SEC. [8003] 8002. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year, unless expressly so provided herein.

SEC. [8004] 8003. No more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of reserve components or summer camp training of the Reserve Officers' Training Corps, or the National Board for the Promotion of Rifle Practice, Army.

(TRANSFER OF FUNDS)

SEC. [8006] 8004. Upon determination by the Secretary of Defense that such action is necessary in the national interest, he may, with the approval of the Office of Management and Budget, transfer not to exceed [\$2,500,000,000] \$2,000,000,000 of working capital funds of the Department of Defense or funds made available in this Act to the Department of Defense for military functions (except military construction) between such appropriations or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: *Provided*, That such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which funds are requested has been denied by Congress: *Provided further*, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority or any other authority in this Act.

(TRANSFER OF FUNDS)

SEC. [8007] 8005. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: *Provided*, That transfers may be made between such funds and the "Foreign Currency Fluctuations, Defense" and "Operation and Maintenance" appropriation accounts in such amounts as may be determined by the Secretary of Defense, with the approval of the Office of Management and Budget, except that such transfers may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in this Act, no obligations may be made against a working capital fund to procure or increase the value of war reserve

material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

SEC. [8010] 8006. None of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services shall be available for payments to physicians and other authorized individual health care providers in excess of the amounts allowed in fiscal year [1993] 1994 for similar services, except that: (a) for services for which the Secretary of Defense determines an increase is justified by economic circumstances, the allowable amounts may be increased in accordance with appropriate economic index data similar to that used pursuant to title XVIII of the Social Security Act; and (b) for services the Secretary determines are overpriced based on allowable payments under title XVIII of the Social Security Act, the allowable amounts shall be reduced by not more than 15 percent (except that the reduction may be waived if the Secretary determines that it would impair adequate access to health care services for beneficiaries). The Secretary shall solicit public comment prior to promulgating regulations to implement this section. Such regulations shall include a limitation, similar to that used under title XVIII of the Social Security Act, on the extent to which a provider may bill a beneficiary an actual charge in excess of the allowable amount.

SEC. [8012] 8007. Within the funds appropriated for the operation and maintenance of the Armed Forces, funds are hereby appropriated pursuant to section 401 of title 10, United States Code, for humanitarian and civic assistance costs under chapter 20 of title 10, United States Code. Such funds may also be obligated for humanitarian and civic assistance costs incidental to authorized operations and pursuant to authority granted in section 401 of chapter 20 of title 10, United States Code, and these obligations shall be reported to Congress on September 30 of each year: *Provided*, That funds available for operation and maintenance shall be available for providing humanitarian and similar assistance by using Civic Action Teams in the Trust Territories of the Pacific Islands and freely associated states of Micronesia, pursuant to the Compact of Free Association as authorized by Public Law 99-239: *Provided further*, That upon a determination by the Secretary of the Army that such action is beneficial for graduate medical education programs conducted at Army medical facilities located in Hawaii, the Secretary of the Army may authorize the provision of medical services at such facilities and transportation to such facilities, on a nonreimbursable basis, for civilian patients from American Samoa, the Commonwealth of the Northern Mariana Islands, the Marshall Islands, the Federated States of Micronesia, Palau, and Guam.

SEC. [8013] 8008. Notwithstanding any other provision of law, governments of Indian tribes shall be treated as State and local governments for the purposes of disposition of real property recommended for closure in the report of the Defense Secretary's Commission on Base Realignment and Closures, December 1988, the report to the President from the Defense Base Closure and Realignment Commission, July 1991, and Public Law 100-526.

SEC. [8015] 8009. None of the funds made available by this Act shall be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before the Congress.

SEC. [8016] 8010. None of the funds appropriated by this Act shall be obligated for the pay of any individual who is initially employed after the date of enactment of this Act as a technician in the administration and training of the Army Reserve and the maintenance and repair of supplies issued to the Army Reserve unless such individual is also a military member of the Army Reserve troop program unit that he or she is employed to support. Those technicians employed by the Army Reserve in areas other than Army Reserve troop program units need only be members of the Selected Reserve.

SEC. [8018] 8011. Notwithstanding any other provision of law, the Secretaries of the Army and Air Force may authorize the retention in an active status until age sixty of any officer who would otherwise be removed from an active status and who is employed as a National Guard or Reserve technician in a position in which active status in a reserve component of the Army or Air Force is required as a condition of that employment.

SEC. [8019] 8012. Notwithstanding any other provision of law, during the current fiscal year and thereafter, proceeds from the investment of the Fisher House Investment Trust Fund will be used to support the operation and maintenance of Fisher Houses associated with Army medical treatment facilities.

SEC. [8020] 8013. (a) None of the funds appropriated by this Act shall be used to make contributions to the Department of Defense Education Benefits Fund pursuant to section 2006(g) of title 10, Unit-

ed States Code, representing the normal cost for future benefits under section 1415(c) of title 38, United States Code, for any member of the armed services who, on or after the date of enactment of this Act—

(1) enlists in the armed services for a period of active duty of less than three years; or

(2) receives an enlistment bonus under section 308a or 308f of title 37, United States Code,

nor shall any amounts representing the normal cost of such future benefits be transferred from the Fund by the Secretary of the Treasury to the Secretary of Veterans Affairs pursuant to section 2006(d) of title 10, United States Code; nor shall the Secretary of Veterans Affairs pay such benefits to any such member: *Provided*, That, in the case of a member covered by clause (1), these limitations shall not apply to members in combat arms skills or to members who enlist in the armed services on or after July 1, 1989, under a program continued or established by the Secretary of Defense in fiscal year 1991 to test the cost-effective use of special recruiting incentives involving not more than nineteen noncombat arms skills approved in advance by the Secretary of Defense: *Provided further*, That this subsection applies only to active components of the Army.

(b) None of the funds appropriated by this Act shall be available for the basic pay and allowances of any member of the Army participating as a full-time student and receiving benefits paid by the Secretary of Veterans Affairs from the Department of Defense Education Benefits Fund when time spent as a full-time student is credited toward completion of a service commitment: *Provided*, That this subsection shall not apply to those members who have reenlisted with this option prior to October 1, 1987: *Provided further*, That this subsection applies only to active components of the Army.

SEC. [8021] 8014. Funds appropriated in this Act shall be available for the payment of not more than 75 percent of the charges of a postsecondary educational institution for the tuition or expenses of an officer in the Ready Reserve of the Army National Guard or Army Reserve for education or training during his off-duty periods, except that no part of the charges may be paid unless the officer agrees to remain a member of the Ready Reserve for at least four years after completion of such training or education.

SEC. [8023] 8015. None of the funds made available by this Act may be obligated for the acquisition of major automated information systems which have not successfully completed oversight reviews required by Department of Defense regulations: *Provided*, That the automated information systems oversight review board will be independent of any other Department review function and chaired by the Assistant Secretary of Defense for Command, Control, Communications and Intelligence: *Provided further*, That except for those programs to modernize and develop migration and standard automated information systems that have been certified by the Department's senior information resource management (IRM) official as being fully compliant with the Department's information management initiative as defined in Defense Department Directive 8000.1, no funds may be expended for modernization or development of any automated information system (AIS) by the military departments, services, defense agencies, Joint Staff or Military Commands in excess of \$2,000,000 unless the senior official of the Office of the Secretary of Defense with primary responsibility for the functions being supported or to be supported certifies to the Assistant Secretary of Defense for Command, Control, Communications and Intelligence that the functional requirement(s) is valid and that the system modernization or development has no unnecessary duplication of other available or planned AISs: *Provided further*, That the Department shall develop the capability for open systems integration of commercial-off-the-shelf (COTS) applications within the Composite Health Care System (CHCS): *Provided further*, That the Department shall limit deployment of the Defense Blood Standard System (DBSS) to existing donor and processing centers, the ten Primary Casualty Receiving Hospitals (PCRHS), and two OCONUS military hospitals, with transfusion services only, and shall procure, install, and integrate by April 1, 1994, at two or more CHCS sites an open system compliant COTS hospital-based blood bank/transfusion application, with security access by application function and developed in the same application language as CHCS: *Provided further*, That the Department shall procure and install at all CHCS alpha and beta sites by September 1, 1994, an open system integrated anatomic pathology COTS application with security access by application function and developed with the same software application language as CHCS: *Provided further*, That notwithstanding any other provision of law, the one time investment cost, including the procurement or lease of new or reutilized auto-

matic data processing investment equipment, peripheral equipment and related software, for the July 16, 1993 DOD Data Center Consolidation Plan shall not exceed \$309,000,000].

SEC. [8024] 8016. Notwithstanding any other provision of law, the Secretary of the Navy may use funds appropriated to charter ships to be used as auxiliary minesweepers providing that the owner agrees that these ships may be activated as Navy Reserve ships with Navy Reserve crews used in training exercises conducted in accordance with law and policies governing Naval Reserve forces: *Provided*, That none of the funds appropriated or made available in this Act may be used to inactivate, disestablish, or discontinue the Navy's Craft of Opportunity Program].

SEC. [8031] 8017. None of the funds appropriated by this Act available for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) shall be available for the reimbursement of any health care provider for inpatient mental health service for care received when a patient is referred to a provider of inpatient mental health care or residential treatment care by a medical or health care professional having an economic interest in the facility to which the patient is referred: *Provided*, That this limitation does not apply in the case of inpatient mental health services provided under the program for the handicapped under subsection (d) of section 1079 of title 10, United States Code, provided as partial hospital care, or provided pursuant to a waiver authorized by the Secretary of Defense because of medical or psychological circumstances of the patient that are confirmed by a health professional who is not a Federal employee after a review, pursuant to rules prescribed by the Secretary, which takes into account the appropriate level of care for the patient, the intensity of services required by the patient, and the availability of that care.

SEC. [8034] 8018. Funds available in this Act may be used to provide transportation for the next-of-kin of individuals who have been prisoners of war or missing in action from the Vietnam era to an annual meeting in the United States, under such regulations as the Secretary of Defense may prescribe.

SEC. [8036] 8019. Notwithstanding any other provision of law, during the current fiscal year, the Secretary of Defense may, by Executive Agreement, establish with host nation governments in NATO member states a separate account into which such residual value amounts negotiated in the return of United States military installations in NATO member states may be deposited, in the currency of the host nation, in lieu of direct monetary transfers to the United States Treasury: *Provided*, That such credits may be utilized only for the construction of facilities to support United States military forces in that host nation, or such real property maintenance and base operating costs that are currently executed through monetary transfers to such host nations: *Provided further*, That the Department of Defense's budget submission for fiscal year 1995 shall identify such sums anticipated in residual value settlements, and identify such construction, real property maintenance or base operating costs that shall be funded by the host nation through such credits: *Provided further*, That all military construction projects to be executed from such accounts must be previously approved in a prior Act of Congress: *Provided further*, That each such Executive Agreement with a NATO member host nation shall be reported to the Committees on Appropriations and Armed Services of the House of Representatives and the Senate thirty days prior to the conclusion and endorsement of any such agreement established under this provision].

SEC. [8037] 8020. All obligations incurred in anticipation of the appropriations and authority provided in this Act are hereby ratified and confirmed if otherwise in accordance with the provisions of this Act.

SEC. [8038] 8021. None of the funds available to the Department of Defense in this Act shall be used to demilitarize or dispose of more than 310,784 unserviceable M1 Garand rifles and M1 Carbines.

SEC. [8039] 8022. Notwithstanding any other provision of law, none of the funds appropriated by this Act shall be available to pay more than 50 percent of an amount paid to any person under section 308 of title 37, United States Code, in a lump sum.

SEC. [8040] 8023. None of the funds appropriated by this Act may be used by the Department of Defense to assign a supervisor's title or grade when the number of people he or she supervises is considered as a basis for this determination: *Provided*, That savings that result from this provision are represented as such in future budget proposals.

SEC. [8041] 8024. Of the funds appropriated by this Act, no more than \$18,500,000 shall be available for the mental health care dem-

onstration project at Fort Bragg, North Carolina: *Provided*, That adjustments may be made for normal and reasonable price and program growth.

SEC. [8043] 8025. None of the funds appropriated by this Act shall be available for payments under the Department of Defense contract with the Louisiana State University Medical Center involving the use of cats for Brain Missile Wound Research, and the Department of Defense shall not make payments under such contract from funds obligated prior to the date of the enactment of this Act, except as necessary for costs incurred by the contractor prior to the enactment of this Act[, and until thirty legislative days after the final General Accounting Office report on the aforesaid contract is submitted for review to the Committees on Appropriations of the House of Representatives and the Senate]: *Provided*, That funds necessary for the care of animals covered by this contract are allowed.

SEC. [8044] 8026. None of the funds provided in this Act or any other Act shall be available to conduct bone trauma research at any Army Research Laboratory until the Secretary of the Army certifies that the synthetic compound to be used in the experiments is of such a type that its use will result in a significant medical finding, the research has military application, the research will be conducted in accordance with the standards set by an animal care and use committee, and the research does not duplicate research already conducted by a manufacturer or any other research organization.

SEC. [8047] 8027. During the current fiscal year, funds appropriated or otherwise available for any Federal agency, the Congress, the judicial branch, or the District of Columbia may be used for the pay, allowances, and benefits of an employee as defined by section 2105 of title 5 or an individual employed by the government of the District of Columbia, permanent or temporary indefinite, who—

(1) is a member of a Reserve component of the armed forces, as described in section 261 of title 10, or the National Guard, as described in section 101 of title 32;

(2) performs, for the purpose of providing military aid to enforce the law or providing assistance to civil authorities in the protection or saving of life or property or prevention of injury—

(A) Federal service under section 331, 332, 333, 3500, or 8500 of title 10, or other provision of law, as applicable, or

(B) full-time military service for his State, the District of Columbia, the Commonwealth of Puerto Rico, or a territory of the United States; and

(3) requests and is granted—

(A) leave under the authority of this section; or

(B) annual leave, which may be granted without regard to the provisions of sections 5519 and 6323(b) of title 5, if such employee is otherwise entitled to such annual leave:

Provided, That any employee who requests leave under subsection (3)(A) for service described in subsection (2) of this section is entitled to such leave, subject to the provisions of this section and of the last sentence of section 6323(b) of title 5, and such leave shall be considered leave under section 6323(b) of title 5.

SEC. [8049] 8028. Funds appropriated by this Act for the American Forces Information Service shall not be used for any national or international political or psychological activities.

SEC. [8050] 8029. Notwithstanding any other provision of law or regulation, the Secretary of Defense may adjust wage rates for civilian employees hired for certain health care occupations as authorized for the Secretary of Veterans Affairs by section 7455 of title 38, United States Code.

SEC. [8055] 8030. (a) Of the funds for the procurement of supplies or services appropriated by this Act, qualified nonprofit agencies for the blind or other severely handicapped shall be afforded the maximum practicable opportunity to participate as subcontractors and suppliers in the performance of contracts let by the Department of Defense.

(b) During the current fiscal year, a business concern which has negotiated with a military service or defense agency a subcontracting plan for the participation by small business concerns pursuant to section 8(d) of the Small Business Act (15 U.S.C. 637(d)) shall be given credit toward meeting that subcontracting goal for any purchases made from qualified nonprofit agencies for the blind or other severely handicapped.

(c) For the purpose of this section, the phrase "qualified nonprofit agency for the blind or other severely handicapped" means a nonprofit agency for the blind or other severely handicapped that has been

approved by the Committee for the Purchase from the Blind and Other Severely Handicapped under the Javits-Wagner-O'Day Act (41 U.S.C. 46-48).

SEC. [8058] 8031. During the current fiscal year, net receipts pursuant to collections from third party payers pursuant to section 1095 of title 10, United States Code, shall be made available to the local facility of the uniformed services responsible for the collections and shall be over and above the facility's direct budget amount.

SEC. [8062] 8032. Of the funds appropriated by this Act for the Defense Health Program, notwithstanding any other provision of law, the amount payable for services provided under this section shall not be less than the amount calculated under the coordination of benefits reimbursement formula utilized when CHAMPUS is a secondary payor to medical insurance programs other than Medicare, and such appropriations as necessary shall be available (notwithstanding the last sentence of section 1086(c) of title 10, United States Code) to continue Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) benefits, until age 65, under such section for a former member of a uniformed service who is entitled to retired or retainer pay or equivalent pay, or a dependent of such a member, or any other beneficiary described by section 1086(c) of title 10, United States Code, who becomes eligible for hospital insurance benefits under part A of title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.) solely on the grounds of physical disability, or end stage renal disease: *Provided*, That expenses under this section shall only be covered to the extent that such expenses are not covered under parts A and B of title XVIII of the Social Security Act and are otherwise covered under CHAMPUS: *Provided further*, That no reimbursement shall be made for services provided prior to October 1, 1991.

SEC. [8064] 8033. [(a)] Funds appropriated in this Act to finance activities of Department of Defense (DOD) Federally Funded Research and Development Centers (FFRDCs) may not be obligated or expended for an FFRDC if a member of its Board of Directors or Trustees simultaneously serves on the Board of Directors or Trustees of a profit-making company under contract to the Department of Defense unless the FFRDC has a DOD approved conflict of interest policy for its members.

[(b) None of the funds appropriated in this Act are available to establish a new FFRDC, either as a new entity, or as a separate entity administered by an organization managing another FFRDC, or as a nonprofit membership corporation consisting of a consortium of other FFRDCs and other nonprofit entities.]

[(c) Notwithstanding any other provision of law, of the amounts available to the Department of Defense during fiscal year 1994, not more than \$1,352,650,000 may be obligated for financing activities of Federally Funded Research and Development Centers.]

[(d) The total amount appropriated by this Act is hereby reduced by \$200,000,000 to reflect the obligation limitation contained in subsection (c).]

[(e) The total amount appropriated to or for the use of the Department of Defense in titles III and IV of this Act is reduced by \$200,000,000 to reflect savings from the decreased use of non-FFRDC consulting services by the Department of Defense.]

SEC. [8068] 8034. Notwithstanding any other provision of law, during the current fiscal year, the [Secretary] Department of Defense may acquire the modification, depot maintenance and repair of aircraft, vehicles and vessels as well as the production of components and other Defense-related articles, through competition between Department of Defense depot maintenance activities and private firms: *Provided*, That the Senior Acquisition Executive of the military department or defense agency concerned, with power of delegation, shall certify that successful bids include comparable estimates of all direct and indirect costs for both public and private bids: *Provided further*, That Office of Management and Budget Circular A-76 shall not apply to competitions conducted under this section.

SEC. [8071] 8035. Notwithstanding any other provision of law, the Secretary of Defense may, when he considers it in the best interest of the United States, cancel any part of an indebtedness, up to \$2,500, that is or was owed to the United States by a member or former member of a uniformed service if such indebtedness, as determined by the Secretary, was incurred in connection with Operation Desert Shield/Storm: *Provided*, That the amount of an indebtedness previously paid by a member or former member and cancelled under this section shall be refunded to the member.

SEC. [8072] 8036. Appropriations contained in this Act that remain available at the end of the current fiscal year as a result of energy cost savings realized by the Department of Defense shall remain

available for obligation for the next fiscal year to the extent, and for the purposes, provided in section 2865 of title 10, United States Code.

SEC. [8073] 8037. During the current fiscal year and thereafter, voluntary separation incentives payable under 10 U.S.C. 1175 may be paid in such amounts as are necessary from the assets of the Voluntary Separation Incentive Fund established by section 1175(h)(1).

(INCLUDING TRANSFER OF FUNDS)

SEC. [8074] 8038. Amounts deposited during the current fiscal [years 1993 and 1994] year and thereafter to the special account established under 40 U.S.C. 485(h)(2) and to the special account established under 10 U.S.C. 2667(d)(1) are appropriated and shall be available until transferred by the Secretary of Defense to current applicable appropriations or funds of the Department of Defense under the terms and conditions specified by 40 U.S.C. 485(h)(2) (A) and (B) and 10 U.S.C. 2667(d)(1)(B), to be merged with and to be available for the same time period and the same purposes as the appropriation to which transferred.

SEC. [8077] 8039. During the current fiscal year, appropriations available to the Department of Defense may be used to reimburse a member of a reserve component of the Armed Forces who is not otherwise entitled to travel and transportation allowances and who occupies transient government housing while performing active duty for training or inactive duty training: *Provided*, That such members may be provided lodging in kind if transient government quarters are unavailable as if the member was entitled to such allowances under subsection (a) of section 404 of title 37, United States Code: *Provided further*, That if lodging in kind is provided, any authorized service charge or cost of such lodging may be paid directly from funds appropriated for operation and maintenance of the reserve component of the member concerned.

SEC. [8079] 8040. the Reserve in the program "military to military contacts and other activities to promote democracy".

SEC. 8058. In addition to any other transfer authority provided in this Act, during the current fiscal year, \$215,000,000 of funds available to the Department of Defense may be transferred to the appropriation, "Former Soviet Union Threat Reduction" in title II of this Act.

SEC. 8059. Balances of the funds appropriated in Public Laws 102-172, 102-396; and 103-139, under the headings "World University Games", "Summer Olympics", and "World Cup USA 1994" in title II of those Acts shall be merged into a single account entitled "Support for International Sporting Competitions, Defense", to remain available until expended: Provided further, That such account shall be available for the purpose of liquidating obligations incurred under the appropriations from which funds are transferred pursuant to the provisions of this section and for providing support to the 1996 Games of the XXVI Olympiad to be held in Atlanta, Georgia, under the terms and conditions specified in those acts under the headings "Summer Olympics" and for providing support to any other international sporting competitions, as authorized by law, during the current fiscal year and thereafter.

SEC. 8060. During the current fiscal year and thereafter, upon a determination by the Secretary of Defense that such action is necessary, appropriations available to the Department of Defense may be used to reimburse states (excluding the Russian Federation) which are parties to the Treaty on the Elimination of Intermediate-Range and Shorter-Range Missiles concluded on December 8, 1987, and the Treaty on the Reduction and Limitation of Strategic Offensive Arms, concluded July 31, 1991, for costs allocated to such states by either of those treaties where such costs are incurred in support of inspections conducted by the United States.

SEC. 8061. Of the funds appropriated in this Act, not to exceed \$43,000,000 may be used for the purchase or construction of vessels for the Ready Reserve Force component of the National Defense Reserve Fleet, as established by section 11 of the Merchant Ship Sales Act of 1946 (50 U.S.C. App. 1744). (Department of Defense Appropriations Act, 1994.)

GENERAL PROVISIONS—MILITARY CONSTRUCTION

SEC. 101. None of the funds appropriated in Military Construction Appropriations Acts shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed \$25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 102. Funds appropriated to the Department of Defense for construction shall be available for hire of passenger motor vehicles.

SEC. 103. Funds appropriated to the Department of Defense for construction may be used for advances to the Federal Highway Administration, Department of Transportation, for the construction of access roads as authorized by section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 104. None of the funds appropriated in this Act may be used to begin construction of new bases inside the continental United States for which specific appropriations have not been made.

SEC. 105. No part of the funds provided in Military Construction Appropriations Acts shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Army Corps of Engineers or the Naval Facilities Engineering Command, except (a) where there is a determination of value by a Federal court, or (b) purchases negotiated by the Attorney General or his designee, or (c) where the estimated value is less than \$25,000, or (d) as otherwise determined by the Secretary of Defense to be in the public interest.

SEC. 106. None of the funds appropriated in Military Construction Appropriations Acts shall be used to (1) acquire land, (2) provide for site preparation, or (3) install utilities for any family housing, except housing for which funds have been made available in annual Military Construction Appropriations Acts.

SEC. 107. None of the funds appropriated in Military Construction Appropriations Acts for minor construction may be used to transfer or relocate any activity from one base or installation to another, without prior notification to the Committees on Appropriations.

SEC. 108. No part of the funds appropriated in Military Construction Appropriations Acts may be used for the procurement of steel for any construction project or activity for which American steel producers, fabricators, and manufacturers have been denied the opportunity to compete for such steel procurement.

SEC. 109. None of the funds available to the Department of Defense for military construction or family housing during the current fiscal year may be used to pay real property taxes in any foreign nation.

SEC. 110. None of the funds appropriated in Military Construction Appropriations Acts may be used to initiate a new installation overseas without prior notification to the Committees on Appropriations.

SEC. [112] 111. None of the funds appropriated in Military Construction Appropriations Acts for military construction in the United States territories and possessions in the Pacific and on Kwajalein Atoll may be used to award any contract estimated by the Government to exceed \$1,000,000 to a foreign contractor: *Provided*, That this section shall not be applicable to contract awards for which the lowest responsive and responsible bid of a United States contractor exceeds the lowest responsive and responsible bid of a foreign contractor by greater than 20 per centum.

(TRANSFER OF FUNDS)

SEC. [114] 112. Unexpended balances in the Military Family Housing Management Account established pursuant to section 2831 of title 10, United States Code, as well as any additional amounts which would otherwise be transferred to the Military Family Housing Management Account, shall be transferred to the appropriations for Family Housing, as determined by the Secretary of Defense, based on the sources from which the funds were derived, and shall be available for the same purposes, and for the same time period, as the appropriation to which they have been transferred.

SEC. [115] 113. Not more than 20 per centum of the appropriations in Military Construction Appropriations Acts which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year.

(TRANSFER OF FUNDS)

SEC. [116] 114. Funds appropriated to the Department of Defense for construction in prior years shall be available for construction authorized for each such military department by the authorizations enacted into law during the current session of Congress.

SEC. [117] 115. For military construction or family housing projects that are being completed with funds otherwise expired or lapsed for obligation, expired or lapsed funds may be used to pay the cost of associated supervision, inspection, overhead, engineering and design on those projects and on subsequent claims, if any.

SEC. [118] 116. Notwithstanding any other provision of law, any funds appropriated to a military department or defense agency for the construction of military projects may be obligated for a military construction project or contract, or for any portion of such a project or contract, at any time before the end of the fourth fiscal year after the fiscal year for which funds for such project were appropriated if the funds obligated for such project (1) are obligated from funds available for military construction projects, and (2) do not exceed the amount appropriated for such project, plus any amount by which the cost of such project is increased pursuant to law.

SEC. [119] 117. Of the funds appropriated in this Act for Operation and maintenance of Family Housing, no more than \$13,000,000 may be obligated for contract cleaning of family housing units.

(TRANSFER OF FUNDS)

SEC. [120] 118. During the five-year period after appropriations available to the Department of Defense for military construction and family housing operation and maintenance and construction have expired for obligation, upon a determination that such appropriations will not be necessary for the liquidation of obligations or for making authorized adjustments to such appropriations for obligations incurred during the period of availability of such appropriations, unobligated balances of such appropriations may be transferred into the appropriation "Foreign Currency Fluctuations, Construction, Defense" to be merged with and to be available for the same time period and for the same purposes as the appropriation to which transferred.

SEC. 119. During the current fiscal year, in addition to any other transfer authority available to the Department of Defense, proceeds deposited to the Department of Defense Base Closure Account established by section 207(a)(1) of the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law 100-526) pursuant to section 207(a)(2)(C) of such Act, may be transferred to the account established by section 2906(a)(1) of the Department of Defense

Authorization Act, 1991, to be merged with, and to be available for the same purposes and the same time period as that account.

SEC. 120. During the current fiscal year, in addition to any other transfer authority available to the Department of Defense, not to exceed \$133,000,000 may be transferred from the Fund established by section 1013(d) of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3374) to the account established by section 2906(a)(1) of the Department of Defense Authorization Act, 1991, to be merged with, and to be available for the same purposes and the same time period as that account.

SEC. 121. Amounts appropriated under the headings "Military Construction, Defense Agencies" and "Military Construction, Defense-Wide"

in this Act or in prior military construction Acts may be used to pay the amount due, plus interest, in settlement of the claim against the Defense Logistics Agency arising out of the 1980 contract to purchase the Defense Fuel Support Point, Newington, New Hampshire, notwithstanding the one-percent limitations of 31 U.S.C. 1553(b) or section 1405 of the National Defense Authorization Act of 1991, as amended.

SEC. 122. The second paragraph under the heading, "Family Housing, Navy, and Marine Corps" in title XI of Public Law 102-368, is amended by inserting "and the August 8, 1993 earthquake in Guam" immediately after "Typhoon Omar". (Military Construction Appropriations Act, 1994.)

Funds are requested for construction, rehabilitation and related activity for water resources development projects having navigation, flood control, water supply, hydroelectric, and other attendant benefits to the Nation.

No new construction starts or major rehabilitation new starts are proposed for fiscal year 1995.

A proposed rescission of 1994 appropriations is shown elsewhere in the Budget Appendix.

Funding is included to mitigate environmental losses caused by the construction of two completed projects. The budget also includes continued funding for juvenile fish mitigation in the Columbia River Basin including funding of passage facilities at six Corps of Engineers hydroelectric dams on the mainstem Columbia and Snake Rivers and funding to support Corps activities in response to the determination that certain Snake River Salmon species are threatened and endangered. Funding is also proposed for wetland and other aquatic habitat creation under authority of section 204 of the Water Resources Development Act of 1992 and for environmental restoration at completed projects under the authority of section 1135 of the Water Resources Development Act of 1986, as amended. Under Public Law 101-512, the Department of the Interior's National Park Service will transfer funds to the Corps of Engineers for work it accomplishes under authority of the Everglades National Park Protection and Expansion Act.

Funding is provided for the Continuing Authorities Program (projects which do not require specific legislation) which includes flood control (Section 205) projects, emergency streambank and shoreline protection (Section 14) projects, beach erosion control (Section 103) projects, mitigation of shore damages (Section 111) projects, navigation (Section 107) projects, and snagging and clearing (Section 208) projects. However, consistent with the treatment of specifically authorized projects, no new construction starts are proposed for fiscal year 1995.

Funds are requested for operation, maintenance, and related activities of the Corps of Engineers at the navigation, flood control and multiple purpose projects for which it is responsible. Work to be accomplished consists of dredging, repair, and operation of structures and other facilities, including recreation facilities, all as authorized in the various Rivers and Harbors and Flood Control Acts. Related activities include aquatic plant control, monitoring of completed coastal projects, removal of sunken vessels, and the collection of domestic waterborne commerce statistics. This request also includes funds for National Emergency Preparedness as directed in Executive Order 11490.

This activity provides for flood emergency preparation, flood fighting and rescue operations, and repair of flood control and Federal hurricane or shore protection works. It also provides for emergency supplies of clean water where the source has been contaminated and, in drought distressed areas, adequate supplies of water for human and livestock consumption. An emergency supplemental appropriation of \$70 million is requested for fiscal year 1994 to complete repair of eligible non-Federal levees damaged by the Midwest floods of 1993. The proposed emergency supplemental is shown elsewhere in the Budget Appendix. In the event of another major flood or coastal emergency, additional funds may be requested.

Executive direction and management.—The Office, Chief of Engineers, and 11 division offices supervise work in 36 district offices.

Board of Engineers for Rivers and Harbors.—This advisory board was terminated in March 1993.

Coastal Engineering Research Board.—The Board provides policy guidance, reviews and plans requirements for conducting coastal engineering research and development, and recommends research project priorities.

Humphreys Engineer Center Support Activity.—This support center provides administrative services for the Office, Chief of Engineers and other separate field operating activities to include personnel, logistics, and finance and accounting.

Water Resources Support Center.—This support center performs studies and analyses for meeting national objectives. It develops planning techniques for comprehensive management and development of the Nation's water resources, and manages the Washington level review of all proposed water resources projects.

Funds are requested for planning, construction, and operation and maintenance activities associated with the Mississippi River and Tributaries water resources development project located in the Lower Mississippi Valley from Cape Girardeau, Missouri, to the Gulf of Mexico.

No funding is requested for new construction starts or new reconnaissance studies.

Funds are requested to continue the Yazoo Basin Study reformulation report, which will identify alternative plans for achieving greater levels of environmental and urban-flood protection. In addition, funds are requested to continue the mitigation plan for completed portions of the Yazoo Backwater Project in Mississippi.

Hydraulic mining in California, debris fund.—Fees paid by mine operators in the Sacramento and San Joaquin river basins for depositing mine debris in restraining works are used for maintaining the works (33 U.S.C. 683).

Maintenance and operation of dams and other improvements of navigable waters.—License fees are levied by the Department of Energy for private construction, operation and maintenance of dams, conduits, and reservoirs. Half of the fees collected are used for maintenance and operation of Federal dams and other navigation structures, and for improvement of navigable waters (16 U.S.C. 810(a)). License fees are also levied by the Department of Energy for benefits accruing directly as the result of headwater improvements by Federal projects. One hundred percent of these fees collected are used for maintenance and operation of Federal dams and other navigation structures, and for improvement of navigable waters (16 U.S.C. 803(e)).

Payments to States.—Three-fourths of the money received from lease of Federal lands acquired for flood control, navigation, and allied purposes is paid to the State in which such property is situated for public schools, roads, or other expenses of county government (33 U.S.C. 701c-3).

The Inland Waterways Trust Fund was established in accordance with the Inland Waterways Revenue Act of 1978, Public Law 95-502, and amended by the Water Resources Development Act of 1986, Public Law 99-662. Revenue is derived from taxes imposed on fuel in vessels engaged in commercial waterway transportation and is used for one half of the construction and rehabilitation costs of specified inland waterway projects. See "Construction, General" for appropriations language.

The Harbor Maintenance Trust Fund is established in accordance with the Harbor Maintenance Revenue Act of 1986 (Public Law 99-662, Title XIV, as amended). Under law, revenue is derived from: (1) receipts from a 0.125 percent *ad valorem* user fee imposed on commercial cargo loaded and

unloaded at specified U.S. ports open to public navigation, and (2) collection of charges and tolls imposed by the Saint Lawrence Seaway Development Corporation.

The Harbor Maintenance Revenue Act also authorized expenditures from the Trust Fund to fully finance the operation and maintenance of the Corporation, to finance up to 100 percent of Corps of Engineers' harbor operation and maintenance (O&M) costs, including O&M costs associated with Great Lakes navigational projects, and to rebate the U.S. portion of tolls paid on the Seaway.

Legislation will be proposed by the National Oceanic and Atmospheric Administration (NOAA) to fund programs that benefit the commercial navigation industry.

For appropriation language, see the following accounts: Army Corps of Engineers, Civil "Operation and Maintenance, General"; St. Lawrence Seaway Development Corporation "Operation and maintenance"; and Department of the Treasury "St. Lawrence Seaway toll rebate program," and "Rental Payments".

In 1990, the Coastal Wetlands Planning, Protection and Restoration Act (Public Law 101-646) authorized transfer of 18 percent of each annual appropriation from the Sport Fish Restoration Account for coastal wetlands activities; 70 percent of this amount is allocated to the Corps of Engineers for use by the Louisiana Coastal Wetlands Conservation and Restoration Task Force, chaired by the Secretary of the Army, to provide for the long-term conservation, protection, and restoration of coastal wetlands in the State of Louisiana. The Coastal Wetlands Restoration Trust Fund is established to receive these funds and finance the appropriate activities.

Title VII of the Oil Pollution Act of 1990 authorizes use of the Oil Spill Liability Trust Fund to perform oil pollution research. The initial focus of the Army Corps of Engineers effort will be in the development of advanced displays, maps, and data management systems utilizing satellite and/or aircraft imaging data. These management tools will be "near real-time", accurate, and focused for the on-scene spill coordinator's use for optimal allocation of resources and timely response to the specific oil spill situation.

ADMINISTRATIVE PROVISIONS

During the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed 100 for replacement only) and hire of passenger motor vehicles. (*Energy and Water Development Appropriations Act, 1994.*)

[GENERAL PROVISIONS]

The following sections are proposed for deletion and do not appear below:

- Sec. 101 ... Provision relating to closure of Corps district offices.
 Sec. 102 ... Provision relating to transfer of Corps district functions.
 Sec. 103 ... Provision relating to the funding of activities of the Office of the Assistant Secretary of the Army for Civil Works.
 Sec. 104 ... Provision making prior appropriations available for other purposes.

- Sec. 105 ... Provision prohibiting using funds to transfer property accountability of automated data processing equipment and software to the Department of Defense.
 Sec. 106 ... Provision requiring the advertisement for competitive bid of a specified volume of dredge material to be accomplished by hopper dredge.
 Sec. 107 ... Provision authorizing the reprogramming of funds to continue construction contracts to prevent contract termination or delays.
 Sec. 108 ... Provision providing a land conveyance to the City of Galveston, TX.

The resources in this schedule are proposed for later transmittal under proposed legislation to support State systemic education reform efforts, to establish a national system for school-to-work transition, and for educational technology. Under pending legislative proposals, resources would be requested for the following activities:

Goals 2000: Educate America.—Funds would be used to create a national framework for education reform and for meeting the National Education Goals. New authorities would include: a National Education Goals Panel; a National Education Standards and Improvement Council; grants to develop voluntary opportunity-to-learn standards and to help States and localities develop systems of assessments linked to State content standards; and formula grants to support State and local efforts to improve teaching and learning to benefit all children.

General and special funds—Continued

EDUCATION REFORM—Continued

School-to-Work Opportunities.—Funds would be used to initiate a national system for school-to-work transition to be administered jointly by the Departments of Education and Labor. Funds would be requested for the two Departments to use jointly to establish a national framework within which all States can create statewide systems to help youth acquire the knowledge, skills, abilities, and labor market information they need to make an effective transition from school to work or to further education or training.

Educational technology.—Funds would be used to support State planning for educational technology, to improve the capacity of technical assistance providers to advise State and local educational agencies about educational technology, and for research, development, and demonstrations of effective applications of technology to education.

The resources in this schedule are proposed for later transmittal under proposed legislation to revise and reauthorize programs currently authorized under the Elementary and Secondary Education Act, as amended. Under the Administration proposal for Title I of that Act, funds would be provided to States and to local school districts for the following activities:

Grants to local educational agencies.—Funds would be allocated through Basic and Concentration grant formulas for local programs which stress the achievement of challenging State education standards, support schoolwide improvement, integrate Title I assessment and curriculum with State systemic reforms, and target funds more effectively on high-poverty schools.

Capital expenses.—Funds would be provided by formula to States to support capital costs incurred by local educational agencies associated with providing educational services to eligible children attending non-public schools.

Even start.—Funds would be provided by formula to States, which would award grants for local projects to provide family literacy services to low-income families with children under 8 years of age and parents needing to acquire basic literacy skills.

State agency migrant program.—Funds would be provided by formula to States for educational services to children of migratory farmworkers and fishers. Funds and services would be concentrated on the most recently mobile children.

State agency neglected and delinquent program.—Funds would be provided by formula to States for educational services to children and youth under age 21 in State neglected, delinquent or adult correction facilities. Services would help institutionalized youth achieve to the same challenging standards established for students in local public schools.

State program improvement grants.—Funds would be provided by formula to States to be used for technical assistance, incentives, and other strategies to assist schools and districts to implement Title I programs which help children meet challenging State education standards.

Demonstrations of innovative practices.—Funds would be used to test and evaluate strategies and approaches for educating disadvantaged children, including migrant children, neglected children and delinquent children.

Evaluation.—Funds would support national activities to evaluate Title I programs and a new national assessment of Title I effectiveness in helping schools and children achieve challenging State education standards.

The resources in this schedule are proposed for later transmittal under proposed legislation to revise and reauthorize

programs currently authorized under the Elementary and Secondary Education Act. Under the pending proposal, resources would be requested for the following activities:

Basic support payments.—Payments would be made only for children who live on and whose parents work on Federal property. Funds would be paid to school districts in each State based on three factors: (1) the number of federally connected children enrolled; (2) the cost of educating children in the State; and (3) the average share of revenues for education provided from local sources in the State.

Supplemental payments for children with disabilities.—Payments would be made for additional assistance to school districts educating children with disabilities who live on and whose parents work on Federal property.

Special payments for increases in military dependents.—One-time payments would be made to school districts experiencing substantial increases in military dependent students to enable the districts to hire additional teachers and meet other expenses.

Capital fund payments.—Formula-based payments for capital improvements would be made to school districts in which at least 50 percent of the children enrolled reside on Indian lands.

Facilities maintained by the Department of Education.—Payments would be made to maintain federally owned school facilities.

Base closure assistance.—Funds would be used to assist school districts experiencing significant reductions in student enrollments due to base closures to restructure educational programs, redesign facility utilization or support other activities being carried out as a direct result of military realignment and closure policy decisions.

The resources in this schedule are proposed for later transmittal under proposed legislation to revise and reauthorize programs currently authorized under the Elementary and Secondary Education Act of 1965 and the Stewart B. McKinney Homeless Assistance Act. Under the pending legislative proposal, resources would be requested for the following activities:

Eisenhower professional development State grants.—Formula grants to States, local districts, and institutions of higher education to support intensive, high-quality professional development in the core academic subjects.

Safe and drug-free schools and communities.—

State grants.—Formula grants to States and outlying areas to assist in combatting school violence and drug use by the Nation's children and youth.

Postsecondary education programs.—Funds to support drug and violence prevention programs at institutions of higher education.

National programs.—Funds to support activities to prevent the illegal use of drugs and violence among, and promote safety and discipline for, students at all educational levels. Such activities may include training, demonstrations, direct services to school districts with severe drug and violence problems, research, program evaluation, and development and dissemination of information and materials.

Safe schools.—A new program of grants to local educational agencies to provide special assistance in developing and implementing violence prevention programs, policies, and practices designed to make schools safe and conducive to learning.

Other programs.—

Charter schools.—Grants to State and local educational agencies to support the design and initial implementation of model charter schools. These schools are created by teachers, parents, and members of the community and are exempt from certain local, State, and Federal regulations.

Technical assistance for improving ESEA programs.—Funds to support 10 comprehensive regional technical assistance centers providing services to States, local educational agencies, schools, and other recipients of Federal education funds in implementing elementary and secondary education programs.

School finance equalization assistance.—Funds to promote greater equity in the distribution of financial resources among school districts through: the support of technical assistance; research and data analysis on methods of improving financial equity; and development and dissemination of models to help States construct more equitable funding systems.

Inexpensive book distribution.—One award, to Reading is Fundamental, to support reading motivation activities, including the distribution of free books for children to read and keep.

Arts in education.—Support for Federal leadership activities in arts education as well as the education activities of the Kennedy Center and Very Special Arts.

Magnet schools assistance.—Funds for local educational agencies for magnet school programs that are part of approved desegregation plans.

Education for homeless children and youth.—Funds to States, Outlying Areas, and the Bureau of Indian Affairs to support a State office to coordinate education for homeless children and youth. In addition, State and local educational agencies provide educational and support services to homeless children and youth that enable them to enroll in, attend, and achieve success in school.

Women's educational equity.—Funds to support implementation of gender-equity practices at schools and colleges, and the development and dissemination of educational materials that promote educational equity for women and girls.

Funds made available under this account were reappropriated by the Supplemental Appropriations Act, 1987 (Public Law 100-71) from funds enjoined in *United States of America v. Board of Education of the City of Chicago*. The funds were reappropriated for the specific purpose of settling this case. The funds are used by the Chicago Board of Education to implement Project CANAL (Creating A New Approach to Learning), the project approved by the court to support the Board's desegregation efforts.

The Department of Education provides these funds to the Chicago Board of Education in annual increments upon receipt and approval of an annual plan for Project CANAL activities.

The resources in this schedule are proposed for later transmittal under proposed legislation to revise and reauthorize programs currently authorized under the Elementary and Secondary Education Act, as amended. Under the pending legislative proposal, resources would be requested for the following activities:

Grants to local educational agencies.—Formula grants to local educational agencies to support their efforts to improve and reform elementary and secondary school programs that serve Indian students.

Special programs for Indian children.—Competitive grants to Indian tribes and organizations to help Indian-controlled schools get started and established. Funds under this activity would also support projects designed to develop, test, and demonstrate the effectiveness of services and programs to improve educational achievement of Indian children.

Professional development and adult education.—Funds to support programs to train professional personnel serving Indians and to improve educational opportunities for Indian adults.

National activities.—Funds to support research, evaluation, data collection, and related activities.

Grants to State educational agencies.—Grants to enable State educational agencies to implement comprehensive, Statewide strategies for providing Indian children and adults with greater opportunities to meet challenging State education standards.

Federal administration.—Funds to support the administrative expenses of the Office of Indian Education and the National Advisory Council on Indian Education.

State grants.—

Grants to States.—This formula grant program assists States in providing special education and related services to children with disabilities. In order to participate in the program, States must provide services to all children with disabilities ages 6 through 17. States must be providing services to all children ages 3 through 5 with disabilities in order to count 3-through-5-year olds for allocations. Children with disabilities ages 18 through 21 must also be served, except when such services would be inconsistent with State law or practice, or the order of any court. To be eligible for a grant, each State is required to submit an acceptable State plan that requires the development and use of an individualized education program for each student with a disability, the establishment of procedural safeguards for all children with

disabilities and their parents, and the training of personnel for these special education programs.

Chapter 1 handicapped program.—As part of its reauthorization proposal for the Elementary and Secondary Education Act of 1965, the Administration has proposed that the Chapter 1 handicapped program be merged with the formula grant programs under the Individuals with Disabilities Education Act. To offset the termination of funding for the Chapter 1 handicapped program, the funds used in 1994 for 3-through-21-year-olds under the Chapter 1 handicapped program have been added to the Grants to States program, and the funds used in 1994 for birth-through-two-year-olds have been added to the Grants for Infants and Families program.

Preschool grants.—This formula grant program provides additional funds to States to further assist them in providing special education and related services to children with disabilities ages 3 through 5 who are counted under the Grants to States program and, at a State's discretion, to 2-year old children with disabilities who will reach age 3 during the school year. To receive awards under this program, States must serve all 3-through-5-year-olds with disabilities. Funds have been added for the 3-through-5-year-olds who were served in 1994 under the Chapter 1 handicapped program and would now be served under the Grants to States program.

Grants for infants and families.—This formula grant program assists States in: (1) developing and implementing statewide programs of early intervention services for infants and toddlers with disabilities, from birth through age 2, and their families; (2) enhancing their capacity to provide quality early intervention services; and (3) expanding and improving existing early intervention services. States may use funds to provide a free appropriate public education to children with disabilities from their third birthday to the beginning of the following school year. The statewide program must be implemented by the fourth year of a State's participation and services must be provided to all infants and toddlers with disabilities by the fifth year of a State's participation. All States must have fully implemented the program in order to receive 1993 funds. Primary funding for services is provided by other Federal, State, local, and private sources.

Special purpose funds.—

Deaf-blindness.—Awards are made to support activities to improve special education services for children with both deafness and blindness.

Serious emotional disturbance.—Projects are supported to improve special education services for children with serious emotional disturbance.

Severe disabilities.—The program supports activities to improve special education services for children with severe disabilities.

Early childhood education.—Awards support activities to expand and improve early intervention and special education services for children with disabilities from birth through age 8.

Secondary and transitional services.—Projects improve secondary school special educational services and assist youths with disabilities in moving from school to work, further education, and adult services.

Postsecondary education.—The program supports demonstration projects to assist persons with disabilities in pursuing postsecondary, vocational, technical, continuing, and adult education.

Innovation and development.—Support is provided for research and related activities to improve special education and early intervention services.

Media and captioning services.—Funds are used for a variety of media related purposes including captioning films and

television for individuals with hearing impairments, and descriptive video and recording activities for individuals with visual impairments.

Technology applications.—Awards are made to advance the use of technology, media, and materials in providing special education services.

Special studies.—Studies are conducted to provide information on and improve the effectiveness of special education programs.

Personnel development.—Awards are made to improve the quality and increase the supply of personnel in the fields of special education and early intervention.

Parent training.—Awards are made to parent organizations to provide training and information to parents regarding the education of their children.

Clearinghouses.—The program supports clearinghouses to disseminate information to parents and others regarding special education, provide information on available postsecondary services, and encourage and assist individuals to seek careers in special education.

Regional resource centers.—Centers provide technical assistance to States to help them provide special education and early intervention services.

Vocational rehabilitation State grants.—The basic State grant program provides Federal matching to State vocational rehabilitation agencies to assist individuals with physical or mental impairments to become gainfully employed. Services provided include vocational evaluation, counseling, mental and physical restoration, education, vocational training, work adjustment, job placement, and post-employment services. Priority is given to serving those with the most severe disabilities.

The first table below presents estimates of the number of persons served and rehabilitated nationally under the program. The second table shows relative State performance in rehabilitating individuals with severe disabilities.

Client assistance State grants.—Formula grants are made to States to provide assistance in informing and advising clients and applicants of benefits available under the Rehabilitation Act and, if requested, to pursue legal or administrative remedies to ensure the protection of the rights of individuals with disabilities.

Training.—Grants are made to States and public or non-profit agencies and organizations, including institutions of higher education, to increase the number of skilled personnel available for employment in the field of rehabilitation.

Special demonstration programs.—Grants are made to develop innovative methods and comprehensive service pro-

grams to help persons with disabilities achieve satisfactory vocational outcomes.

Supported employment projects.—Grants are made for special projects and demonstrations to expand or improve the provision of supported employment services to individuals with the most severe disabilities.

Migratory workers.—Projects provide comprehensive vocational rehabilitation services to migrant or seasonal farm workers with disabilities.

Recreational programs.—Grants are made to provide individuals with disabilities with recreation and related activities to aid in their employment, mobility, independence, socialization, and community integration.

Protection and advocacy of individual rights.—Formula grants are made to protection and advocacy systems to protect the legal and human rights of individuals with disabilities.

Projects with industry.—Projects provide training in work settings to prepare individuals with disabilities for employment and career advancement in the competitive labor market.

Supported employment State grants.—Formula grants are made to assist States in developing programs with public and nonprofit organizations to provide supported employment services for individuals with the most severe disabilities who require on-going support services to enter or retain competitive employment.

Independent living.—Grants are awarded to States and non-profit agencies for services designed to enable individuals with severe disabilities to live and function more independently.

Evaluation.—Studies are conducted to evaluate the impact and effectiveness of various programs authorized under the Rehabilitation Act. In 1992, the Department initiated a multi-year national longitudinal study of the Basic State Vocational Rehabilitation grant program.

Helen Keller National Center for Deaf-Blind Youths and Adults.—The Center provides services to deaf-blind youths and adults and conducts research and training programs.

National Institute on Disability and Rehabilitation Research.—The Institute carries out a comprehensive and coordinated program of rehabilitation research and related activities. Through grants and contracts, it supports research and training centers, rehabilitation engineering centers, research and demonstration projects, information dissemination and utilization projects, and training activities.

Technology assistance.—Grants are made to States to assist them in developing and implementing statewide programs that facilitate the provision of assistive devices and services to persons of all ages with disabilities.

This institution provides college preparatory, undergraduate, and continuing education programs for persons who are deaf, and graduate programs related to deafness for students who are deaf and students who are hearing. The University also conducts basic and applied research and public service programs for persons who are deaf and persons who work with them.

Gallaudet operates two pre-college programs on the main campus of the University. The Kendall Demonstration Elementary School serves students who are deaf from infancy through age 15, and the Model Secondary School for the Deaf serves students who are deaf of high school age. Both schools also develop and disseminate information on effective educational techniques and strategies for teachers and professionals working with students who are deaf or hard of hearing.

In 1993, the Federal appropriation represented 65.7 percent of the University's operating budget, excluding Federal financial aid, vocational rehabilitation, and competitive grants, and 98.7 percent of the operating budgets of the related elementary and secondary schools. Funds are also requested for endowment matching grants.

Vocational education.—

Basic grants.—Formula grants provide funds to States and localities to expand and improve their programs of vocational education and promote equal opportunity in vocational education programs for historically underserved populations. Funds under the Indian program are awarded to federally recognized Indian tribes and are in addition to services provided under other provisions of the Perkins Act. Funds under the Hawaiian natives program are awarded to organizations primarily serving and representing Hawaiian natives. Funds under the Territorial set-aside support the expansion and improvement of vocational education programs in American Samoa, Guam, the Northern Marianas, and Palau.

State councils.—Formula grants support the activities of the State councils which provide advice on the State vocational education plan and evaluate State vocational education programs. Each council is composed of 13 members, 7 of whom represent the private sector.

Tech-prep education.—Formula grants to States support planning and demonstration grants to consortia of local educational agencies and postsecondary institutions to develop and operate model 4-year programs. Programs begin in high school and provide students with the mathematical, science, communications, and technological skills needed to earn a 2-year associate degree or a 2-year certificate in a specific occupational field.

Tribally controlled postsecondary vocational institutions.—Grants support the operation and improvement of tribally controlled postsecondary vocational institutions, to ensure continued and expanded educational opportunities for Indian students.

National programs.—

Research.—Funds are awarded on a competitive basis for research activities that contribute to knowledge of how to improve access to vocational education for underserved populations and how to improve vocational education nationally. Activities include a national center for research in vocational education, regional curriculum coordination centers, and a program of discretionary research projects.

Demonstration programs.—Funds support vocational education demonstration projects that are designed to develop and demonstrate more effective methods of providing vocational education.

Data systems.—Funds support the operation of the National Occupational Information Coordinating Committee and the State occupational information coordinating committees.

General and special funds—Continued**VOCATIONAL AND ADULT EDUCATION—Continued**

The Smith-Hughes Act of 1917 (Public Law 64-347), as amended, provides a permanent appropriation for vocational education basic grants and national programs.

Adult education.—

State programs.—Formula grants are made to States to eliminate functional illiteracy among the Nation's adults and to assist adults in obtaining a high school diploma or its equivalent.

National programs.—Funds support discretionary activities to evaluate the effectiveness of Federal, State, and local adult education programs and provide technical assistance to States to improve program quality. Funds also support the operation of the National Institute for Literacy.

Literacy training for homeless adults.—Funds provide discretionary grants to States to support special literacy services for the homeless.

Workplace literacy partnerships.—Funds support discretionary grants for projects to provide literacy and basic skills education in the workplace.

State literacy resource centers.—Formula grants support the creation of State or regional adult literacy resource centers that coordinate literacy services and expand the capacity of State and local organizations to provide literacy services.

Literacy programs for prisoners.—Funds support discretionary grants to establish, improve, and expand literacy programs for prisoners in State and local institutions.

The narrative and tables below reflect the Administration's budget and legislative proposals.

Federal Pell Grants.—Undergraduate students establish eligibility for these grants under award and need determination rules set out in the authorizing statute and the annual appropriation act. The maximum award for FY 1995 would be \$2,400, an increase of \$100 over the 1994 level.

Federal Work Study.—Federal grants are awarded by formula to qualifying institutions, which develop and provide part-time jobs for eligible undergraduate and graduate students with demonstrated need. Federal grants in most cases pay 75 percent of a student's hourly earnings, with the remainder paid by the employer. Hourly earnings must not be less than the Federal minimum wage. Institutions are required to spend at least 5 percent of their Work-Study allocation to pay students working in community service jobs. The budget amount would increase recipients by 116,000. The budget and legislative program also proposes to require institutions participating in the Work-Study program to use at least 10 percent of their allocation to pay students employed in community service activities. The 10 percent allocation would help pay wages in over 82,900 community service jobs during the 1995-96 school year.

Federal supplemental educational opportunity grants.—Federal funds are awarded by formula to qualifying institutions, which use these funds at their discretion to award grants to undergraduate students, with priority for Pell Grant recipients and others with exceptional need. The Federal share of such grants may not exceed 75 percent of the total grant.

Perkins Loan program. Schools will award loans from revolving funds, composed of collections on prior year loans, and Federal payments for loan cancellations granted in exchange for specified types of teaching, military or public service.

Perkins loans—Cancellations.—Under the Perkins loan (formerly national direct student loan (NDSL)) cancellation program, institutional revolving funds are reimbursed for indebtedness cancelled as a result of a borrower engaging in certain public service occupations.

State postsecondary review program.—This program supports State review of problem postsecondary institutions as part of the process of determining institutional eligibility for Federal student financial assistance.

The following tables display student aid funds available, the number of aid awards, average awards, and the unduplicated count of students receiving awards, including aid under the Federal Family Education Loan Program (FFELP), formerly the Guaranteed Student Loan (GSL) program, and the Federal Direct Student Loan (FDSL) Program, as well as under programs in this account. The tables include the effects of matching funds wherever applicable. Perkins loan amounts also reflect available capital in institutional revolving funds, including loan collection and loan cancella-

tion receipts. FFELP and FDSL amounts reflect the capital actually loaned, not the Federal costs of those loans.

The Federal Direct Student Loan (FDSL) Program is a new streamlined lending system that will simplify the processes of obtaining and repaying loans for student and parent borrowers and will provide borrowers with greater choice in repayment plans. The program will also save taxpayers money because the Federal Government can borrow at lower interest rates than banks and the Department will not make interest subsidy or special allowance payments to lenders. The FDSL Program was authorized by the Student Loan Reform Act (SLRA), which was included as part of the Omnibus Budget Reconciliation Act (OBRA) of 1993, and replaces the Federal Direct Loan Demonstration Program, which was authorized under the Higher Education Act Amendments of 1992. This program will provide students with the same benefits they are currently eligible to receive under the Federal Family Education Loan (FFEL) Program but will provide loans to students through Federal capital rather than through private lenders.

Four types of FDSL Program loans are available: Direct Stafford loans, Direct Unsubsidized Stafford loans, Direct PLUS loans for parents, and Direct Consolidation loans.

The FDSL Program will replace the FFEL Program and will be gradually phased in, beginning with the 1994-1995 academic year. In accordance with the phase-in schedule outlined in the SLRA, the Department expects to achieve the following Federal Direct Student Loan levels as a percentage of total loans (combined FFEL Program and FDSL Program loans) for each of the following academic years: 1994-1995, Federal Direct Student Loans will represent 5 percent of new loan volume; for 1995-1996, 40 percent of new loan volume; for 1996-1997 and 1997-1998, 50 percent of new loan volume; and for 1998-1999, 60 percent of new loan volume. However, beginning in academic year 1996-1997, the Secretary may exceed the statutory percentage levels shown above if warranted by demand.

The Government will provide loan funds to institutions to originate loans to students or to an alternative originator (a contractor) that will originate loans to students. The Secretary will pay fees to institutions that originate loans. For academic year 1994-1995, fees shall not exceed a program-wide average of \$10 per borrower. Similarly, the Department will pay fees to the alternative originator for origination activities; these fees will be negotiated under contract.

Federal costs of the FDSL Program are partially offset by an origination fee of 4 percent of the amount of principal.

Under the FDSL Program, borrowers will have more repayment options than they have under the FFEL Program. Borrowers can select from the following types of repayment plans: a standard repayment plan, with a fixed annual repayment amount over a fixed period of time; an extended repayment plan, with a fixed annual repayment amount paid over an extended period of time; a graduated repayment plan, with annual repayment amounts established at 2 or more graduated levels and paid over a fixed or extended period of time; an income contingent repayment plan, with varying annual repayment amounts based on the income of the borrower, paid over an extended period of time prescribed by the Secretary, not to exceed 25 years (not available to Direct PLUS Loan borrowers); and an alternative repayment plan, for borrowers who demonstrate that the available repayment plans are not adequate to accommodate their exceptional circumstances.

The new income contingent repayment plan will allow borrowers to repay their loans over an extended period of time and will enable students who take lower-paying jobs, such as community service jobs, to repay their loans. Under this program, all students will have the opportunity to repay as a percentage of their income over time.

The following tables display projected loan volume, number of loans, and average loan amount, under the budget and legislative program request. Amounts shown reflect loans made with Federal funds that will be repaid by the borrowers to the Treasury.

Aid for institutional development.—

Strengthening historically Black colleges and universities.—Funds under this heading would support grants to help historically Black undergraduate and graduate institutions equalize educational opportunity and strengthen their management and fiscal operations so that they may eventually become self-sufficient.

Strengthening institutions.—Funds would support planning and development grants for improving academic programs and financial management at schools that enroll high proportions of disadvantaged students and have low per-student expenditures.

Endowment challenge grants.—Funds would support endowment challenge grants for historically Black colleges

and universities and other institutions eligible to participate in the institutional development program.

Evaluation.—Funds would support an evaluation to determine the overall impact and effectiveness of the Aid for Institutional Development programs, which have not been evaluated in over 10 years.

Other aid for institutions.—

Program development.—In 1995, funds would support projects under: the Fund for the Improvement of Postsecondary Education, to address problems and encourage improvements in postsecondary education; the minority science improvement program, to improve science education at predominantly minority institutions; international education and foreign language study programs, to help strengthen American education in foreign languages and area and international studies and to provide research and study opportunities in foreign countries for American graduate students, faculty members, and teachers of foreign languages; innovative projects for community service, to encourage community and national service and to expand efforts to combat illiteracy; minority teacher recruitment, to encourage minorities to enter teaching careers; urban community service projects, to support institutions through cooperative agreements with businesses and organizations to resolve problems in their local communities; and the student financial assistance database and information line, to fund the second year of a feasibility and design study.

Interest subsidy grants.—In 1995, funds would meet mandatory interest subsidy costs of construction loan commitments made prior to 1974.

Aid for students.—

Federal TRIO programs.—In 1995, funds would support: undergraduate outreach programs to help individuals from disadvantaged backgrounds enter and complete college; the student support services program to assist postsecondary students from disadvantaged backgrounds who need academic support to successfully complete their education; the McNair postbaccalaureate program, to provide support to disadvantaged groups underrepresented in graduate education; and staff training, to provide training opportunities for staff employed in or preparing for employment in TRIO programs. In 1995, funds would also support the continuation of an evaluation of the TRIO programs.

Scholarships.—In 1995, funds would support: the national science scholars program for outstanding undergraduate students studying in the areas of mathematics and science; Byrd honors scholarships for outstanding students who show promise of continued excellence; and Douglas teacher scholarships for outstanding students who intend to teach at the elementary and secondary level.

Graduate fellowships.—In 1995, funds would support: Harris fellowships, to assist underrepresented groups to pursue masters degrees, professional study, and doctoral study; Javits fellowships, to assist outstanding students to complete graduate-level education; and graduate assistance in areas of national need, to provide fellowships to financially needy graduate students who are studying in areas of national need.

School, college, and university partnerships.—In 1995, funds under this heading would promote partnerships to support programs designed to improve the academic skills, postsecondary opportunities, and employment prospects of secondary school students.

Legal training for the disadvantaged.—In 1995, funds under this heading would assist disadvantaged individuals in undertaking training for the legal profession.

This account also records collections on outstanding prior year loans under the Cuban Loan program and Law Enforcement Education program. No new loans have been made under these activities since 1980. Most of the cumu-

lative portfolio has been in default for many years, and was written off under standard procedures in FY 1993. Relevant loan data are as follows:

Howard University is a private, nonprofit educational institution consisting of 17 schools and colleges. Federal funds are used to provide partial support for university programs as well as for the teaching hospital facilities. In 1993, direct Federal appropriations for the academic and research programs represented 55 percent of the university's educational and general expenditures.

Program operations.—Title VII, Section 702, of the Higher Education Act of 1965, as amended, authorizes such sums as may be necessary to pay obligations incurred prior to 1987 under the Higher Education Facilities Loan Program previously authorized under Title VII, Part C. Prior to 1987, this program provided direct loans at 5.5 percent interest, repayable within 50 years, to colleges, universities, and higher education building agencies for the construction, reconstruction, or renovation of academic facilities. No new loan commitments have been made since 1981. The Higher Education Act Amendments of 1992 do not authorize new loan activity in this account.

Financing.—Loan capital for this program has been provided both through appropriations and the sale of participation certificates which were backed by pools of existing higher education facilities loans held by the Federal Government. All participation certificates held by this account were redeemed as of September 30, 1988.

Interest is payable to Treasury on the amount of appropriations paid out for loan capital and remaining outstanding, less the average undisbursed cash balance in the fund during the year. The interest rate certified by Treasury for payment from the account is 5.75 percent in 1994.

Repayments on outstanding loans, interest revenue, and investment income are used to pay operating expenses and

to repay interest costs to Treasury. For 1995, operating income is expected to be sufficient to finance all expenses. No appropriation is needed. The status of defaulted loans is shown in the table below:

Program operations.—Loans in this account were made for construction and renovation of college housing facilities prior to 1987 under title IV of the Housing Act of 1950. The Higher Education Amendments of 1986 repealed title IV and gave the Secretary authority to manage outstanding college housing loans under title VII, Part F of the Higher Education Act as amended. New loans made after 1986 under Part F of the Higher Education Act amendments of 1986 were financed in the College Housing and Academic Facilities Loans Account. The Higher Education Act amendments of 1992 do not authorize new loan activity in this account.

Financing.—Loan capital for this program was provided primarily through Treasury borrowings and the sale of participation certificates which were backed by pools of college housing loans held by the Federal Government. The participation certificates sold by the Government National Mortgage Association (GNMA) and held by this account were redeemed as of September 30, 1988. As of September 30, 1993, \$555 million in loan capital is still due the Treasury at an annual interest rate of 2.75 percent.

Available resources (loan repayments, interest revenue, and other income in excess of operating expenses) will be used to redeem a portion of the agency's debt in outstanding Treasury borrowings, as is being done in 1994 and as was done in preceding years. Approximately \$53 million will be repaid to Treasury in 1994 and \$36 million will be repaid in 1995; \$43 million was repaid in 1993.

The status of defaulted loans is shown in the table below:

Note.—The re-estimate of the 1993 cohort was downward due to lower actual interest rates and revised technical assumptions, resulting in less subsidy cost than previously estimated. (The re-estimate of the 1992 cohort was upward and appears within the program account.) The current balance at the end of FY 1994 reflects \$123.7 million from FY 1993 and \$93.4 million from FY 1994. The latest downward re-estimate appears in the current year, as a receipt to the special fund receipt account, in accordance with Credit Reform budget principles.

As required by the Federal Credit Reform Act of 1990, this program account records for this program the subsidy costs associated with Federal Family Education Loans (FFEL), formerly guaranteed student loans (GSL), committed in 1992 and beyond, as well as administrative expenses of the program. Administrative expenses include discretionary expenses for salaries, expenses and overhead of employees working directly on the program. FY 1993 mandatory administrative expenses represent supplemental preclaims assistance and contract collection costs for pre-1992 and 1992 loans in 1993. Beginning in 1994, mandatory administrative expenses for FY 1992 loans are included in the FY 1992 reestimated subsidy costs; and mandatory administrative expenses for pre-1992 loans are included in the liquidating account, from which they originated. Beginning with the 1993 cohort, mandatory administrative costs are included in the FFEL subsidy estimates of each year's cohort. The subsidy amounts are estimated on a net present value basis.

The Federal Family Education Loan (FFEL) program, promotes the availability of loans from banks and other lenders to students and their parents to help meet the costs of attending participating universities, colleges, and other postsecondary institutions after taking into consideration family financial resources. This is accomplished through the provision of Federal reinsurance against borrower default as well as through substantial Federal interest subsidy payments to lenders. In general, the program is administered by State and private nonprofit guaranty agencies that serve as intermediate loan insurers, defaulted loan collectors, and providers of various services to lenders. The Government also provides substantial subsidies to these agencies. Through July 1984, the Federal Government also provided direct loan insurance and for such loans, continues to be responsible for defaulted loan collection and providing assistance to lenders.

Four types of guaranteed loans are available: Stafford loans, which provide in-school interest subsidy; Unsubsidized Stafford loans, which carry the same interest rate as the Stafford loans but do not provide in-school interest subsidy; PLUS loans for parents; and Supplemental loans for Students (SLS), which carry a higher interest-rate cap than Stafford loans and do not provide in-school interest subsidy. The SLS program will be terminated as of July 1, 1994. Evidence of financial need is required for a student to receive a subsidized Stafford loan. The other three loan programs are available to any eligible borrower. All loans can be used only to meet qualified educational expenses.

The Federal Government currently pays lenders a quarterly special allowance throughout the life of each Stafford and unsubsidized Stafford loan originated after October 1, 1992, when the 91-day Treasury bill rate plus 3.1 percentage points exceeds the Stafford student interest cap of 9 percent. Beginning July 1, 1994, the Stafford student interest-rate cap will be 8.25%. The Government is also liable for 100 percent of

costs related to borrower death, disability, and bankruptcy, and up to 98 percent for costs related to default. (In cases of lender-of-last-resort loans, the Government is liable for up to 100 percent of default costs.)

Under the subsidized Stafford loan component, the Federal Government pays the interest obligation of eligible borrowers while they are in school and during grace and certain deferment periods. Beginning July 1, 1994, all FFEL Program borrowers will pay a loan origination fee equal to 3 percent of the loan principal. Also beginning July 1, 1994, guaranty agencies may charge borrowers an insurance premium of up to 1 percent. Fees and premiums are currently higher than these amounts.

The borrower's interest obligation that accrues while in school under the other loan programs is not paid by the Federal Government.

Beginning July 1, 1994, no minimum amount is required to consolidate for Consolidation Loans; however, borrowers consolidating less than \$7,500 must repay their loans in not more than 10 years. Also beginning July 1, 1994, interest rates on Consolidation Loans will be equal to the weighted average of the interest rates on the loans consolidated rounded upward to the nearest whole percent.

The Student Loan Reform Act (SLRA) of 1993 eliminated the administrative cost allowance (ACA) for guaranty agencies beginning October 1, 1993. The Department will pay guaranty agencies an administrative expense allowance for fiscal year 1994 equal to one percent of the agency's new guarantee volume (on the same basis as ACA payments), unless circumstances for a particular guaranty agency indicate an alternative approach in the judgment of the Secretary. Under the SLRA, these payments will come from administrative funds provided under Federal Direct Loan Program transition support, rather than from the FFEL Program account. Funds for "administrative expenses subject to limitation" requested in this account support administration of the program in the Office of Postsecondary Education.

Federal receipts primarily include collections on defaulted loans and reimbursements from guaranty agencies for their default collections. Also included are Student Loan Marketing Association (Sallie Mae) repayments of loans from the Federal Financing Bank; these transactions are treated as part of the cost of the program.

The SLRA introduces the following new fees for participating lenders and holders of FFEL Program loans: (1) for any FFEL loan for which a disbursement is made on or after October 1, 1993, the Federal Government shall collect 0.5 percent of the principal amount of the loan from the lender's interest and special allowance payments; (2) the Student Loan Marketing Association is now required to pay the Federal Government an offset fee of 0.3 percent of the principal on each FFEL loan (other than Consolidation Loans) that it holds and that was acquired on or after enactment of the SLRA; (3) for each Consolidation Loan made on or after October 1, 1993, the holder shall pay an annual rebate fee of 1.05 percent of the principal plus accrued unpaid interest to the Department (the rebate fee will be paid monthly). In addition, prior to enactment of the SLRA, holders of loans that were made or purchased with tax-exempt funds received a higher quarterly special allowance rate than other lenders; the SLRA provides that loans financed with tax-exempt funds receive the same special allowance rates as other loans.

Total loan volume disbursed under all program components under the President's program is expected to be \$15.2 billion in 1995, resulting in outstanding loans at the end of 1995 of \$79.5 billion from both liquidating and program accounts combined.

The Administration will assess fees on States with high default schools. States that have institutions with cohort default rates exceeding 20 percent must pay the Secretary a

percentage of the State's new loan volume equal to a portion of the percentage by which the State's overall default rate exceeds 20 percent. The portion of the percentage used in the calculation increases from 12.5 percent in 1995 and 20 percent in 1996 to 50 percent in 1997 and succeeding years. This will encourage improved monitoring and licensing of postsecondary institutions by States.

The text tables that follow provide additional information. These text tables include data from the FFEL (liquidating) account. They do not include comparable data in 1994 for Direct Loans. (See Federal Direct Student Loan Program account).

¹1993, 1994 and 1995 data reflect 1993, 1994 and 1995 cash flows for loans guaranteed in 1993, 1994 and 1995, as calculated under credit reform requirements, plus 1993, 1994 and 1995 costs associated with loans made prior to 1992 (that appear in the liquidating account).

²Includes fees pursuant to the Student Loan Reform Act of 1993, as part of the Omnibus Reconciliation Act of 1993, P.L. 103-66.

³Includes direct Federal collections and collections due to Federal tax refund offset. Some of these collections are displayed below as offsets to Federal administrative costs, principally for collections work by Federal contractors. These collections are net of amounts retained by guarantee agencies to cover their collection costs. This "collections retention allowance" is reflected in the section on guarantee agency administrative costs.

⁴Includes repayment of agency advances, elimination of excess agency reserves through direct payments to the Government and through reduced reinsurance payments to the agencies, and purchase of rehabilitated loans by the agencies.

⁵Agency collection costs are not directly reimbursed by the Government; instead, they are financed by retained agency collections, and are thus reflected in reduced net agency collections transmitted to the Government. The transactions are displayed here on a gross and net basis for completeness.

⁶Federal contract collection costs are payments to debt collection contractors. The payments are financed in entirety by collections.

⁷Includes scheduled default collections from wage garnishment and IRS offsets pursuant to P.L. 102-164, and estimated default collections due to the proposed extension of the repeal of the statute of limitations provisions.

Because the costs of subsidizing educational loans can vary widely within a program, it becomes valuable to collect data for homogeneous groups within cohort or risk categories. Factors that were considered in developing appropriate risk categories include default behavior of borrowers, type of educational institution attended by the borrower, and the borrower's year in school.

The Stafford programs have been divided into four risk categories: (1) 4-year college, first and second year students, (2) 4-year college, all other students, (3) students attending 2-year schools, and (4) proprietary school students. Borrowing under the Unsubsidized Stafford program was estimated to occur under categories one and two in FY 1993, but for future years reflects the merger of SLS. SLS loans have been divided into two risk categories: (1) nonproprietary school students, and (2) proprietary school students. The SLS component is eliminated as of July 1, 1994. PLUS loans are not further categorized.

Loan data by risk category provides further insight into the FFEL program. The following text table depicts preliminary findings of subsidy costs based on loan program by risk category. Gross default rates (default rates excluding collections on defaulted loans) by risk category are also displayed.

Frequently used default rate measures are the gross and net cumulative default rates. The former represents cumulative defaults divided by cumulative loans that have matured (i.e., entered repayment). The latter represents cumulative defaults minus cumulative collections on defaults, divided by cumulative matured loans. These rates are the best measures of the long-term default costs of the entire portfolio and the best indicators of longer term trends in default costs. The following table displays these gross and net default rates.

Cumulative collections	6,430,317	7,931,385	9,636,186
Gross default rate	18.78%	18.61%	18.49%
Net default rate	13.38%	12.63%	11.90%

Another measure represents defaults in a given year divided by the average amount of loans in repayment during that year. This annual rate is more comparable to default rates calculated by commercial lending institutions. The volatility of this rate, depending as it does on annual flows into

and out of repayment, makes this a less useful indicator in assessing longer term default trends.

The Federal Credit Reform Act of 1990 separates the College Housing and Academic Facilities Loans (CHAFL) account into two distinct operating activities and budget accounts—CHAFL (Liquidating) and CHAFL Program. The loan activity associated with loan awards made in fiscal year 1992 and beyond is recorded in the program account with the corresponding loan subsidies and Federal Administration. This program supports financing for the reconstruction, renovation, and construction of academic facilities, housing and other

Credit accounts—Continued**COLLEGE HOUSING AND ACADEMIC FACILITIES LOANS PROGRAM—Continued**

postsecondary educational facilities for students and faculty. Institutions receive direct interest-subsidized loans of 5.5 percent. This financing is intended to help higher education institutions finance construction and renovation activities on more favorable terms.

This account is only partially self-financing since the amount of interest paid by borrowers, 5.5 percent, is lower than the amount the Department must pay Treasury for capital borrowed to finance the loans. The Secretary, on average, pays 8.88 percent interest on funds borrowed for loans residing in the CHAFL Liquidating account. No new loans were made in 1994 and no appropriation for loan subsidies was requested. During fiscal year 1994, \$730,000 was provided to meet Federal administration cost.

No loan limitation or corresponding loan subsidy funds are requested for the CHAFL program.

As required by the Federal Credit Reform Act of 1990, the College Housing and Academic Facilities Loans account was separated into two distinct budget accounts—College Housing and Academic Facilities Loans Liquidating Account and College Housing and Academic Facilities Loans Program. The College Housing and Academic Facilities Loans Liquidating Account records all cash flows to and from the Government resulting from direct loans made to schools and colleges for construction and renovation of undergraduate academic facilities, student and faculty housing, and other educational facilities from loans obligated prior to fiscal year 1992.

This account is only partially self-financing since the amount of interest paid by borrowers, 5.5 percent, is lower than the amount the Department must pay Treasury for capital borrowed to finance the loans. The Secretary pays, on average, 8.88 percent interest on funds borrowed for liquidating account loans. To meet the required repayment of interest and principal each year to Treasury, the Federal Credit Reform Act of 1990 has provided permanent appropriation authority.

The Historically Black College and University (HBCU) Capital Financing Program was authorized by the Higher Education Act Amendments of 1992 to provide HBCUs with private capital for capital projects such as repairs, renovation and construction of classrooms, libraries, laboratories, dormitories, instructional equipment, and research instrumentations. The Secretary is authorized to enter into insurance agreements with a private for-profit bonding authority to guarantee no more than \$375,000,000 loan principal plus accrued unpaid interest for HBCU's taxable bonds. The bonding authority will issue the bonds and establish and maintain an escrow account in which 10 percent of each institution's principal is deposited. This amount is estimated to be sufficient to cover all potential delinquencies and defaults, so no subsidy budget authority is requested. The maximum amount of loans authorized by law were enacted in the 1994 appropriation. The 1995 Budget requests funds for continuing Federal administrative costs.

The resources in this schedule are proposed for later transmittal under proposed legislation to revise and reauthorize programs currently authorized under the General Education Provisions Act, the Elementary and Secondary Education Act, and the Education for Economic Security Act. Under pending legislative proposals, resources would be requested for the following activities:

Research.—Funds would support research and development on topics of national concern in education through research centers, additional individual projects, field-initiated research

studies, and dissemination and technical assistance through regional laboratories and clearinghouses.

Statistics.—Funds would support the collection of statistics on educational institutions and on individuals to monitor trends in education, and a coordinated program of statistical services to assist States in developing comparable data bases and analyses of the implications of data.

Assessment.—Funds would support the National Assessment of Educational Progress, which surveys young Americans to provide reliable information about educational attainment in important skill areas. Both nationally- and State-representative data would be collected.

Fund for the improvement of education.—Funds would support nationally significant projects to improve the quality of education, assist all students to meet challenging standards, and contribute to achievement of the National Education Goals.

Eisenhower professional development Federal activities.—Funds would support activities of national significance contributing to high-quality professional development in the core subjects.

Javits gifted and talented education.—Funds would support projects designed to develop and adapt programs for gifted and talented students to serve all students, without diminishing curriculum and instruction for those who excel.

Star schools.—Funds would support the acquisition of telecommunications equipment and development of instructional programming for distance learning.

Ready to learn television.—Funds would support the development of educational programming for preschool and elementary school children and their parents.

GENERAL PROVISIONS

SEC. 301. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

SEC. 302. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

SEC. 303. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing or clustering. The prohibition described in this section does not include the establishment of magnet schools.

SEC. 304. No funds appropriated under this Act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools. (*Department of Education Appropriations Act, 1994.*)

Weapons activities.—This program includes the following activities:

Research and Development.—This activity provides for the research, development, and engineering capabilities to support the safety and reliability of the nuclear weapons stockpile, without underground nuclear testing, through a Stockpile Stewardship program. The research and development program supports Stockpile Stewardship by maintaining core competencies at the weapons laboratories, and through research on enhanced safety and reliability of the enduring stockpile, dismantlement techniques, waste minimization, and pollution prevention. Research and development on inertial confinement fusion is also included and the transfer of nonsensitive Defense Programs' funded technology to the private sector is promoted. The program also supports facility construction and maintenance for the nuclear weapons laboratories.

Nuclear Weapons Testing.—This activity supports Stockpile Stewardship through the exploration of experimental means other than underground nuclear testing for maintaining confidence in the safety, reliability, and performance of the stockpile. In addition, the Testing budget maintains the capability to execute an underground nuclear test within 6 months if directed by the President.

Stockpile Support.—This activity provides for the maintenance of the U.S. nuclear weapons stockpile, capabilities to modify or produce new weapons if required, lifetime surveillance of the stockpile, and retirement and disposal of weapons and weapon components. The program supports facility construction and maintenance for the nuclear weapons production plants. This program also supports a more narrowly focused reconfiguration effort including the consolidation of nonnuclear manufacturing activities.

Weapons Program Direction.—This program provides personnel and contractual services for the Federal management, direction, and the administration of selected Defense Programs' missions.

Environmental restoration and waste management.—This program encompasses the following defense-related activities:

Corrective activities.—Provides for those activities needed to bring active and standby defense facilities into compliance with applicable local, State, and Federal requirements and with internal Department of Energy requirements in an expeditious manner.

Environmental restoration.—Provides for assessments, cleanup, and decontamination and decommissioning at contaminated DOE facilities and sites. Various amounts and types of waste have accumulated at these facilities and sites as a result of past departmental activities spanning nearly five decades.

Waste management.—Provides for the management of wastes generated by defense activities, through treatment, storage or disposal of various waste types including radioactive, hazardous, mixed or sanitary wastes in compliance with applicable local, State, and Federal requirements and internal Department of Energy requirements.

Technology development.—Provides for research and development activities which will develop and apply more effective technologies for meeting the Department of Energy's environmental restoration and waste management goals.

Transportation management.—Provides for activities to ensure the safe, secure, and economical transportation of DOE materials, including radioactive and other hazardous materials and waste.

Program direction.—Provides salaries and expenses for headquarters staff for administration and oversight of environmental restoration and waste management programs.

Facility Transition and Management.—Provides for coordination and oversight of the orderly transition of contaminated sites and facilities from other Secretarial Offices to the Office of Environmental Restoration and Waste Management once they are determined to be surplus to their original mission.

Materials support and other defense programs.—This program includes the following activities:

Materials Support.—This activity operates and maintains the Department's nuclear materials production, processing, and storage facilities in a safe, environmentally-sound, and secure manner, and provides, as required, nuclear materials to meet defense and non-defense requirements. This includes the processing of existing nuclear materials into forms suitable for near-term and long-term storage.

Verification and Control Technology.—This activity supports the development and execution of U.S. national security

and foreign policy in the areas of treaty verification and implementation, intelligence, arms control and non-proliferation. The program consists primarily of non-proliferation and verification technology, analytical support, nuclear nonproliferation, international safeguards, export control operations, treaty implementation, and intelligence. Nonproliferation and verification technology efforts include research, development, and fabrication of seismic, nonseismic, and satellite devices. Analytical support provides technical support to both arms control and intelligence concerns.

Nuclear Safeguards and Security.—This activity provides for the development of measures to assure adequate and effective protection of nuclear weapons, nuclear materials, and facilities against theft, sabotage, espionage, and terrorist activity. Also included is the classification and declassification program which protects classified and unclassified sensitive information critical to the national security.

Security Investigations.—This activity ensures that the common defense and the security of the United States will not be endangered by the granting of security clearances for personnel who, in the performance of their official duties, must have access to restricted data, national security information or special nuclear material, or who occupy a designated critical sensitive position. Security investigations are used as a basis to determine whether individuals are an acceptable security risk for such access.

Naval Reactors.—This program provides for the design, development, and testing of improved Naval nuclear propulsion plants and reactors having increased reliability, improved performance, and simplified operating and maintenance requirements. These reactors are necessary to meet a variety of National defense requirements. During 1995, the program will continue to develop and test advanced nuclear reactor plant components/systems intended for the Navy's new attack submarine (SSN) class needed to maintain a viable SSN force and industrial base, and support and improve operating reactors and plant components. In addition, the program will continue to maintain or shutdown aging facilities as appropriate, procure equipment needed for development and testing activities, and fund the shutdown of the highly enriched uranium production facility at Portsmouth, Ohio in FY 1995.

Security Evaluations.—This program provides independent assessment of the safeguards and security posture of the DOE and is the principal focal point within the Department for all safeguards and security inspection and evaluation activities. Oversight is accomplished through the conduct of inspections at field sites and headquarters to evaluate the status of protection provided national security interests, public safety, and program operations. Assessments, evaluations, and special studies of the effectiveness and cost savings applications of protection policies and programs are conducted to provide a consolidated statement of the effectiveness of protection programs throughout the DOE complex. The budget also includes the Radioactive Materials Packaging Certification program, which is responsible for certifying that radioactive material packages are in safety compliance with Federal regulations and for maintaining a technology base to support certification activities.

Nuclear Safety Oversight.—This program provides independent oversight of nuclear safety to assure the Secretary of Energy and, in turn, the Congress and the public that DOE workers, the public and the environment are receiving the highest level of health and safety protection reasonably achievable from DOE nuclear operations. The program has broad authority under its charter to monitor and audit all aspects of nuclear safety through inspections, assessments, and investigations to identify circumstances indicative of deteriorating or inadequate nuclear safety performance. The

program is also responsible for the Department's enforcement policy associated with the civil and criminal penalty authority of the Price-Anderson Amendments Act of 1988.

New Production Reactor.—The balances of the New Production Reactor appropriation has been merged with this appropriation in 1994.

Worker and Community Transition.—In accordance with Section 3161 of the National Defense Authorization Act of 1993, DOE is responsible for mitigating the impact on workers and communities that results from reductions in the workforce at defense nuclear facilities. This program provides for the development and implementation of plans to provide options to assist workers affected by work force restructuring including preference in hiring, outplacement assistance, relocation assistance, and incentives for early retirement or separation. The plan will also provide impact assistance to local communities for economic development.

High energy physics.—Research in this program focuses on the fundamental constituents of matter, the fundamental forces in nature and the transformations between matter and energy at the most elemental level. The program includes experimental and theoretical particle physics research and related advanced accelerator and detector technology R&D. The primary mode of experimental research involves the study of collisions of energetic particles using large particle accelerators or colliding beam facilities by means of advanced multiparticle detector systems and associated electronics. Research in 1995 will continue studies of known fundamental constituents of particles, initiate searches for new particle constituents, and continue to pursue a unified description of the four fundamental forces in nature.

High energy physics contributes to national economic competitiveness. State-of-the-art technology developed for accelerators and detectors advances progress in fields such as fast electronics, high-speed computing, superconducting magnets, and high-power radio-frequency devices. High energy physics also continues to make major contributions to accelerator technology and provides the expertise necessary for the expansion of accelerators into other scientific and industrial fields, such as medical diagnostics and treatment and synchrotron light sources.

The 1995 high energy physics budget request provides for continued research at the Tevatron, the Stanford Linear Collider (SLC), the Alternating Gradient Synchrotron (AGS) and advanced accelerator and detector R&D related to next generation high energy particle accelerators. The operation of the Tevatron will provide the capability for utilizing Fermilab's superconducting synchrotron as a 900 GeV on 900 GeV proton anti-proton collider and as a 800 GeV fixed target facility, while the SLC at the Stanford Linear Accelerator Center (SLAC) will produce 50 GeV on 50 GeV electron-positron collisions. Both facilities will allow access into previously unexplored areas of high energy physics.

The request also provides continuing support for effective participation by university based groups in experimental research, including accelerator user group efforts and non-accelerator experiments, and for theoretical research efforts. The 1995 high energy physics capital equipment request will fund high-priority detector requirements for research at the Tevatron proton anti-proton collider at Fermilab and the SLC electron-positron collider at SLAC. The construction request provides for continuation of the new Main Injector ring at the Fermi National Accelerator Laboratory and the B-Factor at SLAC.

Superconducting Super Collider.—Funding is requested to continue the orderly termination of the Superconducting Super Collider (SSC) project, as directed by Congress in FY 1994.

Nuclear Physics.—The goal of this program is to understand the interactions and structure of atomic nuclei and to inves-

tigate fundamental particles and forces of nature as manifested in nuclear matter. Program emphasis in 1995 centers on the role that quarks play in the makeup and interactions of nuclei, application of nuclear physics to astrophysical problems and properties of neutrinos, and the mechanisms by which colliding nuclei exchange mass, energy, and angular momentum. The program supports and provides experimental equipment to qualified scientists and research groups conducting experiments in nuclear physics accelerator facilities around the world. Nuclear physics accelerators generate many of the radioisotopes used for medical diagnoses, support several cooperative programs in biomedical research and atomic physics, and provide training for health physicists dedicated to maintaining radiation-free environments.

The 1995 nuclear physics budget requests continuation of construction for the Relativistic Heavy Ion Collider (RHIC) at Brookhaven and final assembly and commissioning of the Continuous Electron Beam Accelerator Facility (CEBAF) at Newport News, Virginia.

The request provides for use of the completed South Hall Ring experiment at the Massachusetts Institute of Technology, initiation of experiments at CEBAF, continued operation of the AGS/Tandem facility at Brookhaven, and smaller low energy heavy ion facilities. The program also supports the operation of dedicated university accelerator facilities.

The request provides for preparation of decontamination and decommission of the Los Alamos Meson Physics Facility (LAMPF). However, the Department is currently evaluating new proposed defense uses for LAMPF and may redirect nuclear weapons research and development funds to continue operation of the facility. In this event, funds for preparation of decontamination and decommission of LAMPF would be redirected to high-priority physics research.

General science program direction.—Provides direction, management, and administrative support to HEP and NP programs within general science.

The purpose of energy supply research and development activities is to develop new energy technologies and improve existing energy technologies. Included in this mission are basic and applied research and targeted programs in technology development and market deployment.

This account provides funds for operating expenses, capital equipment and construction projects for the advancement of the various energy technologies under examination in the energy supply, research and development mission.

Solar and renewable energy technology.—A strong, balanced program is proposed for FY 1995 that will contribute toward strengthening the Nation's energy security, promoting energy efficiency and renewable energy, and increasing industrial competitiveness and Federal technology transfer. The FY 1995 Budget Request represents an aggressive program of R&D of promising technologies which will increase the environmentally sound production and use of domestic energy resources and will increase American productivity and economic competitiveness. Toward this end, the Office of Energy Efficiency and Renewable Energy (EE) seeks to work with industry to strengthen the technology base leading to new products and processes for the commercial market. EE's programs address all areas of the energy sector—from production to delivery to end-use. Program activities range from basic research in universities and national laboratories to applied research and development and proof-of-concept projects with industrial firms. For FY 1995, it also includes a market development and subsidy effort called the Market Mobilization Initiative designed to speed commercialization of renewable technologies and support the President's Climate Change Action Plan.

The FY 1995 program continues to work in partnership with industry to develop and promote the use of solar energy. Specific goals or activities of solar energy programs include: (1) in photovoltaics: an industry-driven effort in research, production, engineering, and market development; (2) in solar buildings: a focus on cooperative industry and utility efforts to use more effectively solar space heating and lighting and solar hot water heating; (3) in solar thermal: lowering the operating costs of existing trough systems and developing dish/Stirling and central receiver systems for commercial electric power generation, continued development of the use of concentrated solar energy to break down toxic organic wastes, and supplying process heat to industry; (4) in wind energy: development and deployment of advanced utility-grade wind turbines in collaboration with utilities and industry; and (5) in biofuels: continued R&D to achieve further reductions in biomass energy costs, continued R&D on the biochemical conversion of municipal solid waste to methane, and the biochemical conversion of biomass to ethanol. The Solar Energy program also includes ongoing support for the interagency Committee on Renewable Energy Commerce and Trade (CORECT), for commercialization and demonstration joint ventures, and for renewable energy, outreach information and technical assistance programs. As noted above, the Solar Energy program also supports the Market Mobilization Initiative; this applies to the wind, photovoltaics, geothermal, and biomass power programs.

The geothermal energy program supports work with industry and the utility sector to reduce the life-cycle cost of producing electricity with geothermal resources. The hydropower program addresses the primary environmental mitigation issues associated with licensing and sustaining hydropower production. The Electric Energy Systems program includes increased efforts to improve the efficiency of electric power transmission and distribution systems, increased studies on health effects of electric and magnetic fields, and development

of materials and devices employing advanced high temperature superconducting technology. Energy Storage is focused on battery energy storage for use by utilities. Production and storage of hydrogen is also supported.

Nuclear fission.—In FY 1994 and 1995 the Civilian Reactor Development program places emphasis on the Light Water Reactor (LWR) program to ensure that nuclear energy continues to make a vital contribution to national energy security. This program will focus on making standardized advanced light water reactors available to assist in meeting the increased electrical capacity needs of the first decade of the next century. The program includes institutional and regulatory reform and supporting technology efforts. Cooperative programs with industry have the objective of ensuring that the designs developed are those of interest to utilities. Advanced reactor research and development on reactors that have no near-term commercial or other identified application will not be funded. The Advanced Liquid Metal Reactor (including EBR-II) and Modular High Temperature Gas-Cooled Reactor programs will be shut down. The National Academy of Sciences will be reviewing the advanced liquid metal technology for the Department. As part of the review, the Academy will evaluate the need to operate EBR-II. The Integral Fast Reactor and Light Water Actinide Recycle programs continue to demonstrate the potential of actinide recycle to expand the usable capacity of the repository and thereby significantly defer the need for additional capacity additions. The Fuel Cycle Facility and the Analytical Laboratory at ANL-W operate to support this demonstration. This program is consistent with the President's FY 1994 rescission proposal. The Advanced Radioisotope Power Systems program will continue to develop and produce nuclear power systems for use in U.S. space missions and in support of military and civilian applications. The space reactor power systems program has been significantly reduced and will conduct special studies.

Environment, safety and health.—The Office of Environment, Safety and Health is made up of three programs: Environment, Safety and Health; Environmental Policy Analysis; and Scientific and Engineering Recruitment, Training and Development:

Environment, Safety and Health.—Environment, Safety and Health is responsible for oversight of all Department of Energy (DOE) activities to determine whether they are being conducted in conformance with applicable environmental laws and regulations and in a manner designed to ensure that the health and safety of workers and the public are protected. The Office also ensures that National environmental protection goals are incorporated in all DOE program areas; ensures that environmental, health and safety concerns are identified, prioritized and addressed through corrective and remedial actions; and provides liaison with other Federal agencies, such as the Environmental Protection Agency, the Department of Labor, and the Department of Health and Human Services, concerning regulatory efforts and specific actions of those agencies that may have an effect upon the Department's operations.

The Office will carry out an ambitious program of assessments and appraisals designed to give the Secretary of Energy comprehensive information on the progress and effectiveness of environment, safety and health at all DOE facilities. These assessments and appraisals include activities in all the Office's disciplines, and include progress assessments specifically designed to follow up on the previous "Tiger Team" assessments. These activities focus on the effectiveness of DOE and operating contractor management structures, resources and systems that effectively address environment, safety and health problems and initiatives.

Efforts will continue with the review of environmental legislation and regulations to ensure DOE-wide understanding and compliance with environmental laws and regula-

tions. DOE-wide environmental policies, standards and directives will be developed as well as environmental guidance and training programs which cover the full range of environmental statutes, regulations, and internal requirements.

The Office continues to support the timely implementation of the Department's proposed actions by ensuring compliance with the National Environmental Policy Act (NEPA) and related environmental review requirements that are necessary prior to project commitment. The NEPA review workload is expected to increase significantly as a result of DOE project development and environmental compliance activities.

Establishing effective compliance agreements with the States and the Environmental Protection Agency continues to be a focus of environmental issues coordination and oversight. Oversight of the environment, safety and health aspects of the DOE award fee system will continue. Similar oversight efforts are continuing relative to the development and implementation of the Environmental Restoration and Waste Management Five-Year Plan.

The Office will continue to provide independent internal oversight of DOE line programs for occupational safety, aviation, firearms, high explosives, industrial safety, facility safety, packaging and transportation safety, and quality assurance conducted by program offices, field offices, power administrations, and operating contractors. Independent appraisals, reviews, and technical evaluations of the operation and management of DOE's facilities (exclusive of nuclear reactor and non-reactor nuclear facilities) will be conducted. Diagnostic assessments of DOE line management's safety and health program performance at nuclear and non-nuclear facilities will be conducted.

This Office will continue to conduct a comprehensive DOE occupational health program, a strengthened program of oversight of the occupational medical program of the Department's contractors, and a comprehensive epidemiological and health surveillance program in cooperation with the Department of Health and Human Services.

Also, the Office develops and maintains nuclear safety requirements through directives (rules, orders, guidance and standards) for design, construction, operation, decommissioning and decontamination of DOE's nuclear reactor and non-reactor nuclear facilities and supports implementation of the directives. The Office develops performance-based training instruction material for DOE contractor operating staff, and develops and maintains an occurrence reporting system and a performance indicator trending program to assist DOE and contractor line management and analyzes the input data for senior Department management.

Environmental Analysis.—This office is responsible for developing the analytical framework and database for assessing the environmental implication of energy policy decisions and programs in light of changes in the Nation's energy situation, analyzing legislative environmental and resource proposals, and coordinating Department of Energy policy on such proposals, and for analysis and coordination activities for environmental issues related to energy production, delivery, use, and waste disposal. The immediate objectives are to assess the relationship between energy production and use and international and national environmental goals, and to assess the effects on energy supply and demand from changing environmental laws and regulations. Efforts to achieve these objectives will involve: (a) implementing certain environmental provisions of the Energy Policy Act of 1992, (b) executing portions of the President's Climate Change Plan, (c) representing the Department at international discussions of global climate and transboundary environmental concerns involving energy im-

plications, providing effective DOE representation on environmental and related regulatory issues, and (d) providing timely, high quality analysis of, and recommendations on, emerging environmental policy issues.

Scientific and Engineering Training and Development.—This program provides for training, and professional development of technically trained professionals to staff and manage the Department's technically complex programs and facilities. This will ensure that programs are in place to systematically analyze scientific and engineering job requirements, assess and identify the necessary technical qualifications and skills of each position and target training as appropriate, and provide a trained cadre from which the Secretary can fill the Department's senior technical managerial positions with qualified executives.

Biological and environmental research.—This program develops the knowledge base necessary to identify, understand, and anticipate the long-term health and environmental consequences of energy use and development and utilizes the Department's unique scientific and technological capabilities to solve major scientific problems in the environment, medicine, and biology. Planned 1995 activities include programs in global climate change; terrestrial, atmospheric and marine environmental processes; molecular, cellular and systemic studies on the biological effects of radiation, including radon emissions; structural biology; and medical applications of nuclear technology and the Human Genome Program. Additional funding is provided to continue construction of the environmental and molecular sciences laboratory, the human genome laboratory, and structural biology facilities.

Spill test facility.—Fulfilling the direction of Energy and Water Acts, the Superfund Amendments and Reauthorization Act, and the Clean Air Act Amendments, the overall goal is to conduct user-sponsored spill tests and mitigation responder training in support of plant and community safety and worker and community health associated with the handling, shipping and storage of hydrocarbons and related chemical industries' materials with focused attention on liquefied gaseous fuels and other hazardous fluids. Within this goal, other Federal agencies such as the Environmental Protection Agency conduct user-sponsored tests concerning airborne toxic substances to refine hazard concerns in programs designed in collaboration with the Department.

Fusion energy.—Fusion is a potential energy source that offers the promise of being safe, environmentally benign, and economically affordable. This program provides support for a goal-oriented research and development program to demonstrate the technical feasibility of fusion energy. The long term goals of the program are to have an operating demonstration power plant by 2025 and an operating commercial power plant by 2040. The strategy for achieving these goals is to gain the scientific understanding of the complex processes involved in fusion and to use this understanding to design and operate an engineering test facility to develop fusion technology. The 1995 budget provides for U.S. participation in a world-wide effort to develop the engineering design of an International Thermonuclear Experimental Reactor (ITER) and the analysis of data from the deuterium-tritium fueled experiments at the Tokamak Fusion Test Reactor. In addition, support is provided to develop inertial fusion energy by conducting R&D on a heavy ion driver concept. Funds are included for the construction of the Tokamak Physics Experiment (TPX), a high-priority experimental device that will improve tokamak machine performance and contribute to the ITER effort. TPX will have the capability to operate for long pulses and will help develop advanced tokamak oper-

ating modes that would lead to a more economical demonstration power reactor.

Supporting research and technical analysis.—The role of these programs is to expand the scientific and engineering base for future energy technology development and to provide independent, objective evaluations of energy research activities. Support is also provided for university related research and manpower training including the use of facilities at the national laboratories for student research and education.

Basic Energy Sciences.—This program funds basic research in the physical, biological, and engineering sciences in support of both nuclear and non-nuclear technology programs. The principal focus of the basic energy sciences program is energy; however, support for industry through user facilities and directed research helps strengthen U.S. economic competitiveness and provides important training for U.S. scientists and engineers. In 1995, work will continue in materials sciences, chemical sciences, advanced energy projects, energy biosciences, and research in engineering systems, applied mathematics, and the geosciences. The 1995 budget request is designed to maintain the necessary balance between all of the elements of the BES program, and to ensure that the BES program is responsive to the overall goals of the Energy Policy Act of 1992. The budget request would strengthen small science at both the DOE laboratories and universities. The request contains funding to continue the 6-7 GeV Synchrotron Radiation Source.

Advanced Neutron Source.—The Advanced Neutron Source (ANS) will be a state-of-the-art research reactor that will replace the High-Flux Beam Reactor and the High-Flux Isotope Reactor. The ANS is specifically designed for three types of research activity: neutron scattering to study properties and behavior of materials, production of isotopes for medical and other applications, and the study of materials degradation due to neutron irradiation. Funds are provided to continue research and development and to initiate construction of the ANS.

University and Science Education.—This program helps maintain strong scientific/technical research capabilities in support of the Department's long-range energy R&D mission in the university and private sector and the national laboratories. Specific activities supported include: university reactor fuel assistance; precollege, university, post-graduate science education programs and public science literacy activities. This program includes support for the purchase of state-of-the-art scientific instrumentation used in energy-related research areas such as geological sciences, materials characterization, catalysis, and health effects research.

Technology Transfer.—This program supports efforts to more effectively transfer research and technology from Energy Research laboratories by supporting cost-shared research projects to a point where they can be evaluated for commercial applications.

Energy research analyses.—This activity involves the independent assessment of existing or proposed technological initiatives, including examination of the base of research that underlies energy supply and utilization technologies.

Multiprogram energy laboratories facilities support.—The goal of the multiprogram energy laboratories facilities support program is to provide funds for rehabilitating and replacing deficient common-use utilities, roads, and buildings at the multiprogram laboratories. This program also includes support to correct ES&H deficiencies and inactive surplus facilities. This program also provides funding in support of the landlord responsibility at Oak Ridge National Laboratory.

In-house energy management.—This program funds energy conservation retrofit projects at Department facilities. These projects are designed to improve the efficiency of DOE energy use and set an example for other Federal agencies and the private sector. Surveys are conducted to identify cost-effective

candidate projects and projects are then selected on a competitive basis using as the primary criterion the greatest economic return.

Technical information management program.—This program contributes to DOE's missions in advancing energy and nuclear defense technologies and protecting U.S. economic and military security through the effective management and control of the Department's scientific and technical knowledge which is contained in its information resources. Major objectives which are structured to meet the overall purpose are the effective management, control, and use of the results of DOE's multibillion dollar research program, and the acquisition and management of results of worldwide investment in energy R&D.

Environmental restoration and waste management.—The Environmental Restoration and Waste Management Program encompasses the following non-defense activities:

Corrective Activities.—Provides for those activities needed to bring active and standby Energy Supply Research and Development funded facilities into compliance with applicable local, State and Federal requirements and internal Department of Energy requirements in an expeditious manner.

Environmental Restoration.—Provides for assessments, cleanup, and decontamination and decommissioning at contaminated DOE and legislatively authorized non-government facilities. Various amounts and types of waste have accumulated at these facilities and sites as a result of past department activities spanning nearly five decades.

Waste Management.—Provides for the management of wastes generated by Energy Supply Research and Development funded activities, through treatment, storage or disposal of various waste types including radioactive, hazardous, mixed or sanitary wastes in compliance with applicable local, State and Federal requirements and internal Department of Energy requirements.

Facility Transition and Management.—Provides for coordination and oversight of the orderly transition of contaminated sites and facilities from other Secretarial Offices to the Office of Environmental Restoration and Waste Management once they are determined to be surplus to their original mission.

Policy and management.—Provides executive direction, management assistance, and administrative support to all programs within energy supply activities.

Uranium Programs.—This program manages many of the activities remaining with the Department after the transfer of certain uranium enrichment functions to the United States Enrichment Corporation on July 1, 1993. New responsibilities stemming from the Energy Policy Act of 1992 and arrangements with the Corporation have also emerged. The primary functions of this program are the provision for reimbursable activities including safeguarding and feeding highly enriched uranium; nuclear safety oversight of the enrichment facilities leased to the Corporation; administration of power contracts; lease administration; and non-reimbursable activities including management of non-leased enrichment facilities at Portsmouth and Paducah; non-environmental liabilities that existed prior to the formation of the Corporation; environmental corrective actions; technology transfer activities; and transparency measures needed to increase confidence that low enriched uranium received from the Russian Federation is generated from highly enriched uranium originating from dismantled weapons.

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 95-91), including the acquisition of interest, including defeasible and equitable interests in any real property or any facility or for plant or facility acquisition or expansion, [\$430,674,000] \$469,380,000, to remain available until expended, of which \$17,000,000 shall be derived by transfer of unobligated balances from the "SPR petroleum account". Provided, That no part of the sum herein made available shall be used for the field testing of nuclear explosives in the recovery of oil and gas. The Fossil Energy programs support the Energy Policy Act through research and development that will strengthen the technology base on which industry can draw in developing future new products and processes for the commercial market. The programs support activities ranging from basic research in universities and national laboratories to applied R&D and proof-of-concept projects in private sector firms.

The Fossil Energy R&D programs proposed in the FY 1995 budget will continue limited Federal support of company-specific technology development and demonstration activities. The program continues to fund high-priority, high risk and cross-cutting research that will improve the Nation's ability to cleanly and efficiently use coal, and to enhance the economic recovery of our oil and gas reserves.

Coal R&D.—For FY 1995, programs will be refocused to better meet the new goals and objectives and changing mission the Department of Energy. Instead of emphasizing individual technologies that, in the past, could have the potential for duplicating research efforts, an integrated research and development program is proposed. A new budget structure corresponding with this new direction consists of: (1) Advanced Clean/Efficiency Power Systems, (2) Advanced Fuels Research, and (3) Advanced Research and Technology Development.

Advanced Power Systems research and development concentrates on a set of building-block technologies that will yield the clean coal power generation systems of the future. Typically, many technologies contribute toward advancing any single system. By focusing on building-block technologies that will improve a variety of systems, the Department's program makes optimal use of funds for research, development and demonstration. The categories of these systems that hold great promise for commercial use include: Advanced Pulverized Coal-fired Powerplants, High Efficiency Pressurized Fluidized Bed Combustion, High Efficiency Integrated Gasification Combined Cycles, Indirectly Fired Cycles, and Advanced Research and Environmental Technology.

The Advanced Clean Fuels Research program will conduct activities to develop clean methods to produce coal-derived liquid fuels. This research consists of Coal Preparation, Direct Liquefaction, Indirect Liquefaction, Advanced Research & Environmental Technology, and Systems for Coproducts.

Oil, gas and shale.—The oil program encompasses new and improved oil recovery and related research and development, industry cost-shared demonstration of improved and advanced oil recovery methods, environmental research activities directed to facilitate environmentally acceptable exploration and production of domestic oil resources, and research directed to improve technology needed to economically upgrade domestic-use crude oils in an environmentally sound manner.

Consistent with Energy Policy Act objectives, the natural gas program has been redesigned. Previously focused on unconventional gas recovery, the program now emphasizes enhanced gas production, storage technology, and high efficiency, low NO_x turbines.

New initiatives greatly expand the new gas program research effort. As in all other programs, industry and Gas Research Institute cost-sharing is a key feature. The fuel cells program will continue under this heading since gas-fueled fuel cells will most probably be the first to be developed. Under the Administration's Climate Change Action Plan, a new initiative is being requested to expand fuel cell research. This new initiative will conduct cooperative efforts with industry to accelerate commercialization of near-term fuel cells through cost reductions and incentives such as rebates, and fund additional rounds of demonstration projects.

Program direction and management support.—This program provides the funding for all Headquarters and indirect field personnel and overhead expenses in Fossil Energy. In addition, it provides support for the day-to-day project management functions.

Environmental restoration.—The Department of Energy is assisting in payments for the environmental clean-up of former Fossil Energy projects as required by the Environmental Protection Agency. Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) sites include the Western Superfund Site at Ft. Lewis, Washington, and the Rock Springs and Hoe Creek Sites in Wyoming. Resource Conservation Recovery Act (RCRA) efforts are underway at the Morgantown Energy Technology Center (METC) to eliminate cross-connections between sewer and storm water lines, and at the Pittsburgh Energy Technology Center (PETC) to clean up contaminated soil and monitor groundwater. Clean-up actions related to close-out of the magneto-

hydrodynamics program will be conducted. In addition, as a result of internal DOE evaluations (Tiger Teams) other efforts are underway at both METC and PETC and at the National Institute of Petroleum Energy Research at Bartlesville, Oklahoma to correct a number of other environmental problems.

Fuels conversion.—This program will continue regulatory reviews and oversight of the transmission of natural gas and electricity across the U.S. borders and to process certifications of alternate fuel capability.

reserves at the maximum efficient rate and to conserve the oil shale reserves. This includes routine operation and maintenance, development and exploration drilling, environmental and conservation work, and construction and installation of on-reserve facilities and related systems required for the collection, storage, and distribution of produced petroleum and related products.

In order to maximize the return on the taxpayer's investment and the return to the Treasury, the budget proposes a restructuring of the Government's interest in Elk Hills, the major oil and natural gas field located near Bakersfield, CA that accounts for the bulk of this program. That property was originally set aside to provide oil for the Navy as it converted from coal to oil near the start of this century. Oil and gas from the field has been produced there with contractor assistance, sold commercially and used in the civilian market since 1976. Producing and selling this oil and natural gas is a commercial, not a governmental activity. There is good reason to believe industry can run Elk Hills quite well since it accounts for most U.S. domestic oil production. Restructuring at Elk Hills is consistent with the Administration's commitment to reinvent the government, subjecting public organizations to market dynamics where this can be done in a way to get the best value for the taxpayer's dollar. Under the terms proposed in the budget, any restructuring, such as through a lease, sale or farmout agreement, would be accomplished competitively. The Federal government would receive an annual royalty payment equal to 12.5 percent of production, plus tax receipts on profits and dividends, plus a bonus payment. In addition the government will be freed from the obligation to pay some \$200 million needed each year to operate and maintain the field. The bonus bid will of course be determined competitively and the Federal government will be free to reject all bids if they do not reflect fair market value.

A strong, balanced program is proposed for FY 1995 that will contribute to the Nation's energy security, that will promote energy efficiency in all sectors of the economy, and that will increase industrial competitiveness and Federal technology transfer. The FY 1995 budget proposal includes an aggressive program of cost-shared research and development in partnership with the private sector to help improve energy efficiency in buildings, industry, and transportation. Activities range from basic research in universities and national labora-

tories to applied research and development and proof-of-concept projects with industry. The FY 1995 budget also includes support for improved energy planning by utilities, and technical and financial assistance to States to help them improve their energy-related policies such as building codes and utility regulations.

Building Technologies. In FY 1995, research and development to improve the energy efficiency of appliances, building equipment, and the building envelope is complemented by new incentive programs designed to move advanced technology into the marketplace. Programs to develop appliance and lighting standards and encourage the adoption of the best available building efficiency codes continue on the expanded scale initiated in FY 1994. The Federal Energy Management Programs also continue on the expanded scale of FY 1994 with the critical goal of reducing the consumption of energy in Federal buildings. A variety of approaches are employed, including training, financing, and contracting. New initiatives for energy education and information target many stakeholders, including manufacturers, utilities, State and local organizations, and the general public.

Industrial Technologies. The FY 1995 program consists of cost-shared technology development related both to energy demand and increasing the flexibility of energy supply. Demand-reduction program areas include: the reduction of industrial wastes, which has both energy-efficiency and environmental benefits; improved electric motor systems; materials processing technologies; chemicals and petroleum refining; pulp and paper production; and advanced materials development. Supply activities include: efforts to understand and mitigate the emissions from combustion of municipal wastes; more efficient industrial cogeneration; with emphasis on advanced turbine systems; and development of chemical industry feedstocks from cellulosic resources. Increased emphasis will be placed on near-term Climate Change Action Plan activities, which include Motor Challenge, the National Industrial Competitiveness through Energy, Environment and Economics (NICE3) program, and the expanding Energy Analysis and Diagnostic Centers.

Transportation Technologies. The FY 1995 program continues energy demand and pollution reduction activities, including the cost-effective improvements in components, vehicles, system efficiency, and use of alternative fuels, including electricity. This work will lead to the next generation vehicle, with its significant improvements in fuel economy and environmental emissions. Activities address the most promising opportunities for electric and hybrid propulsion systems, including fuel cells, heat engines, and materials. In addition, the program will continue market-conditioning activities to increase the supplies of alternative fuels available for, and used by, the transportation sector. These activities include fleet acquisitions to demonstrate performance and emissions characteristics of alternative fuel vehicles and development of the fueling infrastructure.

Technical and Financial Assistance.—Activities managed by the Office of Technical and Financial Assistance include the three State and local formula grant programs (Weatherization Assistance, Institutional Conservation, and the State Energy Conservation Program). Other activities include the Energy-Related Inventions/Energy Innovation program, technology deployment and outreach activities, and programs which develop and provide information and technical assistance.

Utility Technologies.—The Office of Utility Technologies provides technical assistance to utilities and regulators on the use of integrated resource planning (IRP). IRP is the process by which utilities determine the mix of demand- and supply-side resources to best meet customer needs. The mix should reflect a fair, market-based competition among all viable demand- and supply-side resource alternatives, including efficiency measures, storage, renewable energy technologies,

emerging fossil and nuclear technologies, and traditional supply resources. IRP is expected to reduce future requirements for new power plants (and their attendant capital and environmental implications) through efficiency improvements and other noncapital-intensive alternatives.

Policy and Management.—This activity supports management in the development of policy and program evaluation for energy conservation programs to ensure effective program delivery.

This account provides for the acquisition, transportation, and injection of petroleum into the Strategic Petroleum Reserve and for its drawdown and distribution. The Reserve is being maintained in readiness for possible further use at the direction of the President. The budget proposes no additional appropriations in FY 1995 for SPR oil purchases. The budget outlay estimates assume direct purchases of 4.8 million barrels in FY 1994. In FY 1995 \$17,000,000 in unobligated balances will be transferred to Fossil Energy Research and Development to fund activities there.

This program supports energy information activities which are designed to provide timely, accurate and relevant energy information for use by the Administration, the Congress, and the general public. The activities funded in this program include the design, development and maintenance of information systems on petroleum, natural gas, coal, nuclear, elec-

tricity, alternate fuel sources, and energy consumption. This includes collecting data and ensuring its accuracy; preparing forecasts of alternative energy futures; and preparing reports on energy sources, end-uses, prices, supply and demand, and associated environmental, economic, international, and financial matters. This program also includes the operation of the Energy Information Administration (EIA) computer facility, telecommunications support, customer services, and ADP software support to the Department of Energy and others. In addition, the National Energy Information Center disseminates statistical and analytical publications, reports, and data files in hard-copy and electronic formats, and responds to public inquiries. Finally, this activity provides survey and statistical design standards, documentation standards, and energy data public-use forms clearance and burden control services.

Economic Regulatory Administration.—The Economic Regulatory Administration (ERA) is responsible for resolving all remaining enforcement actions to ensure that oil companies complied with petroleum regulations in effect prior to decontrol of oil in January 1981.

Hearings and appeals.—The Office of Hearings and Appeals issues all final orders of an adjudicatory nature other than those over which the Federal Energy Regulatory Commission

or the Board of Contract Appeals has jurisdiction. It decides appeals of petroleum enforcement actions and adverse Freedom of Information Act and Privacy Act determinations, examines requests for exception relief, and administers refund proceedings involving funds obtained as a result of petroleum enforcement actions. This office is also responsible for (a) conducting hearings and issuing initial agency decisions on "whistleblower" complaints made under the DOE Contractor Employee Protection Program, (b) issuing final agency decisions on appeals of disputed "Payment-Equal-to-Taxes" determinations made under the Nuclear Waste Policy Act of 1982, as amended, and (c) conducting personnel security administrative review hearings, and performing administrative reviews of initial determinations.

The Federal Energy Regulatory Commission (FERC) is charged with regulating certain interstate aspects of the natural gas, oil pipeline, hydropower, and electric industries. Such regulation includes issuing licenses and certificates for construction of facilities, approving rates, inspecting dams, implementing compliance and enforcement activities, and providing other services to regulated businesses. In FY 1995, these businesses will pay fees and charges sufficient to fully offset the Commission's cost of providing licenses, inspections, and other services.

Natural gas and oil.—The Commission regulates 150 natural gas pipeline companies, and 130 common carrier oil pipeline companies, including the Trans-Alaska Pipeline System (TAPS). Responsibilities include: issuing certificates of public convenience and necessity for natural gas pipelines, determining rates for the transportation and sale of natural gas in interstate commerce and rates for the transportation of oil by pipeline; and establishing applicable tariff provisions to carry out the Commission's responsibilities under the Natural Gas Act and the Natural Gas Policy Act. Under the Natural Gas Wellhead Decontrol Act of 1989, all remaining regulated wellhead gas prices were deregulated on January 1, 1993. Commission Order No. 636, a key part of the Nation's overall energy policy, restructures the natural gas pipeline industry by removing artificial roadblocks and opening up markets so customers will have a wider array of choices in the purchase and transportation of natural gas.

Hydropower.—The Commission issues preliminary permits, exemptions, and licenses, including relicenses, for non-federal hydroelectric projects, enforces their terms and conditions, and performs dam safety inspections. The Commission regulates more than 1,700 hydroelectric projects which supply about 10 percent of the electric energy generated in the United States. The Commission also performs investigations to determine the amount of headwater benefits that are derived from Federally-owned and FERC-licensed headwater improvements and returned almost \$7.0 million in revenues to the U.S. Treasury in FY 1993.

Electric power.—The Commission is responsible for determining rates for the interstate sale or transmission of wholesale electric energy for more than 200 electric utilities and for overseeing electric utility corporate transactions. The Commission approves rates for all Federal power marketing agencies except TVA. Implementing the Energy Policy Act of 1992 will result in many changes in the electric power industry to meet increasing generating capacity needs of the 1990's, primarily through nontraditional sources in response to economic forces in the marketplace. The Commission also certifies cogenerators, small power producers, and electric wholesale generators.

This loan guarantee program was intended to subsidize loans for geothermal energy projects too risky to acquire private sector financing on their own. From 1979 to 1986, 8 loan guarantees were executed. Of those, 3 have been repaid and 5 have defaulted. The new budget authority in the fund in recent years has only been needed to support one FTE to monitor the remaining agreements and assets of the program. In 1992, that person's position was incorporated into

the geothermal R&D activity, so no new budget authority will be needed in this account in FY 1995.

Public Law 99-190, making continuing appropriations for 1986, provided \$400 million from funds in the Energy Security Reserve in the Department of the Treasury for a new Clean Coal Technology program in the Department of Energy. This program was authorized under the Clean Coal Technology Reserve proviso of Public Law 98-473 to subsidize the construction and operation of facilities to demonstrate the potential commercial feasibility of such technologies.

The fiscal year 1995 program includes a continuation of funding for the fourth and fifth rounds of cost-shared innovative Clean Coal Technology projects at \$37,121,000. These projects demonstrate technologies appropriate for replacing, retrofitting, or modernizing existing coal-fired facilities to provide significantly reduced emissions. Projects are cost-shared, with industry providing at least half of the funding, and with

provisions for the Government to recoup its investment through a share of revenues if the technology is commercialized. The FY 1995 budget also includes \$20,000,000 for a new international initiative to support "showcase" demonstration projects in China and Eastern Europe. The funding for this new initiative will come from existing appropriations.

This program was established in 1980 for the purpose of expediting the development and production of alternative fuels.

When the Synthetic Fuels Corporation was declared to be operational in 1982, the uncommitted and unobligated funds remaining in the program were transferred to the Energy Security Reserve for use by the Synthetic Fuels Corporation, with the exception of the loan guarantee for the Great Plains Gasification Project, which remained under the jurisdiction of the Department of Energy. The Department exercised its authority to borrow from the Treasury to repay the Federal Financing Bank upon default of the borrower in 1985. This loan was repaid, along with accrued interest, by a Supplemental appropriation in 1986. The Department acquired ownership of the Great Plains plant by foreclosure, which was completed on July 14, 1986, and continued operation of the plant without the expenditure of appropriated funds. On October 31, 1988, the Department completed the process of establishing an asset purchase agreement for the Great Plains Gasification Plant by settlement with Basin Electric Power Cooperative Association. Responsibilities for other related agreements—Trust Agreement, Gas Transportation Agreement, Gas Purchase Agreement—were also settled. Under the terms of the asset purchase agreement a check for \$85 million was provided to the Government as an initial payment. These agreements are currently the subject of litigation between the Department, Dakota Gasification Company and the four pipeline companies which purchase the synthetic gas from the plant. Future revenue sharing payments to the Department are dependent upon the outcome of this litigation as well as natural gas prices.

The parties to litigation negotiated settlement agreements in principle in December 1993. As of January 1, 1994, the settlement agreements had not yet been executed, however, it is anticipated that the agreements will be signed by the end of January 1994. The Asset Purchase Agreement will be amended pursuant to the settlement and will continue to provide for the operation of the facility through the year 2009.

NUCLEAR WASTE DISPOSAL FUND

For the nuclear waste disposal activities to carry out the purposes of Public Law 97-425, as amended, including the acquisition of real property or facility construction or expansion, [\$260,000,000] \$254,800,000, to remain available until expended, to be derived from the Nuclear Waste Fund. To the extent that balances in the fund are not sufficient to cover amounts available for obligation in the account, the Secretary shall exercise her authority pursuant to section 302(e)(5) of said Act to issue obligations to the Secretary of the Treasury: *Provided*, That of the amount herein appropriated, within available funds, not to exceed \$5,500,000 may be provided to the State of Nevada, for the sole purpose of conduct of its scientific oversight responsibilities pursuant to the Nuclear Waste Policy Act of 1982, Public Law 97-425, as amended: *Provided further*, That of the amount herein appropriated, not more than \$7,000,000 may be provided to affected local governments, as defined in the Act, to conduct appropriate activities pursuant to the Act: *Provided further*, That within ninety days of the completion of each Federal fiscal year, each State or local entity shall provide certification to the Department of Energy, that all funds expended from such payments have been expended for activities as defined in Public Law 97-425, as amended. Failure to provide such certification shall cause such entity to be prohibited from any further funding provided for similar activities: *Provided further*, That none of the funds herein appropriated may be used directly or indirectly to influence legislative action on any matter pending before Congress or a State legislature or for any lobbying activity as provided in 18 U.S.C. 1913: *Provided further*, That none of the funds herein appropriated may be used for litigation expenses: *Provided further*, That none of the funds herein appropriated may be used to support multistate efforts or other coalition building activities inconsistent with the restrictions contained in this Act: *Provided further*, That none of the funds provided under this Act shall be made available for phase II-B grants to study the feasibility of siting a Monitored Retrievable Storage Facility]. The nuclear waste disposal program consists of efforts related to the development, acquisition, and operation of facilities for the disposal of civilian and defense high level nuclear waste. These activities are funded by appropriations from the Nuclear Waste Fund which is paid for by the users of the disposal service, and the Defense Nuclear Waste Disposal account, which was established by Congress as part of the FY 1993 Energy and Water Development Appropriation (P.L. 102-377) in lieu of a payment from the Department of Energy into the Nuclear Waste Fund for activities related to the disposal of defense high-level waste.

Legislation will be proposed to create a new funding mechanism for the Department's civilian high-level waste program. Under this proposal, monies would continue to be requested from the Nuclear Waste Disposal Fund and the Defense Nuclear Waste Disposal appropriation account. Additional funding would be provided by making available a portion of the utility industry's annual payments into the fund. Currently, in each year, utility receipts not appropriated for this program are retained in the fund but are not available for obligation. Under the proposal, one-half of the annual balance will be made available for obligation on a permanent basis. These additional resources would be used to accelerate scientific and engineering activities at the Yucca Mountain site in Nevada.

The additional spending associated with this proposal would come from savings associated with decisions of the Department of Energy and the United States Enrichment Corporation involving: (1) production efficiencies at the Federally-owned enrichment plants; (2) new marketing opportunities for the Corporation to sell enriched uranium derived from highly enriched uranium available to the USEC, and (3) additional opportunities to sell ("wheel") excess electric power to consumers.

The Isotope Production and Distribution program is directed towards the production, sale, and distribution of isotope products and related services to the user community utilizing Government-owned facilities. The isotopes produced by the Department of Energy are those that can be produced in existing DOE production and research facilities dedicated to the products required by the Isotope Production and Distribution program. The isotopes are sold at their market value or at a price determined to be in the best interest of the government for use in industrial applications, hospital and medical facilities, and Government, university, and industrial research programs.

Advances contributed by domestic and foreign sources fund research and development activities for civilian reactor, mag-

netic fusion, and basic energy sciences. Sources also provide funds for defense programs, the technical information management program, and conducting the Naval Petroleum Reserves Community Wells Protection program.

Civilian reactor safety and testing.—Advances contributed by domestic and foreign sources fund research and development activities involving advanced reactors and related processes.

Electric energy systems.—Advances from foreign private industry for basic electric energy effects testing and experimentation through FY 1993.

Magnetic fusion program.—Advances received under international cooperative agreements provide for joint research, operation and upgrading of magnetic fusion and reactor facilities.

Basic energy sciences.—Advances contributed by foreign countries under cost-sharing agreements are for neutron scattering experiments and research.

Defense programs.—Information concerning these activities is classified.

Technical information management program.—Advances received under international cooperative agreements provide funds for operating the International Energy Agency (IEA) Energy Technology Data Exchange (ETDE).

Naval petroleum reserves.—Advances from private sector participants in the community wells protection program that protect wells from the effects of off-site natural gas drainage.

Fossil Energy.—Advances from private domestic and foreign government sources provide funds for enhanced oil recovery research, advancement of coal technology and the liquefied gaseous fuels spill test facility.

The Alaska Power Administration is responsible for operation and maintenance and power marketing for the Eklutna and Snettisham hydroelectric projects in accordance with the authorizing legislation for each project.

The agency's normal activities will continue in 1995, including acquisition of replacement generator windings for the Eklutna Project. Proprietary receipts are estimated to be \$10,232,000 in 1995.

In 1993 the Administration completed its work with the State of Alaska and local customers and companies on a proposal to sell assets of the Alaska Power Administration. Legislation was submitted in 1993. The budget assumes authorization and completion of the sale at the end of 1995.

The Southeastern Power Administration (SEPA) markets power generated at Corps of Engineers hydroelectric generating plants in a 10-State area of the Southeast. Deliveries are made by means of transmission facilities owned by others. There are 22 projects now in operation.

SEPA sells power at wholesale primarily to publicly and cooperatively-owned electric distribution utilities using wheeling and pooling agreements with the region's large private utilities to provide firm power to its customers. SEPA does not own or operate any transmission facilities. Its long-term contracts provide for periodic electric rate adjustments to ensure that the Federal Government recovers costs of operation and capital invested in power, with interest, in keeping with statutory requirements.

The SEPA program includes the following activities:

Systems operations and maintenance.—Provision is made for negotiation and administration of power contracts, collection of revenues, development of wholesale power rates, the amortization of power investment, investigation and planning of proposed water resources projects, scheduling and dispatch of power generation, scheduling storage and release of water, administration of contractual operation requirements, and determination of methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Proprietary receipts deposited in the Treasury were \$155,626,619 for 1993 and are estimated to be \$158,483,000 for 1994. Proprietary receipts are expected to be \$159,181,000 for 1995.

Purchase power and wheeling.—Provision is made for the payment of wheeling fees and for the purchase of electricity in connection with disposal of power under contracts with utility companies.

The Southwestern Power Administration (Southwestern) operates in a six-State area as a marketing agent for hydroelectric power produced at Corps of Engineers dams. It also operates and maintains some 2,225 kilometers (1,380 miles) of high voltage transmission lines, 24 substations and switching stations, and 44 VHF radio and microwave stations. Southwestern sells its power at wholesale primarily to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to ensure that the Federal Government recovers all costs of operation and all capital invested in power, with interest, in keeping with statutory requirements.

Southwestern also is responsible for scheduling and dispatching power, negotiating power sales contracts, and constructing facilities required to meet changing customer load requirements.

Systems operation and maintenance.—Provision is made for investigating and planning proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Provision also is made for maintenance and improvement of the transmission system and related facilities to ensure reliable service, negotiation and administration of power contracts, collection of revenue, development of wholesale power rates and the amortization of the power investment. Actual proprietary receipts in the amount of \$100,236,000 were deposited in the Treasury in FY 1993. Estimated proprietary receipts in the amount of \$97,536,000 in FY 1994 and \$97,392,000 in FY 1995 are expected.

Purchase power and wheeling.—Provision is made for the payment of wheeling fees and for the purchase of energy in connection with the marketing of power under contracts with utility companies.

Construction.—The construction program provides transmission, substation, switching and control facilities to transmit power generated at Corps of Engineers' hydroelectric projects in the Southwest. This program is coordinated with the Corps of Engineers' construction program and customer requirements in order that transmission and related facilities will be in place when these power projects are completed and available for marketing. This program also provides for the purchase of capital electrical equipment used for upgrading the established system to meet changing customer load requirements.

Reimbursable program.—This program involves services provided by Southwestern Power Administration to others under various types of reimbursable arrangements. In FY 1995 the reimbursable program primarily provides for operation and maintenance, construction, and power and energy services. The power and energy service supports the requirements of two government agencies: Ft. Sill and McAlester Army Ammunition Plant, and direct purchase of energy for the Oklahoma municipalities.

The Western Area Power Administration (Western) markets electric power in 15 western States from federally-owned power plants operated primarily by the Bureau of Reclamation, Corps of Engineers, and the International Boundary and Water Commission. Western operates and maintains approximately 16,300 miles of high-voltage transmission lines and 271 substation/switchyards and constructs transmission facilities, including new transmission lines, substations, and essential additions and modifications to existing facilities.

Western sells power at wholesale to electric distribution utilities. In keeping with statutory requirements, Western's long-term power contracts provide for periodic rate adjustments to ensure that the Federal Government recovers costs of operation and capital invested in power facilities, with interest.

Systems operation and maintenance.—A total of 13 power systems will be operated and maintained. Western will continue to participate in conservation and renewable energy programs in 1995. Revenue will be available from Boulder Canyon project operations for Western's power marketing and transmission expenses, without further appropriation, as provided in the Hoover Power Plant Act of 1984 (Public Law 98-381).

Power is sold to wholesale customers such as municipalities, cooperatives, irrigation districts, public utility districts, State and Federal Government agencies, and private utilities. Receipts are deposited in the Reclamation fund, the General fund, the Colorado River dam fund, the Central Valley Project Restoration Fund, the Lower Colorado River Basin development fund, and the Upper Colorado River Basin fund.

Energy sales and revenues resulting from these Western power systems operations, excluding the Colorado River Storage project and the Colorado River Basin project, are as follows:

	1993 actual	1994 est.	1995 est.
Energy sales (millions of kilowatt hours)	25,500	26,384	27,800
Gross Operating Revenues (in thousands of dollars)	572,886	624,883	668,236

Purchase of power and wheeling.—The program provides for purchase of power and wheeling. Financing of this program consists of \$37,706,000 of new budget authority, \$63,800,000 of prior year balances associated with settlement of Western/Pacific Gas and Electric Company Lawsuit, \$3,480,000 of permanent budget authority for Boulder Canyon Project, \$29,416,000 associated with net billing procedures, \$97,743,000 associated with customer bill crediting, \$42,000,000 associated with reimbursement from other Federal entities, and \$2,820,000 associated with Bonneville Power Administration power transfers, for a total program cost of \$276,965,000.

System construction.—Construction of transmission facilities is necessary to maintain system reliability and for marketing electric power produced from generating plants of others. Funding is provided in FY 1995 for upgrading, rehabilitating, and extending the power system to reduce outages, reduce maintenance costs, and to improve overall operational efficiency and reliability, construction of maintenance facilities, and system security additions. Western will continue to participate in joint construction projects to encourage greater transmission access.

Reimbursable program.—This program involves services provided by Western to others under various types of reimbursable arrangements.

A continuing fund, maintained from deposits to the Reclamation Fund, is available to ensure continuous operation of power systems in the event of below-normal hydro-power generation, equipment failure, or other damage caused by acts of God, flood, drought, strikes, embargoes or other conditions which might cause interruptions in service.

Public enterprise funds:

BONNEVILLE POWER ADMINISTRATION FUND

Expenditures from the Bonneville Power Administration Fund, established pursuant to Public Law 93-454, are approved for the purchase, operation and maintenance of two rotary-wing aircraft for replacement only, and for official reception and representation expenses in an amount not to exceed \$3,000.

During fiscal year [1994] 1995, no new direct loan obligations may be made. (Energy and Water Development Appropriations Act, 1994.)

Bonneville Power Administration (BPA) is the Federal electric power marketing agency in the Pacific Northwest. BPA markets hydroelectric power from 21 multipurpose water resource projects of the U.S. Army Corps of Engineers and 9 projects of the U.S. Bureau of Reclamation, plus some energy from non-Federal generating projects in the region. These generating resources and BPA's transmission system, planned by the end of FY 1995 to consist of an estimated 14,804 circuit miles of high-voltage transmission lines and 395 substations, are operated as an integrated power system with operating and financial results combined and reported as the Federal Columbia River Power System (FCRPS). BPA is the largest power wholesaler in the Northwest and provides about four-fifths of the region's electric power transmission capacity.

BPA is responsible for meeting the net firm power requirements of its requesting customers through a variety of means, including energy conservation programs, acquisition of renewable and other resources, and power exchanges with utilities both in and outside the region.

BPA will finance its operations on the basis of the self-financing authority provided by Federal Columbia River Transmission System Act of 1974 (Transmission Act) (Public Law 93-454) and the new borrowing authority provided by the Pacific Northwest Electric Power Planning and Conservation Act (Pacific Northwest Power Act) (Public Law 96-501) for energy conservation, renewable energy resources and capital fish facilities. Authority to borrow is available to the BPA on a permanent, indefinite basis. The amount of borrowing outstanding at any time cannot exceed \$3.75 billion.

Operating expenses: Energy resources.—Provides for the orderly planning, contractual acquisition, and oversight of reliable, cost-effective, environmentally acceptable resources, including resources purchased prior to the Pacific Northwest Power Act, as well as cost-effective conservation measures, including home energy efficiency, commercial energy efficiency, industrial technology transfers, solar energy applications, fuel switching and conservation measures for new home and commercial building construction. These resources are needed to serve BPA's portion of the region's forecasted net electric load requirements.

Residential exchange.—Provides for extending the benefits of low-cost Federal power to the residential and small farm customers of investor-owned and publicly-owned utilities, in accordance with the Pacific Northwest Power Act.

Transmission system development.—Provides funding from revenues for electric transmission research and development and program support of the capital investment program described below for transmission system development.

System operation.—Provides for operating an estimated 14,804 miles of line and 395 substations of the BPA transmission system during 1995.

System maintenance.—Provides for the annual expenses of maintaining the facilities and equipment of the BPA transmission system in 1995.

Power marketing.—Provides for forecasting regional demand; negotiating power sales and wheeling, billing, and servicing these contracts.

Power scheduling.—Provides for the scheduling of power.

Fish and wildlife.—Provides the annual expenses for protection, mitigation and enhancement of fish and wildlife affected by hydroelectric facilities on the Columbia River and its tributaries, in accordance with the Pacific Northwest Power Act.

Planning Council.—Provides for activities of the Pacific Northwest Electric Power and Conservation Planning Council required by the Pacific Northwest Power Act.

Interest.—Provides for payments to the U.S. Treasury for interest on borrowings to finance BPA's transmission system development, system replacements, conservation, capital equipment, fish and wildlife, and associated projects capital

programs under \$3.75 billion borrowing authority provided by the Transmission Act as amended by the Pacific Northwest Power Act and replenished by Public Law 98-50. This category also includes interest on Corps of Engineers, BPA and U.S. Bureau of Reclamation appropriated debt.

Associated project costs.—Provides for repayment of the operation and maintenance (O&M) costs of the 30 U.S. Army Corps of Engineers and U.S. Bureau of Reclamation power generating projects, and amortization on the U.S. Bureau of Reclamation capital investment in power generating facilities and irrigation assistance at Bureau facilities.

Reimbursable.—Provides for reimbursable power purchases, and for services such as construction, operation and maintenance of transmission facilities when requested and financed by other entities. Also includes the coordination agreement payments to the Federal Energy Regulatory Commission.

Capital investments: Energy resources.—Provides for funding conservation measures including home and commercial energy efficiency, industrial technology transfers, solar energy applications and conservation measures for new home and commercial building construction.

Transmission system development.—Provides for planning, design and construction of transmission lines, substation and control system additions, and enhancements to the FCRPS transmission system for a reliable, efficient and cost-effective regional transmission system. During FY 1995, BPA plans to energize three additional substations along with a variety of upgrades and additions to existing facilities.

System replacements.—Provides for planning, design, and construction work to repair or replace existing transmission lines, substations, control systems, and general facilities of the FCRPS transmission system.

Capital equipment.—Provides for general purpose ADP equipment, office furniture and equipment, and software development in support of all BPA programs.

Fish and wildlife.—Provides for capital investments to protect, mitigate, and enhance fish and wildlife affected by hydroelectric facilities on the Columbia River and its tributaries, in accordance with the Pacific Northwest Power Act.

Associated Projects-Capital.—Provides for direct funding of additions, improvements, and replacements at existing Federal hydroelectric projects in the Northwest. BPA's FY 1995 budget includes direct funding for four Bureau of Reclamation projects.

Contingencies.—Although contingencies are not specifically funded, the need may arise to provide for purchase of power in low-water years; for repair and/or replacement of facilities affected by natural and man-made emergencies, including the resulting additional costs for contracting, construction, and operation and maintenance work; for unavoidable increased costs for the planned program due to necessary but unforeseen adjustments, including engineering and design changes, contractor and other claims and relocations, or for payment of a retrospective premium adjustment in excess nuclear property insurance.

Financing.—The Transmission Act provides for the use by BPA of all receipts, collections, and recoveries in cash from all sources, including the sale of bonds, to finance the annual budget programs of BPA. These receipts result primarily from the sale of power and wheeling services. The Transmission Act also provides for authority to borrow from the U.S. Treasury at rates comparable to borrowings at open market rates for similar issues. As amended by the Pacific Northwest Power Act and replenished by Public Law 98-50, it allows for \$3.75 billion of borrowing to be outstanding at any time. The fiscal year 1995 capital program obligations are estimated to be \$447.8 million. To the extent BPA capital borrowing authority is insufficient in 1995, BPA would use cash reserves generated by revenues from customers, if available, to finance some of these investments.

In 1993 BPA made payments to the Treasury of \$730.5 million and also expects to make payments of \$863.7 million in 1994 and \$846.1 million in 1995 on a current services basis. The 1995 payment will be distributed as follows: U.S. Army Corps of Engineers, U.S. Bureau of Reclamation, U.S. Fish and Wildlife Service O&M (\$134.8 million), interest expense on bonds and appropriations (\$382.2 million), allowance for funds used during construction—capitalized interest (\$7.2 million) and amortization (\$321.9 million).

Direct loans.—There will be no direct loans in 1995.

Operating results.—Total revenues and reimbursements are forecast at approximately \$3,387.0 million in 1995.

It should be noted that BPA's revenue forecasts are based on several critical assumptions about both the supply of and demand for Federal energy. During the operating year, deviation from the conditions assumed in a rate case may result in a variation in actual revenues of several hundred million dollars from the forecast.

Western's operation and maintenance and power marketing expenses for the Colorado River storage project, the Colorado River Basin project, the Seedskadee project and the Fort Peck project are financed from power revenues.

Western operates and maintains approximately 3,500 miles of transmission lines, substations, switchyards, communications and control equipment associated with this fund. Wholesale power is provided to utilities over interconnected high-voltage transmission systems. In keeping with statutory requirements, long-term power contracts provide for periodic rate adjustments to ensure that the Federal Government recovers all costs of operation and all capital invested in power, with interest.

Colorado River storage project.—Western markets power and operates and maintains the power transmission facilities of the Colorado River storage project. Western also purchases electricity and pays wheeling fees to meet firm and nonfirm commitments.

Colorado River Basin project.—The Colorado River Basin project includes Western's expenses associated with the Central Arizona project and the United States entitlement from the Navajo coal-fired powerplant. Revenues in excess of operating expenses are deposited in the Lower Colorado River Basin development fund.

Fort Peck project.—Revenue collected by Western is used to defray construction, operation and maintenance and power marketing expenses associated with the power generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to ensure continuous operation. The Corps operates and maintains the power generating facilities, and Western operates and maintains the transmission system and performs power marketing functions.

Seedskadee project.—Activity under the Seedskadee project at Fontenelle Dam in Wyoming was previously included in the Colorado River Storage project. In FY 1994, separate reporting was initiated to comply with power repayment requirements.

Energy sales and revenue from the Colorado River storage project, the Seedskadee project and the Colorado River Basin project are shown in the table below. Revenue from the Fort Peck project is integrated with Pick-Sloan Missouri Basin program revenue and included in the revenue totals shown in Western's construction, rehabilitation, operation and maintenance account.

Departmental Administration.—This account funds a wide array of policy development and analysis activities, institutional and public liaison functions, and other program support requirements necessary to ensure effective operation and management. Specific activities provided for are:

General and special funds—Continued

DEPARTMENTAL ADMINISTRATION—Continued

Policy, Planning and Program Evaluation.—This organization is the principal advisor to the Secretary for formulating and recommending national energy policy, for Departmental planning strategies and outyear program funding requirements, for conducting integrated policy analysis, for conducting a systemic evaluation of DOE programs to ensure that each contributes the maximum towards national energy goals and objectives, for managing the performance management program, for the formulation of international energy policy, analyses and assessments of the current world energy situation, and for international cooperation in energy matters.

Human Resources and Administration.—This office provides institutional support services to headquarters organizations and to the Department as a whole. Areas of responsibility include: organization and management systems; personnel management; automated data processing management and acquisition; telecommunications management; procurement and assistance management and oversight; as well as performing and supplying administration services.

Chief Financial Officer.—This office is responsible for Departmental budgeting, accounting, financial policy, and compliance.

Congressional and Intergovernmental Affairs.—This office is responsible for coordinating and directing legislative liaison with the Congress. It gathers information on issues under departmental jurisdiction; counsels and advises DOE staff on relationships with the Congress, State, local and tribal officials, and other Federal agencies; serves as liaison between relevant DOE elements and Congressional authorization and/or oversight committees and other Members; and coordinates the designation and scheduling of DOE witnesses to testify at hearings. For intergovernmental activities, the office provides guidance to ensure consistency in program activities with constituents and oversight on relations between Federal energy activities and external groups excluding those on an international level.

Public and Consumer Affairs.—This office is responsible for managing and ensuring coordination of Departmental policies and programs for conducting relations with the news media and the general public. The Office also reviews and approves the Department's publications, exhibits and audiovisual products for general distribution.

Field Management.—This office is responsible for strategic planning for all field elements and management coordination and oversight of all operations offices, implementing project management, cost, energy and facilities management systems and programs, and contractor employee protection.

Operations Offices.—The operations offices perform functions in support of energy activities throughout the country. Among these functions are field procurement, engineering and construction management, health and safety and environmental monitoring, property management, labor relations and maintenance of personnel and financial systems.

General Counsel.—This office is responsible for providing legal services to all energy activities except for those functions belonging exclusively to the Federal Energy Regulatory Commission, which is served by its own General Counsel and litigation arising from the Emergency Petroleum Allocation Act. Its responsibilities entail the provision of legal opinion, advice and services to administrative and program offices, and the conduct of both administrative and judicial litigation, as well as legal advice and support for enforcement activities. Further, the General Counsel appears before State and Federal agencies in defense of national energy policies and activities. The office is responsible for the coordination and clearance of proposed legislation affecting energy activities and testimony before Congress. The General Counsel is also re-

sponsible for oversight of intelligence activities; ensuring consistency and legal sufficiency of all energy regulations; administering and monitoring standards of conduct requirements; and conducting the Patents program.

Office of the Secretary.—Directs and supervises the staff and provides policy guidance to line and staff organizations in the accomplishment of agency objectives.

Board of Contract Appeals.—Adjudicates disputes arising out of the Department's contracts and financial assistance programs.

Economic Impact and Diversity.—Is responsible for: (1) advising the Secretary on the effects of the Department's policies, regulations and actions on minorities and minority business enterprises; (2) conducting research to determine energy consumption and use patterns of minorities; (3) providing technical assistance to minority educational institutions and minority business enterprises to enable them to participate more fully in Departmental activities; (4) the office also is responsible for initiatives on historically black colleges and universities for the Department; (5) administering a Departmental small and disadvantaged business program; and, (6) equal employment opportunity.

Work for Others.—This activity covers the cost of work performed under orders placed with the Department by non-DOE entities. Reimbursement for these costs is made through deposits of offsetting collections to this account.

ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY

Appropriations under this Act for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair, and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services.

From appropriations under this Act, transfers of sums may be made to other agencies of the Government for the performance of work for which the appropriation is made.

None of the funds made available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriations Act.

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign: *Provided*, That revenues and other moneys received by or for the account of the Department of Energy or otherwise generated by sale of products in connection with projects of the Department appropriated under this Act may be retained by the Secretary of Energy, to be available until expended, and used only for plant construction, operation, costs, and payments to cost-sharing entities as provided in appropriate cost-sharing contracts or agreements: *Provided further*, That the remainder of revenues after the making of such payments shall be covered into the Treasury as miscellaneous receipts: *Provided further*, That any contract, agreement, or provision thereof entered into by the Secretary pursuant to this authority shall not be executed prior to the expiration of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) from the receipt by the Speaker of the House of Representatives and the President of the Senate of a full comprehensive report on such project, including the facts and circumstances relied upon in support of the proposed project.

The Secretary of Energy may transfer to the Emergency Preparedness appropriation such funds as are necessary to meet any unforeseen emergency needs from any funds available to the Department of Energy from this Act.

No funds provided in this Act may be expended by the Department of Energy to prepare, issue, or process procurement documents for programs or projects for which appropriations have not been made.

The thirty-day waiting period required under this head in Public Law 101-512, Department of Energy Administrative Provisions, relating to a contract, agreement, or arrangement with a profit-making or non-profit entity to conduct activities at the Department of Energy's research facilities at Bartlesville, Oklahoma, is hereby waived. (*Department of the Interior and Related Agencies Appropriations Act, 1994.*)

GENERAL PROVISIONS—DEPARTMENT OF ENERGY

(TRANSFER OF FUNDS)

SEC. 301. Appropriations for the Department of Energy under this title in this and subsequent Energy and Water Development Appropriations Acts, hereafter shall be available for hire of passenger motor vehicles; hire, maintenance and operation of aircraft; purchase, repair and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services. From these appropriations, transfers of sums may hereafter be made to other agencies of the United States Government for the performance of work for which this appropriation is made. None of the funds made available to the Department of Energy under this Act or subsequent Energy and Water Development Appropriations Acts shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriation Act. The Secretary is authorized hereafter to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign.

(TRANSFER OF FUNDS)

SEC. 302. Not to exceed 5 per centum of any appropriation made available for Department of Energy activities funded in this Act or

subsequent Energy and Water Development Appropriations Acts may hereafter be transferred between such appropriations, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 5 per centum by any such transfers, and any such proposed transfers shall be submitted promptly to the Committees on Appropriations of the House and Senate.

(TRANSFERS OF UNEXPENDED BALANCES)

SEC. 303. The unexpended balances of prior appropriations provided for activities in this Act or subsequent Energy and Water Development Appropriations Acts may hereafter be transferred to appropriation accounts for such activities established pursuant to this title. Balances so transferred may be merged with funds in the applicable established accounts and thereafter may be accounted for as one fund for the same time period as originally enacted. (Energy and Water Development Appropriations Act, 1994.)

TITLE V—GENERAL PROVISION

The following sections are proposed for deletion and do not appear below:

- Sec. 501 ... Provisions relating to minority participation in the Superconducting Super Collider program.
- Sec. 502 ... Provisions relating to compliance with Buy American Act.
- Sec. 503 ... Provisions relating to purchase of American-made equipment and products, and notice to recipients of assistance.
- Sec. 504 ... Provisions relating to prohibition of contracts.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

Federal Funds

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Food and Drug Administration, including hire and purchase of passenger motor vehicles; for rental of special purpose space in the District of Columbia or elsewhere; and for miscellaneous and emergency expenses of enforcement activities, authorized and approved by the Secretary and to be accounted for solely on the Secretary's certificate, not to exceed \$25,000; [\$867,339,000, of which not to exceed \$54,000,000 in fees pursuant to section 736 of the Federal Food, Drug, and Cosmetic Act may be credited to this appropriation and remain available until expended: *Provided*, That fees derived from applications received during fiscal year 1994 shall be subject to the fiscal year 1994 limitation: *Provided further*, That none of these funds shall be used to develop, establish, or operate any program of user fees authorized by 31 U.S.C. 9701: *Provided further*, That none of the funds in this Act may be used to pay for expenses of the Board of Experts on Tea] \$588,084,000; including such sums as necessary for the inspection of mammography facilities, notwithstanding section 354(r) of the Public Health Service Act; and in addition, \$252,000,000, to be credited to this appropriation, from fees established and collected to cover the costs of regulation of products under the jurisdiction of the Food and Drug Administration, to remain available until expended.

In addition, fees pursuant to section 736 of the Federal Food, Drug, and Cosmetic Act may be credited to this appropriation and remain available until expended in accordance with section 736(g) of such Act: *Provided*, That the amount of such fees may be adjusted pursuant to section 736(c) of that Act: *Provided further*, That fees derived from applications received during fiscal year 1995 shall be subject to the fiscal year 1995 limitation.

In addition, fees pursuant to section 354 of the Public Health Service Act may be collected and credited to this account, to remain available until expended. (Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1994.)

RENTAL PAYMENTS (FDA)

(INCLUDING TRANSFERS OF FUNDS)

For payment of space rental and related costs pursuant to Public Law 92-313 for programs and activities of the Food and Drug Administration which are included in this Act, \$48,575,000, of which \$15,000,000 shall be retained by the Food and Drug Administration for repairs, improvements, and non-recurring repairs as determined by the Food and Drug Administration: *Provided*, That in the event the Food and Drug Administration should require modification of space needs, a share of the salaries and expenses appropriation may be transferred to this appropriation, or a share of this appropriation may be transferred to the salaries and expenses appropriation, but such transfers shall not exceed 5 per centum of the funds made available for rental payments (FDA) to or from this account.

BUILDINGS AND FACILITIES

For plans, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities of or used by the Food and Drug Administration, where not otherwise provided, \$8,350,000, to remain available until expended (7 U.S.C. 2209b): *Provided*, That the Food and Drug Administration may accept donated land in Montgomery and/or Prince George's Counties, Maryland. (Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1994.)

The Health Education Assistance Loan (HEAL) program guarantees loans from private lenders to health professions students to help pay for the costs of their training. As required by the Federal Credit Reform Act of 1990, this account records, for the HEAL program, the subsidy costs associated with HEAL loan guarantees committed in 1992 and beyond (including modifications of HEAL loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of the program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

Title VII, part C of the Public Health Service Act established a revolving fund from which health professions schools could borrow in order to provide loans to their students.

Public Law 89-751, the Allied Health Professions Personnel Training Act of 1966, amended the Public Health Service Act to authorize the Federal Government to pay the difference between the interest paid by students to the schools and the interest payable by the schools to the Government National Mortgage Association (GNMA) and the Treasury.

Title VI and subsequently title XVI of the Public Health Service Act established a loan and loan guarantee fund for medical facilities with a maximum amount allowable for the Government's liability. Direct loans were made available for public facilities and guaranteed loans for private, nonprofit facilities. Funds under this authority were established in the amount of \$50 million for use in fulfilling guarantees in event of default, \$30 million as a revolving fund for direct loans and an amount for interest subsidy payments on guaranteed loans. Default and interest subsidy funds are replenished as necessary through the annual appropriation process.

The Supplementary Medical Insurance (SMI) program is a voluntary program which affords protection against the costs of physician and certain other medical services. The program also covers treatment of end-stage renal disease for eligible enrollees. SMI costs are financed by premium payments from enrollees and contributions from the general revenues.

The status of the trust fund is as follows:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. The major divisions of this chapter conform to the following Department activities:

Housing programs cover the Department's major housing subsidy programs except for those activities under the public and Indian housing programs. Included in the Housing section is a new initiative called Moving to Independence, which will combine rental subsidies with intensive counseling to enhance the ability of low-income families to live in neighborhoods of their choice. The mortgage insurance activities of the Federal Housing Administration, including loan management, are also included under this heading. Other activities included under this heading are the Office of Interstate Land Sales Registration and manufactured home inspection and monitoring programs.

Public and Indian housing programs cover public housing management and development activities (including modernization and resident management programs) to address the problems associated with severely distressed public housing and to provide housing assistance to Native Americans. This section also includes a new urban anti-crime initiative—Community Partnerships Against Crime (COMPAC).

Government National Mortgage Association (GNMA) covers the Department's programs to assist in the availability of mortgage credit and stabilize financing of selected types of mortgage loans utilizing the guarantee of mortgage-backed securities. GNMA will begin utilizing multiple maturity securities issued through Real Estate Mortgage Investment Conduits (REMICs) in addition to its current single-class mortgage-backed securities.

Community planning and development covers the community development grant program authorized by the Housing and Community Development Act of 1974, as amended, the Home Investment Partnerships program (HOME) and the homeless grant programs—including a proposed, new consolidated Homeless Assistance Program. Other new proposals, beginning in 1995, include a set of Project-Based Community Grant initiatives and the Colonias Assistance Program. This heading also includes the administration of the earlier terminated categorical community development programs, including urban development action grants, and the revolving fund for liquidating programs.

Fair housing and equal opportunity includes the Fair Housing Assistance Program authorized by title VIII of the Civil Rights Act of 1968, as amended, and the Fair Housing Initiatives Program. Additionally, the 1995 Budget includes several new anti-discrimination initiatives, including grants for economic development centers, a mortgage lending initiative, an insurance redlining initiative and a pilot metropolitan area-wide assisted housing program aimed at combating discrimination.

Policy development and research includes the policy development, economic analysis, program evaluation, and research activities of the Department.

Departmental Management includes the Department's Salaries and Expenses, the Inspector General, and the Office of Federal Housing Enterprise Oversight.

A total of \$9.5 billion is requested for 1995 under Annual Contributions for Assisted Housing. The funding will be used for rental assistance for approximately 88,000 units and for amendments to existing contracts. Included within the total number of units proposed for this budget are 79,428 incremental units. This total is comprised of 4,071 units to assist the elderly and disabled, 70,000 incremental rental assistance units, 1,754 units for Public Housing Development, 2,715 units for Indian Housing Development, and approximately 900 units for Housing Opportunities for Persons with AIDS. Included within the 70,000 incremental assistance units are 5,000 units for the Pension Partnership initiative, 15,000 units for homeless assistance and 5,000 units for the disabled.

Within the \$9.5 billion requested is funding for Public and Indian Housing amendments, lease adjustments, and \$2.8 billion for Modernization activities.

Funding is also requested for Family Investment Centers (\$26.3 million), Family Self-Sufficiency Coordinators (\$17.3 million), Loan Management activities (\$150 million), and for lead-based paint abatement (\$100 million).

The Budget also reflects several cost saving initiatives such as reforms in the manner of calculating rents, reforms to the preservation program, a restructured PHA fee system, refinancing high cost section 8 debt, and other program modifications. Also included in the 1995 Budget are several new initiatives. These include Mobility Counseling (149.1 million), Grants for Economic Development (\$25 million), and Metropolitan Area-wide Assisted Housing (\$19 million).

The program being proposed for Annual Contributions in 1995 is summarized in the following table.

Low-income housing (section 8).—The Budget proposes the reservation of 87,658 units under Annual Contributions, of which 79,318 will be section 8.

Included within the 79,318 section 8 units are 2,421 Public Housing and Housing Relocation/Replacement opt-out units, 888 incremental units for Housing Opportunities for Persons with AIDS, 195 units for Section 23 Conversion, 5,814 units for Loan Management activities, and 70,000 regular incremental rental assistance units.

Housing for the elderly and disabled (section 801 and 811).—The Cranston-Gonzales National Affordable Housing Act authorized a grant program to make new construction assistance available to elderly and disabled persons. Both the Grant funding and the Rental Assistance—or operating subsidy—needed to aid these low-income tenants is being requested under the annual contributions account in 1995. The funding requested for 1995 is expected to support 1,156 units for the elderly and 2,915 units for the disabled.

Public and Indian housing.—New development funding is being requested in fiscal year 1995 for both Public Housing (\$150 million) and for Indian Housing development (\$263 million). These funds are expected to support 1,754 Public Housing units and 2,715 Indian Housing units. In addition, \$2.8 billion is requested for Public and Indian Housing Modernization activities and \$21.9 million is requested for Public/Indian Housing amendments and lease adjustments. In addition, \$30 million is requested for Public Housing Service Coordinators. Also, within the Modernization program, \$85 million will be used for a new Tenant Opportunity Program. The Department remains committed to expediting the transfer of funds to Public and Indian Housing Authorities, and to encourage these authorities to complete modernization projects in a more timely fashion.

Section 8 funding for the renewal of expiring subsidy contracts is being requested in a separate account.

To more concisely portray budget activity under the subsidized housing programs, the Annual Contributions for Assisted Housing account has been split into two accounts: Annual Contributions for Assisted Housing, which precedes this section, and Other Assisted Housing Programs presented immediately above.

Rent supplement.—Rent supplement assistance payments will continue to be made on behalf of qualified low-income tenants in approximately 19,270 units which have not converted to section 8.

Section 235.—The Housing and Urban-Rural Recovery Act of 1983 (Public Law 98-181) authorized a restructured section 235 program based on a 10-year interest reduction subsidy. A total of \$150 million of budget authority was provided in the Second Supplemental Appropriations Act of 1984 (Public Law 98-396) to fund the program. Recaptures of budget authority from terminations must be transferred into the Homeownership Assistance Fund account established pursuant to Public Law 98-181. Amounts deposited will be available for use to assist program beneficiaries still in need of assistance at the expiration of their present ten-year assistance contracts.

In addition, appropriations are requested in the amount of \$6.9 million, to fund closing costs, discount points, and incentives needed to encourage mortgagors subsidized under the Section 235 program to refinance at lower, prevailing market interest rates. The subsidy savings from refinancing these loans substantially exceed the costs involved and will produce a net savings to the Treasury over time. Up to \$184 million in budget authority may be rescinded.

Section 236.—The Housing and Urban Development Act of 1968, as amended, authorizes the section 236 Rental Housing Assistance Program which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants.

The Rental Housing Assistance Rescission allows the rescission of not more than \$2,000,000 in uncommitted balances of contract authority.

In addition, up to \$66 million in budget authority may be rescinded as a result of mortgage prepayments by section 236 project owners.

The table below reflects the consolidated outlay total for both the Annual Contributions for Assisted Housing Account and the Other Assisted Housing account, including proposed funding shown separately as supplemental or investment requests.

This schedule shows one part of the Administration's proposal to reform the affordable housing subsidy requirements for multifamily property disposition. This part would authorize a new, direct spending program for Section 8, to facilitate the disposition of subsidized or formerly subsidized projects held or owned by the Department. Expenditures from this account would be offset by savings in the FHA General and Special Risk Insurance Funds, shown elsewhere in the budget.

ASSISTANCE FOR THE RENEWAL OF EXPIRING SECTION 8 SUBSIDY CONTRACTS

(INCLUDING TRANSFER OF FUNDS)

For assistance under the United States Housing Act of 1937 (42 U.S.C. 1437) not otherwise provided for, for use in connection with expiring section 8 subsidy contracts, [\$4,558,106,000] \$4,292,000,000, to remain available until expended: *Provided*, That to the extent the amount in this appropriation is insufficient to fund all expiring section 8 contracts, the Secretary may transfer to and merge with this appropriation such amounts from the "Annual contributions for assisted housing" appropriation as the Secretary shall determine, and amounts earmarked in the foregoing account may be reduced accordingly, at the Secretary's discretion: *Provided further*, That the Secretary may maintain consolidated accounting data for funds disbursed at the public housing agency or Indian housing authority or project level for subsidy assistance regardless of the source of the disbursement so as to minimize the administrative burden of multiple accounts.

Further, for the foregoing purposes, \$800,000,000, to become available for obligation on October 1, [1994] 1995, and to remain available for obligation until expended. (*Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1994.*)

The budget proposes an appropriation of \$4.3 billion to renew those section 8 subsidy contracts that are scheduled to expire. Together with the \$800 million advance appropriation provided in 1994, funding available for 1995 will be \$5.1 billion. Authority is again requested to transfer funds from the Annual Contributions for Assisted Housing account, if needed, to supplement this appropriation.

The Homeownership and Opportunity for People Everywhere Program provides homeownership opportunities which are affordable for low-income families. Units will be converted to homeownership from public and Indian housing properties in HOPE 1, from FHA-insured and Government-held multifamily properties in HOPE 2 and from Government-owned or -held single family properties in HOPE 3. HOPE Grants will be used for property acquisition where appropriate, rehabilitation, mortgage subsidies, security measures, operating reserves, and technical assistance. In addition, grants may be devoted to counseling and training of residents, and other activities intended to help them become economically self-sufficient homeowners.

The budget authority for HOPE homeownership grants in 1995 reflects the funding of implementation grants only; no additional planning grant funding is requested. A proposed rescission of unobligated HOPE 1 and HOPE 2 funds from prior years appears elsewhere in the Budget appendix.

Public housing units which are utilized for homeownership will be replaced by additional housing or housing assistance, and section 8 rental assistance will be given to eligible residents who elect to move from multifamily projects which are converted to homeownership.

An appropriation of \$300 million was transferred to a separate account for Severely Distressed Public Housing by the Supplemental Appropriations Act of 1993 (P.L. 103-50) from funds originally appropriated for the same purpose under the heading HOPE Grants in P.L. 102-389.

The Supplemental Appropriations Act also transferred \$40 million originally appropriated for HOPE homeownership grants to a separate account for Youthbuild Programs. This program and financing schedule also reflects the proposed transfer to this separate account at the start of fiscal year 1995 of an obligated balance of \$28 million appropriated for Youthbuild under HOPE grants in the 1994 Appropriations Act.

The amounts proposed for Youthbuild and Severely Distressed Public Housing in fiscal year 1995 appear separately in this Budget. The Budget reflects no further funding for the Elderly Independence demonstration program. The budget authority requested in the HOPE account in 1995 is for HOPE homeownership grants.

The budget proposes \$50 million for an expanded Housing Counseling Assistance Program in 1995.

Legislation is being proposed also to amend section 106 of the Housing and Urban Development Act of 1968 to authorize the Secretary to make grants to counseling agencies that conduct community outreach and improve the access of low and moderate-income households to homeownership and sources of mortgage credit. This new competitive grant program would provide support for community-based loan counseling efforts with emphasis on increasing the awareness of homeownership opportunities, leveraging new funds for homeownership and expanding access to mortgage credit.

Other authorized section 106 counseling activities will also continue to be eligible for assistance in 1995.

Section 8 assistance for single room occupancy dwellings is authorized by Title IV, subtitle E, of the Stewart B. McKinney Homeless Assistance Act, as amended by the Housing and Community Development Act of 1992. No appropriation is requested for this program in 1995. Instead, the Administration proposes to provide funding for the homeless within a new Homeless Assistance Grants account which is described separately in this chapter.

Funding for this program before 1990 was provided under the Annual Contributions for Assisted Housing account. A separate appropriation, independent of the Assisted Housing account, was provided beginning in 1990. The obligations and outlays shown in the Program and Financing schedule above do not include activity from the pre-1990 appropriations. For purposes of comparison, the table below presents data for the entire program from all appropriations:

Section 620 of the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, authorizes enforcement of appropriate construction standards for the construction, design and performance of manufactured homes to assure their quality, durability, and safety. All manufactured homes produced since the standards took effect on June 15, 1976 must comply with Federal construction and safety standards. The States are actively encouraged to participate in the program under compliance plans approved by HUD.

General and special funds—Continued**MANUFACTURED HOME INSPECTION AND MONITORING—Continued**

A fee is charged to the manufacturers for each manufactured home produced to cover the costs of the monitoring and enforcement activities by HUD contract agents. Fees are deposited in a special fund administered by the Department, and a portion of the fee receipts are transferred to the salaries and expenses account to defray the direct administrative expenses of the program.

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 100 or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, to be paid by the developer when filing a statement of record. The fee receipts are permanently appropriated and have helped finance a portion of the direct administrative expenses incurred in program operations.

Public enterprise funds:**TITLE IV—CORPORATIONS**

Corporations and agencies of the Department of Housing and Urban Development which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for [1994] 1995 for such corporation or agency except as hereinafter provided: *Provided*, That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriations Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government. The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

The Housing and Community Development Amendment of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent collections received after 1978 to the Troubled projects operating subsidy program, renamed the Flexible Subsidy Fund. Prior to that time, collections were used for paying tax and utility increases in section 236 projects. The Housing and Community Development Act of 1980 amended the 1978 Act by authorizing the transfer of excess rent collections regardless of when collected.

This budget proposes that the resources from the Rental Housing Assistance Fund will continue to be transferred to the Flexible Subsidy Fund.

The Flexible Subsidy Fund assists financially troubled subsidized projects under certain FHA authorities. The subsidies are intended to prevent potential losses to the FHA fund

resulting from project insolvency and to preserve these projects as a viable source of housing for low and moderate-income tenants. Priority is given to projects with Federal insurance-in-force and then to those with mortgages that have been assigned to the Department of Housing and Urban Development.

A portion of Flexible Subsidy capital improvement loans are used, along with incentives available in the Emergency Low-Income Housing Preservation program, to extend affordability requirements for projects eligible to prepay mortgages. The Preservation program under Annual Contributions for Assisted Housing, the Multifamily Property Disposition program (which is proposed to become a separate program elsewhere in this budget), and the Flexible Subsidy program are a complementary set of instruments for addressing the needs of the stock of assisted and insured, affordable multifamily housing.

This program and financing schedule reflects appropriations and continued funding from offsetting collections, composed of receipts from the Rental Housing Assistance Fund and income from the Flexible Subsidy Fund.

The community disposition program was established by the Atomic Energy Community Act of 1955 to dispose of federally owned properties.

Budget program.—All sales under the program have been completed. The Department will continue to service the mortgage inventory it currently holds.

Operating results.—Total funds recovered and transferred to the Treasury over the life of the program are estimated to reach \$87.3 million by the end of 1994. The mortgages are expected to be liquidated by the end of 1994 and there will be no activity thereafter.

The Homeownership Assistance Fund was established by the Housing and Urban-Rural Recovery Act of 1983. It provides for the receipt of recaptures of budget authority, cash, and interest earnings under the restructured section 235 program. The funds are authorized to be used, to the extent approved in Appropriation Acts, by the Secretary to provide additional section 235 assistance payments for mortgagors who are unable to assume the full payment due under the mortgage after the termination of the original 10-year assistance payments contract.

The Nehemiah grants program was authorized by the Housing and Community Development Act of 1987 and funded in 1989, 1990 and 1991 under the Annual Contributions for Assisted Housing account. The legislation authorizes a revolving fund into which are deposited appropriated funds. This program and financing schedule indicates the appropriation from 1990 and 1991 as being transferred to the Annual Contributions account during fiscal year 1993.

The program provided loans to eligible families to assist in the purchase of new or substantially rehabilitated units. The purpose of the program was: (1) to encourage homeownership by families not otherwise able to afford homeownership; (2) to undertake a concentrated effort to rebuild the depressed areas of the cities and to create sound and attractive neighborhoods; and (3) to increase the employment of neighborhood residents. No new funding is requested for this program in 1995. This schedule reflects the liquidation of reserve/obligated balances remaining in the Nehemiah Housing Opportunity Fund.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with the loan guarantees committed in 1992 and thereafter, as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis. Total insurance commitments are estimated at \$84.9 billion in 1995. Because the net present value of future income for the 1995 book of business is expected to exceed the net present value of expenses, no credit subsidy appropriation is required. Negative subsidies are recorded in the MMI guaranteed loan financing and receipt accounts. The appropriation requested, \$308.8 million, is to be transferred to the consolidated Salaries and Expenses, HUD, account.

Regulations implementing major reforms to this single family mortgage insurance program, enacted in the National Affordable Housing Act of 1990, became effective July 1, 1991. The objective of the reforms was to rebuild the economic value of the fund while maintaining the following principles: (1) meeting the needs of low- and moderate-income first-time homebuyers; (2) establishing insurance premiums that reflect the risk of default; and (3) requiring homebuyers to make minimum equity contributions to protect them and the Fund from excessive default risk.

(INCLUDING TRANSFERS OF FUNDS)—Continued

An independent actuarial analysis of the fund recommended that capital in the fund be increased to 2.0 percent of outstanding insurance in force by the year 2000. According to the reforms implemented with the July 1, 1991 regulations FHA homebuyers are paying an annual premium of 50 basis points (0.5 percent) for a specified number of years depending upon the amount of downpayment the homebuyer makes. This annual premium is in addition to the up-front premium, currently 3.0 percent and dropping to 2.25 percent beginning in 1995.

Other changes to the program aimed at stabilizing the fund included, elimination of distributive share payments (mutual-ity benefits) to FHA-insured homeowners who pay off their loans unless the entire fund is actuarially sound; and, elimination of vacation properties from the insurance program.

The Department is monitoring the effects of these reforms on the fund. The financial health of the fund depends on the number and costs of homeowner defaults, which are a function of general economic conditions and homeowner equity in the underlying property. The Secretary has the authority to raise or lower the premiums, if an independent auditor determines that the Fund is not meeting its operational goals. These statutory goals are: (1) maintaining an adequate capital ratio; (2) providing access to mortgage credit for homebuyers with low downpayments and first-time homebuyers; (3) minimizing the risk to the Fund and to homeowners from homeowner default; and, (4) avoiding adverse selection.

The \$200 million in FY 1995 direct loan limitation (\$180 million in the MMI Fund and \$20 million in the GI/SRI Fund) would permit the Department to use Purchase Money Mortgages (PMMs) to help finance the sale of 5,000 acquired single family properties. HUD would extend credit for these single-family homes to community nonprofit organizations or local government entities who would be expected to sell the

properties to low- and medium-income buyers. The use of PMMs should provide a new tool for State and local nonprofit organizations to use in revitalizing communities, and create enhanced homeownership opportunities for low- and moderate-income families.

The Federal Housing Administration (FHA) Fund consists of four separate insurance funds. Prior to 1992, all budget transactions for the four funds were reflected in a single consolidated budget account (86-4070). Beginning in 1992, the transactions of the Fund appear in six separate accounts. (However, financial data for each individual insurance fund are continuing to be maintained for control and reporting purposes.)

In order to present more clearly the operations of the various funds, FHA's budget transactions have been separated into two major business segments. The single-family insurance programs in the Mutual Mortgage and the Cooperative Management Housing insurance funds (MMI/CMHI) form one

segment. The multifamily and high risk insurance programs in the General Insurance and Special Risk Insurance funds (GI/SRI) form the other.

The Federal Credit Reform Act of 1990 creates a structure of three accounts for existing credit programs. For each of the FHA business segments (MMI/CMHI and GI/SRI) there is a liquidating account, which records the revenues and costs associated with loan insurance committed prior to October 1, 1991; a financing account which records the revenues and costs associated with commitments to insure loans made after September 30, 1991; and, a program account which records the transactions associated with the program subsidy costs, if any, and the costs of administering the program.

This liquidating account records, for this program, all cash flows to and from the Government resulting from MMI/CMHI loan guarantees committed prior to fiscal year 1992. This account is shown on a cash basis. All new activity in this program in 1992 and thereafter (including modifications of loan guarantees that resulted from commitments in any year) is recorded in corresponding program (86-0138) and financing (86-4587 and 86-4242) accounts.

The detailed program activity in the "Program Highlights" table shown below reflects only the activity in the MMI/CMHI Funds. The detailed GI/SRI program activity can be found with the GI/SRI liquidating account (86-4072).

Insurance reserves from operations at the end of 1993 are estimated to be in a surplus position for the Mutual mortgage insurance and Cooperative management housing insurance funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1995 for the MMI/CMHI account follows:

The *General insurance fund* provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, rental housing and nonprofit hospitals.

The *Special risk insurance fund* provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Budget program.—As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from loan guarantees committed and direct loans obligated prior to 1992. This account is shown on a cash basis. All new activity in this program in 1992 and thereafter (including modifications of loan guarantees that resulted from obligations, direct loans or commitments in any year and direct loans) is recorded in corresponding program (86-0200) and financing (86-4077 and 86-4105) accounts.

The detailed programs activity in the "Program Highlights" table shown below reflects the consolidated activity of the GI/SRI account.

This schedule shows offsetting savings to FHA as a direct result of increased spending from the Reformed Multifamily Property Disposition program, discussed in the preceding. The reduction in spending occurs when FHA averts the mandatory cost of continuing to hold subsidized or formerly subsidized projects in its inventory by being able to sell such projects with Section 8 subsidies.

In addition, this schedule shows savings in 1994 from the second part of the Administration's proposed reforms to multifamily property disposition. This part of the proposal would generate savings by lowering the subsidy required to preserve this housing as affordable when it is disposed of by the Department. This proposal will result in a "loan modification," as defined in the Federal Credit Reform Act of 1990.

Note.—Amounts for direct loan obligations reflect reservations of section 202 funds. Loan obligations shown under the program and financing schedule reflect loans that have reached the initial closing stage of processing.

The Housing for the Elderly or Handicapped Fund was established pursuant to section 202 of the Housing Act of 1959, as amended. The fund provides direct loans to nonprofit organizations building and managing housing projects for lower income persons who are elderly or disabled.

Projects must include an assured range of necessary services for the occupants of such projects. In addition, the section 8 lower income housing assistance payments program has been used in conjunction with the section 202 program. Applications under the two programs have been processed simultaneously.

The data included in these schedules represent direct loan activities funded under the Housing for the Elderly or Handicapped Loan Fund. Activities in support of the needs of the elderly and disabled are carried out under a new grant program funded in the 1991 Appropriations Act (P.L. 101-507) and authorized in the National Affordable Housing Act (P.L. 101-625).

After April 1, 1992, all projects for which there were administrative reservations converted to the new capital advance assistance program. The operations of the new grant program are included within the Annual Contributions for Assisted Housing account presented elsewhere in this Appendix.

The program and financing schedule for this account summarizes the Federal government's obligations for this loan program. The amounts reflected in the following summary of administrative commitments reflect outstanding section 202 fund reservations, whereas, the obligations portion of the program and financing schedule reflects commitments which have reached the initial loan closing stage of processing.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from direct loans obligated prior to 1992. This account is shown on a cash basis.

The Nonprofit sponsor assistance fund provided interest-free loans to nonprofit organizations to plan housing projects to be financed under the section 202 housing for the elderly or disabled program. The Budget does not propose a loan limitation in 1995 since the capital advance program for the elderly and disabled provides money for technical assistance to help nonprofit sponsors to finance these "seed" costs.

Operating subsidy payments are provided to assist local Public Housing Agencies (PHAs) and Indian Housing Authori-

ties (IHAs) to meet certain deficits in the operation of PHA-owned and IHA-owned low-income housing. These payments are in addition to the debt service and capital funding provided by HUD for development and modernization of low-income housing.

The operating subsidy estimates for 1995 are based primarily upon the Performance Funding System (PFS) formula, but include projected savings resulting from a vacancy rule change and other actions.

SEVERELY DISTRESSED PUBLIC HOUSING—Continued

This program provides Federal resources to rehabilitate and restore severely dilapidated public housing projects, thereby expanding the supply of decent, safe, and affordable housing for low-income renters. Funds provided to this program are in addition to the substantial resources provided for the public housing modernization program and are specifically targeted to the units in most need of attention.

The Low-Rent Public Housing Loan Fund is used to provide direct Federal loans to fund remaining Public Housing Agency (PHA) and Indian Housing Authority (IHA) construction, acquisition, and modernization activities reserved under the Annual Contributions appropriation through 1986. These loans are made from available resources of this fund and from borrowings from the Treasury. Under legislation enacted during 1986 (Public Law 99-272), the borrowings from the Treasury are forgiven at the end of each fiscal year and the loans to PHAs/IHAs are forgiven as construction, acquisition, and modernization activities are completed. Under the provisions of this legislation, \$60 million of borrowings from the Treasury were forgiven in 1993, an estimated \$100 million will be borrowed from the Treasury and forgiven in 1994, and an estimated \$50 million will be borrowed from the Treasury and forgiven in 1995. The table below shows the status of outstanding loans for the period 1993-1995. The \$88 million balance at the end of each year represents administrative loans, off-site facility loans, and preliminary loans on projects never undertaken and excess financing.

The Housing and Urban Development Act of 1968 authorized the Government National Mortgage Association (GNMA) to guarantee the timely payment of principal and interest on privately issued securities that are backed by pools of FHA, VA and FmHA mortgages. The GNMA guarantee gives lenders access to the capital markets for funds to originate new loans. Over 95% of new FHA and VA loans are pooled into new GNMA securities.

Financing.—GNMA Issuers are assessed commitment, guarantee and other fees to cover costs incurred by GNMA and to fund a reserve against possible future payments under the guarantee.

Operating results.—Fee collections, interest, and other income are expected to exceed expenses by \$26 million in both 1994 and 1995. These amounts will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and States to fund local community development programs.

Funds are allocated to Indian tribes, and on an entitlement basis, to metropolitan cities and urban counties which receive their grants using the higher of two objective formulas. States and small cities are also allocated a portion of the available funds.

Budget program. A total appropriation of \$4.4 billion is proposed for 1995 including \$200 million for the new Leveraged Investment for Tomorrow (LIFT) program which would provide project-based assistance to stimulate investment in economic and physical revitalization of urban neighborhoods. Eligible activities include industrial, commercial, and mixed use real estate projects.

In 1995, the Department proposes to fund the Early Childhood Development Program authorized by section 222 of the Housing and Urban Rural Recovery Act of 1983 at \$35 million and the neighborhood development program authorized by section 123 of the 1983 Act at \$10 million.

The Budget proposes \$800 million for a new Project-Based Community Development Grants account in 1995. This account would provide funding for three new initiatives, including: \$150 million for the Economic Revitalization Grants program, \$150 million for the Community Viability Fund (including \$20 million for the Capacity Building for Community Development and Affordable Housing program authorized by section 4 of the HUD Demonstration Act of 1993), and \$500 million for Empowerment Zones and Enterprise Communities Grants.

Economic Revitalization Grants.—This program would provide grants to assist the financing of economic development projects in conjunction with loans under the section 108 loan guarantee program. To qualify, projects must be eligible under the Community Development Block Grants program. The Budget assumes that \$100 million of the funding for these grants would be derived from a transfer of unobligated balances from the Urban Development Action Grants Program in 1995.

Community Viability Fund.—This program would provide grants aimed at improving urban design, and in support of comprehensive neighborhood, city-wide and regional planning (including planning for strategic economic development and deconcentration of the poor and minorities). Additionally, the

General and special funds—Continued**PROJECT-BASED COMMUNITY DEVELOPMENT GRANTS—Continued**

Fund would support a recognition awards program to focus national attention on efforts to find solutions to housing and community development issues. Funds would also be available to build the capacity of community-based development corporations and housing development organizations, and to assist such entities to carry out community development and affordable housing activities, including the demonstration specified under section 4 of the HUD Demonstration Act of 1993. Finally, the fund would support community organizing activities.

Empowerment Zones and Enterprise Communities Grants.—This program would provide grants to support the financing of capital projects, including housing and economic development, in urban Empowerment Zones and Enterprise Communities. Grants could be used for a range of activities, at local discretion, including: repayment of debt financed by municipal bonds; financing of projects in conjunction with the section 108 loan guarantee program and other economic development projects; and support for project-based rental assistance and other housing initiatives.

HOME INVESTMENT PARTNERSHIPS PROGRAM

The HOME Investment Partnerships program is authorized by the National Affordable Housing Act (P.L. 101-625). This program provides assistance to States and units of local government, through formula allocation, for the purpose of expanding the supply and affordability of housing. Eligible activities include acquisition, rehabilitation, tenant-based rental assistance, and, new construction.

In 1995, formula funds will be distributed 40 percent to States and 60 percent to eligible local governments after set-

asides for Indian tribes and Insular Areas and technical assistance. Jurisdictions participating in the program are required to develop a "Comprehensive Housing Affordability Strategy" in order to receive funding. A total appropriation of \$1 billion is proposed for 1995 for the HOME program.

An additional \$100 million is requested for the National Homeownership Trust authorized by title III of the National Affordable Housing Act, as amended by section 182 of the HCD Act of 1992.

Title IV, subtitle C, of the Stewart B. McKinney Homeless Assistance Act (Public Law 100-77) authorizes assistance to promote the development of supportive housing and services for deinstitutionalized homeless individuals, homeless families with children, homeless individuals with mental disabilities, and other homeless persons. Such assistance is available for the acquisition, rehabilitation, construction, or leasing of structures to be used for homeless persons as well as to pay for operating costs and supportive services.

The Budget does not propose an appropriation for this program in 1995. Instead, the Administration proposes to provide funding for the homeless within a new Homeless Assistance Grants account which is described separately in this chapter.

90.00 Outlays			152,400

The Budget proposes a total appropriation of \$1,250 million for this account in 1995, of which \$1,120 million would be for a reorganization of the HUD McKinney programs which would be authorized under a proposed amendment to Title IV of the Stewart B. McKinney Homeless Assistance Act (Public Law 100-77). This program would provide support to States, local governments, nonprofit organizations, and Indian tribes. Funds would support a wide range of activities which are components of an innovative approach to providing a "continuum of care" system to assist homeless persons and prevent future homelessness.

Grant funds would be initially allocated to communities that can demonstrate that they have an effective plan to

comprehensively address homelessness, to forge partnerships with local, private, and nonprofit providers, and to improve access by homeless persons to mainstream services and income support programs. In subsequent years, awards may be phased out as mainstream programs take over. A portion of the funds could be used for the Secretary's Innovative Homeless Initiative, which also promotes comprehensive homeless service systems through local partnership.

The Budget also proposes \$130 million under this account for the Emergency Food and Shelter program authorized under Title III of the McKinney Act. This authorization requires amendment to authorize administration of the program in HUD, instead of FEMA.

YOUTHBUILD PROGRAM

(INCLUDING TRANSFER OF FUNDS)

For the HOPE for Youth: Youthbuild program, authorized by subtitle D of title IV of the Cranston-Gonzalez National Affordable Housing Act, as amended, \$50,000,000 to remain available until expended. Guaranteed loans.—Guaranteed loan assistance under section 108 is provided to eligible communities to finance acquisition of real property, rehabilitation of publicly owned real property, and certain related expenses. In the past the Federal Financing Bank (FFB) financed these guaranteed loans. The Consolidated Omnibus Budget Reconciliation Act of 1985 requires private financing of all loan guarantees committed after July 1, 1986. FFB will continue disbursing loans for commitments approved prior to July 1, 1986. The activity shown in the above account reflects privately financed guaranteed loans for which commitments were made prior to 1992.

The Budget proposes an appropriation of \$33.4 million in 1995 for Fair Housing Activities to aid in eliminating housing discrimination. Of the amount requested, \$7.4 million is for the Fair Housing Assistance program and \$26 million is for the Fair Housing Initiatives program.

The Fair Housing Assistance program, authorized by title VIII of the Civil Rights Act of 1968 as amended, provides funding to State and local agencies to assure prompt and

effective processing of title VIII (Civil Rights Act of 1968) complaints.

The Fair Housing Initiatives program, authorized by the Housing and Community Development Act of 1987 as amended by the Housing and Community Development Act of 1992, provides support to public and private organizations for the purpose of eliminating or preventing discrimination in housing and for enhancing fair housing opportunities.

This appropriation provides agency-wide audit and investigative functions to identify and correct management and administrative deficiencies, which create conditions for existing or potential instances of fraud, waste and mismanagement. The audit function provides internal audit, contract audit, and inspection services. Contract audits provide professional advice to agency contracting officials on accounting and financial matters relative to negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of agency operations. Inspection services provide detailed technical evaluations of agency operations. The investigative function provides for the detection and investigation of improper and illegal activities involving programs, personnel, and operations.

This appropriation funds the Office of Federal Housing Enterprise Oversight (OFHEO), which was established in 1992 to regulate the financial safety and soundness of the two housing Government Sponsored Enterprises (GSEs)—the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. The Office was authorized in the Federal Housing Enterprise Safety and Soundness Act of 1992, which also instituted a three-part capital standard for the GSEs, and gave the regulator enhanced authority to enforce those standards. The Department of Housing and Urban Development itself will monitor the GSEs' compliance with affordable housing goals that were also contained in the Act.

This fund is the repository of gifts and bequests that the Secretary of Housing and Urban Development is authorized to accept and use for the purposes of aiding the work of the Department. Section 7(k)(1) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(k)(1), authorizes the installment of a fund amount for the above purpose.

ADMINISTRATIVE PROVISION

None of the funds provided under this title to the Department of Housing and Urban Development, which are obligated to State or local governments or to housing finance agencies or other public or quasi-public housing agencies, shall be used to indemnify contractors or subcontractors of the government or agency against costs associated with judgments of infringement of intellectual property rights. (*Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1994.*)

DEPARTMENT OF THE INTERIOR

LAND AND MINERALS MANAGEMENT

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on 270 million acres of Public Land. It also supervises mineral leasing and operations on an additional 300 million acres of Federal mineral estate that underlie other surface ownerships. The lands managed by BLM provide important natural resource, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties.

Federal Funds

General and special funds:

MANAGEMENT OF PUBLIC LANDS AND RESOURCES

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, and performance of other functions, including [maintenance of facilities], *acquisition of lands and interests therein, and construction and maintenance of buildings, roads, trails, recreation and appurtenant facilities including the revested Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein including existing connecting roads on or adjacent to such grant lands, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, including the general administration of the Bureau of Land Management, [\$599,860,000] \$717,148,000, [of] which [the following amounts] shall remain available until expended, including \$1,462,000 to be derived from the special receipt account established by section 4 of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 4601-6a(i))*, and \$69,418,000 for the Automated Land and Mineral Record System Project]: *Provided, That appropriations herein made shall not be available for the destruction of healthy, unadopted, wild horses and burros in the care of the Bureau of Land Management or its contractors; and in addition, [\$15,300,000] \$20,800,000 for Mining Law Administration program operations [to remain available through September 30, 1994], to be reduced by amounts collected by the Bureau of Land Management and credited to this appropriation from annual mining claim fees so as to result in a final [fiscal year 1994] appropriation estimated at not more than [\$599,860,000] \$717,148,000: *Provided further, That in addition to funds otherwise available, not to exceed \$5,000,000 from annual mining claim fees shall be credited to this account for the costs of administering the mining claim fee program, and shall remain available until expended: *Provided further, That in addition, all unliquidated balances after September 30, 1994, in the "Construction and Access" and "Oregon and California Grant Lands" accounts shall be transferred to and merged with this account, to remain available until expended: *Provided further, That 25 per centum of the aggregate of all receipts during the current fiscal year from the revested Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California land grant fund and shall be transferred to the General Fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of Title II of the Act of August 28, 1937 (50 Stat. 876).****

[CONSTRUCTION AND ACCESS]

[For acquisition of lands and interests therein, and construction of buildings, recreation facilities, roads, trails, and appurtenant facilities, \$10,467,000, to remain available until expended.]

[OREGON AND CALIFORNIA GRANT LANDS]

Sustaining resource values.—Provides for land use planning and integrated management of rangeland and upland resources, recreation and cultural management, riparian and aquatic resources, threatened and endangered species, wilderness, and resource plans and analysis. Funding to implement California wilderness legislation, now pending before Congress, will be provided by reprogramming funds as necessary.

Sustaining economic, social and physical use.—Responds to public demand for use and management of resources in the context of sustainable development and interdisciplinary management; includes realty and ownership management, wild horse and burro care and placement, fluid minerals management, solid minerals management, facilities maintenance, natural resource law enforcement, hazardous materials management and recreation operations (fees).

Workforce and organizational support.—Provides for Bureau-wide administrative functions including management of information resources and automation, administrative support, and fixed costs.

Construction.—Provides for the construction of buildings, recreational facilities, roads and trails.

ALMRS project.—Provides for the development and Bureau-wide implementation of the Automated Lands and Minerals Records System.

Mining law administration (from fees).—Includes compliance with all phases of the Mining Law and related sections of FLPMA with emphasis on surface management regulation and compliance for mining on the public lands.

Emergency operations.—Provides for replacement or reconstruction of facilities damaged or destroyed by fire or natural disaster; and support to control the potential outbreak of pests on public lands.

The Central HAZMAT account will be used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 et seq.) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

LAND ACQUISITION

For expenses necessary to carry out the provisions of sections 205, 206, and 318(d) of Public Law 94-579 including administrative expenses and acquisition of lands or waters, or interests therein, [\$12,122,000] \$21,173,000, to be derived from the Land and Water Conservation Fund, to remain available until expended. ABANDONED HARDROCK MINE RECLAMATION FUND

(Legislative proposal, subject to PAYGO)

This legislative proposal would create in 1997 a fund for reclamation and restoration of land and water resources adversely affected by past mineral activities on Federal lands. The fund could be used to accomplish a variety of treatments on abandoned mine sites, including reclamation of surface areas, preventing or treating drainage, site sealing, and revegetation of sites for wildlife habitat and to prevent erosion.

RANGE IMPROVEMENTS

For rehabilitation, protection, and acquisition of lands and interests therein, and improvement of Federal rangelands pursuant to section 401 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701), notwithstanding any other Act, sums equal to 50 per centum of all moneys received during the prior fiscal year under sections 3 and 15 of the Taylor Grazing Act (43 U.S.C. 315 et seq.) and the amount designated for range improvements from grazing fees and mineral leasing receipts from Bankhead-Jones lands transferred to the Department of the Interior pursuant to law, but not less than **[\$10,025,000]** \$10,350,000, to remain available until expended: *Provided*, That not to exceed \$600,000 shall be available for administrative expenses. (*Department of the Interior and Related Agencies Appropriations Act, 1994.*)

Operating Funds Accounts include:

Operation and maintenance of quarters.—This account provides for the maintenance of quarters used by Bureau employees in areas where other housing alternatives are unavailable. Expenses are offset by collections in the form of rental payments. This account was established in 1986 under provisions of the 1985 Interior Appropriations Act.

Forest ecosystems health and recovery.—This account is derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California Grant Lands, Public Domain Lands, and Coos Bay Wagon Road Lands. It was established under the 1993 Interior and Related Agencies Appropriations Act to allow the Bureau of Land Management to more efficiently and effectively address forest health problems by allowing for prompt salvage and reforestation of insect-, disease- and fire-damaged forests.

Special acquisition of lands and minerals.—This account represents the monetary value of the quarterly adjustments to bidding rights issued under the authority of Public Law 96-476 as required by section 7 of the Lee Metcalf Wilderness and Management Act of 1983. The bidding rights may be used as monetary credits against that portion of any coal lease bonus payments, rentals or royalties payable under the

Mineral Leasing Act of 1920, as amended, and retained by the Federal Government, on any Federal coal lease won or otherwise held by the holder. The value of unused bidding rights increases at a rate set quarterly by the Secretary of the Treasury, pursuant to section 11 of the Debt Collection Act of 1982 (31 U.S.C. 3717). No activity is anticipated for 1994 or 1995.

Payments from proceeds, sale of water.—Section 40(d) of the Mineral Leasing Act of 1920 (30 U.S.C. 229(a)) provides that when leasees or operators drilling for oil or gas on Public Land strike water, water wells may be developed by the Department from the proceeds from sale of water from existing wells. Consistently, funds derived from such proceeds have been recommended for deferral each year by the Administration.

Expenses, road maintenance deposits.—Users of certain roads under jurisdiction of the Bureau of Land Management make deposits for maintenance purposes, and moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

Permanent Payments include:

Payments to Oklahoma (royalties).—The State of Oklahoma is paid 37½ percent of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

Payments to counties, Oregon and California grant lands.—Fifty percent of the receipts of Oregon and California land-grant funds are paid to the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876). Under provisions of the Omnibus Budget Reconciliation Act of 1993, counties in Western Oregon received payments under established formulas related to values of timber sales.

Payments to States (proceeds of sales).—The States are paid 5 percent of the net proceeds from sale of public land and public land products (31 U.S.C. 1305).

Payments to States from grazing receipts, etc., public lands outside grazing districts.—The States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

Payments to States from grazing receipts, etc., public lands within districts.—The States are paid 12½ percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.—The States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

Payments to Alaska, National Petroleum Reserve.—Alaska is paid 50% of the receipts derived from sales, bonuses, royalties, and rentals resulting from the leasing of oil and gas in the National Petroleum Reserve in Alaska (94 Stat. 2964, 42 U.S.C. 6508).

Payments to counties, National Grasslands.—Of the revenues received from the use of Bankhead-Jones Act lands administered by the Bureau of Land Management, 25% is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

Payments to Nevada from receipts on land sales.—Public Law 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues

are distributed to the State of Nevada (5%) and the county in which the land is located (10%).

Cook Inlet Region Inc. Property.—This account received funding appropriated by section 9102 of the fiscal year 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94-204 (43 U.S.C. 1611). Funds are made available to the Bureau of Land Management for administration and subsequent payment to accounts accepting Cook Inlet Region, Incorporated offers for Federal properties.

Western Oregon Counties (P.L. 103-66).—Under provisions of the Omnibus Budget Reconciliation Act of 1993, counties in Western Oregon receive payments under formulas established by the Act through the year 2003.

The Minerals Management Service supervises exploration for and the development and production of gas, oil, and other minerals on the Outer Continental Shelf (OCS) lands and collects royalties, rentals, and bonuses due the Federal Government and Indian lessors from minerals produced on Federal, Indian, and OCS lands.

Outer Continental Shelf (OCS) lands.—The program provides for: (1) performance of environmental assessments to ensure compliance with the National Environmental Policy Act (NEPA); (2) conduct of lease offerings; (3) selection and evaluation of tracts offered for lease by competitive bidding; (4) assurance that the Federal Government receives fair mar-

ket value for leased lands; and (5) regulation and supervision of energy and mineral exploration, development, and production operations on the OCS lands.

Royalty management.—The Royalty Management program provides accounting, auditing, and compliance activities for royalties, rentals, and bonuses due from minerals produced on Federal, Indian, allotted and OCS lands. The program includes an automated accounting system to ensure that all royalties are properly collected.

General administration.—General administrative expenses provide for management, executive direction and coordination, administrative support, Federal building space and general support services.

Alaska is paid 90 percent and other States 50 percent of the receipts from bonuses, royalties, payor late payment inter-

est, and rentals resulting from the leasing and development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351), the Geothermal Steam Act of 1970 (30 U.S.C. 1001), and from leases of potash deposits (30 U.S.C. 285), on both public domain and certain acquired lands.

The Omnibus Reconciliation Act of 1993 (OBRA) requires 50 percent of the Federal Government's mineral leasing administrative program costs to be recovered before disbursement to the United States Treasury and States. OBRA requires a State's share of program costs be the lesser amount determined under two different methods (revenue versus cost-based) as prescribed in the Act.

Appropriations language is included under the Royalty and Offshore Minerals Management account that would direct the Secretary of the Interior to collect unpaid and underpaid royalties and late payment interest owed by Federal and Indian lessees and other royalty payors on amounts received in settlement or other resolution of disputes under, and for partial or complete termination of, sales agreements for minerals from Federal and Indian leases. A portion of the additional royalties collected under this proposal will be shared with the States, thus increasing payments in this account.

State regulatory program grants.—This program activity is to provide grants to States for the operation of permanent enforcement programs under the terms of the Surface Mining Control and Reclamation Act of 1977 (the Act). As of September 30, 1993, 24 States with actual or planned coal mining facilities had approved State programs.

Federal regulatory programs.—This activity includes programs for Federal oversight of State permanent regulatory programs, for monitoring State inspection and enforcement, for the provision of technical assistance to States, for the assessment and collection of civil penalties imposed pursuant to the Act, and for the administration of the Federal regulatory program in States without approved permanent enforcement programs. In addition, it also includes funding for the Office of Surface Mining (OSM) to perform reclamation in cases where performance bonds have been forfeited and OSM is the regulatory authority, and funding derived from collections of civil penalties pursuant to the Act, which is used by OSM and the States for reclamation projects.

General administration.—This activity includes: the Offices of the Director and Deputy Directors; the Headquarters staffs for Public Affairs, Equal Employment Opportunity, Congressional Liaison, Information Systems Management, Planning and Analysis, Budget, Correspondence, and Issues Management; and the Divisions of Financial Management; Personnel; and Management Services. This activity represents only that portion of the total General Administration expenses attributable to the Regulation and Technology appropriation. The remainder has been requested from the Abandoned Mine Reclamation Fund.

State reclamation program grants.—Each State and Tribe with an approved reclamation program is entitled, subject to appropriation, to receive 50 percent of Abandoned Mine Reclamation Fund revenues derived from operating mines in that State or Tribal Land. With grants, States and Tribes

assume primary responsibility for addressing problems such as subsidence, underground fires, open shafts, and acid drainage in accordance with priorities set forth in the Surface Mining Control and Reclamation Act of 1977 (the Act). States with approved reclamation plans are responsible for emergency reclamation.

Federal reclamation programs.—This activity includes fee collection, assistance to States in developing reclamation programs, abandoned mine lands reclamation projects undertaken directly by the Office of Surface Mining Reclamation and Enforcement for States lacking approved reclamation plans, and the Rural Abandoned Mine Program (RAMP) administered by the Department of Agriculture's Soil Conservation Service.

Small operator assistance payments.—This activity provides payments for authorized services to eligible coal mine operators in preparing applications for mining permits under a permanent State or Federal regulatory program. These services include determining the probable hydrologic consequences of the proposed mining operation and analysis of test borings or core samples.

General administration.—This activity includes the offices described for the General Administration activity in the Regulation and Technology appropriation. The funds for this activity represent only that portion of general administration expenses attributable to the Abandoned Mine Reclamation Fund.

WATER AND SCIENCE

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the general fund and special funds. The special funds are: (a) the Reclamation fund, largely derived from certain water and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; (b) the Colorado River Dam fund (CRDF), permanently available revenues of the Boulder Canyon Project; (c) the Central Valley Project restoration fund, derived from revenues from project beneficiaries; and (d) the recreation, entrance and use fees account derived from fees collected pursuant to the Land and Water Conservation Fund Act of 1965, as amended. Funds are also provided by non-Federal entities under the Contributed Funds Act. The 1995 estimates are summarized by source as follows (in thousands of dollars):

Federal Funds

General and special funds:

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau as follows:

CONSTRUCTION PROGRAM

(INCLUDING TRANSFER OF FUNDS)

For construction and rehabilitation of projects and parts thereof (including power transmission facilities for Bureau of Reclamation use) and for other related activities as authorized by law, to remain available until expended, [\$464,423,000] \$380,906,000 of which [\$46,507,000] \$23,272,000 shall be available for transfer to the Upper Colorado River Basin Fund authorized by section 5 of the

Act of April 11, 1956 (43 U.S.C. 620d), and [\$160,470,000] \$146,293,000 shall be available for transfer to the Lower Colorado River Basin Development Fund authorized by section 403 of the Act of September 30, 1968 (43 U.S.C. 1543), and such amounts as may be necessary shall be considered as though advanced to the Colorado River Dam Fund for the Boulder Canyon Project as authorized by the Act of December 21, 1928, as amended: *Provided*, That of the total appropriated, the amount for program activities which can be financed by the reclamation fund shall be derived from that fund: *Provided further*, That transfers to the Upper Colorado River Basin Fund and Lower Colorado River Basin Development Fund may be increased or decreased by transfers within the overall appropriation under this heading: *Provided further*, That funds contributed by non-Federal entities for purposes similar to this appropriation shall be available for expenditure for the purposes for which contributed as though specifically appropriated for said purposes, and such funds shall remain available until expended: *Provided further*, That no part of the funds herein approved shall be available for construction or operation of facilities to prevent waters of Lake Powell from entering any national monument: *Provided further*, That all costs of the safety of dams modification work at Coolidge Dam, San Carlos Irrigation Project, Arizona, performed under the authority of the Reclamation Safety of Dams Act of 1978 (43 U.S.C. 506), as amended, are in addition to the amount authorized in section 5 of said Act: *Provided further*, That notwithstanding section 9 of Public Law 102-495, from amounts appropriated, funds are available for expenses necessary to carry out the provisions of the Elwha River Ecosystem and Fisheries Restoration Act. (Energy and Water Development Appropriations Act, 1994.)

Work in the Construction program is for the purpose of developing and managing water for irrigation, municipal and industrial use, salinity control, dam safety, science and technology work, and flood control in the 17 Western States. Funding under this program provides for transfers to the Lower Colorado River Basin Development fund and Upper Colorado River Basin fund. The Lower Colorado River Basin Development fund provides for the development and construction of the Central Arizona Project. The Upper Colorado River Basin fund supports water supplies in the Upper Colorado River Basin area.

This fund is derived from repayments and other revenue from water resource development, together with certain receipts from sales, leases, and rentals of Federal lands in the 17 Western States, and is available for expenditure pursuant to authorization contained in appropriation acts.

SPECIAL FUNDS

(TRANSFER OF FUNDS)

Sums herein referred to as being derived from the reclamation fund or special fee account are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U.S.C. 391) or the Act of December 22, 1987 (16 U.S.C. 4601-6a, as amended), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the head "General Administrative Expenses" shall revert and be credited to the reclamation fund. (*Energy and Water Development Appropriations Act, 1994.*)

GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects, to remain available until expended, **[\$13,819,000]** **\$12,600,000:** *Provided*, That, of the total appropriated, the amount for program activities which can be financed by the reclamation fund shall be derived from that fund: *Provided further*, That funds contributed by non-Federal entities for purposes similar to this appropriation shall be available for expenditure for the purposes for which contributed as though specifically appropriated for said purposes, and such amounts shall remain available until expended. OPERATION AND MAINTENANCE

For operation and maintenance of reclamation projects or parts thereof and other facilities, as authorized by law; and for a soil and moisture conservation program on lands under the jurisdiction of the Bureau of Reclamation, pursuant to law, to remain available until expended, [\$282,898,000] \$284,165,000: *Provided*, That of the total appropriated, the amount for program activities which can be financed by the reclamation fund shall be derived from that fund, and the amount for program activities which can be derived from the special fee account established pursuant to the Act of December 22, 1987 (16 U.S.C. 460l-6a, as amended), may be derived from that fund: *Provided further*, That of the total appropriated, such amounts as may be required for replacement work on the Boulder Canyon Project which would require readvances to the Colorado River Dam Fund shall be readvanced to the Colorado River Dam Fund pursuant to section 5 of the Boulder Canyon Project Adjustment Act of July 19, 1940 (43 U.S.C. 618d), and such readvances since October 1, 1984, and in the future shall bear interest at the rate determined pursuant to section 104(a)(5) of Public Law 98-381: *Provided further*, That funds advanced by water users for operation and maintenance of reclamation projects or parts thereof shall be deposited to the credit of this appropriation and may be expended for the same purpose and in the same manner as sums appropriated herein may be expended, and such advances shall remain available until expended: *Provided further*, That revenues in the Upper Colorado River Basin Fund shall be available for performing examination of existing structures on participating projects of the Colorado River Storage Project.

[In addition, to remain available until expended, such sums as may be necessary to cover the cost of work associated with rebuilding the Minidoka Powerplant, Minidoka Project, Idaho, to be offset by funds provided by the Bonneville Power Administrator as authorized by section 2406 of Public Law 102-486. Such offset will result in a final appropriation estimated at no more than \$282,898,000.] (*Energy and Water Development Appropriations Act, 1994.*)

The general administrative expenses program provides for the executive direction and management of all reclamation activities, as performed by the Commissioner's office in Washington, DC, the Denver Service Center, and five regional offices. The Denver office and regional offices charge individual projects or activities for direct beneficial services and related administrative and technical costs. These charges are covered under other appropriations.

Under the Small Reclamation Projects Act (43 U.S.C. 422a-422l), loans and/or grants can be made to non-Federal organizations for construction or rehabilitation and betterment of small water resource projects.

As required by the Federal Credit Reform Act of 1990, this account records the subsidy costs associated with the direct loans obligated in 1992 and beyond, as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

Funding under the Federal Credit Reform Act of 1990 is broken out as follows: Liquidating account; Program account (subsidy); and Financing account. The following table summarizes the total loan program of the Bureau of Reclamation by account (in thousands of dollars):

Implementation of the Central Utah Project Completion Act (Titles II-VI of Public Law 102-575) required the establishment of two accounts: the Central Utah Project Completion Account and the Utah Reclamation Mitigation and Conservation Account.

Titles II thru IV of Public Law 102-575 provide for the completion of the Central Utah Project authorized by the

Act of April 11, 1956, and other water delivery and management features and activities; and for the mitigation, conservation, and enhancement of fish and wildlife and recreational resources. Funds are requested for the Central Utah Water Conservancy District, for the Utah Reclamation Mitigation and Conservation Commission, for the Federal Contribution to the Utah Reclamation Mitigation and Conservation Account, and to carry out the responsibilities of the Secretary under the Act.

Note.—Collections contained in this account include amounts that have been legislatively reclassified as intragovernmental funds.

The U.S. Geological Survey conducts research and provides basic scientific data and information concerning water, land, and mineral resources of the Nation. It works with other Federal agencies to encourage increased data-production partnerships, data sharing, and adherence to standards for production of geographic, geologic, and water data. Funding for 1995 emphasizes water-quality assessments, support for the National Spatial Data Infrastructure (NSDI) (identified as a key initiative in the National Performance Review), accelerated digital geospatial data production and provision of scientific and technical information to assist in environmental management, and continues geological hazards and global change research.

National mapping, geography, and surveys.—The national mapping program produces and makes available, in printed and digital format, cartographic and geographic base data, remotely sensed data, and multipurpose and special-purpose maps. Research is conducted in the mapping sciences, geography, and related disciplines, and advanced cartographic systems are developed in support of data production and applications. NSDI-related activities support interagency and intergovernmental partnerships for establishing a national geospatial data clearinghouse, developing data standards, organizing regional coordination, and developing a framework data set for the Nation.

Geologic and mineral resource surveys and mapping.—The national program of onshore and offshore geologic research and investigations produces: (1) information on geologic hazards, such as earthquakes, volcanoes, and landslides; (2) information for use by other Federal and State agencies in the management of public lands and in national policy determinations related to the Nation's environmental information needs; (3) information on the chemistry and physics of the Earth, the climate, and the geologic processes by which it was formed and is being modified; (4) geologic, geophysical, and geochemical maps and analyses to address environmental concerns; and (5) improved methods and instruments for mineral and energy assessments.

Water resources investigations.—The national program of water resources monitoring, investigations, and research has the objective of appraising the Nation's water resources and ensuring that the information necessary to develop and manage them efficiently and effectively is available when needed. The program produces data, analyses, and assessments to support Federal, State and local government decisions on water planning, water management, water quality, energy development, and enhancement of the quality of the environment.

Critical ecosystems research and assessments.—This new activity is established to respond rapidly and effectively to provide needed data, assessments, research, and analysis that contribute to the Administration's overall goal of improving the understanding and management of ecosystems. Multi-disciplinary work will be done in South Florida, Columbia River Basin, San Francisco Bay/Delta, and Trinity/Klamath River Basins.

General administration.—General administrative expenses provide for management, executive direction and coordination, and administrative support.

Facilities.—This activity finances the operation and maintenance, facilities management, and special support services for the operation of the National Center headquarters and field centers.

Reimbursements from non-Federal sources are from States and municipalities for cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reim-

bursments from other Federal agencies are for mission related work performed at the request of the financing agency.

The Geological Survey will have 12 quarters in 1995 located at geomagnetic or seismic observatories. The operation and maintenance of these quarters, in the past, have been funded out of rental receipts which were credited to the Survey's annual Surveys, Investigations, and Research account. Under the provisions of Public Law 98-473, this account was estab-

lished to receive rental receipts to remain available until expended for operation and maintenance of these quarters.

The Working Capital Fund allows for efficient financial management of the USGS mainframe computer and telecommunications and automated data processing equipment acquisition and replacement for the bureau and the operations of the Washington Administrative Service Center (WASC). The WASC is implementing the Federal Financial System (FFS) and is beginning development of the departmentwide automated procurement system. Other USGS activities might also be appropriately managed through such a fund, subject to future determinations by the Department of the Interior.

In an effort to get back to basics and to implement the requirements of the National Performance Review (NPR), the U.S. Bureau of Mines (USBM) has recently completed a review of all of its programs. The program review proposes that over a transition period of several years, USBM should strengthen its core capabilities, including consolidation of more than a dozen USBM field offices into five Centers of Excellence. In 1995, USBM will focus its efforts on developing and demonstrating environmental technologies to protect public lands and aquatic areas, on improving worker health and safety, and on providing minerals and materials information in support of federal regulatory decisionmaking. In support of these efforts, the Department has begun work with the Congress and the Bureau's customers to reach a consensus on the Bureau's mission for the future.

Information and analysis.—The program provides reliable data for analysis of national mineral issues by collecting, interpreting, and disseminating worldwide information relating to the production, consumption, and availability of non-fuel minerals and materials. Data collection activities concentrate on those mineral commodities and countries of great economic importance. Mineral assessment activities focus on Department of the Interior, Department of Defense, and Department of Agriculture lands facing major policy or land use issues. The program also provides scientific and decision-oriented analyses to further the development and implementation of sound ecosystem management policies.

Research.—

Health, safety and mining technology.—This program focuses on research designed to improve all aspects of the health and safety of miners, including prevention of occupational illnesses, accidents, and disasters. Research is being concentrated on new concepts that will safeguard workers and protect the environment.

Minerals and materials science.—This program addresses problems in separation technologies and in materials degradation with the aim of alleviating pollution and environmental damage from processing operations, hazardous waste, and overburdened landfills. Research focuses on characterization and separation of the components of very large but very dilute systems such as ore bodies, waste sites, or scrap heaps.

Environmental technology.—Research is conducted to mitigate or eliminate adverse environmental impacts associated with mining and mineral processing. Problems addressed include subsidence, acid mine drainage, and neutralization of waste materials. The Bureau works closely

with other bureaus and government agencies by providing expertise in hazardous waste cleanup and mitigation.

Mineral institutes.—The minerals institutes program encourages the development of mineral-related university research and graduate education programs. In accordance with the Government Reform and Savings Act of 1993 funding will continue in FY 1995, however, the program will gradually be phased out by the end of FY 1998.

General administration.—The program supports executive direction, and financial and management services for the Bureau of Mines.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The program includes production, conservation, sale, and distribution of helium and involves the management of helium program facilities and resources to:

(a) Provide helium to meet current demands of all Federal agencies.

(b) Provide helium to meet the foreseeable future helium requirements of essential Government programs.

(c) Conduct investigations and evaluations to improve the helium program.

The estimates assume the program will continue to operate to meet the needs of Federal customers and that the income derived from helium sales and services will provide the required funding for program needs through FY 1995. Recommendations of the National Performance Review to improve the Helium program will be implemented starting in FY 1995. Specific actions include lowering Federal customer outlays by reducing the selling price of helium to more directly equate to private-sector prices. Cost reduction and efficiency improvement include discontinuing cylinder operations, reducing FTE by 30, and cancelling non-revenue producing functions. Revenue will be enhanced by increasing sales of government-owned crude helium at rates so as not to disrupt the private market, and by increasing fees charged to private industry for storage, transmission, and withdrawal of privately owned helium.

Note.—Collections contained in this account include amounts that have been legislatively reclassified as intragovernmental funds.

Ecological services.—The Service conducts investigations and provides technical assistance to prevent or minimize adverse environmental effects of development projects, restores trust species habitats and produces wetland maps of the United States. Contaminants are monitored and assessed. Activities are pursued to prevent species from becoming extinct, and return them to the point where they are neither threatened nor endangered.

Refuges and wildlife.—The Service maintains the National Wildlife Refuge System consisting of 510 units, with waterfowl production areas in 178 counties and 51 coordination areas, totaling about 92 million acres; directs and coordinates national migratory bird programs; and enforces Federal wildlife laws and regulations.

Fisheries.—The Service participates in development, management, and protection of interstate and international fishery resources, and provides technical assistance related to fish, wildlife and some marine mammals.

Research and development.—In fiscal year 1994, the research and development activity was transferred to the National Biological Survey.

General administration.—Provides policy formulation, direction, and administration for fish and wildlife programs.

Under the Natural Resource Damage Assessment and Restoration Fund, natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments and for program management. In addition, funds will be received for the restoration of injured resources and other restitution activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior. Restoration activities include the replacement and enhancement of affected resources, acquisition of equivalent resources and services, and long-term environmental monitoring and research programs directed to the prevention, containment, cleanup and amelioration of hazardous substances and oil spill sites. The Fund will allow the four Interior Bureaus with natural resource management responsibilities (Fish and Wildlife Service, National Park Service, Bureau of Land Management, and Bureau of Indian Affairs) and the Office of Environmental Affairs, which coordinates the Department's overall natural resource damage assessment responsibilities, and the Office of the Solicitor to implement coordinated damage assessments and restoration activities. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (P.L. 101-380), and the Act of July 27, 1990 (P.L. 101-337). In FY 1992 and thereafter, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest therein.

INFORMATION SCHEDULES ON EXXON VALDEZ; RESTORATION OF
PRINCE WILLIAM SOUND AND THE GULF OF ALASKA

The budget fully incorporates the receipts and mandatory spending associated with the October 1991 Exxon Valdez oil spill settlement, the largest natural resource damage settlement ever. Receipts and spending for 1992–2001 are currently estimated to total over \$750 million, with approximately equal shares going to the Federal government and the State of Alaska for conduct of the restoration program for Prince William Sound and surrounding areas. Should injury information become available that was unforeseen at the time of the settlement, the Federal and State trustees may pursue up to an additional \$100 million in damages from Exxon for further restoration.

Of the \$125 million criminal fine and restitution payment levied against Exxon as part of the settlement, \$12 million was deposited to the North American Wetlands Conservation Fund for the protection and restoration of the Nation's highest-priority wetlands, and \$50 million was deposited with each of the Federal and State governments for restoration projects within Alaska. In addition, \$13 million was deposited into the Victims of Crimes Fund.

The civil portion of the settlement provides approximately \$900 million from Exxon, exclusive of interest earned by the Trustees. This money is provided over a period of 10 years to the Federal and State Trustees for joint management of natural resources restoration and for reimbursement of past costs. Based upon the current assessment of damages, these funds are sufficient to complete the restoration of Prince William Sound and affected surrounding areas caused by the March 1989 oil spill.

Restoration activities were implemented in 1992, including establishment of an organizational structure, a public advisory group and the approval of funding for closeout of natural resource damage assessment studies, monitoring, research, and restoration planning. In 1993, habitat protection was initiated with the approval of funding of \$7.5 million for the purchase of inholdings by the State within Kachemak Bay State Park. Also in 1993, the Secretaries of Agriculture, Commerce and Interior announced that the Administration had committed \$25 million to acquire land and protect key wildlife habitat in the spill area with Federal restitution funds.

In FY 1994, the State acquired approximately 41,500 acres of key habitat at Seal Bay and Tonki Cape, on Afognak Island, for \$38.7 million, \$30 million of which was paid in FY 1994. The Trustees are currently involved in pre-acquisition activities with regard to inholdings within the boundaries of the Chugach National Forest, Kenai Fjords National Park, Alaska Maritime National Wildlife Refuge and

Kodiak National Wildlife Refuge. The private lands considered for acquisition were ranked by the Trustee Council according to the potential benefits for restoration that purchase and protection would provide to injured resources and services. Public comment on the Draft Restoration Plan for the affected area is expected in 1994 in conjunction with a programmatic Environmental Impact Statement that will be prepared.

Additional information may be found on Federal activities in connection with the Prince William Sound Restoration Program in the budget presentations for the "National Forest System" account in the U.S. Forest Service, Department of Agriculture, and the "Damage assessment and restoration revolving fund" account in the National Oceanic and Atmospheric Administration, Department of Commerce.

The Partnerships for Wildlife Act (16 U.S.C. 3741), authorizes wildlife conservation and appreciation projects to conserve the entire array of diverse fish and wildlife species and to provide opportunities for the public to use and enjoy these species through nonconsumptive activities. Grants provided to States are directed toward nonconsumptive activities and the conservation of species not taken for recreation, fur or food; not listed as endangered or threatened under the Endangered Species Act of 1973; and not defined as marine mammals under the Marine Mammal Protection Act of 1972. Funding is authorized from appropriations and formula-based matching donations from the National Fish and Wildlife Foundation or other private entities.

Funds deposited into this account include direct appropriations and fines, penalties and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid to Wildlife Restoration Fund. The funding for the North American Wetlands Conservation Fund is authorized by the North American Wetlands Conservation Act, Public Law 101-233. The Act establishes the North American Wetlands Conservation Council which recommends wetlands conservation projects for the approval of the Migratory Bird Conservation Commission. These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan, the Act and the Tripartite Agreement among Mexico, Canada and the United States; may involve partnerships with public agencies, and private entities, with non-Federal matching of Federal contributions of funding; and provide for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531). Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

Public Law 100-478 authorized this account, to be administered by the Secretary of the Interior, to fund State grants for the conservation of threatened and endangered species and for monitoring the status of candidate species. The authorization requires formula-determined amounts to be deposited into the Fund each year beginning with fiscal 1989. Amounts become available for expenditure only if appropriated.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

Federal aid in fish restoration and management.—Since 1986, this activity has been funded under the "Sport fish restoration" account, Fish and Wildlife Service, Department of the Interior.

Federal aid in wildlife restoration.—States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds equal to the 11 percent excise tax on sporting arms and ammunition, the 10 percent excise tax on handguns, and the 11 percent tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

Proceeds from sales, water resources development projects.—Receipts collected from the sale of products from refuges on which other agencies have primary jurisdiction pay the costs of producing these products and for managing wildlife habitat.

Since Fiscal Year 1992 the Sport Fish Restoration Fund has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Budget Reconciliation Act of 1990 (P.L. 101-508). The Coastal Wetlands Planning, Protection and Restoration Act requires an amount equal to 18 percent of the total deposits into the Sport Fish Restoration Fund,

or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233). The Clean Vessel Act of 1992 (P.L. 102-587, Sec. 5604) directs the Secretary of the Interior to make grants to states, in specified amounts, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. Sec. 5604 also amends the Sport Fish Restoration Act to provide for the transfer of funds from the Sport Fish Restoration Account of the Aquatic Resources Trust Fund for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Transportation for State recreational boating safety programs under section 13106(a)(1) of title 46, United States Code.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia and American Indian tribal organizations for up to 75 percent of the cost of approved projects including research into fisheries problems, surveys and inventories of fish populations, and acquisition and improvement of fish habitat and provision of access for public use.

Research.—The National Biological Survey conducts research: to improve the collection, analysis and understanding of the nation's inventory of plants and animals, including their habitats and ecosystems; and to provide information on ecosystems and plant and animal species for natural resource management.

Inventory and Monitoring.—The National Biological Survey conducts inventories to determine the types, abundance, and distribution of species and habitats. Monitoring activities provide information on the status and trends of particular species, habitats, and ecosystems for assistance in minimizing adverse environmental impacts.

Information Transfer.—The National Biological Survey will develop new techniques for biological information access, display and analysis and provide assistance to users in the transfer and application of this information to users.

Cooperative Research Units.—The National Biological Survey's Cooperative Research Units provide the federal government with access to faculty expertise and university facilities through fostering cooperation among federal and state governments and academia.

Facility Operation and Maintenance.—This activity supports maintenance and operations services for the National Biological Survey's network of 12 research centers and 4 field stations.

Administration.—This activity provides executive direction and general administrative support to all National Biological Survey programs and organization levels.

Construction.—This activity supports construction of new facilities for the National Biological Survey, and for rehabilitation and modernization necessary to improve capabilities of currently existing facilities.

The National Park System contains 368 areas and 80.3 million acres of land in 49 States, the District of Columbia, Puerto Rico, U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. These areas have been established to protect and preserve the cultural and natural heritage of the United States and its territories. This appropriation funds the operation of individual units of the National Park System as well as planning and administrative support for the entire system. The total appropriation request of \$1,127,317,000 includes \$79,900,000 in revenue from recreation, user and entrance fees in accordance with 16 U.S.C. 4601-6a(i)-(j), to remain available until expended.

If Congress enacts legislation to authorize the expansion of existing or new park system units in desert areas of southern California, appropriate amounts would be reprogrammed in 1994 and 1995 within funds provided under this head for planning and initiation of operations of the proposed new park areas.

Construction.—This activity provides for: (1) rehabilitation and restoration of historic and cultural resources; (2) rehabilitation of operational structures such as visitor use and main-

tenance facilities, trails, and utility systems; (3) construction of new visitor use and operational facilities where the need exists; and (4) rehabilitation and construction of park roads and bridges, funded from the Federal Lands Highways program in the Department of Transportation.

Emergency, unscheduled, and housing projects.—To continue visitor services and preserve resources, minor emergency reconstruction and repair projects are performed. Also, employee housing is repaired and rehabilitated.

Planning.—Under this activity, the National Park Service conducts environmental, architectural and engineering studies, as well as planning and design activities.

General management plans.—Under this activity, general management plans are prepared and revised to guide the National Park Service in the protection, use, development, and management of each unit of the National Park System.

Parkway construction project funds have been derived from the Highway Trust Fund through appropriations to liquidate contract authority which has been provided under section 104(a)(8) of the Federal Aid Highway Act of 1978, title I of Public Law 95-599, as amended, and appropriation language, which has made the contract authority and the appropriations available until expended.

Reconstruction and relocation of Route 25E through the Cumberland Gap National Historical Park, including construction of a tunnel and the approaches thereto, are authorized without fund limitation by Public Law 93-87, section 160.

Improvements to the George Washington Memorial Parkway and the Baltimore Washington Parkway are authorized and funded by the Department of the Interior and Related Agencies Appropriations Acts, 1987, as included in Public Law 95-591, and 1991, Public Law 101-512.

National Park Service, donations.—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park System (16 U.S.C. 6). In 1995, a reduction in donations are estimated due to decreased gifts for restoration and improvements at Mount Rushmore National Monument. The Administration proposes authority to facilitate additional donations in 1995 pursuant to National Performance Review recommendations.

Preservation, Birthplace of Abraham Lincoln, National Park Service.—This fund consists of an endowment given by the Lincoln Farm Association, and the interest therefrom is available for preservation of the Abraham Lincoln Birthplace National Historic Site, Kentucky (16 U.S.C. 211, 212).

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided to Indian tribes, Alaskan Native groups, and individual Native Americans.

Other Recurring Programs.—This activity includes those programs for which funds are (1) distributed by formula, such as school operations, Johnson O'Malley Educational Assistance, housing improvements and road maintenance; (2) based upon need, such as welfare grants and contract support; and (3) resource management activities that carry out specific laws or court-ordered settlements.

Non-Recurring Programs.—This activity includes programs that support Indian reservation and tribal projects of limited duration, such as economic development grants, noxious weed eradication, prairie dog control, cadastral surveys, and forest development.

Central Office Operations.—This activity supports the executive, program, and administrative management costs of Central Office organizations, most of which are located in Washington, DC, and Albuquerque, NM.

Area Office Operations.—The Bureau of Indian Affairs has 12 Area Offices located throughout the country. Area Directors have line authority over agency superintendents. Virtually all of the staff and related administrative support costs for area offices are included within this activity. Area Directors have flexibility in aligning their staff and resources to best meet the program requirements of the tribes within their area.

Special Programs and Pooled Overhead.—Most of the funds in this activity support bureau-wide expenses for items such as unemployment compensation, workers compensation, facilities rentals, FTS-2000, and data processing. In addition, funds that are contracted by tribes in urban areas or private organizations providing services to Indians are included. This activity also includes the Bureau's two post secondary schools.

Tribal Priority Allocations.—This activity includes the majority of the funds used to support ongoing programs at the local tribal level. Funding priorities for all of the programs included in Tribal Priority Allocations are determined in consultation with tribal officials. Although budget estimates include specific amounts for individual programs, funds may be shifted among programs within the total available for a tribe or a Bureau of Indian Affairs agency at the time of budget execution.

This account covers expenses associated with the following activities:

White Earth Reservation Claims Settlement Act (Public Law 99-264).—Funds will be used to investigate and verify questionable transfers of land by which individual Indian allottees, or their heirs, were divested of ownership.

Old Age Assistance Claims Settlement Act (Public Law 98-500).—Funds will be used to identify, notify and compensate individuals entitled to compensation under this Act.

Hoopa-Yurok Settlement Act (Public Law 100-580).—The Act provides for the settlement of reservation lands between the Hoopa Valley Tribe and the Yurok Indians in northern California. Funds will be used for administrative expenses related to implementing the settlement.

Fallon Paiute Shoshone Indian Water Rights Settlement Act (Public Law 101-618).—The Act provides for the settlement of claims of the Fallon Paiute Shoshone Indian Tribe (NV). Funds are used for tribal economic development, land acquisition, and rehabilitation of irrigation systems. Also, funds are provided to continue work on the T-J drain.

Truckee-Carson-Pyramid Lake Water Settlement Act (Public Law 101-618).—The Act provides for the settlement of claims

of the Pyramid Lake Paiute Tribe (NV). Funds are used to capitalize the Pyramid Lake Paiute Fisheries Fund. Interest earned on the Fund will be used by the Tribe for the operation and maintenance of fishery facilities at Pyramid Lake.

Trust Fund Deficiencies.—Funds are requested to reimburse tribal and individual Indian trust funds, Indian Irrigation Systems, and Indian Power Systems accounts for losses on investments made by the Bureau of Indian Affairs in credit unions and failed financial institutions that exceeded Federal insurance levels and losses on their accounts where the claim for losses has been reduced to a judgment and or settlement approved by the Department of Justice.

Southern Arizona Water Rights Settlement Act (Public Law 97-293).—The Act provides for the settlement of water rights claims of the Tohono O'odham Tribe (AZ). Funds may be transferred to the Bureau of Reclamation to construct distribution facilities to deliver Central Arizona Project water to the Tohono O'odham Indian Reservation.

Ute Indian Water Rights Settlement (Public Law 102-575).—The Act provides for the settlement of the water rights claims of the Ute Indian tribe (UT). Funds are authorized to be appropriated for tribal farming operations, stream and reservoir improvements, recreation enhancement, and a tribal development fund.

Jicarilla Apache Tribe Water Rights Settlement Act (Public Law 102-441).—The Act provides for the settlement of water rights claims of the Jicarilla Apache Tribe (NM). Funds are authorized to be appropriated for a tribal development fund.

Navajo Indian Irrigation Project (Public Law 87-483).—Funding would provide for continuation of construction of the Gallegos pumping plant, discharge station and substation, as well as the Block number 8 pumping plant and laterals schedule numbers 1 and 2. The funds may be transferred to the Bureau of Reclamation.

Three Affiliated Tribes and Standing Rock Sioux Tribe Equitable Compensation Act (Public Law 102-575).—The Act provides additional compensation to the Three Affiliated Tribes and Standing Rock Sioux Tribe for reservation land used as the site for the Garrison and Oahe Dams in North Dakota. Funds are authorized to be appropriated for two tribal economic development funds. Beginning in fiscal year 1998, interest earned on the funds can be used by the tribes for education and social service programs, and for economic development.

Water Rights Studies/Negotiations.—Funds are requested for information and data collection studies related to tribal water rights disputes.

Northern Cheyenne Indian Reserved Water Rights Settlement Act (Public Law 102-374).—The Act provides for the establishment of a trust fund for the Northern Cheyenne Indian Tribe and for the enlargement and repair of the Tongue River Dam Project.

Yavapai-Prescott Indian Tribe Water Rights Settlement Act of 1993.—Bills S. 1146 and H.R. 2514 provide for the settlement of the water rights claims of the Yavapai-Prescott Indian Tribe. This request will provide funding for investigation and development of the tribe's relinquishing its Central Arizona Project water.

Catawba Indian Tribe of South Carolina Land Claims Settlement Act (Public Law 103-116).—The Act provides for the Federal share of financial resources to implement the Catawba Indian Tribe of South Carolina's land claims settlement.

The Three Affiliated Tribes and Standing Rock Sioux Tribe Equitable Compensation Act (Public Law 102-575) authorizes the payment of Funds to two tribal economic recovery funds. Beginning in fiscal year 1998, interest earned on the corpus of each fund is available for tribal economic development, education, and social service programs, subject to the approval of the Secretary of the Interior.

Crow Boundary Settlement Bill.—A recent agreement in principle reached between the Department of the Interior and the Crow Indian Tribe would resolve the land and resource claims resulting from the 107th Meridian boundary dispute and various other issues pertaining to the Crow Indian Reservation. Under the agreement and subject to congressional ratification, beginning in FY 1996, interest earned on trust fund balances held by the Treasury would be made available for tribal education, land acquisition, economic development, youth and elderly programs, and other purposes. The Administration supports enactment of a legislative solution that incorporates the agreed-to principles in a final, signed settlement agreement and will consider the associated pay-as-you-go (PAYGO) costs, beginning with an estimated \$700 thousand for FY 1996, in conjunction with the other proposals in the FY 1995 budget that together meet the OBRA PAYGO requirement.

The United States exercises jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities are carried out by the Department of the Interior.

The Republic of the Marshall Islands and the Federated States of Micronesia both approved Compacts of Free Association and are therefore no longer subject to the terms of the Agreement. The Republic of Palau, the only remaining trust territory, will implement its Compact in fiscal year 1994. As a result, assistance to the Republic of Palau will now be included with the Republic of the Marshall Islands and the Federated States of Micronesia in the "Compact of Free Association" account. Remaining funds in the "Trust Territory of the Pacific Islands" account will be used to fulfill final transition responsibilities of the United States as it ends administration of the Trusteeship.

COMPACT OF FREE ASSOCIATION

For economic assistance and necessary expenses for the Federated States of Micronesia and the Republic of the Marshall Islands as provided for in sections 122, 221, 223, 232, and 233 of the Compacts of Free Association, [\$22,102,000] \$20,602,000, to remain available until expended, as authorized by Public Law 99-239[: *Provided*, That the effective date of the Palau Compact for purposes of economic assistance pursuant to the Palau Compact of Free Association, Public Law 99-658, shall be the effective date of the Palau Compact as determined pursuant to section 101 of Public Law 101-219]; *and in addition, for special assistance as authorized by Public Law 101-219, and for economic assistance and necessary expenses for the Republic of Palau as provided for in Sections 122, 221, 223, 232, and*

233 of the Compact of Free Association, \$7,556,000, to remain available until expended, as authorized by Public Law 99-658. (*Department of the Interior and Related Agencies Appropriations Act, 1994.*)

The peoples of the Marshall Islands and the Federated States of Micronesia approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia, which began in fiscal year 1987 and will continue for fifteen years, totalling an estimated \$2.3 billion, to aid in the development of these sovereign nations. Public Law 99-658 provides the necessary authorizing legislation for the Republic of Palau Compact. That Compact will provide annual payments that will total an estimated \$450 million over a fifteen-year period beginning in FY 1994.

The Indian Gaming Regulatory Act (Public Law 100-497) established the National Indian Gaming Commission as an independent agency within the Department of the Interior. The Commission will have a regulatory role over class II gaming (such as bingo) conducted on Indian lands. Operating costs of the Commission are financed, to the greatest extent possible, through annual assessments of gaming operations regulated by the Commission. Federal appropriations are requested in 1995 to cover the remaining operating costs of the Commission to the extent authorized by the Act.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

The following sections are proposed for deletion and do not appear below:

Sec. 111 ... Restricts the use of FY 1994 funds to publish a National final rule defining the term "valid existing rights" for purposes of section 522(e) of the Surface Mining Control and Reclamation Act of 1977 or to publish a final rule disapproving any existing State definition of valid existing rights.

Sec. 112 ... Provides that in implementing section 1307 of Public Law 96-487, the Secretary shall deem the holder of entry permit LP-GLBA005-93 to be a person who, on or before January 1, 1979, was engaged in adequately providing visitor services of the type authorized in said permit within Glacier Bay National Park.

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted: *Provided further*, That all funds used pursuant to this section are hereby designated by Congress to be "emergency requirements" pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985 and must be replenished by a supplemental appropriation which must be requested as promptly as possible.

SEC. 102. The Secretary may authorize the expenditure or transfer of any no year appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under the jurisdiction of the Department of the Interior; for the emergency rehabilitation of burned-over lands under its jurisdiction; for emergency actions related to potential or actual earthquakes, floods, volcanoes, storms, or other unavoidable causes; for contingency planning subsequent to actual oil spills; response and natural resource damage assessment activities related to actual oil spills; for the prevention, suppression, and control of actual or potential grasshopper and Mormon cricket outbreaks on lands under the jurisdiction of the Secretary, pursuant to the authority in section 1773(b) of Public Law 99-198 (99 Stat. 1658); for emergency reclamation projects under section 410 of Public Law 95-87; and shall transfer, from any no year funds available to the Office of Surface Mining Reclamation and Enforcement, such funds as may be necessary to permit assumption of regulatory authority in the event a primacy State is not carrying out the regulatory provisions of the Surface Mining Act: *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That for emergency rehabilitation and wildfire suppression

sion activities, no funds shall be made available under this authority until funds appropriated to [the "Emergency"] "Department of the Interior [Firefighting Fund]" *Wildland Fire Operations* shall have been exhausted: *Provided further*, That all funds used pursuant to this section are hereby designated by Congress to be "emergency requirements" pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985 and must be replenished by a supplemental appropriation which must be requested as promptly as possible: *Provided further*, That such replenishment funds shall be used to reimburse, on a pro rata basis, accounts from which emergency funds were transferred.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by sections 1535 and 1536 of title 31, U.S.C.: *Provided*, That reimbursements for costs and supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$500,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. 106. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the conduct of offshore leasing and related activities placed under restriction in the President's moratorium statement of June 26, 1990, in the areas of Northern, Central, and Southern California; the North Atlantic; Washington and Oregon; and the Eastern Gulf of Mexico south of 26 degrees north latitude and east of 86 degrees west longitude.

SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the conduct of leasing, or the approval or permitting of any drilling or other exploration activity, on lands within the North Aleutian Basin planning area.

SEC. 109. No funds provided in this title may be expended by the Department of the Interior for the conduct of preleasing and leasing activities in the Eastern Gulf of Mexico for Outer Continental Shelf Lease [Sale 137 or for] Sale 151 in [the April 1992 proposal for] the Outer Continental Shelf Natural Gas and Oil Resource Management Comprehensive Program, 1992-1997.

SEC. 110. No funds provided in this title may be expended by the Department of the Interior for the conduct of preleasing and leasing activities in the Atlantic for Outer Continental Shelf Lease Sale 164 in [the April 1992 proposal for] the Outer Continental Shelf Natural Gas and Oil Resource Management Comprehensive Program, 1992-1997. (*Department of the Interior and Related Agencies Appropriations Act, 1994.*)

TITLE III—GENERAL PROVISIONS

The following sections are proposed for deletion and do not appear below:

- Sec. 302 ... Restricts oil and gas basing on the Shawnee National Forest.
- Sec. 306 ... Restricts oil, gas, and geothermal leases on the Mount Baker-Snoqualmie National Forest.
- Sec. 308 ... Amended Section 314 of Public Law 101-512.
- Sec. 309 ... Amended Section 1405(a) of title 36, United States Code.
- Sec. 310 ... Restricts the use of funds provided in the FY 1994 Act unless the entity agrees to comply with the "Buy American Act"; states the sense of Congress regarding (1) purchase of American-made equipment and products, (2) notice to recipients of assistance; and prohibits contracts and subcontracts with persons falsely labeling products as made in America.
- Sec. 313 ... Prohibits increasing housing rental rates above 10 percent.
- Sec. 314 ... Prohibits using funds to implement the Pacific Salmon and Steelhead habitat strategy on the Tongass National Forest.

SEC. 301. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. [303] 302. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete.

SEC. [304] 303. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [305] 304. None of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency except as otherwise provided by law.

SEC. [307] 305. No assessments may be levied against any program, budget activity, subactivity, or project funded by this Act unless notice of such assessments and the basis therefor are presented to the Committees on Appropriations [and are approved by such Committees].

SEC. [311] 306. The Forest Service and Bureau of Land Management may offer for sale salvageable timber in the Pacific Northwest in fiscal year [1994] 1995: *Provided*, That for public lands known to contain the Northern spotted owl, such salvage sales may be offered as long as the offering of such sale will not render the area unsuitable as habitat for the Northern spotted owl: *Provided further*, That timber salvage activity in spotted owl habitat is to be done in full compliance with all existing environmental and forest management laws.

SEC. [312] 307. None of the funds in this Act may be used to plan, prepare, or offer for sale timber from trees classified as giant sequoia (*sequoiadendron giganteum*) which are located on National Forest System or Bureau of Land Management lands until an environmental assessment has been completed and the giant sequoia management implementation plan is approved. In any event, timber harvest within the identified groves will be done only to enhance and perpetuate giant sequoia. There will be no harvesting of giant sequoia specimen trees. Removal of hazard, insect, disease and fire killed giant sequoia other than specimen trees is permitted.

This Act may be cited as the "Department of the Interior and Related Agencies Appropriations Act, [1994] 1995". (*Department of the Interior and Related Agencies Appropriations Act, 1994.*)

Note.—Excludes \$590 thousand in budget authority in 1995 for Mail Operations transferred to the Salaries and Expenses, General Legal Activities (\$200 thousand), U.S. Parole Commission (\$1 thousand), Office of the Inspector General (\$7 thousand), Antitrust Division (\$25 thousand), Community Relations Service (\$1 thousand), U.S. Attorneys (\$17 thousand), U.S. Trustees (\$17 thousand), U.S. Marshals Service (\$64 thousand), Federal Prison System, Salaries and Expenses (\$105 thousand), Drug Enforcement Administration (\$117 thousand), and the Immigration and Naturalization Service (\$36 thousand).

Program direction and policy coordination.—The Attorney General of the United States is responsible for leading the Department of Justice in accomplishing its missions. The Attorney General is assisted by the Deputy Attorney General, Associate Attorney General, Department policy-level officials, and the Justice Management Division. The General Administration appropriation provides the resources for the programs and operations of the Attorney General, the Deputy Attorney General, the Associate Attorney General, and their Offices,

the several Senior Policy Offices, and the Justice Management Division. The resources requested for General Administration in 1995 reflect Department of Justice-wide initiatives that, taken together, strengthen management and fiscal controls, as well as support National Performance Review (NPR) initiatives. Justice Management Division (JMD) Mail Operations will be handled by the WCF in 1995, on behalf of General Administration, Office of the Inspector General, General Legal Activities, U.S. Parole Commission, Community Relations Service, Antitrust Division, U.S. Attorneys, U.S. Trustees, U.S. Marshals Service, Federal Prison System, Drug Enforcement Administration, and the Immigration and Naturalization Service. Resources have been adjusted to reflect the shift in responsibility.

Administrative review and appeals.—This activity includes the Office of the Pardon Attorney and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives and reviews all petitions for clemency, i.e., commutation of sentences and pardons. A number of actions have been taken to reduce backlogs. The Executive Office for Immigration Review contains the Immigration Judge function, the Board of Immigration Appeals, the Office of the Chief Administrative Hearing Officer, and the Office of Management and Administration. EOIR was established January 1, 1983 to improve the immigration hearing and appeal process. Workload for the activity follows:

Note.—Includes \$7 thousand in budget authority in 1995 for Mail Operations transferred from Salaries and Expenses, General Administration.

The Office of the Inspector General, established by the Inspector General Amendments Act of 1988, provides leadership and assists management in promoting economy, efficiency, and effectiveness within the Department; enforces the fraud, waste, abuse and integrity laws and regulations of the United States within the Department; and brings to justice those individuals or organizations involved in financial, professional or criminal misconduct relating to Department of Justice programs and operations.

The Audit function conducts, reports on and tracks the resolution of financial and compliance, economy and efficiency, and program audits of organizations, programs and functions within the Department, including expenditures made under Department contracts, grants and other agreements.

The Investigations function investigates and prepares for criminal prosecution violators of fraud, abuse and integrity laws which govern the Department or operations which are financed by the Department; and develops such allegations for possible civil and/or administrative actions.

The Inspections function performs program review, efficiency and performance reviews of operations and programs within the Department, or financed by the Department, and of field and headquarters entities of Department organizations; this function also provides assistance to management at all levels of the Department.

The Executive Direction and Control function establishes and maintains policy and program direction for the OIG. Specific responsibilities include policy development, legal counsel, Congressional affairs, planning, budget, finance, quality assurance and evaluation, personnel, training, procurement, automated data processing/network communications, and general support services.

The United States Parole Commission makes decisions to grant or deny parole to Federal prisoners serving sentences of one year and a day or more, sets conditions of parole, supervises parolees and mandatory releasees, recommitts parolees in the event of violations of the conditions of super-

vision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976.

By 1997, this program will meet the statutory limitations by granting or denying parole within the legal time requirements to all Federal prisoners who are eligible for parole consideration. In addition to this basic function, the Commission will seek to improve the rehabilitation process by monitoring an effective parole supervision program through the U.S. probation officers. Finally, the Commission conducts ongoing research programs and administers its responsibilities under the labor and pension laws.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

In 1995, the Antitrust Division will continue to collect filing fees for premerger notifications and will retain up to \$33,460,000 of these fees to be used for the Division's Preservation of Competitive Market Structure Program. Filing fees will increase from \$25,000 to \$40,000 to support the full cost of merger review. The appropriation is reduced accordingly. Additionally, increased funding would support expanded antitrust enforcement.

The Government is represented in each of the 94 judicial districts by a U.S. Attorney. The U.S. Attorneys prosecute criminal offenses against the United States, represent the Government in civil actions in which the United States is concerned, and initiate proceedings for the collection of fines, penalties, and forfeitures owed to the United States. In 1995, additional funding will support supervision of the election of officers for the International Brotherhood of Teamsters.

The Foreign Claims Settlement Commission adjudicates the claims of American citizens arising out of the nationalization, expropriation or other taking of their property by foreign governments, pursuant to the International Claims Settlement Act of 1949 and other statutes. In 1995, the Commission will provide technical assistance to the Departments of State and Treasury and to the public in connection with the 45 international and war claims programs previously completed. It also will provide policy recommendations, evaluation of pending claims legislation and liaison with Congressional Committees considering such legislation.

Note.—Includes \$64 thousand in budget authority in 1995 for Mail Operations transferred from Salaries and Expenses, General Administration.

The Federal Government is represented in each of the 94 judicial districts by a U.S. Marshal. The primary mission of the U.S. Marshals Service is responsibility for the protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders, management of seized assets, and custody and transportation of unsentenced prisoners. It is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

Reimbursable program.—Federal funds in 1995 are derived primarily from the U.S. Air Force for Intercontinental Ballistic Missile Program for transportation security services provided by the U.S. Marshals Service, as well as the Bureau of Prisons for the transportation of sentenced prisoners, the Department of State for security details at the United Nations, the Organized Crime Drug Enforcement appropriation for drug law enforcement and the Office of National Drug Control Policy for security services. Non-Federal funds are derived from State and local governments for witness protection and for the transportation of prisoners pursuant to State writs and from fees collected from service of civil process and sales associated with judicial orders.

Care of U.S. prisoners in non-Federal institutions.—Under this program, the U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of confinement occur before and during a trial and while awaiting transfer to Federal institutions after conviction. Base resources will house an average daily prisoner population of 15,024 in approximately 1,000 State and local jails at an average cost of \$61.78 per offender day in 1995.

This program is the payment of fees and expenses to witnesses who appear on behalf of the Government in litigation in which the United States is a party. Factors over which the Department of Justice has little control affect the costs incurred. The U.S. Attorneys, the U.S. Marshals, and the Department's six legal divisions are served by this appropriation.

Fees and expenses of witnesses.—Pays the fees and expenses associated with the preparation and presentation of testimony on behalf of the United States for fact witnesses, who testify as to events or facts about which they have personal knowledge, and for expert witnesses, who provide technical or scientific testimony. This program also pays the fees of physicians and psychiatrists who examine accused persons upon order of the court to determine their mental competency.

Protection of witnesses.—Pays subsistence costs to ensure the safety of Government witnesses whose testimony on behalf of the United States places them or their families in jeopardy.

Victim compensation fund.—Pays restitution to any victim of a crime committed by a protected witness who causes or threatens death or serious bodily injury.

Private counsel.—Pays private counsel retained to represent Government employees who are sued for actions taken while performing their official duties.

D.C. Informant Protection.—Pays for the short term protection and temporary relocation of informants for the District of Columbia Superior Court.

Reimbursable program.—Receives reimbursement from States and localities to cover the costs of maintaining those State and local organized crime witnesses and their families who have been accepted into the witness protection program.

A permanent appropriation finances the independent counsel. Pursuant to 28 U.S.C. 591 et seq., as amended, independent counsel were appointed to investigate allegations that senior Executive branch officials violated Federal law. A permanent appropriation funds the continuation of investigations begun before the authority for the independent counsel expired and new investigations of the recently appointed special counsel. Currently, several investigations are being conducted under this statute.

The Civil Liberties Act of 1988 (P.L. 100-383) authorizes payments to Japanese-Americans whom the Government evacuated, relocated or interned during World War II. The Civil Liberties Act Amendments of 1992 (P.L. 102-371) increased the total authorization for this program to \$1.65 billion. The Departments of Commerce, Justice, and State, the

Judiciary, and Related Agencies Appropriations Act, 1990, provides advance appropriations for these payments.

The 1995 estimate includes \$5 million for educational activities pursuant to section 106(b) of the Civil Liberties Act of 1988. To date, over 79,000 redress payments have been made.

UNITED STATES TRUSTEE SYSTEM FUND

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund, into which forfeited cash and the proceeds of sales of forfeited property are deposited. Authorities of the fund have been amended by various public laws enacted since 1984. Under current law, authority to use the fund for certain investigative expenses shall be specified in annual appropriation acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the asset forfeiture program are paid from the permanent, indefinite portion of the fund. Once all expenses are covered, and statutorily mandated transfers are accomplished, the balance is maintained to meet ongoing expenses of the program.

The Organized Crime Drug Enforcement Task Force (OCDETF) Program consists of 13 regional task forces which consolidate the resources and expertise of 11 member Federal agencies, in cooperation with State and local investigators and prosecutors, to target and destroy major narcotic trafficking and money-laundering organizations. The task forces perform the following activities:

1. *Law Enforcement.*—This activity includes the resources for direct investigative and support activities of the task forces, focusing on the disruption of drug trafficking controlled by various organized crime enterprises. Organizations participating under the law enforcement function of the OCDETF Program are the Drug Enforcement Administration, Federal Bureau of Investigation, U.S. Customs Service, Internal Revenue Service, Bureau of Alcohol, Tobacco and Firearms, U.S. Coast Guard, U.S. Marshals Service, and the Immigration and Naturalization Service.

2. *Drug Intelligence.*—This activity includes the resources to establish Regional Drug Intelligence Squads (RDIS) in all thirteen OCDETF Core Cities. The squads will gather and disseminate raw data for strategic, operational and tactical intelligence purposes and respond to intelligence taskings from the National Drug Intelligence Center (NDIC) and member agencies' headquarters.

3. *Prosecution.*—This activity includes the resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are targeted selectively on the criminal leadership involved in drug trafficking and are intended to dissolve organized illicit enterprises. This

General and special funds—Continued

ORGANIZED CRIME DRUG ENFORCEMENT—Continued

includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys, Criminal Division and Tax Division.

4. *Administrative Support.*—This activity includes the resources for a Washington-based administrative staff which provides policy guidance, central coordination, and administrative support to the headquarters of the 11 member Federal agencies and the 13 regional task forces. The administrative staff is also responsible for financial management, records management, and maintenance of the OCDETF case management system.

In 1983 and 1984, the OCDETF Program operated as a single appropriation reimbursing participating agencies for their involvement. Beginning in 1985, and continuing through 1989, the resources were appropriated directly to the participating agencies. Pursuant to the provisions of the Anti-Drug Abuse Act of 1988, a single appropriation for expenses relating to all Federal agencies participating in the OCDETF Program was established in 1990.

The planned distribution of obligations for fiscal years 1994 and 1995 among the participating Federal agencies, as well as the actual distribution for fiscal year 1993, is as follows:

The 1995 request for the Federal Bureau of Investigation (FBI) provides sufficient resources to permit that the number of agents in 1995 remain at 1994 levels. The overall objectives of the FBI are to uphold the law—to investigate violations of Federal criminal law, to protect the United States from

hostile intelligence efforts, to provide assistance to other Federal, State, and local law enforcement agencies and to perform these responsibilities in a manner that is faithful to the Constitution and the laws of the United States.

These objectives result in the FBI's being actively involved in a wide range of investigations, including traditional law enforcement investigations (bank robbery, kidnaping, fugitive, bank embezzlement, etc.), investigations involving more modern phenomena (organized crime, white-collar crime, drug investigations, gang violence, financial institution fraud, environmental crimes, civil rights violations, antitrust violations, etc.), and investigations of foreign intelligence activities within the United States. The FBI has concurrent jurisdiction with DEA over Federal drug violations.

The activities of the FBI are divided into the following general categories:

Criminal, security, and other investigations.—This activity includes all field investigations of the Federal Bureau of Investigation. These investigations are conducted by FBI Special Agents in 56 field offices and approximately 400 resident agencies located throughout the United States and Puerto Rico. National priority investigations include white-collar crime, drugs, organized crime, counterterrorism and foreign counterintelligence, and investigations relating to violent crimes and major offenders. Other investigative areas are civil rights, applicant, and other investigations.

The FBI is reimbursed by other Federal agencies for certain investigative activities such as pre-employment background inquiries, fingerprint and name checks. Another primary reimbursement is the Organized Crime Drug Enforcement Task Force program.

This activity also includes resources devoted to national program supervision, coordination, and management of FBI investigations and liaison with foreign police and security services through Legal Attaches.

The 1995 request for the Drug Enforcement Administration (DEA) provides sufficient resources to permit that the number of agents in 1995 remain at 1994 levels. The mission of the DEA is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs. At the Federal level, DEA is the lead drug law enforcement agency. DEA accomplishes its objectives through coordination with State, local, and other Federal officials in drug enforcement activities, development and maintenance of drug intelligence systems, regulation of legitimate controlled substances activities, and enforcement coordination and intelligence-gathering activities with foreign government agencies.

Cooperation among Federal law enforcement agencies is extensive, especially within the 13 organized crime drug enforcement task forces (OCDETF). DEA's involvement is integral to this nationwide coordinated enforcement strategy. With the OCDETF program and the expansion of other agency cooperative efforts, overall drug enforcement capabilities have been significantly strengthened in recent years.

The activities of the DEA are divided into the following general categories:

ENFORCEMENT

Domestic enforcement.—This activity encompasses DEA's general efforts to eliminate or immobilize major drug trafficking organizations and thereby reduce the domestic supply of illicit drugs.

In 1995, Domestic Enforcement will include the majority of the activities encompassed in the former Special Enforcement Operations/Programs. These activities include efforts to reduce the availability of illicit drugs by immobilizing targeted organizations that are substantially responsible for importation and distribution of drugs and by focusing enforcement operations on specific drug trafficking problems.

State and local task forces.—This activity encompasses efforts to reduce drug availability and immobilize major drug trafficking organizations through intergovernmental cooperation with State and local law enforcement agencies. There are currently 81 program-funded and 22 provisional State and Local Task Forces participating in the program.

The measures below reflect the level of activity performed by this program.

	1993 actual	1994 est.	1995 est.
DEA initiated arrests (includes SEO/P arrests)	14,442	14,807	14,807
Other Federal referral arrests (includes SEO/P arrests)	1,134	1,235	1,235
DEA cooperative arrests (includes SEO/P arrests)	3,524	3,837	3,837
State and Local Task Force arrests	6,762	6,445	6,445
Clandestine labs seized	387	387	387
DEA/OCDE arrests	4,843	4,843	4,843
DEA-wide assets seized (\$ thousands)	\$801,087,000	\$828,521,000	\$828,521,000

Foreign cooperative investigations.—This activity encompasses efforts to (1) disrupt, as close to the source as possible, production of opium, heroin, cocaine, marijuana, and illicitly produced and diverted legitimate dangerous drugs destined for the United States, and (2) collect and disseminate intelligence regarding narcotics production and trafficking. The measures below reflect the level of activity performed by this program.

	1993 actual	1994 est.	1995 est.
Foreign cooperative arrests	2,038	1,983	3,211

Diversion control.—This activity seeks to reduce, to the maximum extent, the diversion of legitimately produced controlled substances including steroids and chemicals into illicit channels at all levels of distribution and to provide leadership and support to ensure that State and local agencies and the pharmaceutical and chemical industry establish and maintain programs and policies to control diversion. The majority of diversion control activities are funded from the DEA Diversion Control Fee Account.

The measures below reflect the level of activity performed by this program.

	1993 actual	1994 est.	1995 est.
Investigations:

Pre-registrant	348	348	348
Public interest revocations	405	400	400
Steroid investigations	204	250	90

Intelligence.—This activity encompasses the collection, analysis, and dissemination of drug intelligence in support of the enforcement operations of DEA and other Federal, State and local agencies.

DEA laboratory services.—This activity encompasses laboratory analysis of evidence and expert testimony in support of investigation and prosecution of drug traffickers. The measures below reflect the level of activity performed by this program.

	1993 actual	1994 est.	1995 est.
Laboratory exhibits analyzed	38,112	36,313	35,606

DEA training.—This activity encompasses entry level training for all special agents, diversion investigators, and intelligence analysts; advanced, in-service and specialized training for investigative and other personnel; executive, mid-level management, and supervisory training for appropriate agency officials, and foreign language training for all DEA personnel assigned to overseas and border offices as needed. In 1994, training will focus on in-service and specialized training activities. The measures below reflect a portion of the level of activity performed by this program.

	1993 actual	1994 est.	1995 est.
Basic agents trained	0	0	0
Basic diversion investigators trained	0	0	0
Basic intelligence specialist trained	19	20	21
Forensic chemists trained	18	0	0

Research, engineering, and technical operations.—This activity encompasses providing high quality and timely radio communications capability, technical and investigative equipment assistance support, maintenance and operation of an aircraft fleet, and research programs directly related to the DEA law enforcement and intelligence functions.

ADP and telecommunications.—This activity encompasses automated data processing and telecommunication support on a nationwide and worldwide basis.

Records management.—This activity encompasses effective and efficient records management, Freedom of Information/Privacy Act, and library support.

PROGRAM DIRECTION

Management and Administration.—This activity encompasses the overall management, contracting, and direction of DEA to include personnel, general services, and Equal Employment Opportunity functions.

REIMBURSABLE PROGRAM

Reimbursable program.—The primary reimbursements to DEA are for the Organized Crime Drug Enforcement Task Force program, the training of foreign drug law enforcement officials (funded by the Department of State), the expenses incurred in managing seized assets, and other purposes for which DEA is reimbursed from the Department of Justice Assets Forfeiture Fund.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration under the Diversion Control Program are to be set at a level that ensures the recovery of the full costs of operating the various aspects of the program. The purpose of this program is to prevent, detect, and investigate the diversion of controlled substances from legitimate channels, while at the same time ensuring an adequate and uninterrupted supply of controlled substances required to meet legitimate needs.

The Immigration and Naturalization Service is responsible for administering laws relating to the admission, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

Enforcement.—This activity contains resources for preventing illegal entry into the United States and facilitating the entry of qualified persons. This includes inspection of applicants for admission, patrol of the border, and the location of illegal aliens who are in the United States following illegal

entry or violation of status after legal entry. Apprehensions are made through the inspection of places of employment, by the investigation of information about the location of undocumented aliens, and through investigative case work. Also included are the resources for the Service's nationwide anti-smuggling program and for the detention and deportation of illegal aliens. Resources for the intelligence program are included as enforcement activities in 1994 to reflect more accurately the functions and operations of this program.

Most reimbursements received by the Service are from the inspections, legalization, examination, and land border fee programs. Also included are reimbursements for retrofitting conveyances for drug law enforcement purposes and for managing and operating the vehicle seizure program. These resources are from the Department of Justice Assets Forfeiture Fund. Resources are also received for participation in the Organized Crime Drug Enforcement Program.

The Immigration Emergency Fund, established by the Immigration Reform and Control Act and funded by Public Law 101-162, provides funds for possible increases in border patrol and other enforcement activities, and for reimbursement to States and localities for assistance in meeting an immigration emergency. The Immigration Act of 1990, however, amended these provisions and allows for reimbursement to States and localities at the discretion of the Attorney General, in the event that asylum applications in a district exceed a certain amount during a given quarter, or if lives, property, safety or welfare of the residents of a State or locality are endangered, or in other circumstances as determined by the Attorney General.

The Immigration Reform and Control Act of 1986, title II, section 201(a), amends section 245(c) of the Immigration and Nationality Act by permitting the Attorney General to provide for a schedule of fees to be charged for filing legalization applications and further allows for the depositing of payments received in a separate account with the amounts to be available without fiscal year limitation to cover administrative and other expenses incurred in connection with the review of legalization applications. The 1995 request reflects a continued phase-down of this program.

NOTES

Includes \$105 thousand in budget authority in 1995 for Mail Operations transferred from Salaries and Expenses, General Administration.

Includes \$14,526 thousand in budget authority for 1995 for activities financed from Salaries and Expenses, Community Relations Service. Comparable amounts for 1993 (\$9,000 thousand) and 1994 (\$9,219 thousand).

This appropriation will provide for the custody and care of an average of 92,667 offenders and for the maintenance and operation of 89 penal institutions, 6 regional offices, 3 staff training centers, and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other facilities for short periods of time. An average of 10,622 sentenced prisoners will be in contract facilities in 1995.

The Bureau receives reimbursements for daily care and maintenance of State and local offenders, for utilities produced by Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

Inmate care, custody, and programs.—This activity covers the cost of all food, medical supplies, clothing, welfare services, release clothing, transportation, gratuities, staff salaries (including salaries of Health Resources and Services Administration commissioned officers), and operational costs of functions directly related to providing inmate care. This activity also finances the costs of institution security, academic, social and occupational education courses, religious programs, psychological services, and drug abuse treatment programs.

Institution security and maintenance.—This activity covers all costs associated with the maintenance of facilities and institution security. This activity finances institution maintenance, motor pool operations, powerhouse operations, institution security, and other administrative functions.

Contract confinement.—This activity provides for the confinement of sentenced Federal offenders in contract State and local facilities and for the care of Federal prisoners in contract community residential centers.

Institution administration, management and training.—This activity covers all costs associated with the general operation of institutions, regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, human resources management, inmate systems management, safety, and legal counsel.

In 1995, resources are requested to provide for a projected increase in the inmate population and to activate nine new prisons. In total, the new institutions will add about 9,700 new beds. The request also includes resources for Community Corrections Managers to help manage the new 1,000 bed joint Bureau of Prisons/Immigration and Naturalization Service contract facility, as well as resources to support inflation and the average daily population in State and local jails and Community Corrections Centers.

The National Institute of Corrections (NIC) was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide leadership in improving correctional programs and practices, especially in State and local organizations. The NIC awards contracts and grants to provide technical assistance to requesting correctional organizations; to maintain an information service to provide information on the latest developments, research results, et cetera, in the field of corrections; to provide training to the correctional community to improve systems and skills; and to conduct limited research and evaluation of correctional activities.

The NIC Jail Center will continue to improve the knowledge and skills of sheriffs and jail administrators, enabling them to upgrade services and practices within their jail operations.

The National Academy of Corrections will offer training to State and local correctional personnel working in prisons, community corrections, and jails. In 1995, the Academy will train over 8,500 students in the areas of management theory, current issues affecting jails, institutions, probation and parole, standards implementation, and inmate services and programs.

The dissemination of relevant correctional policies, programs, practices and resource documents will continue through the clearinghouse activity of NIC.

Federal Prison Industries, Inc., was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation has been expanding its operations to provide additional industrial employment opportunities at existing and planned institutions.

Budget program.—Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. The amounts used by the Corporation for administrative expenses are subject to a congressional limitation. Information regarding this limitation is provided separately following this account.

Financing program.—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay accident compensation.

Operating results.—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The Office of Justice Programs carries out policy coordination and general management responsibilities for the Bureau of Justice Assistance, Bureau of Justice Statistics, National Institute of Justice, Office of Juvenile Justice and Delinquency Prevention and the Office for Victims of Crime, which administer the following programs and activities.

Research, evaluation, and demonstration programs.—Funds provide for and encourage the development of basic and applied research for the improvement of Federal, State, and local criminal, civil, and juvenile justice systems; new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; and the dissemination of the results of such research efforts.

Criminal justice statistical programs.—Funds provide for the collection and analysis of statistical information concerning crime, victims, offenders, criminal justice processes, juvenile delinquency, and civil disputes in support of public and private policy and decisionmaking about society's response to crime; planning, coordination, implementation and provision of technical assistance to States to initiate innovative applications of communications and information systems technology for State and local criminal justice systems; and assurance of conformance with privacy and security regulations.

Emergency assistance.—Funds are used to provide emergency assistance to a State or locality after the Attorney General has determined that a law enforcement emergency exists. A law enforcement emergency is a situation where the capacity of local resources has been exceeded. No funds are requested for 1995.

Juvenile justice programs.—Funds under this activity provide assistance to States and localities to aid in the prevention, reduction and treatment of juvenile crime and delinquency and to improve the administration of juvenile justice.

Funds are also used to assist in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency.

Missing children.—Funds for this program will be used to reduce the incidence of crimes against children, particularly kidnapping and sexual exploitation, by assisting families, citizen groups, law enforcement agencies and government institutions in a national effort to insure the safety and protection of children.

Mariel Cubans.—This program provided reimbursements to certain States for part of the cost of incarcerating Mariel Cubans who had originally been paroled by the Federal Government. Funds have not been provided for the program since 1993.

Crime control programs.—This activity provides for expenditures from programs that were authorized by preceding legislative authority but are not continued under existing legislation.

Regional information sharing system.—This is a program to aid State and local law enforcement agencies in the exchange of intelligence information. No budget authority is requested in 1995.

Anti-drug abuse program.—Funds for this program have been appropriated since 1987 to assist State and local governments in the war against drugs. This program will in large part be replaced by the Community Policing program in the Crime Control Fund.

Victims of Child Abuse Programs.—This activity provides funds for programs related to the prevention and prosecution of child abuse and improvement of court handling of child abuse and neglect cases.

Management and administration.—Funds provide for executive direction and control, program operation, and administrative support of the above activities.

This program provides payment of death benefits to eligible survivors of public safety officers who die in the line of duty, and disability payments to public safety officers who are permanently disabled as a result of injury incurred in the line of duty. Legislation provides for an annual cost of living escalator tied to the Consumer Price Index (CPI). On October 1 of every year, this escalator will increase the benefit by the percentage of increase to the CPI.

The Victims of Crime Act of 1984 (Public Law 98-473), as amended, established a special fund in the Treasury entitled "The Crime Victims Fund." This fund is credited with criminal fines that are collected from persons convicted of offenses against the United States. Annual grants are made to eligible crime victims compensation and assistance programs.

Amounts collected in the previous year are available for obligation in the subsequent year, subject to the limitations included in authorizing language.

The Crime Control Fund would provide a source of funding for programs authorized by the pending Violent Crime Control and Law Enforcement Act of 1993 (H.R. 3355). The Fund would provide resources for grants to increase police presence, expand and improve cooperative efforts between law enforcement agencies and members of the community to address crime and disorder problems, and otherwise to enhance public safety. A Community Policing program would provide grants directly to State and local governments to put more than 50,000 uniformed officers on the street in 1995, with additional officers funded in future years, and improve cooperative efforts between law enforcement agencies and communities. These new officers would not only enforce the law, but would also employ and promote techniques to prevent crime within a community. A Criminal Records Upgrade ("Brady Bill") program would upgrade criminal history records maintained by the States, thereby enabling a national criminal background check system to be implemented. This system would help prevent unauthorized persons, such as convicted felons, from purchasing handguns. The Border Security and Illegal Immigration initiative would provide resources to increase border controls at the southwest border, deport criminal aliens, and deport those fraudulent asylum applicants whose cases have been adjudicated and denied. Various other crime control programs authorized in the Violent Crime Control and Law Enforcement Act would also be supported by resources in the Crime Control Fund.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

The following sections are proposed for deletion and do not appear below:

- Sec. 106 ... For fiscal year 1994 and thereafter, transferred deposits are to be used for construction of correctional institutions.
- Sec. 108 ... For fiscal year 1994 and thereafter, the Attorney General may credit up to three percent of all amounts collected pursuant to civil debt collection litigation activities to the Working Capital Fund.
- Sec. 109 ... Permanently amends section 524(c)(9) of title 28, U.S. Code, as amended.
- Sec. 110 ... Permanently amends section 1402 of the Victims of Crime Act of 1984 (42 U.S.C. 10601).
- Sec. 111 ... Provides a permanent change relating to bankruptcy filing fees.
- Sec. 112 ... Pertains to grants awarded to State and local governments in fiscal year 1994 only.

SEC. 101. In addition to amounts otherwise made available in this title for official reception and representation expenses, a total of not to exceed \$45,000 from funds appropriated to the Department of Justice in this title shall be available to the Attorney General for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General.

SEC. 102. Subject to subsection (b) of section 102 of the Department of Justice and Related Agencies Appropriations Act, 1993, authorities contained in Public Law 96-132, "The Department of Justice Appropriation Authorization Act, Fiscal Year 1980", shall remain in effect until the termination date of this Act or until the effective date of a Department of Justice Appropriation Authorization Act, whichever is earlier.

SEC. 103. None of the funds appropriated under this title shall be used to require any person to perform, or facilitate in any way the performance of, any abortion.

SEC. 104. Nothing in the preceding section shall remove the obligation of the Director of the Bureau of Prisons to provide escort services necessary for a female inmate to receive such service outside the Federal facility: *Provided*, That nothing in this section in any way diminishes the effect of section 103 intended to address the philosophical beliefs of individual employees of the Bureau of Prisons.

SEC. 105. Pursuant to the provisions of law set forth in 18 U.S.C. 3071-3077, not to exceed [\$2,000,000] \$5,000,000 of the funds appropriated to the Department of Justice in this title shall be available for rewards to individuals who furnish information regarding acts of terrorism against a United States person or property.

SEC. [107] 106. Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Justice in this Act may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by any such transfers: *Provided*, That this section shall not apply to any appropriation made available in title I of this Act under the heading, "Office of Justice Programs, Justice Assistance": *Provided further*, That any transfer pursuant to this section shall be treated as a reprogramming of funds under section 605 of this Act and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section.

SEC. 107. (a) Section 1930(a) of title 28, United States Code, is amended—

(1) in paragraph (3) by striking "\$800" and inserting in lieu thereof "\$900"; and

(2) in paragraph (6) by striking "\$5,000" and inserting in lieu thereof "\$8,000".

(b) Section 589a of title 28, United States Code, is amended—

(1) in subsection (b)(2) by striking "37.5 per centum" and inserting in lieu thereof "33.3 per centum";

(2) in subsection (f)(1) by striking "12.5 per centum" and inserting in lieu thereof "22.2 per centum"; and

(3) in subsection (f)(2) by striking "40 per centum" and inserting in lieu thereof "53.1 per centum".

SEC. 108. In fiscal year 1995 and thereafter, amounts in the Federal Prison System's Commissary Fund, Federal Prisons, which are not currently needed for operations, shall be kept on deposit or invested in obligations of, or guaranteed by, the United States and all earnings on such investments shall be deposited in the Commissary Fund. (Department of Justice and Related Agencies Appropriations Act, 1994.)

This account provides for a flexible, decentralized system of Federal and local programs of training and other services for the economically disadvantaged designed to lead to permanent gains in employment. Such programs are currently authorized by the Job Training Partnership Act (JTPA). The account is forward funded on a July to June cycle.

Grants to States.—Includes (1) grants to provide financial assistance to States and territories to design and operate separate training programs to meet training and employment needs of youth and adults; (2) grants to operate a summer youth employment and training program; and (3) services for dislocated workers under JTPA Title III. Legislation will be requested to improve services to dislocated workers as part of the Administration's Workforce Security proposal.

Federally administered programs.—Provides program support for JTPA activities and training assistance through nationally administered programs for segments of the population that have special disadvantages in the labor market. Among groups to be served are Indians and other native Americans, migrant and seasonal farmworkers, and veterans. This activity also includes the Job Corps, which is a national network of residential centers designed to provide training in basic and vocational skills for youth aged 14-24 who have severe educational and economic disadvantages. Also included in this activity is assistance to homeless Veterans, as authorized by the Stewart B. McKinney Homeless Assistance Act, and the youth fair chance program, which will provide comprehensive services to youth living in high poverty areas. Although funded under current authority in 1994, legislation has been proposed for 1995 for a new, national school-to-work program linking education and jobs. Additional authorizing legislation is being sought for a National Skill Standards Board.

Legislation has been proposed to initiate a national system for school-to-work transition to be administered jointly by the Departments of Labor and Education. Funds would be requested for the two Departments to use jointly to establish a national framework within which all States can create statewide systems to help youth acquire the knowledge, skills, abilities, and labor market information they need to make an effective transition from school to work or to further education or training.

Trade adjustment assistance.—Adjustment assistance, including cash weekly benefits, training, job search and relocation allowances, is paid to workers as authorized by the Trade Act of 1974, as amended.

Unemployment assistance and payments under other Federal unemployment programs.—Benefits were paid to workers under Public Law 95-250, which expanded the Redwood National Park. No benefits are expected to be paid under this program after 1993. Reimbursements from the Federal Emergency Management Agency provide Federal disaster unemployment assistance.

North American Free Trade Agreement (NAFTA) Transitional Adjustment Assistance.—Adjustment assistance, including weekly cash benefits, training, job search and relocation allowances, is paid to workers determined to be adversely affected as a result of the NAFTA as authorized by the Trade Act of 1974, as amended.

Unemployment compensation.—State operations amounts provide administrative grants to State agencies which pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel as well as trade adjustment assistance to eligible individuals. Grants are also provided to continue developing automated profiling systems in all State employment security agencies. These profiling systems will enable States to identify claimants likely to exhaust regular compensation and refer them to reemployment services early in their spells of unemployment. State integrity activities provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a quality control program and related activities designed to assess and reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies. Contingency funds are available only to meet increases in the costs of administration resulting from changes in State law, or increases in the number of claims filed and claims paid.

Employment service.—The public employment service is a nationwide system providing no-fee employment services to individuals who are seeking employment and employers who are seeking workers. State employment service activities are financed by allotment to States distributed under a demographically based funding formula established under the Wagner-Peyser Act, as amended. Employment service allotments are funded on a program year basis running from July 1 through June 30 of the following year.

Employment service activities serving national needs, including interstate job listings and labor certification of aliens, are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended. Funding is also provided for amortization payments for States which had independent retirement plans prior to 1980 in their State employment service agencies.

One-Stop Career Centers.—These funds will be used to support voluntary State efforts to create a comprehensive system of One-Stop Career Centers which will provide workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. Funding for this activity is on a program year basis, running from July 1 through June 30 of the following year.

This account was initiated as a result of the amendments to the Emergency Unemployment Compensation law (P.L. 102-164, as amended) which provides for general fund financing for benefits and administrative costs. These funds are transferred to a receipt account in the Unemployment Trust Fund (UTF) in order that resources may be transferred to the Extended Unemployment Compensation Account for benefit costs and to the Employment Security Administration Account in the UTF for administrative costs.

This account provides advances to several other accounts to pay unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in the funds prove insufficient or whenever reimbursements to certain accounts, as allowed by law, are to be made. Advances made to the Extended unemployment compensation account under the financing provisions of the Emergency Unemployment Act of 1991 and section 5 of Public Law 103-6, the Federal employees compensation account in the Unemployment trust fund and to the Federal unemployment benefits and allowances account are nonrepayable. All other advances made to the Federal unemployment account and to the Extended unemployment compensation account (both in the Unemployment trust fund) are repaid, with interest, to the general fund of the Treasury.

This account also provides repayable advances to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits.

State payroll taxes pay for all regular State benefits. During periods of high State unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax, are also paid. The Federal

tax pays the costs of Federal and State administration of unemployment insurance and veterans employment services and 97% of the costs of the employment service.

The Federal employees compensation account provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. Benefits paid are reimbursed to the Federal employees compensation account by the various Federal agencies. Any additional resources necessary to assure that the account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and other funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the unemployment trust fund and receipts from the tax on railroad payrolls are deposited in the fund to meet expenses.

efits under covered private, defined-benefit pension plans if single-employer plans terminate or if multiemployer plans are unable to pay benefits. Terminated plans are taken over by the Corporation. The Corporation assumes control of their assets, administers them in a trust fund held in a private bank, and takes responsibility for paying benefits. The Corporation also provides repayable assistance to insolvent multi-employer plans when necessary to pay benefits and to forestall termination and subsequent Corporation responsibility to pay benefits.

Plans terminated during year:	1993 actual	1994 est.	1995 est.

With insufficient assets	88	87	86
Government trusteeships at end of year	1,747	1,847	1,933
Regulations issued	18	14	14

Administrative expenses subject to limitation.—Provides case processing, benefits administration, resource management, legal support, public information, executive direction, and other support functions.

Services related to terminations.—Provides for needed but unpredictable costs related to benefits administration services, actuarial services, investment management and a share of other administrative costs arising from pension plan terminations.

Benefit payments.—Checks are issued when due to pay plan participants and other beneficiaries in plans which have terminated.

	1993 actual	1994 est.	1995 est.
Payees in Government trusteeships receiving monthly benefits from the Corporation	158,400	167,900	180,400

Financial assistance.—If multiemployer-sponsored plans become insolvent, the Corporation gives repayable loans to enable the plans to continue paying benefits. Financial assistance to an insolvent plan is made only after the plan takes a series of prescribed steps to place the plan on a sound financial basis.

Financing.—The primary source of financing is a per capita annual premium paid by sponsors of ongoing covered plans, which varies according to the plans' funding level. Other sources of financing include assets from terminated plans, investment income, and amounts due the Corporation from the sponsors of terminating plans. Also, the Corporation is authorized to borrow up to \$100 million from the U.S. Treasury.

Operating results.—The following tables show the status of the Corporation's trust funds and the Corporation's operating results.

The Administration has proposed comprehensive reforms in the Retirement Protection Act of 1993 to improve pension funding and protect workers and retirees. The legislation requires faster funding for underfunded pension plans and specifies realistic actuarial assumptions to assure the new rules are effective; adds a plan solvency rule to reduce the possibility that plans will run out of money; includes transition rules to ease the effect of the bill on financially weaker companies; removes impediments to funding that discourage employers from fully funding plans; and seeks to increase premiums for plans that pose the greatest risk by phasing

out the current cap on PBGC's variable rate premium over three years.

Enforcement of wage and hour standards.—The Wage and Hour Division works to obtain compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act, Migrant and Seasonal Agricultural Worker Protection Act, the Family and Medical Leave Act, certain provisions of the Immigration and Nationality Act, and the wage garnishment provisions in title III of the Consumer Credit Protection Act. Prevailing wages are determined and employment standards enforced under various Government contract wage standards. In 1995, approximately 344,900 persons are expected to be aided under the Fair Labor Standards Act through securing agreements with firms to pay back wages owed to their workers. Through the special minimum wage program, an estimated 250,000 persons will be aided by certificates issued and employment authorized. In Government contract compliance actions, about 45,900 persons will be aided through securing agreements to pay wages owed to workers. Under the Migrant and Seasonal Agricultural Worker Protection Act program, approximately 3,200 investigations and 1,300 housing inspections will be completed. In the course of all on-site investigations, investigators will routinely check for employer compliance with the employment eligibility verification recordkeeping requirements of the Immigration and Nationality Act. The Wage and Hour Division will continue to enforce the Employee Polygraph Protection Act of 1988, Immigration Nursing Relief Act of 1989, certain provisions of the Immigration Act of 1990, and the Family and Medical Leave Act of 1993.

Federal contractor EEO standards enforcement.—The Office of Federal Contract Compliance Programs (OFCCP) is responsible for ensuring nondiscrimination in employment based on race, sex, religion, color and national origin by Federal contractors and subcontractors. It also conducts compliance activities to assure that Federal contractors and subcontractors take affirmative action in the hiring and advancement of minorities and women under the authority of Executive Orders 11246 and 11375. It also enforces the affirmative action and nondiscrimination provisions of the Rehabilitation Act of 1973 and, in coordination with the Equal Employment Opportunity Commission, the Americans with Disabilities Act of 1990, relating to the hiring, promotion, and all other terms and conditions of employment for individuals with physical and mental disabilities. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act providing for affirmative action by Federal contractors to employ, and advance in employment disabled veterans and veterans of the Vietnam era. In 1995, about 4,700 compliance reviews and 1,000 complaint investigations will be conducted. During these reviews and investigations, employer compliance with the Immigration Reform and Control Act will also be checked regarding hiring only legally authorized workers. A total of about 4,380 other compliance actions will also be conducted with respect to contractor employment practices.

Federal programs for workers' compensation.—Under this income maintenance activity, the Employment Standards Administration administers the Federal Employees' Compensation Act, the Longshore and Harbor Workers' Compensation Act, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical

and advisory counseling to which they are entitled. Monitoring and advisory services are provided with respect to State workers' compensation laws.

Program direction and support.—This activity includes planning, personnel management, financial management, and Federal/State liaison programs, management systems implementation, and data processing operations. Major goals in 1995 will include implementing financial management initiatives; continued efforts to eliminate internal fraud, waste, and mismanagement; the improvement of management information, automated data processing, and program and fiscal accountability; and legislative and regulatory improvements.

Federal Employees' Compensation Act Benefits.—Under the Federal Employees' Compensation Act program, income is replaced if a job injury results in time away from work. Medical bills arising from compensable job injuries are also paid. Not all benefits are paid by the program since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies. In 1995, 177

thousand injured federal workers or their survivors will file claims; fifty-eight thousand will receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the employing agencies of beneficiaries.

Longshore and harbor workers' compensation benefits.—Under the Longshore and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers assessed at the beginning of each calendar year for their proportionate share of these payments.

Panama Canal Commission Compensation Fund.—This fund has been established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act

General and special funds—Continued**PANAMA CANAL COMMISSION COMPENSATION FUND—Continued**

(FECA). On December 31, 1999, the Commission will be dissolved as set forth in the Panama Canal Treaty of 1977, and the liability of the Commission for payments beyond that date will not end with its termination. The establishment of this fund, into which funds will be deposited on a regular basis by the Commission is in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor effective January 1, 1989.

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition the fund pays all administrative costs incurred in the operation of part C of the black lung program. The fund is administered jointly by the Secretaries of Labor, the Treasury, and Health and Human Services. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. The outstanding debt at the end of each year was: 1981, \$1,510 million; 1982, \$1,793 million; 1983, \$2,151 million; 1984, \$2,497 million; 1985, \$2,833 million; 1986, \$2,884 million; 1987, \$2,952 million; 1988, \$2,993 million; 1989, \$3,049 million; 1990, \$3,049 million; 1991, \$3,266 million; 1992, \$3,606 million; 1993, \$3,949 million; 1994, \$4,293 million; and 1995, \$4,624 million. Since 1991, advances have been needed only to pay interest on the fund's indebtedness.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act, as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the Longshore and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

Safety and health standards.—New and revised standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious employee injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically sound; and (4) the standard is cost-effective when compared with alternative regulatory proposals providing equal levels of protection.

Enforcement.—The Occupational Safety and Health Act of 1970 provides for enforcement of Federal standards in States declining to assert jurisdiction, and for grants to assist States in administering and enforcing State standards. Compliance with occupational safety and health standards is gained in part by the physical inspection of plants and facilities, and by encouraging cooperation between employers and employees to ensure safe and healthy workplaces. Programs are targeted to the investigation of claims of imminent danger and employee complaints, the investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and special emphasis inspections for serious health and safety hazards. OSHA's enforcement strategy includes a selective targeting of inspections and related compliance activities to specific high hazard industries.

Technical support.—Technical assistance is provided on all aspects of standards setting, variances, compliance assistance, and enforcement programs. Laboratory support is provided to compliance officers. Comprehensive scientific and technical information services are made available. The economic and environmental impacts of proposed standards are analyzed.

Compliance assistance.—OSHA supports a variety of employer and employee assistance activities. Under cooperative agreements, State agencies provide free onsite consultation to employers upon request. Grants are awarded to nonprofit

organizations to provide employee and employer training programs, targeted to address specific industry needs for safety and health education. Employers are encouraged to establish voluntary employee protection programs, and Federal agencies are assisted in implementing job safety and health programs for their employees. Professional training for compliance personnel and others with related workplace safety and health responsibilities is conducted at the OSHA Training Institute.

Statistics.—Management information and statistical support for OSHA's programs and field operations are provided through an integrated data network. Relevant data are reviewed and analyzed in support of agency activities, including standards development, inspection targeting, and program evaluation. Overall responsibility is maintained for the national injury and illness recordkeeping system and forms are undergoing revision in conjunction with the Bureau of Labor Statistics.

Executive direction and administration.—These activities include executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, and administrative services.

Enforcement.—Enforcement of the Federal Mine Safety and Health Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious acci-

dents in mines, recommendations to reduce working hazards, and on-site education and training assistance. In addition to regular health and safety inspections, the program statistics below include additional inspections and investigations that are conducted as needed to ensure the safety and health of miners. MSHA also conducts inspections of the Waste Isolation Pilot Plant (WIPP) under the WIPP Land Withdrawal Act. This research and development facility, operated by the Department of Energy, demonstrates the safe disposal of radioactive waste resulting from U.S. defense activities and programs.

Assessments.—This activity assesses and collects civil monetary penalties for violations of safety and health standards.

Educational policy and development.—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Academy for MSHA personnel, other governmental personnel, and the mining industry. States provide mine health and safety training materials, and provide technical assistance through the State Grants program.

Technical support.—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementation of the Mine Act. Technical support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of accidents. MSHA provides technical and logistical support to the Department of Energy in the review of the WIPP plan to ensure that the mined rooms will remain sufficiently stable and safe to permit uninterrupted testing for the duration of such activities. MSHA provides concurrents and/or recommendations for modifications.

Program administration.—This activity provides for general administrative functions.

Labor force statistics.—Publishes monthly estimates of the labor force, employment, unemployment, and earnings for the Nation, States, and local areas. Makes studies of the labor force. Publishes data on insured employment and wages, by industry.

	1993 actual	1994 est.	1995 est.
Labor force statistics (selected items):			
Insured employment and wages (quarterly series)	1,000,201	1,000,201	1,000,201
Employment and unemployment estimates for States and local areas (monthly and annual series)	5,800	6,100	6,100
Occupational employment statistics (annual series on 3-year cycle)	19,700	13,400	23,940

Prices and cost of living.—Publishes the Consumer Price Index (CPI), the Producer Price Index (PPI), Export and Import Price Indexes (IP), estimates of consumers' expenditures, and studies of price change.

	1993 actual	1994 est.	1995 est.
Consumer price indexes published (monthly)	8,274	8,274	8,274
Producer prices:			
(a) Commodity indexes published (monthly)	12,572	12,572	12,572
(b) Mining and manufacturing indexes published (monthly)	756	760	760
International prices and price indexes:			
(a) Sample units initiated (annually)	4,125	3,800	3,800
(b) Price quotations collected (monthly)	15,250	17,750	22,000

Compensation and working conditions.—Data on wages and benefits are collected and analyzed by occupation for major labor markets and industries. Monthly information is compiled on major work stoppages and wage developments. Included are resources to continue producing surveys to support the implementation of the Federal Employees Pay Comparability Act of 1990.

	1993 actual	1994 est.	1995 est.
Compensation and working conditions (major items):			
Employment cost index—number of schedules	6,300	6,300	6,300
Collective bargaining, bargaining units reviewed	2,500	2,500	2,500
Federal pay reform—number of schedules	24,600	29,200	26,000

Productivity and technology.—Provides studies of productivity changes for industries, major economic sectors in the private economy, and the Federal Government. Develops international comparisons of productivity and cost. Studies the effects of technology change on employment and productivity.

	1993 actual	1994 est.	1995 est.
Studies, articles, and special reports	46	44	41
Series maintained	4,673	4,703	4,724

Employment projections.—Provides economic projections, including changes in the level and structure of economic growth, and industry employment and occupational projections. Publishes the *Occupational Outlook Handbook and Quarterly*.

	1993 actual	1994 est.	1995 est.
Industry projections (2 year cycle)	112	112	112
Occupational Outlook Handbook statements (2 year cycle)	115	115	115
Studies and publications	2	2	1

Executive direction and staff services.—Provides planning and policy for the Bureau of Labor Statistics, operates the management information system, coordinates research, and publishes data and reports for government and public use.

Consumer Price Index Revision.—The Consumer Price Index Revision will begin in 1995 and will be completed in 2000. The revision includes new market baskets of goods and services as well as improvements in collecting and processing data for the CPI and for surveys which support the CPI.

State administration.—The Disabled Veterans Outreach Program provides intensive employability development services to secure permanent employment for veterans with service-connected disabilities and other disadvantaged veterans. Local Veterans Employment Representatives provide job development, placement, and supportive services directly to veterans and act as functional supervisors of the services provided veterans by other local office staff to ensure compliance with the performance standards for services to veterans.

Administration.—Identifies policies and programs to serve and meet employment and training needs of veterans. Assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services. Coordinates with the Department of Defense to ensure the provision of labor market information and other services to military service-members separating from active duty to expedite their transition from military to civilian employment (Transition Assistance Program). Provides on-the-job training programs for certain veterans identified in the Service Members Occupational Conversion and Training Act (SMOCTA) as facing serious barriers to employment. Administers veterans job training programs under the Job Training Partnership Act. Promotes compliance of Federal contractors in listing jobs for veterans. Provides information and processes complaints to help veterans, reservists, and members of the National Guard obtain employment rights provided by law.

National Veterans Training Institute.—This program operates through a contract with the University of Colorado in Denver, Colorado, providing training to Federal and State employees who assist veterans in finding jobs.

WORKING CAPITAL FUND

For expenses necessary during the fiscal year ending September 30, [1994] 1995, and each fiscal year thereafter, for the maintenance and operation of a comprehensive program of centralized services which the Secretary of Labor may prescribe and deem appropriate and advantageous to provide on a reimbursable basis under the provisions of the Economy Act (subject to prior notice to OMB) in the national office and field: *Provided*, That such fund shall be reimbursed in advance from funds available to agencies, bureaus, and offices for which such centralized services are performed at rates which will return in full cost of operations including services obtained through cooperative administrative services units under the Economy Act, including reserves for accrued annual leave, worker's compensation, depreciation of capitalized equipment, and amortization of ADP software and systems (either acquired or donated): *Provided further*, That funds received for services rendered to any entity or person for use of Departmental facilities, including associated utilities and security services, shall be credited to and merged with this fund. *Provided further*, That within the Working Capital Fund, there is hereby established a Reinvention Investment Fund (RIF), which shall be available to invest in projects of the Department designed to produce measurable improvements in agency efficiency and significant taxpayer savings. To provide the initial capital, there is appropriated \$25,000,000, to the RIF; to remain available until expended, to make loans to agencies of the Department for projects designed to enhance productivity and generate cost savings. Such loans are to be paid with interest at the rate on marketable Treasury securities of similar maturity at the time the loan is made, and principal and interest shall be repaid to the RIF no later than September 30 of the fiscal year following the fiscal year in which the project is completed. Such repayments and interest shall be deposited in the RIF, to be available without further appropriation action. (Department of Labor Appropriations Act, 1994.)

Administrative management services.—Provides a broad range of administrative services, including printing, mailing, messengers, motor pool, accounting and payroll oversight, supply and property management, and safety and health services. Provides leadership and direction in the development and execution of Departmental and agency education and career development programs.

Field services.—Provides centralized services from the Department's regional offices to all agencies of the Department located in the regions. These services include personnel, financial, and administrative services.

Facilities management.—Manages the Frances Perkins Building, which is the Department's headquarters, under the terms of an agreement with the General Services Administration. This activity is funded by an allocation from General Services Administration to Department of Labor.

National Capital Service Center.—Provides a range of centralized services to agencies of the Department located in the national capital area. These services include personnel, accounting, payroll and voucher payments, budget, procurements, contracting, and management analysis.

Penalty mail and telecommunications.—Provides for departmental mail payments to the U.S. Postal Service and telecommunications payments to the General Services Administration.

Non-DOL Reimbursements.—Funds received for services rendered to any entity or person for use of Departmental facilities and services, including associated utilities and security services, shall be credited to and merged with this fund.

Reinvention Investment Fund.—This fund will finance agency reinvention proposals and other investment or capital acquisition projects in order to achieve savings and streamline work processes. The fund would be self-sustaining as agencies pay back the initial investment with savings generated through implementation of efficiencies and reinvention initiatives.

Financing.—The fund is paid by the agencies for which centralized services are performed at rates that return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
General Services Administration, Salaries and Expenses.

GENERAL PROVISIONS

SEC. 101. The Secretary of Labor is authorized to accept, in the name of the Department of Labor, and employ or dispose of in furtherance of authorized activities of the Department of Labor, any money or property, real, personal, or mixed, tangible or intangible, received by gift, devise, bequest, or otherwise.

SEC. 102. None of the funds in the Employees' Compensation Fund under 5 U.S.C. 8147 shall be expended for payment of compensation, benefits, and expenses to any individual convicted of a violation of 18 U.S.C. 1920, or of any felony fraud related to the application for or receipt of benefits under subchapters I or III of chapter 81 of title 5, United States Code.

SEC. 103. None of the funds appropriated under this Act shall be expended by the Secretary of Labor to implement or administer either the final or proposed regulations referred to in section 303 of Public Law 102-27. (*Department of Labor Appropriations Act, 1994.*)

TITLE V—GENERAL PROVISIONS

The following section is proposed for deletion and does not appear below:

Sec. 509 ... Provision relating to use of funds for abortions.¹

SEC. 501. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. 502. The Secretaries of Labor, Health and Human Services, and Education are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 503. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 504. (a) No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

(b) No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 505. The Secretaries of Labor and Education are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles I and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed \$2,500 from the funds available for "Salaries and expenses, Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for

¹ The Administration will work with the Congress to address this issue in the context of health care reform.

official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and expenses, National Mediation Board".

SEC. 506. Notwithstanding any other provision of this Act, no funds appropriated under this Act shall be used to carry out any program of distributing sterile needles for the hypodermic injection of any illegal drug unless the Surgeon General of the United States determines that such programs are effective in preventing the spread of HIV and do not encourage the use of illegal drugs, except that such funds may be used for such purposes in furtherance of demonstrations or studies authorized in the ADAMHA Reorganization Act (Public Law 102-321).

SEC. 507. No funds appropriated pursuant to this Act may be expended by an entity unless the entity agrees that in expending the assistance the entity will comply with sections 2 through 4 of the Act of March 3, 1933 (41 U.S.C. 10a-10c, popularly known as the "Buy American Act").

SEC. 508. [(a)] Notwithstanding any other provision of law, monthly benefit [payments] rates under part B or part C of the Black Lung Benefits Act [for months after December 1993 and before October 1994 shall be calculated as though the provisions of Federal law prescribing pay rates for Federal employees continued in effect, without amendment to or limitation of such provisions, after January 1993] shall continue to be based on the benefit rates in effect in September, 1994 and be paid in accordance with the Act, until exceeded by the benefit rate specified in section 412(a)(1) of the Act.

[(b) Of the amounts provided under title XII of Public Law 102-368, Additional Assistance to Distressed Communities, under the heading "Community Investment Program", \$225,000,000 are rescinded.]

This Act may be cited as the "Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, [1994] 1995". (*Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1994.*)

The program described below is financed by this appropriation and by reimbursements from other agencies. Those agencies are provided with most of their administrative services overseas by the Department of State.

Executive direction and policy formulation.—This activity identifies resources which provide sound management through the direction of the Secretary and with the assistance of staff offices, specialized offices, and functional and regional bureaus, for policy formulation and in pursuit of regional and global foreign policy objectives including the hosting of various international conferences and meetings in the United States and abroad.

Conduct of diplomatic relations.—Resources of this activity include: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of our foreign policy objectives including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. These resources also fund the conduct of U.S. diplomatic policy through political and multilateral affairs, economic and social affairs, international budgetary and management affairs, and participation in and hosting various international conferences.

Conduct of consular relations.—Activities included are overseas and American citizen services, and the issuance of passports to U.S. citizens both here and abroad. Visa services involve the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American citizen services include the issuance of passports and emergency assistance to American citizens abroad. Passport services include the issuance

General and special funds—Continued

DIPLOMATIC AND CONSULAR PROGRAMS—Continued

of passports in the United States and U.S. missions abroad and passport fraud detection and investigation.

Professional development and training.—The professional development and training activity is a continuous process by which the Department ensures that its professionals have the skills, experience, and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional, area, and language skills needed for the conduct of foreign relations in the Department and abroad.

Information management.—This activity identifies resources necessary for the effective and efficient creation, collection, processing, transmission, dissemination, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Its requirements are driven by the informational needs of the President, the Secretary of State, the Department and its 263 missions, and approximately fifty Government agencies. Components of the information management activity include: telecommunications; classified information handling; unclassified data and word processing; pouch, mail, and publishing services; administration of an electronic and archival records management program; document classification and declassification; information security; and provision of information management services, as appropriate, to all branches of the Government and to the public. In all of these programs, responsibilities range from policy setting to planning and design, implementation, operation, and maintenance. The Department manages large computer and communications centers to provide administrative, consular, economic, and political information. The computer systems support worldwide consular applications, financial management systems, management of building programs, and intelligence research systems. The centralized management of these activities is funded in the Department's salaries and expenses appropriation.

Security.—This activity identifies resources necessary in meeting security and counter-terrorism responsibilities, both foreign and domestic. Covered in this activity are: security operations; engineering services, which relate to the technical defense of Foreign Service personnel and establishments against electronic and physical attack; protection of dignitaries abroad; and physical security operations abroad.

Medical.—This activity encompasses medical programs for the Department of State, the Foreign Service, and 35 other U.S. Government departments and agencies overseas. Services are provided in Washington as well as at 263 missions worldwide and cover some 60,000 employees and dependents.

Administration and staff activities.—These activities include normal domestic and overseas administrative services directly related to Department programs other than those funded in the Department's salaries and expenses appropriation. They include:

- The direction and control of administration and management operations, representing and negotiating U.S. Government administrative matters with foreign officials, and reviewing and setting resource levels and priorities for various programs and bureaus financed by this appropriation.
- The budgeting, financial planning, and fiscal operations for bureaus and offices financed by this appropriation and most federal agencies resident abroad.
- The management, recruitment, and performance evaluation of Foreign and Civil Service employees and Foreign Service National staff.
- The contracting and procurement of services and supplies, maintenance and repair of equipment and physical prop-

erty, vehicle operation, and shipping and customs services.

—Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave, and separation of the Department's personnel and dependents.

The program described below is financed by this appropriation and by reimbursements from other agencies.

Foreign policy direction.—This activity identifies the resources for the Secretary and staff and specialized offices within the Office of the Secretary to manage policy formulation and pursue regional and global foreign policy objectives.

Information management and security operations.—This activity identifies resources required to meet the informational and security needs of the Secretary of State and to manage the information management and security infrastructure for the Department. This appropriation includes the Department's domestic processing centers that support worldwide financial management systems, personnel management systems, and management of building programs. Diplomatic security responsibilities include security operations; engineering services; investigations, such as malfeasance and passport fraud; certain dignitary protection activities; and domestic physical security operations. This activity also includes relevant training of personnel in these fields.

Department administration.—These activities include the Department's major management and administrative activities including central administration and management operations; Department-wide budgeting, financial planning, and fiscal operations; workforce management of the Department's Foreign and Civil Service employees and Foreign Service National staff; Workers Compensation costs; and administrative services including contracting, property maintenance and repair, vehicle operations, and shipping and customs services.

This appropriation provides for the conduct or supervision of all audits, investigations, and inspections of the Department's programs and operations, as mandated by the Inspector General Act of 1978, as amended, and the Foreign Service Act of 1980, as amended. The objectives of the Office of the Inspector General are to (1) improve the economy, efficiency, and effectiveness of the Department's operations, (2) detect and prevent fraud, waste, abuse and mismanagement, and (3) evaluate independently the formulation, applicability, and implementation of security standards at all U.S. diplomatic and consular posts. The Office also assesses the implementation of U.S. foreign policy, primarily through its inspection of all overseas posts and domestic offices on a cyclical basis. The State Department's IG also serves as Inspector General of the U.S. Arms Control and Disarmament Agency, as mandated by law.

The overall mission of the State Department's Foreign Building Operations Program is to provide policy direction and management of the Department's overseas facilities. When necessary to support diplomatic initiatives, properties are acquired in foreign countries by purchase, lease, lease-purchase, exchange, or construction. The Foreign Buildings Operations program functions include: initiating and developing long-range maintenance, rehabilitation, and safety programs; establishing worldwide priorities for acquisition, disposal, and maintenance of properties; and determining the design, construction, acquisition, and sale of real properties and the reinvestment of proceeds of sale to support its programs. The program provides guidance on overseas building matters to overseas posts, regional bureaus and other foreign affairs agencies; establishes standards and policies for all overseas government-owned and leased properties; provides for the security of facilities under construction or renovation; and maintains statistical, financial, and visual records of overseas properties.

The current appropriation finances, by 30 equal annual installments, any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. In addition, the current appropriation finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions.

The permanent appropriation provides payments to the fund for the interest on the unfunded liability and disbursements attributable to military and naval services—a full 100 percent in each year. In addition, the permanent appropriation finances the supplemental liability of the Foreign Service pension system—amortized over a thirty-year period.

As a member of the above listed organizations, the United States contributes an assessed share of the budgets of those organizations net of certain withholdings. Some 1995 estimates reflect approved budgets of these organizations. The 1995 request also includes \$40.7 million to pay towards prior year arrearages. These funds would be directed toward special activities that are mutually agreed upon by the United States and the respective international organizations, and their payment would be conditional upon such agreements.

Refugee Assistance overseas.—This program addresses the protection and assistance needs of refugees, migrants and conflict victims worldwide. Funds are used primarily to support the programs of international organizations, including the United Nations High Commissioner for Refugees, the United Nations Relief and Works Agency for Palestine Refugees, the World Food Program, the International Organization for Migration and the International Committee of the Red Cross. When possible, funds are used to resolve refugee situations through repatriation or local integration.

Refugees to Israel.—These funds provide a grant to the United Israel Appeal to assist Jewish refugees from all regions of the world resettling in Israel.

U.S. Refugee Admissions.—This program provides overseas English language training and cultural orientation, processing, transportation, and initial placement for up to 110,000 refugees and Amerasian immigrants resettling in the United States. These activities are carried out by the International Organization for Migration and U.S. private voluntary agencies.

Administrative Expenses.—These funds finance the salaries and operating expenses in Washington and overseas for the Bureau for Refugee Programs or its successor bureau.

Authorization for this program is being sought in the Administration's proposed rewrite of the Foreign Assistance Act. Appropriations language shall be transmitted later.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the general fund to the highway trust fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs specified by law.

The status of the fund is as follows:

Note: Includes amounts associated with the rescission and supplemental proposals.

The Federal-Aid Highways (FAH) budget authority consists of several programs designed to aid in the construction, rehabilitation, traffic management and safety of our nation's highways. This program is funded by contract authority found in substantive legislation currently provided by the six-year (1992-1997) Intermodal Surface Transportation Efficiency Act of 1991 (P.L. 102-240), (ISTEA).

All programs included within FAH are financed from the Highway Trust Fund and distributed via apportionments and allocations to States. Liquidating cash appropriations are subsequently requested to fund outlays resulting from obligations incurred under contract authority. The budget proposes to fund programs from within the Federal-Aid Highway obligation limitation that previously were exempt from the limitation.

National highway program.—The ISTEA establishes a National Highway Program to provide funding for a designated National Highway System of about 155,000 miles (plus or minus 15 percent), which is of primary Federal interest. The system, to be selected by the States and approved by the Secretary, would essentially replace the current Interstate 4R program, and a major portion of the primary program. The National Highway System would consist of the current Interstate, other rural principal arterials, urban freeways and connecting urban principal arterials, and facilities on the Defense Department's designated Strategic Highway Network.

Surface Transportation Program (STP).—The ISTEA establishes a new block grant-type program that may be used by States and localities for any roads that are not classified as local or rural minor collector roads. The ISTEA authorized a total of \$23.9 billion for the STP over six years. The authority may be augmented by transfers of authority from other programs and by the apportionment adjustments authorized by section 1015 of ISTEA and minimum allocation funds which may be used as if they were STP funds.

Bridge replacement and rehabilitation.—The ISTEA continues the bridge program to enable States to respond to the problem of unsafe and inadequate bridges. The funds will be available for use on all bridges, both on and off the National Highway System, including those on roads functionally classified as rural minor collectors and as local. The budget proposes, beginning in FY 1995, that highway bridges determined to be an obstruction to navigation will be eligible for funding through the Federal-aid highways program. Currently, such bridges are funded by a separate appropriation to the U.S. Coast Guard.

Interstate completion.—The ISTEA authorized a total of \$7.2 billion through FY 1995 for completion of the Interstate Highway System. Currently, 23 States have completed their Interstate construction programs. Nationwide, as of June 30, 1993, some 42,696 miles (99.8 percent) of the 42,796 mile system is open to traffic. All States except Massachusetts will receive yearly apportionments based on each State's proportionate share of the remaining needs in the 1991 Interstate Cost Estimate (based on costs inflated through 1994), excluding Massachusetts' cost to complete. Massachusetts will receive a specified yearly allocation of Interstate Construction funds (also based on the 1991 Interstate Cost Estimate) that approximates its construction schedule.

Interstate substitution.—The ISTEA authorized a total of \$960 million for substitute highway projects through FY 1995. The funds are distributed to 32 areas (in 21 States) that have withdrawn Interstate routes in accordance with the pro-

visions of Section 103(e)(4) of Title 23 of the United States Code. Since program inception, a total of \$14.0 billion had been obligated on substitute highway and transit projects from the \$14.9 billion made available to the 32 areas as the result of Interstate route withdrawals.

Emergency relief.—The Emergency Relief (ER) program provides funds for the repair or reconstruction of Federal-aid highways and Federally-owned roads which have suffered serious damage as the result of natural disasters or catastrophic failures. The ER program supplements the commitment of resources by States, their political subdivisions, or Federal agencies to help pay for unusually heavy expenses resulting from extraordinary conditions.

Federal lands.—This category includes the Public Lands Highways, Park Roads and Parkways, and Indian Reservation Roads programs. Roads funded under this program are open to public travel. State and local roads (25,000 miles) that provide important access to and within the National Forest System are designated Forest Highways. These roads should not be confused with the Forest Development Roads which are under the jurisdiction of the Forest Service. Park roads and Parkways (8,000 miles) are owned by the National Park Service and provide access to and within the National Park System. Indian Reservation Roads program consists of the Bureau of Indian Affairs (20,000 miles) and State and local roads (25,000 miles) that provide access to, and within, Indian lands.

Miscellaneous.—This category consists of previously authorized programs and includes: Interstate 4R, Primary, Secondary/Urban, Safety Construction, Strategic Highway Research Program, Section 149 Demonstrations and other miscellaneous activities.

This limitation provides for the salaries and expenses of the Federal Highway Administration. Resources are allocated from the following programs: Federal-aid highways, and highway-related safety grants.

Program direction and coordination.—Provides overall management of the highway transportation program.

General program support.—Recognizing the importance of research as an investment in the efficiency of future transportation, the 1995 budget includes \$265.4 million for highway research and technology of which \$165.8 million is requested for development of intelligent vehicle/highway systems.

Highway programs.—Provides engineering guidance to Federal and State agencies and to foreign governments, and conducts a program to encourage use of modern traffic engineering procedures to increase the vehicle-carrying capacity of existing highways and urban streets; and finances construction skill training programs for disadvantaged workers hired by contractors on federally aided highway projects.

Field operations.—Provides staff advisory and support services in field offices of the Federal Highway Administration; and provides program and engineering supervision through 9 regional and 52 division offices.

The Highway Safety Act of 1970 authorized grants to States and communities for implementing and maintaining highway-related safety standards. A portion of the funds authorized for this program will be used to provide incentives to accelerate the advancement of highway safety efforts in proven crash and injury countermeasures. The budget proposes to rescind \$20 million in balances of prior year contract authority that are not available for obligation due to obligation limitations.

The Motor Carrier Safety Grant program provides grants to States to enforce Federal and compatible State standards applicable to commercial motor vehicle safety. Uniform safety standards both enhance the coordination of enforcement activities and simplify the safety requirements of interstate

trucking parties. The purpose of the grant program is to raise the level of enforcement, not to substitute Federal funds for State and local dollars. The budget proposes to fund the program at the ISTEA-authorized level.

Miscellaneous Trust Funds contains the following programs financed out of the highway trust fund and reimbursed by the requesting parties.

Cooperative work, forest highways.—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways.

Technical assistance, U.S. dollars advanced from foreign governments.—The Federal Highway Administration renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries.

Contributions for highway research programs.—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment.

Advances from State cooperating agencies.—Funds are contributed by the State highway departments or local subdivisions thereof for construction and/or maintenance of roads or bridges. The work is performed under the supervision of the Federal Highway Administration.

International highway transportation outreach.—Funds are collected to inform the domestic highway community of technological innovations, promote highway transportation expertise internationally, and increase transfers of transportation technology to foreign countries.

The Federal-Aid Highway Act of 1968 authorized \$300 million for the establishment of a right-of-way revolving fund. This fund is used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs.

States are required to reimburse the fund, generally within ten years from the advance. A loan limitation of \$42,500,000 is proposed for FY 1995.

BUREAU OF TRANSPORTATION STATISTICS

The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991, section 6006, (49 U.S.C. 111), established in the Department of Transportation a new Bureau of Transportation Statistics. Its Director is appointed by the President with the advice and consent of the Senate to a four-year term.

The work of the Bureau consists of: compiling transportation statistics, implementing a long-term data collection program, issuing guidelines for information collection, coordination of information collection, making statistics accessible, and identifying information needs.

Financing of the Bureau's operations is authorized as contract authority out of the Highway Trust Fund at \$5 million for 1992, \$10 million for 1993, \$15 million for 1994 and 1995, \$20 million for 1996, and \$25 million for 1997. The contract authority is included in the Federal-Aid Highways program and subject to the obligation limitation applicable to that program. Funds are transferred to the Bureau from Federal-Aid Highways, where all obligations, outlays, and staff are counted.

Obligations are estimated at \$15 million in 1994 and \$15 million in 1995. Staffing is estimated at 12 FTE in 1994 and 1995. Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriation as follows: Department of Transportation, Federal Highway Administration, Federal-Aid Highways.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

The programs administered by the National Highway Traffic Safety Administration (NHTSA) are authorized by four separate laws: The National Traffic and Motor Vehicle Safety Act, the Highway Safety Act, the Motor Vehicle Information and Cost Savings Act and the National Highway Traffic Safety Administration Authorization Act of 1991. The following table shows the funding for NHTSA programs.
