

BUDGET OF THE
UNITED STATES
GOVERNMENT

HISTORICAL TABLES

Fiscal Year 1995

THE BUDGET DOCUMENTS

Budget of the United States Government, Fiscal Year 1995 contains the Budget Message of the President and presents the President's budget proposals.

Analytical Perspectives, Budget of the United States Government, Fiscal Year 1995 contains analyses that are designed to highlight specified program areas or provide other significant presentations of budget data that place the budget in perspective.

It includes economic and accounting analyses, such as a balance sheet-type presentation; information on Federal receipts and collections, including user fees and tax expenditures; analyses of Federal spending; detailed information on Federal borrowing and debt; the Budget Enforcement Act preview report; current services estimates; and other technical presentation, such as the national income and product accounts.

It also includes information on management improvements; the budget system and concepts; a listing of the Federal programs by agency and account; and a glossary of budget terms.

Historical Tables, Budget of the United States Government, Fiscal Year 1995 provides data on budget receipts, outlays, surpluses or deficits, and Federal debt covering an extended time period—in many cases beginning in fiscal year 1940 and ending in fiscal year 1999. These are much longer time periods than those covered by similar tables in other budget documents. The data in this volume and all other historical data

in the budget documents are consistent with the concepts and presentation used in the 1995 Budget, so the data series are comparable over time.

Budget of the United States Government, Fiscal Year 1995—Appendix contains detailed information on the various appropriations and funds that constitute the budget. The Appendix contains more detailed information than any of the other budget documents. It includes for each agency: the proposed text of appropriation language, budget schedules for each account, new legislative proposals, explanations of the work to be performed and the funds needed, and proposed general provisions applicable to the appropriations of entire agencies or group of agencies. Supplemental and rescission proposals for the current year are presented separately. Information is also provided on certain activities whose outlays are not part of the budget totals.

Automated Sources of Budget Information. Copies of the budget number data in electronic form may be obtained from the U.S. Department of Commerce, National Technical Information Service, Springfield, VA 22161, telephone (703) 487-4650. Refer to stock number PB94-500030. Historical budget information is available on compact disk (CD) from the U.S. Department of Commerce, Office of Business Analysis, HCHB Room 4885, Washington, D.C. 20230, telephone (202) 482-1986. Refer to the National Economic, Social, and Environmental Data Bank (NESE-DB). There is a charge for both of these items.

GENERAL NOTES

1. All years referred to are fiscal years, unless otherwise noted.
2. Detail in this document may not add to the totals due to rounding.

HISTORICAL TABLES

INTRODUCTION

Historical Tables provides budget users with a wide range of data on Federal Government finances. In many cases, the data cover all years from 1940 to the presidential policy estimates through 1999. Additionally, Section 1 provides data on receipts, outlays, and surpluses or deficits for 1934–1939 and for earlier multi-year periods.

Structure

This document is composed of 15 sections, each of which has one or more tables. Each section covers a common theme. Section 1, for example, provides an overview of the budget and off-budget totals; Section 2 provides tables on receipts by source; and Section 3 shows outlays by function. The purpose of this set of tables is to present a broad range of historical budgetary data in one convenient reference source and to provide relevant comparisons most likely to be of assistance. The most common comparisons are in terms of proportions (e.g., each major receipt category as a percentage of total receipts and of the gross domestic product).

Section notes explain the nature of the activities covered by the tables in each section. The first time any new budget concept is introduced, the notes provide a nontechnical definition of the concept. Whenever it appears that some additional descriptive information would be useful, this information is also included. Explanations are generally not repeated, but there are occasional cross-references to related materials. When a section contains several tables, the general rule is to start with tables showing the broadest overview data and then work down to more detailed tables.

Because of the numerous changes in the way budget data have been presented over time, there are inevitable difficulties in trying to produce comparable data to cover many years. The general rule underlying all of

these tables is to provide data in as meaningful and comparable a fashion as possible. To the extent feasible, the data are presented on a basis consistent with current budget concepts. When a structural change is made, insofar as possible the data are adjusted for all years.

In November 1990, the Omnibus Budget Reconciliation Act of 1990 was enacted. Part of this legislation was the Budget Enforcement Act, which not only provided new enforcement mechanisms, but also included significant changes in budget concepts. The major conceptual change concerns the measurement of Federal credit activity in the budget. Under current law, only the subsidy cost (the cost to the Government, including the cost associated with loan defaults) of direct loans and loan guarantees is recorded as budget authority and outlays. The remaining financial transactions of credit programs are recorded as means of financing the deficit. This concept applies only to direct loan obligations and loan guarantee commitments made in 1992 and later years. Unfortunately, the data for credit programs prior to 1992 could not be converted to this subsidy cost measurement basis. Thus, data prior to 1992 are on a cash flow or pre-credit reform basis. Data for 1992 and beyond are on a cash flow basis for direct loans and loan guarantees obligated or committed in earlier years, but the budget program accounts providing direct loans or loan guarantees reflect the subsidy cost for subsequent obligations and commitments.

The Budget Enforcement Act also changed the concept of budget authority for most special and trust funds starting with 1992 data. These changes are discussed in the Notes to Section 5 below.

Coverage

The Federal Government has used the unified or consolidated budget concept as

the foundation for its budgetary analysis and presentation since the 1969 budget. The basic guidelines for the unified budget were presented in the *Report of the President's Commission on Budget Concepts* (October 1967). The Commission recommended the budget include all Federal fiscal activities unless there were exceptionally persuasive reasons for exclusion. Nevertheless, from the very beginning some programs were perceived as warranting special treatment. Indeed, the Commission itself recommended a bifurcated presentation: a "unified budget" composed of an "expenditure account" and a "loan account." The distinction between the expenditure account and the loan account proved to be confusing and caused considerable complication in the budget for little benefit. As a result, this distinction was eliminated starting with the 1974 budget. However, even prior to the 1974 budget, the Export-Import Bank had been excluded by law from the budget totals, and other exclusions followed. The structure of the budget was gradually revised to show the off-budget transactions in many locations along with the on-budget transactions, and the off-budget amounts were added to the on-budget amounts in order to show total Federal spending.

The Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) repealed the off-budget status of all then existing off-budget entities, but it included a provision immediately moving the Federal old-age, survivors, and disability insurance funds (collectively known as social security) off-budget. To provide a consistent time series, the budget historical data show social security off-budget for all years since its inception, and show all formerly off-budget entities on-budget for all years. Subsequent law (OBRA 1989) moved the Postal Service fund off-budget, starting in fiscal year 1989. Prior to that year, the Postal Service fund is shown on-budget.

Though social security and the Postal Service are now off-budget, they continue to be Federal programs. Indeed, social security currently accounts for around one-fourth of all Federal receipts and one-fifth of all Federal spending. Hence, the budget documents include these funds and focus on the Federal totals that combine the on-budget and off-

budget amounts. Various budget tables and charts show total Federal receipts, outlays, and surpluses and deficits, and divide these totals between the portions that are off-budget and the remainder of Federal transactions, all of which are on-budget.

Changes in Historical Outlays and Deficit

The outlay, receipt and deficit totals for 1992 have changed from those published in the Mid-Session Review of the 1994 budget. Receipts are lower by \$9 million, outlays are lower by \$48 million, and the deficit is lower by \$39 million. These changes correct errors of various agencies in reporting actual spending to the Treasury Department.

Note on the Fiscal Year

The Federal fiscal year begins on October 1 and ends on the subsequent September 30. It is designated by the year in which it ends; for example, fiscal year 1993 began on October 1, 1992, and ended on September 30, 1993. Prior to fiscal year 1977 the Federal fiscal years began on July 1 and ended on June 30. In calendar year 1976 the July-September period was a separate accounting period (known as the transition quarter or TQ) to bridge the period required to shift to the new fiscal year.

Concepts Relevant to the Historical Tables

Budget (or "on-budget") receipts constitute the income side of the budget; they are composed almost entirely of taxes or other compulsory payments to the Government. Any income from business-type activities (e.g., interest income or sale of electric power), and any income by Government accounts arising from payments by other Government accounts is offset in computing *budget outlays* (spending). This method of accounting permits users to easily identify the size and trends in Federal taxes and other compulsory income, and in Federal spending financed from taxes, other compulsory income, or borrowing. *Budget surplus* refers to any excess of budget receipts over budget outlays, while *budget deficit*

refers to any excess of budget outlays over budget receipts.

The terms *off-budget receipts*, *off-budget outlays*, *off-budget surpluses*, and *off-budget deficits* refer to similar categories for off-budget activities. The sum of the on-budget and off-budget transactions constitute the consolidated or total Federal Government transactions.

The budget is divided between two fund groups, Federal funds and trust funds. The Federal funds grouping includes all receipts and outlays not specified by law as being trust funds. All Federal funds are on-budget except for the Postal Service fund starting with fiscal year 1989. All trust funds are on-budget, except that, as explained in the general notes above, the two social security retirement trust funds are shown off-budget for all years.

The term *trust fund* as used in Federal budget accounting is frequently misunderstood. In the private sector, "trust" refers to funds of one party held by a second party (the trustee) in a fiduciary capacity. In the Federal budget, the term "trust fund" means only that the law requires the funds be accounted for separately and used only for specified purposes and that the account in which the funds are deposited is designated as a "trust fund." A change in law may change the future receipts and the terms under which the fund's resources are spent. The determining factor as to whether a particular fund is designated as a "Federal" fund or "trust" fund is the law governing the fund.

The largest trust funds are for retirement and social insurance (e.g., civil service and military retirement, social security, medicare, and unemployment benefits). They are financed largely by social insurance taxes and contributions and payments from the general fund (the main component of Federal funds). However, there are also major trust funds for transportation (highway and airport and airways) and for other programs financed in whole or in part by *user charges*.

The budget documents do not separately show user charges. Frequently there is confusion between the concept of user charges and the concept of offsetting collections. User

charges are charges for services rendered. Such charges may take the form of taxes (budget receipts), such as highway excise taxes used to finance the highway trust fund. They may also take the form of business-type charges, in which case they are offsetting collections—offset against budget outlays rather than being recorded as budget receipts. Examples of such charges are the proceeds from the sale of electric power by the Tennessee Valley Authority and medical insurance premiums paid to the supplementary medical insurance trust fund. User charges may go to the general fund of the Treasury or they may be "earmarked". If the funds are earmarked, it means the collections are separately identified and used for a specified purpose—they are not commingled (in an accounting sense) with any other money. This does not mean the money is actually kept in a separate bank account. All money in the Treasury is merged for efficient cash management. However, any earmarked funds are accounted for in such a way that the balances are always identifiable and available for the stipulated purposes.

Notes on Section 1 (Overview of Federal Government Finances)

This section provides an overall perspective on total receipts, outlays (spending), and surpluses or deficits, the on-budget and off-budget amounts are also separately shown. Tables 1.1 and 1.2 have identical structures; 1.1 shows the data in millions of dollars, while 1.2 shows the same data as percentages of the gross domestic product (GDP). For all the historical tables, fiscal year GDP is used to calculate percentages of GDP. The fiscal year GDP data are shown in Table 1.2.

Table 1.3 shows total Federal receipts, outlays, and surpluses or deficits in current and constant dollars, and as percentages of GDP. Table 6.1 provides a disaggregation of the constant dollar outlays.

Table 1.4 shows receipts, outlays and surpluses or deficits for the consolidated budget by fund group. The budget is composed of two principal fund groups—Federal funds and trust funds. Normally, whenever data are shown by fund group, any payments

from programs in one fund group to accounts of the other are shown as outlays of the paying fund and receipts of the collecting fund. When the two fund groups are aggregated to arrive at budget totals these interfund transactions are deducted from both receipts and outlays in order to arrive at transactions with the public. Table 1.4 displays receipts and outlays on a gross basis. That is, in contrast to normal budget practice, collections of interfund payments are included in the receipts totals rather than as offsets to outlays. These interfund collections are grossed-up to more closely approximate cash income and outgo of the fund groups.

Notes on Section 2 (Composition of Federal Government Receipts)

Section 2 provides historical information on on-budget and off-budget receipts. Table 2.1 shows total receipts divided into five major categories; it also shows the split between on-budget and off-budget receipts. Table 2.2 shows the receipts by major category as percentages of total receipts, while Table 2.3 shows the same categories of receipts as percentages of GDP. Table 2.4 disaggregates two of the major receipts categories, social insurance taxes and contributions and excise taxes, and Table 2.5 disaggregates the "other receipts" category. While the focus of the section is on total Federal receipts, auxiliary data show the amounts of trust fund money in each category, so it is possible to readily distinguish the Federal fund and trust fund portions.

Notes on Section 3 (Federal Government Outlays by Function)

Section 3 displays Federal Government outlays (on-budget and off-budget) according to their functional classification. The functional structure is divided into 18 broad areas (functions) that provide a coherent and comprehensive basis for analyzing the budget. Each function, in turn, is divided into basic groupings of programs entitled subfunctions. The structure has two categories—allowances and undistributed offsetting receipts—that are not truly functions but are required in order to cover the entire budget. At times a more summary presentation of functional data is

needed; the data by "superfunction" is produced to satisfy this need. Table 3.1 provides outlays by superfunction and function while Table 3.2 shows outlays by function and subfunction.

No major changes have been made in the functional structure since last year's document. However, the subfunction structure for the International affairs function has been modified (for 1995 and beyond) to combine into a new subfunction, 156 (International cooperation), the activities formerly contained in subfunctions 151 (International development and humanitarian assistance) and 152 (International security assistance). This was done to better reflect the post Cold War purposes of foreign aid.

In arraying data on a functional basis, budget authority and outlays are classified according to the primary purpose of the activity. To the extent feasible, this classification is made without regard to agency or organizational distinctions. Classifying each activity solely in the function defining its most important purpose—even though many activities serve more than one purpose—permits adding the budget authority and outlays of each function to obtain the budget totals. For example, Federal spending for Medicaid constitutes a health care program, but it also constitutes a form of income security benefits. However, the spending cannot be counted in both functions; since the main purpose of Medicaid is to finance the health care of the beneficiaries, this program is classified in the "health" function. Section 3 provides data on budget outlays by function, while Section 5 provides comparable data on budget authority.

Notes on Section 4 (Federal Government Outlays by Agency)

Section 4 displays Federal Government outlays (on- and off-budget) by agency. Table 4.1 shows the dollar amounts of such outlays, and Table 4.2 shows the percentage distribution. The outlays by agency are based upon the agency structure currently in effect. For example, the Department of Education was established by legislation enacted in 1979. However, these data show the Department of Education spending for all years, including

education spending that was in other agencies in earlier years.

Notes on Section 5 (Budget Authority—On- and Off-Budget)

Section 5 provides data on budget authority (BA). BA is the authority provided by law for agencies to obligate the Government to spend. Table 5.1 shows BA by function and subfunction, starting with 1976. Table 5.2 provides the same information by agency, and Table 5.3 provides a percentage distribution of BA by agency.

The data in these tables were compiled using the same methods used for the budget historical tables for receipts and outlays (i.e., to the extent feasible, changes in classification are reflected retroactively so the data show the same stream of transactions in the same location for all years). However, BA is heterogeneous in nature, varying significantly from one program to another. As a result, it is not additive—either across programs or agencies for a year or, in many cases, for an agency or program across a series of years—in the same sense that budget receipts and budget outlays are additive. The following are examples of different kinds of BA and the manner in which there are large divergences between the creation and use of BA.

- BA and outlays for each year may be exactly the same (e.g., interest on the public debt).
- All income to a fund (e.g., certain trust funds) may be permanently appropriated as BA; as long as the fund has adequate resources, there is no further relationship between the BA and outlays.
- For each year the Congress may appropriate a large quantity of BA that will be spent over a subsequent period of years (e.g., many defense procurement contracts and major construction programs).
- Some BA (e.g., the salaries and expenses of an operating agency) is made available only for a year and any portion not obligated during that year lapses (i.e., it ceases to be available to be obligated).

- Revolving funds may operate spending programs indefinitely with no new infusion of BA, other than the authority to spend offsetting collections.
- BA may be enacted with the expectation it is unlikely ever to be used (e.g., standby borrowing authority).
- In its earliest years, the Federal Financing Bank (FFB) was conducted as a revolving fund, making direct loans to the public or purchasing loan assets from other funds or accounts. Each new loan by the FFB required new BA. In many cases, if the same loan were made by the account being serviced by the FFB, the loan could be financed from offsetting collections and no new BA would be recorded. Under terms of the 1985 legislation moving the FFB on-budget, the FFB ceased to make direct loans to the public. Instead, it makes loans to the accounts it services, and these accounts, in turn, make the loans to the public. Such loans could be made from new BA or other obligational authority available to the parent account. These tables have not been reconstructed to shift BA previously scored in the FFB to the parent accounts, because there is no technical way to reconfigure the data.
- Although major changes in the way BA is measured for credit programs (beginning in 1992) result from the Budget Enforcement Act, these tables could not be reconstructed to show revised BA figures for 1991 and prior years on the new basis.
- Beginning in 1992, the measurement of BA changed in most special and trust funds with legislatively imposed limitations or benefit formulas that constrain the use of BA. Where previously budget authority was the total income to the fund, BA in these funds for 1992 and subsequent years is an estimate of the obligations to be incurred during the fiscal year for benefit payments, administration and other expenses of the fund.

As a result of the diverse nature of BA, it is difficult to conceptualize what the BA total means for a single year, or to determine the significance of a change in total BA from one year to the next. Sometimes it

is meaningful to compare the BA for one function or subfunction with that for another function or subfunction, but often it is not. It is also generally not meaningful to compare BA for a particular function or subfunction with total BA. Additionally, since some BA lapses without being used and some BA is standby and never used, it is impossible to add the BA for a period of years in a meaningful manner in the same sense that receipts or outlays can be added over a period of years.

Despite these qualifications and drawbacks, there is a desire for historical data on BA, and this section has been developed to meet that desire. Budget authority data are also provided in Table 8.9 for various discretionary program groupings.

Notes on Section 6 (Composition of Federal Government Outlays)

The "composition" categories in this section divide total outlays (including social security) into national defense and nondefense components, and then disaggregate the nondefense spending into several parts:

- *Payments for individuals:* These are Federal Government spending programs designed to transfer income (in cash or in kind) to individuals or families. To the extent feasible, this category does not include reimbursements for current services rendered (e.g., salaries and interest). The payments may be in the form of cash paid directly to individuals or they may take the form of the provision of services or the payment of bills for activities largely financed from personal income. They include outlays for the provision of medical care (in veterans hospitals, for example) and for the payment of medical bills (e.g., medicare). They also include subsidies to reduce the cost of housing below market rates, and food and nutrition assistance (such as food stamps). The data base, while not precise, provides a reasonable perspective of the size and composition of income support transfers within any particular year and trends over time. Section 11 disaggregates the components of this category. The data in Section 6 show a significant amount of payments for indi-

viduals takes the form of grants to State and local governments to finance benefits for the ultimate recipients. These grants include medicaid, some food and nutrition assistance, and a significant portion of the housing assistance payments. Sections 11 and 12 provide a more detailed disaggregation of this spending.

- *All other grants to State and local governments:* This category is composed of the Federal nondefense grants to State and local governments other than grants defined as payments for individuals. Section 12 disaggregates this spending.
- *Net interest:* This category is composed of all spending (including offsetting receipts) included in the functional category "net interest." Most spending for net interest is paid to the public as interest on the Federal debt. As shown in Table 3.2, net interest includes, as an offset, significant amounts of interest income.
- *All other:* This category is composed of all remaining Federal spending and offsetting receipts except for the offsetting receipts included in the category "undistributed offsetting receipts." It includes most Federal loan activities and most Federal spending for foreign assistance, farm price supports, medical and other scientific research, and, in general, Federal direct program operations.
- *Undistributed offsetting receipts:* These are offsetting receipts that are not offset against any specific agency or programmatic function. They are classified as function 950 in the functional tables. Additional details on their composition can be found at the end of Table 3.2.

Table 6.1 shows these outlays in current and constant dollars, the percentage distribution of current dollar outlays, and the current dollar outlays as percentages of GDP. The term "constant dollars" means the amounts of money that would have had to be spent in each year if, on average, the unit cost of everything purchased within that category each year (including purchases financed by income transfers, interest, etc.) were the same as in the base year (1987). The adjustments to constant dollars are made by applying

a series of price deflators to the current dollar data base. The composite deflator is used to produce estimates of constant dollar receipts, and is published in Table 1.3. The separate deflators used for these calculations are not published, but are available upon request. Requests should be sent to Historical Tables, Office of Management and Budget, Room 6025, NEOB, Washington, DC 20503.

Notes on Section 7 (Federal Debt)

This section provides information about Federal debt. Table 7.1 contains data on gross Federal debt and its major components in terms of both the amount of debt outstanding at the end of each year and that amount as a percentage of fiscal year GDP. Gross Federal debt is the broadest measure of Federal debt commonly used. It is composed both of Federal debt held (owned) by the public and Federal debt held by Federal Government accounts. The largest Federal Government accounts holding Federal debt securities are the civil service and military retirement, social security, and medicare trust funds. However, significant amounts are also held by some other Government accounts, such as the unemployment and highway trust funds.

Federal debt held by the public is gross Federal debt not held by Federal Government accounts. For example, it includes debt held by individuals, private banks and insurance companies, the Federal Reserve Banks, and foreign central banks.

Table 7.1 divides debt held by the public between the amount held by the Federal Reserve Banks and the remainder. The Federal Reserve Banks are the central banking system for the Nation. Those data are shown separately because holdings of Federal debt by the Federal Reserve Banks do not have the same impact on private credit markets as other debt held by the public. Their holdings of Federal debt arise from their role as the country's central bank, and the size of these holdings has a major impact on the Nation's money supply. Since the Federal budget does not forecast Federal Reserve monetary policy, it does not project future changes in the amounts of Federal debt that will be held by the Federal Reserve

Banks. Hence, the split of debt held by the public into that portion held by the Federal Reserve Banks and the remainder is provided only for past years. Table 2.5 shows deposits of earnings by the Federal Reserve System. Most interest paid by Treasury on debt held by the Federal Reserve Banks is returned to the Treasury as deposits of earnings, which are counted as budget receipts.

As a result of a conceptual revision in the quantification of Federal debt, the data on debt held by the public and gross Federal debt—but only a small part of debt held by Government accounts—were revised back to 1956 in the 1990 budget. The total revision was relatively small—a change of under one percent of the recorded value of the debt—but the revised basis is more consistent with the quantification of interest outlays, and provides a more meaningful measure of Federal debt. The change converted most debt held by the public from the par value to the sales price plus amortized discount.

Most debt held by Government accounts is issued at par, and securities issued at a premium or discount have traditionally been recorded at par. However, zero-coupon bonds are recorded at estimated market price. Beginning in the 1995 budget, total debt held by Government accounts is adjusted for any initial discount on other securities. The series has been retroactively revised back to 1989.

Table 7.2 shows the end-of-year amounts of Federal debt subject to the general statutory limitation. It is recorded at par value (except for savings bonds) through 1988, but by law the basis was changed, in part, to accrual value for later years. Before World War I, each debt issue by the Government required specific authorization by the Congress. Starting in 1917, the nature of this limitation was modified in several steps until it developed into a limit on the total amount of Federal debt outstanding. The Treasury is free to borrow whatever amounts are needed up to the debt limit, which is changed from time to time to meet new requirements. Table 7.3 shows the ceiling at each point in time since 1940. It provides the specific legal citation, a short description of the

change, and the amount of the limit specified by each Act. Most of gross Federal debt is subject to the statutory limit. However, there are some differences.

Notes on Section 8 (Outlays by Budget Enforcement Act Category)

Section 8 is composed of nine tables that present budget authority and outlays by the major categories used under the Budget Enforcement Act (BEA) and under previous budget agreements between Congress and the current and previous Administrations. Table 8.1 shows Federal outlays within each of the categories and subcategories. The principal categories are outlays for mandatory and related programs and outlays for discretionary programs. Mandatory and related programs include direct spending and offsetting receipts whose budget authority is provided by law other than appropriations Acts. These include appropriated entitlements and the food stamp program, which receive pro forma appropriations. Table 8.2 has the same structure, but shows the data in constant (FY 1987) dollars. Table 8.3 shows the percentage distribution of outlays by BEA category and Table 8.4 shows outlays by BEA category as a percentage of GDP.

Table 8.5 provides additional detail by function and/or subfunction for mandatory and related programs. Table 8.6 shows the same data in constant dollars.

Discretionary programs are those whose budgetary resources (other than entitlement authority) are provided in appropriations Acts. The BEA defines three categories of discretionary programs: Defense (Function 050), International (Function 150), and Domestic (all other discretionary programs). Table 8.7 provides additional detail by function and/or subfunction on outlays for discretionary programs. Table 8.8 provides the same data in constant dollars. Table 8.9 provides function and/or subfunction detail on budget authority for discretionary programs.

Notes on Section 9 (Federal Government Outlays for Major Physical Capital)

The tables in this section provide a broad perspective on Federal Government outlays

for public physical capital. These data measure new Federal spending for major public physical assets, but they exclude major commodity inventories. In some cases it was necessary to use supplementary data sources to estimate missing data in order to develop a consistent historical data series.

Table 9.1 shows direct Federal and grant outlays for major public physical capital investment in current and constant (FY 1987) dollars. Direct Federal outlays are further disaggregated into capital investment for national defense and nondefense capital investment. Table 9.2 has the same structure but shows the percentage distribution of outlays and the outlays as a percentage of GDP.

Table 9.3 disaggregates national defense direct outlays for major public physical capital investment. Table 9.4 disaggregates non-defense direct outlays. Table 9.5 shows the composition of grant outlays for major public physical capital investment.

Table 9.6 provides total outlays for major public physical capital investment in constant (FY 1987) dollars. Direct outlays and grant outlays are shown with further disaggregations of each category.

Notes on Section 10 (Federal Government Outlays for the Conduct of Research and Development and for the Conduct of Education and Training)

Section 10 provides data showing Federal Government outlays for the conduct of research and development (R&D) and the conduct of education and training. The data for the conduct of R&D exclude outlays for construction and major equipment for R&D, because such spending is included in outlays for physical capital (Section 9). Table 10.1 provides an overall perspective on Federal Government outlays for the conduct of R&D. It shows total spending and the split between national defense and nondefense spending in four forms: in current dollars, in constant dollars, as percentages of total outlays, and as percentages of GDP. Table 10.2 shows the outlays in current dollars by major function and program.

Table 10.3 shows outlays for the conduct of education and training in current dollars for direct Federal programs and for grants to State and local governments. In each of these two categories, outlays are shown by subfunction. Total outlays for the conduct of education and training as a percentage of total Federal outlays and in constant FY 1987 dollars are also shown. As with the series on physical capital, several budget data sources have been used to develop a consistent data series extending back to 1962. The major discontinuity occurs between 1991 and 1992 and affects primarily direct Federal higher education outlays. For 1991 and earlier, these data include net loan outlays. Beginning in 1992, pursuant to changes in the treatment of loans as specified in the Credit Reform Act of 1990, this series includes liquidating accounts for loans obligated in 1991 and earlier and credit subsidies for 1992 and later years.

Table 10.3 also excludes education and training outlays for physical capital (which are included in Section 9) and education and training outlays for the conduct of research and development (which are in Tables 10.1 and 10.2). Also excluded are education and training programs for Federal civilian and military personnel.

Notes on Section 11 (Federal Government Payments for Individuals)

This section provides detail on outlays for Federal Government payments for individuals, which are also described in the notes on Section 6. The basic purpose of the payments for individuals aggregation is to provide a broad perspective on Federal spending in cash or in-kind for which no current service is rendered yet which constitutes income transfers to individuals and families. Table 11.1 provides an overview display of these data in four different forms. All four of these displays show the total payments for individuals, and the split of this total between grants to State and local governments for payments for individuals (such as medicaid and grants for housing assistance) and all other ("direct") payments for individuals.

Table 11.2 shows the functional composition of payments for individuals (see notes on

Section 3 for a description of the functional classification), and includes the same grants versus nongrants ("direct") split provided in Table 11.1. The off-budget social security program finances a significant portion of the Federal payments for individuals. These tables do not distinguish between the on-budget and off-budget payments for individuals. However, all payments for individuals shown in Table 11.2 in function 650 (social security) are off-budget outlays, and all other payments for individuals are on-budget. Table 11.3 displays the payments for individuals by major program category.

Notes on Section 12 (Federal Grants To State and Local Governments)

For several decades the Federal budget documents have provided data on Federal grants to State and local governments. The purpose of these data is to identify Federal Government outlays that constitute income to State and local governments to help finance their services and their income transfers (payments for individuals) to the public. Grants generally exclude Federal Government payments for services rendered directly to the Federal Government; for example, they exclude most Federal Government payments for research and development, and they exclude payments to State social service agencies for screening disability insurance beneficiaries for the Federal disability insurance trust fund.

Table 12.1 provides an overall perspective on grants; its structure is similar to the structure of Table 11.1.

Table 12.2 displays Federal grants by function (see notes on Section 3 for a description of the functional classification). The bulk of Federal grants are included in the Federal funds group; however, since the creation of the highway trust fund in 1957, significant amounts of grants have been financed from trust funds (see notes to Section 1 for a description of the difference between "Federal funds" and "trust funds"). All Federal grants are on-budget. Wherever trust fund outlays are included in those data, Table 12.2 not only identifies the total grants by function but also shows the split between Federal funds and trust funds.

Table 12.3 provides data on grants at the account or program level, with an identification of the function, agency, and fund group of the payment.

Notes on Section 13 (Social Security and Medicare)

Over the past several decades the social security programs (the Federal old-age and survivors insurance (OASI) and the Federal disability insurance (DI) trust funds) and the medicare programs (the Federal hospital insurance (HI) and the Federal supplementary medical insurance (SMI) trust funds) have grown to be among the largest parts of the Federal budget. Because of the size, the rates of growth, and the specialized financing of these programs, policy analysts frequently need to identify these activities separately from all other Federal taxes and spending. As discussed in the introductory notes, the two social security funds are off-budget, while the medicare funds are on-budget. As Table 13.1 shows, the first of these funds (OASI) began in 1937. The table traces the annual transactions of that fund and of the other funds beginning with their points of origin.

The table provides detailed information about social security and medicare by fund. It shows total cash income (including offsetting receipts) by fund, separately identifying social insurance taxes and contributions, intragovernmental income, and proprietary receipts from the public. Virtually all of the proprietary receipts from the public, especially those for the supplementary medical insurance trust fund, are medicare insurance premiums. The table shows the income, outgo, and surplus or deficit of each fund for each year, and also shows the balances of the funds available for future requirements. Most of these fund balances are invested in public debt securities and constitute a significant portion of the debt held by Government accounts (see Table 7.1).

The SMI fund, which was established in 1967, is financed primarily by payments from Federal funds and secondarily by medical insurance premiums (proprietary receipts from the public). The other three trust funds

are financed primarily by social insurance taxes. The law establishing the rate and base of these taxes allocates the tax receipts among the three funds.

The table shows significant transfers by OASI and DI to the railroad retirement social security equivalent account. These transfers are equal to the additional amounts of money social security would have had to pay, less additional receipts it would have collected, if the rail labor force had been included directly under social security since the inception of the social security program.

In 1983, when the OASI fund ran short of money, Congress passed legislation that (a) provided for a one-time acceleration of military service credit payments to these trust funds, (b) provided for a Federal fund payment to OASDI for the estimated value of checks issued in prior years and charged to the trust funds but never cashed, (c) required that the Treasury make payments to OASDHI on the first day of the month for the estimated amounts of their social insurance taxes to be collected over the course of each month (thereby increasing each affected trust fund's balances at the beginning of the month), and (d) subjected some social security benefits to Federal income or other taxes and provided for payments by Federal funds to social security of amounts equal to these additional taxes. Additionally, in 1983 the OASI fund borrowed from the DI and HI funds (the tables show the amounts of such borrowing and repayments of borrowing). The large intragovernmental collections by OASDHI in 1983 are a result of the transactions described under (a) and (b) above. Also starting in 1983, OASI began paying interest to DI and HI to reimburse them for the balances OASI borrowed from them; OASDHI paid interest to Treasury to compensate it for the balances transferred to these funds on the first day of each month. The legal requirement for Treasury to make payments on the first day of the month, and the associated interest payment, ended in 1985 for HI and in 1991 for OASI and DI.

Notes on Section 14 (Federal Sector Transactions in the National Income and Product Accounts)

The principal system used in the United States for measuring total economic activity is the system of national income and product accounts (NIPA), which provide calculations of the GDP and related data series. These data are produced by the Bureau of Economic Analysis (BEA) of the Department of Commerce. As part of this work the BEA staff analyze the budget data base and estimate transactions consistent with this measurement system. The NIPA data are normally produced for calendar years and quarters. Section 14 provides Federal Sector NIPA data on a fiscal year basis from 1947 through 1995.

Notes on Section 15 (Total (Federal and State and Local) Government Finances)

Section 15 provides a perspective on the size and composition of total Government (Federal, State, and local) receipts and spending. Both the Bureau of the Census and the Bureau of Economic Analysis in the Commerce Department provide information (in the national income and product accounts (NIPA) data) on income and spending for all levels of government in the United States. These tables include the NIPA State and local transactions with the Federal Government (deducting the amount of overlap due to Federal grants to State and local governments) to measure total Government receipts and spending on a fiscal year basis from 1947 through 1993.

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940—CURRENT

Date and Act	History of Legislation	Dollar Amount of Limit
June 25, 1940	Amended sec. 21, adding new authority for issuance of \$4 billion National Defense Series obligations outstanding	49,000,000,000
54 Stat. 526		
February 19, 1941	Amended sec. 21, eliminating authority for \$4 billion of National Defense Series obligations and increasing limitation to	65,000,000,000
55 Stat. 7		
March 28, 1942	Amended sec. 21, increasing limitation to	125,000,000,000
56 Stat. 189		
April 11, 1943	Amended sec. 21, increasing limitation to	210,000,000,000
57 Stat. 63		
June 9, 1944	Amended sec. 21, increasing limitation to	260,000,000,000
58 Stat. 272		
April 3, 1945	Amended sec. 21, including obligations guaranteed as to principal and interest by the United States and increasing limitation to	300,000,000,000
59 Stat. 47		
June 26, 1946	Amended sec. 21, defining face amount of savings bonds to be current redemption value and decreasing limitation to	275,000,000,000
60 Stat. 316		
August 28, 1954	Increasing sec. 21 limitation by \$6 billion during period beginning August 28, 1954, and ending June 30, 1955	281,000,000,000
68 Stat. 895		
June 30, 1955	Amended act of August 28, 1954, extending increase in limitation until June 30, 1956	281,000,000,000
69 Stat. 241		
July 9, 1956	Increased sec. 21 limitation by \$9 billion during period beginning July 1, 1956, and ending June 30, 1957	278,000,000,000
70 Stat. 519	Temporary increase terminated July 1, 1957, and limitation reverted to	275,000,000,000
February 26, 1958	Increased sec. 21 limitation by \$5 billion during period beginning February 26, 1958, and ending June 30, 1959	280,000,000,000
72 Stat. 27		
September 2, 1958	Amended sec. 21, increasing limitation to \$283 billion, which with temporary increase of February 26, 1958 made limitation	288,000,000,000
72 Stat. 1758		
June 30, 1959	Amended sec. 21, increasing limitation to \$285 billion and increased sec. 21 limitation by \$10 billion during period beginning July 1, 1959, and ending June 30, 1960	295,000,000,000
73 Stat. 156		
June 30, 1960	Increased sec. 21 limitation by \$8 billion during period beginning July 1, 1960, and ending June 30, 1961	293,000,000,000
74 Stat. 290		
June 30, 1961	Increased sec. 21 limitation by \$13 billion during period beginning July 1, 1961, and ending June 30, 1962	298,000,000,000
75 Stat. 148		
March 13, 1962	Increased sec. 21 limitation by \$2 billion (in addition to temporary increase of \$13 billion in act of June 30, 1961) during period beginning March 13, 1962, and ending June 30, 1962	300,000,000,000
76 Stat. 23		
July 1, 1962	Increased sec. 21 limitation during the periods: (1) beginning July 1, 1962, and ending March 31, 1963, to	308,000,000,000
76 Stat. 124	(2) beginning April 1, 1963, and ending June 24, 1963, to	305,000,000,000
	(3) beginning June 25, 1963, and ending June 30, 1963, to	300,000,000,000
May 29, 1963	Increased sec. 21 limitation during the periods: (1) beginning May 29, 1963, and ending June 30, 1963, to	307,000,000,000
77 Stat. 90	(2) beginning July 1, 1963, and ending August 31, 1963, to	309,000,000,000
August 27, 1963	Increased sec. 21 limitation during the period beginning September 1, 1963, and ending November 30, 1963, to	309,000,000,000
77 Stat. 131		
November 26, 1963	Increased sec. 21 limitation during the periods: (1) beginning December 1, 1963, and ending June 29, 1964, to	315,000,000,000
77 Stat. 342	(2) ending June 30, 1964, to	309,000,000,000
June 29, 1964	Increased sec. 21 limitation during the period beginning June 29, 1964, and ending June 30, 1965, to	324,000,000,000
78 Stat. 225		
June 24, 1965	Increased sec. 21 limitation during the period beginning July 1, 1965, and ending June 30, 1966, to	328,000,000,000
79 Stat. 172		
June 24, 1966	Increased sec. 21 limitation during the period beginning July 1, 1966, and ending June 30, 1967, to	330,000,000,000
80 Stat. 221		
March 2, 1967	Increased sec. 21 limitation during the period beginning March 2, 1967, and ending June 30, 1967, to	336,000,000,000
81 Stat. 4		

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940—CURRENT—Continued

Date and Act	History of Legislation	Dollar Amount of Limit
June 30, 1967 81 Stat. 99	Sec. 21 amended to increase limitation on aggregate outstanding at any time to	358,000,000,000
	Sec. 21 amended also to increase the limitation temporarily, beginning July 1, 1968, and each July 1 thereafter for the period beginning July 1 and ending June 29 of each succeeding calendar year by \$7 billion, providing an operating limitation of	365,000,000,000
April 7, 1969 83 Stat. 7	Amended sec. 21, increasing limitation to \$365 billion, and increased sec. 21 limitation by \$12 billion during period beginning April 7, 1969, and ending June 30, 1970	377,000,000,000
June 30, 1970 84 Stat. 368	Amended sec. 21, increasing limitation to \$380 billion, and increased sec. 21 limitation by \$15 billion during period beginning July 1, 1970, and ending June 30, 1971	395,000,000,000
March 17, 1971 85 Stat. 5	Amended sec. 21, increasing limitation to \$400 billion, and increased sec. 21 limitation by \$30 billion during period beginning March 17, 1971, and ending June 30, 1972	430,000,000,000
March 15, 1972 86 Stat. 63	Amended sec. 21, to further increase the limitation temporarily by \$20 billion during period beginning March 15, 1972, and ending June 30, 1972	450,000,000,000
July 1, 1972 86 Stat. 406	Amended act of March 15, 1972, striking out June 30, 1972, and inserting in lieu thereof October 31, 1972	450,000,000,000
October 27, 1972 86 Stat. 1324	Increased sec. 21 limitation during the period beginning November 1, 1972, and ending June 30, 1973	465,000,000,000
July 1, 1973 86 Stat. 1324	Amended act of October 27, 1972, striking out June 30, 1973, and inserting in lieu thereof November 30, 1973	465,000,000,000
December 3, 1973 87 Stat. 691	Increased sec. 21 limitation during the period beginning December 3, 1973, and ending June 30, 1974	475,700,000,000
June 30, 1974 88 Stat. 285	Increased sec. 21 limitation during the period beginning June 30, 1974, and ending March 31, 1975	495,000,000,000
February 19, 1975 89 Stat. 5	Increased sec. 21 limitation during the period beginning February 19, 1975, and ending June 30, 1975	577,000,000,000
June 30, 1975 89 Stat. 246	Increased sec. 21 limitation during the period beginning June 30, 1975, and ending November 15, 1975	577,000,000,000
November 14, 1975 89 Stat. 693	Increased sec. 21 limitation during the period beginning November 14, 1975, and ending March 15, 1976	595,000,000,000
March 15, 1976 90 Stat. 217	Increased sec. 21 limitation during the period beginning March 15, 1976, and ending June 30, 1976	627,000,000,000
June 30, 1976 90 Stat. 793	Increased sec. 21 limitation during the periods: (1) beginning July 1, 1976, and ending September 30, 1976, to	636,000,000,000
	(2) beginning October 1, 1976, and ending March 31, 1977, to	682,000,000,000
	(3) beginning April 1, 1977, and ending September 30, 1977, to	700,000,000,000
	Temporary increase terminated October 1, 1977, and limitation reverted to	400,000,000,000
October 4, 1977 91 Stat. 1090	Increased sec. 21 limitation by \$352 billion during the period beginning October 4, 1977, and ending March 31, 1978	752,000,000,000
March 27, 1978 92 Stat. 185	Amended act of October 4, 1977, striking out March 31, 1978, and inserting in lieu thereof July 31, 1978	752,000,000,000
	Temporary increase terminated August 1, 1978, and limitation reverted to	400,000,000,000
August 3, 1978 92 Stat. 419	Increased sec. 21 limitation by \$398 billion during the period beginning August 3, 1978, and ending March 31, 1979	798,000,000,000
	Temporary increase terminated April 1, 1979, and limitation reverted to	400,000,000,000
April 2, 1979 93 Stat. 8	Increased sec. 21 limitation by \$430 billion during the period beginning April 2, 1979, and ending September 30, 1979	830,000,000,000
September 29, 1979 93 Stat. 589	Increased sec. 21 limitation by \$479 billion during the period beginning September 29, 1979, and ending May 31, 1980	879,000,000,000
May 30, 1980 94 Stat. 421	Amended act of September 29, 1979, striking out May 31, 1980, and inserting in lieu thereof June 5, 1980	879,000,000,000
June 6, 1980 94 Stat. 439	Amended act of September 29, 1979, striking out June 5, 1980, and inserting in lieu thereof June 30, 1980	879,000,000,000
June 28, 1980 94 Stat. 598	Increased sec. 21 limitation by \$525 billion during the period beginning June 28, 1980, and ending February 28, 1981	925,000,000,000
December 19, 1980 94 Stat. 3261	Increased the total debt limit (composed of \$400.0 billion of permanent ceiling, \$535.1 billion of temporary ceiling) to	935,100,000,000

Table 7.3—STATUTORY LIMITS ON FEDERAL DEBT: 1940—CURRENT—Continued

Date and Act	History of Legislation	Dollar Amount of Limit
February 7, 1981 95 Stat. 4	Increased the temporary portion of the debt limit to \$585.0 billion through September 30, 1980, raising the total debt ceiling to	985,000,000,000
September 30, 1981 95 Stat. 955	Increased the temporary portion of the debt limit to \$599.8 billion for one day—September 30, 1981	999,800,000,000
September 30, 1981 95 Stat. 956	Increased the temporary portion of the debt limit to \$679.8 billion through September 30, 1982	1,079,800,000,000
June 28, 1982 96 Stat. 130	Increased the temporary portion of the debt limit to \$743.1 billion through September 30, 1982	1,143,100,000,000
September 30, 1982 96 Stat. 1156	Increased the temporary portion of the debt limit to \$890.2 billion through September 30, 1983	1,290,200,000,000
May 26, 1983 97 Stat. 196	Eliminated the distinction between permanent and temporary limit with the enactment of a single permanent limit. Raised the debt limit to	1,389,000,000,000
November 21, 1983 97 Stat. 1012	Increased the debt limit to	1,490,000,000,000
May 25, 1984 98 Stat. 211	Increased the debt limit to	1,520,000,000,000
July 6, 1984 98 Stat. 313	Increased the debt limit to	1,573,000,000,000
October 13, 1984 98 Stat. 475	Increased the debt limit to	1,823,800,000,000
November 14, 1985 99 Stat. 814	Increased the debt limit temporarily through December 6, 1985 to	1,903,800,000,000
December 12, 1985 99 Stat. 1037	Increased the debt limit to	2,078,700,000,000
August 21, 1986 100 Stat. 818	Increased the debt limit to	2,111,000,000,000
October 21, 1986 100 Stat. 1874	Increased the debt limit temporarily through May 15, 1987 to	2,300,000,000,000
May 15, 1987 101 Stat. 308	Increased the debt limit temporarily through July 17, 1987 to	2,320,000,000,000
July 30, 1987 101 Stat. 542	Increased the debt limit temporarily through August 6, 1987 to	2,320,000,000,000
August 10, 1987 101 Stat. 550	Increased the debt limit temporarily through September 23, 1987 to	2,352,000,000,000
September 29, 1987 101 Stat. 754	Increased the debt limit to	2,800,000,000,000
August 7, 1989 103 Stat. 182	Increased the debt limit temporarily through October 31, 1989 to	2,870,000,000,000
November 8, 1989 103 Stat. 830	Increased the debt limit to	3,122,700,000,000
August 9, 1990 104 Stat. 403	Increased the debt limit temporarily through October 2, 1990 to	3,195,000,000,000
October 2, 1990 104 Stat. 878	Increased the debt limit temporarily through October 6, 1990 to	3,195,000,000,000
October 9, 1990 104 Stat. 894	Increased the debt limit temporarily through October 19, 1990 to	3,195,000,000,000
October 19, 1990 104 Stat. 1030	Increased the debt limit temporarily through October 24, 1990 to	3,195,000,000,000
October 25, 1990 104 Stat. 1075	Increased the debt limit temporarily through October 27, 1990 to	3,195,000,000,000
October 28, 1990 104 Stat. 1086	Increased the debt limit temporarily through November 5, 1990 to	3,230,000,000,000
November 5, 1990 104 Stat. 1388	Increased the debt limit to	4,145,000,000,000
April 6, 1993 107 Stat. 42	Increased the debt limit temporarily through September 30, 1993 to	4,370,000,000,000
August 10, 1993 107 Stat. 312	Increased the debt limit to	4,900,000,000,000

Total outlays for discretionary programs	542.5	550.1	542.4	546.1	547.8	544.4	548.3

* \$50 million or less.

Note: Due to the effects of the Credit Reform Act of 1990 on the measurement and classification of Federal credit activities, the discretionary outlays for years prior to 1992 are not strictly comparable to those for 1992 and beyond. However, the discretionary outlays shown for 1992 are no more than \$1 billion higher than they would have been if measured on the same (pre-credit reform) basis as the 1991 outlays.

Total outlays for discretionary programs	439.9	433.7	416.0	407.2	396.7	382.8	374.3

* \$50 million or less.

Note: Due to the effects of the Credit Reform Act of 1990 on the measurement and classification of Federal credit activities, the discretionary outlays for years prior to 1992 are not strictly comparable to those for 1992 and beyond. However, the discretionary outlays shown for 1992 are no more than \$1 billion higher (in nominal dollars) than they would have been if measured on the same (pre-credit reform) basis as the 1991 outlays.
