## BUDGET MESSAGE OF THE PRESIDENT

## To the Congress of the United States:

I am transmitting the Budget for the fiscal year 1948. It includes recommendations for the entire Federal program.

Expenditures under existing and proposed legislation are estimated at 37.5 billion dollars and revenues under existing tax laws at 37.7 billion dollars, leaving a very slight margin of surplus.

I strongly recommend that the Congress take early action to continue throughout the fiscal year 1948 the war excise-tax rates, which, under the present law, will expire July 1, 1947. My declaration of the end of hostilities on December 31, 1946, was not issued in order to achieve tax reduction. I considered it essential that war excise-tax rates be retained, but I also considered it necessary to terminate the "state of hostilities" as soon as it became possible to do so.

I also recommend that the Congress increase postal rates sufficiently to wipe out the postal deficit.

These recommendations would reduce expenditures to 37.1 billion dollars and increase revenues to 38.9 billion dollars. We would then have a budget surplus of 1.8 billion dollars.

As long as business, employment, and national income continue high, we should maintain tax revenues at levels that will not only meet current expenditures but also leave a surplus for retirement of the public debt. There is no justification now for tax reduction. At today's level of economic activity, our present revenue system will not yield so much in 1948 as in the current year. We shall no longer collect large sums from the excess-profits tax, and sales of surplus property will decline.

Revenue estimates are, of course, to a very large extent determined by the level of business activity. In this Budget, it has been assumed that, with minor fluctuations, business aetivity will average slightly higher than in the calendar year 1946. A recession in business would cause tax yields to drop. In addition, the cost of supporting agricultural prices and payments to unemployed veterans would increase. Should such a recession occur, it would be a temporary slump growing out of transition period difficulties and would call for no revision in our budget policy.

For the fiscal year 1947, it now appears that receipts will amount to 40.2 billion dollars and expenditures to 42.5 billion dollars. The

1-billion-dollar increase in expenditures over the August estimate occurred largely in veterans' programs. For example, many more veterans than had been expected decided to go to college or enroll for job training. We cannot regret this demand for education, but it illustrates the kind of uncertainty that cannot be eliminated in preparing our estimates.

The deficit for the current fiscal year would have been larger if Executive action had not been taken to place expenditure ceilings on some activities and to hold them well below the amounts available under appropriations already made. The way the various departments and agencies of the Government, particularly the War and Navy Departments, have succeeded in cutting their expenditures is gratifying. Although public works could not be cut so deeply as anticipated in August without causing a wasteful stoppage of work already under way, we shall still show a substantial saving in this fiscal year for these programs.

This Budget meets our basic requirements for Federal programs at home and abroad for the fiscal year 1948. The Federal Government must not only fulfill its contractual obligations; it must also provide the services that are necessary for the welfare and the progress of the Nation. We have to carry our proper share of the expense of building world organization. We must make effective provision for national defense.

We have many other commitments, both international and domestic, that must be honored. In fact, a very large part of all our expenditures in the fiscal year 1948 will be required to meet commitments already made. The Budget is designed to meet these needs, and to execute every program with strict economy.

The reconversion of wartime military and civilian services was far advanced during the calendar year 1946. Of 26 emergency war agencies in operation shortly before VJ-day, only 5 remain, and 3 of these are winding up their work. Two others-the War Assets Administration and the Office of Temporary Controls-have been added to help close out the war program. The 1948 Budget assumes a reduction of civilian employment in the Government as a whole to less than three-fifths of the wartime peak number--in addition to the heavy shrinkage of the armed forces.

The Government has been exerting every effort in the wake of the war demobilization to strengthen and make more efficient its internal organization and administrative methods. It is essential that citizens
receive maximum service for their tax dollars, and the Administration plans further intensive measures to improve the administrative practices, organization, and efficiency of the departments and agencies.

But the cost of peacetime services has risen strikingly as compared to these costs before the war. Prewar figures can no longer be used as a yardstick. Although Government wages have not been raised so much as private wages, the cost of supplies has risen in line with the cost of goods in private markets. Further, the population to be served has grown since 1939 by 10 million people, adding proportionately to the demand for many public services. Many normal maintenance items had to be postponed on account of the war, and cannot be further neglected. Normal services which were cut during the war have to be restored.

Let me now review the expenditure side of the Budget, taking first the large items which practically determine the size of the total.

1. Interest on the national debt will be 5 billion dollars. This is an obligation that must be met.
2. Refunds due under the tax laws are estimated at 2.1 billion dollars. These are fixed obligations under present law.

These two items total 7.1 billion dollars.
3. National defense is estimated at more than 11.2 billion dollars, almost all for the operating expeuses of the Army and Navy. Though we expect the United Nations to move successfully toward world security, any cut ill our present estimate for 1948 would immediately weaken our international position. This large part of the Budget, in my judgment, represents a proper balance between security and economy.

The total so far is 18.3 billion dollars.
4. International affairs and finance will call for 3.5 billion dollars, a sharp reduction from the 6.4 billion dollars required in the fiscal year 1947. We still have contractual commitments to make good in connection with our loan agreement with the United Kingdom and under the reconstruction lending program of the Export-Import Bank. We must discharge our occupation responsibilities in Europe and the Far East. We must provide for war damage restoration in the Philippines and for the relief and resettlement of displaced people of Europe. We must continue to give relief to some other countries which are most urgently in need.

The work of the United Nations and the specialized organizations associated with it is of the highest importance. We must not fail in
our support. The Department of State, for which increased appropriations are requested, must be prepared to carry an increasing load of work in the growing field of American foreign relations.

Our international affairs budget is important for peace, security, and our own prosperity. To reduce it would delay the restoration of a peaceful and prosperous world.

The total of these four items is 21.8 billion dollars.
5. Veterans' services and benefits will cost more than 7.3 billion dollars. This country has provided generously for the successful return of veterans to civilian life and for the care of the disabled. While the cost looms large in the Budget, much of it goes to provide education and rehabilitation which will add to our national strength and prosperity. The cost for veterans' education, pensions, and hospitals will increase in the fiscal year 1948; but if employment remains high, the unemployment payments should be smaller. Veterans' benefits under present law appear to be adequate.

These five items-interest, refunds, national defense, international affairs, and veterans-require expenditures of 29.2 billion dollars, or almost four-fifths of the total Budget.
6. Programs for regulation and improvement of the transportation and communications systems and for development of natural resources will amount to 2.6 billion dollars. The largest single item is 443 million dollars for the Atomic Energy Commission. Our major effort now must be to exploit to the full the peacetime uses of this great discovery.

About 1.2 billion dollars of the expenditures on these two programs is for public works construction, and much of the rest is for the promotion of our merchant marine and other aids to transportation.

The expenditure for the Federal-aid program for highways rests on the Federal Government's agreements with the States. Air transport will be seriously retarded unless new air-navigation facilities are promptly supplied. River basin development and harbor improvement cannot be neglected without impairing efficiency in private enterprise. Most of the public construction projects are already under way. A few additional projects, not yet started, have been provided for in 1947 appropriations.

Public construction in these and other fields contributes to the productive capacity and taxpaying ability of the country. The postponement of public works in good times and their expansion in hard times will make their contribution even greater. All postponable public works should be deferred at the present time. But the need to
protect and improve our natural resources has become acute as a result of the war, and we must carry out the works included in this Budget if we are to avoid waste.
7. Our agricultural program will amount to 1.4 billion dollars. This includes the price supports guaranteed by law, the conservation of farm land, and our investments in rural electrification. In addition, the Department of Agriculture will continue its program to promote research in agriculture and better marketing methods.

This brings the total to 33.2 billion dollars.
8. The Budget programs for social welfare, health, and security, and for education and general research amount to 1.7 billion dollars. This total excludes unemployment compensation and old-age and survivors insurance, which are financed through trust-account operations that do not appear in Budget expenditures. It does include 481 million dollars in payments to the railroad retirement trust fund. More than half of the remaining expenditures is for aid to the aged and other dependent persons. The rest is largely for protection of public health, for crime control, and for grants to States for vocational education.
9. The Federal housing program is estimated at 539 million dollars. The bulk of the housing expenditures is for purchase by the Reconstruction Finance Corporation of guaranteed home loans to veterans and for continued operation of revenue-producing war housing in overcrowded communities.

Our social-security program and our education and housing programs can hardly be considered adequate. Improvements in these fields are seriously needed. Although this Budget does not contemplate major extensions in the next fiscal year, I recommend that the Congress lay the legislative ground work now for the needed improvements, including general health insurance and a long-range housing program.

The costs of social welfare, education, and housing bring the cumulative total above 35.4 billion dollars.

The remainder of the Budget totals 2.1 billion dollars. Nearly one-third is for war liquidation, including the overhead cost of disposing of surplus property. The rest is for services to business and labor through the Commerce Department and Labor Department, for general functions of the Treasury, the General Accounting Office, the legislative branch, the judicial branch, and the Executive Office of the President, and for many other items. These services, with a total cost of less than 5 percent of the Budget, are an indispensable part of the machinery of the Government.

The Budget total of expenditures thus comes to 37.5 billion dollars.
It has always been the Government's duty to provide whatever assistance is required to afford private enterprise a chance to prosper. In the nineteenth century a principal economic service of the Federal Government was the opening of the West. The Government acquired the territory, granted lands to settlers, gave military protection, and subsidized railroads and highways-thereby opening opportunities for the private initiative of the American people.

Today, our great new frontiers are in river-valley developments, in air transport, in new scientific discoveries, and in application of the new science and technology to human progress. These new frontiers can be developed only by the cooperation of Government and private enterprise.

Our expenditures on developmental projects are a good investment for the Government. They increase the productive power of the country and make for higher living standards. Directly or indirectly, the Government recovers the cost in the form of either service charges or increased revenue yields to the Treasury.

The Federal Government promotes improvements in agricultural methods. It provides many services to private enterprise that could not be organized except by Government. The Bureau of Standards, for example, furnishes basic scientific data. The Weather Bureau supplies information used by thousands of farmers and business concerns and has a rapidly developing field of work in aviation weather reporting. Maps and charts, as well as lighthouses, beacons, and other physical aids to navigation, are supplied by the Federal Government. Many kinds of statistical reports, required by American business, are also provided.

Since 1939, our complex system for the production of goods and services has grown so much that more services than ever are required from the Government. We cannot risk retarding our growth by lack of roads, electric power, air-navigation facilities, engineering data, maps, education, surveys of resources, weather reports, protection against disease, or any other necessary instrument of progress. There is a multitude of Government activities which the whole Nation takes for granted and on which our prosperity depends.

Let me now review briefly the appropriation side of the Budget. This Budget recommends appropriations of 31.3 billion dollars for the fiscal year 1948 under existing and proposed legislation. It
recommends that authority of 1.5 billion dollars be granted certain agencies to contract for services and supplies, such as aircraft and construction. Payments under such authority will be financed from appropriations to be made in subsequent years.

The expenditures for 1948 still reflect a portion of the cost of our tremendous war program for which appropriations were made in previous years. They also reflect certain large international commitments likewise previously authorized. These two factors in large measure explain why estimated expenditures for 1948 are so much more than the appropriations recommended for that year.

Existing appropriations available for obligation in 1948 and subsequent years are again under review. As these appropriations become unnecessary, their withdrawal will be recommended to the Congress.

The Federal Government, as shown by the size of its Budget, has far greater obligations than at any time before the war. Although the Budget reflects the urgent need for rigorous economy in the execution of every program, expenditures are inevitably large. The American people surely will not shirk their new responsibilities at home and abroad. They will supply the necessary funds to meet these responsibilities.

## Receipts

As previously indicated, I cannot recommend tax reduction. The responsibilities of the Federal Government cannot be fully met in the fiscal year 1948 at a lower cost than here indicated. Even if the cost were less it would be desirable in our present economic situation to maintain revenues in order to make a start toward the repayment of the national debt. At the present time, in my judgment, high taxes contribute to the welfare and security of the country.

Under the wartime tax system, millions of taxpayers with small incomes are called upon to pay high taxes. When the time comes for taxes to be reduced, these taxpayers will have a high priority among the claimants for tax relief.

I have recommended that the war excise-tax rates due to expire July 1, 1947, be continued. When the time comes for excise-tax revision, the Congress should review the entire group of excise taxes rather than concentrate attention on those that were imposed or increased during the war.

Our long-run tax program must be designed to maintain purchasing power and provide incentives for a high level of production.

In the corporation section of this Message, legislation is recommended which will require return to the Treasury as miscellaneous receipts of certain capital funds totaling 379 million dollars.

I also recommend that the Congress reconsider the extent to which fees should be charged for services rendered by the Federal Government. While it is not sound public policy to charge for all services of the Federal Government on a full cost basis, and many services should be provided free, the Government should receive adequate compensation for certain services primarily of direct benefit to limited groups. For example, I believe that a reasonable share of the cost to the Federal Government for providing specialized transportation facilities, such as airways, should be recovered.

BUDGET RECEIPTS
[Fiscal years. In millions]

| Source | Actual, 1946 | Estimate, 1947 | Estimate, 1948 |
| :---: | :---: | :---: | :---: |
| Direct taxes on individuals. | \$19,008 | \$18,637 | \$19, 120 |
| Direct taxes on corporations. | 12,906 | 9, 227 | 8, 270 |
| Excise taxes | 6,696 | 7,283 | 6,118 |
| Employment taxes. | 1,714 | 1,955 | 2,694 |
| Customs. | 435 | 496 | 517 |
| Miscellaneous receipts: |  |  |  |
| Present law | 3,480 | 3,987 | 2,620 |
| Proposed legislation |  |  | 379 |
| Total receipts. | 44,239 | 41, 585 | 39,717 |
| Less net appropriation to old-age and survivors insurance trust fund. | 1,201 | 1,355 | 1,987 |
| Budget receipts................................ | 43,038 | 40, 230 | 37,730 |
| Proposed continuation of war excise rates (not included in Budget receipts) |  | 37 | 1,130 |

Receipts from direct taxes on individuals are estimated to decrease from the fiscal year 1946 to 1947 because of the lower effective individual income tax rates in the Revenue Act of 1945, and to increase from the fiscal year 1947 to 1948 because of higher incomes. Direct taxes on corporations decline in the fiscal year 1947 and further in 1948 largely because of repeal of the excess-profits tax.

The excise-tax estimates increase in 1947 because of increased consumer demand and increased production, and decline under present law in 1948 because of the expiration of the war tax rates of the Revenue Act of 1943. The employment-tax estimates show increases
in both fiscal years, due in 1947 mostly to larger pay rolls, and in 1948 mostly to increases in rates as provided by law. Miscellaneous receipts increase in 1947 over 1946 largely because of increased receipts from disposition of surplus property and decline in 1948 largely because of a decline in surplus-property receipts.

## Borrowing and the Ptiblic Debt

The public debt reached a peak last February at 279 billion dollars. During the remainder of the calendar year, the debt was reduced by over 20 billion dollars and stood near 259 billion dollars at the end of December. Most of the securities retired were held by banks. This reduction was accomplished by drawing down the Treasury cash balance to a level more in line with peacetime requirements.

We propose to continue the sale of savings bonds. The proceeds will be available to redeem marketable securities-particularly those held by the banking system. It is important that every citizen in a position to do so help to maintain a sound economic situation by purchasing and holding United States savings bonds.
The annual interest charge of about 5 billion dollars is less than 3 percent of our current national income. It is well within our capacity to pay, particularly if we keep up a high volume of national production. The best method of keeping down the burden of the debt is to maintain prosperity. A single year of depression can lay more burdens on the people than many years of gradual debt reduction can relieve.
Our debt-management policy is designed to hold interest rates at the present low level and to prevent undue fluctuations in the bond market. This policy has eased the financial problems of reconversion for both business and Government. The stability of the Government bond market has been a major factor in the business confidence which has been of such value in achieving full production. Low interest rates have also relieved the burden on the taxpayer. The Treasury and the Federal Reserve System will continue their effective control of interest rates.

## Expenditure Programs

In this year's Budget, expenditures are grouped under a new functional classification in order to present to the Congress and the people a clearer picture of the purposes for which Federal funds are spent. To facilitate comparison, figures for previous years are also
given on the new basis. The new classification is described in detail in part IV of this Budget.

| Total.-...-.............-............ | 63, 714 | 42,523 | 37, 528 | 31, 276 |

The Budget classifications and Budget totals reflect all transactions in the general and special accounts and the excess of expenditures over receipts of wholly owned Government corporations. For the first time, the net expenditures of wholly owned corporations are classified on a functional basis. The Budget totals do not include the operations of trust accounts. However, such transactions, when significant, are discussed in connection with the various Budget programs.

NATIONAL DEFENSE
Expenditures for "National defense" remain by far the largest category in the Budget. The cost of maintaining the military, air, and naval forces necessary in the fiscal year 1948 will be high. The present defense establishment requires larger forces, more complex mechanized equipment, more intensive use of equipment, and more extensive developmental activity than before the war.

However, in the fiscal year 1948 these expenditures will be but oneeighth of the outlays in the peak wartime fiscal year, 1945. This drastic cut reflects a corresponding reduction in the size of the armed forces. Outlays for munitions have been reduced even more.

Despite these reductions, our defense establishment will not have fallen to its ultimate peacetime level by the end of the fiscal year 1948. We still have large responsibilities arising out of the war. Military occupation in Europe and the Far East must continue. The lines of communication and supporting installations for the occupation forces must be maintained. Recruits must be trained as replacements.

The high cost of our defense establishments requires that the program be operated with the utmost efficiency. In the estimates for 1948 emphasis has been placed on eliminating as much duplication and overlapping in activities as is possible under present conditions. In my State of the Union Message I have again urged establishment of a single department of national defense. This is an important step in the search for economy and efficiency in organization and administration of the armed services.

I recently appointed an advisory commission to study the need for a universal training program. We still have available from the war much of the equipment and installations which will be needed for such a program. The program, after it has been worked out and approved, will still require considerable time to get under way. Estimates for it have, therefore, not been included in this Budget. Since plans are not complete for the training program, a small amount has been included in the Budget to cover the cost of induction machinery whenever provision is made for it.

- Excludes disbursements of approximately 1,500 million dollars for the War Department and 250 mil lion dollars for the Navy Department which have appeared as Budget expenditures in previous years.

Expenditures.-"National defense," as used in this Budget, is much less inclusive than the category used last year. For example, War Department expenditures of 645 million dollars in 1948 for supplies to and administration of occupied areas (other than Army pay, subsistence, and related items) are now in "International affairs and finance." Likewise, expenditures for the atomic energy activities of the Manhattan District project beginning January 1, 1947, when the Atomic Energy Commission took control, are shown in "Natural resources." For the fiscal year 1946 and the first 6 months of the fiscal year 1947 this program remains in "National defense."

The level of expenditures for "National defense" in 1947 would have been 1.7 billion dollars higher, and the reduction from 1947 to 1948 correspondingly greater, except for certain adjustments- 1.5 billion dollars in War Department accounts and 250 million dollars in Navy accounts. Some funds withdrawn from the Treasury in 1946 and earlier years, and reported as expenditures at the time, were not used until 1947. Also some expenditures by the War Department in 1947 were offset by credits from funds which had accumulated in trust accounts during the war.

The expenditure estimate of 11.1 billion dollars in 1948 for the Army and Navy for military purposes reflects the reductions from the current fiscal year in the number of military personnel and in war-liquidation outlays-such as mustering-out payments (reduced by 370 million dollars), contract termination ( 700 million dollars), and surplus property handling. On the other side, the estimate reflects greater procurement in the fiscal year 1948, as war inventories cease to be available to supply current needs.

The estimated expenditures of 6.7 billion dollars for the War Department in the fiscal year 1948 include 132 million dollars for public works under supplemental legislation. The Navy expenditures of 4.4 billion dollars also include 77 million dollars for ship construction and public works under supplemental legislation. In both instances the objective is to return to the peacetime procedure of obtaining specific legislative authority for these programs.

Taken together, the War and Navy Department expenditures estimated for the fiscal year 1948 provide for an average military strength of $1,641,000$ men and officers. Of this, Army strength is projected at $1,070,000$ throughout the year; Navy and Marine strength will begin the year at 598,000 and average 571,000 . These figures compare with an average strength in the fiscal year 1947 of $2,108,000$. Pay, subsistence, travel, welfare, training, clothing, and medical expenditures for military personnel are estimated at 5.2 billion dollars in the fiscal year 1948, as against 6.7 billion dollars in the current year. Average annual costs per man for these purposes-about 3,100 dollars in 1948-have increased markedly since VJ-day. Fully 45 percent of Army and Navy expenditures in 1948 are in this category.

Expenditures by the War and Navy Departments for all other military purposes are estimated at 5.9 billion dollars in the fiscal year 1948. This sum covers procurement, research and development, construction, operation and maintenance, and citizen-reserve activities. The estimates for 1948 contemplate proceeding with construction projects of highest priority at overseas bases and in the continental

United States, and limiting procurement to those items essential for the current operation, maintenance, and training of the military forces, except for aircraft and limited quantities of newly developed items.

Effective defense under modern conditions requires us to push ahead in scientific and technological fields. Toward this end, expenditures for research and development by the Army and Navy are projected at 530 million dollars in the fiscal year 1948-slightly above their 1947 rate. Similarly, we must keep alive the knowledge of military skills among our citizens. To provide for an orderly expansion of citizenreserve organizations, expenditures of 308 million dollars are projected in 1948-about two-thirds more than the outlays in the current fiscal year when these programs are getting under way. The reserve organizations of the Army will still be below planned strength at the end of 1948 .

The bulk of the terminated Army and Navy contracts has already been settled, with creditable dispatch. For all agencies, total commitments canceled on 318,000 prime contracts exceed 65 billion dollars. After deducting credits due the Government, total payments to contractors under the entire program are estimated at about 6.5 billion dollars. Of this total, about three-fourths of a billion dollars remained for payment at the beginning of the fiscal year 1947. Most of this has now been paid in final settlements or in advances pending settlement.

Applications for terminal-leave payments to enlisted military personnel have been smaller than expected. It is now estimated that 1.9 billion dollars will be paid in 1947 and only 250 million dollars in 1948.

Lend-lease expenditures in the fiscal year 1947 from funds appropriated to the President are largely interappropriation adjustments and payments for articles procured and services rendered in previous years. In 1948 there will be very small expenditures-all for closing out the program.
Except for some military aid to China and minor items, lend-lease was terminated after VJ-day. Since then, lend-lease goods valued at over 1 billion dollars have been sold to foreign countries on a cash or credit basis. Much progress has been made in effecting settlements with the countries which received about 50 billion dollars of lend-lease aid and extended almost 8 billion dollars of reciprocal aid. Final settlements have now been negotiated with the United Kingdom, Australia, New Zealand, India, France, Belgium, and Turkey,
and discussions with the Netherlands, Norway, and the Union of South Africa are nearing completion.

The military program for stock piling of strategic materials has been reviewed carefully to minimize interference with business requirements. New stock piling is estimated at 90 million dollars in the fiscal year 1947 and 33 million dollars in 1948. In addition, excess metals and materials, amounting to 87 million dollars this year and 210 million dollars in the fiscal year 1948, will be transferred from Reconstruction Finance Corporation stocks to the Treasury military stock pile. Apart from stock piles transferred to the Treasury, the receipts of the Reconstruction Finance Corporation in its war activities reflect largely the rental and disposal of excess war plants, together with the sale of metals, minerals, and other commodities to the public.

Appropriations.-To finance the expenditure program outlined above, appropriations of 9.5 billion dollars and new contract authorizations of 541 million dollars will be necessary in the fiscal year 1948. These totals include 262 million dollars of supplemental appropriations and 91 million dollars of contract authorizations under legislation shortly to be submitted. The new appropriations needed in 1948 are about 2 billion dollars lower than the estimated expenditures, which include provision for payment of substantial amounts of unliquidated obligations of prior years.

## INTERNATIONAL AFFAIRS AND FINANCE

The budget for our international program is designed to contribute to a peaceful world and a stable world economy. We have definite responsibilities to our wartime allies and in occupied countries. Our international lending program is an essential part of our efforts to achieve a world economy in which private trade will flourish.

The period when large-scale general relief is required for our allies is almost over. With the termination of the United Nations Relief and Rehabilitation Administration, there will remain, however, the urgent question of refugees and displaced persons. I urge the Congress to provide adequate support for the International Refugee Organization, now in process of being formed under the United Nations. It is also necessary that we provide a modest relief program for a few countries which are still in desperate straits. I recommend that the Congress speedily enact legislation to authorize these expenditures for which I am making provision in this Budget. In
addition, I recommend that the Congress authorize participation in the World Health Organization and the proposed International Trade Organization and have included the small amounts needed for their support.

INTERNATIONAL AFFAIRS AND FINANCE

Expenditures.-The sharp decline in total expenditures in the fiscal year 1948 is due chiefly to the fact that in 1947 we shall complete our payment to the International Monetary Fund and our basic cash subscription to the International Bank for Reconstruction and Development. Further liabilities to the International Bank will arise only if we are called upon, within the limits of our total subscription, to join with other countries in making good any defaults by borrowers from the Bank.

More than half of our expenditures in the international field in the fiscal year 1948 will be loans for reconstruction or trade expansion. Disbursements will be predominantly under existing commitments. By the end of the fiscal year 1948 we shall have discharged about three-fourths of our commitments under our loan agreement with Britain. Since the International Bank is now ready for business, new authorizations for reconstruction loans by the Export-Import Bank are being sharply curtailed. In the future, the Export-Import Bank will be primarily concerned with loans to finance United States trade and small developmental loans in which we have a special interest. Outlays by the Export-Import Bank in the fiscal years 1946 and 1947 have been financed to a considerable extent by the sale of capital stock to the Treasury. Since the Treasury subscription is now complete, future net outlays will be financed entirely by sale of notes to the Treasury.

The existing appropriation for United Nations Relief and Rehabilitation Administration expires at the end of the current fiscal year. Estimated expenditures in 1948 are entirely to wind up the program.

During the fiscal year 1948, the War Department will incur expenditures for administration and relief in Germany, Japan, Korea, and the Ryukyus and for administration in Austria. We must continue to provide subsistence to prevent disease, hunger, and unrest, and to provide proper administration, if these lands are eventually to become democratic and self-supporting. Moreover, shipments of food and other supplies are required to maintain the working efficiency of the populations and to stimulate production. Resulting increases in exports from these areas will furnish a growing source of funds to pay for necessary imports and thus help eliminate the need for financial assistance.

The recent agreement for economic unification of the British and United States zones in Germany will increase exports from those zones and help to make them self-sufficient by the end of the calendar year 1949. All costs incurred for the support of the German economy are
to be repaid out of future German exports as quickly as recovery permits.

An important contribution to the economic revival of the occupied areas is being made by Federal agencies such as the U.S. Commercial Company in temporarily financing exports from these areas. Net dollar proceeds are currently being used primarily to purchase raw materials and equipment needed for a further expansion of exports in order to hasten the time when the occupied areas will become fully self-supporting. To aid in this program, I urge that the Congress authorize the U. S. Commercial Company to continue operations beyond June 30, 1947, the present expiration date.

Aid for the Philippine Republic includes assistance in rebuilding its economy, payments to fulfill our pledge to compensate partially for war damage, and maintenance of training programs for Philippine citizens. The 1947 total includes a Reconstruction Finance Corporation loan of 75 million dollars for aid in financing the current budget of the Republic.

Estimated expenditures of 18 million dollars for our membership in international organizations consist primarily of our share of the administrative budgets of the United Nations and its affliated specialized organizations. In view of the immense tasks we have entrusted to the international organizations, this is a modest sum. Our contribution to the International Refugee Organization and funds for additional relief are included under proposed legislation.

Expenditures by the State Department are expected to increase in the fiscal year 1948. It is of utmost importance that the Department be equipped with sufficient funds and an adequate staff to make its maximum contribution to international peace. In 1948 there will be an increase of expenditures to carry on the improved Foreign Service program authorized under the Foreign Service Act of 1946. The Budget estimate for the Foreign Service buildings fund provides for the purchase of real property obtained by the Office of the Foreign Liquidation Commissioner in lend-lease and surplus property settlement agreements with other nations. Payment for these properties by the State Department increases miscellaneous receipts of the Treasury by a corresponding amount.

Appropriations.-Appropriations for the fiscal year 1948 total 1,169 million dollars, mainly for the administration and relief of occupied countries and for various State Department programs. Funds for loans by the Export-Import Bank in the fiscal year 1948 will be obtained under its current borrowing authority. Advances to the United Kingdom will be made under the existing authorization.

The appropriations total includes 11 million dollars of anticipated supplementals for the State Department and 76 million dollars for proposed legislation.

## veTERANS' SERVICES AND BENEFITS

The Servicemen's Readjustment Act provides education and training benefits, unemployment and self-employment allowances, and loan guarantees. National service life isnsurance is an additional tangible benefit. For those who suffered diabilities, the best of medical care is provided. Pension rates for disabled veterans and for dependents of veterans were increased by the last Congress. In addition to the veterans' program, our servicemen have been assisted in resuming civilian life by mustering-out payments and terminal-leave payments.

Since the main purpose of our veterans' program is to reestablish former servicemen in civilian life, we must carefully avoid types of assistance which would encourage, or unnecessarily prolong, dependence upon Government subsidy. Any other policy would not only put an intolerable burden upon the taxpayer, but would be a great disservice to veterans themselves.
Although some amendments to veterans' legislation may still be required, no major new programs of assistance appear necessary. The job is now primarily one of effective administration. The Veterans' Administration has made great progress in establishing machinery that will administer this comprebensive program with speed and equity.
veterans' SERVICES AND BENEFITS
General and special accounts

Expenditures.-The readjustment benefits program as a whole will continue in 1948 at its present level, as reductions in unemployment allowances will be offset by increases in education and loan-guarantee expenditures. These estimates assume continuing prosperity and present legislation.
In the fiscal year 1947, almost $1,100,000$ veterans, on the average, are drawing unemployment allowances and more than 200,000 are receiving self-employment allowances, at a time when total unemployment in the United States is less than $2,500,000$. The turn-over on the allowance rolls has been rapid. Almost one-half of the $14,000,000$ discharged from the services have already drawn unemployment or self-employment allowances. In recent months tightened administration and a more positive job-placement program by the employment service have contributed to a reduction in the numbers on the allowance rolls. In the fiscal year 1948 it is expected that about 900,000 veterans on the average will receive nearly one billion dollars in these allowances.

On the average $2,000,000$ veterans are receiving education and training benefits in the fiscal year 1947. In 1948 possibly $2,100,000$ will participate at a cost of over 2.3 billion dollars. We have had to meet an acute situation with respect to educational and housing facilities in universities, colleges, and schools throughout the country. In the fiscal year 1948 the Federal Works Agency will largely complete the conversion of war surplus facilities for educational purposes.

The number of trainees receiving on-the-job training has increased sharply to over 600,000 . To guard against misuse of public funds, the Congress, in its last session, wisely provided limitations on subsistence allowances to veterans whose earnings exceed fixed monthly amounts and also clarified the standards to be used by the States in approving training establishments. Such limitations on subsistence allowances are essential to assure equity for veterans and taxpayers alike.

Amendments liberalizing the loan-guarantee program have brought a sharp increase in the number of loans guaranteed and in the average size of the guarantee. During the fiscal year 1947, new loans will be guaranteed for 750,000 veterans; in 1948, for possibly $1,000,000$. Roughly, 90 percent of these loans are made to finance home purchases by veterans. Expenditures in 1948 will be somewhat higher than in 1947-just over 100 million dollars for payment of the first year's interest on the guaranteed portion of the loan and for losses, which are still relatively small.

Pension payments to disabled veterans and to dependents of veterans rose sharply from 1946 to 1947, as claims arising in World War II were granted. The increase in 1947 expenditures also reflects the 20 percent rise in pension rates approved by the last session of the Congress. Estimated expenditures of 2.5 billion dollars for pensions in 1948 include about 150 million dollars for subsistence allowances to disabled trainees and students. An average of $3,150,000$ individuals will receive pensions and compensation in 1948-50 percent more than in 1946. This program will continue to increase for years to come.

Expenditures for insurance, which are mostly transfers to the national service life insurance trust fund, will decline sharply in 1948 with a corresponding decline in the trust fund accumulations. The total cost to the Government for servicemen's insurance in World War II will approach 3.7 billion dollars by the end of 1948 with small additional costs to come later.

| Net accumulation.. | 2,127 | 1,317 | 335 |

The most extensive hospital and domiciliary construction program in the history of this Nation is now under way. The construction of veterans' hospitals and domiciliary facilities now authorized and recommended for authorization aggregates 1 billion dollars. Such construction, chiefly under the direction of the Corps of Engineers, will continue to increase in the fiscal year 1948. Less than half of the total program, however, will be completed by the end of that year.

In the fiscal year 1948 the operating and general administration expenses for veterans' programs as a whole will be somewhat higher than in the present year, chiefly because of the expansion of hospital facilities and improvement of medical care.

General administrative expenses for programs other than hospital and medical care are estimated in 1948 at about the 1947 level. The number of veterans participating in the readjustment, pension, and
insurance programs will be higher, but the work load will fall as the number of entrants drops off.

The Administrator of Veterans' Affairs is carrying out a decentralization program aimed at attaining more effective administration through more direct contact with veterans in their communities.

Appropriations.--For these veterans' programs, this Budget recommends appropriations of 7,009 million dollars and contract authorizations of 220 million dollars to cover obligations to be incurred in the fiscal year 1948.

SOCIAL WELFARE, HEALTH, AND SECURITY
In spite of the achievements of the past 11 years in promoting the health, welfare, and social security of the American people, much remains to be done. Our present program affords but partial protection against the major causes of insecurity; large segments of the population are excluded from its benefits. We have not yet done enough to secure good health for the Nation.

The Federal Security Agency has recently been given broader jurisdiction over the social-welfare activities of the Government. As previously recommended, 1 favor creating a well integrated, yet flexible, Cabinet department of health, education, and social security to supersede this agency.

I hope that the studies already undertaken by congressional committees will result in the prompt expansion and integration of the present social-security system. There is, for example, serious need to correct inequalities between States in public assistance payments and to extend the scope of Federal aid to include general assistance programs. The temporary increase in Federal grants for public assistance enacted in the last session of Congress will expire December 31, 1947; the Congress should now consider permanent legislation in this field. The estimated expenditures for the fiscal year 1948 include provision for such legislation.

The old-age and survivors insurance system at present leaves out 40 percent of those who earn their living. Even greater numbers are outside the unemployment compensation program. It is unjust to deny these agricultural workers, public employees, and other excluded groups the protection of social insurance. The system should be extended to cover them. At the same time, retirement benefits for the aged should be liberalized to reduce the necessity for piecing out insurance benefits with public-assistance payments.

Recent legislation for hospital construction, for increased activities in mental health, and for expanded maternal and child-health services are substantial achievements toward improving the substandard health level of a large part of the population. But the major problem of financing health care still persists. Therefore, I again urge the Congress to enact a health-insurance program which will make adequate medical care available to everyone and provide protection against the economic hardships of sickness. Such a program should be almost entirely self-financing through pay-roll contributions.

| Total. | 1,113 | 1, 570 | 1,654 | 1,877 |

Expenditures.-A large part of the social-insurance program is financed through trust-account operations which are not included in Budget expenditures. Pay-roll taxes collected by the States to finance unemployment compensation are deposited directly in a Federal trust account. The proceeds of Federal pay-roll taxes to cover old-age and survivors insurance are deducted from the receipts side of the Budget and do not appear as Budget expenditures. For the railroad retirement system, however, the pay-roll tax receipts are included in net Budget receipts and the amounts transferred to the trust account appear in Budget expenditures. Similarly, the Government contribution to the

Federal employees' retirement funds is a transfer included in Budget expenditures.

Trust fund withdrawals by the States to pay unemployment benefits depend not only on the number of unemployed in covered employment, but also on the rate of turn-over. Budget expenditures for unemployment and accident compensation are mainly Federal grants to the States for administrative expenses of unemployment compensation. With high employment, accumulations in the trust fund will continue and administrative expenses will remain low.

Withdrawals from the trust fund for old-age and survivors insurance will continue to increase over a long period. As the program matures,
the number of beneficiaries and the average benefit will gradually rise. A large estimated increase in receipts of this fund in the fiscal year 1948 is based on the assumption that the employment tax will rise from the present 2 percent rate on employers and employees to 5 percent on January 1, 1948, in accordance with present law.
Estimates for Budget expenditures for retirement and dependency insurance reflect the action of the last Congress in broadening the Railroad Retirement Act by adding survivors insurance and liberalizing benefits. Employer and employee tax rates were increased, resulting in larger payments to the trust account. These payments, which vary according to the railroad-pay-roll level, are expected to continue high. The major part of administrative expenses for old-age and survivors insurance is now paid directly from the old-age and survivors insurance trust fund and is therefore not included in Budget expenditures after the fiscal year 1946; this change is responsible for a sharp drop in the Budget item for the Federal Security Agency for retirement and dependency insurance.
Federal payments for assistance to the aged and other special groups are expected to increase in the fiscal year 1948 because of a continuing long-term rise in benefit levels and case loads. A sharp rise in the expenditures in the fiscal year 1947 results from the higher public assistance benefits under temporary legislation and the inclusion of the school-lunch program in this category beginning this year.
Expenditures for promotion of public health are estimated slightly higher than in the current year. Although the total for the fiscal year 1948 includes expanded research and State-aid programs, including the Federal-State hospital program, these additions are largely offset by reductions of 24 million dollars owing to termination of the nurses' training program and of the maternity and infant-care program for families of servicemen.

Appropriations.-For the fiscal year 1948 the Budget includes appropriations of 1,877 million dollars, of which 74 million dollars are for proposed legislation. The recommended appropriation for the Railroad Retirement Board for the fiscal year 1948 exceeds the estimated expenditures to permit transfer to the trust account of taxes and income from 1947 and previous years; this transfer will take effect in the current fiscal year. The recommended appropriation for the hospital construction program is greater than the estimated expenditures because the program is just getting under way.

I have urged the Congress to enact the essential features of the general housing bill which was passed by the Senate last year. The most urgent immediate requirements are for incentives and aids to private lenders and builders to provide lower cost housing, especially rental housing, for assistance to local communities in their programs for urban redevelopment and low-rent housing, and for a permanent agency to supervise the major housing activities of the Federal Government.

Expenditures.-In our housing program we shall continue to rely primarily upon private housing construction. During the past year, with the assistance of many public and private agencies, we have succeeded in securing a rapid expansion in the supply of building materials available for construction of veterans' housing. With the increased materials flow now evident, emphasis in the coming year will be focused on a few key materials, on acceleration of programs for recruitment and training of labor, and on provision of ample financing facilities for builders and prefabricators, as well as veterans and other purchasers. Particular attention will be given to measures to expand construction of rental housing. Many of these operations to aid private housing construction are reflected in expenditures of the Office of Temporary Controls, the Department of Labor, the Veterans' Administration, and the Reconstruction Finance Corporation, as part of programs classified elsewhere.

The programs of the Federal Housing Administration and the Federal Home Loan Bank Administration involve relatively small net expenditures, but are of major importance in stimulating private construction. In the fiscal year 1948 the Federal Housing Administration expects to guarantee loaus on 325,000 homes and apartments, most of them for new construction. During the same period savings and loan associations which are members of the Federal Home Loan Bank System will make an estimated 300,000 loans for financing new homes.

From an expenditure standpoint, the chief aids to private housing in the fiscal year 1948 will be provided by Reconstruction Finance Corporation purchases of mortgages guaranteed by the Veterans' Administration and the Federal Housing Administration. In the fiscal year 1948, purchases of veterans' home loans are expected to account for the great bulk of all mortgages purchased by the Reconstruction Finance Corporation. With the rapid rise in guaranteed loans to veterans (see "Veterans' services and benefits"), the Federal Government has recognized that its responsibility to the veterans can be realized only by assuring private financial institutions the same ready market for these obligations that they already possess for mortgages insured by the Federal Housing Administration. The lending institutions in turn have a responsibility to make sure that their loans will benefit the veterans and will not burden them with impossible future obligations.

Reconstruction Finance Corporation funds have also been employed to make premium payments to increase the supply of critically scarce building materials. In view of the rapid expansion in output and the
decontrol of prices, it appears that these programs can be terminated before the close of the current fiscal year.

The repayment of Home Owners' Loan Corporation loans will taper off in 1948 as its outstanding loans shrink. With its profits in recent years, we can now safely predict that this Corporation-which refinanced the loans of more than a million distressed borrowers during the depression-will liquidate without any loss to the Federal Government.

Expenditures on public housing programs are now concentrated almost entirely on liquidation of war housing activities and provision of emergency housing units for war veterans. Conversion of barracks and other types of temporary war structures-the largest expenditure item in 1947-will be substantially completed in the current year. Under this program an estimated 255,000 units are being provided for veterans and their families-more than half for veterans in educational institutions.

The continued housiig shortage in many industrial areas has made it necessary for the Government to continue operating many temporary war housing units longer than previously expected. More than half of these units are occupied by veterans and servicemen. Expenditures in the fiscal year 1948 for management and disposition of war housing show an apparent increase primarily because receipts from the program are now deposited in miscellaneous receipts, rather than credited against expenditures. Payments of 85 million dollars also are forecast to transfer previous net'receipts from rentals and sales into the general receipts of the Treasury. If allowance is made for these transfers and nonrecurring net receipts of 64 million dollars in 1947 from liquidation of the Defense Homes Corporation, program expenditures for war housing will decline substantially in 1948 from 1947 levels.

Receipts from the low-rent housing program will temporarily exceed expenditures in the current fiscal year because of anticipated repayments of loans by local housing authorities. Annual contributions to local housing authorities required by previous contracts will rise gradually as wartime tenants are replaced by low-income occupants.

Expenditures of the Federal Works Agency for defense public works will be virtually completed in the fiscal year 1948. Disbursements to localities for detailed planning of local public works will be limited to previous commitments under existing legislation.

On the other hand, disbursements on Reconstruction Finance Corporation loans to local agencies for construction of self-liquidating projects will be increased as materials become available to resume urgently needed work. To make sure that funds are adequate for these disbursements, I request that the present 100 -million-dollar limitation on Reconstruction Finance Corporation loans for these purposes be increased to 125 million dollars.

Appropriations.-Of the total of 179 million dollars in appropriations estimated for the fiscal year 1948, an estimated 150 million dollars will be from current rental and disposition receipts of the veterans' re-use and war housing programs. Most of the 1948 expenditures will be made from Corporation funds or from unexpended balances of previous appropriations.

## EDUCATION AND GENERAL RESEARCH

Our generous provision for education under the veterans' program should not obscure the fact that the Federal Government has large responsibilities for the general improvement of educational opportunities throughout the country. Although the expenditure estimates for the coming fiscal year are limited to present programs, I have long been on record for basic legislation under which the Federal Government will supplement the resources of the States to assist them to equalize educational opportunities and achieve satisfactory educational standards.

The relationship of the Federal Government to higher education also demands serious consideration. The veterans' readjustment program, which compelled a rapid emergency expansion of facilities to meet immediate needs, has focused attention on this fundamental problem. A Presidential commission on higher education is studying the matter because of its great importance to the future of the Nation.

Many agencies of the Federal Government carry on research as a part of their regular programs. But we need a central agency to correlate and encourage the research activities of the country. While freedom of inquiry must be preserved, the Federal Government should accept responsibility for fostering the flow of scientific knowledge and developing scientific talent in our youth. To accomplish this, I recommend again that a National Science Foundation or its equivalent be established. The Scientific Research Board appointed in October 1946 is now making a study of the research program of the entire

Federal Government in its relation to all other research activities planned or in progress. Its report will undoubtedly be of service in establishing a proper program for the new agency. It is assumed that no additional expenditures will be required during the fiscal year 1948.

| Program or agency concerned | Expenditures |  |  | $\underset{1948}{\text { Appropriations, }}$ |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { Actual, } \\ 1946 \end{gathered}$ | ${ }_{1947}^{\text {Estimate, }}$ | $\underset{1948}{\text { Estimate, }}$ |  |
| Promotion of education: | \$27 | $\$ 28$4 | $\$ 35$3 | \$35 |
| Office of Education, Federal Security Agency $\qquad$ |  |  |  |  |
| Federal Works Agency........... |  |  |  |  |
| Educational aid to special groups (except veterans): |  |  |  |  |
| Bureau of Indian Affiairs (Interior)... | 11 | 12 | 12 | 12 |
| Other agencies.-----------------1.-- | 2 | 3 | 6 | 6 |
| Library and museum services...........-- | 6 | 8 | 17 | 18 |
| General-purpose research: |  |  |  |  |
| Office of Scientific Research and Development. | 34 | 4 |  |  |
| Commerce Department.............-- | 8 | 11 | 14 | 14 |
|  |  |  | 1 | 1 |
| Total. | 88 | 71 | 88 | 85 |

Expenditures.-Federal expenditures for promotion of education, apart from the veterans' education program, now consist almost entirely of vocational grants to States, support of land-grant colleges, and general administration of the Office of Education. The Federal Works Agency will complete during the fiscal year 1948 its expenditures for the maintenance and operation of schools in war-affected communities. Corresponding expenditures prior to the current fiscal year are classified in "Housing and community facilities."

In August 1946, the Congress increased the authorization for vocational education by 15 million dollars. It is not possible at this time, however, for the State and local governments to make firm commitments on the availability of matching funds for the development of new programs of vocational education or the expansion of existing programs. Therefore, although the estimates of appropriations and expenditures for the fiscal year 1948 include an anticipated supplemental appropriation under this authorization, it may be necessary to increase the amount on the basis of later information from State
and local governments. Money for this purpose has been included in the reserve for contingencies.

Expenditures for educational aid to special groups include funds for education of Indians through the Department of the Interior and smaller amounts for assistance to the blind and the deaf and to Howard University through the Federal Security Agency. The major part of the estimated increase in expenditures is for construction of four buildings at Howard University, for which Congress has already appropriated money for drawing plans. Their construction is made urgent by the pressure of enrollment upon all existing facilities.

The increase in expenditures for library and museum services is due chiefly to the general expansion of activities of the Library of Congress.

Research is inherent in many Federal programs and consequently the bulk of such expenditures is included in the specific programs to which the research relates. The principal items of continuing expenditure for those research programs which serve several purposes or are general in character are in the Bureau of the Census, the Bureau of Standards, and the Coast and Geodetic Survey-all within the Department of Commerce. Some expansion of these activities is contemplated in the estimates for the fiscal year 1948. The Office of Scientific Research and Development, which was devoted to research in support of the war effort, will be almost completely liquidated in the fiscal year 1947.

Appropriations.-The total of appropriations for education and general research is 85 million dollars for the fiscal year 1948-3 million dollars less than the estimated expenditures. This total includes a tentative estimate of the amount which will be required under the new authorization for vocational education.

## AGRICULTURE AND AGRICULTURAL RESOURCES

Because of high consumer incomes in the United States and the continuing world shortage of many foods, the demand for farm products will doubtless remain strong throughout the fiscal year 1948. Agricultural production goals for the 1947 crop year, with a few exceptions, will call for another year of maximum output.

The demand for American farm products, however, cannot be counted upon to continue indefinitely at the present high level. Under present legislation the Department of Agriculture is required to support prices of most agricultural commodities until December 31, 1948.

We must design our agricultural policies to work toward a better balance of supply with demand and so avoid excessive expenditures for price support. We should facilitate the transfer of unnecessary farm labor and resources from agriculture to industrial and other pursuits. We shall need also to devise ways of supporting farm income which will retain export markets for wheat, cotton, and tobacco, and at the same time give the American consumer the benefit of increasing efficiency in farm production.

The authority of the Commodity Credit Corporation expires on June 30, 1947. Since the Corporation now has a State charter, I am recommending that it be rechartered by act of Congress and that its present borrowing authority of 4,750 million dollars be renewed.

Expenditures.-By the fiscal year 1948 the program of the Commodity Credit Corporation will be limited almost entirely to price support for agricultural commodities. Reimbursements from lendlease, United Nations Relief and Rehabilitation Administration, and foreign governments will be largely completed in the next 6 months. Liquidation of inventories is tapering off. For the present, the high level of farm prices has made price-support outlays unnecessary except for a few commodities such as potatoes and eggs.
In 1948, however, even with continued general prosperity, an estimated 330 million dollars will be spent to support agricultural prices. Larger outlays will be required should markets weaken seriously. In addition, loans by commercial banks guaranteed by the Commodity Credit Corporation will probably be substantial. The present borrowing authority, if renewed, will be ample to support agricultural prices during the fiscal year 1948.
Receipts from other corporate transactions in the Department of Agriculture are expected to be lower in 1947 and 1948 than in 1946. In 1946 there were unusually large repayments to the farm credit agencies and large receipts in revolving funds of the Treasury from return of capital of mixed-ownership corporations. In view of the large repayments and refinancing of the loans of the Federal Farm Mortgage Corporation, this Budget recommends that the Corporation's borrowing authority of 2 billion dollars be reduced to an amount
more nearly commensurate with foreseeable needs. This recommendation should be considered when the Farm Credit Administrationsubmits its report on the mortgage-loan programs of the Corporation and the Federal land banks.

The rural rehabilitation and farm tenant programs, formerly under the Farm Security Administration, and the Crop and Feed Loan Division of the Farm Credit Administration have been merged to form the new Farmers' Home Administration. This program shows an apparent increase in 1948, solely because of the changed method of financing required in the Farmers' Home Administration Act of 1946.

The increased estimates for Rural Electrification Administration loans will permit expansion of a program that is urgently needed by farmers but has been held back during the war years.

Commitments for payments to farmers under the Agricultural Adjustment Administration conservation and use program for the 1947 crop year have already been made as provided by the 1947 appropriation act. Expenditures for this program, including administrative expenses, are estimated at 311 million dollars in the fiscal year 1948.

A year ago the Budget Message recommended gradual reduction of these payments, and that recommendation is now renewed. More than 60 percent of the total payments go to about one-eighth of the Nation's farmers. Most of this money thus is being paid to farmers who, because of their strong position in American agriculture, would undoubtedly continue the best farm management practices without the persuasion of a bonus from the Treasury.

We should shift our effort from this kind of subsidy to providing technical guidance to all farmers for soil conservation and management, along the lines of the Soil Conservation Service and the Extension Service. I therefore propose that the appropriation act limit the conservation and use program for the crop year 1948 to 200 million dollars instead of the 300 -million-dollar program to which we are committed for the crop year 1947. This will not affect expenditures materially until the fiscal year 1949.

Expenditures to encourage exportation and domestic consumption of farm products are financed under section 32 of the act of August 24,1935 , by a permanent appropriation equal to 30 percent of customs receipts. In the fiscal year 1946 expenditures for the school-lunch program were financed by this appropriation. These have been transferred to "Social welfare, health, and security" in later years. The remaining expenditures in 1947 and 1948 are for export subsidies,
diversion of surplus commodities to new uses, and purchase and distribution of surplus agricultural commodities to State welfare agencies. Addition of the cotton export subsidy program previously financed by the Commodity Credit Corporation and other increases offset the transfer of the school-lunch program.
Almost all wartime food subsidy programs of the Commodity Credit Corporation and the Reconstruction Finance Corporation have now been discontinued. Subsidy payments from corporate funds in the fiscal year 1948 will be limited to sugar, which is expected to remain in short supply. In addition, payments to sugar growers in the United States under the Sugar Act program will remain at approximately the present level.
Expenditures for agricultural land and water resources, which include the Soil Conservation Service, upstream erosion and flood control, water conservation and utilization, and the submarginal land program, are estimated to increase slightly in 1948.
Expansion of agricultural research under the Research and Marketing Act of 1946 will cost an additional 18 million dollars in the fiscal year 1948. The farm labor supply program will decrease by about 16 million dollars. Other general programs for the development and improvement of agriculture, such as the Extension Service, the scientific research agencies, and the staff agencies of the Department of Agriculture, will remain at about the present level. Thus, the programs in this category as a whole will increase by 3 million dollars.

Appropriations.-To carry out our agricultural programs, I recommend that the Congress appropriate 824 million dollars for the fiscal year 1948. In addition, since not all of the permanent appropriation of section 32 funds will be required to subsidize exportation and domestic consumption of surplus agricultural commodities, the transfer of 100 million dollars to the Agricultural Adjustment Administration program for conservation and use of agricultural land resources is recommended. In 1947, 42.5 million dollars of section 32 funds were so transferred. In view of the probable need for these funds after 1948 for surplus disposal programs, however, we cannot look forward to their continued annual use for the conservation and use program.

The operations of the various agricultural corporations and the agricultural programs of the Reconstruction Finance Corporation will be financed out of corporate funds borrowed from the Treasury. It is estimated that 830 million dollars of notes owed the Treasury by the Commodity Credit Corporation will be canceled in 1948
pursuant to the appraisal of the assets of the Corporation as of June 30, 1946. This cancellation of notes will be an expenditure under general and special accounts and a receipt under corporation accounts, and thus will have no net effect on Budget expenditures or on the appropriations recommended for 1948.

NATURAL RESOURCES
The natural resources program has been increasing to fill some of the gaps arising from wartime deferments and depletions. The estimated expenditures for the fiscal year 1948 represent a further expansion over the current year. They do not contemplate initiation of large new projects.

The harnessing of atomic energy was a war achievement, and it remains of major military significance. With the appointment of the Atomic Energy Commission last fall we have entered on a new phase of development. This Commission has assumed direction of the Manhattan Engineer District project. Our aim is to bring the benefits of atomic research to industry and medicine and to enrich standards of well-being.
In line with the shift in emphasis, the atomic energy program, since December 31, 1946, is classified in "Natural resources." This transfer in the middle of the current fiscal year and the inclusion on a full-year basis in 1948 are major reasons for the increases in expenditures for resource development in both years.

Expenditures.-In order to push forward basic research in development and use of atomic energy, I am recommending a program which will involve expenditures of 444 million dollars in the fiscal year 1948. This compares with total outlays of 385 million dollars in the current fiscal year, of which 179 million dollars are shown in "National defense."

Much of the productive future of this Nation lies in the effective development of our river basins. Under the Bureau of Reclamation and the Corps of Engineers, this work will go forward in 1948 at a somewhat increased expenditure rate. The estimates provide for continuation of projects under way and starting those projects for which 1947 appropriations were made, but which have been temporarily deferred.

The only appropriations now recommended are for projects partly provided for in previous appropriation acts. A substantial portion of the expenditures is for multiple-purpose projects which, in addition to flood control, navigation, and irrigation benefits, will supply needed power for industry and agriculture.

Some expansion of transmission facilities is needed by the Bonne ville Power Administration to market the hydroelectric power generated at certain of the Government's multiple-purpose dams. Receipts of 25 million dollars from the sale of power by this agency and the Southwestern Power Administration will be paid into miscellaneous receipts of the Treasury in the fiscal year 1948.

Expenditures of the Tennessee Valley Authority will increase in the fiscal year 1948 as work progresses on the two large dams provided for in the 1947 appropriations. By the end of 1948 construction of the major dams will be almost complete; thereafter, the principal activity will be directed toward the effective utilization of local resources for industrial and agricultural improvement within the valley. The Tennessee Valley Authority finances its power operations and transmission facilities from its own revenues. The Authority will continue the practice started in the last fiscal year of making payments to the Treasury.

Expenditures by the International Boundary and Water Commission for the United States share of the construction of dams and other water improvements on the Rio Grande, in cooperation with the Mexican Government, will be expanded in 1948, pursuant to the 1944 treaty.

Among the other expenditures by the Department of the Interior for land and water resources in 1948, the major portion is for the use, protection, and improvement of the public lands which it manages. The estimated expenditures for 1948 for grazing activities contemplate restoration of the program to approximately the 1946 level. Appropriations for the fiscal year 1947 were cut to a level that does not permit adequate protection and conservation of these grazing resources. The Department of the Interior is investigating the feasibility of raising grazing fees to cover the operating costs of the Grazing Service and also service charges on the cost of capital improvements.

Because of critical needs for lumber, our forests, both public and private, must be administered to yield the maximum immediate supply without unduly impairing future timber resources. Expenditures for the Forest Service for the fiscal year 1948 provide for increased timbersale administration and forest-fire control. These increases are offset by decreases in other phases of the work.

Our mineral resources have been seriously depleted during the war. Substitutes or new sources of supply must now be found. As part of our military program we are accumulating a strategic stock pile of critical materials from both domestic and foreign sources. To plan
this program successfully and to assure adequate supplies for industrial and consumer use, it is essential that we have full information on our domestic resources. Consequently, the Bureau of Mines and the Geological Survey will make small expansions in their mineral resource programs in 1948.

During the war the national park system has been maintained on virtually a custodial basis only. Increased expenditures are required in 1948 to provide the most needed improvements in roads, parkways, buildings and utilities, and for general administration and protection.

Other resource programs of the Department of the Interior will increase by 7 million dollars in 1948. General surveys and topographical mapping activities by the Geological Survey must be accelerated to provide basic data needed for natural resources programs and industrial development. Expenditures for conservation and development of fish and wildlife resources reflect a small increase in operating costs.

Some progress has been made in the development of Alaska, but only a beginning. Included in several of these programs are expenditures for the investigation and development of the natural resources of this vast area.

Appropriations.-Appropriations of 779 million dollars for resource development in the fiscal year 1948 include an estimated supplemental of 4 million dollars for the Forest Service. The total is substantially below estimated expenditures for that year. Postponement of some of the public works projects for flood control and reclamation in the current year will leave available in 1948 substantial balances from earlier-year appropriations. Similarly, the curtailment of other resource development activities has resulted in some carry-over of appropriations for these programs. A smaller amount from 1948 appropriations will be available to finance expenditures in later years.

In the case of the Atomic Energy Commission, the Budget recommendation includes contract authority in the amount of 250 million dollars in addition to the 250 million dollars of recommended appropriations. The appropriations to discharge obligations under this contract authority will be made in future years when the payments become due.

## TRANSFORTATION AND COMMUNICATION

Six years of deferred maintenance and improvement must be made up before the basic postwar needs of motor and water transportation
are met. The highway system, particularly, has fallen far behind the standards which should prevail under conditions of rapidly growing use. Urban congestion is again becoming a serious problem. Likewise, the enormous expansion of civil aviation since VJ-day has thrown an increasing burden upon inadequate airway and airport facilities. An expanded program is essential if undue hazards in the air are to be avoided and if the development of aviation is to continue without serious technical impediment. At the same time it is hoped to restore prewar service standards in the postal service. The enforcement of regulatory standards, particularly those designed for accident prevention in all types of transport, should be restored, at least to prewar levels.

It is the policy of the Government to withdraw from ship operation as rapidly as possible and to dispose of vessels in a manner that will promote a large and effective merchant fleet under our flag. But, since private operators see little prospect of profit in the coastwise trade and much of the overseas traffic is regarded as temporary, Government operations have continued. The Maritime Commission reconversion program, the lay-up of vessels in the reserve fleet, and the preparation of war-built vessels for sale are under way.

Expenditures.-The Maritime Commission, by its petition before the Interstate Commerce Commission, is attempting to obtain revision of the railroad rate structure in order to permit resumption of domestic shipping under private auspices. We must look to the domestic trade to provide the active core of our merchant fleet reserve, since we cannot hope to maintain in the foreign trade alone a merchant fleet adequate for the Nation's security. Because the long-run needs of foreign trade are not yet clear, the expenditure estimates contemplate only a moderate expansion in operating subsidies. Construction of new vessels is limited to those for which private purchasers are available and those essential to meet specialized needs for which war-built vessels cannot be adapted. I hope that the rate of ship disposition and liquidation of Government operations can be expedited.

Under the War Department are two major functions relating to transportation-the Panama Canal and the rivers and harbors work of the Corps of Engineers. To make up deferred maintenance, to continue at a minimum rate river and harbor construction projects already under way, and to make a slow beginning on projects authorized under the 1947 appropriation it is necessary to expand the expenditures during the fiscal year 1948.
Other aids to navigation are those maintained and operated by the Coast Guard (in the Treasury Department). The large decrease in the fiscal year 1948 reflects the return to a normal program, the completion of previously deferred work during 1947 and early 1948, and some reduction in Coast Guard aviation. In the interest of reducing expenditures, the installation of the Loran system of radio navigation aid will be spread over a number of years.
Most Federal expenditures for highways are concentrated in the Federal-aid program under the Federal Works Agency. This is a matching program in which Federal expenditures depend upon the level of State activity within the authorized annual rate of 500 million dollars established for each of the first three postwar years
by the Federal-Aid Highway Act of 1944. Materials shortages, contracting difficulties, and high costs have delayed this program, but the situation should ease by next year. Sums apportioned to the States, however, are available only for a year after the close of the fiscal year for which they are authorized, and the rate of expenditure has thus far been well below congressional authorizations. States are, therefore, under pressure to obligate these funds at once. As has been urged by many of the States, it is recommended that the Congress extend for one additional year the period during which these funds may be expended. Moderate increases for the Agriculture and Interior Departments are included to begin to overcome the long deferment of work on the forest roads and trails and Indian roads.

The sharp upward trend in expenditures by the Department of Commerce for civil aviation results from the rapid expansion of the industry. Inadequate facilities and services have caused serious congestion and a threat to air safety. The expansion and modernization of the airways system provided in these estimates is essential for the continued progress of the industry and could not be reduced without great risk.

As the rapid growth of aviation continues, I believe it is unwise to place the entire burden of expanding, improving, and maintaining the airways upon the general taxpayer. Instead, civil aviation should bear a reasonable share. The Department of Commerce is considering the feasibility of various methods to recover part of the expenses from the users.

Substantial expenditures for grants-in-aid to airports under the 1946 legislation are anticipated for the first time, increasing from 7 million dollars in the fiscal year 1947 to 50 million dollars in 1948. This will be channeled as far as possible into urgent work designed to relieve bottlenecks in air transport, but the apportionment formula will limit the discretion of the Civil Aeronautics Administration in scheduling first the most needed projects.

Unless legislative action is taken to revise postal rates, the Post Office deficit threatens to be the largest in history. Mail volume has expanded enormously, but current operating costs have increased even more rapidly. This is the chief cause of the deficit. Further temporary additions to expenditures result from the need to take up
deferred maintenance and replace equipment. The Post Office Department is studying its operations with a view to introducing economies. I am instructing the Postmaster General to institute all operating economies consistent with reasonable service and to prepare a comprehensive recommendation for rate revision sufficient to wipe out the deficit.

Appropriations.-Appropriations of 1,196 million dollars are included in the Budget for the fiscal year 1948 for "Transportation and communication," compared with estimated expenditures of 1,530 million dollars. Unobligated balances in Maritime Commission revolving funds are adequate for all expenditures with the exception of an appropriation of 6 million dollars recommended for the maritime training fund and aid to State marine schools. War Department and Federal Works Agency appropriations fall below expenditure estimates because of the deferral to 1948 of work for which appropriations were already made in 1947. The appropriations total includes 50 million dollars for the Civil Aeronautics Administration as an estimate of the appropriation request that will be made for the airport program as soon as the plans of the Agency are sufficiently matured. Contract authorizations of 500 million dollars are included for the Federal-aid postwar highway construction program.

## FINANCE, COMMERCE, AND INDUSTRY

By the end of the current fiscal year, almost all wartime controls of business will have ended. I recommend that the Congress extend the authority for rent control ; price control on sugar and sirups, and rice; sugar rationing; export and import controls; priority and allocation controls on a few commodities still in extremely short supply; and a few other minimum controls which are indispensable for the time being.

Now that we are returning to a peacetime economy that depends for its success on private enterprise, the Government should resume and expand its services to business, including both financial and nonfinancial aids. In addition, free enterprise depends on positive Government action to preserve competition and control monopoliesproper functions that a democratic government must not neglect.

Expenditures.-During the rest of this fiscal year, the Office of Temporary Controls will discontinue as rapidly as possible direct controls over business operations previously administered by the Civilian Production Administration and the Office of Price Administration. Although a few essential controls should be retained a little longer, these, too, will be terminated as soon as conditions permit.

Among the other regulatory agencies, Foreign Funds Control (Treasury) and Solid Fuels Administration (Interior) will also cease operations this year.

The peacetime regulatory agencies, however, must be strengthened from low levels justified during the war by the existence of other direct controls. This Budget, therefore, provides for the necessary increases in such essential agencies as the Federal Trade Commission, the Federal Power Commission, the Antitrust Division (Justice), and the Tariff Commission.

The Antitrust Division will concentrate its efforts on major violations of the antitrust laws. The Federal Trade Commission will increase its effectiveness by operating on an industry-wide basis, rather than through the slower procedure of individual complaints. It will also sponsor a larger number of industry conferences designed to locate and eliminate unfair trade practices through cooperative action.
In the past year, we have made a fine start in building up the business service programs of the Department of Commerce from their low wartime levels. To provide necessary information for business, provision of funds is recommended for a census of manufactures (already authorized by law) and likewise for a census of business to be authorized by proposed legislation. No census has been taken in either area since 1939 and present information is badly out of date. A small but necessary increase in the business service activities of the Bureau of Foreign and Domestic Commerce is also recommended. The Patent Office urgently needs increases in personnel to cope with the growing backlog of patent applications and to handle registrations under recent trade-mark legislation.
The Reconstruction Finance Corporation estimates assume that repayment of outstanding wartime loans to business enterprises will continue in the fiscal year 1948, but at a slower rate. In its peacetime business loan program, the Corporation has been authorizing about 1,000 loans a month, chiefly to small business. Ninety percent of them are in amounts of 100,000 dollars or less. The new program also emphasizes guarantees of private credit rather than direct Government loans. These guarantees will not require disbursements in any large amount unless there should be an economic recession. In this event the Reconstruction Finance Corporation stands ready to purchase the loans offered by participating banks.
Since January 1946, the Reconstruction Finance Corporation has been administering the loan and lease program of the Smaller War Plants Corporation. Disbursements on previously authorized Smaller War Plants Corporation loans are nearly finished and outstanding loans are gradually being repaid. In the fiscal year 1948 the Reconstruction Finance Corporation plans to retire an estimated 100 million dollars in Smaller War Plants Corporation capital stock.
The War Damage Corporation, a Reconstruction Finance Corporation subsidiary, which at its peak had a total of 140 billion dollars of war damage insurance in force, is also terminating its operations. By 1948 it will be in full liquidation. The Reconstruction Finance Corporation has been directed to return to the Treasury the 210 million dollars of net profits from this operation.

The expenditures of 310 million dollars for retirement of Smaller War Plants Corporation capital and return of War Damage Corporation profits will be paid into miscellaneous receipts and thus have no net effect on the total Budget. With these transfer items eliminated, the net increase of expenditures under this function in 1948 is 33 million dollars.

Federal and State bank supervisory authorities are making special efforts to encourage banks and insurance companies to complete repayment of their prewar obligations to the Reconstruction Finance Corporation. By June 30, 1948, the outstanding volume of such loans and investments will be down to 100 million dollars out of a total of about 3.5 billion dollars disbursed since 1932.

With stock market activity and new security issues far above wartime levels, the Securities and Exchange Commission requires additional funds to rebuild its depleted staff and thus provide more adequate protection for the millions of investors.

Appropriations.-To finance the expenditures for these programs, estimated appropriations in the fiscal year 1948 of 116 million dollars include anticipated additional appropriations of 53 million dollars required by proposed extension of the existing authority of the Office of Temporary Controls and the authority of the Department of Commerce to control exports. They also include 14 million dollars for new censuses under proposed new legislation.

## LABOR

The facilities of the Federal Government for dealing with the welfare of labor and with labor-management disputes provide for the encouragement of collective bargaining, administration of laws and regulations to protect the working force, assistance to States in promoting employment opportunities, and gathering of basic labor information.

In my message on the State of the Union, I have asked that the machinery in the Department of Labor for facilitating collective bargaining and expediting the settlement of labor-management disputes be amplified and strengthened. I have included administrative funds for this purpose under proposed legislation.

I recommend also that the Congress authorize grants to States through the Department of Labor for programs fostering safe working conditions. The toll resulting from industrial hazards reduces the productive capacity of the labor force. The new program should be administered by State departments of labor under Federal standards.

Funds for this purpose have likewise been included under proposed legislation.

Expenditures.-The National Labor Relations Board has an accumulation of unresolved cases awaiting action owing to the increased incidence of representation cases and unfair labor practice cases and to the reduced appropriations available for the Board's work this year. Delay in settling such cases is in itself a cause of labor disturbance. Apart from the backlog of unsettled cases, the number of cases brought before the Board for settlement has increased. The program submitted in this Budget is designed to reduce the backlog and keep the Board more nearly current in handling cases. This should diminish the incidence of strike action by labor organizations which is encouraged by tardy handling of cases.

The public employment service system, although now composed of the coordinated employment office facilities of the several States, is still financed in full by the Federal Government. Expenditures for these offices for the fiscal year 1947 are estimated at 90 million dollars. This includes the increased cost of State operation and 11 million dollars of nonrecurring terminal-leave pay for Federal employees upon the return of the employment service to the States. It is my hope that the public employment service system will maintain the high standard of operations and the efficient procedures which have proved essential for facilitating the flow of workers to areas where they are needed.

I propose also increased expenditures for labor information and statistics to facilitate collective bargaining and meet the more important needs of labor, business, Government, and the general public for current data concerning employment, wages, prices, and the like.

Appropriations.-For 1948, I recommend appropriations of 118 million dollars, including the amount for proposed legislation.

## GENERAL GOVERNMENT

The principal types of expenditures in "General government" are for (1) legislative and judicial activities, and executive management and control; (2) the Government payment toward civilian employees' retirement; (3) other services covered by appropriations which relate to more than one function; and (4) a few special programs necessitated by the war, such as disposal of surplus property, which do not logically belong in any other category.

Expenditures for these functions in the fiscal year 1948 are expected to decline only moderately from the comparable total for 1947, because they will still include a substantial amount for war liquidation. Such activities will account for more than one-third of all the expenditures in this category.

Expenditures.-The work load of the Treasury Department remains at a high level. For example, in the Bureau of Internal Revenue tax returns for previous years remain to be audited, pending excess-profitstax cases must be investigated and settled, special efforts are continuing to reduce tax evasion, and the number of tax returns to be reviewed is increasing as war veterans revert to civilian status. Further, with the resumption of foreign trade and passenger travel and the designation of new airfields in the United States and Alaska as ports of entry, the staff requirements of the Bureau of Customs are above the level of 1946.

The Government payment toward the Federal civilian employees' general retirement system will be larger in the fiscal year 1948 than in the current year. About half of the increase reflects the advance in salary rates which took effect July 1, 1946, and was not covered in the appropriation for 1947. The remainder of the increase applies against previous liabilities of the Government to the retirement system.

The surplus property disposal program, under the War Assets Administration, is at its peak during the current fiscal year. Henceforth, it will be tapering off, but disposal will be relatively more difficult as Government stocks of scarce items are reduced and as civilian production increases. The statutory provisions governing the sale of surplus property which give preference to certain groups of purchasers have greatly complicated the disposal program, slowing down sales and augmenting administrative costs to such an extent that Congress might well reconsider these provisions. The expenditures of the War Assets Administration cover only part of the handling of surplus property; many other Federal agencies participate in this
program. The proceeds from sales of surplus property are included in miscellaneous receipts of the Treasury.
The return of war dead from overseas is a civil function of the War Department which is just getting under way. The total cost of this program is estimated at 234 million dollars. Efforts will be made to complete this work in the next 2 years.

Public buildings construction programs of the Federal Works Agency will remain at a low level, but certain expenditures for repair and maintenance of buildings cannot be delayed. Together with expenses for current operation of the buildings, these constitute a sizable portion of "General government" expenditures.

Appropriations.-The appropriation total of 1,341 million dollars for the fiscal year 1948 includes 75 million dollars for anticipated supplemental appropriations. The total is well below the estimated expenditures, mainly because the War Assets Administration will be paying obligations incurred against earlier appropriations.

INTEREST ON THE PUBLIC DEBT
The volume of interest payments on the public debt reflects the magnitude and composition of the debt, as well as the level of interest rates. As long as prosperity permits, our objective should be a steady retirement in the outstanding debt. Interest rates will be kept at present low levels through continued cooperation between the Treasury Department and the Federal Reserve System.

INTEREST ON THE PUBLIC DEBT

The estimated increase of 50 million dollars in interest payments in 1948 over 1947 is due principally to (1) increased interest payments on the larger volume of special issues held by trust funds which pay relatively high rates; (2) increased accruals on savings bonds, owing to
a large volume of bonds reaching higher accrual brackets; and (3) the change from semiannual to annual payment of interest on certificates of indebtedness, effective September 1, 1946. The net effect of these factors has been to increase interest costs in 1948, even though the debt has been declining since its peak on February 28, 1946.

Interest payments are made on the basis of a permanent appropriation. The amount shown under recommended appropriations is equal to the estimated expenditures.

## REFUNDS OF RECEIPTS

Tax refunds will be a large item in the Budget for some years to come, largely because of overpayment of individual income tax under the current payment system and settlement of the wartime incomeand profits-tax liabilities of corporations. The overpayments made each year under the current payment system are in the main refunded during each immediately succeeding year. The refunds to corporations, attributable to wartime tax liabilities, will be spread over the next several years because of the time required to effect final settlement in many cases where the various carry-back and other relief provisions are applicable. If the war excise-tax rates are continued, refunds in 1948 will be 123 million dollars lower.

Civil Public Works
In the Budget, construction projects are listed in the programs which they serve. In total the expenditures for civil public works are estimated at 2.1 billion dollars in 1948 compared with 1.7 billion dollars in 1947. These are discussed in detail in part IV.

Federal public works provide capital assets from which the Nation derives benefits over a long period of time. During the past decade
the responsibility of the Federal Government, both directly and through grants to the States, has increased. Public construction is essential to our veterans, natural resources, transportation, social welfare, and housing.

Construction programs have to be scheduled over a number of years. The work done in any one year is largely controlled by legislation and appropriations in prior years. For these reasons the program for 1948 is larger than that for 1947. While curtailment orders in August 1946 slowed down the program, they could not alter the trends already established by legislation.
The recommendations for the fiscal year 1948 for grant and loan programs allow those programs to continue at rates consistent with the authorizing legislation.
Direct Federal construction of long-term projects will be confined to those for which appropriations have already been made. Short-term projects such as provision of national park facilities, forest roads and trails, and institutional facilities will be limited to those of an urgent character.

The Budget contemplates the construction at a conservative rate of all projects for flood control, navigation, and reclamation for which initial appropriations were made in prior years. It does not provide initial appropriations for any new projects under these three programs. Even so, expenditures will be greater in the fiscal year 1949 than in 1948.

This upward trend in public construction deserves careful consideration by the Congress.

## Federal Civilian Personnel

This Budget reflects the continuing decline in Federal civilian employment. Federal agencies have reduced their civilian personnel to $2,300,000$-including those in the Territories and possessions and in foreign countries-from a wartime peak of $3,770,000$ in June 1945. The Budget estimates contemplate further reductions.

Total civilian personnel of the War and Navy Departments is far below the wartime peak. Personnel, in the emergency war agencies has been cut drastically except in the War Assets Administration, which is at the height of its work.

Three agencies-the Veterans' Administration, the Post Office, and the Treasury-together have almost as many employees as the 1939 total of 900,000 for the whole Federal Government. Personnel
requirements of the Veterans' Administration are large because it must administer a great variety of programs for millions of veterans. The rise in the number of postal employees reflects the growth of the population and the even larger increase of business and industry. Increased employment in the Treasury results mainly from the greater complexity and coverage of the tax system and the wide distribution of public-debt ownership.
Total employment in all the other Government departments and agencies combined is lower than in June 1945 even though certain functions of emergency war agencies have been returned to the peacetime agencies from which they were transferred and other permanent functions have been added.
The personnel reductions were facilitated by the statutory limitations on personnel and provisions for detailed personnel ceiling determinations enacted by the Seventy-ninth Congress. When we began to convert to a peacetime basis and appropriations greatly exceeded expenditures, this legislation served a useful purpose. By the Legislative Reorganization Act the Congress has in effect decided that the extent of Federal activities, and hence personnel, should be determined by the usual appropriations process. The statutory limitations and personnel ceilings constitute a separate and possibly conflicting method of controlling the number of employees. The appropriations process, to my mind, is far preferable to the personnel ceilings and limitations, since these place undue emphasis upon the number of employees and put a premium on contractual arrangements and other measures to get the necessary work done without exceeding numerical limitations.
I therefore recommend the repeal of the statutory limitations on personnel and provisions for personnel ceiling determinations.

## Government Corporations

With the termination of wartime programs, net expenditures of corporations in the fiscal year 1948 will be focused in a few major areas-chiefly purchase of veterans' housing mortgages, loans to finance rural electrification, price-support outlays for farm commodities, and disbursements on Export-Import Bank loans to foreign borrowers. These programs represent, in the main, capital items recoverable over a period of years. As long as high levels of business activity continue, disbursements in all other major areas will be held to low levels and will be partly or wholly offset by receipts.

In the fiscal year 1948 net expenditures from corporation accounts alone will amount to 829 million dollars, compared with net receipts of 175 million dollars in 1947. But if we take into account reduced payments by the Treasury to the corporations and increased repayment of capital funds to the Treasury by the corporations, net withdrawals from the Treasury for these programs will remain almost unchanged, despite the sharp shift in the methods of financing them. This is explained in detail in the summary narrative for part III.

At present certain wholly owned Government corporations have authority to issue obligations whose principal and interest are guaranteed by the Federal Government. During the war the Treasury, because of its tremendous public debt operations, requested the corporations to obtain their funds directly from it rather than issue obligations on the market. I now recommend that the authority of Government corporations to issue guaranteed obligations to the public be repealed and that such agencies be authorized to obtain their funds solely by borrowing from the Secretary of the Treasury.

During the war, the Treasury has been advancing funds to the corporations at an interest rate of 1 percent. This low rate was based in part on the general level of interest rates in the market and in part on the fact that a large proportion of corporation activities-like subsidies and preclusive buying-was non-income-producing.

From now on most corporation programs will be revenue-producing. Accordingly, I recommend that corporations be required to reimburse the Treasury for the full cost to it of money advanced to the corporations. Interest paid on borrowings from the Treasury should be based upon the current average rate on outstanding marketable obligations of the United States-now about 1.8 percent. Dividends should be paid on capital stock, if earned. While these changes in the amount of intragovernmental transactions will not affect the Budget deficit or surplus, they will cause the corporations' records to reflect more nearly the true costs of their operations.

I recommend that the statutory authority of the Reconstruction Finance Corporation be extended beyond the present expiration date of June 30,1947 . Such extension is assumed in the expenditure estimates in this Budget. The new charter to be submitted will provide for the repeal of all powers not required for peacetime activities. It will also provide for a reduction of 2.5 billion dollars in the Corporation's borrowing authority. With the receipts anticipated from liquidation of war activities the reduced authority should prove adequate.

I have already recommended extension of the authority of the U. S. Commercial Company and reduction in the borrowing authority of the Federal Farm Mortgage Corporation.

In this Budget, I am also recommending return of capital to the Treasury by certain mixed-ownership corporations. The Federal land banks will complete retirement of Government-owned capital stock during the fiscal year 1947. In the fiscal year 1948, it appears that they can repay the outstanding paid-in surplus of 37 million dollars. These transactions will return the land banks to the status of cooperative institutions owned by the farmers they serve. In addition, I recommend a further small retirement of the capital stock of the Federal home loan banks.

The Corporation Supplement to the 1947 Budget indicated that the Federal Deposit Insurance Corporation could soon begin to retire its capital stock. The continuing rapid growth in the Corporation's resources and the exceptionally strong position of the insured banks now make it possible to propose a substantial amount of capital redemption in the fiscal year 1948. Accordingly, I recommend that the Congress authorize the Corporation to repay all of the 139 million dollars of capital furnished by the Federal Reserve System. Since the Reserve banks have already replaced these funds from earnings in recent years, the Board of Governors of the Federal Reserve System has proposed that the Congress at the same time authorize the payment to the Treasury of the 139 million dollars. I also recommend that the Congress authorize the Corporation to repay 100 million dollars of the 150 million dollars furnished by the Treasury Department.

By the close of the fiscal year 1948, after these repayments, the Corporation will still have capital surplus and reserves of about 1 billion dollars--the objective set several years ago.

The Board of Governors has made a further recommendation, in which I also concur, that the Congress repeal the existing, largely dormant, authority of the Federal Reserve banks to make direct loans to industry, releasing to the Treasury the funds reserved for this purpose. The gold increment fund now includes 112 million dollars reserved for such loans, and an added 28 million dollars has been advanced to the Federal Reserve banks. These sums will be transferred to miscellaneous receipts.

These transfers from the Federal Deposit Insurance Corporation, the Federal Reserve banks, and the gold increment fund will add a total of 379 million dollars in miscellaneous receipts in the fiscal year 1948.

The Government Corporation Control Act requires that no wholly owned Government corporation not now possessing a Federal charter shall continue after June 30, 1948, unless reincorporated before that time by act of Congress. Of the 16 such corporations in operation when the act was approved, the following six are already in process of liquidation: Defense Homes Corporation, Federal Surplus Commodities Corporation, Inter-American Navigation Corporation, Institute of Inter-American Transportation, Prencinradio, and the U. S. Spruce Production Corporation.

This Budget recommends the liquidation of five other Statechartered corporations: Inter-American Educational Foundation, The RFC Mortgage Company, Rubber Development Corporation, Tennessee Valley Associated Cooperatives, and the Warrior River Terminal Company. The residual functions of the Rubber Development Corporation and the program of The RFC Mortgage Company will be assumed by their parent corporation, the Reconstruction Finance Corporation. The Warrior River Terminal Company will be absorbed by the Inland Waterways Corporation, of which it is now a subsidiary.

This Budget also recommends that three nonfederally chartered corporations be reincorporated by act of Congress: Commodity Credit Corporation, Export-Import Bank of Washington, and the Virgin Islands Company. The act establishing the Commodity Credit Corporation as an agency of the United States expires in June. It, therefore, needs early consideration.

Recommendations on the Panama Railroad Company and the Institute of Inter-American Affairs have necessarily been postponed. The Department of State is reviewing the program of the Institute and a recommendation regarding its future status will be forthcoming soon.

Activities of the Panama Railroad Company have become closely interwoven with those of The Panama Canal in the 42 years since the Government purchased this Company. While its major functions obviously must be continued, a careful reexamination and reappraisal of the respective roles of the Company and The Panama Canal are required. As soon as studies are completed, my recommendations will be transmitted to the Congress.

In addition to examination of the nonfederally chartered corporations, studies are under way, in accordance with the provisions of section 107 of the Government Corporation Control Act, regarding those corporations whose fiscal affairs could be handled more appro-
priately in the same manner as those of regular Federal agencies. These and future studies will be useful, not only in developing recommendations concerning specific corporations, but also in establishing a consistent pattern for use of Government corporations.

While the general role of the Government corporation has been accepted in the laws of this country for more than 30 years, the standards for use of this instrument are not fully developed and will be subject to many refinements. Experience indicates that the corporate form of organization is peculiarly adapted to the administration of governmental programs which are predominantly of a commercial character-those which are revenue producing, are at least potentially self-sustaining, and involve a large number of business-type transactions with the public.

In their business operations such programs require greater flexibility than the customary type of appropriation budget ordinarily permits. As a rule the usefulness of a corporation lies in its ability to deal with the public in the manner employed by private business for similar work. Necessary controls are or can be provided under the Government Corporation Control Act. Further study may well indicate not only that some existing corporations ought to be converted into agencies, but also that some existing agencies might administer their programs more effectively if they had some or all of the attributes of corporations.

## Proposed Legislation

The new legislation and the extension of existing legislation, proposed in this Message, for which funds are required in the fiscal year 1948 are as follows:
I. Proposed New Legislation:

International affairs and finance:

Relief program for foreign countries ................ $250,000,000$
Social welfare, health, and security : Increase in public assistance benefits................... 73,500,000 Antibiotics control.

242, 000
Housing and community facilities: Long-range housing program_.......................... $\quad 14,000,000$
Transportation and communication:
Upward revision in postal rates to meet the Post Office Department's operating deficit_-....-.-- $-352,000,000$
I. Proposed New Legislation-Continued

Estimated ex
Estimated ex-
penditures, 1948Finance, commerce, and industry:Census of businessCensus of mineral industries penditures, 150,000 218, 000 Labor:

Grants to the States for programs fostering safe working conditions
Strengthened machinery for facilitating the settlement of industrial disputes
$1,295,000$
II. Proposed Extensions of Existing Legislation:

National defense:
Interim universal training operation.-................
$10,250,000$
Social welfare, health, and security:
Continued benefits for United States civilians injured by enemy action

138,000
Finance, commerce, and industry:
Extension of rent control, price control on sugar and sirups, and rice, sugar rationing, export and import controls, priority and allocation controls on a few commodities, and a few other minimum controls.

## III. Proposed Extensions of Corporation Authority:

United States Commercial Company:
Extension beyond June 30, 1947.
Commodity Credit Corporation:
Extension beyond June 30, 1947.
Federal Farm Mortgage Corporation:
Reduction of borrowing authority.
Reconstruction Finance Corporation:
Extension beyond June 30, 1947.
Reduction of borrowing authority.
Increase in the present limit on loans to States or local public authorities for construction purposes.

In this Message every effort has been made to present the Federal Budget Program with as much clarity as its complexities permit. All citizens have an interest in the Budget. Both sides of the Budget touch their everyday lives. I consider it my duty to give them full information on what their Government proposes to do.

Harry S. Truman.
Jandary 3, 1947.

## INTRODUCTION TO PART I

Part I of the Budget consists of 7 over-all summary tables and 11 supporting tables. These tables present actual data for fiscal year 1946, revised estimates for fiscal year 1947, and estimates and Presidential recommendations for fiscal year 1948.

Table 1 summarizes budget receipts by source and budget expenditures by function, using the new functional classification which is explained in part IV. Table 2 summarizes general and special account appropriations and other authorizations by function. Table 3 repeats the summary of budget receipts by source and presents a summary of budget expenditures by organization unit. Table 4 summarizes receipts and expenditures of trust accounts, and table 5 indicates the effect of over-all operations of the Federal Government upon the public debt. Table 6 summarizes appropriations and other authorizations by types of account and organization unit. Tables $7-17$, inclusive, supply supporting detail for the preceding tables. Table 18 summarizes receipts from and payments to the public after excluding intergovernmental and noncash transactions.

## Fund Structure

The tables in part I deal with transactions of (1) general and special accounts, (2) Government corporation checking accounts with the Treasurer of the United States, (3) trust accounts, and (4) postal accounts. Receipts of general and special accounts are known as "Budget receipts." Expenditures of general and special accounts (other than debt redemption) and net expenditures of Government corporations from checking accounts with the Treasurer of the United States (other than redemption of obligations in the market) are known as "Budget expenditures."

General and special accounts.-General accounts of the Government are credited with receipts not designated by Congress for specific purposes. Most appropriations and expenditures are made from such moneys. Special accounts, commonly called special funds, are credited with receipts earmarked by Congress for specified purposes. Special accounts are identified in tables 7 and 10 and in part II of the Budget.

Government corporation checking accounts.-Wholly owned Government corporations and credit agencies finance a substantial portion of their cash requirements from revenues from the sale of products and services, collections on loans, collections of interest on loans and investments, and receipts from the sale of collateral security acquired by foreclosure. These receipts finance the normal operations of most of the corporations; additional funds are obtained by borrowing or from capital subscription. Several of the corporations have returned a portion of their capital and surplus funds to the Treasury. In some cases, these repayments are held in revolving funds available for re-subscription.

The tables and parts of tables in part I which are labeled "Checking accounts of wholly owned Government corporations and credit agencies with the U.S. Treasurer, net" show only net expenditures (i. e., the difference between gross receipts and gross expenditures). Moreover, they are limited to transactions handled through checking accounts maintained with the Treasurer of the United States as banker or fiscal agent. Some of the corporations and credit agencies maintain checking accounts
with commercial banks. The latter transactions are not reflected m the accounts of the Treasurer; consequently, they are not included in part I of the Budget. However, such transactions are relatively small in amount.

Some Government corporations and credit agencies are financed in whole or in part from appropriations. These receipts and expenditures are included in the transactions of general and special accounts.

Business-type budget programs for all wholly owned Goverument corporations, including complete information regarding their income and expenses and their financial condition, appear in part III of the Budget.

Trust accounts.--In general, trust accounts relate to moneys received by the Government for the special benefit of individuals or classes of individuals and moneys transferred from general and special accounts. Such moneys are held in trust for beneficiaries, and hence are not available for general expenditure. Net accumulations in trust funds are, for the most part, invested in obligations of the United States Government.

Postal accounts.-Postal accounts finance the operation of the postal system. They are credited with receipts from postal operations and with moneys appropriated from general and special accounts to meet postal deficits.

Appropriations from postal accounts are summarized in part I of the Budget and itemized in part II. Postal revenues and obligations are shown in part II. However, the Budget does not contain a statement showing the receipts and expenditures of postal accounts because such transactions do not pass through the hands of the Treasurer of the United States, but are handled through commercial banks. If, in any year, there is a postal surplus, the net receipts of postal accounts are included in the receipts of general and special accounts. If, on the other hand, there is a postal deficiency, the net expenditures of postal accounts are included in the expenditures of general and special accounts. If the postal service were to "break even," with neither surplus nor deficit, the Budget would show no receipts or expenditures for the postal service.

## Receipts and Expenditures

Receipts.-The receipts for fiscal year 1946 which are shown in part I of the Budget are those which have been deposited with the Treasurer of the United States. Repayments to appropriation accounts are treated as credits to expenditures, rather than as receipts. Receipts from taxes for fiscal years 1947 and 1948 are estimated by the Treasury Department; a discussion of these estimates is presented in part IV. Miscellaneous receipts are estimated by the various collecting agencies, subject to review by the Bureau of the Budget.

Receipts of Government corporation checking accounts maintained with the Treasurer of the United States are treated as deductions from expenditures, and are not reported separately; consequently, only net expenditures from such accounts can be shown in part I. The treatment of postal receipts has been explained above.

Expenditures.-Estimates of expenditures for fiscal years 1947 and 1948 , shown in part I, are prepared by the various departments and agencies, and reviewed by the Bureau of the Budget. Actual expenditures for fiscal year 1946 from general and special accounts and some trust accounts as shown in the Budget tables represent
the amount of checks issued, but the total figure for each expenditure table is adjusted to show the amount of checks paid by the Treasurer of the United States, less repayments credited to appropriation accounts. Expenditures of some trust accounts are shown on a checks-paid basis, and therefore need no adjustment.
Expenditures of general and special accounts, net expenditures from checking accounts of Government corporations and credit agencies with the Treasurer of the United States, and trust account expenditures are summarized in part I. The treatment of postal expenditures has been explained above.

## Appropriations and Other Authorizations

Appropriations.-Appropriations authorize the employment of personnel, the purchase of supplies and equipment, the awarding of contracts, and the withdrawal of funds from the Treasury for these and other specified purposes. They are of two general types, annual and permanent. An annual appropriation is one which is made by current action of Congress, usually once a year. A permanent appropriation is automatically renewed each year, pursuant to prior legislative enactment, without new action by Congress.

Appropriations may be either definite or indefinite in amount. A definite appropriation is one the amount of which is stated in the appropriation act as a specific sum of money. An indefinite appropriation is one the amount of which is not stated in the appropriation act as a specific sum of money, but is determinable at some future date; e. g., an appropriation based on certain financial requirements such as the interest on the public debt. Most special account and trust account appropriations are in the permanent-indefinite category. Indefinite appropriations for fiscal year 1947 are estimated, since the amounts involved cannot be definitely determined until after the close of the fiscal year on June 30, 1947.
Appropriations may be available for obligation for a definite or indefinite period of time. Most appropriations are only available for obligation during a single fiscal year, but some appropriations are available for obligation for a longer period of years. Appropriations for construction are generally available for incurring obligations for an indefinite period of time until the project covered by the appropriation is completed or terminated.
Appropriations from postal accounts are summarized in table 6 which is supported by detailed estimates in part II of the Budget.
There is generally a difference-sometimes a great difference-between the amounts of appropriations and expenditures of general and special accounts for any one fiscal year, due to the time lag between the enactment of an appropriation, the incurring of obligations thereunder, and the subsequent expenditures. Appropriations for a given year are based upon the estimated amount of obligations to be incurred in that year, some of which will be liquidated during subsequent years, whereas expenditures indicate the amount of cash actually disbursed during the fiscal period. Some of the 1948 expenditures, for example, will be used to pay off obligations incurred in 1948, but other 1948 expenditures will liquidate obligations carried forward from fiscal years 1946 and 1947 or even earlier years, particularly when contract authorizations have been employed for long-range procurement or construction programs. On the other hand, some of the obligations incurred in fiscal year 1948 will not result in cash expenditures until fiscal year 1949 or 1950 or some succeeding year.
Reappropriations.-Reappropriations of unobligated balances of appropriations continue the availability of unused
balances of appropriations which would otherwise expire. Prior to the war, reappropriations were relatively small in amount. During the war, large reappropriations were enacted principally for the War Department and the defense aid (lend-lease) program. Further use of reappropriations is forbidden by the Legislative Reorganization Act of 1946, except for public works on which work has commenced. Information regarding reappropriations is shown in table 11.

Contract authorizations.-A contract authorization is a statutory authorization by Congress-generally in an appropriation act-empowering the designated agency to enter into contracts and incur obligations for a stated purpose prior to enactment of an appropriation. A contract authorization, however, does not authorize the payment of the bills arising from the obligations mcurred. In order to pay these bills, an appropriation to liquidate the contract authorizations must first be enacted by Congress. Such appropriations to liquidate contract authorizations are included under general and special account appropriations.

Contract authorizations for the naval expansion program are based on tonnage and are indefinite in amount. The financial significance of the indefinite contract authorizations included in this section must therefore be estimated. As the program progresses and unit costs change, the estimates are revised accordingly.

The use of contract authorizations is expanded in the 1948 Budget because of the requirements of the Legislative Reorganization Act of 1946. The appropriations in the Budget are mainly to cover obligations to be paid during fiscal year 1948. The areas which lend themselves most readily to the use of contract authorizations are long-range procurement programs, activities requiring advance planning, and activities requiring years to complete. Thus contract authorizations become another control in these activities. They permit long-range planning and procurement, and the annual appropriations thereunder permit annual review by the President and Congress and some flexibility in the timing of work to be done.

Limitations on Government corporation expenses.-Congress has placed limitations upon the amount which certain Government corporations may use from their own funds for administrative expenses and for advances to Farmers' Home Administration and Rural Electrification Administration. Such limitations are summarized in table 6 and itemized in table 15.

Authorizations treated as public debt transactions.- Congress has authorized the Treasury to provide the new funds for the International Monetary Fund, the International Bank for Reconstruction and Development, and the Export-Import Bank by the issuance of Government securities. Such authorizations appear in table 6. The portion of the United States subscription to the International Monetary Fund financed from the Exchange Stabilization Fund established under the Gold Reserve Act of 1934 is excluded from the table, but the proposed line of credit to be extended to the United Kingdom is included.

Rescissions of appropriations and contract authoriza-tions.-Congress has directed the President through the Bureau of the Budget to maintain a continuous study of appropriations and contract authorizations made for national defense and war purposes and to recommend the rescission of such funds no longer required for the purposes for which they were granted. No rescissions have been recommended as yet for 1947. Such recommendations will be transmitted to Congress in January as requested by Congress.

## Table 1

## SUMMARY OF BUDGET RECEIPTS AND EXPENDITURES

## BY FUNCTION

Based on existing and proposed legislation
[For the fiscal years 1946, 1947, and 1948]

| Description | Actual, 1946 | Estimate, 1947 | Estimate, 1948 |

${ }^{1}$ Net appropriation to Federal old-age and survivors insurance trust fund is excluded from employment taxes, but included as trust account receipt.
${ }^{2}$ Represents payments to the International Monetary Fund.

To judge the effect of the Federal finances on inflation, and for other related purposes, it is desirable to compare the collection of cash from the public by the Federal Government with cash payments to the public. The table on "Receipts from and payments to the public" indicates the actual flow of money between the Federal Government and the public. The public is defined to include individuals, private corporations, State, local, and foreign governments, and international organizations. To show actual receipts from and payments to the public, transactions of the general and special accounts, corporations, trust accounts, and exchange stabilization fund must be consolidated and noncash transactions must be excluded. The consolidation eliminates transactions be-
tween and among Government accounts. These transactions affect receipts and expenditures in the same amount and thus do not affect the Treasury cash balance or the public debt. Noncash expenditures include such items as interest due on savings bonds held by the public which will not be paid until the bonds are redeemed; subscriptions to the International Monetary Fund in the form of non-interest-bearing notes, which will later be exchanged for cash; and terminal-leave pay in interest-bearing bonds, which will be redeemed in cash at a later date.

In the fiscal year 1947, although there will be a budget deficit, all Federal accounts consolidated are expected to take in about 3.9 billion dollars more cash than is paid out. In the fiscal year 1948, the excess of cash receipts over
payments will amount to about 3.2 billion dollars. This figure, however, reflects the increase in employment taxes from 2 to 5 percent scheduled under present law to become effective on January 1, 1948. This change in tax rates will increase anticipated receipts during the fiscal year 1948 by about 600 million dollars. Further, the figures reflect no allowance for payment of dividends out of the National Service Life Insurance trust fund. If employment tax rates are not increased, and to the extent that dividends are paid during the fiscal year 1948, the excess of cash receipts will be correspondingly reduced. A recession, which would reduce tax revenues and would require increased payments from the unemployment compensation trust fund, for veterans' readjustment benefits, and for certain other purposes, would also adversely affect the balance between cash receipts and payments.

No estimate of redemption by the International Monetary Fund of non-interest-bearing notes is included in cash payments, since no estimate is available.

Receipts from the public are shown under the accounts to which the collections from the public are deposited except in one case, namely, the net appropriations from the general and special account receipts to the Federal old-age and survivors insurance trust fund are treated as trust account receipts and therefore are excluded from
"Employment taxes." Payments to the public are shown in this presentation under the accounts from which the disbursements to the public are made. Hence, payments to the public from the general and special, corporation, and trust accounts cannot properly be compared with the sum of receipts from the public for the same accounts because of the elimination of transfers between these accounts. For example, part of the amounts transferred from general and special accounts to trust accounts is held in trust for payment to the public in future years and part is paid out to the public currently but shown in the table under trust account payments instead of under general and special and corporation account payments. Continued operations of insurance, retirement, and other trust funds on a reserve basis require that receipts from the public appropriated and transferred to such funds exceed payments from the funds to the public for some years to come.

Since Government corporations are treated as an integral part of the Federal Government, sales and redemptions of corporation obligations on the market are combined with other Federal debt transactions to arrive at net borrowing from or repayment of debt to the public.

A supporting schedule, showing detailed adjustments made to the Budget figures in preparing this table, will be furnished on request by the Bureau of the Budget.

## INTRODUCTION TO PART II

Part II consists of the official estimates of appropriation recommended by the President in the form of proposed language of appropriations, together with supporting schedules. The detailed schedules for each appropriation title give data on a comparative bāsis for fiscal years 1946 and 1947 in addition to information for the fiscal year 1948 . In order to make the data for 1947 more nearly comparable to 1948 , the appropriate sums which it is estimated will be required as supplemental appropriations for 1947 are included in those instances where the need for additional funds is definitely known and the amounts can be determined with reasonable accuracy. The great majority of these supplementals are due to legislation, such as the Federal Employees Pay Act of 1946 for which no provision was made in the regular appropriations for 1947.

Excluded from part II are supplemental appropriations probably required where the amount cannot be estimated accurately at this time, and appropriations to carry out new legislation or extension
of existing legislation which will otherwise expire. (One-line tentative estimates for such items generally appear in table 6 of pt. I.)

The contents of part II are arranged in chapters, each one usually covering an executive department or a major agency. The Executive Office of the President and various independent establishments are placed within a single chapter. Estimates of the Legislative and Judicial branches are also in separate chapters.

Each chapter begins with a summary table which compares the amounts of appropriations and contract authorizations estimated for 1948 with the 1947 figures, including certain estimated supplemental appropriations as explained above. This table is followed by an explanatory statement, describing briefly the functions and programs provided for in the budget estimates. The remaining portion of each chapter consists of the proposed appropriation language and supporting schedules. They are explained in the following illustration:

## EXPLANATORY ILLUSTRATION OF ESTIMATES AND SCHEDULES IN PART II

Obligations for personal serviees cover (a) mployment in "permanent" positions, broken down as to "departmental" (central office) down "field," by Cluil Service central office the higher grades by titie, (b) elmployment in temporary positions and special categories, in temporary positions and special categories, thue, night work, ete.
n according to a uniform object broken down according to a uniform object classi-

Adjusting entries show sources of obligational authority other than appropriations, tional authority other than appropriations,
the use of such authorlty for transfers, etc., the use of such authorlty for transfers, etc., and the balances unused.

The project schedule shows obllgations classified by projects, activities, or organization units.

Grand total obligations represent financial Tiabilities incurred fol' contracts awarded;
personal services rendered, ete., whether or personal services rendered, ete., whether or
not actually paid or to be paid within the fiscal year.
"Excess of obligations over appropriation" represents the latest available estimate of additional appropriations required for 1947, provided for in the original appropriations:

${ }^{1}$ These estimates do not reflect the full effect of the Legislative Reorganization Act of 1946.

## EXPLANATORY STATEMENT

The estimates for the legislative branch provide for the salaries and expenses of the Members and staffs of the Senate and the House of Representatives, and for the operation and maintenance of the Capitol, the Senate and the House Office Buildings, the Botanic Garden, the Library of Congress, and the Government Printing Office. The 1948 estimates for the legislative branch reflect a net increase of approximately 12 percent over total estimates for 1947.
The estimates for the United States Senate provide salaries for 96 Members and the regular employees and for travel and contingent expenses of the Senators. The 1948 estimates indicate a net decrease of approximately 9 percent under estimates for 1947. However, neither the present estimates for 1947 nor the estimates for 1948 reflect fully the eventual effects of the Legislative Reorganization Act of 1946.
The estimates for the House of Representatives provide salaries and expenses for 435 Members, Territorial Delegates, and the regular employees. While the 1948 estimates indicate a net decrease of approximately 12 percent under present estimates for 1947, neither year reflects fully the effects of the Legislative Reorganization Act of 1946.

The Architect of the Capitol is responsible for the operation and maintenance of the Capitol, the Senate and House Office Buildings, and the Library of Congress. The net increase of approximately 87 percent in these estimates is accounted for largely in the following items: Capitol Building and repairs, improving the Capitol grounds, maintenance of the House Office Building, and the Library buildings and grounds.

The Botanic Garden, which is also under the jurisdiction of the Architect of the Capitol, shows a 2 percent increase in its estimates due to salary advancements.

The Library of Congress provides library and reference service not only to Members of Congress but for the entire Federal Government and for many thousands of private citizens. The 1948 estimates for the Library of Congress are approximately 70 percent larger than the 1947 estimates. These increases are due largely to proposed increases in staff, salary advancements, and expansion of various services.

The Government Printing Office is the printer for the entire Federal Government. Costs of printing included in this estimate are for the legislative branch only. The amount included in the 1948 estimates shows a 4 percent increase over the 1947 appropriations.

## ESTIMATES OF APPROPRIATION

## SENATE

## salaries and mileagi of senators

## Salaries of Senators-

For compensation of Senators, $\$ 1,200,000$. (Act of July 1, 1946, Public Law 479; Act of Aug. 2, 1946, Public Law 601.)

## Appropriated 1947, \$960,000

Estimate 1948, \$1,200,000

## Mileage of President of Senate and of Senators- <br> For mileage of the President of the Senate and of Senators, $\$ 51,000$. (Act of July 1, 1946, Public Law 479.)

Appropriated 1947, \$51,000
Estimate 1948, \$51,000

## Expenses of Senators-

For expenses of Senators, $\$ 240,000$. (Act of July 1, 1946, Public Law 479; Act of Aug. 2, 1946, Public Law 601.)
Appropriated 1947, \$360,000
Estimate 1948, \$240,000

Total, salaries, mileage, and expenses of Senators:
Appropriated 1947, \$1,371,000
Estimate 1948, \$1,491,000

Salaries, Officers and Employees, Senate-
For compensation of officers, clerks, messengers, and others:

## office of the vice president

For compensation of the Vice President of the United States, $\$ 20,000$. (Act of July 1, 1946, Public Law 479; Act of Aug. 2, 1946, Public Law 601.)
Appropriated 1947, \$15,000
Estimate 1948, \$20,000
Salaries: For clerical assistance to the Vice President, at rates of compensation to be fixed by him, $\$ 15,420$. (Act of July 1, 1946, Public Law 479.)
Appropriated 1947, $\$ 15,420$
Estimate 1948, \$15,420
CHAPLAIN
Chaplain of the Senate, $\$ 2,520$. (Act of July 1, 1946, Public Law 479 .)
Appropriated 1947, \$1,680
Estimate 1948, \$2,520

## OFFICE OF THE SECRETARY

Salaries: Secretary of the Senate, including compensation as disbursing officer of salaries of Senators and of contingent fund of the Senate, $\$ 12,000$; Chief Clerk, who shall perform the duties of reading clerk, $\$ 5,500$ and $\$ 2,000$ additional so long as the position is held by the present incumbent; financial clerk, $\$ 5,000$ and $\$ 2,000$ additional so long as the position is held by the present incumbent; assistant financial clerk, $\$ 4,500$; Parliamentarian, $\$ 6,500$ and $\$ 1,500$ additional so long as the position is held by the present incumbent; Journal clerk, $\$ 6,000$ and $\$ 1,000$ additional so long as the position is held by the present incumbent; principal clerk, $\$ 4,000$ and $\$ 500$ additional so long as the position is held by the present incumbent; legislative clerk, $\$ 5,500$ and $\$ 1,500$ additional so long as the position is held by the present incumbent; enrolling clerk, $\$ 4,000$ and $\$ 500$ additional so long as the position is held by the present incumbent; printing clerk, $\$ 3,540$ and $\$ 960$ additional so long as the position is held by the present incumbent; chief bookkeeper, $\$ 3,600$ and $\$ 600$ additional so long as the position is held by the present incumbent; librarian, $\$ 3,600$; executive clerk, $\$ 3,180$ and $\$ 920$ additional so long as the position is held by the present incumbent; first assistant librarian, $\$ 3,120$; keeper of stationery, $\$ 3,320$; clerks-one at $\$ 3,900$, one at $\$ 3,600$ and $\$ 500$ additional so long as the position is held by the present incumbent, one at $\$ 3,380$, one at $\$ 4,000$, two at $\$ 3,180$ each, one at $\$ 2,880$ and $\$ 540$ additional so long as the position is held by the present incumbent, one at $\$ 2,880$, one at $\$ 2,760$, two at $\$ 2,640$ each, clerk in disbursing office, $\$ 2,400$, one at $\$ 2,400$ and $\$ 300$ additional so long as the position is held by the present incumbent, four at $\$ 2,400$ each, one at $\$ 2,700$, three at $\$ 1,860$ each, three at $\$ 1,740$ each; additional clerical assistance and readjustment of salaries in the disbursing office, $\$ 4,020$; two assistants in library at $\$ 1,800$ each; two special officers at $\$ 2,460$ each; assistants at the press door-one at $\$ 2,400$, one at $\$ 2,000$; messenger, $\$ 1,320$;
laborers-one at $\$ 2,040$, one at $\$ 1,680$, five at $\$ 1,500$ each, two at $\$ 1,440$ each, one in Secretary's office, $\$ 1,740$, one $\$ 1,620$, one $\$ 1,320$; in all, \$186,160. (Act of July 1, 1946, Public Law 479; Act of July 28, 1946, Public Law 521.)
Appropriated 1947, \$182,160
Estimate 1948, \$186,160

## DOCUMENT ROOM

Salaries: Superintendent, $\$ 3,960$ and $\$ 1,540$ additional so long as the position is held by the present incumbent; first assistant, $\$ 2,640$; second assistant, $\$ 2,040$; four assistants, at $\$ 2,040$ each; skilled laborer, $\$ 1,440$; in all, $\$ 19,780$. (Act of July 1, 1946, Public Law 479; Act of July 23, 1946, Public Law 521.)
Appropriated 1947, \$19,780
Estimate 1948, \$19,780

## ADMINISTRATIVE ASSISTANTS TO SENATORS

For compensation of an administrative assistant to each Senator, to be appointea by him, at a base salary of not to exceed $\$ 8,000$ per year, to assist him in carrying out his departmental business and other duties, fiscal year 1948, $\$ 768,000$. (Act of Aug. 8, 1946, Public Law 663.)
Appropriated 1947, \$384,000
Estimate 1948, \$768,000

## COMMITTEE EMPLOYEES

Clerks and messengers to the following committees: Agriculture and Forestry-clerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,580$; assistant clerk, $\$ 2,400$; assistant clerk, $\$ 2,220$; additional clerk, $\$ 1,800$. Appropriations-clerk, $\$ 7,000$, and $\$ 1,000$ additional so long as the position is held by the present incumbent; assistant clerk, $\$ 5,000$ and $\$ 1,500$ additional so long as the position is held by the present incumbent; assistant clerk, $\$ 4,800$; assistant clerk, $\$ 3,600$ for the office of the ranking minority member of the Committee on Appropriations, to be appointed by him; three assistant clerks at $\$ 3,000$ each; two assistant clerks at $\$ 2,220$ each; messenger, \$1,800. To Audit and Control the Contingent Expenses of the Senate-clerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,400$; assistant clerk, $\$ 2,220$; additional clerk, $\$ 1,800$. Banking and Currency-clerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,400$; assistant clerk, $\$ 2,220$; additional clerical assistance at rates of compensation to be fixed by the chairman of said committee, $\$ 6,000$. Civil Service-clerk, $\$ 3,900$; assistant clerk, $\$ 3,180$; assistant clerk, $\$ 2,400$; assistant clerk, $\$ 2,220$; additional clerk, $\$ 1,800$. Claims-clerk, $\$ 3,900$; assistant clerk, $\$ 3,600$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,580$; two assistant clerks at $\$ 2,220$ each. Commerce-clerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,580$; assistant clerk, $\$ 2,400$; two assistant clerks at $\$ 2,220$ each. Conference Majority of the Senate-clerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; two assistant clerks at $\$ 2,580$ each; assistant clerk, $\$ 2,220$; additional clerical assistance at rates of compensation to be fixed by the chairman of said committee, $\$ 15,000$. Conference Minority of the Senate-clerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; two assistant clerks at $\$ 2,580$ each; assistant clerk, $\$ 2,220$; additional clerical assistance at rates of compensation to be fixed by the chairman of said committee, $\$ 15,000$. District of Columbia-clerk, $\$ 3,900$; two assistant clerks at $\$ 2,880$ each; assistant clerk, $\$ 2,220$; two additional clerks at $\$ 1,800$ each; additional clerical assistance at rates of compensation to be fixed by the chairman of said committee, $\$ 6,000$. Education and Laborclerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,580$; assistant clerk, $\$ 2,220$; two additional clerks at $\$ 1,800$ each. Enrolled Bills-clerk, $\$ 3,900$; assistant clerk, $\$ 2,400$; assistant clerk, $\$ 2,220$; assistant clerk, $\$ 1,800$; additional clerk, $\$ 1,800$. Expenditures in the Executive Departments-clerk, $\$ 3,900$; assistant clerk, $\$ 3,600$; assistant clerk, $\$ 2,580$; assistant clerk, $\$ 2,220$; two additional clerks at $\$ 1,800$ each. Finance-clerk, $\$ 4,200$ and $\$ 500$ additional so long as the position is held by the present incumbent; special assistant to the committee, $\$ 3,600$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,700$; assistant clerk, $\$ 2,400$; two assistant clerks at $\$ 2,220$ each; two experts (one for the majority and one for the minority) at $\$ 3,600$ each; messenger, $\$ 1,800$. Foreign Relations-clerk, $\$ 3,900$; assistant clerk, $\$ 3,600$; assistant clerk, $\$ 3,000$; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,580$; assistant clerk, $\$ 2,220$; additional clerk, $\$ 1,800$; messenger, $\$ 1,800$. Immigration-clerk, $\$ 3,900$; assistant clerk, $\$ 2,580$; assistant clerk, $\$ 2,400$; assistant clerk, $\$ 2,220$; two additional clerks at $\$ 1,800$ each. Indian Affairs -clerk, $\$ 3,900$; assistant clerk, $\$ 3,600$ and $\$ 1,400$ additional so long as the position is held by the present incumbent; assistant clerk, $\$ 2,880$; assistant clerk, $\$ 2,400$; assistant clerk, $\$ 2,220$; additional clerk, $\$ 1,800$. Interoceanic Canals-clerk, $\$ 3,900$; assistant
clerk, $\$ 2,580$; assistant clerk, $\$ 2,220$; assistant clerk, $\$ 2,040$; additional clerk, $\$ 1,800$. Interstate Commerce-clerk, $\$ 3,900$; assistant clerk, $\$ 3,600$; assistant clerk, $\$ 2,880$; two assistant clerks at $\$ 2,580$ each; assistant clerk, $\$ 2,220$. Irrigation and Reclamationclerk, $\$ 3,900$; assistant clerk, $\$ 2,580$; assistant clerk, $\$ 2,220$; two additional clerks at $\$ 1,800$ each. Judiciary-clerk, $\$ 3,900$; assistant clerk, $\$ 2,880$; two assistant clerks at $\$ 2,580$ each; assistant clerk, $\$ 2,220$; assistant clerk, $\$ 1,800$. The appropriations under the control of the Architect of the Capitol may be expended without reference to section 4 of the Act approved June 17, 1910 (41 U. S. C. 7), concerning purchases for executive departments.

## ARCHITECT OF THE CAPITOL-Continued <br> Capitol Buildings and Grounds-Continued

The Government Printing Office and the Washington City Post Office shall reimburse the Capitol Power Plant for heat, light, and power whenever any such service is furnished during the fiscal year [1947] 1948, and the amounts so reimbursed shall be covered into the Treasury.
[Hereafter, the Architect of the Capitol in expending appropriations under his control may acquire supplies, materials, equipment, furniture, and other items from Government agencies disposing of such property under the Surplus Property Act of 1944, as amended, and shall be accorded the same priority as granted other Government agencies under that Act.] (Act of July 1, 1946, Public Law 479.)

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the fiscal year [1947] 1948 any executive department or independent establishment of the Government ordering printing and binding or blank paper and supplies from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shal not be subject to audit or certification in advance of payment: Provided, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do; all sums received from sales of wastepaper, other waste material, and condemned property; and for losses or damage to Government property; shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office and be subject to requisition by the Public Printer.

No part of any money appropriated in this Act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in the executive branch of the public service of the United States unless such detail be authorized by law.

Hereafter the Secretary of the Senate is authorized to make requisition upon the Public Printer for the binding for the Senate Library of such books as he may deem necessary at a cost not to exceed $\$ 600$ a year. (Act of July 1, 1946, Public Law 479.)

Appropriated 1947, \$1,063,500
Estimate 1948, \$1,273,393
Revised 1947, \$1,083,393

Sec. 102. Purchases may be made from the foregoing appropriations under the "Government Printing Office", as provided for in the Printing Act approved January 12, 1895, and without reference to section 4 of the Act approved June 17, 1910 ( 41 U. S. C. 7), concerning purchases for executive departments.

SEC. 103. In order to keep the expenditures for printing and binding for the fiscal year [1947] 1948 within or under the appropriations for such fiscal year, the heads of the various executive departments and independent establishments are authorized to discontinue the printing of annual or special reports under their respective jurisdictions: Provided, That where the printing of such reports is discontinued the original copy thereof shall be kept on file in the offices of the heads of the respective departments or independent establishments for public inspection.

Sec. 104. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

Sec. 105. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto; and the authority for any position specifically established by such Act which is not specifically appropriated for herein shall cease to exist.

SEc. 106. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: Provided, That the Capitol Police Board is hereby authorized ta detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

Sec. 107. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (Act of July 1, 1946, Public Law 479.)

## THE JUDICIARY

## Comparative Summary of Appropriations and Appropriation Estimates

| [Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due to circumstances virtually be yond administrative control. ## EXPLANATORY STATEMENT

## GENERAL STATEMENT

Appropriations for The Judiciary provide funds for operation of all Federal courts, including the payment of salaries of justices, judges, officers, and employees, and miscellaneous expenses. In addition, provision is made for the activities of such judicial officers and employees as United States commissioners, conciliation commissioners, and probation officers, and for the Administrative Office of the United States Courts.

Estimates for the fiscal year 1948 reflect additional sums which will be required for an anticipated increase in criminal prosecutions during that year.

In accordance with law, estimates for The Judiciary are included in the Budget without revision, in the amounts approved by the Conference of Senior Circuit Judges, except that estimates for the Supreme Court and the three lower courts having special jurisdiction in claims, customs, and patents litigation are included in the amounts approved by the respective courts.

## UNITED STATES SUPREME COURT

The increase reflected in the estimates for the Supreme Court results from provision for additional law clerks for justices and other additional personnel for the Court, as
well as amounts for statutory pay increases not effective during all of the current year.

## OTHER FEDERAL COURTS

The increases under this heading include $\$ 348,600$ for repairs and improvements to the Court of Claims building, $\$ 278,798$ for salaries of additional judges, probation officers, and other judicial officers and assistants, $\$ 277,202$ for increases required by pay legislation, and smaller amounts for increased commodity and other costs.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS
This Office, established by act of Congress approved August 7, 1939, is responsible to the Judicial Conference of Senior Circuit Judges for the performance of administrative services to The Judiciary, the preparation and reporting of statistical data relating to the activities of the courts, and similar matters. The increase reflected in the 1948 estimates for the Administrative Office is to permit resumption of certain functions curtailed during the war years, and to provide for expanded services to the courts under the authority of legislation enacted during the past several years.

## ESTIMATES OF APPROPRIATION

## UNITED STATES SUPREME COURT

## Salaries, Supreme Court-

Salaries: For the Chief Justice and eight Associate Justices; Reporter of the Court; and all other officers and employees, whose compensation shall be fixed by the Court, except as otherwise provided by law, and who may be employed and assigned by the Chief Justice to any office or work of the Court, [ $\$ 598,590] \$ 766,900$. Trust account:
Fees and Other Collections, Clerks of United States District Courts-
13 Refunds, awards, and indemnities: Obligations-1946, \$526.

SEc. 501. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (Act of July 5, 1946, Public Law 490 .)

# EXECUTIVE OFFICE OF THE PRESIDENT AND INDEPENDENT OFFICES 

Comparative Summary of Appropriations and Appropriation Estimates

[Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due
to circumstances virtually beyond administrative control. To the extent that such expenses cannot be absorbed within presently available funds, supplemental appropriations will be required. The latest estimates of amounts so required are shown in the detail sehedules for the various appropriation titles and in a separate column of the table belowl

| Bureau or subdivision | Appropriations for 1947 |  |  | Estimates of appropriation for 1948 | ```Increase ( }+\mathrm{ ) or decrease (-), 1948 estimates over 1947``` |

## EXPLANATORY STATEMENT

## EXECUTIVE OFFICE OF THE PRESIDENT

## The White House

These appropriation estimates provide for the compensation of the President, the salaries and expenses of the White House Office, an emergency contingent fund for the President, and the cost of maintaining the Executive Mansion and grounds. The appropriations for the President's immediate office provide for the handling of documents and correspondence, in addition to maintaining communication with Congress, heads of the executive departments and agencies, the press, the radio, and the general public. The new emergency fund appropriation will provide the President with some additional assistance and funds to take care of unforeseen emergencies.

## Bureau of the Budget

The Bureau of the Budget assists the President in the preparation and administration of the Federal Budget covering the entire fiscal program of the Government. In addition, as a staff agency of the Federal Government, the Bureau makes studies to improve the organization and procedures of Federal agencies; clears departmental recommendations regarding pending legislation, Executive orders, and proclamations; and coordinates Federal statistical services. The Bureau also provides staff and services for the Federal Board of Hospitalization. The 1947 appropriation included $\$ 417,000$ for part of the activities of the Office of Government Reports, recently transferred and reestablished as a separate part of the Executive Office of the President. The small net increase in 1948 estimates over the comparable estimates for 1947, will provide for automatic salary increases and some additional emphasis on improving the organization and procedures of Federal agencies.

## Counctl of Economic Advisers

The Council of Economic Advisers was established by the Employment Act of 1946 (Public Law 304, 79th

Cong.). Members took office in August 1946. Two hundred seventy-five thousand dollars was appropriated for salaries and expenses in the current year.

Section 2 of the Employment Act sets forth as goals of national policy, the maintenance of "conditions under which there will be afforded useful employment opportunities for those able, willing, and seeking to work," and the promotion of "maximum employment production and purchasing power."

Implementation of these goals within the executive branch center around the Economic Report to the Congress submitted by the President at the beginning of each session and supplemented by interim reports from time to time.
Under the provisions of the act, the Council of Economic Advisers assists the President in the preparation of the annual Economic Report. It also analyzes and interprets economic trends and appraises Federal economic programs in light of the goals set forth in the act. As a result of these studies, the Council makes recommendations to the President on national economic policies and programs. In addition it makes such special studies as he may request from time to time.

In accordance with the terms of the act, the Council utilizes to the maximum the services, facilities, and information of other Government agencies and private research agencies. In making its studies and recommendations, it obtains the advice and counsel of representatives of State and local governments, labor, industry, agriculture, consumers, and others. In consequence, the staff of the Council is and will remain very small.

## Office for Emergency Management

## OFFICE OF DEFENSE TRANSPORTATION

The Office of Defense Transportation was created by Executive Order 8989 on December 18, 1941. The basic responsibility of this agency was to insure that all forms of domestic transportation were utilized to meet the transportation requirements of the Nation. The person-
nel of the agency was reduced rapidly in the fall of 1946. The Highway Transport Department was completely liquidated and the forces of other departments were materially reduced.

During 1947 the agency met the emergency transportation needs arising from the boxcar shortage, strikes, and shortages of material. Much of the work in this connection was performed by the Interstate Commerce Commission on a reimbursable basis. It is planned that the agency's principal business will be terminated by April 30,1947 , with a small staff being retained to the close of the fiscal year to continue necessary car service operations. No estimate for the fiscal year 1948 is submitted.

## OFFICE OF SCIENTIFIC RESEARCH AND DEVELOPMENT

The Office of Scientific Research and Development was established on June 28, 1941, as an emergency war agency for scientific and medical research. The estimated appropriation of $\$ 623,800$ for the fiscal year 1947 was necessary to meet the administrative expenses of liquidating the agency's wartime activities and effecting final settlement of research contracts with academic and industrial institutions which were terminated shortly after the cessation of hostilities.

Since it is contemplated that this liquidation program will be completed by the end of the fiscal year 1947, no estimate of appropriation for the agency is included in the 1948 Budget.

## OFFICE OF TEMPORARY CONTROLS

The Office of Temporary Controls was created on December 12, 1946, by Executive Order No. 9809 which consolidated the Office of War Mobilization and Reconversion, the Office of Price Administration, the Civilian Production Administration, and the Office of Economic Stabilization. It is expected that this consolidation will result in economies in operation, and in a more rapid liquidation of programs, personnel, property, and records.

The Office is responsible for carrying out the remaining responsibilities of the Office of Price Administration and the Civilian Production Administration, and certain activities of the Office of War Mobilization and Reconversion. Unless extended by Congress, the priorities powers under which the Civilian Production Administration operated will expire March 31, 1947, except for those over building materials which expire on June 30, 1947. The principal Office of Price Administration programs which continue by law are sugar rationing and rent control. Statutory authority for sugar rationing will expire on March 31, 1947, and for rent control on June 30, 1947.

The functions of the Office of Economic Stabilization already have been largely terminated as a result of decontrol of prices and wages and elimination of most items from rationing. The statute under which the Office of War Mobilization and Reconversion operated expires June 30 , 1947. Until that date most residual functions will be carried on by the Office of Temporary Controls.

No estimate for 1948 for the Office of Temporary Controls is included in this chapter but is included elsewhere in this Budget within the amount estimated for extension of legislation.

## PHILIPPINE ALIEN PROPERTY ADMINISTRATION

The Philippine Alien Property Administration was created by Executive Order 9789 of October 14, 1946,
pursuant to the Trading with the Enemy Act, as amended, and the Philippine Property Act of 1946 (60 Stat. 418). The order transfers to the Philippine Alien Property Administrator, with respect to property located in the Philippines, all authority, rights, privileges, powers, duties, and functions vested in the former Office of Alien Property Custodian, or transferred or delegated thereto. The primary objective of the agency is to complete the vesting program in the Philippines prior to transfer of all Philippine alien property activities to the Government of the Philippines. These activities require no appropriation but are financed from the Administration's own funds under congressional limitation.

## WAR ASSETS ADMINISTRATION

The War Assets Administration was established by Executive Order 9689 on March 25, 1946, succeeding to the policy-making functions of the Surplus Property Administration and to the operating functions of the War Assets Corporation and Smaller War Plants Corporation. The same order vested all functions relating to disposal of surpluses outside the United States, its Territories, and possessions in the Department of State. Under Public Law 181, Seventy-ninth Congress, the Surplus Property Administration had succeeded to the functions of the Surplus Property Board created by the Surplus Property Act of 1944 .

The War Assets Administration is charged with the care, handling, and disposition of domestic surplus property, and is empowered by the act to prescribe regulations effectuating its provisions. Under authority conferred by the act 11 Government Tagencies" have been designated to assist in the disposal of surplus property. However, more than 95 percent of the property available for disposal is carried in War Assets Administration inventories.

Among the 20 statutory objectives governing the disposal of surplus property are the following: (a) to promote reestablishment of a peacetime economy of free private enterprise; (b) to strengthen and preserve the competitive position of small business; (c) to establish returning veterans in agriculture, business, and the professions; (d) to dispose of surpluses rapidly without fostering monopoly; (e) to obtain fair value for the Government.

In making disposals of personal property the Administration is required by the act to afford purchasing priorities in the following order to: the Federal Government, veterans, small business, State and local governments, and nonprofit institutions. In addition, a number of surplus items especially desired by veterans are designated by the Administrator and set aside for exclusive sale to them. The act provides also for discounting the sale or lease value of property disposed of to health and educational institutions, to the extent of benefits thereby accruing to the United States, and for the donation to such institutions of any property having no commercial value or entailing care and handling expenses greater than estimated proceeds. The priority and preference provisions of the act have retarded the disposal of surplus property and constitute a substantial cost factor in the operations of the agency, while the discount and donation programs result in reduced cash recoveries by the Government on its original investment in such properties.

During the fiscal year 1947 the disposal activity will pass the peak, both in terms of all-time inventories and monthly volume of sales. This does not mean, however, that fiscal year 1948 will be merely a clean-up year. Large
stocks of the less desirable and long supply items will be carried over, to be offered on a market where the demand for surpluses will markedly diminish. This condition will apply particularly to the disposal of plants, where an increasingly greater proportion of the inventory on hand will consist of special-purpose installations not readily convertible to peacetime uses.

To offset adverse marketing factors, greater use will be made in 1948 of summary disposal methods, including competitive bids and negotiated sales. Pricing policy will undergo continuous scrutiny. Scrap actions will be stepped up and export outlets exploited. Nevertheless, the rate of recovery on the Government's original investment in surplus property will decline, while over-all disposal costs in relation to proceeds will rise above current levels.

The $\$ 327,500,000$ estimate for 1948 is $\$ 230,500,000$ less than the estimated appropriation for 1947. This decrease is attributable primarily to a smaller volume of disposals and a lower level of inventories on hand, and to the unification and simplification of disposal and administrative methods.

## Office of Government Reports

The Office of Government Reports was established in the Executive Office of the President pursuant to the provisions of Reorganization Plan I of 1939. Appropriations were authorized and the functions of the Office outlined by the Congress in the following year (3 U.S. C. 54).

Certain functions of the Office of Government Reports were subsequently absorbed by the Office of War Information. This Office was terminated on August 31, 1945, by Executive Order 9608. Its special services were transferred to the Bureau of the Budget. These services provide a centralized newspaper clipping service for officials of both the executive and legislative branches; maintain a correspondence service handling public inquiries; revise the U. S. Government Manual, containing a statement of the organization and functions of the Government agencies together with their principal officials; and prepare news digests for the information of the President and his staff.

By Executive Order 9809, of December 12, 1946, applicable provisions of prior Executive orders were repealed and these services were transferred from the Bureau of the Budget to the reestablished Office of Government Reports. The order also transferred to the Office the Motion Picture and Media Programing Divisions of the Office of War Mobilization and Reconversion which had been established at the request of the advertising and motionpicture industries as a liaison point between the Government and the industries.

The functions transferred to the Office of Government Reports had available appropriations aggregating $\$ 583,750$, for fiscal year 1947. The recommendation for fiscal year 1948 contemplates the same level of activity as in the current year.

## FUNDS APPROPRIATED TO THE PRESIDENT

## Armed Forces Leave Payments

The appropriation "Payments under the Armed Forces Leave Act of $1946^{\prime \prime}$ for the fiscal year 1947 in the amount of $\$ 2,431,708,000$ provides for payments for unused leave credits, in cash and in bonds, to enlisted men of the Army, Navy, Marine Carps, and Coast Guard who were dis-
charged prior to September 1, 1946, and payments to officers and enlisted men in the armed forces on September 1, 1946, for unused accumulated leave in excess of 60 days but not exceeding 120 days, and administrative expenses in connection with making such payments. The bonds issued will mature 5 years from the date of discharge and bear interest at the rate of $21 / 2$ percent. No amounts are included for these purposes in the estimates for the fiscal уеar 1948 .

## Defense Aid-Lend-Lease

It is anticipated that the liquidation of the vast procurement activities carried out under this appropriation will be completed during fiscal year 1947. During fiscal year 1948 and for a number of years thereafter the remaining lendlease task will consist of the implementation of the several settlement and "pipe-line" agreements. Foreign governments have agreed to pay the United States over one billion dollars over a period of 30 years; they have also agreed to certain conditions regarding the use and disposition of lend-lease goods. As in the case of all international agreements, the State Department will have responsibility for seeing the terms of these agreements carried out and also that the agreed periodic repayments on the various credits are made.

The original Lend-Lease Act, approved on March 11, 1941, was enacted "to promote the defense of the United States, and for other purposes." Under this act the President was authorized, when he deemed it to be in the interest of the national defense, to sell, transfer title to, exchange, lease, lend, or otherwise dispose of articles, information, or services to any country whose defense the President deemed vital to the defense of the United States. On April 18, 1945, the act was extended to June 30, 1949, for purposes of carrying out agreements with foreign governments entered into prior to June 30, 1946. The agreements for the delivery of the remaining "pipe-line" goods to foreign recipients were all executed prior to June 30, 1946, and deliveries will be completed during fiscal year 1947.

To enable the President to carry out the provisions of this act, there has been available direct appropriations to the President totaling approximately 30.7 billion dollars. Of this amount 385 million dollars has been transferred to United Nations Relief and Rehabilitation Administration and 500 million dollars has been transferred to the Department of Agriculture for the postwar price support of agricultural commodities. In addition to these appropriations, the Congress authorized the President to transfer certain articles and services purchased directly by the War and Navy Departments, and to lease vessels procured out of appropriations made to the Navy Department and the United States Maritime Commission.

Following the surrender of Japan the President's authority for making lend-lease settlements was transferred to the Secretary of State. The remaining operations under the act were continued by such other principal Federal agencies as the Treasury Department, the War Department, the Navy Department, the Department of Agriculture, the War Shipping Administration, and the United States Maritime Commission.

No obligating authority is requested for fiscal year 1948 nor is any further appropriation under this title required.

## Overtime, Leave, and Holiday Compensation

This appropriation was made to enable the President through the departments and agencies concerned to pay
claims for overtime, leave, and holiday compensation at night rates as certified under the provisions of the act of July 31, 1946 (Public Law 575). These claims developed following a ruling of the Comptroller General.

## INDEPENDENT OFFICES

## American Battle Monuments Commission

The American Battle Monuments Commission maintains and operates 8 national cemeteries and 12 memorials in France and Belgium, commemorating the services of American Expeditionary Forces during the First World War, and has been given responsibility for the planning of World War II permanent cemeteries and memorials. Appropriations for 1947 provided for part of the repair and rehabilitation of damage to and deterioration of installations during World War II. The estimates for 1948 contemplate a small increase in the maintenance force, a continuation of the repair and rehabilitation of World War I properties, other than the completely destroyed Brest Naval Memorial, and surveys of each of the three World War II theaters of war preparatory to recommending sites for cemeteries and planning construction of memorials.

## Atomic Energy Commission

The Atomic Energy Commission was established by the Atomic Energy Act of 1946, approved August 1, 1946. The Commission operates within the framework of the policy set forth by the act, which declares that, subject to the paramount objective of assuring the common defense and security, the development and use of atomic energy shall, so far as practicable, be directed toward improving the public welfare, increasing the standard of living, strengthening free competition in private enterprise, and promoting world peace. The Commission is made the exclusive owner of all fissionable materials and of all facilities for the production of fissionable material. To advise and assist the Commission, the act provides for a general advisory committee appointed by the President, and a military liaison committee with members assigned by the Secretaries of War and the Navy.
In prior fiscal years, responsibility for the development and application of atomic energy was vested in the Manhattan Engineer District, War Department, financed by funds appropriated to that Department. In August 1946, the President was authorized by Public Law 663 to allocate the unexpended balances of funds available to the Manhattan Engineer District to such agencies as he might determine. The President in December 1946 transferred to the Commission the properties, contracts, and civilian personnel of the Manhattan Engineer District. During the remainder of the fiscal year 1947, the Commission's activities will be financed from the funds thus allocated. It is estimated that all funds allocated to the Commission in fiscal year 1947 will be fully obligated in that year.
The nature of the Commission's activities is such that certain contracts for services to be rendered to the agency in the succeeding fiscal year must be negotiated in the prior fiscal year. For this reason, the budget estimate for the Commission for the fiscal year 1948 contains contract authority in the amount of $\$ 250,000,000$, in addition to an appropriation of an equal amount to finance current expenditures. The total amount of new obligational
authority for the Atomic Energy Commission in fiscal year 1948 is $\$ 500,000,000$.

## Civil Service Commission

The Civil Service Commission recruits, selects, and certifies persons for employment in the executive branch of the Government. Normally, selections are made as a result of competitive examinations. During the war years the Commission discontinued competitive examinations because of the urgency of filling a large number of vacancies in a scarce labor market. Persons who were appointed during this period received a war-service indefinite appointment. A two-year program has been formulated to replace war-service appointments with permanent-status personnel by June 1948, and to reconvert from a wartime to a peacetime civil service. The program will entail the examining and certifying of a large number of persons who may wish to compete for a vailable positions. Persons holding war-service appointments who wish to be retained in their positions will be required to compete with applicants from both within and outside Government.

In converting from war conditions, the Commission has considered it advisable to decentralize certain phases of recruitment and placement activities to the agencies and their field establishments. This broader decentralization extends to the agencies a wider participation in the selection of their personnel. This function is accomplished through committees and boards of examiners operating under the control of the Civil Service Commission, who are authorized to examine and select personnel for the more technical positions peculiar to a particular agency and for the mechanical and trade positions in the field service. The members of the committees and boards are appointed by and composed of employees of the establistments of the respective departments and agencies and operate under the supervision of the Civil Service Commission in accordance with procedures and rules established by it. The selection of personnel involves, particularly with regard to applicants for the more responsible Government positions, investigations of character, loyalty, and suitability.

Through the promulgation of rules and regulations and the issuance of standard procedures, the Commission to a large extent provides direction to all Federal personnel activities. It is responsible for the administration of the Classification Act which requires that the duties and responsibilities assigned Government positions be the basis for equitable salary allocations. It adjudicates appeals and prescribes a uniform performance rating system.
Responsibility for the administration of the retirement laws for Government employees, including the employees of the Panama Canal and the Alaska Railroad, is vested in the Commission. In addition, the Commission represents the United States Government in fulfiling the Government's commitments as an employer under the provisions of the Veterans' Preference 'Act of 1944.

The Commission during fiscal year 1948 will continue to place emphasis on their program of conducting open competitive examinations which will result in the replacement of war-service appointments by permanent-status appointments. The decrease of $\$ 381,315$ in the estimate for general administrative expenses for 1948 from the amount estimated for 1947 results primarily from anticipated decreases in administrative work connected with retirement refunds for employees who may be separated
?rior to 5 years of Federal service, and curtailment of wartime need for a heavy recruitment and placement orogram.

Appropriations are made annually toward the Governnent share of providing benefits to participants in the :etirement and disability funds provided by law for emoloyees of the Federal service. The appropriations and sontributions made by the participating employees proride the trust funds from which benefits are paid.
The 1948 estimate for retirement funds represents a net ncrease of $\$ 23,408,000$. This additional amount is made 1p of an increase of $\$ 23,900,000$ in the estimated amount equired for the civil-service retirement and disability fund esulting in part from an increase in pay rates of Federal mployees under the Pay Act of 1946 and in part from an ncrease in the Government's accrued liability in the fund; and a decrease of $\$ 492,000$ for the Panama Canal construction annuity fund.

## Federal Communications Commission

The Federal Communications Commission regulates nterstate and international communictions by wire and :adio. It administers the Communications Act of 1934, as amended; international treaties, conventions, conferences, and agreements relating to electric communications; and advises the State Department on the technical uspects of international communications. The Comnission also bandles technical matters for the Interlepartmental Radio Advisory Committee, which advises the President on the assignment of frequencies for use by Government agencies.

The Commission's activities include regulation of radio (broadcast, and safety and special services) and common zarriers using radio or wire. Radio regulation requires allocation of the radio spectrum among the many services and licensing the use of frequencies, surveillance of transnissions to protect freedom from interference and to secure compliance with the law, licensing of operators, prescribing of engineering standards, and monitoring. Common-carrier regulation applies to interstate and international tariffs, physical connections, through routes and sharges, construction and abandonments, mergers, servce, and depreciation. Also included is jurisdiction over iniform accounting, valuation, and reporting of operations.
The remarkable wartime developments in the science of slectronics have had a tremendous influence on radio comnunications systems. Transmission is now practicable, or example, over a range of $30,000,000$ kilocycles, as comjared with a prewar range of approximately 300,000 kilo;ycles. As a consequence, the number of radio stations n the established services is increasing more rapidly than sarlier forecasts could have predicted. At the same time, lew types of services are being established. In October 1946, there were more than 1,400 standard (AM) and 400 requency modulation (FM) broadcast stations in the Inited States and its Territories as compared with 950 IM and 50 FM stations in October 1945. Nearly 1,200 tation applications ( $668 \mathrm{AM}, 525 \mathrm{FM}$ ) were pending refore the Commission in October 1946.
Among the newer services, television is undergoing a imilar development while the increase is equally striking n safety and special-service operations-police, fire, airiraft, ships, railroads, and others. In the 12 months to )ctober 1946, stations on aircraft more than tripled. All afety and special-service stations, excluding amateur, inreased approximately 70 percent, with available evidence ndicating a continuance of expansion in this teld.

Common-carrier regulatory problems are currently accentuated by the vast postwar reconstruction and development programs of the Bell Telephone System and Western Union Telegraph Company. Serious problems exist, moreover, because of the public utility nature of the carriers' operations. Western Union's representation that its service could not be continued without an increase in rates, coupled with evidence that such a change might result in a substantial loss of business, has led the Commission to propose a general investigation into Western Union's affairs with respect to its service, rates, and cbarges.

The budget for the fiscal year 1948 is $\$ 7,300,000$, an increase of $\$ 1,063,052$ over total estimated appropriations for 1947. Of this 17 percent increase, $\$ 375,000$, or over one-third, represents the cost of the Western Union investigation, a nonrecurring item. The $\$ 688,052$ remainder will enable the Commission to cope with its increased work load, which varies directly with industry proposals to establish new services and with the number of radio station applications. These considerations require continuous Commission action in reviewing allocations, preparing engineering and other standards for station operation, and reviewing applicability and adequacy of international treaties and regulations. The increase to carry on regular activities is after adjustments for increased efficiency of operations achieved during the current fiscal year and curtailment or elimination of certain regulatory activities.

## Federal Power Commission

The Federal Power Commission administers the Federal Power Act of 1935 and the Natural Gas Act of 1938 and has certain duties under the provisions of several other acts relating to Federal power developments such as Tennessee Valley Authority Act, Bonneville Act, Fort Peck Project Act, and the Flood-Control Acts. Its principal functions are as follows: (1) to license hydroelectric power projects on navigable waters of the United States and on United States Government lands; (2) to regulate the rates charged by public utilities and natural gas companies engaged in the transmission and sale of electricity and natural gas at wholesale in interstate commerce; (3) to approve rates for sale of electric energy at the Bonneville, Fort Peck, Denison, and Norfork projects and future reservoir projects under the control of the War Department; (4) to regulate the disposition, merger, and consolidation of facilities of public utilities and their acquisition and issuance of securities; (5) to regulate the interlocking directorates of public utilities; (6) to prescribe and enforce uniform systems of accounts for licensees, electric utilities, and natural gas companies and to encourage sound depreciation and accounting practices; (7) to assist State agencies on rate cases and other regulatory matters; (8) to study the present and potential markets for electric energy and the present and potential sources for its production; (9) to study the possibilities for future interconnection and coordination of electric power systems throughout the country and to recommend to the utility industry improvements in the interest of conservation of energy resources and lowering the cost of energy to the ultimate consumer; (10) to issue certificates of public convenience and necessity for the acquisition, construction, extension, and operation or abandonment of natural gas pipe lines and facilities for the transportation or sale of natural gas in interstate commerce; (11) to determine service areas for natural gas companies; (12) to report to Con-
gress on proposed and existing compacts between States relating to the conservation and use of natural gas; (13) to gather, analyze, and publish basic financial and engineering data concerning electric utilities and natural gas companies; (14) to make cooperative studies of river basins in the interest of conservation and utilization of waterpower resources and to make the results of such studies available to the War Department, Department of the Interior, and other Federal, State, and private agencies concerned; (15) to study flood-control projects proposed by the War Department and to recommend facilities for the development of hydroelectric power in connection therewith; and (16) after consulting with the Secretaries of War and State, to recommend to the President appropriate action on applications for permits to construct, operate, maintain, or connect facilities for the exportation of electric energy and the exportation or importation of natural gas.
The estimate for the fiscal year 1948, aggregating $\$ 4,259,700$, constitutes an increase of $\$ 487,300$ over the estimated 1947 appropriations. The increase is reflected mainly in additional requirements as a consequence of the Administrative Procedures Act and additional work for licensing hydroelectric projects, rate regulation, certificates of convenience and necessity, river basin surveys, power requirements and supply, corporation regulation, and gathering and analysis of basic data.

## Federal Trade Commission

The Federal Trade Commission is charged with the responsibility of administering acts which are designed to accomplish the following purposes: (1) To promote free and fair competition in interstate trade in the interest of the public through prevention of price-fixing agreements, boycotts, combinations in restraint of trade, unlawful price discriminations, and other unfair methods of competition and unfair and deceptive acts and practices; (2) to safeguard life and health of the consuming public by preventing the dissemination of false and fraudulent advertisements of food, drugs, cosmetics, and devices which may be injurious to health; (3) to protect producers, manufacturers, distributors, and consumers from unrevealed presence of substitutes and mixtures in manufactured wool products; (4) to supervise the registration and operation of associations of American exporters engaged solely in export trade; and (5) to gather and make available to the President, the Congress, and the public, factual data concerning economic and business conditions as a basis for remedial legislation where needed, and for the guidance and protection of the public.
The $\$ 3,978,000$ estimated for expenses for the fiscal year 1948 is approximately 40 percent greater than the amount estimated for 1947. An increase of $\$ 852,880$ is included to implement the Commission's handling of investigations and corrective actions on an industry-wide basis. It has been the practice of the Commission, when it received a complaint, to proceed with an investigation of the specific company complained against and, if the complaint was valid, to prohibit the specific company from following the unfair practice. Thus competitors of that company were free to follow the same unfair practice until complaints against them were received and until time permitted the Commission to conduct an investigation and issue individual cease-and-desist orders with respect to each company. Using an industry-wide basis the Commission now, on its own motion, initiates an investigation of a whole industry; and all members of the industry who are using unfair competitive methods are pro-
ceeded against simultaneously. The industry-wide approach permits the Commission to eliminate the inequities that were inherent in the former individual case method.

The Commission now places greater emphasis on the elimination of unfair trade practices through cooperative means. In those instances where circumstances permit, industry members are given an opportunity to eliminate unfair methods of competition through stipulation agreements to cease and desist or through the establishment of trade practice rules. Heretofore trade practice conferences were held only when the Commission received a request for rules from an industry. These conferences are now initiated by the Commission where this method of eliminating unfair trade practices appears appropriate. This action by the Commission permits more prompt, equitable, and economic settlement of the issues involved than is otherwise possible.

The remaining increase of $\$ 275,000$ is to provide for the participation by the Commission in a coordinated Federal program for the collection and compilation of business financial statistics. The Federal Trade Commission and the Securities and Exchange Commission will collaborate in carrying out the Federal program relating to business financial statistics. When compiled, these statistics will be made available to other Government agencies and to the public.

## General Accounting Office

The General Accounting Office audits the Government's receipts and expenditures, prescribes accounting systems, maintains appropriation accounts, settles claims, and construes and interprets laws.

The 1948 estimates for the General Accounting Office show a substantial reduction compared with the 1947 appropriations. By far the greater portion of the appropriation is required for the performance of auditing functions, including the audit of the accounts of Government corporations.

The work will be relatively current by the end of 1948, but backlogs may still exist in some activities such as the audit of Government checks.

## Housing Expediter

The Office of the Housing Expediter was originally established by Executive Order 9686, which was issued on January 26, 1946. The order empowered the Expediter to study and make recommendations for the solution of the housing problem, especially with respect to the emergency housing needs of veterans.

The Expediter was given a statutory basis and required appropriations were authorized by the Veterans' Emergency Housing Act, approved May 22, 1946. This act, in addition to incorporating the powers conferred by the Executive order, gave certain additional emergency powers to the Expediter, including the power to allocate and establish priorities for building material and equipment in short supply; to make premium payments for additional production of materials essential to housing; and to guarantee, within certain prescribed standards, the market for factory-built houses and for new-type building materials.
Both Executive Order 9686 and the Veterans' Emergency Housing Act authorized the Expediter to carry out any portion of his program through the facilities of existing Government agencies. The Expediter elected, in accordance with this authority, to carry out his program
rough the staff and facilities of various Government encies, notably, the National Housing Agency, Civilian oduction Administration, Offlice of Price Administration, ıbor Department, Reconstruction Finance Corporation, d the Department of Agriculture. On February 12, 46, the President effectively combined the positions and aff of Housing Expediter and National Housing Adminrator when the incumbent of the former position sumed the latter post.
Public Law 519, Seventy-ninth Congress, authorized yment of the administrative expenses of the Expediter d the veterans' emergency housing program from funds propriated and made available under title $V$ of the inham Act. Consequently, no appropriation estimate s hitherto been submitted for the Housing Expediter.
Concurrently with his announcement in December 46 of a housing prograin to reflect the decontrol policy, e President reestablished the status of the Housing spediter as an independent officer by separate appointents to the positions of Housing Expediter and National ousing Administrator. Separate budget estimates are erefore transmitted to the Congress.
The Housing Expediter assumed his duties so recently at operating policies and procedures have not been mpletely formulated. Nevertheless, an over-all estiate of the cost of the program is included in the ıdget.

## Interstate Commerce Commission

The Interstate Commerce Commission regulates those ilroads, motor carriers, pipe lines, stockyards, water rriers, and freight forwarders operating in interstate mmerce. In general, its jurisdiction covers matters of riffs, finance, operating authority, service, safety, acunting, and valuation. Regulation, in accordance with e national transportation policy, is performed in such a ly as to recognize the inherent economic advantages of ch type of carrier; to promote safe, adequate, economi1 , and efficient service; to encourage the establishment reasonable charges; and to encourage fair wages and uitable working conditions.
Following considerable reduction and deferment of ork during the war because of the preponderance of Jvernment traffic and the consequently fewer private quests for adjudications, the Commission has emerged m the war period with a greatly increased volume of rrk. Prominent among the areas in which these inzases have taken place are: expanded regulation of iter carriers and freight forwarders following legislation acted in 1940 and 1942, respectively; resumption of tensive field investigations of motor carriers' accounts ter concentrating on operational considerations during e war period; increased tariff filings, resulting not only m a natural postwar rise similar to post-World War I perience, but also from the Commission's recent farxching rate decisions; and intensified activity in the tor-carrier field to improve safety conditions. The reases in tariff work are reflected throughout the Comssion in almost proportionate increases in its hearing, ance, complaint, accounting, and valuation work.
The budget estimate for the fiscal year 1948 is $\$ 11,898$,0 , an increase of $\$ 1,375,297$ over total estimated approiations for 1947. Of this 13 -percent increase, $\$ 766,843$, over half, is for the Bureau of Motor Carriers, while the mainder is distributed among the other bureaus in oportion to the augmented volume of work to be per:med as indicated above.

## National Advisory Committee for Aeronautics

The National Advisory Committee for Aeronautics was established in 1915 to supervise and direct the scientific study of the problems of flight and to direct and conduct research and experiments in aeronautics. The membership of the Committee includes official representatives of the agencies of the Government directly concerned with military and civil aviation and private citizens especially qualified in the aeronautical sciences. The actual research work is carried on primarily at the three laboratories of the Committee: The Langley Memorial Aeronautical Laboratory at Langley Field, Va., the Ames Aeronautical Laboratory at Moffett Field, Calif., and the Aircraft Propulsion Research Laboratory at Cleveland, Ohio. The Committee supplements the research work performed in its own laboratories by awarding contracts to institutions having available specialized facilities and scientific personnel capable of assisting in the solution of special technical problems.

The research programs of the Committee are carefully coordinated with the aeronautical development programs of the military services, and since the end of the war greater emphasis is being given to the solution of problems relating to the improvement of all types of civil aircraft. The 1948 estimates of appropriations and contract authorizations make provision for the construction of test facilities urgently needed for research in connection with the development of aircraft and propulsion units capable of exceeding the speed of sound. The estimates of appropriation for 1948 total $\$ 36,360,000$ and contemplate an increase of $\$ 5,445,000$ over the estimated appropriations for 1947, primarily to provide additional personnel for the operation of new facilities and to meet increased costs of supplies and equipment necessary for the Committee's work in the high-speed ranges.

## National Archives

The National Archives is charged with the preservation and servicing of inactive Federal records of permanent value and historical interest for use of Government officials and scholars. In addition, it authorizes agencies to dispose of useless records when Congress has previously approved the disposal of records of similar form and character, recommends to Congress the approval of schedules listing records for future disposal at the source, and after appraising records declared worthless by heads of agencies, makes recommendations to Congress for their disposal. This agency likewise publishes the Federal Register, containing interdepartmental orders of general effect and applicability, and administers the Franklin D. Roosevelt Library at Hyde Park, N. Y., which is the designated repository for the late President's official papers.
The increase of approximately 35 percent in the 1948 estimates is for analysis and description of records, rehabilitation of records and films badly in need of care, the codification of the Federal Register in 1948, handling and exhibiting additional books and papers of the Franklin D. Roosevelt Library, and a substantial start on the preparation of guides to the records of World War II.

## National Capital Housing Authority

The National Capital Housing Authority is the public housing agency for the National Capital and, under title I of the District of Columbia Alley Dwelling Act, operates 112 dwelling units and 5 nonresidential properties located in reclaimed slum areas in the District. All receipts
derived from sales, leases, or other sources in connection with the operation of these properties are covered into the Treasury monthly.

The amount in the 1948 Budget required to protect and conserve the Government's investment of some $\$ 555,000$ includes additional costs made necessary by recent pay legislation.

Other activities of the National Capital Housing Authority, which are financed from other appropriations, include the operation and management of war and other housing projects.

## National Capital Park and Planning Commission

The functions of the National Capital Park and Planning Commission are of an advisory and also an operating character. Its advisory activities, which include preparation and maintenance of a comprehensive plan for the development of the National Capital and its environs, are charged against District revenues and therefore appear in the District of Columbia chapter of the Budget. The operating function of the Commission includes acquisition of land for the development of the National Capital's park, parkway, and playground system and the George Washington Memorial Parkway on both sides of the Potomac River, and for the extension of the District park system into nearby Maryland and Virginia. Appropriations for these purposes are charged against the United States Treasury but are subsequently repaid either in whole or in part by the jurisdiction benefited: 100 percent by the District of Columbia; 50 percent by Virginia and Maryland for development of the George Washington Memorial Parkway; and 66\%3. percent by Maryland for extension of the park system in territory adjacent to the District. The Commission has the further responsibility of making a comprehensive plan and project area redevelopment plans under the District of Columbia Redevelopment Act, for which appropriations of Federal funds are authorized.

The total estimates of $\$ 3,368,000$ for 1948 represent an increase of $\$ 2,500,250$, due primarily to advances and contributions to the Maryland National Capital Park and Planning Commission. Of the total estimates, $\$ 2,994,000$ is required for land purchases in Maryland, $\$ 200,000$ for the George Washington Memorial Parkway, $\$ 79,000$ for lands within the District of Columbia, and $\$ 95,000$ for redevelopment planning and surveys.

## National Labor Relations Board

The National Labor Relations Board administers the provisions of the National Labor Relations Act (29 U.S.C. 151-166). Like a court of law, the Board has little or no control over the number of actions brought before it but is under a statutory mandate to process appropriately all cases formally filed in its several regional offices. Moreover, the Board's work objective is comparable to that of a court: to resolve as rapidly as possible, consistent with careful investigation of the facts and due process of law, the issues brought before it for determination.
The National Labor Relations Act guarantees, as a matter of national policy, the rights of employees to selforganization; to form, join, or assist labor organizations; and to bargain collectively through representatives of their own choosing. The act defines five specific types of unfair labor practices, which, if engaged in by employers, constitute interference with the afore-mentioned employees' rights. The Board investigates charges of alleged unfair labor practices and, if after appropriate notice and hearing it finds that such practices have been com-
mitted, it is empowered to issue a cease-and-desist order against the employer found to have committed such acts. An order of the Board may be enforced, modified or set aside by a United States circuit court of appeals upon proper petition by the Board or an aggrieved employer.

The act provides that representatives designated or selected for the purposes of collective bargaining by the majority of employees, in a unit appropriate for such purposes, shall exclusively represent all employees in such unit for purposes of collective bargaining. The Board is responsible for investigating questions concerning representation of employees for collective bargaining and for certifying the majority representative of employees in the appropriate bargaining unit. In the course of such investigation the Board may take a secret ballot, make a check of union members' cards or authorizations against the employer's pay roll, or utilize any other suitable method to ascertain such representative. A slight decrease in the relative number of representation cases handled, as compared to the number of unfair labor practice cases handled, occurred in fiscal year 1946, reversing a steady upward trend during the preceding 10 years. During fiscal year 1946 the Board received approximately 2 representation cases $(8,445)$ to every unfair labor practice case $(3,815)$.

The Board is confronted with a rapidly mounting back$\log$ of cases, which has the effect of increasing substantinlly the period between receipt and disposition of a case. The backlog increased by 42 percent during fiscal year 1946 and by an additional 23 percent during the first quarter of the current fiscal year. The accelerated rate of backlog accumulation in the current year is brought about by a greatly increased rate of case receipts and by a drastic reduction by Congress below estimated appropriation requirements. The volume of cases received per month since the beginning of the current fiscal year has averaged 42 percent above the monthly average of cases received during fiscal year 1946 and is at a higher level than in any previous year. The present excessive lag in case disposal tends to prolong employer-employee tension while cases are pending and to promote strikes rather than prevent them. Because of this lag, labor organizations are impelled to resort to strike action as a defense against unfair labor practices and in order to establish proof of majority representation for purposes of collective bargaining, rather than involke tne judicial procedures of the Board.
It follows from the nature of the Board's work, and from its key position in the national economy, that the Board must be equipped with funds and personnel sufficient to handle cases brought before it. The Board has formulated a program to dispose of incoming cases and to reduce its backlog to a current operating basis by the middle of fiscal year 1949. To initiate this program during the current fiscal year, the Board proposes a supplemental estimate of appropriation for 1947. The 1948 estimates provide for continued execution of the proposed program.

## National Mediation Board

The National Mediation Board and the National Railroad Adjustment Board are two administrative agencies created under the Railway Labor Act of 1926, as amended in 1934 and 1936. The purpose of the act is to promote and maintain order in the labor relations of carriers by rail and air and the organizations representing their employees.

Under the act, the National Mediation Board has the duty, with respect to railroad and air carriers, to: (1)
tediate disputes concerning rates of pay, rules, or workIg conditions; (2) investigate disputes over representaon and conduct secret ballots or checks of authorization ir the purpose of ascertaining the freely chosen, duly asignated and authorized representatives of the emloyees involved; (3) induce the parties to submit unsolved disputes to arbitration; (4) notify the President henever an unadjusted controversy threatens substanally to interrupt interstate commerce to a degree which ould deprive any section of the country of essential ansportation and to service emergency boards which ay be created by the President in such instances; and i) perform certain functions in connection with the ational Railroad Adjustment Board. This procedure as successful in avoiding major strikes on carriers until artime emergency powers operated to restrict free allective bargaining.
To adapt the procedure to the wartime period in which ajor labor organizations generally observed a no-strike ledge, Executive Order 9172 creating the Railway Labor anel provided for appointment of emergency panel oards to find and publish facts affecting a dispute in hich mediation had failed and a proposal to arbitrate as rejected. These boards are operative without the zcessity of a threatened interruption to essential transortation, a condition precedent to the creation of an nergency board under section 10 of the act. In order , restore the railway labor procedure to the statutory ittern, the language making funds available for the ailway Labor Panel and its emergency panel boards bas zen deleted from the text of the 1948 appropriation itimates.
The National Railroad Adjustment Board consists of 3 members equally representative of and compensated $y$ the carriers and the labor organizations, and composing ur divisions, independent of one another, each with risdiction over specified crafts of employees. It is the lty of the divisions of the Board to act on petitions from te parties seeking adjustment of unresolved disputes, volving an employee or group of employees and a carrier - carriers, growing out of grievances or out of the interetation or application of agreements concerning rates pay, rules, or working conditions. Secretaries to the embers, administrative personnel, and incidental exinses are paid from appropriations authorized by the act. The 1948 estimates provide an over-all increase of 40,000 . The fast developing air transport industry is source of new work load. A reduction resulting from rmination of the Railway Labor Panel is offset by creased funds for emergency boards under section 10 the act. The net increase is due almost entirely to gher costs for printing decisions and increased costs of fice rent for the National Railroad Adjustment Board, sser amounts being required for mediator trainees and ithin-grade salary increases.

## Philifpine War Damage Commission

To implement the policies of the United States toward e Philippines as embodied in the Tydings-McDuffie Act 1934, the Seventy-ninth Congress enacted the Philipne Rehabilitation Act of 1946 (Public Law 370, 79th ong.) which authorized the appropriation of $\$ 400,000,000$ $r$ the purpose of assisting in the restoration of the econny of the new Republic. Because of the widespread operty loss and destruction in the Philippines the Coness in its committee reports recognized that the money thorized would provide only for partial restitution of
property losses. The Philippine War Damage Commission was entrusted with the duties of adjudicating and paying war damage claims to those qualified under the law.
The Commission began operation with an appropriation of $\$ 10,000,000$ carried in the Third Deficiency Appropriation Act of 1946. Inasmuch as the Commission had been established by the Seventy-ninth Congress and was just beginning its work, that sum of money was considered to be adequate to meet the needs for the fiscal year 1947. The Commission will be organized for large-scale handling of claims by the opening of fiscal year 1948 and the provision of $\$ 90,000,000$ is estimated to be necessary to meet immediate needs for payment of war damages during that year.

## Price Decontrol Board

The Price Decontrol Board was created by the Price Control Extension Act of 1946 . Its three members were appointed late in July 1946. In August, hearings were held and decisions rendered on the decontrol of meat, dairy products, fats and oils, and grains. Due to the acceleration of the decontrol program following the President's announcement of the decontrol of meat on October 14 and the subsequent decontrol of most other commodities on November 10, the Board has reduced its staff to a minimum; the Board members will remain on an "on call" basis until June 30, 1947, or as long as the act is in force.

## Railroad Retirement Board

Legislation, enacted in the closing days of the Seventyninth Congress (Public Law 572), substantially expanded and liberalized the program administered by the Railroad Retirement Board. The amendments added survivors' insurance, modeled after the old-age and survivors insurance system, requiring the use of wages recorded under both systems in determining the survivors' benefits payable under either system. Occupational disability insurance, a new development in American social insurance, was also added. The basis upon which physical disability insurance becomes payable has been liberalized and minimum annuities have been increased. The retirement age for women railroad workers was reduced to 60 years. Taxes were substantially increased to provide for the costs of the new insurances and the liberalization of already established insurances. It was also intended that the increased taxes should place the retirement program on an actuarially sound and self-supporting basis.

The amendments practically double operating costs of the retirement program for 1947 and 1948. In addition to a substantial increase in the volume of claims by reason of the new insurances, the Board will be required to review in the next 2 years some 356,900 cases out of which 232,000 new awards are expected. The provision for the joint use of wage records under both the retirement and old-age and survivors insurance programs will require modifications of a substantial nature in both programs in order to make the wage data available for use under either system. Part of the costs of 1947 and 1948 will be nonrecurring after these years through the elimination of the retroactive review of previous awards or disallowances, but because of the new insurances and more liberal basis for determining rights under existing insurances, the retirement program will continue indefinitely at a substantially higher level than in 1946. The estimates for salaries, miscellaneous expenses, printing and binding, and
penalty mail reflect for 1948 the increased requirements due to the changes brought about by the amendments.

The railroad retirement appropriated account is made up of the estimated taxes to be collected from carriers and their employees to provide, after deduction for annual administrative costs, for retirement, disability and survivorship benefits. It also includes Federal contributions for military service which represent, as provided by law, the total tax which would have been received had the worker entering military service continued in railroad employment with earnings of $\$ 160$ per month. The very substantial increase in the estimate of taxes for 1948 reflects the increase in the tax rates beginning with the calendar year 1947.

By reason of the continued receipt of taxes in excess of benefit payments and administrative costs the railroad retirement trust fund at the close of 1946 had improved its position over the previous year. It is anticipated that this improvement will be more rapid during the next few years by reason of the increased tax rates applicable.

The railroad unemployment insurance fund annually receives 10 percent of the taxes collected for railroad unemployment insurance. It is used for the administrative costs of operating the railroad unemployment insurance system. The unexpended balance of this fund in excess of the $\$ 6,000,000$ at the close of each fiscal year together with 90 percent of the taxes collected, goes into the railroad unemployment insurance trust fund and is used to pay unemployment, sickness and maternity insurance benefits. By virtue of amendments to this act increasing the benefit period for unemployment insurance, and adding sickness and maternity insurance and liberalizing benefit payments, administrative costs will increase. The unexpended balance transferable to the trust fund at the close of each fiscal year will be correspondingly decreased. Because of prior year transfers to the railroad unemployment insurance trust fund and current accumulations, this trust fund is in a very strong position to meet any demands in 1948 which may be made upon it.

## Securities and Exchange Commission

The functions of the Securities and Exchange Commission include the supervision of registration of security issues and suppression of fraudulent practices in the sale of securities; regulation of transactions in securities, both on the stock exchanges and in the over-the-counter markets; regulation of public utility holding companies; registration and regulation of investment companies and investment advisers; and the preparation of advisory reports on plans and participation as a party in corporate reorganization.

The volume of corporate financing registered with the Commission during the year 1946 exceeded the average for the three preceding war years by more than 200 percent, reflecting the favorable market conditions prevalent during most of the year which have encouraged new financing and continued refunding operations. Postwar borrowing by corporations for additional capital for expansion combined with anticipated continued favorable market conditions, will continue the upward trend in financing. As indicated by the number of shares traded on the New York Stock Exchange, the volume of trading in securities in 1946, both on national stock exchanges and in the over-the-counter markets, continued at close to the 7 -year high record established in 1945 . This vol-
ume, together with the violent price fluctuations which characterized trading in 1946, has resulted in a corresponding increase in the Commission's work in connection with surveillance of markets and broker-dealer inspections, pointing to the need for strengthening the staff. Progress continued with the integration and corporate simplification of public utility systems under the Public Utility Holding Company Act of 1935. The inability of both the Commission and the companies involved to secure adequate technical personnel during the war years, which seriously retarded this work, is no longer a problem. The integration and simplification work under the Public Utility Holding Company Act will be accelerated during 1947 and 1948. During 1948 the Commission will also resume the compilation and publication of statistical reports on individual companies, a program which was inactive during the war period.

The $\$ 6,500,000$ estimated for expenses for the fiscal year 1948 is approximately 18 percent greater than the amount estimated for 1947. The additional funds are to provide primarily for (1) increased activity in the surveillance of security markets and in the inspection of broker-dealers, (2) strengthening the staff engaged in processing registration statements covering refundings and new financing, (3) accelerating the integration and corporate simplification of public utility holding company systems, and (4) the compilation and publication of financial statistics of individual companies. The Securities and Exchange Commission and the Federal Trade Commission will collaborate in carrying out the Federal program relating to business financial statistics. When compiled, these statistics will be made available to other interested Government agencies and to the public.

## Selective Service System

The Selective Training and Service Act will expire March 31, 1947. For that reason, no estimate of appropriation for the Selective Service System for the fiscal year 1948 is included in this chapter.

## Smithsonian Institution

The Smithsonian Institution, founded in 1846 for "the increase and diffusion of knowledge among men," carries on fundamental research in the natural sciences, and administers the United States National Museum, the Astrophysical Observatory, the National Collection of Fine Arts, the Bureau of American Ethnology, the International Exchange Service, and the Canal Zone Biological Area. The Institution establishes the standards which control a large proportion of the scientific inquiries of mankind. Much of its basic research is of great benefit to the oil, mining, manufacturing, and fishing industries, to engineering enterprise, and to medical research. The increase of approximately 22 percent in the 1948 estimates is required for the cataloging of scientific specimens, a pilot study in modernization of exhibits, better cleaning of floors and glass, printing and binding, and rehabilitation of the laboratories and physical plant of the Canal Zone Biological Area.

The National Gallery of Art is a quasi-independent branch of the Smithsonian Institution. Here are displayed free to the public world-famous paintings and other art objects. The attendance at the Gallery continues to be greater than that at any other art gallery in the world. An increase of approximately 7 percent in the

948 estimates is required for expansion of administrative, :uratorial, and educational functions.

## Tariff Commission

The Tariff Commission is an independent fact-finding, act-reporting agency which studies the effects of United ;tates and foreign trade activities on United States domesic industries and international trade throughout the vorld. Its investigations provide a basis for action by he Congress, by the President, and by the executive lepartments.
The major objective of the Commission traditionally as been the factual determination of the effect of United itates import policies on domestic industries facing comletition from goods produced abroad. The Commission loes not determine trade policies or the level of tariffs; hese functions belong to the Congress and the President. ;ince its establishment in 1916, besides developing a staff If acknowledged competence, the Commission has become $\checkmark$ reservoir of trade, production, commodity, and import nformation of wide use to Government agencies.
During fiscal year 1947 it is estimated that total funds เvailable to the Commission will be $\$ 1,109,000$ and the roposed appropriation for fiscal year 1948 totals $\$ 1,320$,100 , an increase of $\$ 211,000$.
Since the termination of the war, the United States tovernment has been pursuing a series of major programs lirected toward the expansion of international trade; amely, the resumption of trade-agreement negotiations, articipation in the International Bank and the Monetary "und, granting the British loan, and participation a a proposed international trade organization. Fiscal 'ear 1947 represents a transitional year during which rreparations for the stimulation of trade have been under vay, but trade cannot be expected to revive fully in this rear. The nuclear trade-agreement negotiations will tot have been completed until the early part of fiscal ear 1948 nor will the international trade organization lave been established before then. Similarly, the full ffects of the British loan, the operation of the World 3ank and the Monetary Fund, and special legislation uch as the Pbilippine Trade Act, will not be felt until 948 and after. In 1948 also the Government must letermine the future of trade agreements since the nabling act expires in June of that year.
With the expansion of international trade within laborate systems of governmental controls, the need for act-finding by the Tariff Commission as the basis for dministrative and legislative decisions will be greatly ncreased. The economic welfare of the United States $s$ well as of the other United Nations depends upon the uccess of revived, expanding trade; and the maintelance of a high level of employment, both in the United itates and abroad, is directly related to the successful xpansion of the exports and imports of the United States.

## The Tax Court of the United States

The function of the Tax Court is to review administraive determinations of tax deficiencies made by the Comnissioner of Internal Revenue and to finally decide vhether there is a deficiency or an overpayment in income, rofits, estate, gift, and unjust enrichment taxes, and ersonal holding company surtaxes; to adjudicate conroversies relating to excess profits on Navy contracts and Lrmy aircraft contracts; and to review the action of the Jommissioner in deficiency and refund cases founded on laims of abnormalities under excess-profits statutes.

The Court also has jurisdiction in cases involving refunds of processing taxes, and in determining the amount of excessive profits on war contracts when contractors appeal determinations made under the Renegotiation Act.
The 1948 estimates for the Tax Court of the United States show an increase of approximately 7 percent over 1947 appropriations. This increase is necessary to enable the Tax Court to handle an existing backlog of cases and, at the same time, to handle a considerable volume of new cases which will require attention in 1948.

## United States Maritime Commission

The Merchant Marine Act of 1936 declared a merchant marine to be "necessary for the national defense and development of ${ }^{*} *^{*}$ foreign and domestic commerce." The act represented a compromise after 150 years of controversy, departing from previous legislation by accepting the principle of open subsidization of both construction and operation, regulated to prevent abuses. To administer the act, Congress created the United States Maritime Commission and entrusted it with broad discretionary authority to define and establish "essential" trade routes; to administer construction- and operatingdifferential subsidies; to purchase, construct, and operate vessels either directly or by contract under certain conditions; to train officers and seamen, and to establish working conditions, wages, and manning scales for inclusion in subsidy contracts; to provide ship-mortgage insurance; to regulate trade practices and prevent discrimination among shippers; and to promote both foreign trade and the employment of American vessels.

The Maritime Commission's principal wartime responsibility has been the building of ships. Its prewar functions of purchase, charter, operation, and seaman-training were transferred to War Shipping Administration by Executive order issued February 7, 1942; and during the war this agency was responsible for the operation of the largest merchant fleet in the world. By December 1, 1946, the active fleet operating for Government account had declined from a wartime peak of about 4,000 vessels to approximately 1,100 vessels.

Pursuant to the act of July 8, 1946 (Public Law 492), all functions and appropriations of the War Shipping Administration were transferred to the United States Maritime Commission on September 1, 1946. This action was taken "For the purposes of the liquidation by December 31,1946 , of all of the [operating] functions of the War Shipping Administration. * * *" However, the Commission was given an extension of operating authority for two more months, to March 1, 1947, by act of July 23, 1946 (Public Law 521). The 1948 Budget makes provision for these activities only to the date of March 1, as specified by Congress.

Construction fund.-Primary responsibility of the United States Maritime Commission in 1947-48 is to restore private operation in accordance with the Merchant Marine Act of 1936. This requires ship sales and charters, supported by reconversion of war-built vessels and operatingdifferential subsidies. The Budget also provides for a limited amount of new construction of specialized vessels to round out the peacetime American merchant marine, and for administrative expense, surplus property disposal, maintenance of ship-yard facilities, operation of warehouses, and preservation of unrequired vessels in reserve fleets, as required by the Merchant Ship Sales Act of 1946.

Cash and contract authority will be available from prior year balances and receipts for the above-enumerated responsibilities.

Revolving fund.-Continued operation of ships for Government account is provided for only to March 1, 1947, in accordance with the act of July 23, 1946. Surplus war-built vessels are being sold or chartered as rapidly as possible, and it is estimated that approximately $\$ 1,000,-$ 000,000 of the $\$ 11,000,000,000$ speat for construction of vessels during the war will be recovered to the Treasury.

Maritime training.-This activity, although carried on by the War Shipping Administration during the war, is a statutory function of the United States Maritime Commission. It was established by amendment to the Merchant Marine Act in 1938.
The 1948 budgetary provision of $\$ 5,470,000$ for this purpose contemplates the continuance of support for State marine schools and for other federally conducted training on a reduced scale commensurate with peacetime requirements.

State marine schools.-In addition to the direct training activities of the Maritime Commission, grants are made to established State marine schools.

The appropriation for State marine schools is to provide for matching grants and per capita payments for out-ofState students, and for repairs to vessels.

The increase in the 1948 estimate is related to the item of ship repairs.

Authority for the establishment of and the payment of matching grants for the State marine schools is contained in the act of March 4, 1911.

## Employees' Compensation Commission

The functions of the Employees' Compensation Commission were transferred to the Federal Security Agency under the provisions of Reorganization Plan No. 2 of 1946, approved by Congress on July 16, 1946. A description of this program and the recommendation for the provision of funds therefor is set forth under Federal Security Agency head in this Budget.

## Veterans' Administration

The Veterans' Administration furnishes to the veterans of all wars and of the peacetime Military Establishment services consisting mainly of medical and hospital care, the payment of compensation and pensions, the administration of Government life insurance, and a number of broad new programs for veterans of World War II, namely, vocational rehabilitation for disabled veterans; protection from loss of commercial insurance policies in accordance with the Soldiers' and Sailors' Relief Act; the guaranty of loans to eligible veterans for the purchase of homes, farms, or business properties; the provision of subsistence allowances, tuition, books, fees, and educational supplies to eligible veterans who wish to obtain additional education or who desire to obtain training in a vocation; and the payment of readjustment allowances to veterans while seeking employment, or while attempting to establish themselves as self-employed, for a period after their discharge.

The extremely rapid demobilization of the armed forces following the surrender of Japan placed a tremendous burden upon the agency-one which it was practically impossible to foresee with any degree of accuracy. Consequently, supplemental appropriations of over $\$ 2,000$,000,000 will be required for the fiscal year 1947, in addition to the over $\$ 6,000,000,000$ currently available. Total appropriations required for fiscal year 1948 are estimated at almost $\$ 7,000,000,000$, or nearly $\$ 1,500,000,000$ less than now estimated for 1947.
While the estimated appropriation required for "Salaries and expenses' 'reflects a decrease of about $\$ 7,000,000$
from the " 1947 estimate, actually the proposed new appropriation "Veterans' miscellaneous benefits" includes, for 1948, $\$ 58,200,000$ of items charged to the "Salaries and expenses" appropriation in 1947. For a statement showing, by functions, comparable obligations for fiscal years, 1946, 1947, and 1948 from the "Salaries and expenses" appropriation, see page 150 . It should be noted that while total obligations increase $\$ 54,000,000$ on a comparable basis (from $\$ 838,000,000$ in 1947 to $\$ 892,000,000$ in 1948), obligations for medical, hospital, and domiciliary care increase $\$ 70,000,000$ while all other programs show a total decrease of $\$ 16,000,000$.

In general, the decrease in the programs other than for hospital and medical care is due to a somewhat decreased work load resulting from a lower number of veterans entering the various programs for the first time, although the average numbers of veterans included in the programs will be, on the whole, higher than in 1947. This is particularly true in the claims program, which includes the handling of claims from veterans or their dependents for compensation, pensions, and insurance death benefits. While considerable work will be necessary in connection with examinations and reratings of disabled veterans, the numbers of new claims will decline sharply.
Administrative expenses in connection with insurance will rise somewhat due to the necessity of eliminating backlogs of work still impeding fully satisfactory service to veterans who are carrying National Service Life Insurance.
The trends for the vocational rehabilitation and education, loan guaranty, and readjustment allowance programs, are discussed below in connection with the appropriation "Readjustment benefits."
For the hospital and medical care program, it is anticipated that the average number of beds available in 150 lospitals and homes will be increased approximately 4,252 in 1948, bringing the average to 127,810 beds. These facilities will be used to provide hospital and domiciliary care for an estimated average patient and member load of 104,172 , an increase of 10,078 over the fiscal year 1947 estimate. In addition, an average patient and member load of 24,072 will be cared for in other Government, State, and private hospitals. The out-patient activities at field stations will be expanded to take care of an estimated 8 million examinations and treatments and approximately $51 / 2$ million examinations and treatments will be provided on a fee basis through the home-town medical care program of the Administration. The special services program will provide expanded recreational activities, a fulltime chaplain service, and improved library service. Medical research activities in connection with the care of veterans hospitalized in the agency's facilities will be expanded and medical training and education authorized under Public Law 293, 79th Congress, will be provided.

The proposed new appropriation "Administrative facilities" will provide for the construction of eight regional office buildings in cities where it has been impossible to locate adequate space by other means to give proper service to veterans and their dependents.

A supplemental estimate of appropriation for "Army and Navy pensions" in the amount of $\$ 432,407,000$ is necessary in the fiscal year 1947 due largely to legislation enacted by the 79th Congress subsequent to the presentation of the 1947 Budget. A particularly important act was Public Law 662, which increased all compensation and pension payments to veterans of both World Wars, and their dependents, by 20 percent. The total numbers on the compensation and pension rolls are as follows: :June

30, 1946 (actual), 2,082,056; June 30, 1947 (estimated), 2,860,934; and June 30, 1948 (estimated), 3,154,737.

The present outlook is that the fiscal year 1947 will be the peak year for "Readjustment benefits", though this is by no means certain. This appropriation covers three principal benefits which were made available to veterans under the Servicemen's Readjustment Act of 1944, as amended: (1) unemployment and self-employment allowances; (2) subsistence allowances (plus tuition, supplies, and equipment) for veterans engaged in education and training; and (3) the payment of the first year's interest, and whatever losses may be incurred, on loans to veterans guaranteed by the Veterans' Administration. The trend in the first of these three should definitely be downward after fiscal year 1947. The peak of this program, when 1,811,000 veterans were drawing unemployment allowances and 332,000 were drawing self-employment allowances, came in the summer of 1946. While there may be temporary situations which will cause the number of unemployed veterans to increase, only a major recession could bring the number drawing such benefits back to or above that peak. The estimated average number of veterans in this program for 1948 is 925,000 compared to an estimated average of $1,292,000$ for 1947.

The number of veterans drawing subsistence allowances while they are engaged in education and training will increase, however, in 1948 above the 1947 level, judging from available evidence. Although the passage of Public Law 679 of the 79 th Congress seems to have slowed down the extremely rapid increases which had occurred in the number of veterans engaged in training on the job, there will probably still be an appreciable increase in this program. The number of students engaged in institutional education will no doubt continue at close to the maximum capacity of the institutions, which will be somewhat higher in 1948 than in 1947. The estimated average number of veterans in the education and training program covered by this appropriation is $2,145,000$ in 1948 , compared with an estimated average of $2,000,000$ in 1947 .

It is estimated that the number of loans to be guaranteed in 1948 will be approximately $1,000,000$, which represents an average rate about 30 percent higher than the present rate.

For these three programs combined it is estinuated that the total obligations under the appropriation "Readjustment benefits" will decrease somewhat in 1948 over 1947from $\$ 3,630,295,941$ to $\$ 3,424,580,000-$ as shown in the detailed estimate of appropriation "Readjustment bene-
fits" shown on pages 151-152. This varies from the summary table at the head of this chapter because of the fact that approximately $\$ 625,000,000$ of the 1947 estimate of $\$ 4,258,962,000$ shown in the summary table was actually obligated in 1946.

The construction program for 1948 under "Hospital and domiciliary facilities" will provide 15 new hospitals with a total capacity of 11,900 beds at an estimated cost of approximately $\$ 215,000,000$. Construction estimated to cost approximately $\$ 53,000,000$ will also be undertaken in connection with the expanded program for repair, alteration, and renovation of existing facilities.

The veterans' canteen service was established under the provisions of Public Law 636, 79th Congress, and the estimate of $\$ 1,465,000$ for 1948 will provide funds for the installation of approximately 25 new canteens, bringing the total in operation at hospitals and homes to 150 by the end of fiscal year 1948.

The fiscal year 1948 will show a drastic reduction in the Government's share of the cost of national service life insurance. The National Service Life Insurance Act of 1940, as amended, provided that the Government would bear all losses suffered as a result of the hazards of war. Delays in the presentation of claims, and further delays in their award and in the process of determining if the claims were due to war hazards, plus a revaluation of previous transfers as authorized by the Insurance Act of 1946, will result in a cost of approximately $\$ 975,000,000$ in fiscal year 1947. The total cost to the Government for war hazard insurance losses is now between $\$ 3,500,000,000$ and $\$ 4,000,000,000$. Only relatively minor additional losses are expected after the current fiscal year.

As mentioned above, a proposed new appropriation "Veterans' miscellaneous benefits" will assume charges for burial awards, and for tuition, supplies, and equipment for disabled veterans undertaking training under the Vocational Rehabilitation Act, such items being previously charged to the "Salaries and expenses" appropriation. The size of these items, and the fact that the agency has no administrative control over the amounts, indicates the desirability of handling them separately.

The geographical decentralization of the Administration, begun in fiscal year 1946, will be substantially complete in fiscal year 1947, with all 13 branch offices on a full operating basis beginning in January of 1947. Further refinements in the organizational plan may be expected in fiscal year 1948 to improve service to veterans and to decrease administrative costs.

## ESTIMATES OF APPROPRIATION

## executive office of the president

## COMPENSATION OF THE PRESIDENT

Salary of the President-
For compensation of the President of the United States, \$75,000. (3 U. S. C. 42; Act of Mar. 28, 1946, Public Law 994.)

Annual appropriation, general account:
Appropriated 1947, \$75,000
Estimate 1948, \$75,000

## THE WHITE HOUSE OFFICE

## Salaries and Expenses, The White House Office-

Salaries and expenses: For [all] expenses necessary for The White House Office, including compensation of the Secretary to the President, the two additional secretaries to the President and the six administrative assistants to the President at $\$ 10,000$ each, and jther personal services in the District of Columbia; not to exceed $[\$ 3,000] \$ 2,000$ for deposit in the general fund of the Treasury for
cost of penalty mail as required by [section 2 of] the Act of June 28, 1944 [(Public Law 364)]; automobiles; printing and binding; and travel and official entertainment expenses of the President, to be accounted for on his certificate solely [\$883,660: Provided, That of the \$1,650,000 appropriated in the First Deficiency Appropriation Act, 1946 (Public Law 269, Seventy-ninth Congress, ch. 589 , first session), under the head "Executive Office of the President" and the subhead "Executive Mansion and Grounds" for an addition to the Executive Mansion, alterations, improvements, and furnishings and improvement of grounds, $\$ 970,000$ shall be returned to the Treasury, and of the remaining unexpended balance of said appropriation of $\$ 1,650,000$ no part shall be used for an addition to the West Executive Office], $\$ 952,500$ : Provided [further], That employees of the departments and independent offices of the executive branch of the Government may be detailed from time to time to The White House Office for temporary assistance. (3 U.S. C. 45 ; 31 U. S. C. 588 ; 3 U. S. C. 43; Act of Aug. 2, 1946, Public Law 600; Act of Mar. 28, 1946.)

Annual appropriation, general account:
Appropriated 1947, \$883,660
Estimate 1948, \$952,500

## [office of price administration]

## Salaries and Expenses, Office of Price Administration-

[Salaries and expenses: For all necessary expenses of the Office of Price Administration in carrying out the provisions of the Emergency Price Control Act of 1942, as amended by the Act of October 2, 1942 ( 50 U. S. C. App. 901), and the provisions of the Act of May 31, 1941 ( 55 Stat. 236), as amended by the Second War Powers Act, 1942 ( 50 U. S. C. App. 622), and Acts amending or supplementing such Acts, and all other powers, duties, and functions which may be lawfully delegated to the Office of Price Administration, including personal services in the District of Columbia and elsewhere; lawbooks, books of reference, newspapers, and periodicals; expenses of in-service training of employees, including salaries and traveling expenses of instructors; not to exceed $\$ 55,000$ for the employment of aliens; not to exceed $\$ 30,000$ for the temporary employment of persons or organizations, by contract or otherwise, without regard to section 3709, Revised Statutes, or the civil-service and classification laws; contract stenographic reporting services without regard to said section 3709; witness fees; printing and binding (not to exceed $\$ 790,290$, which limitation shall not apply to the printing of forms prescribed for use of trade or public, instructions, regulations, coupon books, price lists, and printing required for the conduct of litigation); not to exceed $\$ 300,000$ for test purchases of commodities, services, or ration currency for enforcement purposes, authorization in each case to have approval prior to purchase of the Administrator, regional administrator, or the district director in the region or district in which the purchase is contemplated; traveling expenses (not to exceed $\$ 7,674,330$ ), including reimbursement, at not to exceed 4 cents per mile, of employees for expenses incurred by them on official travel in privately owned automobiles within the limits of their official stations, expenses of appointees from point of induction in continental United States to their first post of duty in the Territories and return and expenses of attendance at meetings of organizations concerned with the work of the Office of Price Administration; hire, maintenance, operation, and repair of passenger automobiles; not to exceed $\$ 2,509,000$ for deposit in the general fund of the Treasury for cost of penalty mail as required by section 2 of the Act of June 28, 1944 (Public Law 364); fiscal year 1947, $\$ 75,000,000$ : Provided, That the aggregate of expenditures of any kind directly incident to informational functions shall not exceed for the period of the fiscal year $\$ 1,750,000$ : Provided further, That no part of the funds appropriated in this paragraph shall be used to pay the salary of any person engage 4 in preparing or disseminating general propaganda in support of price control: Provided further, That within thirty days after the enactment of legislation extending the termination date of the Office of Price Administration beyond June 30, 1946, the Director of the Bureau of the Budget shall reconsider the

## OFFICE FOR EMERGENCY MANAGEMENT-Continued

Office of Temporary Controls-Continued
[office of price administration]-continued
Salaries and Expenses, Office of Price Administration-Continued estimate of appropriation contained in House Document Numbered 653, Seventy-ninth Congress, and within such period of thirty days make such revision (in no case upward) of the component parts and within the total amount thereof as would, in his judgment, enable compliance with the provisions of such legislation, and such revision shall be published promptly in the Federal Register and shall be binding upon the Office of Price Administration: Provided further, That obligations in pursuance of such revision, if justified thereby, may be incurred at quarterly rates not exceeding (except for liquidation expenses and the added cost of the Federal Employees Pay Act of 1946) those that would have been permissible under an appropriation made in accordance with the estimate of appropriation contained in the afore-mentioned House Document Numbered 653: Provided further, That no part of this appropriation shall be used for the compensation of any officer, agent, clerk, or other employee of the United States who shall divulge or make known in any manner whatever to any person the operations, style of work, or apparatus of any manufacturer or producer visited by him in the discharge of his official duties, or the amount or source of income, profits, losses, expenditures, or any particular thereof, set forth or disclosed in any questionnaire, report, return, or document, required or requested to be filed by order or regulation of the Administrator or to permit any questionnaire, report, return, or document or copy thereof or any book containing any abstract or particulars thercof to be seen or examined by any person except as provided by law; nor for any person who shall print or publish in any manner whatever, except as hereinafter provided, any questionnaire, report, return, or document or any part thereof or source of income, profits, losses, expenditures, or methods of doing business, appearing in any questionnaire, report, return, or document: Provided further, That the foregoing provisions shall not be construed to prevent or prohibit the publication or disclosure of studies, graphs, charts, or other documents of like general character wherein individual statistics or the source thereof is not disclosed or identified directly or indirectly nor to prevent the furnishing in confidence to the War Department, the Navy Department, or the United States Maritime Commission, such data and information as may be requested by them for use in the performance of their official duties: Provided further, That no par of this appropriation shall be available for making any subsidy payments: Provided further, That no part of this appropriation shall be used to enforce any maximum price or prices on any agricultural commodity or any commodity processed or manufactured in whole or substantial part from any agricultural commodity, including milk and its products and livestock, unless and until (1) the Secretary of Agriculture has determined and published for each agricultural commodity the prices specified in section 3 (a) of the Emergency Price Control Act of 1942, as amended by Public Law 729, approved October 2, 1942, as amended; (2) in case of A comparable price for such agricultural commodity, the Secretary of Agriculture has held public hearings and determined and published such comparable price in the manner prescribed by section 3 (b) of said Act as amended; and (3) the Secretary of Agriculture has determined after investigation and proclaimed that the maximum price or prices so established on any such agricultural commodity, including milk and its products and livestock, will reflect to the producer of such agricultural commodity a price in conformity with section 3 (c) of said Act as amended: Provided further, That such maximum price or prices shall conform in all respects to the provisions of section 3 of Public Law 729, approved October 2, 1942, as amended: Provided urfther, That any employee of the Office of Price Administration is authorized and empowered, when designated for the purpose by the head of the agency, to administer to or take from any person an oath, affirmation, or affidavit when such instrument is required in connection with the performance of the functions or activities of said Office: Provided further, That no part of this appropriation shall be directly or indirectly used for the payment of the salary or expenses of any person who directs the formulation of any price policy, maximum price, or price ceiling with respect to any article or commodity unless, in the judgment of the Administrator, such person shall be qualified by experience in business, industry, or commerce; but this limitation shall not apply to the Administrator or Acting Administrator as the case may be, in considering, adopting, signing, and promulgating price policies, maximum prices, or price ceilings formulated and prepared in compliance herewith: Provided further, That none of the funds appropriated in this Act shall be used to pay the salary or expenses of any person fixing maximum prices for different kinds, classes, or types of processed fruits and vegetables which are described in terms of specifications or standards, unless such specifications or standards were, prior to such
order, in general use.] (Act of July 23, 1946, Public Law 521; Act of Aug. 8, 1946, Public Law 663.)

## Franklin D. Roosevelt Library, Income Account-

The joint resolution to provide for the establishment and maintenance of the Franklin D. Roosevelt Library (53 Stat. 1062-1066) establishes a Board to be known as the Trustees of the Franklin D. Roosevelt Library and authorizes it to accept gifts and bequests of personal property (sec. 205 (a) (c)). "The income from any trust funds held by the Board . . . shall be deposited with the Treasurer of the United States, who shall enter it in a special account
. subject to disbursement by the Archivist, except where otherwise restricted by the instrument of gift, in the purchase of equipment for the Franklin D. Roosevelt Library; in the preparation and publication of guides, inventories, calendars, and textual reproduction of material in the said Library; and in the purchase . . . of historical material for the said Library" (sec. 205 (d)). Proceeds from the sale of publications and duplicate printed material and from fees collected from visitors are also paid into the special account and available for disbursement by the Archivist as provided above (secs. 203, 205 (d), 207).

## SELECTIVE SERVICE SYSTEM

## Salaries and Expenses, Selective Service System-

[Salaries and expenses: For all expenses necessary for the operation and maintenance of the Selective Service System as authorized by the Selective Training and Service Act of 1940 (50 U. S. C. App. 301) ; including not to exceed $\$ 330,000$ for printing and binding; not to exceed $\$ 125,000$ for expenditure through other Federal agencies, and through State agencies without regard to section 3648 of the Revised Statutes, for gathering of medical and social history information on registrants; personal services in the District of Columbia and elsewhere; contract stenographic reporting services; lawbooks, books of reference, newspapers, and periodicals; purchase (not to exceed sixty), maintenance, operation, and repair of passenger automobiles; not to exceed $\$ 875,000$ for deposit in the general fund of the Treasury for cost of penalty mail as required by section 2 of the Act of June 28, 1944 (Public Law 364); expenses incident to the granting of nonmonetary awards, including citations, insignia, emblems, and devices, to civilian employees of the Selective Service System and others rendering service to the System in recognition of faithful and meritorious services; and, under such rules or regulations as may be prescribed by the Director of Selective Service, expenses of emergency medical care, including hospitalization, of registrants who suffer illness or injury, and the transportation, and burial, of the remains of registrants who suffer death, while acting under orders issued under the selective-service law but such burial expenses shall not exceed $\$ 150$ in any one case; fiscal year 1947 , \$27,750,000: Provided, That such amounts as may be necessary shall be available for the planning, directing, and operation of a program of work of national importance under civilian direction, either independently or in cooperation with governmental or nongovernmental agencies, and the assignment and delivery thereto of individuals found to be conscientiously opposed to participation in work of the land or naval forces, which cooperation with other agencies may include the furnishing of funds to and acceptance of money, services, or other forms of assistance from such nongovernmental agencies for the more effectual accomplishment of the work; and for the pay and allowances of such individuals at rates not in excess of those paid to persons inducted into the Army under the Selective Service System, and such privileges as are accorded such inductees: Provided further, That the travel of persons engaged in the administration of the Selective Service System, including commissioned, warrant, or enlisted personnel of the Army, Navy, Marine Corps, or their reserve components, including not to exceed $\$ 5,000$ for attendance at meetings of societies or associations for the purpose of obtaining or imparting information concerning functions of the Selective Service System and reimbursement at not to exceed 4 cents per mile of employees or others rendering service to the Government for expenses incurred by them in performance of official travel in privately owned automobiles within the limits of their official stations, may be ordered by the Director or by such persons as he may authorize: Provided further, That no person traveling hereunder shall be allowed travel expenses on the mileage basis unless such expenses are authorized by regulation of the service to which he belongs: Provided further, That within thirty days after the enactment of legislation extending the Selective Training and Service Act of 1940, as amended, the Director of the Bureau of the Budget shall reconsider the estimate of appropriation contained in House Document Numbered 641, Seventy-ninth Congress, and within such period of thirty days make such revision (in no case upward) of the total amount thereof as would, in his judgment, enable compliance with the provisions of such legislation, and such revision shall be published promptly in the Federal Register and shall be binding upon the Selective Service System: Provided further, That obligations in pursuance of such revision, if justified thereby, may be incurred at quarterly rates not exceeding (except for liquidation expenses and the added cost of the Federal Employees Pay Act of 1946) those that would have been permissible under an appropriation made in accordance with the estimate of appropriation
contained in the afore-mentioned House Document Numbered 641.] (Act of July 23, 1946, Public Law 521.)

Appropriated 1947, \$27,750,000

Claims, Judgments, and Private Relief Acts-
13 Refunds, awards, and indemnities: Obligations-1946, $\$ 363.96$.

[SEc. 202. For the purposes of the liquidation by December 31, 1946, of all of the functions of the War Shipping Administration under Executive orders 9054, 9350, 9387, 9495, and 9336, dated February 7, 1942; June 10, 1943; October 15, 1943; November 2, 1944; and April 24, 1943; effective September 1, 1946, and continuing only during the period ending December 31, 1946, all functions, powers, and duties of the War Shipping Administration, including all of the foregoing provisions in this Act relating to said Administration are hereby transferred to and shall be exercised by the United States Maritime Commission under the same legal authorities and subject to the same conditions and limitations not otherwise altered by the foregoing provisions in this Act relating to said Administration, as will be applicable to the War Shipping Administration on August 30. 1946, and the War Shipping Administration
shall cease to exist as of September 1, 1946: Provided, That effective September 1, 1946, there shall be transferred to the United States Maritime Commission the unexpended balance of all funds available to the War Shipping Administration, together with all records, property, and personnel appertaining thereto: Provided further, That the unobligated balance of the War Shipping Administration revolving fund, as of the close of business on December 31, 1946, shall be covered into miscellaneous receipts of the Treasury. 1 (Act of July 8, 1946, Public Law 492.)
[Receipts from operations of any functions of the War Shipping Administration which are transferred to the United States Maritime Commission under the terms of title II of Public Law 492, Seventyninth Congress, second session, shall be available until March 1, 1947, for obligation by the United States Maritime Commission in carrying out any such transferred operating functions as the Commission shall deem necessary, including personnel and other administrative expenses necessary to conduct such operations. 1 (Act of July 23, 1946, Public Law 521.)

Claims, Judgments, and Private Relief Acts-

## United States Government Life Insurance Fund, Veterans' Ad-

 ministration-Sec. 17. That all premiums paid on account of insurance converted under the provisions of title III hereof shall be deposited and covered into the Treasury to the credit of the United States Government life-insurance fund and shall be available for the payment of losses, dividends, refunds, and other benefits provided for under such insurance, including such liabilities as shall have been or shall hereafter be reduced to judgment in a district court of the United States. Payments from this fund shall be made upon and in accordance with awards by the director.

The Administration is authorized to set aside out of the fund so collected such reserve funds as may be required under accepted actuarial principles, to meet all liabilities under such insurance; and the Secretary of the Treasury is hereby authorized to invest and reinvest the said United States Government life-insurance fund, or any part thereof, in interest-bearing obligations of the United States or bonds of the Federal farm-loan banks and to sell said obligations of the United States or the bonds of the Federal farm-loan banks for the purposes of such fund. ## General Post Fund, Veterans' Administration-

This fund represents accumulated benefits of operations of stores, hotels, restaurants, and canteens, and rental from concessions; gifts and bequests and proceeds of property left in the care of the homes by former members; unpaid pension money standing to the credit of members of the homes, who die without pensionable heirs, and proceeds from effects of members of the homes who die leaving no heirs or next of kin and without having disposed of their estate by will. Such funds are available upon authorization of the Administrator of Veterans' Affairs for construction of chapels, amusement halls, and for other objects to promote the comfort and welfare of the veterans at the various hospitals and homes in cases where no general appropriation is available. ## INDEPENDENT OFFICES-GENERAL PROVISIONS

Sec. 102. During the fiscal year ending June 30, [1947] 1948, the salaries of the Commissioners of the United States Tariff Commission shall be at the rate of $\$ 10,000$ each per annum.

Sec. 103. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages
in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from
any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or inprisoned for not more than one year, or both: Provided futher, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 104. No part of any appropriation or authorization in this Act shall be used to pay any part of the salary or expenses of any person whose salary or expenses are prohibited from being paid from any appropriation or authorization in any other Act; but this prohibition shall be effective only during the period for which such prohibition in such other Act is effective.

Sec. 105. Where appropriations in this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations.

Sec. 106. Where appropriations in this Act are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $\$ 50$ : Provided That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.

SEc. 107. No part of any appropriation contained in this Act shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the armed forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 108. Appropriations contained in this Act, available for expenses of travel, shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made.

## TITLE II-GENERAL PROVISIONS

[Sec. 201. (a) Appropriations for the fiscal year 1947 available for expenses of travel of civilian officers and employees of the executive departments and independent establishments shall be available also for expenses of travel performed by them including expenses of transportation of their immediate families in accordance with regulations prescribed by the President, on transfer from one official station to another for permanent duty when authorized by the head of the department or establishment concerned in the order directing such transfer: Provided, That such expenses shall not be allowed for any transfer effected for the convenience of any officer or employee. 1
(b) Appropriations of the executive departments and independent establishments for the fiscal year 1947 available for the transportation of things shall be available, in accordance with the Act of October 10, 1940 (5 U.S. C. $73 \mathrm{c}-1$ ), for expenses incurred in the transfer of household goods and effects of civilian officers and employees of such departments and establishments when transferred from one official station to another for permanent duty. $]$
[(c) Appropriations contained in this Act, available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriationgconcerned is made. 1
[(d) Appropriations of the executive departments and independent establishments for the fiscal year 1947 a vailable for expenses of travel shall be available for the payment of travel expenses while away from their homes or regular place of business, including per diem in lieu of subsistence at place of employment, in accordance with the Standardized Government Travel Regulations, the Subsistence Expense Act of 1926, as amended (5 U. S. C., ch. 16), and the Act of February 14, 1931, as amended (5 U.S. C. 73a), of (1) persons employed intermittently as consultants or experts and receiving compensation on a per diem when-actually-employed basis, and (2) persons serving in an advisory capacity or employed without compensation or at $\$ 1$ per annum; except that in case of (2) above there may be allowed not to exceed $\$ 10$ per diem in lieu of subsistence en route and at place of service or employment, unless a higher rate is specifically provided by law.]
[SEc. 202. Unless otherwise specifically provided, no appropriation available for the executive departments and independent establishments for the fiscal year 1947 in this Act or any other Act, shall be expended-1
[(a) To purchase any motor-propelled passenger-carrying vehicle (exclusive of busses, ambulances, and station wagons), at a cost, completely equipped for operation, and including the value of any vehicle exchanged, in excess of the maximum price therefor established by the Office of Price Administration and in no event more than $\$ 1,050$, which amount shall be in addition to the amount required for transportation.]
[(b) For the maintenance, operation, and repair of any Gov-ernment-owned motor-propelled passenger-carrying yehicle not used exclusively for official purposes; and "official purposes" shall not include the transportation of officers and employees between their domiciles and places of employment, except in case of medical officers on out-patient medical services and except in cases of officers and employees engaged in field work the character of whose duties makes such transportation necessary and then only as to such latier cases when the same is approved by the head of the department or establishment concerned. Any officer or employee of the Government who willfully uses or authorizes the use of any Governmentowned motor-propelled passenger-carrying vehicle, or of any motorpropelled passenger-carrying vehicle leased by the Government, for other than official purposes or otherwise violates the provisions of this subsection shall be suspended from duty by the head of the department or establishment concerned, without compensation for not less than one month, and shall be suspended for a longer period or summarily removed from office if circumstances warrant
The limitations of this subsection (b) shall not apply to any motor vehicles for official use of the President, the heads of the executive departments, Ambassadors, Ministers, chargés d'affaires, and other principal diplomatic and consular officials.]

SEC. 201. Unless otherwise specifically provided, the maximum amount allowable, in accordance with section 16 of the Act of August Q, 1946 (Public Law 600), for the purchase of any passenger motor vehicle (exclusive of busses, ambulances, and station wagons), is hereby fixed at $\$ 1,300$.
[Sec. 203. Excepting appropriations for the Military and Nava Establishments, no appropriation for the fiscal year 1947 in this or any other Act shall be available for the purchase, maintenance, or operation of any aircraft unless specific authority for the purchase maintenance, or operation thereof has been or is provided in such appropriation, and the acquisition of aircraft by any agency by transfer from another agency of the Government shall be considered as a purchase within the meaning hereof.I
[Sec. 204. In purchasing motor-propelled or animal-drawn vehicles or tractors, or road, agricultural, manufacturing, or laboratory equipment, or boats, or parts, accessories, tires, or equipment thereof, the head of any executive department or independent establishment or his duly authorized representative may exchange or sel similar items and apply the exchange allowances or proceeds of sales in such cases in whole or in part payment therefor: Provided, That any transaction carried out under the authority of this section shall be evidenced in writing. 1
[SEC. 205. Section 3709, Revised Statutes (41 U. S. C. 5), shall not apply to any purchase by or service rendered to any executive department or independent establishment during the fiscal year 1947 when the aggregate amount involved does not exceed $\$ 100$ but this section shall not be construed as affecting any provision of law authorizing purchases or services without regard to said section 3709 in amounts greater than $\$ 100.1$

SEC. [206] 202. Unless otherwise specified and until July 1, [1947] 1948, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship had filed a declaration of intention to become a citizen of the United States prior to such date, or (3) is a person who owes allegiance to the United States: Provided, That for the purpose of this section an'affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: Provided further, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided fuither, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: Provided further, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Commonwealth of the Philippines or to nationals of those countries allied with the United States in the prosecution of the war.

Sec. [207] 203. Appropriations for the executive departments and independent establishments for the fiscal year [1947] 1948
available for travel expenses shall be available for the payment of per diem allowances in lieu of subsistence expenses without regard to the Subsistence Expense Act of 1926, as amended (5 U. S. C. 821-833), to civilian officers and employees of such departments and establishments while traveling on official business outside the continental limits of the United States and away from their designated posts of duty: Provided, That the amount of such allowances shall be determined by the head of the department or independent establishment concerned or by such official as he may designate for the purpose, but shall in no case, notwithstanding any other provision of law, exceed the maximum established by regulations prescribed by the President for the locality in which the travel is performed [: Provided further, That the availability of appropriations of the War and Navy Departments with respect to the foregoing shall not be restricted thereby].
[Sec. 208. The provision of law prescribing the use of vessels of United States registry by employees of the Government traveling overseas ( 46 U. S. C. 1241) shall not apply to such travel during the fiscal year 1947.]

SEC. [209] 204. Appropriations of the executive departments and independent establishments for the fiscal year [1947] 1948, available for expenses of travel or for the expenses of the activity concerned, are hereby made available [(1) for allowances for living and quarters in accordance with Standardized Regulations prescribed by the President for civilian officers and employees of the Government temporarily stationed in foreign countries, (2)] for living quarters allowances in accordance with the Act of June 26 1930 ( 5 U. S. C. 118a), and regulations prescribed thereunder, and [(3)] cost of living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946 , in accordance with [the Act of February 23, 1931, as amended ( 22 U. S. C. 12), and regulations prescribed thereunder 1 and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: Provided, That the availability of appropriations of the [Departments of War and Navy and of the] Department of State under the caption "Foreign Service" shall not be affected hereby.

Sec. [210] 205. No part of any appropriation for the fiscal year [1947] 1948 contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve of the nomination of said person.
[Sec. 211. The funds appropriated in the appropriation Acts for the fiscal year 1947 of the services mentioned in the title of the Act of June 16, 1942 ( 56 Stat. 359), shall be available for, and the heads of the executive departments concerned are authorized to prescribe, per diem rates of allowance, at rates not to exceed $\$ 7$ per day, in lieu of subsistence to officers traveling on official business and away from their designated posts of duty, including such per diem allowances for travel without regard to repeated travel between two or more places in the same vicinity, and to members of the services concerned .(including officers, warrant officers, contract
surgeons, enlisted personnel, aviation cadets, and members of the Nurse Corps) when traveling by air under competent orders and on duty without troops; and for the payment in advance, or otherwise, of money allowances in lieu of transportation, at the rate of 3 cents per mile to enlisted men, regardless of the mode of travel.]

Sec. [212] 806. No part of any appropriation contained in this or any other Act shall be used to pay in excess of $\$ 2$ per volume for the current and future volumes of the United States Code Annotated or in excess of $\$ 3.25$ per volume for the current or future volumes of the Lifetime Federal Digest.
[Sec. 213. In order to enable persons who have served ninety days or more in the land or naval forces during the present war, and who have satisfactorily completed their period of active military or naval service, to obtain materials required for the construction, alteration, or repair of dwelling houses to be occupied by them, any department or agency of the Government, in allocating or granting priorities with respect to any materials, shall give to such persons a preference over all other users of such materials (except to the extent such materials are needed by such other users to meet actual military needs), without requiring any showing of hardship or other necessity for the construction, alteration, or repair of such dwelling houses.] (Act of Mar. 28, 1946, Public Law 334.)
[Sec. 402. Nothing contained in this or any other Act shall be construed to alter, or modify in any manner whatsoever, the aggregate maximum personnel ceilings established by section 14 (a) of the Federal Employees Pay Act of 1946 (Public Law Numbered 390 ), nor to authorize the compensation of a greater aggregate number than the number provided for in the aforesaid Act. In the case of any activity within the purview of such Act whose personnel may be and is increased in consequence of appropriations or funds made available in or in pursuance of this or any other Act, the Director of the Bureau of the Budget shall recommend and effectuate such reduction in personnel in such other activity or activities as he may deem advisable as will offset any such increase in personnel: Provided, That if the Director of the Bureau of the Budget shall find and so certify to the President that any such offsetting reduction would be inimical to the public interest, such offsetting reduction, subject to the President's approval, may be waived in whole or in part in writing by the Director of the Bureau of the Budget, and such action by such official shall be published promptly in the Federal Register with a statement of the reasons therefor: Provided further, That there may be exeluded from the aggregate personnel ceilings established by section 14 (a) of the Federal Employees Pay Act of 1946, in addition to any exclusions otherwise provided, not more than six thousand five hundred and seventythree positions, to the extent that all or any part of such number may be determined by the Director of the Bureau of the Budget to be essential to the effectuation of the Veterans' Emergency Housing Act of 1946, the Federal Airport Act, and the Philippine Rehabilitation Act of 1946, and to enabling the rendition of essential service by the Public Buildings Administration to the Veterans' Administration and the War Assets Administration. $]$

## FEDERAL SECURITY AGENCY

## Comparative Summary of Appropriations and Appropriation Estimates

Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due
to circumstances virtually beyond administrative control. To the extent that such expenses cannot be absorbed within presently available funds, supplemental appropriations to circumstances virtually beyond administrative control. To the extent that such expenses cannot be absorbed within presently available funds, supplemental appropriation will be required. The latest estimates of amounts so required are shown in the detail schedules for the various appropriation titles and in a separate column of the table below]

[^40]
## EXPLANATORY STATEMENT

## GENERAL STATEMENT

Prior to 1939, the Federal agencies responsible for the ddministration of social programs were widely scattered is independent units throughout the Government. In hat year Reorganization Plan No. 1 established the Federal Security Agency, bringing together under coordirated direction a large number of these programs. Reor;anization Plan No. 2 of 1946, approved by Congress fuly 16, 1946, has as its purpose further improvement in he administration of social programs and the establish-
ment of uniform standards and procedures for grants-in-aid programs.

The latter plan transferred to the Federal Security Administrator the health and welfare functions of the Children's Bureau and the vital statistics functions of the Bureau of the Census, the latter to be performed through the Public Health Service; abolished the United States Employees' Compensation Commission, transferred its functions to the Federal Security Administrator and established a three-member board of appeals; abolished the Social Security Board, vesting its functions in the

Federal Security Administrator; and abolished the Office of Assistant Commissioner of Education, vesting its functions in the Commissioner of Education. It abolished the Federal Board of Vocational Rehabilitation and the Board of Visitors of Saint Elizabeths Hospital and all their functions. It provided for consolidation of vocational rehabilitation functions by transferring certain activities for the blind from the Office of Education to the Federal Security Administrator.

## American Printing House for the Blind

The amount recommended for this institution located at Louisville, Ky., has been appropriated annually since 1937. This entire amount is used for the manufacture of Braille books, phonograph records, and Braille typewriters for free distribution to schools for the blind throughout the country. Financing of additional material produced for the blind is provided for by sales.

## Bureau of Employees' Compensation

The funds recommended in the estimate for "Salaries and expenses" cover the operating expenses of the Bureau of Employees' Compensation and the Employees' Compensation Board of Appeals. These organizations, both within the Federal Security Agency, are the successors to the United States Employees' Compensation Commission, as provided under Reorganization Plan No. 2 of 1946, approved by Congress on July 16, 1946. This plan provided for the abolition of the Commission and the transfer of its functions to the Federal Security Agency.
Under the reorganization, the Bureau of Employees' Compensation adjudicates all matters under (1) the Federal Employees' Compensation Act, approved September 7,1916 , which provides for payment of compensation to Federal employees for injuries or death sustained in the course of employment, (2) the Longshoremen's and Harbor Workers' Act, approved March 4, 1927, and subsequently amended, which provides for supervision by the Bureau of compensation payments by insurance carriers to covered workers for injury or death occurring upon the navigable waters of the United States (including any drydock) if not covered by a State law, which covers all private employment in the District of Columbia, and which covers employees of Government contractors engaged at military bases outside the United States, (3) the act of December 2, 1942, as amended, providing compensation benefits to employees of Government contractors and persons engaged by the United States under personal service contract outside continental United States, whose injury or death results from war risk hazard, and accrual of wages by any such employees held by the enemy or missing or not returned to their homes because of failure of the United States and its contractors to furnish transportation.
The Employees' Compensation Board of Appeals handles appeals filed from adjudications made by the Bureau of Employees' Compensation with respect to the Federal Employees' Compensation Act, approved September 7, 1916.
The 1948 budget is based on (1) declining loads under the Federal Employees' Compensation Act reflecting the expected reduction in Federal employment, (2) the anticipation that work loads under the Longshoremen's and Harbor Workers' Compensation Act will show some decrease but will remain fairly heavy in connection with formal and informal hearings; (3) sharply decreasing loads arising out of the war-risk hazard program, and (4) the completion of the accrued wage-payment program during
the fiscal year 1947. Of the net decrease of $\$ 3,127,000$ for the fiscal year 1948, the completion of the accrued wagepayment program accounts for $\$ 2,600,000$.

## Columbia Institution for the Deaf

This institution provides instruction for deaf persons below college level at Kendall School and in college subjects at Gallaudet College. The District of Columbia contributes to Kendall School for the education of students who are legal residents. Congress provides free scholarships to Gallaudet College for qualified students from the States and Territories. Little change in program has been made in recent years or contemplated for 1948 pending the completion of a special survey, being made by Federal Security Agency.

## Food and Drug Administration

Needed increase in this regulatory activity was deferred during the war. The level of appropriations, approximately 6 percent higher for 1948, contemplates resumption of this deferred expansion and provision for the many problems that have developed in the interim. Rapid deterioration in quality standards and in sanitary conditions, and the revival and expansion of imports requiring careful inspection have substantially increased the burden of the Food and Drug Administration. For 1948, the appropriations "Enforcement operations" and "General administration" lave been combined for the sake of simplification into a single appropriation, "Salaries and expenses." The appropriation "Certification services" is covered by fees deposited as miscellaneous receipts in the Treasury. The appropriation "Sea food inspectors" is the regular contribution made by the Federal Government to the inspection service provided, upon request, to packers of shrimp and oysters.

## Freedmen's Hospital

This hospital renders medical and hospital care to Negroes, drawing its patients principally from the District of Columbia and adjacent counties in Virginia and Maryland. It consists of a general medical and surgical unit of 402 beds (including 54 bassinets), a tuberculosis unit of 150 beds, and an out-patient department. The hospital derives funds from Federal appropriation and from direct payment by patients. The Federal Government is reimbursed by the District of Columbia for the care of indigent legal residents of the District. The increase in the amount of the Federal appropriation estimate for 1948 is to meet increased costs resulting from staffing and equipping the hospital as recommended by the Public Health Service and the District Board of Nurse Examiners in a survey to determine requirements for the first-class operation of an acute general community and teaching hospital, a tuberculosis unit, and an approved school of nursing education. For 1948, the Government's net share in the cost of operation will be approximately 64 percent as compared with an estimated 57 percent for 1947. The estimates for the hospital are based on 84 percent utilization of the general hospital and 85 percent utilization of the tuberculosis annex.

## Howard University

Howard University receives funds from the Federal Government for the partial support of undergraduate, graduate, and specialized training. Veterans have enrolled in the current year in such numbers as to crowd all
facilities to the limit, thereby necessitating a supplemental appropriation of $\$ 275,364$ for 1947.
Two hundred and twenty-seven thousand one hundred and seventy dollars is recommended for plans and specifications of five new buildings.
To begin the construction of two new buildings, $\$ 2,022,080$ is recommended to be appropriated. In addition, it is recommended the university be authorized to contract for completion of these buildings at a total cost not to exceed $\$ 4,109,755$.

## Office of Education

The Office of Education was created in 1867 to (1) collect and publish statistics and facts to show the progress of education in the States and Territories; (2) circulate information regarding the organization and management of schools and the methods of teaching to aid in the maintenance of efficient State school systems; and (3) promote education. In addition, this Office administers Federal grants to the States for the promotion and support of vocational schools and classes in agriculture, trade and industry, distributive occupations, and home economics. It also administers Federal grants to land-grant colleges for work in the fields of agriculture, engineering, technology, and home economics.
A food conservation program for which $\$ 1,337,000$ was appropriated in 1947 is to be discontinued in 1948.
For salaries and expenses an increase of $\$ 418,180$ is recommended to provide for a better distribution of personnel in the several divisions which deal with specialized educational problems.
Although the Vocational Education Act of 1946 (Public Law 586, 79th Cong.) increased the authorization of funds for the further development of vocational education from $\$ 14,483,000$ to $\$ 29,301,739$, no increase in appropriation is recommended at this time. It is contemplated that information on the additional amounts which States and local districts can make a vailable for matching new Federal funds will be available before the end of fiscal 1947 and an amendment may be submitted at that time.

## Office of Vocational Rehabilitation

The Office of Vocational Rehabilitation was established on September 8, 1943, to carry out the expanded program of vocational rehabilitation authorized by the Vocational Rehabilitation Act amendments of 1943. This act provides for the promotion of vocational rehabilitation of disabled persons and their placement in employment. Payments are made to State agencies in accordance with plans approved by the Federal Security Administrator. State agencies provide medical, educational guidance, and other services necessary to enable a disabled individual to obtain and hold a job. Payments to States for 1948 are estimated at $\$ 19,710,000$, an increase over estimated appropriations for 1947 of $\$ 4,967,000$. This will provide for a continuation of the steady rise experienced over the last several years in the number of cases served and the types of service given by the State rehabilitation agencies.

## Public Health Servicb

The activities of the Public Health Service may be divided into four groups as follows: medical care, Stateaid programs, research, and related activities. Total 1948 financial requirements exceed those for 1947 by approximately 55 percent.

## MEDICAL CARE

The Public Health Service operates marine hospitals, narcotic hospitals, and relief stations, furnishes medical services to the Coast Guard, and provides miscellaneous services to other Federal agencies. The marine hospitals and relief stations, operated by the Hospital Division, render medical, dental, and hospital care to beneficiaries of the Public Health Service as prescribed by law ( 42 U. S. C. ch. 6A). Principal beneficiaries are merchant seamen and members of the United States Coast Guard. In 1948 it is anticipated that the hospital patient load will decrease approximately 3 percent due principally to reduction in the estimated strength of the merchant marine. A sanatorium is also operated for the care of leprous persons. The Hospital Division also furnishes professional personnel on a reimbursable basis for medical programs of other Federal agencies, such as the Office of Indian Affairs and the Bureau of Employees' Compensation.
The Division of Mental Hygiene operates two hospitals which provide care for drug addicts and other mental patients and also furnishes clinical psychiatric services to the Juvenile Court, District of Columbia. As provided by Reorganization Plan No. 3, 1946, Army and Navy mental patients formerly cared for by Saint Elizabeths Hospital became the responsibility of the War and Navy Departments, respectively, and are being cared for in the Mental Hygiene Division hospitals on a reimbursable basis. The 1948 budget envisions little change in the patient loads of these two hospitals with a decrease in the Navy patient-days being offset by an increase in the addict patient load.
The 1948 budget includes an estimate for the first time for the Public Health Service to carry out its responsibilities under the act to provide for health programs for Government employees (Public Law 658, 79th Cong.). The estimate provides the personnel for conducting surveys and preparing the Public Health Service recommendations which are required by law before the Federal agencies may establish preventive health programs for their employees. Funds are also included for the operation of an employee health program for Public Health Service employees located in the Washington, D. C., metropolitan area. No funds have been included for furnishing other Federal agencies with tuberculosis and psychiatric examinations, health and nutrition instruction, or in-service training of agency health personnel as it is contemplated that such services will be furnished only on a reimbursable basis. These services are provided in the District of Columbia in 1947 without charge.

## STATE-AID PROGRAMS

State-aid programs to provide health services of various kinds throughout the Nation, are carried out by means of monetary grants-in-aid, grants of services, demonstrations, consultative services, and training programs. These activities also include direct operations by the Public Health Service, with the approval and cooperation of State and local authorities, against specific diseases, including malaria, typhus, plague, diarrheal infections, poliomyelitis, and others.
In line with the enactment of the Public Health Service Act ( 42 U. S. C. ch. 6 A ) appropriations for the Bureau of State Services, including control of venereal diseases, control of tuberculosis, general assistance to States, and
control of communicable diseases, were substantially increased in fiscal year 1947, compared with funds previously appropriated. The estimates for these programs for the fiscal year 1948 will permit operations to be carried on at approximately the same level as will be reached in the current year under the increased funds which have been made available. In addition, estimates appear in the budget for the first time in 1948 to implement two important laws passed by the Seventy-ninth Congress-the National Mental Health Act (Public Law 487) and the Hospital Survey and Construction Act (Public Law 725). For the National Mental Health Act, $\$ 3,000,000$ is the estimated requirement for the appropriation for general assistance to States, with supplemental amounts for consultative services, demonstrations, and administration. This requirement excludes approximately $\$ 2,900,000$ for mental health training and research, discussed below.

Funds are provided in fiscal year 1948 for carrying out the provisions of the Hospital Survey and Construction Act, approved August 13, 1946. The Public Health Service has been designated as the administrative agency to assist the several States through grants-in-aid to (1) inventory existing hospitals and health facilities, (2) survey needs for the construction of additional facilities, and (3) plan and complete such construction. To accomplish these purposes, Public Law 725 authorizes matched grants consisting of one-third Federal funds and twothirds State and/or local funds.

## RESEARCH

The Public Health Service promotes the development of research in two ways: Through research carried on by the Public Health Service itself, mainly at the National Institute of Health and the National Cancer Institute (to which will be added, when facilities are constructed, the National Institute of Mental Health); and through research grants-in-aid to universities, scholars, and various other recipients other than the Public Health Service. Experience with Federal aid to research during the war indicates that this is a highly desirable channel for the expenditure of Federal funds for this purpose. In 1948, a total of $\$ 10,500,000$ is recommended for research grants-in-aid for the National Institute of Health, National Cancer Institute, and for mental health activities, compared with a little over $\$ 3,500,000$ appropriated in 1947. Funds for direct research operations of the National Institute of Health, National Cancer Institute, and National Institute of Mental Health total $\$ 6,200,000$ in 1948, compared with approximately $\$ 4,500,000$ estimated to be available in 1947. In connection with research activities, the Public Health Service engages in the manufacture of vaccines for certain diseases, particularly yellow fever, typhus, and Rocky Mountain spotted fever, and in the control of the manufacture and sale of viruses, serums, toxins, and similar products.

## RELATED ACTIVITIES

Related activities of the Public Health Service include the foreign quarantine service, international health relations, sanitary engineering programs, public health methods work, training activities, including training for nurses and training of mental health personnel, National Office of Vital Statistics, and other miscellaneous projects.
There is a major decrease in the funds required in 1948 for nurses training program since enrollment in the cadet nurse corps was terminated in October 1945. Payment of
stipends to cadet nurses will be virtually completed in 1948. Completion of the auditing of nursing-school accounts will be the only major activity remaining after fiscal year 1948.

The Sanitary Engineering Division will terminate in fiscal year 1947 survey work under the appropriation for development of health facilities, permitting a reduction of requirements for this Division.
The National Mental Health program cannot be fully developed without additional qualified personnel. The 1948 estimate for mental health activities includes $\$ 2,500,000$ for grants for training such personnel.
Several programs in this head are provided for in the appropriation for salaries and expenses. Contraction of studies by the Division of Public Health Methods will result in a slight decrease in funds for that division in 1948. The National Office of Vital Statistics was transferred from the Census Bureau to the Public Health Service under Reorganization Plan No. 2 of 1946; its activities in connection with more complete coverage of marriage and divorce registration figures and better processing of records of birth and death make necessary some increase in the expenses of this Office. Provision has also been made in 1948 for an increased administrative staff for the Public Health Service to eliminate serious backlogs which hamper program operations and to keep work current so that such backlogs will not again develop. In accordance with increased responsibilities of the Public Health Service, estimates for the pay of commissioned officers include authorization for an increase in the size of the regular corps.

## Saint Elizabeths Hospital

This Government-operated institution renders medical and hospital care to mental patients. The hospital is reimbursed for patients received from the District of Columbia, the Veterans' Administration, the Indian Service, and the United States Soldiers' Home. Direct beneficiaries, for whom no reimbursement is received, are principally patients composed of Federal criminals, American citizens adjudged insane in Canada, residents of the Virgin Islands, and Foreign Service officers and employees. The total patient load in Saint Elizabeths Hospital, estimated for 1948 to average 5,955 patients per day, represents approximately the same load as that estimated for the fiscal year 1947. Under Reorganization Plan No. 3 responsibility for the care of Army and Navy mental patients in Public Health Service hospitals was transferred from Saint Elizabeths to the War and Navy Departments, respectively. This plan reduced Saint Elizabeths patients in Public Health Service hospitals from 944 average daily patients in 1946 to an estimate of 41 for 1948 with a corresponding reduction in appropriated funds.

## Social Security Administration

Reorganization Plan No. 2 of 1946, approved by Congress on July 16, 1946, abolished the Social Security Board and transferred its functions, together with those of its Chairman, to the Federal Security Administrator. The Administrator was given the authority and duty to perform these functions or to direct and control their performance through such officers and employees of the Federal Security Agency as he should designate.
The Federal Security Administrator established the Social Security Administration, headed by the Commissioner for Social Security, to perform the social-security
unctions formerly performed by the Social Security 3oard and those functions of the Children's Bureau ransferred to the Agency under the Reorganization Act.
The Social Security Administration administers the everal provisions of the Social Security Act which give rotection to the individual against economic insecurity. The Bureau of Public Assistance, the Bureau of Employrent Security, the Bureau of Old-Age and Survivors nsurance, and the Children's Bureau constitute the main rogram operating arms of the Administration. In ddition, the Bureau of Accounts and Audits, the Bureau f Research and Statistics, and the Informational Service rovide service functions to the operating bureaus.

## BUREAU OF PUBLIC ASSISTANCE

Under titles I, IV, and X of the Social Security Act, 'ederal grants are made to States for old-age assistance, id to dependent children, and aid to the blind. Within mitations established under the Social Security Act and n the basis of plans approved by the Social Security Idministration, the Federal Government matches payaents made by the States to needy individuals falling rithin these categories and pays part of the cost of adninistration of these programs. Until September 30, 946 , this matching was on a $50-50$ basis. The 1946 mendments to the Social Security Act increased Federal ontributions to two-thirds of the first $\$ 15$ paid monthly 0 each recipient of old-age assistance and aid to the blind, nd two-thirds of the first $\$ 9$ for each child under the aid o dependent children program. These amendments also aised the Federal matching maximum on monthly paynents from $\$ 40$ to $\$ 45$ for old-age assistance and aid to he blind and from $\$ 18$ and $\$ 12$ to $\$ 24$ and $\$ 15$ for the irst and each succeeding child, respectively, in each famly receiving aid to dependent children. These changes in he Social Security account for a large part of the estimated ncrease in cost of this program.
Increase in case loads and average payments also conribute to the estimated increase in costs in 1948. During he war period the trend in the number of recipients was enerally downward. Beginning in fiscal year 1946 the rend was reversed; a continued rise is developing in scal year 1947 and is expected to continue through fiscal ear 1948. The average amount of payment to individals has been steadily increasing; this increase is also exected to continue through fiscal year 1948.
The increase provided for salaries of the Bureau of 'ublic Assistance will furnish the additional staff required o handle the increased work loads.

## BUREAU OF EMPLOXMENT SECURITY

The Bureau of Employment Security is that part of he Social Security Administration responsible for adainistering title III of the Social Security Act, which rovides for grants to States for unemployment comensation administration, for discharging the Adminisration's responsibility under the Federal Unemployment 'ax Act of the Interngl Revenue Code, and for administerig title XIII of the Social Security Act, which relates to econversion unemployment benefits for seamen.
Unemployment compensation is a system of payments or specified periods of time to unemployed workers who re eligible to receive benefits. The unemployment ompensation program operates under State laws and hrough State administrative systems which vary in etail but meet minimum standards established by the ocial Security Act. Benefits are paid from the proceeds
of pay roll taxes collected by the States, deposited to their separate accounts in the special unemployment trust fund maintained in the United States Treasury, and withdrawn as needed. Administrative costs of the State systems are financed by Federal grants.
Unemployment benefit payments declined after the first phase of reconversion unemployment was passed, but leveled off at a somewhat higher level than was anticipated, largely because of the more extensive coverage of workers and duration of benefits resulting from changes in State unemployment compensation laws, and because of the large wage credits built up in the period of high and steady employment recently experienced. Appropriation estimates for grants to States for 1948 total $\$ 57,586,000$; in addition $\$ 994,000$ is estimated for the payment of Federal benefits to seamen employed on Government-controlled ships prior to the coverage of such workers under State unemployment compensation laws.

## BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

This Bureau carries out a program of social insurance designed to provide some replacement of lost earning power to aged workers who retire, and to survivors of workers who die.
Its principal activities are the recording of workers' earnings, the handling of claims, and the payment of benefits.
The number of workers qualifying for benefits under the system increased rapidly during the war because of the tremendous growth in employment of all classes and ages of workers. This growth should continue although at a slower rate during periods of high industrial activity. Furthermore, many aged workers or survivors of deceased workers who otherwise might have filed for benefits during the war, but who for patriotic or economic reasons continued in employment, are expected in the next few years to take advantage of their benefit rights. These various factors will cause a material increase in the number of claims filed and in the number of beneficiaries added to the rolls as a result of which the operating costs of the Bureau will be substantially increased for 1948.
By reason of amendments to the Railroad Retirement Acts providing survivors' insurance for railroad workers, modeled after the old-age and survivors system and for the joint use of wage data under both systems, the Bureau will be required to make significant adjustments in its present program. Amendments to title II of the Social Security Act providing for servicemen's social insurance, the costs of which are to be borne by the Federal Government, will increase operating costs for the period covered by this amendment. These legislative changes will require additional funds for 1948 of $\$ 2,541,000$.
Heretofore, the financial requirements for the Bureau have been appropriated for each year and subsequently reimbursed to the Treasury by the old-age and survivors insurance trust fund. In 1947, the Congress authorized the direct payment from the trust fund of the costs of operating this Bureau. In order to bring together in a single authorization the principal costs for personnel services for this program, continuation of this authorization has been recommended for 1948 with the inclusion of certain other activities heretofore appropriated for and subsequently reimbursed by the trust fund. The additional activities included for 1948 are the salary costs of the office of the actuary, the appeals council and the oldage and survivors insurance legal staff of the office of the
general counsel. Financial requirements of this bureau to be paid from the trust fund are increasing from \$27,132,000 in 1947 to $\$ 30,219,000$ for 1948 . The administrative cost of the servicemen's social insurance ( $\$ 762,000$ ) is provided for by direct appropriation since this cost is independent of the trust fund operation.

## CHILDREN'S BUREAU

Under authority of Reorganization Plan No. 2 of 1946, the Children's Bureau, with all its functions except those relating to the child labor provisions of the Fair Labor Standards Act, was transferred from the Department of Labor to the Federal Security Agency and established as a bureau in the Social Security Administration.

The basic legislative charter gives the Bureau a mandate to investigate and report to the Nation upon matters pertaining to child life and the welfare of children. Activities include the conduct of research and the provision of information and advisory services to Federal, State, and private agencies, and to the public generally.

Title V of the Social Security Act, as amended in 1946, authorizes appropriations totaling $\$ 22,000,000$ annually (compared with previous authorization of $\$ 11,200,000$ ) for grants to States for maternal and child health services, services for crippled children, and child welfare services, which are administered by the Children's Bureau.

The Bureau also administers a program of grants to States for emergency maternity and infant care for the wives and infants of enlisted men in the lower four pay grades in the armed forces. It is proposed to commence liquidation of this activity at the beginning of fiscal year 1948; an estimate is included for expenses necessary to complete such liquidation.

CONSOLIDATED OPERATIONS AND MISCELLANEOUS EXPENSES
The increases recommended in salaries for the consolidated operations of the Administration provide princi-
pally for additional staff in regional offices, central administrative services, research and statistics, and accounts and audits. Principal reasons for the increase are additional work arising out of the 1946 amendments to the Social Security Act and the anticipated increases in the work loads of each of the constituent bureaus of the Social Security Administration. The increase in the single appropriation for miscellaneous expenses covering the entire Administration is commensurate with these increases.

## Office of the Administrator

The Administrator's staff offices have been augmented for the purpose of coordinating policy, standards, and procedures among the Agency's various grants-in-aid programs and to coordinate the relationships of the Agency with other Federal departments and agencies.

The requirements for salaries, Office of the Administrator, provide for comparatively small increases to perform the increased functions transferred to the Administrator in accordance with Reorganization Plan No. 2 of 1946.

Salaries, Office of General Counsel, reflects a reduction below fiscal 1947 requirements, resulting from the proposed payment in the 1948 fiscal year of the costs of legal services to the Bureau of Old-Age and Survivors Insurance directly from the old-age and survivors trust fund.

Central appropriations for travel, printing and binding, and penalty mail to provide for constituent units of the Agency are made to the Office of the Administrator. The increased requirements in 1948 are due mainly to increased personnel transferred to the Agency in accordance with the Reorganization Act, new programs, and expansion of existing programs.

Continued civilian war assistance requirements for 1948 result from the State Department's estimate that 15,500 American nationals and citizens will remain to be repatriated as of June 30, 1947.

## ESTIMATES OF APPROPRIATION

## AMERICAN PRINTING HOUSE FOR THE BLIND

## To Promote the Education of the Blind, Federal Security Agency-

[To enable the American Printing House for the Blind more adequately to provide books and apparatus for the education of the blind in accordance with the provisions of the Act approved February 8, 1927] Education of the blind: For carrying out the Act of August 4, 191 $\overline{9}$, as amended (20 U. S. C. 101), \$115,000. (Act of July 26, 1946, Public Law 549.)

Annual appropriation, general account:
Appropriated 1947, $\mathbf{\$ 1 1 5 , 0 0 0}$
Estimate 1948, \$115,000
11 Grants, subsidies, and contributions: Obligations-1946, 8115,$000 ; 1947, \$ 115,000$. 1948, $\$ 115,000$.
Permanent specific appropriation:

## To Promote the Education of the Blind, Interest-

The act of June 25, 1906, appropriates, out of any money not otherwise appropriated, an amount equal to interest at 4 percent per annum on a fund of $\$ 250,000$ held in trust in the Treasury for the purpose of aiding the education of the blind in the United States through the American Printing House for the Blind. Moneys so appropriated are paid semiannually to the trustees of the American Printing House for the Blind. (20 U.S.C. 101, 102; 91 U. S.C. 725s (82).)
Appropriated 1947, \$10,000 Estimate 1948, \$10,000
11 Grants, subsidies, and contributions: Obligations-1946, \$10,000; 1047, \$10,000; 1048, $\$ 10,000$.

Total, American Printing House for the Blind, general and special accounts:
Appropriated 1947, \$125,000
Estimate 1948, \$125,000

## BUREAU OF EMPLOYEES' COMPENSATION

Estimate 1948, \$4,500,000

## Trust accounts:

Coal-Tar Colors Certification Fees, Food and Drug Administration-
Under authority of section 706 of the Federal Food, Drug, and Cosmetic Act of June 25, 1938 (21 U. S. C. 376), the Federal Security Administrator provides for the listing and certification of coal-car colors upon the application and payment of fees by manufacturers Such fees are to be in an amount necessary to provide, maintain, and equip an adequate service for such purpose. This service is supported by the appropriation for "Certification services, Food and Drug Administration, Federal Security Agency." Fees are paid in advance and are either immediately deposited into the Treasury or to a special trust account for future transfer, if earned, to general funds of the Treasury, or, if unearned, are appropriated and made available for refund. Revenues on deposit in the special trust account are for refund or transfer to general funds of the Treasury. (Decision of Comptroller General, No. A44002.)
Appropriated 1947, \$24
Estimated 1948, \$24
13 Refunds, awards, and indemnities (refunds to coal-tar colors manufacturers): Obligations-1947, \$24; 1948, \$24

## Sea-Food Inspections, Food and Drug Administration-

Under authority of "An Act to amend section 10A of the Federal Food and Drugs Act of June 30, 1906, as amended" approved August 27, 1935 ( 21 U. S. C. 372a), the Federal Security Administrator provides inspection of sea-food products upon the application of packers. This service is supported in part by the appropriation "Salaries, sea-food inspectors, Food and Drug Ad ministration, Federal Security Agency," and partly by fees charged the packers which are used to employ additional inspectors and for administrative equipment and maintenance costs necessary to provide an adequate and efficient inspection service. These unearned fees are covered into the Treasury as a special trust fund and are appropriated and made available for refunds.
Appropriated 1947, \$9,686
Estimate 1948, $\mathbf{\$ 1 6 , 3 3 9}$
Revised 1947, $\mathbf{\$ 1 6 , 3 3 9}$
13 Refunds, awards, and indemnities (refunds to sea-food packers): Obligations1946, $\$ 10,246 ; 1947, \$ 16,339 ; 1948, \$ 16,339$.

Total, Food and Drug Administration, trust accounts:
Appropriated 1947, \$9,710
Estimate 1948, \$16,363

## SOCIAL SECURITY [BOARD] ADMINISTRATION-Con.

Working Fund, Federal Security Agency, Social Security Administration (Office of War Mobilization and Reconversion)-Con.

If during the fiscal year [1946 or] 1947 or 1948 functions are transferred by the Federal Security Administrator from or between any of the [said] offices or bureaus of the Social Security Administration, the Administrator may transfer from or between the Lappropriations 1 amounts herein made available for salaries for the Social Security [Board] Administration the [amounts] sums necessary for personal services in connection with the functions so transferred.

Not to exceed 5 per centum of any of the [foregoing appropriations] amounts herein made available for salaries for the Social Security [Board] Administration may, subject to the approval of the [Director of the] Bureau of the Budget, be transferred by the Administrator to any other of such [appropriations] amounts, but no [appropriation] amount may be increased more than 5 per centum thereby
[None of the moneys appropriated by this Act to the Social Security Board or to the Children's Bureau of the Department of Labor for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees. $]$

The amounts herein made available for salaries or expenses of the Social Security Administration shall be available for a health service program as authorized by the Act of August 8, 1946 (Public Law 658).

Grants to States, fiscal year 1949: For making, after May 31, 1948, payments to States under titles I, III, IV, V, and $X$, respectively, of the Social Security Act, as amended, for the first quanter of the fiscal year 1949, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under each of such titles to be charged to the appropriation therefor for the fiscal year 1949.

In the administration of titles $I, I V, V$, and $X$, respectively, of the Social Security Act, as amended, payments to a State under any of such titles for any quarter in the period beginning April 1, 1947, and ending June 30, 1948, may be made with respect to a State plan approved under such title prior to or during such period, but no such payment shall be made with respect to any plan for any quarter prior to the quarter in which such plan was submitted for approval. (Act of July 26, 1946, Public Law 549.)

Total, Social Security Administration, annual appropriations, general account:
Appropriated 1947, \$555,855,162
Estimate 1948, \$720,843,400

## OFFICE OF THE ADMINISTRATOR[, FEDERAL SECURITY AGENCY]

## OFFICE OF THE ADMINISTRATORE, FEDERAL SECURITY AGENCY1-Continued

In order that the Administrator may effectuate reorganization plans submitted and approved pursuant to the Reorganization [Act] Acts of 1939 and 1945, he may transfer to the foregoing appropriations under this title from funds available for administrative expenses of the constituent units of the Federal Security Agency such sums as represent a consolidation in the Office of the Administrator of any of the administrative functions of said constituent units: Provided, That no such transfer of funds shall be made unless the consolidation of administrative functions will result in a reduction of administrative salary and other expenses and such reduction is accompanied by savings in funds appropriated to the Federal Security Agency, which savings shall not be expended for any other purpose but shall be impounded and returned to the Treasury.

The Secretary of the Treasury is authorized to transfer to the constituent organizations of the Federal Security Agency from appropriations for travel[ing] expenses and printing and binding, Fed-
eral Security Agency, such amounts as the Administrator may request; amounts so transferred shall be set up on the books of the Treasury under suitable titles and shall be available for the same purposes and subject to the same limitations as the appropriations from which transferred: Provided, That balances of any amounts so transferred, or any part of such balances shall, upon request of the Administrator, be retransferred to the appropriations for travel [ing] expenses and printing and binding, Federal Security Agency. (Act of July 26, 1946, Public Law 549.)

Appropriations under this title available for administrative expenses (other than those exclusively for salaries) shall be available for the payment of claims pursuant to part 2 of the Federal Tort Claims Act of August 2, 1946 (Public Law 601).

## GENERAL PROVISIONS

Sec. 701. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a nember of an organization that advocates,
the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (Act of July 26, 1946, Public Law 549.)

## FEDERAL WORKS AGENCY

Comparative Summary of Appropriations and Appropriation Estimates
[Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due
to circumstances virtually beyond administrative contiol. To the extent that such experses cannot he abscrted within presently available furds, supplemental appropriations will be required. The latest estimates of amounts so required are stown in the detail schedules for the various appropriation tities and in a separate column of the table belows

$1 \$ 2,030,742$ made available by reappropriation of 1946 halance for 1947.
\% $\$ 986,112$ estimated 1947 balance available for reappropriation for 1948.
'In addition there were reappropriated $\$ 7,000,000$ for maintenance and operation of sct ools and $\$ 1,000,000$ for liquidation of defense public works.

* Estimated reappropriations of $\$ 35,700$ to cover increase in cost of mainteravce and oreration of schools and $\$ 160,800$ for liquidation of defense public works due to Public Law 390 .

## EXPLANATORY STATEMENT

## GENERAL STATEMENT

The Federal Works Agency deals with public works not incidental to the normal work of other executive establishments and administers Federal grants or loans to State and local governments or to other agencies for the planning and construction of public works.
Under the general supervision and coordination of the Federal Works Administrator, the Federal Works Agency handles public works through three constituent units, viz, Public Buildings Administration, Public Roads Administration, and Bureau of Community Facilities.
Estimates for the fiscal year 1948 reflect a transition of public works programs from wartime to peacetime programs. The estimate of appropriation for 1948 is approximately $\$ 41,000,000$ less than appropriations and estimated supplementals for 1947.

## OFFICE OF THE ADMINISTRATOR

The Office of the Administrator performs the general supervision, policy direction, and coordination of the administration of all of the activities of the Agency.

Provision is made for assisting the Administrator in the performance of these objectives by a small technical staff which covers each of the important programs and administrative functions at the staff level, and develops, establishes, and assures uniformity of policies and procedures throughout the Agency. The estimate for 1948 does not reflect any significant functional changes from 1947.

## PUBLIC BUILDINGS ADMINISTRATION

This constituent unit performs functions related to Federal public buildings and sites in respect to design and construction; lease, purchase, and custody; survey, planning, and control of space; repair, preservation, maintenance, and management; communication services (for various Government agencies); and the administration of surplus real property.

With the cessation of hostilities, the Public Buildings Administration took immediate steps to terminate its war-related activities. Security guarding and other emergency safeguarding activities were terminated and all financial transactions completed. The remaining balances of funds available for the construction of temporary and general office buildings, other than nominal amounts
required for settlements, were either rescinded or reappropriated for regular building activities. The act of June 14, 1946 (Public Law 413), which authorizes the expenditure of available funds for the design of new public building projects, enabled the Administration to initiate preparatory steps for the resumption of its normal building program.

Section 5 of this act authorizes the Commissioner of Public Buildings to maintain a survey of the use of certain Government-owned and leased office space in the larger metropolitan centers and the District of Columbia and to study and determine the extent to which consolidation, reassignment, and reallocation of office space would be advantageous to the Government. The Commissioner is also authorized to direct and prescribe the economical use or the surrender of space found to be uneconomically used in buildings operated by the Public Buildings Administration.

The appropriation for general administrative expenses provides the minimum nucleus personnel for administration of the functions summarized in the first paragraph. The increase in the estimate for 1948 will be required to cover the cost of within-grade salary advancements.

The appropriation for repair, preservation, and equipment of public buildings outside the District of Columbia, involving some 5,000 buildings, provides for normal major items of alteration and repair necessary to keep buildings in usable and efficient operating condition and for accomplishing a portion of the extensive backlog of building maintenance which was deferred because of the war.

The appropriation for salaries and expenses for public buildings and grounds in the District of Columbia and adjacent area provides for the administration, management, operation, maintenance, protection, and improvement of public buildings and grounds in the District and the area adjacent thereto. The operation includes both government-owned and leased buildings and also provides for the administration and operation of communications facilities for use of other government activities. The estimate contemplates the management of approximately $45,000, \mathrm{C} 00$ square feet of space. The program involves the release of $1,500,000$ square feet of space during fiscal year 1948.

The appropriation for salaries and expenses for public buildings and grounds outside the District of Columbia, provides for the administration, management, operation, maintenance, and protection of public buildings and grounds outside the District. The operation includes both Government-owned and leased buildings and, in addition, provides for the administration and operation of communications facilities and space and related service activities serving other governmental agencies. The estimate contemplates the release of 776,000 square feet of space leased under the decentralization program of 1942-43 and the management and operation of approximately $6,000,000$ square feet of additional space primarily for the expanded program of the Veterans' Administration. The program for 1948 contemplates the management of approximately $26,500,000$ square feet of space.

An estimate is included for continuing the program for the return of departmental functions to the seat of government. These functions were decentralized outside the District of Columbia early in the war period to provide
space for newly established war agencies and for expansion of the War and Navy Departments.
Section 2 of the above-mentioned act increases the limit of cost for the site and building for the west central heating plant in Washington, D. C., for which an estimate is included for the remaining unappropriated authorization in order to complete the plant on which work was begun prior to the war but halted due to the emergency. The only other construction estimates provided for 1948 are a proposed hospital center in the District of Columbia, the National Institute of Mental Health in Bethesda, Md., and the establishment of a geophysical institute in Alaska.

## PUBLIC ROADS ADMINISTRATION

This constituent unit, in cooperation with the highway departments of the States, the District of Columbia, Hawaii, and Puerto Rico, is responsible for the approval and development of highway systems and for the approval and supervision of an annual program of construction designed to develop and improve such systems. With the cessation of hostilities, all wartime restrictions and limitations affecting highway construction were removed, but in view of bigh contract prices a very conservative policy in approving new construction has been followed. Federal-aid highway construction is being restricted to most urgently needed work, with particular attention to highway safety.

Estimates of appropriations for the Federal-aid highway programs supervised by the Public Roads Administration represent cash required to liquidate obligations incurred under the authority of previously approved contract authorizations. The estimates of appropriations represent the remainder of the unappropriated authorizations for the prewar highway authorizations-Federalaid highway system and Federal-aid secondary or feeder roads. Of the prewar authorizations, only the appropriation item, elimination of grade crossings, would remain for additional appropriation requests beyond June 30, 1948. The Budget estimate includes $\$ 18,288,854$ for anticipated cash requirements under prewar highway authorizations, of which $\$ 5,288,854$ is reimbursement to the Federal-aid highway system appropriation for payments made on flood-relief projects.
The Federal-aid program which is being undertaken in the reconversion period following World War II is being financed largely from funds authorized by the Federal Aid Highway Act of 1944. This act authorizes for appropriation the sum of $\$ 500,000,000$ annually for each of the three successive postwar fiscal years. By House Concurrent Resolution 81, approved by the Congress October 2, 1945, the fiscal year 1946 was designated to be the first postwar fiscal year. The apportionment of the authorization of $\$ 500,000,000$ to the States for the first postwar fiscal year was made January 6, 1945, and the apportionment of a like amount for the second postwar fiscal year (fiscal year 1947) was made May 13, 1946. The authorization for each of the three fiscal years is apportioned among the States for three classes of highways, as follows:
(1) $\$ 225,000,000$ for projects on the Federal-aid highway system.
(2) $\$ 150,000,000$ for projects on a designated system of secondary and feeder roads including farm-to-market roads, rural free delivery mail, and public-school bus routes.
(3) $\$ 125,000,000$ for projects on the Federal-aid highway system in urban areas.
The estimate of $\$ 279,000,000$ provides for the anticipated cash requirements for the fiscal year 1948.

The active Federal-aid program, as of November 1, 1946, provides for the improvement of 16,770 miles of highway, the construction of 133 highway-railroad grade separations, and the protection of 267 highway-railway crossings. The estimated total cost of this work is $\$ 700,614,000$, of which $\$ 356,970,000$ is the Federal share. Of the total Federal funds involved, $\$ 112,736,000$ represents allotments from prewar highway authorizations and $\$ 244,234,000$ from funds authorized by the Federal Aid Highway Act of 1944.
The estimate of $\$ 3,000,000$ included in the Budget for public-lands highways represents the unappropriated balance of this authorization. This appropriation provides for the survey, construction, and maintenance of main roads through public lands. These funds are apportioned among those States in which the area of certain public lands is 5 percent or more of the total area.

In addition to the Federal-aid highway program, highway activities of the Public Roads Administration include cooperation with other Federal agencies in the construction of main roads in national forests and in and to the national parks, cooperation with the Central American republics in the construction of the Inter-American Highway, cooperation with the State Department and Philippine Republic in the rehabilitation and restoration of highways in the Philippines, and the repair and reconstruction of highways in Hawaii damaged or destroyed by the seismic waves of April 1946 or in the prosecution of the war.

## BUREAU OF COMMUNITY FACILITIES

This constituent unit administers programs assigned to the Agency in the field of public works which are not under the jurisdiction of the other two constituent units.

Currently assigned to this organization are the completion and settlement of the affairs of the war related community facilities program, including maintenance and disposal of over 1,000 Federal properties constructed or acquired under that program; assistance, until June 30, 1947, in the maintenance and operation of certain school facilities; advances of Federal funds to non-Federal public bodies to encourage them to prepare drawings and specifications for locally financed public works, such advances being repayable at start of construction; construction of public works in the Virgin Islands under an authorized 5 -year program; provision of educational facilities, other than housing, from Federal surpluses, to assist universities and colleges furnishing courses of training or education to veterans; and grants for the restoration of public works in the Territory of Hawaii which were damaged by the seismic waves of April 1946

The estimates included in this budget provide the amount authorized for the fiscal year 1948 for the Virgin Islands public works program as well as the unappropriated balance of the fiscal year 1947 authorization, and, funds for the continuation of the liquidation of the war related community facilities program. The estimate for Virgin Islands public works included in this Budget together with appropriations heretofore made provide for approximately half of the $\$ 10,028,420$ program authorized for this purpose.

## ESTIMATES OF APPROPRIATION

## OFFICE OF THE ADMINISTRATOR

## DEPARTMENT OF AGRICULTURE

## Comparative Summary of Appropriations and Appropriation Estimates

Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due will be required. The latest estimates of amounts so required are shown in the detail schedules for the various appropriation titles and in a separate column of the table below]

|  |  |  |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Bureau or subdivision |  |  |

${ }^{1}$ In addition, balance of $\$ 305,000$ reappropriated.
${ }^{2}$ In addition, prior year balances available.
3 Prior year balance available.
4 In addition, $\$ 42,500,000$ of prior year balance for "Exportation and domestic consumption of agricultural commodities" reappropriated.
${ }^{5}$ In addition, $\$ 100,000,000$ authorized to be transferred from 1948 appropriation for "Exportation and domestic consumption of agricultural commodities."
${ }^{6}$ Financed in 1947 by transfer of $\$ 75,000,000$ from appropriation "Exportation and domestic consumption of agricultural commodities."
${ }^{7}$ Appropriation for this program (calendar-year basis), plus prior year balances, available until June 30, 1947.
${ }^{8}$ Created by act of Aug. 14, 1946, which also abolished Farm Security Administration and transferred its functions to Farmers' Home Administration. Estimate for 1948 inludes provision for loan programs provided for in 1947 by authorization to borrow from Reconstruction Finance Corporation.
${ }^{9}$ Transferred by act of Aug. 14, 1946, from Farm Credit Administration. In addition, approximately $\$ 25,410,582$ available in 1947, consisting of reappropriation of prior year halnce ( $\$ 6,610,582$ ) and $\$ 18,800,000$ collections of principal and interest.
${ }^{10}$ In addition, approximately $\$ 65,568,710$ of prior year balances reappropriated. Of total appropriation, $\$ 75,000,000$ transferred to "National School Lunch Act."
${ }^{\prime \prime}$ Offset in part by $\$ 145,000,000$ decrease in authority to borrow from Reconstruction Finance Corporation, as showd on following page, for which direct appropriations are subtituted in 1948; also, further offset on an available funds basis by elimination of reappropriations of $\$ 133,784,292$. Thus, there is an over-all reduction, 1948 compared with 1947 , of 79,032,666.

## EXPLANATORY STATEMENT

## FUNCTIONS OF THE DEPARTMENT

The Department of Agriculture is charged with the responsibility of carrying on agricultural activities and programs concerned with rural people and with production, processing, and distribution of food and fiber in the United States and its possessions, and for the relationship of such activities and programs to those of other countries. It is directed by law to acquire and diffuse useful information on agricultural subjects in the most general and comprehensive sense.
The functions performed relate to conservation, marketing, credit, regulatory work, and research. The Department seeks to eradicate or control insects and diseases affecting plants and animals. It administers regulatory laws enacted to protect food and fiber producers, processors, and consumers. It promotes the proper use of soil and forest resources; conducts agricultural research, the results of which are made available for practical farm application through extension and experiment station work in cooperation with the States; and provides agricultural credit, assists tenants to become farm owners, and facilitates the extension of electric service to rural areas.

## THE 1948 BUDGET

Under general and special accounts, the Budget estimates for the fiscal year 1948, excluding reappropriations, show a riet increase in direct appropriations of approximately $\$ 200,000,000$. Of the increases which are included
in this amount, however, $\$ 145,000,000$ is accounted for by reason of the substitution of direct appropriations for borrowings from the Reconstruction Finance Corporation, and $\$ 20,000,000$ is brought about by the substitution of this amount of direct appropriation for crop production and harvesting loans, in lieu of the financing of these loans chiefly from collections of principal and interest. The remaining $\$ 35,000,000$ includes the sum of $\$ 15,000,000$ to establish a farm tenancy mortgage insurance fund and $\$ 19,000,000$ to initiate the program authorized by the Research and Marketing Act of 1946.

Including reappropriations and the funds authorized to be borrowed from the Reconstruction Finance Corporation, the 1948 Budget, under general and special accounts, provides about $\$ 1,169,000,000$ as compared with $\$ 1,248$,000,000 for 1947 , a reduction of $\$ 79,000,000$.

## GENERAL ADMINISTRATION AND SERVICE

Included under this head are the offices of the Secretary, Solicitor, Information, and Foreign Agricultural Relations, the Department library, and the Bureau of Agricultural Economics. The 1948 estimates indicate an increase of slightly over $\$ 1,000,000$, most of which is to cover increased costs of the Department for penalty mail and printing and binding. Small increases have been provided for the Department's health program, for acquisition of material for the library, and to cover increased costs of the Office of Plant and Operations and the distribution of bulletins and general information to farmers, the general public, and Members of Congress.

## EXTENSION SERVICE

Extension work is cooperative in that the Department and the land-grant colleges in the 48 States, Alaska, Hawaii, and Puerto Rico agree on extension plans of work under which beyond-the-classroom educational programs are carried on in rural communities. Federal funds are approximately matched by State, Territory, and local funds. Recognizing the serious economic and social problems of the rural people of Puerto Rico, an increase in payments for extension work has been provided, the total amount for Puerto Rico still being below the amount authorized by the Congress.

## AGRICULTURAL RESEARCH ADMINISTRATION

The Agricultural Research Administration comprises the offices of the Administrator and Experiment Stations and the Bureaus of Animal Industry; Dairy Industry; Plant Industry, Soils, and Agricultural Engineering; Entomology and Plant Quarantine; Agricultural and Industrial Chemistry; and Human Nutrition and Home Economics. The Administration is responsible for the general planning and coordination of research and regulatory activities of all of the agencies in the Administration, administers the Special Research Fund, and will conduct research on strategic and critical agricultural materials under Public Law 520, Seventy-ninth Congress. Taking into account reappropriations, increases totaling about $\$ 2,750,000$ are provided for 1948. Increases provide for such items as maintenance of improvements deferred because of the war, replacement of worn-out equipment, strengthening of foreign plant quarantine work and meat inspection, and for development of the National Arboretum.

## WHITE PINE BLISTER RUST CONTROL

The approximately 15 million acres of valuable fiveleafed pine forests of the United States are susceptible to blister rust attack, a destructive fungus disease of foreign origin which spends part of its life cycle on currants and gooseberries. The control program provides for the destruction of these host plants in and adjacent to the white pine forests. The amount provided for 1948 is $\$ 2,000,000$ below the 1947 appropriation, but is still almost one-third larger than the 1946 appropriation.

## FOREST SERVICE

The Forest Service is charged with the responsibility for promoting the conservation and best use of the national forests and privately owned forest lands, aggregating approximately a third of the total land area of the United States. Protection of the national forests from fire, insects, and diseases; management of their resources; forest research; and the establishment and maintenance of forest roads and trails are among the activities for which funds are provided. No material change in the level of operations is contemplated in 1948.

## FLOOD CONTROL

This program consists of upstream work in the retardation of run-off and waterflow and the prevention of soil erosion to mitigate downstream flood damage on watersheds specifically approved by the Congress. The appropriation proposed for 1948, together with balances of prior years, provides for a level of operations about $\$ 1,000,000$ below the current year.

## SOIL CONSERVATION SERVICE

The basic purpose of the Soil Conservation Service is to aid in bringing about physical adjustments in land use that will better human welfare, conserve the soil, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation. This purpose is served by the development of a well-rounded, coordinated program of soil and water conservation and land use involving the planning of individual farms, group facilities for the use and disposal of water as it affects the land, work with State-created soil conservation districts, and the application of the best known conservation practices and treatments on the different kinds of land in accordance with their needs and capabilities as shown by detailed land classification surveys. In cooperation with State agricultural experiment stations, Federal research agencies, and interested organizations and citizens, the Service conducts a practical research program designed to develop, refine, and improve soil and water conservation practices for use in its field operations.

Approximately 7 million acres of submarginal land in 33 States, basically unsuitable for cultivation, are owned by the Government and managed by the Service. These lands are improved primarily for grazing and forestry and leased to farmers and ranchers for uses consistent with the conservation and restoration of the land resources.

Additional funds are provided in 1948 for the operation of newly organized soil conservation districts, offset by a reduction in the amount provided for the purchase of surplus war equipment for district operations. An increase of $\$ 1,700,000$ is provided for the rehabilitation and repair of certain dams on the submarginal land projects in the interest of protecting life and property.

Unexpended balances for the water conservation and utilization program will provide for a continuation in 1948 of this activity at the current level without additional funds.

## PRODUCTION AND MARKETING ADMINISTRATION

Included under this head are the annual appropriations for conservation and use of agricultural land resources (the AAA program), the Sugar Act, the national school lunch program, marketing service activities, and supply and distribution of farm labor; and the permanent appropriation for exportation and domestic consumption of agricultural commodities (sec. 32).

In addition to a direct appropriation, the conservation and use program is financed in 1947 by a reappropriation of $\$ 42,500,000$ from prior year section 32 funds, and in 1948 provision is made for a transfer in the amount of $\$ 100,000,000$ from section 32 funds. This transfer provision, together with the elimination of $\$ 12,500,000$ for grass and legume seed payments, accounts for a reduction in the direct appropriation for 1948 of $\$ 70,000,000$. An increase of $\$ 1,500,000$ under the Sugar Act is provided for additional payments as a result of an estimated increase in sugar production.

The school lunch program is provided for at the same level in 1948 but is to be financed by a direct appropriation, whereas currently and heretofore section 32 funds have been used. Several nominal increases are provided for marketing service activities, but they are more than offset by a reduction in the marketing-farm-products item. No estimate is provided for the farm labor program, inasmuch as the authorizing act expires on June 30, 1947.

## FARMERS' HOME ADMINISTRATION

The Farmers' Home Administration, created by the act of August 14, 1946, is charged with the continuation of the rehabilitation and farm tenancy programs heretofore carried out by .the Farm Security Administration, which was abolished by the act, and the operation of the crop and feed loan program transferred from the Farm Credit Administration. In addition, the act creating the Farmers' Home Administration authorized a program for insuring mortgages for farm ownership loans, and the establishment of a mortgage insurance fund of $\$ 25,000,-$ 000 . An initial appropriation for this insurance fund of $\$ 15,000,000$ for 1948 is recommended. Funds for the new Administration are provided for by a direct appropriation in accordance with said act, whereas loan funds for the Farm Security Administration were provided by advances by the Reconstruction Finance Corporation, while crop and feed loans were financed principally from collections. Provision is made for carrying on these programs in 1948 at about the current level, but with a reduction of about $\$ 4,400,000$ in administrative expenses.

## RURAL ELECTRIFICATION ADMINISTRATION

The Rural Electrification Administration finances and supervises self-liquidating loans for constructing rural
electric facilities to serve rural people who do not have central station electric service. For the most part, these loans are made to local cooperatives organized to furnish the service. The same amount of loan funds are provided for 1948, a part of which funds, however, will be provided by a direct appropriation in 1948 whereas all the 1947 loan funds are being advanced from the Reconstruction Finance Corporation.

## FARM CREDIT ADMINISTRATION

The Farm Credit Administration conducts a national program of agricultural credit. The program is administered through a central group known as the "Administration," which supervises and coordinates the activities of (1) the Federal Farm Mortgage Corporation, 12 Federal intermediate credit banks, 12 production credit corporations, and the Regional Agricultural Credit Corporation, all of which are wholly owned Goviernment corporations; (2) 12 Federal land banks; (3) 12 district banks for cooperatives and the Central Bank for Cooperatives; (4) the joint stock land banks; and (5) a direct lending activity under the Agricultural Marketing Act revolving fund. Crop and feed loan activities have been transferred to the new Farmers' Home Administration. No important changes in these credit activities are contemplated for 1948.

## OFFICE OF THE SECRETARY

## salaries and expenses

## Salaries and Expenses, Office of Secretary of Agriculture-

For personal services in the Office of the Secretary of Agriculture, hereafter in this Act referred to as the Secretary, [and other personal services in the Office of the Secretary] in the District of Columbia, and elsewhere, and other necessary expenses, including the purchase of [one and the maintenance, repair, and operation of four motor-propelled passenger-carrying vehicles 1 two (one at not to exceed $\$ 9,000$ ) passenger motor vehicles; travel expenses, including examination of estimates for appropriations in the field; stationery, supplies, materials, and equipment; freight, express, and drayage charges; advertising, communication service, postage, washing towels, repairs and alterations, and other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department of Agriculture, hereafter in this Act referred to as the Department, [ $\$ 1,838,500] \$ 2,150,000$, together with such amounts from other appropriations or authorizations as are provided in the schedules in the Budget for the current fiscal year for such services and expenses, which several amounts or portions thereof as may be determined by the Secretary, not exceeding a total of [ $\$ 79,480] \$ 87,560$, shall be transferred to and made a part of this appropriation: Provided, however, That if the total amounts of such appropriations or authorizations for the current fiscal year shall at any time exceed or fall below the amounts estimated, respectively, therefor in the Budget for such year, the amounts transferred or to be transferred therefrom to this appropriation shall be increased or decreased in such amounts as the Director of the Bureau of the Budget, after a hearing thereon with representatives of the Department shall determine are appropriate to the requirements as changed by such reductions or increases in such appropriations or authorizations: Provided further, That, of appropriations herein made which are available for the purchase of lands, not to exceed $\$ 1$ may be expended for each option to purchase any particular tract or tracts of land: Provided further, That no part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same: Provided further, That, except to provide materials required in or
incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States. (5 U. S. C. 511-517; secs. 511-512, establishing the Department of Agriculture, which was implemented by the Act of July 24, 1919 (5 U.S.C. 563-564), apply to all appropriation items of the Department which are not based upon specific legislative authority either incorporated in the language of the item or cited immediately thereunder; 520a, 542-1, 543b; Act of June 22, 1946, Public Law 422.) ## RESEARCH AND MARKETING ACT OF 1946

## Research and Marketing Act of 1946, Department of Agriculture-

To enable the Secretary to carry into effect the provisions of the Act of August 14, 1946 (Public Law 793), including, in addition to the objects for which funds are available for such Act of August 14, 1946, and under title I of the Bankhead-Jones Act, as amended, personal services in the District of Columbia; printing and binding; overall administration, planning, and coordinalion of research under section 10 pursuant to the provisions of section 10 (c); and necessary expenses for carrying out the provisions of title III of the Act, as follows:

For payments to States, Territories, and Puerto Rico for agricultural experiment stations pursuant to section 9 of the BankheadJones Act approved June 29, 1935, as amended by the Act of August 14, 1946, $\$ 5,000,000$;

For research on utilization and associated problems pursuant to section 10 (a) of said Act, $\$ 6,000,000$;

For cooperative research other than research on utilization of agricultural commodities and the products thereof, pursuant to section 10 (b) of said Act, $\$ 3,000,000$;

For the improvement and development, independently or through cooperation among Federal and State agencies, and others, of a sound and efficient system for the distribution and marketing of agricultural products pursuant to the "Agricultural Marketing Act of 1946" (title II of the Act of Aug. 14, 1946), \$5,000,000;

In all, \$19,000,000: Provided, That such sums as may be necessary for penalty mail as required by the Act of June 28, 1944, may be transferred to the regular departmental appropriation therefor: Provided further, That for necessary printing and binding there may be transferred to, and made a part of, the item "Printing and binding, Department of Agriculture," such sums as are necessary: Provided further, That the Secretary may make available to any bureau, office, or agency of the Department such amounts from this appropriation
as may be necessary to carry out the functions for which it is made, and any such amounts shall be in addition to amounts transferred or otherwise made available to other appropriation items of the Department.

## BUREAU OF AGRICULTURAL ECONOMICS

## Salaries and Expenses, Bureau of Agricultural Economics-

For necessary expenses, including not to exceed [\$2,121,589] $\$ 2,412,650$ for personal services in the District of Columbia, [of the Bureau of Agricultural Economics,] including the salary of Chief of Bureau at $\$ 10,000$ per annum, and not to exceed $\$ 1,000$ for the purchase of books of reference, periodicals, and newspapers, as follows: (5 U. S. C. 511-512-establishing the Department of Agriculture; 7 U.S. C. 411-establishing the Bureau of Agricultural Economics; 5 U. S. C. 673. The foregoing citations apply to all appropriation items under the Bureau; Act of June 22, 1946, Public Law 422.)

Economic investigations: For conducting investigations and for acquiring and diffusing useful information among the people of the United States, relative to agricultural production, distribution, land utilization, and conservation in their broadest aspects, including farm management and practice, utilization of farm and food products, purchasing of farm supplies, farm population and rural life, farm labor, farm finance, insurance and taxation, adjustments in production to probable demand for the different farm and food
products; land ownership and values, costs, prices and income in their relation to agriculture, including causes for their variations and trends, [\$2,163,457, together with such amounts from other appropriations or authorizations as are provided in the schedules in the Budget for the current fiscal year for such salaries and expenses, which several amounts or portions thereof, as may be determined by the Secretary, not exceeding a total of $\$ 71,150$ shall be transferred to and made a part of this appropriation: Provided, however, That if the total amounts of such appropriations or authorizations for the current fiscal year shall at any time exceed or fall below the amounts estimated, respectively, therefor in the Budget for such year, the amounts transferred or to be transferred therefrom to this appropriation and the amount which may be expended for personal services in the District of Columbia shall be increased or decreased in such amounts as the Director of the Bureau of the Budget, after a hearing thereon with representatives of the Depart ment, shall determine are appropriate to the requirements as changed by such reductions or increases in such appropriations or authorizations] $\$ 2,493,600:$ Provided [further], That no part of the funds herein appropriated or made available to the Bureau of Agricultural Economics under the heading "Economic investigations" shall be used for State and county land-use planning, for conducting cultural surveys, or for the maintenance of regional offices. (Act of June 22, 1946, Public Law 422.)
Appropriated 1947, \$2,163,457
Estimate 1948, \$2,493,600

## BUREAU OF AGRICULTURAL ECONOMICS-Continued

Salaries and Expenses, Bureau of Agricultural Economics-Con.

Crop and livestock estimates: For collecting, compiling, abstracting, analyzing, summarizing, interpreting, and publishing data relating to agriculture, including crop and livestock estimates, acreage, yield, grades, staples of cotton, stocks, and value of farm crops and numbers, grades, and value of livestock and livestock products on farms, production, distribution, and consumption of turpentine and rosin pursuant to the Act of August 15, 1935 (5 U.S. C. 5566 ), and for the collection and publication of statistics of peanuts as provided by the Act approved June 24, 1936, as amended May 12, 1938 ( 7 U. S. C. 951-957), [ $\$ 2,132,000] \$ 2,375,400$ : Provided, That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intention of farmers as to the acreage to be planted in cotton, or for estimates of apple production for other than the commercial crop. ( 7 U. S. C. 411a, 411b, 475-476; Act of June 22, 1946, Public Law 422.$)$
 a Includes $\$ 3,450$ previously carried under "Salaries and expenses, Bureau of Agricul"
tural and Industrial Chemistry," naval stores investigations. For comparative purposes the amounts provided for 1946 and 1947 are shown in the schedule as transfers.

Working Funds, Agriculture, Extension Service-

Total, Extension Service, annual appropriations, general account:
Appropriated 1947, \$23,475,850 Estimate 1948, \$23,660,150

## Permanent specific appropriation:

## Cooperative Agricultural Extension Work-

The act of May 8, 1914, as amended, appropriates, out of any moneys not otherwise appropriated, for payment each year to the States and Territories for the purpose of cooperative agricultural extension work: (a) a sum of $\$ 480,000$ for the several States, of which $\$ 10,000$ is paid annually to each State, and an additional sum of $\$ 4,100,000$ allotted annually to each State in the proportion which the rural population of each State bears to the total rural population of all the States as determined by the next preceding Federal census, provided that the additional sum is matched by an equal sum from sources within the State; and (b) such additional amounts as may be necessary to enable the Territory of Hawaii and the Territory of Puerto Rico to participate on the same basis

## EXTENSION SERVICE-Continued <br> Cooperative Agricultural Extension Work-Continued <br> as the States without diminishing the amount to which any State would otherwise be entitled. ( 7 U.S.C. $343,386 b-386 f$.)

## Appropriated 1947, \$4,704,710

Estimate 1948, \$4,704,710
11 Grants, subsidies, and contributions: Obligations-1946, \$4,704,710; 1947, \$4,704, 710; 1948, \$4,704,710.

Total, Extension Service, general account:
Appropriated 1947, \$28,180,560
Estimate 1948, \$28,364,860

## AGRICULTURAL RESEARCH ADMINISTRATION

## Office of the Administrator

## Salaries and Expenses, Office of Administrator, Agricultural Re-

 search Administration-Salaries and expenses: For necessary [salaries and] expenses of the Office of Administrator, including the salary of the Administrator at $\$ 10,000$ per annum, and personal services in the District of Columbia [and elsewhere], and for [necessary expenses in connection with] the maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center, [including not to exceed $\$ 15,000$ for the construction of a building to house water-treatment facilities at the Center, and including not to exceed $\$ 20,000$ to be immediately available for special exploratory investigations of agricultural problems of Alaska, \$480,500] $\$ 481,500$, and there shall be transferred to the Department, from Government surplus without reimbursement therefor, certain parcels of real property, valued at approximately $\$ 10,050$, within the boundaries of the Agricultural Research Center, Beltsville, Maryland, consisting of approximately 88 acres of land known as the Paul Hense tract, approximately 40 acres of land known as the Sampson tract, and approximately 2 acres known as the Pleasant Grove Church tract: Provided, That the appropriation current at the time services are rendered may be reimbursed (by advance credits or reimbursements based on estimated or actual charges) from applicable appropria tions, to cover the charges, including handling and other related services, for equipment rentals (including depreciation, maintenance, and repairs) ; for services, supplies, equipment and materials furnished, stores of which may be maintained at the Center, and for building construction, alteration, and repair performed by the Center in carrying out the purposes of such applicable appropriations and the applicable appropriations may also be charged their proportionate share of the necessary general expenses of the Center not covered by this appropriation: Provided further, That the several appropriations of the Agricultural Research Administration shall be available for the construction, alteration, and repair of buildings and improvements: Provided, however, That unless otherwise provided, the cost of constructing any one building (excepting headhouses connecting greenhouses) shall not exceed $\$ 5,000$, the total amount for construction of buildings costing more than $\$ 2,500$ each shall be within the limits of the estimates submitted and approved therefor, and the cost of altering any one building during the fiscal year shall not exceed $\$ 2,500$ or 2 per centum of the cost of the building as certified by the Research Administrator, whichever is greater. (5 U.S.C. 511-512, 673; Act of June 22, 1946, Public Law 422.)

## Special Research Fund, Department of Agriculture

## Special Research Fund, Department of Agriculture-

For enabling the Secretary to carry into effect the [provisions of an] Act [entitled "An Act to provide for research into basic laws and principles relating to agriculture and to provide for the further development of cooperative agicultural extension work and the more complete endowment and support of land-grant colleges",] approved June 29, 1935 (7 U. S. C. 427, 427b, 427c, 427f) ; for administration of the provisions of section 5 of the said Act, and for special research work, including the planning, programming, coordination, and printing the results of such research, to be conducted by
such agencies of the Department as the Secretary may designate or establish, and to which he may make allotments from this fund, including [the employment of persons and means] personal services in the District of Columbia [and elsewhere]; [\$1,193,000] $\$ 1,303,000$, of which amount [ $\$ 723,126] \$ 785,200$ shall be a vailable for the maintenance and operation of research laboratories and facilities in the major agricultural regions provided for by section 4 of said Act. (Act of June 22, 1946, Public Law 422; Act of Aug.14, 1946, Public Law 733.)

Annual appropriation, general account:
Appropriated 1947, $\$ 1,193,000$
Estimate 1948, \$1,303,000
