BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I am transmitting the Budget for the fiscal year 1946 as fighting all over the globe reaches a climax of fury. We on the home front must back our fighting men and women to the limit. That is our supreme duty. At the same time we must look ahead. We must be ready to throw our whole effort into the campaign against Japan as fast as the war in Europe permits. And finally, we must begin plans to transform an all-out war economy into a full-employment peace economy whenever demobilization becomes possible. Programs for all these developments must be considered in budget planning for a period that extends over 18 months.

We must make sure that our armed forces can plan their procurement programs for continuing global war. I shall transmit detailed recommendations for war appropriations by early spring, in time for the Congress to act on these requests before the beginning of the new fiscal year. I estimate now that 73 billion dollars of appropriations and authorizations will be needed for war purposes for the fiscal year 1946.

If the war develops favorably, unobligated balances of war appropriations no longer required for authorized purposes will be placed in reserve and reported to the Congress for repeal or other action under the provisions of present law.

Actual expenditures of the Federal Government depend largely on the course of the war. I have not made in the past, and I shall not now make, any prediction concerning the length of the war. My only prediction is that our enemies will be totally defeated before we lay down our arms. Depending on various assumptions which may reasonably be made with respect to the course of the war, estimates of war expenditures for the fiscal year 1946 range from less than 60 to more than 80 billion dollars. I propose to use 70 billion dollars as a tentative estimate of war expenditures for the fiscal year 1946. I repeat, however—the rate of actual spending must depend on developments on the battlefronts.

For purposes other than war, I am recommending appropriations, in general and special accounts, to cover estimated expenditures of 13 billion dollars.

Total appropriations and authorizations (including reappropriations and permanent appropriations) for war and other purposes

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

reached a peak of 128 billion dollars for the last complete fiscal year that ended June 30, 1944; 97 billion dollars have been appropriated for the current fiscal year; and I estimate now that 87 billion dollars will be recommended to the Congress for the next fiscal year.

Total expenditures for war and other purposes (in general and special accounts and net outlays of Government corporations, excluding debt retirement) were 95 billion dollars during the fiscal year 1944; they are now estimated at 100 billion dollars for the current fiscal year; and, on the basis of the tentative estimates of war expenditures, they will be 83 billion dollars during the fiscal year 1946.

I propose no substantial change in tax legislation at this time. Revenues are expected to decline somewhat under the influence of the estimated decline in expenditures. The Federal debt is estimated to reach 252 billion dollars on June 30, 1945, and 292 billion dollars 12 months later.

The 1946 Budget is summarized in charts and tables following this Message. In the subsequent sections I comment on appropriations, expenditures, and revenues under existing legislation, and make suggestions for future legislation.

The War Program

EXPENDITURES FOR THE WAR PROGRAM

Early in the war we had the threefold task of building up a new munitions industry in this country, producing the equipment and means of transportation for our expanding armed forces, and aiding our Allies in their resistance against the aggressors. The record today shows that we have spent 28 billion dollars since July 1, 1940, to build munitions factories, cantonments, depots, hospitals, war housing, and for other war construction. Three times the total strength of our Army and Navy at the time of Pearl Harbor is now fighting or deployed overseas. Thirty-six billion dollars of lend-lease aid have been furnished in goods and services to our Allies, who in turn have aided us with approximately 4.5 billion dollars worth of goods and services.

We have now substantially completed our war construction. Expenditures for war construction, which in the fiscal year 1943 reached a peak of 12.7 billion dollars, are now down to an annual rate of about 2.5 billion dollars. The development of new weapons and increased need for ammunition still require some new plants and equipment, but total outlays for war construction are declining, as shown in the following table:

[1] Revised estimate.

[2] Including agricultural lend-lease and other civilian war activities.

We have also substantially completed the initial equipment of the Army and Navy and their Air Forces. Although we have now a Merchant Marine four times its pre-war tonnage, the terrific strain of global war makes necessary some further addition to the cargo and tanker fleet.

Our forces engaged in battles in Europe and Asia expend munitions at a prodigious rate. The main job now is that of replenishing equipment and supplies and of providing our fighting men with the most up-to-date weapons which can be contrived. Some weapons of which we had sizable inventories only a few months ago must now be produced in increased quantities. More than one-fourth of present war production is in critical items. Untimely relaxation in war production spells greater sacrifice in human lives and delays victory.

Expenditures for pay and subsistence of the armed forces still are increasing because of the higher pay for a larger number of soldiers and sailors stationed overseas. Expenditures for mustering-out payments are also increasing as a result of the considerable turn-over in our forces.

The war expenditure estimate for the fiscal year 1946 also provides for continuance of subsidies paid out of funds of the Reconstruction Finance Corporation to assure war output and to stabilize the cost of living. It excludes payments of the Department of Agriculture for the farm price support and related agricultural programs which are discussed elsewhere in this Budget. No allowance is made either for possible addition of new subsidy programs or for discon-

tinuance or reduction of existing programs, although I hope that a reduction will become possible. In accordance with legislation enacted by the last Congress, I shall submit detailed recommendations for these programs at a later date.

War expenditures are expected to decline in the fiscal year 1946; our war construction and initial military equipment are substantially complete, and our supply lines have been filled. The extent of that decline depends on the course of the war. The composition of war expenditures will change considerably in any case.

There has been overoptimistic speculation about the possible cut in war expenditures when major hostilities in Europe end and our main efforts are concentrated on the Japanese campaign. We should make a great mistake if, in our military and budgetary planning, we underestimate the task of defeating Japan. Japan now occupies twice the area which was held by the Nazis in Europe at the peak of their power, an area as large as the continental United States. The population now under Japanese control is more than three times the population of the United States.

The supply lines to the Pacific and Asiatic theater are two and three times the distance to Europe, and the turn-around time for ships has been two-thirds greater. As the battle against Japan mounts, more cargo will have to be shipped over greater distances.

Our task in Europe will not end with the cessation of hostilities there. The war will not be won unless we accept our share of responsibility for the administration of occupied territories and for relief and rehabilitation in the liberated areas. Expenditures for these tasks are part of the war Budget.

APPROPRIATIONS FOR THE WAR PROGRAM

The uncertainties of war require that the budgets of the military agencies be sufficiently large and flexible to permit them to meet all demands that may arise. Adequate appropriations and contract authorizations enable the war agencies to make commitments and to place procurement contracts far enough ahead for industry to plan the various stages of production. On the other hand, we should, of course, also be prepared to adjust our war programs downward if the development of the war allows.

The Congress has placed administrative controls in the Executive Office of the President by granting authority, under legislation expir-

ing June 30, 1945, to limit personnel in the Federal agencies and has reinforced them by requesting reports on unobligated balances of war appropriations.

There is a considerable time lag between the legislative authorization or appropriation for war supply, the obligation or placement of orders with contractors, and the final payment on delivery of finished munitions. The huge authorizations and appropriations voted by the Congress in the early years of the war enabled the war agencies to place munitions contracts for later delivery. We are now paying for deliveries under these contracts. Unliquidated obligations for the war program totaled 100 billion dollars at the beginning of the fiscal year 1944; they had been reduced at the end of November 1944 to about 66 billion dollars by payment or, in some cases, by cancelation.

Appropriations and authorizations for war purposes, in the general and special accounts, for the fiscal year 1944 were 120 billion dollars. For the fiscal year 1945, they declined to 85 billion dollars, and for the fiscal year 1946 are now tentatively estimated at 73 billion dollars. These totals include reappropriations and contract authorizations required for new obligations. The total war program, measured by such appropriations and authorizations together with net commitments of Government corporations for the fiscal years 1941 through 1946, will total 450 billion dollars, as shown in the following table:

The estimated appropriations and authorizations for war for the fiscal year 1946 are composed of 59 billion dollars of new appropriations and authorizations, and 14 billion dollars of reappropriations of funds previously appropriated for war but not yet obligated. Unobligated balances of prior-year appropriations and authorizations to the Maritime Commission are adequate to carry out the merchant ship construction program as now approved. Detailed recommendations for most war activities will be transmitted in the spring.

These tentative estimates of appropriations include provisions for continuing lend-lease aid to our Allies. They are based on the assumption that the Lend-Lease Act will be reenacted prior to its expiration on June 30, 1945.

About one-sixth of present war outlays are for lend-lease and for relief and rehabilitation. We shall continue to provide lend-lease, and our Allies to provide reciprocal aid, to the full extent necessary to win the war. Lend-lease has been and will be an instrument of war; it will be liquidated with the end of the war. But when the war draws to a close in any theater, it may become urgently necessary for us to assist in relieving distress in the liberated areas. Appropriations to the War Department make some provision for civilian supply in territories occupied by the Army, but only to the extent necessary in the interest of military operations. For relief and rehabilitation after the battle lifts, the Congress has already authorized 1,350 million dollars as the contribution of the United States to the United Nations Relief and Rehabilitation Administration. To date, appropriations of 450 million dollars and transfer authorizations from lend-lease of 350 million dollars have been made as our share for immediate needs under this program. If the appropriated amount proves inadequate, we must take additional measures, in cooperation with the other United Nations, to make sure that the peoples of the liberated countries have essential relief from the devastation of war.

Appropriations and Expenditures for Other Than War Activities

AFTERMATH-OF-WAR

In last year's Budget Message, I indicated the inevitable increase of expenditures in the aftermath-of-war category, particularly expenditures for war veterans, interest on the public debt, and tax refunds. Total expenditures for these purposes are increasing from

Digitized for FRASER

Federal Reserve Bank of St. Louis

1.6 billion dollars in 1939 to an estimated 7.2 billion dollars in the current fiscal year, and will probably amount to 9.8 billion dollars in the next fiscal year. This increase arises directly out of the war. The 1946 total is larger than the whole Federal Budget 5 years ago.

Veterans' pensions and benefits.—Although the full impact of the veterans' program will not be felt until the years following demobilization, the total estimated requirements for 1946 of 2,623 million dollars represent about 20 percent of the total appropriations for other than direct war purposes. They are more than double the total appropriated for the veterans' program in the current fiscal year.

Additional appropriations for the current fiscal year will become necessary to cover increased pension costs occasioned by losses in service; to conform with recent legislation increasing coverage and liberalizing payments to veterans of former wars and to their dependents; and to carry out the provisions of the Servicemen's Readjustment Act of 1944. The estimated supplemental appropriations include these items.

Pension costs during the fiscal year 1946 are expected to increase sharply to a total of 1,080 million dollars, and the costs of education, readjustment allowances, and loan guarantees to 295 million dollars. In addition, 1,000 million dollars are provided for losses resulting from the hazards of the war among holders of national service life insurance policies and 85 million dollars for construction and reconditioning of hospital facilities. This hospital construction program (shown in the Budget under General Public Works), together with Army facilities later to be made available to the Veterans' Administration, may ultimately provide 300,000 beds.

The time and rate of demobilization will greatly affect the expansion of education, readjustment allowance, loan guarantee, and rehabilitation activities of the Veterans' Administration. The number of veterans of the present war will increase until at full tide these veterans will constitute one-tenth of the population and almost one-fourth of the labor force. The responsibility which we are assuming for their jobs, education, medical care, and financial assistance makes it increasingly essential that these programs for veterans be integrated with other programs of like nature affecting the whole Nation.

Interest.—Interest on the public debt is estimated to rise next year by 750 million dollars to 4,500 million dollars. This rise reflects entirely the current increase in the outstanding debt. No change is anticipated in the low interest rates at which the war is being financed.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Tax refunds.—Refunds of taxes are expected to require a total of 2,725 million dollars, an increase of 556 million dollars over the fiscal year 1945. About 1 billion dollars of this total will consist of repayments to wage and salary earners of withholdings in excess of tax liabilities. Another billion dollars reflects the issuance of post-war bonds which cover the refundable 10 percent of the excess profits tax. Other corporate tax refunds are due to the recomputation of the special amortization allowances for emergency facilities certified to be no longer necessary for war production, and to the carry-back provisions of the corporate income and excess profits tax laws. The refunds arising from these provisions for corporate tax relief will reach full volume only in future years.

AGRICULTURE

Agricultural production has continued at record levels for 3 successive war years. Farm income has been more than 135 percent of parity throughout the period. To assure continued production at a high level, I recommend appropriations for the Department of Agriculture, including the War Food Administration, of 512 million dollars. Although this is considerably less than has been appropriated in the fiscal year 1945, the amount available, after adjustment for unused balances, reappropriations, and transfers, will not be substantially less than the amount being used for agricultural purposes in this fiscal year. The appropriations include provision for the Agricultural Adjustment Agency, the Soil Conservation Service, the Farm Security Administration, the exportation and domestic consumption of agricultural commodities, the administration of the Sugar Act, and research and other long-established functions of the Department of Agriculture. They do not include provision for potential net expenditures of either the Commodity Credit Corporation or the Federal Crop Insurance Corporation. Of the 512 million dollars recommended, 10 million dollars for the War Food Administration are designated for war activities and 10 million dollars are for General Public Works.

Anticipating the needs of returning war veterans and the desirability of providing adequate assistance to small, low-income farmers, I recommend that the borrowing authority of the Farm Security Administration be increased from 67 to 125 million dollars for rural rehabilitation and from 15 to 50 million dollars for the tenant purchase program. I recommend that the borrowing authority of the

Rural Electrification Administration be increased from 25 to 150 million dollars in order to permit the extension of electricity to at least part of the 6 million rural families now without such service. I have already given my approval to a recommendation of the War Food Administrator for an increase of 2 billion dollars in borrowing authority of the Commodity Credit Corporation. I shall recommend appropriations for financing the revived program for crop insurance in the very near future.

This agricultural budget is a wartime budget. It does not fully reflect desirable long-time objectives. In the future, we must develop a program to eliminate malnutrition and rural poverty. The Government is committed to support agricultural prices to farmers at a fair level for 2 years after the war. Farmers and the Nation as a whole must be protected from heavy fluctuations in agricultural prices and income, and this must be accomplished without the accumulation of unmanageable surpluses. So long as a large number of people have an inadequate diet, we cannot have a true surplus of agricultural production. We can have only too much of the wrong things.

SOCIAL SECURITY, RETIREMENT, AND EDUCATION

Social security.—Appropriations for administration and grants under the social security program are estimated at 494 million dollars for the fiscal year 1946, an increase of 14 million dollars over the fiscal year 1945. This increase is largely for higher grants to match payments of the States under the Social Security Act.

I hope that the Congress will give early consideration to extension and improvement of our social security system and will reexamine the financial basis of the program.

Retirement funds.—Appropriations for the Government employees' retirement funds are estimated at 247 million dollars for the fiscal year 1946, an increase of 50 million dollars over the current fiscal year. This will reduce the previously accrued liabilities of the Government to these trust funds and will also provide for an increase in the number of employees currently acquiring benefit rights.

Education.—As a part of the Budget for the fiscal year 1946, I am recommending reorganization of the basic structure of the Office of Education. This reorganization will facilitate service to the States in the development of more adequate educational programs with proper emphasis on all the various aspects of education.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The training and educational programs of the Army, the Navy, and civilian agencies during this war have broadened our conception of the role that education should play in our national life. The records of selective service reveal that we have fallen far short of a suitable standard of elementary and secondary education. If a suitable standard is to be maintained in all parts of the country, the Federal Government must render aid where it is needed—but only where it is needed. Such financial aid should involve no interference with State and local control and administration of educational programs. It should simply make good our national obligation to all our children. This country is great enough to guarantee the right to education adequate for full citizenship.

PUBLIC WORKS

Recommended appropriations under the General Public Works Program in the fiscal year 1946 total 279 million dollars, 93 million dollars more than appropriated for the current year. Balances brought forward from public works appropriations of several years ago are about used up. Even with the recommended new appropriations, the program as a whole will be limited; actual construction will continue to be restricted to those projects which contribute to the war effort. Because of the completion of some of this war-related construction, expenditures are estimated to decrease slightly in the next fiscal year.

I recommend, however, appropriations for the planning of public works which the Congress has already authorized. We must continue to stock up a shelf of meritorious construction and development projects to be undertaken as manpower and material become available. By the end of the current fiscal year, detailed plans will be ready for about 1.5 billion dollars of Federal public works, and also will be substantially ready for a billion-dollar program of Federal-aid highways, half of this road program to be financed with State funds. We need a larger shelf of detailed plans in order to be prepared for the post-war period. Hence, appropriations for 1946 are recommended to make possible the completion of additional plans for highways, flood control, river development, stream pollution control, power transmission, reclamation, hospital, and other construction, as authorized by law. Further requests for funds for detailed planning of Federal projects will be made on Congressional authorization.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Plans have been completed or are in the design stage for about 3 billion dollars of State and local public works, excluding Federal-aid highways. The War Mobilization and Reconversion Act authorizes funds for Federal loans and advances which would make it possible to place further projects on the shelf of planned public works. The extent to which Federal funds are needed to enable States and localities to plan adequately for useful public works is now being reexamined, and I shall soon transmit a new recommendation concerning funds for these purposes.

In addition, programs are being developed for Federal loans and guarantees to stimulate private construction after the war. Guarantees and loans already available under the Servicemen's Readjustment Act will encourage residential, commercial, and farm building.

GENERAL GOVERNMENT

The civil departments and agencies of the Federal Government have been fully geared to the war effort. Appropriations for other than direct war or war-related activities have been reduced to rock-bottom. When the war situation permits a reduction in the war program, it will also be possible to reduce war activities of the civil departments. Such activities should be curtailed wherever possible. The Bureau of the Budget has been instructed to review currently the activities of the various Government agencies and to recommend such changes as become desirable in light of changing war requirements.

Agencies which will play a leading role in the peace effort must begin preparations for a progressively larger job. I recommend, for instance, an increase in the appropriations for the Department of State in order that it may be more adequately staffed at home and abroad. To prepare for the expected increase in workload, increases in appropriations are recommended for the Bureau of Foreign and Domestic Commerce, the Office of the Administrator of Civil Aeronautics, and a few other agencies.

Recommended appropriations for general Government for the fiscal year 1946 are slightly below those enacted for the current fiscal year. If supplemental appropriations for overtime pay are adopted, requirements for general Government may be somewhat above those for the current year.

GOVERNMENT CORPORATIONS—OTHER THAN WAR ACTIVITIES

Receipts of Government corporations (excluding war activities) will exceed expenditures for purposes other than debt retirement by

Federal Reserve Bank of St. Louis

27 million dollars in the fiscal year 1946, and by 224 million dollars in the current fiscal year.

The operations of the Commodity Credit Corporation in connection with the farm and food programs require net outlays of 1 billion dollars during the current fiscal year. This assumes a supplemental appropriation of 256 million dollars to restore impaired capital of the Corporation. The estimate for the fiscal year 1946 provides for net expenditures of 572 million dollars which will absorb practically all the funds available to the Corporation under its present maximum borrowing authority of 3 billion dollars. If the Congress approves the pending recommendation for a further increase in the borrowing authority, increased operations of the Corporation may result in additional net expenditures in the fiscal year 1946.

Activities of other Government corporations are expected to show smaller net receipts than during the fiscal year 1945. Liquidation of pre-war loans and other assets will probably taper off. Some expansion in the nondefense lending activities of the Reconstruction Finance Corporation is also anticipated. The net receipts of Government corporations, in both the fiscal years 1945 and 1946, reflect substantial transfers of funds necessary to retire outstanding obligations of the Federal land banks.

FEDERAL PERSONNEL

Most of the Federal civilian employees are engaged in essential war work and must stay on the job as long as the war lasts. Government war services have suffered in recent months by departure of personnel, partly because of overoptimism about early victory, partly because of concern about employment opportunities after the war.

The total number of paid Federal employees in the continental United States in November 1944 was slightly under 2,900,000, of whom 2,040,000 were in the War and Navy Departments and other war agencies and 836,000 in the Post Office and other peacetime establishments. The total has declined 126,000 below the peak of June 1943. There will be further reductions as the course of the war permits, but our main concern at the present moment is to keep essential Government personnel on the job.

Anticipated supplemental appropriations for the fiscal year 1946 include about 500 million dollars as an approximation of the additional cost of overtime pay and other salary adjustments, assuming enactment of such pay legislation as the Congress may authorize to replace those

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

present acts which expire June 30, 1945. This allowance has not been allocated among the detailed war and other appropriation estimates to which it relates. The Budget estimates of personnel needs, expressed in "man-years," do, however, assume continuance of the present work-week, generally 48 hours. Under the War Overtime Pay Act of 1943, salaried employees are compensated for hours worked in excess of 40 a week. With but minor exceptions, basic salary rates have not been increased during the war.

In contrast to salaried employees, the skilled and unskilled workers, such as those in navy yards and arsenals, have had wage adjustments which have approximately kept pace with wage rates for comparable work in private industry. They have also received overtime pay at true time and one-half rates.

The third large category of Federal employees—the postal workers—in addition to receiving overtime compensation at straight-time rates, has been granted a wartime bonus.

Prior to the expiration of the overtime pay law, the Congress should reexamine the entire subject of hours of work and pay. Regardless of the progress of the war in Europe, many Federal employees will continue to be needed on a 48-hour work schedule, and provision must be made for their overtime compensation. I recommend that the Congress enact permanent legislation which would authorize overtime compensation at true time and one-half rates.

When at some future date it becomes possible for most Federal employees to go on a 40-hour workweek, their earnings will be materially reduced. A situation of hardship and unfairness will then exist unless an increase in basic salary rates has been granted in recognition of the rise in the cost of living. I recommend a prompt reexamination of Federal salary rates with a view to making adjustments consistent with the national stabilization policy.

Budget Totals

The discussion of expenditures for the war and for all other purposes lays the basis for presenting the Budget totals and for an analysis of the impact of the Federal Budget on the national economy as a whole.

EXPENDITURES

Of the total estimated expenditures, including net outlays of Government corporations, of 83 billion dollars for the fiscal year 1946, 84

percent are for direct war purposes; 12 percent are for veterans, interest on the public debt, and tax refunds; and only 4 percent for all other activities of the Federal Government. Expenditures in this last group of "other activities" are estimated at 3.3 billion dollars, somewhat less than for the current fiscal year; they are only about one-half of what they were in the years before the start of the defense program—largely because of the reduction in work relief, aids to youth, and general public works.

NET RECEIPTS IN THE FISCAL YEAR 1946 UNDER EXISTING LEGISLATION

Net receipts in general and special accounts under existing legislation are expected to decline from 45.7 billion dollars in the current fiscal year to 41.3 billion dollars in the fiscal year 1946. This development reflects, in large part, the 17-billion-dollar decrease in expenditures estimated in this Budget. Such a decrease in expenditures before full reconversion to civilian production will mean smaller individual incomes and corporate profits. This, in turn, will bring a decrease in receipts from individual income taxes and from corporate taxes. Because the present law will expire June 30, 1945, receipts from recovery of excessive profits from renegotiated war contracts will taper off during the fiscal year 1946. I recommend that the Congress extend the authority to renegotiate war contracts.

Receipts from excises and customs are expected to continue at about the same level in the fiscal year 1946 as in the current fiscal year. Sales of surplus Government-owned war supplies and property are beginning to yield substantial amounts. These receipts will be still larger in later fiscal years.

RECOMMENDATIONS FOR TAX LEGISLATION

Wartime taxes must be maintained as long as large-scale war expenditures are necessary. There is no justification for tax reductions as long as we are engaged in a major war. When a favorable development of the war allows a major decline in war expenditures, minor tax adjustments will become possible and desirable. I am pleased that the Joint Committee on Internal Revenue Taxation is studying the tax problems of the transition and post-war period.

BORROWING IN THE FISCAL YEAR 1946

Borrowing requirements during the fiscal year 1946 will amount to an estimated 40 billion dollars, compared with 51 billion dollars in the current fiscal year. Federal trust funds will have 5 billion dollars available for investment in Government securities, thus leaving 35 billion dollars to be borrowed from individuals and financial and other institutions. These estimates assume that the Treasury general fund balance, which amounted to 20 billion dollars at the end of the fiscal year 1944, will be reduced by 5 billion dollars during the current fiscal year, and by 2 billion dollars during the fiscal year 1946. They also assume that retirement of guaranteed obligations of Government corporations held outside the Treasury will be almost completed by June 30, 1945.

These large borrowing operations will require a further rise in the public debt to 292 billion dollars on June 30, 1946. Before the debt reaches this figure, a further increase in the 260-billion-dollar debt limit will be necessary.

Management of the public debt has become one of the major financial operations of the Government. To assure effective discharge of these responsibilities and, in particular, to maintain the present low rates of interest, ample powers must be available to the monetary authorities. I shall later recommend legislation reducing the present high gold-reserve requirements of the Federal Reserve banks.

The management of the public debt is bound to have a profound influence on the economy for a long time to come. Retaining high taxes on the masses of consumers for general reduction of debt held by financial institutions may destroy purchasing power and create unemployment. But the use of progressive taxes for the redemption of bonds held by millions of individual savers may have a stabilizing influence on incomes and employment. I favor a policy of orderly but steady debt reduction, consistent with the objectives of long-run economic policy. The mistakes in debt management and tax policy after the last war should not be repeated.

Economic Controls and Reconversion

RECONVERSION

As long as we are at war—at war against two powerful enemies or against only one of them—we will give unqualified priority to all war production and to all manpower needs of war. Nevertheless, some reconversion of war industries may become possible, dependent on the progress of the war.

The foundation for dealing with the main reconversion problems has been laid by the Contract Settlement Act, the Surplus Property Act, and the War Mobilization and Reconversion Act; the machinery for the administration of these acts is being put in operation. Still, a great many problems remain to be solved if we are to be ready for successful reconversion. We may have a scarcity of manpower in certain industries and regions, while temporary unemployment may develop in others. We may have surpluses of some commodities and a downward tendency in certain prices, particularly of raw materials, while scarcities cause a continuing upward pressure on other prices.

The human side of reconversion requires effective organization to aid each discharged war veteran and war worker to find his way back into productive peacetime employment. As far as veterans are concerned, the basis is laid by the Servicemen's Readjustment Act. I have already emphasized the need to strengthen our social security program. With respect to the reconversion period, I am particularly concerned over the fact that broad categories of workers are not covered by present legislation and that present standards for unemployment compensation are not adequate in many States. To promote employment opportunities and to assure the proper occupational adjustment of returning veterans and war workers, a strong, integrated system of public employment offices is a basic necessity. We can best accomplish this objective by the establishment, through permanent legislation, of an effective national employment service with adequate coverage throughout the Nation. For the reconversion period we should provide assistance for travel and retraining of war workers.

We must also see to it that our administrative machinery for the adjustment of labor disputes is ready for the strains of the reconversion period. We must apply some of our wartime lessons in labor-management cooperation in working out a sound long-range labor

policy implemented by permanent mediation machinery for the adjustment of labor disputes.

The material side of reconversion should also be conducted with a view toward the long-range objectives of economic policy. Surplus property disposal should contribute to filling the needs of production, domestic and foreign. It should be carried on with full recognition of the objectives of price stability.

Every effort should be made to achieve full civilian use of plants built for war purposes when they are no longer needed for war production and to facilitate their rapid transfer to private industry for productive use. If prompt transfers of ownership cannot be made, temporary lease arrangements may facilitate early productive use while permanent arrangements for transfer are being worked out.

Statistical information concerning business activities and markets, employment and unemployment, incomes, expenditures, and savings is urgently needed as a guide for economic policies during the remainder of the war and during the reconversion and post-war periods. I recommended appropriations for this purpose to the last Congress. I shall transmit recommendations in the near future for those essential parts of the program on which the Congress took no action. Business, agriculture, labor, and the Government need to know the basic economic facts if each is to play its role with maximum effectiveness during the months and years ahead.

INTERNATIONAL FINANCIAL PROGRAMS

As the war progresses, we must hasten our plans to secure world-wide economic cooperation in both the transition period and the post-war period. We have learned that just as the United States cannot afford to be isolationist in its political philosophy, neither can it stand the malignant effects of economic isolationism.

Last July the United Nations Monetary and Financial Conference formulated articles of agreement for the establishment of an International Monetary Fund and an International Bank for Reconstruction and Development. These institutions will be integral parts of a broad program for cooperation among the United Nations in those areas of economic contact where failure to adopt common policies will result in economic "spite fences," economic waste, and economic warfare.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

A concrete program for international monetary and financial cooperation at an early date is essential. In the first place, all countries agree that a solution must be found for the evils that stem from the unstable and destructive exchange practices which the Fund is designed to eliminate. Second, the need for international investment is already becoming acute. The liberated countries will require loans for the reconstruction of their industry, their transport, their cities, their agriculture, and their trade. The International Bank will make direct long-term loans out of its capital or from borrowed funds, and particularly will guarantee private loans for these purposes. While the proceeds of these loans will be spent to procure equipment in the countries where it is available, the risks of lending will be spread equitably among all member countries.

It is therefore imperative that both the Fund and the Bank be established at once in order that they may be properly staffed and equipped to cope with problems which are already developing as the countries in Europe are liberated. Accordingly, I urge acceptance of the agreements and recommend the enactment of legislation which would permit the United States to make its proportionate investment in the Fund and the Bank.

In addition to the operations of the International Bank, there will continue to be many types of foreign investment in which a national financial institution such as the Export-Import Bank should participate, especially during the next few years when the foreign demand for our products will be particularly heavy. The Export-Import Bank will provide short- and medium-term credits to finance our exporters. It will also undertake long-term lending for reconstruction and development in cases where special American purposes are to be served and other countries may not wish to participate. In collaboration with private banks, manufacturers, engineers, and exporters, the Export-Import Bank has had 10 years of successful experience in these fields. At present its resources available for new operations are very limited. In order that it may play its part in the reconstruction period, I recommend early expansion of its lending power.

At present our foreign investment programs are impeded by legislation which restricts loans to those countries which are in default on loans arising out of the first World War. For both the International Bank and the Export-Import Bank to operate effectively, as well as

Digitized for FRASER

to achieve an adequate flow of private investment, it is essential that these restrictions be removed.

NATIONAL INCOME, PRODUCTION, AND ECONOMIC CONTROLS

The American Nation has almost doubled its total output of goods and services under the impact of the war program. Slightly less than one-half of this total output is purchased by the Federal Government. What is left for civilian consumption has been sufficient to provide most of us with better living standards than prevailed before the war.

The national economy is operating at extremely high levels of income and expenditure. Despite wartime taxes and large wartime savings, consumers and business have sought to buy more than the available supply of goods and services. Nevertheless, prices have been substantially stabilized through vigorous application of our stabilization program and the cooperation of the American people. Whereas the cost of living has increased by between 25 and 30 percent since 1939, it has risen only about 2 percent since the "hold-the-line" order of April 1943. Holding the line on prices and wages has prevented, and is still preventing, inflationary developments.

The reduction in war expenditures, which I hope the progress of the war will permit during the next fiscal year, will result in somewhat lower wartime incomes, even if wage ceilings are adjusted upward to avoid reduction in average hourly rates when overtime is curtailed. Nevertheless, the demand for goods and services will undoubtedly still be great and we can be sure of eager buyers for whatever durable goods industry might produce.

When war production is extensively reduced some of the controls which were needed in an all-out war economy can be relaxed, although other controls must be continued to assure necessary war production and orderly reconversion. For example, we must avoid speculation in inventories such as contributed to the inflation after the last war. The fact that many businesses and individuals have ample funds for a buying spree necessitates caution in relaxing controls. The balance between incomes, savings, and expenditures will still be precarious during the reconversion period. It will therefore be necessary to retain the machinery for allocation and price controls as long as certain materials and finished goods are in short supply. I therefore recommend extension of the Economic Stabilization Act before its expiration on June 30, 1945.

Digitized for FRASER

Federal Reserve Bank of St. Louis

In general, it will be our policy to hold the over-all cost of living and to permit only such adjustments as are conducive to the full utilization of available resources and compatible with the general objective of economic stabilization. As long as we are engaged in a war with desperate and resourceful enemies, war controls are needed, but they must be readjusted to changing levels of war production and civilian production.

Demobilization and Post-war Full Employment

Large-scale demobilization can hardly be expected to begin during the period covered in this Budget. Nevertheless, as we continue to mobilize for a long, hard war, we must under no circumstances be caught unprepared for peace.

Under the impact of a huge war program, we are employing 52 million men and women either in war production or in production and service for civilian purposes, while another 12 million are serving in the armed forces. After the war many of them will retire or resume their schooling or devote themselves to their homes and families. But such reduction in the civilian labor force will be more than offset by demobilization of our armed forces and by the natural growth of the population of working age. Thus, before long there may be 60 million men and women to be employed. Huge war expenditures have brought full employment, more than full employment. What will be the outlook when Federal expenditures are 50 and 25 billion dollars in the period of demobilization and thereafter?

The following table shows the operations of our national economy—the Nation's Budget—in the calendar year 1939 with considerable unemployment, and the same operations in the calendar year 1944 when we had moved to a much higher level of incomes, expenditures, and savings, involving more than full employment under the stress of war. Manifestly, full employment in peacetime can be assured only when the reduction in war demand is approximately offset by additional peacetime demand from the millions of consumers, businesses, and farmers, and by Federal, State, and local governments. And that means that consumers' expenditures and business investments must increase by about 50 percent, measured in constant prices, above the level of the year 1939 if full employment is to be provided by private enterprise.

Consumers' purchases of durable goods, business nonwar investments, and capital outlays of the governments for nonwar purposes have been so low during recent years that a large backlog of demand will be carried over into the post-war period. Individuals, however, will buy the new car or build the new home only if they feel secure in their jobs; businessmen will expand plant and buy new machinery only if they feel confident of profitable markets for additional products.

The American people have learned during the war the measure of their productive capacity, and they will remember that experience in the peace to come. It is the responsibility of business enterprise to translate market opportunities into employment and production. It is the responsibility of the Government to hold open the door of opportunity and to assure sustained markets. Then and only then can free enterprise provide jobs.

Full employment after the war is not only a matter of immediate self-interest, but also part of our stake in world stability and prosperity. Other countries are anxiously awaiting the development of our policy and will be more willing to make international commitments if they are assured of high post-war employment in the United States. They are fully aware that international cooperation cannot succeed unless the United States is prosperous.

We must attack the employment problem on every front.

For instance, we must overhaul the wartime tax structure to stimulate consumers' demand and to promote business investment. The elements of such a tax program should be developed now so that it can be put into effect after victory.

We must make sure that there are opportunities for new and growing business. The national and international policies which we adopt now—affecting trade, credit, investment, and competition and monopoly—largely determine future business and employment opportunities.

We must develop the human standards and material resources of the Nation, which in turn will tend to increase our productivity and most effectively support business expansion and employment. Our program should include provision for extended social security, including medical care; for better education, public health, and nutrition; for the improvement of our homes, cities, and farms; and for the development of transportation facilities and river valleys. We must plan now so that these programs can become effective when manpower and material are available.

I shall from time to time submit to the Congress recommendations for legislative measures to implement our demobilization program and to assure jobs for all returning war veterans and discharged war workers.

Our productive achievements during the war have demonstrated once and for all the progress which this Nation can support, the progress which will be required if all our resources are to be put to adequate peacetime use. The war, however, will also leave us deep distortions in our economic life which must be overcome. We owe it to those who give everything that we set our sights as high for peace as we set them for war.

[1] This table is explained in appendix 1.

[2] Because of possible material changes in war conditions, the detailed estimates of appropriations and contract authorizations for the fiscal year 1946 for most of the major "war activities" will be submitted to Congress in the spring of 1945 in a war supplement to the Budget. However, tentative estimates for these items are included in the amounts shown for the fiscal year 1946.

[3] The amounts shown for the fiscal years 1945 and 1946 include anticipated supplemental appropriations.

[4] Includes transfers to public debt accounts for excess-profits tax refund bonds issued.

[5] Included in "Appropriations" above.

[1] This table is explained in appendix 1.

[2] Because of possible material changes in war conditions, the detailed estimates of appropriations for the fiscal year 1946 will be submitted to the Congress as a part of a supplementary budget in the spring of 1945. Consequently the estimated appropriations and expenditures for the fiscal year 1946 are tentative.

[3] Includes Office for Emergency Management and constituent agencies, Office of Censorship, Office of Price Administration, Office of Strategic Services, and Petroleum Administration for War.

[4] Expenditures are shown under the various agencies to which funds are allocated.

[2] Because of possible material changes in war conditions the detailed estimates of appropriations for the fiscal year 1946 will be submitted to the Congress as a part of a supplementary Budget in the spring of 1945. Consequently the estimated appropriations and expenditures for the fiscal year 1946 are tentative.

EXPLANATORY STATEMENT

The estimates for the legislative branch provide for the salaries and expenses of the Members and staffs of the Senate and the House of Representatives, and for the operation and maintenance of the Capitol, the Senate and the House Office Buildings, the Botanic Garden, the Library of Congress, and the Government Printing Office. The 1946 estimates for the legislative branch reflect a net increase of approximately 7½ percent over appropriations for 1945.

The estimates for the United States Senate provide salaries for 96 Members and approximately 1,200 regular employees and for travel and contingent expenses of the Senators. The 1946 estimates show a slight decrease below the 1945 appropriations due to a reduction in staff in the Office of the Sergeant at Arms and Doorkeeper.

For the House of Representatives, with its 435 Members and some 2,000 regular employees, the 1946 estimates show an increase of approximately 12 percent over the 1945 appropriations due to an increased allowance for clerk hire authorized by law.

The Architect of the Capitol is responsible for the operation and maintenance of the Capitol and the Senate and the House Office Buildings. There is a net increase of approximately 32 percent in these estimates, composed largely of the following items: Reconstruction of roofs and skylights over the Senate and House wings of the Capitol; general repairs to the Library buildings, and an addition to the main Library of Congress building.

The Botanic Garden, which is also under the jurisdiction of the Architect of the Capitol, shows a 7 percent increase in its estimates due to proposed additions to the staff.

The Library of Congress provides library and reference service not only for the Members of Congress, but for the entire Federal Government and for many thousands of private citizens. The 1946 estimates for the Library of Congress are approximately 37 percent larger than the 1945 appropriations. These increases are due largely to proposed increases in staff and additional purchases of books, furniture, and equipment.

The Government Printing Office is the printer for the entire Federal Government. Only the cost of printing for the legislative branch, however, is included in this estimate. The amount included in the 1946 Budget shows somewhat less than 1 percent increase over the 1945 appropriations.

Public printing and binding	2	$1,750	2	$600	$1,150	----------	$1,350	New cars to be used for official business by the officials of the Government Printing Office when in writing ordered by the Public Printer.

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the fiscal year [1945] *1946* any executive department or independent establishment of the Government ordering printing and binding *or blank paper and supplies* from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do*; all sums received from sales of waste paper, other waste material, and condemned property; and for losses or damage to Government property;* shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office for the year in which the [work is done] *bills are rendered*, and be subject to requisition by the Public Printer.

No part of any money appropriated in this Act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in the executive branch of the public service of the United States unless such detail be authorized by law (*Act of June 26, 1944, Public Law 354*).

EXPLANATORY STATEMENT

GENERAL STATEMENT

Appropriations for The Judiciary provide funds for the United States Supreme Court, circuit courts of appeals, district courts, the Customs Court, Court of Customs and Patent Appeals, Court of Claims, and the Supreme Court and circuit courts of Hawaii. In addition to these courts, provision is made for the activities of United States commissioners, conciliation commissioners, the probation system, referees in bankruptcy, and the Administrative Office of the United States Courts.

The volume of matters coming before the courts in 1946 is expected to be slightly above the 1945 level, as any lessening in war-related litigation will probably be more than offset by increases in other types of civil and criminal cases.

In accordance with law, estimates for The Judiciary are included in the Budget without revision by the Bureau of the Budget.

UNITED STATES SUPREME COURT

The net decrease in the estimates for the Supreme Court results from a reduced estimate for printing and binding, and from the elimination of any additional amount in 1946 for the Advisory Committee on Rules for Civil Procedure. These reductions are partially offset by proposed increases in salaries of certain Court officials and clerks and for miscellaneous expenses, including care of the Court building and grounds.

OTHER FEDERAL COURTS

Appropriations under this heading provide for salaries and operating expenses for the circuit courts of appeals, district courts, the special courts, probation system, and other court officers. Major items of increase include a proposed new appropriation for salaries of court reporters, authorized by the Act of January 20, 1944 (Public Law 222); provision for additional law clerks and secretaries for circuit and district judges, and messengers for circuit judges, in accordance with a plan approved by the Conference of Senior Circuit Judges; and amounts for additional commissioners, auditors, clerks, and other personal services for the Court of Claims. The remainder of the increase is for fees of commissioners and jurors, for reclassification of certain probation officers, and for other expenses resulting from the additional personnel included in the estimates.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

Increases under this heading are to provide for within-grade promotions and increased allotments for supplies and equipment.

SEC. 301. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who advocates or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment, the salary or wages for which are paid from any appropriation contained in this Act, shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

[SEC. 302. If at any time during the fiscal year 1945 the termination of the Act entitled "An Act to provide temporary additional compensation for employees in the Postal Service", approved April 9, 1943, or of the Act entitled "An Act to provide for the payment of overtime compensation to Government employees, and for other purposes", approved May 7, 1943, shall be fixed by concurrent resolution of the Congress at a date earlier than June 30, 1945, the appropriations contained in this Act shall cease to be available on such earlier date for obligation for the purposes of the terminated Act and the unobligated portions of appropriations allocated for the purposes of such terminated Act shall not be obligated for any other purposes of the appropriation during the fiscal year 1945] (*Act of June 26, 1944, Public Law 354*).

EXPLANATORY STATEMENT

Executive Office of the President

THE WHITE HOUSE

These appropriations provide for the compensation of the President, the salaries and expenses of the White House Office, and the cost of maintaining the Executive Mansion and grounds. The President's immediate office provides for the handling of documents and correspondence, in addition to maintaining communication with Congress, the heads of the executive departments and agencies, the press, the radio, and the general public. Included in the staff are the President's personal aides and secretaries.

BUREAU OF THE BUDGET

The Bureau of the Budget assists the President in the preparation and administration of the Federal Budget covering the entire fiscal program of the Government. In addition, as a staff agency of the Federal Government, the Bureau makes studies to improve the organization and procedures of Federal agencies; clears departmental recommendations regarding pending legislation, Executive orders, and proclamations; and coordinates Federal statistical services. The requested increase of 12 percent in the 1946 estimates is to permit the Bureau to increase its field service and to expand activities relating to management improvement within the Federal service.

AMERICAN BATTLE MONUMENTS COMMISSION

Prior to the German invasion of western Europe in 1940, the American Battle Monuments Commission maintained and operated 8 national cemeteries and 11 memorials in France, Belgium, and England, commemorating the services of the American Expeditionary Forces during the First World War. Following the withdrawal from Europe in 1941 of its American employees, the Commission depended upon the United States Army in England, and the Governments of France and Belgium, to administer on a contractual basis its properties in these respective countries. After the discontinuance of relations with the French and Belgian Governments in 1942, arrangements were worked out for the Commission by the Department of State whereby the contractual services with those Governments were continued in effect through the offices of the Swiss Government. The United States Army, for the period of the war, has administrative control of the cemetery in England, with all expenses connected therewith borne by the Army. The Commission's departmental staff has been reduced to one civilian employee, pending the cessation of present hostilities.

AMERICAN COMMISSION FOR THE PROTECTION AND SALVAGE OF ARTISTIC AND HISTORIC MONUMENTS IN WAR AREAS

The American Commission for the Protection and Salvage of Artistic and Historic Monuments in War Areas cooperates with the United States Army and Navy and the United Nations in protecting monuments, objects, and materials of cultural value in occupied areas; compiles lists of damaged or appropriated properties, and endeavors to effect restitution of public and private properties appropriated by the Axis nations.

During 1946 the Commission expects to emphasize the work of salvage and restitution rather than protection work. In this connection the Commission members will be called upon to act as advisers in the adjudication of claims arising from damage, destruction, or looting. The Commission's estimates reflect an increase in 1946 of 48 percent over 1945 appropriations.

CIVIL SERVICE COMMISSION

The United States Civil Service Commission recruits, examines, selects, and certifies to the departments and agencies persons eligible for employment in the Federal Government, including civilian establishments operated by the War and Navy Departments. This activity requires investigations of the character, suitability, and past experience of applicants.

The Commission is concerned with problems related to employment in the Government service such as interagency transfers to secure better utilization of skills, promotion of sound personnel practices and in-service training. The Commission administers the Classification Act which requires that the duties and responsibilities assigned to positions be the basis for an equitable salary allocation for Federal employees. The Commission also administers the retirement laws for civilian employees of the Government, including the employees of the Panama Canal and the Alaska Railroad.

Federal employment and placements are expected to decrease during the fiscal year 1946, but the increased use of formal examination and certification procedures will assure more careful screening of appointees.

The Commission's placement procedure now emphasizes the placement of veterans in the Federal service, both those who were Federal employees before entering military service, and those who desire to enter the Federal service. Special plans are also under way to facilitate the placement of disabled veterans. Provision is made to promote better personnel management.

Investigative work will emphasize more thorough analysis of the suitability and qualifications of applicants and careful examination of the reasons advanced by appointing officers for passing over veterans. A comprehensive program for the development of position classification standards to provide a more effective guide to departments and agencies in the allocation of field positions under terms of the Classification Act is being inaugurated. In addition to securing more equitable treatment of employees, the program will be more economical for the Government.

The handling of employee claims upon the retirement funds is being accelerated and a sufficient sum is requested to insure the prompt processing of the large volume of refunds to persons leaving the Federal service.

The decrease of $1,297,347 in the Budget for general administrative expenses for 1946 is due primarily to the anticipated reduction in the volume of placements and investigations. The decrease of $57,000 in the estimate for the Panama Canal construction annuity fund is due to the fact that the 1945 appropriation included funds for slightly more than a thirteen-month period for approximately the same number of claims.

Appropriations are made annually toward the Government's share of providing benefits to participants in the disability and retirement benefits provided by law for the Federal service. These appropriations and the contributions made by the participating employees provide the trust funds from which benefits are paid. The increase of $50,542,000 for the retirement and disability funds is for the purpose of building up the Government's share in the funds toward the amounts recommended by the Board of Actuaries, based upon increased numbers of employees acquiring benefit rights. The estimated number of employees who will have acquired benefit rights by reason of having 5 years or more of creditable service by the end of 1946 will be 1,545,000.

EMPLOYEES' COMPENSATION COMMISSION

The United States Employees' Compensation Commission administers (1) the Federal Employees' Compensation Act, approved September 7, 1916, which provides for payment by the Commission of compensation to Federal employees for injury or death sustained in the course of employment; (2) the Longshoremen's and Harbor Workers' Compensation Act, approved March 4, 1927, which provides for supervision by the Commission of compensation payments by insurance carriers to covered workers for injury or death occurring upon the navigable waters of the United States (including any drydock), if not covered by State law; and (3) the Longshoremen's and Harbor Workers' Compensation Act, as extended by Congress on May 17, 1928, to cover all private employment in the District of Columbia.

The Commission also administers two programs arising out of war activity: (1) The Longshoremen's and Harbor Workers' Compensation Act, as extended by Congress on August 16, 1941, to cover employees of Government contractors engaged in employment at military bases outside the continental United States, and (2) the act of December 2, 1942, providing (a) compensation benefits to employees of Government contractors and persons engaged by the

United States under personal service contract outside the continental United States, whose injury or death results from a war-risk hazard, and (b) accrual of wages for any such employee held by the enemy, missing because of enemy action, or not returned to his home or place where he was employed because of failure of the United States or its contractors to furnish transportation.

The workload of the Commission has increased greatly since the beginning of the war and is expected to increase further in 1946. This estimate is based on (1) expected slight decline in workloads under the Federal Employees' Compensation Act; (2) continued heavy loads under the Longshoremen's and Harbor Workers' Compensation Act, and (3) increased loads in cleaning up cases outside continental United States. The Budget provides funds to meet these expected workloads and consequent cost increases, as well as a small amount for accident prevention activity. The Budget also provides, in addition to the continuation of payment to dependents of persons who were employed by Government contractors and who are now held by the Japanese, for the establishment of a fund to provide accrued wage payments to such persons upon their release or repatriation.

FEDERAL COMMUNICATIONS COMMISSION

The Federal Communications Commission has extensive regulatory authority over interstate telephone and telegraph, international radiotelegraph, and international cable services. It is required to regulate the common carriers in these fields in matters of interstate and international tariffs, physical connections, through routes and charges, constructions and abandonments, mergers, service, and depreciation. It also has jurisdiction over uniform accounting, valuation, and reporting of operations.

The Commission has licensing authority over most classes of radio transmitters—standard broadcast, frequency modulation, television, experimental, police, fire, ship, aircraft, and others. As a part of the licensing, it allocates frequencies, establishes the power that may be used, passes upon equipment, and designates time of operation. The Commission also monitors for unlicensed, faulty, and other illegal operations; inspects radio transmitters; and gives operator examinations, all to the end of providing the maximum use of the radio spectrum. Included among the functions of the Commission is that of handling technical matters for the Interdepartmental Radio Advisory Committee, which prepares recommendations to the President for the assignment of frequencies to stations operated by Government agencies. During the war the Commission has extended its monitoring activities for the purpose of obtaining intelligence information for other agencies of the Government.

The war has retarded the commercial use of radio, but it has not retarded its development. In fact, radar and other war devices may have resulted in a radio development that would have taken years to attain in normal times. Furthermore, the training of thousands of servicemen as radio operators and the use of radio for regular military communications has stimulated interest in the possibilities of radio. The recent hearing held by the Federal Communications Commission on allocation of the radio spectrum has shown that applications for station licenses of all kinds may be expected to increase.

The 1946 estimate also provides for an expansion in the Commission's activities with respect to the regulation of telephone, telegraph, and cable companies. Original cost, depreciation, and cost of service studies, as well as work resulting from the Western Union-Postal merger and the proposed international merger, are expected to become increasingly important during 1946.

The increases in the normal regulatory work are more than offset by decreases in monitoring work and in work for the Board of War Communications. Monitoring for unlicensed, faulty, and other illegal operations will be continued on a reduced scale. Some work will continue to be performed for the Board of War Communications. The net effect of the increase in regulatory activities, counterbalanced by the decrease in other activities, is a reduction of approximately 5 percent in the 1946 estimate from the 1945 appropriation, exclusive of overtime.

FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation was organized under authority of the Banking Act of 1933 to insure the deposits of all banks that are entitled to the benefit of insurance under the law. It is one of the Federal agencies supervising banks, the others being the Office of the Comptroller of the Currency and the 12 regional Federal Reserve banks. The insurance provided by the Corporation protects the accounts of depositors up to a maximum of $5,000 each. On June 30, 1944, the number of insured banks was 13,461 and the contingent liability of the Corporation with respect to insured deposits aggregated $46 billion. There are now only about 1,253 uninsured banks in the United States and its possessions.

To protect the 60 million depositors in insured banks the Corporation exercises general supervision over the entire insured banking system. In connection with its program of strengthening the banking system it examines annually insured banks now numbering 6,691 not examined by any other Federal agency and reviews the reports of examination of 6,770 banks which are examined either by the Office of the Comptroller of the Currency or the Board of Governors of the Federal Reserve System. The Corporation in certain instances also conducts special examinations of the latter group of banks.

Two methods have been utilized by the Corporation to protect depositors of insured banks: (1) By making a loan on or through the purchase of substandard assets of a bank in an unsound condition in order to facilitate its merger with another insured bank; (2) by paying deposits of a closed bank up to $5,000 for each depositor. During the fiscal year 1944, only four insured banks closed or received aid from the Corporation.

By Executive Order of April 27, 1942, the Corporation was given responsibility for supervision of the activities of all Federal credit unions which prior to that time had been under the jurisdiction of the Farm Credit Administration. It does not, however, insure share balances in credit unions. On June 30, 1944, there were 3,847 Federal credit unions in operation.

The Corporation was organized with capital of $289 million. All insured banks pay assessments at an annual rate of one-twelfth of 1 percent of their deposit liabilities. During the past 10 years the return from its capital investment and assessments has been sufficient to cover all insurance losses and expenses and provide for the accumulation of reserve which, on June 30, 1944, amounted to $463 million. Although the administrative expense budget of the Corporation has been submitted for review and approval by the Bureau of the Budget annually since 1935, the Corporation in this Budget is submitting for the first time its administrative expense requirements for congressional approval. These expenses are provided for

through an authorization approving the use of a specified proportion of the Corporation's assets for this purpose and do not require the appropriation of funds from the United States Treasury.

Due to the shortage of trained bank examiners the Corporation has adopted various provisional measures, such as lengthening the interval between bank examinations. The 1946 estimate provides for a slight expansion above the 1945 authorization, exclusive of overtime.

FEDERAL POWER COMMISSION

The Federal Power Commission is primarily engaged in the administration of the Federal Power Act of 1935 and the Natural Gas Act of 1938. Its principal statutory functions include the issuance of licenses for the orderly development of the Nation's water-power resources; regulation of the wholesale rates for electric energy and natural gas in interstate commerce; supervision of the accounts and rates of depreciation for interstate electric utilities, interstate natural gas companies, and licensees; regulation of the disposition and merger of public utility properties; the interconnection and coordination of electric utility systems, and the conduct of power market surveys; control of the exportation of electric energy and importation or exportation of natural gas; the preparation of financial and operating information on electric utilities and natural gas companies; the issuance of certificates of public convenience and necessity for the transportation or sale of natural gas in interstate commerce; the determination of service areas of natural gas companies, and the recommendation of facilities for the development of hydroelectric power at flood control projects under the provisions of the Flood Control Act of 1938.

The Commission is also charged, during the war emergency, with arranging for the cheapest source of power supply for war plants and establishments; participating with the War Department in the protection of power and gas supply against hostile acts; and collaborating with the War Production Board, in meeting and handling wartime power and certain natural gas problems.

The aggregate estimates for 1946 are substantially the same as for 1945, excluding overtime pay. The increase in the regular appropriation estimate reflects the necessity for the resumption of certain of the Commission's statutory duties which are being suspended or curtailed in order to divert personnel to the Commission's war duties. These suspensions and curtailments were principally in connection with licensed projects, accounting matters, the extension of assistance to States and municipalities in handling regulatory problems, and work on comprehensive river basin studies in conjunction with other Federal agencies. This increased volume of regulatory work is offset by a lessening of the Commission's duties in connection with war-power contracts and plant-protection surveys, as well as a lessening of work in collaboration with the War Production Board.

FEDERAL TRADE COMMISSION

The Federal Trade Commission is charged with the responsibility of administering acts that were designed to accomplish the following purposes: (1) To promote free and fair competition in interstate trade in the interest of the public through prevention of price-fixing agreements, boycotts, combinations in restraint of trade, unlawful price discriminations, and other unfair methods of competition and unfair and deceptive acts and practices; (2) to safeguard life and health of the consuming public by preventing the dissemination of false and fraudulent advertisements of food, drugs, cosmetics, and devices which may be injurious to health; (3) to protect producers, manufacturers, distributors, and consumers from unrevealed presence of substitutes and mixtures in manufactured wool products; (4) to supervise the registration and operation of associations of American exporters engaged solely in export trade, and (5) to gather and make available to the President, the Congress, and the public, factual data concerning economic and business conditions as a basis for remedial legislation where needed, and for the guidance and protection of the public.

Reflecting in part the conversion of our economy from a peace to a war basis, with the accompanying reduction in the production of civilian goods and the vastly expanded purchases by the Federal Government, the new complaints filed by the Commission have decreased steadily during the war. Additional funds have been provided for the negotiation of trade practice conference agreements as a method of preventing unfair practices, for the administration of the Wool Products Labeling Act, and for economic investigations.

FOREIGN SERVICE PAY ADJUSTMENT

The purpose of this appropriation is to enable employees of the Government serving in foreign countries to be reimbursed for losses sustained due to the appreciation of foreign currencies in relation to the American dollar. It is estimated that during 1946 there will be a greater number of officers and employees stationed in the five countries (Switzerland, Turkey, Union of Soviet Socialist Republics, Venezuela, and the Netherlands Possessions) where exchange losses apply, requiring an appropriation of $1,000,000, an increase of $210,000 over the amount appropriated for 1945.

GENERAL ACCOUNTING OFFICE

The General Accounting Office audits the Government's receipts and expenditures, prescribes accounting systems, maintains appropriation accounts, settles claims, and construes and interprets laws.

The estimates of the General Accounting Office for 1946 show an increase of approximately 5 percent over the appropriations for 1945, which increase is limited by the availability of qualified persons who can be efficiently employed upon the increased volume of work to be performed. By far the greater portion of the appropriations of the General Accounting Office is required for the performance of its auditing functions, the volume of which is related to the trend in Federal expenditures. A large portion of the audit activity is being performed at Army and Navy audit branches and war-contract audit stations located at strategic points throughout the country.

INTERSTATE COMMERCE COMMISSION

The Interstate Commerce Commission regulates rail carriers, motor carriers, water carriers, pipe lines, freight forwarders, and stockyards that are engaged in transportation subject to the Interstate Commerce Act. Regulation is, in accordance with the national transportation policy, performed in such a way as to recognize the inherent economic advantages of each class of carrier; to promote safe, adequate, economical, and efficient service; to encourage the establishment of reasonable charges; and to encourage fair wages and equitable working conditions.

The war has changed the emphasis upon the various activities of the Commission. While car-service work to assist in maintaining a smoothly functioning railway system has reached an all-time high, the increase in this work has been more than offset by decreases in regulatory activities that come about through applications, complaints, and tariff filings. Car-service work will remain at a relatively high level until after the end of the war.

The total estimate for 1946 is approximately 5 percent above the 1945 appropriation, exclusive of overtime. Principal increases provide for the additional work that will be made necessary by the anticipated rise in complaints and in tariff filings, for strengthening the Commission's cost analysis work, and for more intensive safety work among the motor carriers subject to the Commission's jurisdiction. Partially offsetting these increases are decreases in the appropriations for car-service work and for printing and binding.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

The National Advisory Committee for Aeronautics was established in 1915 to supervise and direct the scientific study of the problems of flight and to direct and conduct research and experiment in aeronautics. The membership of the Committee includes official representatives of the agencies of the Government directly concerned with military and civil aviation and private citizens especially qualified in the aeronautical sciences. The actual research work is carried on under the Director of Aeronautical Research at the three laboratories of the Committee: The Langley Memorial Aeronautical Laboratory at Langley Field, Va., the Ames Aeronautical Laboratory at Moffett Field, Calif., and the Aircraft Engine Research Laboratory at Cleveland, Ohio.

Although the Committee is normally concerned primarily with fundamental scientific research in aeronautics, it has devoted its efforts since the beginning of the war almost exclusively to urgent projects of applied research in military aviation assigned to it by the War and Navy Departments. A program for expanding facilities and personnel at the Committee's three laboratories to meet the wartime needs of the Army and Navy will be substantially complete by the end of fiscal year 1945. The increase in the appropriation recommended for 1946 is necessary to provide for the operation of the new facilities on a full-year basis.

NATIONAL ARCHIVES

The National Archives is charged with the preservation and servicing of inactive Federal records of permanent value and historical interest for the use of officials and scholars. In addition, it authorizes agencies to dispose of useless records when Congress has previously approved the disposal of records of similar form and character, recommends to Congress the approval of schedules listing records for future disposal at the source, and after appraising records declared worthless by heads of agencies, makes recommendations to Congress for their disposal. This agency likewise publishes the Federal Register, containing interdepartmental orders of general effect and applicability, and administers the Franklin D. Roosevelt Library at Hyde Park, N. Y., which is the designated repository for the President's official papers. The financial requirements of the National Archives for 1946 show an increase of approximately 10 percent over the appropriations for 1945 because of the need for retiring a vastly increased volume of records.

NATIONAL CAPITAL HOUSING AUTHORITY

The National Capital Housing Authority is the public housing agency for the National Capital and under title I of the District of Columbia Alley Dwelling Act, operates 112 dwelling units and three groups of garages built in reclaimed slum areas in the District. All receipts derived from sales, leases, or other sources in connection with the operation of these properties are covered into the Treasury monthly.

The amount in the 1946 Budget is identical with that for 1945, excluding overtime pay, and is required for the maintenance of the properties.

Other activities of the National Capital Housing Authority, which are financed from other appropriations, include the operation and management of war and other housing projects.

NATIONAL CAPITAL PARK AND PLANNING COMMISSION

The functions of the National Capital Park and Planning Commission are of both an advisory and an operating character. Its advisory activities are covered in the District of Columbia chapter of the Budget, and appropriations therefor are charged against District revenues.

Its operating functions include the acquisition of land for the development of the National Capital's park, parkway, and playground system; for the development of the George Washington Memorial Parkway on both sides of the Potomac River, and for the extension of the District park system into nearby Maryland and Virginia. As a consequence of these duties, the Commission maintains a comprehensive plan for the National Capital and its environs, and consults with officials of the District of Columbia, Maryland, and Virginia. Appropriations for these purposes are charged against the United States Treasury but are subsequently repaid either in whole or in part by the jurisdiction benefited, 100 percent by the District of Columbia, 50 percent or 66⅔ percent by Maryland, depending on the character of the project, and 50 percent by Virginia. The 1946 estimate of appropriation shows a decrease of approximately 47 percent, due to a reduction in the amount of land to be acquired in the District of Columbia.

NATIONAL LABOR RELATIONS BOARD

The National Labor Relations Board administers the provisions of the National Labor Relations Act of July 5, 1935. The act was designed to eliminate labor disputes affecting commerce, and affirms the right of employees to full freedom of self-organization without coercion or interference from employers. It makes unlawful certain labor practices of employers which interfere with such activities. The Board adjudicates cases where commission of unfair labor practices is charged. The decisions of the Board are enforced, modified, or set aside, by United States circuit courts of appeals upon proper petition by the Board or an aggrieved employer.

The Board is also responsible under the act for investigating questions concerning representation of employees for purposes of collective bargaining, and for certifying such representatives in appropriate units. The investigations frequently involve secret polls at which employees express their choice under the same safeguards as surround our political elections. In this class of case the Board acts upon the filing of an appropriate petition.

With the passage of the War Labor Disputes Act in June 1943, the Board was made responsible for the conduct of strike polls among employees of war contractors,

which must take place on the thirtieth day after filing of notice of a dispute. The workload under this law is unpredictable, since all preparations for balloting are set in motion by the filing of notice, but these preparations are abandoned upon the withdrawal of notice, which may occur at any time up to the actual beginning of the poll.

The number of formal actions in both representation cases and unfair labor practice cases continued to increase in 1944. The upward trend also continued in the percentage of representation cases handled, which in 1944 constituted over 60 percent of the cases received by the Board. An over-all increase of $60,000 for the Board is recommended, of which the major portion is for increased activities under the War Labor Disputes Act.

NATIONAL MEDIATION BOARD

The National Mediation Board, the National Railroad Adjustment Board, and the National Railway Labor Panel have been created to maintain and promote peaceful labor relations on the railroads, water-borne transport facilities operated by the railroads, and air lines. The National Mediation Board mediates disputes between employers and employees, resolves questions of employee representation and interprets agreements arrived at by mediation under the Railway Labor Act of 1926, as amended. The principal increase in the 1946 estimate provides for continued employment of four additional mediators authorized under a supplemental appropriation for the second half of fiscal year 1945. The Board has been receiving cases for the past 6 months at a rate unprecedented in the Board's history, and the increase is necessary to continue giving more prompt attention to cases threatening interruption of commerce due to lack of available mediator staff.

If mediation fails to settle a dispute and the parties refuse to submit the issues in dispute to arbitration, under section 10 of the act the President, on request of the Board, may appoint boards to investigate and to make findings of fact and recommendations for the disposition of the dispute. The agencies provided for under the Railway Labor Act are known as emergency boards and are appointed by the President. Under the provisions of Executive Order 9172, emergency panel boards performing the same functions under the "no-strike agreement" are appointed by the Chairman of the National Railway Labor Panel.

The Stabilization Act of 1944 provides that all disputes involving rates of pay must be handled by the agencies provided under the Railway Labor Act; and that in effecting or recommending settlements, such agencies must make specific findings and certifications that the proposed changes are consistent with national stabilization policy, and that such findings and certifications shall be conclusive. Since both types of emergency boards perform the same function under the act, the items have been consolidated in one appropriation.

The National Railroad Adjustment Board is composed of 36 members equally divided between management and employees, whose salaries are paid by carriers or organizations, respectively. This Board decides all grievances and disputes growing out of interpretation or application of existing agreements. Secretaries of the members, administrative personnel, and other incidental expenses are paid from regular appropriations. The personnel of this Board is divided into four divisions, each with jurisdiction over specified crafts of railway employees. No changes of any consequence are contemplated in this appropriation.

RAILROAD RETIREMENT BOARD

Retirement of workers from the railroad industry, retarded by the war, is expected to increase and to continue at an upward trend.

Nearly 166,000 aged and disabled workers, survivors of deceased workers, and former pensioners of the railroads, are currently drawing monthly benefits in excess of $11,000,000 per month. Lump-sum death benefit payments are presently in excess of $600,000 per month.

The estimates for salaries, exclusive of overtime, and printing and binding have been increased for 1946 to provide for the growth in retirements and benefits-in-force during that year.

The railroad retirement appropriated account is made up of the estimated taxes to be collected from carriers and their employees to provide for retirement and other benefits to railroad workers (less administrative expenses), and Federal contributions for military service which represent, as provided by law, the total tax which would have been received had the worker, entering military service, continued in railroad employment and earned at the rate of $160 per month. The reduced estimate of taxes for 1946 reflects the change in aggregate railroad employment expected. This reduction is partially offset by increased tax rates effective January 1, 1946, and by an increase in the military service credit for 1945, which is appropriated for in 1946.

The railroad unemployment insurance fund annually receives by law 10 percent of the taxes collected for railroad unemployment insurance. The remaining 90 percent of the taxes, together with the unexpended balance of the fund in excess of $6,000,000 at the close of the previous fiscal year, goes into the railroad unemployment insurance trust fund and is used to pay unemployment insurance benefits. It is anticipated that in 1946 there will be an increase in the unemployment benefits paid over the level of 1945, but the total will still fall far below pre-war experience. The railroad unemployment insurance trust fund is in a very strong position to meet any demands made upon it.

SECURITIES AND EXCHANGE COMMISSION

The functions of the Securities and Exchange Commission include the supervision of registration of security issues and suppression of fraudulent practices in the sale of securities; regulation of transactions in outstanding securities, both on the stock exchanges and in the over-the-counter markets; regulation of public-utility holding companies; registration and regulation of investment companies and investment advisers; and the preparation of advisory reports on plans and participation as a party in corporate reorganization.

The fiscal year 1944 witnessed a further increase in the volume of corporate financing registered with the Commission, reflecting in part favorable market conditions which have encouraged refunding operations. Although many corporations have strengthened their working capital position, there will be a great number that will need additional capital during the reconversion period, as a result of which it is expected that the upward trend in corporation financing will continue. Securities markets generally have been relatively active during the past year, necessitating an increase in the Commission's investigatory work and pointing to the need for strengthening the staff engaged in broker-dealer inspections. Progress continued with the integration and corporate simplification

of public utilities systems under the Public Utility Holding Company Act of 1935. However, inability to recruit technical personnel, both on the part of the Commission and the companies, has retarded this work during the war. It is expected that the Commission's activities in this field will continue at approximately the 1944 level during 1945 and 1946.

The estimate for 1946 is approximately 4 percent above the 1945 appropriation (exclusive of overtime). The additional amount will enable the Commission (1) to increase its surveillance of security markets; (2) expand its activities with respect to the inspection of the books and records of brokers and dealers, and (3) investigate reports of alleged political activities of public utility holding companies in contravention of section 12 (h) of the Public Utility Holding Company Act of 1935.

SMITHSONIAN INSTITUTION

The Smithsonian Institution, founded in 1846 "for the increase and diffusion of knowledge among men," carries on fundamental research in the natural sciences, issues publications, and operates the United States National Museum and the Freer Art Gallery. The shift in this agency's activities to fit it into the national war program has resulted in such large backlogs of essential scientific work that further accumulations will seriously threaten the value and usefulness of its great national collections. Moreover, for the remainder of the war period, the Institution must continue to function as a clearing house for hundreds of technical questions referred to it by the Army and Navy. The 1946 estimates of appropriations show an increase of approximately 14 percent to provide for the agency's most pressing needs.

The National Gallery of Art is a quasi-independent branch of the Smithsonian Institution. Here are displayed free to the public such famous collections as those formerly belonging to Mr. Andrew W. Mellon, Mr. Samuel H. Kress, Mr. Joseph E. Widener, and others. The numbers attending the National Gallery of Art continue to be greater than the previous attendance figures of any other art gallery in the world. The estimates for the Gallery show an increase of approximately 8 percent over 1945 appropriations.

TARIFF COMMISSION

The Tariff Commission is primarily an independent fact-finding, fact-reporting agency, which determines no trade policies and has no regulatory functions. Since its establishment in 1916, it has become a reservoir of trade, production, commodity, and import information. During the war, and the resulting curtailment of United States commercial exports and imports, the facilities of the Commission have been made available to the war agencies. While the demand for the services to other agencies may decrease, Congress and the President will be confronted with basic policy determinations in regard to a revived export and import trade. The studies and reports of the Commission, being made largely at the request of committees of Congress, will be designed to present factual information as a basis for these policy decisions.

Services relating to the Commission's regular activities will be rendered to other agencies of the Government during 1945 on a reimbursable basis. These services will be drastically curtailed during 1946 and will be offset, in part, by a recommended increase of 10 percent in appropriations to the Commission.

THE TAX COURT OF THE UNITED STATES

The function of The Tax Court of the United States is to decide, in cases where deficiencies have been determined by the Commissioner of Internal Revenue, whether there is a deficiency or an overpayment in income, profits, estate, gift, and unjust enrichment taxes, and personal holding company surtaxes; to adjudicate controversies relating to excess profits on Navy contracts and Army aircraft contracts; and to review the action of the Commissioner in deficiency and refund cases founded on claims of abnormalities under excess-profits statutes. The court also has jurisdiction in cases involving refunds of processing taxes.

The estimates of The Tax Court of the United States show a slight decrease in 1946, as compared with 1945, but contemplate that its activities will continue at about the 1945 level.

UNITED STATES MARITIME COMMISSION

The 1946 Budget includes no estimate of appropriation for the United States Maritime Commission, whose principal war job is the construction of ships. Contract authority and cash already provided is sufficient to finance construction throughout fiscal year 1946. The shipbuilding program will be carried forward on a full-capacity basis through the first half of the fiscal year 1946, with construction for the latter half of the fiscal year contingent upon military requirements.

To the end of fiscal year 1944, the Maritime Commission had delivered more than 38,400,000 dead-weight tons of shipping under all war-construction programs. In addition, approximately 21,800,000 dead-weight tons are scheduled for completion in fiscal years 1945 and 1946. Of the total of more than 60,200,000 dead-weight tons of merchant vessels to be constructed, approximately 51,000,000 dead-weight tons are financed under the long-range program of the Maritime Commission. Through application of the principles of prefabrication and mass production to shipbuilding, new records have been established for speed and volume of output. For example, Liberty ships, which constitute the preponderance of the war-built fleet, have averaged 50 days in construction as compared with a pre-war average for cargo ships of 20 months.

The Merchant Marine Act of 1936 declared a merchant marine to be "necessary for the national defense and development of * * * foreign and domestic commerce." The act represented a compromise after 150 years of controversy, departing from previous legislation by accepting the principle of open subsidization of both construction and operation, regulated to prevent abuses. To administer the act, Congress created the United States Maritime Commission and entrusted it with broad discretionary authority to define and establish "essential" trade routes; to administer construction- and operating-differential subsidies; to purchase, construct, and operate vessels either directly or by contract if necessary; to train officers and seamen, and to establish working conditions, wages, and manning scales for inclusion in subsidy contracts; to provide ship-mortgage insurance; to regulate trade practices and prevent discrimination among shippers; and to promote both foreign trade and the employment of American vessels.

The Maritime Commission's principal wartime responsibility has been the building of ships. Its pre-war functions

of purchase, charter, operations, and seaman-training were transferred to War Shipping Administration. The Maritime Commission plans, after the war, to resume these functions and to seek the reestablishment of private ship operation.

VETERANS' ADMINISTRATION

The Veterans' Administration furnishes to the veterans of all wars and of the peacetime military establishment services consisting mainly of medical and hospital care, the payment of pensions and compensation, the administration of Government life insurance, and a number of broad new programs for veterans of the present war, namely: Vocational rehabilitation for disabled veterans; protection from loss of commercial insurance policies in accordance with the Soldiers' and Sailors' Civil Relief Act; the guaranty of loans to eligible veterans for the purchase of homes, farms, or business properties; the provision of subsistence allowances, tuition, books, fees, and educational supplies to eligible veterans who wish to resume education interrupted by their entry into the armed services, and the payment of weekly readjustment allowances to veterans while seeking employment for a period after their discharge.

Including all items of expenditure, 1946 requirements of the Veterans' Administration will be about three times those for 1944. There had been discharged from the armed services by June 30, 1944, approximately 1,200,000 veterans of World War II. When hostilities cease and mass demobilization begins, the costs under the Servicemen's Readjustment Act of 1944 can be expected to mount rapidly.

In the field, hospital activities will be expanded to meet the increased number of veterans from the present war. It is anticipated that the average number of beds available in Veterans' facilities will be increased by approximately 9,000, bringing the total to 104,000 beds. Utilization of these facilities is expected to average 86 percent. Construction of additional facilities providing another 14,100 beds also will be undertaken in 1946 in anticipation of an accelerated rate of discharge from the armed forces.

It is anticipated that there will be a substantial increase in pension, compensation, and insurance claims, as well as a marked increase in the number of applications for vocational rehabilitation. In the fiscal year 1945, the total number of veterans and dependents receiving compensation and pensions is estimated to be in excess of 1,400,000. By June 30, 1946, this figure is expected to grow to 1,900,000.

As of June 30, 1944, 15,200,000 national service life insurance policies had been issued, covering 12,685,067 persons with $114,623,000,000 insurance.

It is expected that approximately 600,000 loans for veterans will be guaranteed, 372,000 veterans will receive readjustment allowances, and 336,000 veterans will receive benefits under the education program.

The additional amount required for Army and Navy pensions results from the sharp increase expected in the number of approved compensation and pension claims arising from the present war. The enactment of Public Laws 242, 312, and 313, Seventy-eighth Congress, in the latter part of fiscal year 1944, also increases the financial costs for pensions resulting from wars prior to World War II. These new laws increase the pensions of Spanish-American War veterans, either for total disability or attainment of age 65, from $60 to $75 per month; increase pensions of widows of veterans of that war from $30 to $40; increase service-connected compensation of veterans of World Wars I and II by 15 percent; increase pensions of dependents of veterans who had service-connected disability (but whose death was not service-connected) by approximately 50 percent, and increase pensions for total disability (nonservice-connected) for World War I veterans from $40 to $50.

The amount recommended for the national service life insurance appropriated fund is to reimburse the national service life insurance trust fund for losses resulting from hazards of military and naval service in World War II.

The proposed new appropriation, "Readjustment benefits," is for the purpose of providing to veterans the direct benefits made available by the Servicemen's Readjustment Act of 1944. Included are amounts to cover educational costs of veterans, readjustment allowances, and the first year's interest on the guaranteed portion of loans to veterans under the Servicemen's Readjustment Act.

Franklin D. Roosevelt Library, Income Account—

The joint resolution to provide for the establishment and maintenance of the Franklin D. Roosevelt Library (53 Stat. 1062–1066) establishes a Board to be known as the Trustees of the Franklin D. Roosevelt Library and authorizes it to accept gifts and bequests of personal property (sec. 205 (a) (c)). "The income from any trust funds held by the Board . . . shall be deposited with the Treasurer of the United States, who shall enter it in a special account . . . subject to disbursement by the Archivist, except where otherwise restricted by the instrument of gift, in the purchase of equipment for the Franklin D. Roosevelt Library; in the preparation and publication of guides, inventories, calendars, and textual reproduction of material in the said Library; and in the purchase . . . of historical material for the said Library" (sec. 205 (d)). Proceeds from the sale of publications and duplicate printed material and from fees collected from visitors are also paid into the special account and available for disbursement by the Archivist as provided above (secs. 203, 205 (d), 207).

SELECTIVE SERVICE SYSTEM

NOTE.—Because of possible material changes in war conditions, the estimates of appropriations in detail for the fiscal year 1946 will be submitted to the Congress as a part of a supplementary budget in the spring of 1945. However, the summary financial statements include an estimate of total war appropriations and expenditures for the fiscal year 1946 as well as for the fiscal year 1945.

VETERANS' ADMINISTRATION

Salaries and Expenses, Veterans' Administration—

Administration, medical, hospital, and domiciliary services: For all salaries and expenses of the Veterans' Administration, including the expenses of maintenance and operation of medical, hospital, and domiciliary services of the Veterans' Administration, in carrying out the duties, powers, and functions devolving upon it pursuant to the authority contained in the Act entitled "An Act to authorize the President to consolidate and coordinate governmental activities affecting war veterans", approved July 3, 1930 (38 U. S. C. 11–11f), and any and all laws for which the Veterans' Administration is now or may hereafter be charged with administering, [$164,044,940] *$227,675,000*, of which $44,940 shall be available for salaries and expenses of the Federal Board of Hospitalization: *Provided*, [That not to exceed $3,500 of this amount shall be available for expenses, except membership fees, of employees, detailed by the Administrator of Veterans' Affairs to attend meetings of associations for the promotion of medical science or for the betterment of insurance practices and conventions of organized war veterans: *Provided further*,] That this appropriation shall be available also for personal services in the District of Columbia and elsewhere, including traveling expenses; examination of estimates of appropriations in the field, including actual expenses of subsistence or per diem allowance in lieu thereof; furnishing and laundering of such wearing apparel as may be prescribed for employees in the performance of their official duties; purchase and exchange of lawbooks, books of reference, periodicals, and newspapers; for [passenger-carrying and other motor vehicles, including] purchase (*not to exceed fifty-five*), maintenance, repair, and operation of [same, including not more than two] passenger automobiles [for general administrative use of the central office in the District of Columbia]; and notwithstanding any provisions of law to the contrary, the Administrator is authorized to utilize Government-owned automotive equipment in transporting children of Veterans' Administration employees located at isolated stations to and from school under such limitations as he may by regulation prescribe; and notwithstanding any provisions of law to the contrary, the Administrator is authorized to expend not to exceed $5,000 of this appropriation for actuarial services pertaining to the Government life-insurance fund and the National Service Life Insurance Fund, to be obtained by contract, without obtaining competition, at such rates of compensation as he may determine to be reasonable; for allotment and transfer to the Federal Security Agency (Public Health Service), the War, Navy, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans' Administration, including minor repairs and improvements of existing facilities under their jurisdiction necessary to such care and treatment; for expenses incidental to the maintenance and operation of farms; for recreational articles and facilities at institutions maintained by the Veterans' Administration; for administrative expenses incidental to securing employment for war veterans; for funeral, burial, and other expenses incidental thereto for beneficiaries of the Veterans' Administration accruing during the year for which this appropriation is made or prior fiscal years: *Provided further*, That the appropriations herein made for the care and maintenance of veterans in hospitals or homes under the jurisdiction of the Veterans' Administration shall be available for the purchase of tobacco to be furnished, subject to such regulations as the Administrator of Veterans' Affairs shall prescribe, to veterans receiving hospital treatment or domiciliary care in Veterans' Administration hospitals or homes: *Provided further*, That this appropriation shall be available for continuing aid to State or Territorial homes for the support of disabled volunteer soldiers and sailors, in conformity with the Act approved August 27, 1888 (24 U. S. C. 134), as amended, for those veterans eligible for admission to Veterans' Administration facilities for hospital or domiciliary care: *Provided furthe.*, That the Administrator is hereby authorized to employ medical consultants for duty on such terms as he may deem advisable and without regard to the civil service and classification laws: *Provided further*, That this appropriation shall be available for the purchase directly from sources authorized by the common carriers of printed reduced fare requests for use by veterans when traveling at their own expense from or to Veterans' Administration facilities: *Provided further*, That notwithstanding any limitation in this Act, this appropriation shall be available for the purchase of legal newspapers in an amount not exceeding $200: *Provided further, That this appropriation shall be available for the preparation, shipment, installation, and display of exhibits, photographic displays, moving pictures, and other visual educational information and descriptive material, including the purchase or rental of equipment.*

No part of this appropriation shall be expended for the purchase of any site for or toward the construction of any new hospital or home, or for the purchase of any hospital or home; and not more than [$2,500,000] *$3,650,000* of this appropriation may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans' Administration either by contract or by the hire of temporary employees and the purchase of materials.

SEC. 102. During the fiscal year ending June 30, [1945] *1946*, the salaries of the Commissioners of the United States Maritime Commission, with the exception of the Chairman so long as the office is held by the present incumbent, and the Commissioners of the United States Tariff Commission shall be at the rate of $10,000 each per annum.

SEC. 103. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 104. No part of any appropriation or authorization in this Act shall be used to pay any part of the salary or expenses of any person whose salary or expenses are prohibited from being paid from any appropriation or authorization in any other Act; but this prohibition shall be effective only during the period for which such prohibition in such other Act is effective.

SEC. 105. Where appropriations in this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations.

SEC. 106. Where appropriations in this Act are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.

[SEC. 107. If at any time during the fiscal year 1945 the termination of the Act entitled "An Act to provide temporary additional compensation for employees in the Postal Service", approved April 9, 1943, or of the Act entitled "An Act to provide for the payment of overtime compensation to Government employees, and for other purposes", approved May 7, 1943, shall be fixed by concurrent resolution of the Congress at a date earlier than June 30, 1945, the appropriations contained in this Act shall cease to be available on such earlier date for obligation for the purposes of the terminated Act and the unobligated portions of appropriations allocated for the purposes of such terminated Act shall not be obligated for any other purposes of the appropriation during the fiscal year 1945.]

GENERAL PROVISIONS

SEC. 201. (a) Appropriations for the fiscal year [1945] *1946* available for expenses of travel of civilian officers and employees of the executive departments and independent establishments shall be available also for expenses of travel performed by them, *including expenses of transportation of their immediate families in accordance with regulations prescribed by the President*, on transfer from one official station to another *for permanent duty* when authorized by the head of the department or establishment concerned in the order directing such transfer: *Provided*, That such expenses shall not be allowed for any transfer effected for the convenience of any officer or employee.

(b) Appropriations of the executive departments and independent establishments for the fiscal year [1945] *1946* available for the transportation of things shall be available, in accordance with the Act of October 10, 1940 (5 U. S. C. 73c–1), for expenses incurred in the transfer of household goods and effects of civilian officers and employees of such departments and establishments when transferred from one official station to another for permanent duty.

(c) Appropriations of the executive departments and independent establishments for the fiscal year 1946 shall be available for expenses of travel of new appointees and of transportation of their immediate families in accordance with regulations prescribed by the President, and expenses of transportation of household goods and personal effects in accordance with the Act of October 10, 1940 (5 U. S. C. 73c–1), from the places of their actual residence at the time of appointment to places of employment outside continental United States, and for such expenses on return of civilian officers and employees from their posts of duty outside continental United States to the places of their actual residence at time of assignment to duty outside the United States.

(d) Appropriations of the executive departments and independent establishments for the fiscal year 1946 shall be available for reimbursement, at not to exceed three cents (3¢) per mile (unless otherwise permitted by law), of employees or others rendering service to the Government for use by them of privately owned automobiles for transportation on official business within the limits of their official stations or places of service.

(e) During the fiscal year 1946 the head of the department or establishment concerned may delegate to such officials as he may designate his authority to authorize payment of expenses of travel and of transportation of household goods and immediate families of civilian officers and employees on change of official station.

(f) Appropriations of the executive departments and independent establishments for the fiscal year 1946 available for expenses of travel shall be available, when specifically authorized by the head of the department or establishment concerned or by such officials as he may designate for the purpose, for expenses of attendance at meetings of organizations concerned with the furtherance of the function or activity for which the appropriation concerned is made.

(g) Appropriations of the executive departments and independent establishments for the fiscal year 1946 available for expenses of travel shall be available for the payment of travel expenses, while away from their homes or regular places of business, including per diem in lieu of subsistence at place of employment, in accordance with the Standardized Government Travel Regulations, the Subsistence Expense Act of 1926, as amended (5 U. S. C. ch. 16), and the Act of February 14, 1931, as amended (5 U. S. C. 73a), of (1) persons employed intermittently as consultants or experts and receiving compensation on a per diem when-actually-employed basis, and (2) persons serving in an advisory capacity or employed without compensation or at $1 per annum; except that in case of (2) above there may be allowed not to exceed $10 per diem in lieu of subsistence en route and at place of service or employment, unless a higher rate is specifically provided by law.

SEC. 202. Unless otherwise specifically provided, no appropriation available for the executive departments and independent establishments for the fiscal year [1945] *1946*, in this Act or any other Act, shall be expended—

(a) To purchase any motor-propelled passenger-carrying vehicle (exclusive of busses, ambulances, and station wagons), at a cost, completely equipped for operation, and including the value of any vehicle exchanged, in excess of such amount as the Secretary of War, in the case of the War Department, the Secretary of the Navy, in the case of the Navy Department, the Commissioners, in case of the government of the District of Columbia, and the Director of the Bureau of the Budget, in the case of other essential governmental needs, may determine necessary to obtain satisfactory motor-propelled passenger-carrying vehicles, but in no event shall the price so paid for any such vehicle exceed the maximum price therefor established by the Office of Price Administration and in no

event more than $1,500, which amount shall be in addition to the amount required for transportation.

(b) For the maintenance, operation, and repair of any Government-owned motor-propelled passenger-carrying vehicle not used exclusively for official purposes; and "official purposes" shall not include the transportation of officers and employees between their domiciles and places of employment, except in case of medical officers on out-patient medical services and except in cases of officers and employees engaged in field work the character of whose duties makes such transportation necessary and then only as to such latter cases when the same is approved by the head of the department or establishment concerned. Any officer or employee of the Government who uses or authorizes the use of any Government-owned motor-propelled passenger-carrying vehicle, or of any motor-propelled passenger-carrying vehicle leased by the Government, for other than official purposes or otherwise violates the provisions of this subsection shall be summarily removed from office. The limitations of this subsection (b) shall not apply to any motor vehicles for official use of the President, the heads of the executive departments, Ambassadors, Ministers, chargés d'affaires, and other principal diplomatic and consular officials.

Sec. 203. No appropriation for the fiscal year 1946 in this or any other Act shall be available for the purchase of any aircraft unless specific authority for the purchase thereof is provided in such appropriation, and the acquisition of aircraft by any agency by transfer from another agency of the Government shall be considered as a purchase within the meaning hereof.

SEC. [203] *204.* In purchasing motor-propelled or animal-drawn vehicles or tractors, or road, agricultural, manufacturing, or laboratory equipment, or boats, or parts, accessories, tires, or equipment thereof, the head of any executive department or independent establishment or his duly authorized representative may exchange or sell similar items and apply the exchange allowances or proceeds of sales in such cases in whole or in part payment therefor.

SEC. [204] *205.* Section 3709, Revised Statutes (41 U. S. C. 5), shall not apply to any purchase by or service rendered to any executive department or independent establishment during the fiscal year [1945] *1946* when the aggregate amount involved does not exceed $100, but this section shall not be construed as affecting any provision of law authorizing purchases or services without regard to said section 3709 in amounts greater than $100.

SEC. [205] *206.* Unless otherwise specified and until July 1, [1945] *1946*, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, or (3) is a person who owes allegiance to the United States: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Commonwealth of the Philippines or to nationals of those countries allied with the United States in the prosecution of the war.

SEC. [206] *207.* Appropriations for the executive departments and independent establishments for the fiscal year [1945] *1946* available for travel expenses shall be available for the payment of per diem allowances in lieu of subsistence expenses without regard to the Subsistence Expense Act of 1926, as amended (5 U. S. C. 821–833), to civilian officers and employees of such departments and establishments while traveling on official business outside the continental limits of the United States and away from their designated posts of duty: *Provided*, That the amount of such allowances shall be determined by the head of the department or independent establishment concerned or by such official as he may designate for the purpose, but shall in no case, notwithstanding any other provision of law, exceed the maximum established by regulations prescribed by the President for the locality in which the travel is performed: *Provided further*, That the availability of appropriations of the War and Navy Departments with respect to the foregoing shall not be restricted thereby.

SEC. [207] *208.* The provision of law prescribing the use of vessels of United States registry by employees of the Government traveling overseas (46 U. S. C. 1241) shall not apply to such travel during the fiscal year [1945] *1946*.

SEC. [208] *209.* Appropriations of the executive departments and independent establishments for the fiscal year [1945] *1946* shall be available for reimbursement at not to exceed 5 cents per mile to personnel serving without compensation from the United States for expenses of travel performed by them in privately owned automobiles away from their designated posts of duty[, and not to exceed 3 cents per mile for such travel within the limits of their official stations].

SEC. [209] *210.* Appropriations of the executive departments and independent establishments for the fiscal year [1945] *1946*, available for expenses of travel are hereby made available (1) for allowances for living and quarters in accordance with Standardized Regulations prescribed by the President for civilian officers and employees of the Government temporarily stationed in foreign countries, [and] (2) for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and *(3)* cost of living allowances in accordance with the Act of February 23, 1931, as amended (22 U. S. C. 12), and regulations prescribed thereunder, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations of the Departments of War[, Navy, and State, except the appropriation Cooperation with the American Republics, for any of the above-mentioned objects] *and Navy and of the Department of State under the caption "Foreign Service"* shall not be affected hereby.

SEC. [210] *211.* No part of any appropriation for the fiscal year [1945] *1946* contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve of the nomination of said person.

SEC. [211] *212.* The funds appropriated in the appropriation Acts for the fiscal year [1945] *1946* of the services mentioned in the title of the Act of June 16, 1942 (Public Law 607, Seventy-seventh Congress), shall be available for, and the heads of the executive departments concerned are authorized to prescribe, per diem rates of allowance, at rates not to exceed $7 per day, in lieu of subsistence to officers traveling on official business and away from their designated posts of duty, and to members of the services concerned (including officers, warrant officers, contract surgeons, enlisted personnel, aviation cadets, and members of the Nurse Corps) when traveling by air under competent orders and on duty without troops; *and for the payment in advance, or otherwise, of money allowances in lieu of transportation, at the rate of 3 cents per mile to enlisted men, regardless of the mode of travel.*

SEC. [212] *213.* No part of any appropriation contained in this or any other Act shall be used to pay in excess of $2 per volume for the current and future volumes of the United States Code Annotated or in excess of $3.25 per volume for the current or future volumes of the Lifetime Federal Digest.

[SEC. 213. After January 1, 1945, no part of any appropriation or fund made available by this or any other Act shall be allotted or made available to, or used to pay the expenses of, any agency or instrumentality including those established by Executive order after such agency or instrumentality has been in existence for more than one year, if the Congress has not appropriated any money specifically for such agency or instrumentality or specifically authorized the expenditure of funds by it. For the purposes of this section, any agency or instrumentality including those established by Executive order shall be deemed to have been in existence during the existence of any other agency or instrumentality, established by a prior Executive order, if the principal functions of both of such agencies or instrumentalities are substantially the same or similar. When any agency or instrumentality is or has been prevented from using appropriations by reason of this section, no part of any appropriation or fund made available by this or any other Act shall be used to pay the expenses or the performance by any other agency or instrumentality of functions which are substantially the same as or similar to the principal functions of the agency or instrumentality so prevented from using appropriations, unless the Congress has specifically authorized the expenditure of funds for performing such functions.]

SEC. [401] *214.* [Appropriations] *Hereafter appropriations* of the executive departments and independent establishments of the Government for the fiscal year [1945] *1946* shall be available for the expenses of committees, boards, or other interagency groups engaged in authorized activities of common interest to such departments and establishments and composed in whole or in part of representatives thereof who receive no additional compensation by virtue of such membership: *Provided*, That employees of such departments and establishments rendering service for such committees, boards, or other groups, other than as representatives, shall receive no additional compensation by virtue of such service.

EXPLANATORY STATEMENT

American Printing House for the Blind

The amount recommended has been appropriated annually for this institution since 1937. This entire amount is used for the manufacture of phonograph records, Braille books, and Braille typewriters for free distribution to schools for the blind throughout the country.

Columbia Institution for the Deaf

This institution provides instruction for deaf persons in grade school subjects at Kendall School and in college subjects at Gallaudet College. The District of Columbia contributes to the institution for the education of students who are legal residents. Congress provides 145 free scholarships to qualified students from the States and Territories. The 1946 estimate includes an additional amount of $9,300 to provide a $300 salary increase for 30 members of the teaching staff and the business manager.

Food and Drug Administration

This Administration carries on an enforcement program directed toward the promotion of purity, standard potency, and truthful and informative labeling of foods, drugs, cosmetics, and caustic poisons. Workloads have continued to increase under wartime conditions because of the deterioration in standards in manufacturing processes and skills, in the increase of substitutions, and in the general insanitary conditions found prevalent in the storage of both raw and manufactured products. Increased importations from both liberated countries which formerly had substantial markets in this country and from new countries hitherto not exporters to this country have added to the volume of enforcement work.

By arrangement with the Army, the Food and Drug Administration has been examining, under its enforcement operations, at the points of manufacture, all drugs prepared for shipment to the Army. As a consequence, it has been able also to withhold from distribution to civilians any drugs found deficient in quality or improperly labeled. In 1946, however, due to reductions in both the kinds and quantities of drugs to be purchased for the Army, the Administration will have to return to its pre-war practice of inspection and sampling at the local level. The effect will be to increase both the inspecting and analysis workloads and to increase expenditures for samples. Supervision of factory processes and certification of new drugs, of which penicillin is the outstanding example, will continue in larger volume as production is stepped up to meet

increasing military and civilian needs. More adequate control of certified products, especially in color certification, will be required to prevent use of noncertified colors now reaching the food field indirectly.

The recommended appropriations for 1946 provide for an increase of $312,990, to meet in part the substantial increase in workloads arising from changing conditions.

Freedmen's Hospital

This hospital renders medical and hospital care to Negroes. It consists of a general unit of 402 beds, a tuberculosis unit of 150 beds, and an out-patient department. The hospital derives funds from Federal appropriation and from direct payment by patients. The Federal Government is reimbursed by the District of Columbia for the care of indigent legal residents of the District. In 1946 the Government's net share of the cost of operation will be approximately 45 percent. The increase of approximately 15 percent in the Government's share of the cost and in the amount of funds included in the 1946 estimates is due principally to acceleration of the program to rehabilitate the physical plant. The estimates for the hospital are based on 85 percent utilization of the general hospital and 90 percent utilization of the tuberculosis annex. Freedmen's Hospital is affiliated with the Howard University School of Medicine and serves as a teaching center for the medical students, in exchange for which the university provides medical and technical staff for the hospital.

Howard University

Howard University is an institution of higher education for Negroes which receives funds from the Federal Government for partial support of the maintenance and operation of undergraduate, graduate, and specialized training. The recommendation of $912,000 provides funds for strengthening certain phases of the university's work with the view to placing the institution on a more comparable basis with other institutions of higher learning. Provision is made for scholarships to students of proved superior ability.

Office of Education

The Office of Education was created in 1867 to (1) collect and publish statistics and facts to show the condition and progress of education in the States and Territories, (2) circulate information regarding the organization and management of schools and the methods of teaching to aid in the maintenance of efficient State school systems, and (3) promote education. In addition, this Office administers grants for vocational education and Federal funds for other training programs throughout the United States.

The first Federal statutes relating to land-grant colleges were enacted in 1862, and since 1890 the Federal Government has made appropriations for the support of these institutions in order to encourage work in the fields of agriculture, engineering and technology, and home economics. In addition to these grants to colleges, the Office administers Federal grants to the States for the promotion and support of vocational schools and classes for instruction in agriculture, trades and industry, distributive occupations, and home economics.

Since 1940 the Office has directed defense training programs, designed and operated primarily to meet the specific local needs of industry and government. Although these programs are financed by the Federal Government, they are administered through the colleges and State boards for vocational education. These programs include: (1) War production training in vocational courses below college grade for the training of all types of skilled and semiskilled mechanical operations in war industry; (2) engineering, science, and management war training of college grade for the training of engineers, chemists, physicists, and production supervisors, and (3) the training of rural and nonrural youth and adults in food production and conservation, mechanics, farm machinery repair, and for farm labor.

In the Budget for 1946 an amount of $26,365,000 is allowed for grants for the development of vocational education and the endowment of colleges for agriculture and the mechanic arts. $9,550,000 of the amount provided for these purposes is for permanent appropriations. An increase of $619,265 is recommended for expanding and strengthening the regular Office of Education. A complete reorganization of the basic structure of the Office is involved for the purpose of giving proper emphasis to all the various aspects of education. No recommendation of amounts to cover the continued operations of training activities is made at the present time, since the extent of the need for training in the fiscal year 1946 cannot now be determined. When the facts are available upon which the extent of the need for training can be determined, an amendment to the Budget may be necessary.

Public Health Service

Since the last Budget was presented to Congress, Public Law 410, to consolidate and revise the laws relating to the Public Health Service, has been enacted. This organic act repealed all previous legislation relating to the organization and functions of the Service, with the exception of the Nurse Training Act, a wartime emergency law, and incorporated such legislation, with some modifications and additions, into a single comprehensive document.

Pursuant to this act, and earlier authority of Public Law 184, approved November 11, 1943, the Public Health Service has been reorganized to permit more efficient administration of its functions. The estimates of appropriation for the fiscal year 1946 have been rearranged so that the several functions of the Service will be appropriated for in accordance with the new organization. The estimates for 1946 also include funds for certain new activities authorized by Public Law 410, namely, an expanded program of tuberculosis control (for which funds for the last half of 1945 have been provided in the First Supplemental Appropriation Act, 1945), public health demonstrations, training of health workers, and research fellowships.

Provision is made in 1946 for an increase in the size of the regular active commissioned corps of the Public Health Service as the first step in a program to eliminate the use of reserve officers as a customary peacetime practice and to put all permanent full-time professional staff in the Service on a regular commissioned basis, with some exceptions. Provision is also made for a program of commissioning nurses, inaugurated under authorization of Public Law 410 and the First Supplemental Appropriation Act, 1945.

The programs of the Public Health Service may be grouped under major categories as follows: Health and sanitation activities (largely in cooperation with the States), operation of hospitals, foreign quarantine activities, research, regulatory work, and education and training.

HEALTH AND SANITATION ACTIVITIES

Programs directed against specific diseases.—These include appropriations for control of venereal disease, tuberculosis, malaria and diseases of tropical origin, typhus, and plague.

After deducting overtime and nonrecurring supply purchases, the 1946 estimate for venereal-disease control is $185,000 greater than provided by direct appropriation in 1945, although, because under the new law year-end balances in this appropriation are no longer available the succeeding year, the total amount available in 1946 for venereal-disease control will be about $400,000 less than in 1945. The development of penicillin treatment and the establishment of rapid treatment centers have had a profound effect on the entire field of venereal-disease control, and may alter the clinic programs which have been supported in large part by grants-in-aid. A survey is now under way to evaluate the rapid treatment program with a view to the future prosecution of the campaign against venereal diseases. Pending the results of this survey, the rapid treatment centers continue to be financed principally by allotments under the Lanham Act.

The funds recommended for tuberculosis control provide for continuation of the expanded organization approved by Congress in the First Supplemental Appropriation Act, 1945. This is the framework upon which an intensive campaign against this disease will be conducted. At a later date, additional funds will be recommended for grants-in-aid.

The estimate for malaria control is an extension of amounts provided in regular and supplemental appropriation acts for 1945 and contemplates a moderate reduction in the program to protect personnel in military establishments and war industries, but provides no change in the program to protect civilians against returning servicemen who may be carriers of the disease. Provision is made for control of the *aedes aegypti* mosquito, carrier of dengue and yellow fever, at a slightly higher level than in 1945.

Under the estimate for control of communicable diseases, funds for plague control are provided in 1946 at about the same level as 1945. Plague control in Hawaii is a wartime program for which funds are provided under the appropriation for health and sanitation activities in war and defense areas. A substantial increase, amounting to about 20 percent after deduction of nonrecurring overtime in 1945, is recommended for typhus control in view of the increasing menace of this disease.

General health and sanitation programs.—The amount recommended for grants-in-aid for general public health work under the appropriation "Assistance to States, general," remains at $11,000,000, which is the amount appropriated for the past several years. This is supplemented by funds for administration of the grants and for consultative services rendered the States in the development of State and local health services and by the loan to the States of personnel employed under various appropriations of the Public Health Service. The estimate for 1946 also includes an amount for public health demonstrations, as authorized in Public Law 410. Other general activities include enforcement of interstate quarantine regulations (under the appropriation for control of communicable diseases) and industrial hygiene investigations, both recommended in about the same amounts as have been provided in 1945, and sanitary engineering, provided under the salaries and miscellaneous expenses appropriation, for which a small increase is recommended.

Wartime activities of the Public Health Service under the appropriation for health and sanitation activities in war and defense areas include (in addition to the loan of personnel to State and local health departments) laboratory services in war areas, milk and food sanitation, and the expenses of the health commission to Liberia, and additional funds to supplement regular programs for industrial hygiene investigations and research, and for health education.

A new appropriation for post-war planning is recommended to enable the Public Health Service to make surveys of the needs for construction of health facilities throughout the Nation in the post-war period to include principally hospitals, health centers, and sewage disposal facilities, and to provide expert consultative and advisory services to State and local authorities in their development and planning of specific projects.

OPERATION OF HOSPITALS

Marine hospitals, relief stations, and Coast Guard service.—The Marine hospitals and relief stations of the Public Health Service render medical, dental, and hospital care to certain types of beneficiaries prescribed by law, principally merchant seamen and members of the United States Coast Guard. A special hospital also is operated for the care of leprous persons. Personnel of the Marine Hospital Division furnish advisory and consultative services to other Federal agencies in connection with the establishment and operation of Federal employee health programs.

Narcotic hospitals.—The Division of Mental Hygiene operates two hospitals designed for narcotic addicts, one at Fort Worth, Tex., and one at Lexington, Ky., with a combined capacity of about 2,450 beds. The Division also conducts research into the nature and treatment of drug addiction, provides clinical psychiatric care, and operates vocational therapy projects for the patients. Wartime inability of individuals to secure narcotics has resulted in a declining number of addict patients. Since it is expected that this trend will continue in 1946, the narcotic hospitals, as authorized by law, will continue to care for the overflow of mental patients from Saint Elizabeths Hospital. Almost the entire population of the Fort Worth hospital now consists of psychotics. The Lexington hospital renders care to narcotic patients principally but also has a substantial number of psychotic patients who could not be accommodated at Fort Worth. The Public Health Service is reimbursed for care of Saint Elizabeths Hospital patients.

The 1946 Budget provides for continued additional medical and dental services to the Coast Guard and increased patient loads in the hospitals of the Service. The larger number of hospital patients is due principally to increases in the number of patients received from the Coast Guard and Navy and to the continuation of the new tuberculosis service for merchant seamen started in 1945.

FOREIGN QUARANTINE ACTIVITIES

The Foreign Quarantine Service is responsible for preventing the introduction of dangerous quarantinable diseases into the United States. Such diseases are anthrax, cholera, leprosy, plague, psittacosis, smallpox, typhus, and yellow fever. The workload of the Foreign Quarantine Service has increased markedly since early in the war, when commerce reached a low point. The increase in air traffic has been particularly great. The Foreign Quarantine Service has also been placing emphasis on rodent control.

RESEARCH

Research activities are carried on mainly at the National Institute of Health and National Cancer Institute at Bethesda, Md., at the Rocky Mountain Laboratory at Hamilton, Mont., and at smaller laboratories in various locations. Research is provided for mostly in the appropriations for the National Institute of Health and National Cancer Institute, with some additional sums being provided under control of venereal disease, tuberculosis, and other appropriations. In connection with research activities, the Public Health Service engages in the manufacture of vaccines for certain diseases, particularly yellow fever, typhus, and Rocky Mountain spotted fever. In 1946, research is continued at about the same level as in previous years except for a recent increase in tuberculosis work and a small increase proposed for 1946 for research fellowships, as authorized by Public Law 410.

REGULATORY WORK

The enforcement of the former Biologics Control Act, now incorporated as part F, title III of Public Law 410, involves control of the manufacture and sale of viruses, serums, toxins, and similar products, and is a part of the activities of the National Institute of Health. No change is contemplated in 1946.

HEALTH EDUCATION AND TRAINING

Health education is principally provided for in the appropriation for salaries and miscellaneous expenses, under the Division of Public Health Methods, but is also reflected in various operating programs of the Public Health Service, as well as in expenditures by the States under grants-in-aid currently estimated in excess of one-third of a million dollars.

Training of personnel for State and local health work is provided under the appropriation for "Assistance to States, general," following recent authorization for such a program in Public Law 410. Training of specialists is included in various appropriations, including those for venereal disease control and the National Cancer Institute. In addition, over $500,000 of grant in-aid money is spent by the States for training of personnel.

Under authority of the Bolton Act, approved June 15, 1943, an appropriation is made for the training of nurses to insure an adequate supply for the armed forces, governmental and civilian hospitals, health agencies, and war industries. Under the present law, any student nurse who is enrolled in an approved school may join the United States Cadet Nurse Corps and participate in the benefits of the act, which makes provision for tuition, books, uniforms, and stipends to the student, and allowances to training schools for maintenance for 9 months for new students. With an anticipated enrollment of 125,000 new students in the first 2 years of the program, the estimates for 1946 contemplate continued enrollment of new student nurses for the year on the basis of 60,000 new enrollees, as well as provision for continuation in the program of all existing United States Cadet Corps members until graduation. For 1946, post-graduate and refresher courses have been dropped from the program.

Saint Elizabeths Hospital

This Government-operated institution renders medical and hospital care to mental patients. The hospital is reimbursed for patients who come from the District of Columbia, the Veterans' Administration, the Indian Service, and the United States Soldiers' Home. Direct beneficiaries, for whom no reimbursement is received, are principally patients from the armed forces, Federal criminals, American citizens adjudged insane in Canada, residents of the Virgin Islands, and Foreign Service officers and employees. The total patient load at Saint Elizabeths Hospital itself, estimated at 7,125 for the fiscal year 1946, represents a slight increase over the fiscal year 1945. An excess of approximately 1,140 patients will be cared for at the narcotic hospitals of the Public Health Service. The estimate for 1946 provides for the cost of hospitalization of all patients, whether at Saint Elizabeths Hospital or the narcotic hospitals of the Public Health Service.

Social Security Board

Under the Social Security Act, the Board is responsible for administering programs carried on through the Bureaus of Old-Age and Survivors' Insurance, Employment Security, and Public Assistance designed to provide the individual with protection against economic insecurity. In addition to these operating bureaus, the Board maintains three service bureaus: the Bureau of Accounts and Audits, the Bureau of Research and Statistics, and the Informational Service, which perform for the Board and the several operating bureaus the necessary services in their respective fields. The general operations of the Board and the several bureaus are carried on through the Office of the Executive Director, which also performs housekeeping activities for the entire Board. In addition, the Office of the Actuary is concerned principally with the long-range effect of the Social Security programs and the Office of the Appeals Council provides an independent review of the administrative determinations with respect to claims by the Bureau of Old-Age and Survivors' Insurance.

Separate salary appropriations are made for the offices of the Board, the operating bureaus, and for the Federal-State grant programs. A consolidated appropriation is made for miscellaneous expenses.

OFFICES OF THE BOARD

This appropriation provides for the Offices of the Board, which include the Board itself, the Office of the Executive Director, the Office of the Actuary, the Bureau of Research and Statistics, the Appeals Council, the Bureau of Accounts and Audits, and the Informational Service. Field operations are carried on through 11 regional offices, in which representatives of the various operating bureaus are located, in order to give prompt and efficient service to the State agencies in each region and to supervise over 400 old-age and survivors' insurance field offices.

The 1946 estimate is increased over 1945 (excluding overtime) to provide for requirements arising from increased loads and activity already being experienced. Increase in claims filed with the Bureau of Old-Age and Survivors' Insurance, is expected to require substantially more work on the part of the Appeals Council and in the regional offices. The Informational Service is likewise expanded to provide a more effective service for the unemployment compensation and old-age and survivors' insurance programs.

BUREAU OF OLD-AGE AND SURVIVORS' INSURANCE

This Bureau administers a Federal system of social insurance for aged workers who retire and survivors of workers who die.

Its chief activities are (1) the recording of the earnings of workers covered under the system, (2) development,

adjudication, and certification of claims for benefits, and (3) recertification of monthly payments to beneficiaries and the continuous maintenance of beneficiary rolls.

The number of persons receiving benefits under this program will grow larger each year for a long period of years.

Although the number of workers qualifying for retirement benefits has increased rapidly during the wartime period of high employment, a significant proportion of those 65 years or older have continued in employment or returned to it because of high wages and the need for workers. In 1946 it is expected that they will retire in larger numbers.

There is evidence, at the present time, that many of these older workers are now seeking retirement. This accumulated load, plus an increase in survivors' and dependents' claims resulting from the greater number having acquired insured status and the aging of the covered population, will produce in 1946 the largest claims workload this Bureau has yet experienced. The recording of earnings will remain at a high level through 1946.

The net effect of these changes in workload as far as it can be foreseen is to necessitate an increase of about 10 percent over 1945, exclusive of overtime.

BUREAU OF EMPLOYMENT SECURITY

The Bureau of Employment Security is that part of the Social Security Board responsible for administering title III of the Social Security Act, which provides for "Grants to States for unemployment compensation administration," and for discharging the Board's responsibility under the Federal Unemployment Tax Act of the Internal Revenue Code. Unemployment compensation is a system of payments for specified periods of time to unemployed workers who are eligible to receive benefits. The unemployment compensation program operates through State systems which vary in detail but meet minimum standards established by the Social Security Act and regulations of the Social Security Board under the act. Pay roll taxes are collected by the States, deposited to their separate accounts in the special unemployment trust fund maintained in the United States Treasury, and withdrawn as needed to pay benefits. The administrative costs of the State systems are financed by Federal grants.

Prior to September 17, 1942, the functions of the United States Employment Service, which was transferred to the War Manpower Commission by Executive order, were performed by the Bureau of Employment Security. The United States Employment Service and the State employment security agencies continue to perform services for each other, which are compensated for by the transfer of funds. A net transfer of approximately $4,500,000 will be made in fiscal year 1945, and also in fiscal year 1946, to the unemployment compensation program.

Grants to States of about $29,000,000 have been approved for 1945 to cover the administrative costs of their systems. It is estimated that $32,000,000 will be required to finance the administrative costs of the unemployment compensation programs in 1946.

BUREAU OF PUBLIC ASSISTANCE

Under the Social Security Act, Federal grants to States for old-age assistance, aid to dependent children, and aid to the blind are provided. The Federal Government matches, up to certain prescribed limits, payments made by States to needy individuals for the above purposes, and pays part of the cost of the administration of these programs.

Hitherto, appropriations for grants to States have been made separately for each of these programs. However, in 1945 Congress authorized a single appropriation for all three programs which, in view of the interchangeability of surplus funds among these appropriations, simplified the appropriation structure.

The grant programs tend to reflect the prevailing economic conditions, both in the number of recipients and in the availability of State funds for the existing recipient load. It is expected that the recipient load under all three programs in 1946 will continue its present downward trend but to a less marked degree. Average payments to recipients, which have increased materially during the war economy due to the greater availability of State funds, will continue to rise. Because many States have either exceeded or closely approached the maximum individual payments which the Federal Government, under basic law, may match, the proportion of total assistance payments made by the Federal Government is expected to continue to decline. The recommended appropriation for grants in 1946 is increased by about $12 million over 1945 to provide for the cumulative effect of these factors.

The recommended appropriation for 1946 to cover salaries of the Bureau, exclusive of overtime, is maintained at the same level as in 1945.

OFFICE OF THE ADMINISTRATOR

The regular appropriations for this office provide for the immediate Office of the Administrator, the Office of the General Counsel, and the Personnel and Service Operation Divisions. In addition to the foregoing, the Office of Community War Services, including the Committee on Physical Fitness, and the Office of Vocational Rehabilitation were incorporated in this office in 1943 and 1944, respectively. Staff for completing liquidation of Civilian Conservation Corps and the National Youth Administration was included in this office in 1944. Central appropriations for traveling expenses and printing and binding are likewise made to this office. In 1944, an appropriation to provide for temporary aid to enemy aliens and other restricted persons for the duration of the war and 6 months thereafter was made to this office to replace allocations for this purpose formerly made from the emergency fund for the President.

Apart from elimination of overtime pay, increases are provided in the estimates for the Office of the Administrator and the Office of the General Counsel to provide for the enlarged Public Health Service and Food and Drug Administration programs. A small increase is provided for the appropriation "Expenses of temporary aid to enemy aliens and other restricted persons" to take care of the larger load anticipated in 1946. The larger part of the cost of this program will be carried by reimbursement from the War Relocation Authority.

The estimate for the Office of Community War Services has been decreased substantially. This reduction contemplates the continuation of the social protection program at a fully effective level throughout 1946, with curtailment of the remaining programs and elimination of the Committee on Physical Fitness. A substantial increase is provided in the central estimate of traveling expenses for the expanded programs of the Public Health Service, the Office of Education, and the Food and Drug Administration. The remaining programs are held at, or close to, their 1945 requirements.

In line with program increases in the Office of Education and the Public Health Service, a small increase in the estimate of printing and binding is recommended.

FOOD AND DRUG ADMINISTRATION

Salaries and Expenses, Food and Drug Administration, Federal Security Agency—

For all necessary expenses of the Food and Drug Administration in carrying out the investigations, including collecting, reporting, and illustrating the results thereof, and performing the functions required to carry into effect the provisions of the Federal Food, Drug, and Cosmetic Act (21 U. S. C. 301–392); the Tea Importation Act (21 U. S. C. 41–50); the Import Milk Act (21 U. S. C. 141–149); the Federal Caustic Poison Act (15 U. S. C. 401–411); and the Filled Milk Act (21 U. S. C. 61–64); as follows (*5 U. S. C. 511, 512; 7 U. S. C. 128; 5 U. S. C. 133; Act of June 28, 1944, Public Law 373*):

Enforcement operations: To enable the Federal Security Administrator to carry into effect the provisions of the above statutes, including personal services in the District of Columbia (not exceeding [$759,490] *$680,000*) and elsewhere; purchase (not to exceed [ten] *35*), operation, maintenance, and repair of motor-propelled and horse-drawn passenger-carrying vehicles; purchase of chemicals, apparatus, and scientific equipment; contract stenographic reporting services; books of reference and periodicals, [$2,717,580] *$2,700,000 (15 U. Trust accounts:

Coal-tar Colors Certification Fees, Food and Drug Administration—

Under authority of section 706 of the Federal Food, Drug, and Cosmetic Act of June 25, 1938 (21 U. S. C. 376), the Federal Security Administrator provides for the listing and certification of coal-tar colors upon the application and payment of fees by manufacturers. Such fees are to be in an amount necessary to provide, maintain, and equip an adequate service for such purpose. This service is supported by the appropriation for the enforcement of the Federal Food, Drug, and Cosmetic Act. Fees are paid in advance and are either immediately deposited to "Miscellaneous receipts" or to a special trust account for future transfer, if earned, to "Miscellaneous receipts", or, if unearned, are appropriated and made available for refund. Revenues on deposit in the special trust account are for refund or transfer to "Miscellaneous receipts" (*decision of Comptroller General, No. A44002*).

Estimate 1946, **$10** Appropriated 1945, **$300**
Revised 1945, **$10**

13 Refunds, awards, and indemnities: Obligations—1946, $10; 1945, $10; 1944, $11.

Sea Food Inspections, Food and Drug Administration—

Under authority of "An Act to amend section 10A of the Federal Food and Drugs Act of June 30, 1906, as amended", approved August 27, 1935 (21 U. S. C. 372a), the Federal Security Administrator provides inspection of sea food products upon the application of packers. This service is supported in part by the appropriation "Salaries, Sea Food Inspectors", Food and Drug Administration, and partly by fees charged the packers which are used to employ additional inspectors and for administrative equipment and maintenance costs necessary to provide an adequate and efficient inspection service. These unearned fees are covered into the Treasury as a special trust fund and are appropriated and made available for refunds.

Estimate 1946, **$13,618** Appropriated 1945, **$8,400**
Revised 1945, **$13,618**

13 Refunds, awards, and indemnities: Obligations—1946, $13,618; 1945, $13,618; 1944, $8,810.

Total, Food and Drug Administration, trust accounts:

Estimate 1946, **$13,628** Appropriated 1945, **$8,700**

Operation of Commissaries, Division of Mental Hygiene, Public Health Service—

Operation of commissaries: The First Supplemental National Defense Appropriation Act, 1944 (Public Law 216), authorized the establishment of commissaries in the Public Health Service hospitals at Lexington, Ky., and Fort Worth, Tex., for the sale of miscellaneous articles and supplies to patients, the proceeds of such sales to be deposited in the Treasury in a special account which shall be available for expenditure for the replenishment of stock and the continued operation of the commissaries. Under this authorization receipts from sales are appropriated monthly to this account; thus the estimated or actual appropriations shown below represent the estimated or actual sales to patients.

If during the fiscal [years 1944] *year 1945* or [1945] *1946* functions are transferred by the Federal Security Administrator from or between any of the said offices or bureaus, the Administrator may transfer from or between the appropriations herein made for salaries for the Social Security Board the amounts necessary for personal services in connection with the functions so transferred.

Not to exceed 5 per centum of any of the foregoing appropriations for salaries for the Social Security Board may, subject to the approval of the [Director of the] Bureau of the Budget, be transferred by the Administrator to any other of such appropriations, but no appropriation may be increased more than 5 per centum thereby.

None of the moneys appropriated by this Act to the Social Security Board or to the Children's Bureau of the Department of Labor for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees (*Act of June 28, 1944, Public Law 373*).

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Federal Works Agency deals with public works, not incidental to the normal work of other departments, and administers Federal grants or loans to State and local governments or other agencies for the purpose of construction.

Appropriations to the several activities of the Federal Works Agency fall into two general categories: (1) Those which provide for administration and general service programs, as well as public works incident to the war, covered in this section of the Budget, and (2) those which provide for the normal programs of public buildings construction, and grants for public roads, covered in the General Public Works Program. (See pp. 664–669.)

OFFICE OF THE ADMINISTRATOR

The Office of the Administrator is responsible for the general supervision and coordination of the administration of all of the activities and programs of the Agency.

In addition to this general function, the community facilities program, the liquidation of the Public Works Administration and the final settlement of the affairs of the Work Projects Administration are handled in this office. In order to discharge these responsibilities, provision is made for increased technical representation at the staff level for each of the important administrative and program functions for the purpose of supervising and coordinating such functions and for developing and establishing uniform policies and procedures throughout the Agency.

PUBLIC BUILDINGS ADMINISTRATION

This constituent administration performs functions related to Federal public buildings and sites in respect to construction; lease, purchase, and custody; the planning and control of space; repair, preservation, maintenance, and management; and the administration of surplus real property.

The appropriation for general administrative expenses provides for administration of these functions and technical architectural and engineering services and advice in respect to them. The small increase in the estimate for 1946 over the basic appropriation for 1945 is in part due to the cost of supervising the leasing of space for certain war agencies, for which an appropriation request appears here for the first time, and the balance is necessary for supervising the repair and preservation program described in the following paragraph.

The appropriation for repair, preservation, and equipment of Federal public buildings outside the District of Columbia provides for major items of alteration and repair necessary to keep buildings in usable condition and arrangement.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The appropriation for salaries and expenses for public buildings and grounds in the District of Columbia provides for the management of space occupied by Federal agencies in the District, including the operation and maintenance of some 330 buildings involving approximately 47,500,000 square feet of space. It also provides for the repair, preservation, and equipment of these buildings as well as for furnishing communication services for certain war agencies. The increase in the estimate over the basic appropriation for 1945 will provide for critical repairs to Federal buildings in the District and the additional cost of handling communication services for certain war agencies, for which an appropriation request appears here for the first time.

The appropriation for salaries and expenses for public buildings and grounds outside the District of Columbia provides for the management of space occupied by Federal agencies outside the District, including the operation and maintenance of 215 buildings, involving approximately 16,500,000 square feet of space, and for communication services for certain war agencies. The repair, preservation, and equipment of federally owned buildings outside the District is provided for under a separate appropriation. The increase in the estimate over the appropriation for 1945 is due to an increase in floor space of 500,000 square feet and the additional cost of furnishing space and communication services for certain war agencies, for which an appropriation request appears here for the first time.

PUBLIC ROADS ADMINISTRATION

This constituent administration performs functions related to cooperative work with State highway departments and other agencies in the development and supervision of construction of an improved system of highways. Appropriations for the activities of this agency are carried respectively in the General Public Works section and this section, as specified in the paragraphs which follow. All of the estimates of appropriations for this administration represent cash required to liquidate obligations incurred under the authority of previously approved contract authorizations.

Projects involving 709 miles of highways are now under construction on the strategic highway network. The Federal share of the cost of the work which will be payable during the fiscal year 1946 is provided for in part by appropriations authorized in the Defense Highway Act of 1941, estimates for which, amounting to $10,000,000, are included in this section of the Budget, and in part by appropriations authorized in the Federal-Aid Highway Act, estimates for which are shown in the General Public Works Program. (See pp. 666–669.)

Other roads which are primarily required to provide access to naval and military reservations, to sites of defense industries, and to sources of raw materials, involve approximately 11,250 miles of construction. Of this amount, 8,875 miles have been completed and 2,375 miles are still under construction. The Federal share of the cost of this work which will be payable during the fiscal year 1946, authorized in the Defense Highway Act of 1941, amounting to $35,000,000, is included in this section of the Budget.

Surveys and plans to carry out the purpose of the Defense Highway Act of 1941 include those necessary for future development of the strategic highway network and bypasses around, and extensions into, municipalities and metropolitan areas. Under the $10,000,000 authorized for this purpose, work is under way in substantially all States. The Federal share of the cost of this work which will be payable during the fiscal year 1946 is provided for by the estimate of $3,000,000 included in this section of the Budget.

The Inter-American Highway project contemplates the construction of about 800 miles of hard surface road between the southern border of Mexico and the Panama Canal Zone. Under appropriations heretofore made, 125 miles are complete, or nearly so, and an additional 175 miles are under construction.

Under the appropriations for salaries and expenses, public buildings and grounds in and outside the District of Columbia, per diem employees may be paid at rates approved by the Commissioner of Public Buildings, not exceeding current rates for similar services in the place where such services are employed, and such employees in emergencies may be entered on duty subject to confirmation by the Federal Works Administrator.

The appropriations for salaries and expenses, public buildings and grounds in and outside the District of Columbia, shall be available for teletype service, telephone switchboards or equivalent telephone-switching equipment serving one or more governmental activities, and for services to motor vehicles, and where such services, together with quarters, maintenance or other services are furnished on a reimbursable basis to any governmental activity, such activity shall make payment therefor promptly by check upon the request of the Public Buildings Administration, either in advance or after the service has been furnished, for deposit to the credit of the applicable appropriation, of all or part of the estimated or actual cost thereof, as the case may be, proper adjustment upon the basis of actual cost to be made for services paid for in advance.

In the prosecution of construction projects or planning programs assigned to the Public Buildings Administration for which funds are provided by direct appropriation or transferred under authority contained in section 35 of the Act of June 15, 1938 (40 U. S. C. 265), an amount administratively determined as necessary for the payment of salaries and expenses of personnel engaged upon the preparation of plans and specifications, field supervision, and general office expense, may be transferred and consolidated on the books of the Treasury Department into a special account for direct expenditure in the prosecution of said work, such expenditures to be subsequently allocated and reported upon by projects in accordance with procedures prescribed by the General Accounting Office (*Act of June 27, 1944, Public Law 358*).

Working Capital Fund, Public Buildings Administration—

For the establishment of a working capital fund, $50,000, without fiscal year limitation, for the payment of salaries and other expenses necessary to the operation of a central blueprinting, photostating, and duplicating service; said fund to be reimbursed in order to insure continuous operation, from available funds of constituents of the Federal Works Agency, or of any other Federal agency for which services are performed, at rates to be determined by the Public Buildings Administration on the basis of estimated or actual charges for personal services, materials, equipment (including maintenance, repair, and depreciation on existing as well as new equipment) and other expenses: Provided, That at the close of each fiscal year any excess of funds resulting from such operation, after making adequate provision for the replacement of mechanical and other equipment and for accrued annual leave of employees engaged in this work by the establishment of reserves therefor, shall be covered into the Treasury of the United States as miscellaneous receipts (submitted).

S. C. ch. 9).

[3] In addition to unexpended balances of prior-year appropriations.

[4] Funds for salaries and expenses of the Office of the Administrator are provided by contributions from the constituent units.

[5] Funds for deposit in the Treasury for cost of handling penalty mail are provided by contributions from the constituent units.

EXPLANATORY STATEMENT

GENERAL STATEMENT

The National Housing Agency was created by Executive Order 9070, issued February 24, 1942. The Agency has complete authority for the development and execution of an integrated national housing policy and program, and represents a consolidation of the civilian housing programs formerly vested in 16 Government agencies.

The Agency has four component units: The Office of the Administrator, the Federal Home Loan Bank Administration, the Federal Housing Administration, and the Federal Public Housing Authority. Through these units the National Housing Agency has responsibilities in the fields of private urban mortgage credit, the insuring of privately financed home mortgages, and the construction and management of housing built with public funds. For the fiscal year 1944, total assets for which the Agency has some responsibility amounted to approximately 16.7 billion dollars as compared with 15.9 billion dollars for the previous year.

The total estimate for administrative expenses of the Agency for 1946, as well as for most of the individual activities, are smaller than the amounts approved for 1945. Due to increased workload, the 1946 estimates for the Federal Housing Administration and for that portion of salaries and expenses of the Office of the Administrator financed by contributions from the three constituent units are slightly larger than the amounts approved for 1945. The only budget estimate requiring a direct appropriation from the Treasury is Annual contributions, Federal Public Housing Authority, United States Housing Authority. The remaining items are subject to a limitation by the Congress on the amount of corporate or other available funds which may be used for the payment of administrative expenses or of certain losses by the Federal Housing Administration.

OFFICE OF THE ADMINISTRATOR

The Office of the Administrator is responsible for establishing and administering a national housing policy, for directing the program arising from this policy, and for supervising the other component units of the Agency in carrying out the program. In addition, the Office of the

Administrator has certain direct operating responsibilities, including: (1) Programming of new construction, or of conversion of existing structures, to provide essential housing in war production areas, and authorization of housing construction to relieve conditions of hardship; (2) operation of war housing centers to minimize the need for new construction through maximum utilization of existing accommodations; (3) administration of wartime controls on the use of materials for housing and on war housing rental, sales, and occupancy, in accordance with the policies of the War Production Board and by its delegated authority; and (4) preparation for the disposition or removal of war housing.

Section 313 of the Lanham Act requires the Administrator to determine what war housing is temporary, and provides that it must be removed within 2 years after the end of the national emergency unless the Administrator, in consultation with local communities, finds that it is needed for temporary use in connection with the orderly demobilization of the war effort. Such exceptions must be annually reexamined and reported to Congress.

During fiscal years 1944 and 1945 the number of regions serving the Office of the Administrator was reduced from 10 to 7. The number of war housing centers decreased from a peak of 172 in the first quarter of fiscal year 1944 to 122 at the close of the year, and it is estimated that further reduction will be made during fiscal years 1945 and 1946.

The budget is based on the assumption that the supply of materials in fiscal year 1946 will be sufficient to permit a total volume of private construction in 1946 of about 175,000 units. Increased attention will be given in 1946 to the problems of disposition of war housing and of relaxation of wartime restrictions. The problems of over-all Agency supervision will be increased somewhat because of the many long-range questions raised by the transition to a post-war program.

It is estimated that, for fiscal year 1946, $499,000 (exclusive of overtime pay) will be required for the administration and supervision of the national housing program. This amount will be allocated from funds for administrative expenses made available to the constituent units of the Agency. Funds for the operating activities of the Office of the Administrator, amounting to $2,526,250 (as compared with $3,156,043 for fiscal year 1945), will be provided from appropriations already available for war housing construction, and from war housing rental receipts.

FEDERAL HOME LOAN BANK ADMINISTRATION

The primary objective of the Federal Home Loan Bank Administration is to maintain a stable home-financing system. The Bank Administration comprises the Federal Home Loan Bank System, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation. An Administrative Department, composed of the Commissioner, his immediate staff, and certain administrative divisions under his direction, is supported by contributions from the constituent units of the Bank Administration in proportion to the value of services provided them by the Department.

The administrative expenses of the Bank Administration are included in a combined budget estimate entitled "Federal Home Loan Bank Administration," which is in turn subdivided as follows:

Administrative Department	($358, 583)
Federal Home Loan Bank System	1, 346, 164
Federal Savings and Loan Insurance Corporation	$495, 536
Home Owners' Loan Corporation	5, 687, 000
United States Housing Corporation	0
Total	7, 528, 700

These expenses are to be paid from the income of the Home Owners' Loan Corporation and the Federal Savings and Loan Insurance Corporation, assessments against the Federal Home Loan Banks, and from examining fees.

The Federal Home Loan Bank System was established under the provisions of the Federal Home Loan Bank Act of 1932. Made up of 12 Federal Home Loan Banks and 3,714 member banks, associations, and insurance companies, it was created to stabilize and strengthen institutions providing capital to finance individual home ownership. The Bank System furnishes local home financing institutions with a permanent credit pool for mortgage funds, and provides a means of equalizing the availability of mortgage credit throughout the country through its ability to transfer funds to localities and areas where they are most needed. As of June 30, 1944, assets of the member institutions were 6.84 billion dollars, an increase of 13 percent over the preceding year. The budget estimate of the Federal Home Loan Bank System represents the costs of supervision and examination and is financed by assessments against the Federal Home Loan banks and by fees collected from member institutions.

The Federal Savings and Loan Insurance Corporation was created for the purpose of insuring the safety of investments to a maximum of $5,000 for each investor in Federal savings and loan associations and in eligible State-chartered institutions of the same type which apply for insurance and are approved by it. The Corporation's authorized capital of $100,000,000, pursuant to Act of Congress, was subscribed for and is held by the Home Owners' Loan Corporation. On June 30, 1944, there were 2,461 insured institutions with assets of approximately 4.6 billion dollars, an increase of 33 institutions and 700 million dollars over fiscal year 1943. The gross earnings of the Corporation for fiscal year 1944, consisting of premiums earned, admission fees earned, and interest income, were 7.5 million dollars. No insured institution went into receivership during fiscal year 1944. Much of the supervision, review, and examination work of the Corporation is done by the Bank System on a reimbursable basis.

The Home Owners' Loan Corporation was created in 1933, under the provisions of the Home Owners' Loan Act, for the purpose of halting the rising volume of home foreclosures by refinancing distressed home mortgages. The authority of the Corporation to acquire obligations secured by real estate expired on June 12, 1936. Since that date the Corporation has moved steadily toward ultimate liquidation, its principal functions being to service loans, to take over properties where necessary, and to dispose of them in the best interest of the Government. During fiscal year 1944, the Corporation disposed of 21,528 properties at an average sales price of $4,756 per property. This is an increase of 53 percent over the number of properties sold in fiscal year 1943, and of 12 percent in the average sale price. At the close of fiscal year 1944, total assets of the Corporation amounted to 1.5 billion dollars, a reduction of 21 percent under total assets at the end of fiscal year 1943. The number of active accounts and properties under its jurisdiction had been reduced 15 percent from those held a year earlier. Exclusive of overtime pay, the 1946 budget for administrative expenses is approximately 25 percent less than the 1945 authoriza-

tion, reflecting the anticipated decrease in the Corporation's workload as a result of continuing liquidation.

Executive Order 9070 also assigned to the Bank Administration responsibility for management of the United States Housing Corporation, a remnant of World War I. During fiscal 1944 the legal complications which had long stood in the way of final liquidation of the Corporation's property holdings were cleared away, and it is anticipated that liquidation will be completed before June 30, 1945. All properties have been disposed of except those in the city of Philadelphia, and arrangements for their disposition are in progress.

FEDERAL HOUSING ADMINISTRATION

The Federal Housing Administration was established June 27, 1934, under the provisions of titles I and II of the National Housing Act, to encourage improvement in housing standards and conditions and to promote a stable mortgage market through a system of mutual mortgage insurance for private mortgage loan institutions. On March 28, 1941, title VI was added to provide authority for insuring mortgages on privately financed war housing. As of June 30, 1944, the Administration had insured loans and mortgages under all three titles in a face amount of 7.6 billion dollars.

Provision has been made in 1946 for the insurance of 475,000 loans, the same as estimated for fiscal year 1945, for renovation and repair of existing structures under title I. Because of generally favorable employment conditions throughout the country, defaulted notes are being paid off at a very favorable rate, and the volume of new defaults is relatively small. It is estimated that the number and value of defaulted notes held for collection will be further reduced in 1946, and that premium receipts and cash recoveries will again exceed the amount of claims to be paid plus administrative expenses. A request for authorization of 3 million dollars for payment of losses has been included in the budget, such payments to be made from the title I revolving fund which, as of June 30, 1944, amounted to more than 6.4 million dollars.

On June 30, 1944, the Congress increased the title VI authorization by 100 million dollars. It is anticipated that this additional authorization will be committed by June 30, 1945, and that the only new insurance activity remaining under this title will consist of a small volume of applications for refinancing existing mortgages. It is expected that the workload in connection with the acquisition of defaulted properties and property management and disposition under title VI will increase considerably during fiscal year 1946.

On the basis of current estimates of the volume of private construction during fiscal year 1946 and of the demand for Federal Housing Administration mortgage insurance protection, provision has been made in the 1946 estimate for receiving approximately 125,000 applications under title II for insurance of mortgages on new construction. These figures compare with 50,000 and 60,000, respectively, estimated for fiscal year 1945, covering both titles II and VI.

In view of the over-all increased workload for fiscal year 1946, the budget estimate for the Federal Housing Administration for fiscal year 1946 provides for a total of $10,558,000 for administrative expenses, an increase of $1,527,352 over fiscal year 1945, such funds to be supplied through assessments against the various insurance funds.

FEDERAL PUBLIC HOUSING AUTHORITY

The Federal Public Housing Authority will have four major activities in fiscal year 1946, namely: (1) a relatively small volume of public war housing construction; (2) management of Federally owned projects under the jurisdiction of the Authority, and general management supervision over locally owned low-rent projects; (3) management of the completed units in the homes conversion program; and (4) custodial management or removal of temporary war housing which the Administrator determines is no longer needed in a specific locality.

Construction of publicly financed war housing projects already programmed will be substantially completed by the end of fiscal year 1945, but there will be a considerable volume of supplemental or clean-up construction work to be performed. The major operating functions of the Authority, however, will be the management of directly operated projects and supervision of projects leased to or owned by local housing authorities and of converted properties managed by private contract brokers, together with custodial management of inactive projects and disposition activities. The total operating program will include approximately 2,660 active projects, containing about 780,000 dwelling units. More than half of all projects will be managed by local housing authorities, either through lease agreements or direct ownership.

Total administrative expenses of the Authority for fiscal year 1946 are estimated at $11,940,000, of which amount $2,350,000 will be derived from corporate funds of the United States Housing Authority and $9,590,000 from other sources. The management of war housing is to be financed from the consolidated rental receipts fund. Administrative expenses of management of the conversion program will be met from the income of this operation. Administrative expenses of management of the projects transferred from the Public Works Administration and the Farm Security Administration will be charged to the income from these projects. Corporate funds of the Defense Homes Corporation will be used to finance the administrative expenses of the Corporation's activities.

Rental income from the low-rent, slum-clearance projects is based upon the rent-paying ability of the low-income tenants. Annual contributions by the Federal Government are pledged by the terms of the United States Housing Act for the purpose of guaranteeing the low-rent character of the operation by bridging the gap between rental income and the expenses of the local housing authorities, including operating costs, payment of interest, and amortization of capital costs. Due to increased wage levels, rental income from such projects has risen and the amounts required for annual contributions have decreased. As a matter of policy, the National Housing Agency has encouraged the use of projects built under this program to provide housing accommodations for war workers, and this has contributed to the increased income of these projects during the war. In 1946, annual contributions to local housing authorities are estimated at $9,630,000, of which $2,030,000 would be provided by the reappropriation of remaining fiscal year 1945 funds, and $7,600,000 by direct appropriation. This represents 46.5 percent of the maximum contractual contributions for which the Federal Government is liable. It is estimated that 170 statutory projects will require contributions in fiscal year 1946, and that 100 will not, since the rental income will be sufficient to meet all charges.

EXPLANATORY STATEMENT

GENERAL STATEMENT

The Department of Agriculture, which includes the War Food Administration, is charged with the responsibility for carrying on activities and programs concerned with agricultural research, credit, production, processing, and distribution in the United States and its possessions, and for the relationship of such activities and programs to those of other countries.

In order to assure the greatest possible contribution of agriculture to winning the war, those functions of the Federal Government most directly related to food production and distribution were, beginning in March 1943, placed under the direction of a War Food Administrator, appointed by and responsible to the President.

The need for food production will not be lessened in the immediate future. We must continue to be prepared to meet the needs of our armed forces, our civilian population, and our Allies, as well as the requirements of war-torn countries. Some shifts in the pattern of production may be needed in line with changing demand situations, but the total requirements will continue to be great.

The direct appropriation estimates for the Department of Agriculture for 1946 show a decrease of 26 percent below 1945. Including reappropriations, there is a reduction of 12 percent in the amount of funds available

for 1946 as compared to 1945. An increase of about 200 percent in authority to borrow from Reconstruction Finance Corporation is included for self-liquidating loans.

ADMINISTRATION AND SERVICE

This broad classification includes the Offices of the Secretary and the War Food Administrator and the staff offices. These offices, which provide essential services for the Department as a whole, include the Offices of Solicitor, Information, Personnel, Budget and Finance, Plant and Operations, and the Library. Included also are the Bureau of Agricultural Economics, the central economic research and statistical agency of the Department, and the Office of Foreign Agricultural Relations.

There are indications that, by the beginning of fiscal year 1946, possibly some of the administrative activities presently carried on can be curtailed. Planning for postwar readjustment problems will impose an added burden at this level, and in the field of foreign agricultural relations more information will be needed to serve as a basis for working out international policies and cooperation. The anticipated expansion in our foreign trade has a direct bearing on the future of our agricultural economy. Immediate problems are emerging as the war progresses and additional countries are liberated. The net effect of these considerations on the 1946 estimates is a reduction for administration and service in the Department of one-half percent as compared with 1945.

AGRICULTURAL RESEARCH, DISEASE AND INSECT CONTROL

Included in this classification are the agencies comprising the Agricultural Research Administration, the research activities of the Forest Service and the Soil Conservation Service, and the white pine blister rust control program.

An increase of 6 percent in the amount for agricultural research is recommended for 1946. The largest increase among the research items is $546,292, for increased payments to States for agricultural experiment stations.

The balance of the increase for research, approximately $1,000,000, is distributed among 15 items of 8 bureaus and agencies. The need for research increases as the aims of our living standards are raised, as our civilization becomes more complex, and as new problems are presented by newly introduced diseases and insects. Further need for such research is illustrated by the results of a few of the Department's projects: Developing methods for expanding the production of lifesaving penicillin; developing the insecticide DDT, which promises to revolutionize pest control and eradication measures; and research on the use of wood and wood products, especially valuable during the war in aircraft production, shipbuilding, and packaging of overseas military shipments.

For the control of insect pests and plant diseases, an increase of 13 percent in funds for 1946 is provided for in the estimates. More than three-fourths of this increase is for the control of white pine blister rust, a destructive disease which menaces our five-needled pine forests.

PRODUCTION, MARKETING, AND CREDIT

Grouped under this head are the Farm Credit Administration, Farm Security Administration, Rural Electrification Administration, Agricultural Adjustment Agency, Soil Conservation Service, Extension Service, Office of Labor, Office of Production, Office of Distribution, Commodity Credit Corporation, and the Emergency Rubber Project. Each of these agencies has played a vital part in the urgent wartime job of getting necessary food and fiber produced and distributed equitably among our armed forces, our civilian population, and our allies. The high level of production reached during the war years could not have been achieved without the assistance and service available to farmers through the agricultural conservation agencies.

While the estimates for 1946 reflect a proposed reduction of approximately 32 percent in direct appropriations as compared to 1945, due to reappropriations and transfers, the availability of funds for administering the various production, marketing, and credit functions is about 14 percent below 1945.

The estimates provide for an expanded loan program under the Rural Electrification Administration through increases in authorized borrowing power from the Reconstruction Finance Corporation. An increase from $25,000,000 to $150,000,000 is provided for loans for rural electrification so that this program, which has been necessarily curtailed by the war, may be resumed at an accelerated pace if materials and labor become available.

An increase in the loan authorization for Farm Security Administration from $15,000,000 to $50,000,000 is provided for farm tenant loans, and from $67,500,000 to $125,000,000 is provided for rural rehabilitation loans. These increases are provided largely to meet the anticipated demand for agricultural credit from returning veterans.

When the reduction in military requirements and lend-lease demands for farm products occurs, it will create a number of problems in production, distribution, and price support. The Congress has recognized that farmers must be protected against a possible collapse of farm prices immediately following the war. To meet price-support requirements during and after the war, a proposed increase of $2,000,000,000 in the borrowing power of Commodity Credit Corporation has already been recommended to the Congress.

The 1946 Budget estimates for the Commodity Credit Corporation and the Farm Credit Administration do not provide for any substantial change in the administrative requirements for the credit and loan programs of these agencies. Should adjustments in these programs be required because of changing conditions, provision therefor will be considered at the appropriate time.

PUBLIC LAND AND FOREST MANAGEMENT

Under this head are grouped the activities and functions of the Forest Service (excluding research items), Forest Roads and Trails, Land Utilization and Retirement of Submarginal Land, and Payments to States and school funds of certain percentages of receipts from national forest and land-utilization projects. The national forests have played an important part in our war production program. The cut of national forest timber reached an all-time high of 3,333,000,000 board feet in fiscal year 1944, with a total value of $14,362,671, and is still increasing.

Budget estimates for 1946 provide for increased expenditures under this head, as compared to 1945, of approximately 27 percent. Over 60 percent of this increase is for forest highway construction which was authorized in 1942, but for which funds heretofore have not been appropriated. The balance of the increase is chiefly for forest fire cooperation, timber sales, and the mapping of national forests.
