Sec. [115] 109. [Whenever, during the fiscal year ending June 30, 1947, the Secretary should deem it to be advantageous to the national defense, and if in his opinion the existing facilities of the Navy Department are inadequate, he is hereby authorized to employ at the seat of government and elsewhere, by contract or otherwise, without reference to section 3709, Revised Statutes, civil-service or classification laws, or section 5 of the Act of April 6, 1914 (38 Stat. 335), and at such rates of compensation (not to exceed $\$ 40$ per day, and travel expenses, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized in travel orders or letters of appointment for individuals) as he may determine, the services of architects, engineers, and other technical and professional personnel as may be necessary] During the fiscal year 1948 the Secretary is authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (Public Law 600), but at rates for individuals not in excess of $\$ 50$ per day.

SEc. [116] 110. Provisions of law prohibiting the payment of compensation to any person not a citizen of the United States shall not apply to personnel under the Naval Establishment during the fiscal year ending June 30, [1947] 1948.

SEc. [117] 111. The appropriations for the Navy Department and the naval service for the fiscal year ending June 30, [1947] 1948, shall be available for expenses in connection with the transfer to the United States of foreign vessels, including pay, subsistence, transportation, and repatriation of alien crews[; and such expenses incident to observers of tests of the atomic bomb as the Secretary may deem necessary].
[Sec. 118. The Secretary may transfer not to exceed 5 per centum of any of the foregoing appropriations to any other appropriation or appropriations, but no appropriation shall be increased more than 5 per centum as a result of such transfers: Provided, That a quarterly statement of any such transfers shall be transmitted to the chairmen of the Appropriations Committees of the House of Representatives and the Senate.]
[SEc. 119. None of the funds appropriated in this Act for the Navy Department and the naval service for the fiscal year ending June 30, 1947, other than funds for which reimbursement is made hereunder, shall be available for any expenses (including the pay, allowances, and subsistence of naval and Marine Corps personnel) for care, upkeep, repair, handling, and assistance in the sale of any property, material, or equipment subsequent to the date of a declaration of surplus covering such property to a disposal agency, or, if procedures are prescribed whereby declarations of surplus are made at approximately the time of disposal or removal, subsequent to the date of notice by the owning agency to the disposal agency that property has been determined to be surplus and is subject to such procedures. With respect to all such expenses, disposal agencies shall provide reimbursement to the Navy Department, for credit to the appropriations from which such expenses would be normally paid: Provided, That advance payments based on the estimated expenses of the Navy Department may be made by any disposal agency: Provided further, That in lieu of ascertaining the direct expenses and the applicable portion of the indirect expenses, the Navy Department and the disposal agencies may agree on any basis for determining
such expenses as will equitably accomplish the purpose of this section. 1
[SEc. 120. The Secretary of the Navy may delegate to the commandants of the naval districts, for administration within their respective districts, his authority to authorize payment of the expenses of the transfer of household goods of employees, and of the costs of transportation of their immediate families on change from one official duty station to another.]

SEc. 112. The Secretary may advance by check to the Director of Central Intelligence such portions of the foregoing appropriations as the National Intelligence Authority may deternine, and sums so advanced shall be available for the fiscal year 1948 in a common fund for necessary expenses of the Central Intelligence Group. The Director of Central Intelligence shall make a certificate of any expenditure of said funds as he may thinl it advisable not to specify and every such certificate shall be deemed a sufficient voucher for the sum therein expressed to have been expended.

SEc. 113. The transfer of funds as directed in this Act shall not operate to reduce the cash working capital of the Naval Stock Fund below $\$ 50,000,000$, nor that of the Clothing and Small Stores Fund below $\$ 15,000,000$.

Total, Navy Department, annual appropriations, general account:

## AVIATION

## Construction of Aircraft, Navy -

Construction of aircraft: Construction and procurement of aircraft and related equipment, spare parts, and accessories therefor, including tools, equipment, and facilities for public and private plants for their production; $\$ 104,450,000$, which, together with the unexpended balances of appropriations heretofore made under the head "Aviation, Navy" in the Naval Appropriation Act for the fiscal year 1947 for these purposes, shall be accounted for as one fund and shall be available for continuing any project heretofore authorized under such appropriation for these purposes, to remain available until expended: Provided, That not to exceed $\$ 100,000,000$ of the funds appropriated for "Aviation, Navy" for the fiscal year 1945 shall continue available during the fiscal year 1948 for the liquidation of contractual obligations for aircraft and aircraft equipment procurement incurred during the fiscal year 1945: Provided further, That, in addition to this appropriation, the Secretary of the Navy may, prior to July 1, 1948, contract for new construction, procurement and equipment of aircraft, including spare parts and accessories therefor, in an amount not in excess of $\$ 170,000,000$.

Estimate 1948, a $\$ \mathbf{1 0 4 , 4 5 0 , 0 0 0}$

## GENERAL PROVISIONS

Sec. 102. The foregoing appropriations, except those for pay of Naval and Marine Corps personnel, shall be available for the payment of all compensation, travel expenses, and other allowances authorized by law to civilian personnel performing the functions for which the respective appropriations are made, at the seat of government and elsewhere including, in the case of employees abroad, allowances authorized by law for quarters, cost of living, and per diem in lieu of subsistence while traveling

Sec. 103. During the fiscal year 1948 the Secretary is authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (Public Law 600), but at rates for individuals not in excess of $\$ 50$ per day.

SEC. 104. The foregoing appropriations shall be respectively available for expenses necessary for the performance of the functions for which the respective appropriations are made, including: printing and binding; the purchase of not more than one hundred and twenty-five automobiles (including three at not to exceed $\$ 3,000$ each) for naval activities and not more than thirty-three for Marine Corps activities; the Naval Reserve; Naval Reserve Officers' Training Corps; Officer Candidate Training; providing transportation of naval and civilian personnel between their domiciles and places of employment as authorized by law; a health service program as authorized by the Act of August 8, 1946 (Public Law 658); carrying out the provisions of Executive Order No. 9112 of March 26, 1942, Public Law 395, approved July 1, 1944, Public Law 119, approved July 2, 1945, Public Law 277, approved December 28, 1945 (except as otherwise specifically provided for), Public Law 457 , approved October 3, 1944, and section 13 of Public Law 604, approved August 2, 1946.

SEc. 105. No part of the appropriations made in this Act shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person or persons having charge of the work of any employee of the United States Government while making or causing to be made with a stop watch or other timemeasuring device a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work; and no moneys herein appropriated for the Naval Establishment or made available therefor shall be used or expended under contracts hereafter made for the repair, purchase, or acquirement, by or from any private contractor, of any naval vessel, machinery, article, or articles that at the time of the proposed repair, purchase, or acquirement can be repaired, manufactured, or produced in each or any of the Government naval shipyards or arsenals of the United States, when time and facilities permit, and when, in the judgment of the Secretary, such repair, purchase, acquirement, or production would not in volve an appreciable increase in cost to the Government, except when the repair, purchase, or acquirement, by or from any private contractor, would, in the opinion of the Secretary, be advantageous to the national defense.

Sec. 106. The appropriations available to the Navy Department and the naval service shall be available for the pay and other expenses of men inducted into the Navy and Marine Corps in accordance with law.

Sec. 107. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any
person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 108. No part of any money appropriated herein or included under any contract authority herein granted shall be expended for the payment of any commission on any land purchase contract in excess of 2 per centum of the purchase price.

Sec. 109. Appropriations in this Act shall be available for the pay of missing or captured civilian or naval personnel under the provisions of Public Law 490, approved March 7, 1942, as amended, and for that which accrued during prior years and was not paid, including accruals of pay authorized by law for retired and Reserve officers, nurses, enlisted personnel, and family allowances.

Sec. 110. Provisions of law prohibiting the payment of compensation to any person not a citizen of the United States shall not apply to personnel under the Naval Establishment during the fiscal year ending June 30, 1948.

Sec. 111. The appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1948, shall be available for expenses in connection with the transfer to the United States of foreign vessels, including pay, subsistence, transportation, and repatriation of alien crews.

SEc. 112. The Secretary may advance by check to the Director of Central Intelligence such portions of the foregoing appropriations as the National Intelligence Authority may determine, and sums so advanced shall be available for the fiscal year 1948 in a common fund for necessary expenses of the Central Intelligence Group. The Director of Central Intelligence shall make a certificate of any expenditure of said funds as he may think it advisable not to specify and every such certificate shall be deemed a sufficient voucher for the sum therein expressed to have been expended.

Sec. 113. The balance remaining of appropriations under the head "Increase and Replacement of Naval Vessels" shall not be available for beginning the construction of any new vessels during the fiscal year 1948.

Sec. 114. The transfer of funds as directed in this Act shall not operate to reduce the cash working capital of the Naval Stock Fund below $\$ 50,000,000$, nor that of the Clothing and Small Stores Fund below $\$ 15,000,000$.

1 Total supplemental estimates of appropriation required for 1947 amount to $\$ 250,817,427$. Estimated savings in certain appropriations in $\mathbf{1 9 4 7}$, totaling $\$ 15,419,106$, have been doducted from $\$ 250,817,427$ to arrive at the estimated supplementals on an expenditure basis for 1947 of $\$ 235,398,321$.
${ }^{1}$ Excludes estimated obligations for claims, judgments, and private relief acts in 1947 and 1948 of $\$ 150,000$ in each year to be paid from postal revenue.

## EXPLANATORY STATEMENT

## INTRODUCTION

In order to provide a more comprehensive comparison of the financial operations of the postal service as they relate to the use of the postal revenue and general revenue, the above table has been expanded to include a section on "Annual appropriations out of general fund of the Treasury." This permits a clearer understanding of the amounts and purposes for which general funds of the Treasury are appropriated for postal-service operations.

## PROGRAM

In the year following the war's end, the Department's policy to restore operations in the postal service to a prewar standard was hampered by continued shortages in the labor and commodity markets. The Department continued its program in 1947 of restoring full services to the public which were curtailed during the war. However, greatly increased costs reduced the scope of its action within prescribed appropriation limits. Sufficient funds to implement the program have therefore been provided in the estimates for the fiscal years 1947 and 1948, to make up for the handicaps experienced during the first reconversion year.

The Department has provided necessary additional manpower and facilities for handling the mails to keep pace with mail volume and expanded transportation services. The Department also assumed the costs, which were formerly borne by war agencies, of transporting civilian mails between this and foreign countries. Complete mail service has been restored to many foreign countries and partial service to some.
Air transport carriers, in both domestic and foreign services, have been encouraged to expand their facilities to meet the increasing public demands that will be generated by lowered postage rates.

## MAIL VOLUME AND POSTAL REVENUE

Total estimated postal revenue for 1947 and 1948 has been predicated upon estimates of mail volume and special services in units, as shown in supporting schedule 3. Estimates indicate something more than a 3 percent increase in mail volume in 1948 compared with 1946, and slightly less than that percentage of increase in revenue. This reflects the changing patterns of use by the public between classes of mail and services in the postwar reconversion period.

Substantial volume increases in first-class ordinary mail, in domestic air mail, third- and fourth-class mail, and in special services are anticipated in 1948. Increases in domestic air mail volume are forecast for 1947 and 1948 as a result of the recent reduction of the postage rate to 5 cents an ounce. Volume increases in civilian mails to foreign countries are expected, although these are more than offset by the sharp reductions in paid air mail volume to military forces stationed in foreign countries. A continued trend in the expanded use of the mails by business is forecast by the increases estimated for first-, third- and fourth-class domestic mails.

Estimated postal revenue for the fiscal year 1947 is based on the wartime rates of postage authorized by the Revenue Act of 1943. On December 31, 1946, the President proclamed the cessation of hostilities of World War II; six months after that date the wartime increases are automatically eliminated and the estimated revenue for the fiscal year 1948 reflect the reduced rates.

## POSTAL EXPENDITURES AND DEFICIENCIES IN POSTAL REVENUES

Increased costs of labor and commodities used by the postal service, with no corresponding increase in the level of postal revenue, will result in an estimated deficiency in fiscal years 1947 and 1948. These deficiencies would be 19.4 percent of total postal expenditures in fiscal year 1947 and 22.8 percent in 1948. Deficiencies in postal revenue are paid from the general fund of the Treasury. Under the
recommendations of the President the deficiency for the fiscal year 1948 would be wiped out through higher postal rates.
Since more than 80 percent of the operating costs are for personal services, the principal part of the increased operating expenditures in 1947 and 1948 results from increases in salaries and adjustments in classification of employees in the postal service authorized by recent legislation. Due to the enactment of that legislation after the regular appropriation had been made for 1947 it is estimated that an additional appropriation of $\$ 176,465,954$ will be required to meet its cost in that year. Further, an additional appropriation totaling $\$ 74,351,473$ will be required to meet increased cost of services and commodities, the necessity for providing additional facilities and manpower to care for increased mail volume, restoration and expansion of service, and the replacement of equipment which could not be replaced during war years. These amounts will be partially offset by savings in certain appropriations totaling $\$ 15,419,106$. On an expenditure basis, this will result in a total deficiency of postal revenue in 1947 of $\$ 295,150,543$.

Of the $\$ 26,990,707$ estimated increase in expenditures for 1948 over 1947, 66 percent will be required in post offices (directed by the First Assistant Postmaster General), 22 percent will be required for transportation (directed by the Second Assistant Postmaster General) and 12 percent will be required for services, supplies and equipment, and operation of public buildings (directed by the Fourth Assistant Postmaster General).

Furniture, Carpets, and Safes for Public Buildings, Post Office Department-
Furniture, carpets, and safes, public buildings: For the procurement, including transportation, of furniture, carpets, safes, safe and vault protective devices, and repairs of same, for use in public buildings which are now, or may hereafter be, operated by the Post Office Department, [ $\$ 818,000] \$ 1,000,000$ : Provided, That excepting expenditures for labor for or incidental to the moving of equipment from or into public buildings, the foregoing appropriation shall not be used for personal services except for work done under contract or for temporary job labor under exigency and not exceeding at one time the sum of $\$ 100$ at any one building: Provided further, That all furniture now owned by the United States in other public buildings or in buildings rented by the United States shall be used, so far as practicable, whether or not it corresponds with the present regulation plan of furniture. ( $5 \mathrm{U} . \mathrm{S} . \mathrm{C}$. 73a, 124-132; $\$ 1$ U. S. C. 610; Act of Aug. 2, 1946, Public Law 600; Act of July 20, 1946, Public Law 518.)
Appropriated 1947, $\$ 818,000$
Estimate 1948, \$1,000,000

Total, Office of the Fourth Assistant Postmaster General, annual appropriations:
Appropriated 1947, \$100,753,450
Estimate 1948, \$116,142,900

Total, field service, Post Office Department:
Appropriated 1947, \$1,272,566,340 Estimate 1948, \$1,537,129,150

Deficiency in postal revenues: If the revenues of the Post Office Department shall be insufficient to meet the appropriations made under title II of this Act, a sum equal to such deficiency in the revenues of such Department is hereby appropriated, to be paid out of any money in the Treasury not otherwise appropriated, to supply such deficiency in the revenues of the Post Office Department for the fiscal year ending June 30, [1947] 1948, and the sum needed may be advanced to the Post Office Department upon requisition of the Postmaster General.

During the fiscal year [1947] 1948, the Postmaster General shall make quarterly reports to the Senate and House Committees on Appropriations, showing for each quarter the amount paid from each appropriation for overtime, the number of employees receiving such overtime, and the number of hours of overtime worked by such employees, together with a statement as to the necessity for such overtime work. (Act of July 20, 1946, Public Law 518.)

## Claims, Judgments, and Private Relief Acts-

13 Refunds, awards, and indemnities: Obligations-1946, $\$ 670,066$.

Total, Post Office Department:
Appropriated 1947, \$1,279,580,069 Estimate 1948, \$1,545,089,250

Sec. 301. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an
organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (Act of July 20, 1946, Public Law 518.)

## DEPARTMENT OF STATE

Comparative Summary of Appropriations and Appropriation Estimates
[Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due to circumstances virtually beyond administrative control. To the extent that such expenses cannot be absorbed within presently available funds, supplemental appropriation will be required. The latest estimates of amounts so required are shown in the detail schedules for the various appropriation titles and in a separate column of the table below]

## EXPLANATORY STATEMENT

## GENERAL STATEMENT

The United States is now committed to participation in international relations to a greater extent than ever before in our history. The Department of State is the principal agency of the Government responsible under the President for conducting our foreign relations. The Department must assure that all aspects of foreign policy are developed in harmony with total national policy, and that they are properly enunciated and implemented through normal diplomatic channels as well as through international organizations and other avenues of international intercourse. The work of the Department includes extensive negotiations with foreign countries, development of measures for the protection of American citizens and interests abroad, promotion of friendly relations between the United States and other countries, and operation of our diplomatic missions throughout the world.

Most of the war emergency functions of the Department will have disappeared by 1948; a number of postwar and transitional problems will remain. Postwar reconversion problems do not stop at our national boundaries but are world wide and are increasingly more difficult in the foreign relations field. Within the new framework of the Foreign Service Act of 1946, foreign service activities require strengthening and expansion. The relatively new responsibilities of the Department in the fields of research and intelligence are essential to provide the Department and other agencies of the Government with necessary information concerning foreign developments. Foreign information and cultural relations programs will continue to be integral aspects of our foreign relations program. Finally, the extent and cost of participation in international organizations is increasing.
department service
Appropriations totaling $\$ 43,665,000$ will be required for the Department Service. This estimate, approximately $\$ 1,057,000$ less than the appropriations for 1947 , reflects some internal adjustment of organization and program. Slight increases are provided to strengthen the Department's organization for certain strategic areas, and for travel and other service items. A substantial increase is required for the departmental staff necessary for the administration of an expanded Foreign Service. The appropriations take into account some reductions in personal serviges for certain regular Department activities. The appropriation proposed for the domestic aspects of the research and intelligence program contemplates continuation of this activity at approximately its present level. A significant increase has been provided in the domestic programing and production aspects of the foreign information and cultural relations program to permit urgently required expansion in important segments of that program and to meet increased costs. The overseas surplus property disposal program should be drawing to an end in fiscal year 1948, and the amount included will provide for a final closing out of that activity. The surplus property disposal estimate represents an 80 percent reduction from the funds available for this purpose in 1947.

## FOREIGN SERVICE

The Foreign Service of the United States is the instrument through which the Secretary of State maintains permanent representation abroad in the discharge of his responsibilities to the President for the conduct of foreign relations.

The $\$ 134,639,000$ proposed represents an increase of approximately $\$ 75,000,000$ over the 1947 figure. A sizable part of this increase ( $\$ 50,000,000$ ) provides in accordance with law for sums to be covered into the Treasury as representing the value of property acquired abroad for diplomatic and consular use in return for credits received in surplus property and lend-lease settlements. This is primarily a "bookkeeping" item.

With the return of peaceful conditions throughout the world increased provision has been made for the promotion and protection of American trade abroad, more adequate political and economic reporting and increased consular work including the issuance of visas and the relief and repatriation of United States nationals. A more adequate and effective administrative staff abroad is planned.
Finally, the major role of this Nation in world affairs necessitates an adequate international information program and the provision abroad for a small staff for special studies to round out the intelligence program of the Department. Increases are provided for these fields.

## INTERNATIONAL OBLIGATIONS AND ACTIVITIES

International obligations and activities, including United States contributions to international organizations and commissions, will require $\$ 91,406,787$. Greater provision
is made in 1948 for United States contributions to international organizations than in 1947. This includes an increase in the United States' share of a larger United Nations budget and a new United States contribution to the United Nations Educational, Scientific, and Cultural Organization.

An amount of $\$ 5,820,000$ is included to carry on the program of cooperation with the other American Republics at approximately its present level and contemplates greater emphasis on that phase of the program concerned with the exchange of persons. This program is based on the cooperative purposes expressed in treaties, resolutions, and recommendations previously signed by the American republics. The projects under this program afford a practical means of carrying out the objective of strengthening inter-American solidarity.

The increase of $\$ 6,174,000$ over 1947 in funds for Philippine rehabilitation will be used to carry out the established schedule for the second year of this 4 -year program.

The sum of $\$ 9,025,000$ is provided for the work of the International Boundary and Water Commission, United States and Mexico, including construction activities under international treaties with Mexico, and represents a $\$ 1,205,000$ reduction under 1947 appropriations.

ESTIMATES OF APPROPRIATIONS

## [OFFICE OF THE SECRETARY OF STATE] DEPARTMENT SERVICE

## Salaries, Department of State-

[Salaries: For Secretary of State; Under Secretary of State, $\$ 12,000$; Assistant Secretaries of State, $\$ 10,000$ each; and other personal services in the District of Columbia and elsewhere, including the employment of aliens; and not to exceed $\$ 35,000$ for the temporary employment of persons in the United States, without regard to civil service and classification laws; $\$ 23,600,000.1$ (5 U.S.C. 661-673; Act of July 5, 1946, Public Law 490.)

## Appropriated 1947, \$23,600,000

Note.-The appropriation under the above title has been transferred to and estimated for under "Salaries and expenses, Department of State." For comparative purposes the amounts available for 1946 and 1947 are shown in the schedule as transfers.

## Rio Grande Canalization, Department of State-

[Rio Grande canalization project: For the replacement of the Anthony Bridge, over the Rio Glande within the Rio Grande canalization project, as authorized by and subject to the provisions of the Act, approved April 22, 1940 ( 54 Stat. 151), fiscal year 1946, $\$ 40,000$, to remain available until expended.] (Act of May 18, 1946, Public Law 384.)
Nore.-The appropriation under the above title has been transferred to and estimated for under "Construction, International Boundary and Water Commission, United States and Mexico." For comparative purposes the amount available for 1946 is shown in the schedule as a transfer.

Transferred to "Construction, International Boundary and Water Commission United States and Mexico':' $1946, \$ 40,000$.

Construction, International Boundary and Water Commission, United States and Mexico-

Construction: For detail plan preparation and construction of projects authorized by the Convention concluded February 1, 1933, between the United States and Mexico, the Acts approved August 19, 1935, as amended ([49 Stat. 660, 1370;] 22 U. S. C. 277-277d), August 29, 1935 [(49 Stat. 961)], (Public Law 392), June 4, 1936 [(49 Stat. 1463)] (Public Law 648), June 28, 1941 (22 U. S. C. 277f), and the projects stipulated in the treaty between the United States and Mexico signed at Washington on February 3, 1944, [ $\$ 9,250,000] \$ 8,000,000$, to be immediately available, and to remain available until expended: Provided, That no expenditures shall be made for the Lower Rio Grande flood-control project for construction on any land, site, or easement in connection with this project except such as has been acquired by donation and the title thereto has been approved by the Attorney General of the United States: Provided further, That expenditures for the Rio Grande bank-protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (Public Law 40): [Provided further, That expenditures for the Douglas-Agua Prieta sanitation project shall be subject to the provisions and conditions contained in the appropriation for this project as provided by the Act approved July 2, 1942 (56 Stat. 477) : Provided further, That expenditures for the Nogales sanitation project and an extension to the Nogales flood-control project shall be subject to the same provisions and conditions as to assurances by the city of Nogales, Arizona, as are required of the city of Douglas, Arizona, by this Act in connection with the Douglas-Agua Prieta sanitation project:] Provided further, That no expenditures shall be made for the acquisition of lands or easements for sites for boundary fences except for procurement of abstracts or certificates of title, payment of recording fees, and examination of titles: Provided further, That unexpended balances of appropriations for construction under the International Boundary and Water Commission available for the fiscal year [1946] 1947 shall be merged with this appropriation and shall continue available until expended. (2Q U.S.C. $277-277 d$; Act of Apr. 25, 1945, Public Law 40; Act of Aug. 29, 1935, Public Law 992; Act of June 4, 1936, Public Law 648; Act of June 28, 1941, 22 U. S. C. $277 f$; Act of July 5, 1946, Public Law 490.)
Appropriated 1947, \$9,250,000

## Cooperation With the American Republics-

Cooperation with the American Republics: For [all] expenses necessary to enable the Secretary of State to meet the obligations of the United States under the Convention for the Promotion of Inter-American Cultural Relations between the United States and the other American Republics, signed at Buenos Aires, December 23, 1936, and to carry out the purposes of the Act entitled "An Act to authorize the President to render closer and more effective the relationship between the American Republics", approved August 9,1939 (22 U. S. C. 501 ), and to supplement appropriations available for carrying out other provisions of law authorizing related activities, including the establishment and operation of agricultural and other experiment and demonstration stations in other American
countries, on land acquired by gift or lease for the duration of the experiments and demonstrations, and construction of necessary buildings thereon; such expenses to include personal services in the District of Columbia; not to exceed $\$ 150,000$ for printing and binding; Lstenographic reporting, translating and other services by contract, without regard to section 3709 of the Revised Statutes (41 U. S. C. 5) $]$ temporary services as authorized by section 15 of the Act of August 2, 1946 (Public Law 600); not to exceed \$15,000 for entertainment; not to exceed $\$ 5,000$ for expenses of attendance at meetings or conventions of societies and associations concerned with the furtherance of the purposes hereof; and, under such regulations as the Secretary of State may prescribe, tuition, compensation, allowances and enrollment, laboratory, insurance, and other fees incident to training, including traveling expenses in the United States and abroad in accordance with the Standardized Government Travel Regulations and the Act of June 3, 1926, as amended, of educational, professional, and artistic leaders, and professors, students, internes, and persons possessing special scientific or other technical qualifications, who are citizens of the United States or the other American Republics; and the actual expenses of preparing and transporting to their former homes the remains of such persons, not United States Government employees, who may die while away from their homes under the authority of this appropriation: Provided, That the Secretary of State is authorized under such regulations as he may adopt, to pay the actual transportation expenses and not to exceed $\$ 10$ per diem in lieu of subsistence and other expenses, of citizens of the other American Republics while traveling in the Western Hemisphere, without regard to the Standardized Government Travel Regulations, and to make advances of funds notwithstanding section 3648 of the Revised Statutes as amended by the Act of August 2, 1946, Public Law 600; traveling expenses of members of advisory committees in accordance with section 2 of said Act of August 9, 1939 [(22 U. S. C. 249a)]; purchase [(not to exceed six passenger automobiles), hire, maintenance, operation, and repair of motor-propelled and animal-drawn passenger-carrying] of six and hire of passenger motor vehicles; [purchase of books and periodicals ; ] rental of [halls and] boats, [; and purchase, rental, and repair of microfilming equipment and supplies, and colored photographic enlargements, $\$ 5,375,000$ ] $\$ 5,820,000$; and the Secretary of State, or such official as he may designate is hereby authorized, in his discretion, and, subject to the approval of the President, to transfer from this appropriation to other departments, agencies, and independent establishments of the Government for expenditure in the United States and in the other American Republics any part of this amount for direct expenditure by such department or independent establishment for the purposes of this appropriation and any such expenditures may be made under the specific authority herein contained or under the authority governing the activities of the department, agency, or independent establishment to which amounts are transferred: [Provided further, That not to exceed $\$ 100,000$ of this appropriation shall be available until June 30, 1948:] Provided further, That this appropriation shall be available to make contracts with, and grants of money or property to, nonprofit institutions in the United States and the other American Republics, including the distribution of materials and other services in the fields of education and travel, arts and sciences, publications, the radio, the press, and the cinema. (Convention of Dec. 23, 1936, 51 Stat. 178; 5 U. S. C. 118e; 22 U. S. C. 501, 502; Act of July 5, 1946, Public Law 490.)

## Salaries and Expenses, Philippine Rehabilitation, Department of

 State-Philippine rehabilitation: For [all] expenses necessary to carry out the provisions of titles III and V of the Philippine Rehabilitation Act of 1946 (Public Law 370, hereinafter called the Act), without regard, outside the United States, to section 3709 of the Revised Statutes, as amended, including personal services in the District of Columbia [or elsewhere], and employment of personnel outside the continental United States without regard to civil-service and classification laws; temporary services [of experts or consultants by contract or otherwise] as authorized by section 15 of the Act of August ${ }^{2}, 1946$ (Public Law 600); purchase [(not to exceed sixtynine] of seventeen and hire of passenger [automobiles), hire, maintenance, operation, and repair of] motor[-propelled and animal-drawn passenger-carrying] vehicles; [purchase (not to exceed four),] hire, maintenance, operation, and repair of aircraft; purchase of health and accident insurance for trainees (for whom such benefits are not otherwise allowed) while in the United States in pursuance of training programs; actual expenses of preparing and transporting to their former homes the remains of trainees who may die while away from such homes under the authority of this Act; advances of funds to trainees, such advancements to be deducted from allowances due to such trainees; not to exceed [ $\$ 4,000] \$ 1,100$ for deposit in the general fund of the Treasury for cost of handling penalty mail as required by [section 2 of] the Act of June 28, 1944 [(Public Law 364) ]; printing and binding without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); [purchase of lawbooks, books of reference, newspapers, and periodicals; travel expenses, including] expenses of attendance at meetings of organizations concerned with the furtherance of the purposes hereof; compilation, printing, and distribution, in the Philippine Islands or the United States, of charts, reports, and publications pertaining to the various programs set forth in the Act; acquisition of sites for the construction of additional [bulidings] buildings, and furnishing and equipping of [bulidings] buildings acquired or constructed, under section 501 of the Act; and acquisition of quarters in the Philippines to house employees of the United States Government, including military personnel, by purchase, rental (without regard to section 322 of the Act of June 30, 1932, as amended ( 40 U. S. C. 278a)), lease, or construction and necessary repairs and alterations to and maintenance of such quarters; amounts as follows: (a) For carrying out the provisions of sections 302, 303, 304, and 305 of title III of the Act, [ $\$ 33,000,000$; ] $\$ 51,430,823$; and (b) for carrying out sections 306, 307, 308, 309, 310 , and 311 of said title III, $\mathbf{[} \$ 10,918,000$; and (c) for carrying out the provisions of title $V$ of the Act, $\$ 4,000,000$ ] $\$ 2,661,17 \overline{7}$; in all, [ $\$ 47,918,0001 \$ 54,092,000$, to be available on July 1, [1946] 1947 , and to remain available until June 30, 1950: Provided, That no part of this appropriation shall be available for engaging in any phase of activity or for undertaking any phase of activity authorized by the Philippine Rehabilitation Act of 1946 that would result in obligating the Government of the United States in any sense or respect to the future payment of amounts in excess of the amounts authorized to be appropriated in such Act, nor shall any part of this appropriation be available for expanding any public works project authorized by law to be replaced or rehabilitated beyond such as nay be justified by sound engineering practice and which can be accomplished within the amount authorized to be appropriated: Provided further, That the total amount that may be obligated for the entire accomplishment of section 307 (a) of title III of such Act shall not exceed $\$ 8,000,000$ : [Provided further, That the Secretary of State, or such official as he may designate, is authorized to transfer from any of the foregoing amounts to any department or independent establishment of the Government for participation in the foregoing programs, sums for expenditure by such department or establishment for the purposes hereof, and sums so transferred shall be available for expenditure in accordance with the provisions hereof and, to the extent determined by the Secretary of State, in accordance with the law governing expenditures of the department or independent establishment of the Government for ther, That transfers of funds to participating agencies for the programs set forth in sections 302 to 305 of the Act shall be approved by the President prior to such transfers] Provided further, That this appropriation shall be available to make con-
tracts with nonproft institutions in the United States and the Philippines in connection with training programs: Provided further, That sums from the foregoing applicable appropriation may be transferred directly to and merged with the appropriations contemplated in section 306 (b) of the Act to reimburse said latter appropriations for expenditures therefrom for the purposes hereof: Provided further, That the construction of diplomatic and consular establishments of the United States in the Philippine Islands shall be without regard to the proviso contained in twenty-two United States Code 295 a.
[Philippine rehabilitation: The third proviso of the appropriation under this head contained in the Third Deficiency Appropriation Act, 1946, hereby is corrected to read as follows: " Provided further, That the Secretary of State, or such official as he may designate, is authorized to transfer from any of the foregoing amounts to any department or independent establishment of the Government for participation in the foregoing programs, sums for expenditure by such department or establishment for the purposes hereof, and sums so transferred shall be available for expenditure in accordance with the provisions hereof and, to the extent determined by the Secretary of State, in accordance with the law governing expenditures of the department or establishment to which transferred: Provided further, That transfers of funds to participating agencies for the programs set forth in sections 302 to 305 of the Act shall be approved by the President prior to such transfers[:'’]. ${ }^{2}$ Purchase of these 15 cars was authorized under Public Law 521, but funds were not made available.
[Upon request of the Secretary of State and with the approval of the heads of the departments concerned, personnel of the Army, Navy, Treasury Department, or Federal Works Agency may be assigned for duty as inspectors of buildings owned or occupied by the United States in foreign countries, or as inspectors or supervisors of buildings under construction or repair by or for the United States in foreign countries, under the jurisdiction of the Department of State, or for duty as couriers of the Department of State, and when so assigned they may receive the same traveling expenses as are authorized for officers of the Foreign Service, payable from the applicable appropriations of the Department of State. $]$

Contracts entered into in foreign countries involving expenditures from any of the foregoing appropriations shall not be subject to the provisions of section 3741 of the Revised Statutes ( 41 U. S. C. 22).

Notwithstanding the provisions of section 6 of the Act of August 24, 1912 ( 37 Stat. 555), or the provisions of any other law, the Secretary of State may, in his absolute discretion, on or before June 30, [1947] 1948, terminate the employment of any officer or employee of the Department of State or of the Foreign Service of the United States whenever he shall deem such termination necessary or advisable in the interests of the United States, but such termination shall not affect the right of such officer or employee to seek or accept employment in any other department or agency of the Government if declared eligible for such employment by the United States Civil Service Commission. (Act of July 5, 1946, Public Law 490.)

## TREASURY DEPARTMENT

## Comparative Summary of Appropriations and Appropriation Estimates

Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due to circumstances virtually beyond administrative control. To the extent that such expenses cannot be absorbed within presently available funds, supplementa appropriations
will be required. The latest estimates of amounts so required are shown in the detail schedules for the various appropriation titles and in a separate column of the table below]

## EXPLANATORY STATEMENT

## GENERAL STATEMENT

The Treasury Department's appropriations provide for the performance of functions relating to the public debt; the collection of internal-revenue and customs duties; the manufacture of currency and coin; accounting, disbursing, and procurement operations; and for the following regulatory and enforcement agencies: U.S. Coast Guard, the Bureau of Narcotics, the Secret Service, and the Alcohol Tax Unit of the Bureau of Internal Revenue.

The Treasury's estimates for 1948 do not include funds for the war emergency functions of the Foreign Funds Control, the liquidation of which is contemplated prior to

July 1, 1947. However, the estimates do include funds to be required for the maintenance, in accordance with the provisions of Public Law 658, approved August 8, 1946, of the health service program for Treasury Department employees in the District of Columbia. Funds for a similar purpose for the current year are available to the Federal Security Agency.

The total amount requested for 1948 under general and special accounts of the Department reflects a net decrease of about 1 percent as compared with 1947 estimated funds for similar purposes. This decrease results primarily from reduced requirements for tax refunds, strategic and critical materials, and refund payments under the Renegotiation

Act, offset by increases necessitated for expanded operations in the Bureau of Customs, Bureau of Accounts (Division of Disbursement), Bureau of Federal Supply (formerly the Procurement Division), an amourt for Subscriptions to Capital Stock, Federal Crop Insurance Corporation, additional maintenance expenses of the United States Coast Guard and the Bureau of the Public Debt, and the increased cost of the Department's penalty mail.

## DEPARTMENTAL ADMINISTRATION

The administrative expenses of the Office of the Secretary in 1948, as well as the requirements for the administrative services in the Division of Tax Research, the Office of Tax Legislative Counsel, the Division of Research and Statistics, the Office of the General Counsel, the Division of Personnel, the Office of the Chief Clerk, and the Custody of Treasury Department Buildings, which provide the general overhead activities of the Department, are estimated to be about the same in 1948 as in 1947. However, a substantial increase in the Department's requirements for penalty mail costs is expected due to the additional checks to be issued for the Veterans' Administration and Social Security Board and to increased rates charged by the Post Office Department.

## REVENUE COLLECTIONS

The Bureau of Internal Revenue and the Bureau of Customs are responsible for collecting the preponderant portion of the Government's revenue.

While Internal Revenue tax refunds are expected to decrease by approximately 4 percent in 1948, the requirements for the Bureau of Internal Revenue for administrative expenses in administering the existing revenue laws are about the same as the 1947 estimated requirements.

The estimates for the Bureau of Customs are about 12 percent greater in 1948 than in 1947. Of this percentage, the administrative expenses of the Bureau of Customs show an increase of about 8 percent for 1948. Requirements for refunds and drawbacks of customs receipts are expected to increase about 20 percent over the current fiscal year. The additional funds to be required by the Bureau for 1948 are necessary to restore the positions abolished during the war, for increased drawbacks, and to provide for handling the increased business stemming from expanded air traffic.

## PUBLIC DEBT OPERATIONS

The administrative expenses of the Bureau of the Public Debt are expected to be slightly more in 1948 than in the current fiscal year. During the war period, the number of bonds sold greatly exceeded redemptions. For 1948 it is expected that this situation will be reversed, and that a substantial part of existing heavy backlogs of work can be eliminated. Savings bond promotional operations currently restricted to the encouragement of bond sales through the pay-roll savings plan throughout the country will be carried on at the same level in 1948. Interest on the public debt for 1948 shows an increase of about 1 percent over 1947.

An anticipated reduction in receipts representing repayments of loans made by the Federal Emergency Administration of Public Works is expected to reduce, correspondingly, the appropriations for the retirement of obligations of the United States.

## CENTRAL FISCAL SERVICES

The Bureau of Accounts and the Office of the Treasurer of the United States are responsible for the receipt, safekeeping, and disbursing of the Government's funds, and for related accounting functions. The volume of work to be performed by the Bureau of Accounts in 1947 is expected to be substantially greater than can be financed with currently available funds. This is due to the increased number of veterans and social-security payments. These increases also affect the Office of the Treasurer of the United States. However, improved check clearance procedures in the Treasurer's office results in an anticipated decrease in the 1948 requirements of about 4 percent.

MANUFACTURE OF COIN, CURRENCY, AND SECURITIES
The estimates for the Bureau of the Mint for 1948 reflect an estimated increase approximating $2 \frac{1}{2}$ percent which is required for the restoration to near prewar levels of refinery and deposit activities.

In the Bureau of Engraving and Printing, increased currency and revenue-stamp demands result in additional requirements approximating 2 percent.

## REGULATORY AND ENFORCEMENT ACTIVITIES

Funds are requested to provide for regulatory and enforcement activities of the Treasury Department to be carried on by the Bureau of Narcotics, Secret Service, Alcohol Tax Unit of the Bureau of Internal Revenue, and the United States Coast Guard. Similar functions performed by the Comptroller of the Currency are no longer provided for by appropriation by Congress. The activities of the Foreign Funds Control are expected to be liquidated prior to July 1, 1947, and no further appropriation for this purpose is anticipated.

The United States Coast Guard, wbich had operated as a part of the Navy during the war, was transferred back to Treasury effective January 1, 1946, by Executive Order 9666 . The amount requested for 1948 , as compared with funds available for the current fiscal year, represents an increase of about 7 percent which is necessary primarily for increased retirement pay, equipment replacement and repairs, and supplies and materials for current operating needs.

Anticipated increased work load in the Secret Service Division in 1948 will necessitate an increase in the agent force. Such increase results primarily from the estimated increase in the number of investigations which must be made of forgeries of veterans' checks and checks currently being issued pursuant to the Armed Forces Leave Act of 1946. All otber regulatory and enforcement activities of the Department will be continued in 1948 at approximately their 1947 levels.

## GOVERNMENT PROCUREMENT

The increase requested for the Bureau of Federal Supply (formerly the Procurement Division) is due to the expansion of certain procurement operations including those related to public utility, central freight traffic and inspection activities.

## TRUST ACCOUNTS

The estimates of appropriation for trust accounts for 1948 are slightly greater than the appropriations for 1947. Increased receipts during the fiscal year 1948 are expected in both the Federal old-age and survivors insurance trust fund and the unemployment trust fund.

## ESTIMATES OF APPROPRIATION

## OFFICE OF THE SECRETARY

## Salaries, Office of Secretary of the Treasury-

Salaries: [Secretary of the Treasury, Under Secretary of the Treasury, Fiscal Assistant Secretary of the Treasury, two Assistant Secretaries of the Treasury, and other] For personal services in the District of Columbia, [ $\$ 432,000$ ] $\$ 489,000$ : Provided, That no part of the money appropriated shall be used to pay the salaries of more than eighteen messengers assigned to duty in the Office of the Secretary. ## Bureau of the Public Debt

## Administering the Public Debt-

Administering the public debt: For necessary expenses connected with any public-debt operations authorized by the Second Liberty Bond Act, as amended (31 U. S. C. 760-762), and with the administration of any public debt or currency issues of the United States with which the Secretary of the Treasury is charged, [ $\$ 65,300,000] \$ 68,300,000$, to be expended as the Secretary of the Treasury may direct: Provided, That from the amount appropriated herein, the Federal Reserve banks and their branches may be reimbursed for expenditures made by them as fiscal agents of the United States on account of public-debt transactions for the account of the Secretary of the Treasury, and advances to the Postmaster General may be made in accordance with the provisions of section 22 (e) of the Second Liberty Bond Act, as amended ( 31 U. S. C. 757e (e)), which section shall be construed as applying to this
appropriation: Provided further, That the indefinite appropriation provided by section 10 of the Second Liberty Bond Act, as amended, shall not be available for obligation during the fiscal year [1947] 1948. (Act of July 20, 1946, Public Law 518.)

Appropriated 1947, \$65,300,000

WAR DEPARTMENT

## Comparative Summary of Appropriations and Appropriation Estimates

[ Appropriations for 1947 did not make provision for certain legislation enacted in the latter part of the last regular session, nor for certain unforeseen costs arising since that time due to circumstances virtually beyond administrative control. To the extent that such expenses cannot be absorked within presently available funds, supplemental appropriations
will be required. The latest estimates of amounts so required are shown in the detail schedules for the various appropriation titles and in a separate column of the table belowl

${ }^{1}$ Includes $\$ 262,219,000$ proposed transfers from presently available appropriations.
2 Proposed transfers of presently available appropriations.
In addition, unobligated balances of prior-year appropriations estimated at $\$ 92,500,000$ continued available in 1947.
4 In addition, unobligated balances of prior-year appropriations estimated at $\$ 76,970,805$ continued available in 1947.
8 In addition, unobligated balances of prior-year appropriations estimated at $\$ 33,250,000$ continued available in 1948.
${ }^{8}$ In addition, unobligated balances of prior-year appropriations estimated at $\$ 169,470,805$ continued available in 1947.
${ }^{7}$ In addition, unobligated balances of prior-year appropriations estimated at $\$ 305,820$ continued available in 1947.

## EXPLANATORY STATEMENT

## Military Activities

## GENERAL STATEMENT

The War Department is charged with the primary responsibility of organizing, equipping, training, and maintaining the Army. This responsibility is discharged by the War Department under conditions, and to the extent, prescribed by the Congress and the President. The Army of the United States consists of the following components: the Regular Army, the National Guard of the United States, the National Guard while in the service of the United States, the Officers' Reserve Corps, the Organized Reserves, and the Enlisted Reserve Corps. At the present time, those on active duty are largely the Regular Army, members of the Officers' Reserve Corps, and a large number of officers and enlisted men volunteering for the emergency or inducted through the Selective Service System. In past years, explanations made to the Congress of the functions of the Army components
have emphasized that, in time of peace, these elements constitute the framework upon which a wartime military organization may be readily built. This remains true. However, the advent of new weapons capable of striking across vast distances without warning requires that this framework also be self-sufficient to repulse the initial blow of an attacker. The following text reviews the financial program for the fiscal year 1947 and the proposed military budget for fiscal year 1948.

## FISCAL YEAR 1947

The War Department budget estimates for fiscal year 1947 were based upon a number of optimistic assumptions. Several of these assumptions have failed to materialize. Others have not developed to the extent predicted. For example: Peace treaties have not been concluded; the disposal of property declared surplus to the needs of the War Department has not progressed as rapidly as assumed; many more displaced persons than anticipated
had to be cared for by the armies of occupation. In addition, significant modifications in the financial program were required in the interests of economy. The problems thus created for the War Department were made more difficult by general salary increases authorized at the beginning of the year, which, for the most part, will be absorbed within the available appropriations. It is estimated, however, that supplemental appropriations in the amount of $\$ 556,281,000$ will be required for pay of the Army and $\$ 300,000,000$ for government and relief in occupied areas for fiscal year 1947 .

## MILITARY BUDGET PROGRAM, FISCAL YEAR 1948

The War Department estimates for the fiscal year 1948, contemplate the appropriation of $\$ 5,716,791,500$ and contract authority for $\$ 280,000,000$. This total is the minimum considered necessary to provide for:
(a) Operation of the military activities of the War Department.
(b) Operation, training, and maintenance of the military forces overseas and in the United States.
(c) Maintenance of required command installations and Army facilities on a scale commensurate with present and projected usage.
(d) Procurement to the extent necessary to maintain the required flow of essential supplies and equipment.
(e) Maintenance in stand-by of the Government-owned industrial facilities approved for retention as reserve capacity.

In addition, supplemental estimates for the appropriation of $\$ 225,000,000$ to provide for construction at posts, camps, and stations in the United States and overseas, to the extent necessary in the interests of health, safety, training, research, and to relieve the critical housing shortage, will be submitted at such time as authorizing legislation is enacted by the Congress.

The budget estimates provide for a man-year strength of the Army of $1,070,000$ during fiscal year 1948, including noneffectives. Of the total man-year strength, it is anticipated that 500,000 will be overseas during fiscal year 1948, and 570,000 will be in the United States. Personnel assigned to the Army Air Forces will total approximately 400,000 throughout the fiscal year. The Army strength of $1,070,000$ is considered to be the minimum necessary to perform the Army's missions during fiscal year 1948.

The War Department's budget estimates for fiscal year 1948 may be divided functionally as follows:

Funds in the amount of $\$ 850,000,000$ and contract authority for $\$ 280,000,000$ are required for the support of the Army Air Forces 70 -group program, to the extent that 55 groups will be active and 15 groups will be skeletonized. The active groups will be at approximately 80 percent strength. The equipment modernization program will be continued in the fields of bombers and fighters only.
To carry out the military operations of the Corps of Engineers and for the maintenance at a minimum level of existing structures and facilities both overseas and in the United States, $\$ 365,000,000$ is required.

A total of $\$ 190,840,000$ is for the purpose of supporting the programs of the National Guard, Organized Reserves, and Reserve Officers' Training Corps. These components are, in part, vital elements of the M-day force, immediately available for the defense of the United States in an emergency.

Funds totaling $\$ 3,384,381,000$ are to defray the cost of pay, food, clothing, and essential supplies for the military forces.

Funds totaling $\$ 400,000,000$ are for the activities of the Transportation Corps in moving personnel and equipment throughout the far-flung areas where our soldiers are now stationed.

The operations of the Ordnance Department in the care and preservation of ordnance equipment, the operation of ordnance depots and testing facilities, and the procurement of improved equipment will amount to $\$ 275$,044,000.

Funds amounting to $\$ 90,000,000$ are required for the operation of the Signal Corps and to maintain the essential communications of the Army, both in the United States and overseas bases.

The cost of medical service, the procurement of medical supplies, and the operation of medical facilities is estimated at $\$ 75,000,000$.

Funds for Atomic Service activities and for government and relief in occupied areas are not included in the estimates for the Military Establishment. The budget estimates for Atomic Service, previously included in the estimates of the Military Establishment, are to be included in estimates for the Atomic Energy Commission and the estimates for government and relief in occupied areas are included under civil functions of the War Department.

## Civil Functions of the War Department

## GENERAL STATEMENT

The civil functions administered by the War Department consist of a group of activities only indirectly related to the active Military Establishment and are gathered under a separate head in the Budget to distinguish them from Army activities.

Appropriations for the Panama Canal are included in this chapter of the Budget, because the Panama Canal, while not a part of the War Department, is under direct supervision of the Secretary of War.

## QUARTERMASTER CORPS

The Secretary of War has the responsibility for acquiring land for and maintaining national cemeteries and marking the graves of veterans. These activities have been delegated to the Quartermaster General and are financed by the appropriation "Cemeterial expenses." The increase of $\$ 1,774,000$ reflects the preparation of additional burial sites for World War II dead to be returned from overseas, deferred maintenance, and additional headstones.

## SIGNAL CORPS

The Signal Corps of the Army maintains a communication system between the United States and Alaska and within Alaska, which handles commercial messages. The system connects with approximately 300 telephone or radio stations which are commercially operated or operated by other Government agencies. In 1948 the Alaska Communication System plans to operate 35 stations in Alaska and one in Seattle.

## CORPS OF ENGINEERS

The Corps of Engineers, United States Army, under the supervision of the Secretary of War, is responsible for maintenance and improvement of rivers, harbors, and
waterways of the Nation in the interest of navigation, control of floods, and related hydroelectric power development.

Navigation works.-The funds for maintenance and operation of completed works and for surveys of modifications and further improvements thereof included in the 1948 budget estimates amount to $\$ 76,042,000$. This amount is necessary to operate and maintain navigation facilities and to permit initiation of needed major repairs and alterations postponed during the war.

The funds include $\$ 23,452,000$ for improvement work and $\$ 2,500,000$ for advance planning.

Flood control.-In 1917 the Corps of Engineers, in compliance with an act of Congress, extended its work in connection with rivers and harbors to include the undertaking of flood-control works on the lower Mississippi River and the Sacramento River, Calif.

The authorization for appropriation for flood protection and improvement of navigation on the lower Mississippi River is $\$ 1,026,609,500$, exclusive of maintenance, of which about $\$ 479,764,600$ remains to be provided. The funds proposed for the fiscal year 1948 provide for maintenance of the navigation channel and flood-control works and for continuation of the improvement project.

The estimated Federal cost of the Sacramento River flood-control project is $\$ 40,850,000$, of which $\$ 33,195,000$ has been appropriated. The estimate of $\$ 1,000,000$ for fiscal year 1948 is to continue construction of the authorized improvement.

In 1936 Congress adopted a national flood control policy and assigned responsibility for Federal investigations and improvements in connection therewith to the Corps of Engineers. The amount of $\$ 152,584,000$ is included in the 1948 Budget estimates for continuing work on 59 flood-control projects. In addition, $\$ 4,000,000$ is included for advance planning; $\$ 3,272,000$ for maintenance, operation, and repair of completed projects; and $\$ 3,500,000$ for surveys.

Veterans' hospitals.-TThe Veterans' Administration has arranged to have the Corps of Engineers, United States Army, assume responsibility for the preparation of plans for and the construction of its new hospitals. The 1946 and 1947 programs, consisting of 76 hospitals with a total bed capacity of 39,470 at an estimated planning and construction cost of approximately $\$ 656,000,000$ (exclusive of $\$ 16,000,000$ to be utilized by the Veterans' Administration
for site acquisition and technical services), has already been assigned to the Corps of Engineers. The proposed 1948 program consists of 15 additional hospitals with a total bed capacity of 11,900 at an estimated planning and construction cost of approximately $\$ 203,000,000$ (exclusive of $\$ 12,000,000$ to be utilized by the Veterans' Administration for site acquisition and technical services).

## GOVERNMENT AND RELIEF IN OCCUPIED AREAS

An amount of $\$ 725,000,000$ has been included in the Budget for this activity in fiscal year 1948.

## United states soldiers' home

The United States Soldiers' Home at Washington, D. C., provides domicilary and medical care for former soldiers of the Regular Army who qualify for admission under physical and age eligibility requirements. The estimated membership at the Home for 1948 is 1,438 members, an increase of 88.
The 1948 estimate for maintenance and operation of the Home is 43 percent greater than the prior year appropriation. The increased funds for 1948 are principally for expansion of existing facilities, preparation of plans for future enlargement of the Home, continuation of the program of rehabilitation of equipment and structures, and salary increases similar to that granted Federal employees.

## The Panama Canal

Appropriations for the Panama Canal provide funds for the maintenance and operation of the Panama Canal and for sanitation and government of the Canal Zone. While the summary table shows an increase in appropriations of $\$ 2,970,000$ for 1948 , this does not reflect the work-load in the Canal Zone. The total, gross obligations for 1948 are estimated at $\$ 67,965,640$ compared to $\$ 71,123,824$ in 1947, a decrease of $\$ 3,158,184$. The total reimbursements and receipts (exclusive of tolls and revenues covered directly into the Treasury) are estimated at $\$ 42,557,135$ in 1948 compared to $\$ 43,495,103$ in 1947 , a drop of $\$ 937,968$.

This leaves a total net obligation for 1948 of only $\$ 25,408,505$ compared to $\$ 27,628,719$ in 1947, a decrease of $\$ 2,220,214$. Revenues covered directly into the Treasury are estimated at $\$ 19,907,872$ in 1948 and $\$ 18$,796,652 in 1947, an increase of $\$ 1,101,220$.

## FINANCE DEPARTMENT

finance service, army

## Finance Service, Army-

Pay of the Army: For pay and allowances of the Army of the United States, including pay of Reserve officers and officers of the National Guard of the United States ordered to active duty under the provisions of section 37 a and the fourth paragraph of section 38 of the National Defense Act, as amended; pay of civilian employees at military headquarters; allowances for quarters for enlisted men on duty where public quarters are not available; interest on soldiers' deposits; payment of life insurance premiums authorized by law; payment of exchange fees and exchange losses incurred by disbursing officers or their agents; repayment of amounts determined by the Secretary of War, or officers designated by him, to have been erroneously collected from military and civilian personnel in and under the Military Establishment; and losses in the accounts of Army disbursing officers in accordance with the Acts of December 13, 1944 (31 U.S. C. 95a) and December 23, 1944 (50 U. S. C. 1705-1707) ; [ $\$ 2,375,000,000] \$ 2,476,480,000$, which shall also be available to pay mustering-out payments, as authorized by the "Mustering-Out Payment Act of 1944", as amended (38 U. S. C. 691-691g), to persons who were or may be denied such payments because they were discharged from the Army to enter the United States Military Academy or the United States Naval Academy and subsequently were discharged from either academy because of physical disability: Provided, That the appropriations contained in this Act shall not be available for increased pay for making aerial flights by nonflying officers at a rate in excess of $\$ 720$ per annum, which shall be the legal maximum rate as to such officers, and such nonflying officers shall be entitled to such rate of increase by performing three or more flights within each ninety-day period, pursuant to orders of competent authority, without regard to the duration of such flight or flights: Provided further, That, during the continuance of the present war and for six months after the termination thereof, a flying officer as defined under existing law shall include flight surgeons, and commissioned officers or warrant officers while undergoing flying training: Provided further, That section 212 of the Act of June 30 , 1932 ( 5 U . S. C. 59 a ), shall not apply to retired military personnel on duty at the United States Soldiers' Home: Provided further, That during the fiscal year ending June 30, [1947] 1948, no officer of the Army shall be entitled to receive an addition to his pay in consequence of the provisions of the Act approved May 11, 1908 (10 U. S. C. 803) : Provided further, That provisions of law prohibiting the payment of any person not a citizen of the United States shall not apply to military and civilian personnel in and under the Military Establishment: Provided further, That without deposit to the credit of the Treasurer of the United'States and withdrawal on money requisitions, receipts of public moneys from sales or other sources by officers of the Army on disbursing duty and charged in their official accounts, except receipts to be credited to river and harbor and flood-control appropriations, may be used by them as required for current expenditures, all necessary bookkeeping adjustments of appropriations, funds, and accounts to be made in the settlement of their disbursing accounts: Provided further, That no collection or reclamation shall be made by the United States on account of any money paid to assignees, transferees, or allottees, or to others for them, under assignments, transfers, or allotments of pay and allowances made under authority of law where liability might exist with respect to such assignments, transfers, or allotments, or the use of such moneys, because of the death of the assignor, transferor, or allotter: Provided further, That no appropriation contained in this Act shall be used for any expense pertaining to (1) the instruction, education, or training of class IV-E conscientious objectors in colleges, (2) the service of such conscientious objectors outside the United States, its Territories and possessions, (3) the transportation of such conscientious objectors to or from any college or any such service, or (4) the compensation of military or civilian personnel performing any services with respect to the matters set forth in (1), (2), or (3) above after the enactment of this Act, except any services which may be necessary promptly to
terminate any such class IV-E conscientious-objector college or foreign-service projects existing on the date of the enactment of this Act.
[Pay of the Army: The appropriation for "Pay of the Army" in the Military Appropriation Act, 1947, is hereby made available to pay mustering-out payments, as authorized by the "MusteringOut Payment Act of 1944", Public Law 225, Seventy-eighth Congress, second session, as amended, to members of the armed forces who were or may be denied such payments because they resigned from the Army to enter the United States Military Academy or the United States Naval Academy and subsequently were separated the United States Naval Academy and subsequently were separated
from either Academy because of physical disability. 1 ( 1 U.S.C. $61 a-d, 118 c-l, 672 b, c, 673,901-902,912,921,922,943,949 b, 947$; 10 U. S. > Appropriations a vailable to the Military Establishment for the fiscal year [1947] 1948 shall be available for reimbursement to such appropriations of the Naval Establishment as may be designated by the Secretary of the Navy, for the pay, allowances, and other expenses as authorized by law, for such number of naval dental officers as may be authorized by the President to perform service with the Military Establishment: Provided, That such military and naval personnel, as may be detailed for duty with other than the War and Navy Departments, respectively, on a reimbursement basis may be employed in addition to the numbers otherwise authorized and appropriated for.

No payment shall be made from money appropriated in this Act to any officer on the retired list of the Army who, for himself or for others, is engaged in the selling of, contracting for the sale of, or negotiating for the sale of, to the Army or the War Department, any war materials or [supplies;] supplies.

No appropriation for the pay of the Army shall be available for the pay of any officer or enlisted man on the active list of the Army who is engaged in any manner with any publication which is or may be issued by or for any branch or organization of the Army or military association in which officers or enlisted men have membership and which carries paid advertising of firms doing business with the War Department: Provided, however, That nothing herein contained shall be construed to prohibit officers from writing or disseminating articles in accordance with regulations issued by the Secretary of War; (Act of July 16, 1946, Public Law 515.)

Travel of the Army: For travel allowances and travel in kind, as authorized by law, for persons traveling in connection with the military activities of the War Department, including mileage, transportation, reimbursement of actual expenses, or per diem allowances, to officers, contract surgeons, and others whose rank, pay and allowances are assimilated to officers; the cost of a compartment or such other accommodations as may be authorized by the Secretary of War for security purposes when secret documents are transported by officer messenger, or when valuable War Department property is transported as hand baggage by personnel of the Military Establishment; transportation of troops; transportation, or reimbursement therefor, of cadets, enrolled members of the Medical Department, enlisted men, recruits, recruiting parties, applicants for enlistment between places of acceptance for enlistment and recruiting stations, rejected applicants for enlistment, general prisoners, cadets and accepted cadets from their homes to the Military Academy, discharged cadets, civilian employees, civilian witnesses before courts martial, and dependents of civilian and military personnel; [all necessary expenses of travel, under such regulations and restrictions as the Secretary of War may prescribe, of military personnel who have served outside the continental limits of the United States or in Alaska, to places in the United States, its Territories and possessions, whether on leave or duty status, for purposes connected with redeployment or reassignment, or for the purpose of recuperation, rehabilitation
and recovery; 1 travel pay to discharged military personnel; transportation of discharged prisoners and persons discharged from Saint Elizabeths Hospital after transfer thereto from the military service, to their homes, or elsewhere as they may elect, the cost in each case not to be greater than to the place of last enlistment; transportation of persons discharged [for fraudulent enlistment] other than honorably; monetary allowances for liquid coffee for troops traveling when supplied with cooked or travel rations; commutation of quarters and rations to enlisted men traveling on detached duty when it is [impractical] impracticable to carry rations, and to applicants for enlistment and general prisoners rations, and to applicants for enlistment and general prisoners
traveling under orders; per diem allowances or actual cost of subtraveling under orders; per diem allowances or actual cost of sub-
sistence while in a travel status, to civilian employees and civilian witnesses before courts martial; for rental of camp sites and the local procurement of communication service, fuel, light, water service, and other necessary supplies and services incident to individual or troop movements, including transportation of organizational equipment and impedimenta; and for transportation of authorized baggage of military and civilian personnel, including packing and unpacking; [ $\$ 175,000,000] \$ 150,000,000$ : Provided, That other appropriations for the Military Establishment shall be charged with such amounts as may be required for travel in connection with development, procurement, production, maintenance, or construction activities; and, with such exception, no other appropriation in this Act shall be available for any expense for or incident to travel of personnel of the Regular Army or civilian "employees under the War Department, except the [appropriations "Government and relief in occupied areas", "Atomic Service" and 1 appropriation "Contingencies of the Army" and the appropriations for Engineer Service, Army, the National Guard, the Organized Reserves, the Reserve Officers' Training Corps, and the National Board for the Promotion of Rifle Practice, and except as may be provided for in the appropriations "Special Field Exercises", "Inter-American Relations, War Department", and "Air Corps, Army": Provided further, That, in addition to the authority contained in section 67, National Defense Act of June 3, 1916, as amended, [a total of not to exceed $\$ 15,000$ of] the appropriations available to the War Department chargeable with expenses of travel shall be available for expenses incident to attendance at meetings of technical, professional, scientific, and other similar organizations, when, in the judgment of the Secretary of War, such attendance would be of benefit in the conduct of the work of the War Department: Provided further, That appropriations available for travel of personnel of the Military Establishment or employees under the War Department which are current at the date of relief from duty station of such personnel traveling under orders shall be charged with all expenses properly chargeable to such appropriations in connection with the travel enjoined, including travel of dependents and transportation of authorized baggage and household effects of such personnel, regardless of the dates of arrival at destination of the persons so traveling; (5U.S.C. $7 \mathscr{A}$, 73a; 10 U. ## Trust accounts:

## Pay of the Army, Deposit Fund-

Sec. 1305 , R. S., as amended ( 10 U. S. C. 906). Any enlisted man of the Army may deposit his savings in sums not less than $\$ 5$, with any finance officer, who shall furnish him a deposit book, in which shall be entered the name of the finance officer and of the soldier, and the amount, date, and place of such deposit. Effective during the present war, and for a period of one year thereafter, any amount heretofore or hereafter so deposited shall be held during such period of his service as may be prescribed by the Secretary of War; shall be accounted for in the same manner as other public funds; shall be deposited in the Treasury of the United States and kept as a separate fund, known as pay of the Army deposit fund, repayment of which to the enlisted man or to his heirs or representatives shall be made out of the fund created by said deposits; shall not be subject to forfeiture by sentence of court-martial, but shall be forfeited by desertion; and shall be exempt from liability for such soldier's debts: Provided, That the Government shall be liable for the amount deposited to the person so depositing the same. (31 U. S. C. 725 s .)

Appropriated 1947, \$15,000,000

None of the funds appropriated elsewhere in this Act, except for printing and binding, field exercises, and for pay and allowances of officers and enlisted men of the Army of the United States, and for mileage, reimbursement of actual traveling expenses, or per diem allowances in lieu thereof, and travel of dependents or reimbursement therefor, as authorized by law, to Reserve officers on extended active duty, shall be used for expenses in connection with the Organized Reserves, but available supplies and existing facilities at military posts shall be utilized to the fullest extent practicable.

No appropriation made in this Act shall be available for pay, allowances, or traveling or other expenses of any officer of the Organized Reserves who may be drawing a pension, disability allowance, disability compensation, or retired pay from the Government of the United States.

The pay and allowances of such additional officers and nurses of the Medical Reserve Corps as are required to supplement the like officers and nurses of the Regular Army in the care of bene-
ficiaries of the United States Veterans' Administration treated in Army hospitals may be paid from the funds allotted to the War Department by that Administration under existing law. (Act of July 16, 1946, Public Law 515.)

## CITIZENS' MILITARY TRAINING

reserve officers' training corps

## Reserve Officers' Training Corps-

For the procurement, maintenance, and issue, under such regulations as may be prescribed by the Secretary of War, to institutions at which one or more units of the Reserve Officers' Training Corps are maintained, of such public animals, means of transportation, supplies, tentage, equipment, and uniforms as he may deem necessary, including cleaning and laundering of uniforms and clothing at camps; and to forage, at the expense of the United States, public animals so issued, and to pay commutation in lieu of uniforms at a rate to be fixed annually by the Secretary of War: [for] transporting said animals and other authorized supplies and equipment from place of issue to the several institutions and training camps and return of same to place of issue when necessary; [for] purchase of training manuals, including Government publications and blank forms; for the establishment and maintenance of camps for the further practical instruction of the members of the Reserve Officers' Training Corps, and for transporting members of such corps to and from such camps or other places designated by the Secretary of War, and to subsist them while traveling to and from such camps and while remaining therein so far as appropriations will permit, or, in lieu of transporting them to and from such camps and subsisting them while en route, to pay them travel allowance at the rate of 5 cents per mile for the distance by the shortest usually traveled route from the places from which they are authorized to proceed to the camp and for the return travel are authorized to proceed to the camp and for the return travel
thereto, and to pay the return travel pay in advance of the actual performance of the travel, or to pay commutation in lieu of subsistence at camps at rates fixed by the Secretary of War; [for] expenses incident to the use, including upkeep and depreciation costs, of supplies, equipment, and materiel furnished in accordance with law from stocks under the control of the War Department; [for] pay for students attending advanced camps at the rate [preLcribed for soldiers of the seventh grade of the Regular Army ; for the $]$ authorized by law; payment of commutation of subsistence to members of the senior division of the Reserve Officers' Training Corps, at a rate not exceeding the cost of the garrison ration prescribed for the Army, as authorized in the Act approved June 3, 1916, as amended by the Act approved June 4, 1920 ( 10 U. S. C. 387) ; [for the 1 medical and hospital treatment of members of the Reserve Officers' Training Corps, who suffer personal injury or contract disease in line of duty, and for other expenses in connection therewith including pay and allowances, subsistence, transportation, and buria expenses, as authorized by the Act of June 15, 1936 ( 49 Stat. 1507); [for] mileage, traveling expenses, or transportation, for transportation of dependents (including dependents of retired officers, warrant officers, and enlisted men of the first three grades, and enlisted men of the first three grades of the Regular Army Reserve, ordered to active duty and upon relief therefrom), and for packing, crating, and unpacking, and transportation of baggage (including baggage of retired officers, warrant officers, and enlisted men of the first three grades, and enlisted men of the first three grades of the Regular Army Reserve ordered to active duty and upon relief therefrom) for officers, warrant officers, and enlisted men traveling on duty pertaining to or on detail to or relief from duty with the Reserve Officers' Training Corps; Lfor the purchase, maintenance, repair, and operation of motor vehicles, including station wagons; for the 1 procurement and issue as provided in section 55 c of the Act approved June 4, 1920 ( 10 U. S. C. 1180), and in section 1225, Revised Statutes, as amended, under such regulations as may be prescribed by the Secretary of War, to schools and colleges, other than those provided for in section 40 of the Act above referred to, of such arms, tentage, and equipment, and of ammunition, targets, and target materials, including the transporting of the same, and the overhauling and repair of articles issued as the Secretary of War shall deem necessafy for proper military training in said schools and colleges; $[\$ 16,782,000] \$ 24,840,000$ : Provided, That uniforms and other equipment or material issued to the Reserve Officers' Training Corps in accordance with law shall be furnished from surplus or excess stocks of the War Department without payment from this appropriation, except for actual expense incurred in the manufacture or issue: Provided further, That in no case shall the amount paid from this appropriation for uniforms, equipment, or material furnished to the Reserve Officers' Training Corps from stocks under the control of the War Department be in excess of the price current at the time the issue is made: Provided further, That none of the
funds appropriated in this Act shall be used for the organization or maintenance of a greater number of mounted units in the Reserve Officers' Training Corps than were in existence on January 1, 1928 Provided further, That none of the funds appropriated in this Act shall be available for any expense on account of any student in [Dental Corps, or] Veterinary units not a member of such units on May 5, 1932, but such stoppage of further enrollments shall not interfere with the maintenance of existing units: Provided further, That none of the funds appropriated elsewhere in this Act, except for printing and binding and pay and allowances of officers and enlisted men, shall be used for expenses in connection with the Reserve Officers' Training Corps. (10 U. S. C. 381-390, 441, 455d; Act of July cers Training Corps.

Appropriated 1947, \$7,263,542,400 Estimate 1948, \$5,716,791,500

Sec. 2. No part of the appropriations made in this Act shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of the work of any employee of the United States Government while making or causing to be made with a stop watch, or other time-measuring device, a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work; nor shall any part of the appropriations made in this Act be available to pay any premiums or bonus or cash reward to any employee in addition to his regular wages, except as [may be otherwise authorized in this Act] authorized by section 14 of the Act of August 2, 1946 (Public Law 600).

Sec. 3. The foregoing appropriations for "Quartermaster Servce, Army", "Signal Service of the Army", "Air Corps, Army", "Medical and Hospital Department", "Engineer Service, Army", "Ordnance Service and Supplies", ["Chemical Warfare Service", and "Seacoast Defenses"' Iand "Chemical Service, Army" shall each be available for the pay and allowances, including travel allowances, of such Reserve officers as the President may, with their consent, order to active duty for such periods, not in excess of two years, as their service may be required in the procurement [of] or production of equipment therein appropriated for, or on duty pertaining to aviation

Sec. 4. Appropriations for the Military Establishment for the fiscal year [1947] 1948 shall be available for carrying out the purposes of Executive Order 9112 of March 26, 1942; for expenses in connection with the administration by the Army of occupied areas; for expenses of conducting investigations in foreign countries incident to matters relating strictly to the Military Establishment, without regard to section 3648 , Revised Statutes, including such compensation, expenses, and allowances of witnesses, cost of procuring and transcribing evidence, documents, and testimony, and other miscellaneous and incidental expenses as may be determined by the investigating officer to be necessary and in accord with local custom; [for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost of living allowances in accordance with the Act of February 23, 1931, as amended (22 U. S. C. 12), and regulations prescribed thereunder, for all civilian officers and employees of the War Department who are citizens of the United States permanently stationed in foreign countries;1 for carrying into effect the provisions of the Act entitled "An Act to govern distribution of war trophies and devices", approved July 16, 1946 (Public Law 510); for actual and necessary expenses or per diem in lieu thereof authorized by section 12 of the Pay Readjustment Act of 1942, as amended; for per diem allowances authorized by section 4 of the Act approved August 2, 1946 (Public Law 600); and for [employees' special wearing apparel and equipment necessary to carry out the purposes of this Act 1 health programs authorized by the Act of August 8, 1946 (Public Law 658).

Sec. 5. No part of any appropriation made by this Act shall be used in any way to pay any expense in connection with the conduct, operation, or management of any post exchange, branch exchange, or subexchange within any State, Territory, or the District of Columbia, save and except for real assistance and convenience under such regulations as the Secretary of War may prescribe, to such personnel as are now or may be hereafter authorized by law and regulation to purchase subsistence stores or other Quartermaster supplies and to civilians employed or serving at military posts in supplying them with articles of small personal needs, not similar to those furnished by the Government: Provided, That the commanding officer of the post at which any such exchange is situated shall certify on the monthly report of the post exchange council that such exchange was, during the period [overed] covered by such report, operated in compliance with this section: Provided further, That at posts isolated from a convenient market the Secretary of War may broaden the nature of the articles to be sold.
[Sec. 6. No part of any appropriation contained in this Act shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: Provided, however, (1) That, notwithstand-
ing the provision in the Act approved August 11, 1939 (53 Stat. 1409), limiting employment in the above-mentioned positions to citizens of the United States from and after the date of the approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in contineutal United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: Provided further, That the President may suspend from time to time in whole or in part compliance with this section in time of war or national emergency if he should deem such course to be in the public interest: Provided further, That the President may, if he finds it necessary because of a shortage of housing, suspend, for the fiscal year 1947, the application of those portions of this section which require the employment of citizens of the Republic of Panama or of the United States in skilled, technical, clerıcal, administrative, executive, or supervisory positions.]

Sec. [7] 6. Appropriations for the Military Establishment for the fiscal year [1947] 1948 shall be available for all necessary expenses in connection with the instruction and training, including tuition, not otherwise provided for, of civilian employees in and under the War Department and the Military Establishment.

Sec. [8] 7. Whenever, during the fiscal year ending June 30, [1947] 1948, the Secretary of War should deem it to be advantageous to the national defense, and if in his opinion the existing facilities of the War Department are inadequate, he is hereby authorized to [employ, by contract or otherwise, without reference to section 3709, Revised Statutes, civil-service or classification laws, or section 5 of the Act of April 6,1914 ( 38 Stat. 335), and at such rates of compensation (not to exceed $\$ 40$ per day and travel expenses] procure services as authorized by section 15 of the Act of August $\overline{2}$, 1946 (Public Law 600), at rates not in excess of $\$ 50$ per day for individuals, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized in travel orders or letters of appointment [for individuals) as he may determine, the services of architects, engineers, or firms or corporations thereof, and other technical and professional personnel as may be necessary 1

Sec. [9] 8. Section 3648, Revised Statutes (31 U. S. C. 529), shall not apply to payments made from appropriations contained in this Act in compliznce with the laws of foreign countries or their ministerial regulations or to payments made for tuition.

Sec. [10] 9 . No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees or who is a member of an organization of Government employees
that asserts the right to strike against the Government of the that asserts the right to strike against the Government of the
United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affitavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government United States, is not a member of an organization that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation in this Act shall be guilty of a felony and, upon conviction,
shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

Sec. [11] 10. No part of any money appropriated herein or included under any contract authority herein granted shall be expended for the payment of any commission on any land purchase contract in excess of 2 per centum of the purchase price.
[SEc. 12. No part of any appropriation contained in this Act may be obligated for the construction of quarters, including heating and plumbing apparatus, wiring and fixtures, in continental United States, except in Alaska, for greater amounts per unit than follow:]
[Permanent construction:]
[For commissioned officer, $\$ 10,000$.]
[For commissioned warrant or warrant officer, $\$ 7,500$.
[Tem [Por enlisted man, $\$ 6,000$.
[For commissioned officer, $\$ 7,500$.
[For commissioned warrant or warrant officer, $\$ 5,000$.] [For enlisted man, $\$ 3,500$.]

Sec. [13] 11. The Secretary of War is authorized to utilize ally appropriation available for the Military Establishment, under such regulations as he may prescribe, for [all] expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army custody whose status is determined by the Secretary of War to be similar to prisoners of war, and persons detained in Army custody pursuant to Presidential proclamation.

Sec. [14] 12. The appropriations contained in this Act which are available for the procurement or manufacture of munitions of war of special or technical design may be used for the development and procurement of gages, dies, jigs, and other special aids and appliances, production studies, factory plans, and other production data, including specifications and detailed drawings, in accordance with the provisions of sections 120 and 123 of the National Defense Act, as amended. Such appropriations may also be used for the purchase of letters patent, applications for letters patent, and licenses under letters patent and applications for letters patent that pertain to such equipment or material for which the appropriations are made.

SEc. [15] 13. None of the moneys appropriated by this or any other Act shall be available to the War Department or the Military Establishment for audit work for the purpose of reconciling family allowance pay-roll deductions made by disbursing officers in the field with family allowance payments to dependents of military personnel under the provisions of the Servicemen's Dependents Allowance Act of 1942 .
[Sec. 16. The appropriations for the Military Establishment and for civil functions administered by the War Department for the
fiscal year 1947 shall be available for the payment of rewards, subject to such regulations as the Secretary of War shall prescribe, to civilian officers and employees in addition to their usual compensation and to persons in civil life for suggestions resulting in improvement or economy in manufacturing process or plant or military material, and for suggestions resulting in efficiency or economy in the operation or administration of the War Department and the Military Establishment, and for expenses of such nonmonetary awards, including citations, insignia, emblems, medals, and devices, as may be granted in recognition of faithful and meritorious service.]

SEc. [17] 14. During the fiscal year [1947] 1948 occupancy of Government facilities under the jurisdiction of the Military Establishment on a rental basis by personnel of the services mentioned in the title of the Pay Readjustment Act of 1942 or by their dependents shall not deprive such personnel of money allowances for rental of quarters.
[Sec. 18. The rescissions of the unexpended balances of War Department appropriations of prior years shall be deemed to be a compliance with so much of paragraph (2) of subsection (c) of section 403, as amended, of the Sixth Supplemental National Defense Appropriation Act, 1942, as reads: "Upon the withholding of any amount of excessive profits or the crediting of any amount of excessive profits against amounts otherwise due a contractor, the Secretary shall certify the amount thereof to the Treasury and the appropriations of his Department shall be reduced by an amount equal to the amount so withheld or credited. The amount of such reductions shall be transferred to the surplus fund of the Treasury".]
[SEc. 19. The Secretary of War is authorized to delegate to subordinate officials the power to employ persons in the departmental service of the War Department wherever located and to delegate to such officials as he shall designate the function of authorizing payment of the cost of transportation of employees' immediate families on change from one official duty station to another for permanent duty. 1
[SEC. 20. Not to exceed 4 per centum of any of the appropriations for the Military Establishment for the fiscal year 1947 may be transferred with the approval of the Bureau of the Budget to any other of such appropriations, but no appropriation shall be increased more than 4 per centum thereby: Provided, That no such transfers shall be made to the appropriations under the headings "Finance Department", "Quartermaster Corps", and "Corps of Engineers": Provided further, That a quarterly statement of any transfers made under the authority of this section shall be transmitted to the chairmen of the Appropriations Committees of the House of Representatives and the Senate: Provided further, That no part of any amount by which appropriations or subappropriations may be increased under the authority of this section shall be available for or on account of public works or land acquisition or to replace any funds thus used.]

## CIVIL FUNCTIONS OF THE WAR DEPARTMENT QUARTERMASTER CORPS

## cemeterial expenses

## Cemeterial Expenses, War Department-

Cemeterial expenses: For maintaining and improving national cemeteries, including fuel for and pay of superintendents and the superintendent at Mexico City, and other employees; purchase of grave sites; [purchase of tools and materials; purchase (not to exceed five), repair, maintenance, and operation of passengercarrying motor vehicles; care and maintenance of the Arlington Memorial Amphitheater, chapel, and grounds in the Arlington National Cemetery, and that portion of Congressional Cemetery to which the United States has title and the graves of those buried therein, including Confederate graves, and [including] the burial site of Pushmataha, a Choctaw Indian chief; repair to roadways but not to more than a single approach road to any national cemetery [constructed under special Act of Congress]; for headstones or markers for unmarked graves of soldiers, sailors, and marines under the Acts approved March 3, 1873, February 3, 1879, February 26, 1929, and April 18, 1940 ( 24 U. S. C. $279-280$ b), and civilians interred in post cemeteries; for [repairs and preservation] maintenance of monuments, tablets, roads, fences, and so forth, made and constructed by the United States in Cuba and China to mark the places where American soldiers fell; [care, protection, and] maintenance of the Confederate Mound in Oakwood Cemetery at Chicago, the Confederate Stockade Cemetery at Johnstons Island, the Confederate burial plats owned by the United States in Confederate Cemetery at North Alton, the Confederate Cemetery, Camp Chase, at Columbus, the Confederate Cemetery at Point Lookout, and the Confederate Cemetery at Rock Island; and for [care and] maintenance of graves used by the Army for burials in commercial cemeteries; $\$ \$ 2,433,000] \$ 4,255,000$ : Provided, That no railroad shall be permitted upon any right-of-way which may have been acquired by the United States leading to a national cemetery, or to encroach upon any roads or walks constructed thereon and maintained by the United States: Provided further, That no part of this appropriation shall be used for repairing any roadway not owned by the United States within the corporate limits of any city, town, or village.
[Cemeterial expenses: For an additional amount for "Cemeterial expenses", fiscal year 1946, including the objects specified under this head in the War Department Civil Appropriation Act, 1946, and necessary expenditures in connection with the procurement of caskets, $\$ 3,000,000.1$ ( 5 U.S. C. 78; 24 U. S. C. 271 279, 274, 276, 278, 279, 280, 283, 288, 290; Act of Mar. 28, 1946 Public Law 335; Act of May 2, 1946, Public Law 374; Act of June 21, 1946, Public Law 419.)

Maintenance and Operation of Dams and Other Improvements of Navigable Waters-

By the act of June 10, 1920, 41 Stat. 1072, 50 percent of the proceeds of certain licenses issued by the Federal Power Commission for constructing, operating, and maintaining dams, conduits, reservoirs, etc. (exclusive of proceeds from Indian reservations), was appropriated for maintenance and operation of dams and other navigation structures owned by the United States, and for other improvements of navigable waters. Such appropriation was repealed by the act of June 26, 1934, but was reestablished by the act of August 26, 1935, 49 Stat. 845. Moneys derived from such appropriations each year are available until expended. (16 U.S.C.810; 31 U. S. C. $725 c$.)

Payments to States, Flood Control Act, June 28, 1938, as Amended-
The act of June 28, 1938, appropriates 25 percent of the moneys received during any fiscal year, on account of leases of lands acquired by the United States in connection with flood control projects, for the benefit of the public schools and public roads of the county or counties in which such property is situated. Moneys so appropriated are paid, in the fiscal year following that in which received, to the States in which such counties are situated. ( $39 \mathrm{U} . \mathrm{S} . \mathrm{C}$. 702a-11.)
Appropriated 1947, $\mathbf{\$ 8 5 , 0 0 0}$
Estimate 1948, \$215,000
Revised 1947, \$215,000
13 Refunds, awards, and indemnities: Obligations-1946, $\$ 71,017$; 1947, $\$ 215,000$, 1948, $\$ 215,000$.

## UNITED STATES SOLDIERS' HOME

Permanent indefinite appropriation:

## Payment of Interest on Soldiers' Home Permanent Fund-

The act of March 3, 1883, as amended, appropriates, out of any money not otherwise appropriated, an amount representing interest at the rate of 3 percent per year on the balance of the Soldiers' Home permanent fund held in trust by the Treasury. Payments of the amounts so appropriated are made quarterly to the Soldiers' Home permanent fund. (\$4 U.S.C.46; 31 U.S.C. 725s; 24 U. S. C. 46 (a).)
Appropriated 1947, \$420,000
Estimate 1948, \$530.000
Revised 1947, \$480,000
15 Interest: Obligations-1946, $\$ 437,197 ; 1947, \$ 480,000 ; 1948, \$ 530,000$.

## Trust account:

## Soldiers' Home, Permanent Fund-

For maintenance and operation of the United States Soldiers' Home, to be paid from the Soldiers' Home permanent fund, [ $\$ 1,596,248] \$ 2,286,600$ of which $\$ 220,000$ shall be immediately and continuously available until expended for the preparation of plans and specifications for the renovation and enlargement of the United States Soldiers' Home: Provided, [That $\$ 54,768$ of such amount shall be immediately available: Provided further, 1 That this appropriation shall not be available for the payment of hospitalization of members of the home in United States Army hospitals at rates in excess of those prescribed by the Secretary of War, upon the recommendation of the Board of Commissioners of the home and the Surgeon General of the Army: Provided further, That any owning or disposal agency is authorized to transfer surplus property, other than real estate, to the United States Soldiers' Home without reimbursement or transfer of funds. (5 U. S. C. 59b; 24 U. S. C. 41-60; 31 U.S.C. 711 (12); 31 U.S. C. 725s (a); Act of May 2, 1946, Public Law ${ }^{\text {7444). }}$

## Special deposit account:

## Municipal Works, Panama and Colon-

Pursuant of Article VII of the 1903 Treaty with the Republic of Panama, contract was entered into in 1907 between the Isthmian Canal Commission (Panama Canal) and the Republic of Panama, under which the Commission constructed the water distribution and sewer systems, as well as some paving in the cities of Panama and Colon, in order to provide necessary utilities for those cities. The Panama Canal has maintained the water and sewer systems and pavements, and extends and improves them on properly authorized and approved requests by the Republic of Panama. The Canal has collected the water rentals from the water consumers and applies the proceeds thereof to cover the cost of the water; maintenance, extension, and improvement of the systems; amortization of the investment; and interest at the rate of 2 percent on the unamortized balance. In accordance with the joint resolution ap proved May 3, 1943 (Public Law 48), and in conformity with Executive Order 9551 of May 16, 1945, the transfer of the water and sewer systems in Panama and Colon has been negotiated and covered in the instrument of transfer to the Republic of Panama of the water and sewer systems in the cities of Panama and Colon and agreement respecting incidental and related matters, between the Governor, The Panama Canal, and the Minister of Foreign Relations of the Republic of Panama, under date of December 28, 1945. The effective date of the transfer was January 1, 1946, and interest on and amortization of the original investment ceased to accrue to the United States as of that date. The schedule below under the heading of "Surplus account" is based on the transfer effected as of January 1, 1946, and indicates the estimated obligation of the accrued surplus to undertake any requested and approved extensions and improvements to the water and sewer systems and the pavements in the cities of Panama and Colon.

Coincidental with the accomplishment of the instrument of transfer there was entered into a contract covering the management of the water and sewer systems and the paving of the streets of the cities of Panama and Colon by The Panama Canal for the account of the Republic of Panama., The schedule below under the heading of "Management account" indicates the obligations, receipts, and payment to the Republic of Panama as provided for in the management agreement.

1 Includes 9 station wagons and 10 busses.
In addition to the foregoing sums there is hereby made available for the fiscal year [1947] 1948 for expenditures and reinvestment under the several heads of appropriation aforesaid, without being covered into the Treasury of the United States, and to remain available until expended, all moneys received by the Panama Canal during the fiscal year [1947 and prior fiscal years (exclusive of net profits for such prior fiscal years) 1948 from services rendered or materials and supplies furnished to the United States, the Panama Railroad Company, the Canal Zone government, or to their employees, respectively, or to the Panama Government, from hotel and hospital supplies and services; from rentals, wharfage, and like service; from labor, materials, and supplies and other services furnished to vessels other than those passing through the Canal, and to others unable to obtain the same elsewhere; from the sale of scrap and other by products of manufacturing and shop operations; from the sale of obsolete and unserviceable materials, supplies, and equipment purchased or acquired for the operation, maintenauce, protection, sanitation, and government of the Canal and Canal Zone; and any net profits accruing from such business to the Panama Canal shall annually be covered into the Treasury of the United States.

There is also made available for the fiscal year [1947] 1948 for the operation, maintenance, and extension of waterworks, sewers, and pavements in the cities of Panama and Colon, to remain available until expended, the necessary portions of such sums as shall be paid during that fiscal year as water rentals or directly by the Government of Panama for such expenses[; and notwithstanding the transfer of the waterworks and sewer systems pursuant to the joint resolution approved May 3, 1943 (Public Law 48), any unexpended balances of the sums made available by this paragraph, together with the unexpended balances of sums heretofore made available for the same purpose in prior fiscal years, shall be immediately available and shall remain available until expended for the purposes for which they were made available].

Sec. 2. [No part of any appropriation contained in this Act shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: Provided, however, (1) That, notwithstanding the provision in the Act approved August 11, 1939 ( 53 Stat. 1409), limiting employment in the above-mentioned positions to citizens of the United States from and after the date of the approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory; or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United'States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: Provided further, That the President may suspend from time to time in whole or in part compliance with this
section in time of war or national emergency if he should deem such course to be in the public interest: Provided further, That the President may, if he tinds it necessary because of a shortage of bousing, suspend, for the fiscal year 1947, the application of those portions of this section which require the employment of citizens of the Republic of Panama or of the United States in skilled, technical, clerical, administrative, executive, or supervisory positions]. Notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409 ), limiting employment in certain positions to cilizens of the United States, citizens of Panama may be employed in such positions.

Sec. 3. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

Sec. 4. The Governor of the Panama Canal is [hereby] authorized to employ [by contract or otherwise without regard to section 3709, Revised Statutes, and at such rates as he may determine, the services of architects, engineers, and other technical and
professional personnel, or firms or corporations thereof, as may be necessary 1 services as authorized by section 15 of the Act of August 2, 1946 (Public Law 600), but at rates not exceeding $\$ 100$ per diem for indieiduals.

Sec. 5. Appropriations for the Military Establishment and for civil functions administered by the War Department [for the fiscal year 1947] may be used for [carrying into effect the Act entitled "An Act to provide for the settlement of claims for damage to or loss or destruction of property or personal injury or death caused by military personnel or civilian employees, or otherwise incident to activities, of the War Department or of the Army', approved] the payment of claims under the Act of July 3, 1943 and part 2 of the Federal Tort Claims Act of August 2, 1946 (Public Law 601), and for the expenses of health programs for Federal employees pursuant to the Act of August 8, 1946 (Public Law 658).
[Sec. 6. No part of the appropriation for the Garrison Reservoir herein contained may be expended for actual construction of the dam itself until the Secretary of War shall have selected and offered, through the Secretary of the Interior, to the Three Affiliated Tribes, land which the Secretary of the Interior approves as comparable in quality and sufficient in area to compensate the said tribes for the land on the Fort Berthold Reservation which shall be inundated by the construction of the Garrison Dam: Provided further, That said selection and offer by the Secretary of War and approval by the Secretary of the Interior shall be consummated before January 1, 1947, after which consummation actual construction of the dam itself may proceed: And provided further, That funds appropriated for the construction of said dam may be transferred to the Secretary of the Interior for use by him in acquiring title to the lands thus selected. 1 (Act of May 2, 1946, Public Law 374.)

## EXPLANATORY STATEMENT

## General Statement

The Federal district, designated as the District of Columbia, constitutes a political entity in which are exercised not only municipal but also county and State functions, such as public education, administration of justice, maintenance of a unit of the National Guard, promotion of family welfare, care of the indigent, custody of mental defectives and delinquents, protection of the interests of labor, metropolitan area planning, etc. While the municipal functions are administered principally by the Board of Commissioners, District of Columbia, most of the county and State functions are carried on by other agencies, some local and some Federal in character.

In contrast to this diversity of District administration, Congress only, under the Constitution, is empowered "to exercise exclusive legislation in all cases whatsoever" on behalf of the District of Columbia as the seat of government of the United States, acting in municipal matters as a city council and in dealing with the broader aspects of the government of the District of Columbia as a county board and a State legislature. In this connection, Congress enacts the District's revenue measures and appropriates the money thus raised to carry on the government of the District of Columbia. Under the law, the District estimates of appropriation are submitted to the Bureau of the Budget for incorporation in the Budget of the United States. Furthermore, while District revenues from all sources are covered into the United States Treasury and credited to either the general fund, the highway fund, the water fund, or some trust fund, no expenditure can be made from any of these funds, other than trust funds, without specific appropriation by Congress. The Bureau of the Budget does not examine the estimates of the

District of Columbia in minute detail, but confines its attention more to matters of policy which concern the Federal Government and present and proposed revenue measures required to balance the District budget.

The estimates of revenues for the general, highway, water, and trust funds are found in Supporting Statement No. 1. Estimates of appropriation for the same funds are shown on Supporting Statement No. 2. Attention is also directed to the summary of estimates of appropriation at the beginning of this chapter.

## GENERAL FUND

Revenues accruing to the general fund of the District of Columbia are used to finance the administrative offices, schools, libraries, health, recreation, sanitation, welfare, corrections, certain public works, and other operating activities. These revenues are realized from real, personal, and other property taxes; sales and gross receipts; taxes on alcobolic beverages, business privileges, insurance, public utilities, and other business; licenses and permits; individual and corporation income taxes; inheritance and estate taxes; certain earnings and miscellaneous revenues; and the Federal contribution. The largest item of revenue in the general fund comes from realty and personal property taxes and, including proposed new taxes, amounts to approximately 42 percent of the total. The levy is based on an estimated assessed valuation of $\$ 1,725,000,000$, taxed at the rate of $\$ 1.75$ per $\$ 100$. The estimated valuation is $\$ 140,000,000$ higher in 1948 than for the current fiscal year. The Federal contribution is estimated at $\$ 8,000,000$, which is the same amount as was appropriated in fiscal year 1947.

The estimate of general-fund revenues on the present tax base for the fiscal year 1948, including the Federal contribution of $\$ 8,000,000$ and the sale of $\$ 1,376,200$ in securities, totals $\$ 65,926,200$, which amount is $\$ 11,300,000$ less than the estimated obligations for 1948 . To this end, the District Commissioners have approved proposed legislation for raising additional revenues to balance the budget. This legislation would broaden the tax base on individual incomes and alcoholic beverages and provide for new taxes on sales, cigarettes, amusements, public utility bills, and unincorporated business income. It is estimated that this proposed legislation will increase general-fund revenues by $\$ 11,300,000$ in fiscal 1948, if enacted into law by July 1, 1947. However, it is expected that the new legislation will produce approximately $\$ 17,750,000$ a year when fully effective. The balancing of the general-fund budget for the fiscal year 1948, therefore, depends upon congressional approval of the new tax legislation or disapproval of a sizable part of the appropriation requests.

General-fund estimates of appropriation for 1948 show an over-all increase of approximately 6 percent over 1947 estimates. This increase is reflected largely in libraries, recreation, police and fire, courts, health, welfare and corrections, park service, and public works programs. In addition to regular appropriations, some new contract authorizations for public schools are requested.

## Highway Fund

Highway-fund revenues are realized from a gasoline tax, automotive registration and weight tax, motorvehicle fees of various types, and paving assessments. The estimated revenues from these sources at existing rates for the fiscal year 1948, plus available surpluses, total $\$ 7,547,878$, which will be $\$ 1,662,422$ less than the amount of the estimated obligations. To meet this deficit and balance the 1948 highway-fund budget, the Commissioners are proposing legislation to increase the gasoline tax 1 cent per gallon and double motor vehicle inspection fees.

While there is a small decrease in the 1948 estimates of appropriation from the highway fund for debt service and the Trees and Parking Division, the over-all estimates show an increase of 18 percent over 1947 estimates. The increases are for operating expenses and capital outlays for the Street and Bridge Divisions, for salaries and expenses of the Department of Vehicles and Traffic, and for reimbursements of other appropriations from the
highway fund. In addition to the regular appropriation estimates, some new contract authorizations for the Street and Bridge Divisions are included.

## Water Fund

Water-fund revenues are derived from the sale of water to residents of the District of Columbia and to Arlington County, Va.; from water-main assessments; from interest on investments; and from miscellaneous receipts. Total revenues for the fiscal year 1948, including surplus funds and sales of investment securities, are estimated at $\$ 4,129,-$ 260 , which will be $\$ 4,516,740$ less than the estimated obligations.
The estimates of appropriation for fiscal 1948 from the water fund, excluding contract authorizations, amount to $\$ 8,646,000$ and exceed estimates for the fiscal year 1947 by $\$ 3,214,336$ for an increase of approximately 59 percent.

Capital outlays amounting to $\$ 5,693,000$ account for approximately 66 percent of the fiscal year 1948 estimates, as compared with 48 percent of the 1947 estimates. These capital-outlay projects will provide important improvements in the District water distribution system and the Washington Aqueduct. In addition to these appropriation estimates, new contract authorizations for the Washington Aqueduct are included in the budget request.

To cover the substantial deficit indicated in the water fund for fiscal 1948, the District Commissioners are proposing legislation requiring payment from the Federal Government and the District of Columbia general fund for the water used by Government agencies and institutions and authorizing long-term loans for capital improvements in the water system from the United States Treasuty. This is expected to produce an additional annual revenue for the water fund amounting to a net of $\$ 983,000$, of which the Federal Government will pay $\$ 886,000$ and the District Government $\$ 97,000$. Under this proposed legislation, the remainder of the indicated deficit may be financed by borrowing from the Federal Treasury as the cash is needed. It is not expected that any funds will need to be borrowed under this proposed arrangement during fiscal 1948.

## Trust Funds

Revenues and expenditures of trust funds are shown in Supporting Statements Nos. 1 and 2. The balances in these funds are expected to continue without much change. The District unemployment trust fund balance constitutes a greater part of the total of these funds.

SUMMARY OF OPERATIONS

| Classification | Actual, fiscal year 1946 | $\underset{\text { year } 1947}{\text { Estimate fiscal }}$ | Estimate, fiscal year 1948 |

## ESTIMATES OF APPROPRIATION

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, [1947] 1948, out of (1) the general fund of the District of Columbia, hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, and $\$ 8,000,000$, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1946] 1947), (2) the highway fund, established by law (D. C. Code, title 47, ch. 19), and (3) the water fund, established by law (D. C. Code, title 43 , ch. 15), sums as follows:

From the general fund: All sums appropriated under the following heads: General administration, fiscal service, compensation and retirement fund expenses, [District debt service (excluding those items designated as payable from the highway fund), $\mathbf{1}$ regulatory agencies, public schools, Public Library, Recreation Department, Metropolitan Police, Fire Department, policemen's and firemen's relief, Veterans' Services, courts, Health Department, public welfare, public works (excluding those items designated as payable from the highway and water funds), National Guard, National Capital Parks, National Capital Park and Planning Commission, and National Zoological Park;

From the highway fund: All sums appropriated under District debt service and public works designated as payable from the highway fund; and

From the water fund: All sums appropriated under public works and Washington aqueduct, designated as payable from the water fund; namely:

## GENERAL ADMINISTRATION

For [all] expenses necessary for the offices named under this general head[, including, in addition to the objects specified respectively under each head, personal services; lawbooks, books of reference, periodicals, and newspapers; and printing and binding1: (Act of July 9, 1946, Public Law 493.)

## Salaries and Expenses, Executive Office, District of Columbia-

Executive office, plus so much as may be necessary to compensate the Engineer Commissioner at such rate in grade 8 of the professional service of the Classification Act of 1923, as amended, as may be determined by the Board of Commissioners of the District of Columbia, hereafter in this Act referred to as the Commissioners; [ $\$ 11,910] \$ 13,578$ for examination of estimates of appropriations without regard to the civil-service and classification laws; six members of the Apprenticeship Council at $\$ 120$ per annum each; $\$ 250$ to aid in support of the National Conference of Commissioners on Uniform State Laws; general advertising in newspapers and legal periodicals in the District of Columbia but not elsewhere, unless the need for advertising outside the District of Columbia shall have been specifically approved by the Commissioners, including notices of public hearings, publication of orders and regulations, tax and school notices, and notices of changes in regulations; and $\$ 20,000$ for expenses in case of emergency, such as riot, pestilence, public insanitary conditions, flood, fire, or storm, and for expenses of investigations; [\$195,300] $\$ 223,600$ : Provided, That the certificate of the Commissioners shall be sufficient voucher for the expenditure of $\$ 1,500$ of this appropriation for such purposes as they may deem necessary. (Act of May 21, 1946, Public Law 987; Act of July 9, 1946, Public Law 493.)

Sec. 2. No part of any appropriation contained in this Act or authorized hereby to be expended shall be used to pay the compensation of any officer or employee of the Government of the United States, or of the District of Columbia unless such person is a citizen of the United States, or a person in the service of the United States or
the District of Columbia on the date of the approval of this Act who being eligible for citizenship had theretofore filed a declaration of intention to become a citizen or who owes allegiance to the United States. This section shall not apply to citizens of the Commonwealth of the Philippines or nationals of those countries allied with the United States in the prosecution of the war effort.

Sec. 3. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or the Government of the District of Columbia or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the Government of the District of Columbia, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States or the Government of the District of Columbia, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the Government of the District of Columbia, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or the Government of the District of Columbia or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the Government of the District of Columbia, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

Sec. 4. Whenever in this Act an amount is specified within an appropriation for particular purposes or object of expenditure, such amount, unless otherwise specified, shall be considered as the maxi mum amount which may be expended for said purpose or object rather than an amount set apart exclusively therefor.

Sec. 5. The Commissioners are authorized, under available appropriations in this Act, to contract for stenographic reporting services without regard to section 3709 of the Revised Statutes.

Sec. 6. Work performed for repairs and improvements under appropriations contained in this Act may be by contract or otherwise, as determined by the Commissioners.

Sec. 7. In purchasing motor-propelled or animal-drawn vehicles or tractors, or road, agricultural, manufacturing, or laboratory equipment, or boats, or parts, accessories, tires, or equipment thereof, the Commissioners or their duly authorized representatives may exchange or sell similar items and apply the exchange allowances or proceeds of sales in such cases in whole or in part payment therefor.

Sec. 8. Appropriations in this Act shall be available, when authorized by the Commissioners, for allowances for privately owned automobiles used for the performance of official duties at not to exceed $\$ 264$ per annum for each automobile, unless otherwise therein specifically provided.

Sec.9. Appropriations in this Act shall be available for the payment of dues and expenses of attendance at meetings of organizations concerned with the work of the District of Columbia Government, when authorized by the Commissioners

Sec. 10. The Secretary of the Treasury is authorized to sell United States securities now held for and on account of the general fund of the District of Columbia in such amounts as may be certified by the Commissioners as necessary and credit the proceeds of such sale to said general fund.

CSec. 11. Unless otherwise specifically provided, no appropriation for the District of Columbia for the fiscal year 1947 shall be expended to purchase any motor-propelled passenger-carrying vehicle (exclusive of busses, ambulances, and station wagons) at a cost, completely equipped for operation, and including the value of any vehicle exchanged, in excess of the maximum price therefor established by the Office of Price Administration, which amount shall be in addition to the amount required for transportation.I

Sec. 11. Appropriations for necessary expenses shall be available for personal services and printing and binding and, when authorized by the Commissioners or by the purchasing officer and the auditor acting for the Commissioners, printing and binding may be performed by the District of Columbia Division of Printing and Publications without reference to fiscal-year limitations.

SEc. 12. The limitation of $\$ 42,000$ contained in section 2 of the District of Columbia Appropriation Act, 1945, is hereby increased to $\$ 55,000$.

Trust accounts:

## Miscellaneous Trust-Fund Deposits, District of Columbia-

This fund is derived from deposits made by property owners, corporations, and others on account of work to be performed by the District in connection with cuts in streets, special sewers, and various engineering projects, the whole cost of which is payable by the depositor. There are also carried in this account several bequests for the benefit of certain charitable and religious institutions, and as a fund to provide awards for prizes for excellence in school work. (39 Stat. 968 .)

Relief and Rehabilitation, District of Columbia Workmen's Compensation Act-

This fund is derived from collections of awards against employers made by the United States Employees' Compensation Commission, as compensation for death of employees resulting from injuries, in each case where no person is found to be entitled to such compensation, under the Longshoremen's and Harbor Workers' Compensation Act as extended to certain employments in the Compensation Act as extended to certain employments in the
District of Columbia. Fines and penalties collected in connection therewith are also credited to the account. One-half of each such collection is available as compensation for injuries increasing previous disabilities, the other half being available for maintenance
of employees undergoing vocational rehabilitation. Any portion of the account which, in the opinion of the Commission, is not needed for current requirements, is invested in bonds or notes of the United States or of any Federal land bank, the interest therefrom being credited to this account. (44 Stat. 1444, sec. 44; 39 U. S. C. 944; 45 Stat. 600; 19 D. C. Code, 11, 12.)
Appropriated 1947, a $\$ \mathbf{5 , 0 0 0}$

## INTRODUCTION TO PART III

Part III of the Budget contains a summary narrative and financial statements for all wholly owned Government corporations and four noncorporate operations supervised by the Federal Public Housing Authority. Net expenditures or net receipts in checking accounts with the Treasurer of the United States of these corporations and credit agencies have been discussed in the Budget Message of the President. In this section of the Budget these same activities are reflected in business-type budgets which portray the operations of Government corporations in considerable detail and from a somewhat different perspective.

The financial statements in this part of the Budget present three main aspects of corporation budgeting: (1) comparative statements of the sources and application of funds reflect the total volume of transactions of corporations; (2) comparative statements of income and expenses disclose the estimated profit or loss which accrues during a given year; and (3) comparative statements of financial condition indicate at the end of each fiscal year the amount and type of assets owned by corporations and the financial interest of the Government and others in such corporations.
In order to prepare financial statements which reflect income and expenses, Government corporation accounts are kept on the accrual basis, which is generally used by private corporations. Under the accrual system of accounting, liabilities are recorded in the accounts at the time materials are received or services rendered, and expenses are determined on the basis of the materials and supplies used, or applied to, a particular year. Income is recorded on the basis of the sales made and the services rendered in any particular year, even though collections may not be made until some later year.
The accrual method further requires the capitalization of expenditures for fixed assets, such as buildings and equipment, with annual charges for depreciation representing the portion of the total outlay considered as expense for that year. Agencies financed by appropriations, on the other hand, treat any outlay of funds, whether for a fixed asset or for current expenses, as an expenditure
of funds against the appropriation for the year in which the outlay takes place. Similarly, items of income and expense are recognized as such in Government corporation accounting, whether or not cash settlements have been made; such items are not recognized by noncorporate agencies unless there has been a cash settlement. Corporation accounting also sets up values for inventories of goods on hand. The cost of any goods which are sold during the period can thus be readily determined by adjusting the cost of goods purchased by amounts representing the change in inventories during the budget period.

Another important difference between corporations and noncorporate agencies of the Government is in the handling of cash. Government corporations use the United States Treasurer as they would a commercial bank; some of them use commercial banks, too. This practice enables the corporations to deposit their receipts with the Treasurer, as well as in commercial banks, subject to their own check. In this way, a corporation engaged in making loans can use receipts from loan repayments for disbursement to new borrowers, and a corporation engaged in selling commodities can use the proceeds of one sale to buy additional commodities for subsequent resale with a minimum of delay.
By contrast, receipts arising from the activities of noncorporate agencies, as a general rule, are deposited in the Treasury. They are not available to the agency for subsequent disbursement unless special arrangements to that effect are stipulated in the appropriation act, and then only after the Treasury has credited the funds to the agency by the issuance of appropriate documents.
In summary, the Government-owned corporation, like the privately owned corporation, is an autonomous legal entity which keeps its books on the accrual basis and controls its own bank account. The noncorporate agency financed by appropriated funds, on the other hand, keeps its books on the obligation and cash basis and has access to its own cash revenues only if given special authority.

## SUMMARY NARRATIVE

The wholly owned Government corporations and credit agencies whose budgets are presented in this section of the Budget are financed in part by borrowing, in part by appropriations and other authorizations for expenditures from general and special accounts, in part by drawing on cash balances held with the Treasurer of the United States, and to a very small extent by withdrawals from trust accounts.

## Net Withdrawals From United States Treasury

The net effects of these operations upon the checking accounts carried with the Treasurer of the United States are shown in net expenditures of corporation accounts, which are incorporated into the budget expenditure totals shown in the Budget Message of the President and in the summary tables in part I. The accompanying table on "Net withdrawals from the United States Treasury" gives a more comprehensive picture of the impact of the operations of corporations on the cash position of the Treasury since it includes not only transactions in the corporation accounts, but also transactions in general and special accounts and trust accounts arising from these programs. It omits only transactions through checking accounts in the commercial banks, ordinarily of minor importance.

| Net withdrawals from U. S. Treasury. | 35 | 1,335 | 1,310 |

${ }^{1}$ Offset by reduction in borrowings from the U. S. Treasury in equal amounts
In the aggregate, net withdrawals from the Treasury will amount to 1,310 million dollars in the fiscal year 1948 , or roughly the 1947 level, but far above the 35 million dollars withdrawn in 1946. In contrast to the high levels of expenditures in 1946 from appropriations-chiefly to provide for postwar price support of farm products-and in 1947-chiefly for veterans' housing-receipts from programs directly financed by appropriations in the fiscal year 1948 will slightly exceed expenditures. Similarly, the large general and special account expenditures for subscription to capital stock-chiefly stock of the Export-

Import Bank-in 1946 and 1947 will be replaced in 1948 by substantial repayments-primarily by the Reconstruction Finance Corporation for the accounts of the Smaller War Plants Corporation and the War Damage Corporation.

In the fiscal year 1948 restoration of capital impairment of the Commodity Credit Corporation will require general and special account expenditures of 830 million dollars through cancellation of the Corporation's notes, 91 million dollars less than in the current year
As the result of the greatly reduced expenditures from general and special accounts to finance their programs, corporations in the fiscal year 1948 will no longer make net repayments to the Treasury on their borrowings, as in 1946 and 1947, but will borrow an estimated total of 922 million dollars. This change from financing by appropriations to borrowing from the Treasury is the reason for practically all of the increase in net expenditures from corporation accounts in 1948 over 1947 shown in the summary tables in part I.

## Sources and Application of Funds

Most corporation programs involve a considerable turn-over of funds. The total volume of corporate activity, however, was larger during the war and immediate postwar years than it is likely to be in later years. In fact, the total volume of funds applied is estimated to decline in the fiscal year 1948 to 11,434 million dollars from a level of over 14,735 million dollars in 1946 and 1947. Apart from the changes in debt operations, this reflects a decline in the amount of commodities purchased, subsidies paid, and additions to fixed assets. Most subsidy programs have already been eliminated, and only 13 million dollars is expected to be spent in 1948. On the other hand, loans of Government corporations will expand in 1948-chiefly because of expansion in Reconstruction Finance Corporation loans for rural electrification, together with purchases of mortgages guaranteed by the Veterans' Administration and the Federal Housing Administration, and an increase in direct and guaranteed loans on agricultural commodities for price-support purposes.

In addition to the general expansion in loan activity in 1948, important changes will occur between various payments and receipts. New loans of 4,310 million dollars will exceed repayments on old loans by even more than in 1947. Purchases of commodities for price support or other longer term investment will be larger than sales of commodities, whereas the major part of the commodities purchased in earlier years was liquidated in 1946 and 1947. On the other hand, funds received by the sale of fixed assets, while declining, will exceed additions to fixed assets. In 1947, as the result of the veterans' re-use housing program, additions to fixed assets were much larger than receipts from sales.

| Total.. | 14, 656 | 14,735 | 11,434 |

${ }^{1}$ Includes eancellation of notes of Commodity Credit Corporation.
Important shifts are also anticipated in the financing of corporations. In 1946 there was a net repayment of borrowings by the corporations and credit agencies, accompanied by a net increase in Treasury capital subscriptions of 536 million dollars. By 1948, as indicated in the earlier discussion, corporations will borrow more than they will repay, most of this from the Treasury rather than the public. At the same time, they will return capital funds to the Treasury in the net amount of 418 million dollars. To a large extent, thus, corporations and credit agencies in 1948 will be retiring Tieasury capital, but at the same time increasing their borrowings from the Treasury.

Besides the changes in borrowing and repayment of capital funds, corporations will be supplied with 883 million dollars of Treasury funds, through appropriation or cancellation of notes-109 million dollars less than in 1947.

## Inoome and Expenses

The consolidated income and expense statement reflects the transition from war to peacetime activities. With the diminishing scope of the corporation programs, total income will decline from 3,390 million dollars in the fiscal year 1946 to 1,403 million dollars in 1948. Total expenses will fall even more. As a result, the net loss for all corporation programs is estimated at 944 million dollars in the fiscal year 1948 before reserve adjustments, or less than half the net loss in the current year. After adjustments, the estimated net loss will be 351 million dollars in 1948, compared to 3,187 million dollars in 1947 and 3,655 million dollars in 1946.

*Deduct.
The sharp decline in net loss since 1946 results primarily from the virtual elimination of subsidies and contributions, which amounted to 1,872 million dollars in that year. Losses and charge-offs, chiefly on sales and dispositions of war plants and preclusive buying operations, totaling 1,619 million dollars in the current fiscal year, will fall to 908 million dollars in 1948 . Reutilization costs of housing transferred to the veterans' housing program will drop from the peak of 505 million dollars in the present year to 80 million dollars in 1948. Moreover, while net additions to reserves amounted to 2,311 million dollars in the fiscal year 1946 and are estimated at 1,193 million dollars in the current fiscal year--chiefly against defense plants and other war activities-in 1948 net withdrawals of 593 million from those reserves help to hold down net loss carried to surplus.
Sales of commodities and supplies (except agricultural commodities) will fall sharply to 965 million dollars in the fiscal year 1948; transactions with occupied countries are the largest remaining item. This compares with 910 million dollars in direct costs of commodities and supplies sold. The net gain on the sale of agricultural commodities in the fiscal year 1946, however, will be much lower this year, and in 1948 a net loss of 83 million dollars is forecast.
With the sale of defense plants and war housing, rentals will decline to 156 million dollars in the fiscal year 1948. Income from this source together with 76 million dollars from sales of power, transportation, and other services, however, will exceed by 72 million dollars direct operating expenses of these programs.
Interest and dividend income of 206 million dollars, largely from the expanded volume of loans, also will materially exceed interost expense of 125 million dollars on all corporation programs. This reflects in part the low interest rate currently charged by the Federal

Government on borrowing by corporations from the Treasury. Insurance premiums of 52 million dollars will exceed expected losses and claims of 41 million dollars. Administrative expenses of 97 million dollars will continue at approximately present levels.

## Financial Condition

During the current fiscal year, the book value of assets of Government corporations will fall from 15,642 million dollars on June 30, 1946, to 11,843 million dollars on June 30, 1947. By June 30, 1948, it is expected to increase to 12,405 million dollars. The book value of land, structures, and equipment, on June 30,1948 , will fall to 3,223 million dollars, both through liquidation and establishment of valuation reserves, largely in the fiscal years 1946 and 1947. The decline in book value of commodities, supplies, and materials will continue at a slower rate as the result of further liquidation of strategic and critical materials, both by sale to the public and transfers to the military stock pile.

## Financial Condition

As of June 30, 1946, 1947, and 1948
[In millions]

By contrast, outstanding loans of Government corporations will show a considerable increase during the fiscal year 1948. By June 30, 1948, loans receivable will be 6,825 million dollars as compared with 3,474 million dollars on June 30, 1946. This involves an expansion in loan activity for practically all economic groups served by corporations: home owners, agriculture, industry, and local and foreign governments. Outstanding loans to foreign governments and for foreign trade will increase by 705 million dollars in fiscal year 1948 to 2,872 million dollars at the end of the year. This increase in 1948 is not as large as the 1,200 -million-dollar increase in the current fiscal year.

Investments will decline moderately to 657 million dollars on June 30, 1948. Over half of these are investments in United States Government securities, largely held by agricultural corporations. Preferred stocks and debentures of banks and trust companies held by the Reconstruction Finance Corporation will decline by 101 million dollars in the 2 -year period.

The total liabilities and capital reflect the investment of the Government and private investors in securities of Government corporations, and the cumulative surplus or deficit from corporation activities. The volume of bonds, notes, and debentures payable will increase in 1948 to 12,923 million dollars. All but 565 million dollars is held by the Federal Government. The amount held by the public has been steadily declining.

In this summary statement, paid-in capital and surplus includes not only the original capital investment by the Treasury in Government corporations but also appropriations from the general fund of the Treasury for specific programs related to corporate activity, and appropriations to restore capital impairment, or cancellation of notes owned by the Treasury (which has the same effect as restoration of capital). Over the period from June 30, 1946, to June 30,1948 , the paid-in capital and surplus will increase from 5,201 million dollars to 8,568 million dollars. Paid-in capital and surplus is more than offset by the cumulative deficit which will amount to 10,689 million dollars on June 30, 1948, predominantly from the war activities of the Reconstruction Finance Corporation.

## EXPORT-IMPORT BANK OF WASHINGTON

## Creation and Purpose

The Export-Import Bank of Washington was organized as a District of Columbia banking corporation pursuant to Executive Order 6851, dated February 2, 1934, and was continued as an agency of the United States by act approved January 31,1935 , as amended (15 U. S. C. 713 b ). The Bank was established to stimulate the international trade of the United States. The act of September 26, 1940, increased the Bank's lending authority from \$200,000,000 to $\$ 700,000,000$. In a message to Congress in June 1945, the President indicated that, with the slowing down and termination of lend-lease, the Bank should be empowered to assist liberated countries during the transition from war to peace. Congress subsequently passed the Export-Import Bank Act of July 31, 1945 (12 U. S. C. $635)$, increasing the lending authority of the Bank from $\$ 700,000,000$ to $\$ 3,500,000,000$. The same legislation removed the prohibition on loans by the Bank and persons participating with the Bank to governments in default to the United States Government, made the Bank an independent agency, created a statutory bipartisan board of directors, and arranged its financing directly from the United States Treasury instead of through the Reconstruction Finance Corporation. The board of directors consists of the Secretary of State and four full-time members appointed by the President of the United States by and with the advice and consent of the Senate, one of whom is designated by the President as chairman.

## Financial Organization

The Bank is authorized by the Export-Import Bank Act of 1945 to have $\$ 1,000,000,000$ of capital stock subscribed by the United States. All this has been issued and is now held by the Secretary of the Treasury. The Bank is authorized to issue from time to time for purchase by the Secretary of the Treasury its notes, debentures, bonds, or other obligations in an aggregate amount not to exceed $21 / 2$ times its authorized capital, and the Secretary of the Treasury is authorized and directed to make such purchases. The aggregate of outstanding loans and guaranties made by the Bank shall not exceed $\$ 3,500,000,000$ at any one time. Comparative statements of the financial condition of the Bank as of June 30, 1945 and 1946, and estimated comparative statements as of June 30, 1947 and 1948, are shown immediately following the textual material (exhibit C).

## Analysis of Budget Program by Major Activities

The budget program of the Bank for the fiscal years 1947 and 1948 is a part of a broader program of the United States Government, as a whole, for expanding international trade. The extension of the Trade Agreements Act, the establishment of the International Bank and the International Monetary Fund, the authorization of the British loan, together with the program of the Export-Import Bank, are all cornerstones of the broad program.

The Export-Import Bank consults with the National Advisory Council on International Monetary and Finan-
cial Problems on questions of major loan policies. In this way the loan programs of the Bank are coordinated with other aspects of national financial foreign policy.

Requests for Export-Import Bank credits far exceed the proposed budget program. Nevertheless, estimated credit authorizations and loan disbursements shown on the attached schedules are based upon the Bank's present lending authority.

The general budget program of the Bank stems from the primary mandate of the Congress as expressed in the Export-Import Bank Act of 1945 to aid in ${ }^{* *}{ }^{*}{ }^{*}$ financing and facilitating of exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country (or the Philippine Islands) or the agencies or nationals thereof."

## EXPORTER AND EXPORT TRADE DEVELOPMENT CREDITS

This type of credit has been traditional with the Bank since its inception. It is designed to offer facilities for financing the export of products and services which otherwise might be impossible by reason of a long term of repayment or other impediments to customary financing methods. These credits are of assistance directly to the American exporter in specific transactions; they also usually tend to the greater development of the economy of the importing country, thus promoting larger exports and imports in the future.
When the transaction involves a single United States exporter or primary contractor, the Bank usually deals direct with the American exporter, purchasing from him the obligations of the foreign buyer, which are usually guaranteed by the foreign government or foreign bank and are accompanied by suitable assurances of dollar exchange for the service of the loan. The exporter is usually required to finance a portion of the transaction himself, and the Bank attempts to secure participation of commercial banks for a portion of the remainder when possible. When the transaction involves numerous American exporters and one foreign purchaser, it is usually more advantageous to establish the credit direct with the foreign purchaser, with similar guaranties and assurances.

The Bank regards with particular favor those credit projects which will directly generate dollar and other foreign exchange for the borrowing country, or which will develop new areas and industries in less developed countries. In the final analysis, the Bank must receive repayments of its loans from the foreign exchange earned by the borrowing country.
These loans must be used for the specific purposes approved by the Bank and usually run from 2 to 20 years. A few typical examples of recent loan authorizations of this type include: $\$ 28,000,000$ to Chile to finance the purchase in the United States of equipment, materials, and services required for the construction of an integrated iron and steel plant; $\$ 20,000,000$ to Mexico for the purchase in the United States of equipment, materials, and services for a broad electrification program; approximately $\$ 500,000$ to an American exporter of railroad equipment to Colombia; and approximately $\$ 3,000,000$ to an American exporter
acting as prime contractor on behalf of himself and other American manufacturers for airport equipment to Turkey. As will be noted from the examples, the program to a considerable extent has operated in Latin America because of the natural trade interest between Latin America and the United States and because of the necessity during the war years to assist in the wartime adjustments of the LatinAmerican economies. Provision for these activities was made by the Congress in the act of September 26, 1940, which increased the Bank's lending authority from $\$ 200,000,000$ to $\$ 700,000,000$ to develop the resources, to stabilize the economies, and to assist in the orderly marketing of products of the countries of the Western Hemisphere.

As of June 30, 1946, loans outstanding in this program were $\$ 250,000,000$ and undisbursed authorizations were $\$ 367,000,000$. About $\$ 72,000,000$ of these credits as originally authorized have become due and have been repaid. Disbursements are estimated at $\$ 169,500,000$ in 1947 and $\$ 235,200,000$ in 1948. Repayments are estimated at $\$ 36,300,000$ in 1947 and $\$ 51,300,000$ in 1948.

## REVOLVING CREDITS FOR SMALL EXPORTERS AND IMPORTERS

In addition to the broader program of exporter and export trade development credits described above, the Bank has a program for making its facilities available to smaller United States exporters and importers, who are unable to secure the necessary assistance from commercial banks. Frequently, large commercial banks which specialize in foreign trade financing, find it difficult to give adequate service to small concerns. Smaller banks who might perform this service frequently do not have the facilities for foreign trade financing. To provide for these small exporters and importers the Bank has authorized a revolving credit to which such concerns may have access.
Although the average amount outstanding per account at any one time is small, approximately $\$ 5,000$, the total disbursements on these revolving credits for the first 10 months of 1946 exceeded $\$ 500,000$. The program represents an important contribution to small exporters and importers. Estimated disbursements are $\$ 1,000,000$ per year in 1947 and 1948. Repayments are estimated in 1947 at $\$ 900,000$ and $\$ 1,000,000$ in 1948.

## COMMODITY EXPORT CREDITS

Credits restricted exclusively to financing certain specific commodities are granted by the Bank when the terms and arrangements of the loan must be tailored to fit the customs and requirements of a single specialized commodity.
Existing credits of this type are the raw cotton credits established for European countries ( $\$ 100,000,000$ ) and for China ( $\$ 33,000,000$ ), and a credit to Czechoslovakia of $\$ 2,000,000$ for the purchase of tobacco. In these cases, the maturity varies from 15 to 26 months and the transactions are carried on through foreign and domestic commercial banks in the manner customary to these particular trades. The same principles would apply to other future credits of this type. This policy induces resumption of private financing through normal commercial channels.

Allocations from the European cotton program have been made to Finland ( $\$ 5,000,000$ ), Czechoslovakia ( $\$ 20,000,000$ ), and Italy ( $\$ 25,000,000$ ). If fully utilized, the cotton programs for Europe and China will finance in excess of 880,000 bales of cotton. In addition, approximately 250,000 bales of cotton have been financed in the reconstruction and other programs described below.

As of June 30, 1946, loans outstanding in the commodity export program were $\$ 7,500,000$ and undisbursed
authorizations were $\$ 125,500,000$. Disbursements are estimated at $\$ 99,500,000$ for 1947 and $\$ 78,000,000$ for 1948. Since there are no maturities in 1947, there will be no repayments in 1947 but repayments in 1948 are estimated at $\$ 58,300,000$.

## LEND-LEASE TERMINATION CREDITS

Credits have been extended to Belgium for $\$ 55,000,000$, to France for $\$ 550,000,000$, and to the Netherlands for $\$ 50,000,000$ to finance the purchase of products and services for which requisitions had been filed and approved, but not contracted for, before VJ-day (Sept. 2, 1945). These credits are distinct from the lend-lease "pipe line" credits which were extended in accordance with section 3 (c) of the Lend-Lease Act and which are financed from lend-lease funds and apply principally to goods and services under contract prior to VJ-day.

All the Export-Import Bank loan authorizations of this type totaling $\$ 655,000,000$ were made during fiscal year 1946. The President in his message to Congress of June 4, 1945, on the lend-lease appropriation for the fiscal year 1946, indicated that Export-Import Bank loans should be made for these purposes.
Since these credits served to carry out previous commitments of the United States Government, their terms with respect to maturities and rate of interest were made to correspond to those of the lend-lease 3 (c) agreements, namely, repayments of principal over a period of 30 years and an interest rate of $23 / 8$ percent per annum. The credit in favor of Belgium was available until June 30, 1946, while those in favor of France and the Netherlands are available until December 31, 1946, and are expected to be fully used.

As of June 30, 1946, loans outstanding in this program were $\$ 376,000,000$ and undisbursed authorizations were $\$ 279,100,000$. Disbursements in 1947 are estimated at $\$ 279,100,000$, and no disbursements are estimated in 1948. No further authorizations are anticipated. Repayments are estimated at $\$ 15,600,000$ in 1947 and $\$ 21,800,000$ in 1948.

## reconstruction credits for united states exports

This program has been necessary for the purpose of providing dollar credits in foreign countries for immediate reconstruction purposes pending the full operation of the International Bank. When that institution becomes fully operative, it will take over the major responsibility of making reconstruction credits which private capital cannot furnish on reasonable terms. In the meantime, in order that an undue assumption of risk by the United States alone would be avoided, these credits are being extended by the Export-Import Bank only in urgent cases and in such limited amounts as may be needed by the borrower for emergency purchases in the United States. These credits were contemplated in the President's message to Congress, June 4, 1945, and in the hearings on the ExportImport Bank Act of 1945.

As of June 30, 1946, credits of this character aggregated $\$ 1,277,200,000$ to aid liberated and war-devastated countries. Final, formalized loan arrangements had been completed with Belgium ( $\$ 45,000,000$ ), Denmark ( $\$ 20,-$ 000,000 ), Finland ( $\$ 35,000,000$ ), France ( $\$ 650,000,000$ ), Greece ( $\$ 25,000,000$ ), Netherlands ( $\$ 250,000,000$ ), and China ( $\$ 33,700,000$ ). Other credits in process included Poland ( $\$ 40,000,000$ ), Norway ( $\$ 50,000,000$ ), and Netherlands East Indies ( $\$ 100,000,000$ ).

Most of these credits are generally available until the middle of 1948. Advances are made against notes bear-
ing interest at the rate of $21 / 2$ percent and maturing at the end of 1950 and 1951. At that time the obligors will have the right to tender new notes in exchange for the original notes. The aggregate principal amount of the new notes will mature in approximately equal semiannual installments over a period varying from 15 to 25 years. Notes evidencing the earlier maturities will bear interest at $21 / 2$ percent; the midterm maturities will bear interest at 3 percent; the later maturities will bear interest at $31 / 2$ percent. The effective rate of interest will average approximately 3 percent over the life of the loans, the exact rate depending upon the rapidity with which the credits are utilized. The provisions with respect to the rate of interest are in accordance with a recommendation of the National Advisory Council on International Monetary and Financial Problems.

In the case of the Netherlands, however, the credit of $\$ 200,000,000$ authorized in the spring of 1946 is short term, one-half maturing in 1 year and one-half in 2 years from the date of the advances. Interest is $2 \frac{1}{4}$ percent. Forty-three commercial banks agreed to participate in the aggregate for approximately $\$ 100,000,000$, or onehalf of the total credit, without recourse on or any guaranty of the Export-Import Bank. The short-term feature was premised upon the belief that the Netherlands could refinance all or a part of the loan on the private capital market prior to maturity and repay the remainder from its own dollar resources as these became more liquid.

As of June 30, 1946, total loans outstanding on reconstruction credits were $\$ 93,800,000$ and undisbursed authorizations $\$ 1,180,000,000$. Disbursements are estimated at $\$ 632,400,000$ for 1947 and $\$ 530,600,000$ for 1948. Repayments are estimated at $\$ 600,000$ in 1947 and $\$ 27,200,000$ in 1948.

## OTHER CREDITS

The Bank's future program cannot be forecast in precise terms. Both the volume and the character of its operations depend upon the extent and nature of the demands upon it for credit assistance and upon developments in the foreign financial policy of the United States Government. It is necessary, therefore, to provide for a variety of operations which do not fall into any of the above categories. The Bank plans to extend such types of credit permitted by the Export-Import Bank Act of 1945 as will assist in promoting and facilitating foreign trade.

## IMPORT ACTIVITIES

The Bank is necessarily concerned with the growth of imports into the United States of such character and manner as will not dislocate American producers. The Congress has charged the Bank in the Export-Import Bank Act of 1945 with the responsibility of making loans which "offer reasonable assurance of repayment."

Unless United States foreign loans are eventually to be refunded merely with new foreign loans by the United States, repayments of American investments abroad must come from an excess of imports and similar items above exports and similar items. Viewed in terms of the small size of future annual amounts of repayments to the Bank, the problem is solvable if a careful policy and program is developed. Based on loans outstanding on June 30, 1946, total future payments due the Bank for principal and interest vary between $\$ 12,000,000$ and $\$ 70,000,000$ per year. Total repayments to the Bank of principal and
interest should not exceed $\$ 300,000,000$ in any one year, even for such future periods when the Bank's credits may have been fully advanced in actual loans. In proportion to the total annual volume of exports and imports and the total balance of international payments, the annual repayments of Export-Import Bank loans are not particularly large. The principal problem is that of developing a level of imports which will slightly exceed a high level of exports, such as is necessary to accompany a sound postwar position of the United States as a creditor nation.
The actual financing of imports into the United States has not, so far, been much of a problem. Up until now, at least, the Bank's facilities in this respect have not been called upon extensively, beyond the assistance rendered in the revolving credit for small importers and exporters described above.

The Bank is making a study, however, of how it may facilitate imports in accordance with its mandate contained in the Export-Import Bank Act of 1945. Among various means of accomplishing this is encouragement to countries from whom we must secure future repayment to increase that type of production which can earn dollars and other foreign exchange to an extent consistent with the external obligations they have undertaken. It is important, also, that American nationals be encouraged to study the possibilities and profits from imports as extensively as they do those of exports.
During the fiscal years 1947 and 1948, the Bank is expected to become increasingly active in this field, not only in the form of credits, but also by the use of its position and influence in facilitating the growth of imports as well as exports.

## PRIVATE CAPITAL PARTICIPATION

In furtherance of the Export-Import Bank Act of 1945 that the Bank "* * * supplement and encourage and not compete with private capital," the Bank has been exerting its utmost effort to stimulate the use of private capital for foreign trade financing without the use of the Bank's funds when possible and in arranging for partial private capital participation with the Export-Import Bank, when this is impossible. Participation of private capital in connection with the Export-Import Bank credits can take place in several ways. First, the Bank frequently requires that foreign purchasers must finance a portion of the transaction with their own dollar funds. Second, the Bank usually requires that exporters carry a portion of the credit at their own risk. Third, the Bank may secure the participation of commercial banks or other financial institutions in a credit whereby such institutions will undertake a portion of the loan at their own risk without the guaranty of the Export-Import Bank. Fourth, the Bank may resell securities in its portfolio without recourse on the Bank. Fifth, the Bank sometimes provides for disbursements of its loans through commercial banks, with the guaranty and at the risk of the ExportImport Bank, when the facilities of commercial banks will expedite trade, as in the case of the Bank's commodity credits. The Bank has a special division in its organization to maintain close contact with the private capital market and to assist in stimulating private capital participation.
Until public confidence revives further, extensive international financing by private capital is still definitely limited. Nevertheless, the Bank should be able in an increasing number of instances to secure participation
by private institutions. In March 1946, the Bank arranged for a credit of $\$ 200,000,000$ to the Kingdom of the Netherlands on terms which it was believed would be acceptable to commercial banking institutions and afforded them the opportunity to participate. Forty-three commercial banks throughout the United States agreed to do so at their own risk to the extent of approximately $\$ 100,000,000$ in the aggregate or approximately 50 percent of the loan.

## Operating Results

During the fiscal year 1946, the use of the Bank's resources (loan disbursements) steadily increased from $\$ 5,500,000$ in the month of July 1945 to $\$ 114,300,000$ in the month of June 1946, with an aggregate for the 1946 fiscal year of $\$ 558,000,000$. This closely measures the actual export of goods in that period as the result of the Bank's activities. There is a considerable time lag, however, between the original engagement of the Bank's facilities (credit authorizations) and the actual loan disbursements later arising therefrom. Total credit authorizations during 1946 amounted to $\$ 2,197,000,000$, substantially all of which will ultimately be reflected in exports. Total United States exports for the fiscal year 1946, including those financed through lend-lease, were approximately $\$ 8,744,000,000$.

Operations for the fiscal year 1946 showed a net income of $\$ 9,100,000$. Reserves have been provided for current delinquent accounts. Possible future losses on loans now in good standing cannot be estimated. Accordingly, the entire earned surplus of the Bank is regarded as a reserve against any such ! contingencies. The net profit from operations in 1947 is estimated at $\$ 25,000,000$ and approximately $\$ 56,700,000$ in 1948, all which is expected to increase the earned surplus reserve for future contingencies (exhibits B and C).

## Financial Condition <br> loan account

On June 30, 1946, loans outstanding were $\$ 734,200,000$ as compared with $\$ 214,300,000$ on June 30, 1945. Loans outstanding are estimated at $\$ 1,897,300,000$ on June 30,1947 , and $\$ 2,642,500,000$ on June 30, 1948. These estimates of future loans and disbursements do not include any provision for loan advances to China from the possible $\$ 500,000,000$ credit that has been under discussion but not authorized as of December 1, 1946.

Of the total loans made by the Bank and outstanding on June 30, 1946, amounting to $\$ 734,200,000, \$ 125,900,000$ was advanced by private commercial banks under guaanty of the Bank to assume the loans upon demand of the commercial banks; and $\$ 7,000,000$ was advanced by Government agencies as participants.

Of the total loans outstanding June 30, 1946, five loans were delinquent in some respect as compared with seven loans a year earlier. The total amount of outstanding principal on the delinquent loans on June 30, 1946, both due and unmatured, was $\$ 277,547$, which with delinquent interest of $\$ 6,533$, gives a total of $\$ 284,080$ as of that date. A portion of this sum will probably be collectible.

## CAPITAL STOCK

Capital stock issued and outstanding as of June 30, 1946, and held by the Secretary of the Treasury was
$\$ 675,000,000$. All of remaining authorized but unissued capital stock now has been issued so that $\$ 1,000,000,000$ is now outstanding.

## BORROWING AUTHORITY

The present borrowing authority of the Bank is $\$ 2,500$,000,000 which together with total authorized stock of $\$ 1,000,000,000$ equals the total lending limitation of the Bank of $\$ 3,500,000,000$.

As of June 30, 1946, loans outstanding and undisbursed credit authorizations together totaled $\$ 2,680,000,000$. It is estimated that total loans and undisbursed authorizations as of June 30,1947 , will be $\$ 3,402,000,000$ and on June 30, 1948, $\$ 3,467,000,000$. Included in this estimate is an increase in undisbursed authorizations of $\$ 500,000$,000 representing possible future credit authorizations to China. The remaining estimated net increase in credit authorizations, from June 30, 1946, to June 30, 1948, of $\$ 287,000,000$, will be required for the different programs enumerated above. Applications for the use of the Bank's funds under these programs considerably exceed this amount.

As of June 30, 1946, no notes had been issued to the Treasury against the Bank's borrowing authority. It is estimated that $\$ 637,000,000$ will be outstanding as of June 30, 1947, and $\$ 1,395,000,000$ as of June 30, 1948. Although the Bank's lending authority will be nearly fully obligated, notes to be issued to the Treasury will not take up the full borrowing authority in 1947 and 1948. This difference is caused by two factors; first, by the time lag between authorizations and actual loan advances thereunder and, second, by advances made by commercial banks from their own funds guaranteed by the Bank, or other guaranties by the Bank.

## Administrative Expenses

These expenses cover the operating staff of the Bank and general expenses of the organization required in carrying out the programs of the Bank. The Bank's administrative activities, which are under the general direction and supervision of the board of directors, may be divided into three major categories: (1) negotiation of new credit lines, which involves careful examination by the Bank of the following factors: (a) the urgency of the need of the borrower, (b) the borrower's own resources, (c) the possibility of the borrower obtaining the loan from other sources, including private capital and loans from other governments, ( $d$ ) the ability of the borrower to make effective use of the funds, (e) the capacity of the borrower to repay, and $(f)$ the effect of the loan on the United States domestic economy; (2) management of loans, which as of June 30, 1947, will reach $\$ 1,890,300,000$ and by June 30, $1948, \$ 2,635,500,000$, or about $33 / 5$ times the loans outstanding as of June 30, 1946; and (3) private capital participation.

In addition to the over-all supervision by the board of directors and the president's office, the functions of the Bank are carried out by eight groups: (1) examining division, (2) legal division, (3) economic division, (4) engineering division, (5) treasurer's and accounting division, (6) secretary's division, (7) administrative assistant's division, and (8) private capital participation division.

The operations of the Bank in 1946 required 85.1 manyears of employment, which is equivalent to the average net positions actually fully occupied during the year. For 1947, the Bank will require 130 positions, gross before lapses, and 140 in 1948. After allowing for lapses, however, the net employment required (on a basis comparable with the 1946 employment) will be 120.3 for 1947 and 128.7 for 1948.

This increase in personnel positions of about 40 percent above 1946 is but a small fraction of the step-up in the routine work load of the Bank which has increased by more than 300 percent, as the result of increased loans outstanding and the number of transactions relating thereto. Transactions are estimated to increase from 14,000 in 1946 to 46,000 in 1947, and 60,000 in 1948.
The authorizing language implementing the Bank's budget for fiscal year 1948 includes the limitation of $\$ 842,000$ for the cost of administration, as compared with $\$ 780,000$ for 1947 (see exhibit B-1). The total operating expenses will be less than one-twentieth of 1 percent of the loans outstanding at the end of the respective fiscal years.

## Language

## Administrative Expenses, Export-Import Bank of Washington-

Export-Import Bank of Washington: [Provided, That not] Not to exceed [ $\$ 780,000] \$ 842,000$ (to be on an accrual basis) of the funds of the Export-Import Bank of Washington shall be available during the fiscal year [1947] 1948 for all administrative expenses of the [bank] Bank, including [purchase, maintenance, operation, and repair of one passenger automobile; not to exceed $\$ 100$ for periodicals, $\$ 200$ for newspapers, and $\$ 200$ for maps; $]$ health service program as authorized by the Act of August 8, 1946 (Public Law 658), and not to exceed $\$ 24,000$ for [the] temporary [employment of persons or organizations for special services by contract or otherwise, without regard to section 3709 of the Revised Statutes and the civil-service and classification laws] services, as authorized by section 15 of the Act of August 2, 1946 (Public Law 600): Provided further, That [all] necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the [bank] Bank or in which it has an 'interest, including expenses of collections of pledged collateral, or the investigation or appraisal of any property in respect to which an application for a loan has been made, shall be considered as nonadministrative expenses for the purposes hereof. (12 U.S.C. 635; Act of July 20, 1946, Public Law 519.)

## PANAMA RAILROAD COMPANY

## Creation and Purpose

The Panama Railroad Company was incorporated by an act of the Legislature of the State of New York on April 7, 1849, and was operated under private control until 1881, when the original French Canal Company acquired most of the 70,000 shares of its stock. This company and its successor, the New Panama Canal Co., continued to operate the railroad company as a common carrier and also as an adjunct to their attempt to construct a canal, until 1904, when their stock ( 68,888 shares) passed to the ownership of the United States as a part of the assets of the New Panama Canal Co., which were purchased for the sum of $\$ 40,000,000$, as authorized by the act of Congress approved June 28, 1902 (34 Stat. 481). The remaining 1,112 shares were purchased from private owners in 1905 at an average cost of approximately $\$ 140$ per share.

By Executive order of May 9, 1904, the President directed that all members of the Isthmian Canal Commission be elected to the board of directors of the Panama Railroad Company and that the policy of the Panama Railroad Company be completely harmonized with the policy of the Government of making it an adjunct to the construction of the Canal, while at the same time fulfilling the purpose for which it was constructed as a route of commercial movement across the Isthmus of Panama. The Panama Canal Act, approved August 24, 1912, authorized the President to establish, maintain, and operate, through the Panama Railroad Company or otherwise, numerous types of business activities related to the Canal. This authority was exercised in many cases, and the conduct of incidental business operations by the Panama Railroad Company has been continued to date.

From 1914 to 1939 the Company's operations were on a fairly stable basis, marked only by an abrupt decline in the early 1930's of its once important coaling business. During the period of construction for national defense, starting in 1940 and throughout World. War II, the Company's business was greatly expanded. This caused a large increase in the earnings of its various enterprises. The increased demands suddenly placed upon the Company made it necessary for it to add many items to its facilities, such as additional locomotives, commissary store buildings and warehouses, and telephone equipment. It also became necessary to utilize a great deal of additional working capital to cover increased inventories, increased current accounts receivable, and increased cash to cover larger purchases, pay rolls, and other expenses. The peak of the Company's business was reached in 1943, and while all activities continued on a relatively high level during the years 1944 and 1945, they had declined to a certain extent by the end of fiscal year 1946.

Under section 304 of the Government Corporation Control Act (Public Law 238, 79th Cong.) the Panama Railroad Company intends to seek reincorporation in the Eightieth Congress. All of the present functions of the

Company as an adjunct to The Panama Canal and as an international common carrier are essential and are required by provisions of public treaties and notes accessory thereto to be performed by a public agency of the United States. Operation by a Government corporation, rather than by an agency other than a corporation, is necessary for those functions tinged with an international character and is highly desirable in the public interest for the remaining functions, which require the flexibility of operation provided by the corporate form for their proper performance.

## Financial Organization and Policy

The authorized and issued capital stock of the Panama Railroad Company at the time of its acquisition by the United States Government in 1904 was $\$ 7,000,000$, consisting of 70,000 shares. No change has been made in its capital structure, and the Company has no bonded indebtedness. The entire capital stock of the Company stands in the name of the Secretary of War, with the exception of 13 shares which are issued to the directors for qualification purposes but which remain in the custody of the Secretary of War. The Secretary of War, by virtue of holding the majority of the stock, nominates or approves the 13 directors who administer the affairs of the Panama Railroad Company. The Governor and the engineer of maintenance of The Panama Canal are president and second vice president, respectively, of the Panama Railroad Company and also members of its board of directors.

Although the Company is authorized by its charter to borrow money and to mortgage its property if necessary, it does not exercise the right to do so. The Company has followed a very conservative financial policy, and its board of directors has set aside funds, invested in United States Government securities, to provide for the replacement of plant and equipment and for other important future expenditures. All cash funds which the board of directors considers to be in excess of the needs of the Company are paid as dividends into the Treasury of the United States. The absolute necessity of adhering to this policy was amply demonstrated at the start of the expansion period in early 1940, when the sudden demands upon the Company, not only for additional facilities but also for additional working capital, resulted in a serious drain on the Company's cash.

## Analysis of Budget Program by Major Activities

The operations of the Panama Railroad Company are divided into nine distinct activities or functions, which are listed below and individually discussed in the following text: (1) Railroad, (2) Harbor terminal facilities, (3) Telephone system, (4) Hotel Tivoli, (5) Hotel Washington, (6) Commissary division, (7) Coaling plants, (8) Mindi dairy, (9).New York office and steamship line.

Statements of income and expenses have been prepared for each of the foregoing units and are shown in the same order as listed above in schedule B-1.

Basic assumptions.-The estimates for fiscal years 1947 and 1948 are based on the assumption that the general level of activity on the Isthmus during the 2 years will be approximately the same as it was during the last half of fiscal year 1946. However, the outlook for fiscal year 1947 is highly uncertain and the net revenues could vary by an appreciable amount, either one way or the other, from the estimates submitted for that year.

The level of business activity on the Isthmus to a certain extent reflects world trade conditions, but it is largely dependent upon the activities of the various United States Government agencies in the Canal Zone, which affect certain services of the Railroad directly, and others indirectly through the creation of employment in the Canal Zone and in the Republic of Panama. It is assumed that fiscal year 1947 will complete the transition to normal peacetime conditions, but there is little definite indication at this time as to what those conditions will be.

Another uncertain factor arises from increases in salaries and wages which were put into effect on July 1, 1946, and are reflected in the estimates for fiscal years 1947 and 1948. These increases, together with the increased costs of materials and supplies, have made it necessary to increase the prices charged for many services and commodities, but it is considered desirable, in order to assist in combating inflationary tendencies, to defer price increases as long as possible and to hold them to a minimum when they must be made.

The combination of increased personnel costs and deferment of corresponding price increases will materially reduce the net income of the Company for fiscal year 1947, and, in fact, some of its operations may result in a deficit. Considering the present financial position of the Company and the dividends it has paid during the past few years, it is believed that there is full justification for the policy of holding price increases to a minimum and of absorbing as much of the increased salary rates as is possible, in order to promote business stability.

It is hoped that by fiscal year 1948 conditions will have become so stabilized that the Panama Railroad Company can make a more definite estimate of its prospective business; if at that time costs are stabilized at a higher level, rates can be adjusted upward if necessary. In view of all these factors, the estimated net revenues for fiscal year 1948 may prove to be more accurate than the present estimate of net revenues for fiscal year 1947.

Railroad (see schedule B-1).-The railroad comprises 50 miles of main line track between the cities of Panama and Colon, at the Pacific and Atlantic terminals of the Canal, and the usual appurtenances such as freight and passenger stations and terminals, railroad yards, industrial trackage, and the requisite rolling stock. The railroad serves The Panama Canal, the United States Army and Navy, and other Government agencies on the Isthmus, and also performs the functions of a common carrier in meeting the needs of the Republic of Panama, and commercial agencies transacting business in this area.

For purposes of administration and accounting, there are also included under this heading the incidental real estate activities of the Company. Formerly the Company had an extensive real estate business consisting of the rental of Company-owned lands in the cities of Colon and Panama, Republic of Panama. All such lands not needed for the operations of the Panama Railroad Company or The Panama Canal were transferred to the Republic of Panama in December 1943, under authority of Public Law 48, Seventy-eighth Congress, and since
that date the Company's real estate activities have been of negligible importance. The $\$ 48,700$ income from rentals is nearly all derived from rental of buildings.

The gross revenues from operations of the railroad during the fiscal year 1946 were $\$ 3,177,256$ and for 1947 are estimated to be $\$ 2,514,000$. It is estimated that for fiscal year 1948 gross revenues will be reduced to $\$ 2,120$,000 as a result of, first, a decline in Government business with the return to normal peacetime conditions, and, second, the contemplated diversion of a significant amount of passenger and freight traffic to the recently constructed trans-Isthmian highway.

While operating expenses will be reduced, the reduction cannot be proportionate to the decline in revenue. This is because the largest part of the expense of operating and maintaining the railroad does not vary appreciably with the volume of traffic and must be incurred as long as required standards of service are maintained.
As a net result of the anticipated decline in both gross revenues and expenses, it is estimated that net revenues of the railroad, which were $\$ 877,293$ in fiscal year 1946, will be reduced to $\$ 68,000$ in fiscal year 1947, and further reduced to $\$ 20,000$ in 1948.
The railroad provides the principal transportation service for both freight and passengers between the two sides of the Isthmus of Panama. The Canal waterway is primarily for oceangoing commerce and cannot be utilized conveniently for local movements between its two terminal ports. The trans-Isthmian highway was built during the war by the United States Government, but shortages of equipment have so far prevented the establishment of truck and bus facilities adequate to satisfy a considerable part of the local demands. The rapid growth of highway facilities may be expected, but it is not believed that they will ever entirely replace the services of the railroad, particularly for heavy or bulky shipments.
Harbor terminal facilities (see schedule B-1).-The harbor terminal facilities consist of docks, piers, and appurtenances necessary for handling, transferring, stevedoring, and storing cargo arriving at the Canal Zone ports of Cristobal and Balboa, either for ultimate destination in the Canal Zone or the Republic of Panama, or for transshipment to points beyond. They include facilities for berthing vessels at docks and piers. This function also includes the custody and rental of the Colon stables.

The net income of the harbor terminals during fiscal year 1946 was $\$ 269,955$. An increase in wages effective July 1, 1946, together with a decline in activity, will cause a major decline in net income. In addition, it is estimated that $\$ 128,000$ will be expended during fiscal year 1947 to complete several important deferred maintenance projects. These extraordinary repair expenses may cause harbor terminals to show a deficit of $\$ 52,000$ for fiscal year 1947 instead of a net income of some $\$ 76,000$.

By fiscal year 1948 the receipt of commercial cargo for transshipment is expected to increase, the extent of the increase depending both on economic conditions and the trade routes established, which might or might not entail cargo transfer on the Isthmus. Assuming a slight increase in business and no further increase in basic wage rates or in rates charged by the Company, the net revenues for 1948 are estimated as $\$ 140,500$.

Telephone system (see schedule $B-1$ ). -The telephone system provides telephone service for The Panama Canal and for the civilian communities in the Canal Zone. It
also leases trunk lines, circuits, and duct space to the United States Army and Navy and to the Government of Panama. As regards gross and net income, it is the most stable operation conducted by the Panama Railroad Company.

The net income from telephone system operations during fiscal year 1946 was $\$ 76,173$, and it is estimated that the net income in both 1947 and 1948 will be approximately $\$ 72,000$. While the total income of the system should remain constant at about $\$ 386,000$ per year, increases of some $\$ 30,000$ in annual maintenance and operation expenses will more than offset a decrease of $\$ 27,000$ in annual depreciation expense. The reduction in depreciation expense is due to completion of the assigned service lives of certain switchboards and other equipment bought during the war expansion period and depreciated on what was expected to be the period of increased activity rather than on the normal physical life of such equipment.

Hotels Tivoli and Washington (see schedule B-1).--The Hotel Tivoli in Ancon, adjacent to Panama City, is an old frame structure of 132 rooms owned by The Panama Canal, built in 1907, and fully depreciated many years ago. It is operated by the Panama Railroad Company. The Company paid The Panama Canal a rental of $\$ 60,000$ in the fiscal year 1946. The rental rate has been reduced to $\$ 4,000$ per month effective at the beginning of fiscal year 1947 and probably will have to be further reduced because of present higher operating costs and lower net income. The Hotel Washington in Colon is a concrete structure of 82 rooms, built in 1913 and owned by the Panama Railroad Company.
In the decade 1930-39 both hotels operated at a loss, their continued operation having been justified because of their status as essential adjuncts to The Panama Canal, or, more broadly speaking, to the United States Government in this area. Since the large expansion in activity on the Isthmus which began about 1940 , both hotels have operated at a profit, and in fiscal year 1946 the net income of the Hotel Tivoli was $\$ 63,739$ and that of the Hotel Washington, \$34,772.
Increased salaries and wages effective at the start of fiscal year 1947, in addition to general increases in other operating costs, will make appreciable increases in the cost of operations of these two hotels, irrespective of any changes in the volume of business. It is estimated that the Hotel Tivoli will have a net revenue of $\$ 43,700$ for fiscal year 1947 after allowing for the purchase of some badly needed equipment and certain maintenance expenditures which could not possibly be deferred. In fiscal year 1948 no such extra expenses are anticipated and net revenues are estimated at $\$ 64,700$.
Business at the Hotel Tivoli is now maintained at a high level by transient guests from commercial airlines. The Hotel Washington has very little business of this kind and is expected to show a deficit of $\$ 34,300$ in fiscal year 1947 and $\$ 32,900$ in fiscal year 1948. However, it will be noted that depreciation charged to operations amounts to some $\$ 17,000$ a year. Thus, while the Hotel Washington will not be operated at a profit, it is estimated that the Panama Railroad Company will derive a net revenue from the combined operations of the two hotels.

In a note accessory to the Treaty of 1936 between the United States and the Republic of Panama, the United States agreed that the hotel business proper would be left in the hands of Panamanian industry when suitable hotel accommodations are available in the Republic of Panama. Preparations are now under way for the construction of a large hotel in Panama City, but it is not anticipated that
the new hotel will be in operation before the end of fiscal year 1948 .

Commissary division (see schedule B-1).-The commissary division provides food supplies, clothing, and other essential requirements to Government employees and their families, to establishments of the United States Government located on the Isthmus, and to commercial shipping. In addition to retail stores in all the Canal Zone communities, the division operates large dry and cold storage plants, a bakery, an ice-cream and milkbottling plant, an industrial laboratory, an ice plant, an abattoir, and a coffee-roasting plant, primarily as processing plants to supply its retail stores, as well as a laundry.

Commissary sales in fiscal year 1946 totaled $\$ 36,623,631$, including some $\$ 6,000,000$ of supplies furnished to other United States Government agencies during the prosecution of the war in the Pacific and the reconversion period. This abnormal wholesale trade has ended, but there has been no change in the volume of retail trade and none is expected. On this basis commissary sales are estimated to be $\$ 30,000,000$ in fiscal years 1947 and 1948, and income from other sources is estimated to be $\$ 585,000$ a year. Net revenues are estimated to be approximately $\$ 200,000$ for each of these years.
The activities of the United States Government on the Isthmus, including The Panama Canal, the Army, and the Navy, are now much greater than they were before the war, and these activities require a considerably increased quantity of commissary goods. The attendant larger civilian population has increased the volume of retail trade. Because of these two conditions, the commissary business is now, and probably will continue to be, much larger than it was before the war.
Coaling plants (see schedule B-1). -The Panama Railroad operates two coaling plants, one at each terminus of the Canal, to supply coal to shipping calling at Canal Zone ports. In addition to selling coal, the coaling plants derive revenue from wharfage on vessels docking at coaling plant piers but not taking coal. The Balboa coaling plant also handles sand brought by barge to the Canal Zone from nearby deposits.
The net revenue of the coaling plants during fiscal year 1946 was $\$ 67,517$. This favorable result was almost entirely due to reclaiming and selling a stock of coal of low inventory value that had been in subaqueous storage for many years at the Company's plant in Cristobal.
It is estimated that the net revenue of the coaling plants will decline to $\$ 1,000$ in fiscal year 1947 and that thereafter income will approximately equal expenses. These estimates are based on the fact that the war-induced demands for coal for ocean vessels ceased soon after the start of fiscal year 1946 and it is not expected that any important new demands will arise. Declines in revenues from sandhandling operations and wharfage are also anticipated as a result of generally reduced activity.
The function of the coaling plants was at one time of great importance. Although operations have decreased greatly in the past 15 years, the plants played a vital part in the war effort, and as long as coal-burning ships use the Canal their operation should be continued, even though the Company may recover no more than the annual depreciation.
Mindi dairy farm (see schedule $B-1$ ).-The Mindi dairy farm maintains a herd of approximately 1,000 head of dairy cattle and produces the fresh milk for the Canal Zone community, the total output being processed and marketed through the commissary division. Thus it is
really comparable in function to the other processing plants of the commissary division, but it has always been administered as a separate unit of the Company. Consideration is now being given to placing the dairy under the direct supervision of the commissary division and consolidating its financial operations with those of the other processing plants of that division.

Under the climatic conditions of the Canal Zone, cows have a relatively short life of full normal milk production, and it is not economically practicable to raise sufficient calves for the necessary replacements. For this reason, dairy cattle are imported from the United States, there being no local source of suitable herd replacements.

The net revenue from the operaton of the dairy farm during fiscal year 1946 was $\$ 5,669$. It is estimated that there may be a loss of $\$ 10,900$ in fiscal year 1947 as a result of higher wage and feed costs and the policy of holding down the retail selling price of milk. There will also be an increase in repair costs because of the necessity of repairing farm buildings and purchasing items of farm equipment, and tools. By fiscal year 1948, it is estimated that there will be sufficient replacements to the herd to increase the milk production and permit the dairy to earn a net income of $\$ 6,600$. The higher purchase price of new cows will require additional investment of funds in dairy cattle without an increase in the actual number of cattle in the herd.

New York office and steamship line (see schedule B-1).The New York office of the Panama Railroad Company is the general office of the Company maintained under its charter as a corporation of the State of New York; it is also the main office of the Company in the United States. Aside from the administration of its corporate affairs, it has control under the authority of the board of directors of all of the funds of the Company, except those required for working cash in the Canal Zone, and of the deposit and investment of those funds.

The New York office also has direct supervision over and responsibility for the operation of the steamship service and facilities in connection therewith; for the transportation of supplies, material, equipment, and personnel to the Canal Zone; the operation of a commissary purchasing department; and the necessary accounting required in connection with those activities.

The Company's steamship line comprises three identical cargo and passenger steamers of 10,000 gross tons, built in 1939 at a total cost of $\$ 13,200,000$. They normally maintain a weekly service between New York and Cristobal, C. Z. In June 1941 the S. S. Panama was requisitioned by the United States Maritime Commission for use during the national emergency, and shortly after the declaration of war the S. S. Ancon and the S. S. Cristobal were requisitioned by the War Department for use in the prosecution of the war.

The steamship line, although discontinued during wartime, had proved itself to be an essential adjunct to the construction, operation, and maintenance of the Canal, by furnishing ocean transportation for the large quantity of goods required by The Panama Canal and by the civilian community in the Canal Zone, as well as by furnishing passenger transportation for the civilian employees and their families between the Canal Zone and the United States.

Since the cessation of hostilities the three steamers have been returned to the Company and are now undergoing an extensive overhaul and rehabilitation so that they may be returned to their former service during the fiscal year 1947.

It is expected that the steamship line and the New York office will incur a large deficit in fiscal year 1947, which is shown as $\$ 285,800$ in the estimate. The estimates submitted in the 1947 Budget were based on the assumption that all three of the steamers would be in operation throughout the greater part of the fiscal year, but unexpected delays both in their return to the Company's control and in their rehabilitation have vitiated that assumption. The present estimates are therefore based on a total of approximately 32 trips during fiscal year 1947 and on full normal operation in fiscal year 1948.

## Operating Results

During the fiscal year 1946, the operations of the Company as a whole resulted in a net revenue of $\$ 1,945,107$. This result is arrived at after making due provision for depreciation on the Company's physical plant, and takes into account accrued liabilities for all expenses not settled at the close of the fiscal year. During fiscal year 1946, two dividends totaling $\$ 4,200,000$ were paid in cash by the Company into the Treasury of the United States. Certain other transactions affecting the general profit and loss or unreserved surplus account of the Company are reflected in exhibit B.

For fiscal year 1947, it is estimated that the operations of the Company as a whole will result in a net loss of $\$ 165,540$, and for fiscal year 1948 a net revenue of $\$ 521,660$.

Last year's budget statements indicated that the Company would pay dividends of $\$ 2,100,000$ in 1946 and $\$ 3,000,000$ in fiscal year 1947, but it was stated in the Budget that part of the 1947 dividends might be paid in 1946. Actually, dividends totaling $\$ 4,200,000$ were paid in 1946, a second dividend of $\$ 2,100,000$ having been paid in the latter part of that year.

It is now estimated that a dividend of $\$ 1,250,000$ can be paid in 1947, and the normal dividend of $\$ 700,000$, or 10 percent on the capital stock, in 1948.

## Financial Condition

There follows a brief discussion of the Company's financial condition as detailed in exhibit C :

Inventories.-The inventories of the Company, totaling $\$ 6,452,962$ at June 30, 1946, are carried on the books at cost, including liability for ocean freight not paid in cash, and they are corrected annually based on a physical check at the close of the fiscal year. The merchandise held for sale consists of $\$ 78,648$ in coal stock and $\$ 4,225,249$ in commissary stock. Considering the present level of prices and the prospective business of the commissary, an inventory value of $\$ 4,225,249$ is low, but because of a general scarcity of goods the inventories were low at both June 30, 1945, and June 30, 1946. It is estimated that in the future the commissary will have an inventory of goods valued at $\$ 6,000,000$. A postwar inventory reserve for commissary supplies, amounting to $\$ 750,000$, had been provided for contingent losses resulting from liquidation of surplus or substitute stock acquired during the war and to cover possible sharp declines in merchandise values. It became apparent after the termination of hostilities that no losses of this sort would actually be suffered, and so this reserve was transferred to unreserved surplus during fiscal year 1946.

Plant and equipment--All items of plant and equipment are recorded on the books at actual cost, including cost of installation, except for certain items acquired prior to 1921. Depreciation is charged on the straight-line method based on estimated service lives.

The most important addition to capital in fiscal year 1947 will be the purchase from The Panama Canal of the Cocoli and Margarita commissary buildings. These stores were built with funds provided for Third Locks construction, in new townsites created to house employees working on the Third Locks project, and have been rented by the Panama Railroad Company. Because of the semipermanent status of these towns, the Company is purchasing the commissary buildings at their depreciated values.
The more important additions in fiscal year 1948 include a series of small projects (principally different equipment items) for the commissary, a number of new box cars for the Railroad to continue a long-range program of replacements of freight cars interrupted by the outbreak of war, and additional fork-lift trucks as replacements for the old platform trucks used in cargo handling on the piers. It is also estimated that an ice-cream and milkbottling plant to replace facilities now housed in the commissary cold-storage building at Mount Hope will be under construction as of June 30, 1948.
During the fiscal year 1947, it is planned to retire several of the old steam locomotives for which replacements were actually provided in 1941 but which were retained in service to handle the peak volume of traffic during the war period. It is also planned to retire certain parts of the coaling plant during 1947 and miscellaneous items of equipment of the commissary and harbor terminals divisions during 1947 and 1948.

Accounts receivable.-Accounts receivable consist primarily of amounts due from United States Government agencies. As no credit is extended to commercial interests or individuals without adequate guarantees, no significant losses from uncollectible accounts are anticipated and no reserves for such losses are provided. The slight decline in accounts receivable during fiscal year 1946 reflects the decline in activity.
Funds.-Funds of the Company which are not required for handling its normal daily cash transactions are invested in United States Government securities. Certain of these securities and the interest thereon have been set aside by the board of directors to cover the Company's contingency and depreciation reserves.

The investment in United States Government securities on June 30, 1946, amounted to $\$ 21,806,000$. All these securities have been set aside for replacement of obsolete and worn-out property and equipment and for the rehabilitation of steamers and other postwar contingencies, with the exception of $\$ 3,355,000$ carried in the working fund, consisting of United States Treasury notes and certificates of indebtedness.
Deferred debit items.-The Company's steamers have been returned to it and are now undergoing rehabilitation to make them suitable for their regular service. As of June 30, 1946, $\$ 605,373$ had been expended on this rehabilitation work. Funds, mostly invested in United States Government securities, set aside to pay for this rehabilitation are transferred as needed to the general working funds of the Company to meet the actual cash disbursements for this work.
The amount of the rehabilitation expense is included under Deferred debit items. When the rehabilitation program is complete this gross expense along with the offsetting ocean freight liability, discussed below under Deferred credits, will be transferred to the unreserved surplus account of the Company. (See exhibit BAnalysis of unreserved surplus.) It is assumed that this entire transaction will be consummated before June 30, 1947.

Deferred credits.-The item entitled, After-war adjustments, ocean freight, etc., represents the Company's accrued liability for ocean freight payments on goods carried under direction of the Army Transport Service and the War Shipping Administration. It is assumed that the Company will not be required to make cash payment for this liability but, on the other hand, that it will receive no rental for the wartime use of its steamers and will be required to spend an estimated $\$ 6,000,000$ to rehabilitate them for the service in which they were formerly engaged. As the estimated gross liability for unpaid ocean freight was $\$ 7,138,899$ as of June 30,1946 , this would leave $\$ 1,138,899$ to reduce the loss of $\$ 3,043,333$ as of June 30, 1946, in depreciation on the steamers while diverted from the Company's use, which has been taken from the Company's annual earnings. The most important item included in the total of $\$ 555,314$ for other deferred credit items is $\$ 294,270$ for commissary coupon books outstanding as of June 30, 1946.
Reserved surplus.-A postwar contingency reserve of $\$ 2,000,000 \mathrm{had}$ been set aside from prior years' earnings to cover contingencies that might be experienced in the postwar years. It is now estimated that a reserve of $\$ 750,000$ will be adequate and the amount of $\$ 1,250,000$ will be credited to unreserved surplus during the current fiscal year. The remaining balance will be used for rehabilitation and alterations of commissary division plants which normally would have been accomplished during the war years, but which were deferred primarily to avoid interruption of service.
The cold-storage warehouse at Mount Hope, originally constructed in 1918 and 1919, is the principal structure involved. The structure has had undue deterioration from corrosion and from saturation of the insulation. About 10 years ago, a gradual plan of rehabilitation was inaugurated, which was interrupted during the war. Preliminary estimates indicate that the cost of the rehabilitation will be $\$ 600,000$.

In addition to deferred repairs on the cold-storage building, fairly extensive alterations will be required in some of the retail store buildings and in the laundry to rectify certain temporary alterations which had to be made to handle an excessive volume of business during the war period. Expenditures in these categories are roughly estimated to total $\$ 150,000$, which, added to the $\$ 600,000$ for the cold-storage plant, indicates a required reserve of $\$ 750,000$.
Because of inability to obtain construction materials as well as governmental restrictions on new construction, it will not be possible to accomplish any substantial amount of this work during fiscal year 1947. There is no basis at present for estimating how much of the work will be done during fiscal year 1948, and for the purpose of the budget estimate the entire amount, or $\$ 750,000$, is therefore shown as being intact at the end of that fiscal year.
The commissary division inventory reserve of $\$ 750,000$ has been discussed in the preceding section under the heading of Inventories. As explained under that heading, it developed that there was no need for this reserve and it was accordingly transferred from reserved surplus to unreserved surplus.
A coaling plant reserve of $\$ 165,000$ and an operating reserve of $\$ 118,565$ were provided in part to cover contingent losses resulting from a major reduction of coal prices and to cover contingent losses in the possible partial piquidation of the coaling plants. During fiscal year 1946, $\$ 33,565$ was set aside to pay for demolishing a wharf bunker at Cristobal, and during fiscal year 1947, it is estimated
that $\$ 51,000$ will be expended on demolishing other surplus items at both Balboa and Cristobal plants, while $\$ 34,000$ will be used to write off the undepreciated value of the demolished items. The remaining balance of $\$ 165,000$ will be transferred from reserved surplus to unreserved surplus during fiscal year 1947.

## Administrative Expenses

These expenses cover the salaries and wages in the New York office of the first vice president, the third vice president and secretary, the treasurer, the auditor, and the employees in the administrative office and in the offices of the treasurer and the auditor. Also included are the general office expenses of these officers and employees and the legal expenses in the United States. With reference to Isthmian activities, the entire administrative expense is composed of the executive, administrative, accounting, collecting, disbursing, and legal services furnished by The Panama Canal. Further details of administrative expenses are given in schedule B-3.

It will be noted that the Panama Railroad Company's administrative expenses for fiscal year 1947 are now esti-
mated as $\$ 781,000$, as compared to the $\$ 500,000$ limitation set by the Congress in Public Law 519, Seventy-ninth Congress. A limitation of $\$ 779,700$ administrative expenses proposed for 1948 does not include any amount for an external audit. The sum of $\$ 12,000$ was included in 1947 under administrative expenses for this purpose.

# TENNESSEE VALLEY ASSOCIATED COOPERATIVES, INC. 

## Creation and Purpose

The Tennessee Valley Associated Cooperatives, Inc., was incorporated January 25, 1934, under the laws of the State of Tennessee, for the purpose of receiving and administering a grant of funds made by the Federal Emergency Relief Administration to the State of Tennessee. The funds were made available to assist in organizing, fostering, and financing a chain of self-help cooperative enterprises needed to improve the economic welfare of the lower-income families in the Tennessee Valley area; to assist in the development of cooperative enterprises in the Tennessee Valley area through educational services to individuals and associations concerning the principles of cooperative enterprise; to determine which of the various types of cooperative organizations could advantageously be created and utilized in the area; and to accumulate data and evaluate the services which might be economically rendered by such organizations as well as other scientific data and information useful and valuable from an economic standpoint. The directors of the Tennessee Valley Authority served as the incorporators of Tennessee Valley Associated Cooperatives, Inc., and as its first board of directors, but in so doing, acted in their private capacity as individuals rather than in their official capacity as Tennessee Valley Authority directors. The present directors of Tennessee Valley Associated Cooperatives, Inc., have no present connection with the Tennessee Valley Authority. No act of Congress or executive order or Federal statute specifically authorized the creation of the Tennessee Valley Associated Cooperatives, Inc.

## Financial Organization and History

On March 12, 1934, the Tennessee Valley Associated Cooperatives, Inc., received an outright grant of Federal funds in the amount of $\$ 300,000$. This grant was made by Federal Emergency Relief Administration to the Governor of the State of Tennessee in the same manner as all other grants made by that agency to or for the benefit of selfhelp cooperative enterprises, namely, through the medium of the State Emergency Relief Administration. This grant constituted all of the funds made available to the Tennessee Valley Associated Cooperatives, Inc., and no funds were ever advanced to it by Congressional appropriation. The incorporators recognized the nonprofit character of this proposed corporation and wanted to assure that none of its funds could inure to any private shareholder. Therefore, they caused the certificate of incorporation to provide that all of the capital stock be issued and held in the name of the United States, the voting rights of such stock being exercised by the directors. In so doing, the incorporators and the State of Tennessee created a Corporation without sanction or any intent of the Federal Government to create a Government corporation or to exercise Federal control. When the grant was received by the Tennessee Valley Associated Cooperatives, Inc., the directors did not consider the fund as consideration for the stock subscribed for by the incorporators. However, as a purely accounting matter, by resolution as permitted by the Tennessee statutes, the directors set up
on the books of the Tennessee Valley Associated Cooperatives, Inc., $\$ 1,000$ of the fund as capital stock and the remainder, $\$ 299,000$, as paid-in surplus.
The affairs of the Tennessee Valley Associated Cooperatives, Inc., are managed by an administrator pursuant to directives of the board. An agreement was made between the Tennessee Valley Associated Cooperatives, Inc., and the Land $O^{\prime}$ the Sky Mutual Association, Inc., a North Carolina regional or service cooperative association, providing that the Land $O^{\prime}$ the Sky Mutual Association, Inc., act as disbursing agent for the Tennessee Valley Associated Cooperatives, Inc. Under this agreement, funds approved by the board for projects are disbursed through the Land O' the Sky Mutual Association, Inc., and the member cooperatives. When the products of the member cooperatives are sold through the Land $\mathrm{O}^{\prime}$ the Sky Mutual Association, Inc., moneys are collected and applied against loans made by the Tennessee Valley Associated Cooperatives, Inc. The funds may then be used to make new loans, thereby constituting a revolving fund.

## DISPOSITION OF CORPORATION

A proposal for disposition of the Corporation will be submitted to the Eightieth Congress.

## Analysis of Budget Programs by Major Activities

The authority for the Tennessee Valley Associated Cooperatives, Inc., to carry on its activities is found in the certificate of incorporation granted by the State of Tennessee on January 25, 1934. These include both revenue-producing and non-revenue-producing activities as described in the following paragraphs.

Revenue-producing activities.-Interest on loans to member cooperatives constitutes the primary revenueproducing activity of the Tennessee Valley Associated Cooperatives, Inc. The authority for making loans is vested in the board of directors of the Tennessee Valley Associated Cooperatives, Inc., who usually provide either for a purchase of preferred stock or for the acceptance of demand notes of member cooperatives. To qualify for eligibility borrowers must be under the cooperative laws of the State in which they are located, officers and members must be producers of said cooperative, and there must be a need for such loans to relieve distress among farmers and idle workers in the area of activity of the borrowing cooperative. Borrowing cooperatives have no ownership or control in the Tennessee Valley Associated Cooperatives, Inc. Interest rates originally charged on loans made through the acceptance of demand notes was 3112 percent on construction loans and 4 percent on operating loans. Interest rates are now governed, more or less, by local banking rates and average approximately 2 percent. The size of loans is governed by the amount of business the borrowing cooperative expects to do. This is determined by the presentation of a budget showing the needs of the cooperative in advance of the operating season. Because the program is more or less a relief program, the amount of the loans actually has been determined more by the needs of the borrowing cooperative than by appraisals of the security.

The Tennessee Valley Associated Cooperatives, Inc., has a lien on the fixed assets of the borrowing cooperatives and on inventories of finished goods created through the use of the loans when such inventories are not used as collateral for bank loans. Repayment is made when the products of the various member cooperatives are sold. The proceeds of repayments are returned to the Tennessee Valley Associated Cooperatives, Inc., and credited on the notes of the borrowing cooperatives. Insurance is carried on fixed assets and inventories by the borrowing cooperatives with a loss clause running to the Tennessee Valley Associated Cooperatives, Inc., to protect its interest and to preserve its security. There are no fees charged to the borrower for servicing a loan.

Non-revenue-producing activities.-The Tennessee Valley Associated Cooperatives, Inc., has sponsored cooperative associations in the area for the purpose of promoting cooperative enterprise among the inhabitants in their respective territories. Thus, in order to promote certain of these cooperatives, many non-revenue-producing activities have been performed. The cumulative costs of these activities contribute to the deficit shown in exhibits $B$ and C.

## Operating Results

It has been a policy of the Tennessee Valley Associated Cooperatives, Inc., not to accrue interest on loans to the cooperatives but to collect the interest if earned or so much of the interest charges as may be earned by the cooperatives. Only $\$ 2,294$ in interest was collected in the fiscal year 1946 and operating expenses amounted to $\$ 3,165$ leaving a loss for the year of $\$ 871$. Loans made during 1946 amounted to $\$ 27,000$ and repayments of loans amounted to $\$ 15,620$. For the fiscal years 1947 and 1948 it is assumed that the cooperatives will be operating and that interest of approximately 2 percent will be earned and paid on notes held by the Tennessee Valley Associated Cooperatives, Inc. It is also estimated that new loans will be made each year in the amount of approximately $\$ 15,000$ each year and that collections on loans will amount to $\$ 17,700$ for each of the two years. In estimating the
collections it is assumed that conditions will be favorable so that 1 percent of the sales of the cooperatives may be paid on the notes in addition to the $\$ 15,000$ repayment of amount borrowed during the year. On the basis of these assumptions it is estimated that the Tennessee Valley Associated Cooperatives, Inc., may have a net income in 1947 of $\$ 1,900$ and in 1948 of $\$ 1,850$.

## Financial Condition

The Tennessee Valley Associated Cooperatives, Inc., has no property except the cash and securities shown in its financial statement (exhibit C). The office equipment is furnished by the regional cooperative, Land $O^{\prime}$ the Sky Mutual Association, Inc.

The Tennessee Valley Associated Cooperatives, Inc., had a deficit in the amount of $\$ 117,314$ as of June 30 , 1946, which amounts to the depletion of capital and paidin surplus at that time. This deficit was caused by making grants to cooperatives in prior years in the amount of $\$ 15,182$; by loss on the settlement of a loan in the amount of $\$ 1,500$ in a prior year and by a reserve being set up in the amount of $\$ 110,000$ for probable losses on notes and preferred stocks of cooperatives held by the Tennessee Valley Associated Cooperatives, Inc. The cumulative interest received less the cumulative operating expenses (other than the grants, loss on loan and reserve mentioned above) have resulted in net earnings of $\$ 9,368$ as of June 30, 1946. (See exhibit C.) If favorable conditions exist, it is anticipated that the deficit will be reduced by June 30, 1948, to $\$ 113,564$. It is estimated that loans to cooperatives will decrease from $\$ 241,180$ in 1946 to $\$ 235,780$ in 1948 and that the investments in preferred stocks of cooperatives will remain at $\$ 33,825$. (See schedules C-1 and C-2.)

# TENNESSEE VALLEY AUTHORITY 

## Creation and Purpose

The Tennessee Valley Authority is a Corporation created by act of Congress on May 18, 1933 (16 U. S. C. 831). It was established "to improve the navigability and to provide for the flood control of the Tennessee River; to provide for reforestation and the proper use of marginal lands in the Tennessee Valley; to provide for the agricultural and industrial development of said valley; to provide for the national defense by the creation of a corporation for the operation of Government properties at and near Muscle Shoals in the State of Alabama, and for other purposes.'
To accomplish these purposes the Corporation was specifically authorized to construct such dams and reservoirs in the Tennessee River and its tributaries as will provide and maintain a 9 -foot channel in the river from Knoxville to its raouth and will best serve to prompte navigation on the Tennessee River and its tributaries and control destructive floodwaters in the Tennessee and Mississippi drainage basins (16 U. S. C. 831c). Insofar as may be consistent with these navigation and floodcontrol objectives, it was directed to provide and operate facilities for the generation and sale of electric energy (16 U. S. C. 831h).
The Corporation was also specifically authorized to take over the World War I munitions plant facilities in the vicinity of Muscle Shoals, Ala. ( 16 U. S. C. 831f), and to utilize and enlarge these facilities to develop and demonstrate new forms of fertilizer under practical farm conditions and to provide munitions for military purposes ( 16 U. S. C. 831d). In addition, the President determined, by Executive Order 6161 (June 8, 1933) that the Tennessee Valley Authority should make the surveys, plans, experiments, and demonstrations contemplated by the act to further the proper use and development of the natural resources of the Tennessee River Basin and adjoining territory ( 16 U. S. C. 831u).

## Financial Organization

The Tennessee Valley Authority program is currently being financed from annual appropriations and that portion of proceeds found to be needed in the operation of dams and reservoirs and in the conduct of power and fertilizer business activities. The Corporation has no authorized capital stock and all authority to issue bonds, except for refunding purposes, expired as of January 1, 1941. Property received by transfer from other Federal agencies without reimbursement is accounted for on the basis of value to the Tennessee Valley Authority program.
Annual appropriations for the 13 fiscal periods ending June 30,1946 , totaled $\$ 677,617,270$, including four şupplementary appropriations to expedite construction of power facilities during the war. A new appropriation of $\$ 39,906,000$ was made available for obligation in the fiscal year 1947 by the Government Corporations Appropriations Act, 1947. This new appropriation, together with the unexpended balance reappropriated, will finance all current development programs and construction activities not financed out of proceeds in accordance with the terms of section 26 of the Tennessee Valley Authority Act, as
amended (16 U. S. C. 831y), and Public Law 301, Seventyseventh Congress ( 16 U.S. C. 831c-1).
Section 26 provides that all proceeds from the sale of power and other activities of the Corporation for each fiscal year "save and except such part of such proceeds as in the opinion of the board shall be necessary for the Corporation in the operation of dams and reservoirs, in conducting its business in generating, transmitting, and distributing electric energy ànd in manufacturing, selling, and distributing fertilizer and fertilizer ingredients" shall be paid into the general fund of the Treasury of the United States at the end of the calendar year. Public Law 301 provides that whenever, as the result of the construction of improvements under provisions of the Tennessee Valley Authority Act, any highway or railroad structure is adversely affected, the owners shall be compensated by Tennessee Valley Authority for actual costs of reconstruction, alterations, or relocation less the net value to the owners of any direct or special benefits resulting therefrom. Up to the fiscal year 1945, expenditures for construction of power facilities and bridges over navigable streams utilized all available proceeds not devoted to operating purposes and debt repayment, and appropriated funds were used to supplement proceeds in keeping the heavy power construction program on schedule. Because of these circumstances no surplus of proceeds was available for payment to the Treasury until December 1945. At that time $\$ 12,597,744$, the amount of proceeds in excess of section 26 requirements in the fiscal year 1945, was declared surplus by the board of directors and paid over to the general fund of the Treasury. In the fiscal year 1946, available proceeds exceeded current requirements by $\$ 18,836,264$. The determination as to the disposition of this 1946 balance of proceeds will be made by the board in December 1946.
The estimate of $\$ 22,597,744$ shown in exhibit $C$ as payments into the United States Treasury as of June 30, 1947, includes the actual payment made by the board of directors in December 1945 and an estimate of $\$ 10,000,000$ for the payment from surplus proceeds in December 1946. The estimate of $\$ 30,597,744$ as of June 30,1948 , includes an estimate of $\$ 8,000,000$ for December 1947. These estimates are of course tentative, and are not presented as commitments against proceeds because revenues and expenditures are subject to wide variations affected by fluctuations in power sales, stream flow conditions, the amount of steam-electric generation necessary to meet power contract requirements, the amount of capital expenditures required to meet the demands of new business, increased loads, and other factors incident to the operations of a large utility system.
All authority for the issuance of bonds, except for an authorization of not to exceed $\$ 5,000,000$ for refunding purposes, expired as of January 1, 1941 ( 16 U . S. C. $831 \mathrm{n}-2$ and 3 ). As of this expiration date, none of the issued bonds had been redeemed and the total outstanding was $\$ 65,072,500$, of which $\$ 56,772,500$ were held by the United States Treasury and $\$ 8,300,000$ were held by the Reconstruction Finance Corporation. As of June 30, 1946, the Treasury still held $\$ 56,772,500$ and the Reconstruction Finance Corporation held $\$ 2,000,000$ in bonds,

The $\$ 6,300,000$ reduction in Reconstruction Finance Corporation holdings was financed out of power earnings in the fiscal years 1944, 1945, and 1946. All bonds outstanding are fully guaranteed as to interest and principal by the United States Government.

As of June 30 , 1946, all property received by transfer from other Federal agencies without reimbursement was valued at $\$ 39,196,388$, of which $\$ 31,300,000$ represented the value of Wilson Dam as determined by the Tennessee Valley Authority and approved by the President of the United States in accordance with the provisions of section 14 of the Tennessee Valley Authority Act ( 16 U. S. C. 831m). Other items of transferred property include the recorded cost of lock design and construction ( $\$ 2,307,423$ ), other plant and inventories received at Muscle Shoals in 1933 (\$1,967,024), and depreciation reserve accruals on nitrate facilities financed by the War Department pending a final determination of value to Tennessee Valley Authority ( $\$ 3,621,942$ ).

A comparative statement of financial condition of the Corporation reflecting this financial organization is shown in exhibit $C$ of the financial statements immediately following this narrative material.

## Analysis of Budget Program by Major Activities

Consistent with the broad purposes of the Tennessee Valley Authority Act as outlined above, the budget program of the Corporation is divided into four major types of activity, as follows: (1) Navigation, flood control, and power operations; (2) fertilizer and munitions research and production; (3) resource development activities; (4) general plant and equipment requirements.

While each type of activity is separately presented in the ensuing sections of this analysis, they are all pointed toward the basic objective of enabling the people of the Tennessee Valley to make the fullest and most effective possible use of their available resources by methods which stimulate the initiative of individual farmers and business people, and which strengthen the State and local institutions and agencies under their direct control. The program outlined involves the use of $\$ 39,935,000$ of appropriated funds (of which $\$ 27,057,500$ is the amount of new money requested), and the application to program purposes of $\$ 56,239,500$ available from the sale of power, fertilizer products, and other sources.

## navigation, flood control, and power operations

One of the major objectives of the Tennossee Valley Authority Act is the unified development and use of the Tennessee River system for navigation, flood control, and power purposes ( $16 \mathrm{U} . \mathrm{S} . \mathrm{C} .831 \mathrm{c}$ ). A system of 22 dams, 20 hydroelectric generating stations, 10 navigation locks, 5 steam-electric generating stations, and a power transmission network of more than 6,000 circuit-miles constitute the major elements in the total Tennessee Valley Authority plant investment of $\$ 755,935,373$ serving these purposes as of June 30, 1946. The allocation of this investment in accordance with the provisions of section 14 of the Tennessee Valley Authority Act ( 16 U. S. C. 831 m ) was $\$ 149,116,375$ to navigation, $\$ 152,817,804$ to flood control, and $\$ 454,001,194$ to power.
Scheduled additions to this investment include the following major projects:

| W | \$2 |
| :---: | :---: |
| South Holston dam and rese | 31,500, 000 |
| Hales Bar-raising of dam, lock, and gates | 5, 200, 000 |
| Wheeler generating units 5 and 6 | 5, 200, 000 |
| n manaratina unita 3 |  |

All of the above projects are designed and in some stage of construction. Other scheduled capital improvements include a number of additions to the transmission network, channel dredging below Wilson Dam, shore-line improvements for malaria-control purposes, and a power service building at Wilson Dam. As shown in exhibit A, this construction program involves appropriated fund expenditures of $\$ 14,501,000$ in 1947 and $\$ 20,280,000$ in 1948, and corporate fund expenditures of $\$ 24,737,000$ in 1947 and $\$ 22,788,500$ in 1948 . The detail by projects, as well as other elements of the over-all construction program, appears in schedule C-1.

The annual cost of operating facilities for navigation and flood-control purposes is presented in schedule B-1 and the net income from power operations is presented in schedule $\mathrm{B}-2$. The annual expense common to all three purposes and allocated to them in accordance with the allocation provisions of section 14 of the Tennessee Valley Authority Act is presented in schedule B-5. In the ensuing paragraphs each of these operations is briefly summarized and explained.

Navigation operations.-The nine multiple-purpose dam and reservoir projects on the main stem of the Tennessee River, together with a low lift navigation lock below Wilson Dam, provide a 650 -mile, year-round, 9 -foot navigable channel from Knoxville, Tenn., to the mouth of the river on the Ohio near Paducah, Ky. This new waterway links the major shipping points of the Tennessee Valley with all points served by the more than 8,000 miles of inland waterways extending from the Gulf of Mexico to the Great Lakes. Despite the shortage of tugs and barges, the special rail rates which inhibit the development of water traffic, and the inadequacies of the joint-rate arrangements covering rail and water shipments, about $250,000,000$ ton-miles of freight (excluding sand, gravel, and ferry hauls) were shipped on the river in calendar year 1945 as compared with shipments of approximately $139,000,000$ ton-miles in 1944. Figures for 1946 are not complete, but significant changes have occurred in the composition of the traffic. For example, with the installation of private terminals for handling petroleum products, gasoline has become one of the major commodities in river shipments. New passenger cars are moving in volume by barge from Evansville, Ind., to Guntersville, Ala., for distribution throughout the Southeast. Aluminum sheets and pig were shipped via the river for the first time in 1946. Limestone shipments, a major item in previous years, have practically ceased with the closing down of the calcium carbide furnaces at Muscle Shoals, operated by Tennessee Valley Authority during the war for Rubber Reserve Corporation.

Many shippers, water carriers, and other business people in the valley and elsewhere are planning developments which should greatly expand the use of the river with resulting savings to shippers and even more important effects on agricultural and industrial development in the valley and elsewhere. Tennessee Valley Authority is cooperating in these efforts to expand river transportation by providing engineering and economic advice to shippers and water carriers and by operating four public-use river terminals until such time as the volume of traffic warrants commercial operation by some other organization. The 1948 budget anticipates a heavier volume of traffic through the terminals, and a continuation of the technical assistance to shippers, particularly the smaller operators who are trying to secure a scheduled common-carrier bargeline service between the new ports in the valley and'ports on other inland waterwavs. The small technical stafflwill
barriers, (such as inadequate joint rail-barge rates) which stand in the way of a fully effective use of the waterway system.

In the conduct of navigation operations, close working relationships are maintained with the United States Corps of Engineers on lock operations and channel maintenance, the United States Coast Guard on channel marking and water safety, the Tennessee Valley Waterways Conference and other State and local agencies on river-traffic studies and other developments.
Flood-control operations.-The controlled flood storage capacity of the completed system of reservoirs in the valley ranges from $11,200,000$ acre-feet in January to 10 ,500,000 acre-feet in April. This capacity is managed throughout the flood season to achieve the maximum amount of flood protection for urban and rural areas along the Tennessee River and its major tributaries and to so regulate the flow from the Tennessee into the Ohio as to reduce flood crests on the lower Ohio and Mississippi rivers. The present storage capacity is sufficient to reduce the crest of the greatest flood of record at Chattanooga, Tenn., by at least 16 feet, and the crests of major floods at Cairo, Ill., by as much as 4 feet. It has been estimated that the lafgest flood of record, that of 1867, if it occurred today without regulation, would cause damage of nearly $\$ 40,000,000$ at Chattanooga, one of the major danger points in the Tennessee Valley for which the Tennessee Valley Authority system provides protection. The present system of reservoirs could control the 1867 flood to the point where no extensive damage would occur at Chattanooga. When channel improvements and levees as proposed are provided at Chattanooga, a development made feasible by upstream storage in Tennessee Valley Authority reservoirs, this city will be fully protected against floods exceeding by more than 50 percent that of 1867. The Chattanooga levees and channel improvement project will, when built, also accommodate the operation of upstream reservoirs to achieve the degree of flood protection below Chattanooga and in the lower Ohio and Mississippi rivers for which the Tennessee Valley Authority system was designed and built.
Many valuable urban and rural areas in the valley are affected by floods of less than regional significance. The Tennessee Valley Authority and other agencies are providing technical advice and assistance to local agencies and groups of landowners who are interested in the regulation of floodwaters in these small watersheds. In some instances a modest outlay for channel work locally financed is all that is needed to achieve complete regulation, while in other cases the readjustment of forest and farm management practices to retard run-off is an essential part of the solution. In one typical rural watershed, where all types of regulation are needed, an experimental demonstration is scheduled to be started in the fiscal year 1948 to discover the most effective method of integrating the regulation of local floods with regional programs of agricultural and forest resource development already under way. In this experimental watershed the Tennessee Valley Authority will help provide the local channel works as well as the technical guidance now available in other watersheds of the valley. The results of this experiment will be useful in formulating policies to be followed in similar watersheds throughout the Tennessee Valley.
Power operations.-The hydroelectric generating capacity of the Tennessee Valley Authority power system
(which includes 311,000 kilowatts in plants owned by the Aluminum Co. of Ametica but operated as an integral part of the system) was $2,088,000$ kilowatts as of June 30 , 1946. The combined capacity of all generating stations in the system as of June 30,1946 , including all fuel plants owned or leased by Tennessee Valley Authority, was $2,538,000$ kilowatts. Out of total generation in the fiscal year 1946 of $12,313,000,000$ kilowatt-hours, $11,997,000,000$ kilowatt-hours, or 97 percent, came from hydroelectric plants. Based on average year stream flow and predicted power requirements, total generation should exceed 14 billion kilowatt-hours in each of the fiscal years 1947 and 1948. Under conditions of average rainfall the 1946 level of output from hydroelectric plants can be expected to be repeated, and bettered somewhat, in 1948, supplying about 90 percent of the total power requirements in that year. In 1947, the hydro output is expected to be even higher, as a consequence of a wet spring season which increased reservoir contents to record level at the beginning of the fiscal year. The especially favorable conditions with which fiscal year 1947 begins account for a substantial portion of the increase in power expenses from 1947 to the 1948 program estimates shown in schedule B-2. The estimates for both years and particularly 1948 could, of course, be adversely affected by extended dry weather.
The net income before interest from power operations in the fiscal year 1946 was $\$ 16,782,999$. This represents a return of 4.2 percent on the average net investment in power facilities for that fiscal year. The corresponding estimates showing net income in 1947 of $\$ 20,612,000$ and in 1948 of $\$ 18,889,000$, represent returns on investment of about 5 percent in 1947 and about 4 $4 / 2$ percent in 1948. It is roughly estimated that dry-year conditions or a recession in power requirements could cause these estimates of net income to shrink by $\$ 9,000,000$ in 1947 and $\$ 15,000,000$ in 1948 . Better-than-average-year stream flow would have no very considerable effect on the 1947 estimate of net income but could produce a modest increase over the estimate for 1948.
Oommon operations.-The unified development and use of the Tennessee River system for navigation, flood control, and power includes nine main-river reservoirs and seven tributary reservoirs which are operated to serve all three purposes. The net expense of these common operations (detailed in schedule B-5) is allocated to the three primary purposes in accordance with the provisions of section 14 of the Tennessee Valley Authority Act (16 U. S. C. 831 m ). Consistent with these primary purposes all reservoir properties are used to further other resource use objectives. The shore areas, for example, are extensively used for recreational, agricultural, and industrial purposes. Other Federal, State, and local agencies are joined with Tennessee Yalley Authority in planning for these developments and in managing properties best adapted to use in programs for which they are responsible.

## fertilizer and munitions research and production

Fertilizer and munitions research and production activities are conducted to discover and develop improved products and demonstrate improved production processes; to supply fertilizer products for soil restoration, farm demonstrations, and food supply purposes; and to develop and supply munitions for military purposes ( 16 U . S. C. 831d, f, and h). A five-furnace elemental phosphorus and phosphate fertilizer plant at Muscle Shoals, Ala.,
and a two-furnace fused tricalcium phosphate fertilizer plant near Columbia, Tenn., are the major production units in the total Tennessee Valley Authority plant investment, which, as of June 30, 1946, was $\$ 12,454,108$. In addition, a plant financed during the war by the War Department for munitions purposes was in operation producing ammonium nitrate fertilizer as of June $30,1946$.
A sixth elemental phosphorus furnace, and facilities to bring phosphate fertilizer capacity nearer to phosphorus furnace capacity were the major new production units under construction as of June 30, 1946. A new chemical laboratory building, to cost $\$ 3,500,000$, and an ammonium nitrate crystallization plant, to cost about $\$ 1,000,000$, are the major individual items to be started in 1947. The budget as presented for 1948 contemplates no new major additions or improvements. It provides for completion of the projects already under way and for a large variety of smaller improvements and replacements to increase the safety and operating efficiency of a plant which largely dates back to World War I.

The net income from chemical plant operations and the annual cost of fertilizer and munitions research and development are presented in schedule B-3. These activities are more fully analyzed in the ensuing paragraphs.

Chemical plant operations.-The actual and proposed disposition of fertilizer products for each fiscal year follows:

|  | $\underset{1946}{\text { Actual, }}$ | Proposed, 1947 | Proposed, 1048 |
| :---: | :---: | :---: | :---: |
| Tons of phosphorus pentoxide: |  |  |  |
| Sales--------- | \$30,184 | \$60,177 | \$77, 105 |
| Used in test-demonstration programs. | 18,755 | 22, 685 | 20, 276 |
| Total shipments. | 49,125 | 82, 862 | 97,381 |
| Tons of nitrogen: |  |  |  |
|  | 51, 021 | 50,782 | 50, 717 |
| Used in test-demonstration prograins. | 1,509 | 113 | 178 |
| Total shipments... | 52, 530 | 50,895 | 50,895 |

The increased total shipments of phosphate products in 1947 and 1948 reflect the scheduled program of adding facilities to balance phosphate fertilizer capacity with phosphorus furnace capacity. Almost the entire tonnage of nitrogen production and more than three-fourths of the phosphorus pentoxide tonnage will be sold through farmer cooperatives to help meet food production goals.
Fertilizer and munitions research and development.The basic program of laboratory research on fertilizer and munitions products is projected for 1948 at about the 1947 level, but the cost of pilot-plant developments increases slightly. Work on an improved calcium metaphosphate process should be completed in 1948, and other pilot-plant developments dealing with electric-furnace improvements, the accelerated curing of superphosphates, the agglomeration of raw phosphates, and the dual use of nitric acid in the production of dicalcium phosphate and ammonium nitrate will be in various stages of development. The results of this research and developmental work are made available to the industry in numerous technical publications and through direct contacts with private business organizations.

## RESOURCE DEVELOPMENT ACTIVITIES

The Tennessee Valley Authority Act provides not only for the unified development of the Tennessee River system and for fertilizer and munitions research and pro-
duction activities, but also for such studies, surveys, experiments, and demonstrations as may be necessary in helping the people of the region make the fullest possible use of their natural resources, and for the participation of the various Federal, State, and local resource agencies in the activities conducted for this purpose ( 16 U. S. C. 831u). The annual expense of the several activities being carried on under this authorization is presented in schedule B-4.
The 1948 net expense estimate of $\$ 6,024,000$ represents a decrease of about 20 percent under the 1947 budget and is slightly in excess of the actual dollar expense incurred in fiscal year 1946. Due to the upward trend in costs since fiscal year 1946, greater financial participation will be required on the part of State and local agencies in the cooperative program if gains to date are to be held and consolidated. The need for intensification of efforts to further the resource use objectives of the Tennessee Valley Authority Act is especially acute at this time. During the war years, the region necessarily exhausted its resource base faster than the borrowings could be restored. If the region is to carry its full load in the Nation's economy in years to come, not only must the wartime borrowings against the resource capital be restored, but this capital must be used in ways which will provide a better standard of living for a greater population.

Mineral deficiencies in the region's soils should be restored through improved fertilizer practices and the land so managed that it will support $\mathfrak{a}$ diversified agriculture in lieu of the row-crop systems to which large areas in the South have been bound. These adjustments and improvements should be supplemented by new employment opportunities from industrial developments related whenever possible to the agricultural activities for which the region is so admirably equipped. Efforts will be made in fiscal year 1948 to secure the additional participation by State and local agencies necessary to meet in part the increased needs of this work.
Through test-demonstration farms within the Tennessee Valley, the role of mineral fertilizers in a fundamental readjustment of farm practices is being proved. Within limits of the funds available in 1948, test demonstrations will be continued in valley communities and other areas. The other resource programs will be carried out in 1948 on a restricted basis with emphasis upon those activities which will secure the greatest participation of State and local agencies.

## general plant and equipment requirements

General plant and equipment requirements in 1948 are estimated at $\$ 1,909,000$. In addition to the replacement of worn-out office and transportation equipment, the figure provides for completion of a new highway on the Government reservation at Muscle Shoals, Ala. Construction of this highway, including the rebuilding of a dangerous railroad overpass, is scheduled to start January 1, 1947. The 1948 general plant budget also includes small amounts for general-use construction equipment, and for planning and design studies of future public recreational developments on dam reservations.

## Operating Results

The operating results of Tennessee Valley Authority programs are reflected in exhibit B. The net expense of navigation, flood control, fertilizer, and development programs, which are not financed out of revenues, was
$\$ 11,374,892$ in the fiscal year 1946. In 1947 and 1948 the corresponding estimates are $\$ 13,882,000$ and $\$ 12,679,000$, respectively.

The net income from power operations, which was $\$ 16,213,723$ in 1946, is expected to be $\$ 20,020,000$ in 1947 and $\$ 18,344,000$ in 1948. (All three figures are after interest on the funded debt.) The favorable operating result for 1947 reflects the high level of water in storage at the beginning of the year. The less favorable result in 1948 is based entirely on average-year stream flows continuing from July 1946 to June 30, 1948. The results in both years and particularly 1948 could, of course, be adversely affected by extended dry weather or favorably affected by a wet spring season in 1947.

## Financial Condition

There follows a brief discussion of the major items and changes in the statement of financial condition of the Corporation as detailed in exhibit C.

Cash and cash funds.-The net increase in the estimated cash balance as of June 30, 1947, over the actual balance as of June 30,1946 , is principally due to the deferment of certain expenditures originally scheduled for fiscal year 1947. The carrying forward into fiscal year 1948 of the balance thus made available serves to reduce the amount of the appropriation request for that year. The net decrease in the estimated cash balance as of June 30, 1948, as compared with June 30, 1947, reflects the full utilization of both the new appropriation and the balance brought forward from 1947. The June 30, 1948, balance of $\$ 17,366,000$ is fully covered by normal obligations estimated to be outstanding as of that date as well as the usual reserve of proceeds from which payments to the United States Treasury are made under section 26 of the Tennessee Valley Authority Act. The changes in cash and cash funds, current receivables, inventories, and current liabilities are more fully detailed in schedule A-1.

Long-term receivables.-On June 30, 1946, there were 11 loan contracts, totaling $\$ 1,123,913$, outstanding with municipal and cooperative power distributors. The payments on all these contracts were current as of that date. During the fiscal year 1946 several cooperative distributors retired their total indebtedness to the Tennessee Valley Authority by refinancing with Rural Electrification Administration in accordance with the Rural Electrification Act, as amended in December 1944 (58 Stat. 925). The estimated decrease in loans receivable as of June 30 , 1947, assumes that several additional cooperatives will refinace with Rural Electrification Administration.

Fixed assets less reserves for depreciation.-The Corporation's fixed assets and reserves for depreciation are reported in the statement of financial condition (exhibit C) by type of facility. In the following tabulation the net of these amounts is reclassified and summarized to show the book value of assets serving each major Tennessee Valley Authority program:

| Project | $\begin{gathered} \text { Actual, June } \\ 30,1946 \end{gathered}$ | Estimate, June 20, 1947 | Estimate, June 30, 1948 |
| :---: | :---: | :---: | :---: |
| Navigation. | \$140, 677. 548 | \$141, 023,000 | \$140, 898, 000 |
| Flood control | 146, 824,615 | 147, 185, 000 | 146, 297, 000 |
| Power. | 395, 929, 544 | 405, 006, 879 | 419,167, 879 |
| Total navigation, flood control, and power | 683, 431, 707 | 693, 214, 879 | 706, 362, 879 |
| Fertilizer and munitions | 7, 631, 856 | 10, 727, 000 | 14, 958,000 |
| General plant | 8, 555, 814 | 9,551, 000 | 11, 729,000 |
| Total fixed assets in service | 699, 613, 377 | 733,492, 879 | 733,049,879 |
| Construction and investigations in prog. ress | 22, 888,915 | 39, 421, 033 | 60, 152, 433 |
| Total fixed assets (net).- | 722, 508, 292 | 752, 914, 812 | 793, 202, 312 |

It will be noted that retirements and depreciation provisions in 1948 for navigation and flood-control facilities will exceed the value of facilities to be added in that year. The only significant addition to navigation fixed assets is channel improvement below Wilson Dam, scheduled for completion in December 1947. A small increase in flood control fixed assets as well as small increases in navigation and power fixed assets result from scheduled completion of sundry clean-up work at the various multipurpose projects. The significant scheduled additions to power fixed assets in service in the fiscal years 1947 and 1948 are the fifth generator unit at Kentucky Dam, to be completed in March 1947; the third and fourth generator units at Fort Loudoun Dam, to be completed during 1948; a new power service building at Wilson Dam, to be completed by June 1948; and a large number of transmission system projects, to be completed in both years. The increases in fertilizer and munitions fixed assets in service include the sixth electric phosphorus furnace which was completed in July 1946, two phosphate fertilizer conversion facilities, one of which is to be completed during the latter part of 1946 and the other by January 1948, and a number of other plant additions to be completed in both years. The increases in general plant in service include a new highway on the Wilson Dam reservation, to be completed in June 1947, and miscellaneous general equipment to be purchased during the 2 years.

The major projects to be in construction in progress accounts as of June 30, 1948, follow:

| Project | Estimated cost in progress as of June 30, 1948 | Estimated cost to complete | Total estimated cost |
| :---: | :---: | :---: | :---: |
| Watauga dam and reservoir | \$25, 038, 500 | \$4, 461, 500 | \$29,500,000 |
| South Holston dam and reservoir | 10, 872, 148 | 20,627, 852 | 31,500, 000 |
| Hales Bar raising | 4, 525, 562 | 244, 640 | 15,200,000 |
| Wheeler generating units 5 and | 4, 718, 826 | 481, 174 | 5. 200,000 |
|  | 1,839, 840 | 260, 160 | 2, 100, 000 |
| Cbemical lahoratory and gatehouse buildings | 3, 353, 718 | 146,282 | 3,500.000 |
| Total of major projects. | 50, 348, 594 | 26, 221, 608 | 77,000,000 |

${ }^{1}$ Includes $\$ 429,798$ closed to plant in service prior to June 30, 1946.
The remaining balarce of $\$ 9,803,839$ in construction accounts as of June 30, 1948, represents costs on a large number of tiansmission, chemical plant, and other smaller projects.

Funded debt.-Total funded debt as of June 30, 1946, was $\$ 58,772,500$. The 1947 and 1948 budget programs provide for debt reductions of $\$ 2,272,500$ in 1947 and $\$ 2,500,000$ in 1948. These debt reductions are to be financed from current earnings of the power program.

Funds appropriated and property transferred to Tennessee Valley Authority less net expense of programs.-As of June 30, 1946, the Congress had appropriated $\$ 677,617,270$ for Tennessee Valley Authority program purposes. The Government Corporations Appropriations Act, 1947, made an additional $\$ 39,906,000$ available for use in the fiscal year ending June 30, 1947. The 1948 budget program presented herewith calls for a new appropriation of $\$ 27,057,500$ for use in that fiscal year. As shown in exhibit $A$, this new appropriation, together with a $\$ 12$,877,500 reduction in appropriated fund working capital and an adjustment of $\$ 500,000$ for minor depreciation, would provide $\$ 32,585,000$ for acquisition of assets and $\$ 7,850,000$ for the operating costs of programs financed from appropriations.

The changes in the value of property transferred to Tennessee Valley Authority is accounted for primarily by credits for depreciation on nitrate facilities received from the War Department but not valued and recorded in the assets of Tennessee Valley Authority.

## Administrative and General Expense

Schedule B-6, Comparative statement of administrative and general expense, brings together the costs of the Tennessee Valley Authority central administrative offices and certain functions and services necessary in the conduct of all Tennessee Valley Authority programs, but which cannot be assigned directly to the costs of any segment of operations. These costs are allocated or distributed to construction projects and operating programs, and are included as part of the total program costs shown in exhibits and schedules preceding schedule $B-6$. Prorations of administrative and general expense are arrived at by applying to each of the component items the most realistic of a number of distribution formulas. Insofar as practicable, they are based upon annual administrative and accounting studies of direction of effort.

In Tennessee Valley Authority, as in any construction and operating organization which carries on a variety of activities, the line separating administration and operations is a tenuous one, and definitions are somewhat arbitrary. In Tennessee Valley Authority all expenses attributable to restricted segments of the total program are treated in financial statements as direct costs. Similarly, office upkeep, the provision of transportation, and other services which are susceptible of precise physical measurement are accumulated in clearing accounts and distributed on a use basis to the different activities to which services are furnished. All other expenses, of whatever character, are classified as administrative and general; consequently, schedule B-6 includes the costs of a variety of activities, many of which differ from direct expenses only by the range of the operations served.

In the fiscal year 1946, the total of items classified as administrative and general expense was $\$ 3,921,706$. The estimated increase of $\$ 868,294$ in 1947 is largely accounted for by pay increases effective as of June 16, 1946. The 1948 estimate is substantially the same as that of the current year. The ratio of administrative and general expense to grand total obligations, including working funds, was 5.8 percent in 1946. The corresponding ratio in 1947 is 5 percent, and in 1948 it is 4.6 percent.

## TENNESSEE VALLEY AUTHORITY

## Administrative Expenses, Tennessee Valley Authority-

For the purpose of carrying out the provisions of the Tennessee Valley Authority Act of 1933, as amended ( $16 \mathrm{U} . \mathrm{S}$. C., ch. 12A), including the construction of South Holston Dam and Watauga Dam; [and the acquisition of necessary land, the clearing of such land, relocation of highways, and the construction or purchase of transmission lines and other facilities, and all other necessary works authorized by such Act;1 purchase, hire, maintenance, repair, and operation of aircraft and the purchase of four hundred and twenty-one, and hire of passenger motor vehicles; [rents in the District of Columbia and elsewhere; $]$ penalty mall (not to exceed $\$ 25,000$ ); [and all necessary salaries and expenses connected with the organization, operation, and investigations of the Tennessee Valley Authority, $\$ 39$,$906,000,1 \$ 27,057,500$, together with the unexpended balance of funds heretofore appropriated (the unobligated portion of such unexpended balance to be expended only for public works commeaced prior to July 1, 1947), to remain available until [June 30, 1947 ] expended, and to be available for the payment of obligations chargeable against prior appropriations [: Provided, That of the $\$ 39,906,000$ appropriated herein, $\$ 14,000,000$ shall be available for the immediate resumption of work on the Watauga and South Holston Dams]. (Act of July 20, 1946, Public Law 519.)

Annual appropriation, general account:

## FEDERAL LOAN AGENCY

## INTRODUCTORY STATEMENT

In accordance with the authority contained in the Reorganization Act of 1939, the Federal Loan Agency was created to supervise and coordinate the activities of the following agencies:

> Reconstruction Finance Corporation
> Electric Home and Farm Authority
> The RFC Mortgage Company
> Disaster Loan Corporation
> Federal National Mortgage Association
> Federal Home Loan Bank Board
> Home Owners' Loan Corporation
> Federal Savings and Loan Insurance Corporation
> Federal Housing Administration
> Export-Import Bank of Washington

Subsequent to the creation of the Federal Loan Agency, the Reconstruction Finance Corporation organized subsidiary corporations for the purpose of administering certain defense activities. These subsidiary corporations which are listed below were, through the Reconstruction Finance Corporation, subject to the supervision of the Federal Loan Administrator.

## Defense Plant Corporation

Defense Supplies Corporation
Metals Reserve Company
Rubber Reserve Company
War Damage Corporation
U. S. Commercial Company

Petroleum Reserves Corporation
Rubber Development Corporation
In addition to these corporations, Defense Homes Corporation was organized by the Federal Loan Administrator at the President's request and until February 24, 1942, remained a part of the Federal Loan Agency.
Under the provisions of Executive Order 9070, dated February 24, 1942, the Federal Home Loan Bank Board, Home Owners' Loan Corporation, Federal Savings and Loan Insurance Corporation, Federal Housing Administration, and the Defense Homes Corporation were transferred to the National Housing Agency. Executive Order 9256, dated October 13, 1942, provided for the termination of the Electric Home and Farm Authority and .the transfer of its assets for liquidation to the Reconstruction Finance Corporation. As a result of Public Law 109, approved June 30, 1945, the Defense Plant Corporation, Metals Reserve Company, Rubber Reserve Company, Defense Supplies Corporation, and the Disaster Loan

Corporation were dissolved and their functions transferred to the Reconstruction Finance Corporation.
During the period July 1943 to October 1945, the Rubber Development Corporation, U. S. Commercial Company, and Petroleum Reserves Corporation together with the Export-Import Bank of Washington were under the jurisdiction of the Foreign Economic Administration. The latter, in accordance with the provisions of Public Law 173, approved July 31, 1945, was given independent status and on October 20, 1945, the former were returned to the Reconstruction Finance Corporation. The name of Petroleum Reserves Corporation was changed to War Assets Corporation on November 15, 1945, and there were transferred to it the surplus property functions of the Reconstruction Finance Corporation. Under the provisions of Executive Order 9689, dated January 31, 1946, provision was made for the transfer of the surplus property functions of the War Assets Corporation to the War Assets Administration on March 25, 1946. Having no remaining functions to perform the War Assets Corporation was dissolved on June 30, 1946.

With the transfer of certain corporations from the Federal Loan Agency and the consolidation of other corporations with the Reconstruction Finance Corporation, the Federal Loan Agency now consists of the Reconstruction Finance Corporation and five subsidiary corpo-rations-The RFC Mortgage Company, Federal National Mortgage Association, War Damage Corporation, U. S. Commercial Company and Rubber Development Corporation. The RFC Mortgage Company, War Damage Corporation and the Rubber Development Corporation will be dissolved on or before June 30, 1947, and their assets, liabilities and functions will be transferred to the Reconstruction Finance Corporation.

This chapter presents the budgetary requirements of the Office of the Administrator of the Federal Loan Agency, the Reconstruction Finance Corporation, U. S. Commercial Company, and the Federal National Mortgage Association. A budget program has not been submitted for The RFC Mortgage Company, War Damage Corporation, or the Rubber Development Corporation since they will be dissolved, and the budget for Reconstruction Finance Corporation will cover the functions presently performed by them.

## OFFICE OF THE ADMINISTRATOR

## Administrative Expenses

The Administrator of the Federal Loan Agency supervises and coordinates the activities of the Reconstruction Finance Corporation, U. S. Commercial Company, and the Federal National Mortgage Association, constituting the Federal Loan Agency. In the exercise of such supervision the services of personnel of the Reconstruction Finance Corporation are utilized on a reimbursable basis. The funds made available for administrative expenses are transferred from the administrative funds available to the corporations under the supervision of the Administrator and the amount chargeable to each is determined upon the basis of services rendered.

During the fiscal year 1946 the administrative expenses of this office amounted to $\$ 37,771$ and the amount provided for the fiscal year 1947 is $\$ 118,000$. It is estimated that the amount required for these supervisory functions will amount to $\$ 100,000$ during the fiscal year 1948.

## Language

## Administrative Expenses, Federal Loan Agency-

Office of the Administrator: [Provided, That of] Of the funds available for administrative expenses to the agencies under the direction
and supervision of the Federal Loan Administrator (12 U. S. C. 1801), $\mathbf{[} \$ 118,000] \$ 100,000$ is hereby made available to the Administrator for administrative expenses of supervising such agencies, including printing and binding ( $\$ 2,500$ ) ; not to exceed $\$ 10,000$ for [the temporary employment of persons or organizations for special services by contract or otherwise without regard to section 3709 of the Revised Statutes and the civil-service and classification laws] services as authorized by section 15 of the Act of August 2, 1946 (Public Law 600). (Act of July 20, 1946, Public Law 519.)

## RECONSTRUCTION FINANCE CORPORATION

## CREATION AND PURPOSE

The Reconstruction Finance Corporation was created by the act approved January 22, 1932 ( 47 Stat. $5 ; 15$ U. S. C. 601 et seq.). The Corporation was formally organized and its operations were begun on February 2, 1932. The scope of the Corporation's functions has been extended or modified from time to time by amendatory and supplemental legislation, and its succession, originally established at 10 years, has been extended to June 30, 1947. The affairs of the Corporation are supervised by a bipartisan board of five directors appointed for a term of 2 years by the President with the advice of the Senate.

The legislation creating the Corporation authorized it to extend financial assistance to agriculture, commerce, and industry, through direct loans to banks, trust companies, building and loan associations, insurance companies, mortgage-loan companies, and various agricultural credit agencies. Loans were also authorized to closed banks to aid in their reorganization or liquidation, and, upon approval of the Interstate Commerce Commission, to railroads to provide temporary financial assistance.

Through amendatory and supplemental legislation the Corporation has been authorized: (1) to purchase the capital stock of banks, insurance companies, agricultural credit corporations, national mortgage associations, and various Governmental agencies; (2) to make loans to business enterprises, mining interests, agricultural improvement districts, public school authorities, and various other classes of borrowers; (3) to assist in financing the construction of public works and various self-liquidating projects; (4) to purchase loans guaranteed or insured under the provisions of the Servicemen's Readjustment Act of 1944, as amended; and (5) in connection with the defense and war programs, to provide financing for purposes of plant conversion and construction, working capital, mining operations, and other activities; to provide war production facilities; to provide supplies of strategic and critical materials including the payment of price subsidies; to make premium payments on building materials and to provide a guaranteed market for new type building materials and prefabricated houses; and to undertake a wide range of other activities incident to the war effort. Under the provisions of Executive Order 9665, dated December 27, 1945, the lending functions and certain related activities of the Smaller War Plants Corporation were transferred to the Reconstruction Finance Corporation as of January 27, 1946.

## FINANCIAL ORGANIZATION

The Corporation originally had an authorized capital stock of $\$ 500,000,000$ all of which has been subscribed and paid for by the Secretary of the Treasury. In April 1941, this total was reduced by $\$ 175,000,000$. As provided in Public Law 2, approved January 22, 1932, the Corporation was authorized to borrow $\$ 1,500,000,000$. This authority has been increased from time to time, and by June 30,1946 , the Corporation had been authorized to borrow to the extent of $\$ 15,750,000,000$ for general purposes. In addition, the Corporation was authorized to borrow for specific purposes, the amount limited in some cases to stipulated amounts and in others to the amount
necessary to carry out the program or purpose authorized. The total authorized for specific purposes was $\$ 5,105,800,000$ including amounts used for purposes where the limitation was not stated in terms of dollars. Pursuant to the act approved February 24, 1938, and the National Housing Act, as amended, the Secretary of the Treasury was authorized and directed to cancel obligations of the Corporation incurred in supplying funds for allocations to other governmental agencies or for relief by direction of Congress. The amount of notes cancelled pursuant thereto has been $\$ 2,785,500,000$, which included $\$ 1,660,300,000$ for general purposes and $\$ 1,125,200,000$ for specific purposes. Specific borrowing authority has been further reduced by $\$ 735,200,000$, due to repayments on obligations to this Corporation and to cancellations of unused borrowing authority. As at June 30, 1946, the Corporation had $\$ 9,205,300,000$ in notes outstanding in the hands of the Secretary of the Treasury. Notes held by the Secretary of the Treasury bear interest at the rate of 1 percent per annum. Notes outstanding for specific purposes amounted to $\$ 1,042,906,000$ and for general purposes $\$ 8,162,394,000$. (See schedule C-1.)

## ANALYSIS OF BUDGET PROGRAM BY MAJOR ACTIVITIES

The budgetary requirements of the Corporation cover a number of complex and far-reaching programs, most of which are subject to contraction or expansion depending upon prevailing economic conditions. The various types of programs of the Corporation and the major activities under those programs are as follows:

1. Loan and general program
(a) Loans and purchase of securities
(b) War damage insurance
(c) Smaller war plants liquidation
2. Defense plants program
(a) Completion of existing projects and continuing capital expenditures
(b) Termination of contracts and agreements
(c) Disposition of property
(d) Protection and maintenance
(d) Continued operation of plants
3. Strategic supplies program
(a) Procurement and distribution of strategic supplies
(b) Supervision of fiber and cinchona plantations in Central America
(c) Making premium payments on building materials
(d) Providing a guaranteed market for new type building materials and prefabricated houses
(e) Performance of services for U. S. Commercial Company
(f) Verification of food subsidy payments
4. Strategic metals and minerals program
(a) Procurement and disposal of strategic metals
(b) Treatment and processing
(c) Plant operations for production of strategic metals
(d) Direct subsidies
(e) Performance of services for U. S. Commercial Company
5. Rubber program
(a) Production and distribution of synthetic rubber
(b) Disposal of synthetic plants
(c) Maintaining standby synthetic plants
(d) Plant improvement
(e) Storage and handling
(f) Research
(g) Purchase and distribution of crude rubber
6. Reconstruction Finance Corporation Price Adjustment Board

The loan and investment program of the Corporation is, of course, its normal peacetime activity. At present this activity involves primarily meeting the financial needs of veterans and of small businesses which are not being satisfied by private financial institutions. The next largest program of the Corporation from the standpoint of cost of administration is the defense plants program which involves the disposal of approximately $\$ 6,000$,000,000 of plants and plant facilities that were constructed or purchased during the war. The remaining programs of the Corporation involve financial assistance in connection with the veterans' housing program, and the continued operation or liquidation of programs instituted during the war including the procurement of critical materials and supplies to meet civilian deficiencies.

All of the programs listed above will continue into or during the fiscal year 1948. However, the extent to which they will continue will depend for the most part upon legislation enacted by the Congress and upon direction from the Office of Temporary Controls and the President. See statement of sources and application of funds included in financial statements following the narrative (exhibit A).

## Basic Assumptions

There are certain assumptions that apply to specific programs only, and are brought out in the discussion that follows with respect to those programs. There are certain basic assumptions that apply to all of the programs. The most fundamental of these is, of course, that Congress will extend the life of the Reconstruction Finance Corporation, with substantially its present powers, beyond June 30,1947 . It is further assumed that all subsidies, premium price payments, and guaranteeing a market for new type building materials and prefabricated houses will not be extended beyond the provisions of existing legislation and that the Corporation can proceed to complete the orderly termination and liquidation of its war activities. It is also assumed that the Reconstruction Finance Corporation will not be called upon by the Army, Navy Munitions Board, or the Treasury Department to assist in the stock pile program to an extent greater than at present.

## Loans and Purchase of Securities

To aid in the proper understanding of the loan and security purchase program of the Corporation, schedule $\mathrm{C}-2 \mathrm{~b}$ has been prepared to reflect for each type of loan or security purchase for which a balance was outstanding on the books of the Corporation at June 30, 1946, or for which it is anticipated new authorizations and disbursements will be made during the fiscal years 1947 and 1948, authorizations, disbursements, and repayments, classified by type and by legal authority under which each type of loan or security purchase is made. In interpreting the information contained in this schedule it must be borne in mind that it is extremely difficult in the case of many types of loans to anticipate what the actual demands upon the Corporation may be. The estimates represent a reasonable expectancy based upon past experience, current inquiries, and the probable trend of economic conditions. Another important factor affecting the loan and security purchase activities of the Corporation is recent legislation, such as the veterans' housing program and the authorization by Congress for the Reconstruction Finance Corporation to purchase veteran loans which have been guaranteed
that economic conditions change it may be necessary to review and revise the estimates under this program.

On the basis of the assumptions made with respect to the various types of loans the Corporation will make during fiscal years 1947 and 1948, it is expected the total loans outstanding will aggregate $\$ 2,392,143,000$ as of June 30,1948 , as compared with $\$ 1,653,830,000$ one year earlier. During the same period investments other than in subsidiaries are expected to decrease from $\$ 350,151,000$ to $\$ 288,808,000$ (exhibit C). The increase in loans is primarily attributable to business enterprise loans and the purchase of guaranteed or insured GI mortgages. Details with respect to various types of loans are discussed in the following paragraphs.

## LOANING POLICY

The functions of the Corporation with respect to lending in the postwar period will be: (1) to assist banks of the country in supplying needed credit to deserving business through its standard participation and its blanket participation programs, and (2) to supply such credit directly when such enterprises are unable to obtain the credit from banks. In this respect the Corporation considers applications from business enterprises for:

1. Loans for working capital.
2. Loans for long or short term plant reconversion or expansion.
3. Loans to finance surplus property purchases.
4. Loans to veterans under either the Reconstruction Finance Corporation Business Loan Program, or the G. I. Act.
5. Commitments to loan for future disbursements so that industry may proceed with plans for rehabilitation, etc.
6. Automatic participation in loans made by banks to industry, up to 75 percent, with $\$ 100,000$ ceiling (known as the Blanket Participation Agreement plan).
The Corporation is interested in conducting to the fullest extent possible a sound and practicable program of aiding business enterprises, both large and small, but particularly small business. including veterans, when needed credit is not otherwise available to them.

## business Enterprise loans and participations

The Corporation has widely publicized the availability of its services to small business and to veterans who wish to become established in business. This policy is being carried out effectively through the 31 loan agencies of the Corporation. The character of these loans is indicated by the fact that, of the total business loans approved during the fiscal year 1946, 42.6 percent were for $\$ 10,000$ or less, 65.2 percent for $\$ 25,000$ or less, and 90.9 percent for $\$ 100,000$ or less.

It will be observed from schedule $\mathrm{C}-2 \mathrm{~b}$ that business enterprise loans and participations (exclusive of national defense loans) made under the provisions of section 5 d of the Reconstruction Finance Corporation Act, as amended, represent the greatest volume of loan activity of the Corporation at this time. On June 30, 1946, the Corporation had outstanding $\$ 146,300,000$ of such loans. It is estimated that during the fiscal year 1947 the Reconstruction Finance Corporation will disburse $\$ 125,000,000$ for business loans and that receipts will amount to $\$ 50,000,000$. During the fiscal year 1948, it is expected that $\$ 150,000,000$ of such loans will be disbursed and that receipts will aggregate $\$ 65,000,000$. This would result in the outstanding balance of business loans reaching $\$ 306,300,000$ at June 30,1948 , or more than twice the volume outstanding at June 30, 1946.

Under the blanket participation loan program, established in April 1945, the Corporation agrees to purchase
enterprise with a limitation of $\$ 100,000$, provided the bank so requests at the time the loan is made, and the loan meets the requirements of the blanket participation agreement. The agreement is particularly significant in that it indirectly extends the loan services of the Reconstruction Finance Corporation into many more cities and towns than would otherwise be possible; it makes the facilities of commercial banks available to handle the demand for small business loans which the banks cannot or will not handle wholly at their own risks; and it reduces the financial demand on the Government.

During the 8 -month period ended December 31, 1945, 1,929 banks had, upon their request, been approved to participate in the program. By September 30, 1946, participating banks had increased in number to 5,018 . Loans approved under this program totaled 1,204 at December 31, 1945, and 7,120 at September 30, 1946.
While the blanket participation agreements expire on January 22, 1947, the estimates reflected in this budget submission are based on the possibility that the blanket participation plan will be extended and will be in effect throughout the fiscal year 1948.

PURCHASE OF GI LOANS
Under the provisions of Public Law 656, Seventy-ninth Congress, the Reconstruction Finance Corporation was authorized to purchase directly or through a subsidiary, loans guaranteed or insured under the provisions of the Servicemen's Readjustment Act of 1944, as amended. The veterans' housing program contemplates that in excess of $2,000,000$ homes for veterans will be constructed within the first 2 years of the program. The budget provides for the purchase by the Corporation of $\$ 200,000,000$ of mortgages on these homes in the fiscal year 1947, and $\$ 400,000,000$ during the fiscal year 1948.

## PUBLIC AGENCY LOANS

Under the provisions of Public Law 519, Seventy-ninth Congress, the Corporation is not permitted to have outstanding at any one time loans of this character in an amount exceeding $\$ 100,000,000$ without specific authorization from Congress. This contemplates that the Corporation will sell such loans to private investors. In view of the anticipated demands from States and municipalities for financial aid in financing projects authorized under Federal, State, or municipal law, it is recommended that this limitation be increased to $\$ 125,000,000$. Information presently available indicates that $\$ 35,000,000$ of such loans will be made during 1947 and $\$ 47,000,000$ for the fiscal year 1948, bringing the estimated outstanding balance to about $\$ 108,774,000$ at June 30, 1948.

## RAILROAD LOANS

It is not contemplated that the Corporation will be called upon to undertake any substantial amount of railroad financing during 1947 and 1948. This situation, however, will be materially influenced by the financial condition of the carriers and, therefore, the $\$ 2,500,000$ provided for 1947 and $\$ 2,500,000$ in 1948 are nominal and may require modification at a later date. Unless railroads do require a substantial amount of financing it is expected that the outstanding loan volume will be reduced to $\$ 140,885,000$ by June $30,1948$.

## LOANS TO OTHER GOVERNMENT AGENCIES

Estimated loans in this category will be made on the basis of sdecific substantive legislation. Tomas to the
of Agriculture for farm tenant loans are included in the budget in the amount of $\$ 339,000,000$ for the fiscal year 1948.

## REAL ESTATE MORTGAGE LOANS

As has been previously indicated in this document, it is contemplated that The RFC Mortgage Company will be dissolved and its assets, liabilities, and functions taken over by the Reconstruction Finance Corporation, on or before June 30, 1947. This statement is based upon the assumption that the Congress will extend to the Corporation the existing power of The RFC Mortgage Company to make real estate mortgage loans. This activity will involve assistance in financing the construction of new buildings, remodeling existing buildings, and refinancing distressed properties. As materials become available it is believed that such building and remodeling will greatly increase. It has been the experience of The RFC Mortgage Company that much of such financing cannot be arranged through private lending institutions and that the Government is called upon to take care of such needs. While only $\$ 535,000$ of such loans were disbursed during the fiscal year 1946, it is estimated that disbursements for this purpose in the fiscal year 1947 will amount to $\$ 25$,000,000 and to $\$ 20,000,000$ during the fiscal year 1948.

## SMALLER WAR PLANTS CORPORATION LOANS

In carrying out the responsibility placed upon the Reconstruction Finance Corporation under Executive Order 9665, transferring the loan activities of the Smaller War Plants Corporation to the Reconstruction Finance Corporation, it is estimated that of undisbursed authorizations of $\$ 47,702,000$ at June 30, 1946, together with estimated additional authorizations of $\$ 1,000,000$ for refinancing purposes, $\$ 12,000,000$ will be disbursed during the fiscal year 1947 and $\$ 8,000,000$ during the fiscal year 1948. Anticipated repayments of $\$ 16,000,000$ in 1947 and $\$ 12,000,000$ in 1948 will reduce the outstanding balance of these loans to $\$ 16,815,000$ as of June 30, 1948.

## OTHER LOANS AND SECURITY PURCHASES

It will be observed from schedule $\mathrm{C}-2 \mathrm{~b}$ that there are many other types of loans and security purchases which the Reconstruction Finance Corporation is authorized to make under its existing authority. These include loans to financial institutions; loans to mining, milling and smelting businesses; loans to drainage, levee and irrigation districts, and catastrophe loans and the purchase of securities, such as preferred stock, capital notes and debentures of banks and trust companies. While schedule $\mathrm{C}-2 \mathrm{~b}$ shows disbursements of $\$ 94,005,000$ for 1947 and $\$ 19,700,-$ 000 for 1948 for a number of these categories, it will also be observed that for other types of loans reflected in this schedule no authorizations or disbursements were projected for the fiscal years 1947 and 1948. Notwithstanding this fact it is entirely possible that demands will be made upon the Reconstruction Finance Corporation for such loans and therefore these too constitute a part of the budget program. Likewise, any other loan or investment authority vested by law in the Reconstruction Finance Corporation is considered to be a part of the Corporation's budget program, in order that it may function such authority upon request.

## SERVICING LOANS AND SECURITIES

While the administrative burden upon the Corporation in the making of loans calls for an extensive organization
and investments acquired is a continuing one which must be accorded very close and constant supervision, by that same organization, in order to effect collections and minimize losses to the Government. It must be recognized, therefore, that due to the estimated increase in the volume of loans and mortgages to be acquired by the Corporation in the next 2 years there will naturally result a considerable increase in the administrative burden upon the Corporation in servicing such assets. It is estimated that total collections and repayments on loans and investments, exclusive of sales of U. S. Government securities but including proceeds from sale of mortgages and other types of securities will amount to $\$ 483,700,000$ during the fiscal year 1947 and to $\$ 315,820,000$ during the fiscal year 1948. The dollar volume of collections reflects a decline. This is due to repayments on certain large loans and the sale of securities in 1947 which will not recur to the same extent in the fiscal year 1948. Actually, there will be a very substantial increase in the number of loans outstanding to be serviced in fiscal 1948 over 1947.

In addition to the servicing of loans and investments, the Corporation presently holds $\$ 21,421,000$ of collateral, acquired in the liquidation of loans and investments, which must be serviced and collected or disposed of in a manner that will result in the greatest financial return to the Government. It is estimated that additional collateral acquired and the expense of improving collateral will amount to $\$ 2,175,000$ in the fiscal year 1947 and to $\$ 5,100,000$ in the fiscal year 1948. It is further estimated that of the sum total of collateral held or to be acquired, $\$ 4,202,000$ of such collateral will be collected or disposed of during the fiscal year 1947 and $\$ 14,880,000$ during the fiscal year 1948.

## War Damage Insurance Program

War Damage Corporation was created by Reconstruction Finance Corporation on December 13, 1941, pursuant to section 5d of the Reconstruction Finance Corporation Act, as amended ( 15 U. S. C. A., section 606b). The name of the Corporation (originally War Insurance Corporation) was changed to War Damage Corporation, pursuant to charter amendment, to conform with the provisions of section 2 of the act approved March 27, 1942 (Public Law 506).

The Corporation was created for the purpose of providing reasonable protection against loss of or damage to tangible property, real or personal, resulting from enemy attack, including any action taken by military, naval, or air forces of the United States in resisting enemy attack. Under the act the Corporation was authorized to insure property situated in the United States (including the several States and the District of Columbia), the Philippine Islands, the Canal Zone, and the Territories and possessions of the United States.

Pursuant to the act approved March 27, 1942, referred to above, the Corporation established the terms and conditions, including rates, under which the authorized protection was made available. Included in such terms and conditions are such general exceptions as have been deemed advisable. Because of the inaccessibility of certain areas which were in control of the enemy the premium insurance program was not extended to the Philippines, Guam, and Midway Islands when such program was effected July 1, 1942. By Public Law 370, approved April 30, 1946, the authority of War Damage Corporation to make gratis compensation for war damage to property in the Philippines was terminated, and such

In accordance with public announcement made March 1, 1946, in view of the lack of substantial demand for war damage insurance after VJ-day, War Damage Corporation ceased to issue policies of insurance on March 15, 1946.

The Corporation has a total authorized capital stock of $\$ 100,000,000$ all of which has been subscribed for by Reconstruction Finance Corporation, with $\$ 1,000,000$ paid in. This Corporation will be dissolved during the fiscal year 1947 and its assets and liabilities will be transferred to the Reconstruction Finance Corporation for liquidation. Therefore, no budget is being submitted for the War Damage Corporation and the expenses necessary for liquidation of its affairs are included in the budget for Reconstruction Finance Corporation (see exhibit A). Operations of the War Damage Corporation now consist almost entirely of the settlement of claims as no additional insurance is being written. The auditing of fiduciary agents will extend over most of the fiscal year 1948. When the audits are completed, final liquidation of the program can be made very quickly. Upon final liquidation, profits of approximately $\$ 210,173,000$, realized from the insurance program, will be paid into the miscellaneous receipts of the Treasury. A discussion of the insurance programs is given in the following paragraphs.

## GENERAL PROGRAM

To avoid the necessity for creating a complete governmental organization to handle this program the War Damage Corporation entered into separate agreements with 546 fire insurance companies pursuant to which such companies agreed to act as fiduciary agents for the Corporation in receiving applications and premiums, issuing policies, and otherwise handling the program. The fiduciary agents have a 10 percent participating interest in the operating profits or losses of the program, subject to an original limit of $\$ 20,000,000$. As a result of cancellation of participation agreements this amount has been reduced to $\$ 19,925,000$ which represents the participants' interest as of June 30, 1946. Insurance policies with an aggregate liability of approximately $\$ 114,000,000,000$, will have expired by March 1, 1947. There will be no premium collections, producers' commissions, or fiduciary fees in the fiscal year 1948.

During the fiscal year 1946 approximately 18 claims were filed, 9 paid, and 13 denied. There were in process at June 30, 1946, some 132 claims, aggregating $\$ 37,000$ of which approximately 78 are recorded at a nominal amount of $\$ 1$ each pending receipt of information as to the correct amount. A reserve of $\$ 50,000$ has been set up to provide for payment of these claims, which is believed to be adequate.

Over the past 2 fiscal years 521 interim audits have been made leaving 644 to be performed. At August 31, 1946, 225 audits were in process, and there remained 419 audits not yet started.
Provision has been made in the budget estimates for payment of $\$ 19,925,000$ to the participating insurance companies of their interest in this program.

## MONEY AND SECURITIES PROGRAM

Effective December 21, 1942, the Corporation made available insurance on money and securities through the facilities of 88 casualty and surety insurance companies likewise acting as fiduciary agents of War Damage Corporation. The participating companies have a similar
at June 30, 1946, amounted to approximately $\$ 90,000$. All insurance policies will have expired by March 1, 1947. There will be no premiums for the fiscal years 1947 and 1948.

Provision has been made in the budget estimates for the fiscal year 1947 for payment to the participating insurance companies of their interest in this program.

## PREPOLICY PROGRAM

War Damage Corporation was also authorized to compensate for loss or damage to property sustained during the period from December 6, 1941, to July 1, 1942, without premium or other charge, subject to the limitations prescribed in the act. The Corporation has investigated and adjusted claims for losses sustained during this period as a result of enemy attack or action of the military, naval, or air forces of the United States in resisting enemy attack in the Hawaiian Islands, Alaska, and certain other areas within the geographical purview of the act. Practically all of the Hawaiian eligible claims have been paid. The Alaskan, Wake Island, and Guam claims are in process of adjustment and payment, as are certain other claims. As of June 30, 1946, $\$ 370,000$ had been paid to compensate for losses sustained during the period from December 6, 1941, to July 1, 1942.

During the fiscal year 1946 approximately 800 claims were filed, 177 paid and 2 denied. There were on file at June 30,1946 , some 700 claims aggregating $\$ 1,360,000$, of which approximately 400 were recorded at a nominal amount of $\$ 1$ each because of lack of information as to the correct amount. A reserve of $\$ 2,000,000$ has been set up to provide for payment of these claims, which is believed to be adequate.

## ADJUSTMENT OF CLAIMS

In the adjustment of claims under the free or pre-policy program, as well as under the policy program, the Corporation has used the personnel and facilities of Fire Companies' Adjustment Bureau, Inc., Western Adjustment and Inspection Company, and Underwriters Adjusting Company. These companies have offices operating as claims service offices of War Damage Corporation in approximately 400 cities in the United States. Under contract with this Corporation, the services of their investigators and adjusters are made available to this Corporation on a cost basis, subject to audit by the Corporation.

## Smaller War Plants Corporation Program

Under Executive Order 9665, dated December 27, 1945, certain functions of Smaller War Plants Corporation were transferred to the Reconstruction Finance Corporation, effective January 27,1946 , as were its assets and liabilities with the exception of a specified sum of cash, and certain obligations to be paid out of such cash, that were transferred to the Department of Commerce

At the date of transfer of these assets and liabilities to the Reconstruction Finance Corporation, there were outstanding on the books of the Smaller War Plants Corporation undisbursed authorizations for loans in the amount of $\$ 88,778,000$. The progress in liquidation of outstanding Smaller War Plants Corporation loans and authorizations is fully covered under the Loan and Security Purchase Program of the Reconstruction Finance Corporation.

The Reconstruction Finance Corporation also acquired from the Smaller War Plants Corporation land, structure. and eauipment under lease. As the leases are
declare the property surplus. The estimated changes in this account by June 30, 1948, are summarized below:

|  | Actual, Jan. <br> 27, 1946, to <br> June 30, 1946 | Estimated, flseal year 1947 | Estimated, ilscal year 1948 |
| :---: | :---: | :---: | :---: |
| Balance outstanding at beginning of period.- | \$16, 366, 000 | \$14, 941,000 | \$4,900,000 |
| Sales at book value during period...- | 1,425, 000 | 10,041, 000 | 4,900,000 |
| Balance at end of period | 14, 941,000 | 4, 000, 000 |  |

Other assets of Smaller War Plants Corporation taken over by the Reconstruction Finance Corporation, except cash, were the usual receivables and interest accruals. Smaller War Plants Corporation liabilities taken over by the Reconstruction Finance Corporation consisted almost entirely of trust and deposit liabilities.
For a summary of the changes in the net assets acquired from Smaller War Plants Corporation which occurred during the fiscal year 1946 and estimated for 1947 and 1948, see schedule C-5, "Comparative Statement of Income and Expense Applicable to Assets and. Liabilities Acquired from Smaller War Plants Corporation."
The total net assets acquired by the Corporation from Smaller War Plants Corporation amounted to $\$ 173,878,000$ of which $\$ 129,742,000$ was in cash. Provision has been made in the Reconstruction Finance Corporation's 1948 budget for payment of $\$ 100,000,000$ to the Treasury in partial liquidation of the former Smaller War Plants assets.

## Defense Plants Program

The Reconstruction Finance Corporation assumed the functions and responsibilities of the Defense Plant Corporation, a former subsidiary, upon dissolution of the latter on July 1, 1945, pursuant to the provisions of Public Law 109, Seventy-ninth Congress, approved June 30, 1945. The Defense Plant Corporation was organized August 22, 1940, under section 5d of the Reconstruction Finance Corporation Act, for the purpose of constructing or otherwise acquiring industrial facilities necessary to the National defense.
Under the defense plants program the Reconstruction Finance Corporation financed and supervised the construction and equipping of various industrial facilities for use in war production and in addition procured and leased equipment and machinery for use in privately owned plants. All facilities provided by the Corporation were undertaken at the direction of other governmental agencies, and in approximately 70 percent of the cases the sponsoring agency agreed to immediately reimburse the Reconstruction Finance Corporation for a portion of the cost of the facilities, and that at a subsequent date, it would reimburse the Corporation for the remainder of the cost provided appropriations were made available for that purpose. These were known as "take-out agreements." Approximately $\$ 2,000,000,000$ is due from the sponsors under these take-out agreements and negotiations are now in process to determine the ultimate disposition of such agreements.
On June 30, 1946, the Corporation's investment in land, plants, machinery, and facilities in the defense plants program aggregated $\$ 6,163,030,000$ which is expected to be reduced to $\$ 4,798,231,000$ by June 30, 1947, and to $\$ 3,995,631,000$ by June 30, 1948. This latter amount is exclusive of the Corporation's investment of $\$ 509,051,000$ in synthetic rubber plants and $\$ 21,187,000$ investment in equipment under other programs (see schedule C-4). It is estimated that with the exception of $\$ 489,000,000$ of olants consisting of $\$ 100.000 .000$ of propertv under long-
pending sale or declaration as surplus, all property acquired under the defense plants program will have been disposed of by declaration to War Assets Administration or sale by the end of June $30,1948$.

During the fiscal year 1948, the Corporation's major function with respect to the defense plants program will be the continued orderly disposal of property, involving completion of existing projects and continuing capital expenditures, termination of agreements and contracts, final settlement with lessee-operators of facilities, declaring property surplus to the War Assets Administration, sales of property direct to lessees in possession, close-down and protection and maintenance of plants pending their final disposition, and continued operation of certain plants.

The projected rate of liquidating this program as reflected in the budget is based upon the expectation that the Corporation will be able to dispose of property by sale or declaration to War Assets Administration in the amount of $\$ 2,371,000,000$ during the remainder of the fiscal year 1947 and $\$ 1,244,000,000$ in the fiscal year 1948. Other basic assumptions made are that delaying strikes will not be encountered, that sufficient personnel will remain available, and that there will be no marked modification of the sponsoring agencies' policies with regard to releasing property for disposal.

Brief discussions of the existing and contemplated activities under the defense plants program follow.

## COMPLETION OF EXISTING PRORECTS AND CONTINUING CAPITAL EXPENDITURES

Since VJ-day work has been continued on a limited number of projects because either (a) such work was determined to be necessary to protect life or property, (b) completion of the project was requested by the sponsoring agency or the Office of War Mobilization and Reconversion, or (c) the status of the project was such that completion was determined to be in the interest of the Government. Work will be continued during the last half of 1947 on approximately 53 projects. As indicated on schedule A-3, approximately $\$ 58,500,000$ will be expended for this purpose, of which $\$ 35,000,000$ will be in payment of work performed during the previous year; $\$ 8,500,000$ will represent cost of new construction and purchases; $\$ 13,000,000$ will be for terminated contracts for machinery, equipment, etc.; and, $\$ 2,000,000$ will be the cost of replacements to existing property. It is expected that expenditures for these purposes will cease by the end of the fiscal year 1947 except for $\$ 1,000,000$, estimated to be the cost in 1948 of necessary repairs and replacements to existing property.

## TERMINATION OF CONTRACTS AND AGREEMENTS

An important feature remaining to be completed in liquidating the defense plants program is the termination and final settlement of the thousands of leases, contracts, and agreements to which the Corporation remains a party. These agreements were entered into primarily for the construction and operation of plants and facilities; the production of machinery, equipment, and supplies required in war production; and for such auxiliary purposes as service contracts with public utilities. A brief discussion of the status of these agreements follows.
Lease agreements.-During the war the Corporation leased millions of items of property to private operators for war production purposes. These agreements ranged from leases covering single pieces of machinery to fully

ess of terminating and effecting final settlement with the lessees. This involves taking physical inventories of entire plants, reconciling property records, settling with the lessees for missing or damaged items, and making a final determination as to whether the lessee has fully satisfied all obligations under the lease. It is expected that this activity will continue at a fairly even rate throughout the fiscal years 1947 and 1948 and by the end of the fiscal year 1948 will be 60 percent completed.

Contract terminations.-This activity consists of settling claims submitted by manufacturers and suppliers for the cost of machinery, equipment, and supplies in the process of production for which the contracts have been cancelled, including the disposal of termination inventories. As of June $30,1946,1,900$ termination claims involving $\$ 25$,400,000 remained unsettled. It is estimated that these claims will eventually be settled for $\$ 19,400,000$. Based upon the present rate of settlement, indications are that 1,620 claims will be settled in 1947 for a net amount of $\$ 15,700,000$, and the remaining 280 claims, which will probably be mostly of a litigious nature, will be settled for $\$ 3,700,000$ during the fiscal year 1948 .
Continuation of existing agreements.-Other leases and contracts entered into under the defense plants program will continue in effect for an indefinite period of time and must be serviced by the Corporation. These cover, principally, the rental of facilities or equipment to private operators. A total of 1,310 facility leases have not been terminated either because they are of a long-term duration or the Government agencies sponsoring the projects or the Office of War Mobilization and Reconversion have requested continuance of the facilities. Facilities covered by these agreements will be declared surplus upon expiration of the agreements.
There also remains in existence approximately 650 interim leases covering machinery and equipment which is still in use by the original lessee operators. These interim agreements were entered into by the Corporation with the approval of the War Assets Administration and the Office of War Mobilization and Reconversion. They cover equipment used by the lessees during the war, which the lessees have requested to retain temporarily to soften the impact of reconversion. It is expected that the great bulk of these leases will either be terminated or transferred to War Assets Administration during the fiscal year 1947.
There are also in existence about 300 agreements with utility companies for services to war plants which will be terminated or otherwise disposed of as the plants they serve are sold or declared surplus.

## disposition of property

Plant clearance.-The removal of machinery and equipment owned by the Corporation from the plants of lessees, as well as from plants owned by the Corporation itself, continues to be one of the major activities in the defense plants program. As of June 30, 1946, production facilities valued at approximately $\$ 474,200,000$ on a cost basis had been removed from privately owned plants leaving property costing approximately $\$ 270,000,000$ to be cleared. It is expected that this phase of the work will be completed during the fiscal year 1947. The experience to date indicates that the average cost of removing equipment from privately owned plants amounts to approximately 5.1 percent of the cost of the facilities involved. Therefore, $\$ 13,770,000$ has been provided in the 1947 estimates for this purpose. When the plant clearance program is comnlet.ed during the fiseal vas.r 1947 fanilitios noctino annrov-
vately owned plants. It should be noted, however, that this figure does not include the cost of facilities located in privately owned plants which have been, or will be, sold to lessees in possession.

Clearance of facilities from plants owned by the Corporation is necessary in instances where machinery and equipment is disposed of separately from the buildings. As of the close of fiscal year 1946 machinery and equipment costing approximately $\$ 210,000,000$ had been removed from plants owned by the Corporation. While the future trend of the clearance activity with respect to plants owned by the Corporation is dependent upon the volume of requests received from War Assets Administration, present indications are that such requests will continue to be made during the remainder of 1947 and 1948 at the current rate of $\$ 25,000,000$ monthly, based upon the cost of the property to be removed. It is, therefore, estimated that property costing approximately $\$ 300,000,-$ 000 will be cleared from plants owned by the Corporation during each of the fiscal years 1947 and 1948. Experience indicates that the cost of removal averages 6.6 percent of the cost of the facilities removed. On this basis, $\$ 19,800,000$ has been included in the budget for each of the years 1947 and 1948 for removing machinery and equipment from plants owned by the Corporation.

Close-down.-As plants cease operations, it is the Corporation's responsibility to prepare the facilities for closedown pending final disposition. This includes such operations as greasing the machinery and equipment, draining chemicals from pipes, and similar measures. As of June 30, 1946, close-down operations had been completed or commenced on 334 units costing approximately $\$ 2,130$,000,000 at a close-down cost of about one-half of one percent of the cost of the facilities, or $\$ 11,930,000$. It is estimated that during the fiscal year 1947, 177 units costing $\$ 785,000,000$ will be closed down and that an additional 97 units, costing approximately $\$ 380,000,000$, may be closed down in the fiscal year 1948. Because of the difference in type of plants involved it is expected that the close-down costs of these units will approximate 1 percent of the cost of the facilities. Consequently, close-down expenses of $\$ 8,500,000$ and $\$ 4,000,000$ have been provided in the budget for the years 1947 and 1948, respectively. (See schedule A-3.)

These estimates are based upon the best available information respecting the duration of lease agreements, and also on estimates as to plants that may be sold without cessation of operations and which consequently will not require close-down operations.

Surplus declarations.-This constitutes the largest activity under the defense plants program. As property is determined to be excess to the needs and responsibilities of the Corporation it is declared surplus to the War Assets Administration for ultimate disposal. A relatively minor exception to this procedure results from the Corporation's authority to sell machinery and equipment direct to lessees in possession, to sell small lots direct to purchasers, and to dispose of property as scrap, salvage, and waste.

Of the original aggregate amount of personal property, consisting of machinery, equipment, and sundry facilities to be declared surplus, which cost approximately $\$ 3,-$ $410,000,000$ (exclusive of freight and installation charges), $\$ 2,550,000,000$ remained undeclared at the close of June 30,1946 . It is estimated that $\$ 1,200,000,000$ and $\$ 1,000,000,000$ of this property will be declared surplus to War Assets Administration during the respective fiscal years 1947 and 1948, leaving property costing approximatelv $\$ 350,000,000$ still to be declared surplus by the

The total cost of real estate owned by the Corporation, consisting of land, building, and building installations (exclusive of plants under long-term lease) to be declared surplus originally amounted to $\$ 1,930,000,000$. As of June $30,1946, \$ 1,184,000,000$ of this property had been declared surplus to War Assets Administration, leaving property costing $\$ 746,000,000$ to be disposed of. It is anticipated that the entire $\$ 746,000,000$ of property will be declared surplus to War Assets Administration during the fiscal year 1947.

Sales of property.-It is estimated that during the fiscal year 1947 surplus property costing approximately $\$ 960,-$ 000,000 will be sold by War Assets Administration for account of the Corporation at about 30 percent of cost, after deduction of selling expenses, and that during the year 1948 property costing $\$ 600,000,000$ will be disposed of for about 19 percent of cost after selling expenses. In. addition, property costing approximately $\$ 175,000,000$ is expected to be sold by the Corporation in 1947 direct to lessees in possession, in small lots and as scrap or salvage, for 32 percent of cost. No such sales are contemplated for the fiscal year 1948.

## protection and maintenance

Under the usual agreement of lease or other facility contract covering property owned by the Corporation, the lessee is required to protect and maintain the facility. Upon termination of leases, however, this function must be performed by the Corporation pending disposal to War Assets Administration and for a certain period thereafter. Through June 30, 1946, protection and maintenance operations had been performed by the Corporation in connection with 281 plants having facilities costing approximately $\$ 2,300,000,000$. The cost of this service amounted to approximately $\$ 7,200,000$, or one-third of one percent of the cost of the facilities. It is estimated that 340 plants, costing $\$ 2,800,000,000$, will be serviced by the Corporation during the fiscal year 1947 and that 250 such plants, costing $\$ 2,050,000,000$ will be serviced during the fiscal year 1948. Based on past experience it is anticipated that the cost of this service will amount to $\$ 23,000,000$ in 1947 and $\$ 15,500,000$ for the fiscal year 1948 , of which $\$ 15,000,000$ will be borne by War Assets Administration in each year, thereby reducing the net cost to the Corporation to $\$ 7,900,000$ and $\$ 500,000$ for the years 1947 and 1948, respectively.

## CONTINUED OPERATION OF PLANTS

It is presently anticipated that the Corporation under this program will retain a limited number of plants throughout the fiscal year 1948 . These facilities will be retained either (a) because the lease or operating agreement covering them remain in effect by their terms, or (b) because the sponsoring agencies-the War and Navy De-partments--have requested that such facilities be retained in order that they may be acquired as part of the permanent military and naval establishments. The loss in such operations during the fiscal year 1948 is estimated at $\$ 1,000,000$ as compared to $\$ 3,000,000$ for the fiscal year 1947.

## MISCELLANEOUS COSTS

Claims, suits, etc.-The budget submission contains a contingency provision of $\$ 10,000,000$ for the fiscal year 1948 covering estimated expenditures for claims and suits.

Expenses of conversion"and recovery of silver"loaned by U.S. Treasury for industrial purnoses.-During 1942 and 1943
valued at approximately $\$ 337,000,000$ from the U. S. Treasury to be used for industrial purposes in place of copper as a conductor of electricity. The Corporation is now in a position of having to convert this silver back to its original form and return it to the U. S. Treasury. This will involve removal of the silver, under guard, from industrial plants, conversion into its original form, and removal under guard from point of conversion to the Treasury. This will, of course, involve some melt loss. The program will be concluded during the fiscal year 1947.

## RECEIPTS

It is estimated that receipts of $\$ 399,582,000$ and $\$ 179,268,000$ will be received from this program during the respective fiscal years 1947 and 1948. Receipts for 1947 will consist primarily of $\$ 288,000,000$ net proceeds to be received from War Assets Administration for sales of surplus property; $\$ 56,000,000$ proceeds from property sold by the Corporation direct to lessees in possession or as scrap, salvage, or waste; and $\$ 51,000,000$ rentals from plants and facilities. 1948 receipts are expected to consist principally of $\$ 115,900,000$ proceeds from sales by War Assets Administration of surplus property and $\$ 60,400,000$ rentals from plants and facilities.

## Strategic Supplies Program

The Reconstruction Finance Corporation is now carrying on all functions which were previously assigned to the Defense Supplies Corporation. That Corporation was organized August 29, 1940, under section 5d (3) of the Reconstruction Finance Corporation Act, as amended, with power to buy, sell, produce, or otherwise deal in strategic and critical materials, to acquire and dispose of land, plants, machinery, equipment and other facilities required in the defense program, and to take such other action as the President and the Federal Loan Administrator might deem necessary to expedite the national defense program. The Corporation was dissolved on July 1, 1945, under the provisions of Public Law 109, approved June 30, 1945, and its functions were merged into the Reconstruction Finance Corporation.

The activities of the Defense Supplies Corporation were initiated primarily at the request and recommendation of other governmental agencies, and as those sponsoring agencies have withdrawn their recommendations for continuation of the activities, the Reconstruction Finance Corporation has acted promptly to terminate all contracts and agreements in such programs, and ceased further activities other than work necessary to liquidation. Under the Strategic Supplies Program it is contemplated that the following major activities will, on an active or liquidation basis, extend into the fiscal year 1948:

1. Procurement and distribution of strategic supplies.
2. Supervision of abaca and cinchona plantations in Central America.
3. Making premium payments on building materials.
4. Providing a guaranteed market for new type building materials and prefabricated houses.
5. Performance of services for U. S. Commercial Company.
6. Verification of food subsidy payments.

The following discussion covers the foregoing, with further details as to their financial implications being set forth in schedule A-4.

## PROCUREMENT AND DISTRIBUTION OF STRATEGIC SUPPLIES

Assuming no further directives are received from the Sffinn of Tammenner Contenla on tha Procidant tha 1018
supplies is expected to be limited to acceptance of deliveries on presently existing contracts for the purchase of molasses and alcohol which will involve disbursements of $\$ 26,950,-$ 000 as compared to disbursements of $\$ 172,500,000$ for deliveries of various commodities in 1947. It is anticipated that there will be no loss in the molasses program in 1948 since the sales price is expected to approximate the Corporation's costs. The budget provides for a loss of approximately $\$ 4,750,000$ in connection with the alcohol program since the market price for this commodity is not expected to equal costs to the Corporation. Approximately $\$ 4,800,000$ of the strategic supplies inventory will be transferred to the Treasury Procurement Division stockpile in 1947, which will result in the cancellation by the Treasury of an equal amount of the Corporation's notes, this representing the fair market value of the commodities transferred. The June 30, 1946, inventory of $\$ 76,880,000$ will be reduced to $\$ 532,000$ by June 30,1947 , and will be completely disposed of prior to June 30, 1948. Practically all procurement programs will have been terminated by June 30, 1947. While they were active, however, these programs necessitated entering into many contracts which, upon termination, must be audited before final settlement can be effected. A substantial amount of this work will extend into the fiscal year 1948.

## SUPERVISION OF FIBER AND CINCHONA PLANTATIONS

Prior to 1946 these plantations constituted a part of the development program of the U.S. Commercial Company. Subsequent to their transfer to the Reconstruction Finance Corporation in January 1946, activity with respect thereto has been limited to supervision of their management and to incurring the necessary expense to obtain maximum production, with development work or extension of the projects restricted to a minimum. As these commodities are in short supply, especially fiber, which will undoubtedly be required for strategic stock pile as authorized under recent legislation, it is essential that the Corporation continue the plantations in operation until a satisfactory arrangement can be made for their continued operation for stock pile purposes, or for their disposition. In any event, it is expected that operation of the cinchona plantation by Reconstruction Finance Corporation will be discontinued by December 31, 1947, and that the Corporation will have disposed of the fiber plantations on or before December 31,1948 , unless directed to continue their operation beyond that date.
The commodities produced on these plantations are shipped to the United States and are disposed of under allocating authority. The cost of production, plus freight and handling, constitute the cost of these commodities to the U. S. Government. It is expected that approximately 200,000 bales of tiber will be received from the fiber plantations during fiscal 1948, at an approximate cost of $\$ 4,500,000$.

## PREMIUM PAYMENTS ON BUILDING MATERIALS

In order to stimulate the production of building materials needed in connection with the emergency housing program and for other essential construction, maintenance, and repairs, the Reconstruction Finance Corporation was authorized by the Veterans Emergency Housing Act of 1946 to pay premiums for the production of such materials to the extent deemed necessary by the housing expediter, but in no event more than an aggregate amount of $\$ 400,000,000$. This authority expires December 31, 1947. Not mnm than dif nnn non af tho dinn non non allnttad
of access roads to standing timber on lands owned by or under the jurisdiction of an agency of the Government.

Premium payments are made through the loan agencies of the Reconstruction Finance Corporation pursuant to regulations issued by the housing expediter and are subject to final verification and appropriate investigation or audit by the housing expediter. It is estimated that premium payments and accruals will amount to $\$ 60,000,000$ for the fiscal year 1947, and that no such payments will be made in 1948 except for claims unpaid at June 30, 1947.

## PROVIDING A GUARANTEED MARKET FOR NEW TYPE

 BUILDING MATERIALS AND PREFABRICATED HOUSESPursuant to section 12 of the Veterans Emergency Housing Act, the Corporation is authorized to guarantee a market for prefabricated houses and new type building materials. Contracts guaranteeing markets to manufacturers for their products will be negotiated as directed by the housing expediter. Under the terms of these contracts, the Reconstruction Finance Corporation must be prepared to effect payment for any partially or fully completed houses or any building material covered by the contracts. Thereafter, provision must be made for care and preservation and subsequent sale of the units tendered. The obligations of the Corporation under these contracts will expire no later than June 30, 1948.

While it is difficult to estimate the total number, or dollar value, of units which will be tendered under these contracts, it is assumed that approximately 5 percent of the 200,000 prefabricated houses which it is expected will be produced will ultimately be tendered to the Reconstruction Finance Corporation. On this basis houses with an estimated value of $\$ 30,000,000$ will be tendered to the Reconstruction Finance Corporation and must be serviced as indicated above. It is further assumed that one-half of this total will be tendered during the fiscal year 1947 and the remainder during the fiscal year 1948, and that sales of such houses will amount to $\$ 12,500,000$ each year.

## PERFORMANCE OF SERVICES FOR U. S. COMMERCIAL COMPANY

At the time U.S. Commercial Company was transferred to the Reconstruction Finance Corporation under Executive Order 9630, the foreign purchases of strategic supplies by the former were taken over by the Reconstruction Finance Corporation under the strategic supplies program. In addition, the Corporation undertook to perform for the U. S. Commercial Company the handling of traffic, customs, insurance, and the audit of freight bills, both marine and rail. Except as to materials which are handled under the strategic metals program, the Office of Defense Supplies will continue to perform the traffic and freight bill auditing in connection with all exports and imports by the U. S. Commercial Company to and from areas occupied by the United States armed forces as well as other parts of the world.

## VERIFICATION OF FOOD SUBSIDY PAYMENTS

The meat subsidy, the only food subsidy which continued active after June 30, 1946, was terminated on October 14, 1946. Some time will be required, however, to effect payments of subsidies accrued prior to that date, and a very large number of field checks will have to be made. Furthermore, the Corporation will have a number of claims receivable on its books covering overpayments madn in thannot whinh will hown tn ha nollnatad Gnma
of the food subsidy programs, will necessarily have to be litigated and as a result will carry over into the fiscal year 1948. While it has been the practice of the Corporation in the past to make field checks of the records of all meat slaughterers in order to establish overpayments that may have been made as a result of erroneous claims having been filed by them, the Corporation has found it necessary because of shortage of administrative funds to defer the making of a considerable number of these field checks until further funds are provided for the purpose.

## Strategic Metals and Minerals Program

The Metals Reserve Company was created by the Reconstruction Finance Corporation on June 28, 1940, pursuant to authority contained in section 5d (3) of the Reconstruction Finance Corporation Act, as amended, for the purpose of aiding in the procurement of strategic metals and minerals essential to the national defense program of the U. S. Government. The Company was dissolved on July 1, 1945, under the provisions of Public Law 109, Seventy-ninth Congress, approved June 30, 1945, and its functions assumed by the Reconstruction Finance Corporation.
As defense and war requirements subsided with the cessation of hostilities, the program was continued on a modified basis to meet reconversion needs. All of the activities under this program have been conducted pursuant to directives from other Government agencies, such as the War and Navy Departments, Civilian Production Administration, and the Office of War Mobilization and Reconversion. During the period of price controls, materials were sold at ceilings established by the Office of Price Administration but since the lifting of controls these commodities have been sold at the market price.
The procurement and disposal activity has operated on the basis of (a) straight procurement contracts, (b) operating agreements for ore treatment and metal recovery and (c) sales arrangements and other methods of disposition. In addition, premium payments have been made on excess quota production of domestic copper, lead and zinc pursuant to the recommendations of the Civilian Production Administration and the Office of Price Administration. It is contemplated under this submission, however, that the premium price plan for copper, lead, and zinc will not extend into the fiscal year 1948 except to the extent of disbursements during that period applicable to the fiscal year 1947.
The major activities under this program contemplated during the fiscal year 1948 are as follows:

1. Procurement and disposal of strategic metals and minerals.
2. Treating and processing ores and minerals.
3. Plant operations for production of strategic and critical metals.
4. Payment of direct subsidies.
5. Performance of services for U. S. Commercial Company.

There follows a discussion of the foregoing activities with further details as to their financial implications being set forth in schedule A-5.

## PROCUREMENT AND DISPOSAL OF STRATEGIC METALS

The President's letter of August 9, 1945, to the chairman of the War Production Board, requested expansion of the production of materials in short supply for military and civilian demands and the maintenance of inventory controls to avoid an unbalanced distribution. Since that date the Reconstruction Finance Corporation has, pursuant to Civilian Production Administration and Office of Whan Makilimotinn and Ramanvemminn dimativas anntinuad
are principally tin and tin ores and concentrates, copper, lead, and antimony. Public Law 548, approved July 25, 1946, authorizes the Reconstruction Finance Corporation to continue the purchase of tin ores and concentrates without limitation to insure the continued operation of the Texas City tin smelter. In addition to the purchases of tin and tin ores and concentrates during fiscal 1948, it is anticipated that $\$ 550,000$ will be expended for antimony, $\$ 9,405,000$ for copper and copper ore, and $\$ 4,600,000$ for tungsten ore to be received during that year under outstanding commitments. The procurement program is limited to the commodities specified on the assumption that there will be no legislation or directives requiring the procurement of additonal commodities or larger quantities of the projected commodities.
Sales of material will be made for the purpose of supplying civilian deficiencies as determined by Office of Temporary Controls. This will involve the negotiation and administration of contracts covering all sales transactions. The balance of the material will be declared excess for transfer to the Treasury Department for permanent stock piling under the provisions of the Strategic and Critical Materials Stock Piling Act, or will be declared surplus to War Assets Administration under the provisions of the Surplus Property Act. Transfers for permanent stock piling involve preparation for shipping (resampling, reanalyzing, reweighing, repackaging, and remarking) and transportation to the stock pile, charges for all of which will be paid by the Reconstruction Finance Corporation and recorded as a part of the cost of the materials declared excess. Unloading and handling charges at the permanent stock pile are for the account of the Treasury Department and no provision is made in this budget for these latter charges. Some of the material to be shipped to permanent stock pile will require beneficiation in order to meet the present specifications established by the Army and Navy Munitions Board.
Purchases during the fiscal year 1948 will approximate $\$ 146,120,000$, including storage and handling, but excluding treatment costs, as compared to $\$ 297,558,000$ estimated purchases for the fiscal year 1947. Proceeds from sales will decrease from about $\$ 471,178,000$ in fiscal year 1947 to $\$ 203,864,000$ in 1948. In addition, it is contemplated that materials having a book value of $\$ 135,802,000$ will be declared surplus and made available for transfer to the Treasury Department for permanent stock pile. The June 30,1946 , inventory of $\$ 460,368,000$ is expected to be reduced to $\$ 238,831,000$ as of June 30, 1947 , and to $\$ 59,719,000$ one year later. (See schedule B-1b.)

## TREATMENT AND PROCESSING

It is necessary to treat certain materials before they can be available for either civilian use, or as previously mentioned, for permanent stock pile. It is anticipated that the principal materials requiring treatment in fiscal year 1948 will be tin, lead, and zinc. Such costs are estimated at $\$ 13,075,000$ during fiscal year 1948 as compared to $\$ 17,075,900$ for the current fiscal year. (See schedule B-1b.)

## PLANT OPERATIONS FOR PRODUCTION OF STRATEGIC AND CRITICAL METALS

It is contemplated that the Corporation will continue the operation of the Tin Smelter at Texas City, Tex., during 1948 at a net cost of $\$ 5,000,000$ which is the same as in fiscal year 1947. During the fiscal year 1948 it is
estimated that $\$ 1,000,000$ will be expended in connection with an acid disposition and metal recovery plant, and for replacements with more efficient equipment in order to increase efficiency of operations.

## DIRECT SUBSIDIES

For purposes of the Corporation's budget program, it is assumed that Public Law 548, Seventy-ninth Congress, will not be extended by Congress to permit the continuance of the premium price plan covering direct subsidies on domestic copper, lead, and zinc through the fiscal year 1948. However, payments estimated at $\$ 18,000,000$, which amount is included in accounts payable at June 30, 1947, will have to be made in the fiscal year 1948 covering claims applicable to the prior year. Although $\$ 100$,000,000 has been authorized in connection with this subsidy program for the fiscal year 1947, it is estimated that not more than $\$ 60,000,000$ will be spent as a result of lifting of price controls and increased market prices.

## PERFORMANCE OF SERVICES FOR U.S. COMMERCIAL COMPANY

At the time U.S. Commercial Company was transferred to the Reconstruction Finance Corporation under Executive Order 9630, the foreign procurement of strategic and critical metals and minerals was taken over by Reconstruction Finance Corporation and placed in the Office of Metals Reserve except for such items handled under the strategic supplies program. The Office of Metals Reserve will continue to perform services in connection with the exports and imports of metals by U. S. Commercial Company to and from areas occupied by the United States armed forces.

## Rubber Program

The Reconstruction Finance Corporation now performs the functions previously handled by the Rubber Reserve Company and supervises the functions previously performed by the Rubber Development Corporation.

The Rubber Reserve Company was created by the Reconstruction Finance Corporation on June 28, 1940, pursuant to authority contained in section 5d (3) of the Reconstruction Finance Corporation Act, as amended. That Company was dissolved on July 1, 1945, under the provisions of Public Law 109, approved June 30, 1945.

The original function of the Rubber Reserve Company was to purchase and stock pile natural rubber. After outbreak of the war in the Far East and the consequent loss of major sources of natural rubber, the predominant functions of the Rubber Reserve Company became the operation of the Government's synthetic rubber program and the distribution of available supplies of both synthetic and natural rubber to consumers. The function of procuring natural rubber from foreign sources was transferred to the Rubber Development Corporation. The various activities of the Rubber Reserve Company were initiated at the request of other governmental agencies.

Rubber Development Corporation, chartered under the laws of the State of Delaware, commenced operations on February 23, 1943, with approval of the President, and at the suggestion of the Rubber Director who, by terms of Executive Order 7246, dated September 17, 1942, had been made administratively responsible for the Nation's rubber program. In performing this function the Rubber Development Corporation assumed certain activities of the Rubber Reserve Company and the Defense Supplies

Corporation relating, respectively, to rubber agreements with various foreign governments, and to aviation and construction programs directed toward facilitating rubber production primarily in the Amazon Valley of South America. Under Executive Order 9361, dated July 15, 1943, Rubber Development Corporation was transferred from the Reconstruction Finance Corporation to the Office of Economic Warfare, and subsequently, under Executive Order 9380, dated September 25, 1943, to the Foreign Economic Administration. Pursuant to Executive Order 9630, dated September 27, 1945, the Rubber Development Corporation was returned to the Reconstruction Finance Corporation. The Rubber Development Corporation will be dissolved during the fiscal year 1947 and its assets, liabilities, and functions transferred to the Reconstruction Finance Corporation.

The budget estimates for the fiscal year 1948 are based upon the assumption that (1) the Government will continue in its present role of owner and operator of the principal portion of the American synthetic rubber plants pending their dispositions to private industry, (2) the Government will be called upon to produce 508,000 long tons of synthetic rubber, (3) the Reconstruction Finance Corporation will not be required to purchase natural rubber, and (4) the Reconstruction Finance Corporation will assist in controlling distribution to consumers in the United States. The major activities under the program consist of the following:

1. Synthetic rubber
(a) Production and sales
(b) Synthetic plant disposition
(c) Maintaining stand-by plants
(d) Plant improvement
(e) Storage and handling
2. Natural rubber
(a) Purchase and disposition
(b) Latin-American operations
3. Scrap rubber

The following discussion covers the respective rubber activities of the Corporation, as listed above (for details of the financial requirements for the rubber program, see schedule A-6).

## SYNTHETIC RUBBER

The Inter-Agency Policy Committee on Rubber has recommended that, regardless of cost considerations, a certain portion of rubber consumption in the United States shall be from domestically produced rubber. The volume of synthetics above 250,000 long tons which the American rubber industry will demand cannot now be accurately predicted because of the following factors which are undetermined at the present time: (1) total requirements for rubber during fiscal year 1948, (2) total quantity of natural rubber available, (3) prices at which natural rubber will be available, (4) costs of raw materials and labor required in the synthetic rubber program, and (5) timing of disposal of the synthetic rubber plants.

In establishing the budgetary requirements of the synthetic rubber program of the Reconstruction Finance Corporation for the fiscal year 1948, it has been assumed that 508,000 long tons of total synthetic rubbers is the limit which the Reconstruction Finance Corporation will be called upon to produce in that year.

Production and distribution.-As stated above, it has been assumed that during the fiscal year 1948 production of 508,000 long tons of synthetic rubber would be required to supplement the anticipated supply of natural rubber. It is estimated that such production will cost an average
of 14.6 cents per pound, excluding depreciation, or an aggregate of $\$ 166,566,000$. Depreciation on 28 plants to be employed in the production program is estimated at $\$ 42,922,000$ which represents 3.77 cents per pound resulting in a total average cost of 18.37 cents per pound.

It has been assumed that the sale prices of all types of synthetic rubber will remain unchanged for fiscal year 1948, and that total sales will, therefore, amount to $\$ 217,772,800$, as compared to $\$ 300,653,000$ during the fiscal year 1947. It is estimated the average sale price of all types included in the estimated 508,000 long tons to be sold during the period will be 19.13 cents per pound. Sale at this average price would result in a net profit of 4.53 cents per pound before provision for depreciation. Including provision for depreciation at 3.77 cents per pound results in an estimated average net profit of 0.76 cent per pound on all synthetic rubber produced and sold during the fiscal year 1948. During the fiscal year 1946, 716,070 long tons of rubber were produced at an average cost of 17.8 cents per pound before provision for depreciation. Including depreciation at 3.6 cents per pound the total average cost was 21.4 cents per pound. The reduction in production cost estimated for fiscal year 1948 results from the elimination of certain high cost plants.

Synthetic plant disposition.-In projecting the disposal of synthetic rubber plants, the Reconstruction Finance Corporation has followed as closely as practicable the recommendations contained in the Second Report of the InterAgency Policy Committee on Rubber dated July 22, 1946. A total of 51 plants were designed, constructed and placed in operation to produce synthetic rubber, butadiene, styrene, and other materials essential to the manufacture of synthetic rubber. The total cost of these plants approximated $\$ 672,000,000$ as of June 30, 1946. For budgetary purposes, it has been assumed that 17 plants will have been declared surplus prior to July 1, 1947, 3 will be declared surplus during fiscal year 1948, and that 3 plants costing approximately $\$ 49,000,000$ will be maintained in stand-by condition during the latter period. It is further assumed that 28 plants costing approximately $\$ 406,000,000$ will be operated during fiscal year 1948 to supply the national requirements for synthetic rubber. It is estimated that the Corporation will sustain a loss of $\$ 75$,388,000 as the result of disposal of synthetic rubber plants and equipment during the fiscal year 1947, and $\$ 3,153,000$ during the fiscal year 1948.

Maintaining stand-by plants. - Expenses of maintaining three plants in stand-by condition are estimated at $\$ 1,000,000$ for fiscal year 1948. Stand-by expenses for fiscal year 1946 amounted to $\$ 2,340,000$ and is estimated at $\$ 2,500,000$ for fiscal year 1947. The estimated reduction for fiscal year 1948 is due to the projected disposal of several plants prior to July 1, 1947. Liquidated damages and other costs incident to termination of contracts amounted to $\$ 2,132,540$ in fiscal year 1946, is estimated at $\$ 3,000,000$ for fiscal year 1947, and the same amount for fiscal year 1948. The estimate for fiscal years 1947 and 1948 is based upon the expected increased cancellation of contracts as the production program is reduced.

Plant improvement.-During the fiscal year 1948 it is estimated that $\$ 12,000,000$ will be expended to replace equipment now in place with new and more efficient equipment and to improve plants in order to increase efficiency of operations. The equipment to be replaced has an estimated cost of $\$ 5,000,000$.

Storage and handling.-Storage and handling expenses covering stored materials and finished rubber is estimated at $\$ 428,000$ for fiscal year 1948. Similar expense amounted to $\$ 1,098,000$ for fiscal year 1946 and is estimated at $\$ 600,000$ for fiscal year 1947 . The reduced estimates for 1947 and 1948 reflect the reduced inventories of synthetic rubber anticipated during the latter periods.

Research.-Research and testing costs are estimated at $\$ 2,240,000$ for the fiscal year 1948, the major portion of which will be for work performed at the Rubber Laboratory, Akron, Ohio, and at the Bureau of Standards, Washington, D. C. Actual expenditures for this purpose during the fiscal year 1946 amounted to $\$ 3,680,000$ and are estimated at $\$ 3,225,000$ for the fiscal year 1947.

## NATURAL RUBBER

Estimates relating to the crude rubber activities of the Reconstruction Finance Corporation during the fiscal year 1948 are based upon the assumption that the Corporation will not be called upon to purchase any crude rubber or to perform any stock piling functions under the terms of the Strategic and Critical Materials Stock Piling Act, Public Law 520, Seventy-ninth Congress.

Purchases and disposition.-The budget contemplates cessation of purchases of natural rubber by the Corporation in 1947, and the transfer of the June 30, 1947, inventory, estimated at 235,000 tons acquired at a cost of $\$ 118,474,000$ to the national stock pile at the Procurement Division of the Treasury. The 235,000 tons represents 90,000 tons to be accumulated out of purchases during the fiscal year 1947 of 465,000 tons, in addition to stock pile accumulated during previous years. The transfer of the crude rubber inventory will result in the cancellation by the Treasury of approximately $\$ 118,474,000$ of the Corporation's notes.

Latin-American operations.--For a brief period during the fiscal year 1948 the Corporation will be engaged in final liquidation of various Latin-American rubber agreements, all of which will have expired by their terms on or before June 30, 1947. No expenditures during the fiscal year 1948, other than minor expenditures of an administrative character, are anticipated in connection with the Latin-American operation. However, during the period of final liquidation it is expected the Corporation will obtain recovery on certain of its investments which cannot be liquidated before June 30, 1947. Primarily, such recoveries will relate to the participation of the United States Government with the Brazilian Government in operation of the Banco de Credito da Borracha. It is estimated that the Corporation will secure complete recovery on its $\$ 3,000,000$ investment in the stock of that institution. It is also estimated that the Corporation during the fiscal year 1948 will obtain some recovery on assets declared or to be declared surplus to the Foreign Liquidation Commissioner. The bulk of such assets is heavy marine equipment which has been subjected to hard usage for 4 years and upon which substantial recovery is consequently not anticipated.

## SCRAP RUBBER

It is expected that this program will be liquidated during the fiscal year 1947 and therefore will not be involved in the Corporation's operations during the fiscal year 1948.

## RFC Price Adjustment Board

The RFC Price Adjustment Board was created in July 1943 to carry out the intent of section 403 of the Sixth Supplemental National Defense Appropriation Act of 1942, as amended. This board, consisting of the same membership as the board of directors of the Reconstruction Finance Corporation, renegotiates such contracts as are assigned to it by the War Contracts Price Adjustment Board which is charged with the responsibility of administering the Renegotiation Act of 1943. The War Contracts Price Adjustment Board assigns contracts to a given departmental board, such as the RFC Price Adjustment Board, on the basis of the preponderance of its interest in the war contracts of an industry.

Through July 1, 1946, there has been assigned for renegotiation to the RFC Price Adjustment Board 8,046 contractors. The dollar volume of gross recoveries by agreements or unilateral determinations amounted to $\$ 354,000,000$ as compared to $\$ 291,199,000$ at December 31,1945 , with others in process amounting to $\$ 14,000,000$. As of July 1, 1946, there were 885 contractors still to be renegotiated and approximately 185 additional assignments were yet to be made.

The recovery from renegotiation of the Reconstruction Finance Corporation's own contracts is returned to the Corporation, whereas the recoveries on contracts negotiated for other agencies and assigned to the Reconstruction Finance Corporation are deposited in miscellaneous receipts of the Treasury.

It is anticipated that with the exception of cases in litigation this program will be entirely completed during the fiscal year 1948 .

## OPERATING RESULTS

As shown on the statement of income and expense (exhibit B), the Corporation's various programs will result in net losses for the fiscal years 1946, 1947, and 1948 as follows:

|  | Actual, 1946 | Estimate, 1947 | Estimate, 1948 |
| :---: | :---: | :---: | :---: |
| Net loss from war activities.- | $\begin{array}{r} \$ 3,577,828,000 \\ 28,755,000 \end{array}$ | $\begin{array}{r} \$ 2,943,570,000 \\ 21,183,000 \end{array}$ | $\$ 207,492,000$ |
| Net loss for the year. | 3,549, 073,000 | 2, 922, 387, 000 | 170, 662,000 |

While the net losses from war activities indicated for all 3 years result, principally, from several identical factors, the amounts of these losses will have been reduced substantially by 1948. The major factors contributing to the war activities losses are: (a) payments of direct subsidies on a variety of supplies, metals, and minerals; (b) losses sustained on the disposal of war properties; and (c) writeoffs and the establishment of valuation reserves for such property.

Payments of direct subsidies during 1946, principally on livestock, flour, coffee, butter, gasoline, and domestic copper, lead, and zinc, aggregated \$1,019,499,000. As price controls were removed from these various items during the fiscal year 1947, subsidy payments were reduced or eliminated. However, in the same year subsidy payments on building materials for veterans' housing were initiated. Total direct subsidy payments for the
fiscal year 1947 are estimated at $\$ 211,000,000$. No such payments are contemplated for the fiscal year 1948. (See schedule B-3.)
To be expected as a result of the Corporation's accelerated program for disposing of property and facilities acquired for war purposes, which will reach a peak during the fiscal year 1947, losses sustained on the sales of such property as surplus through War Assets Administration are expected to be exceptionally high in that year. Losses from sales of surplus property which amounted to only $\$ 645,000$ in the fiscal year 1946, are expected to increase to $\$ 759,566,000$ in 1947 and then recede to $\$ 505,994,000$ in 1948. Similarly, it is estimated that sales of war property made direct to purchasers by the Corporation will result in losses of $\$ 122,061,000$ and $\$ 275,000$ for the years 1947 and 1948, respectively, as compared to $\$ 11,256,-$ 000 in 1946.

The Corporation's statement of income and expense also reflects substantial adjustments of valuations reserves for war property, facilities, and commodity inventories remaining unsold as of the close of each of the fiscal years under consideration. It is contemplated that reserves of $\$ 1,505,760,000$ will be provided for this purpose during 1947 as compared to $\$ 2,322,830,000$ in 1946 and that in 1948 the income statement will reflect a reduction in valuation reserves for war property of $\$ 564,419,000$. In addition, surplus property in the amount of $\$ 256,939,000$ and $\$ 200,000,000$ will be written off in the fiscal years 1947 and 1948 respectively, as compared to $\$ 926,000$ in 1946.

Other wartime losses which are expected to decline in 1948 as compared to 1946 are: losses from operation of plants, from $\$ 11,016,000$ to $\$ 1,000,000$; losses from agency operating agreements, from $\$ 14,880,000$ to $\$ 100,000$; contract termination expense, from $\$ 43,665,000$ to $\$ 3,000,000$; losses from public sales of commodities, from $\$ 11,438,000$ to a profit of $\$ 47,892,000$; and losses from transfers of commodities to the National stock pile from $\$ 58,849,000$ to $\$ 10,176,000$. Expenses incident to closing down plants and maintaining stand-by plants are expected to amount to $\$ 25,663,000$ in 1948 as compared to $\$ 50,081,000$ in 1947 and $\$ 19,670,000$ in 1946. Provision of $\$ 10,000,000$ is also made in each of the years 1947 and 1948 for claims, suits, and miscellaneous expenses as compared to $\$ 17,000$ actually expended for this purpose in 1946.

The increase in net income from loan activities projected for the year 1948 as compared to 1946 and 1947 is expected to result primarily from the collection of interest on the increased volume of business loans and purchases of GI mortgages. As shown in exhibit B, interest and dividend income is expected to increase from $\$ 57,269,000$ in 1946 to $\$ 74,023,000$ in 1948 . While the Corporation's investments in business loans and in GI mortgages is expected to show a decided increase in fiscal year 1947 the full impact of income from these investments will not be felt until 1948.

## FINANCIAL CONDITION

The comparative statement of financial condition (exhibit C) includes the financial condition of War Damage Corporation, Rubber Development Corporation, and The RFC Mortgage Company on a consolidated basis in contemplation of the merger of these subsidiaries with the Reconstruction Finance Corporation on or before

June 30, 1947. The June 30, 1945, statement also includes, on a consolidated basis, the financial condition of Defense Plant Corporation, Defense Supplies Corporation, Metals Reserve Company, Rubber Reserve Company, and Disaster Loan Corporation which were merged with the Reconstruction Finance Corporation on July 1, 1945, pursuant to Public Law 109, Seventy-ninth Congress.

In connection with financial transactions under its wartime programs, the Corporation was unable, in some cases, to obtain definitive year and reports and other pertinent data because of the circumstances under which it was necessary to carry on and liquidate wartime activities. For this reason substantial adjustments to the June 30, 1945, net worth accounts were recorded in the fiscal year 1946. However, at June 30, 1946, transactions concerning which full and complete information was not available were recorded on the basis of the best information then at hand, but it is believed that when complete information is received there will be no material effect on the Corporation's net worth. Surplus adjustments reflected in fiscal year 1947 represent, for the most part, prior years' income relating to properties under reimbursement agreements with other governmental agencies.

No physical inventories of commodities held for sale were taken for the purpose of the financial statements. However, in the majority of cases inventories are covered by warehouse receipts and other documents evidencing ownership by the Corporation. It is believed that any differences between book inventories and physical inventories are not significant. The inventories generally have been stated at the lower of cost or market, except that in the June 30, 1945, statement, inventories are reflected at cost. The Corporation was required, pursuant to regulations issued under section 22 of the Surplus Property Act (Public Law 457, 78th Cong.), to transfer to the National stock pile, without reimbursement, certain inventories of strategic and critical materials. Inventories on hand at June 30, 1946, held for transfer under such regulations were made the subject of a 100 -percent reserve. Inventories to be transiferred under the Strategic and Critical Materials Stock Piling Act (Public Law 520, 79th Cong.), and for which the Corporation is entitled to reimbursement in the amount of the fair market value thereof as determined by the Secretary of the Treasury, were stated at the estimated fair market value at June 30 , 1946, 1947, and 1948, respectively.
The Corporation's investments in its subsidiaries not consolidated in exhibit C (i. e., Federal National Mortgage Association and the U. S. Commercial Company) have been adjusted to give effect to the deficit of the latter company for the purpose of reflecting in the net worth accounts the aggregate net deficit from wartime activities. No adjustments have been made to reflect the surplus of the Federal National Mortgage Association.

Of the Corporation's total investment in land, building facilities, machinery and equipment-wartime capital facilities-at June 30, 1946, aggregating $\$ 6,896,157,000$, its investment in such facilities covered by reimbursement agreements with other governmental agencies amounted to $\$ 3,813,336,000$. Under the provisions of these agreements the underwriting agencies undertook to request the Congress to appropriate adequate funds to reimburse the Corporation for the difference between the total amount due under such agreements and the amounts paid to the Corporation by such agencies. The net
investment of the Corporation at June 30, 1946, covered by these agreements, aggregated $\$ 2,094,700,000$, the difference between the net investment and gross investment being made up of deposits received on reimbursement agreements in the amount of $\$ 1,364,940,000$, net income from operation of the plants under underwritten agreements in the amount of $\$ 339,696,000$, and unallocated receipts from War Assets Administration related to plants under underwritten agreements, in the amount of $\$ 14,000,000$. Exhibit C for June 30, 1945 and 1946, does not distinguish between investments in wartime capital facilities covered by such agreements and those not so covered, in order to afford a basis of comparison.

The June 30, 1946, investments covered by reimbursement agreements were not made the subject of a valuation reserve in view of the terms of such agreements (this reserve, had it been established, would have amounted to approximately $\$ 1,150,000,000$ ). It is possible, of course, that the Congress may not make the funds available to the agencies concerned to enable them to carry out these agreements. In view of this possibility, in preparing the budget estimates for the fiscal years 1947 and 1948, the reserves reflected at June 30, 1947, and 1948, in exhibit C have been adjusted to reflect appropriate reserve provisions for that portion of total plant, investment estimated to be unliquidated at such dates.

With respect to the remaining portion of the Corporation's investment in wartime capital facilities (not covered by reimbursement agreements), it is believed the reserves provided are adequate to cover losses which may be sustained in connection with their disposition. However, since the Corporation exercises no control over the disposal of such assets, which is a function of the War Assets, Administration, future disposition of the Corporation's properties may result in additional losses not presently provided for with corresponding changes in the Corporation's net worth.

A reserve in the amount of $\$ 100,000,000$ has been provided at June 30, 1946, to cover liabilities in connection with wartime activities which were not definitely ascertainable, and is included in the "Reserves for War Damage Insurance claims and other anticipated losses." Valuation reserves relating to loans, receivables, and other property were established on the basis of estimated realization. Exhibit C does not reflect as an asset or liability silver in the custody of the Corporation or its agents which is owned by the U. S. Treasury and returnable to it, in the amount of $\$ 213,388,000$ at June 30, 1946.

The Corporation was contingently liable at June 30, 1946, as a party defendant in legal proceedings involving claims arising from wartime activities aggregating $\$ 7,600,-$ 000 ; also claims aggregating $\$ 740,000$ not approved by the Corporation have been received from various contractors. The Corporation had outstanding contracts relating to the procurement of strategic materials not delivered as at June 30, 1946, and for the construction, acquisition and operation of wartime facilities in amounts aggregating $\$ 1,598,733,000$, and had guaranteed the payment of wartime loans made in foreign countries having outstanding balances of $\$ 103,000$. Under agreements with other lending institutions the Corporation may be called upon to participate to the extent of $\$ 236,709,000$ in loans carried by those institutions. It also had commitments outstanding to make loans and purchase mortgages aggregating approximately $\$ 1,381,530,000$. The aforementioned contingencies are reflected under loan commitments and under the "Provisions for Emergencies and Contincencies" in schedule C-1 concernine the nosi-
tion of the Corporation in respect of its Borrowing Authority.

As shown on the comparative statement of financial condition (exhibit C) the total assets of the Corporation at June 30, 1948, are expected to amount to $\$ 4,251,000,000$ after deducting a $\$ 3,575,000,000$ valuation reserve from the plant account, and other reserves applicable to specific assets, as compared to total assets of $\$ 4,104,000,000$ at June 30, 1947, and $\$ 7,669,000,000$ at June 30, 1946. The major items comprising these total assets consist of (a) loans and investments, (b) land, plants, machinery, and equipment, and (c) inventories of commodities held for resale or stock piling. The Corporation's liabilities consist primarily of notes payable to the U. S. Treasury.

## Loans Receivable

Exhibit C shows that the Corporation's outstanding loans receivable are expected to increase from $\$ 1,287$,337,000 at June 30, 1946, to $\$ 1,653,829,000$ by June 30, 1947, and to $\$ 2,392,143,000$ by June 30, 1948. The increase shown for the years 1947 and 1948 results principally from anticipated purchases by the Corporation of veterans' real-estate loans guaranteed or insured by the Veterans' Administration and to greater activity in business loans.

In addition to loans outstanding it is estimated that as of June 30, 1948, the Corporation will have undisbursed loan commitments of $\$ 1,136,092,000$ as compared to $\$ 958,512,000$ at the end of the fiscal year 1947 and $\$ 1,381,530,000$ at the end of the fiscal year 1946. As indicated in Schedule C-2 (a) the loans receivable outstanding were made to many types of borrowers including industrial organizations, Government agencies, States and municipalities, financial institutions, agricultural organizations, and for national defense purposes.

The status of loans outstanding as of June 30, 1945, and May 31, 1946, is reflected in schedule C-2 (c). Almost every category of loan made by the Corporation requires special consideration in determining whether a particular loan or the loans within a given category should be classified as delinquent. However, as a general rule, loans which are past due 30 days or more are considered delinquent.

## Investment in Securities

This account contains the Corporation's investment in securities of issuers other than subsidiaries. The investments are divisible into three major categories: (a) U. S. Government bonds, (b) capital stock and bonds of other Government agencies, and (c) preferred stocks, notes, and debentures of banks and trust companies (see schedule C-3). It is anticipated that the Corporation's investments exclusive of securities purchased from Federal Emergency Administration of Public Works, will decline from $\$ 386,919,000$ at June 30, 1946, to $\$ 291,223,000$ at June 30, 1947, and to $\$ 232,627,000$ at June $30,1948$. It is planned that the entire investment of $\$ 47,955,000$ in U. S. Government securities will be disposed of during the year 1947 and the proceeds, estimated at approximately $\$ 50,000,000$, will be utilized for reducing Corporation's notes held by the U.S. Treasury. Capital stocks of other Government agencies including bonds of Tennessee Valley Authority and debentures issued by the National Housing Administration, which amounted to $\$ 133,668,000$ at the end of 1946 , will remain approximately the same through 1947 and 1948, except for the renavment, in 1947 of the $\$ 2.000 .000$ investment in

Tennessee Valley Authority bonds. Investments in preferred stocks, notes, and debentures of banks and trust companies aggregated $\$ 201,196,000$ at June 30, 1946, and are expected to decline to $\$ 156,196,000$ by the end of 1947 and to $\$ 100,000,000$ by the end of 1948.

## Land, Plants, Buildings, Facilities, Machinery and Equipment

The amount shown in this account, which constitutes substantially more than one-balf the Corporation's assets, consists of a wide variety of land, plants, machinery, equipment, and facilities acquired principally under the defense plants program in connection with the war effort. The amount of land, buildings, furniture, and equipment of an administrative character remain fairly constant over the years 1946, 1947, and 1948 at approximately $\$ 11,000,000$ before deduction of depreciation reserves. Wartime facilities, before depreciation reserves, are expected to show a continual decrease from $\$ 6,896,156,000$ at the end of the fiscal year 1946 to $\$ 5,354,073,000$ by June 30, 1947, and to $\$ 4,525,869,000$ by June 30, 1948. The estimated reduction in the property account over the 3 year period reflects the anticipated disposal of wartime facilities as surplus. Of the total property remaining on the Corporation's books at June 30, 1948, amounting to $\$ 4,525,869,000$, it is estimated that $\$ 3,507,631,000$ will have been declared surplus to War Assets Administration, and the balance of $\$ 1,018,238,000$ will consist of plants which will not have been released by the sponsoring agencies, those in operation under lease agreements, and facilities pending declaration to War Assets Administration as surplus (see schedule C-4). The reserves established in connection with the Corporation's investment in property, as indicated in exhibit C, represent the full loss anticipated to be sustained upon ultimate disposition of the property.

## Commodities Held for Resale or Stock Pile

The commodities shown in this category were acquired under the strategic supplies program, the strategic metals and minerals program, and the rubber program. Details as to the type of commodities owned at June 30, 1946, are shown in schedules $\mathrm{B}-1$ (a), $\mathrm{B}-1$ (b) and $\mathrm{B}-1$ (c), and the Corporation's plans with respect to the ultimate disposition or retention are dealt with under the headings of the respective programs. In aggregate, the balance shown in these commodities accounts, including $\$ 25,768,100$ of metals held under the defense plants program, are expected to decrease from $\$ 668,046,000$ at June 30 , 1946, to $\$ 70,237,000$ by June 30,1948 . The sharp reduction in inventories results from (a) cessation of procurement programs during 1947 except purchases of tin and tin concentrates for the operation of the Texas City tin smelter, alcohol, molasses, fibers, and the acceptance of deliveries of copper, tungsten and antimony under existing contracts, and (b) to the transfer of inventories to the national stockpile, sales to the public, or declarations as surplus to War Assets Administration. It is expected that commodities carried at $\$ 102,307,000$ and $\$ 220,276,000$ will be transferred to Treasury Procurement in 1947 and 1948 in cancellation of the Corporation's notes.

## Notes Payable to U.S. Treasury

The Corporation borrows funds from U. S. Treasury to finance its various activities. Notes payable outstanding rebresenting such advances by the Treasurv amounted to
$\$ 9,019,900,000$ at June 30, 1945. It is estimated that borrowings from the Treasury will increase to $\$ 10,098,400,000$ by June 30, 1948, as a result of financing the programs set forth in exhibit A. Of the increase, $\$ 110,500,000$ is expected to occur in fiscal year 1947 and $\$ 782,641,000$ in fiscal year 1948.

## Net Excess of Assets Over Liabilities Transferred From Smaller War Plants Corporation

As of January 27, 1946, the Corporation acquired certain assets and liabilities of the Smaller War Plants Corporation. These have been administered on a liquidating basis and at June 30 , 1946, the excess of such assets over liabilities, at book values, amounted to $\$ 162,930,000$. It is expected that during 1947 this net excess will be increased to $\$ 163,963,000$. Smaller War Plants Corporation expires on December 31, 1946, and the 1948 Budget provides for payment by the Reconstruction Finance Corporation of $\$ 100,000,000$ to the Treasury in partial liquidation of these assets, leaving a balance of $\$ 65,046,000$ on the books of the Reconstruction Finance Corporation.

## Deferred and Undistributed Credits

The major portion of the balance in this account, or $\$ 1,364,900,000$, as of the fiscal years 1945 and 1946 consists of unallocated receipts received from other Government agencies, principally the War and Navy Departments, in partial liquidation of these agencies' obligations under "take-out agreements" to reimburse the Corporation for the cost of constructing certain war plants. As it is expected that these agreements will be canceled in 1947, the above amount has been transferred to paid-in surplus in that year.

## Capital Stock and Operating Deficit

The Corporation has outstanding $\$ 325,000,000$ of capital stock all of which is held by the U. S. Treasury. On June 30, 1946, accumulated assets donated by other Government agencies, and expended appropriated funds allocated by other Government agencies to the Corporation, amounted to $\$ 16,371,000$. This amount remained unchanged during 1947 and 1948. In 1947 the Corporation's paid-in surplus was further increased as a result of transferring the $\$ 1,364,900,000$ of receipts received in connection with the take-out agreements from deferred and undistributed credits, plus $\$ 18,000,000$ of rental income in excess of the Corporation's investment on certain plants under the take-out agreements. This transfer resulted in increasing the Corporation's total paid-in capital and surplus from $\$ 341,372,000$ at June 30, 1946, to $\$ 1,724,272,000$ at June 30, 1947.
As a result of its over-all operations the Corporation had accumulated a deficit in its earned surplus account as of June 30, 1945, of $\$ 2,007,859,000$, which had increased by the end of the following year to $\$ 4,884,913,000$. It is estimated that this deficit will further increase to $\$ 7,483,919,000$ by June 30, 1947, and to $\$ 7,862,694,000$ by June 30, 1948. The deficits shown at the end of these years are the result of losses arising out of the Corporation's war activities less accumulated earnings from its loan activities. The accumulated earned surplus from the loan activities shows a constant increase from $\$ 494,082,000$ at June 30, 1945, to $\$ 576,279,000$ at June 30, 1948. The accumulated year-end deficits arising out of war activities likewise show a constant increase from $\$ 2,503,712,000$ at the end of 1945 to $\$ 8,443,370,000$ estimated bv the end of 1948. The principal items in the war
activities losses result from the payment of subsidies and the disposal of defense plants and facilities.

Since a reserve for the full amount of the Corporation's loss in its investment in U. S. Commercial Company, the only remaining wartime subsidiary, has been provided through surplus, the net loss of this Company is reflected in the Corporation's deficit from war activities.

## Borrowing Authority

The Corporation has from time to time been authorized by Congress to borrow funds from the United States Treasury for the purpose of financing its various activities. This authority is of two types: general authority, which permits the Corporation to borrow for general corporate purposes up to a stated amount; and specific authority, which authorizes borrowing for specified purposes. The maximum amount which may be borrowed for a specific purpose is, in some cases, expressly stipulated in the authority; while in others, borrowing authority is granted in an unlimited amount to carry out the program or purpose authorized.

Schedule C-1 shows the actual position of the Corporation as to borrowing authority at June 30, 1946, and its estimated position at June 30, 1947, and 1948. After provision is made for financing the programs set forth on the statement of sources and application of funds (exhibit A), it is estimated that the Corporation's required borrowing authority will amount to $\$ 11,734,000,000$ at June 30, 1948, as follows:

|  | General | Specific | Total |
| :---: | :---: | :---: | :---: |
| Notes payable to the U. S. Treasury outstanding. | \$8, 647, 000, 000 | \$1, 451, 000, 000 | \$10, 098, 000, 000 |
| Undisbursed firm loan commitments. | 927, 000, $0 \times 0$ | 209, 000, 000 | 1,136,000,000 |
| Contingencies: <br> Possible additional financial requirements of the Corporation and its subsidiaries | 500, 000, 000 |  | 500, 000, 000 |
| Total.. | 10,074, 000, 000 | 1,660,000,000 | 11, 734,000,000 |

Undisbursed loan commitments represent estimated commitments in connection with loan activities which will not have been disbursed by June 30, 1948. The contingency of $\$ 500,000,000$ provides for such additional borrowing as may ultimately become necessary to final settlement of certain outstanding war activity commitments.

Total borrowing authority granted the Corporation for general purposes amounts to $\$ 15,750,000,000$, of which $\$ 1,660,300,000$ had been cancelled by the end of June 30, 1946, leaving general purpose borrowing authority in effect as of that date of $\$ 14,090,000,000$. Additional cancellations of geneal purpose borrowing authority during the years 1947 and 1948, resulting from anticipated cancellation of notes for commodities transferred to the National stock pile (pursuant to the provisions of Public Law 600, 79th Cong.), will have the effect of further reducing general purpose borrowing authority to $\$ 13,799,-$ 000,000 by June 30,1948 , or $\$ 3,725,000,000$ in excess of requirements.

Total specific borrowing authority, including as authority the amount of notes issued pursuant to unlimited specific authority, amounted to $\$ 5,105,800,000$, of which $\$ 1,860,400,000$ had been cancelled as of June 30, 1946, leaving borrowing authority for specific purposes of $\$ 3,246,000,000$ in effect as of that date. Additional cancellations anticipated during the fiscal years 1947 and 1948
will further reduce the borrowing authority for specific purposes to $\$ 3,008,000,000$ by June 30 , 1948. This is $\$ 1,348,000,000$ in excess of requirements.

As a result of the foregoing changes, the total borrowing authority, general and specific, is expected to amount to $\$ 16,807,000,000$ on June 30,1948 , as compared to $\$ 17,336,000,000$ at the end of the fiscal year 1946. Since it appears that the borrowing authority at June 30, 1948, will be in substantial excess of all reasonably foreseeable requirements, a further cancellation of $\$ 2,500,000,000$ in the general purpose borrowing authority is recommended.

## Restoration of Capital Impairment

Section 102 of the Government Corporation Control Act (Public Law 248, 79th Cong.) requires submission with the annual budget program of a statement of the appropriation required to provide for the restoration of capital impairment.

Since the Reconstruction Finance Corporation has certain wholly-owned subsidiaries, namely, Rubber Development Corporation, U. S. Commercial Company, The RFC Mortgage Company, War Damage Corporation, and Federal National Mortgage Association, all constituting a part of the Federal Loan Agency, and as the Rubber Development Corporation, The RFC Mortgage Company and the War Damage Corporation will be dissolved on or before June 30, 1947, it is the opinion of the Corporation that capital impairment should be determined on a consolidated basis, particularly since four larger corporations organized for war purposes have already been merged into the Reconstruction Finance Corporation. Further, it is the Corporation's interpretation of the law that determination of capital impairment is to be based on actual realized losses, and, therefore, that losses arising from establishment of valuation reserves should be excluded from consideration in determining the amount of the impairment.

Computation of the net impairment as of June 30, 1946, follows:
Deficit from wartime activities, June 30, 1946 (see exhibit C)
Reserve for valuation of inventories beld for sale or stock
piling
piling.
eserve for valuation of inventories held for shipment to
permanent stock pile

An appropriation of funds by the Congress will eventually be necessary to eliminate the deficit or the Secretary of the Treasury be authorized to cancel an equivalent amount of the Corporation's outstanding notes.

## ADMINISTRATIVE EXPENSES

In prior years the administrative expenses of the Reconstruction Finance Corporation and its subsidiaries have been defined so as to exclude all costs which, in accordance with the accounting rules and regulations of the Corporation, were project or capitalized costs, thus eliminating
certain personal services and other costs from the administrative expense limitation. This definition of administrative expenses has now been revised so as to include salaries and other costs of all employees of the Corporation, excluding those stationed outside the continental United States and employees engaged on a daily or weekly wage basis. The Corporation will, however, continue to distribute these expenses on its books in accordance with its prescribed accounting practice. While this change in the definition of administrative expenses results in the necessity for showing an increased limitation as compared to prior years, it is not an increase in expenses but a shift to the administrative expense limitation of certain charges not previously included therein.

The administrative expenses of the Reconstruction Finance Corporation cover the six major programs which have been discussed in the preceding sections. Detailed information with respect to the administrative expenses applicable to the programs is shown in schedule B-2. For the fiscal year 1948 the administrative expenses are estimated at $\$ 46,204,000$ as compared with $\$ 48,261,000$ for the fiscal year 1947 (including a recommended supplemental estimate of $\$ 6,065,000$ ) and $\$ 47,107,000$ for the fiscal year 1946. The recommended supplemental estimate for 1947 is required to provide for new programs involving premium payments on new type building material; the guarantee of a market for prefabricated houses and the purchase of G. I. mortgages. Also included, are funds required for pay act increases (Public Law 390) and for terminal-leave pay.

The continued liquidation of the Corporation's war activities in the fiscal year 6948 is offset to some extent by new and expanded programs relating to the purchase of G. I. mortgages, making of business loans, and providing a market for prefabricated houses. In the liquidation of its war activities the Corporation will be confronted with a large number of extensive and complex audits and a considerable amount of legal work. Some factors bearing on the administration of these programs are summarized below:

## Loan and General Activities

Loans and purchase of securities.-Administrative expenses during 1948 for this program will be approximately 14 percent above those for 1947 . This is due to an increase in the Corporation's lending activities together with an expanded loan service to veterans and small business.

War damage insurance.-The administrative expenses of this program will continue in the fiscal year 1948 at approximately the 1947 level due principally to the backlog of audits that must be completed before liquidation. The liquidation of this program will involve the payment of war damage claims, fiduciary agents' participating interest in the operating profits from the general program, and the - moneys and securities program.

Smaller war plants liquidation.-In addition to the expenses specifically assigned to the foregoing programs the Reconstruction Finance Corporation has provided in the 1948 Budget for $\$ 750,000$ to be expended in connection with the administration and liquidation of loans and plants which were transferred to the Reconstruction Finance Corporation on January 27, 1946. The $\$ 750,000$ will be deducted from the assets transferred from the Smaller War Plants Corporation and is not reflected in the statement of income and expenses of the Reconstruc-
tion Finance Corporation. This does not cover any expenses which will result from new loans made since these are provided for under the loan program of the Reconstruction Finance Corporation.

## Strategic Supflies Program

During the fiscal year 1948 administrative expenses for this program will be approximately 24 percent less than in 1947. The reduction is primarily attributable to the decontrol program which eliminates the necessity for continuing certain subsidy payments and to a reduction in the number of strategic commodities that will be purchased for sale to industry. The major activity under this program in 1948, aside from the purchase of molasses, alcohol and fibers and considerable clean-up work, involves maintaining a market for prefabricated houses.

## Strategic Metals and Minerals Program

Administrative expenses applicable to this program during the fiscal year 1948 will be approximately 13 percent less than in 1947. The decontrol of prices eliminates the necessity for continuing subsidy payments or purchases for sale at a loss. The major activities under this program in 1948 involves the purchase of tin ore and tin concentrates for the continued operation of the Texas City tin smelter, acceptance of delivery of antimony, copper and tungsten under existing contracts, and the treatment of certain ores prior to their transfer to the Treasury Procurement Division stock pile.

## Defense Plants Program

The budget for 1948 reflects a 12 percent decrease in the administrative expenses of this program as compared with 1947. The plant program will continue in active liquidation and at the close of the fiscal year 1948 there will remain approximately $\$ 1,000,000,000$ of plants and facilities to be disposed of. A very large amount of paper work remains to be done in the plant program before lessees can be released from accountability. This work involves the taking of physical inventories, checking inventories against asset property records of custodian banks, and verifying or locating differences between these records. In addition, there will be a considerable amount of work in connection with contract terminations, plant clearance, and the maintenance of certain plants in stand-by status pending a final determination by the sponsoring agency.

## Rubber Program

Administrative expenses applicable to this program during the fiscal year 1948 will be approximately 14 percent less than in 1947. This reflects the production and distribution of synthetic rubber at a reduced level during 1948. It also contemplates that there will be no purchases of crude rubber in 1948 and that the inventory of crude rubber will be transferred to the Treasury Procurement Division stock pile.

## LANGUAGE

Authorizing language covering the Reconstruction Finance Corporation and its subsidiaries follows the narratives and financial statements of these corporations. (See p. 1089.)
