Helium Production, Bureau of Mines—

Helium production and investigations: The sums made available for the fiscal year [1945] *1946* in the Acts making appropriations for the War and Navy Departments for the acquisition of helium from the Bureau of Mines shall be transferred to the Bureau of Mines on July 1, [1944] *1945*, for operation and maintenance of the plants for the production of helium for military and naval purposes, including laboratory gloves, goggles, rubber boots, and aprons; purchase, not to exceed [$4,500] *six*, maintenance, operation, and repair of motor-propelled passenger-carrying vehicles, books of reference and periodicals; the purchase in the District of Columbia and elsewhere of items otherwise properly chargeable to the appropriation "Contingent expenses, Department of the Interior" (not exceeding $5,000); and all other necessary expenses, and including [$50,000] *$42,000* for personal services in the District of Columbia in addition to which sums the Bureau of Mines may use for helium-plant operations in the fiscal year [1945] *1946* the unobligated balance of funds transferred to it for such operations, in the fiscal year [1944] *1945*: *Provided*, That section 3709, Revised Statutes, shall not be construed to apply to this appropriation, or to the appropriation for development and operation of helium properties (special fund) in section 3 (c) of the Act of September 1, 1937 (50 U. S. C. 164): *Provided further*, That funds available for the production of helium and the development of helium properties may be utilized to provide transportation between helium plants and related facilities and communities that provide adequate living accommodations of persons engaged in the operation and maintenance of helium plants; and for transportation to and from schools of pupils who are dependents of such persons which transportation shall be by methods which the Office of Defense Transportation shall find to be most advantageous and efficient: *Provided further*, That pursuant to agreements approved by the Secretary and the Office of Defense Transportation, the transportation equipment available to the Bureau of Mines may be pooled with that of school districts and other local or Federal agencies for use in transporting persons engaged in operation and maintenance of helium plants, pupils who are dependents of such persons, and other pupils, and in the interest of economy the expenses of operating such equipment may be shared (*Act of June 28, 1944, Public Law 369*).

During the fiscal year [1945] *1946* the head of any department or independent establishment of the Government having funds available for scientific investigations within the scope of the functions of the Bureau of Mines may, with the approval of the Secretary, transfer to the Bureau such sums as may be necessary therefor, which sums so transferred may be expended for the same objects and in the same manner as sums appropriated herein may be expended.

The Federal Security Administrator may detail medical officers of the Public Health Service for cooperative health, safety, or sanitation work with the Bureau of Mines, and the compensation and expenses of the officers so detailed may be paid from the applicable appropriations made herein for the Bureau of Mines.

The Bureau of Mines is hereby authorized, during the fiscal year [1945] *1946*, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated from funds appropriated to the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts (*Act of June 28, 1944, Public Law 369*).

Total, Fish and Wildlife Service, [$6,085,548] *$6,748,900*, and in addition thereto funds made available under the Migratory Bird Conservation Fund, of which amounts not to exceed [$825,000] *$756,282* may be expended for departmental personal services, including such services in the District of Columbia, and [not to exceed $30,000 shall be available] for the purchase of *one hundred and twenty-two* motor-propelled passenger-carrying vehicles. Funds available for the work of the Fish and Wildlife Service shall be available for the maintenance, repair, and operation of motor-propelled passenger-carrying vehicles; the installation and operation of telephones in Government-owned residences, apartments, or quarters occupied by employees of the Fish and Wildlife Service; providing by purchase, construction, or otherwise, facilities incident to such public recreational uses of wildlife refuges as are not inconsistent with the primary purposes of such refuges; [books, periodicals, and] newspapers (not to exceed $100), rubber boots, oilskins, first-aid [outfits,] *outfits;* plans and specifications for vessels, or for contract personal services for the preparation thereof *without regard to section 3709, Revised Statutes;* and rations for officers and crews of vessels; and for the expenditure from appropriations available for the purchase of lands of not to exceed $1 for each option to purchase any tract of land. Reimbursements for the cost of supplies and materials and the transportation and handling thereof issued from central warehouses authorized to be established by the Act of June 24, 1936 (16 U. S. C. 667), may be credited to the appropriation current at the time supplies and materials are allotted, assigned, or issued, or at the time such reimbursements are received. Not to exceed 10 per centum of the foregoing amounts for expenses of the Fish and Wildlife Service shall be available interchangeably for expenditure on the objects included within the general expenses of said Service, but no more than 10 per centum shall be added to any one item or appropriation (*Act of June 28, 1944, Public Law 369*).

Total, Fish and Wildlife Service, annual appropriations, general account:

Estimate 1946, **$7,748,900** Appropriated 1945, **$7,085,548**

Permanent appropriations, special accounts:

Payments to Counties Under Migratory Bird Conservation Act—

Twenty-five percent of the net proceeds received during each fiscal year from the sale or other disposition of surplus wildlife or of timber, hay, grass, or other spontaneous products of the soil, shell, sand, or gravel, and from other privileges on refuges established under the Migratory Bird Conservation Act of February 18, 1929, or under any other law, proclamation, or Executive order, administered by the Fish and Wildlife Service of the United States, Department of the Interior, shall be paid at the end of such year by the Secretary of the Treasury to the county or counties in which such refuge is situated for the benefit of the public schools and roads in the county or counties in which such refuge is situated: *Provided,* That when any such refuge is in more than one State or Territory or county or subdivision, the distributive share to each from the proceeds of such refuge shall be proportional to its area therein (*16 U. S. C. 715s*).

Estimate 1946, **$61,300** Appropriated 1945, **$45,000**
Revised 1945, **$61,282**

11 Grants, subsidies, and contributions: Obligations—1946, $61,300; 1945, $61,282; 1944, $43,441.

Expenses for Sales, Etc., in Refuges, Fish and Wildlife Service—

For payment of expenses incident to the sale of refuge products, privileges, or animals from proceeds of the sales (*16 U. S. C. 715s; decision of Comptroller General, July 11, 1938, A-63693*).

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of Justice represents the Government in legal matters and renders advice and opinions upon request of the President and the heads of executive departments. The work of the Department also includes the activities of the United States district attorneys and marshals in the 93 judicial districts, and the operations of the Federal Bureau of Investigation, the Immigration and Naturalization Service, and the Federal Prison System.

LEGAL ACTIVITIES AND GENERAL ADMINISTRATION

This section of the estimates consists of the legal and administrative divisions and offices, involving 25 appropriations. Included are the offices of the Attorney General, the Solicitor General, the Assistant to the Attorney General, and the Assistant Solicitor General; the Administrative Division; and other divisions handling tax, criminal, claims, antitrust, customs, land, and other legal matters. The appropriation, "Salaries and expenses, veterans' insurance litigation, Department of Justice," has been eliminated by including salaries for this activity in the estimate for the Claims Division and other expenses in the estimates for contingent expenses, traveling expenses, and printing and binding. Increased workloads and higher costs are reflected in larger estimates for the Antitrust and Claims Divisions and for the activities of district attorneys and marshals. The increase for the War Division includes funds formerly provided by transfer from the Foreign Economic Administration. These increases are partially offset by substantial reductions in estimates for the Lands and Criminal Divisions and for other expenses, including fees of witnesses, printing and binding, and compensation of special attorneys.

FEDERAL BUREAU OF INVESTIGATION

This Bureau, throughout the war period, will continue to have responsibility for investigating activities relative to espionage, sabotage, war frauds, selective service, and similar matters. Except for war frauds and espionage, the number of investigations in this group is expected to decline. This decline will be partially offset by an increase in fugitive cases which are more difficult and require increased investigative time.

IMMIGRATION AND NATURALIZATION SERVICE

The activities of the Service relating to the war effort are diminishing, with a reduction in the alien enemy detention program which accounts for a substantial part of the decrease in funds required for 1946. In contrast, the Service is confronted with new problems such as a mounting volume of deportation cases, which includes new cases arising from efforts to improve the control of aliens in the United States. Administrative changes which have been and are being made will enable the Service to cope more effectively with emerging problems.

FEDERAL PRISON SYSTEM

The principal factors contributing to the increased estimates for 1946 are the anticipated growth in inmate population of Federal institutions, the higher cost of temporarily maintaining prisoners in non-Federal facilities, and an increased allowance for major repairs, alterations, and improvements. Twenty-seven institutions will be operated in 1946, an increase of two over those in operation at the beginning of the current fiscal year.

Return of Deposits to Secure Payment of Fines and Passage Money, Immigration and Naturalization Service—

Amounts collected from transportation companies, owners and masters of vessels and agents to cover fines that may be imposed for unlawful entry of aliens and to secure the return of passage money (including head tax if paid by the alien as part of passage money) are deposited in the trust receipt account "Deposits to Secure Payment of Fines and Passage Money, Immigration and Naturalization Service." The portion of receipts representing fines, penalties, etc., is transferred monthly to miscellaneous-receipt account "Immigration Fines and Penalties." Such amounts as are required to make refunds to transportation companies and others in cases where no fine is imposed, and for payment to aliens of amounts due them are established from time to time in the appropriation account (*31 U. S. C. 725r*).

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of Labor is concerned with those activities which foster the welfare of wage earners, improve their working conditions, and advance their opportunities for profitable employment.

The estimates for 1946 provide for continuance of necessary wartime functions. The principal increases are in the fields of conciliation of labor disputes, the collection of information upon interindustry and interstate shifts of employment, wage differentials within industries, and the social problems of children and families in a period characterized by large-scale migration. There is also a new appropriation in the amount of $87,900 for expenses and travel to enable the Department to exchange employees with the labor departments of 12 foreign governments. Over-all, the Department's budget is approximately $3,000,000 more than 1945, due principally to an increase in the estimate of grants for the emergency maternity and infant care program.

The Office of the Secretary provides general supervision and policy direction over the activities of the Department. In addition to the immediate Office of the Secretary, the activities financed from this appropriation include administrative staff functions, such as the Office of the Solicitor, the library, and the division of information, and the operating functions of the Division of Labor Standards and the United States Conciliation Service.

The Division of Labor Standards assists industry, labor, and the States in improving, developing, and administering labor laws, and sponsors official activities aimed at improving working conditions of employees. This division operates as a clearinghouse of information for State labor departments, and in this capacity sponsors regional conferences at which labor law administrators, workers, employers, and interested public agencies exchange views and agree upon labor standards and administrative methods. It is also charged with the promotion of accident prevention and the improvement of occupational health techniques.

The Conciliation Service is engaged in mediation and conciliation of disputes between employers and employees, and acts for the Secretary under section 8 of the organic act establishing the Department of Labor which provides that "The Secretary of Labor shall have power to act as mediator and appoint commissioners of conciliation in labor disputes whenever in his judgment the interests of industrial peace may require it to be done." The service provides a method whereby workers and employers can settle their grievances around the conference table. If the Conciliation Service is unable to adjust a labor dispute, and so certifies, the Secretary of Labor may refer it to the National War Labor Board, if the dispute interferes with the Nation's war effort.

BUREAU OF LABOR STATISTICS

The Bureau of Labor Statistics has long been charged with the statutory duty "to acquire and diffuse among the people in the United States useful information on subjects connected with labor in the most general and comprehensive sense." It collects and publishes analyses of statistical and other information relative to wages, hours of labor, employment, earnings, wholesale and retail prices, cost of living, building construction, the effect of industrial production upon labor and employment, and other related subjects. The statistical and economic information gathered by the Bureau has intimate and definite relation to the national economy.

CHILDREN'S BUREAU

The Children's Bureau is the only Federal agency which concerns itself with activities pertaining to the welfare of children and child life and which makes recommendations to ameliorate conditions inimical to the welfare of mothers and children. It administers provisions of the Fair Labor Standards Act which prohibit child labor under certain conditions and under certain ages, and also administers grants to States for maternal and child health services, services for crippled children, child welfare

services under the Social Security Act, and maternity and infant care for wives and infants of enlisted men in the armed services. Its administration relates to approximately 41,000,000 infants and young persons under 18 years of age.

WOMEN'S BUREAU

The Women's Bureau formulates standards and policies to promote the welfare of wage-earning women, improve their working conditions, increase their efficiency, and advance their opportunity for profitable employment. The work of this Bureau is of great importance during the war period because of the increased number of women engaged in production work in war industries. Difficult problems of adjustment will be created for women workers as the inflated demand for their services in war production declines. There is urgent need for information and advice to women workers and their employers as to new employment opportunities and techniques of adjustment.

WAGE AND HOUR DIVISION

Under the provisions of the Fair Labor Standards Act of 1938, the Wage and Hour Division enforces the wage and hour provisions of the act upon employers engaged in interstate commerce, or producing goods for interstate commerce. This division also administers the Walsh-Healey Act, which requires Government supply contractors to operate upon a 40-hour basic workweek with overtime beyond that time, and to maintain specified standards for child labor and safety and health.

[1] Overtime pay covers all overtime pay and additional compensation authorized by acts expiring June 30, 1945.

[2] Total supplemental estimate of appropriations required for 1945 amount to $50,793,331. Estimated savings in certain appropriations in 1945 totalling $13,278,341 have been deducted from the estimated total supplemental appropriations required in other appropriations for 1945 to account for the total estimated surplus in 1945 of $117,643,897.

EXPLANATORY STATEMENT

The Post Office Department handles mail and performs certain special services at statutory rates. The volume of work performed is governed by the public demand. Expenditures are met from postal revenue; any excess of expenditures over revenue is met from the general fund of the Treasury.

In addition to service rendered on a prepaid basis to the public, certain important services are provided to other departments and agencies of the Federal Government for which reimbursements are received in whole or in part. However, a large part of the cost of the service rendered to other departments is absorbed by the Post Office Department, such as (1) operation and custodial service for public buildings controlled by the Post Office Department and occupied in part by field offices of other departments, and (2) informational services, and assistance in examinations for civil service applicants. The Post Office Department continues to absorb the cost of penalty and franked mail for all branches of the Federal Government but since July 1, 1944, the executive departments and agencies, except the War and Navy Departments, have been required to pay into the general funds of the Treasury an amount equal to the cost of handling their penalty mail of 4 pounds or less. However, postal revenues have been augmented since August 1, 1944, by a requirement that all executive departments except the War and Navy Departments pay regular postal rates for mail matter weighing in excess of 4 pounds.

Reflecting increased activity due to the war, the upswing in postal business which began in 1938 has continued to new heights. In addition to an unprecedented volume of paid mail, the estimates for 1946 contemplate the handling of larger quantities of free mail from members of the armed forces.

POSTAL REVENUE

It is estimated that there will be a surplus of postal revenue over the cost of postal operations of approximately 117.6 million dollars for 1945 and 265.2 million dollars for 1946. The increased revenues of the Postal Service for those years, in some measure, will result from increased postage rates provided by the Revenue Act of 1943 and the act of September 17, 1944 (Public Law 424). However, some increase is due to the unusual mobility of the population and resultant greater use of the postal service.

POSTAL EXPENDITURES

Following the upward swing of postal revenue which began in 1938, postal expenditures have reflected a similar trend which has continued thus far into 1945. It is expected that some further increase in volume of services rendered both to the public and to other Government agencies will be experienced in 1946. Comparing the 1946 estimates with the 1945 appropriations, excluding overtime, a slight increase of expenditures is anticipated to provide for the expenses of expanded operations.

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of State is the principal agency of Government responsible under the President for determining our foreign policy and conducting our foreign relations. While the more vital decisions on foreign policy are made by the President, negotiations with foreign countries, including specific measures for the protection of American interests, the promotion of friendly relations between the United States and other countries, and the conduct of the voluminous correspondence with our diplomatic missions abroad and with accredited representatives of foreign powers in this country, are administered by the Department of State. Continued expansion is necessary to meet the needs and problems of liberated areas and conquered territory, and to enable the Department to prepare for and participate in the coming period of intensive international cooperation.

The Department is faced with the task of continuing to deal with a multitude of war-related problems and at the same time conducting research, formulating policy, and preparing programs for political and economic reconstruction insofar as it touches upon the foreign policy of this country. Extensive preparations are necessary for the many international conferences in prospect. The outstanding objective of the Department is the establishment of an international peace organization, and to that end it must recruit and equip an increasing number of competent personnel. Appropriations totaling $75,213,400 will be required for 1946.

OFFICE OF THE SECRETARY

An appropriation of $11,362,200 will be required for the departmental service which includes the political offices (American Republic Affairs, European Affairs, Far Eastern Affairs, Near Eastern and African Affairs, and Special Political Affairs) and the functional offices (Controls, Transportation and Communications, Wartime Economic Affairs, Economic Affairs, Public Affairs, Departmental Administration, and Foreign Service). Moderate expansion is planned throughout the political offices and in the Office of Economic Affairs. The Office of Public Affairs will be strengthened in an effort to further the dissemination of information on foreign relations and to implement our foreign policy.

FOREIGN SERVICE

The Foreign Service must expand for the twofold purpose of staffing missions being reopened in Europe and to enable it to perform more intensively the functions of representation and reporting. An increase is planned in the number of cultural and informational attachés abroad. An expansion is also planned in the number of specialists appointed to serve as agricultural, financial, petroleum, aviation, labor, and mining attachés in our diplomatic missions. Consular services, particularly in the liberated areas, will place a heavy load upon the personnel of the Foreign Service. These increasing demands, coupled with the serious inflationary trend abroad, will require

$53,929,800. Of the foregoing amount, $35,929,800 will be expended for salaries, allowances, and other operating expenses of the Foreign Service, and $18,000,000 principally for financial relief to American nationals detained by the enemy or stranded abroad.

INTERNATIONAL OBLIGATIONS

International obligations, including contributions to international commissions, congresses, and bureaus, will require $9,921,400. An amount of $1,500,000 is included to enable the Department to participate in international conferences which cannot be specifically foreseen at this time. The largest requirement under this head is for $4,430,000 to carry on the program of cooperation with the other American republics. This program is based on the reciprocal and cooperative purposes enunciated in the treaties, resolutions, declarations, and recommendations previously signed by all the American republics. The projects under this program afford a practical means of carrying out the objective of strengthening the bond of inter-American solidarity.

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Treasury Department is primarily a service organization, performing many activities of a fiscal nature for all Federal agencies. The general increase in governmental activities resulting from the war continues to be reflected in the Department's appropriation estimates, and, as a matter of fact, with respect to many of the Treasury's fiscal functions, including its public debt, accounting, and disbursing operations, and the collection of the revenue, there is no likelihood of any reduction for a considerable period following the war's termination.

Revenue-collecting and debt-servicing activities are expected to continue in 1946 at levels comparable with the 1945 program. Interest on the public debt will necessarily increase. Activities in connection with the receipt and custody of public funds will show little change as compared with 1945, but additional funds will be required for disbursement functions.

Regulatory and enforcement activities of the Treasury are expected to maintain 1945 levels in 1946, with the exception of the program of foreign funds control. Regarding the latter, decreased requirements for domestic controls will result in a substantial net reduction for 1946, despite slightly increased requirements for expanded foreign-control activities. The regular Government-wide procurement functions of the Treasury Department are expected to continue in 1946 at practically the 1945 level, while the surplus property program is estimated to require funds somewhat in excess of those available for 1945. Procurement activities of the Department related directly to the war are being financed from War, Navy, and Lend-Lease funds.

Treasury Department trust funds reflect increased receipts from social-security taxes.

DEPARTMENTAL ADMINISTRATION

The large decrease shown in the Office of the Secretary is not accounted for by any decrease in the administrative expenses of that Office. The reduction is due to the inclusion in the 1945 appropriations of $50,000,000 for the purchase of capital stock of the Smaller War Plants Corporation.

The administrative expense appropriations for the Division of Tax Research, Office of the Tax Legislative Counsel, Division of Research and Statistics, Office of General Counsel, Division of Personnel, Office of Chief Clerk, and Custody of Treasury Department Buildings, provide for the general overhead activities of the Department. Except for a few minor changes, the requirements for these offices in 1946 will be about the same as for 1945.

REVENUE COLLECTION

The Bureau of Internal Revenue and the Bureau of Customs have the responsibility of collecting a considerable portion of the Government's revenue.

For the administration of existing revenue laws, the Bureau of Internal Revenue will require, in the fiscal year 1946, funds approximately equivalent to its 1945 requirements. It is anticipated that more than 85 million tax returns of all classes will be handled in each of the fiscal years 1945 and 1946. Refunds of internal revenue are expected to increase from the current year's total of 17,600,000 to 20,000,000 items in 1946. Practically all of these refunds are attributable to overwithholdings of income tax in the case of individual taxpayers. Substantial refunds will be made to corporations under relief provisions of the wartime tax structure.

The administrative expenses of the Bureau of Customs show a slight increase for 1946. The normal activities of this Bureau, which decreased measurably earlier in the war, are gradually resuming their previous proportions, with still further increases due to expanded import transactions anticipated for the fiscal year 1946. The Bureau will continue in 1946 to perform emergency duties previously assumed in connection with the war effort, such as increased guarding of port facilities and the maintenance of more rigid controls over exports. Refunds and drawbacks of customs receipts are anticipated to be slightly above the 1945 level.

PUBLIC DEBT OPERATIONS

The administrative expenses of the Bureau of the Public Debt, exclusive of requirements for bond-sales promotion, will continue in 1946 at approximately the 1945 level. It is not practicable at this time to forecast the number of war-bond drives to be conducted next year, and while the funds included for this purpose in the 1946 estimate are less than the amount available in 1945 in the expectation that there will be some curtailment of this program, supplemental funds will be necessary if later developments should point to the need for continuing these activities at a higher level than anticipated. War-bond promotional operations, as now planned, are to be directed not only toward the encouragement of sales, but will also emphasize the advantages of retaining the bonds to maturity.

The estimates for the Bureau of the Public Debt include an appropriation, "Administering the Public Debt," which represents a consolidation of three existing appropriations. This consolidation, together with the decision to appropriate directly to the Office of the Treasurer of the United States, the Office of the General Counsel, and the Secret Service Division for work presently financed by the Bureau of the Public Debt will simplify administrative controls within the Department, and will also facilitate consideration of the estimates by the Appropriations Committees and the Bureau of the Budget. With respect to the amount required to meet payments of interest on the public debt, an increase of 20 percent is anticipated in 1946 as compared with 1945.

CENTRAL FISCAL SERVICES

The Bureau of Accounts and the Office of the Treasurer of the United States are responsible for receiving, safekeeping, disbursing, and accounting for the Government's funds. The activities of the Bureau of Accounts are expected to continue at about the same level in 1946. While the workload of the Treasurer of the United States, as related to check payments, reflects a decrease in 1946 of less than 1 percent, the total cost of this operation will be greatly reduced by reason of the increased use of card checks which can be handled at substantially less cost than paper checks. The volume of card checks will increase in 1946 from 203 million to 244 million, with corresponding reduction in the volume of paper checks.

MANUFACTURE OF COIN, CURRENCY, AND SECURITIES

The estimates for the Bureau of the Mint for 1946 are predicated upon a coinage demand reasonably comparable with that of the current year. The requirements for the

Bureau of Engraving and Printing contemplate an increase in the production of revenue stamps, with continuance of the 1945 production levels of currency and securities.

REGULATORY AND ENFORCEMENT ACTIVITIES

The regulatory and enforcement programs of the Treasury Department are administered by the Foreign Funds Control, the Comptroller of the Currency, the Bureau of Narcotics, the Secret Service, and the alcohol tax unit of the Bureau of Internal Revenue. With respect to the Foreign Funds Control, a reduction of approximately 43 percent is reflected in the 1946 requirements. As previously stated, this is due to the anticipated curtailment of the Control's domestic program, which will be partially offset by expanded foreign-control activities resulting from military operations. All other regulatory and enforcement activities of the Treasury will continue in 1946 at approximately the 1945 levels.

GOVERNMENT PROCUREMENT

The regular procurement activities of the Procurement Division are expected to continue in 1946 at approximately the 1945 level. The Division's 1946 requirements, however, reflect an increase of about 30 percent, as compared with 1945, by reason of the assumption of certain administrative functions formerly appropriated for under the Office for Emergency Management.

SURPLUS PROPERTY PROGRAM

The Treasury's activities in connection with the disposal of surplus property have called for a substantial increase in funds for the current fiscal year as compared with 1944, and will reflect a further increase in 1946.

TRUST ACCOUNTS

The estimates of appropriations for trust accounts for 1946 indicate a net increase of about 6 percent, resulting primarily from increased receipts to the Federal old-age and survivors insurance trust fund and the unemployment trust fund. These increased receipts will be used largely for investment purposes, as only minor increases are anticipated in benefit payments.

Federal Old-Age and Survivors Insurance Trust Fund—

Under the provisions of section 201, title II, of the Social Security Act amendments of 1939, approved August 10, 1939, there was created on the books of the Treasury of the United States a trust fund known as the "Federal old-age and survivors insurance trust fund," consisting of the securities held by the Secretary of the Treasury for the "Old age reserve account" and the amount standing to the credit of the "Old age reserve account" on the books of the Treasury on January 1, 1940, and, in addition, such amounts as may be appropriated to the trust fund as provided in the Act. The Act appropriates to the trust fund for the fiscal year ending June 30, 1941, and for each fiscal year thereafter, amounts equivalent to 100 per centum of the taxes (including interest, penalties, and additions to the taxes) received under the Federal Insurance Contributions Act and covered into the Treasury, with the further provision that the trust fund shall repay to the general fund of the Treasury the amount required by the Social Security Board and the Treasury Department to administer title II and title VIII of the Act and the Federal Insurance Contributions Act (*42 U. S. C. 401*).

such non-Federal agencies where such functions are to be discontinued by the agency from which the warehousing function has been transferred, and the receipts, including surcharge, for all issues to and all advances by all non-Federal agencies shall be credited to the general supply fund: *Provided further,* That payments during the fiscal year [1945] *1946* to the general supply fund for materials, and supplies (including fuel), and services, and overhead expenses for all issues shall be made on the books of the Treasury Department by transfer and counterwarrants prepared by the Procurement Division of the Treasury Department and countersigned by the Comptroller General, such warrants to be based solely on itemized invoices prepared by the Procurement Division at issue prices to be fixed by the Director of Procurement: *Provided further, That payments covering transactions between the Procurement Division and field offices of other Government agencies whose detailed appropriation or fund accounts are maintained elsewhere than within the District of Columbia, may be made on the basis of itemized vouchers or invoices prepared by the Procurement Division and sent through the appropriate field offices to the disbursing officers for the agencies involved, who are hereby authorized to make payment based (1) upon certification of the Procurement Division, which shall include the specific statement that the vouchers are issued pursuant to and in conformity with purchase orders or requisitions duly executed by the agency billed, and (2) upon approval and certification of such vouchers by the agency billed, which action shall be based upon acceptance of the Procurement Division certification as made, subject to later adjustment if necessary, the responsibility of the certifying officer to be limited to the availability of the funds to be charged: Provided further, That notwithstanding the provisions of any other law relating to the procurement of printing and binding, the general supply fund may be used to purchase from or through the Public Printer standard forms and blankbook work for field warehouse stocking and issue, but issues thereof shall be made only to government agencies and shall be chargeable to applicable appropriation authorizations or limitations of such agencies for printing and binding, and reports of such issues shall be made as the Public Printer may require: Provided further,* That advances received pursuant to law (31 U. S. C. 686) from departments and establishments of the United States Government and the government of the District of Columbia during the fiscal year [1945] *1946* shall be credited to the general supply fund: *Provided further,* That during the fiscal year [1945] *1946* there shall be available from the general supply fund for personal services in the District of Columbia not to exceed $1,250,000: *Provided further,* That per diem employees engaged in work in connection with operations of the fuel yards may be paid rates of pay approved by the Secretary of the Treasury not exceeding current rates for similar services in the District of Columbia: *Provided further,* That the term "fuel" shall be held to include "fuel oil": *Provided further,* That the reconditioning and repair of surplus property and equipment for disposition or reissue to Government service, may be made at cost by the Procurement Division, payment therefor to be effected by charging the proper appropriation and crediting the general supply fund: *Provided further,* That all orders for printing and binding for the Treasury Department, exclusive of work performed in the Bureau of Engraving and Printing and exclusive of such printing and binding as may under existing law be procured by field offices under authorization of the Joint Committee on Printing, shall be placed by the Director of Procurement in accord with the provisions of existing law (*Act of Apr. 22, 1944, Public Law 293*).

[Procurement accounting: The provisos under the head, "Salaries and expenses, Procurement Division", in the Treasury Department Appropriation Act, 1944, and the Treasury Department Appropriation Act, 1945, requiring that payments to the general supply fund be made on the books of the Treasury Department by transfer and counter warrants, are hereby amended to authorize such payments covering transactions between the Procurement Division and field offices of other Government agencies whose detailed appropriation or fund accounts are maintained elsewhere than within the District of Columbia, to be made on the basis of itemized vouchers or invoices prepared by the Procurement Division and sent through the appropriate field offices to the disbursing officers for the agencies involved, who are hereby authorized to make payment based (1) upon certification of the Procurement Division, which shall include the specific statement that the vouchers are issued pursuant to and in conformity with purchase orders or requisitions duly executed by the agency billed, and (2) upon approval and certification of such vouchers by the agency billed, which action shall be based upon acceptance of the Procurement Division certification as made, subject to later adjustment if necessary, the responsibility of the authorized certifying officer, under the Act of December 29, 1941, as amended, to be limited to the availability of the funds to be charged] (*Act of Apr. 22, 1944, Public Law 293; Act of June 28, 1944, Public Law 375*).

EXPLANATORY STATEMENT

General Statement

The civil functions administered by the War Department consist of a group of activities only indirectly related to the active military establishment and are gathered under a separate head in the Budget to distinguish them from Army activities.

Appropriations for The Panama Canal are included in this chapter of the Budget, because The Panama Canal, while not a part of the War Department, is under direct supervision of the Secretary of War.

Civil Functions

QUARTERMASTER CORPS

The Secretary of War has the responsibility for acquiring land for and maintaining national cemeteries and marking the graves of soldiers and war veterans. These activities have been delegated to the Quartermaster General and are financed by the appropriation "Cemeterial expenses." The increase of $554,400 anticipates a heavier load of operation and maintenance.

SIGNAL CORPS

The Signal Corps of the Army maintains a communication system between the United States and Alaska and within Alaska, which handles commercial messages. The system now consists of a radio network with 41 stations in Alaska and 1 at Seattle, Wash. The estimate for the fiscal year 1946 provides for maintenance and operation of the system on the existing level.

CORPS OF ENGINEERS

The Corps of Engineers is generally responsible for maintenance and improvement of rivers, harbors, and waterways throughout the country in the interest of navigation and control of floods. The appropriations necessary to carry on these activities provided from the general fund are carried under the General Public Works Program (pp. 697–702). The accounts of the Corps of Engineers carried in this chapter are those special and trust funds for carrying out functions related to waterway improvement.

The Panama Canal

Appropriations for The Panama Canal provide funds for the maintenance and operation of the Panama Canal and for sanitation and government of the Canal Zone. While the table above shows the 1946 estimates as a decrease of $40,779 below the 1945 estimates, a full picture of the workload is not reflected in these figures because the sum of $16,192,597 was carried forward from prior years for use in 1945, whereas the sum of $14,540,717 is recommended to be carried forward from prior years in 1946. Taking into consideration the sums carried forward from prior years, the estimate represents a decrease from 1945 to 1946 of $1,692,659.

Trust Account

The United States Soldiers' Home at Washington, D. C., provides domiciliary and medical care to former soldiers of the Regular Army who qualify for admission under physical and age eligibility requirements. The home is supported by monthly contributions of the soldiers of the Regular Army, courts-martial fines, forfeitures of enlisted men and warrant officers, and interest on the principal. The increase in the estimate is attributed principally to $45,000 recommended for planning necessary post-war construction.

ESTIMATES OF APPROPRIATIONS

MILITARY ACTIVITIES

NOTE.—Because of possible material changes in war conditions, the estimates of appropriations in detail for the fiscal year 1946 will be submitted to the Congress as a part of a supplementary budget in the spring of 1945. However, the summary financial statements include an estimate of total war appropriations and expenditures for the fiscal year 1946 as well as for the fiscal year 1945.

CIVIL FUNCTIONS OF THE WAR DEPARTMENT

EXPLANATORY STATEMENT

National Advisory Committee for Aeronautics

No additional funds are required in 1946 for construction work at the Committee's three laboratories. The existing appropriations are available until expended and it is expected that the construction program will be substantially complete by the end of fiscal year 1945.

Tennessee Valley Authority

The Tennessee Valley Authority is a corporate regional agency of the Government of the United States. It was created in 1933 to regulate the Tennessee River system for flood control, navigation, and power production; to operate the Government's plants at Muscle Shoals, Ala., for the production of fertilizer and munitions; and to cooperate with Federal, State, and local governmental agencies in the complete and unified development of the natural resources of the region. In 1946 it will have in operation 28 major power projects, of which 22 are dams and 6 are steam electric plants.

The Authority is financed from congressional appropriations, unobligated balances of prior year appropriations, and proceeds from the sale of electric power, fertilizer, munitions, and other products.

During 1946 an appropriation of $9,850,000 and an unobligated balance of prior-year appropriations of $9,631,000 will be required to finance programs for the development of the resources of the valley and all additions to capital plant other than direct-power facilities in major projects, transmission lines, and power and chemical inventories.

Corporate funds will be utilized to finance construction of all direct-power facilities in major projects and transmission lines, additions to power and chemical inventories, operation of multipurpose reservoirs, the direct cost of all power-system operations, the operation of all fertilizer

and munitions production facilities, and the scheduled retirement of funded debt. These programs, together with reimbursable services performed for other agencies, will require $40,422,000 of available corporate funds, estimated at $50,438,000 for the year. The remaining $10,016,000 will be reserved for operating contingencies and payments into the Treasury. Thus, the complete operations of the Tennessee Valley Authority for fiscal year 1946 will require a total of $59,903,000.

Capital improvements to be made during the year total $21,102,000, of which $7,980,000 is for continued construction of and additions to unified river development projects; $6,696,000 for transmission facilities; $5,880,000 for additions to chemical plants, and $546,000 for general plant and equipment.

Veterans' Administration

The estimate provides for major repair and reconditioning of existing veterans' facilities, including necessary extension and enlargement of related service facilities due to increased capacity or utilization of such facilities. Provision also is made for additions to existing facilities which will provide 3,945 more beds, of which 1,845 will be for general medical and surgical patients, and 2,100 will be for tuberculous patients; and for the construction of 18 new facilities with a total bed capacity of 10,155, of which 2,700 beds will be for psychotic patients, 6,155 for general medical and surgical patients, and 1,300 for tuberculous patients.

Federal Works Agency

Public Roads Administration.—The estimates for the fiscal year 1946 represent the Federal share of the cost of the work on which payments will have to be made during that year. Although the estimates cover amounts for the regular programs of Federal-aid highways, Federal-aid secondary roads and the elimination of grade crossings, most all of the work to be paid for during 1946 is in connection with construction on the strategic highway network. Approximately $14,000,000 of the estimates cover the Federal share of the costs of surveys and plans for construction of highways.

Department of Agriculture

The appropriation for "Forest roads and trails" under public works provides for forest highways, which are primarily important to the States and counties within or adjacent to the national forests, and which are a part of the Nation's transportation system. It also provides for forest roads and trails which are open to public travel, but are constructed primarily for the management and protection of the national forests.

The 1946 Budget includes an estimate of $10,133,000 as compared to the 1945 appropriation of $3,619,106 plus a carry-over of 1944 appropriations in the amount of $619,586. The estimate for 1946 provides $4,418,778 for the necessary maintenance work, and $5,714,222 for construction of forest highways. No new construction work was provided for in fiscal year 1945.

Department of the Interior

The 1946 public works program of the Department includes projects of the Bonneville Power Administration, the Indian Service, and the Bureau of Reclamation.

Bonneville Power Administration

The Administration, created by the Bonneville Project Act of 1937, is responsible for the construction, operation, and maintenance of electric transmission lines, substations, and other facilities and structures for transmitting and marketing electric energy for sale from the Bonneville and Grand Coulee projects and, upon completion, from the Hungry Horse Dam, to existing and potential markets; for the exchange of electric energy; and for the interconnection of the Federal projects with other systems now or hereafter constructed.

Revenues of the Administration from the sale of electric energy during the fiscal year 1944 were $20,893,364. During the fiscal year 1945, on the basis of present war conditions, it is estimated that revenues will be in excess of $22,000,000. Estimated revenues for the fiscal year 1946 will be $20,325,000. In line with the stated policy of Congress that the benefits of low-cost electric power shall be distributed fully in the area, the Administration is developing an intensive marketing program to offset the eventual loss of war loads and to increase the possibilities of full post-war employment in the Pacific Northwest. A successful marketing program of this nature will insure full utilization of dams and transmission facilities in which the Federal Government has invested about $340,000,000, including $77,000,000 for transmission facilities of the Bonneville power transmission system.

The present transmission system consists of 2,518 circuit miles of transmission lines, ranging upward to 230,000 volts, and 45 substations. Extensions and additions to be completed during fiscal year 1945 will increase the number of circuit miles to 2,725, and the number of substations to 46. On the completion of the 1946 construction program, it is estimated that 3,169 circuit miles of transmission lines will have been energized and 53 substations will be in operation. The construction program for the fiscal year 1946 is expected to require $15,811,000. For operation and maintenance of the electric system and pertinent facilities and for the marketing of power, it is estimated that $4,206,690 will be required.

Bureau of Indian Affairs

This chapter of the Budget also contains the estimates for construction of irrigation systems and for construction and maintenance of roads on Indian reservations. Appropriations totaling $2,319,250 are recommended for these projects; 1945 appropriations for such projects total $1,105,690, exclusive of overtime pay. The amount recommended for roads is primarily for routine and deferred maintenance; it provides no funds for emergency repairs resulting from flood damage and other natural contingencies.

Bureau of Reclamation

The estimates for 1946 are intended to provide funds to enable the Bureau to complete the reorganization of its administrative offices, make substantial progress on its plans and investigations for post-war construction, and complete construction of several irrigation projects approved by the War Production Board. No funds are recommended for the initiation or resumption of construction of any major undertaking.

In recent years, funds for the administrative expenses of the Bureau have been included in four appropriations and under various project limitations, in addition to which there have been substantial balances available from prior

years' appropriations. Coincident with the reorganization of the Bureau offices, it is recommended that only one salary and expense annual appropriation be made for other than project offices. The estimate of $4,000,000 for 1946 compares with a total of $3,428,000, excluding overtime, available in 1945 from appropriations, limitations, and carry-over.

Recognizing the need for the Bureau of Reclamation to be prepared to resume either its normal peacetime program or an accelerated program in the post-war period, the estimates for general investigations provide for preconstruction activities, including the preparation of plans and specifications for newly authorized projects, and for continuing field studies and completing reports of river basins and projects to determine the feasibility of their development. The amount of $6,000,000 recommended for 1946 represents an increase of 89 percent over the $3,173,000, excluding overtime but including carry-over, available for field studies and reports in 1945. The additional funds will be used primarily for the preconstruction activities.

All construction work approved by the War Production Board which is now under way will be continued or completed in the fiscal year 1946. Estimates for 1946 aggregate $29,008,500 for 18 projects which, combined with a $15,000,000 carry-over, will support a total program of $44,000,000. Appropriations for construction in the 1945 Interior Department Appropriation Act total $15,882,200; carry-over funds are $40,549,600; the supplemental appropriation is $3,876,000, which, less $1,789,000 overtime, has made available $58,518,800 for the current fiscal year program. Included in the construction estimates for 1946 for the Columbia Basin project are funds required to complete the studies, plans, and specifications for beginning the irrigation features of the project and for the initial purchase of lands for farm development under the Columbia Basin Project Act of 1943.

Department of State

The 1946 public-works program for this Department includes $1,466,000 for the Foreign Service buildings fund, an increase of $1,246,000 over the amount appropriated for 1945. Of the estimate of $1,466,000, the sum of $850,000 is to enable the Department to undertake a special property purchasing program, particularly in the devastated cities of Europe, where rezoning may make it advisable to relocate our foreign mission offices.

There is also included the sum of $1,249,500 for work of the International Boundary Commission, United States and Mexico, along the Rio Grande. While no funds, except those for emergency flood control, were appropriated for this purpose in 1945, $353,000 of prior year balances was available for the flood-control project. In addition to continuing this latter project at an accelerated rate, the 1946 program proposes the undertaking of deferred work on the canalization and rectification projects.

War Department

The Corps of Engineers, United States Army, under the supervision of the Secretary of War, is generally responsible for maintenance and improvement of rivers, harbors, and waterways throughout the country in the interests of navigation, control of floods, and related hydroelectric power development.

Navigation works: The funds for maintenance and operation of completed works and for surveys contained in the 1946 Budget estimates amount to $47,388,000 including $6,315,000 for the construction of two hopper dredges.

In view of the general curtailment of construction work during the current emergency, the amount included for improvement work is only $3,970,000.

Flood control: In 1917 the Corps of Engineers, in compliance with an act of Congress, extended its work in connection with rivers and harbors to include the undertaking of flood-control works on the lower Mississippi River and the Sacramento River.

The authorized appropriation for flood protection of the lower Mississippi River is $662,982,000, exclusive of maintenance, of which about $184,000,000 remains to be appropriated. The $30,000,000 proposed for the fiscal year 1946 provides for full maintenance of the navigation channel and flood-control works and continuation of the improvement project.

The authorized Federal expenditure for the Sacramento River, Calif., flood-control project is $30,750,000, of which $2,105,000 remains to be appropriated. The estimate of $2,050,000, included for fiscal year 1946, provides for completing all essential portions of the project.

In 1936 the Congress adopted a national flood-control policy and assigned the construction program to the Corps of Engineers. Shortages of manpower, machines, and materials resulting from the war situation have necessitated curtailment of a number of projects. The amount of $7,044,000 is included in the 1946 Budget estimates for resuming work on projects important to the war, or where additional work is required to prevent serious damage to structures constructed at large Government expense. The funds included for essential maintenance, repairs, and surveys during fiscal year 1946 is $6,993,000.

Statement of proposed expenditures for purchase, maintenance, repair, and operation of passenger-carrying vehicles, for the fiscal year ending June 30, 1946, as required by 5 U. S. C. 78

TENNESSEE VALLEY AUTHORITY

Appropriation	Vehicles to be purchased (motor unless otherwise indicated)		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Total maintenance, repair, and operation, all vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund			[1] 171	$51,300		611	$274,682	For use of officials and employees of the Tennessee Valley Authority. All automobiles are pooled in 1 fleet and issued to individual employees when such means of transportation is the most economical and advantageous to the Government. The principal users are field engineers and geologists, land buyers and appraisers, inspectors, supervisors, and administrative officers. Reconnaissance body vehicles are used primarily by engineering field parties for survey and engineering work in reservoir sites, valley mapping, transmission-line surveys and construction.

Bureau of Reclamation

Reclamation Fund, Special Fund, Construction—

Construction: For continuation of construction *of the following projects,* and for general investigations [and administrative expenses, of the following projects] *and salaries and expenses (other than project offices)* in not to exceed the following amounts, [respectively, to be expended from the reclamation fund in the same manner and for the same objects of expenditure as specified under the caption "Bureau of Reclamation", under the head "Administrative provisions and limitations", but without regard to the amounts of the limitations therein set forth,] all to be reimbursable under the reclamation law, and to remain available until expended (*Act of June 28, 1944, Public Law 369*):

Salaries and expenses (other than project offices): For expenses necessary during the fiscal year 1946, including personal services in the District of Columbia, in the administration and performance by other than project offices of Bureau of Reclamation functions, $4,000,000; to be available for the purposes, among others, specified under the head "Operation and maintenance administration," Bureau of Reclamation, in the Department of the Interior Appropriation Act, 1945, and reimbursable (1) as to expenditures for operation and maintenance administration to the same extent as is provided under said head, and (2) as to other expenditures to the extent provided by subsection O of section 4 of the Act of December 5, 1924 (43 U. S. C. 377): Provided, That in addition to the foregoing amount there shall be available for expenditure under this appropriation any sums transferred thereto for work performed or to be performed for the benefit of specific projects or undertakings for which other funds or appropriations are available: Provided further, That the unobligated balances on June 30, 1945, of appropriations heretofore made under the "Reclamation fund, special fund, construction, administrative expenses," and under the "General fund, construction, administrative expenses," shall no longer remain available for obligation after June 30, 1945 (16 U. S. C. 810; 25 U. S. C. 409; 30 U. S. C. 83, 84, 141, 149, 191; 43 U. S. WAR DEPARTMENT, CIVIL FUNCTIONS

Corps of Engineers

RIVERS AND HARBORS AND FLOOD CONTROL

To be immediately available and to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers, and to remain available until expended: *Provided*, That the services of such additional technical and clerical personnel as the Secretary of War may deem necessary may be employed only in the Office of the Chief of Engineers, to carry into effect the various appropriations for rivers and harbors and flood control, surveys, and preparation for and the consideration of river and harbor and flood control estimates and bills, to be paid from such appropriations: *Provided further*, That the expenditures on this account for the fiscal year [1945] *1946* shall not exceed [$760,000] *$662,000*, and the Secretary of War shall each year, in the Budget, report to Congress the number of persons so employed, their duties, and the amount paid to each: *Provided further*, That any appropriation for civil functions under the Corps of Engineers for the fiscal year [1945] *1946* shall be available for contracting in such manner as the Secretary of War may determine to be in the public interest without regard to the provisions of section 3709 of the Revised Statutes or section 3 of the River and Harbor Act of August 11, 1888.

[Rivers and harbors and flood control: The limitation contained in the War Department Civil Appropriation Act, 1945, under the head "Rivers and harbors and flood control" on expenditures from the various appropriations for rivers and harbors and flood control for the payment of services of technical and clerical personnel in the office of the Chief of Engineers is hereby increased for the fiscal year 1945 from $760,000 to $788,500.]

RIVERS AND HARBORS

Maintenance and Improvement of Existing River and Harbor Works—

For the preservation and maintenance of existing river and harbor works, and for the prosecution of such projects heretofore authorized as may be most desirable in the interests of commerce and navigation; for survey of northern and northwestern lakes and other boundary and connecting waters as heretofore authorized, including the preparation, correction, printing, and issuing of charts and bulletins and the investigation of lake levels; for prevention of obstructive and injurious deposits within the harbor and adjacent waters of New York City; for expenses of the California Débris Commission in carrying on the work authorized by the Act approved March 1, 1893, as amended (33 U. S. C. 661, 678, and 683); for removing sunken vessels or craft obstructing or endangering navigation as authorized by law; for operating and maintaining, keeping in repair, and continuing in use without interruption any lock, canal (except the Panama Canal), canalized river, or other public works for the use and benefit of navigation belonging to the United States, including maintenance of the Hennepin Canal in Illinois; for payment annually of tuition fees of not to exceed fifty student officers of the Corps of Engineers at civil technical institutions under the provisions of section 127a of the National Defense Act, as amended (10 U. S. C. 535); for examinations, surveys, and contingencies of rivers and harbors; for the execution of detailed investigations and the preparation of plans and specifications for projects heretofore or hereafter authorized; for printing and binding, newspapers, lawbooks, books of reference, periodicals, and office supplies and equipment required in the Office of the Chief of Engineers to carry out the purposes of this appropriation, including such printing as may be authorized by the Committee on Printing of the House of Representatives, either during a recess or session of Congress, of surveys authorized by law, and such surveys as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress, and for the purchase, *in the fiscal year 1946*, of *not to exceed* two hundred motor-propelled passenger-carrying vehicles and five motorboats: *Provided*, That no part of this appropriation shall be expended for any preliminary examination, survey, project, or estimate not authorized by law, [$51,344,000] *$41,358,000*: *Provided*, That from this appropriation the Secretary of War may, in his discretion and on the recommendation of the Chief of Engineers based on the recommendation by the Board of Rivers and Harbors in the review of a report or reports authorized by law, expend such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality, or other public agency, outside of harbor lines and serving essential needs of general commerce and navigation, such work to be subject to the conditions recommended by the Chief of Engineers in his report or reports thereon: *Provided further*, That no appropriation under the Corps of Engineers for the fiscal year [1945] *1946* shall be available for any expenses incident to operating any power-driven boat or vessel on other than Government business[: *Provided further*, That $700,000 of the appropriation "Maintenance and improvement of existing river and harbor works" is hereby repealed].

EXPLANATORY STATEMENT

General Statement

The Federal district, designated as the District of Columbia, constitutes a political entity which exercises not only municipal but also county and State functions, such as public education, administration of justice, maintenance of the National Guard, promotion of family welfare, care of the indigent, custody of mental defectives and delinquents, protection of the interests of labor, metropolitan area planning, and so forth. Therefore, while acting in most matters as a city council for the District of Columbia, the Congress likewise acts in the capacity of a county board and a State legislature in dealing with the broader aspects of the District government.

Under the Constitution, Congress is empowered "to exercise exclusive legislation in all cases whatsoever" over the District of Columbia as the seat of government of the United States. In this connection, Congress enacts the local revenue measures and appropriates the money thus raised to carry on the functions of the District government. Approximately 90 percent of the money is derived from local taxation and the remainder is paid by the Federal Government in the form of a lump sum of $6,000,000. Under the law, Congress requires that District estimates of appropriations be submitted to the Bureau of the Budget for scrutiny, processing, and incorporation with the estimates of the Federal agencies in the Budget of the United States. Furthermore, while District revenues from all sources are covered into the United States Treasury to the credit of one of the following funds, namely, the general fund, the highway fund, the water fund, or various trust funds, no expenditures can be made from any of these funds (other than trust funds) without specific appropriation by Congress.

The Bureau of the Budget does not examine the estimates of the District of Columbia in minute detail, but confines its attention more to matters of policy which concern the Federal Government, such as the revenue estimates, the allocation of capital outlay moneys, the orderly repayment of District indebtedness to the Federal Government, the amount of the Federal lump-sum payment, the adequacy of reserves to finance public works programs, and the balancing of the District budget.

Revenues

Estimates of revenues for the general, highway, water, and trust funds are to be found in Supporting Statement No. 1.

General fund revenues amount to nearly 80 percent of the total revenues for the District. These revenues continue unusually large because of the increase in population, property values, and business profits occasioned by the war. It is expected that the 1946 revenues will continue with little change, inasmuch as the population has become relatively stabilized as a result of the decentralization of Federal agencies and the leveling off of the employment programs of the war agencies. The largest item of revenue in the general fund is the real property tax, amounting to approximately 50 percent. The levy is based on an estimated assessed valuation of $1,390,000,000 taxed at the rate of $1.75 per hundred dollars. This valuation is $10,000,000 higher than that for the current year. Other important items in the 1946 general fund revenues are the tangible personal tax, the corporate income tax, the individual income tax, the motor vehicle personalty tax, and public utility taxes, all of which are expected to continue their present high yields.

Revenues for the highway fund have been affected by certain war-related circumstances. Since 1943 the gas tax, which provides the bulk of the revenues for the highway fund, has produced only some 70 percent of the amount realized in 1942. No further decline occurred in 1944 and no changes for 1945 or 1946 are anticipated. Other sources of revenue for the highway fund such as the registration of motor vehicles, and issuance of drivers' permits, are expected to approximate their present volume.

The water fund revenue estimates reflect little change in 1946 over 1945.

Appropriations

Estimates of appropriations for the District of Columbia from the general, highway, water, and trust funds in 1946 are shown in Supporting Statement No. 2 and summarized for comparative purposes in the table at the beginning of this chapter.

General fund estimates for 1946 show an over-all decrease of 3 percent below 1945 appropriations exclusive of overtime pay. This difference, however, includes an increase of about 2 percent in operating expenses, a decrease of 98 percent in the District debt service (general fund only), and about a 25-percent increase in capital outlays, including plans, construction, and purchase of sites.

COMPENSATION AND RETIREMENT FUND EXPENSES

Under this head the 1946 estimates show a decrease of approximately 7 percent below the 1945 appropriations. The decrease is due primarily to a lowering of the amount to be paid by the District of Columbia into the civil service retirement fund.

DISTRICT DEBT SERVICE

The 1946 estimates for debt retirement under the general, highway, and water funds represent a decrease of about 92 percent below the 1945 appropriations. They include the reimbursement of the United States for land purchases made for the District of Columbia for park, parkway, and playground purposes by the National Capital Park and Planning Commission under authority of the Capper-Cramton Act and repayments on defense loans for highway- and water-fund projects from the Federal Works Administrator.

PUBLIC WORKS INVESTMENT FUND

In addition to completing the amortization of small amounts of current indebtedness, the District again proposes to appropriate practically all of its remaining estimated surplus, amounting to $5,000,000, for investment in Federal securities as a reserve for public works to be constructed as soon as priorities will permit. This sum will increase the amount in the fund to $10,000,000.

REGULATORY AGENCIES

The 1946 estimates for this group of agencies is 5 percent more than the 1945 appropriations. The additional amounts requested are required to care for increased workloads in practically all of the regulatory agencies.

PUBLIC SCHOOLS

While the school population of the District of Columbia continues to decline during the present emergency, despite the great influx of war workers, the necessity for providing

additional school facilities in new residential areas requires a net increase in the 1946 estimates of 9 percent over the 1945 appropriations, principally for the construction of new buildings and staffing newly completed schools.

PUBLIC LIBRARY

The 1946 estimates under this head show a 23-percent increase over the 1945 appropriations and include additional amounts for operating expenses, for completing the first unit of the new main library building, for plans and specifications for a number of new branch libraries, and for additional branch library sites.

RECREATION DEPARTMENT

The 1946 estimates under this head reflect a net increase of 9 percent, principally for additional playground staffs.

DEPARTMENT OF CIVILIAN DEFENSE

This agency will be terminated as of June 30, 1945.

HEALTH DEPARTMENT

This activity includes the maintenance of various clinical services, the inspection of food and sanitation, the operation of the Tuberculosis Sanatorium, the Gallinger Municipal Hospital, and the latter's Upshur Street annex, and the support of certain medical charities. The declining indigency rate in the District appears to be somewhat offset by the increased needs of a wartime expanded population. Accordingly, the 1946 estimates for these activities show a net increase of 19 percent over 1945. This increase will provide for additional preventive and protective services, additional staff for District hospitals, and a new pediatrics building and laboratory for Gallinger Municipal Hospital.

PUBLIC WELFARE

The Board of Public Welfare has general supervision over dependents, delinquents, and defectives in the District of Columbia. While some increases are proposed for operating expenses for child care, the juvenile correctional service, and the District Training School, these increases are more than offset by large decreases due to nonrecurring capital outlay items.

PUBLIC WORKS

Under this head are grouped the offices, divisions, and departments subject to the direction of the Engineer Commissioner. The divisions and departments which are supported by highway-fund or water-fund revenues are specifically designated.

The estimates for public works activities payable from the general fund show a 15-percent net increase over current appropriations. This increase includes additional operating expenses for the office of Superintendent of District buildings; additional staff for the Surveyor's office and the Department of Inspections; additional operating and capital outlay costs for the Electrical Division, relating to the District government's communication systems; additional cars for the Central Garage; additional funds for street cleaning, removal of refuse, and construction of an additional incinerator and a refuse transfer station; and additional outlays for maintenance of the District's sewer system.

The estimates for projects payable from the highway fund show an apparent net increase of 21 percent over current appropriations. The reappropriation for 1945 of a number of unobligated 1943 balances, however, more than offsets this apparent increase. Of the total amount payable from the highway fund, there is, over 1945, a 25 percent increase for the Street and Bridge Divisions, a 28 percent increase for the Department of Vehicles and Traffic, and a 14 percent increase for Trees and Parking Division.

Public works items payable from the water fund (exclusive of the Washington Aqueduct which is treated below) show increases over 1945 of 6 percent for maintenance and 230 percent for capital outlays, chiefly for new mains and reservoirs.

WASHINGTON AQUEDUCT

The estimates for this service, which is under the direction of the local field office of the United States Corps of Engineers, are 4 percent in excess of the 1945 appropriations and will provide for additional maintenance costs and substantial capital improvements in the system, which is now being required to furnish a considerably increased volume of water to the District of Columbia.

NATIONAL ZOOLOGICAL PARK

The estimate for this agency (which is a part of the Smithsonian Institution) indicates a net increase of nearly 11 percent over the 1945 appropriation and is required to meet rising maintenance costs and to pay for additional equipment and structural improvements.

SUMMARY OF OPERATIONS

The financial requirements of the District of Columbia are summarized in the tables which follow this statement. It will be noted from the summary of operations that the 1946 general fund expenditure program, excluding overtime pay, debt service, public works reserves, and capital outlays, is within current revenues. Previously accumulated surpluses are to be used to complete repayment on the outstanding portion of the advances made by the Federal Government in connection with the acquisition of land in the District of Columbia, to establish additional reserves for future public works programs, and to undertake additional capital outlay programs. The estimated surplus at the close of 1946 is reserved entirely for repayment in 1947 of advances to be made by the Treasury during 1945 and 1946 for the acquisition of park, parkway, and playground land in the District of Columbia. The 1946 highway fund program, while substantially in excess of current revenues, contemplates the use of previously accumulated surpluses to pay for the proposed capital outlay items. Upon completion of the expanded 1946 water fund program, it is estimated that there will still be a reasonable balance to carry over into the following fiscal year. Trust fund balances are expected to continue without much change, the District unemployment compensation fund balance constituting the bulk of the total.

By the close of the fiscal year 1946, the District of Columbia will, in addition to being free from debt, have a $10,000,000 reserve for a post-war public works program.

Capital Outlay, Street and Bridge Divisions, Highway Fund, District of Columbia—

Capital outlay, Street and Bridge Divisions (payable from highway fund): For personal services and all expenses necessary for the grading, surfacing, paving, repaving, widening, altering, and otherwise improving streets, avenues, roads, and alleys, including curbing and gutters, directional and pedestrian islands at various intersections to permit of proper traffic-light control and channelization of traffic, drainage structures, culverts, suitable connections to storm-water sewer system, retaining walls, replacement and relocation of sewers, water mains, fire hydrants, traffic lights, street lights, fire-alarm boxes, police-patrol boxes, and curb-line trees, when necessary, Federal-aid highway projects under section 1 (b) of the Federal-Aid Highway Act of 1938, and highway structure projects financed wholly from the highway fund upon the approval of plans for such structures by the Commissioners; for carrying out the provisions of existing laws which authorize the Commissioners to open, extend, straighten, or widen streets, avenues, roads, or highways, in accordance with the plan of the permanent system of highways for the District of Columbia, and alleys and minor streets, and for the establishment of building lines in the District of Columbia, including the procurement of chains of title; and for assessment and permit work, paving of roadways under the permit system, and construction of sidewalks and curbs around public reservations and municipal and United States buildings, including purchase or condemnation of streets, roads, and alleys, and of areas less than 250 square feet at the intersection of streets, avenues, or roads in the District of Columbia, to be selected by the Commissioners, [$1,825,000, together with $970,000 of the unexpended balance of the appropriation contained in the District of Columbia Appropriation Act, 1943, for the South Capitol Street Bridge and $200,000 of the unexpended balances of the appropriations contained in the District of Columbia Appropriation Act, 1943, and the Third Supplemental National Defense Act, 1942, for grading, paving, repaving, surfacing, and otherwise improving streets, avenues, and roads as Federal-aid highway projects under section 1 (b) of the Federal Aid Highway Act of 1938 is hereby made available for engineering and economic investigations of projects for future construction and for surveys, plans, specifications, and estimates for post-war highway improvements, in accordance with the Defense Highway Act of 1941, as amended by the Act of July 13, 1943, all of said sums] *$2,650,000*, to remain available until June 30, [1946] *1947*: *Provided*, That appropriations contained in this Act for highways, sewers, city refuse, and the Water Division shall be available for snow removal when ordered by the Commissioners in writing: *Provided further*, That the Commissioners are hereby authorized to purchase a municipal asphalt plant at a cost not to exceed $30,000: *Provided further*, That in connection with the highway planning survey, involving surveys, plans, engineering, and economic investigations of projects for future construction in the District of Columbia, as provided for under section 10 of the Federal Aid Highway Act of 1938, and in connection with the construction of Federal-aid highway projects under section 1 (b) of said Act, and highway structure projects financed wholly from the highway fund, this appropriation shall be available for the employment of engineering or other professional services by contract or otherwise, and without regard to section 3709 of the Revised Statutes and the civil service and classification laws, and for engineering and incidental expenses: *Provided further*, That this appropriation shall be available for the construction and repair of pavements of street railways in accordance with the provisions of the Merger Act (47 Stat. 752), and the proportion of the amount thus expended which under the terms of the said Act is required to be paid by the street-railway company shall be collected, upon the neglect or the refusal of such street-railway company to make such payment, from the said street-railway company in the manner provided by section 5 of the Act of June 11, 1878, and shall be deposited to the credit of the appropriation for the fiscal year in which it is collected: *Provided further*, That assessments in accordance with existing law shall be made for paving and repaving roadways, alleys, and sidewalks where such roadways, alleys, and sidewalks are paved or repaved with funds herein appropriated: *Provided further*, That this appropriation may be used for payment to contractors and for other expenses in connection with the expense of design, construction, and inspection of grade-crossing elimination and other construction projects authorized under section 8 of the Act of June 16, 1936 (49 Stat. 1521), and section 1 (b) of the Federal Aid Highway Act of 1938, pending reimbursement to the District of Columbia by the Public Roads Administration, Federal Works Agency, reimbursement to be credited to fund from which payment was made: *Provided further*, That the Commissioners are authorized to fix or alter the respective widths of sidewalks and roadways (including tree spaces and parking) of all highways that may be improved under appropriations contained in this Act: *Provided further*, That no appropriation in this Act shall be available for repairing, resurfacing, or paving any street, avenue, or roadway by private contract unless the specifications for such work shall be so prepared as to permit of fair and open competition in paving materials as well as in price: *Provided further*, That in addition to the provision of existing law requiring contractors to keep new pavements in repair for a period of one year from the date of the completion of the work, the Commissioners shall further require that where repairs are necessary during the four years following the said one-year period, due to inferior work or defective materials, such repairs shall be made at the expense of the contractor, and the bond furnished by the contractor shall be liable for such expense: *Provided further*, That no appropriation in this Act shall be used for the operation of a testing laboratory of the Highway Department for making tests of materials in connection with any activity of the District Government (*Act of June 28, 1944, Public Law 371*).

[SEC. 2. Hereafter the services of draftsmen, assistant engineers, levelers, trainsitmen, rodmen, chainmen, computers, copyists, overseers, and inspectors temporarily required in connection with sewer, water, street, street-cleaning, or road work, or construction and repair of buildings and bridges, or any general or special engineering or construction work authorized by appropriations may be employed exclusively to carry into effect District of Columbia appropriations when ordered by the Commissioners in writing, and all such necessary expenditures for the proper execution of said work shall be paid from and equitably charged against the sums appropriated for said work; and the Commissioners in their Budget estimates shall report the number of such employees performing such services, and their work, and the sums paid to each, and out of what appropriation: *Provided*, That the expenditures hereunder shall not exceed $42,000 during any one fiscal year: *Provided further*, That excluding inspectors in the sewer department, one inspector in the electrical department, and one inspector in the repair shop, no person shall be employed in pursuance of the authority contained in this paragraph for a longer period than nine months in the aggregate during any one fiscal year.]

[Hereafter appropriations for the District of Columbia shall be available for payment by the District of Columbia of its contributions as an employer, in accordance with the provisions of the District of Columbia Unemployment Compensation Act (49 Stat. 946).]

[Hereafter the Commissioners, or their duly designated representatives, are authorized to employ temporarily such laborers, skilled laborers, drivers, hostlers, and mechanics as may be required exclusively in connection with sewer, water, street, and road work, and street cleaning, or the construction and repair of buildings and bridges, furniture and equipment, and any general or special engineering or construction or repair work, at per diem rates of pay to be fixed and adjusted from time to time by a wage board and approved by the Commissioners, and to incur all necessary engineering and other expenses, exclusive of personal services, incidental to carrying on such work and necessary for the proper execution thereof, said laborers, skilled laborers, drivers, hostlers, and mechanics to be employed to perform such work as may not be required by law to be done under contract, and to pay for such services and expenses from the appropriations under which such services are rendered and expenses incurred.]

[SEC. 3. Hereafter all horses, harness, horse-drawn vehicles necessary for use in connection with construction and supervision of sewer, street, street lighting, road work, and street-cleaning work, including maintenance of said horses and harness, and maintenance and repair of said vehicles, and purchase of all necessary articles and supplies in connection therewith, or on construction and repair of buildings and bridges, or any general or special engineering or construction work authorized by District of Columbia appropriations, may be purchased, hired, and maintained, and motortrucks may be hired exclusively to carry into effect said appropriations, when ordered by the Commissioners in writing; and all such expenditures necessary for the proper execution of said work, exclusive of personal services, shall be paid from and equitably charged against the sums appropriated for said work; and the Commissioners in the Budget estimates shall report the number of horses, vehicles, and harness purchased, and horses and vehicles hired, and the sums paid for same, and out of what appropriation; and all horses owned or maintained by the District shall, so far as may be practicable, be provided for in stables owned or operated by said District: *Provided*, That such horses, horse-drawn vehicles, and carts as may be temporarily needed for hauling and excavating material in connection with works authorized by appropriations may be tempo-

rarily employed for such purposes under the conditions named in section 2 of this Act in relation to the employment of laborers, skilled laborers, and mechanics.]

[SEC. 4. Hereafter the Commissioners are authorized to employ in the execution of work, the cost of which is payable from the appropriation account created in the District of Columbia Appropriation Act, approved April 27, 1904, and known as the miscellaneous trust-fund deposits, District of Columbia, necessary personal services, horses, carts, and wagons, and to hire therefor motortrucks when specifically and in writing authorized by the Commissioners, to establish and fix fees to be charged for such work, maintain operating balances, and to incur all necessary expenses incidental to carrying on such work and necessary for the proper execution thereof, including the purchase, exchange, maintenance, and operation of motor vehicles for inspection and transportation purposes; such services and expenses to be paid from said appropriation account or operating balances: *Provided*, That the Commissioners may delegate to their duly authorized representatives the employment under this section of laborers, mechanics, and artisans.]

[SEC. 5. Hereafter the Commissioners and other responsible officials, in expending appropriations for the District of Columbia, so far as possible, shall purchase material, supplies, including food supplies and equipment, when needed and funds are available, in accordance with the regulations and schedules of the Procurement Division of the Treasury Department or from various services of the Government of the United States possessing materials, supplies, passenger-carrying and other motor vehicles, and equipment no longer required. Surplus articles purchased from the Government, if the same have not been used, shall be paid for at a reasonable price, not to exceed actual cost, and if the same have been used, at a reasonable price based upon length of usage.]

[SEC. 6. Hereafter no part of the funds appropriated for the District of Columbia shall be available for the payment of rental of quarters for any activity at a rate in excess of 90 per centum of the per annum rate paid by the District of Columbia for such quarters on June 30, 1933: *Provided*, That the provisions of this paragraph shall not apply to leases made prior to the passage of this Act, except when renewals thereof are made hereafter: *Provided further*, That the appropriations or portions of appropriations unexpended by reason of the operation of this paragraph shall not be used for any purpose, but shall be impounded and deposited in the Treasury to the credit of the District of Columbia.]

[SEC. 7. Hereafter appropriations for the District of Columbia shall be used to pay increases in the salaries of officers and employees by reason of the reallocation of the position of any officer or employee by the Civil Service Commission, and administrative promotions within the several grades: *Provided*, That the total reallocation increases under such appropriations shall not exceed $35,000 in any one fiscal year: *Provided further*, That such reallocation increases and administrative promotions shall be subject to the approval of the Commissioners of the District of Columbia.]

[SEC. 8. Hereafter no part of any District of Columbia appropriations shall be available for any expense for or incident to the issuance of congressional tags except to those persons set out in the Act of December 19, 1932 (47 Stat. 750), including the Speaker and the Vice President.]

SEC. [9] *2.* No part of any appropriation contained in this Act or authorized hereby to be expended shall be used to pay the compensation of any officer or employee of the Government of the United States, or of the District of Columbia unless such person is a citizen of the United States, or a person in the service of the United States or the District of Columbia on the date of the approval of this Act who being eligible for citizenship had theretofore filed a declaration of intention to become a citizen or who owes allegiance to the United States. This section shall not apply to citizens of the Commonwealth of the Philippines or nationals of those countries allied with the United States in the prosecution of the war effort.

SEC. [10] *3.* No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. [11] *4.* Whenever in this Act an amount is specified within an appropriation for a particular purpose or object of expenditure, such amount, unless otherwise specified, shall be considered as the maximum amount which may be expended for said purpose or object rather than an amount set apart exclusively therefor.

[SEC. 12. Hereafter no District of Columbia appropriation shall be used for the payment of premiums or other cost of fire insurance.]

[SEC. 13. Hereafter no part of any appropriation for the District of Columbia, except for public schools, shall be expended for printing or binding a schedule or list of supplies and materials for the furnishing of which contracts have been or may be awarded.]

[SEC. 14. Title VI of the District of Columbia Revenue Act approved July 26, 1939, as amended, is amended by striking out "Until and including June 30, 1944,".]

SEC. [15] *5.* The Commissioners are authorized, under available appropriations in this Act, to contract for stenographic reporting services without regard to section 3709 of the Revised Statutes.

[SEC. 16. Neither the District of Columbia nor any officer thereof acting therefor shall be required to pay court costs in any court in and for the District of Columbia.]

SEC. [17] *6.* Work performed for repairs and improvements under appropriations contained in this Act may be by contract or otherwise, as determined by the Commissioners.

[SEC. 18. Hereafter any revenue now required by law to be credited to the District of Columbia and the United States in the proportion that each contributed to the activity or source from whence such revenue was derived shall be credited wholly to the general fund of the District of Columbia.]

[SEC. 19. If at any time during the fiscal year 1945 the termination of the Act entitled "An Act to provide temporary additional compensation for employees in the Postal Service" approved April 9, 1943, or of the Act entitled "An Act to provide for the payment of overtime compensation to Government employees, and for other purposes", approved May 7, 1943, shall be fixed by concurrent resolution of the Congress at a date earlier than June 30, 1945, the appropriations contained in this Act shall cease to be available on such earlier date for obligation for the purposes of the terminated Act and the unobligated portions of appropriations allocated for the purposes of such terminated Act shall not be obligated for any other purposes of the appropriation during the fiscal year 1945].

SEC. 7. In purchasing motor-propelled or animal-drawn vehicles or tractors, or road, agricultural, manufacturing, or laboratory equipment, or boats, or parts, accessories, tires, or equipment thereof, the Commissioners or their duly authorized representatives may exchange or sell similar items and apply the exchange allowances or proceeds of sales in such cases in whole or in part payment therefor.

SEC. 8. The Commissioners are hereby authorized, in their discretion, to invest at any time in United States Government securities, with the approval of the Secretary of the Treasury, any part of the general fund, highway fund, water fund, or trust funds, of the District of Columbia, not needed to meet expenses during the current fiscal year, to deposit the interest accruing from such investment to the credit of the fund from which the investment was made, and to sell or exchange such securities for other Government securities, and deposit the proceeds to the credit of the appropriate fund (Act of June 28, 1944, Public Law 371).

Relief and Rehabilitation, District of Columbia Workmen's Compensation Act—

This fund is derived from collections of awards against employers made by the United States Employees' Compensation Commission, as compensation for death of employees resulting from injuries, in each case where no person is found to be entitled to such compensation, under the Longshoremen's and Harbor Workers' Compensation Act as extended to certain employments in the District of Columbia. Fines and penalties collected in connection therewith are also credited to the account. One-half of each such collection is available as compensation for injuries increasing previous disabilities, the other half being available for maintenance of employees undergoing vocational rehabilitation. Any portion of the account which, in the opinion of the Commission, is not needed for current requirements, is invested in bonds or notes of the United States or of any Federal land bank, the interest therefrom being credited to this account (*44 Stat. 1444, sec. 44; 33 U. S. C. 944; 45 Stat. 600; 19 D. C. Code, 11, 12*).

EXPLANATORY STATEMENT

The 12 district banks for cooperatives and the Central Bank for Cooperatives (Kansas City, Mo.) were organized to make credit available to farmers' cooperative associations on a business basis and were chartered by the Governor of the Farm Credit Administration pursuant to the provisions of the Farm Credit Act of 1933. The banks were organized and began to function in the year 1933. Their charters provide for continued existence until dissolved by law.

The initial capital of the banks was subscribed by the Governor of the Farm Credit Administration from funds available in the revolving fund established under the Agricultural Marketing Act of 1929. Government-owned capital in the banks amounted to $177,000,000 on June 30, 1944, and the capital stock and guaranty fund subscribed by borrowing cooperative associations amounted to $5,485,700 on that date. During the fiscal year 1944, due to the need for capital funds to meet increased requirements for lending purposes, the Governor of the Farm Credit Administration subscribed to additional capital stock in the banks on behalf of the United States Government in the aggregate net amount of $5,000,000, all of which was paid in to the banks during the year.

The banks for cooperatives obtain a portion of their funds for lending purposes by discounting certain of their paper with the Federal intermediate credit banks, and by borrowing from the Federal intermediate credit banks and commercial banks. The Central Bank for Cooperatives may issue debentures but has never availed itself of the authority.

The receipts, expenditures, and means of financing these banks are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Commodity Credit Corporation, created under the laws of the State of Delaware pursuant to Executive Order 6340 dated October 16, 1933, was organized primarily to make loans to producers to finance the carrying and orderly marketing of agricultural commodities. Its functions as an agency of the United States have been continued from time to time and pursuant to Public Law 240 Seventy-eighth Congress, these functions were continued to June 30, 1945, or such earlier date as may be determined by the President of the United States. The Corporation was transferred to the Department of Agriculture on July 1, 1939, by Reorganization Plan 1 and was made a part of the War Food Administration by Executive Order 9334 of April 19, 1943.

The Agricultural Adjustment Act of 1938, as amended, authorized and directed the Corporation to make loans available at 85 percent of the parity price for the commodities as of the beginning of the marketing year, on the basic commodities cotton, corn, wheat, rice, tobacco, and peanuts up to and including the 1946 crops, provided that producers had not disapproved marketing quotas for such commodities. The act of October 2, 1942, Public Law 729, Seventy-seventh Congress, provided for loans to be made available on these commodities at 90 percent of the parity price at the beginning of the marketing year, until 2 years after the 1st day of January, following a declaration of the termination of the present war, except that the President may fix the loan rate for any such commodity at not less than 85 percent of the parity price if he determines that such loan rate is necessary to prevent an increase in the cost of feed for livestock and poultry and to aid in the effective prosecution of the war. The act of July 1, 1941, Public Law 147, Seventy-seventh Congress, as amended by the act of October 2, 1942, also provides for loans, purchases, or other operations to support the price of those nonbasic commodities for which expansion of production is necessary at not less than 90 percent of the parity or comparable prices therefor during the same period, and also states that it is the policy of the Congress that lending and purchasing operations should be conducted in such manner as to bring the price and income of producers of other nonbasic commodities to a fair parity relationship with other commodities, to the extent that funds are available for such purpose. The act of October 3, 1944, Public Law 457, Seventy-eighth Congress, provides for loans on 1944-crop cotton at the rate of 95 percent of parity. The continued large volume of business of Commodity Credit Corporation arises partly from higher loan rates and purchase prices required by legislation, and partly from activities designed to support the war effort. These include price supports on crops for which expansion of products has been requested, temporary financing of purchases of other essential agricultural commodities from domestic, Canadian, or (in the case of sugar) Caribbean sources.

The Corporation has a capital stock of $100,000,000, all of which is held by the United States, and it is authorized, with the approval of the Secretary of the Treasury, to have outstanding at any one time obligations guaranteed by the United States in an aggregate amount of $3,000,000,000. The Secretary of the Treasury is required to make an appraisal of all assets and liabilities of the Corporation as of June 30 in each year for the purpose of determining its net worth. If the net worth of the Corporation is determined to be less than $100,000,000, the Secretary of the Treasury, subject to appropriation of funds therefor, is required to restore such capital impairment. If the net worth exceeds $100,000,000, such excess is required to be deposited by the Corporation in the Treasury of the United States as "Miscellaneous receipts."

The receipts, expenditures, and means of financing are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

On October 18, 1940, the President of the United States addressed a letter to the Secretary of the Treasury, referring to provisions contained in the Military Appropriations Act 1941, approved June 13, 1940, and the Naval Appropriations Act, 1941, approved June 11, 1940, and ordering allocation of $6,700,000 from the act of June 13, 1940, and $3,300,000 from the act of June 11, 1940, to the Federal Loan Administrator. These funds were to be used for the purchase of the entire capital stock of a corporation to be organized for the purpose of providing for the construction and financing of housing deemed necessary for national defense and for the acquisition and leasing of land in connection therewith. The entire capital stock of the Corporation was required to be issued to and at all times be held by the Federal Loan Administrator for the benefit of the United States.

In accordance with this authority Defense Homes Corporation was formed by incorporation under the laws of the State of Maryland on October 23, 1940.

By Executive Order 9070 dated February 24, 1942, the President directed that the Defense Homes Corporation, its functions, duties, and powers be consolidated with certain other agencies into a National Housing Agency and that the capital stock be transferred from the Federal Loan Administrator to the National Housing Administrator. Transfer of the capital stock was effected on February 27, 1942, and the Corporation is now functioning as a part of the National Housing Agency.

Activities of the Corporation provide permanent housing in defense areas and in so doing supplement functions of other governmental agencies engaged in the public housing program.

Defense Homes Corporation and its functions, duties and powers, including those of the board of directors, are now administered by the Federal Public Housing Commissioner under the direction and supervision of the National Housing Administrator.

The Corporation is authorized to avail itself of services and facilities of the Federal Public Housing Authority upon a reimbursable basis.

In view of the fact that all of the stock of Defense Homes Corporation is beneficially owned by the United States and that the Corporation is engaged in performing a Federal governmental wartime function, it is believed that neither the Corporation nor its property or assets are subject to taxation by the States or their political subdivisions. However, because of the powers vested in the National Housing Agency and the Corporation by Executive Order 9001, as extended by Executive Order 9116, the Corporation is empowered to enter into agreements for public services in lieu of real and personal property taxes. It is therefore the policy of the Corporation to make payment of full real and personal property tax equivalents by agreement with the various States or political subdivisions in which such property is located.

The receipts, expenditures, and means of financing are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

Disaster Loan Corporation was organized February 15, 1937, in accordance with the act approved February 11, 1937. The Corporation has succession until dissolved by act of Congress. The Reconstruction Finance Corporation subscribed and paid for the original capital of $20,000,000. The act approved March 4, 1939, increased the capitalization of the Corporation to $40,000,000, which was subscribed for by the Reconstruction Finance Corporation. The Treasury has reimbursed Reconstruction Finance Corporation for and now owns, all the paid-in capital, which at present amounts to $24,000,000.

In accordance with the act approved March 4, 1939, the Corporation is authorized to make loans as it may determine to be necessary or appropriate because of floods or other catastrophes occurring during the period between January 1, 1936, and January 22, 1947.

The receipts, expenditures, and means of financing are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Federal Crop Insurance Corporation was organized under the act of February 16, 1938, for the purpose of promoting the national welfare by alleviating the economic distress caused by wheat crop failures, due to drought and other causes, by maintaining the purchasing power of farmers.

Public Law 118, Seventy-seventh Congress, approved June 21, 1941, authorized the Federal Crop Insurance Corporation to insure producers of cotton, commencing with the cotton crop planted for harvest in 1942. Also, the act authorized the Corporation to accept in payment of premiums, notes to be payable in the commodity insured, or the cash equivalent, and to purchase for insurance reserve purposes the quantity of the commodity represented by such notes.

The Federal Crop Insurance Act provided that the Corporation should have an authorized capital stock of $100,000,000 to be subscribed by the United States of America. As of June 30, 1944, $40,000,000 had been made available to the Secretary of the Treasury for purchase of capital stock of the Corporation, and this amount had been requisitioned by the Corporation.

The Department of Agriculture Appropriation Act, 1944, Public Law 129, Seventy-eighth Congress, under the item "Federal Crop Insurance Act," provided an appropriation of $3,500,000 and stated in part that: "* * * no part of this appropriation shall be used for or in connection with the insurance of wheat and cotton crops planted subsequent to July 31, 1943, or for any other purpose except in connection with the liquidation of insurance contracts on wheat and cotton crops planted prior to July 31, 1943."

This provision was interpreted to mean that insurance on both 1943 cotton and wheat crops would remain in full force and effect; that existing 3-year wheat contracts could not cover crops for harvest in 1944 or 1945; that new wheat applications already signed for the 3-year period 1944–46 could not go into effect even though they had been accepted; and that cotton crop insurance could not be offered for 1944.

The Department of Agriculture Appropriation Act, 1945, Public Law 367, Seventy-eighth Congress (58 Stat. 451) under the item "Federal Crop Insurance Act" provided a reappropriation of $350,000 from the fiscal year 1944 unobligated balance for the continued liquidation of the program.

The estimates of receipts and expenditures in the foregoing statement for the fiscal years 1945 and 1946 are limited to those involved in the liquidation of insurance relating to the 1943 and prior crops.

Public Law 551, approved December 23, 1944, amended the Federal Crop Insurance Act to authorize the insurance of wheat, cotton, and flax for 1945 and trial insurance on corn and tobacco for 1945 in not more than 20 representative counties for each. This law further provides for insuring other crops on a trial basis with the limitation that not more than three additional crops may be added in any one succeeding year. This act also reappropriated an additional $3,000,000 for the fiscal year 1945 from the unexpended balances of the 1943 and 1944 appropriations. Estimates of receipts and expenditures for the operations authorized by Public Law 551 are not available at this time and are not included in the 1945 and 1946 estimates in the foregoing statement.

EXPLANATORY STATEMENT

The Federal Deposit Insurance Corporation was created under provisions of section 8 of the Banking Act of 1933, and section 101 of the Banking Act of 1935, as amended, (12 U. S. C. 264).

By virtue of the Federal Statute (12 U. S. C. 264–J), the Corporation is a separate body corporate and has succession until dissolved by act of Congress. Its management is vested in a board of directors, appointed by the President with the advice and consent of the Senate (12 U. S. C. 264–B).

The Corporation's primary functions specified by law are (1) to protect up to $5,000 the deposits of each depositor in closed insured banks; (2) to act as receiver for all closed national banks, and all closed insured State banks where the Corporation may be appointed receiver; and, (3) to liquidate the assets of all such closed institutions.

Under the Banking Act of 1935, the Corporation has the responsibility for exercising a general supervision over the entire banking system with a view to strengthening the system by raising the standards of bank operations and the elimination of unsound banking practices, and, pursuant to Executive Order 9148 of April 27, 1942, is responsible for the administration of the Federal Credit Union Act (12 U. S. C. 1751–1771).

The capital stock of the Corporation was purchased and is held as follows: By the Secretary of the Treasury, $150,000,000; by the 12 banks comprising the Federal Reserve System, $139,299,556.99.

The receipts, expenditures, and means of financing are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Federal Farm Mortgage Corporation was created under the act approved January 31, 1934 (12 U. S. C. 1016–1020 (h)), to aid in financing the lending operations of the Federal land banks and the Land Bank Commissioner.

The Corporation, which is wholly owned by the United States, had paid-in capital of $100,000,000 as of June 30, 1944, a repayment to the Treasury in the amount of $100,000,000 having been made in May 1941. This retirement of stock was made in accordance with the President's Budget Message of January 3, 1940, and the provisions of an act approved June 25, 1940, and the proceeds are being held in the Treasury of the United States as a fund available for additional capital subscriptions, if necessary.

The Corporation is authorized to issue and have outstanding at any one time a total of not more than $2,000,000,000 of bonds, which are fully and unconditionally guaranteed by the United States Government. During the fiscal year ended June 30, 1944, the Corporation called for redemption of all its bonds held by the public, amounting to $931,723,600. Redemptions of such bonds were effected to the extent of $888,810,200, and as of June 30, 1944, funds were on deposit with the Treasurer of the United States as fiscal agent for the redemption of the remaining matured bonds amounting to $42,913,400. To partially finance this retirement $375,000,000 of 1-percent bonds were issued to the United States Treasury during the year, of which $365,000,000 remained outstanding on June 30, 1944.

The receipts, expenditures, and means of financing the activities of the Corporation are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Federal Housing Administration was created under authority of the National Housing Act approved June 27, 1934 (48 Stat. 1246), "to encourage improvement in housing standards and conditions, to provide a system of mutual mortgage insurance, and for other purposes." The activities of the Administration in fiscal year 1946 involve the insurance of lending institutions against loss incurred on loans of the following type:

1. Title I (property improvement): Loans for the purpose of repairing, modernizing, and improving property and the building of new structures. Total liability which may be outstanding at any time, plus the amount of claims paid, less the amount collected from insurance premiums and other sources, shall not exceed $165,000,000.

2. Title II, section 203 (mutual mortgage insurance): Loans not in excess of $16,000 secured by mortgages on one- to four-family dwellings. Total insurance liability under this section and section 207 is limited to $4,000,000,000, except that the President may increase the aggregate amount to $5,000,000,000.

3. Title III, section 207 (rental housing insurance): Loans not to exceed $5,000,000 secured by mortgages on large-scale rental properties. Total insurance liability under this section and section 203 is limited to $4,000,000,000, except that it may be increased by the President to $5,000,000,000.

4. Title VI, section 603 (war housing insurance): Loans not to exceed $12,000, secured by mortgages on one- to four-family dwellings constructed in designated critical war areas, and preference of occupancy extended to war workers.

5. Title VI, section 608 (war housing insurance): Loans not to exceed $5,000,000 secured by mortgages on large-scale rental projects.

Total liability under title VI, sections 603 and 608, is limited to $1,700,000,000. Authority to insure new construction under title VI expires June 30, 1945 and after that date only refinancing of former title VI cases under certain conditions will be eligible for reinsurance. The receipts, expenditures, and means of financing of the Administration are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Agricultural Credits Act of 1923 (title II of the Federal Farm Loan Act) provided for the establishment of 12 Federal intermediate credit banks. The 12 banks were chartered by the Federal Farm Loan Board during 1923, their term of existence being unlimited.

The original capital stock of the Federal intermediate credit banks in the amount of $5,000,000 each was subscribed and paid for by the Secretary of the Treasury on behalf of the United States. By an act approved January 31, 1934, an additional sum of $40,000,000 was provided, to be allocated to the capital stock and paid-in surplus of any banks. Late in 1940, in accordance with the Federal budgetary program for the fiscal year 1941, the banks returned the $40,000,000 to the revolving fund in the Treasury, the proceeds of such repayments being held as a fund available for resubscription, if necessary. Thus, on June 30, 1944, the total capital in the banks amounted to $60,000,000.

The principal function of the Federal intermediate credit banks is to supply funds by way of discounts and loans to lending institutions for short- and intermediate-term agricultural loans.

The authority for supervision of the various Federal intermediate credit banks was transferred to the Farm Credit Administration on May 27, 1933, in conformity with the provisions of Executive Order 6084 of March 27, 1933.

The Federal intermediate credit banks have authority, subject to the approval of the Farm Credit Administration, to borrow money from any source and to issue and sell collateral trust debentures or other similar obligations subject to the general limitation that the aggregate amount of such outstanding debentures and similar obligations issued individually by any bank, together with the amount of consolidated debentures issued for its benefit and account, shall not exceed 10 times the surplus and paid-in capital of such bank. As of June 30, 1944, the banks reported total debentures outstanding aggregating $285,040,000.

The Federal intermediate credit banks pay annually to the United States Treasury a franchise tax equivalent to 25 percent of the amount of earnings remaining after absorption of losses and provision for estimated losses, the elimination of any impairment of paid-in capital, and the creation of necessary reserves.

The receipts, expenditures, and means of financing the Federal intermediate credit banks are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The United States Housing Authority was originally created as a body corporate of perpetual duration in the Department of the Interior by the United States Housing Act of 1937, approved September 1, 1937 (50 Stat. 888), to "provide financial assistance to the States and political subdivisions thereof for the elimination of unsafe and insanitary housing conditions, for the eradication of slums, for the provision of decent, safe, and sanitary dwellings for families of low income, for the reduction of unemployment, and the stimulation of business activity * * *." This act was amended by the United States Housing Act amendment of 1938, approved June 21, 1938 (52 Stat. 820). The United States Housing Authority, under Reorganization Plan No. 1, effective July 1, 1939, was transferred from the Department of the Interior to the newly created Federal Works Agency. The United States Housing Authority was authorized by Public, No. 671, Seventy-sixth Congress, approved June 28, 1940 (54 Stat. 676, 681), to use, for the period of the emergency, low-rent housing and slum-clearance funds and projects for war-housing purposes. Under date of February 24, 1942, the President, by Executive Order 9070, consolidated the various housing agencies and functions of the Federal Government into the National Housing Agency. This order provided that the "United States Housing Authority and its functions, powers, and duties shall be administered as the Federal Public Housing Authority," which was stated to be one of the three main constituent units of the National Housing Agency. The order further provided that the Federal Public Housing Authority was to administer nearly all of the public housing necessary for the war effort and also housing projects of the Farm Security Administration serving nonfarm families.

The Authority has a capital stock of $1,000,000 subscribed by the United States and is authorized to issue obligations guaranteed by the United States in an amount not to exceed $800,000,000, and to make contributions in an amount not to exceed $28,000,000 per annum.

The foregoing statement relates to the receipts, expenditures, and means of financing the Authority with respect to its activities under the United States Housing Act of 1937 and Public, No. 671, Seventy-sixth Congress, but not with respect to its housing activities transferred under Executive Order 9070.

EXPLANATORY STATEMENT

The Federal Savings and Loan Insurance Corporation was created pursuant to act of Congress. It is charged with the responsibility of carrying out the provisions of title IV of the National Housing Act approved June 27, 1934 (48 Stat. 1246), as amended, subject to section 7 (a), title IV, of the First Deficiency Appropriation Act, fiscal year 1936 (Public No. 739, 74th Cong., approved June 22, 1936).

The Corporation protects investors and depositors up to $5,000 against loss in the event of default of an insured institution. The Corporation is an instrumentality of the United States.

By Executive Order 9070 dated February 24, 1942, the Corporation was included in the consolidation into the National Housing Agency and is one of the units of the Federal Home Loan Bank Administration, formerly the Federal Home Loan Bank Board. The supervision is now under the direction of a single commissioner, superseding the board of trustees composed of five members.

The Corporation's capital stock of $100,000,000 was purchased and is held by the Home Owners' Loan Corporation.

The receipts, expenditures, and means of financing are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Home Owners' Loan Corporation was created by the act of June 13, 1933, to grant long-term mortgage loans at low interest rates in order that distressed home owners might refinance their homes and, wherever possible, save them from foreclosure.

By subsequent amendments to the original act, the Corporation became the owner of all of the $100,000,000 capital stock of the Federal Savings and Loan Insurance Corporation. It was empowered likewise to use not to exceed $300,000,000 in making certain investments, including shares of savings and loan associations.

The Corporation has a capital stock of $200,000,000 par value owned by the United States and has authority to issue $4,750,000,000 in bonds (exclusive of refunding). All unmatured bonds of the Corporation outstanding are unconditionally guaranteed by the United States Government.

In accordance with the Home Owners' Loan Act of 1933 the Corporation terminated its lending activities on June 12, 1936, and is now principally engaged in servicing the loans outstanding and in managing and disposing of real estate acquired as a result of foreclosure proceedings.

By Executive order, dated February 24, 1942, the Corporation was included in the consolidation into the National Housing Agency, being one of the units of the Federal Home Loan Bank Administration, formerly the Federal Home Loan Bank Board.

The receipts, expenditures, and means of financing are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

Title I of the Farm Credit Act of 1933 authorized and directed the Governor of the Farm Credit Administration to organize and charter 12 production credit corporations, 1 to be established in each city in which a Federal land bank was located.

Paid-in capital of the production credit corporations is furnished by the United States Government from a revolving fund of $120,000,000 appropriated by Congress. As of June 30, 1944, paid-in capital of the corporations totaled $115,000,000, a repayment of $5,000,000 having been made to the revolving fund in April 1944.

The principal function of the production-credit corporations is to organize, provide capital for, and supervise local production-credit associations, which make short-term agricultural loans to their members. As of June 30, 1944, the 12 corporations were supervising the operations of 522 production-credit associations, serving farmers in every rural county in the United States, and owned about 69 percent of the total outstanding stock of the associations.

The receipts, expenditures, and means of financing these corporations are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Reconstruction Finance Corporation was created as a body corporate by the act approved January 22, 1932, for the purpose of providing funds, through loans to be made by the Corporation, to counteract the then-existing restriction of private credit. The enactment creating the Corporation authorized it to extend financial assistance to banks and other financial institutions and to various classes of borrowers for agricultural, commercial, and industrial purposes. The Corporation's powers have been expanded from time to time by subsequent legislation. The succession of the Corporation was originally established at 10 years but has been extended by subsequent legislation to January 22, 1947. The capital stock of the Corporation was originally established at $500,000,000, the stock being subscribed by the Secretary of the Treasury from the proceeds of an appropriation authorized by the act creating the Corporation. The act approved June 25, 1940, authorized the Corporation to retire part of its capital stock, to pay dividends thereon, and to purchase the stock of any Federal home-loan bank held by the Treasury, the amount to be paid to the Treasury for any or all such purposes not to exceed $300,000,000. Pursuant to this act and the President's Budget message of January 3, 1940, relative to excess capital funds of corporations, the Reconstruction Finance Corporation reduced its capital stock to $325,000,000, returning $175,000,000 to the Treasury.

The Corporation was also authorized by the act of its creation to issue a limited amount of notes, debentures, or other such obligations, which authority has been variously increased and decreased by subsequent legislation. The Secretary of the Treasury is authorized to purchase such obligations of the Corporation.

The financing operations of the Corporation are carried out in one of three ways. First, the Corporation is authorized, in its discretion, to make various classes of

loans and to purchase various types of obligations and corporate stock. Second, the Corporation, upon the direction of Congress, is required to provide funds to certain agencies of the Government for the financing of various programs which such agencies are authorized to undertake. Third, the Corporation is authorized, in its discretion, to make loans to and to purchase the capital stock of the subsidiary corporations which, under various amendments of the Reconstruction Finance Corporation Act, it is authorized to create or organize. These various types of operations are indicated in the foregoing statement.

The direct operations of the Corporation include loans to banks, railroads, business enterprises, mining interests, public agencies, agricultural marketing organizations, etc., and purchases of stock in banks, insurance companies, mortgage corporations and corporations engaged in defense activities, as well as the administrative expenses incurred in connection with the operations of the Corporation. Direct receipts include repayments of principal and interest in connection with the foregoing loans and the proceeds accruing from the sale or redemption of obligations purchased.

Funds allocated at the direction or upon the authorization of Congress have been employed to purchase the capital stock of the Disaster Loan Corporation, regional agricultural credit corporations, the Home Owners' Loan Corporation, the Federal home-loan banks, the Export-Import Bank of Washington, the Federal Farm Mortgage Corporation, the RFC Mortgage Company, the Federal National Mortgage Association, and the following corporations created by the Reconstruction Finance Corporation pursuant to section 5d of the Reconstruction Finance Corporation Act, as amended: Defense Plant Corporation, Defense Supplies Corporation, Rubber Reserve Company, Metals Reserve Company, and War Damage Corporation. Funds of the Corporation have also been supplied, other than through capital stock subscriptions, to the Federal Emergency Relief Administration, Farm Credit Administration, Farm Security Administration, Federal Housing Administration, Commodity Credit Corporation, the Rural Electrification Administration, Defense Homes Corporation, and the corporations created by the Reconstruction Finance Corporation pursuant to the said section 5d, and have been used for the purchase of securities from the Federal Emergency Administrator of Public Works and for transfer to the appropriation made by the Emergency Relief Act of 1935. Obligations of the Corporation have been canceled pursuant to the act approved February 24, 1938, in an amount equivalent to most of the funds so provided.

The act approved February 24, 1938, authorized and directed the Secretary of the Treasury to cancel the obligations of the Corporation in an amount equal to the investments or advances of the Corporation made at the direction of Congress to various agencies of the Government, including such advances for relief purposes. The act provides also for the cancelation of obligations as respects future disbursements which may be made within the same categories. The act approved March 28, 1941, directing Reconstruction Finance Corporation to make funds available for the defense housing insurance fund also provides for the cancelation of obligations in an amount equivalent to the funds made available for such purpose. Under the authority of the first-mentioned act, obligations totaling approximately $2,741,000,000 had been canceled as of November 30, 1942.

Reorganization Plan No. I, promulgated by the President pursuant to the Reorganization Act of 1939, provides that Reconstruction Finance Corporation shall be grouped under the Federal Loan Agency and subject to the supervision of the Federal Loan Administrator.

Executive Order No. 9071, dated February 24, 1942, transferred the powers, functions, and duties of the Federal Loan Administrator and the Federal Loan Agency, which related to Reconstruction Finance Corporation and its subsidiaries and affiliates (other than Defense Homes Corporation), to the Department of Commerce, to be exercised under the direction and supervision of the Secretary of Commerce.

Under the act approved June 11, 1942, creating Smaller War Plants Corporation, Defense Plant Corporation, as agent, administers loans and advances made by Smaller War Plants Corporation.

The Contract Settlement Act of 1944 requires the Reconstruction Finance Corporation and its subsidiaries Defense Plant Corporation, Defense Supplies Corporation, Metals Reserve Company, and Rubber Reserve Company to carry out the policies and procedures established therein. This involves termination settlements and interim financing.

Under Executive Order 9425 (February 19, 1944), setting up the Surplus War Property Administration, and Regulation No. 1 of that Administration, Reconstruction Finance Corporation, acting directly or through its subsidiaries has functioned as one of the principal disposal agencies for surplus property. The Surplus Property Act of 1944, approved October 3, 1944, will supersede the Administration with a Surplus Property Board, under whose regulations this Corporation anticipates continued activities.

The receipts, expenditures, and means of financing are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

By authority granted in section 201 (e) of the Emergency Relief and Construction Act of 1932, approved July 21, 1932, the Reconstruction Finance Corporation created 12 regional agricultural credit corporations to make short-term loans direct to farmers and stockmen in the United States. Effective May 27, 1933, Executive Order 6084 transferred supervision of the regional agricultural credit corporations from the Reconstruction Finance Corporation to the Farm Credit Administration.

The stock of these corporations was subscribed and paid for by the Reconstruction Finance Corporation out of the unexpended balance of the amounts allocated and made available to the Secretary of Agriculture under section 2 of the Reconstruction Finance Corporation acts. All of the stock is now held by the Secretary of the Treasury for and on behalf of the United States. By April 30, 1938, the corporations had returned $39,500,000 of their original capital to a revolving fund set up under section 84 of the Farm Credit Act of 1933. In February 1943 this sum was resubscribed and paid in to the Regional Agricultural Credit Corporation of Washington, D. C., to provide funds to meet the needs of borrowers under the war food production program (discussed in a subsequent paragraph), increasing the total capital of the corporations to $44,500,000. This amount remained outstanding on June 30, 1944, but was reduced to $5,000,000 in December 1944 by the retirement of capital in the amount of $39,500,000 which was returned to said revolving fund under the control of the Secretary of the Treasury.

Since May 1, 1934, the regional agricultural credit corporations have been in process of orderly liquidation, the short-term credit needs of agriculture being provided for by other permanent organizations administered by the Farm Credit Administration. In accordance with authority granted by the Farm Credit Act of 1937, the Farm Credit Administration has effected the consolidation or merger of various of the corporations so that on June 30, 1944, only one corporation remained in existence, the Regional Agricultural Credit Corporation of Washington, D. C., located at Kansas City, Mo., with a branch office at Wenatchee, Wash.

The operations of the Regional Agricultural Credit Corporation of Washington, D. C., are of three distinct types: (1) The orderly liquidation of its remaining regular loans, (2) active lending operations of its Wenatchee branch where a special program was established in 1941 for the rehabilitation of the area as an effective and prosperous fruit-growing region, (3) the orderly liquidation of loans made under the original war food production program and the making and collection of loans for the production of specified crops and livestock in certain restricted areas. Active lending operations under the war food production program were discontinued after June 30, 1943, with the enactment of restrictions on the opera-

tion of this program in section 2 of the Department of Agriculture Appropriation Act, 1944 (57 Stat. 428). Since that date no loans and advances have been made except for commitments already outstanding and further loans and advances in aid of collection of the outstanding loans and advances. Pursuant to section 2 of this act, the Secretary of Agriculture, beginning in October 1943 and from time to time thereafter, upon recommendation of the War Food Administrator, has authorized and directed the Regional Agricultural Credit Corporation of Washington, D. C., to make loans in certain regions in 23 States to finance the production of crops and livestock that would otherwise not be produced. Such loans are designated as restricted area loans, 1,146 totaling $3,112,761 having been made through June 30, 1944.

The receipts, expenditures, and means of financing the regional agricultural credit corporations are shown in detail in the foregoing statement.

EXPLANATORY STATEMENT

The Tennessee Valley Authority is a corporate regional agency owned by the Government of the United States. It was created on May 18, 1933, to regulate rivers in the Tennessee Valley for navigation, alleviation of floods, and power production; to manage the Government's munitions plants at Muscle Shoals, Ala., for fertilizer and munitions production and development of new forms of fertilizer; and to cooperate with Federal, State, and local governmental agencies in the complete and unified development of the natural resources of the region.

The TVA program is financed from two major sources: Congressional appropriations and proceeds from revenue-producing operations. Congressional appropriations are used to finance resource development programs and all additions to capital account with the exception of direct power facilities in major projects, transmission lines, and inventories for power and chemical operations. Corporate proceeds are used to finance the operation of dams and reservoirs, direct power system operations, fertilizer and munitions operations, construction of power facilities in major projects and transmission lines, and inventories for power and fertilizer operations. Prior to the fiscal year 1945, congressional appropriations provided the additional funds needed over available corporate proceeds. Starting in the fiscal year 1945, available corporate proceeds are expected to be sufficient to provide all of the funds needed each year for corporate fund purposes and leave a balance for payments into the general fund of the Treasury as provided in section 26 of the Tennessee Valley Authority Act, as amended.

In addition to appropriations and corporate proceeds, the TVA has acquired and constructs certain power properties by the use of bond proceeds and also provides services to other public agencies on a reimbursable cost of service basis.

Total appropriated fund requirements for 1946 of $19,481,000 will be met by a new appropriation of $9,850,000 and by use of an unobligated balance of $9,631,000 reappropriated from the fiscal year 1945. The new appropriation will bring to $677,819,270 the total of appropriated funds thus far made available by the Congress. In 1946 a total of $7,599,000 will be used to finance the resource development programs which are being carried on with the people and local agencies to secure a unified and balanced development of the land, water, and mineral resources of the region. The remaining $11,882,000 will be used for capital investment, including the completion of Kentucky Dam and Reservoir, additions to completed projects and chemical plant, and investigations and surveys.

The estimated requirement of $40,422,000 for activities financed from corporate funds provides for the operation of 22 reservoirs for the purposes of navigation, flood control, and power; the direct cost of all power system operations; and capacity operation of fertilizer and munitions production facilities. It provides $10,540,000 for all scheduled power system construction and for changes in power and chemical inventories. Corporate funds will be used in 1946 to reduce the funded debt of TVA by $2,000,000, and to finance estimated obligations of $5,192,000 to be incurred in the performance of services for which TVA will be reimbursed by other Federal agencies. Total receipts from all sources in 1946 are estimated at $50,438,000. The excess of $10,016,000 in gross income over the requirements listed above will be established as a reserve for operating contingencies and for payment to the general fund of the United States Treasury. Departures from average stream flow conditions or present schedules for the production of power and chemicals could result in substantial changes from the presently estimated net income from power and chemical operations, and affect the amount to be paid to the general fund of the Treasury after the end of the 1946 fiscal year.

As of November 30, 1944, the TVA had in service on its electric power system an installed capacity of 1,957,800 kilowatts. In operation were 27 major projects—21 dams developed for navigation, flood control, and power, and 6 steam power-generating plants. The Kentucky dam project was in operation, but there remained unfinished considerable construction work which will extend throughout fiscal year 1945 and a substantial portion of 1946. At this project two power-generating units were in operation and two additional units were under construction. Considerable work still remained to be done in the reservoir. One other major dam, Fontana, was still under construction as of November 30, 1944, but is scheduled to be completed during fiscal year 1945. Two uncompleted dams, South Holston and Watauga, are no longer under construction, having been deferred at the order of the War Production Board because of shortages in materials and manpower. A fourth generating unit was being installed at the Watts Bar steam plant which is scheduled to be in operation in February 1945. Of the 27 projects in operation, 16 were built by TVA forces; 8 were acquired from privately owned utilities; 2 were transferred from other agencies of the Federal Government; and 1 steam plant is operated under a lease agreement. Upon completion of the installation of power-generating units now under construction, the installed power-generating capacity of the TVA system will be increased by 259,000 kilowatts, bringing the total installed capacity to 2,216,800 kilowatts.

The navigation channel in the Tennessee River is now useful for commercial navigation for the full length of the River from Paducah, Ky., to Knoxville, Tenn., a distance of 650 miles, although certain sections of the channel are still substandard as to depth and width. During fiscal year 1945, substandard sections of the channel downstream from Watts Bar and Fort Loudoun Dams will be dredged to standard depth for a minimum width of 150 feet. During 1946 these sections will be dredged to the full standard width of 300 feet. Four general-purpose public-use terminals are in operation by TVA on the main stream and one TVA terminal for handling coal is in operation on a tributary central to the coal-producing area in Tennessee.

Upon completion of the two remaining dams still under construction, the Authority will have provided, on the Tennessee River and its tributaries, flood storage capacity of between 10,500,000 and 14,000,000 acre-feet depending on reservoir levels preceding storms. This storage will, it is estimated, reduce flood crests on the Mississippi River by as much as 3 feet at Cairo, Ill., and by lesser amounts for three-fourths of the distance between Cairo and New Orleans.

Revenues from the sale of electric power, including about $1,860,000 from intraagency sales, are estimated to amount to $31,700,000 in the 1946 fiscal year, or enough to pay all power expenses (including payments in lieu of

taxes and depreciation on a straight-line basis) and produce a return of about 3¼ percent on the investment allocated to power. This estimated rate of return is based on the assumption that average stream-flow conditions will prevail and that other circumstances affecting revenues and production costs will be normal. In the event that unforeseen conditions arise, such as failure of projected loads to develop or dry weather over extended periods, the rate of return in 1946 might be substantially below 3¼ percent.

The existing power system is furnishing about 75 to 80 percent of its total power deliveries to industries engaged in war production, principally aluminum and chemicals. Nine large industries and several major war projects are served directly by the Authority, while over 550,000 customers are being served with TVA power through the distribution systems of 84 municipalities and 45 cooperatives.

It is estimated that in 1946, the TVA system and the hydroelectric power generating system of the Aluminum Co. of America (the operations of which will be integrated under the Authority's direction upon the filling of Fontana Reservoir) will produce about 11,760,000,000 kilowatt-hours of electric energy under normal stream flow conditions.

The chemical properties at Muscle Shoals, operated during peacetime for the experimental production of fertilizers in order to improve and cheapen processes for fertilizer production, have been used during the war to assist in the war food program by large-scale production of phosphatic and nitrogenous fertilizers, to manufacture phosphorus for "smoke" and other chemical warfare uses, and to produce calcium carbide for the national synthetic rubber program.

In fiscal year 1946, elemental phosphorus will be produced on a large scale for the War Department, and an estimated 49,000 tons of concentrated phosphatic fertilizers will be produced for the national war food program and the fertilizer test-demonstration program conducted jointly by TVA, cooperating state institutions, and farmers. Capacity operation of ammonia and ammonium nitrate producing facilities is scheduled to meet the requirements of the War Department and the war food program. Production of calcium carbide for Defense Supplies Corporation will be continued.

General research and development activities authorized by the TVA Act to assure optimum development of the Valley region will be continued in 1946 at about the level of fiscal year 1945. TVA and cooperating educational and technical institutions are providing the research, the knowledge, and the technical advice necessary for the people to understand the causes and remedies of their problems, the extent and location of their resources, and the technical and administrative processes by which these resources can be wisely used.

Technical skills available within the TVA staff will continue to be used by other agencies in war assignments. Major assignments, other than those mentioned above, include mapping of strategic areas for the War Department and the design of hydroelectric projects for the lend-lease program.

APPENDIX 1

EXPLANATION OF THE BUDGET CONTENTS

This appendix explains important technical aspects of the Budget document, the basic authority for which is the Budget and Accounting Act of 1921 providing for a national budget system. Under that act, the President transmits an annual Budget to the Congress on the first day of each regular session. The act further requires presentation of the following information in the Budget: (a) Estimates of expenditures and of appropriations recommended for the ensuing fiscal year, (b) estimates of receipts during the ensuing fiscal year under existing laws and under any new revenue proposals which may be contained in the Budget, (c) actual expenditures and receipts during the last completed fiscal year and as estimated for the fiscal year in progress, (d) appropriations and balances from prior fiscal years available for expenditure during the fiscal year in progress, (e) balanced statements of the condition of the Treasury for each of the 3 years covered, and (f) essential facts regarding Government indebtedness and other considerations affecting the financial condition of the Government.

This Budget document, transmitted to the Congress after the annual State of the Union Message, consists of the following major sections:

Budget Message of the President.—This Presidential statement transmits the Budget document, indicates the broad policies underlying its formulation, and describes major Budget programs.

Charts.—These four charts show the trends of receipts, expenditures, and debt over the past decade. They reestablish the graphic presentation used in the 12 Budget documents of the fiscal years 1924 through 1935 which portrayed the components of the estimates of appropriations and expenditures during each ensuing year. Trend charts seem preferable at this time because of the tremendous increases in financial operations of the Government caused by the war. Statistical data supporting these charts are presented in appendix 9.

Budget résumé.—This abridged summary is a new feature of this Budget document which brings together on a single page various receipt, expenditure, appropriation, and debt totals from the more extended summary tables which follow immediately thereafter.

Part I. Summary and supporting tables.—Three summary tables and nine supporting tables show receipts, expenditures, and appropriations and other authorizations.

Part II. Detailed estimates of appropriations and other authorizations.—This section, over three-fourths of the total pages in the Budget document, presents the proposed statutory appropriation language; details of obligations and appropriations for the last completed fiscal year, the current fiscal year, and the ensuing fiscal year; together with transfers, reimbursements, reappropriations, and other adjustments.

Part III. Government corporations and credit agencies.—This section presents statements of cash receipts and expenditures for most of the Government corporations and credit agencies.

Appendixes.—The appendix material starts with this discussion of the contents of the Budget document, and is followed by an explanation of the revenue estimates, an analysis of the public debt and contingent liabilities of the United States, comparative data on receipts and expenditures, and other reference data.

The tables and schedules in this Budget are on a fiscal year basis. The fiscal year for the Federal Government begins on the 1st of July and ends on June 30 of the succeeding calendar year. The fiscal year 1944, for example, covered the period from July 1, 1943, to June 30, 1944.

PART I. SUMMARY AND SUPPORTING TABLES

The summary and supporting tables include lump-sum preliminary estimates of appropriations, contract authorizations, and expenditures for fiscal year 1946 for most of the major war agencies. Detailed recommendations of appropriations, superseding and amplifying the preliminary total estimates for these agencies, will be submitted to the Congress during the spring of 1945 and published in a war supplement to the 1946 Budget. This treatment of war activities began with the 1944 Budget.

TABLE 1. BUDGET SUMMARY OF RECEIPTS AND EXPENDITURES

Table 1 summarizes the budget program as reflected by cash receipts and expenditures. This table shows the estimates of receipts and expenditures for the fiscal years 1945 and 1946 and actual receipts and expenditures for fiscal year 1944. All estimates are reviewed by the Bureau of the Budget. Budget classifications of actual receipts and expenditures are based on Treasury tabulations, but differ in some respects for purposes of summary and economic analyses. However, the over-all totals for fiscal year 1944 in the "Daily Statement of the United States Treasury" and in the Budget are in agreement.

Table 1 is arranged in the following four sections: (1) General and special accounts, (2) checking accounts of Government corporations and credit agencies with the Treasurer of the United States, (3) trust accounts, and (4) effect of operations on the public debt. A discussion of each of these sections follows:

GENERAL AND SPECIAL ACCOUNTS

The general accounts of the Government record the receipts which are not designated by Congress for specific purposes. Most appropriations and expenditures are made from such funds. Special accounts, commonly called special funds, are credited with receipts earmarked by Congress for specified purposes. The special accounts are identified in tables 4 and 6 and in part II of the Budget document.

Receipts.—Receipts and expenditures from general and special accounts are shown in the first section of table 1. Receipts exclude repayments to appropriation accounts which are treated as credits to expenditures in this and other supporting tables. The receipts from taxes for fiscal years 1945 and 1946 are estimated by the Treasury Department; a discussion of these estimates is presented in appendix 2 by the Treasury Department. Miscellaneous receipts for these years are estimated by the collecting agencies. All estimates of receipts are based on

Federal Reserve Bank of St. Louis

existing legislation. Actual receipts for fiscal year 1944 are those which have been deposited with the Treasurer of the United States. Detailed information on receipts by source is presented in table 4.

Attention is called to the portion of the excess-profits tax included under "direct taxes on corporations" which will be refunded in the post-war period. Estimates of these refundable taxes are shown in a footnote. The law now requires that excess-profits tax refund bonds be issued within 3 months after the final payment of the tax; however, a full year was allowed for the issuance of these bonds for 1942 tax liabilities. The collections of refundable taxes are shown as receipts, whereas excess-profits tax refund bonds are reported as general and special account expenditures (under "refunds") and as public debt receipts at the time the bonds are issued.

Expenditures.—Estimates of expenditures for fiscal years 1945 and 1946 are prepared by the various departments and agencies, and reviewed by the Bureau of the Budget. Actual expenditures for fiscal year 1944 represent checks which have been paid by the Treasurer of the United States reduced by repayments credited to appropriation accounts. Greater detail on expenditures is presented by function and by organization unit in table 5 and by organization unit and appropriation title in table 6.

The three following functional expenditure classifications used in table 1 are discussed below: Refunds, interest on the public debt, and statutory public debt retirement. The first of these items includes refunds of customs and internal revenue, and post-war credits against excess-profits taxes as reflected by excess-profits tax refund bonds. The refund bonds are reported as expenditures at the time they are issued, although such action does not involve a cash payment.

Interest on the public debt includes accrued discount on savings bonds, discount on Treasury bills, and interest credited to trust and other investment accounts.

Statutory public debt retirement is made from either the cumulative sinking fund or, under special provisions of law, from specified receipts. The cumulative sinking fund was established by the Victory Liberty Loan Act for the purpose of providing a regular and systematic means of retiring debt. In recent years, because of deficit financing, little use has been made of the sinking fund to retire debt. As of December 31, 1944, the sinking fund had unused appropriations of approximately 5 billion dollars. Although these unused appropriations are available for debt retirement, their use for this purpose currently would be offset by new debt of like amount.

Estimated expenditures for fiscal years 1945 and 1946 from anticipated supplemental appropriations which will be transmitted to Congress after the submission of this Budget are included in this table.

There is generally a difference—sometimes a great difference—between the amounts of appropriations and of expenditures for a given purpose within any one fiscal year. Appropriations for a given year are based upon the estimated amount of obligations to be incurred in that year, some of which will be liquidated during subsequent years, whereas expenditures reflect the amount of cash actually disbursed during the fiscal period. There is generally some time lag between the enactment of an appropriation, the incurring of obligations thereunder, and the subsequent expenditures.

CHECKING ACCOUNTS OF GOVERNMENT CORPORATIONS AND CREDIT AGENCIES WITH THE TREASURER OF THE UNITED STATES

Net expenditures of Government corporations and credit agencies from checking accounts maintained with the Treasurer of the United States as banker or fiscal agent are shown in the second section of table 1. This table reports only net expenditures or the difference between gross receipts and expenditures for each fiscal year.

Deposits with the Treasurer of the United States are available for expenditure without the necessity for appropriations except that congressional limitations are placed on certain loans and expenses of Government corporations and credit agencies in appropriation acts.

Estimates of net expenditures are prepared annually by the various corporations and credit agencies and reviewed by the Bureau of the Budget. In the table the transactions of these checking accounts are segregated between those which relate to (1) war activities, (2) redemption of obligations in the market (net), and (3) other activities.

The item "war activities" includes the operations of the Defense Plant Corporation, Defense Supplies Corporation, War Damage Corporation, Metals Reserve Company, and Rubber Reserve Company, allocations of funds by the Reconstruction Finance Corporation to the United States Commercial Company, Rubber Development Corporation, Petroleum Reserve Corporation, and Defense Homes Corporation, and other expenditures for war purposes.

"Redemption of obligations in the market (net)," represents the net expenditures for the retirement of outstanding obligations of the Government corporations and credit agencies held by the public, including those retired with funds borrowed from the Treasury. The item "other activities" covers the net expenditures of the remaining activities of the Government corporations and credit agencies from checking accounts with the Treasurer of the United States. This latter category also includes the net expenditures of several small special deposit and miscellaneous checking accounts.

Greater detail supporting the above summary figures is presented in table 9. Part III of the Budget includes statements of cash receipts and expenditures for most of these corporations and credit agencies, including transactions not handled through checking accounts with the Treasurer of the United States and hence not included in the net expenditures shown in table 1.

TRUST ACCOUNTS

The third major section of table 1 summarizes the receipts and expenditures of trust accounts. In general, the receipts of trust accounts relate to moneys received by the Government for the special benefit of individuals or classes of individuals. Such moneys are held in trust for beneficiaries, and hence are not available for general expenditure.

Receipts.—Estimates of receipts for fiscal years 1945 and 1946 are prepared by the agencies which administer trust accounts, and are reviewed by the Bureau of the Budget. The actual receipts for fiscal year 1944 shown in this table represent receipts which have been deposited with the Treasurer of the United States and include

transfers from general and special accounts. More detailed information on trust receipts is presented in table 11.

Expenditures.—Estimates of expenditures for fiscal years 1945 and 1946 are prepared by the agencies which administer trust accounts, and are reviewed by the Bureau of the Budget. Actual expenditures for fiscal year 1944 represent checks which have been paid by the Treasurer of the United States reduced by repayments credited to appropriation accounts. More detailed information on expenditures is presented in table 12.

Trust funds which are not needed to pay benefit payments and other expenses are, for the most part, invested in securities of the United States. Purchases of securities are presented on a net basis, *i. e.*, expenditures for the purchase of securities less the proceeds from the sale or redemption of securities.

EFFECT OF OPERATIONS ON THE PUBLIC DEBT

The concluding section of table 1 summarizes the effect on the public debt of operations under all three sets of accounts discussed above. The public debt excludes the comparatively small guaranteed debt of Government corporations and credit agencies. An analysis of the public debt by type of issue outstanding as of June 30, 1943 and 1944, is shown in appendix 4.

The excess of expenditures over receipts is financed by the Treasury through the sale of Government securities to the public, to trust accounts, and to Government corporations and credit agencies. The sale less the redemption of Government securities, represents the increase in the public debt.

TABLE 2. BUDGET SUMMARY OF APPROPRIATIONS AND OTHER AUTHORIZATIONS

Table 2 summarizes the budget program as reflected by appropriations and other authorizations. It shows the appropriations, reappropriations, and contract authorizations recommended by the President for fiscal year 1946 and the amounts enacted by Congress for fiscal years 1944 and 1945. Presidential recommendations most frequently take the form of suggested appropriations, but occasionally reappropriations and contract authorizations are proposed.

Appropriations authorize employment of personnel, purchase of supplies and equipment, and the withdrawal of funds from the Treasury for these and other specified purposes. They are of two general types: Annual and permanent. An annual appropriation is one which is acted upon each year by Congress. A permanent appropriation is automatically renewed each year, pursuant to prior legislative enactment, without annual action by Congress.

Appropriations may be either definite or indefinite in amount. A definite appropriation is one the amount of which is stated in the appropriation act as a specific sum of money. An indefinite appropriation is one the amount of which is not stated in the appropriation act as a specific sum of money, but is determinable at some future date; *e. g.*, an appropriation of receipts from a certain source or an appropriation based on certain financial requirements such as the interest on the public debt. Most special account and trust account appropriations are in the latter "permanent-indefinite" category.

Appropriations may be available for obligation for a definite or indefinite period of time. Most appropriations are only available for obligation during a single fiscal year, but some appropriations are available for obligation for a longer period of years. Appropriations for construction are generally available for incurring obligations for an indefinite period of time until the project covered by the appropriation is completed or terminated. Table 2 includes examples of all of these types of appropriations.

GENERAL AND SPECIAL ACCOUNTS

Appropriations.—Appropriations from the general and special accounts are shown in the first section of table 2. The figure for war activities for fiscal year 1946 includes only a few comparatively small definite Presidential recommendations for war agencies; the other war agencies are covered by tentative lump-sum estimates. The latter tentative estimates are preliminary forecasts of the appropriations which the President will recommend for these activities during the spring of 1945.

Estimates of anticipated supplemental appropriations for fiscal years 1945 and 1946 which will probably be sent to Congress after the submission of this Budget, are included in this table. "Indefinite" appropriations for fiscal year 1945 are estimated, since actual appropriations cannot be definitely determined until after the close of the fiscal year on June 30, 1945. Greater detail on general and special account appropriations is presented by function and organization unit in table 5 and by organization unit and appropriation title in table 6.

Reappropriations.—Reappropriations of the unobligated balances of general and special account appropriations are shown in this section. They continue the availability of unused balances of appropriations which otherwise would expire. Prior to the war, reappropriations were relatively small in amount. Large reappropriations in recent years are principally for the War Department and the defense aid (lend-lease) program. Detailed information on reappropriations is presented in table 7 by organization unit and appropriation title.

Contract authorizations.—A contract authorization is a statutory authorization by Congress—generally in an appropriation act—empowering the designated agency to enter into contracts and incur obligations for a stated purpose prior to enactment of an appropriation. A contract authorization, however, does not authorize the payment of the bills arising from the obligations incurred. In order to pay these bills, an appropriation to liquidate the contract authorizations must first be enacted by Congress. Such appropriations to liquidate contract authorizations are included under general and special account appropriations.

The contract authorizations for the naval expansion program are based on tonnage and are indefinite in amount. The financial significance of the indefinite contract authorizations included in this section must therefore be estimated. As the program progresses and unit costs change, the estimates are revised accordingly.

The new contract authorizations and appropriations to liquidate prior contract authorizations for fiscal year 1946 include tentative estimates for some of the war agencies. More detail on contract authorizations and on appropriations to liquidate contract authorizations is presented in table 8.

POSTAL ACCOUNTS

Appropriations.—Appropriations of postal accounts shown in the second section of table 2 cover all postal operations. These operations are financed from postal revenues, supplemented, when necessary, by appropriations from general and special accounts. Only the expenditures from general and special account appropriations are reflected in table 1 since postal revenues are retained by the Post Office Department to pay the costs of operating the postal system. Detailed information on appropriations for postal operations is presented in part II.

ACCOUNTS OF GOVERNMENT CORPORATIONS AND CREDIT AGENCIES

Limitation on certain loans and expenses.—The third section of table 2 summarizes congressional limitations on the amount of their own funds which certain Government corporations and credit agencies may use for "administrative expenses." This section of the table also includes advances which the Reconstruction Finance Corporation is authorized to make to the Farm Security Administration and the Rural Electrification Administration. More detail on these limitations is presented in table 10.

TRUST ACCOUNTS

Appropriations.—Trust account appropriations, summarized in the fourth section of table 2, are mostly permanent indefinite appropriations based upon receipts. The amounts shown for these indefinite appropriations for fiscal years 1945 and 1946 are estimated at the same amounts as the estimated receipts. The slight variations between the appropriations and the actual receipts shown for fiscal year 1944 are principally due to the time lag between the deposit of the receipts with the Treasurer of the United States and issuance of appropriation warrants. Detailed information on trust account appropriations is presented in table 12.

TABLE 3. SUMMARY OF PAYMENTS TO AND RECEIPTS FROM THE PUBLIC

Table 3 summarizes the budget program as reflected by payments to and receipts from the public. It indicates the actual flow of money between the Federal Government and the "public" which includes individuals, private corporations, and State, local, and foreign governments.

PAYMENTS TO THE PUBLIC

Payments to the public are shown in table 3 under the accounts from which the disbursements to the public are made. These payments exclude the following intragovernmental and noncash transactions:

"Interest on the public debt" excludes net accrued discount on savings bonds, net discount on Treasury bills, interest paid on trust account investments in Federal securities (public and special issues), and interest paid on Government corporation investments in special issues.

The item "refunds" excludes the excess-profits tax refund bonds transferred to public debt receipts. "Veterans' pensions and benefits" excludes transfers to the national service life insurance fund and the adjusted service certificate fund.

The item "general and special accounts" under "other activities" excludes transfers to the Federal employees' retirement funds, to the unemployment trust funds, and to other trust funds.

The item "checking accounts of Government corporations and credit agencies" under "other activities" excludes surplus funds returned to general and special accounts, investments of the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, and the mutual mortgage insurance fund in Government securities, interest paid by Government corporations to the United States Treasury, interest paid to the Government life insurance fund on investments in Federal farm loan bonds, general fund contribution for restoration of capital impairment of the Commodity Credit Corporation, and interest received on Government corporation investments in special issues.

The item "trust accounts" under "other activities" excludes net investments in Government securities, and includes the redemption of adjusted service bonds.

RECEIPTS FROM THE PUBLIC (INCLUDING BORROWING)

Receipts from the public are shown in table 3 under the account to which the collections from the public are deposited except in two cases: (1) The net appropriations from general account receipts to the Federal old-age and survivors' insurance trust fund are treated as trust account receipts and (2) excess-profits taxes refundable in the post-war period are treated as borrowings rather than tax receipts.

The receipts in this table exclude the following intragovernmental and noncash transactions: "Direct taxes on corporations" excludes the portion of the excess-profits tax collections which is refundable in the post-war period; these refundable taxes are included under "borrowing from the public." "Employment taxes" excludes the net appropriation to the Federal old-age and survivors' insurance trust fund; this appropriation to the trust fund is included under trust account receipts. "Miscellaneous receipts" excludes the return of surplus funds from Government corporations and interest paid by Government corporations to the United States Treasury. Trust account receipts in table 3 exclude interest on investments in Government securities and transfers from general and special accounts.

Borrowing from the public is comprised of the net increase in the direct public debt, excluding the following intragovernmental and noncash transactions: Trust fund investments in Government securities (public and special issues), accrued discount on savings bonds, investments of the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, and the mutual mortgage insurance fund in Government securities, discount on Treasury bills, excess-profits tax refund bonds, and the net redemption of adjusted service bonds. The portion of the excess-profits tax collections which is refundable in the post-war period is treated as borrowing from the public. Sales of Government corporation obligations on the market increase the amount of borrowing from the public. When redemptions of these obligations exceed sales, borrowing from the public is reduced.

Table 3 shows the distribution of "borrowing from the public" by type of Treasury issue for the completed fiscal year 1944. The net increase in each type of issue during fiscal year 1944 is shown in this table, excluding the following intragovernmental and noncash transactions. The item "Savings bonds and stamps" is comprised of "United States savings bonds" and "United States savings stamps" less the net accrued discount on savings bonds. The item "Treasury bonds" excludes trust account investments in public issues. The item "short-term Treasury issues"

is comprised of "Treasury bills"; "certificates of indebtedness"; "certificates of indebtedness, special series"; "Treasury notes"; and "Treasury notes (tax and savings series)"; less net discount on "Treasury bills". The item "other obligations" is comprised of "depositary bonds"; "deposits for retirement of Federal Reserve bank notes"; "national and other Federal Reserve bank notes"; "postal savings bonds"; "postal savings system (notes)"; "Canal Zone postal savings system (notes)"; and "other debt items."

Tables 4–12

Tables 4 to 12, inclusive, present information in support of tables 1 and 2. Table 4 itemizes general and special account receipts by source. Table 5 presents supporting detail for the general and special account appropriations and expenditures, classified by function and itemized by bureau or other organization unit. Table 6 presents supporting detail for the general and special account appropriations and expenditures, classified by organization unit and itemized by appropriation title. The items appear in the same sequence as the detailed estimates of general and special account appropriations in part II.

Table 7 shows the supporting detail for the reappropriations of unobligated balances of general and special accounts, classified by organization unit and itemized by appropriation title. Table 8 itemizes contract authorizations and appropriations to liquidate contract authorizations.

Table 9 itemizes the net expenditures of Government corporations and credit agencies from checking accounts with the Treasurer of the United States. Table 10 itemizes the limitations on certain loans and expenses of Government corporations and credit agencies. Table 11 itemizes trust account receipts by source. Table 12 itemizes appropriations and expenditures of trust accounts; the items are grouped in this table according to the classification of trust account expenditures in tables 1 and 2.

Part II. DETAILED ESTIMATES OF APPROPRIATIONS AND OTHER AUTHORIZATIONS

Part II contains the recommendations of the President with respect to the appropriation language and the appropriations to provide for Federal activities during the fiscal year 1946, and the detailed schedules in support of his recommendations. Because of possible material changes in war conditions, only tentative lump-sum "estimates" or "amounts of recommended appropriation" are included for most of the major war activities. Detailed estimates for the fiscal year 1946 will, as last year, be submitted to Congress in the spring of 1945 in a war supplement to the Budget document.

Presidential recommendations most frequently take the form of suggested appropriations, but occasionally reappropriations and contract authorizations are proposed. As discussed previously, appropriations authorize employment of personnel, the purchase of supplies and equipment, and the withdrawal of funds from the Treasury for these and other specified purposes. These appropriations are usually available for obligation for only one fiscal year. Reappropriations, however, continue the availability of unused balances of appropriations which otherwise would expire. Contract authorizations provide for the letting of contracts and the incurring of obligations, but do not authorize the payment of bills arising from the obligations incurred. In order to pay these bills, appropriations to liquidate the contract authorizations must first be enacted by Congress.

These Presidential recommendations are arranged in chapters in the order of departments or major agencies shown on the face sheet at the beginning of part II. Independent offices are grouped with the Executive Office of the President. Individual chapters omit major public works projects of the departments and agencies, these estimates being brought together in a chapter headed "General Public Works Program."

Each chapter begins with a summary table which shows the estimates for fiscal year 1946 for all major units of the department or agency, the actual appropriations or other authorizations for fiscal year 1945 up to the time of submission of this Budget, and the year's increase or decrease. The table is followed by an "Explanatory statement" describing functions and programs. The extended remaining portion of each chapter is headed "Estimates of Appropriations" and consists of the proposed appropriation language and the detailed schedules of obligation for each major unit. An example of proposed appropriation language appears below.

Salaries and Expenses, _____ Commission—

For [every expenditure requisite for and incident to] *expenses necessary for* the work of the _____ Commission, including not to exceed [$112,165] *$102,000* for travel expenses; purchase, maintenance, and operation of motor-propelled passenger-carrying vehicles; law books, books of reference, periodicals, and newspapers; not to exceed [$1,209,000] *$1,064,800* for personal services in the District of Columbia; [$1,378,240] *and obligations chargeable to the appropriation for this purpose for the fiscal year 1945; $1,195,780, together with the unexpended balance of the appropriation for this purpose for the fiscal year 1945 and repayments thereto (16 U. S. C. 790–825; 15 U. S. C. 717; Act of June —, 1944, Public Law —; Act of Oct. —, 1944, Public Law —).*

Estimate 1946, **$1,195,780** Appropriated 1945, [a] **$1,560,240**

[a] Includes $182,000 appropriated in the First Supplemental Appropriation Act, 1945.

The bold face side heading above is the official title which identifies the appropriation. The legal phraseology indicates the nature and scope of the activities to which the expenditures of the indicated amount must be restricted. Bracketed material indicates those words and figures which appeared in the previous 1945 act and which it is proposed be omitted from the 1946 act; similarly, italicized words show proposed additions. Italicized symbols, words, and figures in parentheses at the end of the appropriation language give citations to relevant laws and to the 1945 appropriation act if it contained funds for the same purpose.

Below the last line of appropriation language the dollar amounts indicate at the left the recommended estimate for fiscal year 1946 and at the right the appropriation for fiscal year 1945. The amount shown for fiscal year 1945 includes any supplemental appropriations up to the date of this Budget, as indicated by the footnote to the illustration. Footnotes are also used if a function has been transferred or is proposed to be transferred to or from another appropriation. When appropriations are based on the receipts of special accounts and trust accounts the figure shown for appropriations for fiscal year 1945 are estimated. In connection with some special and trust accounts the entry "Appropriated, 1945, $———" is accompanied immediately below by the entry "Revised, 1945, $———"; the latter figure indicates the revision from the estimate published a year ago.

The appropriation language is followed by a comparative schedule of obligations showing actual obligations for the fiscal year 1944, and estimated obligations for the fiscal years 1945 and 1946. The obligations are for financial liabilities incurred for orders placed, contracts awarded, services received, and the like, and in certain

cases the amounts shown include expenditures which have not been preceded by obligations.

The following discussion of the schedule of obligations first covers the initial major section which breaks down the obligations by objects, and then the usual second major section, which breaks down the obligations by projects or functions. An example of the initial major break-down by objects is given below:

Grand total obligations		1,341,100		1,526,240		1,356,698

The initial major section of the obligation schedule, arranged by object of expenditure, utilizes symbol numbers for ready reference, *e. g.*, 01 Personal services, 02 Travel, and 03 Transportation of things, etc. Only those objects of expenditure which are relevant to a given schedule are printed, the others being omitted in the interest of brevity.

It will be noted that of the various objects of expenditure the greatest detail is shown for 01 Personal services. The primary division here is between the departmental employees serving at the headquarters or central office, and those in the field service at other offices which may be scattered throughout the country.

Within the departmental and field service categories, subcategories indicate the types of service of the permanent positions established by the Civil Service Commission. These types include the clerical, administrative, and fiscal service; professional service; subprofessional service; crafts, protective, and custodial service; and unclassified. The grades within each type of service are arranged in descending order of salary ranges; operating titles are listed separately if the basic salary is above $3,200, and by groups if below that amount. On each line dual columnar entries at the right indicate the man-years of employment and the amount of basic salaries for each of the 3 fiscal years.

Following the total line for both departmental and permanent field personnel, one line entries cover special categories such as temporary, part-time, and $1-a-year employment. Deductions are then made for the value of quarters, subsistence, etc., thus adjusting the salaries of those employees at Federal institutions, *e. g.*, who must pay for the accommodations they are furnished.

The total line for 01 Personal services (net) is followed by one-line entries for (a) other obligations, such as 02 Travel and 03 Transportation of things, and (b) adjustments for reimbursements, transfers, and the like indicated in the following example from a typical schedule. The final line shows the total estimate or appropriation for fiscal years 1945 and 1946 which agrees with the boldface figures at the end of the appropriation language.

By objects	Obligations		
	Estimate, 1946	Estimate, 1945	Actual, 1944
Grand total obligations	$1,341,100	$1,526,240	$1,356,698
Reimbursements for services performed		−3,500	−2,505
Transferred to "Miscellaneous researches, transferred funds, National Bureau of Standards"	+4,680	+5,500	+4,419
Received by transfer from—			
"Loans, grants, and rural rehabilitation, Department of Agriculture"			−20,000
"Conservation and use of agricultural land resources, Department of Agriculture"		−15,000	−15,000
"Salaries and expenses, Bureau of Foreign and Domestic Commerce"		−3,000	−2,000
1944 appropriation obligated in 1943			+50,000
Subsequent appropriation to be obligated in 1946	−100,000		
1943 appropriation available in 1944			−70,000
Reappropriation of 1945 balance in 1946	−50,000	+50,000	
Net total obligations	1,195,780	1,560,240	1,301,612
Estimated savings, unobligated balance			16,809
Total estimate or appropriation	1,195,780	1,560,240	1,318,421

The preceding discussion covers the break-down by objects in each schedule of obligations. In many cases this is followed by another break-down by activities, projects, or functions. An example of this second major portion of many obligation schedules is given below:

By projects or functions	Obligations		
	Estimate, 1946	Estimate, 1945	Actual, 1944
1. Administration	$204,100	$262,240	$210,698
2. Economic investigations	237,000	338,000	336,000
3. Trade-practice agreements	400,000	416,000	350,000
4. Unlawful practices	500,000	510,000	460,000
Grand total obligations	1,341,100	1,526,240	1,356,698
Adjustments (see objects schedule for detail)	−145,320	+34,000	−38,277

Each year Congress places limitations on the amount of the funds for administrative expenses which are available to certain Government corporations and credit agencies. These amounts are not shown in bold-face figures following the appropriation language, as no moneys are appropriated from the Treasury. Instead, the corporations and credit agencies are authorized to use a certain portion of their own funds. In such cases the obligations reported in the schedule are generally offset by an entry "Payable from funds of the corporation" and hence no figures are shown opposite the entry "Total estimate or appropriation."

PART III. GOVERNMENT CORPORATIONS AND CREDIT AGENCIES—STATEMENTS OF CASH RECEIPTS AND EXPENDITURES

Statements of cash receipts and expenditures are presented in part III for the larger Government corporations and credit agencies in which the United States has a proprietary interest and whose financial operations affect the Budget and the Treasury. The financial transactions of these corporations and credit agencies are quite different in character and significance from those of the regular Government agencies and affect the Budget and the Treasury in a different manner from the ordinary receipts and expenditures of the Government.

Initial financial requirements of these agencies are frequently financed in part from appropriations from the general fund of the Treasury. Initial and subsequent subscriptions to their paid-in capital are usually purchased by the Secretary of the Treasury or by another official of the Government on behalf of the United States from appropriated funds, or by another corporation from its own funds. The United States thereby acquires a direct or indirect proprietary interest in the corporations and credit agencies. Annual appropriations from general and special accounts are made to a few of these agencies for the payment of their operating expenses or for making loans or grants. Appropriated funds which are expended in making loans are returned, in whole or in part, to the Treasury when the loans are collected or the agencies are liquidated. Limitations are established by appropriation acts on the amounts of their own funds which several corporations and agencies may spend for the payment of administrative expenses. All appropriations to the corporations and credit agencies, and the limitations on their administrative expenses are presented in part II of the Budget in the same manner as appropriations to other agencies of the Government.

Several of the corporations and credit agencies have been granted limited statutory authority to obtain funds for general or specific purposes by issuing bonds and debentures guaranteed by the United States. The maximum borrowing power of each of these agencies and the amounts of their outstanding obligations are shown in appendix 5. The individual cash receipts and expenditure statements of these agencies, included in part III of the Budget, show the debt obligations outstanding or estimated to be outstanding at the end of the fiscal years 1944, 1945, and 1946, and the amounts held by the Treasury and by the public. The ultimate cost to the Government is limited to any borrowing which the agencies cannot liquidate from their own assets.

The Government corporations and credit agencies finance a substantial portion of their cash requirements from collections of interest on loans and investments, revenues from the sale of their products and services, repayments on loans, and receipts from the sale of collateral security acquired by foreclosure. These receipts finance the normal operations of most of the agencies; additional funds are obtained by borrowing, or from capital subscriptions to finance expanding activities of the agencies. On the other hand, a reduction in the amount of loans, investments, or properties owned by these agencies provides surplus funds which are then available for the retirement of outstanding bonds and debentures or of capital and surplus. During the fiscal year 1941 several of the corporations returned a portion of their capital and surplus funds to the Treasury pursuant to the act approved June 25, 1940. In some cases, these repayments are held in revolving funds available for resubscription.

Most of the Government corporations and credit agencies deposit their funds in checking accounts with the Treasurer of the United States and disburse therefrom by checks drawn on the Treasurer. The net receipts and expenditures from these accounts are summarized in table 1 in the section on "checking accounts of Government corporations and credit agencies with the Treasurer of the United States."

THE APPENDIXES

Appendix 2 is a statement prepared by the Treasury Department to explain estimates of receipts of general and special accounts. Appendix 3 summarizes the cash transactions of all funds and Treasury balances at the beginning and end of the year. The data, other than Treasury balances, are derived from table 1.

Appendix 4 shows the outstanding public debt by types of indebtedness. The difference between the total public debt outstanding at the end of fiscal years 1943 and 1944 appears in table 1 as the net increase in public debt during the fiscal year 1944. Appendix 5 lists the contingent liabilities of the United States as of June 30, 1944.

Appendix 6 shows permanent appropriations from general and special accounts for the fiscal years 1944, 1945, and 1946 and expenditures for the fiscal year 1944. The permanent appropriations were enacted by Congress at various times and the acts remain in effect until repealed or amended. This appendix does not include permanent trust appropriations. Most of the trust appropriations listed in table 12 are of the permanent type.

Appendix 7 compares cash expenditures of departments and agencies and their constituent units over a 7-year period. In several instances, there have been reorganizations and certain activities have been transferred between departments and agencies. In such cases, annual expenditures throughout the 7-year period are based upon the pattern of organization on June 30, 1944. Footnotes indicate the date of the transfer and the name of the earlier agency.

Appendix 8 shows the unexpended balances of appropriations (a) on the books of the Treasury and (b) to the credit of disbursing officers as of June 30, 1944. It also shows appropriations for the fiscal year 1945 as of November 1, 1944.

Appendix 9 presents a 10-year comparison (1937–46) of the general and special accounts of receipts by source and expenditures by function as classified in table 1, and the outstanding public debt at the end of each fiscal year.

Appendix 10 shows the composition and derivation of the components of "The Government's Budget and the Nation's Budget."

APPENDIX 2

EXPLANATION OF THE ESTIMATES OF RECEIPTS

The Treasury prepares in December of each year estimates of the amount of Federal receipts expected in the current fiscal year and in the ensuing fiscal year on the basis of legislation existing at the time of making the estimates. The estimates here presented are consistent with the program of Government expenditures outlined elsewhere in the Budget.

TOTAL RECEIPTS

Total receipts, general and special accounts, are estimated (on the daily Treasury statement basis, unrevised) in the amounts of $47,022.8 millions in the fiscal year 1945 and $42,854.8 millions in the fiscal year 1946. The estimated total receipts in the fiscal year 1945 exceed by $1,614.4 millions the actual total receipts of $45,408.4 millions in the fiscal year 1944, while estimated total receipts of $42,854.8 millions in the fiscal year 1946 represent a decrease of $4,168.0 millions from the estimated total receipts in the fiscal year 1945.

The details of the estimated and actual receipts as prepared by the Treasury are shown in table 4, page A6. Throughout the tables shown in this exposition the figures are rounded and will not necessarily add to totals. The exposition utilizes the Budget classification of receipts as presented in the following table. The footnotes to the table outline the differences between this classification and the Treasury classification of receipts.

Percentage distribution of total receipts

General and special account receipts [1]	Estimated, 1946	Estimated, 1945	Actual, 1944	Actual, 1943
Direct taxes on individuals	36.5	40.2	44.7	29.7
Direct taxes on corporations	37.9	36.2	33.6	42.4
Excise taxes [2]	13.2	12.1	9.7	16.2
Employment taxes [3]	4.8	3.8	3.9	6.4
Customs	0.8	0.7	0.9	1.4
Miscellaneous receipts	6.8	7.0	7.2	3.9
Total receipts	100.0	100.0	100.0	100.0

[1] This classification removes from the Treasury classification of miscellaneous internal revenue the capital stock, estate, and gift taxes. The capital stock tax is included in "Direct taxes on corporations" along with current and back taxes on corporation income and excess profits, and declared value excess-profits taxes. The estate and gift taxes are placed in the "Direct taxes on individuals" classification, together with current and back individual income taxes. The unjust enrichment tax is removed from the Treasury corporation "Back tax" classification and included in "Excise taxes." The entire adjustment of miscellaneous internal revenue from a collections to a daily Treasury statement basis is included in "Excise taxes."

[2] Includes the unjust enrichment tax collection and all of miscellaneous internal revenue receipts except collections from the capital stock, estate, and gift taxes.

[3] Includes taxes collected under the Railroad Unemployment Insurance Act in addition to the taxes collected under the Federal Insurance Contributions Act, the Federal Unemployment Tax Act, and the Carriers Taxing Act of 1937, which are called "employment taxes" under the Internal Revenue Code.

Several shifts in the relative importance of the major tax sources in the period from the fiscal year 1943 through the fiscal year 1946 are shown in the above table: (1) Direct taxes on individuals shift to the position of greatest importance in the fiscal year 1944, because of the nonrecurring increases arising from the transition to a current payment basis; (2) by the fiscal year 1946, however, corporation taxes represent the largest percentage since the lower level of incomes reflected in individual income tax receipts does not affect the corporate tax receipts until a year later; (3) the relative stability of excise and employment tax receipts causes them, in spite of steady absolute increases over the period, to appear percentagewise of less importance in the 2 years of larger aggregate tax receipts, namely the fiscal years 1944 and 1945; (4) miscellaneous receipts are of greater significance, in percentage of the total, in the fiscal year 1944 than in other years of the period, because of the recoveries of excessive profits on renegotiated war contracts, included in this item, which are expected to be at their peak in this fiscal year; (5) finally, customs receipts continue to decline in relative importance.

FISCAL YEAR 1945

The estimated receipts in the fiscal year 1945 and actual receipts in the fiscal year 1944 are compared by major sources in the following table:

Total and net receipts by source

[In millions of dollars]

General and special account receipts	Estimated, 1945	Actual, 1944	Increase (+) or decrease (−), 1945 over 1944
Direct taxes on individuals	18,900.1	20,290.4	−1,390.3
Direct taxes on corporations	17,042.6	15,256.0	+1,786.6
Excise taxes	5,664.1	4,399.6	+1,264.5
Employment taxes	1,806.8	1,751.2	+55.6
Customs	326.1	431.3	−105.2
Miscellaneous receipts	3,283.1	3,280.1	+3.0
Total receipts	47,022.8	45,408.4	+1,614.4
Deduct: Net appropriation for Federal old-age and survivors insurance trust fund	1,293.1	1,259.5	+33.5
Net receipts	45,729.7	44,148.9	+1,580.8

While the fiscal year 1945 receipts are estimated to be larger than the actual receipts in the fiscal year 1944, there is a divergence of trend by tax sources. The major items of increase include the excise taxes, where rate increases and the elimination of Government exemptions increase receipts, and corporation taxes, which are still collected a year later than the incurrence of the liability. The increase in tax receipts from larger corporation incomes more than offsets the decrease in the amount estimated to be received as recoveries from renegotiation of war contracts, which decline as experience with war purchases makes for more efficient procurement. A partially offsetting decrease occurred in the case of the individual income tax where the fiscal year 1944 receipts were more affected than those of the fiscal year 1945 by the abnormal bunching of receipts due to the transition to a pay-as-you-go basis.

Direct taxes on individuals.—The yields of direct taxes on individuals in the fiscal years 1944 and 1945 are shown in the following table:

[In millions o fdollars]

General and special account receipts	Estimated, 1945	Actual, 1944	Increase (+) or decrease (−), 1945 over 1944
Individual income tax:			
Withheld	9,970.1	9,177.8	+792.3
Not withheld	8,284.3	10,417.6	−2,133.3
Back taxes	131.2	183.7	−52.5
Total individual income tax	18,385.6	19,779.2	−1,393.6
Estate tax	474.6	473.5	+1.1
Gift tax	39.9	37.7	+2.2
Total direct taxes on individuals	18,900.1	20,290.4	−1,390.3

Federal Reserve Bank of St. Louis

Individual income tax receipts of $18,385.6 millions are again the most important tax source, although smaller in absolute amount by $1,393.6 millions than those of the preceding year. The abnormal bunching of receipts in the fiscal year 1944 in connection with going on a pay-as-you-go basis arose chiefly from the following circumstances:

(1) The nonrecurring offset to the remitted 1942 liabilities (i. e., payment on "unforgiven tax") estimated at $900 millions in the fiscal year 1945, is $400 millions less than the amount estimated to have been received in the fiscal year 1944.

(2) The payments in the first half of the calendar year 1943 in settlement of part of the calendar year 1942 liabilities, together with amounts withheld on 1943 salaries and wages at Victory tax withholding rates, were much smaller than would have been received if the current law had been in effect during that time interval. These low payments in partial liquidation of 1943 liabilities were received in the fiscal year 1943. Fiscal year 1944 collections were therefore large in a nonrecurring way because they included the balance of calendar year 1943 liability payments which were abnormally large. This distribution of payments was associated with going on the current payment basis.

Direct taxes on corporations.—An increase of $1,786.6 millions is shown from this source, the details of which are given in the following table:

[In millions of dollars]

General and special account receipts	Estimated, 1945	Actual, 1944	Increase (+) or decrease (−), 1945 over 1944
Income and excess profits taxes	15,192.3	13,242.1	+1,950.2
Declared value excess profits tax	123.5	109.9	+13.6
Back taxes (excluding unjust enrichment tax)	1,354.3	1,414.4	−60.1
Capital stock tax	372.5	380.7	−8.2
Adjustment to daily Treasury statement basis		+108.9	−108.9
Total direct taxes on corporations	17,042.6	15,256.0	+1,786.6

Receipts in the fiscal year 1945 from corporation taxes are estimated to provide the wartime peak from this tax source. Following the conversion of plants from peacetime to war uses in the calendar year 1942, and as a consequence of growing wartime Government expenditures, corporate profits continued to expand rapidly during the calendar year 1943 and are estimated to have nearly maintained the peak level in the calendar year 1944. Government expenditures increased markets for products and lowered unit costs as production facilities were used to a larger extent of capacity and as more experience was gained both by corporations and by labor in the production of new and unfamiliar lines.

Excise taxes.—The yields of the major groups of excise taxes are compared in the following table:

[In millions of dollars]

General and special account receipts	Estimated, 1945	Actual, 1944	Increase (+) or decrease (−), 1945 over 1944
Liquor taxes	2,063.5	1,618.0	+445.5
Tobacco taxes	921.2	988.4	−67.2
Stamp taxes	62.8	50.8	+12.0
Manufacturers' excise taxes	800.2	502.7	+297.5
Retailers' excise taxes	420.0	225.2	+194.8
Miscellaneous taxes	1,396.3	1,076.2	+320.1
Unjust enrichment tax	0.1	0.4	−0.3
Adjustment to daily Treasury statement basis		−62.3	+62.3
Total excise taxes	5,664.1	4,399.6	+1,264.5

With the exception of the receipts from the tobacco taxes which are adversely affected by the increased amount of tax-free withdrawals of cigarettes going to the armed forces, the receipts from every major grouping of excise taxes show an increase in the fiscal year 1945 over those of the preceding year.

The receipts from liquor taxes are at a new peak in the fiscal year 1945. Supplies of distilled spirits are more ample as a result of the resumption of the distilling of beverage alcohol during the so-called "liquor holidays." Increased wartime tax rates on liquors also contribute to the record receipts.

Following the passage of the Revenue Act of 1943, and as old contracts for delivery expire, the Federal Government is paying a tax on its purchase of taxable items. This amount which the Federal Government pays to itself, and which therefore does not improve its fiscal position, is estimated at $243.2 millions in the fiscal year 1945. The effect of the repeal of these Federal exemptions is shown almost entirely in the receipts from the manufacturers' excise tax group and reflects principally the purchases of war materials.

In general, increases in the receipts from other excise taxes are due to higher tax rates together with a rising volume of spending by individuals.

Employment taxes.—Receipts from the employment taxes are distributed as follows:

[In millions of dollars]

General and special account receipts	Estimated, 1945	Actual, 1944	Increase (+) or decrease (−), 1945 over 1944
Federal Insurance Contributions Act	1,322.6	1,292.1	+30.5
Federal Unemployment Tax Act	190.7	179.9	+10.8
Taxes on carriers and their employees	280.5	267.1	+13.4
Railroad unemployment insurance contributions	13.0	12.1	+0.9
Total employment taxes	1,806.8	1,751.2	+55.6
Deduct: Net appropriation for Federal old-age and survivors insurance trust fund	1,293.1	1,259.5	+33.5
Net employment taxes	513.7	491.7	+22.0

The tax rates and the statutory coverage of the employment taxes are the same in the 2 fiscal years, so that larger amounts of covered salaries and wages cause the increased tax yields. The receipts from the Federal Insurance Contributions Act are appropriated to the Federal old-age and survivors insurance trust fund except for administrative expenses.

Customs.—Customs receipts decrease to $326.1 millions in the fiscal year 1945 from receipts of $431.3 millions in the fiscal year 1944. The dominating causes of changes in customs receipts are exigencies of shipping space, increased duty-free imports of strategic materials (particularly sugar) under Executive Order No. 9177, dated May 30, 1942, and the improving domestic supply situation in connection with liquors, wool, and metals.

Miscellaneous receipts.—Miscellaneous receipts in the fiscal year 1945 amount to $3,283.1 millions, an increase of $3.0 millions from comparable receipts in the preceding year. There is a slight increase despite smaller recoveries from the renegotiation of war contracts as the Government acquires more experience in procurement pricing.

FISCAL YEAR 1946

The estimates of receipts in the fiscal years 1945 and 1946 are compared by major tax sources in the following table:

Federal Reserve Bank of St. Louis

Total and net receipts by source

[In millions of dollars]

General and special account receipts	Estimated, 1946	Estimated, 1945	Increase (+) or decrease (−), 1946 over 1945
Direct taxes on individuals	15,631.7	18,900.1	−3,268.4
Direct taxes on corporations	16,263.1	17,042.6	−779.5
Excise taxes	5,647.3	5,664.1	−16.8
Employment taxes	2,066.9	1,806.8	+260.1
Customs	326.3	326.1	+0.2
Miscellaneous receipts	2,919.4	3,283.1	−363.7
Total receipts	42,854.8	47,022.8	−4,168.0
Deduct: Net appropriation for Federal old-age and survivors insurance trust fund	1,599.9	1,293.1	+306.8
Net receipts	41,254.9	45,729.7	−4,474.8

Receipts are expected to be smaller in the fiscal year 1946 than in the fiscal year 1945. Major sources of revenue contributing to the decrease are: (1) The individual income tax receipts which are smaller because of estimated lower incomes and because of the nonrecurring payments in the fiscal year 1945; (2) the corporation tax receipts which are less because of lower corporate incomes, and (3) miscellaneous receipts which are lower because of the decreasing recoveries from renegotiation of war contracts.

Partly offsetting these declines are increases in receipts from employment taxes as a result of higher tax rates for certain of these taxes affecting receipts in 3 months of the fiscal year.

Direct taxes on individuals.—The yields of direct taxes on individuals in the fiscal years 1945 and 1946 are shown in the following table:

[In millions of dollars]

General and special account receipts	Estimated, 1946	Estimated, 1945	Increase (+) or decrease (−), 1946 over 1945
Individual income tax:			
Withheld	8,243.0	9,970.1	−1,727.1
Not withheld	6,734.0	8,284.3	−1,550.3
Back taxes	132.0	131.2	+0.8
Total individual income tax	15,109.0	18,385.6	−3,276.6
Estate tax	487.0	474.6	+12.4
Gift tax	35.7	39.9	−4.2
Total direct taxes on individuals	15,631.7	18,900.1	−3,268.4

Individual income-tax receipts decrease to $15,109.0 millions in the fiscal year 1946. The last of the nonrecurring offsets to the remitted 1942 liabilities (i. e., payment on "unforgiven tax") will be paid in the fiscal year 1945 in an amount estimated at $900 millions. No corresponding amount is collectible in the fiscal year 1946. This fact, together with a reduction in the level of incomes on which receipts are based, accounts for the lower yield in the fiscal year 1946.

Direct taxes on corporations.—The details of the yield of direct taxes on corporations are shown below:

[In millions of dollars]

General and special account receipts	Estimated, 1946	Estimated, 1945	Increase (+) or decrease (−), 1946 over 1945
Income and excess profits taxes	14,312.9	15,192.3	−879.4
Declared value excess profits tax	112.6	123.5	−10.9
Back taxes (excluding unjust enrichment tax)	1,487.6	1,354.3	+133.3
Capital stock tax	350.0	372.5	−22.5
Total direct taxes on corporations	16,263.1	17,042.6	−779.5

Receipts from corporation taxes in the fiscal year 1946 are estimated at $16,263.1 millions, somewhat below the $17,042.6 millions expected in the fiscal year 1945. The high level of corporate income attained in 1943 is not expected to increase even with the continued high level of Government war expenditures. Costs catch up and cut into corporate profits as military services create manpower shortages (leading to the employment of less efficient labor, frequently at higher hourly rates and with much overtime), as machines under wartime exigencies are not adequately maintained or replaced, and as ceilings prevent selling prices from rising correspondingly. Hence the fiscal year 1946 estimated corporation tax receipts, reflecting 1944 and 1945 corporate income, are slightly less than the receipts arising from the peak 1943 and 1944 corporate profits, but nevertheless they are larger than the fiscal year 1944 receipts, arising from 1942 and 1943 income experience.

Excise taxes.—The estimates of yields from the more important groups of excise taxes are shown in the following table:

[In millions of dollars]

General and special account receipts	Estimated, 1946	Estimated, 1945	Increase (+) or decrease (−), 1946 over 1945
Liquor taxes	2,023.8	2,063.5	−39.7
Tobacco taxes	886.1	921.2	−35.2
Stamp taxes	59.2	62.8	−3.6
Manufacturers' excise taxes	997.4	800.2	+197.2
Retailers' excise taxes	392.2	420.0	−27.8
Miscellaneous taxes	1,288.6	1,396.3	−107.7
Total excise taxes	5,647.3	5,664.1	−16.8

In general, a decline in the volume of Government expenditures is expected to result in some reduction in individual incomes, which will be reflected in reduced buying of various taxable items. This will be offset in part, however, by some increase in the production and sale of other taxable civilian goods, the supplies of which had been restricted by war requirements.

Estimated revenues in the fiscal year 1946 include an increased amount of tax payments by the Government on taxable items purchased largely for war uses, owing to a greater tax coverage of Government purchases during this first full year under the new provision of the tax laws. Collections from this source, which represent no improvement in the Federal fiscal position, are estimated at $301.0 millions in the fiscal year 1946, as compared with $243.2 millions in the previous fiscal year. Including this item of increase, there is a fairly large increase in revenues from the manufacturers' excise tax group, which increase is more than offset by decreases in other sources of excise

taxes, so that the excise tax receipts as a whole show a decrease.

Employment taxes.—The relative magnitudes and changes in yield from employment taxes are as follows:

[In millions of dollars]

General and special account receipts	Estimated, 1946	Estimated, 1945	Increase (+) or decrease (−), 1946 over 1945
Federal Insurance Contributions Act	1,629.7	1,322.6	+307.1
Federal Unemployment Tax Act	182.8	190.7	−7.9
Taxes on carriers and their employees	243.4	280.5	−37.1
Railroad unemployment insurance contributions	11.0	13.0	−2.0
Total employment taxes	2,066.9	1,806.8	+260.1
Deduct: Net appropriation for Federal old-age and survivors insurance trust fund	1,599.9	1,293.1	+306.8
Net employment taxes	467.0	513.7	−46.7

The estimates of receipts from the Federal Insurance Contributions Act assume existing law, that is, that the freeze in tax rates will not be continued in the calendar year 1946, but that the rates will advance to 2½ percent on employer and 2½ percent on employee. If this increase were not effective the fiscal year 1946 receipts would be reduced by $434.0 millions.

Customs.—While numerous items of customs receipts are expected to vary between the fiscal years 1945 and 1946, total receipts from this source in each of these years are estimated at approximately $326.0 millions.

Miscellaneous receipts.—Miscellaneous receipts in the fiscal year 1946 are expected to be $2,919.4 millions, a decrease of $363.7 millions from the previous year. Smaller recoveries from the renegotiation of war contracts account for the decrease since other items included in miscellaneous receipts increase in the aggregate.

[a] Excess of credits, deduct.

[1] This appendix is explained in appendix 1.

[2] Includes the following estimated amounts for excess-profits tax refundable in post-war period: 1943, $258 million; 1944, $689 million; 1945, $860 million; and 1946, $784 million.

[3] Because of possible material changes in war conditions, the detailed estimates of appropriations for the fiscal year 1946 for most of the major "war activities" will be submitted to Congress in the spring of 1945 in a war supplement to the Budget. Consequently the estimated expenditures for the fiscal year 1946 are tentative.

[4] Includes transfers to public debt accounts for excess-profits tax refund bonds issued.

APPENDIX 10—Continued

Notes

This appendix shows the income and expenditure picture for the economy of the United States as a whole. The figures are based on the national income concepts used by the Department of Commerce, except as otherwise indicated below. The primary divergence from Commerce concepts arises because the data have been adapted and modified so that the Government figures correspond with the concepts used in table 3 of the Budget. This appendix shows how the essential balance in the national accounts is achieved. Total incomes must equal total expenditures for goods and services by definition. These totals are technically known as the gross national product or gross national expenditure. Therefore, if any sector of the economy receives more than it spends, expenditures must be greater than receipts in other sectors. In 1939, excess receipts (savings) of individuals were offset by excess expenditures of both business and Government. In 1944, however, both individuals and business retained far more than they received, thus providing an offset for the excess of Federal payments over receipts. The Commerce concept of gross national product and its components are explained in the Survey of Current Business, March 1943.

Figures for 1944 are preliminary and based on incomplete data. The official estimates will not be available until February 1945.

The following explains selected lines in the table:

Line

3 Government insurance includes Government life insurance and national-service life insurance.

4 Includes United States savings bonds and Treasury bills.

6 This differs from the Commerce concept of disposable income in that in this table lines 3, 4, and 5 are deducted from income payments.

11 See note to line 6.

13 This differs from Commerce concept in that post-war credits for excess profits tax refundable in the post-war period are here included in Federal corporate tax liabilities.

15 This differs from the Commerce concept because of the differences explained in line 13.

16 This agrees with Commerce concepts and includes: Depreciation and depletion charges; other business reserves; capital outlay charged to current expense; inventory revaluation; and adjustments for discrepancies.

19 This line includes prepayments on war contracts, excess payments for war production which will subsequently be recovered by renegotiation, and miscellaneous transfer payments to business on capital account.

20 The renegotiation payments included here are made in discharge of previous liabilities and hence differ from the figure for renegotiation liabilities in line 19.

21 Commerce does not present a single figure on business receipts, but presents separately corporate savings, which differ from the concept here as explained in note to line 15, and business reserves, which agree with line 16 in this table. This table also differs from Commerce in that the difference between line 19 and line 20 is here regarded as an addition to business reserves. Excluded from corporate savings and business reserves as used by Commerce and from business receipts as used in this table are the retained earnings of unincorporated business which are counted as individual savings (line 11).

Line

22 This agrees with Commerce concept and includes residential building even if financed by individuals and used for private purposes.

27 Because of statistical imperfections explained in lines 6 and 21, the figures for business receipts and business expenditures are not strictly comparable with each other.

28 Tax liabilities and nontax payments and contributions by the public to State and local social insurance funds as used in the Commerce concept of national income are adjusted in this table to a collections basis. The figures exclude duplications owing to transfers among Federal, State, and local governments.

29 Commerce concept of State and local government expenditures for goods and services is adjusted to a budget basis, but excludes duplications owing to transfers among Federal, State, and local governments.

31, 32 These lines correspond to table 3 of the Federal Budget which is explained in appendix I.

33 Excess of expenditures, or payments to the public, as shown in this table is equal to borrowing from the public minus any increase or plus any decrease in the Treasury cash fund balance, as shown in table 3 of the Federal Budget.

34–39 These adjustments (to be deducted) are made to reconcile this appendix with Commerce totals.

34, 35 These items, included in consumers income (line 6) and business receipts (line 21), are not regarded as payments made for current production, and are therefore deducted from total receipts. They are also deducted from total expenditures because they are not a payment for goods and services.

36–38 These items, included in the Commerce concept of gross national product, have not been included as such elsewhere in this table.

40, 41 These totals correspond to Commerce concept of gross national product.
