# BUDGET OF THE UNITED STATES GOVERNMENT

FISCAL YEAR  
**1989**

## THE BUDGET DOCUMENTS

*Budget of the United States Government, 1989* contains the Budget Message of the President and presents an overview of the President's budget proposals. It includes summary information on the economic assumptions used in the 1989 Budget, Federal receipts, and Federal spending. In addition, it includes supplemental information on the baselines used in the Budget, Federal credit programs, Federal capital expenditures, several topics that help place the budget in perspective, the budget system and concepts, a listing of the Federal program by agency and account, and summary tables.

*United States Budget in Brief, 1989* is designed for use by the general public. It provides a more concise, less technical overview of the 1989 Budget than the above volume, including summary and historical tables on the Federal budget and debt, together with graphic displays.

*Budget of the United States Government, 1989—Appendix* contains detailed information on the various appropriations and funds that constitute the budget. The *Appendix* contains more detailed information than any of the other budget documents. It includes for each agency: the proposed text of appropriation language, budget schedules for each account, new legislative proposals, explanations of the work to be performed and the funds needed, and proposed general provisions applicable to the appropriations of entire agencies or groups of agencies. Supplemental proposals for the current year are presented separately. Information is also provided on certain activities whose outlays are not part of the budget totals.

*Special Analyses, Budget of the United States Government, 1989* contains analyses that are designed to highlight specified program areas or provide other significant presentations of budget data. The first part of this document includes information about two alternative views of the budget; i.e., the current services and Gramm-Rudman-Hollings budget baselines, and the na-

tional income accounts. The second part provides analyses and tabulations of the totals that cover the Federal Government's finances and operation as a whole and reflect the ways in which Government finances affect the economy. Financial information on Federal research and development programs and data on Federal civilian employment are also included in this part.

*Historical Tables, Budget of the United States Government, 1989* provides data on budget receipts, outlays, surpluses or deficits, and Federal debt covering extended time periods—in many cases from 1940-1993. These are much longer time periods than those covered by similar tables in other budget documents. The data in this volume and all other historical data in the budget documents are consistent with the concepts and presentation used in the 1989 Budget, so the data series are comparable over time.

*Management of the United States Government, 1989* includes the President's Management Message and provides the goals and strategies of the President's Management Improvement Program. It reports on the credit management program, the program to improve financial management in executive branch agencies, the President's Productivity Program, the activities of the President's Council on Integrity and Efficiency, and the President's Council on Management Improvement. This document also describes the status of Grace Commission recommendations and the status of debt collection and prompt payment efforts.

*Major Policy Initiatives, 1989* highlights the major policy changes proposed in the 1989 Budget. Each description includes a brief history of the program and the conditions that precipitated the need for change. The President's proposal describes concisely the initiative and, in most examples, presents a summary funding chart that contains the budget authority and outlay changes that would occur if enacted.

Instructions for purchasing copies of any of these documents are on the last two pages of this volume.

### GENERAL NOTES

## EXPLANATION OF ESTIMATES

Part I contains various tables and certain schedules in support of the budget, including explanatory statements of the work to be performed and the money needed, as well as the text of the language proposed for enactment by Congress on each item for which congressional action in an appropriation bill is required. It also contains the text of general provisions of appropriations acts, proposed for enactment by the Congress, that apply to entire agencies or groups of agencies.

### ARRANGEMENT

The chapters of Part I reflect the branches of Government, and the cabinet departments, selected independent agencies, and other activities of the executive branch. Most of the smaller agencies in the executive branch are grouped in one chapter—"Other independent agencies."

Each chapter is organized by major subordinate organizations within the agency (usually bureaus) or by major program area. For each bureau or major program area, *Federal funds*, covering the funds that are not set aside in "trust," precede *trust funds*, covering moneys that are held by the Government in accounts established by law or by trust agreement for specific purposes and designated by law as being trust funds. Within each fund group, accounts with new budget authority in 1989 generally will precede those without such an entry. By law, the Old-Age and Survivors Insurance and Disability Insurance trust funds are outside the budget totals. In this volume, these accounts are presented in a separate chapter, Health and Human Services, Social Security.

The proposed language for *general provisions* of appropriations acts that are applicable to the agency in that chapter appear in a separate section at the end of the chapter. General provisions that apply to specified groups of agencies are placed in the chapter covering the first agency that appears in the respective appropriations act. The general provisions that are Government-wide in scope (identified "Departments, Agencies, and Corporations"), normally contained in the Treasury, Postal Service, and General Government Appropriations Act, are placed at the end of the Executive Office of the President chapter.

An explanation of the types of funds included in the budget may be found in Part 6e, "The Budget System and Concepts," in *The Budget of the United States Government, 1989*.

### FORM OF DETAILED MATERIAL

#### APPROPRIATIONS LANGUAGE

The language proposed for inclusion in the 1989 appropriations acts is printed following the account title. Language for 1988 appropriations, printed in roman type, is used as a base. All language for accounts receiving appropriations in 1988 is based on language included in a continuing resolution for 1988 (Public Law 100-

202). Brackets enclose material that is proposed for deletion; italic type indicates proposed new language. At the end of the final language paragraph, and printed in italics within parentheses, are citations to any relevant authorizing legislation and to the specific appropriations act (as included in the continuing resolution) from which the basic text of the 1988 language is taken. Where appropriate, a note follows the language indicating that the budget authority proposed is for continuing activities for which additional appropriations authorization is or has been proposed. An illustration of proposed appropriations language for 1989 follows:

#### OPERATING EXPENSES

For necessary expenses of the Office of Climate Information, **[\$29,440,000]** *\$28,920,000* of which **[\$150,000]** *\$400,000* shall remain available until expended. (34 U.S.C. 218 et seq.; Department of Government Appropriation Act, 1988.)

#### BASIS FOR SCHEDULES

The 1987 column of this budget generally presents the actual transactions and balances for that year, as recorded in agency accounts.

For 1988, the regular schedules include enacted appropriations. In addition, indefinite appropriations are included on the basis of amounts likely to be required.

The 1989 column of the regular schedules includes proposed appropriations for all programs under existing legislation, including those that require extension or renewal of expiring laws.

Amounts for proposed new legislation are shown generally in separate schedules, following the regular schedules or in budget sequence in the respective bureau. These schedules are headed "Proposed for later transmittal under proposed legislation." Appropriation language is included with the regular schedules, but not with the separate schedules for proposed legislation. Necessary appropriations language will be transmitted later upon enactment of the proposed legislation. In some cases, when the amount requested in the budget is less than the amount required for the program level mandated in existing authorizing legislation (as in the case of certain entitlement programs), the reduced amount is reflected in the proposed appropriation language and the regular schedules. The proposed change in the authorizing legislation may be included in the appropriation language transmitted with the budget or in proposed legislation, to be transmitted separately. In these cases, the words, "Legislative Action Required" appear at the end of the language.

#### PROGRAM AND FINANCING SCHEDULE

This schedule consists of three parts.

In the "Program by activities" section, obligations generally are shown for specific activities or projects. The activity structure is developed individually for each appropriation or fund account to provide a meaningful

presentation of information for the program being financed. That structure is tailored to the individual account and is not uniform across the Government. When the amounts of obligations that are financed from collections credited to an account (reimbursements) are significant, "Reimbursable program" obligations are shown separately from "Direct program" obligations. When the amounts are significant, "Capital investments" are shown separately from "Operating expenses." The last entry "Total obligations," indicates the minimum amount of budgetary resources that must be available to the appropriation or fund account in that year.

The "Financing" section shows the budgetary resources available or estimated to be available to finance the total obligations. First are the amounts of offsetting collections credited to the account. Next are unobligated balances of budgetary resources (that have not expired) brought forward from the end of the prior year. Finally, those amounts that were available for obligation during the year and were not used, but continue to be available, are shown as an unobligated balance available, end of year. That balance is carried forward and usually obligated in a subsequent year. Other adjusting entries may be included. The residual is the new budget authority required to finance the program. Where more than one kind of budget authority is provided, that information is shown. In some cases, the availability of budgetary resources may be restrained by legally binding limitations on obligations for direct loans or for other purposes. Such limitations are usually included in appropriations language.

The "Relation of obligations to outlays" section shows the difference between obligations, which may not be liquidated in the same year in which they are incurred, and outlays. The entry "obligations incurred, net," shows the amount of new obligations incurred in the year, less offsetting collections credited to the account. The amount of obligations that were incurred in previous years but not liquidated, are entered as an obligated balance, start of year. Similarly, an end of year obligated balance is entered. Certain adjusting entries may be included. The residual is the net amount of outlays resulting from the liquidation of obligations incurred in that year and previous years.

The account identification code, found at the head of the program and financing schedule, facilitates computer processing of budgetary information. The last three digits of this code represent the functional category to which the account is classified. Functional classification permits presentation of budget authority and outlays in terms of their purpose, rather than the organization administering the program or the account under which these funds are made available. For example, the 452 at the top of the following schedule indicates that the purpose of the program financed by this appropriation is *Area and regional development*—a subfunction within major function 450, *Community and regional development*. When the outlays from an account are split between two or more subfunctions within a single major function, the code of the major function is used. In those few cases where the outlays from an account are split between two or more functions, a code of 999 is used. A detailed discussion of how Federal programs

are addressed to each identified national need is included in Part 5 of the 1989 Budget. The individual functional categories are identified with each appropriation or fund account in the "Federal Program by Agency and Account" in Part 6f of the Budget.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

Narrative statements present briefly the objectives of the program and the work to be financed primarily for 1989. Measures of expected performance may be included, and the relationship to the financial estimates is described.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a schedule of obligations, according to the following uniform list of object classifications:

10 PERSONAL SERVICES AND BENEFITS	24 Printing and reproduction
11 Personnel compensation	25 Other services
12 Personnel benefits	26 Supplies and materials
13 Benefits for former personnel	30 ACQUISITION OF CAPITAL ASSETS

These object classes reflect the nature of the things or services purchased, regardless of the purpose of the program for which they are used.

Several of the object classes are divided into subclasses—personnel compensation, for example, is shown separately for full-time permanent employees, for other than full-time employees, and for certain other payments.

Except for revolving funds, reimbursable obligations are aggregated in a single line and not identified by object class. Data, classified by object, are illustrated in the following schedule:

99.9 Total obligations .....	30,396	30,590	29,300

When obligations for personnel compensation are shown in the object classification schedule, a personnel summary generally will follow the object classification schedule, as illustrated below:

Personnel Summary			
<b>Direct:</b>			
Total number of full-time permanent positions .....	813	785	741

<b>Reimbursable:</b>			
Total number of full-time permanent positions .....	9	13	14
Total compensable workyears: Full-time equivalent employment .....	8	12	13

Control of Federal civilian employment generally is on a full-time equivalent (FTE) or workyear basis for the executive branch.

**BUSINESS-TYPE BUDGET STATEMENTS**

Business-type budget statements are presented for activities specifically required by the Government Corporation Control Act or similar legislation and generally for other revolving and trust revolving funds conducting business with the public. They are not usually presented for funds conducting business within the Government.

**Statement of Revenue and Expense**

For many revolving funds there is a statement of revenue and expense that shows the resulting net income or loss for the year. This statement usually includes accrued revenue (e.g., revenue earned) and ac-

crued expenditures (e.g., including cost incurred but not yet paid), whether funded or unfunded.

**Statement of Financial Condition**

The statement of financial condition shows assets, liabilities, and Government equity for the fund at the close of each fiscal year. In addition to this information, which is similar to commercial balance sheet data, budget needs also require additional information, shown in the equity section. A disclosure is made of obligations incurred that have not yet accrued into liabilities (undelivered orders) and of budgetary resources for which no funding has been received (unfinanced budgetary resources). Unfinanced budgetary resources include orders from Federal customers that have not been filled (unfilled orders), and unfinanced budget authority in the form of authority to borrow for which borrowing has not taken place, and contract authority for which liquidating cash has not been received. Orders received from the public must be accompanied by advance payment.

**FEDERAL CREDIT SCHEDULES**

As part of an effort to establish systematic control of the levels of Federal credit during any fiscal year, the budget appendix includes annual limitations on the amount of obligations for direct loans and commitments for guaranteed loans in appropriations language for appropriations or funds with credit activity. For those accounts under which Federal credit is extended, schedules for the status of direct loans and the status of guaranteed loans summarize activity for the years shown.

Status of Direct Loans

A direct loan obligation is a legal or binding agreement that results in: (1) a disbursement of funds to a non-Federal entity by a Federal agency (including the Federal Financing Bank on behalf of a Federal agency) that is contracted to be repaid, with or without interest; (2) a purchase of non-Federal loans by a Federal agency through secondary market operations; or (3) a sale of Federal agency assets to a non-Federal entity on credit terms of more than 90 days duration.

Acquisitions of guaranteed non-Federal loans by a Federal agency in satisfaction of default or other guarantee claims are not recorded as new direct loan obligations. However, they are disbursements for guaranteed loan claims (line 1232) in the cumulative balance of loans outstanding section of the schedule on the status of direct loans.

A direct loan obligation is counted against the annual limitation when the principal amount is obligated. Limitations apply to the gross obligations for direct loans, which means the amount obligated during a fiscal year, without reductions for such items as repayments, prepayments, sale of loan assets, defaults, or forgiveness.

For each appropriation or fund with direct loan activity, a schedule is displayed immediately following the program and financing schedule as follows:

1330	Subsidy amount (in dollars).....	1,633	1,120	1,096

<sup>1</sup> Represents an adjustment to the prior year balance of direct loans outstanding.

The subsidy amounts presented in these schedules are the estimated present value of the difference in cost to the borrower between the Federal direct loan or guaranteed loan and alternative private financing available to the same or a similar borrower for the same or a similar purpose.

Status of Guaranteed Loans

A guaranteed loan commitment is a legal or binding agreement that results in a non-Federal debt instrument on which the agency pledges to pay part or all of the amount due to a lender or holder in the event of default by the borrower. Agency guarantees that result in loans that are disbursed by the FFB are counted as *direct loans* of the agency and, therefore, will not be

counted as guaranteed loans. However, the amount of direct loans made in this manner is subject to limitations on loan guarantee commitments of the originating agency. Loan guarantees include agreements in the form of loan insurance, defined as a type of guarantee in which an agency pledges the use of accumulated insurance premiums to secure lenders against default on the part of borrowers.

A guaranteed loan is counted against the annual limitation when a firm commitment is made, i.e., when the Government enters into a guarantee agreement to become effective at such time as the lender meets stipulated pre-conditions. A commitment is reported for every guaranteed loan, even though the commitment and the actual loan guarantee may occur simultaneously. Amounts for limitations and in the schedules are the full principal amounts of loans guaranteed whether guaranteed in full or in part. The amount of the Government's contingent liability is shown as a memorandum entry in the schedule. Limitations apply to the gross commitments for guaranteed loans, which means the amount committed during a fiscal year, without reductions for such items as repayments, prepayments, sale of guaranteed loans, or defaults.

For each appropriation or fund account with guaranteed loan activity, a schedule is displayed following the program and financing schedule (or status of direct loans schedule, if there is one) as follows:

Note.—Excludes \$680 thousand in 1989 for activities transferred to Speaker's Civic Achievement Award Program. Comparable amounts for 1987 (\$0) and 1988 (\$658 thousand) are included above.

Personal services and necessary expenses to provide support for the basic operations of the Library are financed from this appropriation.

*Purchase of books and library materials.*—The Library's collections are acquired through purchase, gift, exchange, copyright deposit, and official deposit. This includes materials in all subjects, except clinical medicine and technical agriculture, for the general collections of the Library and domestic and foreign legal materials for the law library.

*Preparation of books and library materials for use.*—Library materials are cataloged for use and are classified for systematic arrangement on the shelves of the collection. Cataloging data is converted to machine-readable form for use by the Library of Congress, other libraries, and cataloging service agencies. The Network Development and MARC Standards Office plans and coordinates the exchange of bibliographic information among major library cooperatives and research facilities.

**Cataloging distribution service.**—The cataloging distribution service makes available copies of the Library's printed catalog cards, cataloging data in machine-readable form, book catalogs, technical publications, and select bibliographies from the automated data bases.

**Research and reader services.**—Books and other library materials are provided to readers inside and outside the Library, reference, referral and bibliographic assistance is rendered, and custody of the collections is maintained.

**Preservation of library materials.**—Library materials are preserved in their original format by being bound or rebound, or by a variety of conservation techniques. Materials are also preserved by converting them to a more durable form through such means as microfilming, by conversion of nitrate film to safety base film, and by the conversion of deteriorating sound recordings to polyester tape. Scientific research on the preservation of library materials is undertaken.

**Automated systems support.**—Central computer support to all operations of the Library is provided by the Automated Systems Office. This support consists of systems analysis, programming, and operation of central computers, minicomputers and data communication services.

**Optical disk program.**—In 1982 the Library began research in the use of optical disks for image preservation and retrieval with a view to using this advanced technology for the preservation and management of its collections. The program has two aspects: print or textual materials stored on digital optical disks and pictorial materials stored on analog optical disks (videodisks). The Library is actively studying the results gained from the pilot program. It hopes to phase in the new technology in all appropriate activities throughout the organization.

**Central support services.**—This activity supports the executive staff of the Office of the Librarian; exhibit, information, and publication activities; personnel, budget and finance, procurement, buildings management, and other centralized services. It also includes rental of space off Capitol Hill.

**American Folklife Center.**—Public Law 94-201 established the American Folklife Center in the Library of Congress "to preserve and present American folklife" through field documentation, consultancies, research, publishing, exhibition and dissemination of information.

**Deacidification facility.**—Public Law 98-427 authorized the Library of Congress to construct a deacidification facility for the operation of the diethyl zinc preservation process. The funding for this project was provided under Public Law 98-396. The funds are to remain available until expended.

**Civic Achievement Award.**—Public Law 100-158 established the Civic Achievement Award Program in honor of the Office of Speaker of the House of Representatives. The program is to be conducted by the Close Up Foundation in cooperation with the National Association of Elementary School Principals. Funds for the program are to be disbursed to the Foundation by the Librarian of Congress.

The Copyright Office is responsible for registering and recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for publishing complete and indexed catalogs for each class of copyright entries. The Office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and obligations for 1987, and estimates for 1988 and 1989 are as follows:

	1987 actual	1988 est.	1989 est.
<b>Income:</b>			
Gross receipts.....	7,812,841	7,931,000	8,034,000
Estimated value of materials deposited and transferred to the Library of Congress.....	5,456,166	5,570,000	5,700,000
<b>Total income</b> .....	<b>13,269,007</b>	<b>13,501,000</b>	<b>13,734,000</b>
<b>Obligations</b> .....	<b>17,166,724</b>	<b>19,211,000</b>	<b>20,173,000</b>

The effort described under each of the activities are predicated on an estimated 600,000 copyright registrations during 1989, an estimated 590,000 during 1988, and registrations of 582,000 during 1987.

*Receiving and accounting for applications, fees, and correspondence.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act.

*Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recordings of documents to determine whether the provisions of the Copyright Act have been satisfied.

*Indexing and cataloging materials received.*—The Register of Copyrights is required to publish complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available to the public and the Library. It is estimated that for 1989 the number of items to be cataloged will be 600,000.

*Reference service.*—The Copyright Office makes information available to the public concerning the provisions of the Copyright Act, including procedures, policies, and rulings. Information concerning registrations is furnished on a fee basis.

*Publishing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are published and made available to the public.

*General supervision and legal services.*—The work of the Copyright Office includes legal supervision and research into the present copyright law and international copyright relations. It also involves a study of improvement of the domestic law and our international copyright relations.

*Licensing Division.*—The Licensing Division performs the responsibilities connected with the licensing activities of cable television stations and the licensing of jukeboxes.

**Policy analysis and research.**—The Congressional Research Service provides objective, nonpartisan analytical and consultative services to the Members and committees of Congress, assisting them in the analysis, appraisal, and evaluation of any subject matter of legislative concern, including recommendations submitted to the Congress by the Executive Branch. Research services are also provided to assist Congress with its oversight, representative, and other responsibilities. Support takes the form of background studies, in-depth policy analyses, consultations, briefings, legal research, continuous liaison with committees, assistance with committee hearings, public policy seminars for Members and congressional staff, and related data and materials. In order to respond most effectively to the broad range of congressional inquiries, the Service supplements individually tailored products with Issue Briefs, Reports, Committee Prints, and "Info Packs", which are collections of both CRS products and carefully selected materials from outside sources that provide background material on issues of very high congressional interest. Lists of subjects and policy areas that a committee might profitably pursue are periodically made available to each congressional committee. As provided by statute, the Service prepares decennially the Constitution of the United States—Analysis and Interpretation, and supplements at 2-year intervals, prepares compendiums for the annual national high school and college debate topics, and provides assistance to the Congressional Budget Office, the Office of Technology Assessment, and the General Accounting Office.

**Documentation and status of legislation.**—The Service prepares and publishes for distribution to the Congress the Digest of Public General Bills and Resolutions, including summaries of all public bills and resolutions introduced in Congress, the status of bills receiving action, and various pertinent indexes. Upon request, the Service prepares legislative history memorandums on bills for which hearings have been announced, and compiles and makes available to each committee reports on legislatively authorized programs and activi-

ties within that committee's jurisdiction that are scheduled to terminate during the current Congress.

**Information and reference service.**—The Congressional Research Service provides extensive information and reference assistance to Members and committees. Reference files containing clippings, pamphlets, and documents and automated information services are maintained for rapid information retrieval. Lists of selected reports, prepared by CRS staff on legislative issues, are regularly distributed to congressional offices. To provide faster responses and in-person services, the Service also maintains reference centers in congressional office buildings and the Congressional Reading Rooms in the Madison and Jefferson Buildings of the Library of Congress.

**Executive direction and support.**—Providing overall supervision and administrative support to the entire Congressional Research Service is the responsibility of the Office of the Director and the administrative personnel.

The Office of the Superintendent of Documents operates under a separate appropriation which provides funds for: (1) the mailing for Members of Congress and other Government agencies of certain Government publications, as authorized by law; (2) the distribution of Government publications to designated depository libraries; (3) the compilation of catalogs and indexes of Government publications; and (4) beginning in 1987, the International Exchange Program which previously had been charged to the establishment issuing the publication. These four functions are related to the publication activity of other agencies and to the demands of the public, Members of Congress, and depository libraries. Consequently, the Office of the Superintendent of Documents can exercise little control over the volume of work which it may be called upon to perform. A description of these four functions follows:

*Distribution for other Government agencies and Members of Congress.*—The Office of Superintendent of Documents maintains mailing lists and mails, at the request of Government agencies and Members of Congress, certain publications specified by public law.

*Depository library distribution.*—As required, Government publications are supplied to libraries which are designated as depositories for Government publications.

*Cataloging and indexing.*—The Office of Superintendent of Documents is charged with preparing catalogs and indexes of all publications issued by the Federal Government. The principal publication is the "Monthly Catalog of U.S. Government Publications."

*International exchange.*—The Office of Superintendent of Documents distributes Government publications to foreign governments which agree, as indicated by the Library of Congress, to send to the United States similar publications of their governments for delivery to the Library of Congress.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. The Government Printing Office also sells publications to the public through its sales of publications program.

All such work is financed through the Government Printing Office revolving fund (44 U.S.C. 309). The fund is reimbursed by the customer agencies, receipts from sales of publications to the general public, and, except for the excess of receipts over costs associated with the sale of publications to the public, net operating income is retained for reuse by the fund.

The U.S. Tax Court hears and decides cases involving Federal income, estate and gift tax deficiencies and excise taxes relating to public charities, private foundations, qualified pension plans, real estate investment trusts, and windfall profit tax on domestic crude oil. It also renders declaratory judgments regarding the qualification or continuing qualification (including revocations of rulings on the exemptions) of retirement plans.

The Tax Court has jurisdiction to render declaratory judgments with respect to exempt organization status determinations pursuant to section 501(c)(3), Internal Revenue Code, and to enter declaratory judgments on the tax treatment of interest on proposed issues of Government obligations. In addition, the court has jurisdiction over actions to restrain disclosure and to obtain additional disclosure with respect to public inspection of written determinations issued by the Internal Revenue Service, and actions to compel the disclosure of the identity of third-party contacts relating to written determinations made by the Internal Revenue Service.

For 1989, the court proposes a trial program of 400 weeks consisting of 230 weeks of regular trial sessions and 170 weeks of small tax case sessions. Trials are held in approximately 80 cities throughout the United States.

The actual and estimated work volume of the court is presented in the following tabulation:

This fund, established under 26 U.S.C. 7448, is used to pay survivorship benefits to eligible surviving spouses and dependent children of deceased judges of the U.S. Tax Court. Participating judges pay 3.5 percent of their salaries or retired pay into the fund to cover creditable service for which payment is required. Additional funds as are needed are provided through the annual appropriation to the U.S. Tax Court.

On September 30, 1987, 25 judges of the court were participating in the fund, and 3 eligible widows were receiving survivorship annuity payments.

Sec. 304. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

(c) The pay for each position described in subsection (b) shall be the pay payable for such position with respect to the last pay period before this section takes effect, subject to any applicable adjustment during fiscal year 1988 under, or by reference to any applicable adjustment during fiscal year 1988 under, subchapter I of chapter 53 of title 5, United States Code.

Sec. 310. The provision of law which was derived from section 80 of the Revised Statutes and which currently is carried as the second sentence of section 131 of title 2, United States Code, is hereby repealed. ]

Sec. 311. (a) The first sentence of section 4(a) of Public Law 91-656 (2 U.S.C. 60a-1) is amended by striking out the period at the end and inserting “and adjust the rates of such personnel by such amounts as necessary to restore the same pay relationships that existed on December 31, 1986, between personnel and Senators and between positions.”

(b) Section 4(d) of such public law is amended by striking out the period at the end and inserting “, except in cases in which it is necessary to restore and maintain the same pay relationships that existed on December 31, 1986, between personnel and Senators and between positions.”

(c) Notwithstanding any other provision of this Act or any other provision of law, subsections (a) and (b) of this section shall be effective in the case of pay orders issued by the President pro tempore of the Senate on or after January 1, 1988.

(d) Notwithstanding any other provision of this Act, or any other provision of law, rule, or regulation, hereafter each time the President pro tempore of the Senate exercises any authority pursuant to any of the amendments made by this section with respect to rates of pay or any other matter relating to personnel whose pay is disbursed by the Secretary of the Senate, the Speaker of the House of Representatives may, with respect to personnel whose pay is disbursed by the Clerk of the House of Representatives, exercise the same authority to the extent necessary to ensure parity of treatment between personnel of the respective Houses of Congress having comparable duties and responsibilities. ] (*Legislative Branch Appropriations Act, 1988.*)

(b) Notwithstanding section 9(b) of Public Law 92-392 or section 704(b) of Public Law 95-454, subsection (a) of this section shall apply (in such manner as the Office of Personnel Management shall prescribe) to any prevailing rate employee to whom such section 9(b) applies.

[(g)] (h) Nothing in this section may be construed to permit or require the payment to any employee covered by this section at a rate in excess of the rate that would be payable were this section not in effect.

[(h)] (i) The Office of Personnel Management may provide for exceptions to the limitations imposed by this section if the Office determines that such exceptions are necessary to ensure the recruitment or retention of qualified employees.

Sec. 614. None of the funds made available in this Act may be used to plan, implement, or administer (1) any reduction in the number of regions, districts or entry processing locations of the United States Customs Service; or (2) any consolidation or centralization of duty assessment or appraisal functions of any offices in the United States Customs Service.]

Sec. [617] 614. Funds appropriated in this or any other Act may be used to pay travel to the United States for the immediate family of employees serving abroad in cases of death or life threatening illness of said employee.

Sec. [618] 615. (a) None of the funds appropriated by this Act, or any other Act in this or any fiscal year hereafter, may be used in preparing, promulgating, or implementing any regulations relating to the Combined Federal Campaign if such regulations are not in conformance with subsection (b).

(b)(1)(A) Any requirements for eligibility to receive contributions through the Combined Federal Campaign shall not, to the extent that such requirements relate to litigation, public-policy advocacy, or attempting to influence legislation, be any more restrictive than any requirements established with respect to those subject matters under section 501(c)(3) or 501(h) of the Internal Revenue Code of 1986.

(B) Any requirements for eligibility to receive contributions through the Combined Federal Campaign shall, to the extent that such requirements relate to any subject matter other than one referred to in subparagraph (A), remain the same as the criteria in the 1984 regulations, except as otherwise provided in this section.

(C) Notwithstanding any requirement referred to in subparagraph (A) or (B), for purposes of any Combined Federal Campaign—

(i) any voluntary agency or federated group which was a named plaintiff as of September 1, 1987, in a case brought in the United States District Court for the District of Columbia, and designated as Civil Action No. 83-0928 or 86-1367, and

(ii) The Federal Employee Education and Assistance Fund, shall be considered to have national eligibility.

(D) Public accountability standards shall remain similar to the standards which were by regulation established with respect to the 1984-1987 Combined Federal Campaigns, except that the Office of Personnel Management shall prescribe regulations under which a voluntary agency or federated group which does not exceed a certain size (as established under such regulations) may submit a copy of an appropriate Federal tax return, rather than complying with any independent auditing requirements which would otherwise apply.

(2)(A) A voluntary agency or federated group shall, for purposes of any Combined Federal Campaign in any year, be considered to have national eligibility if such agency or group—

- (i) complies with all requirements for eligibility to receive contributions through the Combined Federal Campaign, without regard to any requirements relating to "local presence"; and
- (ii) demonstrates that it provided services, benefits, or assistance, or otherwise conducted program activities, in—

(I) 15 or more different States over the 3-year period immediately preceding the start of the year involved; or

(II) several foreign countries or several parts of a foreign country.

For purposes of this subparagraph, an agency or federated group shall be considered to have conducted program activities in the required number of States, countries, or parts of a country, over the period of years involved, if such agency or group conducted program activities in such number of States, countries, or parts either in any single year during such period or in the aggregate over the course of such period, provided that no State, country, or part of a country is counted more than once.

(B) Notwithstanding any other provisions, eligibility requirements relating to International Services Agencies shall remain at least as inclusive as existing requirements. Any voluntary agency or federated group which attains national eligibility under subparagraph (A), and any voluntary agency which is a member of the International Services Agencies, shall be considered to have satisfied any requirements relating to "local presence".

(3)(A) If a federated group is eligible to receive donations in a Combined Federal Campaign, whether on a national level (pursuant to certification by the Office) or a local level (pursuant to certification by the local Federal coordinating committee), each voluntary agency which is a member of such group may, upon certification by the federated group, be considered eligible to participate on such national or local level, as the case may be.

(B) Notwithstanding any provision of subparagraph (A)—

(i) the Office may require a voluntary agency to provide information to support any certification submitted by a federated group with respect to such agency under subparagraph (A); and

(ii) if a determination is made, in writing after notice and opportunity to submit written comments, that the information submitted by the voluntary agency does not satisfy the applicable eligibility requirements, such agency may be barred from participating in the Combined Federal Campaign on a national or local level, as the case may be, for a period not to exceed 1 campaign year.

(4) The Office shall exercise oversight responsibility to ensure that—

(A) regulations are uniformly and equitably implemented in all local combined Federal campaigns;

(B) federated groups participating in a local combined Federal campaign are allowed to compete fairly for the role of principal combined fund organization;

(C) federated groups participating in a local combined Federal campaign are afforded—

(i) adequate opportunity to consult with the PCFO for the area involved before any plans are made final relating to the

design or conduct of such campaign (including plans pertaining to any materials to be printed as part of the campaign);

(ii) adequate opportunity to participate in campaign events and other related activities; and

(iii) timely access to all reports, budgets, audits, and other records in the possession of, or under the control of, the PCFO for the areas involved; and

(D) a federated group or voluntary agency found by the Office, by a written decision issued after notice and opportunity to submit written comments, to have violated the regulations may be barred from serving as a PCFO for not to exceed 1 campaign year.

(5) The Office shall prescribe regulations to ensure that PCFOs do not make inappropriate delegations of decision-making authority.

(6)(A) The Office shall, in consultation with federated groups, establish a formula under which any undesignated contributions received in a local combined Federal campaign shall be allocated in any year.

(B) Under the formula for the 1990 Combined Federal Campaign, all undesignated contributions received in a local campaign shall be allocated as follows:

(i) 82 percent shall be allocated to the United Way.

(ii) 7 percent shall be allocated to the International Services Agencies.

(iii) 7 percent shall be allocated to the National Voluntary Health Agencies.

(iv) 4 percent shall, after fair and careful consideration of all eligible federated groups and agencies, be allocated by the local Federal coordinating committee among any or all of the following:

(I) National federated groups (other than any identified in clauses (i), (ii), or (iii)), except that a national federated group shall not be eligible under this subclause unless there are at least 15 members of such group participating in the local campaign, unless the members of such group collectively receive at least 4 percent of the designated contributions in the local campaign, and unless such group was granted national eligibility status for the 1987, 1988, 1989, or 1990 Combined Federal Campaign.

(II) Local federated groups.

(III) Any local, non-affiliated voluntary agency which receives at least 4 percent of the designated contributions in the local campaign.

(C) The formula set forth in subparagraph (B)—

(i) shall be phased in over the course of the 1988 and 1989 Combined Federal Campaigns;

(ii) shall be fully implemented with respect to the 1990 Combined Federal Campaigns; and

(iii) shall, with respect to any Combined Federal Campaign thereafter, be adjusted based on the experience gained in the Combined Federal Campaigns referred to in clauses (i) and (ii).

(D) Nothing in this paragraph shall apply with respect to any campaign conducted in a foreign country.

(E) All appropriate steps shall be taken to encourage donors to make designated contributions.

(7) The option for a donor to write in the name of a voluntary agency or federated group not listed in the campaign brochure to receive that individual's contribution in a local campaign shall be eliminated.

(8) The name of any individual making a designed contribution in a campaign shall, upon request of the recipient voluntary agency or federated group, be released to such agency or group, unless the contributor indicates that his or her name is not to be released. Under no circumstance may the names of contributors be sold or otherwise released by such agency or group.

(9)(A) The name of each participating voluntary agency and federated group, together with a brief description of [their] its respective programs, shall be published in any information leaflet distributed to employees in a local combined Federal campaign. Agencies shall be arranged by federated group, with combined Federal campaign organization code numbers corresponding to each such agency and group.

(B) The requirement under subparagraph (A) relating to the inclusion of program descriptions may, at the discretion of a local Federal coordinating committee, be waived for a local campaign in any year if, in the immediately preceding campaign year, contributions received through the local campaign totaled less than \$100,000.

(10) Employee coercion is not to be tolerated in the Combined Federal Campaign, and protections against employee coercion shall be strengthened and clarified.

(11) The Office—

(A) may not, after the date of the enactment of this Act, grant national eligibility status to any federated group unless such group has at least 15-member voluntary agencies, each of which meets the requirements for national eligibility under paragraph (2)(A); and

(B) may withdraw federation status from any federated group for a period of not to exceed 1 campaign year if it is determined, on the record after opportunity for a hearing, that the federated group has not complied with the regulatory requirements.

(12) The Office may bar from participation in the Combined Federal Campaign, for a period not to exceed 1 campaign year, any voluntary agency which the Office determines, in writing, and after notice and opportunity to submit written comments, did not comply with a reasonable request by the Office to furnish it with information relating to such agency's campaign accounting and auditing practices.

(c) For purposes of this section, a voluntary agency or federated group having "national eligibility" is one which is eligible to participate in each local domestic combined Federal campaign.

The loans, bonds, notes or other obligations are hereinafter referred to as the "private loans": *Provided*, That such guaranties which are transferred or are made pursuant to paragraph (a) shall cover no more and no less than ninety percent of the private loan or any portion or derivative thereof plus unpaid accrued interest and arrearages, if any, outstanding at the time of guaranty transfer or extension: *Provided further*, That the total amount of the guaranty of the private loan cannot exceed ninety percent of the outstanding principal, unpaid accrued interest and arrearages, if any, at any time: *Provided further*, That of the total amount of the private loan, the ninety percent guaranteed portion of the private loan cannot be separated from the private loan at any time: *Provided further*, That no sums in addition to the payment of the outstanding principal amounts maturing after September 30, 1989 of the loan (or advance), plus unpaid accrued interest thereon, and arrearages, if any, shall be charged by the private lender or the Federal Financing Bank as a result of such prepayment against the borrower, the guarantor, or the Guaranty Reserve Fund (GRF), except that the private lender may include, in the interest rate charged, a standard fee to cover costs, such fee which will be set at prevailing market rates, and no guaranty fee shall be charged on guaranties transferred or issued pursuant to this provision: *Provided further*, That the terms of guaranties transferred or issued under this paragraph shall be exactly the same as the existing loans or guaranties, except as modified by this paragraph and including but not limited to the final maturity and principal and interest payment structure of the existing loans which shall not be altered, except that the repayments of the private loan issued debt may be consolidated into two payments per year: *Provided further*, That the private loan or guaranties transferred or issued pursuant to this paragraph shall be fully and freely transferable, except

that any guaranty transferred or extended shall cease to be effective if the private loan or any derivative thereof is to be used to provide significant support for any non-registered obligation: *Provided further*, That for purposes of sections 23 and 24 of the Arms Export Control Act (AECA), the term "defense services" shall be deemed to include the refinancing of FMS debt outstanding at the date of the enactment of this Act: *Provided further*, That not later than ninety days after the enactment of this Act, the Secretary of the Treasury (Secretary) shall issue regulations to carry out the purposes of this heading and that in issuing such regulations, the Secretary shall (1) facilitate the prepayment of loans and loan advances hereunder, (2) provide for full processing of each application within thirty days of its submission to the Secretary, and (3) except as provided in section 24(a) of the AECA, impose no restriction that increases the cost to borrowers of obtaining private financing for prepayment hereunder or that inhibits the ability of the borrower to enter into prepayment arrangements hereunder: *Provided further*, That the Secretary of State shall transmit to the Committee on Foreign Affairs of the House of Representatives, the Committee on Foreign Relations of the Senate, and the Committees on Appropriations of the House of Representatives and Senate, a copy of the text of any agreement entered into pursuant to this section not more than thirty days after its entry into force, together with a description of the transaction.]

[(b) INTEREST RATE REDUCTION.—Notwithstanding any other provision of law, there is hereby appropriated such sums as may be necessary, but not more than \$270,000,000, to be made available after October 1, 1988 to the Secretary of Defense for the Defense Security Assistance Agency for deposit into a new account, to remain available until expended: *Provided*, That the funds shall be used solely for the purpose of lowering the interest rate on Foreign Military Sales (FMS) credits which were financed through the Federal Financing Bank (FFB) for countries which do not refinance one or more FFB loans pursuant to paragraph (a) of this heading, and which loans have interest rates exceeding ten percent, down to an interest rate of ten percent for the remaining life of such loans: *Provided further*, That these funds shall be available only subject to a Presidential budget request: *Provided further*, That it is the intent of the Congress that these funds shall be available to all countries having FMS credits from the FFB that carry interest rates in excess of ten percent.]

[(c) ARREARAGES.—(1) None of the funds provided pursuant to the Arms Export Control Act (relating to Foreign Military Sales credits) or pursuant to chapter 2 of part II of the Foreign Assistance Act (relating to the Military Assistance program) shall be made available to any country for which one or more loans is refinanced pursuant to paragraph (a) of this heading and which is in default for a period in excess of ninety days in payment of principal or interest on (A) any loan made to such country guaranteed by the United States pursuant to paragraph (a) of this heading, and (B) any other loan issued pursuant to the Arms Export Control Act outstanding on the date of enactment of this provision.

[(2) In conjunction with any interest rate reduction pursuant to the authority provided in paragraph (b) of this heading, the President shall require the country to commit in writing that within two years of the effective date of the interest rate reduction it will be no more than ninety days in arrears on the repayment of principal and interest on all loans for which the interest rate is thus reduced and will remain no more than ninety days in arrears for the remaining life of all such loans. None of the funds provided pursuant to the Arms Export Control Act or chapter 2 of part II of the Foreign Assistance Act shall be made available to any country during any period in which it fails to comply with such commitment.]

The International Development Association (IDA), a member of the World Bank Group, provides development financing on highly concessional terms to the world's poorest nations. IDA is the largest source of multilateral lending extended on concessional terms to developing countries. Projects have to meet the same economic and financial standards as other World Bank projects and there has never been a default on an IDA loan by any borrower.

By June 30, 1987, IDA had extended credits totaling \$43.3 billion for development projects in 85 countries. IDA assistance is concentrated overwhelmingly in the poorest countries—mainly those with an annual per capita gross national product of less than \$400 in 1985 dollars. In 1987, IDA's lending program included 108 credits to 38 countries for a total of \$3.1 billion.

The Eighth Replenishment of IDA will provide resources of nearly \$12.5 billion. The United States has pledged \$2.875 billion to the replenishment and the \$958.3 million requested in 1989 is for payment toward the second installment on that contribution.

**Functional development assistance.**—Program provides economic resources to developing countries with the aim of bringing the benefits of development to the poor. Loans and grants under this program are concen-

trated in those areas in which the United States has special expertise and which promise the greatest opportunity for the poor to better their lives.

Funds are provided under eight separate activities:

**Agriculture, rural development, and nutrition.**—Supports efforts to increase food production in the developing countries by improving the productivity and income of small farmers, creating greater rural employment opportunities, enhancing rural infrastructure and the environment, improving nutrition and removing impediments to equitable economic growth.

**Population planning.**—Supports efforts to reduce population growth rates in developing countries and to provide families with effective options in choosing the number and spacing of their children.

**Health.**—Assists developing countries to increase access to health care, family planning and nutrition services, to make safe water and adequate sanitation more widely available, to reduce the incidence of debilitating tropical diseases, malnutrition, diarrheal infections, measles and other preventable diseases, and to increase governmental capacity to plan and manage their health resources.

**Child survival fund.**—Provides funds for programs designed to deal directly with the special health needs of children and mothers. Includes oral rehydration therapy to combat diarrheal diseases, immunization and other primary health care efforts aimed at cutting in half infant and child mortality rates in developing countries.

**Education and human resources.**—Supports the efforts of developing countries to provide basic education for children, improve the fundamental life skills of adults, and improve the management skills and performance of managers of development programs.

**Private sector, environment and energy.**—Provides assistance to developing countries to better contend with national energy problems, to cope with employment and income problems in urban areas, to mitigate the problems of rapid urban migration, and to improve environmental management and resource planning. This activity also facilitates the involvement of U.S. private voluntary organizations in development and helps improve access by developing countries to U.S. scientific and technical expertise.

**Science and technology.**—Supports new and innovative research on problems of development and assists developing countries in improving their scientific and technological capacities.

**AIDS.**—Provide assistance for the prevention and control of AIDS through the World Health Organization (WHO) Special Programme on AIDS and through bilateral activities in AID-assisted countries in support of country programs designed in conjunction with WHO.

Resources are used in both project and non-project modes to address shared development program and policy commitments of reform-minded African leaders. The account assures availability of resources for Africa and provides greater flexibility in supporting the objective of growth with equity in Africa. TRADE CREDIT INSURANCE PROGRAM

During fiscal year [1988, total] 1989, commitments to guarantee or insure loans for the "Trade Credit Insurance Program" may be made only to the extent that the total loan principal, any part of which is to be guaranteed, shall not exceed \$200,000,000 [of contingent liability for loan principal]. (Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1988.)

The Trade Credit Insurance Program is a secondary guarantee program designed to promote recovery of the private export sector in Central America. Given the continuation of the weak financial position of the Central American economies, which limits their access to the Export-Import Bank's regular credit programs, new authority of \$200 million to commit to guarantee or insure loans is sought for 1989.

The Housing guaranty program extends guaranties to assist developing countries in formulating and executing sound housing and community development policies that meet the needs of lower income groups. Activities to be carried out will emphasize: (1) sites and services and core housing projects providing homesites and shelter for poor families; (2) slum upgrading projects designed to conserve and improve existing shelter; (3) low-income shelter projects designed for demonstration or institution building purposes; and (4) project-related community facilities and services. A new sector policy is being adopted in 1988 to encourage more rapid utilization of funds. A program level of \$100 million is adequate in 1989 given the need to implement the large pipeline of authorized but uncontracted commitments. The borrowing authority in 1989 is to replenish the Housing Guaranty reserve, depleted as a result of increased loan reschedulings.

The private sector revolving fund, capitalized by transfers from development assistance accounts, expands the AID private sector initiative through new financing mechanisms and support of business activities. Loans are made to local private sector firms and credit institutions in developing countries. Beginning in 1989, the Administration proposes to provide loan guarantees in addition to direct loans in order to expand the program's impact.

Section 608 of the Foreign Assistance Act of 1961 created a revolving fund to finance the acquisition and rehabilitation at minimal cost of U.S. Government-owned excess property for purchase by friendly countries and eligible organizations, for use in conjunction with economic development programs. Excess property includes heavy construction equipment, vehicles, heavy machinery, electrical generating equipment, and medical equipment and supplies. The program is self-financed from service fees and reimbursements by equipment purchasers ultimately funded from development assistance appropriations to the Agency for International Development.

The Overseas Private Investment Corporation encourages the participation of United States private capital and skills in the economic and social development of less developed friendly countries. Its primary programs are: (1) political risk insurance against losses due to expropriation, inconvertibility, and war damage; and (2) investment financing through loans and guaranteed loans. The Corporation operates on a self-sustaining basis. The budget for fiscal years 1988 and 1989 includes funds to support the administration's initiatives in two new areas—encouraging investment policy reform in less developed countries and promotion of the private political risk insurance industry.

Established by the U.S. Congress in 1980 to provide direct assistance to Africa's disadvantaged populations, the African Development Foundation (ADF) became operational in 1984. The Foundation is authorized to provide grants, loans and loan guarantees directly to self-help development initiatives with evident potential for expanding development opportunities and generating a positive impact on the living standards and conditions of the people. Organizations receiving support from the Foundation must, therefore, demonstrate their commitment to this approach by encouraging the substantive participation of the poor in all phases of the development process, particularly in the design, implementation and management of projects.

ADF is currently funding development projects and research in 23 African countries in the regions of the Sahel/North Africa; West Africa; West/Central Africa; East Africa; and, Southern Africa.

As of September 30, 1987, the current dollar value of the U.S. quota denominated in Special Drawing Rights (SDR), the IMF's unit of account, was \$22,929 million.

Use by the IMF of the quota commitment does not result in net budget outlays because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars to the IMF under the U.S. quota subscription. The United States can use these reserves automatically to meet a balance of payments financing need.

As of September 30, 1987, U.S. claims on the IMF under the Supplementary Financing Facility had declined to SDR 505 million (\$647 million) as a consequence of repayments by the IMF.

Members of the IMF are obligated to maintain the value of their currency, held by the IMF, in terms of the SDR—the unit of account of the IMF. When the dollar appreciates (depreciates) against the SDR, the cost of maintaining these holdings decreases (increases), and an appropriate adjustment is made in the U.S. account with the IMF. In fiscal year 1987, the maintenance of value adjustment resulted in an increase in the dollar value of IMF dollars holdings equivalent to \$1,196 million. Budget authority is provided for the maintenance of value adjustment, but this adjustment does not result in any immediate cash transfers to the IMF.

The Supplementary Financing Facility was created to augment temporarily the ability of the IMF to assist member countries with serious balance of payments problems, thereby allowing these countries time to implement required policy measures without resorting to abrupt and harmful restrictions on trade and payments. The United States and other countries agreed to finance the facility by making available to the IMF lines of credit totaling 7,784 Special Drawing Rights (about

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. Each participant agreed to provide specific amounts of its currency to help finance drawings from the IMF by another GAB participant. GAB members agreed in early 1983 to increase their financial commitments to the GAB and to allow the IMF, in certain strictly defined circumstances, to activate the GAB to provide financing for any IMF member. Total GAB commitments were increased from SDR 6.3 billion to SDR 17 billion, with the U.S. share rising from \$2.0 billion to SDR 4.250 billion, approximately \$5.4 billion at the September 30, 1987 exchange rate. Financing extended by the United States under the GAB does not result in any net budget outlays because the United States receives an increase in its international reserve assets corresponding to any transfer to the IMF under the U.S. credit line.

During 1987, no calls were made on the U.S. commitment under the GAB, and no U.S. loans were outstanding at the end of the fiscal year.

#### 【HUMAN RIGHTS IN CUBA】

【SEC. 574. (a) The Congress finds that—

(1) the United Nations was established in 1945 for, among other purposes, the promotion and encouragement of respect for human rights and fundamental freedoms for all;

(2) the United Nations Human Rights Commission was established by the Economic and Social Council in 1946 to investigate and make recommendations concerning the violation of human rights and fundamental freedoms;

(3) the Government of Cuba has engaged in systematic and flagrant abuses of basic human rights and freedoms so offensive that they demand universal condemnation, including—

(A) the arbitrary arrest and prolonged imprisonment of individuals accused of political opposition to the Government of Cuba for engaging in such activities as the open or private expression of political opinions or religious beliefs, the attempt to form independent labor unions, the possession, reproduction, or intended distribution of religious or political literature, including the Universal Declaration of Human Rights, or even the professional representation by legal counsel of those so accused;

(B) the murder of political prisoners while in custody or the execution of individuals sentenced to death for political offenses;

(C) the reported systematic use of physical and psychological torture and the degrading and abusive treatment of political prisoners, especially the plantados—those who refuse out of conscience to participate in so-called political rehabilitation programs;

(D) the institutionalized use of a network of neighborhood informants organized by political “block committees” or so-called “Committees for the Defense of the Revolution” to repress the exercise of any freedom of expression and to otherwise control the behavior of citizens through intimidation;

(E) the repression of the independent Committee for Human Rights in Cuba for its attempt to register as a legal organization under the laws of the State, and the reported arrest, disappearance, or death of members of the Committee, and the continuing persecution of its president who has had to seek the safety of a foreign embassy out of fear for his life and continues to be deprived of the right to leave Cuba or to be reunited with his family; and

(F) the expulsion from Cuba of foreign journalists for having attempted to interview Cuban citizens and report objectively on the human rights situation in that country; and

(4) the Congress further recognizes that the United Nations has consistently failed to address the violation of fundamental human rights and freedoms in Cuba.]

[(b) It is the sense of Congress that—

(1) the United Nations and the United Nations Human Rights Commission have acted selectively and inconsistently in addressing violations of basic human rights in various countries;

(2) the United Nations General Assembly and the United Nations Human Rights Commission have failed to responsibly address the deplorable human rights situation in Cuba despite overwhelming evidence of the continuing disregard and systematic abuse of the most basic human rights by the Government of Cuba;

(3) the President, the Secretary of State, and the Permanent Representative of the United States to the United Nations are to be commended for their efforts to place Cuba on the human rights agenda of the United Nations and are strongly encouraged to continue in their efforts to bring this issue to the attention of the United Nations;

(4) the following countries are to be commended for their courageous vote in favor of considering human rights violations in Cuba, particularly in light of the thinly veiled threats of the Cuban delegation: Austria, Australia, Belgium, Costa Rica, France, Gambia, the Federal Republic of Germany, Iceland, Italy, Japan, Lesotho, Liberia, Norway, the Philippines, Somalia, Togo, and the United Kingdom;

(5) member states of the United Nations Human Rights Commission interested in democracy in the region, particularly Mexico, Spain, Peru, Venezuela, Argentina, and Colombia, should support the United States resolution on Cuban human rights at the next session of the United Nations Human Rights Commission, and that the United States should take into account this vote in determining United States bilateral and other assistance to all countries which are members of the Commission;

(6) the United States should continue to emphasize how other countries vote on fundamental issues such as human rights when determining financial support for the United Nations, including the contribution to the Human Rights Commission; and

(7) the United Nations Human Rights Commission, which will hold its forty-fourth session in Geneva, Switzerland, in 1988 should include among the highest priorities of its human rights agenda consideration of human rights violations in Cuba.]

[(b) DEFINITION.—For purposes of this section, the term “international financial institution” includes—

(2) if obligated before such date as assistance for such country, shall not be disbursed, and

#### 【UNITED STATES POLICY TOWARD CHILE】

【SEC. 577. (a) The Congress finds that—

(1) genuine democracy and internal stability best guarantee the long-term security and economic well-being of Chile;

(2) the 14-year period of military rule under General Augusto Pinochet has been a deviation from the traditional, apolitical role of the Chilean Armed Forces which had proudly carried out its security responsibilities as an arm of democratic governments for approximately 150 years, thus fundamentally assisting Chile to be a Latin American model of democracy;

(3) continued rule by a military leader after 1989 will be likely to bolster the position of the Communists, enhance the appeal of the Communist opposition's more radical and violent approach to political activity, and further the growing political polarization in Chile;

(4) the United States Government has actively supported a democratic transition in Chile, condemned violence from all sides, urged dialog between the government and democratic opposition leaders leading to a broad consensus on a transition to full democracy, and has also promoted increased respect for human rights in Chile;

(5) the United States has voiced legitimate concern regarding the failure of the Chilean Government to cooperate with the prosecution of those indicted for the 1976 assassination of former Chilean diplomat Orlando Letelier and American citizen Ronni Moffitt, and to bring to justice those members of government security forces reported to have beaten and set fire on Carmen Gloria Quintana and Rodrigo Rojas de Negri;

(6) on August 1, 1978, a United States Federal grand jury indicted three members of the Chilean intelligence service, General Manuel Contreras, Captain Armando Fernandez Larios, and Colonel Pedro Espinoza, for conspiracy in the September 21, 1976, murders of Orlando Letelier and Ronni Karpen Moffitt; Armando Fernandez Larios affirmed the grand jury indictment in his February 4, 1987, testimony before the United States District Court in Washington, District of Columbia;

(7) free elections and democratic government are conditions which lead to public accountability and thus to observance of human rights in Chile and all other countries;

(8) the Universal Declaration of Human Rights determines free elections to be a basic human right and states that the "will of the people shall be the basis of government; this will shall be expressed in equal suffrage and shall be held by secret vote or by equivalent voting procedures";

(9) the United States believes that a free, fair and open election which offers a clear choice of candidates and political views is the best formula for choosing democratic leaders and insuring a peaceful transition to democracy in Chile; and

(10) the United States, in view of longstanding friendly ties between the American and Chilean people, recognizes that only the Chilean people can bring about a transition to democracy but wishes to encourage a situation in which a return to fully functioning democracy will occur in the near future and in which the Chilean people will have the opportunity to elect democratically their own leaders.】

【(b) The Congress hereby—

(1) looks forward to the early return of the Chilean Armed Forces to its traditional role as a pillar of strength in the support of democracy in Chile; and

(2) calls upon the Government of Chile to make appropriate compensation to the members of the Letelier and Moffitt families and urges the Chilean Government to make available for trial in the United States or bring to justice in Chile Manuel Contreras and Pedro Espinoza for their involvement in the assassination and subsequent coverup of their role in the 1976 car bombing of Orlando Letelier and Ronni Karpen Moffitt; and

(3) strongly urges that the Government of Chile takes steps to—

(A) assure that military rule in Chile ends at least by 1989;

(B) ensure that the next democratically elected president of Chile is chosen from civilian candidates who offer a clear choice of political views;

(C) facilitate and assure voting procedures for the electoral process which are genuinely fair and based upon universal and equal suffrage with broad participation and which ensure that the vote will be accurately counted and subject to independent verification;

(D) in accord with past Chilean traditions, such clear and agreed upon procedures should be established well in advance of any electoral act so that all Chileans can be confident that the vote will be accurately counted and subject to independent verification; and

(E) ensure that prior to any electoral process, freedom of assembly and expression are fully restored and nonviolent government opponents are given early and fair access to every means of communication, including television.】

The authority of this section shall expire on September 30, 1989."】

#### 【COOPERATIVE TRAINING AGREEMENTS WITH MAJOR NON-NATO ALLIES】

【SEC. 580. Section 21(g) of the Arms Export Control Act is amended—

(1) by inserting "and with other countries which are major non-NATO allies," after "New Zealand,"; and

#### 【ASSISTANCE FOR POLAND】

【SEC. 581. #### 【MAINTENANCE OF MILITARY BALANCE OF EASTERN MEDITERRANEAN】

【SEC. 582. (a) UNITED STATES POLICY.—The Congress intends that excess defense articles be made available under this section consistent with the United States policy, established by section 620C of the Foreign Assistance Act of 1961, of maintaining the military balance in the eastern Mediterranean.】

【(b) MAINTENANCE OF BALANCE.—Accordingly, the President shall ensure that, for each fiscal year, the ratio of—

(1) the value of excess defense articles made available for Turkey under this section, to

(2) the value of excess defense articles made available for Greece under this section, closely approximates the ratio of—

(A) the amount of military assistance and financing provided for Turkey, to

(B) the amount of military assistance and financing provided for Greece.】

【(c) EXCEPTION TO REQUIREMENT.—Subsection (b) shall not apply if either Greece or Turkey ceases to be eligible to receive excess defense articles.】

【IMPORT ASSISTANCE FOR CBI BENEFICIARY COUNTRIES AND THE PHILIPPINES】

【SEC. 583. (a) For the purpose of this Act Congress finds that the cultivation and processing of sugar cane is a significant part of the economy of a number of friendly foreign nations that have traditionally exported raw sugar to the United States for refining and marketing. The sugar production and marketing policies of sugar exporting countries, other than the CBI and the Philippines, notably the EEC, has resulted in the surplus production of sugar and the dumping of sugar on world markets, thereby depressing prices to levels below the cost of production. Because of the changes occurring in the United States market for sweeteners, the export market for raw sugar produced in the CBI and Philippines has been severely restricted. In accordance with the purposes of this Act, efforts shall be made by the United States to provide assistance that helps to maintain a viable sugar industry in these countries. By conducting a special reexport program for sugar, effectively utilizing CCC-owned commodities, the friendly sugar-producing nations of the Caribbean Basin and the Philippines are helped more effectively than they are through section 416 commodity program assistance, and the sugar refining industry in the United States is able to retain a viable level of productive capacity.】

【(b) The Secretary of Agriculture shall issue regulations for fiscal year 1988 that set forth the terms and conditions of a special export enhancement program for a quantity of refined sugar produced in the United States equal to the quantity of raw sugar imported from beneficiary countries as defined in the Caribbean Basin Initiative (19 U.S.C. 2702) and the Republic of the Philippines. This will enable United States refiners, processors or operators to purchase raw sugar from CBI beneficiary countries and the Republic of the Philippines at United States domestic prices for export of an equivalent quantity of refined sugar into world markets within 60 days. The tonnage for fiscal year 1988 for this purpose shall be no less than 290,000 short tons, raw value, for the CBI nations and 110,000 short tons, raw value, for the Philippines. This amount shall be in addition to the sugar quota level established for the CBI and Philippines pursuant to the tariff schedules (19 U.S.C. 1202), for calendar year 1988 and shall not be held as violating the no cost provision contained in the sugar title of the Food Security Act of 1985. In order to maximize the number of competing bidders, the Secretary shall, in determining the low bidders in the special export enhancement program established under this section, make appropriate adjustments in bids received from sugar refiners and processors to reflect differing transportation costs based on refinery and factory location.】

【(c) The Secretary of Agriculture shall estimate the dollar amount of section 416 commodities which would be made available to compensate eligible CBI countries and the Philippines for the 1988 sugar quota year and operate the special sugar export enhancement program by adjusting the quantities of sugar shipped and imported under this program so as to insure that the cost of \$12,000,000 below the outlay costs for fiscal year 1988 of the section 416 commodities that would otherwise have been made available, including any costs in shipping the minimum amount of section 416 commodities as required in the Food Security Act of 1985. To estimate dollar values, the Secretary of Agriculture shall estimate the cost of the certificates to be 13 percent above their face value.】

【AMERASIAN IMMIGRATION】

【SEC. 584. (a)(1) Notwithstanding any numerical limitations specified in the Immigration and Nationality Act, the Attorney General may admit aliens described in subsection (b) to the United States as immigrants if—

(A) they are admissible (except as otherwise provided in paragraph (2)) as immigrants, and

(B) they are issued an immigrant visa and depart from Vietnam during the 2-year period beginning 90 days after the date of the enactment of this Act.】

【(2) The provisions of paragraphs (14), (15), (20), (21), (25), and (32) of section 212(a) of the Immigration and Nationality Act shall not be

applicable to any alien seeking admission to the United States under this section, and the Attorney General on the recommendation of a consular officer may waive any other provision of such section (other than paragraph (27), (29), or (33) and other than so much of paragraph (23) as relates to trafficking in narcotics) with respect to such an alien for humanitarian purposes, to assure family unity, or when it is otherwise in the public interest. Any such waiver by the Attorney General shall be in writing and shall be granted only on an individual basis following an investigation by a consular officer.】

【(3) Notwithstanding section 221(c) of the Immigration and Nationality Act, immigrant visas issued to aliens under this section shall be valid for a period of 8 months.】

【(b)(1) An alien described in this section is an alien who, as of the date of the enactment of this Act, is residing in Vietnam and who establishes to the satisfaction of a consular officer or an officer of the Immigration and Naturalization Service after a face-to-face interview, that the alien—

(A)(i) was born in Vietnam after January 1, 1962, and before January 1, 1976, and (ii) was fathered by a citizen of the United States (such an alien in this section referred to as a “principal alien”);

(B) is the spouse or child of a principal alien and is accompanying, or following to join, the principal alien; or

(C) subject to paragraph (2), either (i) is the principal alien's natural mother (or is the spouse or child of such mother), or (ii) has acted in effect as the principal alien's mother, father, or next-of-kin (or is the spouse or child of such an alien), and is accompanying, or following to join, the principal alien.】

【(2) An immigrant visa may not be issued to an alien under paragraph (1)(C) unless the principal alien involved is unmarried and the officer referred to in paragraph (1) has determined, in the officer's discretion, that (A) such an alien has a bona fide relationship with the principal alien similar to that which exists between close family members and (B) the admission of such an alien is necessary for humanitarian purposes or to assure family unity. If an alien described in paragraph (1)(C)(ii) is admitted to the United States, the natural mother of the principal alien involved shall not, thereafter, be accorded any right, privilege, or status under the Immigration and Nationality Act by virtue of such parentage.】

【(3) For purposes of this section, the term “child” has the meaning given such term in section 101(b)(1) (A), (B), (C), (D), and (E) of the Immigration and Nationality Act.】

【(c) Any alien admitted (or awaiting admission) to the United States under this section shall be eligible for benefits under chapter 2 of Title IV of the Immigration and Nationality Act to the same extent as individuals admitted (or awaiting admission) to the United States under section 207 of such Act are eligible for benefits under such chapter.】

【(d) The Attorney General, in cooperation with the Secretary of State, shall report to Congress 1 year, 2 years, and 3 years, after the date of the enactment of this Act on the implementation of this section. Each such report shall include the number of aliens who are issued immigrant visas and who are admitted to the United States under this section and number of waivers granted under subsection (a)(2) and the reasons for granting such waivers.】

【(e) Except as otherwise specifically provided in this section, the definitions contained in the Immigration and Nationality Act shall apply in the administration of this section and nothing contained in this section shall be held to repeal, amend, alter, modify, effect, or restrict the powers, duties, functions, or authority of the Attorney General in the administration and enforcement of such Act or any other law relating to immigration, nationality, or naturalization. The fact that an alien may be eligible to be granted the status of having been lawfully admitted for permanent residence under this section shall not preclude the alien from seeking such status under any other provision of law for which the alien may be eligible.】

【NARCOTICS AGREEMENTS】

【SEC. 585. (a) Section 481(h)(2)(A) of the Foreign Assistance Act of 1961 is amended—

(1) in clause (i), by inserting “in satisfying the goals agreed to in an applicable bilateral narcotics agreement with the United States, (as described in (ii) and,” after “on its own,”;

(2) by redesignating clauses (i) and (ii) as clauses (I) and (II), respectively;

(3) by inserting “(i)” immediately after “(2)(A)”;

(4) by adding at the end thereof the following:

“(ii) A bilateral narcotics agreement referred to in clause (i)(I) is an agreement between the United States and a foreign country whereby the foreign country agrees to take specific activities including but not limited to, efforts to reduce drug production, drug consumption, and drug trafficking within its territory, including activities to address illicit crop eradication and crop substitution; drug interdiction and enforcement; drug consumption and treatment; identification of and elimination of illicit drug laboratories; identification and elimination of the trafficking of precursor chemicals for the use in production of illegal drugs; cooperation with United States drug enforcement officials; and, where applicable, participation in extradition treaties, mutual legal assistance provisions directed at money laundering, sharing of evidence, and other initiatives for cooperative drug enforcement.”.]

[(b) The amendments made by paragraph (1) shall apply with respect to any certification of the President under section 481(h)(2)(A) of the Foreign Assistance Act of 1961 made on or after March 1, 1989.]

[(c) Beginning with certifications with respect to fiscal year 1989 and each subsequent year, a country which in the previous year was designated a major drug producing or drug-transit country may not be deemed as cooperating fully unless it has in place a bilateral narcotics agreement with the United States.]

**[SPECIAL AMBASSADORIAL COMMISSION FOR CYPRUS AND THE AEGEAN]**

**[SEC. 586. (a) FINDINGS.—**The Congress finds that—

(1) the inability to achieve a just and lasting Cyprus settlement will continue to affect relations among the United States and its close NATO allies, Greece and Turkey, to the detriment of larger, mutually shared, security interests in the Eastern Mediterranean region;

(2) it is of paramount importance that Cyprus, Greece, and Turkey resolve their differences through negotiations and otherwise peaceful procedures, and that the United States should support the resolution of these differences through all the diplomatic means at its disposal;

(3) it is in the national interest of the United States that the President make a significant new diplomatic demarche towards bringing this dispute to a resolution; and

(4) it is also in the national interest of the United States to undertake a diplomatic initiative to promote the peaceful and equitable resolution of differences between Greece and Turkey in the Aegean by fostering a renewed and sustained bilateral dialogue between those countries on such issues as: the delineation of the continental shelf, the definition of the territorial seas, air traffic control over the Aegean, NATO command and control arrangements in the Aegean, and the status of Lemnos and NATO exercises in the Aegean.]

[(b) **APPOINTMENT OF SPECIAL AMBASSADOR.—**The President is authorized to appoint a special ambassadorial level envoy who shall be responsible for representing the United States in direct negotiations with the parties to the Cyprus dispute, for representing the United States in negotiations through international intermediaries and, generally, lending the good offices of the United States to the parties in this dispute in order to facilitate a peaceful settlement on Cyprus. As agreed to by Greece and Turkey, the special envoy shall also represent the United States in promoting mutual discussions between those countries concerning their differences on Aegean issues. The special ambassador appointed under this section shall have available the services of two deputies (one to specialize on the Cyprus question, the other on general Aegean issues) and such senior level Department

of State personnel as may be required by the special ambassador in order to carry out his responsibilities.]

[(c) **REPORT.—**Not later than June 1, 1988, the President shall submit a report to the Congress describing in detail the activities being undertaken by the special ambassador, the progress being made toward achievement of a peaceful resolution of the Cyprus dispute, an assessment of the obstacles to achievement of such a resolution and of the future role of the United States in achieving a settlement on Cyprus, and an assessment of the progress being made toward resolution of issues affecting the Aegean region.]

[(d) **FUNDING.—**Up to \$500,000 of the funds appropriated under any heading of this Act which are allocated for Greece and up to \$500,000 of the funds appropriated under any heading of this Act which are allocated for Turkey, may be used by the Department of State for any administrative costs associated with the activities of the special ambassador and supporting personnel, including transportation, salaries and per diem.]

**[DETENTION OF CHILDREN]**

**[SEC. 587.** It is the sense of the Congress that the practice of detaining children without charge or trial is unjust, inhumane, and is an affront to civilized principles. The Congress further believes that it should be the policy of the United States to make the ending of the practice of detaining children without charge or trial a matter of the highest priority. Therefore, the Congress believes the Secretary of State should convey to all international organizations that ending the practice of detaining children without charge or trial should be a policy of the highest priority for those organizations.]

The Agricultural Research Service conducts research to provide the means for a safer, more economical supply of agricultural products for the Nation and to provide producers with technologies to competitively supply these products. The Service uses coordinated, interdisciplinary approaches to perform basic and applied research on soil and water conservation, plant and animal sciences, commodity conversion and delivery, human nutrition, and integrated agricultural systems. The 1989 budget proposes increases to improve the quality of agricultural soil and water resources, enhance plant productivity, and improve food safety and quality.

*Research on soil and water conservation.*—Research is conducted to improve soil and water management, irrigation, and conservation practices; to protect natural resources from harmful effects of soil, air, and water pollutants and to minimize certain agricultural pollution problems; and to determine the relation of soil types and water to plant, animal, and human nutrition. Research increases in 1989 are proposed to improve groundwater quality and to determine the effects of the depletion of stratospheric ozone on major crops.

*Research on plant science.*—Research is conducted to increase plant productivity by improving plant varieties, developing new crop resources, and improving crop production practices, including methods to control plant diseases, nematodes, insects, and weeds.

*Research on animal science.*—Research is conducted to increase livestock productivity (including poultry) through improved breeding, feeding, and management practices, and to develop methods for controlling diseases, parasites, and insect pests affecting these animals. The increase proposed for 1989 is to reduce the bacterial contamination and pesticide residues in foods and products of animal origin.

*Research on commodity conversion and delivery.*—Research is conducted to develop new and improved foods, feeds, products, and processes for agricultural commodities and to improve the processing, transportation, storage, wholesaling, and retailing of products. Research is also conducted on problems of human health and safety, including means to insure the safety of food and feed supplies, control insect pests of man and his belongings, and reduce the hazards to human life resulting from pesticide residues and other causes. The increase proposed in 1989 is to reduce bacterial contamination and residues in foods and products of animal origin.

*Human nutrition research.*—Research is conducted on subjects such as human nutritional requirements and the composition and nutritive value of foods, to promote optimum human health through improved nutrition.

*Integration of agricultural systems.*—Research is conducted to develop integrated systems for efficiently producing, processing, and marketing agricultural products, and to develop alternative agricultural systems that are less dependent upon nonrenewable resources and that are productive, efficient, and sustainable in the long term.

**Repair and maintenance of facilities.**—Funds are used to restore, upgrade, and maintain Federal facilities to meet OSHA and EPA requirements, provide suitable workspace for in-house research programs, and to retrofit existing structures for better energy utilization. An increase is proposed in 1989 to meet the growing repair and maintenance needs of research facilities.

**Contingencies.**—Funds available to meet urgent needs that develop unexpectedly during the year when such needs cannot be met by redirection of resources from other projects.

**Construction of facilities.**—Unobligated balances are used for this purpose. No program is being proposed in fiscal year 1989.

**Reimbursements.**—Agricultural Research Service performs program research activities and services for other USDA, Federal, and non-Federal agencies. These activities and services are paid for on a reimbursable basis.

Cooperative State Research Service participates in a nationwide system of agricultural research program planning and coordination between the State institutions and the U.S. Department of Agriculture. It assists in maintaining cooperation among the State institutions, and between the State institutions and their Federal research partners. The Agency administers grants and payments to State institutions to supplement State and local funding for agricultural research and higher education.

*Payments under the Hatch Act.*—Funds under the Hatch Act are allocated on a formula basis to agricultural experiment stations of the land-grant colleges in the 50 States, District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, Micronesia, and Northern Mariana Islands.

*Cooperative forestry research.*—These funds are allocated by formula to land-grant colleges or agricultural experiment stations in the 50 States, Puerto Rico, Guam, the Virgin Islands, and other State-supported colleges and universities having a forestry school and offering graduate training in forestry sciences.

*Payments to 1890 colleges and Tuskegee University.*—Funds support agricultural research at the 1890 land-grant colleges, including Tuskegee University.

*Special research grants.*—This program targets research to problems of national interest.

*Competitive research grants.*—Research scientists throughout the U.S. scientific community compete for funding under this program. These grants support basic research in biotechnology, plant and animal science, pest science, and human nutrition. For 1989, a new program of research is proposed to examine the effects of the depletion of stratospheric ozone on major crops.

*Animal health and disease research.*—Funds, distributed by formula, support livestock and poultry disease research in colleges of veterinary medicine and in eligible agricultural experiment stations. No funding is proposed in 1989.

*Federal administration.*—A coordinating and review staff assists in maintaining cooperation within and among the States, and between the States and their Federal research partners. This staff also administers research grants and payments to States. Federal administration is funded from a combination of program set-asides from formula and grant programs and from direct appropriation for administration.

*1890 research facilities.*—Funds support the purchase of land and the construction, alteration or renovation of buildings necessary for the conduct of food and agricultural research at colleges eligible to receive funds under the second Morrill Act of 1890, including Tuskegee University. No funding is proposed in 1989.

*Higher education.*—Funding is proposed for Strengthening Grants to support resident instruction at the 1890 colleges, the Tuskegee University, and the University of the District of Columbia. No funding is proposed in 1989 for the Morrill-Nelson and graduate training grants programs.

*Forestry competitive grants.*—This program emphasizes basic research in the areas of harvesting, wood utilization and forest biology. No funding is proposed in 1989.

*Research facilities.*—Funds support the construction, acquisition, equipping and remodeling of research facilities at the State agricultural experiment stations and other eligible institutions. No funding is proposed in 1989.

*Buildings and facilities.*—Funds support the planning, construction, acquisition, equipping and remodeling of research facilities at designated State Agricultural Experiment Stations and other eligible institutions. No funding is proposed in 1989.

*Reimbursable program.*—Funds support basic and applied agriculture research and activities performed for other USDA, Federal, and non-Federal agencies.

The Federal Extension Service, States, and localities comprise the Cooperative Extension System. This nationwide system provides out-of-school, applied education, information, and technology transfer to the public on national issues and concerns.

Federal funds are distributed primarily by formula to States, Puerto Rico, Guam, the Virgin Islands, Micronesia, Northern Marianas and American Samoa, primarily on the basis of population. Funds are used primarily for the employment of State, area, and county extension workers and paraprofessionals who work with individuals, families, community organizations, marketing concerns, and others by providing advice and assistance in the application of improved methods for production, marketing, nutrition, family living, and community development. Most of these funds are matched by the States and provide the Federal share of State retirement and penalty mail costs associated with program activities specifically undertaken with these matched funds.

In 1989, initiatives are proposed to address national concerns on agricultural competitiveness and profitability, rural revitalization and the newly established system-wide National Initiatives for Cooperative Extension. Funds are also proposed for low income nutrition education and an increase in the pesticide impact assessment program is proposed consistent with Federal pesticide regulatory activity levels. Maintenance of operations is proposed for the 1890 institutions and the District of Columbia.

The Extension Service provides leadership and assistance to States, Puerto Rico, Guam, the Virgin Islands, the District of Columbia, American Samoa, Northern Marianas and Micronesia, in developing extension programs, improving teaching methods, efficient use of available resources, evaluation of programs, and administrative services. These responsibilities are funded from a combination of program set-asides for administering payments to States and from direct appropriations for the Federal Extension Administration.

*Crop and livestock estimates.*—The Service provides the official National and State estimates of acreage, yield, and production of crops, stocks and value of farm commodities, and numbers of inventory values of livestock items. Data on approximately 120 crops and 45 livestock products are covered in some 300 reports issued each year. Data collected and published on prices paid and received by farmers are basic to computation of parity prices.

The work under this activity is conducted through 44 State offices serving the 50 States; most of these offices are operated as joint State and Federal services. Cooperative arrangements with State agencies provide additional State and county data. The major program modification in 1989 is an increase of \$1,200,000 to provide seasonal agricultural labor data to fulfill the requirements of the Immigration Reform and Control Act.

*Statistical research and service.*—This activity is designed to improve crop and livestock estimating techniques by improving sample survey designs and procedures and by testing new forecasting and estimating techniques, such as the use of satellite data.

The World Agricultural Outlook Board (WAOB) was established to provide a single focal point for the Nation's economic intelligence related to domestic and international food and agriculture.

The objectives of the WAOB are to improve the consistency, objectivity, and reliability of outlook and situation material being disseminated to the public and to integrate and coordinate USDA domestic and international economic information assistance.

The WAOB carries out these objectives through daily market surveillance and special analyses of international and domestic agricultural developments, direct participation in the planning of research programs supporting outlook and situation activities, and coordination of all departmental activities relating to weather and climate and remote sensing. The 1989 budget includes funds for economic analysis and coordination of supply/demand estimates, and meteorological data base expansion for improved crop forecasting.

The Foreign Agricultural Service mission is to help American farmers and traders take maximum advantage of increased opportunities to sell U.S. agricultural commodities abroad and to help increase U.S. farm income.

Activities are conducted within three program areas:

**Foreign agricultural affairs.**—The Service maintains agricultural counselors, attachés or trade officers at 76 foreign posts to assist overseas development of markets for U.S. farm commodities. They work closely with numerous U.S. agricultural trade groups and maintain significant contacts with foreign governments and traders to promote market access for U.S. farm products. They also file annually about 4,500 comprehensive reports regarding foreign agricultural production, supply, demand, marketing and trade policy developments to keep U.S. agriculture, industry, and Government currently informed.

<sup>1</sup> Global Economic Data Exchange System.

**Foreign market information and access.**—Under this broad program heading, the Service initiates, directs, and coordinates the Department's formulation of trade policies and programs with the goal of maintaining and expanding world markets for U.S. agricultural products. The Service is responsible for the development and maintenance of the USDA statistical data base encompassing foreign production estimates, trade data, export forecasts, economic indicators, price data and export sales reporting. These data are collected, analyzed, and disseminated to U.S. farm and trade groups providing ready access to reliable information to assess short-term changes in world agricultural supply and demand conditions by commodity.

The analyses of world commodity conditions provide the information necessary to develop export marketing strategies that can be used by the Department not only to gain market access but to enhance the long term market development plans for major U.S. commodities.

**Foreign market development.**—This program provides funding support to 47 commodity associations (cooperators), 9 contractors participating in the export incentive program, 4 regional groups (representing 47 State departments of agriculture) and the National Association of State Departments of Agriculture. Under FAS guidance and supervision, these organizations conduct an extensive worldwide market development program on behalf of the U.S. farm sector. In addition, the Service

develops and operates a worldwide system of multicommodity promotional programs utilizing product exhibits, trade teams, trade services, market information programs, and trade referral services to expand overseas markets. Historically, FAS contributes approximately 30 percent of the total annual cost of this program.

The mission of the Office of International Cooperation and Development (OICD) is to promote U.S. agriculture and to advance the agriculture of developing countries as parts of a complementary global agricultural system capable of providing ample food and fiber for all people.

*International agricultural development.*—OICD analyzes agricultural policy issues related to USDA's international agricultural development efforts, and supports the Cancun Presidential Agricultural Task Forces and the International Science and Education Council. The Agency also formulates and reviews food aid development activities supported by Public Law 480 Titles I and III agreements.

*International scientific and technical cooperation.*—OICD manages the Department's bilateral exchange and cooperative research programs with foreign governments and institutions in order to strengthen the role of science and technology in the ongoing effort to stabilize world food supplies and to increase the efficiency with which world resources are used. Priorities and criteria for these programs are based on domestic research priorities, potential benefits to U.S. agricultural production, and the availability of desired technologies.

OICD coordinates USDA's and the U.S. Government's participation in approximately 30 international organizations concerned with food, agriculture and rural development.

*Reimbursable program.*—OICD, utilizing USDA and university expertise, provides technical assistance and training to developing countries at the request of AID and international organizations. OICD manages technical assistance projects in over 50 countries, focusing on land and water management, crop and livestock production and marketing, forestry, pest control, resource conservation and other areas. OICD offers a technical and management training program in agriculture and rural development to participants from foreign countries and designees of international organizations.

*Financing the sale of agricultural commodities for convertible foreign currencies and for dollars on credit terms; for convertible foreign currency for use under section 108; and furnishing commodities to carry out the Food for Progress Act of 1985 (titles I and III).—The Corporation finances all sales made pursuant to agreements concluded under the authority of title I, and may serve as the purchasing or shipping agent, or both, if the purchaser so requests. Sales are made to friendly countries—as defined in section 103(d) of the act—and must not displace expected commercial sales for cash dollars (secs. 103 (c) and (n)).*

Agreements may not be made under title I in any calendar year which call for an appropriation to reimburse the Corporation in excess of \$1.9 billion, plus unused prior years' authorizations.

Whenever practicable, terms of agreements must require payment at time of delivery of not less than 5% of the purchase price in dollars or in currencies convertible to dollars. These initial payments are applied against costs to reduce appropriation requests.

When U.S.-flag vessels are required to ship commodities under this title, the Corporation will pay the difference between U.S.-flag rates and foreign-flag rates. In limited cases, full transportation costs to port of entry or point of entry abroad may be included along with the cost of the commodity in the amount financed by CCC in order to ensure that U.S. food aid would reach the most needy recipients.

*Use of foreign currency (title I).—*Certain U.S. uses of foreign currencies are subject to the appropriation process. The Corporation is reimbursed for the dollar value of currencies so used. Proceeds from sales of foreign currencies and from dollar repayments of foreign currency loans are applied as a reduction in appropriation requests.

*Financing sales of agricultural commodities for dollars or convertible foreign currencies on credit terms (title I).—*Agreements are made with friendly countries for delivery in annual installments for not more than 10 years from the date of the agreement subject to the availability of the commodity.

Credit terms are to be no less favorable than those required by section 122 of the Foreign Assistance Act of 1961, as amended, for loans made under that section.

Repayments under dollar credit agreements are not more than 20 years with a grace period of not more than 2 years on repayment of principal. Convertible foreign currency terms permit repayment of up to 40 years with deferral of principal payments for up to 10 years. As payments are received each year, they are

applied against current costs to reduce appropriation requests.

*Financing sales of agricultural commodities for convertible foreign currencies to be used pursuant to section 108 (title I).*—Title I sales may be financed for convertible foreign currencies which are then loaned to financial intermediaries in the recipient country pursuant to agreements whereby the intermediaries would reloan the funds to promote private enterprise institutions. Funds repaid by the financial intermediaries may be used to finance additional private enterprise investment, develop new markets, pay U.S. obligations, or be converted to dollars.

*Furnishing commodities to carry out the Food for Progress Act of 1985 (title I).*—Funds appropriated to carry out title I may be used to furnish commodities to carry out the Food for Progress Act of 1985. Such commodities may be furnished on credit terms or on a grant basis in order to assist countries that have made a commitment to introduce and expand free enterprise elements in their agricultural economies.

Total title I agreements made since inception to September 30, 1987, amount to \$16,844.0 million cost value, including ocean freight for shipment on U.S. ships. Major commodities are wheat, cotton, oils, rice, and feed grains. Payments received during the period amount to \$4,506.9 million, of which \$2,748.9 million was applied to principal and \$1,758.0 million to interest.

*Commodities supplied in connection with dispositions abroad (title II).*—Under title II, agricultural commodities are furnished to developing countries to meet famine or other emergency relief needs and to combat malnutrition. They are furnished through friendly governments, private voluntary agencies, foreign nonprofit voluntary agencies if no such U.S. agency is available, and intergovernmental organizations such as the United Nations World Food Program.

The Corporation is authorized to pay the costs of acquisition, packaging, processing, enrichment, preservation, fortification, transportation, handling, and other incidental costs incurred up to the time of delivery to U.S. ports. The Corporation also pays ocean freight charges, and pays transportation costs to points of entry other than ports in the case of landlocked countries, where carriers to a specific country are unavailable, where ports cannot be used effectively, or where a substantial saving in costs or time can be obtained, and pays general average contributions arising from ocean transport. In addition, transportation costs from designated points of entry or ports of entry abroad to storage and distribution sites and associated storage and distribution costs may be paid for commodities made available to meet urgent and extraordinary relief requirements.

Up to \$7.5 million each year may be used to buy foreign currencies accruing under title I of this act to meet costs directed to community and other self-help activities designed to alleviate the causes of the need for such aid. Such costs may not include personnel and administrative costs of cooperating sponsors, distributing agencies and recipient agencies.

Through September 30, 1987, appropriations totaling \$18,850 million were authorized. Beginning October 1, 1985, no programs of assistance shall be undertaken under this title during any fiscal year which call for an appropriation of more than \$1 billion to reimburse the Corporation. This limitation applies to costs incurred, including its investment in commodities (but only on the basis of a price not greater than the export market price of commodities acquired under a price support program), plus any amount by which programs of assistance undertaken under this title in the preceding fiscal year have called or will call for appropriations in amounts less than authorized during the preceding year. This limitation may be waived if the President determines that a waiver is necessary to undertake programs to meet urgent humanitarian needs. Any incidental sales proceeds and proceeds from loss, damage, and other claims are applied against costs to reflect a reduction in appropriation requests.

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Service. The funds consist of transfers from the Commodity Credit Corporation (CCC), user fees, and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of national, commodity, State, and county offices.

*Program formulation and appraisal.*—The supply adjustment, conservation, and commodity support programs, and the management and merchandising of commodities acquired under the support program, have a tremendous impact on the national and (to a lesser extent) the international economy. This activity provides for constant review of the effectiveness of these programs. It also provides for the analysis of data to formulate more effective programs.

*Operation of supply adjustment, conservation, and price support programs.*—This activity includes all func-

tions dealing with the administration of programs carried out through the farmer committee system, including: (a) developing program regulations and procedures; (b) holding meetings with employees and producers to discuss new programs or changes in existing programs; (c) collecting and compiling basic data for individual farms; (d) establishing individual farm allotments, bases, and yields; (e) notifying producers of established allotments, bases, and yields; (f) determining farm marketing quotas; (g) handling appeals; (h) conducting referendums and certifying results; (i) accepting farmer certifications and checking compliance; (j) accepting producer applications for participation in commodity price stabilizing programs; (k) issuing marketing cards so that production from the allotted acreage can be marketed without penalty; (l) processing producer requests for conservation cost-sharing and issuing conservation reserve rental payments; (m) processing commodity loan and storage facility loan documents and issuing checks; (n) processing disaster, deficiency, and diversion payments and issuing checks and commodity certificates; and (o) monitoring payment limitations.

**Inventory management and merchandising.**—This activity includes: (a) overall management of CCC-owned commodities; (b) purchasing commodities; (c) donating commodities; (d) selling commodities; (e) processing the redemption of commodity certificates for CCC inventory; and (f) accounting for loans and commodities.

**Warehouse examination.**—This activity provides for the examination of warehouses licensed under the U.S. Warehouse Act and non-licensed warehouses storing CCC-owned or pledged commodities. ASCS examiners perform periodic examinations of the facilities and the warehouse records to ensure protection of depositors against potential losses of the stored commodities and to ensure compliance with the U.S. Warehouse Act and any CCC storage agreements.

**Automated data processing.**—ADP in ASCS is integral to the agency's long range Information Resources Management Plan. The plan calls for the utilization of modern technology wherever it is feasible and cost-beneficial. ASCS recently implemented a national network of computer systems in support of CCC operations. All State and county ASCS offices now utilize computer-based procedures to conduct day-to-day support to producers. Most farm and producer data are currently maintained on the county office computers and are automatically accessed, used, and updated simultaneously while servicing the producers. Other facets of the plan include contractor assistance being utilized for developing and implementing a processed commodities inventory system and the proposed automation of tobacco marketing sites. Equipment purchases for these new systems represent a capital investment under the statutory authority of the Commodity Credit Corporation Charter Act.

The fiscal year 1989 budget for salaries and expenses reflects the continuing impact of the 1985 Farm Bill, and the impact of zero funding for all ASCS conservation programs, except for the Conservation Reserve Program.

This experimental Rural Clean Water Program (RCWP), authorized by the Appropriation Acts of 1980 (Public Law 96-108) and 1981 (Public Law 96-528), is a cooperative endeavor among farmers, various USDA agencies and other organizations to develop and test means of controlling agricultural nonpoint source water pollution in rural areas.

Recommended project areas were developed by local and State committees and approved by the Secretary of Agriculture in consultation with the Administrator of the Environmental Protection Agency. Full funding has been provided for all approved projects.

In fiscal year 1987, \$6 million in RCWP funds was rescinded.

The fiscal year 1989 Budget proposes no funding for this program.

The program is administered by ASC county committees, with review and approval by State ASC committees and the Secretary. Technical assistance is provided by SCS and FS.

The 1988 program level of \$176,935 thousand will be allocated to States based on the highest priority soil and water resource problems, and is expected to serve 8.1 million acres. Practices are expected to prevent approximately 39.5 million tons of soil erosion and save 568,000 acre-feet of water.

The fiscal year 1989 Budget proposes no funding for this program.

This program carries out the purposes of section 202(c) of Title II of the Colorado River Basin Salinity Control Act (43 U.S.C. 1592(c)), as amended, by providing cost-share assistance to landowners and others in the Colorado River Basin. The main objective is to enhance the supply and quality of water in the Colorado River for delivery to downstream users in the U.S. and Mexico.

Practices are recommended by the ASC county committees and approved by the State committees and the Secretary of Agriculture. Technical assistance is provided by the Soil Conservation Service. Education and information activities are provided by the Extension Service.

The 1988 program will focus on five projects in Colorado, Utah, and Wyoming. Under this program, 30 percent of ASCS cost-share funds will be reimbursed to the U.S. Treasury by the Colorado River Basin States.

The fiscal year 1989 Budget proposes no funding for this program.

The Conservation Reserve Program (CRP) was mandated by sections 1231-1244 of the Food Security Act of 1985 (Public Law 99-198) to establish permanent cover on highly erodible cropland. The primary objectives of the CRP are to help farmers control critical soil erosion that occurs on about a third of America's cropland and to decrease production of some surplus agricultural commodities.

The CRP is authorized in all 50 States, Puerto Rico, and the Virgin Islands on all croplands meeting the eligibility criteria of eroding at three times the soil loss tolerance or higher, or twice the soil loss tolerance with serious gully erosion. Up to 45 million acres of highly erodible land may be entered into the reserve.

The program is administered through the Commodity Credit Corporation (CCC) by State and local ASC committees working under the general direction of ASCS. Technical assistance is provided by the Soil Conservation Service, the Forest Service, the Cooperative Extension Service, and others.

In exchange for entering land into the reserve, program participants receive annual rental payments in cash or commodities, based on their accepted bids per acre and the number of acres placed under 10-year contracts. In addition, farmers receive one-time payments of 50 percent of the eligible costs of establishing vegetative cover on the reserve acreage.

To facilitate program implementation, use of the funds and facilities of the Commodity Credit Corporation was authorized for fiscal years 1986 and 1987. Beginning in fiscal year 1988, the services and facilities of CCC will continue to be used, but appropriations were provided to CCC in advance to carry out the program. The 1988 appropriation also required that CCC be reimbursed for CRP expenditures made for the period of the fiscal year 1988 short-term continuing resolutions, ex-

tending from October 1, 1987 through December 21, 1987. Under the Food Security Act, authority is provided to enter into CRP contracts through fiscal year 1990. Appropriations needed to make annual payments will be requested through fiscal year 2000.

During fiscal year 1988, two sign-up periods will be held to enroll acres. The first sign-up period will be held in February 1988 for crop year 1988 acres. A second sign-up, which will be for both crop year 1988 and 1989 acres, will be held later in 1988. These signups are expected to enroll 6 million acres for crop year 1988, bringing total participation through crop year 1988 up to 29 million acres.

The 1989 program is expected to enroll 12 million acres of highly erodible cropland. These 1989 crop acres would be enrolled during fiscal year 1989 or in advance during fiscal year 1988. Total participation through fiscal year 1989 is projected to be at least the 40 million acres established by the Act. The appropriation requested for fiscal year 1989 would be used for annual rental payments due on prior year contracts, for cost-sharing assistance on crop year 1989 contracts, and for fiscal year 1989 technical assistance payments.

The objectives of the Water Bank Program are to conserve water; preserve, maintain, and improve the Nation's wetlands; increase waterfowl habitat in migratory waterfowl nesting, breeding, and feeding areas in the United States; and secure recreational and environmental benefits for the Nation. The program was authorized by the Water Bank Act, approved December 19, 1970, as amended by Public Law 96-182, approved January 2, 1980.

The Secretary of Agriculture, through designated ASCS county offices, uses program funds to enter into 10-year agreements with landowners and operators for the conservation of specified wetlands. Provisions exist to renew agreements for additional periods, to make annual payments on agreements, and under certain

conditions to increase payment rates in the fifth year of a contract or at the time of renewal.

The 1989 Budget proposes no funding for this program.

This program was authorized by the Agricultural Credit Act of 1978 (16 U.S.C. 2201-05). It provides funds for sharing the cost of emergency measures to deal with cases of severe damage to farms and rangelands resulting from natural disasters.

Under the 1987 program, cost-sharing assistance was provided in 26 States to treat farmlands damaged by floods, tornadoes, and drought. The 1988 program is expected to rehabilitate approximately 60,700 acres of farmland damaged by natural disaster.

The 1989 Budget proposes no funding for this program.

Under this program indemnification payments are made to dairy farmers and manufacturers of dairy products.

The Dairy Indemnity Program was authorized under 78 Stat. 508 in 1964, and has been extended through September 30, 1990, by the Food Security Act of 1985 (Public Law 99-198). Payments are made to farmers and manufacturers who are directed to remove their milk or milk products from commercial markets because they contain residues of chemicals which have been registered and approved for use by the Federal Government, of other chemicals, of nuclear radiation, or of nuclear fallout. The authority also provides that indemnification may be paid for cows producing such milk.

In fiscal year 1988, an estimated \$1,606 thousand will complete payments to producers and manufacturers who have incurred losses due to contamination of milk, milk products, or cows by the pesticide heptachlor.

Due to the emergency nature of this program, funding is requested as needs arise. Therefore, the fiscal year 1989 budget proposes no funding for this program.

This program was authorized by the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101). The objectives of the program are to bring private, nonindustrial forest land under intensified management, to increase

timber production, to ensure adequate supplies of timber products, and to enhance other forest resources.

The Forestry Incentives Program shares up to 65 percent of the cost of tree planting and timberstand improvement. The percentage cost-shared depends on the rate set in a particular State and county by the Agricultural Stabilization and Conservation Committee, after consulting with the State forester. The program is available in designated counties based on a Forest Service survey of total eligible private timberland available for production of timber products. The program is administered by ASCS. Technical assistance is provided by Forest Service.

Under the 1988 program, cost-sharing will be provided to farmers for planting trees on 163,500 acres and improving the timberstand on 38,000 acres of forest.

The 1989 Budget proposes no funding for this program.

ADMINISTRATIVE AND OPERATING EXPENSES—Continued

This appropriation finances the administrative and operating expenses of the Corporation to provide funds to establish and maintain rates and coverages for 19,600 county programs in over 3,000 counties and to continue development of sales policies. Crop insurance in force is estimated to increase from \$7.2 billion in crop year 1988 to \$7.6 billion in crop year 1989, and the estimated insured acres are expected to increase from 57.8 million in crop year 1988 to 61.2 million in crop year 1989.

The Corporation's long-term objective is to oversee the private delivery of crop insurance on an actuarially sound basis, develop actuarial rates for use by private insurance companies, and perform compliance activities.

For fiscal year 1989, the appropriation for administrative and operating expenses will enable the Corporation to provide for growth in the expanded crop insurance program to an estimated 23.1 percent of farmers' participation, bringing the program closer to attaining its long-term objective.

The major portion of administrative and operating expenses is to support delivery systems which rely heavily on the private sector as provided by the Federal Crop Insurance Act of 1980 under section 507(c). The delivery systems are:

(a) Reinsured companies which enable insurance companies to provide the insurance marketing, distribution, servicing, training, quality control, and loss adjustment functions. The companies also share with Federal Crop Insurance Corporation, to a limited extent, in both profits and losses. It is estimated that reinsured companies will handle about 80 percent of the total premium during crop year 1989. For crop year 1988, 43 companies or groups will be writing crop insurance with reinsurance from FCIC; and

(b) Agency sales and service agreement, also known as the "master marketing agreement." Under this type of agreement, private insurance companies and associations are offered the opportunity to contract with FCIC to provide insurance sales and services. They are compensated on a commission basis. It is estimated that these agreements will account for 20 percent of the total premium for crop year 1989.

In addition, in areas where an adequate private sales and service force is not available, FCIC may ask other USDA agencies to sell and service all-risk crop insurance through existing county offices.

As the private sector becomes more involved in the all-risk crop insurance program, it is expected that the companies will be able to "risk" more of their funds thus reducing the cost to the Government and at the same time reach the Corporation's goal of having all-risk crop insurance available to as many farm producers as possible.

The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U.S.C. 1501-1520), to carry out the provisions of the Federal Crop Insurance Act, as amended. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance, and to provide the means for the research and experience helpful in devising and establishing such insurance.

Crop insurance offered to agricultural producers by the Corporation provides protection from losses caused by natural hazards, such as insect and wildlife damage, plant diseases, fire, drought, flood, wind, and other weather conditions. It does not indemnify producers for losses resulting from negligence or failure to observe good farming practices.

The crop insurance programs are planned, developed, and monitored by the FCIC headquarters office located in Washington, DC and its national operations office located in Kansas City, MO. The program is administered in the field through 18 field operations offices and 11 field underwriting offices. Sales and servicing of contracts at the county level are performed primarily by agents operating under agency sales and service agreements (master marketing agreements) and agents of reinsured companies. In those areas where these delivery systems are not in place, other USDA agencies may be used to market and service the program. The adjustment of losses is performed by independent claims adjusters and reinsured companies under contract with FCIC. Also, as required, ASCS will perform some loss adjustment support on a reimbursable basis for the Corporation. Detailed administrative accounting is performed by the National Finance Center in New Orleans, LA, and program accounting and statistical functions, as well as the underwriting and actuarial analysis work, are performed in Kansas City, MO.

**Budget program.**—The program for crop year 1988 will provide crop insurance protection to farmers amounting to approximately \$7.2 billion on the following commodities: Almonds, apples, barley, beans (dry and C&P), citrus, citrus trees, corn, cotton, ELS cotton, cranberries, figs, flax, forage production, forage seeding, grain sorghum, grapes, table grapes, hybrid seeding, macadamia nuts, macadamia trees, nursery stock, oats, onions, peaches, peanuts, peas (dry and green), peppers, popcorn, potatoes, prevented planting, prunes, raisins, rice, rye, safflowers, soybeans, stonefruit (CA only—apricots, nectarines and peaches), sugar beets, sugarcane, sunflowers, C&P sweet corn, sweet corn (fresh), tobacco, tomatoes (fresh), C&P tomatoes, walnuts, and wheat.

The 1987 appropriation provided sufficient funding for crop year 1987 to insure 50 million acres with an estimated \$375 million in total premium income, including \$135.7 million in premium subsidy.

The following table compares the scope of the insurance operations planned for 1988 and 1989, as compared with 1987. Amounts in the 1987 column are as of September 30, 1987 and pertain to the 1987 crop year.

Beginning in fiscal year 1986 the FCIC followed requirements of the GAO that the Corporation conform to Financial Accounting Standards Board Transmittal No. 60 (FASB 60). Under FASB 60, the Corporation would match revenues and expenses in the period in which they are earned. For example, fiscal year 1987 would consist of mostly crop year 1987 income and expense but would include some crop year 1986 and adjustment in prior crop years. Therefore, for purposes of this presentation fiscal year 1987 will pertain to crop year 1987.

**Financing.**—The Corporation is authorized under the Federal Crop Insurance Act, as amended, to use funds from the issuance of capital stock which provides working capital for the Corporation.

Receipts which are for deposit to this fund come mainly from premiums paid by farmers. The principal payments from this fund are for indemnities to insured farmers, the direct cost of adjusting crop losses and agents' commissions. However, an appropriation will be requested in subsequent years for payments made from premium income used for loss adjustment costs and/or agents' commissions as provided by section 516(a) of the Federal Crop Insurance Act, as amended.

Premium subsidies are authorized by section 508(b) of the Federal Crop Insurance Act, as amended. The purpose of the subsidy is to encourage the broadest possible participation of farm producers in the crop insurance program. Subsidies are paid by the Corporation based upon 30 percent of each producer's premium (reduced, where applicable, for hail and fire exclusion or State agency subsidy) on any coverage, under the Corporation's policy of insurance of up to a maximum of 65 percent of the recorded or appraised average yield, as adjusted.

In fiscal year 1987, the Corporation received a transfer of \$300 million from the Commodity Credit Corporation as a hedge against heavy crop years 1986 and 1987 losses.

**Operating results and financial condition.**—As of September 30, 1987, the Corporation reflected a deficit of \$1,719.8 million. This compares with a deficit of \$1,476.9 million at September 30, 1986.

For crop years 1948 through 1986, indemnities (\$3,412.4 million) exceeded premium income (\$2,661.3 million) by \$710.1 million; the loss ratio for the period was 1.28. Indemnity costs exceeded premiums in 21 of the 39 years.

The Corporation was created to stabilize, support, and protect farm income and prices, to help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers, and to help in their orderly distribution (15 U.S.C. 714-714p). It may make available materials and facilities required in connection with the production and marketing of agricultural commodities and may be used to administer and to temporarily finance numerous special activities.

The Corporation's capital stock of \$100 million is held by the United States. Under present law, up to \$30 billion may be borrowed from the U.S. Treasury to finance operations.

The 1989 estimate includes savings from improving the control and timing of disbursements and handling of cash collections as part of continuing budget management reforms. Current indefinite appropriation authority is requested to cover all net realized losses. Appropriations to the Corporation for net realized losses have no effect on budget authority.

**Budget assumptions.**—The following general assumptions form the basis for the Corporation's 1988 and 1989 budget estimates: (a) National income will rise both in 1988 and 1989 from the present level; (b) 1988 crop production will rise from 1987 crop levels; (c) generally, exports of agricultural commodities in 1989 are expected to be slightly higher than 1988 levels; (d) yields for the 1988 crops are based on recent averages adjusted for trend; (e) acreage allotments and marketing quotas will be in effect for the 1988 crops of certain kinds of tobacco; (f) poundage quotas will be in effect for the 1988 crop of peanuts.

It is difficult to forecast with accuracy requirements for the year ending September 30, 1989, since the projections are subject to complex and unpredictable factors such as weather, other factors which affect the volume of production of crops not yet planted, feed and food needs here and overseas, and available dollar exchange.

PROGRAMS OF THE CORPORATION

The basic functions of the Corporation include the following programs for which appropriations are made for net realized losses sustained:

*Price support and related stabilization programs.*—The Corporation conducts programs to support farm income and prices and stabilize the market for agricultural commodities. Price support is provided to producers of agricultural commodities through loans, purchases, payments, and other means. This is done mainly under the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714 et seq.), the Agricultural Act of 1949, as amended (7 U.S.C. 1421 et seq.), and the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.).

Price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. The Agricultural Act of 1949, as amended, also requires support of the following nonbasic commodities: honey, milk, barley, oats, rye, grain sorghum, sugar and soybeans. The National Wool Act of 1954, as amended (7 U.S.C. 1781–87), requires support for wool and mohair. Support for other nonbasic commodities is discretionary. The support program may also include operations to remove and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

The principal methods of providing support are loans to and purchases from producers. With limited exceptions, loans made on commodities are nonrecourse. The commodities serve as collateral for the loan and on maturity the producer may deliver or forfeit such collateral to satisfy the loan obligation without further payment.

Direct purchases are also made from processors as well as producers, depending on the commodity involved. Also, special purchases are made under various laws for the removal of surpluses; for example, the Act of August 19, 1958, as amended (7 U.S.C. 1431 note), and section 416 of the Agricultural Act of 1949, as amended (7 U.S.C. 1431).

*Set-aside program and acreage limitation program.*—The Agricultural Act of 1949, as amended, authorizes the Secretary to establish, through the Corporation, acreage limitation programs for the 1986 through 1990 crops of upland cotton, rice, and ELS cotton. In addition, the Secretary is authorized to implement a set-aside or acreage limitation program for the 1986 through 1990 crops of wheat and feed grains.

*Land diversion payments.*—The Agricultural Act of 1949, as amended, provides that, to assist in adjusting the acreage of commodities to desirable goals, the Secretary is required, with respect to the 1986 crops of wheat and feed grains if certain stock levels exist on the first day of the marketing years for such crop, to make land diversion payments in the form of an “in-kind” payment; and is required to make land diversion payments with respect to the 1988 crops of corn, grain sorghum, and barley. With respect to the 1987, 1989, and 1990 crops of feed grains, the 1987 and subsequent crops of wheat and the 1986 through 1990 crops of upland cotton, ELS cotton, and rice, the Corporation may make land diversion payments to producers who devote to approved conservation uses acreages of cropland in addition to those required to be so devoted under the

acreage limitation or set-aside programs. For the 1987 and subsequent crops, diversion payments may be paid in cash or on a non-cash basis, including payments in the form of commodities or commodity certificates that may be exchanged for commodities owned by the Corporation.

*Producer eligibility.*—Producers of feed grains and wheat must comply with acreage limitation provisions or acreage set-aside provisions, and normal crop acreage (NCA) requirements, if in effect, in order to be eligible for price support loans and purchases and deficiency payments. Producers of rice must comply with acreage limitation provisions, if in effect, in order to be eligible for price support loans and purchases and deficiency payments. Producers of cotton must comply with acreage limitation provisions, if in effect, in order to be eligible for price support loans and deficiency payments.

*Deficiency payments.*—The Agricultural Act of 1949, as amended, establishes: (1) minimum established “target” prices for the 1986 through 1990 crops of the following commodities—wheat, corn, upland cotton, rice, and ELS cotton; (2) minimum price support loan and purchase levels for wheat, feed grains, and rice; and (3) minimum price support loan levels for upland cotton and ELS cotton. Deficiency payments for each of the commodities are required when the target price for the commodity exceeds the national average market price or the price support loan level, whichever is higher. The target prices for grain sorghum and oats and, if designated by the Secretary, barley, are established at a level which is fair and reasonable in relation to the target prices established for corn. These payments may be paid by cash or on a non-cash basis, including payments in the form of commodities or commodity certificates that may be exchanged for commodities owned by CCC.

*Disaster Assistance.*—Section 633(B) of the Agriculture, Rural Development and Related Agencies Appropriations Act, 1987, as included in Public Laws 99–500 and 99–591, provided that certain producers who experienced 1986 crop losses from natural disasters were eligible to receive disaster payments in the form of commodity certificates in a total amount not to exceed \$400 million. The Farm Disaster Assistance Act of 1987, Public Law 100–45, amended Section 633(B) to expand the eligibility requirements to other producers, subject to an appropriation for such losses. The Supplemental Appropriations Act, 1987, Public Law 100–71, provided an additional \$135 million for payments to the producers who were eligible to receive the initial \$400 million, and \$25 million for producers who became eligible to receive payments as the result of the amendments made by Public Law 100–45. Public Law 100–202 provided an additional \$12 million to producers who were eligible to receive payments under Public Law 100–45.

*Marketing loan and certificate programs.*—The Agricultural Act of 1949, as amended, authorizes a mandatory marketing loan program for each of the 1986 through 1990 crops of rice and upland cotton and a discretionary marketing loan program for each of the 1986 through 1990 crops of wheat, feed grains, and soybeans. Under a marketing loan program, a producer

may repay a price support loan at a level which is lower than the original loan rate. The Agricultural Act of 1949, as amended, also provides that the Secretary may allow honey producers to repay price support loans at a level which is lower than the original loan rate. The Agricultural Act of 1949, as amended, provided for payments, in the form of negotiable marketing certificates, to persons holding free stocks of upland cotton as of August 1, 1986, and to first handlers of upland cotton (persons regularly engaged in buying or selling upland cotton). The Food Security Act of 1985, as amended, provides for a marketing certificate program for rice producers and sellers.

The following table itemizes CCC certificate payments by program:

**Grain reserves.**—The Agricultural Act of 1949, as amended, authorizes a producer-owned grain reserve program for wheat and feed grains that provides 3-year extended loans to producers. Producers receive annual storage payments under the contract. Program provisions establish when interest is charged. Storage payments cease and producers may repay their loans when market prices reach the higher of 140 percent of the nonrecourse loan rate for the commodity or the established price for the commodity. Under section 5 of the Commodity Credit Corporation Charter Act, as amended, a Special Producer Storage Loan Program is conducted which allows producers with maturing producer-owned grain reserve loans to pledge the collateral securing such loans as collateral for extended storage loans for a period determined by the Secretary.

**Dairy.**—The Agricultural Act of 1949, as amended, provides for a revised dairy price support program. The support price was \$11.35 per hundredweight for the period January 1, 1987 through September 30, 1987. During the period October 1, 1987 through December 31, 1990, the support price will be \$11.10 per hundredweight. The Secretary will, on January 1 of calendar years 1988, 1989, and 1990, reduce the support price in effect by 50 cents per hundredweight if estimates of CCC purchases of milk or milk products for the twelve-month period beginning on such date is in excess of five billion pounds milk equivalent. However, the price support level may not be reduced unless the milk production termination program implemented for the 18-month period of April 1, 1986 through September 30,

1987 achieved a reduction in production of at least 12 billion pounds by program participants, or the Secretary certifies to Congress that reasonable contract offers were extended but that such offers were not accepted by a sufficient number of producers to achieve the 12 billion pound reduction. In addition, if the Secretary estimates on January 1 in any of the calendar years 1988, 1989, and 1990 that the level of purchases of milk and milk products by CCC for such calendar year will not exceed 2.5 billion pounds, the Secretary shall increase the support price in effect on such date by 50 cents per hundredweight. The support price was reduced from \$11.10 to \$10.60 per hundredweight on January 1, 1988. Under the production termination program, producers submitted bids for payments by CCC in return for the full termination of production by such producers. To encourage the adjustment of milk production to levels consistent with national demand, and finance the production termination program, the Secretary was required to provide for a reduction of 40 cents per hundredweight in the support price received on all milk marketed for commercial use by producers to be made during the period April 1, 1986 through December 31, 1986 and 25 cents per hundredweight for the period January 1, 1987 through September 30, 1987.

**Storage facilities.**—Pursuant to sections 4(h) and 5(b) of the Commodity Credit Corporation Charter Act, as amended, the Corporation has authority to make secured loans for the purchase, construction, or remodeling of facilities for storage and care of commodities on the farm.

**Conservation Reserve Program.**—The Food Security Act of 1985, as amended, provides that the Secretary shall carry out a Conservation Reserve Program by entering into 10- to 15-year contracts with owners or operators of highly erodible cropland to assist them in conserving and using the soil and water resources of their farms. Non-erodible lands which pose an off-farm environmental threat or cause productivity degradation due to soil salinity may also be included. In return for placing land in the reserve, farmers receive cost-share and rental payments, as well as technical assistance from USDA agencies. Annual rental payments may be paid in cash or on a non-cash basis, including payments in the form of commodities or commodity certificates that may be exchanged for commodities owned by the Corporation. Total acres to be included in the reserve by the end of fiscal year 1989 are 40 million. The facilities, services and funds of CCC were used to carry out the program in fiscal years 1986 and 1987. The services and facilities of the Corporation may be used in subsequent years, but appropriations must be provided in advance to carry out the program. Beginning in fiscal year 1988, a separate appropriation for advance to CCC was provided to carry out the program. See "Special Activities" section.

**Payment limitations.**—The Food Security Act of 1985, as amended, provides that the total amount of deficiency and land diversion payments, excluding any deficiency payment received as the result of a reduction of the wheat or feed grain price support loan level, which a person is entitled to receive under one or more of the annual programs for feed grains, wheat, upland cotton,

ELS cotton, and rice for each of the 1987 through 1990 crops of these commodities shall not exceed \$50 thousand. For each of the 1987 through 1990 crops, the total amount of: (1) with respect to wheat, feed grains, upland cotton, ELS cotton, rice, and honey, deficiency payments; land diversion payments; disaster payments; loan deficiency payments; inventory reduction payments; and gains realized from a marketing loan repayment; and (2) with respect to other commodities, gains realized by a producer from repaying a loan at less than the original loan level that a person shall be entitled to receive under one or more of the annual programs for such commodities shall not exceed \$250 thousand, except as otherwise may be authorized by the Secretary. Annual rental payments made under the Conservation Reserve Program are limited to \$50,000 per person.

**Supply and foreign purchase.**—The Corporation can procure from domestic and foreign sources food, agricultural commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies, under section 5 (b) and (c) of the Commodity Credit Corporation Charter Act, as amended.

**Commodity export.**—The Corporation promotes the export of agricultural commodities and products through sales for dollars or foreign currency, payments, extension of credit, assumption of certain risks, and conduct of other operations with respect to the exportation of commodities. Such commodities and products may be those held in private trade channels as well as those acquired by the Corporation. These programs are carried out under the Corporation's charter and other specific legislation.

**Foreign donations.**—Under the authority of section 416(b) of the Agricultural Act of 1949, as amended, the Corporation may furnish eligible commodities for carrying out programs of assistance in developing and friendly countries and may pay costs associated with making the commodities available. Such commodities may also be used to carry out the Food for Progress Act of 1985 or furnished in connection with (1) sales under title I of the Agricultural Trade Development Act of 1954, as amended; (2) agricultural export bonus or promotion programs; or (3) agreements by recipient countries to acquire additional agricultural commodities from the United States through commercial arrangements.

**Operating expenses.**—The Corporation carries out its functions through utilization of employees and facilities of other Government agencies. Administrative expenses are incurred for the services of: the Agricultural Stabilization and Conservation Service, General Sales Manager, and other agencies of the Department engaged in the Corporation's activities; and the General Accounting Office for audit. Additional expenses are incurred for ASCS county offices for work related to programs of the Corporation, other ASCS expenses offset by revenue, custodian, and agency expenses of the Federal Reserve banks and lending agencies, and miscellaneous costs.

Expenses are incurred for acquisition, operation, maintenance, improvement, or disposition of property

which the Corporation owns or in which it has an interest. These expenses are treated as program expenses. Such program expenses include inspection, classing and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors; work relating to Commodity Credit Corporation programs performed on a contract or fee basis by Agricultural Stabilization and Conservation Service; and special services performed by other Federal agencies within and outside this Department. Most of these general expenses, including storage and handling, transportation, inspection, classing and grading, and producer storage payments, are included in program costs. They are shown in the program and financing schedule in the entries entitled "Storage, transportation, and other obligations not included above," and "Producer storage payments."

The Corporation receives reimbursement for grain requisitioned pursuant to Public Law 87-152 (7 U.S.C. 447-449) by the States from Corporation stocks to feed resident wildlife threatened with starvation through the appropriation reimbursement for net realized losses. There have been no requisitions in recent years, however.

## SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter act and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted.

A summary of such current activities not included under other designated activities is as follows:

Item	1989 estimate (In thousands of dollars)	
	Gross obligations	Outlays (reimbursable)
(1) Sale of agricultural commodities for foreign currencies.....	45,800	45,800
(2) Financing sales of agricultural commodities for convertible foreign currencies and for dollars on credit terms.....	766,200	434,200

(5) Conservation Reserve Program.....	1,864,000	1,864,000
Total.....	3,404,275	3,072,275

The Corporation receives appropriations or reimbursement for cost of these activities as described under each.

Activities currently being carried out are as follows (see Foreign Assistance programs for details of items (1), (2), (3) and (4) and see Conservation Reserve Program for details of item (5)):

(1) Sale of agricultural commodities for foreign currencies.

(2) Financing sales of agricultural commodities for convertible foreign currencies and for dollars on credit terms (*titles I and III, Public Law 480*).

(3) Commodities supplied in connection with dispositions abroad (*title II, Public Law 480*).

(4) *National Wool Act*.—Under the National Wool Act of 1954, as amended, support of prices of wool and mohair is mandatory. The Corporation makes payments to producers in order to bring the national average

price received by all producers up to the support price required under the act.

(5) *Conservation Reserve Program*.—The Food Security Act of 1985, as amended, provides that the Secretary shall carry out a Conservation Reserve Program by entering into 10- to 15-year contracts with owners and operators of highly erodible cropland to assist them in conserving and using the soil and water resources of their farms. In return for placing land in the reserve, farmers receive cost-share and rental payments, as well as technical assistance from USDA agencies. Beginning in fiscal year 1988, a separate appropriation for advance to CCC was provided to carry out the program.

Funds of the Corporation are used to carry on this program. For the purpose of reimbursing the Corporation, section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year and to amounts expended in prior fiscal years not previously reimbursed, but not to exceed an amount equal to 70 percent of the gross receipts from duties collected on wool and wool manufactures during the calendar year preceding the fiscal year.

**FINANCING**

**Borrowing authority.**—The Corporation has an authorized capital stock of \$100 million held by the United States and, effective in fiscal year 1988, authority to borrow up to \$30 billion.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies and others. The Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made by such agencies and others. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the Act of March 8, 1938 (15 U.S.C. 713a-4).

Interest on borrowings from the Treasury (and on capital stock) is paid at a rate based upon the average interest rate of all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on other notes and obligations at a rate prescribed by the Corporation and approved by the Secretary of Treasury.

The Department of Agriculture and Related Agencies Appropriation Act, 1966, made provision for terminating interest after June 30, 1964 on the portion of the Corporation's borrowings from the Treasury equal to the unreimbursed realized losses recorded on the books of the Corporation after the end of the fiscal year in which such losses are realized.

Note.—Accounts payable, accrued liabilities and other outstanding obligations not reflected on this table do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

**Contract authority.**—Price support and other programs required by statute may result in the Corporation incurring obligations in excess of available funds and borrowing authority. Such obligations are liquidated from subsequent appropriations and other funds which may become available to the Corporation. Any increase in obligations in excess of available fund resources is reported as contract authority in the year involved; a decrease is reported as the application of appropriations and other funds to liquidate the authority.

**Appropriations.**—Under section 2 of Public Law 87-155 (15 U.S.C. 713a-11), annual appropriations are authorized for each fiscal year to reimburse the Corporation for net realized losses incurred as of the close of each year. However, for fiscal year 1988, Congress appropriated specified amounts for various activities of the Corporation in lieu of providing reimbursement for the Corporation's losses.

The special activities are financed as indicated in the program descriptions above. In addition to certain reimbursements from other agencies, appropriations are made for the National Wool Act (see above), foreign assistance programs, and the Conservation Reserve Program.

**Deficit.**—The net realized losses of the Corporation have previously been reimbursed as follows:

The Rural Electrification Administration, under authority of the Rural Electrification Act of 1936, as amended, makes heavily subsidized direct loans and guarantees loans made by other qualified lenders to rural electric and telephone systems for electric and telephone service in rural areas. Because of population growth over the past several decades, a number of borrowers now serve areas that are predominantly suburban.

In order to administer the REA loan subsidy programs and to ensure that construction and operation projects conform to approved standards, REA furnishes, without cost to the borrower, business management and technical assistance on a regular basis. This objective is carried out through regulations, personal visits to the borrowers, and training. REA has personnel in the Washington office and a field staff who have expertise in the electric or telephone industry and who are available to assist borrowers in specialized areas.

The heavily subsidized lending programs have cost the Treasury over \$17 billion since 1973 even though the goals of the program have largely been accomplished. For these reasons, the administration proposes

to convert the programs to partial (either 70 or 80 percent) guarantees of private loans. Staff resources necessary to carry out these programs are kept at levels to maintain the program.

The Rural Telephone Bank will pay its share of administrative expenses and will reimburse the Salaries and expenses account accordingly. It will also take the necessary steps to ensure it achieves privatization in 1995.

**[REIMBURSEMENT TO THE RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND]**

For an additional amount to reimburse the rural electrification and telephone revolving fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), \$327,675,000. (Rural Development, Agriculture, and Related Agencies Appropriations Act, 1988.)

This appropriation reimburses the rural electrification and telephone revolving fund for interest subsidies and loan default losses incurred by the revolving fund.

This appropriation is not warranted since the fund has already been given a large subsidy for such purposes. It is exempted by the Act from paying millions in annual interest costs owed to the Treasury on advances totaling \$7.9 billion. The costs of this interest-free loan have been sustained by the Treasury, not by the revolving fund.

Therefore, no appropriation is requested for 1989.

**[PURCHASE OF RURAL TELEPHONE BANK CAPITAL STOCK]**

For the purchase of Class A stock of the Rural Telephone Bank, \$28,710,000, to remain available until expended (7 U.S.C. 901-950(b)). (Rural Development, Agriculture, and Related Agencies Appropriations Act, 1988.)

The Rural Electrification Act of 1936, as amended, authorizes appropriations for the purchase of Class A stock in the Rural Telephone Bank by the U.S. Government.

No appropriation is requested for 1989. The Federal Government has already provided \$506 million in subsidized capital (2 percent interest) to the Bank—\$206 million over the amount in the original statute establishing the Bank. Since 1973 the cost to the taxpayer for this subsidy exceeds \$200 million. Since all RTB borrowers are financially strong and compare favorably to investor owned companies, there is no need for increasing the subsidy.

The Rural Development Insurance Fund was established on October 1, 1972, pursuant to section 116 of the Rural Development Act of 1972 (Public Law 92-419) approved August 30, 1972, to make community facility and business and industrial loans and guaranteed loans to both profit and nonprofit organizations.

The Rural Communication Development Fund, an account under the Rural Development Insurance Fund authorities, was established pursuant to Secretary's Memorandum No. 1988 approved May 22, 1979. This memorandum transferred certain financing authorities under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) from the Farmers Home Administration to the Rural Electrification Administration for the purpose of financing and administering community antenna television services or facilities in

rural areas. Funding is required for losses from operation of the program.

The Rural Electrification Administration conducts two loan programs: (1) The rural electrification program; and (2) the rural telephone program.

Direct electric and telephone loans from the Rural Electrification and Telephone Revolving Fund (RETRF) bear interest at a 5 percent rate. Some loans may be made at a lesser rate. RETRF loans must be repaid within a period not to exceed 35 years. REA also guarantees loans made directly by the Government through the Federal Financing Bank (FFB) at long-term Treasury rates plus 12.5 basis points or by other qualified lenders at rates agreed upon by the lender and the borrower.

Loans from the RETRF are financed from available receipts or, when necessary, by interim Treasury borrowings. Loans made from the RETRF are held in a pool as security for certificates of beneficial ownership (CBO's) which are sold to Treasury.

*Rural electrification.*—This loan program is financed through REA direct and guaranteed loans for the operation of generating plants, electric transmission, and distribution lines or systems. The change in the 1989 loan level from 1988 reflects the phase-out of the RETRF direct loan and 100 percent loan guarantee program by replacing it with a new partial REA loan guarantee program which allows for a 70 percent REA guarantee of principal and interest of privately originated electric distribution loans and 80 percent guarantee of power supply loans.

Legislation will be proposed to provide 80 percent REA guarantees of power supply loans and 70 percent guarantees of electric distribution and telephone loans made by the private sector. Direct loans would be phased out by the end of 1988. REA borrowers serving largely urban, suburban or recreational areas or affiliates of larger telephone holding companies will no longer be eligible for Rural Electrification and Telephone Revolving Fund loan assistance. Proposed legislation would permit the sale of rural electrification and telephone revolving fund loan assets. The proceeds would be used to repay Treasury loans.

Legislation will also be proposed to allow (1) REA borrowers to prepay their outstanding FFB and REA guaranteed FFB direct loans utilizing an 80 percent guarantee of a privately originated loan without paying the required premium, (2) REA borrowers to repay their

direct loans at a discount determined by the Administrator, provided that they become ineligible for any type of REA assistance in the future, (3) repeal Section 1403 Cushion of Credit Payments Program included in The Omnibus Budget Reconciliation Act of 1987, and (4) repeal Section 1402 Use of Funds included in the Omnibus Budget Reconciliation Act of 1987.

<sup>1</sup> Represents discount from face value on loan asset sales.

The Rural Telephone Bank (RTB) provides a second source of heavily subsidized financing for the REA telephone borrowers. The Bank charges an interest rate based on the average cost of money to the Bank, but not less than 5 percent per annum. The weighted average interest rate on cumulative loans through September 30, 1987, was 8.12 percent.

Equity capital of the Bank consists of class A stock purchased by the United States of \$506 million with a 2 percent dividend and classes B and C stock purchased by bank borrowers, organizations eligible to become borrowers and organizations controlled by borrowers. The Bank has borrowed \$759 million from the Treasury. The \$506 million in capital stock is heavily subsidized by the Federal Government.

Administrative support was provided without charge for the general operations of the Bank by REA employees and the Office of the General Counsel. Beginning in fiscal year 1989, the Bank will reimburse the REA Salaries and expenses for all administrative support provided to the RTB. Certain others incidental administrative expenses, such as expense of the elected members of the Board of Directors, postage fees and the audit by the General Accounting Office, are also paid by the Bank.

Bank loans totaled \$185 million in 1987. After almost 15 years in operation, loans to 605 borrowers have been approved, totaling over \$2.392 billion. Almost all Bank borrowers have the financial strength to borrow privately and a number of the borrowers are subsidiaries of large telephone holding companies with annual sales in the hundreds of millions of dollars. Furthermore, over 96 percent of rural areas now have telephone service available. The administration proposes that the Bank take the steps necessary to privatize, starting in 1989 including charging interest rates necessary to set aside \$30 million annually to repurchase the \$506 million of Class A stock at the end of 1995 and to pay the administrative costs of the Bank. Bank loans are \$177 million annually for 1989 through 1993. Borrowers will be permitted to prepay outstanding loans without premium starting in 1989 if they agree never to return to the RTB or REA for further financial assistance.

Legislation will be proposed to allow RTB borrowers to prepay their loans, without penalty, provided that the borrower will no longer be eligible for future REA/RTB lending assistance. The legislation will also include the repeal of Section 1412 interest rate to be considered for purposes of assessing eligibility for loans and Section 1413 Establishment of Reserve for losses due to Interest Rate Fluctuations and the disallowance of any other reserves included in Omnibus Budget Reconciliation Act of 1987. The combined effect of these provisions would be to severely impair privatization of the RTB in 1995.

This is a new program proposed for implementation in fiscal year 1989. A demonstration rural housing voucher program has been proposed for funding under the Rural housing insurance fund in fiscal year 1989. Housing vouchers replace the rural rental assistance payments program which was authorized under section

521 of the Housing Act of 1949, as amended, and previously funded from this account. The objective of that program was to reduce rents paid by low-income families living in FmHA financed rental projects and farm labor housing projects. Under that program, low-income tenants contributed the higher of (1) 30 percent of monthly adjusted income, (2) 10 percent of monthly income, or (3) designated housing payment from a welfare agency. Payments were made to the project owner to make up the difference between the tenants' rent payments and the approved rental rates for the units.

Funding for the purpose of providing rental assistance for newly constructed units was provided in limited amounts in 1986, 1987, and 1988 under the Rural housing insurance fund. The Fund continues in fiscal year 1989 to finance existing rental assistance contracts.

In fiscal year 1989, a housing voucher program authorized under section 8(o) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437(f)), will be implemented under this fund. This program will support 21,200 units or families for a 5-year period.

The housing voucher program provides tenants the flexibility to choose housing to meet their needs and to determine the appropriate level of expenditure to be made for housing. Further, unlike the rental assistance program, the housing voucher goes with the tenant should he or she decide to move.

The Agricultural Credit Insurance Fund and its associated loan programs are authorized by title III of the consolidated Farm and Rural Development Act, as amended.

The Agricultural Credit Insurance Fund is used to insure or guarantee farm ownership, soil and water, farm operating, and emergency loans to individuals. Associations, Indian tribes and tribal corporations are eligible for the following types of loans: Indian land acquisition, watershed protection, flood prevention, and resource conservation and development.

The 1989 budget proposes to maintain approximately a \$4.2 billion program level each year. Funding is proposed to be limited to farm ownership, farm operating and emergency disaster loans. By 1992, all farm operating loans will be provided on a guaranteed basis.

The following table shows the 1987 actual and estimated 1988 and 1989 number of loans and program levels. The guaranteed program levels reflect the full principal amount of the loan of which part is guaranteed by the U.S. Government.

RURAL HOUSING INSURANCE FUND—Continued

**Rural housing insurance fund.**—This fund was established in 1965 (Public Law 89-117) pursuant to section 517 of title V of the Housing Act of 1949, as amended. This fund may be used to insure or guarantee rural housing loans for single family homes, rental and cooperative housing, farm labor housing, and rural housing sites and to make rental assistance payments authorized by section 521(a). Loan programs are limited to rural areas that include towns, villages, and other places which are not part of an urban area and that have a population not in excess of 2,500 inhabitants, or is in excess of 2,500 but not in excess of 10,000 if rural in character, or has a population in excess of 10,000 but not more than 20,000 and is not within a standard metropolitan statistical area and has a serious lack of mortgage credit for low- and moderate-income borrowers.

The 1989 budget proposes to terminate all new program activity under this account. A new FmHA rural housing voucher program is being proposed at 21,200 units annually to replace these programs. It is targeted to low income rural families most in need.

In fiscal year 1988 and 1989, a rural housing voucher demonstration is proposed under this account pursuant to authorities contained in the Housing and Community Development Act of 1987.

The major programs currently funded through the Rural housing insurance fund are: section 502 very low and low to moderate income home ownership loans; section 514 domestic farm labor housing loans; section 515 rural rental housing loans; section 521 rural rental assistance; and section 524 rural housing site loans.

In fiscal year 1987, the FmHA sold rural housing section 502 loan assets without recourse to institutional and individual investors. Additional sales are proposed in fiscal year 1989. The 1989 appropriation request reflects the realized discount on the sale of loan assets mandated by Congress for 1987.

The following table shows 1987 actual and estimated 1988 number of units and program levels.

Proposed legislation will be submitted that will effectively remove the prepayment penalty provisions associated with the redemption ahead of schedule of Certificates of Beneficial Ownership when such redemptions are pursuant to accomplishing sales of loan assets to the public. The Federal Financing Bank will request a direct appropriation for any penalty payments foregone by the client agencies.

Under the Rural Housing Insurance Fund, a \$88.6 million penalty has been projected pursuant the redemption of \$725 million of Certificates of Beneficial Ownership in 1989 as part of the proposed sale of \$1.75 billion of rural housing loans. The proposed legislation would eliminate the need for the Agency to make such a payment to the Federal Financing Bank from the revolving fund to accomplish the redemption. This transaction would not have any government-wide budgetary impact.

**RURAL DEVELOPMENT INSURANCE FUND**

For direct and guaranteed loans as authorized by 7 U.S.C. 1928 and 86 Stat. 661-664, to be available from funds in the Rural Development Insurance Fund, as follows: insured water and sewer facility loans, **[\$330,380,000] \$250,000,000**; guaranteed industrial development loans, **\$95,700,000**; and insured community facility loans, **[\$95,700,000] \$50,000,000**.

For an additional amount to reimburse the Rural Development Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1988(a)), **[\$842,682,000] \$1,607,047,000**. The Rural Development Insurance Fund (RDIF) was established on October 1, 1972, pursuant to section 116 of the Rural Development Act of 1972 (Public Law 92-419), approved August 30, 1972, which also provided for transfer of the assets and liabilities of the Agricultural Credit Insurance Fund applicable to loans for water systems and waste disposal facilities to this fund. The 1985 farm bill, signed December 23, 1985, extends authorization of the RDIF through fiscal year 1988.

The fund is used to insure or guarantee loans for water systems and waste disposal facilities, community facilities, and industrial development in rural areas.

The Food Security Act of 1985, Public Law 99-198, provided for rural development finance corporation loans to be made in conjunction with rural development finance grants authorized under the Rural development loan fund. The objective of this program is to guarantee loans made by public agencies to nonprofit national rural development and finance corporations that establish statewide rural development and finance programs for the purpose of providing loans, guarantees, and other financial assistance to local businesses to improve business, industry and employment opportunities in rural areas. All available funds were obligated in fiscal year 1987. No additional funds were appropriated in fiscal year 1988 and no program is requested in fiscal year 1989.

In fiscal year 1987, the Agency sold a portion of the loan portfolio without recourse to institutional and individual investors. Additional sales are required in 1988 and 1989. The 1989 appropriation request reflects the realized discount on the sale of loan assets mandated by Congress for 1987.

The following table shows the number of loans and the program levels for 1987 actual and estimated for 1988 and 1989. The guaranteed program levels reflect the full principal amount of the loans of which part is guaranteed by the U.S. Government.

Proposed legislation will be submitted that will effectively remove the prepayment penalty provisions associated with the redemption ahead of schedule of Certificates of Beneficial Ownership when such redemptions are pursuant to accomplishing sales of loan assets to the public. The Federal Financing Bank will request a direct appropriation for any penalty payments foregone by the client agencies.

Under the Rural Development Insurance Fund, \$411.8 million of penalties have been projected from redemption of \$3.587 billion of Certificates of Beneficial Ownership in 1988 and 1989 as part of actual and proposed sales of community program loans. The proposed legislation would eliminate the need for the Agency to make such payments to the Federal Financing Bank from the revolving fund to accomplish the redemptions. This transaction would not have any government-wide budgetary impact.

This fund was transferred to FmHA from the Department of Health and Human Services pursuant to Public Law 99-198, the Food Security Act of 1985. This Act mandated that the unobligated balance in the Fund, as of the date of enactment (December 23, 1985), be made available for grants to rural development finance corporations. These grants are to be made in conjunction with rural development finance corporation loans authorized under FmHA's Rural development insurance fund. No rural development finance corporation loans or grants were made in 1986. In 1987, \$14.3 million in grants was made. In addition, Public Law 99-425, the Human Services Reauthorization Act of 1986, reauthorized the making of loans in fiscal year 1987 out of repayments or other funds made available to the Rural development loan fund by FmHA. Since no loans were obligated from this fund in fiscal year 1987, the unobligated balance will be added to a transfer of \$7.5 million from the Rural Development Insurance Fund to provide a total program level of \$14 million for fiscal year 1988. No program level is requested for fiscal year 1989.

**Technical assistance.**—Technical assistance is provided through 2,947 conservation districts to land users and decisionmakers, including individual landowners and operators, community groups, units of government, Indian tribes, and others for the planning of conservation programs and installation of needed conservation systems on the land, including design, layout, installation, and consultation services.

Combinations of needed soil and water conservation systems are planned in relation to each other to achieve well-balanced conservation programs. Technicians of the Soil Conservation Service explain the various soil conditions, develop alternative uses and treatments, help to evaluate the costs and returns of conservation work, and furnish onsite assistance to farmers, ranch-

ers, and others in applying the needed treatments. About 70 percent of the total annual investment in conservation practices applied through the conservation technical assistance program is made by private land-users. During 1989, personnel funded within this account will continue to provide technical assistance to implement the Conservation Reserve Program and the highly erodible land and wetland conservation provisions of the Food Security Act of 1985.

Also included in this item are the inventory and monitoring, resource appraisal, and program development activities carried out by the Service. Resource inventories are conducted to provide soil, water, and related resource data for evaluating land-use changes and trends; and for guidance in the development and implementation of Federal, State, and local resource conservation programs. Resource appraisal and program development provides for periodic reports to the public and Congress as required by the Soil and Water Resources Conservation Act of 1977 as amended.

**Soil surveys.**—Soil surveys and investigations are made of the Nation's soil resources, with interpretations and publications that provide physical land facts needed for program development, resource conservation planning, installation of planned practices, and for use by other Federal, State, and local agencies in making land-use decisions.

**Operation of plant materials centers.**—The selection and evaluation of plant materials are made at 22 plant materials centers through field trials to determine their suitability for erosion control, conservation, and other environmental improvements.

This program provides for cooperation between the Federal Government and States and their political subdivisions to reduce damage from floodwater, sediment, and erosion, for the conservation, development, utilization and disposal of water, and for the conservation and proper utilization of land. The 1989 budget proposes to merge all water resource activities carried out by the Soil Conservation Service into a single appropriation account to simplify program and financial management and provide greater flexibility at an overall reduced budget level. Under this initiative, new studies, plans and construction starts will be initiated in 1989 only for high priority work or in response to urgent national resource concerns. Legislation will be proposed to nego-

ciate cost-share rates on a project specific basis and require non-federal contributions of between 25 and 50 percent of which 5 percent will be in cash.

**River basin surveys and investigations.**—The Department cooperates with other Federal, State, and local agencies in making surveys and investigations of watersheds of rivers and other waterways as the basis for the development of coordinated water and related land resources programs.

The 1989 budget will continue to perform USDA cooperative studies and flood plain management studies. Interagency coordination and program formulation activities will be terminated and all reimbursable flood insurance study work will end during the year.

**Watershed planning and construction authorized by Public Laws: P.L. 534 and P.L. 566.**—The Department cooperates with other agencies and the States in planning and installing land treatment measures and watershed improvement measures to reduce damage from floodwater, sediment and erosion and for the conservation, development, utilization and disposal of water.

**Small watershed planning activities.**—The Department makes surveys of proposed small watershed projects, and work plans are prepared in cooperation with local sponsors. These plans outline the soil and water management problems in the watershed, the steps that have been or are authorized to be taken to alleviate these problems, the proposed works of improvement to be installed, the estimated benefits and costs, cost sharing, and operation and maintenance arrangements, and other facts necessary to justify Federal participation in project development.

【WATERSHED AND FLOOD PREVENTION OPERATIONS】—Continued

*Watershed operations activities authorized by Public Law 534.*—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention in 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares the cost of works of improvement for flood prevention, agricultural water management, recreation, and fish and wildlife development.

Within the 11 authorized projects, 406 subwatershed areas have been identified for planning purposes. Installation progress in these subwatersheds is as follows:

*Small watershed operations activities authorized by Public Law 566.*—The Department provides technical and financial assistance to local organizations to install measures for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife enhancement.

Watershed work plans are prepared by sponsoring local organizations with the Department's assistance or through State and local resources. After work plans are approved by the Department or Congress (projects where the estimated Federal contribution will exceed \$5 million require congressional approval), technical services and financial assistance are provided for specific works of improvements.

The following tabulation shows the status of Public Law 566 projects:

*Emergency watershed protection operations.*—This program authorizes the Secretary of Agriculture to undertake such emergency measures for runoff retardation and soil erosion prevention as may be needed to safeguard life and property from floods and the products of erosion on any watershed whenever natural elements or force causes a sudden impairment of that watershed. An emergency is considered to exist when a watershed is suddenly impaired by flood, fire, wind, earthquake, or

other natural cause and consequently life and property are endangered by floodwater, erosion, or sediment discharge. The emergency area need not be declared a national disaster area to be eligible for emergency watershed protection. Emergency watershed protection is applicable to small scale, localized disasters as well as large scale disasters. State environmental, natural resource, fish and game, and other agencies participate in planning and coordinating emergency work.

*Loan services.*—Loans are made to local sponsoring organizations to finance the local cost of installing works of improvement in Public Law 534 and approved Public Law 566 watershed projects. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Loans are made from funds available for this purpose from the Agricultural credit insurance fund of the Farmers Home Administration. Loan services related to processing and making loans are financed from this appropriation.

The 1989 Budget proposes no new Agricultural credit insurance fund loans for construction starts. Funding for fiscal year 1989 and beyond will be to service existing loans.

This program provides cost-share and technical services to participating landowners or operators in the Great Plains area in the development and installation of long-term conservation plans and practices for their land under contracts entered into in prior years. It is a voluntary program in 518 designated counties of 10 Great Plains States. Contracts with individual landowners range in time from 3 to 10 years.

As of September 30, 1987, there were 5,261 active contracts on hand. Co-landowners or operators finance the entire cost of installing recurring management-type practices and pay a specified part of the cost-shared practices installed on their land. Program regulations provide that cost-share rates offered in any contract shall not exceed 80 percent of the cost of installing eligible practices within the designated county. There is a cost-sharing limitation of \$35 thousand for any contract. The budget proposes termination of the Great Plains Program by the end of 1989.

This program provides for the Department to assist States, local units of government, groups and individuals in developing area plans for resource conservation and development (RC&D). It will play an important role in the Department's Rural Development Initiative.

RC&D areas are provided technical and financial assistance to help States and local units of government prepare plans for resource development and economic improvement and to plan and install community-type conservation projects or measures. Financial contributions, loans, and other Federal assistance are used to help carry out measures specified in RC&D area plans. Loans were made through the Farmers Home Administration to qualified local organizations to help finance their share of the costs of installing the measures.

Under this proposal, the RC&D program would be continued in 1989 with additional RC&D coordinators, reduced RC&D funded cost-sharing, and no new Farmers Home Administration Loans from the Agricultural Credit Insurance Funds.

The following tabulation shows the status of RC&D areas authorized to receive technical and financial assistance.

The major objectives of the Animal and Plant Health Inspection Service are to protect the animal and plant resources of the Nation from destructive pests and diseases.

*Plant disease and pest control.*—Through inspections at ports of entry, insects, plant diseases, nematodes and animal pests and diseases harmful to agriculture are prevented from entering this country. Cooperative programs with the States are conducted to prevent the spread of and/or to eradicate certain plant pests already established in this country. The 1989 estimates maintain support for plant disease and pest control efforts, by increasing the agricultural quarantine inspection, international programs, pest detection, and provid-

ing funding for Africanized bee, while decreasing the biocontrol, boll weevil, grasshopper and pink bollworm programs and eliminating the golden nematode, imported fire ant, and noxious weeds programs.

**Animal disease and pest control.**—Inspections and programs are conducted to keep communicable diseases of foreign origin from entering this country and to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics. In cooperation with States, programs are directed at the control and eradication of livestock diseases present in this country. Foreign animal diseases, should they enter this country, are rapidly diagnosed and outbreaks which are of economic significance and for which the Secretary of Agriculture declares a national emergency are controlled and eradicated. The 1989 estimates propose increases for animal disease detection, international programs, and veterinary diagnostics programs and decreases for brucellosis, poultry diseases, pseudorabies, and animal welfare.

**Animal damage control.**—Conducted to reduce wildlife-caused damage to agricultural interests and protect land use and wildlife resource values through the maintenance of a Federal presence in cooperation with the States and other cooperators. The Department of the Interior conducted the program prior to 1986. The budget proposes a decrease for this program in 1989, which will require cooperators to pay 100 percent of operations of animal damage control costs on private lands.

**Biotechnology.**—This Agency has the responsibility to coordinate the development and implementation of all matters and functions pertaining to the Department's regulation of biotechnology and the responsibility to act as liaison on all matters and functions pertaining to the regulation of biotechnology between agencies within the Department, between the Department and governmental and private organizations. Additionally, this agency has been designated the lead agency within USDA for regulating and evaluating applications of biotechnologically derived products for test permits and commercial licenses. The budget proposes an increase in 1989 to bring total funding to \$5.0 million.

**Construction of facilities.**—In 1981, the Congress appropriated funds under a separate account to APHIS, Buildings and Facilities. The activity reflected shows obligations from prior year funds.

**Contingencies.**—The 1989 estimates provide a contingency fund of \$5.0 million.

The FGIS provides for the establishment of official United States standards for grain, promotes the uniform application thereof by official inspection personnel, provides for an official inspection system for grain, and regulates the weighing and certification of the weight of grain shipped in interstate or foreign commerce as authorized by the U.S. Grain Standards Act (USGSA), as amended, and the regulations thereof, and the Agricultural Marketing Act of 1946 (AMA).

Standardization activities include establishing and updating U.S. grain standards and research and developing and improving methods to ensure the accurate and uniform application of the standards.

The compliance activities ensure the accurate and uniform application of the USGSA and applicable provisions of the AMA. The compliance program functions include: (1) evaluating alleged violations and initiating

preliminary investigations; initiating the implementation of corrective actions; (2) conducting management and technical reviews; (3) administering the designations and delegations of State and private agencies to perform official functions and monitoring the performance of the agencies; (4) identifying and, where appropriate, waiving and monitoring conflicts of interest; (5) licensing personnel of delegated States and designated agencies; (6) registering persons/firms engaged in the business of buying grain for sale in foreign commerce, and in the business of handling, weighing, or transporting of grain for sale in foreign commerce; (7) responding to audits of FGIS programs; and (8) reviewing and, when appropriate, approving official agencies' fee schedules.

The International Monitoring Staff briefs foreign buyers, assesses foreign inspection and weighing techniques, and responds to foreign quality and quantity complaints.

An advisory committee consisting of members from the grain industry exists to advise the agency regarding efficient and economical implementations of the USGSA.

The Grain Quality Improvement Act of 1986 was enacted on November 10, 1986, to improve the quality of U.S. grain by prohibiting the introduction and reintroduction of dockage and foreign material to grain. FGIS has drafted action plans for implementing the provisions of a new law which became effective May 1, 1987.

The Federal Grain Inspection Service provides a uniform system for the inspection and weighing of grain. Services provided under this system are financed through a fee supported revolving fund.

Fee supported programs include direct services, supervision activities and administrative functions. Direct services include official grain inspection and weighing by FGIS employees at certain export ports as well as the inspection of U.S. grain shipped through Canada. FGIS supervises the inspection and weighing activities performed by its own employees. The agency also oversees the inspection and weighing of grain performed by employees of 8 delegated States and 80 designated State and private agencies. FGIS provides an appeal service of original grain inspections and a registration system for grain exporting firms. Through support from the Association of American Railroads and user fees, FGIS conducts a railroad track scale testing program. In addition, the agency provides grading services on request for rice and grain related products under the authority of the Agricultural Marketing Act of 1946 (AMA).

AMS activities assist producers and handlers of agricultural commodities by providing a variety of marketing services. These services continue to become more complex as the volume of agricultural commodities increases, as a greater number of new processed commodities are developed, and as the agricultural market structure undergoes extensive changes. Marketing changes include increased concentration in food retailing, direct buying, decentralization of processing, growth of interregional competition, vertical integration, and contract farming. The individual activities include:

*Market news service.*—The market news program provides the agricultural community with information pertaining to the movement of agricultural products. This nationwide service provides daily reports on the supply, demand and price of over 400 commodities throughout the country.

*Inspection, grading and standardization.*—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of products to: promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. Grading services are provided for cotton and domestic and imported tobacco.

Continuous in-plant inspection of all plants manufacturing liquid, frozen or dried egg products is provided

with quarterly inspection of egg handlers and hatcheries to ensure the proper disposition of shell eggs unfit for human consumption. Imported egg products are controlled to make certain that the inspection systems in exporting countries have standards equal to those of the United States.

A uniform government food specification system is maintained to provide a more efficient Federal food procurement service.

**Market protection and promotion.**—This program consists of: (1) the research and promotion programs which are designed to improve the competitive position and expand markets for cotton, eggs, and egg products, honey, pork, beef, milk and dairy products, mohair, and potatoes; (2) the Federal Seed Act, and the Plant Variety Protection Act; and (3) the administration of the Capper-Volstead Act and the Agricultural Fair Practices Act.

Amendments to the 1985 Food Security Act provided legislative authority for the beef, pork, and watermelon research and promotion programs. Assessments on producers to fund the beef and pork programs began in 1986. Hearings on the watermelon program were held in February and March of 1987. A recommendation based upon the hearings is being finalized by AMS. If approved by producers, the program provisions will go into effect in 1988.

Federal seed inspectors have conducted tests on samples to help ensure truthful labeling of agricultural and vegetable seeds sold in interstate commerce. This program is proposed for elimination in 1989. Plant variety protection provides for the issuance of certificates to ensure that developers of novel varieties of sexually reproduced plants have exclusive rights to sell, reproduce, import and export such varieties for a period of 18 years. This program was transferred to User Fees in 1988. Appropriations will continue until the transition is completed.

The Capper-Volstead Act and the Agricultural Fair Practices Act protect producers against discriminatory practices by handlers, permit producers to engage in

cooperative efforts, and ensure that such cooperatives do not engage in practices that monopolize or restrain trade.

Grants are made on a matching fund basis to State departments of agriculture to carry out specifically approved programs designed to enhance marketing efficiency. Under this activity, specialists have worked with farmers, marketing firms, and other agencies in solving marketing problems and in using research results. Since State agencies are now able to carry on these activities by themselves, no program is being proposed in 1989.

License fees are deposited in this special fund and are used to meet the costs of administering the Perishable Agricultural Commodities and the Produce Agency Acts (7 U.S.C. 491-497, 499a-499s). The current annual license fee is set at \$300 plus \$150 for each additional business facility operated by the applicant in excess of nine facilities, up to a maximum of \$3,000.

The Acts are intended to ensure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal agreements between the two parties, (b) formal decisions involving payment of reparation

awards, and/or (c) suspension or revocation of license and/or publication of the facts.

A 1984 amendment to the Perishable Agricultural Commodities Act requires traders to have trust assets on hand to meet their obligations to fruit and vegetable suppliers. To preserve their trust and establish their rights ahead of other creditors, unpaid suppliers file notice with both the Department and their debtors that payment is due.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30 percent of customs receipts collected during each calendar year is automatically appropriated for expanding outlets for nonbasic commodities. An amount equal to 30 percent of receipts collected on fishery products is transferred to the Department of Commerce. Most of the funds are transferred to the Food and Nutrition Service and are used to purchase commodities under section 6 of the National School Lunch Act and other authorities specified in the child nutrition appropriation. If unforeseen commodity surpluses should develop, unobligated reserve balances are available for surplus removal.

Expenses and refunds, inspection and grading of farm products.—The commodity inspection and grading programs provide grading, examination, and certification services for a wide variety of fresh and processed food commodities using federally approved grade standards and purchase specifications. Commodities graded include poultry, livestock, meat, dairy products, and fresh and processed fruits and vegetables. These programs use official grade standards which reflect the relative quality of a particular food commodity based on laboratory testing and characteristics such as taste, color, weight and physical condition. Producers voluntarily request grading and certification services which are provided on a fee for service basis.

Note.—The administration fund totals are comprised of 43 separate independent order accounts in 1987. The Marketing Service fund totals are comprised of 41 separate independent order accounts in 1987.

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are appointed by the Secretary and are responsible for carrying out the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks, and disbursed directly by the market administrator.

The expenses of each local office are met from an administrative fund and a marketing service fund which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The

marketing service fund of the individual order provides for the expense of disseminating market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling, and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order and adjustments below these rates are made from time to time upon recommendations by the market administrator and upon approval of the Agricultural Marketing Service to provide reserves at about a 6-month operating level. Upon termination of any order, the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers as the case may be.

As of October 1, 1987, as required by the Food Security Act of 1985 and the Food Security Improvements Act of 1986, the Agricultural Marketing Service, as agent for the Commodity Credit Corporation, collected over \$735 million by charging 52, 40 and 25 cents per hundredweight during the applicable months on all milk produced in the forty-eight contiguous States and marketed by producers for commercial use. These funds were used to partially offset the costs of the Dairy Termination Program.

Milk sold by regulated handlers supplied almost 178 million persons in calendar year 1986.

The principal purpose of the Office of Transportation is to facilitate an efficient domestic and international transportation system for U.S. agricultural products. This is done by providing assistance to exporters and firms by helping to solve international transportation problems relating to agriculture; assisting agricultural shippers and carriers in the new deregulation environ-

ment; and providing technical assistance to producers, producer groups, and rural communities to help them solve specific transport problems. Because the process of deregulation of the transportation industry is virtually complete, this program is proposed for termination at the end of 1989.

The major objectives of the Food Safety and Inspection Service are to ensure that meat and poultry products are wholesome, unadulterated, and properly labeled and packaged, as required by the Federal Meat Inspection Act and the Poultry Products Inspection Act.

The Meat and Poultry Inspection program of the Food Safety and Inspection Service provides continuous inplant inspection of all domestic plants preparing meat or poultry products for sale or distribution; reviews foreign inspection systems and establishments that prepare meat or poultry products for export to the United States; and provides technical and financial assistance to States which maintain meat and poultry inspection programs.

The goal of this program is to ensure the integrity of the livestock, meat, and poultry markets and the marketplace in order to protect producers against unfair, deceptive, or discriminatory practices as well as those that are predatory or monopolistic in nature. Consumers and members of the livestock, poultry, and meat industries are also protected against unfair business practices in the marketing of livestock, meat and poultry, and from restrictions on competition which could unduly affect prices. The Agency also carries out the Secretary's responsibilities under Section 1324 of the

Food Security Act of 1985 covering "central filing systems" established by States for pre-notification of security interests against farm products.

The 156 National Forests, 19 National Grasslands, and 18 land utilization projects located in 44 States, Puerto Rico and the Virgin Islands are managed under multiple use and sustained yield principles. The natural resources of timber, minerals, range, wildlife, outdoor recreation, watershed, and soil are utilized in a planned combination that will best meet the needs of the Nation, without impairing productivity of the land or damaging the environment. These management and utilization principles are recognized in the Multiple-Use Sustained-Yield Act of June 12, 1960 (16 U.S.C. 528-531).

**Land and resource protection.**—Provides for the protection and/or maintenance of National Forest System users, resources, lands and facilities, including roads and trails.

**Renewable resource management and utilization.**—Provides for the management and utilization of the timber, mineral, range, recreation, wildlife, watershed, and soil resources on National Forest System lands.

**General administration.**—This activity represents that share of the cost which contributes to the support of programs financed from National forest system, Construction, Forest research, State and private forestry, and Land acquisition appropriations.

Construction of facilities—

**Recreation facilities.**—Provides facilities necessary to safely meet recreation demand without sacrificing environmental values and without unduly impinging upon other resource uses of the National Forests.

**Other facilities.**—Provides for construction and acquisition of fire, administrative, and other improvements and related facilities necessary to carry out National Forest and State and private forestry programs. Includes fire lookouts, offices, dwellings and barracks for employee housing, service, and storage buildings, insectories, tree nursery buildings, dams, and other forest resource management projects. Efforts to make buildings more energy efficient (retrofit) will be continued.

**Research construction.**—Provides for construction, alteration, and improvement of research laboratories and related facilities, and for procurement and installation of necessary initial equipment needed to put the facility into operating condition. Efforts to make research facilities more energy efficient (retrofit) will be continued.

Road and trail construction—

**Road and trail construction.**—Roads and trails are essential to the protection and management of the National Forest System, as well as providing access to

National Forest System areas for recreation and utilization of their resources. Of the revenues received annually from National Forest activities, 10 percent is being transferred to the General Fund with a comparable amount appropriated to the construction program for road and trail construction activities.

**Timber purchaser construction.**—Roads may be constructed and/or reconstructed by a timber purchaser who in turn receives credit against timber value as a reimbursement. These roads are those required within a timber sale area specifically for the removal of the timber, but which will remain on the National Forest development road system for resource management purposes after the timber sale contract is completed. (16 U.S.C. 535, 1608.)

Research is conducted and disseminated through eight regional forest experiment stations and the Forest Products Laboratory and includes both in-house and extramural programs.

**Timber management research.**—Research is conducted to develop improved silvicultural alternatives and management guidelines to increase the productivity and multiple-use benefits of forest lands, maximize tree growth and quality, and maintain land productivity.

General and special funds—Continued

FOREST RESEARCH—Continued

**Forest products and harvesting research.**—Research is conducted to provide technology to harvest and utilize timber more efficiently and in ways that are environmentally acceptable, to improve the performance of wood products, and to expand opportunities for wood products exports.

**Forest protection research.**—Research is conducted to understand the impact of forest fires, atmospheric factors, insects, and diseases on forest and range ecosystems; to improve methods for preventing, predicting, controlling, and reducing the effects of wildfire, insects, and diseases, and for using fire for resource management; and to acquire basic knowledge to monitor and predict atmospheric effects on forests.

**Resource analysis research.**—Research is conducted to provide inventory information on forest resources; to determine the effects of economic and institutional forces on forest product markets and forest management strategies; and to improve methods of managing outdoor recreation and wilderness.

**Forest environment research.**—Research is conducted to provide knowledge needed to manage forests and range non-timber resources; including wildlife and fish habitats, watersheds, and forage.

For 1989, forest research will focus on basic research thus allowing the private sector to concentrate on developmental and applied research. Competitive research grants will be terminated.

Cooperative forestry assistance is provided to all the States, Puerto Rico, Virgin Islands, Guam, the Northern Mariana Islands and the Trust Territory of the Pacific to promote protection and management of forest lands.

**Forest pest management.**—Protects forest resources and processed wood from insects and diseases directly on National Forests and other Federal lands and in cooperation with States on non-Federal lands.

**Fire protection.**—Helps State forestry organizations to achieve fire protection efficiency through activities of national interest on non-Federal wildlands.

**Forest management and utilization.**—Improves management of non-industrial private forest resources; increases wood utilization; increases seedling production and nursery capacity of State tree nurseries; expands

State tree improvement programs; and provides management and planning assistance.

*Special projects.*—Assistance will be provided to Minnesota for forestry impacts of the Boundary Waters Canoe Area Wilderness.

For 1989, financial assistance to the States will be terminated and limited technical assistance will be provided. State forestry programs have matured sufficiently to justify reduced Federal assistance.

The Working Capital Fund is a self-sustaining revolving fund which provides services to National Forests, research experiment stations, and when necessary, to other Federal agencies, and as provided by law, to State and private agencies and persons who cooperate with the Forest Service in fire control and other authorized programs.

The forestry related supply and support services include:

Equipment services which own, operate, maintain, replace, and repair common use motor driven and similar equipment. This equipment is rented to administrative units, that is, National Forests, research experiment stations, and other units, and in some cases to the other agencies, at rates which recover the cost of operation, repair and maintenance, management, and depreciation. The rates also include an increment which provides additional cash which, when added to depreciation earnings and the residual value of equipment, provides sufficient funds to replace the equipment.

Aircraft services which operate, maintain, and repair Forest Service owned aircraft used in fire surveillance and suppression and in other Forest Service programs. The aircraft are rented to National Forests, research experiment stations, and in some cases to other agencies, at rates which recover the cost of depreciation, operation, maintenance, repair, and improvements in the airworthiness of the aircraft. Aircraft replacement costs are financed from either appropriated funds or the Forest Service Working Capital Fund, or a combination of both.

Supply services operate the following common services:

Photo reproduction laboratories which store, reproduce, and supply aerial photographs, aerial maps, and other photographs of National Forest lands. The photographic reproductions are sold to National Forests, experiment stations, and others at cost.

Sign shops which manufacture and supply special signs for the National Forests for use in regulating traffic and as information to the public and other users

of the National Forests. The signs are sold to National Forests and experiment stations at cost.

Subsistence which prepare and serve meals to Forest Service crews working in areas where adequate public restaurant facilities are not available.

Seed supply which provides tree seed for direct seeding or sowing in nurseries for the production of trees. Includes purchase or collection of cones, extraction of seeds, cleaning and testing, and storage and delivery. Operates in conjunction with tree nurseries.

Tree nurseries which operate forest tree nurseries and cold storage facilities for storage of tree seedlings. Tree seedlings are sold to National Forests, State foresters, and other cooperators at cost.

*Current economic statistics programs—*

*Business statistics.*—This program provides current information on sales and related measures of retail and wholesale trade and selected service industries.

*Construction statistics.*—Reports are provided on significant construction activity such as housing permits and starts, value of new construction, residential alterations and repairs, and quarterly price indexes for new, single-family houses.

*Manufacturing statistics.*—Surveys of key industrial commodities and manufacturing activity provide current statistics on the quantity and value of industry output. The 1989 budget provides for the transfer and improvement of the plant and equipment survey from ESA to the Bureau of Census.

*General economic statistics.*—This subactivity provides a Standard Statistical Establishment List (SSEL) of all U.S. business firms and their establishments, uniform classification data, annual county business data, and corporate financial data.

The 1989 budget reduces coverage of the Quarterly Financial Report to its 1984 level and provides for the classification of new businesses.

*Foreign trade statistics.*—Monthly, cumulative, and annual reports are published on the quantity, shipping weight, and dollar value of imports and exports, by mode of transportation, detailed commodity category, customs district, and country of origin or destination. Commodity classifications are being improved for comparability and other activities in support of the Trade Act of 1974.

*Government statistics.*—Reports are published annually regarding the revenue, expenditures, indebtedness and debt transactions, financial assets, employment, and payrolls of State and local governments. Quarterly information on State and local tax revenue is furnished on the national level by type of tax and governmental level, and information is provided on financial assistance programs of the Federal Government.

*Agriculture statistics.*—Information on cotton ginnings and production is compiled and published. Assistance is provided on using the information from the census of agriculture.

*Current demographic statistics programs—*

This appropriation funds legislatively mandated censuses of economic and demographic areas once or twice each decade and other authorized periodic activities.

*Economic statistics programs—*

*Economic censuses.*—The economic censuses provide data on manufactures, mineral industries, retail and wholesale trade and service industries, construction, and transportation. The censuses are taken every fifth year, covering calendar years ending in two and seven.

The 1989 budget marks the transition from centralized processing in our Jeffersonville, Indiana facility to processing by subject matter divisions at Headquarters. We will complete the computer edits of millions of establishment records, and identify and correct erroneous and/or inconsistent records. We will also conduct data collection activities of several follow-on surveys.

*Census of governments.*—This census collects State and local government data on taxes, tax valuations, governmental receipts, expenditures, indebtedness, and number of employees. This census is taken every fifth year for calendar years ending in two and seven.

The 1989 budget provides for the collection and processing of data for the governmental finance and public employment phases of the 1987 Census of Governments.

*Census of agriculture.*—This census covers the agricultural sector of the economy and includes the census of irrigation.

The 1989 budget provides for the completion of data edits and tabulations, and for the publication of county, State, and U.S. Advance Reports.

*Demographic statistics programs—*

*Intercensal demographic estimates.*—This program provides updated population and per capita income estimates for general purpose governmental units for use in the equitable allocation of funds by various Federal programs and for other purposes.

*Decennial census.*—The decennial census of population and housing involves the enumeration of the total population of the 50 States, the District of Columbia, Puerto Rico, Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa.

The 1989 budget provides for processing and evaluating dress rehearsal data, completing and verifying the master address list, establishing control files, continuing to open collection offices and completing the opening of 11 processing offices, installing communications systems, hiring and training of 33,000 people and contingency funding to cover unanticipated and uncontrollable costs related to the 1990 decennial census. The 1989 budget also provides funding for planning the 2000 decennial census.

*Sample redesign.*—This program provides for revisions to the statistical samples used for monthly, quarterly and annual surveys.

*Geographic support.*—This activity provides for the geographic requirements of the various periodic programs and involves accurate identification of both political and statistical areas, preparation of maps, and maintenance of geographic base files.

*Data processing systems.*—This program provides the resources necessary to improve the data processing installation of the Bureau of the Census.

**Economic analysis.**—The objective of this activity is to provide a clear picture of the state of the economy through the preparation, development, and interpretation of the economic accounts of the United States. The principal programs are:

**National economic accounts.**—The national income and product accounts, summarized by the gross national product (GNP), provide an up-to-date overall view of national production, its distribution, and its use as shown by the interrelated receipts and expenditures of producers, consumers, investors, government, and the foreign customers of the United States. In 1989, increases are provided to maintain the quality of the GNP estimates and to improve the annual tabulations of corporate tax return data.

**Analysis of business trends.**—This work includes surveys of business investment, econometric models of the U.S. economy, a system of business cycle indicators, and analyses of the economic situation. In 1989, funds will be transferred to the Bureau of the Census for the plant and equipment survey.

**International economic accounts.**—The balance of payments accounts provide a comprehensive and detailed view of economic transactions between the United States and foreign countries. The internation-

al investment accounts consist of the preparation, development, and analysis of estimates of U.S. direct investment abroad and foreign direct investment in the United States. In 1989, an increase is provided to maintain the quality of the balance of payments estimates.

**Policy support.**—The objective of this activity is to support the Secretary, Under Secretary for Economic Affairs, and other Government officials in interpreting the state of the economy, and on matters relating to economic policy.

**Productivity, technology, and innovation.**—The objective of this activity is to promote a favorable climate for private sector innovation and improvements in technology, utilization, and productivity. In 1989, the productivity, technology, and innovation program will be reduced.

**Japanese Technical Literature.**—The Japanese Technical Literature Act was enacted to improve the availability of Japanese science and engineering literature in the United States. In 1989, funds will be transferred from other bureaus of the Department to support an office to coordinate the Federal Government's activities under this Act.

**Reimbursable.**—ESA provides economic and statistical data and analyses on a reimbursable and advance payment basis to other Federal agencies, individuals, and firms requesting such information. Funds received for these services cover the cost of performing this work. ESA is authorized to perform these services under 31 U.S.C. 1535, 1536 and 15 U.S.C. 1526. In 1988, an increase reflects the transfer of NTIS functions which will be maintained by the Department after privatization.

The activities of the International Trade Administration in the Department of Commerce are intended to develop the export potential of U.S. firms in a manner consistent with national security and foreign and economic policy and to promote an improved trade posture for U.S. industry.

**Trade development.**—The trade development program assesses the competitiveness of various U.S. industries; performs trade and investment analyses in support of industry programs and trade policy; and conducts export promotion programs directed toward industry sectors. Trade Adjustment Assistance to firms is proposed for termination in 1989.

**International economic policy.**—This program develops regional and multilateral economic policies; provides marketing services directly and through the Foreign Commercial Service which assist U.S. businesses in expanding exports; identifies long range trade and investment problems and develops remedial strategies.

**Import Administration.**—Import Administration investigates antidumping and countervailing duty cases to ensure compliance with applicable U.S. statutes; administers certain other statutory programs relating to imports and foreign trade zones; and ensures the availability of industrial resources for national defense under the authority of the Defense Production Act.

In 1989, an increase of 13 positions and \$635,000 is requested for Import Administration to support the U.S.-Canada softwood lumber memorandum of understanding.

**U.S. and foreign commercial service.**—The U.S. and foreign commercial service counsels U.S. businesses on exporting through 48 District Offices in the United States and overseas offices in 66 countries. The program's goals are to increase the number of U.S. firms that export and the number of foreign markets to which they export; to provide export market information; to promote and facilitate participation of U.S. firms in trade shows; and to encourage and sponsor additional involvement by private, State and local organizations.

Furthermore, in 1989, ITA will continue its counseling services to U.S. businesses through its automated Commercial Information Management System (CIMS) that will provide customized and proactive export assistance to U.S. businesses. ITA proposes to charge a fee to businesses who wish to take advantage of this system.

In 1989, an increase of \$9,200,000 is requested for the U.S. and Foreign Commercial Service to offset the loss of purchasing power overseas as a result of the decline in the value of the dollar and thereby allow ITA to maintain its existing level of overseas program activity.

*Reimbursable program.*—This account includes receipts for services rendered to other Federal agencies and receipts received on a cost recovery basis from private entities for trade events and export information services.

OPERATIONS AND ADMINISTRATION—Continued

The activities of the Bureau of Export Administration in the Department of Commerce are designed to enforce U.S. export trade laws consistent with national security, foreign policy, and short supply objectives. The program strives to achieve a balance between the interests of U.S. exporters, the U.S. economy and U.S. national security requirements.

**Management and policy coordination.**—The management and policy coordination program controls the development, analysis, coordination, and consolidation of policy initiatives and responses within the Bureau of Export Administration and, through the Offices of the Under Secretary and Deputy Under Secretary, serves as the focal point for agency-wide program management decisions.

**Export administration.**—Through administration of the export administration activities contained in the U.S. code, the export administration program assures that U.S. export activity is consistent with national security and foreign policy requirements.

In 1989, an increase of 16 positions and \$793,000 is required to meet expanded statutory requirements concerning foreign availability determinations and to ensure that decontrol objectives are met consistent with U.S. national security requirements.

In addition, we are proposing a decrease of 9 positions and \$709,000 as a result of estimated reductions in export licensing workload and due to decontrol and efficiencies resulting from license processing automation.

**Export enforcement.**—The export enforcement program detects and prevents the illegal distribution of controlled U.S. goods and technical data in violation of the export administration provisions of the U.S. code. Responsibilities also include enforcement of prohibitions against participating in unsanctioned boycotts against countries friendly to the United States.

Note.—Excludes \$36,381 thousand in 1988 for activities transferred to the Small Business Administration. Salaries and expenses, Minority Small Business/Capital Ownership Development. Comparable amounts for 1986 (\$34,824 thousand) and 1987 (\$34,016 thousand) are included above.

The 1989 Budget proposes to consolidate the Federal minority business assistance programs in the Small Business Administration. The proposed reorganization is designed to facilitate the coordination and delivery of

minority business programs in order to encourage greater minority participation in the ownership and operation of businesses. Under the proposal, all current MBDA programs will be transferred to SBA.

**National Ocean Service.**—The National Ocean Service provides for the management of ocean and coastal resources, particularly in the 200-mile Exclusive Economic Zone; improvements in the quality, quantity, geographic distribution and timeliness of ocean observations; the conservation, rational use, and charting of the Nation's coastal regions; production of aeronautical and nautical charts; and geodetic surveys. Program changes involve decreases for ocean assessments, the ocean services program, and Coastal Zone Management grants, and increases for the next generation automated nautical charting system. Chart prices will be increased to pay for the new system.

**National Marine Fisheries Service.**—These programs provide for the management and conservation of the Nation's living marine resources and their environment including marine mammals and endangered species. Program changes, consistent with NOAA's priorities, will reduce information collection and analyses and re-

lated research, as well as regulatory and management operations. Programs that primarily support local and private sector interests, e.g., aquaculture research, fisheries trade, and fisheries grant programs will be terminated.

**Oceanic and Atmospheric Research.**—These programs provide: the understanding and technique development necessary to improve NOAA services (weather warnings and forecasts, solar-terrestrial services, climate predictions, and marine services); and the understanding of environmental systems necessary for national policy formulation (e.g., acid rain) and the enhanced use of ocean resources (e.g., fisheries, minerals). A proposed increase for an integrated NOAA program in Earth System Science will provide a new, coordinated approach to conducting research to improve predictions of global climate change. Other program changes principally involve decreases in research activities which primarily support State, regional or private sector interests.

**National Weather Service.**—These programs provide timely and accurate meteorologic, hydrologic, and oceanographic warnings, forecasts, and planning information to ensure the safety of the population, mitigate property losses, and improve the economic efficiency of the Nation. Additional funding is proposed for acquisition of Doppler weather radars (NEXRAD). Specialized weather services which can be conducted by the private sector will be reduced or eliminated. Proposed decreases in 1989 include a consolidation of selected regional headquarters, a reduction in staffing levels in selected offices, and a reduction in operations and maintenance for selected data buoys.

**National Environmental Satellite, Data, and Information Service.**—These programs provide for the operation of environmental polar-orbiting and geostationary satellites; provide for the subsidy of a commercially operated Landsat system; and provide global environmental data and information products and services to users in commerce, industry, agriculture, science and engineering, the general public and Federal, State and local agencies. Increases provide for procurements of replacement satellites and subsidies for one additional Landsat satellite. A decrease in Government funding for the Landsat 4 and 5 system is proposed because the satellites are expected to cease operating in 1988.

**Program support.**—These programs provide for overall NOAA management, NOAA's share of the Regional Administrative Support Centers, and the operational and logistics support of ships, marine centers, and aircraft to support NOAA missions. Proposed decreases in 1989 include the number of ships and days-at-sea. Air Force hurricane reconnaissance flights will continue to be funded directly by the Department of Defense. An increase is proposed for the consolidation of NOAA's facilities in the Washington, D.C. Metropolitan area in Silver Spring, MD.

This fund is financed through collections from foreign vessel owners who fish within the U.S. Fishery Conservation Zone. Collections to the fund are used by the Secretary of Commerce to pay the salaries of observers and program support personnel, and the costs of data management and analysis of the observer program. The observers collect scientific information on the foreign catch, and monitor compliance with the provisions of the Magnuson Fishery Conservation and Management Act (MFCMA) of 1976.

The Office administers laws governing the granting of patents for inventions and the registration of trademarks.

Public Law 99-607 provides for a portion of Office operating costs to be recovered through user fee revenues. Since 1983, all fees are retained in the PTO appropriation and are available along with appropriated funds. Collections were \$144.7 million in 1987 and are estimated to be \$151.6 million in 1988 and \$167.6 million in 1989.

The 1987 unobligated balance brought forward is \$16.7 million, of which \$6.7 million is reserved for trademark programs. Remaining funds will be utilized in 1988 for procurement actions delayed from 1987, for program requirements resulting from higher workloads, for 1988 pay raise costs, and to cover the effect of the general reduction included in the 1988 appropriation.

An Automation Master Plan provides for the automation of the majority of the functions and operations of the Office by the 1990's. The Plan proposes a phased approach to complete the progressive development and installation of system capabilities. The 1989 increases will provide for the expansion of the Automated Patent System. Automation resources are distributed among the four activities of the Office.

*Patent process.*—Applications are examined to determine inventor entitlements to a patent for the claimed invention. Patent application examination also includes quasi-judicial review in appeal and interference proceedings, and the publication of issued patents.

The 1989 increases support programs to reduce patent application pendency time to 18.9 months by 1989; and to support the automated patent system.

Key patent application workload and performance data are:

<sup>1</sup> Includes inventory adjustment (2,403) in 1986 to reflect new withdrawal counting procedures.

**Trademark process.**—This activity provides for the examination of applications to determine whether the statutory criteria for the Federal registration of the trademark or service mark have been met. When the criteria are met, a registration is printed and issued to the applicant. Examination also includes *inter partes* proceedings involving oppositions, cancellations, and interferences. The 1989 funding maintains the reduced pendencies in trademark examination, provides for the integrated automated trademark system, and provides increases for a Trademark quality review program.

Key trademark application workload and performance data are:

**Information dissemination.**—Materials and services which assist in the examination of patent and trademark applications and in the transfer of technological information are provided in this activity. Specific materials and services include the maintenance of subject matter search files of prior art documents; maintenance of a scientific library and public search rooms; preparation of copies of patents, trademark registrations, and official documents; assignment of patents and trademark rights; and administration of printing.

The 1989 increases provide funds to support micro-filming the increased volume of patent applications, to assure patent quality by providing the best search tools for the examiners and to disseminate patent information to users.

**Executive direction and administration.**—Management and administration of the Office are provided by this activity. Administrative Services which maintain program support services are expanded to keep pace with increased application filings and enhanced examiner production. The Legislation and International Affairs activity is increased to strengthen worldwide protection of intellectual property which relates to increasing America's competitiveness in the world economy. The automation function is enhanced to carry out initiatives identified in the Automation Master Plan.

The National Bureau of Standards (NBS) is responsible for the measurement foundation which supports U.S. industry, government, and scientific establishments. NBS efforts are organized into the following program activities:

## General and special funds—Continued

## SCIENTIFIC AND TECHNICAL RESEARCH AND SERVICES—Continued

*Measurement and Engineering Research and Standards—*

*Measurement research and standards.*—Research in physics, radiation, analytical chemistry, and chemical properties and processes produces fundamental measurements and data that are the foundation for U.S. industry, commerce, and science to achieve levels of accuracy and compatibility required to support technological development, efficient processing, research and development, process control and quality assurance, and equity in trade. A 1989 increase will provide advanced chemical measurement science for new high-technology needs and improve quality assurance of chemical measurements.

*Materials science and engineering.*—Research in materials characterization, nondestructive evaluation, metallurgy, polymers, and ceramics produces measurement methods, standards, data and other technical information on processing, structure, properties, and performance of materials. These activities are in support of generic materials technologies which will permit industry to improve productivity and competitiveness in the manufacture of new advanced materials through increased reliability and quality at lower cost. The 1989 increase will expand the development of measurement methods and standards to produce and use high performance composite materials more reliably.

*Engineering measurements and standards.*—Research in electronic and electrical measurements, chemical engineering, manufacturing engineering, mathematical sciences, construction and performance of buildings and fire protection produces new engineering knowledge, techniques, and databases for design, development, prediction, and control of industrial processes. In 1989, increases will: (1) provide measurement technology and services for the components of fiber optic systems, (2) fund development of reliable measurement techniques and data to support the engineering design, scale-up, and optimal control of biochemical manufacturing processes, and (3) provide U.S. industry with measurement capability and research findings needed for rapid commercialization of products based on new high temperature superconductors. In 1989 the building research and fire research programs will be combined into a new Center for Fire and Building Safety Research at a funding level of \$5 million.

*Computer sciences and technology.*—Research in computer science and engineering establishes government-wide automated data processing (ADP) standards and provides technical support for the development of national and international voluntary industry standards which lead to more productive use of computers and networks, and the maintenance of the competitive posture of the U.S. computer industry. A 1989 increase will address new responsibilities assigned by the Computer Security Act of 1987.

*Industrial technology grants.*—This program provides matching grants to universities and nonprofit organizations for use as seed money to establish Tech-

nology Transfer Centers. These centers will facilitate the transfer of manufacturing technology to small and medium size businesses. The first grants will support the centers throughout 1989.

*Technological innovation awards.*—The proposed national "Thomas A. Edison Prize" will offer monetary incentives open to all Americans to develop technologies that could improve the quality of life in the United States and the world. This prize program will spur innovation in areas of great public benefit, but without strong market reward; encourage the exchange of ideas between scientific disciplines; and stimulate interest in science and technology.

*Research support activities.*—This subactivity groups the centrally managed programs that provide support to all other NBS programs. This support includes developing technical competence in NBS mission oriented areas of research and services, providing scientists and engineers from industry and universities the opportunity to participate in the Research Associate program, providing computing support to NBS programs, maintaining a satisfactory facilities environment for conducting the NBS technical programs, constructing a cold neutron research facility for advanced materials research, and formulating and implementing product standards policy and guidelines related to international standardization and legal metrology.

The National Telecommunications and Information Administration (NTIA) is the principal executive branch adviser to the President on domestic and international communications policy. Additionally, it manages the Federal Government's use of the radio frequency spectrum and performs extensive research in telecommunications sciences.

*Domestic and international policies—*

*Domestic policies.*—In 1989, NTIA will continue to develop and advocate policies to decrease regulation and increase competition in the domestic telecommunications marketplace. NTIA will place special emphasis on emerging technologies and will develop and advocate policies in the common carrier and mass media fields which offer increased consumer choices.

*International policies.*—In 1989, NTIA will continue to develop and advocate policies for the advancement of U.S. interests in the international telecommunications area. In coordination with the Department of State, the agency will continue to discharge the Presidential responsibility for oversight of the Communications Satellite Corporation (COMSAT).

*Spectrum management—*

*Spectrum plans and policies.*—In 1989, NTIA will continue to prepare for, participate in, and implement the results of international, regional, and national conferences addressing spectrum allocation and utilization. The public telecommunications facilities program has provided grants for planning and construction of non-commercial telecommunications facilities in areas not previously served by public television and radio. Since over 95 percent of the United States currently receives public broadcast programming, funding for this grant program is not requested in 1989.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 101. During the current fiscal year, applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by said Act, and, notwithstanding 31 U.S.C. 3324, may be used for advance pay-

ments not otherwise authorized only upon the certification of officials designated by the Secretary that such payments are in the public interest.

SEC. 102. During the current fiscal year, appropriations to the Department of Commerce which are available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by 5 U.S.C. 3109; and uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

【SEC. 103. No funds in this title shall be used to sell to private interests, except with the consent of the borrower, or contract with private interests to sell or administer, any loans made under the Public Works and Economic Development Act of 1965 or any loans made under section 254 of the Trade Act of 1974.】

SEC. 【104】 103. During the current fiscal year, the National Bureau of Standards is authorized to accept contributions of funds, to remain available until expended, from any public or private source to construct a facility for cold neutron research on materials, notwithstanding the limitations contained in 15 U.S.C. 278d.

【SEC. 105. In procuring information processing and telecommunications services of the National Oceanic and Atmospheric Administration for the Advanced Weather Interactive Processing System, the Secretary of Commerce may provide, in the contract or contracts for such services, for the payment for contingent liability of the Federal Government which may accrue in the event that the Government decides to terminate the contract before the expiration of the multiyear contract period. Such contract or contracts for such services shall limit the payments which the Federal Government is allowed to make under such contract or contracts to amounts provided in advance in appropriation Acts.】

SEC. 【106】 104. Notwithstanding any other provision of law, including section 257(c) of the Trade Act of 1974, as amended, and section 203 of the Public Works and Economic Development Act of 1965, as amended, principal and interest repayments from loans, proceeds from the sale of loan assets or collateral, and other receipts arising out of transactions entered into pursuant to title II, chapter 3 of the Trade Act of 1974 shall be deposited into the economic development revolving fund established under section 203 of the Public Works and Economic Development Act of 1965 beginning October 1, 1987: *Provided*, That payments of obligations in connection with loans guaranteed under the authority of the Trade Act of 1974 or the Public Works and Economic Development Act of 1965, and any related ex-

penses, shall be made from funds available in the economic development revolving fund: *Provided further*, That deposits to the economic development revolving fund of amounts appropriated for, or received in connection with, activities authorized under the Trade Act of 1974, made prior to October 1, 1987, shall be deemed valid deposits.

【SEC. 107. Notwithstanding any other provision of law, the Secretary of Commerce is authorized to negotiate and conclude an agreement to exchange properties with the necessary private and public parties for the purpose of expanding the National Oceanic and Atmospheric Administration marine facility at Pascagoula, Mississippi.】

SEC. 【108】 105. In order to maintain overseas program activity for the Department of Commerce provided for each fiscal year at the appropriated program levels, the Secretary may establish Buying Power Maintenance accounts for the International Trade Administration, the Export Administration, and the United States Travel and Tourism Administration. There are authorized to be appropriated for such accounts such sums as may be necessary to offset adverse fluctuations in foreign currency exchange rates, or unbudgeted overseas wage and price changes. To eliminate substantial gains to the approved levels of overseas operations, the Secretary shall transfer to a Buying Power Maintenance account such amounts determined to be excessive to the needs of the approved level of overseas operations because of fluctuations in foreign currency exchange rates or changes in unbudgeted overseas wages and prices, including unobligated balances associated with the overseas program. To offset adverse fluctuations in foreign currency exchange rates or unbudgeted overseas wage and price changes, the Secretary may transfer from a Buying Power Maintenance account such amounts determined to be necessary to maintain the approved level of overseas operations under an appropriation account. Funds transferred by the Secretary to or from a Buying Power Maintenance account to another account shall be merged with and be available for the same purpose, and for the same time period, as the funds in the account into which transferred. Any restriction contained in an appropriation Act or other provision of law limiting the amounts available for the Department of Commerce that may be obligated or expended shall be deemed to be adjusted to the extent necessary to offset the net effect of fluctuations in foreign currency exchange rates or unbudgeted overseas wage and price changes in order to maintain approved levels. (*Department of Commerce Appropriation Act, 1988.*)

## DEPARTMENT OF DEFENSE—MILITARY

### MILITARY PERSONNEL

#### ACTIVE FORCES

These appropriations finance the personnel costs of the active duty forces of the Army, Navy, Marine Corps, and Air Force. Changes in financial requirements are primarily related to military personnel strengths. In addition, these appropriations finance the future retirement benefits of the current active forces. While most of the entitlements financed by these appropriations are set by statute, the estimates reflect continuing efforts to improve management including implementation of audit recommendations, improved management of military travel, and prudent use of subsistence, bonus programs, and other pay programs.

The numbers of active duty military personnel provided for are shown in the following table:

These appropriations finance the personnel costs of the National Guard and Reserve forces, including the future retirement benefits of the current Reserve forces. The estimates reflect continuing efforts to improve management efficiency including, for example, more economical use of training and recruiting resources as well as the undertaking of active missions at lower costs.

The number of National Guard and Reserve personnel estimated to participate in the Selected Reserve training programs and the number of full-time active duty military personnel provided for are summarized in the following table:

The Reserve Officers' Training Corps program provides training for reserve and regular officer candidates who have enrolled in the course while attending a college at which an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and are ordinarily ordered to active duty for a minimum of 3 years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships generally serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. A number of scholarship recipients will fulfill their entire obligation in the Reserve components.

The Armed Forces health professions scholarship program provides a source of commissioned officers for the various health professions.

The numbers of commissioned officers graduated from these programs are summarized below:

**OPERATION AND MAINTENANCE**

These appropriations finance the costs of operating and maintaining the Armed Forces, including the Reserve components and related support activities of the Department of Defense, except military personnel costs. Included are amounts for pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements are influenced by many factors, including the number of aircraft squadrons, Army and Marine Corps divisions, installations, military strength and deployments, rates of operational activity, and the quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation.

Transfers are made, as needed, to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and are available for subsequent transfer when needed.

**RESEARCH, DEVELOPMENT, TEST, AND EVALUATION**

Programs in this title support modernization through military research, exploratory development, fabrication of technology-demonstration devices, and development and testing of prototypes and full-scale preproduction hardware. This work is performed by industrial contractors, Government laboratories and facilities, universities and nonprofit organizations. Research and development programs are funded to cover annual needs.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 1989 it presents, by budget activity, the value of the program requested for the life of these multiple-year appropriations, with comparable amounts in 1987 and 1988.

During the development of weapon systems, special management emphasis is placed on achieving savings through increased testing, increased competition, and developing realistic budgets.

The 1989 program provides for major development efforts on the National Aerospace Plane, Balanced Technology Initiative, Peacekeeper Rail Garrison, the Short-Range Attack Missile, the B-2 Advanced Technology Bomber, the MILSTAR Communications Satellite System, the Strategic Defense Initiative, as well as an advanced Anti-Tank Weapon, a new light helicopter, a Forward Area Air Defense system, the Advanced Tactical Fighter, the next generation airlifter (C-17), the new research and nuclear attack submarine and NATO Cooperative Research and Development. Funds are also requested for product improvement to systems which have already been fielded or are in production, such as the F-14D, F-15, and the M1A1.

**MILITARY CONSTRUCTION**

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 1989 it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriation, with comparable amounts in 1987 and 1988.

The direct military construction programs for the Armed Forces, both Active and Reserve, shown in the individual schedules of this title are summarized in the following table (in thousands of dollars):

**MILITARY CONSTRUCTION PROGRAM**

1987 actual				1988 est.	1989 est.
Active Forces .....	3,954,235	3,962,024	4,056,100		
Reserve Forces .....	479,957	583,833	472,900		
Interservice activities .....	832,580	1,074,844	1,254,100		
<b>Total</b> .....	<b>5,266,772</b>	<b>5,620,701</b>	<b>5,783,100</b>		

The 1989 military construction program will support new construction needed to accommodate force structure changes such as the Navy's strategic homeporting initiative and the Army's conversion to light infantry divisions. The Military Construction programs are also intended to provide facilities required as a result of new weapon systems entering the inventory including naval vessels, B-2's, Peacekeeper, and the Trident II Weapon System. The program continues initiatives to improve living and working conditions, to reduce operating costs, increase productivity, and conserve energy by upgrading or replacing facilities which have become functionally obsolete or can be made more efficient through relatively modest investments in improvements.

FAMILY HOUSING, DEFENSE

These appropriations finance all costs associated with construction, improvements, operations, maintenance and leasing of all military family housing. The family housing indebtedness information schedules show the status of indebtedness assumed by each military department to acquire family housing for assignment as public quarters. The program contains initiatives to reduce operating costs and conserve energy by upgrading or replacing facilities which can be made more efficient through relatively modest investments in improvements.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 1989 it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriation, with comparable amounts in 1987 and 1988.

Note.—Responsibility for the National Defense Stockpile will be transferred to the Department of Defense from the General Services Administration. Amounts are presented above on a three year comparable basis.

The National Defense Stockpile is planned and operated under the authority of the Strategic and Critical Materials Stockpiling Act. The purpose of the Stockpile is to decrease or preclude a dangerous and costly dependence by the United States upon foreign sources for supplies of strategic and critical materials in times of national emergency. The quantities of the materials

stockpiled are to be sufficient to sustain the United States for a period of not less than three years during a national emergency situation that would necessitate a total mobilization of the economy for a sustained conventional global war of indefinite duration.

The National Defense Stockpile Transaction Fund provides for the financing of the following activities:

**Acquisition and upgrade of materials.**—This activity finances the acquisition and upgrade of strategic and critical stockpile materials, and all related expenses such as transportation, development of specifications, testing, quality studies, and relocations of materials.

**Research grants.**—In 1988, this activity finances the construction of strategic materials research facilities, equipment, and studies at the University of Massachusetts, the University of Hawaii at Manoa, the University of Utah, the University of Arizona, and the University of New Mexico.

**DEPARTMENT OF DEFENSE STOCK FUNDS**

Department of Defense stock funds finance the purchase of materials for resale to the military services and other authorized customers (10 U.S.C. 2208). These inventories are stocked at various Defense activities. Mobilization reserve materials are also purchased through the stock funds.

**Budget program.**—Inventories rise in 1988 and 1989 over 1987 for increased non-fuel inventory levels to support an expanding force structure, the modernization of the existing force, and other logistics initiatives. Efforts continue to achieve efficiencies in spare parts procurement through acquisition reform. The following table shows the stock fund inventories (in millions of dollars) resulting from the budget program.

**Financing the budget program.**—The budget program is financed primarily from sales to customers. Gross expenditures in 1988 and 1989 are projected to be higher than in 1987 to support an expanding force. Estimated expenditures are shown below (in millions of dollars):

	Gross outlays		
	1987 actual	1988 est.	1989 est.
Army stock fund.....	7,071.2	7,274.2	7,345.4
Navy stock fund.....	8,383.7	9,480.0	8,897.0

Procurement leadtime for material acquisition is greater than the time required to fill and collect customers' orders. As a result, Department of Defense stock funds are authorized to incur obligations in anticipation of future years' sales (10 U.S.C. 2210(b)). Pursuant to this authority, the outstanding balance of contract authority was \$13,210.8 million at the end of 1987, and is estimated to remain at \$13,210.8 million in 1989.

**Operating results and financial conditions.**—Revenue and expenses for 1987, 1988, and 1989 are projected on a break-even basis. It is estimated that by the end of 1989, there will be \$62,585.5 million in inventory and other assets. Liabilities will be \$3,405.7 million and invested capital from appropriations, capitalized resources and retained income will be \$59,179.8 million.

**INDUSTRIAL FUNDS**

Department of Defense industrial funds finance various Defense activities that perform industrial or commercial type functions on a reimbursable basis (10 U.S.C. 2208). Workload at these activities is generated by orders from various customers who provide reimbursement through progress payments for the full cost of the work performed. This enables the industrial funds to maintain the level of working capital needed for continued operations.

*Budget program.*—The policy of stabilizing the rates charged to customers will continue. Estimated total obligations are projected to decrease by over \$188 million and \$527 million in 1988 and 1989 respectively, reflecting changes in customer workload requirements. Year-end totals are shown in the following table (in thousands of dollars):

The Marine Corps industrial fund finances maintenance depots engaged in repairing or overhauling Marine Corps equipment and providing technical engineering support.

The activities financed under the Air Force industrial fund include laundries, depot maintenance activities, a real property maintenance facility, and airlift services.

【Sec. 8116. Whereas a verifiable treaty eliminating United States and Soviet medium- and short-range nuclear ballistic missiles in Europe would enhance United States and European security;

Whereas the Congress supports the President's goal of reducing United States and Soviet conventional forces in Europe and reducing United States and Soviet strategic nuclear forces;

Whereas it is important the Congress and the President be in agreement on United States national security goals and objectives in order for the United States to be in the strongest possible position to negotiate with the Soviet Union future reductions in conventional and strategic nuclear forces;

Whereas the Congress strongly opposes the undercutting of these arms reduction negotiations by either the United States or the Soviet Union through unnecessary military initiatives or counter-productive arms control proposals;

Whereas no decision has been made on the development or deployment of strategic defenses;

Therefore, it is the sense of the Congress that—

(1) in order to maintain the basis for strong deterrence, the Strategic Defense Initiative (SDI) should be a long-term and robust research program to provide the United States with expanded options for responding to a Soviet breakout from the 1972 Anti-Ballistic Missile Treaty and to respond to other future Soviet arms initiatives that might pose a grave threat to United States national security;

(2) by expanding potential United States strategic options the SDI research program can enhance United States leverage in the United States-Soviet arms reduction negotiations and serve as a safeguard for ensuring that negotiated agreements are kept;

(3) future research plans and budgets for SDI must be established using realistic projections of available resources in the overall defense budget and must not undercut other important Department of Defense programs; and

(4) in matching research priorities against available resources, the primary emphasis of SDI should be to explore promising new technologies, such as directed energy technologies, which might have long-term potential to defend against a responsive Soviet offensive nuclear threat.】

Note.—Beginning in 1988, the general regulatory functions program will be included in a separate appropriation account.

Funds are requested for operation, maintenance, and related activities of the Corps of Engineers at the navigation, flood control and multiple purpose projects for which it is responsible. Work to be accomplished consists of dredging, repair, and operation of structures and other facilities, including recreation, all as authorized in the various River and Harbor and Flood Control Acts. Related activities include aquatic plant control, monitoring of completed coastal projects, river ice management, maintenance research, removal of sunken vessels, and the collection of domestic waterborne commerce statistics. This request also includes funds for Mobilization Readiness Planning as directed in Executive Order 11490. Proposed legislation would expand authority to collect recreation user fees on a comparable basis with other agencies. The increase in revenues, to become effective on October 1, 1989, would allow improvement of the program for construction, operation and maintenance of recreation facilities consistent with public demand.
