GENERAL NOTES

1. All years referenced for budget data are fiscal years unless otherwise noted. All years referenced for economic data are calendar years unless otherwise noted.
2. Detail in this document may not add to the totals due to rounding.

INTRODUCTION TO THE HISTORICAL TABLES

STRUCTURE, COVERAGE, AND CONCEPTS

The *Historical Tables* provide a wide range of data on Federal Government finances. Many of the data series begin in 1940 and include estimates of the President's Budget for 2016–2021. Additionally, Table 1.1 provides data on receipts, outlays, and surpluses or deficits for 1901–1939 and for earlier multiyear periods.

Structure

The *Historical Tables* are organized into 16 sections, each of which has one or more tables. Each section covers a common theme. Section 1, for example, provides an overview of the budget and off-budget totals; Section 2 provides tables on receipts by source; and Section 3 shows outlays by function. When a section contains several tables, the general rule is to start with tables showing the broadest overview data and then work down to more detailed tables. The purpose of these tables is to present a broad range of historical budgetary data in one convenient reference source and to provide relevant comparisons likely to be most useful. The most common comparisons are in terms of proportions (e.g., each major receipt category as a percentage of total receipts and of the gross domestic product).

Section notes explain the nature of the activities covered by the tables in each section. Additional descriptive information is also included where appropriate. Explanations are generally not repeated, but there are occasional cross-references to related materials. Because of the numerous changes in the way budget data have been presented over time, there are inevitable difficulties in trying to produce comparable data to cover many years. The general rule is to provide data in as meaningful and comparable a fashion as possible. To the extent feasible, the data are presented on a basis consistent with current budget concepts. When a structural change is made, insofar as possible the data are adjusted for all years.

One significant change made in the early 1990s concerns the budgetary treatment of Federal credit programs, which was changed by the Federal Credit Reform Act of 1990. Previously the budget recorded transactions related to direct and guaranteed loans on a cash basis. Under credit reform, the budget records budget authority and outlays for the subsidy cost of direct and guaranteed loans made in 1992 and subsequent years. The subsidy is defined as the net estimated cash flows to and from the Government over the life of the loan, discounted to the present. The remaining cash transactions of credit programs are recorded as a “means of financing” the deficit. Because it is impossible to convert the pre-1992 loans to a credit reform basis, the data are on a cash basis for pre-1992 loans and on a credit reform basis for loans made in 1992 and subsequent years.

Coverage

The Federal Government has used the unified or consolidated budget concept as the foundation for its budgetary analysis and presentation since the 1969 Budget. The basic

guidelines for the unified budget were presented in the *Report of the President's Commission on Budget Concepts* (October 1967). The Commission recommended the budget include all Federal fiscal activities unless there were exceptionally persuasive reasons for exclusion. Nevertheless, from the very beginning some programs were perceived as warranting special treatment. For example, the Export-Import Bank was excluded by law from the budget totals beginning in the 1973 Budget, and other exclusions followed. These exclusions resulted in two new budget terms, *on-budget* and *off-budget*, to distinguish between these excluded entities and the rest of the budget. Although there is a legal distinction between on-budget and off-budget entities, there is no conceptual difference between the two. The off-budget Federal entities engage in the same kinds of governmental activities as the on-budget entities, and the programs of off-budget entities result in the same kind of outlays and receipts as on-budget entities. Like on-budget entities, off-budget entities are owned and controlled by the Government. The "unified budget" reflects the conceptual similarity between on-budget and off-budget entities by showing combined totals of outlays and receipts for both types of entities.

The Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) repealed the off-budget status of all then existing off-budget entities, but it also included a provision moving the Federal old-age, survivors, and disability insurance funds (collectively known as Social Security) off-budget. To provide a consistent time series, the historical tables show Social Security off-budget for all years since its inception, and show all formerly off-budget entities on-budget for all years. The Omnibus Budget Reconciliation Act of 1989 (OBRA 1989) moved the Postal Service fund off-budget, starting in 1989. Again to provide a consistent time series, transactions of the Postal Service fund are shown off-budget beginning with its inception in 1972. The transactions of its predecessor, the Post Office Department, remain on-budget.

Though Social Security and the Postal Service are now off-budget, they continue to be Federal programs. Indeed, Social Security currently accounts for about one-fourth of all Federal receipts and more than one-fifth of all Federal spending. Hence, the budget documents include these funds and focus on the Federal totals that combine the on-budget and off-budget amounts. Various budget tables and charts show total Federal receipts, outlays, and surpluses and deficits, and divide these totals between the portions that are on-budget and off-budget.

Changes in Historical Budget Authority, Outlays, Receipts, and Deficits

Adjustments have been made to the historical budget authority and outlay totals to reflect corrections in agency reporting provided to the Department of the Treasury.

This year's annual consultations with the Congress regarding reclassification of accounts or activities as to function or subfunction resulted in no reclassifications.

Note on the Fiscal Year

The Federal fiscal year begins on October 1 and ends on the subsequent September 30. It is designated by the year in which it ends; for example, fiscal year 2015 began on October 1, 2014, and ended on September 30, 2015. Prior to fiscal year 1977 the Federal fiscal years began on July 1 and ended on June 30. In calendar year 1976 the July-September period was a separate accounting period (known as the transition quarter or TQ) to bridge the period required to shift to the new fiscal year.

Note on Proposed Reclassification of Certain Programs

The Budget includes a proposal to change the financing of certain transportation programs, which would result in the reclassification of certain activities as to Budget Enforcement Act (BEA) categories. The proposed reclassification would not take effect until 2017, but, for purposes of comparability, the Budget estimates show the category reclassifications starting in 2015. Tables in this document that display Budget Enforcement Act (BEA) categories reflect these reclassifications as starting in 2016 in order to show the actual categorization for 2015. As a result, discretionary and mandatory category totals for 2016 and beyond are not fully comparable with corresponding totals for 2015 and prior years.

Note on Revisions to Historical GDP

The Bureau of Economic Analysis in the Department of Commerce completed its regular annual revisions of the National Income and Product Accounts (NIPA) data in July 2015. These revisions resulted in changes to Gross Domestic Product (GDP). As a result of these changes, the fiscal year GDP figures shown in this publication for fiscal years 2011 through 2014 differ from the GDP figures shown in last year's *Historical Tables* publication. The tables showing constant dollar amounts and the deflators shown in Table 10.1 have been correspondingly revised.

Concepts Relevant to the Historical Tables

Budget receipts constitute the income side of the budget; they are composed almost entirely of taxes or other compulsory payments to the Government. In contrast, *offsetting collections* and *offsetting receipts* result from either of two kinds of transactions: business-like activities with the public (e.g., interest income or the sale of electric power) and the receipt by one Government account of a payment from another account. Offsetting collections and offsetting receipts are offset against outlays, so that total *budget outlays* are reported net of these transactions. This method of accounting permits users to easily identify the size and trends in Federal taxes and other compulsory income, and in Federal spending financed from taxes, other compulsory income, and borrowing. See Chapter 12, "Governmental Receipts," and Chapter 13, "Offsetting Collections and Offsetting Receipts," of the *Analytical Perspectives* volume for more information.

The budget *surplus* refers to any excess of budget receipts over budget outlays, while the budget *deficit* refers to any excess of budget outlays over budget receipts. The terms *off-budget receipts*, *off-budget outlays*, *off-budget surpluses*, and *off-budget deficits* refer to

similar categories for off-budget activities. The sum of the on-budget and off-budget transactions is referred to as the consolidated, unified, or total Federal Government transactions.

The budget is divided between two fund groups, *Federal funds* and *trust funds*. The Federal funds group includes all receipts and outlays not specified by law as being trust funds. All Federal funds are on-budget except for the Postal Service fund, which is shown as off-budget starting in 1972. All trust funds are on-budget, except the two Social Security retirement and disability trust funds, which are shown off-budget for all years. See Chapter 26, “Trust Funds and Federal Funds,” of the *Analytical Perspectives* volume for more information.

Payments for individuals are Federal Government spending programs designed to transfer income (in cash or in kind) to individuals or families. To the extent feasible, this category does not include reimbursements for current services rendered to the Government (e.g., salaries and interest). See “Notes on Section 6” in this volume for more information.

Means-Tested Entitlements are entitlement programs that limit benefits or payments based on the beneficiary’s income and/or assets and payments from refundable tax credits that are phased out at certain income levels. See “Notes on Section 8” in this volume for more information.

HISTORICAL TRENDS

Because the *Historical Tables* publication provides a large volume and wide array of data on Federal Government finances, it is sometimes difficult to perceive the long-term patterns in various budget aggregates and components. To assist the reader in understanding some of these long-term patterns, this section provides a short summary of the trends in Federal deficits and surpluses, debt, receipts, outlays, and employment.

Deficits and Debt.—As shown in Table 1.1, except for periods of war (when spending for defense increased sharply), depressions, or other economic downturns (when receipts fell precipitously), the Federal budget was generally in surplus throughout most of the Nation's first 200 years. For our first 60 years as a Nation (through 1849), cumulative budget surpluses and deficits yielded a net surplus of \$70 million. The Civil War, along with the Spanish-American War and the depression of the 1890s, resulted in a cumulative deficit totaling just under \$1 billion during the 1850–1900 period. Between 1901 and 1916, the budget hovered very close to balance every year. World War I brought large deficits that totaled \$23 billion over the 1917–1919 period. The budget was then in surplus throughout the 1920s. However, the combination of the Great Depression followed by World War II resulted in a long, unbroken string of deficits that were historically unprecedented in magnitude. As a result, Federal debt held by the public mushroomed from less than \$3 billion in 1917 to \$16 billion in 1930 and then to \$242 billion by 1946. In relation to the size of the economy, debt held by the public grew from 16 percent of GDP in 1930 to 106 percent in 1946.

During much of the postwar period, this same pattern persisted—large deficits were incurred only in time of war (e.g., Korea and Vietnam) or as a result of recessions. As shown in Table 1.2, prior to the 1980s, postwar deficits as a percent of GDP reached their highest during the 1975–76 recession at 4.1 percent in 1976. Debt held by the public had grown to \$477 billion by 1976, but, because the economy had grown faster, debt as a percent of GDP had declined throughout the postwar period to a low of 23.1 percent in 1974, climbing back to 26.7 percent in 1976. Following five years of deficits averaging only 2.3 percent of GDP between 1977 and 1981, debt held by the public stood at 25.2 percent of GDP by 1981—two percentage points higher than its postwar low.

The traditional pattern of running large deficits only in times of war or economic downturns was broken during much of the 1980s. In 1982, large permanent tax cuts were enacted. Moreover, these were accompanied by substantial increases in defense spending. Although reductions were made to nondefense spending, they were not of sufficient size to offset the impact on the deficit. As a result, deficits averaging \$206 billion were incurred between 1983 and 1992. These unprecedented peacetime deficits increased debt held by the public from \$789 billion in 1981 to \$3.0 trillion (46.6 percent of GDP) in 1992.

After peaking at \$290 billion in 1992, deficits declined each year, dropping to a level of \$22 billion in 1997. In 1998, the Nation recorded its first budget surplus (\$69.3 billion) since 1969. As a percent of GDP, the budget bottom line went from a deficit of 4.5 percent in 1992 to a surplus of 0.8 percent in 1998, increasing to a 2.3 percent surplus in 2000.

An economic slowdown began in 2001. The deterioration in the performance of the economy, together with large tax reductions as well as additional spending in response to the September 11th terrorist attacks, produced a drop in the surplus from \$236 billion in 2000 to \$128 billion (1.2 percent of GDP) in 2001 and a return to deficit (\$158 billion, 1.5 percent of GDP) in 2002. These factors also contributed to the increase in the deficit in the following two years, reaching \$413 billion (3.4 percent of GDP) in 2004. Economic growth in 2005 and 2006 produced a sharp increase in revenues, helping to reduce the deficit to \$161 billion (1.1 percent of GDP) by 2007.

Debt held by the public, which had peaked at 47.8 percent of GDP in 1993, fell to 31.4 percent by 2001 and increased thereafter, reaching 35.6 percent by 2005. The declines in the deficit in 2006 and 2007 helped to reduce debt held by the public to 35.2 percent of GDP in 2007.

In December 2007, the economy fell into recession. In response, tax reductions in the form of rebates were enacted in mid-February 2008. In addition, several years of poor private-sector mortgage lending practices and other risky financial market behaviors led to a financial market crisis in September 2008 that significantly deepened the ongoing recession. Lower revenue (due to both the tax reductions and lower economic activity) and recession-induced spending for unemployment assistance and other automatic stabilizers combined with a large stimulus package of further tax reductions and program increases as well as increased defense spending (due partly to the surge of troops in Iraq and, subsequently, in Afghanistan) to produce deficits peaking at \$1,413 billion (9.8 percent of GDP) in 2009 before declining slowly to \$438 billion (2.5 percent of GDP) in 2015. As a result there were corresponding increases in debt held by the public from 39.3 percent of GDP in 2008 to 74.4 percent in 2015. The Government used a portion of the increased debt to acquire financial assets from the private sector as a way of ameliorating the financial market crisis and otherwise assisting the economy. These financial assets can be considered offsets to the increase in the debt; taking them into account, however, still shows that debt held by the public net of financial assets reached 66.7 percent of GDP by in 2015.

Receipts.—From the beginning of the Republic until the start of the Civil War, our Nation relied on customs duties to finance the activities of the Federal Government. During the 19th Century, sales of public lands supplemented customs duties. While large amounts were occasionally obtained from the sale of lands, customs duties accounted for over 90 percent of Federal receipts in most years prior to the Civil War. Excise taxes became an important and growing source of Federal receipts starting in the 1860s. Estate and gift taxes were levied and collected sporadically from the 1860s through World War I, although never amounting to a significant source of receipts during that time. Prior to 1913, income taxes did not exist or were inconsequential, other than for a brief time during the Civil War period, when special tax legislation raised the income tax share of Federal receipts to as much as 13 percent in 1866. Subsequent to the enactment of income tax legislation in 1913, these taxes grew in importance as a source of Federal receipts during the following decade. By 1930, the Federal Government was relying on income taxes for 60 percent of its receipts, while customs duties and excise taxes each accounted for 15 percent of the receipts total.

During the 1930s, total Federal receipts averaged about 5 percent of GDP. World War II brought a dramatic increase in receipts, with Federal receipts peaking at 20.5 percent of

GDP in 1944. The percentage declined in the early post-war years to 14.1 by 1950. Since then receipts have fluctuated within a range of 15-20 percent of GDP. In recent years, the deepening recession and further tax reductions enacted in 2009 to help revive the economy reduced receipts as a percent of GDP to 14.6 in both 2009 and 2010, the lowest since 1950. Receipts have since increased to within the historical average, reaching 18.3 percent of GDP in 2015.

There have also been some significant shifts during the postwar period in the underlying sources or composition of receipts. The increase in taxes needed to support the war effort in the 1940s saw total (corporate and individual) income taxes rise to prominence as a source of Federal receipts, reaching 79 percent of total receipts in 1944. After the war, the total income tax share of receipts fell from a postwar high of 74 percent in 1952 to an average of 64 percent in the late 1960s. The growth in social insurance taxes (such as Social Security and Medicare) more than offset a postwar secular decline in excise and other non-income tax shares. The combination of substantial reductions in income taxes enacted in the early 1980s and the continued growth in social insurance taxes resulted in a continued decline in the total income tax share of receipts. By 1983 the total income tax share had dropped to 54 percent of receipts, and it ranged from 52 percent to 60 percent through 2007. As a result of the recession and tax reductions enacted as part of the stimulus packages in February 2008 and again in the spring of 2009, the total income tax share dropped to 50 percent in 2009 and 2010. By 2015, the total income tax share of receipts had risen to 58 percent.

Corporation income taxes accounted for a large part of this postwar decline in total income tax share, falling from over 30 percent of total Federal receipts in the early 1950s to 19 percent in 1968. During the same period, pretax corporate profits fell from about 13 percent of GDP in the early 1950s to 11 percent in 1968. By 1980 the corporation income tax share of total receipts had dropped to 12.5 percent. Pretax corporate profits also declined as a percent of GDP during the 1980s and, thus, the corporation income tax share of total receipts dropped to a low of 6.2 percent in 1983. By 1996, the share had climbed back to 11.8 percent. But, between 2001 and 2003, it averaged 7.7 percent, well below the 1980 share, before increasing to 14.7 percent by 2006. The December 2007 recession reduced the corporation income tax share of total receipts to just 6.6 percent in 2009. In 2010 the share rose to 8.9 percent before falling to 7.9 percent in 2011 and then rising to 10.6 percent in 2015.

This postwar drop in corporation income taxes as a share of total receipts has been more than offset by the growth in social insurance taxes and retirement receipts, as both tax rates and the percentage of the workforce covered by these payroll taxes increased. This category of receipts increased from only 8 percent of total receipts during the mid-1940s to 38 percent by 1992, but declined to 32 percent by 2000 before rising to a 40 percent share in 2003, and then falling off to 34 percent in 2007. One effect of the deepening recession was to reduce the relative share of income taxes (both individual and corporation) to 50 percent in 2009, which helped raise the social insurance taxes and retirement receipts share of total receipts in that year to 42 percent. By 2012 this share had dropped to less than 35 percent, due to a reduction in the Social Security payroll tax rate (first enacted in December 2010 and, subsequently, extended through most of 2011 and 2012) and also due to a decline in the taxable portion of covered wages and self-employment income subject to payroll taxes, and a

substantially higher average annual growth rate of 6.9 percent for income taxes (raising the total income taxes share in 2012 to 56 percent). By 2015 the income taxes share reached 58 percent while the social insurance taxes share declined slightly to 34 percent.

Excise taxes have also declined in relative importance during the postwar period, falling from a 19 percent share of total receipts in 1950 to 10 percent by 1966 and 5 percent by 1985. Excise taxes accounted for only 3.1 percent of total receipts in 2006 and dropped further to 2.5 percent in 2007, due, in part, to the end of the Federal telephone excise tax on long distance telephone calls. The excise tax share of total receipts increased slightly to 3.0 percent by 2009, but this was due to the rapid decline in income tax receipts rather than any substantial growth in excise tax receipts. In 2015, this share remained unchanged at 3.0 percent.

Outlays and Executive Branch Civilian Employment.—Throughout most of the Nation's history prior to the 1930s, the bulk of Federal spending went towards national defense, veterans' benefits, and interest on the public debt. In 1929, for example, 71 percent of Federal outlays were in these three categories. The 1930s began with Federal outlays equaling just 3.4 percent of GDP. As shown in Table 1.2, the efforts to fight the Great Depression with public works and other nondefense Federal spending, when combined with the depressed GDP levels, caused outlays and their share of GDP to increase steadily during most of that decade, with outlays rising to 10.1 percent of GDP by 1939 and to 11.7 percent by 1941 on the eve of U.S. involvement in World War II.

Defense spending during World War II resulted in outlays as a percent of GDP rising sharply, to a peak of 42.7 percent by 1944. The end of the war brought total spending down to 14.0 percent of GDP by 1949, but the Korean War increased spending to 19.9 percent of GDP by 1953. Outlays as a percent of GDP dropped after the Korean War and stayed between 16.1 and 18.3 percent until U.S. involvement in the Vietnam War escalated sharply in the middle 1960s and remained high into the early 1970s.

From 1967 through 1972, Federal outlays averaged 18.9 percent of GDP, with a peak occurring in 1968 at 19.8 percent of GDP. The decline in defense spending as a percent of GDP that began in 1973, as the withdrawal of U.S. forces from Vietnam was nearing completion, was more than offset by increased spending on human resources programs during the 1970s. The increase in human resources programs was due to the maturation of the Social Security program; increases in education and training, general and Federal employee retirement, and other income support programs, such as food stamps and unemployment assistance; as well as a takeoff in spending on the recently enacted Great Society programs, such as Medicare and Medicaid. As a result, total spending increased as a percent of GDP, averaging 19.4 percent during the 1970s. Since receipts were averaging only 17.4 percent of GDP during that decade, the result was chronic deficits averaging over 2.0 percent of GDP (contributing to this was the recession of 1975–76, which saw deficits increase to 4.1 percent in 1976).

The 1980s began with substantial momentum in the growth of Federal nondefense spending in the areas of human resources, including grants to State and local governments for human resources programs, and, as a result of the deficits incurred throughout the 1970s, interest on the public debt. In the early 1980s, a combination of substantially

increased defense spending, continued growth in human resource spending, large tax cuts, and a deep recession caused the deficits to soar, which, in turn, sharply increased spending for interest on the public debt. Federal spending climbed to an average of 22.1 percent of GDP during 1981–1985. An end to the rapid defense buildup and a partial reversal of the tax cuts, along with a strong economy during the second half of the decade, brought Federal spending back down to 20.5 percent of GDP by 1989.

In the early 1990s, another recession, in the face of continued rapid growth in Federal health care costs and additional spending resulting from the savings and loan crisis, caused the outlay share of GDP to average 21.6 percent over 1991 and 1992. During the decade following 1992, this upward trend was reversed, with outlays as a percent of GDP declining gradually but steadily, falling to a low of 17.6 percent in both 2000 and 2001. The outlay share of GDP rose to 19.1 percent by 2003, due, in part, to the increase in defense and homeland security spending in response to the September 11, 2001, terrorist attacks, and in part to the weak growth of GDP resulting from the 2001 recession. The outlay share of GDP increased further, reaching 19.4 percent in 2006, due, in part, to increased spending on the wars in Iraq and Afghanistan, as well as further increases in response to the devastating hurricanes that struck States along the Gulf Coast in late summer 2005. However, by 2007, outlays had dropped back slightly to 19.1 percent of GDP, only to shoot back up significantly in 2008, to 20.2 percent of GDP, as a result of both the recession that began in December 2007 and spending associated with the first stages of a Federal effort to restore financial markets to full functionality. The recession deepened in the first part of 2009 and additional efforts to fight the recession with a large package of program increases and additional tax reductions combined with a drop in the level of GDP to increase outlays as a percent of GDP to 24.4 percent in 2009, the highest since World War II. Outlays as a percent of GDP have since fallen and were at 20.7 percent in 2015.

Despite the growth in total Federal spending as a percent of GDP in recent decades, Executive Branch (full-time equivalent) civilian employment, as shown in Table 16.1, has remained roughly constant, ranging from 1.7 to 2.2 million civilian employees (excluding the Postal Service) since 1981. However, the composition of employment has shifted significantly between defense and civilian agencies during the postwar period, especially since the mid-1980s. In 1986, for example, the 2.1 million total for civilian employees was split equally between defense and the civilian agencies, with each accounting for 1 million employees. During the 1990s and up through the current decade there has been a shift away from defense to civilian agency employment. In recent years, civilian agency employment has been nearly twice that of the Department of Defense, accounting for over 1.3 million of the 2.0 million total in 2015.

Although total spending has increased substantially as a percent of GDP since the 1950s, the growth in the various components of spending has not been even and, thus, the composition of spending has changed significantly during the same period.

Outlays for discretionary programs (whose funding levels are determined by annual appropriations) totaled 12.3 percent of GDP in 1962, with nearly three-fourths going to defense. Discretionary spending for defense programs increased during the Vietnam War buildup in the late 1960s, causing total discretionary outlays to rise to 13.1 percent of GDP by 1968, after which a gradual decline began. By the middle 1970s, this category had

dropped to slightly less than 10 percent of GDP and it generally stayed at that level until the late 1980s, when the defense buildup that started early in that decade came to an end. Discretionary spending, as a percent of GDP, fell substantially over the late 1980s and throughout the 1990s, from 9.3 percent in 1987 to 6.0 percent in 1999. Since then, discretionary spending has increased. Much of this growth occurred in 2002 and 2003, in response to the September 11, 2001, terrorist attacks and the initiation of the wars in Afghanistan and Iraq. Additional outlays in response to the Gulf Coast hurricanes in September 2005 brought the discretionary outlay share of GDP up to 7.5 percent in 2005. The recession that began in December 2007 caused GDP to drop from 2008 to 2009 and, in conjunction with additional program spending, increased discretionary spending to 9.1 percent of GDP by 2010. Discretionary outlays have fallen in the years since, in part due to the caps on discretionary spending instituted as part of the Budget Control Act of 2011, and were 6.6 percent of GDP in 2015.

While total discretionary spending as a percent of GDP has generally followed a downward path over most of the past 25 years, its major components—defense and nondefense—have contrasting histories. As shown in Table 8.4, discretionary defense spending was at 9.0 percent of GDP in 1962. By 1965, spending in this category had declined to 7.2 percent of GDP. It then increased as a result of the Vietnam War, peaking at 9.1 percent of GDP in 1968, returning to the 1965 level by 1971. This decline continued throughout the 1970s, hitting a low point in that decade of 4.5 percent of GDP in 1979.

The defense buildup starting in the early 1980s boosted its percentage of GDP back to 6.0 percent by 1986, after which it again began a gradual decline throughout the rest of that decade and the next. By 1999, defense discretionary spending had fallen to 2.9 percent of GDP, reflecting the end of the Cold War and the above-average economic growth during much of the 1990s. Spending in response to the September 11, 2001, attacks, followed by the wars in Iraq and Afghanistan, reversed this decline, with defense discretionary spending growing over the decade and (due in part to the drop in GDP) peaking at 4.7 percent of GDP in 2010, before declining to 3.3 percent of GDP 2015, in part due to the caps on discretionary spending instituted as part of the Budget Control Act of 2011.

Nondefense discretionary spending as a percent of GDP has followed a much different path. In 1962, it stood at 3.3 percent of GDP. During the next few years it quickly increased, reaching 4.1 percent of GDP by 1967. It dropped slightly after that year, but still averaged about 3.8 percent of GDP until 1975, when it grew to 4.4 percent of GDP due, in part, to the recession and partly due to growth in spending on energy, the environment, and housing and other income support programs. Much of this growth was in the form of Federal grants to State and local governments. Additional spending arose from the creation of various anti-recession grants at the end of the decade. Nondefense discretionary outlays peaked as a percent of GDP during the recession in 1980 at 5.1 percent. This category declined sharply as a percent of GDP starting in 1982, averaging 3.4 percent during 1987–1991. Spending for these programs then increased slightly as a percent of GDP, reaching 3.6 percent during 1992-1995, before receding in subsequent years to a low of 3.1 percent during 1998-2000. This category then grew to 3.7 percent of GDP during the 2003-2006 period, before dropping slightly to 3.4 percent in 2007. The effects of the deepening recession and the anti-recession stimulus spending enacted in the spring of 2009 combined to increase the nondefense discretionary spending to 4.4 percent of GDP in 2010, before dropping in the subsequent

years. Nondefense discretionary spending was 3.3 percent of GDP in 2015, the same percentage as in 1962.

Programmatic mandatory spending (which excludes net interest and undistributed offsetting receipts) accounts for the largest part of the growth in total Federal spending as a percent of GDP since the 1950s. Major programs in this category include Social Security, Medicare, unemployment compensation, deposit insurance, and means-tested entitlements (Medicaid, the Supplemental Nutrition Assistance Program (SNAP), Supplemental Security Income, the refundable portions of a variety of tax credits, including the Earned Income and Child Tax Credits, and other programs subject to an income or asset test). Prior to the start of Medicare and Medicaid in 1966, programmatic mandatory spending averaged 5.5 percent of GDP between 1962 and 1965 (less than half the size of total discretionary spending), with Social Security accounting for nearly half. Within a decade, this category was comparable in size to total discretionary spending, nearly doubling as a percent of GDP to 10.3 percent by 1976 and remained between 9.4 percent of GDP and 11.4 percent of GDP for the next 30 years.

Although part of the growth from 1966 to 1976 represented the impact of the 1975–76 recession on GDP levels and on outlays for unemployment compensation (unemployment compensation accounted for 1.1 percent of GDP in 1976) and other programs sensitive to unemployment, the largest part of the increase was due to Social Security, Medicare, and Medicaid. These three programs totaled 3.3 percent of GDP in 1968 and grew rapidly to 5.4 percent of GDP by 1976. By 1985, they reached 6.4 percent of GDP. While Social Security stabilized as a percent of GDP during 1984–1998, ranging from 4.1 percent to 4.5 percent, the growth in other programmatic mandatory spending continued to outpace the growth in GDP through this period (apart from recession recovery periods) due largely to Medicare and Medicaid. These two programs, which were 1.2 percent of GDP in 1975, have more than quadrupled as a percent of GDP since then, reaching 5.0 percent in 2015. Spending for means-tested entitlements other than Medicaid was at 1.3 percent of GDP from 2003 through 2006, nearly the same as it had been thirty years before (1.2 percent), in 1976. The impact of the 2007 recession helped increase this percentage to 2.0 percent by 2010 and 2011, before the percentage again decreased to 1.8 percent of GDP by 2015.

By way of contrast, programmatic mandatory spending other than Social Security, Medicare, means-tested entitlements (which includes Medicaid), unemployment compensation, and deposit insurance had shrunk nearly in half as a percent of GDP between 1975 and 2008, falling from 3.1 percent in 1975 to no more than 1.7 during the 1989-2008 period. (Major programs in this grouping include Federal military and civilian employee and railroad retirement, farm price supports and veterans' compensation and readjustment benefits.) However, the large assistance provided to the financial sector in response to the financial crisis in the fall of 2008, along with the drop in GDP associated with the severe recession, caused this percentage to more than double in 2009, when it reached 3.1 percent of GDP, before dropping back to 1.1 percent of GDP in 2010. It subsequently increased to 2.0 percent by 2013, before dropping back to 1.1 percent by 2015. This assistance to the financial sector, along with the effects of the deepening recession, anti-recession spending enacted in the spring of 2009, and the spending from automatic stabilizers, such as unemployment assistance and other cyclically sensitive mandatory programs, combined to increase outlays for the entire programmatic mandatory category to 15.2 percent of GDP in

2009. This category has since fallen slightly and was 13.6 percent of GDP in 2015. By way of comparison, total discretionary spending in 2015 was 6.6 percent of GDP.

Additional perspectives on spending trends available in this document include spending by agency, by function and subfunction, and by composition of outlays categories, which include payments for individuals and grants to State and local governments.

SECTION NOTES

Notes on Section 1 (Overview of Federal Government Finances)

This section provides an overall perspective on total receipts, outlays (spending), and surpluses or deficits. Off-budget transactions, which consist of the Social Security trust funds and the Postal Service fund, and on-budget transactions, which equal the total minus the off-budget transactions, are shown separately. Tables 1.1 and 1.2 have similar structures; 1.1 shows the data in millions of dollars, while 1.2 shows the same data as percentages of the gross domestic product (GDP). For all the tables using GDP, fiscal year GDP is used to calculate percentages of GDP. The fiscal year GDP data are shown in Table 1.2. Additionally, Table 1.1 shows budget totals annually back to 1901 and for multi-year periods back to 1789.

Table 1.3 shows total Federal receipts, outlays, and surpluses or deficits in current and constant (Fiscal Year 2009) dollars, and as percentages of GDP. Section 6 provides a disaggregation of the constant dollar outlays.

Table 1.4 shows receipts, outlays, and surpluses or deficits for the consolidated budget by fund group. The budget is composed of two principal fund groups—Federal funds and trust funds. Normally, whenever data are shown by fund group, any payments from programs in one fund group to accounts of the other are shown as outlays of the paying fund and receipts of the collecting fund. When the two fund groups are aggregated to arrive at budget totals these interfund transactions are deducted from both receipts and outlays in order to arrive at transactions with the public. Table 1.4 displays receipts and outlays on a gross basis. That is, in contrast to normal budget practice, collections of interfund payments are included in the receipts totals rather than as offsets to outlays. These interfund collections are grossed-up to more closely approximate cash income and outgo of the fund groups.

Notes on Section 2 (Composition of Federal Government Receipts)

Section 2 provides historical information on on-budget and off-budget governmental receipts. Table 2.1 shows total receipts divided into five major categories; it also shows the split between on-budget and off-budget receipts. Table 2.2 shows the receipts by major category as percentages of total receipts, while Table 2.3 shows the same categories of receipts as percentages of GDP. Table 2.4 disaggregates two of the major receipts categories, social insurance and retirement receipts and excise taxes, and Table 2.5 disaggregates the “other receipts” category. While the focus of the section is on total Federal receipts, auxiliary data show the amounts of trust fund receipts in each category, so it is readily possible to distinguish the Federal fund and trust fund portions.

Notes on Section 3 (Federal Government Outlays by Function)

Section 3 displays Federal Government outlays (on-budget and off-budget) according to their functional classification. The functional structure divides the budget into 18 broad areas (functions) that provide a coherent and comprehensive basis for analysis. Each function, in turn, is divided into basic groupings of programs, called subfunctions. The structure has two categories—allowances and undistributed offsetting receipts—that are not truly functions but are required in order to cover the entire budget. At times a more summary presentation of functional data is needed; the data are arrayed by “superfunction” to satisfy this need. Table 3.1 provides outlays by superfunction and function while Table 3.2 shows outlays by function and subfunction.

In arraying data on a functional basis, budget authority and outlays are classified according to the primary purpose of the activity. To the extent feasible, this classification is made without regard to agency or organizational distinctions. Classifying each activity solely in the function defining its most important purpose—even though many activities serve more than one purpose—permits adding the budget authority and outlays of each function to obtain the budget totals. For example, Federal spending for Medicaid constitutes a health care program, but it also constitutes a form of income security benefits. However, the spending cannot be counted in both functions; since the main purpose of Medicaid is to finance the health care of the beneficiaries, this program is classified in the “health” function. Section 3 provides data on budget outlays by function, while Section 5 provides comparable data on budget authority.

Notes on Section 4 (Federal Government Outlays by Agency)

Section 4 displays Federal Government outlays (on- and off-budget) by agency. Table 4.1 shows the dollar amounts of such outlays and Table 4.2 shows the percentage distribution. The outlays by agency are based on the agency structure currently in effect. For example, the Department of Homeland Security was established by legislation enacted in 2002. However, these data show spending by the Department of Homeland Security in previous years that consists of spending attributable to predecessor agencies in earlier years, but now attributable to the Department of Homeland Security.

Notes on Section 5 (Budget Authority by Agency and by Subfunction)

Section 5 provides data on budget authority (BA). BA is the authority provided by law for agencies to obligate the Government to spend. Table 5.1 shows BA by function and subfunction, starting with 1976. Table 5.2 provides the same information by agency, and Table 5.3 provides a percentage distribution of BA by agency. Tables 5.4 and 5.5 provide the same displays as Tables 5.2 and 5.3, but for discretionary budget authority rather than total budget authority. Budget authority data are also provided by function in Table 5.6 for various discretionary program groupings. (Discretionary refers to the Budget Enforcement Act category that comprises programs subject to the annual appropriations process. See Chapter 9, “Budget Concepts,” of the *Analytical Perspectives* volume for more information.)

The data in these tables were compiled using the same methods used for the historical tables for receipts and outlays (e.g., to the extent feasible, changes in classification are reflected retroactively so the data show the same stream of transactions in the same location for all years). However, BA is heterogeneous in nature, varying in type from one program to another. As a result, it is not strictly additive—either across programs or agencies for a year or, in many cases, for an agency or program across a series of years—in the same sense that budget receipts and budget outlays are additive. The following are examples of different kinds of BA and the manner in which BA results in outlays:

- BA and outlays for each year may be exactly the same (e.g., interest on the public debt).
- For each year, the Congress may appropriate a large quantity of BA that will be spent over a subsequent period of years (e.g., many defense procurement contracts and major construction programs).
- Some BA (e.g., the salaries and expenses of an operating agency) is made available only for a year and any portion not obligated during that year lapses (i.e., it ceases to be available to be obligated).
- Revolving funds may operate spending programs indefinitely with no new infusion of BA, other than the authority to spend offsetting collections.
- BA may be enacted with the expectation it is unlikely ever to be used (e.g., standby borrowing authority).
- As a result of the Budget Enforcement Act of 1990, the measurement of BA changed in most special and trust funds with legislatively imposed limitations or benefit formulas that constrain the use of BA. Where previously budget authority was the total income to the fund, BA in these funds for 1990 and subsequent years is now an estimate of the obligations to be incurred during the fiscal year for benefit payments, administration, and other expenses of the fund. In some, but not all, cases it was possible to adjust BA figures for these funds for years prior to 1990 to conform to the current concepts.
- All income to a fund (e.g., certain revolving, special, and trust funds not subject to limitation or benefit formula) may be permanently appropriated as BA; as long as the fund has adequate resources, there is no further relationship between the BA and outlays.
- Although major changes in the way BA is measured for credit programs (beginning in 1992) result from the Federal Credit Reform Act, these tables could not be reconstructed to show revised BA figures for 1991 and prior years on the new basis. (This distinction between pre-1992 credit transactions and later ones also exists for outlays, which otherwise do not suffer from differences in type.)
- In its earliest years, the Federal Financing Bank (FFB) was conducted as a revolving fund, making direct loans to the public or purchasing loan assets from other funds or accounts. Each new loan by the FFB required new BA. In many cases, if the same loan were made by the account being serviced by the FFB, the loan could be financed from offsetting collections and no new BA would be recorded. Under terms of the 1985

legislation moving the FFB on-budget, the FFB ceased to make direct loans to the public. Instead, it makes loans to the accounts it services, and these accounts, in turn, make the loans to the public. Such loans could be made from new BA or other obligational authority available to the parent account. These tables have not been reconstructed to shift BA previously scored in the FFB to the parent accounts, because there is no technical way to reconfigure the data.

Despite these qualifications, there is a desire for historical data on BA, and this section has been developed to meet that desire.

Notes on Section 6 (Composition of Federal Government Outlays)

The “composition” categories in this section divide total outlays into national defense and nondefense components, and then disaggregate the nondefense spending into several parts:

- *Payments for individuals:* These are Federal Government spending programs designed to transfer income (in cash or in kind) to individuals or families. To the extent feasible, this category does not include reimbursements for current services rendered to the Government (e.g., salaries and interest). The payments may be in the form of cash paid directly to individuals or they may take the form of the provision of services or the payment of bills for activities generally financed from personal income. They include outlays for the provision of medical care (in veterans’ hospitals, for example) and for the payment of medical bills (e.g., Medicare). They also include subsidies to reduce the cost of housing below market rates and food and nutrition assistance (such as SNAP – formerly food stamps). The data base, while not precise, provides a reasonable perspective of the size and composition of income support transfers within any particular year and trends over time. Section 11 disaggregates the components of this category. The data in Section 6 show a significant amount of payments for individuals takes the form of grants to State and local governments to finance benefits for the ultimate recipients. These grants include Medicaid, some food and nutrition assistance, and a significant portion of the housing assistance payments. Sections 11 and 12 provide a more detailed disaggregation of this spending.
- *All other grants to State and local governments:* This category consists of the Federal nondefense grants to State and local governments other than grants defined as payments for individuals. Section 12 disaggregates this spending.
- *Net interest:* Most spending for net interest is paid to the public as interest on the Federal debt. As shown in Table 3.2, net interest includes, as an offset, significant amounts of interest income. Spending in this category is equal to net outlays in the budget function of the same name.
- *All other:* This category consists of all remaining Federal spending and offsetting receipts except for those included in the functional category “undistributed offsetting receipts.” It includes most Federal loan activities and most Federal spending for foreign assistance, farm price supports, medical and other scientific research, and, in general, Federal direct program operations.

- *Undistributed offsetting receipts:* These are offsetting receipts that are not offset against any specific agency or programmatic function. They are classified as function 950 in the functional tables. Additional details on their composition can be found at the end of Table 3.2.

Table 6.1 shows these outlays in current and constant dollars, the percentage distribution of current dollar outlays, and the current dollar outlays as percentages of GDP. The term “constant dollars” means the amounts of money that would have had to be spent in each year if, on average, the unit cost of everything purchased within that category each year (including purchases financed by income transfers, interest, etc.) were the same as in the base year (Fiscal Year 2009). The adjustments to constant dollars are made by applying a series of chain-weighted price indexes to the current dollar data base. The composite total outlays deflator is used to deflate current dollar receipts to produce the constant dollar receipts in Table 1.3. The separate composite deflators used for the various outlay categories are shown in Table 10.1.

Notes on Section 7 (Federal Debt)

This section provides information about Federal debt. Table 7.1 contains data on gross Federal debt and its major components in terms of both the amount of debt outstanding at the end of each year and that amount as a percentage of fiscal year GDP.

Gross Federal debt is composed both of Federal debt held (owned) by the public and Federal debt held by Federal Government accounts, which is mostly held by trust funds. Federal debt held by the public consists of all Federal debt held outside the Federal Government accounts. For example, it includes debt held by individuals, private banks and insurance companies, the Federal Reserve Banks, and foreign central banks. The sale (or repayment) of Federal debt to the public is the principal means of financing a Federal budget deficit (or disposing of a Federal budget surplus).

Table 7.1 divides debt held by the public between the amount held by the Federal Reserve Banks and the remainder. The Federal Reserve System is the central bank for the Nation. Their holdings of Federal debt are shown separately because they do not have the same impact on private credit markets as does other debt held by the public. They accumulate Federal debt as a result of their role as the country’s central bank, and the size of these holdings has a major impact on the Nation’s money supply. Since the Federal budget does not forecast Federal Reserve monetary policy, it does not project future changes in the amounts of Federal debt that will be held by the Federal Reserve Banks. Hence, the split of debt held by the public into that portion held by the Federal Reserve Banks and the remainder is provided only for past years. Table 2.5 shows deposits of earnings by the Federal Reserve System. Most interest paid by Treasury on debt held by the Federal Reserve Banks is returned to the Treasury as deposits of earnings, which are recorded as budget receipts.

As a result of a conceptual revision in the quantification of Federal debt, the data on debt held by the public and gross Federal debt—but only a small part of debt held by Government accounts—were revised back to 1956 in the 1990 Budget. The total revision was relatively small—a change of less than one percent of the recorded value of the debt—but

the revised basis is more consistent with the quantification of interest outlays, and provides a more meaningful measure of Federal debt. The change converted most debt held by the public from the par value to the sales price plus amortized discount.

Most debt held by Government accounts is issued at par, and securities issued at a premium or discount were formerly recorded at par. That portion of debt held by Government accounts that was not revised back to 1956 in the 1990 Budget was first recorded with an adjustment for any initial discount starting with debt issued in 1989. Zero-coupon bonds, however, are recorded at estimated market or redemption price.

Table 7.2 shows the end-of-year amounts of Federal debt subject to the general statutory limitation. It is recorded at par value (except for savings bonds) through 1988, but by law the basis was changed, in part, to accrual value for later years. Before World War I, each debt issue by the Government required specific authorization by the Congress. Starting in 1917, the nature of this limitation was modified in several steps until it developed into a limit on the total amount of Federal debt outstanding. The Treasury is free to borrow whatever amounts are needed up to the debt limit, which is changed from time to time to meet new requirements. Table 7.3 shows the ceiling at each point in time since 1940. It provides the specific legal citation, a short description of the change, and the amount of the limit specified by each Act. Most, but not all, of gross Federal debt is subject to the statutory limit. See Chapter 4, “Federal Borrowing and Debt,” of the *Analytical Perspectives* volume for more information.

Notes on Section 8 (Outlays by Budget Enforcement Act Category and Budget Authority for Discretionary Programs)

Section 8 is composed of eight tables that present outlays by the major categories used under the Budget Enforcement Act (BEA) and under previous budget agreements between Congress and previous Administrations. Table 8.1 shows Federal outlays within each of the categories and subcategories. The principal categories are outlays for mandatory and related programs and outlays for discretionary programs. (Discretionary budget authority is shown in Section 5; on an agency basis in Table 5.4 and Table 5.5 and on a functional basis in Table 5.6.) Mandatory and related programs include direct spending and offsetting receipts whose budget authority is determined by law other than appropriations acts. These include appropriated entitlements and SNAP (formerly the food stamp program), which receive pro forma appropriations. Discretionary programs are those whose budgetary resources (other than entitlement authority) are determined by annual appropriations acts. The table shows two major categories of discretionary programs: National Defense (Function 050) and Nondefense (all other discretionary programs). Table 8.2 has the same structure, but shows the data in constant (FY 2009) dollars. Table 8.3 shows the percentage distribution of outlays by BEA category and Table 8.4 shows outlays by BEA category as a percentage of GDP.

Tables 8.1 through 8.4 include a category called *Means-Tested Entitlements*. These programs include entitlement programs that limit benefits or payments based on the beneficiary’s income and/or assets. Also included are payments from refundable tax credits

that are phased out at certain income (generally, Adjusted Gross Income) levels. The programs currently categorized as Means-Tested Entitlements are:

- Funds for Strengthening Markets, Income, and Supply (section 32)
- SNAP (formerly the Food Stamp Program), including nutrition assistance for Puerto Rico
- Child Nutrition Programs, including the special milk program
- Student Financial Assistance (mostly Pell Grants)
- Grants to States for Medicaid
- Children's Health Insurance Program
- Child Enrollment Contingency Fund
- Payments to States for Child Support Enforcement and Family Support Programs
- Temporary Assistance for Needy Families (TANF)
- TANF Contingency Fund
- Payment Where Adoption Credit Exceeds Liability for Tax
- Payments to States for Foster Care and Adoption Assistance
- Child Care Entitlement to States
- Payment Where Recovery Rebate Exceeds Liability for Tax
- Payment Where Earned Income Credit Exceeds Liability for Tax
- Allotment for Puerto Rico EITC Payments
- Health insurance supplement to earned income credit
- Payment Where Child Credit Exceeds Liability for Tax
- Payment Where Credit to Aid First-Time Homebuyers Exceeds Liability for Tax
- Payment Where American Opportunity Credit Exceeds Liability for Tax
- Payment Where Making Work Pay Credit Exceeds Liability for Tax
- Supplemental Security Income Program (SSI)
- Recovery of Beneficiary Overpayments from SSI Program
- Veterans' Pensions benefits
- Refundable Premium Tax Credit and Reduced Cost Sharing Reductions
- Payment Where COBRA Credit Exceeds Liability for Tax

Table 8.5 provides additional detail by function or subfunction for mandatory and related programs. Table 8.6 shows the same data in constant dollars.

Table 8.7 provides additional detail by function and subfunction on outlays for discretionary programs. Table 8.8 provides the same data in constant dollars.

Notes on Section 9 (Federal Government Outlays for Major Physical Capital, Research and Development, and Education and Training)

Tables in this section provide a broad perspective on Federal Government outlays for investment in public physical capital, the conduct of research and development (R&D), and education and training. These data measure new Federal spending for major public physical assets, but they exclude major commodity inventories. In some cases it was necessary to use

supplementary data sources to estimate missing data in order to develop a consistent historical data series. The data for the conduct of research and development exclude outlays for construction and major equipment because such spending is included in outlays for physical capital.

Table 9.1 shows total investment outlays for major public physical capital, R&D, and education and training in current and constant (FY 2009) dollars, and shows the percentage distribution of outlays and outlays as a percentage of GDP. Table 9.2 focuses on direct Federal outlays and grants for major public physical capital investment in current and constant (FY 2009) dollars, disaggregating direct Federal outlays into national defense and nondefense capital investment. Table 9.3 retains the same structure as 9.2, but shows direct Federal outlay totals for physical capital investment as percentages of total outlays and as percentages of GDP. Table 9.4 disaggregates national defense direct outlays, while Table 9.5 disaggregates nondefense outlays for major public physical capital investment. Table 9.6 shows the composition of grant outlays for major public physical capital investment.

Table 9.7 provides an overall perspective on Federal Government outlays for the conduct of R&D. It shows total R&D spending and the split between national defense and nondefense spending in four forms: in current dollars, in constant dollars, as percentages of total outlays, and as percentages of GDP. Table 9.8 shows outlays in current dollars by major function and program.

Table 9.9 shows outlays for the conduct of education and training in current dollars for direct Federal programs and for grants to State and local governments. Total outlays for the conduct of education and training as a percentage of Federal outlays and in constant (FY 2009) dollars are also shown. As with the series on physical capital, several budget data sources have been used to develop a consistent data series extending back to 1962. A discontinuity occurs between 1991 and 1992 and affects primarily direct Federal higher education outlays. For 1991 and earlier, these data include net loan disbursements, repayments, and other transactions on a cash basis. Beginning in 1992, pursuant to changes in the treatment of loans as specified in the Federal Credit Reform Act of 1990, this series includes outlays for loan repayments and defaults for loans originated in 1991 and earlier, but credit subsidy outlays for loans originated in 1992 and later years.

Table 9.9 also excludes education and training outlays for physical capital (which are included in Table 9.7) and education and training outlays for the conduct of research and development (which are in Table 9.8). Also excluded are education and training programs for Federal civilian and military personnel.

Notes on Section 10 (Implicit Outlay Deflators)

Section 10 consists of Table 10.1, Gross Domestic Product and Deflators Used in the Historical Tables, which shows the various implicit deflators used to convert current dollar outlays to constant dollars. The constant dollar deflators are based on chain-weighted (FY 2009 chained-dollars) price indexes derived from the National Income and Product Accounts data.

Notes on Section 11 (Federal Government Payments for Individuals)

This section provides detail on outlays for Federal Government payments for individuals, which are also described in the notes on Section 6. The basic purpose of the payments for individuals aggregation is to provide a broad perspective on Federal cash or in-kind payments for which no current service is rendered, yet which constitutes income transfers to individuals and families. Table 11.1 provides an overview display of these data in four different forms. All four of these displays show the total payments for individuals, and the split of this total between grants to State and local governments for payments for individuals (such as Medicaid and grants for housing assistance) and all other (“direct”) payments for individuals.

Table 11.2 shows the functional composition of payments for individuals (see notes on Section 3 for a description of the functional classification), and includes the same grants versus nongrants (“direct”) split provided in Table 11.1. The off-budget Social Security program finances a significant portion of the Federal payments for individuals. These tables do not distinguish between the on-budget and off-budget payments for individuals. However, all payments for individuals shown in Table 11.2 in function 650 (Social Security), except for minor payment amounts associated with the 2009 Recovery Act (ARRA), are off-budget outlays, and all other payments for individuals are on-budget. Table 11.3 displays the payments for individuals by major program category.

Notes on Section 12 (Federal Grants To State and Local Governments)

For several decades the Federal budget documents have provided data on Federal grants to State and local governments. The purpose of these data is to identify Federal Government outlays that constitute income to State and local governments to help finance their services and their income transfers (payments for individuals) to the public. Grants generally exclude Federal Government payments for services rendered directly to the Federal Government; for example, they exclude most Federal Government payments for research and development, and they exclude payments to State social service agencies for screening disability insurance beneficiaries for the Federal disability insurance trust fund.

Table 12.1 provides an overall perspective on grants; its structure is similar to the structure of Table 11.1.

Table 12.2 displays Federal grants by function (see notes on Section 3 for a description of the functional classification). The bulk of Federal grants are included in the Federal funds group. However, since the creation of the highway trust fund in 1957, significant amounts of grants have been financed from trust funds. All Federal grants are on-budget. Wherever trust fund outlays are included in those data, Table 12.2 not only identifies the total grants by function but also shows the split between Federal funds and trust funds. See “Concepts Relevant to the Historical Tables” in this volume for more information on Federal funds and trust funds.

Table 12.3 provides data on grants at the account or program level, with an identification of the function, agency, and fund group of the payment.

Notes on Section 13 (Social Security and Medicare)

Table 13.1 displays the transactions of the Social Security and Medicare trust funds, including trust fund income, outgo, and balances, from their inception.

Over the past several decades the Social Security programs (the Federal old-age and survivors insurance (OASI) and the Federal disability insurance (DI) trust funds) and the Medicare programs (the Federal hospital insurance (HI) and the Federal supplementary medical insurance (SMI) trust funds) have grown to be among the largest parts of the Federal budget. Because of the size, the rates of growth, and the specialized financing of these programs, policy analysts frequently wish to identify these activities separately from all other Federal taxes and spending. As discussed in the introductory notes, the two Social Security funds are off-budget, while the Medicare funds are on-budget. As Table 13.1 shows, the first of these funds (OASI) began in 1937. The table shows the annual transactions of that fund and of the other funds beginning with their points of origin.

The table provides detailed information about Social Security and Medicare by fund. It shows total cash income (including offsetting receipts, but excluding any offsetting collections, which are offset within the expenditure accounts) by fund, separately identifying social insurance taxes and contributions, intragovernmental income, and proprietary receipts from the public. Virtually all of the proprietary receipts from the public, especially those for the SMI trust fund, are Medicare insurance premiums. The table shows the income, outgo, and surplus or deficit of each fund for each year, and also shows the balances of the funds available for future requirements. Most of these fund balances are invested in public debt securities and constitute a significant portion of the debt held by Government accounts (see Table 7.1).

The SMI fund, which was established in 1967, is financed primarily by payments from Federal funds and secondarily by medical insurance premiums (proprietary receipts from the public). The other three trust funds are financed primarily by dedicated social insurance taxes. The law establishing the rate and base of these taxes allocates the tax receipts among the three funds.

The table shows significant transfers by OASI and DI to the railroad retirement Social Security equivalent account. These transfers are equal to the additional amounts of money Social Security would have had to pay, less additional receipts it would have collected, if the rail labor force had been included directly under Social Security since the inception of the Social Security program.

In 1983, when the OASI fund ran short of money, Congress passed legislation that (a) provided for a one-time acceleration of military service credit payments to these trust funds, (b) provided for a Federal fund payment to OASI and DI for the estimated value of checks issued in prior years and charged to the trust funds but never cashed, (c) required that the Treasury make payments to OASI, DI, and HI on the first day of the month for the estimated amounts of their social insurance taxes to be collected over the course of each month (thereby increasing each affected trust fund's balances at the beginning of the month), and (d) subjected some Social Security benefits to Federal income or other taxes and provided for payments by Federal funds to Social Security of amounts equal to these

additional taxes. Additionally, in 1983 the OASI fund borrowed from the DI and HI funds (the tables show the amounts of such borrowing and repayments of borrowing). The large intragovernmental collections by OASI, DI, and HI in 1983 are a result of the transactions described under (a) and (b) above. Also starting in 1983, OASI began paying interest to DI and HI to reimburse them for the balances OASI borrowed from them; OASI, DI, and HI paid interest to Treasury to compensate it for the balances transferred to these funds on the first day of each month. The legal requirement for Treasury to make payments on the first day of the month, and the associated interest payment, ended in 1985 for HI and in 1991 for OASI and DI.

Notes on Section 14 (Total (Federal and State and Local) Government Finances)

Section 14 provides a perspective on the size and composition of total Government (Federal, State, and local) receipts and spending. Both the Bureau of the Census and the Bureau of Economic Analysis in the Commerce Department provide information (in the national income and product accounts (NIPA) data) on income and spending for all levels of government in the United States. The tables in this section include the NIPA State and local transactions with the Federal Government (deducting the amount of overlap due to Federal grants to State and local governments) to measure total Government receipts and spending on a fiscal year basis. The NIPA State and local government receipts and expenditures have been adjusted to be more comparable to the Federal unified budget receipts and outlays by using State and local government Total Expenditures, by including NIPA Capital Receipts from Estate and Gift taxes, and by displaying State and local interest receipts as an offset to State and local interest expenditures.

Notes on Section 15 (Federal Health Spending)

Section 15 consists of Table 15.1, Total Outlays for Health Programs. This table shows a broad definition of total Federal health spending by type of health program, including defense and veterans' health programs, Medicare, Medicaid, Federal employees' health benefits and other health spending. It also shows Federal health spending as percentages of total outlays and of GDP.

Notes on Section 16 (Executive Branch Civilian Employment)

Section 16 provides an overview of the size and scope of the Executive Branch Civilian work force. Federal employment in the Executive Branch is controlled on the basis of Full-Time Equivalent (FTE) employment, which is the measure of the total number of regular (non-overtime) hours worked by an employee divided by the number of compensable hours applicable to each fiscal year. A typical FTE workyear is equal to 2,087 hours. For example, one full-time employee counts as one FTE, and two employees who work half-time count as one FTE. FTE data have been collected for Executive Branch agencies since 1981.

The tables included in this section illustrate the size of the Executive Branch Civilian work force utilizing the FTE measures. Table 16.1 shows FTEs for the Executive Branch and

selected agencies for 1981 and subsequent years; Table 16.2 shows these FTEs as a percentage of total Executive Branch FTEs.

Tables showing end-strength employment are no longer included in the *Historical Tables*. However, these data are now available from the Office of Personnel Management's web site at: <http://www.opm.gov/feddata/HistoricalTables/index.asp>.

Table 1.1—SUMMARY OF RECEIPTS, OUTLAYS, AND SURPLUSES OR DEFICITS (-): 1789–2021

¹ Discretionary budget authority includes a placeholder for outyear Overseas Contingency Operations that includes some funding that would be categorized as national defense once the placeholder is allocated in the FY 2018 and subsequent Budgets. See the Allowances section of Table 5.1 for the amount of this placeholder.

² The budget authority totals in this table do not include the Allowance for Future Disaster Costs, which is not classified in either the discretionary or mandatory category. See Table 5.1 for the budget authority amounts for this allowance.

Note: Due to the effects of the Credit Reform Act of 1990 on the measurement and classification of Federal credit activities, the discretionary budget authority for these programs for years prior to 1992 is not strictly comparable to that for 1992 and beyond. Due to the effects of the Budget Enforcement Act of 1990 and subsequent comparable redefinitions on the measurement and classification as budget authority of the obligation limitations of certain special and trust funds, the discretionary budget authority for these programs for years prior to 1990 is not strictly comparable to that for 1990 and beyond.

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940–CURRENT

(Dollar amounts in billions)

Statute	Date	Description	Limit
54 Stat. 526	June 25, 1940	Amended sec. 21, adding new authority for issuance of \$4 billion National Defense Series obligations outstanding	49.0
55 Stat. 7	February 19, 1941	Amended sec. 21, eliminating authority for \$4 billion of National Defense Series obligations and increasing limitation to	65.0
56 Stat. 189	March 28, 1942	Amended sec. 21, increasing limitation to	125.0
57 Stat. 63	April 11, 1943	Amended sec. 21, increasing limitation to	210.0
58 Stat. 272	June 9, 1944	Amended sec. 21, increasing limitation to	260.0
59 Stat. 47	April 3, 1945	Amended sec. 21, including obligations guaranteed as to principal and interest by the United States and increasing limitation to	300.0
60 Stat. 316	June 26, 1946	Amended sec. 21, defining face amount of savings bonds to be current redemption value and decreasing limitation to	275.0
68 Stat. 895	August 28, 1954	Increasing sec. 21 limitation by \$6 billion during period beginning August 28, 1954, and ending June 30, 1955	281.0
69 Stat. 241	June 30, 1955	Amended act of August 28, 1954, extending increase in limitation until June 30, 1956	281.0
70 Stat. 519	July 9, 1956	Increased sec. 21 limitation by \$3 billion during period beginning July 1, 1956, and ending June 30, 1957	278.0
		Temporary increase terminated July 1, 1957, and limitation reverted to	275.0
72 Stat. 27	February 26, 1958	Increased sec. 21 limitation by \$5 billion during period beginning February 26, 1958, and ending June 30, 1959	280.0
72 Stat. 1758	September 2, 1958	Amended sec. 21, increasing limitation to \$283 billion, which with temporary increase of February 26, 1958 made limitation	288.0
73 Stat. 156	June 30, 1959	Amended sec. 21, increasing limitation to \$285 billion and increased sec. 21 limitation by \$10 billion during period beginning July 1, 1959, and ending June 30, 1960	295.0
74 Stat. 290	June 30, 1960	Increased sec. 21 limitation by \$8 billion during period beginning July 1, 1960, and ending June 30, 1961	293.0
75 Stat. 148	June 30, 1961	Increased sec. 21 limitation by \$13 billion during period beginning July 1, 1961, and ending June 30, 1962	298.0
76 Stat. 23	March 13, 1962	Increased sec. 21 limitation by \$2 billion (in addition to temporary increase of \$13 billion in act of June 30, 1961) during period beginning March 13, 1962, and ending June 30, 1962	300.0
76 Stat. 124	July 1, 1962	Increased sec. 21 limitation during the periods: (1) beginning July 1, 1962, and ending March 31, 1963, to	308.0
		(2) beginning April 1, 1963, and ending June 24, 1963, to	305.0
		(3) beginning June 25, 1963, and ending June 30, 1963, to	300.0
77 Stat. 50	May 29, 1963	Increased sec. 21 limitation during the periods: (1) beginning May 29, 1963, and ending June 30, 1963, to	307.0
		(2) beginning July 1, 1963, and ending August 31, 1963, to	309.0
77 Stat. 131	August 27, 1963	Increased sec. 21 limitation during the period beginning September 1, 1963, and ending November 30, 1963, to	309.0
77 Stat. 342	November 26, 1963	Increased sec. 21 limitation during the periods: (1) beginning December 1, 1963, and ending June 29, 1964, to	315.0
		(2) ending June 30, 1964, to	309.0
78 Stat. 225	June 29, 1964	Increased sec. 21 limitation during the period beginning June 29, 1964, and ending June 30, 1965, to	324.0
79 Stat. 172	June 24, 1965	Increased sec. 21 limitation during the period beginning July 1, 1965, and ending June 30, 1966, to	328.0
80 Stat. 221	June 24, 1966	Increased sec. 21 limitation during the period beginning July 1, 1966, and ending June 30, 1967, to	330.0
81 Stat. 4	March 2, 1967	Increased sec. 21 limitation during the period beginning March 2, 1967, and ending June 30, 1967, to	336.0
81 Stat. 99	June 30, 1967	Sec. 21 amended to increase limitation on aggregate outstanding at any time to Sec. 21 amended also to increase the limitation temporarily, beginning July 1, 1968, and each July 1 thereafter for the period beginning July 1 and ending June 29 of each succeeding calendar year by \$7 billion, providing an operating limitation of	358.0
83 Stat. 7	April 7, 1969	Amended sec. 21, increasing limitation to \$365 billion, and increased sec. 21 limitation by \$12 billion during period beginning April 7, 1969, and ending June 30, 1970	377.0
84 Stat. 368	June 30, 1970	Amended sec. 21, increasing limitation to \$380 billion, and increased sec. 21 limitation by \$15 billion during period beginning July 1, 1970, and ending June 30, 1971	395.0
85 Stat. 5	March 17, 1971	Amended sec. 21, increasing limitation to \$400 billion, and increased sec. 21 limitation by \$30 billion during period beginning March 17, 1971, and ending June 30, 1972	430.0
86 Stat. 63	March 15, 1972	Amended sec. 21, to further increase the limitation temporarily by \$20 billion during period beginning March 15, 1972, and ending June 30, 1972	450.0
86 Stat. 406	July 1, 1972	Amended act of March 15, 1972, striking out June 30, 1972, and inserting in lieu thereof October 31, 1972	450.0

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940–CURRENT—Continued

(Dollar amounts in billions)

Statute	Date	Description	Limit
86 Stat. 1324	October 27, 1972	Increased sec. 21 limitation during the period beginning November 1, 1972, and ending June 30, 1973	465.0
87 Stat. 134	July 1, 1973	Amended act of October 27, 1972, striking out June 30, 1973, and inserting in lieu thereof November 30, 1973	465.0
87 Stat. 691	December 3, 1973	Increased sec. 21 limitation during the period beginning December 3, 1973, and ending June 30, 1974	475.7
88 Stat. 285	June 30, 1974	Increased sec. 21 limitation during the period beginning June 30, 1974, and ending March 31, 1975	495.0
89 Stat. 5	February 19, 1975	Increased sec. 21 limitation during the period beginning February 19, 1975, and ending June 30, 1975	577.0
89 Stat. 246	June 30, 1975	Increased sec. 21 limitation during the period beginning June 30, 1975, and ending November 15, 1975	577.0
89 Stat. 693	November 14, 1975	Increased sec. 21 limitation during the period beginning November 14, 1975, and ending March 15, 1976	595.0
90 Stat. 217	March 15, 1976	Increased sec. 21 limitation during the period beginning March 15, 1976, and ending June 30, 1976	627.0
90 Stat. 793	June 30, 1976	Increased sec. 21 limitation during the periods: (1) beginning July 1, 1976, and ending September 30, 1976, to (2) beginning October 1, 1976, and ending March 31, 1977, to (3) beginning April 1, 1977, and ending September 30, 1977, to Temporary increase terminated October 1, 1977, and limitation reverted to	636.0 682.0 700.0 400.0
91 Stat. 1090	October 4, 1977	Increased sec. 21 limitation by \$352 billion during the period beginning October 4, 1977, and ending March 31, 1978	752.0
92 Stat. 185	March 27, 1978	Amended act of October 4, 1977, striking out March 31, 1978, and inserting in lieu thereof July 31, 1978	752.0
92 Stat. 419	August 3, 1978	Temporary increase terminated August 1, 1978, and limitation reverted to Increased sec. 21 limitation by \$398 billion during the period beginning August 3, 1978, and ending March 31, 1979 Temporary increase terminated April 1, 1979, and limitation reverted to	400.0 798.0 400.0
93 Stat. 8	April 2, 1979	Increased sec. 21 limitation by \$430 billion during the period beginning April 2, 1979, and ending September 30, 1979	830.0
93 Stat. 589	September 29, 1979	Increased sec. 21 limitation by \$479 billion during the period beginning September 29, 1979, and ending May 31, 1980	879.0
94 Stat. 421	May 30, 1980	Amended act of September 29, 1979, striking out May 31, 1980, and inserting in lieu thereof June 5, 1980	879.0
94 Stat. 439	June 6, 1980	Amended act of September 29, 1979, striking out June 5, 1980, and inserting in lieu thereof June 30, 1980	879.0
94 Stat. 598	June 28, 1980	Increased sec. 21 limitation by \$525 billion during the period beginning June 28, 1980, and ending February 28, 1981	925.0
94 Stat. 3261	December 19, 1980	Increased the total debt limit (composed of \$400.0 billion of permanent ceiling, \$535.1 billion of temporary ceiling) to	935.1
95 Stat. 4	February 7, 1981	Increased the temporary portion of the debt limit to \$585.0 billion through September 30, 1980, raising the total debt ceiling to	985.0
95 Stat. 955	September 30, 1981	Increased the temporary portion of the debt limit to \$599.8 billion for one day – September 30, 1981	999.8
95 Stat. 956	September 30, 1981	Increased the temporary portion of the debt limit to \$679.8 billion through September 30, 1982	1,079.8
96 Stat. 130	June 28, 1982	Increased the temporary portion of the debt limit to \$743.1 billion through September 30, 1982	1,143.1
96 Stat. 1156	September 30, 1982	Increased the temporary portion of the debt limit to \$890.2 billion through September 30, 1983	1,290.2
97 Stat. 196	May 26, 1983	Eliminated the distinction between permanent and temporary limit with the enactment of a single permanent limit. Raised the debt limit to	1,389.0
97 Stat. 1012	November 21, 1983	Increased the debt limit to	1,490.0
98 Stat. 217	May 25, 1984	Increased the debt limit to	1,520.0
98 Stat. 313	July 6, 1984	Increased the debt limit to	1,573.0
98 Stat. 2206	October 13, 1984	Increased the debt limit to	1,823.8
99 Stat. 814	November 14, 1985	Increased the debt limit temporarily through December 6, 1985, to	1,903.8
99 Stat. 1037	December 12, 1985	Increased the debt limit to	2,078.7
100 Stat. 818	August 21, 1986	Increased the debt limit to	2,111.0
100 Stat. 1968	October 21, 1986	Increased the debt limit temporarily through May 15, 1987, to	2,300.0
101 Stat. 308	May 15, 1987	Increased the debt limit temporarily through July 17, 1987, to	2,320.0
101 Stat. 542	July 30, 1987	Increased the debt limit temporarily through August 6, 1987, to	2,320.0
101 Stat. 550	August 10, 1987	Increased the debt limit temporarily through September 23, 1987, to	2,352.0
101 Stat. 754	September 29, 1987	Increased the debt limit to	2,800.0
103 Stat. 182	August 7, 1989	Increased the debt limit temporarily through October 31, 1989, to	2,870.0
103 Stat. 830	November 8, 1989	Increased the debt limit to	3,122.7

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940–CURRENT—Continued

(Dollar amounts in billions)

Statute	Date	Description	Limit
104 Stat. 403	August 9, 1990	Increased the debt limit temporarily through October 2, 1990, to	3,195.0
104 Stat. 878	October 2, 1990	Increased the debt limit temporarily through October 6, 1990, to	3,195.0
104 Stat. 897	October 9, 1990	Increased the debt limit temporarily through October 19, 1990, to	3,195.0
104 Stat. 1033	October 19, 1990	Increased the debt limit temporarily through October 24, 1990, to	3,195.0
104 Stat. 1078	October 25, 1990	Increased the debt limit temporarily through October 27, 1990, to	3,195.0
104 Stat. 1087	October 28, 1990	Increased the debt limit temporarily through November 5, 1990, to	3,230.0
104 Stat. 1388-560	November 5, 1990	Increased the debt limit to	4,145.0
107 Stat. 42	April 6, 1993	Increased the debt limit temporarily through September 30, 1993, to	4,370.0
107 Stat. 565	August 10, 1993	Increased the debt limit to	4,900.0
110 Stat. 55	February 8, 1996	Temporarily exempted from limit obligations in an amount equal to the monthly insurance benefits payable under Title II of the Social Security Act in March 1996, the exemption to expire on the earlier of an increase in the limit or March 15, 1996.	
110 Stat. 825	March 12, 1996	Temporarily exempted from limit (a) obligations in an amount equal to the monthly insurance benefits payable under Title II of the Social Security Act in March 1996 and (b) certain obligations issued to trust funds and other Federal Government accounts, both exemptions to expire on the earlier of an increase in the limit or March 30, 1996.	
110 Stat. 875	March 29, 1996	Increased the debt limit to	5,500.0
111 Stat. 648	August 5, 1997	Increased the debt limit to	5,950.0
116 Stat. 734	June 28, 2002	Increased the debt limit to	6,400.0
117 Stat. 710	May 27, 2003	Increased the debt limit to	7,384.0
118 Stat. 2337	November 19, 2004	Increased the debt limit to	8,184.0
120 Stat. 289	March 20, 2006	Increased the debt limit to	8,965.0
121 Stat. 988	September 29, 2007	Increased the debt limit to	9,815.0
122 Stat. 2908	July 30, 2008	Increased the debt limit to	10,615.0
122 Stat. 3790	October 3, 2008	Increased the debt limit to	11,315.0
123 Stat. 366	February 17, 2009	Increased the debt limit to	12,104.0
123 Stat. 3483	December 28, 2009	Increased the debt limit to	12,394.0
124 Stat. 8	February 12, 2010	Increased the debt limit to	14,294.0
125 Stat. 251	August 2, 2011	Increased the debt limit to	14,694.0
		Effective after September 21, 2011, increased the debt limit to	15,194.0
		Effective after January 27, 2012, increased the debt limit to	16,394.0
127 Stat. 51	February 4, 2013	Suspended the existing debt limit from February 4, 2013, through May 18, 2013, and prospectively increased the limit to accommodate the increase in such debt outstanding as of May 19, 2013. Effective May 19, 2013, reestablished the debt limit at	16,699.4
127 Stat. 566	October 17, 2013	Suspended the existing debt limit from October 17, 2013, through February 7, 2014, and prospectively increased the limit to accommodate the increase in such debt outstanding as of February 8, 2014. Effective February 8, 2014, reestablished the debt limit at	17,211.6
128 Stat. 1011	February 15, 2014	Suspended the existing debt limit from February 15, 2014, through March 15, 2015, and prospectively increased the limit to accommodate the increase in such debt outstanding as of March 16, 2015. Effective March 16, 2015, reestablished the debt limit at	18,113.0
129 Stat. 620	November 2, 2015	Suspended the existing debt limit from November 2, 2015, through March 15, 2017, and prospectively increased the limit to accommodate the increase in such debt outstanding as of March 16, 2017.

¹ Total Outlays includes an Allowance for Future Disaster Costs that is not displayed in the table by category. See the Allowances section of Table 3.2 for these amounts.

² Discretionary outlays include a placeholder for outyear Overseas Contingency Operations that includes some funding that would be categorized as national defense once the placeholder is allocated in the FY 2018 and subsequent Budgets. See the Allowances section of Table 3.2 for the amount of this placeholder.

³ See the Section Notes for Section 8 in the Historical Tables Introduction for a list of mandatory accounts classified as means-tested entitlements.

⁴ Including asset sales.

¹ Discretionary outlays include a placeholder for outyear Overseas Contingency Operations that includes some funding that would be categorized as national defense once the placeholder is allocated in the FY 2018 and subsequent Budgets. See the Allowances section of Table 3.2 for the amount of this placeholder.

Note: Due to the effects of the Credit Reform Act of 1990 on the measurement and classification of Federal credit activities, the discretionary outlays for years prior to 1992 are not strictly comparable to those for 1992 and beyond. However, the discretionary outlays shown for 1992 are no more than \$1 billion higher than they would have been if measured on the same (pre-credit reform) basis as the 1991 outlays.

¹ Discretionary outlays include a placeholder for outyear Overseas Contingency Operations that includes some funding that would be categorized as national defense once the placeholder is allocated in the FY 2018 and subsequent Budgets. See the Allowances section of Table 3.2 for the amount of this placeholder.

Note: Due to the effects of the Credit Reform Act of 1990 on the measurement and classification of Federal credit activities, the discretionary outlays for years prior to 1992 are not strictly comparable to those for 1992 and beyond. However, the discretionary outlays shown for 1992 are no more than \$1 billion higher (in nominal dollars) than they would have been if measured on the same (pre-credit reform) basis as the 1991 outlays.

Table 9.1—TOTAL INVESTMENT OUTLAYS FOR MAJOR PUBLIC PHYSICAL CAPITAL, RESEARCH AND DEVELOPMENT, AND EDUCATION AND TRAINING: 1962–2017

* \$500 thousand or less.

¹ Includes relatively small amounts for railroads.

² National Guard shelters and civil defense.

Note: Grants for 1940 totaled \$442 million, composed of \$165 million for highways and \$277 million for public works.

Table 9.7—SUMMARY OF OUTLAYS FOR THE CONDUCT OF RESEARCH AND DEVELOPMENT: 1949–2017

Note: Total outlays include off-budget outlays; however, all grant outlays are from on-budget accounts. Grants that are both payments for individuals and capital investment are shown under capital investment. In this table, capital investment is used as shorthand for Major Public Physical Capital Investment.

Table 12.2—TOTAL OUTLAYS FOR GRANTS TO STATE AND LOCAL GOVERNMENTS BY FUNCTION AND FUND GROUP: 1940–2021

(in millions of dollars)

See footnotes at end of table.

* \$500 thousand or less.

¹ In 1983, includes \$329.3 million loss on sale of securities.

² Starting in 1983, includes amounts from Postal Service.

³ For 1989 and 1990, includes transactions and balances of the HI and SMI Catastrophic Insurance trust funds, which began in 1989 and were abolished in 1990.

⁴ For years after 1986, SMI receipts for kidney dialysis. For years after 2004, includes Medicare refunds, which were shown as offsets to cash outgo in years prior to 2005.

⁵ For years after 2017, outlays for "Beneficiary Services and other" are included in the "Benefit Payments" line.

⁶ For years after 2017, outlays in the "Other" line are included in the "Benefit Payments" line.

Note: Offsetting collections from Federal sources that are credited to the Old Age and Survivors insurance (OASI) account and to the Supplementary Medical insurance (SMI) account are treated as offsets to cash outgo rather than as cash income. As a result, the partial transfer to SMI of Hospital Insurance (HI) home health is shown as benefit payments under HI rather than SMI. Similarly, transfers to Medicaid for payment of SMI premiums, which began in 2001, are shown as benefits under SMI.
