## *Deduct.

## FEDERAL NATIONAL MORTGAGE ASSOCIATION

## Creation and Purpose

Federal National Mortgage Association was organized in April 1938 under title III of the National Housing Act, as amended, for the purpose of assisting in establishing a market for first mortgages insured under the provisions of title II of the National Housing Act, as amended, covering properties upon which are located newly constructed houses or housing projects; to facilitate the construction and financing of economically sound rental housing projects to be operated at a moderate scale of rentals, and to make available to individual and institutional investors bonds issued by the Association pursuant to the provisions of section 302 of title III of the National Housing Act, as amended, and the regulations of the Federal Housing Commissioner. The Association purchases mortgages insured under sections 203 and 207 of the National Housing Act. Purchases under section 203 are limited to mortgages insured subsequent to January 1, 1936. The Association has made periodic sales of mortgages to originating mortgagees.
The affairs of the Association are managed by a board of directors who are appointed by the board of directors of the Reconstruction Finance Corporation.

## Financial Organization

Federal National Mortgage Association was organized with a paid-in capital of $\$ 10,000,000$ and a surplus of $\$ 1,000,000$ which was subscribed for and purchased by the Reconstruction Finance Corporation. Such additional funds as were required by its programs were obtained through the sale of bonds which it issued, and by borrowings from the Reconstruction Finance Corporation. The provisions of the National Housing Act authorized the Association to borrow an amount not to exceed at any one time: (1) 20 times the amount of its paid-in capital and surplus, and (2) the current unpaid principal of mortgages held by it and insured under the provisions of title II of the Act plus the amount of its cash and the amortized value of its investment in bonds issued or guaranteed by the United States. All bonds sold have been redeemed (see statement of condition following textual material-exhibit C).

## Analysis of Budget Program

In appraising the budget requirements of the Association for the fiscal year 1948, consideration must be given to the following circumstances: (1) there is an acute shortage of moderately priced homes for nonveteran families as well as for war veterans; (2) the financing of homes for nonveteran families will be done largely through Federal Housing Administration insured mortgages, while the financing of veterans' homes will be done principally, through mortgages guaranteed or insured by the Veterans' Administration; (3) although veterans have priority in the obtainment of building materials, houses will be constructed for nonveteran home owners in a rising volume as sufficient materials become available and this will result in the creation of a heavy volume of Federal Housing Administration insured mortgages; (4) while it is expected that these Federal Housing Administration insured mortgages will be absorbed and held principally by private financial institutions, the experience of the prewar years
shows that the Association will be called upon to purchase a substantial volume of the mortgages. The fact that the Association stands ready to buy the mortgages has been and remains an important influence upon the financing of medium priced homes on liberal terms and an important influence upon the willingness of private institutions to invest in Federal Housing Administration insured mortgages. On the basis of these circumstances it is estimated that the Federal National Mortgage Association will be required to disburse $\$ 10,010,000$ during the fiscal year 1947 and $\$ 50,025,000$ during the fiscal year 1948 for the purchase of Federal Housing Administration insured mortgages, while repayments are estimated at $\$ 1, \mathbf{1 0 5 , 0 0 0}$ and $\$ 1,610,000$ (see exhibit A).

## Operating Results

Operations of the Association resulted in a net profit of $\$ 72,000$ for the fiscal year 1946 (see exhibit B). Estimated net profit for the fiscal years 1947 and 1948 amount to $\$ 33,000$ and $\$ 470,000$, respectively. The increase in estimated net income for the fiscal year 1948 is caused by the increase in the Association's investment in interestbearing mortgage loans from $\$ 6,372,000$ at the beginning of the fiscal year 1947 to $\$ 63,421,000$ by the end of 1948. No sales are anticipated in 1947 and 1948.
While the Association has no established dividend policy, $\$ 1,500,000$ of dividends was paid to Reconstruction Finance Corporation during the fiscal year 1946, bringing to $\$ 20,500,000$ the total dividends paid since inception.

## Financial Condition

Loan account.-On June 30, 1946, there were 2,246 insured mortgage loans outstanding, amounting to $\$ 6,372,000$. Of this number 21 or approximately 1 percent were in default. On June 30, 1945, there were 114 loans in default, representing approximately 4 percent of total loans outstanding. This improvement in the condition of loans was due to payments made by the mortgagors (see schedule $\mathrm{C}-1$ ).
Notes payable.-New borrowings from the Reconstruction Finance Corporation in the amount of $\$ 2,200,000$ are reflected in the budget for the fiscal year 1947 and in the amount of $\$ 47,850,000$ during the fiscal year 1948 (exhibits A and C).

## Administrative Expenses

The personnel engaged in the handling of the Association's business are employees of the Reconstruction Finance Corporation. The Association does not have an organization of its own. The Reconstruction Finance Corporation is reimbursed for such services. Administrative expenses for the fiscal year 1946 amounted to $\$ 263,000$. Based upon the volume of business anticipated it is estimated that administrative expenses will amount to $\$ 376,000$ for the fiscal year 1947 and $\$ 614,000$ for 1948 (see statement of income and expense, exhibit $B$, and schedule $\mathrm{B}-1$ ).

## Language

Language covering this Association is included with that of the Reconstruction Finance Corporation (see p. 1089).

## U. S. COMMERCIAL COMPANY

## Creation and Purpose

Pursuant to section 5d (3) of the Reconstruction Finance Corporation Act (15 U. S. C. 606 b ), in order to aid the Government in its national defense program, U. S. Commercial Company was created on March 26, 1942. Under Executive Orders 9361, dated July 15, 1943, and 9380, dated September 25, 1943, the U. S. Commercial Company was transferred to the Office of Economic Warfare and thereafter to the Foreign Economic Administration. Pursuant to Executive Order 9630, the U. S. Commercial Company was transferred to the Reconstruction Finance Corporation on October 20, 1945. The affairs of the Company are supervised by a board of directors appointed by the Board of Directors of the Reconstruction Finance Corporation and includes representatives of the Department of State, the Treasury Department, and the Department of Agriculture.
The charter of the Company incorporates the provisions of 5 d (3) of the Reconstruction Finance Corporation Act providing that the purposes of the Corporation and the business to be conducted by it are: (a) to produce, acquire, carry, sell, or otherwise deal in strategic and critical materials; (b) to purchase and lease land, plants, facilities, etc., for the manufacture of strategic and critical materials and implements of war, and other facilities, supplies, etc., necessary to the national defense; (c) to dispose of such land, plants, facilities, etc., to others to engage in manufacture; (d) to engage in such manufacture itself, if the President finds it necessary; (e) to produce or otherwise acquire railroad equipment and commercial aircraft and dispose of same; ( $f$ ) to arrange facilities for the training of aviators; (g) to take such other action as the President and Federal Loan Administrator may deem necessary to expedite the national defense program; and ( $h$ ) to do and perform all acts and things which are necessary in connection with the foregoing objects and purposes.
In accordance with the provisions of section 5 d (3) of the Reconstruction Finance Corporation Act, and Executive orders and letters of the President, the Foreign Economic Administrator authorized the Company on June 15 1944: (1) to conduct or facilitate and promote commercial trade with liberated areas or areas from which private traders may be barred or in which they may find it impracticable to carry on normal trade; (2) to acquire articles, etc., for export to or sale or distribution in foreign countries in which the Company is engaged in procurement or production programs; (3) to act for the Foreign Economic Administration in carrying out its functions and transactions and to take such other action deemed necessary to facilitate the war effort and strengthen the international economic relations of the United States; (4) to conduct operations necessary or incident to the procurement and development of food, etc., in foreign countries, and (5) to handle or dispose of Governmentowned property when authorized, and to carry out such functions as may be delegated to Foreign Economic Administration in connection with surplus war property. The functions of the Foreign Economic Administration were transferred pursuant to Executive Order 9630, dated

September 27, 1945, to the Department of State, Reconstruction Finance Corporation, Department of Agriculture, and Department of Commerce.

## Financial Organization

The authorized capital stock of the U. S. Commercial Company in the amount of $\$ 5,000,000$ is held by the Reconstruction Finance Corporation. The Board of Directors of the Reconstruction Finance Corporation charges the Company 1 percent interest on the funds invested in its capital stock, this being the same rate of interest charged the Reconstruction Finance Corporation by the United States Treasury. The Company obtains its funds through loans from the Reconstruction Finance Corporation. The outstanding balance of such loans at June 30, 1946, was $\$ 204,161,000$ (see exhibit C).

## Analysis of Budget Program by Major Activities

The major budgetary requirements of the U. S. Commercial Company for the fiscal year 1948 are predicated upon instructions from the President of the United States, such instructions having been issued upon the recommendations of the War, Navy, and State Departments. Obviously, the estimates must be based upon what constitutes a reasonable expectancy in light of existing instructions which are more fully stated below. The budget program of the Company involves the following activities:

1. Pacific Ocean operation.
2. Trade with occupied and liberated countries.
3. Custody and care of surplus property.
4. Final accounting for foreign operations and assembling of accounting and operating records.

## PACIFIC OCEAN OPERATIONS

The Pacific Ocean operations were initiated at the request of the Chief of Naval Operations on September 12, 1942, to the then Board of Economic Warfare to perform various functions on Pacific Islands occupied and to be occupied by the United States military forces. These functions included the local production of foodstuffs, primarily intended to supply troops and to develop island resources, and in general to assist the Navy in various related operations. The original request has been supplemented at various times by extending the area to be covered and by including new projects such as a dairy farm and a hog farm on Guam and other related activities. Under the program, there has been delivered to the armed forces to August 1, 1946, approximately $32,000,000$ pounds of fresh vegetables. The dairy farm is currently delivering approximately 1,200 quarts of milk per day to naval hospitals on Guam. Slaughtering of hogs has resulted in approximately 200,000 pounds of pork. Fishery projects have produced a large tonnage of fresh fish. During the war, and until recently, the produce was delivered against receipts to Army and Navy commissaries, and hospitals and other military units which in turn supplied labor, equipment, land, and buildings. An arrangement has now been worked out with the Navy

Department with respect to produce delivered subsequent to June 30, 1946, whereby such produce is to be paid for in accordance with price schedules which, it is estimated, will cover production costs.

A trade-goods program initially intended merely as a work incentive to encourage native labor has been greatly expanded and now consists of supplying civilian needs on occupied islands and taking native products in exchange. Some 66 native trade stores are in operation throughout the islands. Purchases and sales are not conducted by barter, but on an actual cash basis. A considerable part of the goods supplied consists of articles of production such as small agricultural tools, fertilizer, fishing equipment, and other articles intended to develop a subsistence economy. Apart from the dairy products and pork produced for the armed services, cows, hogs, poultry, and other animals are being sold for the purpose of upbreeding local stock and providing food supplies.

After the surrender of Japan, the Navy requested that all of these activities be continued and expanded to cover other islands, including islands formerly controlled by Japan and occupied by our forces.

In a letter to the Chairman of the Board of Directors of the Reconstruction Finance Corporation, dated February 1, 1946, and in a confirming letter dated September 10, 1946, the President has stated that he deems the program desirable and that the U.S. Commercial Company should continue the program and expand it if necessary in accordance with recommendations of the Navy Department. The extent and scope of the program during the fiscal year 1948 is necessarily indefinite since it is contingent upon such recommendations. However, it is assumed that the present program will be carried on through the fiscal year 1948. It is estimated that during the fiscal year 1948, sales in connection with trade-goods operations will approximate $\$ 1,200,000$, and that sales of agricultural products will be approximately $\$ 150,000$. It is expected that the Company will realize a gross profit in connection with trade-goods operations during the fiscal year of approximately $\$ 200,000$. As indicated above, it is contemplated that the produce operations will be conducted on a no loss basis after June 30, 1946. It is estimated that the operating expenses in connection with the entire program for the fiscal year 1948 will be $\$ 600,000$ as compared to $\$ 1,300,000$ for the fiscal year 1947 (see exhibit B).

## TRADE WITH OCCUPIED AND LIBERATED COUNTRIES

In December 1945, the President wrote the Chairman of the Board of Directors of the Reconstruction Finance Corporation and requested the U. S. Commercial Company to give all possible assistance to the Department of State in carrying out any programs for the handling of trade which the Department of State considered essential to the achievement of our immediate postwar objectives. The President pointed out that the objective of this Government is to return international trade to private channels as rapidly as possible. He further stated that in certain areas of the world, however, particularly in trade with countries now under military occupation, the achievement of this objective would not be immediately possible because normal commercial intercourse is either unsuitable to the situation or impracticable. He also stated that during the period of transition from war to peace, and until normal conditions of trade can be restored it would be important that the U.S. Commercial Company remain available to facilitate the handling of foreign trade of
tions are such that unassisted private trade is not feasible. He stated that such assistance would be needed particu= larly in areas then under military occupation such as Germany, Austria, and Japan.

In accordance with the President's request, and pursuant to arrangements made between the Department of State and the U. S. Commercial Company, the Company entered into agreements with the War Department according to the terms of which the U. S. Commercial Company sells merchandise made available to it in Japan and Germany by the military authorities. The Company pays the sales proceeds, less all out-of-pocket expenses in connection with the programs, and less a fixed charge to cover administrative expenses, to the War Department or its designee. The purpose of the programs is to provide dollar exchange for use by the Supreme Commander of the Allied powers in Japan and the Office of Military Government for Germany (United States) in facilitating the solution of problems arising in connection with the military occupation of Germany and Japan. A similar agreement covering Korean exports is in process of approval.

The principal items which have been made available to the Company under the afore-mentioned agreements are silk, textiles, tin, lead, antimony, rubber, agar, angora wool, and German hops. It is anticipated that various and sundry other items of merchandise will be made arailable in the near future and that such merchandise will be sold by the U. S. Commercial Company in the open market in the United States and possibly, in some instances, in other countries. In this connection, the Company will also accept orders from purchasers in this country covering merchandise manufactured or to be manufactured in Germany, Japan, and possibly other countries. In addition, the Company will probably be called upon to handle merchandise manufactured or produced in countries other than Japan and Germany and in zones in Germany other than the zone under the control of United States military authorities.
In addition to the above-mentioned agreements, the Company has entered into agreements with the War Department, Department of State, and Commodity Credit Corporation covering programs under which surplus raw cotton in this country will be shipped to Germany and Japan to be made into textiles which will be sold to far eastern countries. The Company has also been requested to enter into a contract with Commodity Credit Corporation covering a program under which wool owned by Commodity Credit Corporation will be shipped to Germany to be made into textiles which will be sold by the U. S. Commercial Company. The Company will probably be requested from time to time to enter into other programs of a similar nature, and in addition be requested to enter into other export-import sales programs and arrangements for which specific estimates have not been made but which constitute a part of the Company's budget program. The scope of this program is much broader and far more complex, particularly from a marketing standpoint, than was anticipated by the Company when the budget for the fiscal year 1947 was prepared.

Because of the uncertainty with respect to the number and nature of transactions the Company may be called upon to handle during the fiscal year 1948, it is difficult to predict the volume of business which will be transacted. It would appear, however, from available information, that merchandise having a value of $\$ 292,000,000$ will be made available to the Company from Germany and
charges in connection with the disposition of their merchandise is estimated at approximately $\$ 58,000,000$. Indications are that all of the merchandise will be sold during the fiscal year together with an inventory carried over from the fiscal year 1947 in the approximate amount of $\$ 75,909,000$. It is anticipated that the Company will receive $\$ 425,909,000$ for the merchandise so sold, exclusive of approximately $\$ 12,777,000$ which will be retained by the Company as its service fee in disposing of the merchandise (see exhibit A).

The Company is currently negotiating an agreement with the Office of Military Government in Germany (United States zone) under which it will finance, either by direct purchases or by advances, the procurement of raw materials needed to develop specific export programs in the United States zone of occupied Germany. This arrangement will be temporary pending the merger of the United States and British zones in Germany and the establishment of a more permanent arrangement for the stimulation of German exports. The Company will be reimbursed from the proceeds from sales of exportable finished products manufactured from raw materials procured with the advances. Because of the uncertainty of the number and nature of transactions that may be involved, it is very difficult to estimate the dollar amount of advances that may be made by the Company under this arrangement. It is expected that approximately $\$ 10,-$ 000,000 will be advanced for this purpose in 1947 which will be repaid in 1948. However, it is possible that the amount to be advanced in 1947 will reach $\$ 50,000,000$ which would be repaid in 1948 .

In connection with the operations of the Company covered above, the Department of State, the War Department, and the Department of Agriculture, have urgently requested the continuance of the U. S. Commercial Company in the sales and export-import fields as indicated, and in this regard additional legislation may be necessary to permit the Company to continue to perform the activities covered in this statement after June 30, 1947.

## CUSTODY AND CARE OF SURPLUS PROPERTY

It is contemplated that all U. S. Commercial Company surplus property will be sold during the fiscal year 1947; therefore, no estimate of expenditures for that purpose have been included in the budget estimates for the fiscal year 1948. Should this not materialize, the Company may be called upon to provide temporarily for care and protection of foreign surplus property pending disposition by the Office of Foreign Liquidation Commissioner.

FINAL ACCOUNTING FOR FOREIGN OPERATIONS AND ASSEMBLING OF ACCOUNTING AND OPERATING RECORDS
There will extend into the fiscal year 1948 a large volume of work necessary to arriving at a final accounting for the extensive operations conducted by this Company throughout the world during the war. This involves the movement of records to Washington, the careful analysis and arrangement of such records, and the determination, to the extent practical and possible, as to whether all transactions have been recorded or properly recorded.

## Operating Results

During the fiscal year 1946, programs carried on by the Company after adjustment of reserves for losses, involving a reduction of $\$ 28,565,000$ in such reserves, resulted in a
net profit of $\$ 6,899,000$. For the fiscal year 1947, it is estimated that, after a $\$ 113,694,000$ downward adjustment of reserves for losses, a net profit of $\$ 9,580,000$ will be realized, and that the profit for 1948 will amount to $\$ 8,773,000$ (see exhibit B).

## Financial Condition

The Company has been unable, in some cases, to obtain definitive reports and other pertinent data with respect to certain transactions consummated prior to June 30, 1946, because of the circumstances under which it was necessary to carry on and liquidate wartime activities. These transactions have, however, been reflected in the financial statements on the basis of the best information available, and it is believed that when complete information is obtained, there will be no material change in the net worth of the Company.

No physical inventories of merchandise held for sale were taken for the purpose of this statement; however, in the majority of instances such inventories are covered by warehouse or other receipts held by the Company. It is believed that any differences between book inventories and physical inventories would not be significant. In connection with the program for the importation of commodities from occupied countries the inventory has been established at insured values, since the Company is not required to pay for this merchandise but to account for the proceeds of its sale to the War Department. Other inventories are stated at the lower of cost or market.

With respect to the Company's investment in wartime capital facilities, it is believed that the reserves provided are adequate to cover losses which may be sustained in connection with their disposition; however, since the Company exercises no control over the disposal of such assets, which is a function of the War Assets Administration and Foreign Liquidation Commission, future disposition of the Company's properties may result in additional losses not presently provided for with corresponding changes in the Company's net worth.

The Company has outstanding contracts principally for the procurement of commodities in foreign countries, in the amount of $\$ 3,890,000$, against which unused commercial letters of credit were outstanding in the amount of $\$ 646,000$. The Company has outstanding indemnity agreements issued to steamship companies in lieu of bills of lading for material having an estimated value of \$6,037,000.

Settlement of the joint venture accounts involving preclusive buying activities with United Kingdom Commercial Corporation and the British Ministry of Supply is under discussion and to the extent that such settlement differs from the amount reflected in the financial statements an appropriate adjustment of net worth will be required which it is believed will not be material in amount.

## ACCOUNTS RECEIVABLE

The reserve established against accounts receivable at June 30, 1946, is believed to be adequate to cover probable losses. These accounts are expected to be substantially settled by June 30, 1947. Of the $\$ 46,621,000$ due from others, approximately $\$ 39,982,000$ represented funds due the Company for materials supplied for United Nations Relief and Rehabilitation Administration and lend-lease. This latter amount has been received by the Reconstruction Finance Corporation in fiscal year 1947. Approximately $\$ 5,500,000$ of the total due from others consists of trade receivables.

## INVESTMENTS

The account titled, "Joint account, United Kingdom Commercial Corporation," represents expenditures incurred in the preclusive operations of the Company during the war and is considered to be practically a complete loss for which a reserve has been provided. The balance of investment in development programs represents the Company's investment in the abaca plantations projects in Central America and a reserve for losses has been established in an amount equal to the investment shown.

## OTHER ASSETS

Deferred charges at June 30, 1946, in the amount of $\$ 3,335,000$, appearing under "Other assets," represent almost entirely expenses incurred (reimbursable from proceeds of sales) in connection with the trade with occupied and liberated countries program.

## INVENTORIES

The $\$ 4,146,000$ inventory held at June 30 , 1946, in connection with the South Pacific program will be reduced to $\$ 200,000$ at June 30,1947 , with complete disposal effected during the fiscal year 1948. No loss is anticipated with respect to this program. The $\$ 55,907,000$ inventory held at June 30,1946 , with respect to commodities from occupied countries is expected to increase to $\$ 75,909,000$ as of June 30, 1947, with complete disposal anticipated during the fiscal year 1948. Financial arrangements agreed upon in the handling of these commodities prevents any loss to the Company. The reserve for valuation of inventories represents probable loss to be sustained in the disposal during the fiscal year 1947 of the $\$ 1,425,000$ inventory of critical and strategic supplies.

## ACCOUNTS PAYABLE

Of the $\$ 76,437,000$ due other Government agencies at June 30 , 1946, approximately $\$ 51,000,000$ was due on reverse lend-lease transactions; $\$ 9,500,000$ was due the Department of Agriculture for commodities exported by the U. S. Commercial Company; $\$ 6,500,000$ was due the United States Army and the Foreign Liquidation Commissioner in the Philippines covering the purchase of transportation equipment, tools, foodstuffs, clothing, medical, and other supplies used in the Philippine rehabilitation program in the fiscal year 1946; and $\$ 2,000,000$ was due the War Department on sales of materials received from occupied areas. The balance was due various Government agencies for materials purchased.

Of the $\$ 25,130,000$ due others, $\$ 8,000,000$ was due the British Ministry of Supply on chrome losses; $\$ 5,700,000$
was due the British Raw Materials Mission for tin, and the balance was due United States and foreign suppliers of commodities and services.

All accounts will be paid or otherwise settled during the fiscal year 1947 except an estimated $\$ 20,000,000$ involved in the importation of commodities from occupied countries and it is anticipated that this account will be liquidated during the fiscal year 1948.

## BORROWINGS FROM THE RECONSTRUCTION FINANCE COIRPORATION

It is estimated that borrowings from the Reconstruction Finance Corporation will be reduced by $\$ 72,280,000$ during the fiscal year 1947 and will increase by $\$ 9,527,000$ in 1948.

## CAPITAL IMPAIRMENT

On June 30, 1946, this Company had a capital impairment of $\$ 165,007,000$. It is estimated that such impairment will amount to $\$ 155,427,000$ at June 30,1947 , and to $\$ 146 ; 654,000$ at June 30, 1948. Provision for the Company's operating deficit appears in the financial statement of the Reconstruction Finance Corporation in the form of a reserve against the Corporation's investment in the Company. Any action toward restoration of the U. S. Commercial Company's impairment should consequently be effected through the Reconstruction Finance Corporation.

## Administrative Expenses

This Company does not have an administrative organization of its own, all work being performed by employees of the Reconstruction Finance Corporation on a reimbursable basis.

For the fiscal year 1946 administrative expenses as shown on the statement of income and expenses amount to $\$ 2,453,000$. For the fiscal year 1947 it is estimated that the Company will require $\$ 1,940,000$ for administrative expenses. This amount includes a recommended supplemental estimate of $\$ 760,000$ to permit the Company to carry out expanded activities in regard to the trade programs with occupied and liberated countries. It is estimated that administrative expenses will increase to $\$ 2,104,000$ for the fiscal year 1948. This increase reflects the expansion in commercial transactions with occupied areas (see exhibit B and schedule B-2).

## Language

Language covering administrative expenses for the Company has been consolidated with that of the Reconstruction Finance Corporation. (See p. 1089.)

LANGUAGE FOR THE RECONSTRUCTION FINANCE CORPORATION AND ITS SUBSIDIARIES

Administrative Expenses, Reconstruction Finance Corporation-
Reconstruction Finance Corporation: [Provided, That not] Not to exceed [ $\$ 34,553,000] \$ 49,672,000$ (to be computed on an accrual basis) of the funds of the Reconstruction Finance Corporation, [established by the Act of January 22, 1932 (47 Stat. 5),] shall be available during the fiscal year [1947] 1948 for its administrative expenses and the administrative expenses of the Federal National Mortgage Association[, The RFC Mortgage Company, War Damage Corporation, 1 and the U. S. Commercial Company [, and Rubber Development Corporation]; not to exceed [\$650] $\$ 1,500$ for periodicals and newspapers; health service program as authorized by Act of August 8, 1946 (Public Law 658); use of the services and facilities of the Federal Reserve banks; and not to exceed [ $\$ 115,150] \$ 75,000$ for deposit in the general fund of the Treasury for cost of penalty mail as required by [section 2 of] the Act of June 28, 1944 [(Public Law 364)]: Provided [further], That [all necessary expenses (including services performed on a force account, contract, or fee basis, but not including other personal services except those which the corporations' prescribed accounting system requires to be capitalized or charged to the cost of commodities acquired) in connection with the acquisition, protection, operation, maintenance, improvement, or disposition of real or personal property belonging to said corporations, or in which they have an interest, including expenses of collections of pledged collateral, expenses incurred for services performed outside the limits of continental United States and properly capitalized expenditures, shall be considered as nonadministrative expenses for the purposes hereof:1 as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchases of equipment and supplies, of administrative offices: Provided further, That the limiting amount heretofore stated for administrative expenses shall be increased by an amount which does not exceed the aggregate cost of salaries, wages, travel and other expenses of persons employed outside the continental Uniled States; wages, fees and other expenses, including cost of contract services, of persons who are exclusively engaged in construction, operation, clearance, maintenance and protection of plants, construction, operation, clearance, maintenance and protection of plants,
operating facilities, acquired collateral and other property in which the Corporation has an interest; the expenses of services performed on a contract or fee basis in connection with termination of contracts or in the performance of legal services; and all expenses reimbursable from other Government agencies: Provided further, That the distribution of administrative expenses to the accounts of the Corporation shall be made in accordance with its accounting principles and practices: Provided further, That none of the funds of the Reconstruction Finance Corporation and the subsidiaries thereof shall be used for the custody, maintenance, or disposal of any surplus property except such property as may be owned by and held for disposal by the Reconstruction Finance Corporation or its subsidiaries: Provided further, That no part of the funds of the Reconstruction Finance Corporation or of any subsidiary thereof shall be used to make any purchase or for personal services or to enter into any contract for the use or benefit of any other agency of the Government unless such agency shall have authority in law and appropriations available to make reimbursement for such purchase, personal services, or contract: Provided further, That none of the funds of the Reconstruction Finance Corporation and its subsidiaries shall be used for the making of any loan to any State, any subdivision thereof, any municipality therein, or any public authority, for construction purposes, unless in pursuance of a specific authorization if such loan would increase the aggregate amount of such loans outstanding above [\$100,$000,0001 \$ 125,000,000$.

## NATIONAL HOUSING AGENCY

## INTRODUCTORY STATEMENT

The National Housing Agency was created by Executive Order 9070, issued February 24, 1942, and represented a consolidation of the civilian housing programs previously vested in 16 Government agencies.
The Agency consists of: the Office of the Administrator, which is responsible for assisting in the formulation of Federal housing programs, for supervising the execution of national housing policy, and for over-all coordination of the Agency's activities; the Federal Home Loan Bank Administration, with responsibilities for the supervision of building and loan and similar financial institutions and the establishment of credit facilities to protect their liquidity; the Federal Housing Administration, with statutory powers to insure mortgage loans made by private financial institutions on privately constructed and owned dwellings; and the Federal Public Housing Authority, which provides financial assistance, pursuant to the United States Housing Act of 1937, in the construction and maintenance of low-rent slum-clearance housing projects and supervision in varying degrees over their management, and is also engaged in reerection, management, and disposition of temporary emergency bousing under the veterans housing and the public war housing programs.

The only budget estimate of the Agency herein presented which requires a direct appropriation from the Treasury is that for annual contributions by the Federal Public Housing Authority to local housing authorities in connection with low-rent housing. The remaining
items are subject to a limitation by the Congress on the amount of corporate or other available funds which may be used for the payment of administrative expenses.

The Agency includes several activities which have been defined by section 101 of the Government Corporation Control Act as wholly owned Government corporations subject to the provisions of that act; namely, the Federal Savings and Loan Insurance Corporation, the Home Owners' Loan Corporation, and the United States Housing Corporation, which are administered within the Federal Home Loan Bank Administration; the Defense Homes Corporation; and the Federal Public Housing Authority (or United States Housing Authority) including public housing projects financed from appropriated funds and operations thereof. Accordingly, business-type budget programs have been submitted for these activities. Also included in this presentation are estimates in customary form for the following noncorporate activities of the Agency: Office of the Administrator; the Administrative Department and Federal Home Loan Bank System, of the Federal Home Loan Bank Administration; and the Federal Housing Administration. The unity of the National Housing Agency budget is thus preserved, in accordance with the expressed wishes of the Congress. The programs and estimates are based on presently authorized functions, and make no allowance for additional activities which would result from enactment of new legislation.

## OFFICE OF THE ADMINISTRATOR

The National Housing Administrator is charged by Executive Order 9070 with the direction and supervision of the constituent administrations of the National Housing Agency. The Administrator is responsible for carrying on a broad program of policy, legal, economic, and technical research necessary to assist the President and the Congress in the formulation of long-range Federal housing policies and programs, for providing information to the President and the Congress in the development and consideration of legislation, and for providing information and technical assistance to the constituent units, foreign, State and local governments, the housing industry, and the general public.

The Administrator is responsible under the provisions of the Lanham Act (a) for the development, construction, management, disposition and removal of Federally financed war housing, and (b) for the moving, re-erection, operation, disposition and removal of temporary emergency housing for veterans and the families of distressed veterans and servicemen. The operating phases of these programs are performed by the constituent administrations under the general policy guidance and direction of the Administrator.

The Administrator will in addition undertake, during the life of the veterans' emergency housing program, certain activities by request or direction of the Housing Expediter.

During the first phase of the veterans' emergency housing program-from February 8, 1946, until the

President revised the program in December-the Office of the Administrator carried out the major functions of the Housing Expediter, during a period when the same individual was both Administrator and Expediter. When the veterans' emergency housing program entered its second phase, and the President made separate appointments to the posts of Administrator and Expediter, the single staff was divided functionally.
The functions of the Office of the Administrator required under Executive Order 9070 continued to be carried on before and during this emergency program. The estimates presented cover these functions, presenting the budget figures on a comparative basis for all 3 fiscal years. In accordance with usual budget practice, adjustments have been shown to exclude the obligations for the Housing Expediter, which are presented likewise on a comparative basis for all 3 years under the head, "Salaries and Expenses, Housing Expediter," in the chapter, "Executive Office of the President and Independent Offices" in the Budget.

## Language

## NATIONAL HOUSING AGENCY

Salaries and Expenses, Office of Administrator, National Housing Agency-

Salaries and expenses, Office of the Administrator [and Expediter]: In addition to the amounts available by or pursuant to law (which shall be transferred to this authorization) for the admin-
istrative expenses of the Office of the Administrator, National Housing Agency, in carrying out duties imposed by or pursuant to law, such amounts, not exceeding $\$ 450,000$, as the Administrator determines are required for the expenses of the Office of the Administrator in the performance of administrative and supervisory services relating to the constituent units of said Agency, shall be transferred[,] from the funds available for the administrative expenses of such constituent units for the fiscal year [1947,] 1948 to this authorization for expenditure hereunder, and all such amounts shall be available for [all] necessary expenses of said Office of the Administrator; [periodicals and newspapers (not to exceed $\$ 1,000) ;]$ including the preparation, mounting, shipping, and installation of exhibits; [purchase of sixteen (including one at not to exceed $\$ 1,800$ ), maintenance, repair, operation, and rental of passenger automobiles; temporary employment of persons or organizations, by contract or otherwise, for research work, and for engineering, technical, legal, or other special services, including stenographic reporting services, without regard to section 3709 of the Revised Statutes and the civil-service and classification laws] procurement of temporary or intermittent services of experts or consultants or organizations thereof for research work and for engineering, technical, or other services, including stenographic reporting services, by contract, without regard to the civil-service and classification laws and, except in the case of stenographic reporting services by organizations, without regard to section 3709, Revised Statutes, as amended August 2, 1946; expenses of attendance at meetings of organizations concerned with the work of the Agency[, when specifically authorized by the Administrator; reimbursement for the actual cost of ferry fares and bridge, road, and tunnel tolls; payment of not to exceed 3 cents per mile to employees or others rendering service to the Government for use by them of privately owned automobiles for transportation on official business within the limits of their official station; and purchase of teletype news services (not to exceed $\$ 1,000$ ) ]; claims determined and settled pursuant to the Federal Tort Claims Act, $\$ 5,000$; health service program as authorized by the Act of August 8, 1946 (Public Law 658); and maps: Provided, That the Administrator may, with the approval of the President of the United States, transfer to this authorization or to an authorization of a constituent unit from funds available for administrative expenses of the constituent units or the Office of the Administrator such additional sums as represent a consolidation in the Office of the Administrator or in a constituent unit of any of the administrative functions of the National Housing Agency; but no such transfer of funds shall be made unless the consolidation will result in a reduction in manpower and a savings in administrative expenses, which savings shall not be used for administrative expenses but instead shall be returned to or remain in the funds from which administrative expenses are drawn under this authorization: Provided further, That a report of such transfers and the savings effected thereby shall be submitted to Congress in the annual budget. (42 U.S.C. 1521; 50 U.S.C. 601; Act of July 20, 1946, Public Law 519.)

# FEDERAL HOME LOAN BANK ADMINISTRATION 

## INTRODUCTORY STATEMENT

The Federal Home Loan Bank Administration was created by Executive Order 9070 to administer the functions, powers, and duties of: (1) the Federal Home Loan Bank Board, created by the Federal Home Loan Bank Act of 1932 (12 U. S. C. 1421-1449), and of its members; (2) the board of trustees of the Federal Savings and Loan Insurance Corporation; (3) the board of directors of the Home Owners' Loan Corporation; and (4) certain functions, powers, and duties with respect to the United States Housing Corporation which was established to provide housing in World War I, and which is now fully liquidated.

By Reorganization Plan No. 1 which became effective July 1, 1939, the Federal Home Loan Bank Board, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation were grouped with other agencies in the Federal Loan Agency where they remained until the issuance of Executive Order 9070.

The Federal Home Loan Bank Administration is administered by the Federal Home Loan Bank Commissioner. Under the Commissioner, the operations of the Federal Home Loan Bank System are directed by a governor and those of the Federal Savings and Loan Insurance Corporation and the Home Owners' Loan Corporation are each directed by a general manager.

For the fiscal year 1948, budget estimates are being submitted separately for the following units of the Federal Home Loan Bank Administration:

Administrative Department.
Federal Home Loan Bank System.
Federal Savings and Loan Insurance Corporation.
Home Owners' Loan Corporation.
The estimates for the Federal Savings and Loan Insurance Corporation and the Home Owners' Loan Corporation are being submitted in the form of corporation budget programs, in accordance with the provisions of the Government Corporation Control Act (Public Law 248, 79th Cong.).

## FEDERAL HOME LOAN BANK ADMINISTRATION

Salaries and Expenses, National Housing Agency, Federal Home Loan Bank Administration-

Federal Home Loan Bank Administration: [Provided, That not] Not to exceed a total of [ $\$ 1,501,000] \$ 1,965,000$, to be derived from the special deposit account established under the provisions under the head "Federal Home Loan Bank Administration" in the Independent Offices Appropriation Act, 1944, and from receipts of the Federal Home Loan Bank Administration or the Federal Home Loan Bank Board for the fiscal year [1947] 1948 and prior fiscal years, shall be available during the fiscal year [1947] 1948 for administrative expenses of the Federal Home Loan Bank Adminisadministrative expenses of the Federal Home Loan Bank Adminis-
tration (Executive Order 9070 of February 24, 1942), including health service program as authorized by the Act of August 8, 1946 (Public Law 658), and said Administration may transfer to a separate authorization (which is hereby authorized to be established), for expenditure by the Administration thereunder, not to exceed such amounts, from funds available for administrative expenses of the Federal Home Loan Bank Administration, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation, as said Administration may deem necessary or advisable to be so transferred for administrative expenses of or relating to any
department or unit of said Administration providing services or facilities also to the Federal Savings and Loan Insurance Corporation and the Home Owners' Loan Corporation; and use of services and facilities of the Federal home-loan banks, Federal Reserve banks, Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation and other agencies of the Government, the amounts so derived to be credited upon the books of the Treasurer of the United States in such account or accounts as said Administration may determine: Provided [further], That all necessary expenses in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation and all necessary expenses (including services performed on a contract or fee basis, but not including other personal services) in connection with the handling, including the purchase, sale, and exchange, of securities on behalf of Federal home-loan banks, and the sale, issuance, and retirement of, or payment of interest on, debentures or bonds, under the Federal Home Loan Bank Act, as amended, shall be considered as nonadministrative expenses for the purposes hereof: Provided further, That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of the Administration shall be incurred, allowed, and paid in accordance with the provisions of the Federal Home Loan Bank Act of July 22, 1932, as amended (12 U. S. C. 1421-1449). (Act of July 20, 1946, Public Law 519.)

## ADMINISTRATIVE DEPARTMENT

Prior to July 1, 1944, personnel rendering services to more than one unit of the Federal Home Loan Bank Administration were carried on the pay rolls of the several units, their salaries being apportioned among said units.
On July 1, 1944, the commissioner transferred the major portion of such personnel to an Administrative Department of the Federal Home Loan Bank Administration. The amount which each unit of the Federal Home Loan Bank Administration contributes towards defraying the expenses of the Administrative Department is based upon a calculation of the time rendered by each of the employees of the Administrative Department to each of said units.

Under the provisions of the Federal Home Loan Bank Act approved July 22, 1932 ( 47 Stat. 725), Congress created a reservoir of credit from which home-financing institutions might secure funds to meet the reasonable withdrawal requests of their investors and supplement the savings ordinarily received from individual citizens to meet the home-financing needs of their communities. Twelve Federal Home Loan Banks, which were created under the act, and the building and loan associations, savings and loan associations, cooperative banks, homestead associations, insurance companies, and savings banks which are members of these banks, constitute the Federal Home Loan Bank System. It was designed to stabilize and strengthen the agencies promoting private thrift and individual home ownership. It performs substantially the same function in the field of home mortgage credit which the Federal Reserve System performs as a credit reserve for commercial banks, and the Federal land banks perform in the field of farm finance.

On March 29, 1946, the Federal Home Loan Bank located at Portland, Oreg., and the Federal Home Loan Bank located at Los Angeles, Calif., were combined into one bank located at San Francisco, Calif., which is now known as the Federal Home Loan Bank of San Francisco.

The 11 Federal Home Loan Banks, defined as mixedownership corporations, obtain their funds chiefly from subscriptions to capital stock, the issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists of subscriptions of the United States Government and of member institutions. The Secretary of the Treasury was authorized by the Federal Home Loan Bank Act to subscribe to the capital stock of the original 12 banks up to the total amount of $\$ 125,000,000$. The amount thus subscribed and paid in full aggregated $\$ 124,741,000$, of which $\$ 231,100$ was retired during the fiscal year 1945. During the fiscal year ended June 30,1946 , the sum of $\$ 858,700$ was retired, making the total reduction to June 30, 1946, $\$ 1,089,800$. The Government stock is now held by the Reconstruction Finance Corporation under the provisions of the act of June 25, 1940 (54 Stat. 572). As of June 30, 1946, total paid-in capital stock of the banks amounted to $\$ 203,210,650$ of which $\$ 123,651,200$ was held by the Reconstruction Finance Corporation, and $\$ 79,559,450$ was held by member institutions. It is estimated that during the fiscal year 1947 approximately $\$ 800,000$ will be repaid by the banks to the Reconstruction Finance Corporation, and $\$ 1,250,000$ during the fiscal year 1948 .

## Creation and Purpose

The Federal Savings and Loan Insurance Corporation was created under title IV of the National Housing Act of June 27, 1934 ( 48 Stat. 1246), which has been amended by acts of Congress approved May 28, 1935 (49 Stat. 293), and February 3, 1938 (52 Stat. 8). Insuring savings up to $\$ 5,000$ for each account of investors in approved institutions of the savings and loan type, the act was intended also to provide a stable source of funds for economical home financing. By application of the eligibility standards established by the law and the use of constructive rehabilitation programs where necessary, the Corporation played an important part in restoring confidence in local home-financing institutions and in the larger financial economy.

Like all forms of insurance operations, it is important that the program of the Corporation be sound and selfsupporting. To this end, insured associations pay a definite premium which together with the interest return on investments is intended to build reserves which will be more than adequate to meet prospective losses.

The risks of other types of insurance, such as fire and life, are usually fairly regular and uniform; they lend themselves to convenient forecasting of the possible losses in a given period of time. This facility is not equally present in the insurance of savings. Here the risks are more the result of erratic agricultural, industrial, and economic fluctuations which bring possible sudden and severe pressures upon financial institutions. Under these conditions, it is important that the budget of the Corporation provide sufficient leeway to meet the exigencies of its insurance coverage.
Provision for flexibility in operation is essential both to the Corporation and the public which it serves. Delay in making insurance payments or in effectively meeting problems of insured institutions could easily weaken public respect for insurance and destroy confidence in financial institutions. In order to make this flexibility available when needed, the Corporation was authorized in 1935 (49 Stat. 298) to prevent a default or to restore an insured institution in default to normal operations by means of a loan, purchase of assets, or a contribution.

Originally the Corporation was under the direction of a board of trustees whose membership was identical to that of the Federal Home Loan Bank Board. As a result of Reorganization Plan No. 1, which took effect on July 1, 1939, the Corporation was grouped with other organizations under the Federal Loan Agency. Under the terms of Executive Order 9070, dated February 24, 1942, all of the duties and powers of the Board were transferred to the Federal Home Loan Bank Administration, which was made one of three constituent units of the National Housing Agency. In this reorganization the corporate entity remained intact and its functions and purposes continued without change.

## Financial Organization

The total authorized and issued capital stock of the Corporation amounting to $\$ 100,000,000$ is held by the Home Owners' Loan Corporation. As directed by section 402b of title IV of the National Housing Act (48 Stat.
1246), as amended, the Home Owners' Loan Corporation issued bonds in payment for this stock and is entitled to payment of dividends out of net earnings at a rate equal to the interest rate on the bonds. Dividends were paid from June 27, 1934, to June 30, 1935, since which time they have been accumulated at the rate of $\$ 3,000,000$ per year. The payment of dividends on the capital stock has been deferred until ample reserves could be established and a determination made that the Corporation had net earnings after the provision for losses. Because of the dividend obligation, as well as the basic insurance liability of $\$ 5,771,876,000$ on 2,490 insured savings and loan associations as of June 30, 1946, the Corporation does not contemplate the return of any Government capital during 1948.

For the purpose of carrying out the provisions of title IV of the National Housing Act, authority exists to borrow money and to issue notes, bonds, debentures, or other such obligations upon such terms and conditions as the Corporation may determine. As of June 30, 1946, there were no securities of these types outstanding.

Section 404a of the National Housing Act requires the Corporation to accumulate a reserve fund equivalent to 5 percent of all insured accounts and creditor obligations of all insured institutions. As of June 30, 1946, the total reserves of the Corporation were equal to 1.166 percent of the insured liability, including creditor obligations. Deducting the special reserve for contingencies which is equal to the accumulated dividends on the capital stock, the reserve fund would then be only 0.595 percent. A statement of condition of the Corporation is shown in exhibit C.

## Analysis of Budget Program by Major Activities

The three principal phases of the insurance operations of the Federal Savings and Loan Insurance Corporation, discussed below following certain introductory information, are: (1) extension of new insurance, (2) payment of insurance claims, and (3) rehabilitation of insured institutions. Finally, a discussion of past and anticipated income from insurance operations is presented.

In considering the budgetary requirements of the Corporation for the fiscal year 1948, recognition must be given to the hazards and economic conditions which produce emergencies requiring prompt and effective action in order to limit losses and maintain public confidence. Business fluctuations cannot be accurately predicted and indicate a need for a high degree of flexibility in the organization and operation of the Corporation. Fluctuations in the housing and real-estate market also affect the programs of the Corporation through their effect on the financial condition of insured institutions which are engaged primarily in the financing of small homes.

As a part of its responsibility of encouraging economical home financing, the Corporation insures accounts up to $\$ 5,000$ in Federal savings and loan associations, Statechartered building and loan associations, savings and loan associations, homestead associations, and cooperative banks. Insurance is compulsory for all Federal savings and loan associations and optional for other institutions.

If an insured savings and loan association is in default the Corporation may be appointed as conservator or receiver and as such may:

1. Take over the assets and operate the institution.
2. Take action necessary to place it in a sound and solvent condition.
3. Merge it with another insured institution.
4. Organize a new Federal savings and loan association.
5. Liquidate the assets.

Although the Corporation must, in accordance with title IV of the National Housing Act, be appointed as receiver in the event a Federal savings and loan association is placed in liquidation, appointment as receiver of State-chartered associations rests with the State authorities. If the Corporation should not be appointed receiver, it may:

1. Bid for the assets of the associations.
2. Negotiate for a merger with another insured institution. 3. Make any other disposition deemed advisable.

In order to prevent a default, the Corporation is authorized to make loans to, purchase the assets of, or make contributions to an insured institution.

In the event an insured institution is liquidated, the Corporation must pay insurance up to $\$ 5,000$ on each account as provided by title IV of the National Housing Act.

The activities of the Corporation since 1934 have been primarily in connection with the granting of insurance of accounts to eligible institutions, the payment of insurance, the liquidation of Federal associations declared in default, and the rehabilitation of insured institutions through contributions to prevent a default. Because of this pattern, estimates for 1948, as reflected in the statement of sources and application of funds (exhibit A), have been restricted to these fields. However, consideration must be given to the possibility that circumstances in specific cases may require other action, now authorized by law, instead of the procedure heretofore followed.

## INSURANCE OPERATIONS

1. Extension of new insurance.-As of June 30, 1946, there were 2,490 insured institutions with assets of approximately $\$ 6,744,000,000$, an increase of nearly 22 percent since the beginning of the fiscal year. Although there has been a tremendous increase in assets and outstanding shares of insured institutions during the past few years, there has been no substantial increase in the number of insured institutions. This is principally due to a curtailment of the staff of the Corporation and the maintenance of only essential activities during the war years in keeping with the needs of the emergency period. Now that the country is returning to peacetime activities, the Corporation intends to resume normal operations and, in accordance with the directives of the Congress, to extend the expected protection of insurance to thousands of small investors, and further the development of facilities for adequate and economical home financing.

One of the pillars upon which the success of the housing program in this country rests is adequate and economical financing. At the present time savings and loan associations are making over 35 percent of all the mortgage loans of $\$ 20,000$ or less, the largest block by any type of mortgagee. Estimates indicate that more than 16 billion dollars will be required to finance the veterans' emergency housing program in the next 2 years. To meet
this tremendous increase in demand, savings and loan associations will find it necessary to attract and hold a considerable amount of the savings of small investors. Therefore, the Corporation considers the extension of insurance of accounts as a sound feature of public policy, and believes that through such insurance it is possible to add still further to the confidence of the public in financial institutions of the savings and loan type.
2. Payment of insurance claims.-In the event of default of an insured institution, each insured investor has the option under title IV of the National Housing Act, as amended, of either: (1) A new account in an insured institution not in default, or (2) 10 percent of his insured account in cash and the balance of 90 percent in negotiable non-interest-bearing debentures, one-half due within 1 year and one-half within 3 years from the date of default.

The Corporation has been called upon to make payment of insurance on seven institutions with 7,705 investors' accounts amounting to $\$ 7,557,214$, after eliminating those accounts of investors which were offset against obligations to the institutions. Of these accounts 7,646 or 99.23 percent with balances of $\$ 6,411,842$ or 84.84 percent were fully covered by insurance. The other 59 accounts were partially covered by insurance to a total of $\$ 295,000$. Therefore, the total insurance payable on the 7,705 accounts amounted to $\$ 6,706,842$ or 88.75 percent. As of June 30, 1946, 7,171 accounts in the amount of $\$ 6,695,694$ had been presented and paid, leaving 534 claims of $\$ 11,148$ not yet presented.

During the year ended June 30, 1946, the Corporation paid out $\$ 7,270$ on accounts of investors in several of these institutions which were presented for payment as reflected in the statement of sources and application of funds (exhibit A). Of the four institutions which the Corporation is liquidating, three have been virtually completedawaiting only the expiration of the statute of limitations before effecting the final termination of the receivership. During 1946, liquidating dividends of $\$ 820,900$ were received on the shares assigned to the Corporation at the time of payment of insurance. It is estimated that the losses on shares subrogated to the Corporation will amount to approximately $\$ 314,538$, of which $\$ 25,040$ has been absorbed, $\$ 288,642$ appears as an ailowance for losses on subrogated shares, and $\$ 856$ appears as an allowance for losses on pending and unclaimed accounts in exhibit C as of June 30, 1946.

Turning to the number of institutions which will require assistance in fiscal 1947 and 1948, the program is based upon seven and ten cases respectively. In 1947, provision is made for four liquidations and three contributions; in 1948, six liquidations and four contributions. These are purely estimates- they may be raised or lowered according to economic and financial conditions.
Aside from economic fluctuations, the failure of financial institutions is a fairly normal expectancy. Statistics are lacking for the savings and loan business, but it is significant that during the relatively calm period from 1890 to 1920, not fewer than 30 commercial banks failed each year and that the typical number was nearer 100 . Undoubtedly, the standards of private financial management have been vastly improved, but even so, prudent management of the Insurance Corporation requires a condition of preparedness to meet any possible economic difficulties. As stated previously, this may be particularly true of the fields of housing and real estate.

More tangible evidence of prospective loss cases for the Corporation is found in 126 insured associations with reserves of less than 3 percent of assets. These institutions have total assets of $\$ 303,813,200$ and their average size of $\$ 2,411,000$ compares favorably with that of all insured members. Indicating the attention which has been given to potential trouble cases, it is significant that the number of associations with reserves of less than 3 percent declined from 150 as of the close of the previous year. Indeed, 52 associations were removed from this category during the period, but 28 new cases brought the total to 126 .

Using the average size of these 126 institutions of $\$ 2,411,000$ as a base, and assuming that the insured share liability will aggregate approximately 85 percent of the average assets, it is estimated that based upon past experience the Corporation will disburse $\$ 7,378,000$ in the payment of insurance on four liquidations in 1947 and $\$ 11,785,000$ on six liquidations in 1948. If such disbursements should be made, the Corporation could expect to receive partial liquidating dividends on shares subrogated to it in the process of paying insurance of $\$ 1,001,000$ in 1947 and $\$ 2,115,000$ in 1948. The effect of such actions on the funds of the Corporation is reflected in the statement of sources and application of funds (exhibit A). It is estimated that the assets of the institutions placed in liquidation would aggregate in excess of $\$ 24,000,000$.
3. Rehabilitation of insured institutions.--Since organization the Corporation has saved 54,873 investors in 28 insured institutions from loss of their savings through contributions to remove impairments of capital in order to prevent a declaration of default. These actions required disbursements by the Corporation of $\$ 5,374,125$, of which $\$ 330,555$ has been recovered, leaving a net loss of $\$ 5,043,570$, all of which has been charged against the reserve fund as provided by law. An outstanding commitment as of June 30, 1946, for additional payments to one of these institutions, of $\$ 54,148$ is reflected as a liability in exhibit $C$.

During the fiscal year 1946 the Corporation did not make any contributions to insured institutions. Undoubtedly rising real estate prices and the high level of employment have contributed to this favorable situation. With the exception of the fiscal years 1935 and 1936, which were the first 2 years of operation, the Corporation has never before experienced a year without some insurance losses. During the year 1946 the Corporation obtained recoveries aggregating $\$ 146,693$ on previous contributions to four institutions, all of which appear in the statement of sources and application of funds (exhibit A).
Attention is directed to the difficulties of trying to indicate by preview whether losses will take the form of contributions or of liquidations. The exact determination can be made only by analysis of the facts of specific cases. Where communities would be deprived of essential financial services or where the causes are minor and temporary, there is a natural tendency to favor the more constructive settlement of contribution. More serious conditions or the presence of an excessive number of associations would call for the more drastic remedy of liquidation.

Using the assumptions set forth above under payment of insurance claims, the Corporation may make contributions to three insured institutions in 1947 and four in 1948. Assuming that the lending on inflated real estate values during the past few years will cause a higher percentage of loss to the Corporation in those institutions
which it is called upon to assist during 1947 and 1948, it is estimated that an average loss of 20 percent on the assets of each insurance case would cause the Corporation to disburse $\$ 1,501,000$ in 1947 and $\$ 1,929,000$ in 1948. These amounts are reflected as funds applied in exhibit $A$ and as a part of the expenses and losses of the Corporation in exhibit B.

Consideration should also be given to the fact that there are a number of large insured institutions, the failure of any one of which would seriously affect the estimates presented in the statement of sources and application of funds (exhibit A). Again it must be recognized that losses are minimized through the ability to move rapidly and select the most advantageous course of action, which conceivably could result in decisions to make loans, purchases of assets, or take other action now authorized by law, if circumstances should warrant.
4. Income from insurance operations.--The present annual rate of one-eighth of 1 percent of insured accounts and creditor obligations has furnished the Corporation with a total income from premiums since organization of over $\$ 35,100,000$. Income from invested capital and earnings from other sources have produced additional income of approximately $\$ 44,100,000$. After deduction of operating costs, earnings have been credited to reserves for the purpose of absorbing losses as required by title IV of the National Housing Act.

In the fiscal year 1946 income from insurance premiums and admission fees totaled $\$ 6,118,904$ and interest earned on investments totaled $\$ 3,764,296$. During the first 6 months of calendar year 1946, insured savings and loan associations showed a net gain in savings of $\$ 497,175,000$. This is only slightly in excess of the figure for the comparable period in the previous year, and may indicate that savings are now beginning to level off. To be on the conservative side, the Corporation has estimated that the growth in savings in 1947 will be only 65 percent of the 1946 period. Based upon this assumption the Corporation could expect a premium income of $\$ 7,283,000$. Any funds not needed for the payment of insurance and projected losses will be invested in United States Government obligations or obligations guaranteed as to principal and interest by the United States, and will produce an estimated income of approximately $\$ 3,919,000$ (see exhibit B).

Assuming that the rate of growth of savings in insured institutions will further decline in fiscal year 1948 but that there will be some increase of the aggregate outstanding accounts as a result of the granting of membership to presently uninsured institutions, the Corporation estimates a premium income of $\$ 8,090,000$ in that year. The investment of cash not required for estimated losses and payment of insurance should increase the annual interest earned by the Corporation to $\$ 3,956,000$. The effect of these estimates on the condition of the Corporation is shown in exhibits $A$ and $B$.

## Operating Results

During the fiscal year 1946 the operations of the Corporation resulted in a net income of $\$ 9,856,533$ after provision for all losses and adjustment of valuation reserves. In accordance with section 404a of the National Housing Act, all of this income was transferred to reserves. However, for the fiscal year 1947 it is estimated that the net income will amount to only $\$ 7,518,000$ due to projected losses on contributions of $\$ 1,446,700$ and provisions for
losses of $\$ 1,639,800$ on accounts subrogated or pending and unclaimed in connection with the payment of insurance. Although the assumptions for the fiscal year 1948 indicate estimated losses of $\$ 1,929,000$ because of contributions to prevent default of insured institutions and $\$ 2,459,400$ as provisions for losses on insured accounts, it is estimated that income will be sufficient to meet such losses and provide for additions to reserves. As of June 30, 1948, it is estimated that reserves will aggregate $\$ 81,799,400$ as compared with $\$ 67,350,194$ as of June 30, 1946 (see exhibits B and C).

## Financial Condition

Assets.-As of June 30, 1946, the assets of the Corporation totaled $\$ 170,728,691$ as reflected in exhibit C. Provision has been made for specific reserves for any assets with an actual value below that recorded on the books. Because of the nature of its operations, the assets of the Corporation are held mainly in Government bonds so as to maintain the highest degree of liquidity consistent with safety and the rate of investment return. While cash and Government bonds as of June 30, 1946, were equal to only about 3 percent of the potential liability on the insured accounts and creditor obligations of 2,490 member institutions, it should be recognized that the latter have their own primary holdings which would be available for initial use in the event of trouble. Appraising the overall picture, it is believed that the Corporation should have no difficulty in meeting anticipated losses and payment of insured claims.

Investments.-All funds of the Corporation not required for current expenditures are invested in obligations of the United States, or in obligations guaranteed as to interest and principal by the United States, in accordance with section 402d of the National Housing Act. As of June 30, 1946, the Corporation held Government obligations of $\$ 165,982,721$ (exhibit C) representing 97 percent of total assets. The market value of these securities at that time was $\$ 172,040,281$. Based upon the assumptions previously presented, it is estimated that total investments will increase approximately $\$ 3,635,279$ by June 30, 1948.

Accounts receivable.-The accounts receivable consist principally of insurance premiums and admission fees payable by insured institutions (see exhibit C). Annual insurance premiums at the rate of one-eighth of $1 \%$ of insured accounts and creditor obligations are paid in semiannual installments, one-half at the beginning of each insurance year and the remaining half 6 months later. As of June 30, 1946, this receivable consisted of $\$ 19,025$ in premiums due and payable as of that date and $\$ 1,707,977$ which will become payable during the 6 months' period ending December 31, 1946, plus admission fees of $\$ 30$.

Subrogated accounts.-Title IV of the National Housing Act provides that the surrender and transfer to the Corporation through payment of insurance of an insured account in an association in default shall subrogate the Corporation with respect to such account. To June 30, 1946, the Corporation has been subrogated to accounts aggregating $\$ 6,695,694$, of which $\$ 25,040$ has been charged off and $\$ 5,315,235$ received in liquidating dividends, leaving a balance of $\$ 1,355,419$ as reflected by exhibit C. The allowance for losses on subrogated accounts in the amount of $\$ 288,642$ as of June 30, 1946, represents an estimate of the appraised and indicated losses which the Corporation may absorb on accounts of investors in institutions for which the receiver has not been discharged.

Liabilities.---The Corporation has no outstanding obligations except current liabilities. The undisbursed commitments for contributions to insured institutions reported in exhibit C as of June 30, 1946, were charged against reserves at the time a contribution to prevent a default was approved and will be disbursed upon the establishment of losses and expenses incurred by an insured institution in connection with the disposition of certain slow assets. At the time an insured institution is placed in liquidation the amount which the Corporation may be required to disburse in connection with the payment of insurance is recorded as a liability and also as a contingent asset. As of June 30, 1946, there were $\$ 11,148$ of such insured accounts which had not been presented for payment.

Deferred income.-Premiums billed to insured institutions are credited to a deferred income account and are taken into earnings over the insurance year of each institution.

Reserve fund as provided by law.-As of June 30, 1946, the legal reserve of the Corporation amounted to $\$ 34,350,194$ while the 5 percent reserve of all insured accounts and creditor obligations of all insured institutions as specified by section 404a of title IV of the National Housing Act amounted to $\$ 288,593,800$. The aggregate of the insured accounts and creditor obligations of the 2,490 member institutions amounted to $\$ 5,771,876,000$. Therefore, for each dollar of capital and total reserves the Corporation-has a potential liability of $\$ 34.49$. However, since approximately 94.7 percent of the total amount of all inyestors' accounts in insured institutions is protected by insurance and would be subrogated in the event it should become necessary to make payment of insurance, the Corporation would later recover funds to the extent of the liquidating dividends paid out by the receiverships. To date, recoveries on subrogated shares have amounted to 79.38 percent which with anticipated dividends of 15.94 percent will produce a loss of only 4.68 percent. Of the contributions amounting to $\$ 5,374,125$ made by the Corporation, approximately $\$ 330,555$ or 6.15 percent has been recovered. Under more adverse conditions, the percentage of recovery will naturally not be as favorable, but, even so, there is every evidence of a sound position.

As previously pointed out, it is important to recognize that the protection of insurance is a secondary cushion against loss to investors in insured institutions since the primary protection is afforded by the soundness of the assets and the management of the associations. As of June 30, 1946, the cash and Government bonds held by insured institutions were equivalent to approximately 34.46 percent of their insured accounts and creditor obligations, and combined reserves and undivided profits were 9.4 percent of all their mortgage loans.

These results necessarily reflect the over-all position and there will be a considerable range in the status of the various individual associations. As reported at another point, some 126 associations had reserves and undivided profits equal to less than 3 percent of assets as of December 31, 1945; however, 479 institutions as of the same date had reserves and undivided profits of 10 percent or more of assets.

Special reserve for contingencies.-This reserve amounted to $\$ 33,000,000$ on June 30, 1946, and is equivalent to the unpaid cumulative dividends on the capital stock of the Corporation since June 30, 1935. As of June 30, 1948, the cumulative dividend obligation would amount to $\$ 39,000,000$. However, attention is called to the fact
that the 3 percent bonds issued by the Home Owners' Loan Corporation have been retired for a considerable period of time. As a result, legislation was attempted during the past year which would correct the apparent inequity but the bill which included the proposal failed of final enactment.

## BOND AUTHORIZATION

Although the Corporation has authority to borrow money and to issue notes, bonds, debentures and other such obligations, in accordance with the provisions of title IV of the National Housing Act, the projected program for 1948 as presented in exhibit A does not include the issuance of any obligations. However, in the event of economic dislocations the Corporation may find it advisable to issue obligations for the purpose of providing sufficient funds to meet its insurance liability. Under present authority securities must be sold in the private market which, in a period of stress, may not offer favorable opportunities for the sale of such obligations. Considering these long-term contingencies and recognizing the importance to the public interest of the Corporation's capacity to meet insurance claims promptly, it would seem that it should have the right to sell debentures to the Treasury in times of emergency.

## Administrative Expenses

This expense covers the general administrative staff engaged in carrying out the program of the Corporation. It does not include expenses in connection with the liquidation of insured institutions, liquidation or handling of assets of, or derived from, insured institutions, payment of insurance, and action for or toward the avoidance, termination, or minimizing of losses in the case of specific insured institutions. During the war period the Corporation operated with a minimum staff in keeping with the needs of the emergency period. During the fiscal year

1946 the staff of present divisions of the Corporation consisted of an average of 82.2 positions which with other related costs of administration resulted in a total expenditure of $\$ 477,654$ after reimbursements for services rendered to the Federal Home Loan Bank Administration. In order for the Corporation to resume normal promotional activities by extending the protection of insurance of accounts to thousands of small investors and assisting in the further development of adequate facilities for economical home financing, both of which are of major importance in our present economy, provision has been made in the estimates for slight increases in the staff for 1947 and 1948.

For the fiscal year 1947, the Corporation estimates net expenditures of $\$ 581,000$ for administrative expenses. The authorizing language implementing the Corporation's budget for the fiscal year 1948 includes a limitation of $\$ 670,000$ for administrative expenses.

## Language:

Administrative Expenses, Federal Savings and Loan Insurance Corporation-

Federal Savings and Loan Insurance Corporation: [Provided, That not] Not to exceed [ $\$ 532,000] \$ 670,000$ shall be available for administrative expenses, including health service program as authorized by the Act of August 8, 1946 (Public Law 658), and the use of services and facilities of the Federal home-loan banks, Federal Reserve banks, and agencies of the Government, including Federal Reserve banks, and agencies of the Government, the Home Owners' Loan Corporation, which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expenditures, and expenses in connection with liquidation of insured institutions, liquidation or handling of assets of or derived from insured institutions, payment of insurance, and action for or toward the avoidance, termination, or minimizing of losses in the case of specific insured institutions: Provided [further], That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with title IV of the Act of June 27, 1934, as amended (12 U. S. C. 1724-1730). (Act of Dec. 6, 1945, Public Law 248; Act of July 20, 1946, Public Law 519.)

## Exhibit A-Federal Savings and Loan Insurance Corporation COMPARATIVE STATEMENT OF SOURCES AND APPLICATION OF FUNDS

[Fiscal years ending June 30, 1946, 1947, and 1948]

Note.-Amounts not disbursed for anticipated losses or the payment of insurance will be invested in United States Government obligations or obligations guaranteed as to interest and principal by the United States.

## HOME OWNERS' LOAN CORPORATION

## Creation and Purpose

The Home Owners' Loan Corporation was established under the act of June 13, 1933 (48 Stat. 128), as an emergency instrumentality of the Federal Government for the purpose of refinancing the mortgages of distressed urban home owners and to stem the flood of foreclosures resulting from the unprecedented economic collapse of the early thirties. In 1933 hundreds of thousands of home mortgages were in default. Home owners throughout the country had already lost their properties through foreclosure or were in imminent danger of doing so. Financial institutions were threatened with irreparable losses and deflation was rapidly destroying all property values. As a result Congress created the Home Owners' Loan Corporation and charged it with the responsibility of taking over mortgages on small nonfarm homes, the owners of which were in actual default and who could not otherwise escape foreclosure.
The authority of the Corporation to acquire mortgages of distressed home owners and other obligations and liens secured by real estate in exchange for cash or bonds of the Corporation expired June 12, 1936. Since that time the principal function of the Corporation has been to service the loans and to take over properties where necessary and dispose of them to the best interests of the Corporation. Through this process the Corporation is and has been proceeding with a rapid and orderly liquidation of its assets. Its objectives are to assist as many borrowers as possible to preserve and ultimately own their homes free and clear of debt and to conclude its operations, if possible, without loss to the Federal Government and the taxpayers.

Originally the Corporation was under the direction of a board of directors, the membership of which was identical to the Federal Home Loan Bank Board. As a result of Reorganization Plan No. 1 which took effect on July 1, 1939, the Corporation was grouped with other organizations under the Federal Loan Agency. On February 24, 1942, under terms of Executive Order No. 9070 the board was vacated and all of its duties, powers and functions were transferred to the Federal Home Loan Bank Administration under the direction of a single Commissioner. The Administration was made one of the three constituent units of the National Housing Agency. In this reorganization the corporate entity remained intact and its functions and purposes continued without change.

## Financial Organization

All activities of the Corporation from its inception to date have been financed from funds received from the following sources: (a) Sale of capital stock, (b) issuance of bonds, and (c) income received from its operations.

The Corporation's authorized capital, as provided for in section 4b of the Home Owners' Loan Act of 1933 amounted to $\$ 200,000,000$. The total amount was subscribed and paid for by the Secretary of the Treasury. Under the terms of the original act, bonds guaranteed as to interest only by the Federal Government were authorized for issue in an aggregate amount of $\$ 2,000,000,000$. By an amendment approved April 27, 1934 (48 Stat. 643),
bonds of the Corporation were guaranteed by the Federal Government both as to principal and interest. A subseguent amendment contained in title $V$ of the National Housing Act, approved June 27, 1934 (48 Stat. 1246), increased the authorized issue of bonds to $\$ 3,000,000,000$, exclusive of certain bonds for refunding purposes. By a further amendment in the act of May 28, 1935 (49 Stat. 293), the authorized issue was further increased to $\$ 4,750,000,000$, exclusive of certain bonds issued for refunding purposes.

Of the total amount authorized, $\$ 2,688,215,850$ was exchanged for mortgages, $\$ 100,000,000$ was invested in the capital stock of the Federal Savings and Loan Insurance Corporation under authority of an act of Congress (48 Stat. 1246), and $\$ 701,237,700$ was sold to provide capital, making a total of $\$ 3,489,453,550$ of bonds issued for value. As of June 30, 1946, there remained a balance of $\$ 1,260,546,450$ available for issue.

## Analysis of Budget Program by Major Activities

The liquidating activities of the Corporation at the present time, and until their completion about 1952, consist of the servicing of the remaining mortgage loans and vendee accounts and the acquisition, management, and disposition of such properties as it may be necessary to take over. These two activities are discussed below under the headings, "Mortgage loans and vendee accounts," and "Properties."

The budgetary requirements of the Corporation for the fiscal year 1948 have been calculated on the basis of past experience and predicated upon a continuance of the favorable economic conditions which it has enjoyed during the war period. Full employment, higher wages and incomes, and generally improved business conditions have contributed materially to the gains recorded. However, recognition must be given to changes which might occur in the Nation's economy and the extent to which such changes will affect the Corporation's activities presently restricted to realization and liquidation. The gains which have been made to date should not be lost through inadequacy of manpower or insufficiency of funds with which to accomplish the purposes for which the Corporation was created and to discharge its duties properly and efficiently.

Mortgage loans and vendee accounts.-Mortgage loans are original loans made by the Corporation during its lending period from June 13, 1933, through June 12, 1936. Vendee accounts have resulted from sale of the Corpora-tion-owned properties acquired through foreclosure.

The Corporation has taken full advantage of the improved economic conditions prevailing by encouraging its borrowers:

1. To pay off their indebtedness to the Corporation in full and become the owners of their homes free of debt.
2. To pay more each month on their loan accounts than is called for under their contractual obligations and thus build up in good times a substantial equity to serve as a bulwark against subsequent periods of unemployment or depression.
It has also exerted its best efforts to reduce the number of delinquent accounts to the minimum.

During the fiscal year 1946, payment in full was completed on a total of 102,557 accounts, having an original
dollar value of $\$ 314,283,000$. These accounts consisted of 81,603 original loans having a dollar value of $\$ 239,614,516$ and 20,954 vendee accounts having a dollar value of $\$ 74,668,161$.

Based on the experience of prior years it is estimated that payment in full will be completed on 90,000 loans, both original and vendee, during the fiscal year 1947 and on 75,000 during fiscal year 1948. During the fiscal year 1946, $\$ 29,614,000$ was collected from borrowers in excess of their contractual obligations, exclusive of loans which became fully paid. Accounts delinquent 3 months or more were less at the end of the 1946 fiscal year by 1,688 than the number reported at the end of the preceding fiscal year.

It is essentially the duty and responsibility of the Corporation's borrowers to pay their own taxes, insurance, and the cost of repairs. The establishment of the tax and insurance account for the convenience of many of its borrowers whereby they include with their monthly payments an amount equal to one-twelfth of their aninual taxes and one-thirty-sixth of a three-year insurance premium has materially assisted them in discharging their tax and insurance obligations without undue burden. Funds held for borrowers for these purposes appear in the statement of financial condition under trust and deposit liabilities. (See exhibit C.)

In order to protect its interest the Corporation must pay the taxes and insurance for those borrowers who have net availed themselves of the advantages of establishing a tax and insurance account and are financially unable to meet such payments when due. It is also required to make necessary repairs for those borrowers who are financially unable to do so themselves. During the fiscal year 1946, $\$ 1,284,359$ was paid and charged to borrowers' accounts as advances. Based on the record of past experience and predicated upon the continuation of the same conditions, it is estimated that during the fiscal year 1947 it will be required to pay $\$ 1,270,000$. During the fiscal year 1948 it is estimated that it will be required to advance $\$ 1,225$,000 . (See exhibit A.)

Repayments of principal of loans outstanding, both mortgage loans and vendee accounts, during the fiscal year 1946 amounted to $\$ 232,059,092$. For the fiscal year 1947, it is estimated that such repayments will amount to $\$ 212,623,000$. For the fiscal year 1948, it is estimated that repayments of principal of loans outstanding, both mortgage loans and vendee accounts, will amount to $\$ 183,225,000$. (See exhibit A.)

Section 4 k , of the act, as amended, provides that all payments upon the principal of the loans made by the Corporation shall under regulations made by the Corporation be applied to the retirement of bonds of the Corporation. Certain other receipts, such as amounts received by the Corporation from the repurchase of shares purchased by the Corporation in savings and loan associations, are also applied to the retirement of bonds of the Corporation.

During fiscal year 1946, $\$ 272,982,000$ was applied to the retirement of bonds held by the United States Treasury, and $\$ 10,146,075$ was applied to the retirement of bonds held by the public. During the fiscal year 1947 it is estimated that $\$ 236,000,000$ will be applied to the retirement of bonds held by the Treasury and $\$ 3,112,000$ will be applied against the bonds held by the public. During the fiscal year 1948, it is estimated that the sum of $\$ 202,000,000$ will be applied against the retirement of bonds held by the United States Treasury and $\$ 1,000,000$
will be applied against bonds held by the public. The bonds of the Corporation now held by the public represent issues which have matured and which it is anticipated will be presented for payment during the fiscal years stated. (See exhibit A.)

Properties.-During the fiscal year 1946 the Corporation disposed of 776 properties for which it received $\$ 2,395,672$, of which $\$ 1,692,036$ was represented by purchase money obligations acquired and $\$ 703,636$ was represented by cash. These properties were carried on the books of the Corporation at a capitalized value of $\$ 4,-$ 120,606 . The number of properties remaining on hand totaled 209. During the fiscal year 1947 it is estimated that the number of properties on hand and in process of acquiring title will increase by 122 new acquisitions and decrease by an estimated 150 sales, leaving on hand and in process as of June $30,1947,181$ properties. It is estimated that the Corporation will receive $\$ 350,000$ for the estimated 150 sales, of which $\$ 210,000$ will be represented by purchase money obligations acquired and $\$ 140,000$ will be represented by cash. During the fiscal year 1948 it is estimated that the 181 properties on hand and in process at the beginning of the year will increase by 124 new acquisitions and decrease by an estimated 140 sales, leaving on hand and in process as of June 30, 1948, 165 properties. It is estimated that the Corporation will receive $\$ 318,000$ for the estimated 140 sales, of which $\$ 190,000$ will be represented by purchase money obligations acquired and $\$ 128,000$ will be represented by cash. (See exhibit A.)

After acquisition of property by the Corporation, it is generally necessary to make certain expenditures to put the property in condition for sale. Such expenditures are capitalized. During the fiscal year 1947, the number of properties owned will be materially reduced and it is estimated that $\$ 25,000$ will be required for property expenditures. During the fiscal year 1948 it is estimated that the same amount will be required. (See exhibit A.)
Foreclosure costs which, like property expenditures, are capitalized, amounted to $\$ 63,126$ during the fiscal year 1946. For the fiscal year 1947 it is estimated that $\$ 80,000$ will be required and for the fiscal year 1948, $\$ 70,000$. The estimates here presented are calculated on the basis of the reduced number of loans outstanding. Consideration has also been given to the increasing equity of the borrowers in their homes. (See exhibit A.)
These estimates, as previously stated, have been predicated upon a continuance of favorable economic conditions. It is obvious that any adverse change in the general economic level will materially affect the estimates now submitted for the fiscal year 1948.

## Operating Results

During the fiscal year 1946, the operations of the Corporation resulted in a net income of $\$ 23,884,551$, after provision for all losses and adjustment of valuation reserves. Due to the normal liquidation of the Corporation's assets, it is but natural to anticipate that its net income will be proportionately less each year. For the fiscal year 1947, it is estimated that the net income will amount to $\$ 18,580,000$. For the fiscal year 1948 it is estimated that the operations of the Corporation will result in a net income of $\$ 12,236,000$. The anticipated net income for the fiscal years 1947 and 1948 will decrease the Corporation's deficit from $\$ 81,686,300$ as of June 30, 1946 , to $\$ 50,870,300$ as of June 30,1948 . (See exhibits B and C.)

## Financial Condition

Amounts paid by borrowers into their respective tax and insurance accounts are allowed to accumulate until payments therefrom become due. As of June 30, 1946, the sum of $\$ 20,280,133$ deposited by borrowers, was held for this purpose. As of June 30, 1947, it is estimated that the balance of this fund will be $\$ 18,087,867$ and as of June 30,1948 , it will be $\$ 17,076,867$. A portion of these funds which would otherwise remain idle pending the payment of taxes and/or insurance have been utilized by purchasing short-term investments in United States Government securities. On June 30, 1946, this investment amounted to $\$ 15,000,000$. It is estimated that the same amount will remain invested at the end of the fiscal years 1947 and 1948. (See exhibit C.)
Section 4n of the Home Owners' Loan Act of 1933, as added by the act of May 28, 1935 (49 Stat. 293), authorizes the Home Owners' Loan Corporation to make certain investments, including investments in both Federal and State-chartered savings and loan associations. On June 30, 1946, investments in these associations amounted to $\$ 17,984,250$. During the fiscal year 1947 it is estimated that repurchases of shares by these associations will reduce the amount of this investment to $\$ 11,984,250$. During the fiscal year 1948 it is estimated that further repurchases by these associations will reduce the amount of this investment at June 30,1948 , to $\$ 5,984,250$. (See exhibit C.)

Mortgage loans and vendee accounts.-On June 30, 1946, there were 430,307 mortgage loans and vendee accounts outstanding, amounting to $\$ 735,303,202$. Of this number, 9,717 were delinquent in their payments to the extent of three months or more. As of June 30, 1947, it is estimated that the number of outstanding accounts will be reduced to 340,260 , amounting to $\$ 523,943,201$. At the end of the fiscal year 1948, it is estimated that the number of outstanding accounts will aggregate 265,206, amounting to $\$ 341,937,201$. The above figures represent the value of the outstanding accounts before the application of reserve for losses. (See exhibit C.)
Acquired security.-As of June 30, 1946, there were 209 properties owned and in process of acquiring title, having a capitalized value of $\$ 841,348$. Depending largely upon a continuation of favorable economic conditions during the fiscal years 1947 and 1948, it is estimated that there will be as of June 30, 1947, a total of 181 properties having a capitalized value of $\$ 691,348$. On June 30,1948 , it is estimated that there will be 165 properties owned and in process of acquisition having a capitalized value of $\$ 563,348$. (See exhibit C.)
Interagency proprietary interests.--Section 402b of the National Housing Act, approved June 27, 1934 (48 Stat. 1246), authorized and directed the Corporation to subscribe for the total amount of the capital stock of the Federal Savings and Loan Insurance Corporation. Pursuant thereto, the Corporation invested the sum of $\$ 100,000,000$. It is anticipated that there will be no change in this proprietary interest in 1947 or 1948. (See exhibit C.)
Bonds outstanding.-Section 4 k of the Home Owners' Loan Act of 1933, as amended, provides that all payments upon principal of loans shall, under regulations made by the Corporation, be applied to the retirement of its bonds. In pursuance thereof, funds received, representing amounts realized on the principal of loans, including amounts realized on the sale of properties and repurchases of investments in savings and loan associations, are deposited in tha hand ratiramant fund Of tha tintal amnont of
bonds issued for value, there remained outstanding as of June 30,1946 , the sum of $\$ 743,111,625$ of which $\$ 737,-$ 000,000 was held by the United States Treasury and $\$ 6,111,625$ representing matured issues not yet presented for retirement, was held by the public. Because of the liquidating status of the Corporation, it is not contemplated that it will increase its outstanding bonds during the fiscal years 1947 and 1948. On the contrary, it is estimated that as of June 30, 1947, the total amount of bonds outstanding will be $\$ 503,999,625$. As of June 30, 1948, it is estimated that a total of $\$ 300,999,625$ will be outstanding. (See exhibit C.)

Return of capital funds to the Treasury.-On June 30, 1946, the Corporation's deficit amounted to $\$ 81,686,300$. By the application of net income after provision for losses, it is estimated that this deficit will be reduced to $\$ 63,106$,300 as of June 30, 1947. It is estimated that this deficit will be further reduced to $\$ 50,870,300$ as of June $30,1948$. Under the above stated circumstances, the Corporation does not contemplate the return of any capital in 1947 or 1948. Moreover, since practically all of its acquired properties have now been disposed of, the major portion of its net income will continue to be applied against its deficit. For this reason, it does not recommend that its actual or estimated impairment of capital be restored by the use of Treasury funds. (See exhibit C.)

## Administrative Expenses

This expense covers the staff engaged in over-all supervision of the programs carried on by the Corporation. It does not include expenses (including services performed on a force account, contract, or fee basis, but not including other personal services) in connection with the acquisition, protection, operation, maintenance, improvement, or disposition of real or personal property belonging to the Corporation or in which it has an interest, or legal fees and expenses.

During the fiscal year 1946, the administrative staff consisted of an average of $1,515.3$ positions which with other related costs of administration resulted in the total expenditure of $\$ 5,293,070$. The liquidation of the Corporation's assets permits a reduction in its supervisory staff during the fiscal year 1947 to an estimated 1,365 positions with estimated expenditures of $\$ 4,650,000$, and a further reduction to an estimated 910 positions for the fiscal year 1948 which with other related costs of administration will amount to $\$ 3,875,000$. For further details see statement of income and expense (exhibit B).

## Language

## Administrative Expenses, Home Owners' Loan Corporation-

Home Owners' Loan Corporation: [Provided, That not] Not to exceed [ $\$ 4,650,000] \$ 3,875,000$ shall be available for administrative expenses, including health service program as authorized by the Act of August 8, 1946 (Public Law 658), and the use of services and facilities of the Federal home-loan banks, Federal Reserve banks, and agencies of the Government, including the Federal Home Loan Bank Administration and the Federal Savings and Loan Insurance Corporation, which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expenditures, expenses (including services performed on a force account, contract, or fee basis, but not including other personal services) in connection with the acquisition, protection, operation, maintenance, improvement, or disposition of real or personal property belonging to said Corporation or in which it has an interest, and legal fees and expenses: Provided [further], That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with the Home Owners' Loan Act of 1933, as amended (12 U. S. C. 1461-1468). (Act of Dec. 6, 1945, Public

## FEDERAL HOUSING ADMINISTRATION

## INTRODUCTORY STATEMENT

## Creation and Purpose

The Federal Housing Administration was established as a noncorporate agency June 27, 1934, under provisions of the National Housing Act (12 U. S. C. 1701). Its purpose is to stabilize and strengthen the home mortgage market and stimulate the flow of private capital into the field of home financing through a system of mortgage insurance. It also has a responsibility to improve home financing practices and procedures, and to place financing of home ownership and improvement on a sound and economic basis.
All powers of the agency were vested by the National Housing Act in its Administrator. In 1939, when the Federal Loan Agency was created by the President's Reorganization Plan No. 1, Federal Housing Administration was placed in this Agency where it remained until the issuance of Executive Order 9070 dated February 24, 1942. The latter order placed the Federal Housing Administration in its current position as one of the three main constituents of the National Housing Agency.

At the present time Federal Housing Administration is operating under three titles of the National Housing Act: Title I which authorizes partial insurance by Federal Housing Administration of character loans made for renovation, improvement, and, within certain limitations, construction of both residential and nonresidential properties; title II which provides for insurance of home mortgages up to 80 to 90 percent of the appraised long-term value of both new and existing small homes and new rental housing projects; and title VI which parallels title II but provides for appraisals on a current-cost basis and higher coverage for emergency housing. Title VI was used during the years 1941-45 for insurance of privately financed war housing and was reinstated by the Congress in the spring of 1946 (Public Law 388, 79th Cong.) for insurance of veterans' housing. During normal times Federal Housing Administration operates exclusively under titles I and II. None of the titles of the National Housing Act contemplates that the Federal Housing Administration either build houses or lend money.

## Financial Organization

All operating expenditures of the Federal Housing Administration in connection with the programs authorized by titles I, II, and VI of the National Housing Act are financed from the resources of the four insurance funds; namely, the title I insurance fund, the mutual mortgage insurance fund, the housing insurance fund, and the war housing insurance fund. Receipts of these insurance funds are obtained from insurance premiums, interest on investments, fees, and income from properties which have been taken over by the Commissioner as the result of defaults.

Expenditures of the Federal Housing Administration include: (1) payment of claims for insurance under the modernization and property improvement program authorized by title I of the Act; (2) payment of charges to the several housing insurance funds resulting from acquisition, management, and disposal of foreclosed properties acquired by the Commissioner under the mortgage insurance programs; and (3) administrative expenses of the departmental and field staffs of the Federal Housing Adminis-

Prior to July 1, 1939, no premiums were charged for insurance on title I loans, and losses were paid from funds transfierred from the Reconstruction Finance Corporation. Of the amount of $\$ 165,000,000$ of Reconstruction Finance Corporation funds authorized for payment of claims by the amendments of June 3, 1939, to the National Housing Act, only $\$ 40,315,306$ has been required. Beginning with the fiscal year following the authorization for collection of premiums, all administrative expenses and payments for claims under title I have been met from title I income. Should title I losses exceed the resources of the title I insurance revolving fund, the remaining authorization from the Reconstruction Finance Corporation would be available. The total liability which may be outstanding at any one time plus the amount of claims paid in respect of all insurance granted under title I less the amount collected from insurance premiums and other sources and deposited in the Treasury may not exceed an aggregate of $\$ 165,000,000$. As of September 30, 1946, the estimated liability against this limitation was $\$ 92,047$,131, leaving an available balance of $\$ 72,952,869$. Due to the revolving character of the title I insurance limitation the balance available is increased as insured loans are paid off.

Title II insurance activities were commenced with an initial allocation of $\$ 10,000,000$ from the Reconstruction Finance Corporation to the mutual mortgage insurance fund. A premium, now $1 / 2$ of 1 percent of the declining unpaid mortgage balance, as well as certain fees have been collected from the beginning of the program. A maximum outstanding liability of 4 billion dollars, which the President may increase to 5 billion dollars, has been established by statute for this title. As of September 30, 1946, the estimated outstanding insurance liability of the fund was $\$ 2,996,838,149$, leaving a balance of $\$ 1,003,161,851$. The title-II limitation is also of a revolving character and its balance increases as mortgages are retired. At present title II insuring activities are reflected in the mutual mortgage insurance fund, which covers small homes insured under section 203 of the National Housing Act, and the housing insurance fund, which provides for large-scale housing developments financed under sections 207 and 210. The latter fund was established February 1938 by transfer of 1 million dollars from the mutual mortgage insurance fund. The mutual character of the mutual mortgage insurance fund results from the fact that the National Housing Act requires that mortgages insured under section 203 be grouped with others of similar risk nature and maturity date and that members of the group divide any excess of premiums and fees paid by the group over losses and expenses allocable to the group. The housing insurance fund is not mutual.

Title VI was enacted originally to insure housing constructed during the war years when risks were higher and construction standards generally lower. An allocation of $\$ 5,000,000$ was made from Reconstruction Finance Corporation funds to establish the war housing insurance fund. Premiums, appraisal fees, and other revenues of the fund are similar to those under title II. An initial insurance authorization of $\$ 1,800,000,000$ was made, expiring June 30, 1946. The Veterans' Emergency Housing
of title VI for veterans' housing and increased the insurance authorization to $\$ 3,800,000,000$.

## Activities

The principal activities of the Federal Housing Administration consist of: (1) insurance operations under the National Housing Act; and (2) priority and permit processing under the veterans' emergency housing program.

## INSURANCE PROGRAM

The original budget for fiscal year 1947 was prepared before the formulation of the veterans' emergency housing program and the adoption of certain new legislation designed to implement it. The effect of the veterans' emergency housing program and this new legislation has been to reshape the work program of the Federal Housing Administration for fiscal year 1947. New schedules for fiscal year 1947 have therefore been prepared and are shown in this budget in lieu of those originally approved by the Congress. These revised schedules make no provision for any increase in the amount authorized by the Congress for administrative expenses for fiscal year 1947 despite the heavier work load and increased costs due to the Federal Employees Pay Act of 1946. To absorb these additional costs the very highest production standards have been used.
The original work program of the Federal Housing Administration for 1947 was based on the assumption that approximately 600,000 units of privately constructed housing would be started during the fiscal year, and that the Federal Housing Administration would participate to the extent of 35 percent. This would have resulted in 210,000 commitments for insurance which would have been obtained by processing applications for 314,500 dwelling units. All of this insurance business would have been under title II since authority for title VI was to have expired June 30, 1946. (Processing of new construction applications under title VI was actually suspended by order of the Commissioner in September 1945.) Authority for insurance of existing housing under title II expired June 30, 1946, and no new business under this activity' was provided for in the original 1947 budget. Increased demand for title I loans for modernization and repair was expected, and provision was made for insuring 850,000 such notes. It was also anticipated that demobilization of war production centers would begin early in fiscal 1947 and that a total of 23,700 units of title VI housing would be foreclosed by the Federal Housing Administration during the year.
The veterans' emergency housing program, announced in January 1946, called for starting 2,700,000 homes for veterans before December 31, 1947. Of these, 2,425,000 were to be privately financed. Legislation enacted by the Congress to implement this program provided, among other things, for the extension of title VI to June 30, 1947, and authorized an additional $\$ 2,000,000,000$ of insurance for veterans' housing; and authorized an indefinite extension of authority to insure mortgages on existing housing under title II, section 203.

New construction mortgages.-In line with this changed program the revised estimates for fiscal year 1947 are based on the assumption that 827,000 dwelling units will be started by private industry during the fiscal year 1947 and that participation by the Federal Housing Administration will be 25 percent, or 207,000 . To produce these 207,000 units, it will be necessary to process applications
of rental housing and 163,530 of small homes. Most of this business will be done under the provisions of title VI.

In fiscal year 1948, Federal Housing Administration mortgage insuring activities will be carried on under title II, since authority to insure under title VI will expire June 30, 1947. The estimates for the fiscal year 1948 are predicated on assumptions of $1,200,000$ private starts during the fiscal year and participation by the Federal Housing Administration of 25 percent or 300,000 dwelling units. The estimated number of units for which applications will be processed is 357,500 , consisting of 71,500 dwelling units of rental housing and 286,000 units in 1- to 4 -family homes. In arriving at these figures recognition was given to the fact that restrictions on nonveteran building and on commercial construction have been relaxed. However, it is anticipated that materials will be available in more variety and greater volume, that the supply of labor will be adequate, and that the organization of the construction industry will be such as to enable it to maintain a high level of housing construction and at the same time absorb the demands from the nonhousing field.
The immediate prewar level of Federal Housing Administration participation averaged about 35 percent of all private construction starts. During the war, Federal Housing Administration participation increased under title VI to peak levels, ranging up to 78.5 percent in 1944. During the transitional year of fiscal 1946, a year in which title VI operations were minor, Federal Housing Administration participation declined to 10.5 percent. The revival of the title VI program of insurance for mortgages based on current necessary costs is expected to result during fiscal year 1947 in an increase in the proportion of Federal Housing Administration participation to about 25 percent.
Some considerations which explain the somewhat lower Federal Housing Administration participation in fiscal year 1948 than in prewar years are presented below. With the end of authority on June 30,1947 , to insure new construction mortgages under title VI on the basis of current necessary costs, Federal Housing Administration insuring operations will be restrained under title II by whatever gap remains between Federal Housing Administration valuations made under the title II standards for economic soundness, and construction costs and sales prices influenced by current market conditions. A difference of 10 to 25 percent between the current market prices and Federal Housing Administration valuations on title II mortgages has developed during and since the war in many localities. The rapid rise in construction costs and market prices, induced by shortages of materials and labor and the intensification of housing demand while the volume of residential construction was restricted, have been primarily responsible for this gap between Federal Housing Administration valuations under title II and current market prices. Since the valuation set by the Federal Housing Administration under title II automatically establishes a ceiling on the amount of the mortgage, any gap between sale price and value must be financed by the purchaser through an increase in his down payment if he uses the insured mortgage plan. The abundance of funds in the hands of building and loan associations, banks, and insurance companies may encourage lenders to make a greater proportion of their mortgage loans without mortgage insurance. However, three factors may be expected to operate throughout fiscal year 1948 toward increasing the participation of the Federal Housing Administration insured mortgage program. First, with the success of the emergency housing program in stimulating materials
gap between Federal Housing Administration valuations under title II and current replacement costs should be constantly reduced, either through cost reductions or a stabilization of current costs that can be recognized in title II valuations; second, as the volume of outstanding mortgage debt expands in consequence of new construction in the emergency housing program, increasing caution may be expected to prompt mortgagees to seek mortgage insurance more frequently; and third, the relaxation of controls will make newly constructed housing more readily available throughout the year to nonveteran purchasers who do not have the alternative method of federally guaranteed mortgage financing provided by section 501 of the Servicemen's Readjustment Act of 1944, as amended.
Existing construction mortgages.-The original 1947 estimate did not include any provision for mortgage insurance on existing construction under section 203. On July 1, 1946, Congress enacted legislation (Public Law 480) authorizing the continuance of this activity. Accordingly, the 1947 estimate has been revised on the basis of processing 95,000 applications for mortgage insurance on existing homes under section 203. The basis of this estimate is the recent experience of about 8,000 such applications per month, which is expected to continue throughout the fiscal year. For the fiscal year 1948 this is expected to increase to 120,000 because of the probability of greater activity in the mortgage market during that period as well as the increased demand for insurance by lending institutions because of the expanding amount of the outstanding mortgage debt of the Nation. Another factor which will tend to create a greater volume of business is the anticipated closing of the gap between Federal Housing Administration valuations and current market prices for existing construction.
Title VI mortgages can be refinanced within certain limitations even after the authority to insure new mortgages under this title expires June 30, 1947. Title VI, as amended, also permits insurance after this date of mortgages made in connection with the sale of title VI properties acquired by foreclosure. The first provision will take care of refinancing by mortgagors who wish to add to or improve the equipment in a house, or to add rooms to the small houses constructed during the war. With an increased supply of plumbing and heating equipment, there will be an increasing number of mortgagors who will want to bring their wartime houses up to postwar standards. In the original 1947 budget it was estimated that 9,000 such applications would be received. A revised estimate has been made of 5,000 for the fiscal year 1947. In 1948 this estimate has been increased to 9,000 because of the fact that there will be a greater number of properties eligible for this type of insurance because of the great activity under title VI during the current fiscal year.

Modernization and repair loan insurance.-The emphasis which is being placed on conversion and remodeling for veterans, together with the strain which is being put on existing housing by the present housing shortage, is expected to result in a large demand for title I loans. The original estimate of 850,000 such loans has therefore been increased to 950,000 in fiscal year 1947. In view of the expiration of the insurance provisions of title $I$ on June 30,

1947, no amount has been included in the 1948 estimates for new business under this title.

Foreclosures.--At the time of the preparation of the 1947 estimates, it was anticipated that foreclosures under section 203 would amount to about 240 and under section 603 to 20,000 based upon expected developments resulting from the termination of the war, such as the shifting of population from those areas which were built up primarily for war activities. Since this situation has not developed to the extent anticipated and present indications are that it may not develop during the current and next fiscal years, the foreclosure estimate has been reduced to 100 properties under section 203 and 2,400 properties under section 603 during the current fiscal year. In the fiscal year 1948 the same estimate has been used.

## PRIORITY RATING AND PERMIT PROGRAM

The "HH" priority program, under which the Federal Housing Administration has acted as agent of the Civilian Production Administration and National Housing Agency for the purpose of processing priority applications, was terminated on December 24, 1946. During the period July 1 to December 24, 1946, there were processed under this program, at a cost of approximately $\$ 2,000,000$, some 190,000 priorities applications for the construction of 400,000 dwelling units together with 32,000 applications for conversions and 215,000 applications for repairs and alterations.
Under the new program calling for a general relaxation of controls construction of housing will be authorized by Federal permits. The major restrictions that will be imposed are:

1. The proposed dwelling must be designed for year-round occupancy.
2. The total floor area will be restricted.
3. In the case of rental housing projects maximum rents, excluding charges for services, will be set at a project average not exceeding $\$ 80$ per rental unit. Rentals will also be established for individual houses built for rental purposes. Permits will also be required for conversions and for repairs and alterations. Compliance inspections will be made of houses which were under construction on December 24,1946 , or were started thereafter under priorities assistance.
The estimated work load under the new program for the last half of the fiscal year 1947 will involve the processing of applications 1 or approximately 304,300 units of rental housing, 465,700 for sale or owner occupancy, 37,000 for conversions and 180,000 for repairs and alteratic ns. Approximately 142,000 compliance inspections will be required. The estimated cost of this work is about $\$ 2,500,000$ making a total cost of $\$ 4,500,000$ for the priorities and permit program during the fiscal year 1947.
During the period July 1 to December 31, 1947, on which date the program will be terminated by operation of law, the estimated work load includes applications for about 240,000 rental units, 367,000 for sale or owner occupancy, 24,000 for conversions and 120,000 for repairs and alterations. The estimated cost of this work is $\$ 1,750,000$.

## Operating Results

The following is a summary of insuring operations of the Federal Housing Administration through September 30, 1946.

| Total mortgages and loans insured | Cumulative to date |  |  | Classification | Actual, 1946 | Estimate,1947 | Estimate, 1948 |

## Administrative Expenses

This expense covers the salaries and other expenses of the central and field offices of the Administration. It does not include expenses in connection with the acquisition, protection, completion, operation, maintenance, improvement, or disposition of acquired properties.

For fiscal year 1948 administrative expenses are estimated in the amount of $\$ 24,000,000$ covering the insurance activities and will be financed out of income as follows: Title I insurance fund, $\$ 1,084,000$; mutual mortgage insurance fund, $\$ 17,612,300$; housing insurance fund, $\$ 1,403,700$; war housing insurance fund, $\$ 3,900,000$. The cost of processing permit applications for the Housing Expediter amounting to $\$ 1,750,000$ will be financed out of funds transferred from that office. An additional amount of $\$ 133,700$ included in the total estimated obligations
covers reimbursable services to be performed for other Government agencies.

Details of the administrative expenses are contained in the schedule of obligations which follows.

## Language

## Salaries and Expenses, National Housing Agency, Federal Hous-

 ing Administration-Federal Housing Administration: [Provided, That in] In addition to the amounts available by or pursuant to law (which shall be transferred to this authorization) for the administrative expenses of the Federal Housing Administration in carrying out duties imposed by or pursuant to law, not to exceed [ $\$ 17,624,000] \$ 24,000$,000 of the various funds of the Federal Housing Administration as follows: (1) The mutual mortgage insurance fund; (2) the housing insurance fund; (3) the account in the Treasury comprised of funds derived from premiums collected under authority of section 2 (f), title I of the National Housing Act, as amended (12 U. S. C. 1701); and (4) the war housing insurance fund shall be available for expenditure, in accordance with the provisions of said Act for the administrative expenses of the Federal Housing Administration, including [in addition to mileage at a rate not to exceed 4 cents per mile for travel by motor vehicle, reimbursement for the actual cost of ferry fares and bridge, road, and tunnel tolls, and employees engaged in the inspection of property, servicing of loans, or the liquidation of delinquent accounts, may be paid an allowance not to exceed 4 cents per mile for all travel performed in privately owned automobiles within the limits of their official posts of duty when such travel is performed in connection with such inspection, servicing, or liquidation; and not to exceed $\$ 1,500$ for periodicals and newspapers; not to exceed $\$ 1,500$ for contract actuarial services] purchase of one passenger motor vehicle; and health program as aupurchase of one passenger motor vehicle; and health program as au-
thorized by the Act of August 8, 1946 (Public Law 658) : Provided [further], That [ali] necessary expenses of the Administration (including both services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, protection, completion, operation, maintenance, improvement, or disposition of real or personal property of the Administration acquired under authority of titles I, II, and VI of said National Housing Act, shall be considered as nonadministrative [expenses] for the purposes hereof: Provided further, That, except as herein otherwise provided, the administrative expenses and other obligations, including nonadministrative expenses, of the Administration shall be incurred, allowed, and paid in accordance with the provisions of said Act of June 27, 1934, as amended (12 U. S. C. 1701) [: Provided further, That not to exceed $\$ 3,000,000$ of the funds (after allowance for salaries and expenses as authorized under the heading, "Salaries and expenses, National Housing Agency, Federal Housing Administration') in the account in the 'Treasury comprised of premiums collected under authority of section 2 (f), title I, of said Act, shall be available for the payment of losses under insurance granted under section 2 and section 6, title I, of said Act]. (Act of July 20, 1946, Public Law 519.)

## FEDERAL PUBLIC HOUSING AUTHORITY

## INTRODUCTORY STATEMENT

The Federal Public Housing Authority is one of the three constituent units of the National Housing Agency provided for by Executive Order 9070, issued February 24, 1942, under authority contained in title I of the First War Powers Act, 1941. Under the Executive order, the functions of a number of agencies concerned with defense and low-rent housing were consolidated into the Federal Public Housing Authority, with responsibility for the development and management of housing built with public funds.

The agencies and activities included in the consolidation were-

The United States Housing Authority.
The slum-clearance projects of the Public Works Administration.
Defense housing of the United States Housing Authority.
The division of defense housing of the Federal Works Agency.
The division of mutual ownership of the Federal Works Agency.
The defense housing program of the Public Buildings Administration.
The housing of the War and Navy Departments (except projects on military and naval reservations).
The nonfarm housing of the Farm Security Administration.
Defense housing of the Farm Security Administration.
The Defense Homes Corporation.
The creation and purpose of each of these components may be briefly outlined as follows:

The United States Housing Authority.-The nucleus of this concentration of public housing activities was the low-rent program of the United States Housing Authority established pursuant to the United States Housing Act of 1937 (42 U.S. C. 1401). Under this act the assistance of the Federal Government was pledged to local housing agencies to enable them to build and operate large-scale housing projects to house families in the lowest income groups.

The slum-clearance projects of the Public Works Admin-istration.-The original slum-clearance projects were developed by the Public Works Administration under the National İndustrial Recovery Act and transferred to the United States Housing Authority at the time of its creation.
Defense housing of the United States Housing Au-thority.-In June 1940, Congress passed the defense amendment to the United States Housing Act which authorized the use of United States Housing Authority lowrent and slum-clearance funds to provide housing for defense workers ( 42 U. S. C. 1501).

The division of defense housing of the Federal Works Agency.-The Federal Works Agency originally administered through its own organization, and allotments to other agencies, defense housing activities under the authorizations contained in the basic defense housing act (the Lanham Act (42 U. S. C. 1521)) and the temporary shelter acts (55 Stat. 14, 197, 810).
The division of mutual ownership of the Federal Works Agency.-Projects were developed under the Lanham Act by the Mutual Ownership Defense Housing Division of the Federal Works Agency. It was contemplated that these projects would be sold to nonprofit corporations organized by the residents of the project in accordance with the provisions of the Lanham Act relating to the disposition_of housing.

The defense housing program of the Public Buildings Administration.-Defense housing projects were initiated by the Public Buildings Administration from Lanham Act funds ( 42 U. S. C. 1521). These projects consisted of dormitories for the District of Columbia and family dwelling projects in various States.
The housing of the War and Navy Departments (except housing on military and naval reservations).-The Second Supplemental National Defense Appropriation Act, 1941 ( 54 Stat. $872,883,884$ ), appropriated funds for war housing to the War and Navy Departments. The Lanham Act provided that these funds could be transferred for expenditure in accordance with the provisions of that act. The defense housing transferred to Federal Public Housing Authority excluded units located on military or naval reservations, posts, or bases.

The nonfarm housing of the Farm Security Administra-tion.--These projects were developed out of funds appropriated by the National Recovery Act of 1933 (40 U. S. C. 401-414) and the Emergency Relief Appropriation Act of 1935 (49 Stat. 115). Projects consist of (1) subsistence homesteads, or groups of homes with garden plots for urban families of low income; and (2) greenbelt towns, or model suburban developments for lower salaried office workers.

Defense housing of the Farm Security Administration.Defense housing developed under the Lanham Act (42 U. S. C. 1521) and the Temporary Shelter Acts (55 Stat. 14, 197, 810) in outlying areas was also transferred from the Farm Security Administration. Stopgap housing (trailers) made up a large part of this bousing.

The Defense Homes Corporation.-The Defense Homes Corporation was organized in October 1940, as a Maryland corporation, by direction of the President contained in a letter dated October 18, 1940. The Corporation provided permanent housing in centers of war activity where private capital was unable to provide sufficient housing and where there would be a continuing need for such housing after the war. This housing consisted of large-scale projects, dormitories, and groups of individual houses. Under Executive Order 9070 the functions, powers, and duties of the Corporation are administered by the Commissioner of the Federal Public Housing Authority. The Corporation has been in liquidation since January 1, 1945.

## Subsequent Additions

In addition to the above activities, several important supplemental programs or additions to existing programs were assigned to the Authority subsequent to the original consolidation. These are-.
(a) Federal Public Housing Authority received additional allocations of funds, after the consolidation, authorized by the basic public defense housing legislation known as the Lanham Act ( 42 U. S. C. 1521) adopted October 14, 1940. This act called for the provision of housing for persons engaged in national defense activities in those localities in which an acute shortage of housing existed, or impended, which would impede national defense activities and where private capital could not provide such housing.
(b) Federal Public Housing Authority also received additional allocations authorized by the Temporary Shelter Acts enacted in 1941 to provide temporary and immediate stopgap shelter for defense workers (55 Stat. $14,197,810$ ).
(c) The United States Maritime Commission constructed with its own funds dormitory and family dwelling unit projects to further the defense activities of commercial shipbuilding concerns engaged in Government work. Most of these projects were transferred to Federal Public Housing Authority on June 30, 1944.
(d) In October 1942, the homes conversion program was inaugurated by the Home Owners' Loan Corporation, under the provisions of the Lanham Act, whereby the Government leased existing structures and remodeled them into apartments to house war workers, thus assuring that maximum use would be made of the existing building supply at the same time every effort was being made to construct new war housing. Management of this program was transferred to the Federal Public Housing Authority on August 1, 1944.
(e) Title V was added June 23, 1945, to the Lanham Act (59 Stat. 260 ), authorizing the use of war housing and war housing funds to provide housing for veterans and for families of servicemen. This title was amended December 31, 1945 (59 Stat. 674) and March 28, 1946 (Public Law 336, 79th Cong.), and appropriations were made available for the relocation or conversion of surplus war housing and other facilities for transfer to universities and local bodies for housing veterans.
( $f$ ) On August 18, 1945, the War Relocation Authority transferred to the Federal Public Housing Authority the responsibility for rehousing approximately 10,000 Jap-anese-Americans prior to their reabsorption into normal civilian life.
(g) The National Housing Agency has designated the Federal Public Housing Authority to act in the disposition of surplus housing property of other agencies in accordance with the Surplus Property Act of 1944 ( 58 Stat. 765). The activities under this authorization and the cost thereof are not included in this budget presentation but are reported separately to the War Assets Administration for inclusion in its budget.
(h) On December 28, 1944, the Foreign Economic Administration assigned to the Federal Public Housing Authority the program of producing 30,000 houses for the United Kingdom and 4,500 barracks for France. On VJ-day the United Kingdom canceled the remainder of its program including 8,110 partially completed units which were then declared surplus and later sold to the French Government.

## New Legislation

No allowances for new legislation have been included in this budget presentation.

## 1948 Budget Programs

Under the provisions of the Government Corporation Control Act, budget programs for the fiscal year 1948 are required to be submitted to the Congress by the Defense Homes Corporation, and by the "Federal Public Housing Authority (or United States Housing Authority), and including public housing projects financed from appropriated funds and operations thereof."

The various Federal Public Housing Authority activities have been classified for purposes of budgeting, accounting,
and reporting into seven major groưps based on the purpose of the program and the methods of financing, development, and management, as follows:

1. Public war housing program.-This program includes all the housing under Federal Public Housing Authority administration developed under the basic defense housing act (the Lanham Act), the Temporary Shelter Acts, and the War and Navy Department Second Supplemental National Defense Appropriation Act of 1941, and the United States Maritime Commission projects. It excludes war housing administered under the homes conversion program and the veterans' re-use housing program.
2. Homes conversion program.--This program covers buildings and homes leased by the Federal Government as authorized by the Lanham Act and converted into dwelling units.
3. Veterans' re-use housing program.-Projects included in this program consist of housing constructed for veterans and families of servicemen, as authorized by title $V$ of the Lanham Act. It is limited to (a) housing accommodations made available with funds specifically appropriated to convert or relocate surplus federally owned facilities, and (b) projects developed by local bodies through reutilization of Federal facilities without Federal funds. It does not include accommodations in the public war housing program or homes conversion program which are being made available to and operated for veterans and families of servicemen as authorized under title V.
4. Defense Homes Corporation.-This program includes all the housing developed and operated by this Corporation. The Corporation is in process of liquidation and it is contemplated that its entire holdings will be disposed of by June 30, 1947.
5. United States Housing Act program.--This program includes the low-rent housing program under the United States Housing Act, the war housing developed as a result of the defense amendment, and the slum-clearance projects developed by the Public Works Administration. There is included in the budget submission for this program the annual appropriation request to Congress to cover subsidy payments which the Federal Government has contracted to pay to local authorities. These payments, in the form of annual contributions, assist in financing the operations of locally owned low-rent projects.
6. Subsistence homestead and greenbelt towns program.This program covers the subsistence homestead and greenbelt towns projects constructed by the Farm Security Administration. The program is now in process of liquidation and it is anticipated that all subsistence homestead projects will have been disposed of by sale or by lease and purchase contracts by December 31, 1947.
7. Administrative expense.-This presentation covers the total administrative expense requirements of the Federal Public Housing Authority, with the exception of the Defense Homes Corporation, and distributes these expenses to the various programs on the basis of work load. Much of the effectiveness of the Federal Public Housing Authority arises from the fact that it is operated as a single homogeneous organization, instead of being subdivided into separate organizations to administer each program. The authority for the establishment of a single administrative expense account was contained in the Independent Offices Appropriation Acts of fiscal years 1944, 1945, and 1946, and the Government Corporations Appropriations Act, 1947.

## Creation and Purpose

In order to sustain the defense production program, the Congress during 1940 enacted the following legisfation authorizing the provision of housing for defense workers: The Second Supplemental National Defense Appropriation Act, 1941, Public Law 781, approved September 9, 1940 (54 Stat. 872, 883, 884); and the Lanham Act, Public Law 849, approved October 14, 1940 ( 42 U. S. C. 1521). Subsequently, authorizations and appropriations for temporary shelter for defense workers and in-migrant war workers were provided by Public Laws 9, 73, 140, 375, and 353 ( 55 Stat. 14, 197, 810). These acts provided for financing the required emergency housing entirely from Federal funds in localities in which an acute shortage of housing existed or impended and where such housing would not be provided by private capital.
Executive Order 9070 of February 24, 1942, transferred to the National Housing Agency for administration by the Federal Public Housing Authority nearly all war housing functions previously administered by other Federal agencies except those of the War and Navy Departments with respect to housing located on military or naval reservations. Since this Executive order, the Federal Public Housing Authority has been responsible for development and management of practically the entire public war housing program of the Federal Government.
Public war housing is now being fully utilized to meet the problem of housing veterans in accordance with title V of the Lanham Act which was added June 23, 1945 (59 Stat. 260), and to alleviate the general housing shortage. On June 30, 1946, there were 390,966 dwelling units in active operation which were originally constructed to house war workers. Veterans' and servicemen's families occupied 153,000 family dwelling units on that date, representing 44 percent of all occupied family dwelling units. Veterans' housing provided by the veterans' re-use housing program is covered in a separate budget.

## Financlal Organization

Titles I and IV of the Lanham Act, as amended, authorized $\$ 1,515,000,000$ for the development of war housing, and additional authorizations of $\$ 320,000,000$ were made under Public Law 9, as amended. As of June 30, 1946, allotments amounting to $\$ 1,560,000,000$ had been made to the Federal Public Housing Authority from appropriations under these authorizations.
Section 303 of the Lanham Act, as amended, authorized the use of income derived from project operations to pay expenses for project operation and maintenance. It also provided for the establishment of a $\$ 25,000,000$ reserve for expenses in connection with the disposition operations of projects constructed with Lanham Act funds. This reserve has been established from the net income from project operations and sales proceeds from the disposition of terminated war housing. Of this reserve $\$ 24,000,000$ has been allocated to this program and $\$ 1,000,000$ to the homes conversion program.

## Analysis of Budget Program by Major Activities

The public war housing program is now divided into two major activities: management and disposition. Development has been virtually completed. The scope of the program is shown by the following table:

| Activity | Juqe 30, 1946, actual |  | June 30, 1947, estimate |  | June 30, 1948, estimate |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Projects | Units | Projects | Units | Projects | Units |
| Management: Active | 1,596 | 390, 966 | 1,350 | 341, 045 | 1, 033 | 253, 510 |
| Inactive and in process of disposition | - 566 | 83,850 | 72 | 12,118 | 17 | 5,443 |
| Total under management | 2, 162 | 474, 816 | 1, 422 | 353,163 | 1,050 | 258,953 |
| Disposed of during fiscal year. |  |  | 749 | 121,966 | 372 | 94, 210 |

## Development

The National Housing Administrator, after considering local war housing needs and taking steps to have these needs met insofar as possible through privately financed construction and the utilization of existing housing, assigned public war housing projects for development by the Federal Public Housing Authority. A series of standard plans for war housing construction were developed to provide economies and save time in planning and in obtaining materials and equipment. Most of the projects are of temporary construction and consist of family dwelling units and dormitories. Some trailers and trailer parks were also provided as stopgap housing.

Immediately after the Japanese surrender, the Federal Public Housing Authority instructed its regional offices to cancel all contracts for war housing not under construction, to review those under construction and to suspend operations where savings could be realized. Suspensions were not made in the relatively few cases where small additional obligations were required for completion and the projects would serve continuing military needs certified by the Army and Navy or where they would serve the needs of distressed families of veterans or servicemen in accordance with title $V$ of the Lanham Act. All such construction was completed during the first quarter of fiscal year 1947, but settlement of contracts, land deficiency judgments, and currently unliquidated obligations will result in expenditures of $\$ 13,052,924$ in fiscal year 1947 and $\$ 1,126,470$ in fiscal year 1948 .

## Management Operations

The job of managing the large volume of public war housing constitutes a work load of substantial size and complexity. On June 30, 1946, the Federal Public Housing Authority had management responsibility for 474,816 units under the public war housing program. Management operations are supervised by the Federal Public Housing Authority as a consolidated program under the provisions of section 303 of the Lanham Act, as amended, which reads as follows:

Moneys derived from rental or operation of property shall be available for expense of operation and maintenance ${ }^{*}{ }^{*}{ }^{*}$; Provided, That moneys derived by the Administrator * * * from the rental or operation of any such property may be deposited in a common fund account or accounts in the Treasury: And provided further, That except for necessary reserves authorized by this Act * * * the unobligated balance of the moneys deposited into the Treasury from the rental or operation of such property shall be covered at the end of each fiscal year into miscellaneous receipts.
Section 304 of the Lanham Act permits the Federal Public Housing Authority to operate war housing projects directly or through qualified public or private agencies on a rental, lease, or other basis.

Heavy reliance has been placed upon local housing authorities in the management of war housing. These authorities were operating 250,757 units under lease as of June 30, 1946, approximately 64 percent of the active units. The leases provide for payment to the Federal Public Housing Autbority of the excess of income over expense for the period, or payment by Federal Public Housing Authority of any operating deficit. The lessee deposits receipts in its own bank account, pays all expenses subject to Federal Public Housing Authority budget control, and returns the net revenue for each quarter to the Federal Public Housing Authority.

Where there have been no local housing authorities to assume management, the Federal Public HousingAuthority has developed its own management staff and operates the projects under the direction of its regional offices. On June 30, 1946, it was directly managing 140,209 units.

Pursuant to the Lanham Act, rents in war housing are fair market-value rentals conforming to those prevailing in the local community for comparable accommodations and within approved OPA ceilings. The Lanham Act permits, however, adjusted rents for the benefit of individual families for whom full rent payments would constitute a hardship. Adjustments were at first limited to war workers, but in June of 1945 were extended to distressed families of servicemen and veterans. Rentals for military personnel are based on a national rent schedule established by the War and Navy Departments as authorized by the Lanham Act.

Annual project operating budgets are prepared for both directly managed and local housing-authority-managed projects. They include provision for both projects in active operation and projects in inactive status (i. e., projects held in custody pending either re-use or disposition). The budgets are carefully reviewed and approved in sufficient time to permit issuance of allotments of operating funds and modification of plans of operation prior to the beginning of a new fiscal year.
The budget for fiscal year 1948 is based on the following assumptions:
(a) Approved 1947 budgets provided for a large reduction in vacancy loss to approximately 5 percent for family dwelling units and approximately 10 percent for dormitories and stopgap units. This was based on the assumption that projects showing any considerable vacancy would be partially deprogramed and the vacant units disposed of. It is assumed that the heavy demand for housing will continue for 2 or 3 years at least. Therefore, these conservative vacancy-loss percentages will continue through fiscal year 1948.
(b) Operating expense for fiscal year 1947 shows an increase over fiscal year 1946. This is based upon an increase in the cost of materials and wages. It is estimated that the operating expenses for fiscal year 1948 will remain the same as those for 1947.
(c) Temporary projects needed for housing veterans will be maintained in a condition consistent with the useful life of each project. It is estimated that the useful life of temporary projects will not exceed five additional years. Permanent housing will be maintained in a salable condition.
(d) Operating improvements will be approved only if essential to the health or safety of tenants or if selfliquidating within 2 years or one-half of the probable unspent life span of the project, whichever is the shorter period.
(e) All inactive temporary housing will be transferred to the veterans' re-use housing program or will be otherwise disposed of.
$(f)$ It is estimated that 27,406 units of permanent housing will be transferred to low-rent use and that 38,885 units will be sold or otherwise disposed of during fiscal year 1948. These units will be transferred, sold, or otherwise disposed of while under active management and fully occupied.

The summary income and expense factors for active operations used in developing the estimates are shown in the following table. These factors are based on the preceding assumptions and actual past experience and are expressed in terms of income and expense per unit per month.

The increased expense per dwelling unit per month for active operations noted in the above table is accounted for by increased cost of management and repairs, maintenance and replacements. Increased cost is largely attributed to a general increase in wages and cost of materials and to the elimination of inactive units. Total operating income of $\$ 81,217,700$ is estimated for fiscal year 1947 and $\$ 65,669,800$ for 1948 for leased and directly operated projects combined. Expenses directly related to project operation are estimated at $\$ 32,022,000$ for fiscal year 1947 and $\$ 24,430,600$ for 1948 for both groups of projects, resulting in an estimated net operating income of $\$ 41,239,200$ for fiscal year 1948 and $\$ 49,195,700$ in fiscal year 1947 (before administrative expenses, losses, and charge-offs).

## Disposition

All temporary housing constructed under this program must be removed within 2 years after the end of the emergency. The only exception is such housing as is found, after consultation with local communities, to be still required in the interests of orderly war demobilization or for veterans' needs. Much of this has been transferred to the veterans' re-use housing program under title $V$ of the Lanham Act. This housing must be removed by the local body after it has served its purpose.
Permanent housing projects constructed under this program must also be disposed of as expeditiously as possible in accordance with provisions of the Lanham Act.

Upon determination by the National Housing Administrator that a project can be terminated, the Federal Public Housing Authority undertakes to dispose of the
project by transfer to other Government agencies, by sale or by demolition, or for re-use under the veterans' re-use housing program. Leased land is returned to the owner and FPHA-owned land is declared surplus to the War Assets Administration. Surplus personal property, supplies, and equipment are likewise transferred to the War Assets Administration for disposal.

The following table summarizes disposition of temporary housing for the fiscal years 1947 and 1948:

| Temporary housing | Estimate, 1947 | Estimate, 1948 |
| :---: | :---: | :---: |
| Units disposed of: |  |  |
| Transferred to veterans' re-use housing program_ | 14, 883 |  |
| Trailer sites | 37, 35,074 | 27,919 |
| Total | 87, 227 | 27,919 |
| Asser values written off: |  |  |
| Units transferred to veterans' re-use housing program. | \$136, 665,000 | \$15, 229,000 |
|  | 67,588, 900 <br> 13, 958,000 |  |
|  |  |  |
| Total | 218, 211, 90 | 88, 171,000 |
| Asset values removed by transfer: Owned land transferred to War Assets A dministration | 744, 900 | 691,800 |
| Disposition expenses: Restoration of leased land |  |  |
| Restoration of leased land | $\begin{array}{r} 590,500 \\ 6,154,60 \end{array}$ | $\begin{array}{r} 373,500 \\ 5,898,500 \end{array}$ |
| Total. | 6,745,000 | 6, 272,000 |

In addition to the 14,883 units shown above as transferred to the veterans' re-use housing program during the fiscal year 1947, approximately 57,962 units were physically transferred during the fiscal year 1946. The development cost of these units is included in the write-off of asset values for the fiscal year 1947 since title to these units cannot be transferred to the various local bodies until reerection is completed and all obligations liquidated. For the same reason $\$ 15,229,000$ in asset values of units transferred physically during the fiscal year 1947 will not be written off until the fiscal year 1948. Included in the $\$ 136,665,000$ written off in 1947 are 18,000 trailers classified as personal property and valued at $\$ 22,320,000$. It was the original policy to transfer trailers for use under the veterans' re-use housing program by means of bailment contracts whereby title remained with the Federal Public Housing Authority. It has now been decided that the disposition program will be greatly facilitated by transferring title to the local bodies who in turn must dispose of them in accordance with the provisions of the Lanham Act, when the trailers are no longer required as temporary dwelling units. Proceeds from their ultimate disposal will be retained by the various local bodies.

With the exception of those units transferred to the veterans' re-use housing program, temporary dwelling units will be disposed of by demolition and salvage at an estimated net cost to the Federal Public Housing Authority of $\$ 250$ per unit for family units and $\$ 90$ per unit for other types. The basic assumption as to disposition by demolition and the estimated unit costs are based on a very limited experience in this type of disposition. This experience has indicated that labor costs have increased to the extent that contractors can no longer realize a profit from demolition activities merely from the materials salvaged.

It is estimated that only 20 percent of the leased land returned to its owners will require the expenditure of funds for site restoration and that in such cases restoration expenses will average $\$ 300$ per acre. It is anticipated that the remaining 80 percent of such land can be returned

a site restoration settlement. Site improvements are written off at the time temporary units are demohshed or trailers are removed from the site.

The following table summarizes the anticipated disposition of permanent housing units in fiscal years 1947 and 1948:

| Permanent housing | Estimate, 1947 | Estimate, 1948 |
| :---: | :---: | :---: |
| Transferred to the United States Housing Act program: Units. <br> Asset value | $\begin{array}{r} 9,373 \\ \$ 41,241,200 \end{array}$ | $\begin{array}{r} 27,406 \\ \$ 120,586,400 \end{array}$ |
| Permanent units sold Asset values written off | $\begin{array}{r} 25,3666 \\ \$ 109.073 .800 \end{array}$ | $\begin{array}{r} 38,885 \\ \$ 167,205,500 \end{array}$ |
| Proceeds from sale (gross) | \$71. 025,000 | \$108, 876, 000 |
| Mash | 46, 637, 000 $24,388,000$ | $\begin{aligned} & 57,860,000 \\ & 51,016,000 \end{aligned}$ |
| Disposition expenses | 7,610, 000 | 11,665, 000 |

In general, permanent dwelling units will be disposed of by sale or by transfer to the United States Housing Act program. The transfer of permanent dwelling units to the United States Housing Act program for use in housing low-income families must be requested by the local communities and is subject to the specific approval of Congress pursuant to the provisions of title I, section 4, of the Lanham Act. These transfers will not be reflected in the statement of income and expense since they will involve merely the transfer of the assets at their full development cost from one Federal Public Housing Authority program to another without gain or loss.
It is estimated that the average cost of the units to be sold is $\$ 4,300$, and that the average gross proceeds will be $\$ 2,800$ per unit, resulting in a gross loss of $\$ 1,500$ per unit. This estimate includes the sale of demountable units for off-site use on which the return is estimated to be approximately $\$ 700$ per unit. The smaller returu from this type of sale is the result of the high cost to the purchaser of denounting, transporting, and re-erecting these units. Disposition expenses, exclusive of administrative expense, are estimated at $\$ 300$ per unit for surveys, appraisals, selling expenses, and any essential repairs and reconditioning. This results in a net return after disposition expenses of 58 percent on the original expenditure. It is also anticipated that somewhat over onequarter of the gross proceeds from sales will be in longterm mortgages in fiscal year 1947 and close to one-half in fiscal year 1948. As a general policy, all sales will be for cash. Mortgage notes will be taken by the Federal Public Housing. Authority only when financing from private sources is not available. It is anticipated that most of mortgage notes held by the Federal Public Housing Authority will result from sales of entire projects to mutual-ownership corporations and in a lesser degree to private investors.

## Operating Results

Net project operating income in comparison with total management income increases from 57.6 percent in the 1946 fiscal year to 60.9 percent in 1947 and to 62.8 percent in 1948. The occupancy rate in the 1946 fiscal year fell during the first 3 months and then rose steadily to the high rate which is expected to be sustained throughout the 1947 and 1948 fiscal years. Satisfactory occupancy has counterbalanced the increase in operating expenses resulting from increased costs of labor and materials.

Losses and charge-offs convert net operating income into a net loss in both the 1947 and 1948 fiscal years. As
units transferred to local bodies under the veterans' re-use housing program, for units demolished, for improvements on leased trailer sites returned to their owners, for owned land transferred to War Assets Administration, and for permanent units sold. The last item is partially balanced by disposition proceeds.

## Financial Condition

Reference to the comparative statement of financial condition (exhibit C ) discloses a continual decrease in assets from June 30, 1946, through June 30, 1948. A similar decrease in capital is evident over the same period. These decreases are a direct result of the program forecasts which provide for a continuing reduction in fixed assets through disposition of war housing projects and transfers to other programs for reuse.

Appropriated funds.-Appropriated funds show an increase through fiscal year 1947 and a decrease from that base (schedule A-2). The increase in the 1947 fiscal year is due principally to the realization of disposition proceeds in addition to the income from management activities, whereas the expenditure of funds for construction and operations shows a sharp decline in the same period. The net effect of these transactions is to increase the unexpended balance of appropriated funds at the close of fiscal year 1947 to $\$ 128,001,926$, of which it is anticipated that $\$ 74,824,332$ will be returned to the general fund of the Treasury in fiscal year 1948, as compared to $\$ 20,578,192$ of 1946 fiscal-year collections which are being so deposited in fiscal year 1947. Similarly the balance of $\$ 127,150,905$ at June 30, 1948, includes $\$ 77,269,255$ for return to the Treasury in 1949, based on present assumptions.

Fixed assets. -The balance in fixed assets as evidenced by exhibit C, shows a net decrease of $\$ 357,112,376$ at the
close of fiscal year 1947 over 1946 and a net decrease of $\$ 375,528,230$ at the close of fiscal year 1948 as compared to June 30,1947 . As outlined above this decrease is due to estimated disposition of war housing projects during the two fiscal years.

Revenue receipts.-Reference to schedule A-2 reveals anticipated appropriation receipts of $\$ 126,933,483$ during fiscal year 1947 and $\$ 126,453,748$ during 1948, representing gross receipts from management and disposition activities. Total expenditures for each of these years, including lapsed appropriations and deposits of general fund receipts, are $\$ 86,080,281$ and $\$ 128,217,291$, respectively.

Earned surplus (or deficit).-The earned surplus of $\$ 98,575,345$ at June 30,1946 (exhibit C), becomes a deficit of $\$ 133,127,559$ at June 30,1947 , and a cumulative deficit of $\$ 264,315,959$ at June 30,1948 , as a direct result of losses realized on disposition of assets.

Total capital.-The capital investment of the Government in this program is anticipated to be $\$ 1,012,167,553$, at June 30, 1948, as compared with $\$ 1,646,589,459$ at June 30,1946 . The decrease is due principally to the disposition activities during the 2 years.

## Administrative Expenses

Estimated administrative expenses for fiscal year 1947 consist of $\$ 8,847,400$ for management and disposition operations and $\$ 893,500$ for development operations, the latter being derived from appropriated funds and capitalized as a part of development costs. In fiscal year 1948, $\$ 7,582,100$ is estimated for management and disposition operations.

The basis for distributing these costs is explained in the separate budget program covering estimate of administrative expenses.

${ }^{1}$ This item consists of appropriations made by the act of Oct. 14, 1940, as amended, of moneys 'derived from the rental or operation of housing property, and of moneys derived from the disposition or removal of such property. Appropriations so derived are available for operation and maintenance and disposition or removal of such housing. Moneys so appropriated are made available each flscal year for such expenses, and for the establishment of necessary reserves, as authorized by law, until the end of the fiscal year, at which time any unobligated balances are covered into miscellaneous receipts. (42 U. S. C. 1543.)

## HOMES CONVERSION PROGRAM

## Creation and Purpose

The homes conversion program was originated under the provisions of the Lanham Act (42 U. S. C. 1521).
Its purpose was to provide urgently needed additional housing for war workers by remodeling existing structures such as large single-family residences, warehouses, factory buildings, and similar structures, into multiple unit family dwellings with a minimum expenditure of critical war materials and manpower.

## Financial Organization

Funds appropriated under the Lanham Act, amounting to $\$ 90,077,323$ as of June 30,1946 , were expended for the development of the program. In addition capitalized operating improvements amounting to $\$ 594,650$ have been financed from management income.
Section 303 of the Lanham Act, as amended, authorizes the use of operating income to meet all costs of property operation, including the costs of administration and to establish a reserve for the expenses of disposition. Of the total reserve of $\$ 25,000,000$ so authorized, $\$ 1,000,000$ has been apportioned to this program. Operating income is adequate to meet all operating costs in addition to permitting a substantial return to the Treasury.

## Analysis of Budget Program by Major Activity

The homes conversion program consists of two major activities: Management and disposition. Development has been virtually completed. The scope of the program is shown by the following table:

| Activity | June 30, 1945, actual |  | June 30, 1946, actual |  | June 30, 1947,estimated |  | June 30, 1948, estimated |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Property | Units | Property | Units | $\begin{aligned} & \text { Prop- } \\ & \text { erty } \end{aligned}$ | Units | Property | Units |
| Management | 8,800 | 49,732 | 8,566 | 48,296 | 6, 282 | 35, 296 | 3,798 | 21,352 |
| Leases canceled during year. |  |  | 234 | 1,436 | 2, 284 | 13,000 | 2,484 | 13,944 |

Development.-Development operations consisted of negotiating leases on suitable structures and remodeling them into apartments by the employment of private contractors. The leases generally run for 7 years with the right on the part of the Government to cancel on 30 days' notice. The initial conversion was financed entirely from appropriated funds and the whole amount capitalized. Approximately 50,000 family units were thus provided. Initial development costs averaged $\$ 1,822$ per unit provided. These costs include not only the contract costs of remodeling which averaged $\$ 1,538$ per unit, but also overdue taxes and mortgage payments and rent, taxes, and administrative overhead expenses during the construction period. As of June 30, 1946, only $\$ 169,844$ of the initial development costs were still outstanding, all of which is expected to be paid during fiscal year 1947 .

In order to place and keep the properties in operation, additional expenditures are necessary for equipment, furniture, and for operating improvements such as new heating systems and replacing roofs which became faulty after
initial conversion. In fiscal years 1947 and 1948, respectively, expenditures for these purposes are estimated in the amount of $\$ 304,164$ and $\$ 201,300$ (exhibit A) which are to be capitalized after payment from operating income. These estimates are based on experience during fiscal year 1946 but the total costs decrease as a large number of leases are expected to be canceled during that time.

Management.-Management is conducted through 349 contract managers (real estate management brokers) who operate and maintain the properties and collect rents. From the rental collections, the contract manager pays operating and maintenance costs and retains the commission which is stipulated by contract. The net revenue is remitted to Federal Public Housing Authority accompanied by detailed monthly statements of account in support of their transactions. Rental payments to lessors and mortgagees and for taxes and insurance are paid directly by the Federal Public Housing Authority from the net income received from the contract managers.

From 48,296 dwelling units as of June 30, 1946, the number of units is expected to be reduced by leasehold terminations to 35,296 by the end of fiscal year 1947, and 21,352 units by the end of fiscal year 1948. These units are estimated to provide 501,490 available months of occupancy in fiscal year 1947 and 339,900 in fiscal year 1948 resulting in a return from contract managers of $\$ 12,436,200$ and $\$ 8,439,800$ in the respective fiscal years.
Disposition.-It is the policy of the Federal Public Housing Authority to negotiate cancellation of leases as rapidly as possible in all areas when-

1. The property cannot be made to produce a net profit before charges for amortization of capital cost; or
2. The owner agrees to purchase the unexpired lease term at a satisfactory price which in normal cases is approximately equivalent to the anticipated net income before amortization over the remaining life of the lease.
Whenever cancellations are negotiated, a stipulation is made which requires continued occupancy preference for veterans.
The average expiration date of all leases is September 30, 1950. The disposition program contemplates the cancellation of 2,284 leases comprising 13,000 dwelling units in fiscal year 1947, and 2,484 leases comprising 13,944 dwelling units in fiscal year 1948. By June 30, 1948, this programing results in termination of approximately 55.7 percent of leaseholds which were active as of June 30, 1946.

## Operating Results

During fiscal years 1947 and 1948 operations are estimated to yield a higher rate of return per dwelling unit than in fiscal year 1946. Operating income as shown in exhibit B may be analyzed as follows:

|  | $\begin{gathered} \text { Fiscal year } \\ \text { 1946, } \\ \text { actual } \end{gathered}$ | Fiscal year 1947, estimated | Fiscal year 1948, estimated |
| :---: | :---: | :---: | :---: |
| Operating net income before provisions for amortization and disposition A verage per unit per month | $\begin{array}{r} \$ 6,170,003 \\ 10.44 \end{array}$ | $\begin{array}{r} \$ 5,415,400 \\ 10.80 \end{array}$ | $\begin{array}{r} \$ 3,619,600 \\ 10.66 \end{array}$ |

The low vacancy rate experienced in the last quarter of fiscal year 1946 is expected to continue through fiscal year 1947. During fiscal year 1947, efforts will be directed toward cancelling leases on all properties which have unusually high vacancy rates. Cancellation of leases on these properties is expected to reduce the over-all rate of vacancy to the extent that the anticipated increase in vacancy rate in fiscal year 1948, due to a generally improved housing situation, will be virtually offset.

Net operating income is charged annually to amortize initial development costs over a 7 -year period, and to charge off the unamortized value of leases that are cancelled during the year. As of June 30, 1946, the unamortized value of leaseholds and undepreciated value of equipment and furniture was $\$ 55,860,186$, or an average of $\$ 6,362$ per existing property at that time. Sales of the unexpired leases to property owners are estimated to bring $\$ 4,746,800$ or an average of $\$ 2,078$ in fiscal year 1947 and $\$ 6,585,600$ or an average of $\$ 2,651$ in fiscal year 1948, representing a return of 32.6 percent and 41.6 percent, respectively, on the unamortized value of leases. The return is higher during fiscal year 1948 because the quality of the remaining leases is expected to improve as disposition progresses.

## Financial Condition

As of June 30, 1946, cash and appropriated funds totaled $\$ 11,278,691$ including a balance of $\$ 274,805$ of direct appropriations authorized by the Lanham Act for
development purposes. The development funds are to be used during fiscal year 1947 to settle development accounts payable of $\$ 169,884$ (exhibit C); and the remainder, $\$ 104,921$, will be returned to the Office of the Administrator (schedule A-2). As of June 30, of fiscal years 1947 and 1948, therefore, no development funds are included in the cash and appropriated funds balances.

In accordance with section 303 of the Lanham Act, as amended, all revenue receipts, with the exception of the $\$ 1,000,000$ reserve previously mentioned and operating balances equal to unliquidated obligations at the close of each fiscal year, must be returned to the Treasury. Determination of the amount that can be returned to the Treasury cannot be made until after the close of a fiscal year.

On this basis, $\$ 9,137,961$ from fiscal year 1946 operations will be returned to the Treasury during fiscal year 1947, $\$ 10,263,694$ from fiscal year 1947 operations in the 1948 fiscal year, and $\$ 9,242,530$ from fiscal year 1948 operations in the 1949 fiscal year.

## Administrative Expenses

The administrative expenses as set forth in the income and expense statement (exhibit B) are paid from rental income. Justification of the amounts applicable to this program and an explanation of the basis of cost distribution are contained in the consolidated estimate of Federal Public Housing Authority administrative expenses.

${ }^{T}$ This item consists of appropriations made by the act of Oct. 14, 1940, as amended, of moneys derived from the rental or operation of housing property, and of moneys derived from the disposition or removal of such property. Appropriations so derived are avail-
able for operation and maintenance, and disposition or removal of such housing.

Moneys so appropriated are made available each fiscal year for such expenses, and for the establishment of necessary reserves, as authorized by law, until the end of the fiscal U.S.C. 1543 ).

## VETERANS' RE-USE HOUSING PROGRAM

## Creation and Purpose

In order to alleviate the housing difficulties of distressed families of servicemen and veterans, and veterans attending educational institutions, emergency steps were taken by the Congress. Title V was added to the Lanham Act on June 23, 1945 (59 Stat. 260) and an amendment to that title on December 31, 1945 (59 Stat. 674) authorized funds for providing temporary housing for veterans. An additional authorization was approved on March 28, 1946 (60 Stat. 85). Under the authority contained in title V, the Federal Public Housing Authority is providing temporary housing for distressed veterans and servicemen, by cooperative arrangements with local governments, educational institutions, local public agencies, and nonprofit organizations. This is accomplished by the use, conversion, or relocation of surplus federally owned facilities, such as temporary war housing and military barracks. This re-use program makes temporary housing available sooner and conserves new building materials for permanent type residential construction. Reimbursement is made under title $V$ to those applicants that had incurred relocation expense in providing temporary housing for veterans' re-use prior to the act of December 31, 1945, and for those local bodies desiring to develop their entire projects.

The veterans' re-use housing program consists of (a) those housing accommodations made available with the funds specifically appropriated to convert or relocate surplus federally owned facilities, and (b) projects developed by local bodies through reutilization of Federal facilities without Federal funds. It does not include accommodations in the public war housing program or homes conversion program which are being made available to and operated for veterans and families of servicemen as authorized under title V.

## Financial Organization

On December 28, 1945 (59 Stat. 632), the Congress appropriated $\$ 191,900,000$ to the National Housing Agency to carry out the purposes of title V and supplemented this by an additional appropriation of $\$ 253,727,000$ on April 12, 1946 ( 60 Stat. 88 ), making a total of $\$ 445$,627,000 . A total of $\$ 436,697,814$ is to be transferred to the Federal Public Housing Authority to provide temporary dwelling accommodations for veterans.

## Analysis of Budget Program by Major Activities

The present goal of this program is to provide through Federal financing and within the available funds, approximately 180,800 temporary dwelling accommodations through the re-use of federally owned structures. About $\$ 7,000,000$ will be reimbursed to the local bodies which undertook removal and re-use to provide approximately 9,600 accommodations prior to the appropriation of funds for this program. Some additional 700 accommodations at a cost of about $\$ 850,000$ will be constructed by local bodies desiring to develop their entire projects on a reimbursable basis. The balance of 170,500 federally financed accommodations are being developed by the Federal Public Housing Authority pursuant to contracts with local
bodies. As of September 15, 1946, surplus structures to produce an additional 53,440 accommodations had been allocated to local bodies for development with other than Federal funds also through re-use of federally owned structures. This would make a program of 234,240 accommodations which may be further increased to approximately 255,000 by allocation of additional surplus structures.

On June 30, 1946, there were 95,400 federally financed accommodations allocated but not under construction, 90,879 under construction and 12,688 ready for occupancy, making a total of 198,967 . This total was subsequently cut back to 180,800 accommodations in order to keep the program within available funds. This budget was prepared at a time when approximately 164,000 of these accommodations were scheduled to be ready for occupancy by December 31, 1946, and the total program to be under management by March 31, 1947. Final clean-up, inspection, and settlements with contractors will probably not be concluded until June 30, 1948. Of the additional 53,440 nonfederally financed accommodations 28,000 were under construction on September 15, 1946.

The following table summarizes scheduled progress in this program:

In addition to the units being provided by this program, approximately 250,000 families of veterans and servicemen were being housed as of the end of July 1946 in other projects under Federal Public Housing Authority jurisdiction.

The activities under this program may be divided into two major categories-development operations and management operations.

## DEVELOPMENT OPERATIONS

The Federal Public Housing Authority accepted applications from eligible local bodies and based upon established quotas entered into contracts to provide such housing as was available within fund limitations. As of August 2, 1946, a total of 2,510 local bodies had requested veterans housing. Of these, 2,040 specified the need for 522,800 accommodations and the remaining 470 did not specify the number required. It was necessary therefore, to establish regional quotas to effect an equitable national distribution of the funds and accommodations available. Separate regional quotas were established for educational institutions and local public agencies by the National Housing Agency and were applied by the regional direc-
tors of the Federal Public Housing Authority in collaboration with the former's regional representatives. The available accommodations are divided about equally between educational institutions and local public agencies.

The contracts generally provided for the Federal Public Housing Authority to obtain, move and re-erect the surplus structures, connect the dwellings to off-site utilities, make available surplus equipment, pay all related costs including transportation, and transfer title to the local body. Local bodies agreed to provide without cost to the Federal Government the site, streets, and off-site utilities, to manage the projects and generally to pay to the Federal Public Housing Authority the net income earned from the operation of the property. It had been anticipated that some local bodies would undertake entire development operations on a reimbursable basis, but very few have applied on this basis. The contract also provides that the local body will remove the structures, in strict adherence to section 313 of the Lanham Act and regulations thereunder, after they have served their temporary purpose.

Allocations of surplus federally owned facilities were made to local bodies desiring to develop temporary veterans' housing projects under this program with other than Federal funds.

Completion of the program has been seriously retarded by shortages of the materials and equipment required to place the re-used structures in livable condition. Costs have risen substantially over original estimates as the result of: (1) inability to secure the contemplated number of surplus temporary war housing structures, because of continued high occupancy, thus leading to a greater use of surplus military structures, (2) delays in delivery of materials and equipment and lack of adequate labor supply, and (3) increase in labor rates and in costs of materials and equipment.

## MANAGEMENT OPERATIONS

The veterans' re-use housing program is managed by participating local bodies. The management functions of the Federal Public Housing Authority are of an advisory nature. In the planning of the project and prior to the signing of the contract, the Federal Public Housing Authority develops with the local body a project management plan covering tenant eligibility, rentals, allowable charges to expense, and methods for determining the net operating income. The project management plan is incorporated into the contract. Standards for housing accommodations are also jointly established between the Federal Public Housing Authority and the local body. Rent schedules are reviewed by the Federal Public Housing Authority to determine conformance with contract provisions and to establish a basis for evaluating project income. Upon request the Federal Public Housing Authority will provide consultative services to the local bodies and institutions to give them the benefit of its broad experience in the management of temporary housing.

Most of the projects will realize net operating income which, under the contract with the local body, must be returned to the Federal Housing Public Authority. Three alternative methods of determining net operating income are used in approved management plans:
(1) Net operating income as determined from actual operations. The management section of the contract defines allowable expense charges, and permits the establishment of a repairs, maintenance and replacement re-
project operation when such expenses are expected to be higher than could be met from current rental income. Under this plan the Federal Public Housing Authority receives from the local body annual statements of income and expense which must be audited in order to verify the net operating income remitted in accordance with the contract terms.
(2) Net operating income after deduction of a fixed annual operating expense per unit. The fixed expense is estimated from experience on similar projects to cover normal operating costs plus a reserve for repairs, maintenance and replacements. Under this plan only the income of the project need be audited by Federal personnel.
(3) Fixed rent based on estimated net operating income. This method is preferred for use where previous experience of the local body with housing management provides a basis for estimates.

A limited number of projects, chiefly of dormitory type at educational institutions, are expected to operate at a net loss. The management section of contracts for such projects provides that the local body assumes any deficit from operations.

All net returns on nonfederally financed projects will be retained by the local bodies who likewise must finance any operating deficits. The Federal Public Housing Authority confines its activities on these projects to a review of the rent schedules and tenant eligibility requirements.

The estimated income from management is $\$ 8,345,000$ in fiscal year 1947 and $\$ 11,586,000$ in fiscal year 1948.

No provision is made under the present contracts for repayment to the Federal Government of the original costs of the structures. As authorized by section 303 of the Lanham Act, income is available for administrative expenses and the balance is returned to the United States Treasury as partial payment of the cost of relocating such projects. These estimates are based on the assumption that the net operating income on family dwelling units will be approximately $\$ 8$ per unit per month, with no net income from stop-gap or dormitory units. Expenses of project operation in this program will be high since it consists of many small projects. Rental levels will be relatively low because rental adjustments are permitted in hardship cases.

## Operating Results

The anticipated financial results of aperations during the fiscal years 1946, 1947, and 1948 are shown in exhibit B. After giving effect to anticipated project net income, projected operations result in net program losses amounting to $\$ 360,645,142$ and $\$ 54,340,626$ respectively for the fiscal years 1947 and 1948. The bulk of the direct program costs are incurred during the fiscal year 1947. Project costs are carried on the books of account as assets until title to the projects is transferred to the local bodies, at which time the assets are written off and the loss is recorded. Title is not transferred until all project contract obligations are liquidated. Therefore, the cost of some housing units completed and available for occupancy in the fiscal year 1946 will be charged to the cost of the program during the fiscal year 1947. A similar situation is anticipated for fiscal year 1948.

## Financial Condition

The financial condition of the program as of June 30, 1945, 1946, 1947, and 1948 is shown in exhibit C. The following are brief comments with respect to the more

Accounts receivable (due from local bodies).-The terms of contracts with local bodies specify that net income is payable to the Federal Public Housing Authority after the close of each Federal fiscal year. Therefore, $\$ 8,345,000$ and $\$ 11,586,000$ are shown as accounts receivable at the close of fiscal years 1947 and 1948, respectively.
Land, structures, and equipment.-This asset item represents housing in various stages of preparation for re-use and for which title has not been transferred to local bodies. It is valued at the amount of expenditures for direct costs of reutilization and is exclusive of the original cost of the structures, which were transferred from other programs or agencies without reimbursement. The amount of $\$ 33,291,650$ shown as of June 30, 1947, represents housing, title to which is still retained by the Federal Public Housing Authority at that date. As of June 30, 1948, title to all housing will have been transferred to local bodies.
Paid-in capital.-This item includes both the appropriated development funds and the receipts from operating the projects. Both these sources of funds are combined in the expended and unexpended appropriations. The cumulative receipts from operations are shown separately. As of June 30, 1947, expended appropriations will be
$\$ 405,110,716$ consisting of expenditures from appropriated development funds of $\$ 405,000,238$ and expenditures of $\$ 110,478$ from revenue receipts. As of June 30, 1948, expenditures will be $\$ 438,632,414$ consisting of $\$ 436,697$,814 of development appropriations, the total available for expenditure by the Federal Public Housing Authority, and $\$ 1,934,600$ of revenue receipts. The unexpended balance as of June 30, 1948, consists entirely of revenue receipts.

## Administrative Expenses

There is no separate organization for the administration of this program within the Federal Public Housing Authority: The administrative expenses shown in exhibit $\mathbf{B}$ are the proportionate share of total Federal Public Housing Authority administration costs attributable to the development and management operations under this program. The basis for this distribution is defined in the consolidated estimate of Federal Public Housing Authority administrative expenses. It is estimated that the administration of this program during fiscal year 1948 will require $\$ 2,311,400$ from development funds and $\$ 937,400$ from management funds.

${ }^{1}$ This item consists of appropriations made by the act of Oct. 14, 1940, as amended, of moneys derived from the rental or operation of housing property, and of moneys derived from the disposition or removal of such property. Appropriations so derived are available for operation and maintenance and disposition or removal of such housing. Moneys so appropriated are made available each fiscal year for such expenses, and for the establishment of necessary reserves, as authorized by law, until the end of the fiscal year, at which time any unobligated balances are covered into miscellaneous receipts. (42 U. S. C. 1543.)

## DEFENSE HOMES CORPORATION

## Creation and Purpose

The Defense Homes Corporation was formed by incorporation under the laws of the State of Maryland on October 23, 1940, by direction of the President of the United States contained in a letter addressed to the Secretary of the Treasury on October 18, 1940. This letter referred to provisions of the title "Emergency fund for the President" contained in the Military Appropriations Act 1941, approved June 13, 1940, and the Naval Appropriation Act 1941, approved June 11, 1940, and ordered allocation of $\$ 6,700,000$ from the act of June 13, 1940, and $\$ 3,300,000$ from the Act of June 11, 1940, to the Federal Loan Administrator. These funds were to be used for the purchase of the entire capital stock of a housing corporation. The capital stock of the corporation so formed was required to be held by the Federal Loan Administrator for the benefit of the United States.
By Executive Order 9070 dated February 24, 1942, the President of the United States directed that the Defense Homes Corporation, its functions, duties, and powers be consolidated with certain other agencies into the National Housing Agency and that the capital stock be transferred from the Federal Loan Administrator to the National Housing Administrator. Transfer of the capital stock was effected on February 27, 1942, and the Corporation has functioned in accordance with this order as a part of the Federal Public Housing Authority.

The purpose of this Corporation was to provide for construction and financing of living quarters of a permanent nature in defense areas which were to be rented to defense workers during the emergency and thereafter sold at prices corresponding to those of comparable quarters in areas adjacent to the projects erected or financed.

## Financial Organization

The Corporation has an authorized capital stock of $\$ 10,000,000$ all of which is held by the National Housing Administrator. Allocations to the Federal Loan Administrator from the emergency fund for the President were originally used to purchase the capital stock, but these funds were subsequently reimbursed from Lanham Act appropriations authorized to be used for that purpose (42 U. S. C. 1523). The Corporation was authorized to borrow not to exceed $\$ 65,750,000$ from the Reconstruction Finance Corporation. Such borrowings are repaid from the net income from operation of the properties after provision of adequate reserves and the payment of all expenses, and from proceeds of disposition. The Corporation is authorized by its charter to make loans for construction of houses secured by mortgages or deeds of trust.

ANALYSIS OF BUDGET PROGRAM BY MAJOR ACTIVITIES
The Corporation is in liquidation. Its program now includes two major activities, management and disposition, as shown in the following table:

| Activity | June 30, 1946, actual |  | June 30, 1947, estimated |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Projects | Units | Projects | Units |
| Management | 241 | 8,619 |  |  |
| Disposed of during year |  | 1,490 | 24 | 8,619 |

Included in the property holdings of the Defense Homes Corporation are 286 unimproved lots and 4 tracts of land amounting to 286 acres which will also be disposed of during fiscal year 1947.
Development.-The construction program was completed by June 30, 1945, at which time it consisted of 25 projects totaling 10,964 units. Correction of construction deficiencies and payment of final invoices required $\$ 238,162$ in fiscal year 1946 and is estimated to require $\$ 108,000$ during fiscal year 1947.
Management.-Management activities are carried out on a fixed fee basis through contract managers using their own employees.
At the beginning of the fiscal year 1947 a total of 23 properties containing 8,475 units were being operated. It is estimated that all will be disposed of by June 30 , 1947.

Operating income and expenses as shown in exhibit A are expected to result in the following net income from operations:

|  | Fiscal year 1947 |
| :---: | :---: |
| Operating income | $\$ 5,614,916$ |
| Operating expenses. | $4,152,761$ |
| Net operating income before provision for depreciation. | 1,462,155 |

Disposition.-Present plans contemplate the disposition of the entire holdings of 8,475 units in fiscal year 1947. Indications are that the Corporation will be able to realize a return to the Government of over $\$ 5,000,000$ after liquidation.

Funds provided by the disposition of properties are estimated as follows:

|  | Fiscal year 1947 |
| :---: | :---: |
| Estimated sales price of property sold (exhibit A) ......................... <br> Less sales expenses. | $\begin{array}{r} \$ 61,228,525 \\ 96,000 \end{array}$ |
|  | 61, 132, 525 |

All estimates of recoveries are based on current market levels, bids received to date, and present legislative provisions governing disposition.

Loans receivable amounting to $\$ 808,229$ as of June 30 , 1946, are expected to be repaid in full or disposed of for at least face value as shown in exhibit A.

## Operating Results

Operating income before provision for depreciation has been discussed under the heading of management. These results can be related to net income per exhibit $B$ as follows:

|  | Fiscal year 1947 |
| :---: | :---: |
| Net operating income before provision for depreciation | \$1,462, 155 |
| Less: Depreciation and other reserves...---.---..--- | 1,139,573 |
| Net operating income. | 322,582 |
| Add: Profit on sales of property. | 2, 240, 283 |
| Net profit (exhibit B). | 2,562, 865 |

## FINANCIAL CONDITION

The cost value of land, structures, and equipment totaled $\$ 63,438,705$ at June 30,1946 . The program of disposition previously mentioned is expected to completely liquidate this amount by June 30, 1947.

Notes payable to the Reconstruction Finance Corporation at June 30, 1947, are shown in exhibit C at $\$ 49,416,006$. These notes carry an interest rate of $2 \frac{1}{2}$ percent. Schedule C-1 presents estimates of borrowings in fiscal year 1947 of $\$ 108,000$ and repayments of $\$ 49,524,006$ which will fully repay all notes by June 30, 1947. The amount to be borrowed is needed to correct deficiencies in construction due to wartime conditions.

Proceeds of sale over and above all liabilities and capital are estimated in the amount of $\$ 5,275,330$. The Corporation is to deposit this amount in the general fund of the Treasury in fiscal year 1947.

The statutes of the State of incorporation require that corporate existence be maintained for 2 years after date of liquidation. Therefore, though the Corporation expects to have sufficient funds on hand to retire all capital stock in fiscal year 1947, it will be required to retain a small amount to continue the corporate existence. Retirement of $\$ 9,999,000$ is planned in fiscal year 1947. The balance, together with $\$ 67,300$ of surplus, is to be retained in fiscal 1948.

Of the surplus, $\$ 17,300$ is estimated as required in fiscal year 1948 for final expenses, and the balance, together with the capital stock, is to revert upon expiration of the statutory waiting period.

## Administrative Expense

This expense covers the general supervisory and the supporting staff engaged in the over-all administration of the program carried on by the Corporation. During the fiscal year 1946 the staff included in schedule B-3, performing the functions set forth in this budget, amounted
to 22 man-years of personal service. Salaries and other related costs of administration amounted to a net expenditure of $\$ 97,866$.

During fiscal year 1947 the administrative expense is estimated at $\$ 109,070$ or $\$ 10,670$ in excess of the 1947 authorization contained in Public Law 519 of the Seventyninth Congress. This increase is due to the 1946 pay act (Public Law 390, 79th Cong.), absorption of this cost being impracticable with a small organization and with no expectation of turn-over.

The disposition program has, since its inception, resulted in a heavy additional work load on the staff, especially in fiscal and accounting work. To avoid a temporary increase in the staff during the peak period of management and disposition operations, basic records are being maintained on disposition. Personnel now engaged in accounting for operations will be shifted to the work of formalizing these records as sales of operating properties are consummated.

Although the program of the Corporation is scheduled to result in liquidation by June 30,1947 , there will remain the work of closing out records, documentation of the Corporation activities from inception to liquidation for transfer to the National Archives, transfer of mortgage paper to the Reconstruction Finance Corporation or other purchasers, and other miscellaneous activities involved in corporation liquidation. It is estimated that eight employees, including the officers of the Corporation, will be needed for approximately 3 months of fiscal year 1948. The cost will amount to $\$ 12,233$ for such personal services and other expenses amounting to $\$ 67$ for a total of $\$ 12,300$. The balance of $\$ 5,000$ is required in fiscal year 1948 for the payment of final audit costs, classified as nonadministrative expense.

## Language

## Administrative Expenses, Defense Homes Corporation-

Defense Homes Corporation: [Provided, That not] Not to exceed $[\$ 98,400] \$ 12,300$ shall be available for administrative expenses, which sball be on an accrual basis [and which expenses may include temporary employment of persons or organizations, by contract or otherwise, for legal or other special services, without regard to section 3709 of the Revised Statutes and the civil-service and classification laws; reimbursement for the cost of ferry fares and bridge, road, and tunnel tolls; and allowance of not to exceed 3 cents per mile for official travel in privately owned automobiles by employees within the limits of their official stations; and reimbursement at not to exceed 5 cents per mile to personnel serving without compensation from the United States for expenses of travel performed by them in privately owned automobiles away from their official stations]: Provided [further], That such administrative expenses shall be exclusive of interest paid, depreciation, properly capitalized expenditures, repayment of loans, property operating expenses (including project inventory), charges to surplus and operating reserve, and cost of sales of commodities, services, and property: Provided further, That advances of funds made in connection with the operation of housing properties are hereby authorized. (Act of July 20,1946 , Public Law 519.)

## UNITED STATES HOUSING ACT PROGRAM

## Creation and Purpose

The United States Housing Authority, which was transferred to the Federal Public Housing Authority under Executive Order 9070, was created on September 1, 1937, by Public Law 412 ( 42 U. S. C. 1401) to provide low-rent housing for families of low income who could not otherwise afford decent, safe, and sanitary dwellings. This basic act, known as the United States Housing Act of 1937, authorized the Authority to make loans to local public housing agencies to aid in financing slum clearance and the development of low-rent housing projects. To bring rents in the completed dwellings within financial reach of families in the lowest income groups, the Authority was empowered to make limited annual contributions, provided that the community would also make contributions toward the operation of the projects.
An important amendment to this act was added by Public Law 671 (42 U. S. C. 1501), approved June 28, 1940. Under this amendment the unused portion of the borrowing authorization provided in the United States Housing Act of 1937 was made available for the construction of permanent housing to be used primarily for housing war workers for the duration of the war. In accordance with this purpose, the projects initiated under Public Law 671 have been occupied chiefly by war workers who pay prevailing rents for comparable accommodations. On a Presidential finding that such projects are no longer needed for housing war workers, however, the projects are required to be converted to low-rent use. Most of these projects have already received Presidential approval for conversion, and the remaining projects are to be presented to the President for approval by January 1, 1947. As private housing becomes available for occupants whose incomes exceed the maximum allowable for tenants in low-rent projects, these occupants will be replaced by lowincome families. These projects will then be on a basis of operation comparable to that of Public Law 412 projects.
An addition to the locally owned low-rent program is possible through the sale of federally owned permanent war housing projects developed under the Lanham Act, Public Law 849 (42 U. S. C. 1521), approved October 14 , 1940. The Lanham Act requires the disposition of all war housing projects but permits transfers for low-rent use only when specifically authorized by Congress. In keeping with this provision of the act, it is the intention of the Federal Public Housing Authority to request authority of Congress for such transfers in those cases in which a community, through its local housing authority, desires to take over' a project suitable for low-rent housing and the local government approves and supports the request.
Besides the locally owned projects which constitute the greater part of the low-rent program, the Federal Public Housing Authority has under management some federally owned projects. The main group of federally owned housing projects consists of those developed by the Public Works Administration Housing Division, which were subsequently transferred to the Authority by the President under a provision of the United States Housing Act. This transfer was effected under Executive Order 7732,
dated October 27, 1937. The Public Works Administration projects were constructed by the Federal Government with appropriated funds, and consequently the capital cost of these projects is not repayable. They are operated in the same manner as locally owned low-rent projects, except that they are not eligible for annual contribution subsidies nor are any necessary since no debt service is required.
Another group of federally owned housing projects consists of Public Law 412 projects in Ohio. The Federal Government had to take title to these projects as a result of a decision by the Ohio Supreme Court, which denied tax exemption and eliminated the local contributions required under the United States Housing Act. These projects will return to local ownership when State legislative action is taken to permit their operation in accordance with the Housing Act.

Federally owned projects also include a small group of Public Law 671 projects. In order to expedite construction of housing urgently needed during the war, it was necessary for the Federal Government to engage in some direct construction under Public Law 671. These projects will be sold to local housing authorities for low-rent use, but it is not possible to finance the sale of the entire group of projects because of the legislative limitation on the anount of annual contributions that may be committed. As long as the Public Law 412 Ohio projects and the Public Law 671 projects remain under Federal ownership, they are not eligible for annual contributions.

## Financial Organization

The Authority was created as a "body corporate of perpetual duration" with $\$ 1,000,000$ in capital stock subscribed by the Treasury. The United States Housing Act, as amended, provides a borrowing and a lending power amounting to $\$ 800,000,000$ and limits the total annual contributions for which the Authority may contract to a maximum of $\$ 28,000,000$ per year. Funds borrowed by the Federal Public Housing Authority under Public Law 412 were to be used for loans to local housing authorities covering not more than 90 percent of the development cost of individual housing projects. The Public Law 671 war amendment permitted loans to cover 100 percent of the development cost or direct construction by the Federal Government.
By June 30, 1946, the Authority had borrowed \$398,000,000 , of which $\$ 38,000,000$ had been repaid, leaving $\$ 360,000,000$ outstanding. Long-term loans of $\$ 348$,097,000 had been made to local housing authorities, of which $\$ 71,045,000$ had been repaid by refunding operations and $\$ 1,408,000$ by advance repayments. Another $\$ 2,507,217$ was outstanding on short-term advance loan notes. Thus, the outstanding balance of loans receivable from local housing authorities, as of June 30, 1946, amounted to $\$ 278,151,217$, as shown in exhibit C. An amount of $\$ 41,120,540$ had been used for direct Federal Public Housing Authority construction of war housing projects under Public Law 671. From private sources local housing authorities had obtained $\$ 376,990,000$. This amount is made up of $\$ 147,594,000$ in bonds and $\$ 229$,396,000 in temporary loan notes, secured by a Federal

Public Housing Authority pledge to redeem them at maturity, if necessary. The total paid-in capital of $\$ 195,596,284$ shown in exhibit C, as of June 30, 1946, consists of capital stock amounting to $\$ 1,000,000$, funds and property transferred from the Public Works Administration Housing Division amounting to $\$ 140,746,284$, and cumulative appropriations for the payment of annual contributions on low-rent projects in an amount of $\$ 53,850,000$.

## Analysis of Budget Program by Major Activities

The major activities under the United States Housing Act program may be divided into two groups: (a) those connected with the development and capital financing of low-rent projects; and (b) those concerned with the management of projects and the payment of subsidies in the form of annual contributions. Within each group of activities, locally owned and federally owned projects are discussed separately as they present different types of problems.

During the war the attention of the staff of the Federal Public Housing Authority was focused on providing and managing housing for war workers. With the end of the war, it is the intention of the Authority to provide the low-rent program with the services necessary to assure compliance with the basic objectives of the United States Housing Act.

This submission contains a request for an appropriation of $\$ 8,300,000$ for the payment of annual contributions for projects which are locally owned and operated. Since the projects are not the property of the Federal Public Hcusing Authority, the operations of these projects are reflected in the financial statements of the United States Housing Act program only to the extent of the loans made to the local housing authorities and the amount of annual contributions payable. This narrative, however, includes tables supporting the estimate of annual contributions. The development and managementoperations oi the federally owned projects in the United States Housing Act program are covered fully in the financial statements.
The table shown below lists the number of developments and units in the United States Housing Act program as of June 30, 1946, and contains a forecast of additions and progress in the program as of June 30, 1947 and 1948. The changes in the status of the program are brought about primarily by the partial reactivation of the deferred urban and rural projects and by the expected transfer of Public Law 849 projects to low-rent use. As a result of an analysis of all deferred projects, a partial reactivation of urban and rural projects is scheduled in fiscal years 1947 and 1948. Of the total deferred projects, 22 developments, consisting of 1,985 units, are expected to be reactivated in fiscal year 1947 and 106 developments,'consisting of 12,807 units, in fiscal year 1948.

DEVELOPMENT AND CAPITAL FINANCING OPERATIONS
Locally owned projects-Public Laws 412 and 671.Under the United States Housing Act, low-rent housing activities are primarily a subject for local determination and control, the role of the Federal Government being limited ckiefly to providing technical and financial assistance. Accordingly, title to locally owned projects and primary responsibility for their operation rests with local housing authorities established under the laws of the political subdivisions in which they are located.

Federal assistance can be provided only under conditions prescribed by the United States Housing Act. The local housing authority is required to establish that the locality has a real need for public low-rent housing; ascertain that at least 10 percent of the development cost can be financed from private capital; provide, by tax exemption, a local subsidy equal to at least one-fifth of the annual contribution to be provided by the Federal Public Housing Authority; assure the elimination of one slum unit for every new dwelling unit built; observe statutory dwelling cost limitations; and provide for an economical system of management operations. The local authority must also select and acquire a suitable site, secure proper zoning, prepare site and architectural plans, award the construction contract to the lowest responsible bidder, and supervise and inspect construction.

In furnishing technical and financial assistance, the Federal Public Housing Authority is responsible for reviewing and inspecting the operations of local authorities to assure compliance with the act. The Authority exercises this responsibility by enforcing the provisions of contracts under which it provides loans and agrees to pay annual contributions. The loans to local authorities bear interest at the rate of one-half of 1 percent above the going Federal rate on long-term bonds. Financial aid in the form of short-term loans is made available to local authorities during the early phases of project development. Permanent financing, which normally occurs after construction is approximately 75 percent complete, is accomplished by the sale of two types of bonds-A bonds sold to private investors on the basis of competitive bids and B bonds sold to the Federal Public Housing Authority for the balance of the development cost. The entire loan and annual contribution authorizations provided in the act have been committed, but actual construction of a number of projects was deferred because of the war.

Approximately 90 percent of the short-term financing requirements during fiscal years 1947 and 1948 will be supplied by private investors at lower interest rates than the Federal Public Housing Authority is required by law to charge. The Authority's participation in short-term financing is estimated to be $\$ 2,396,750$ in fiscal year 1947 and $\$ 3,568,250$ in fiscal year 1948, as shown in exhibit C.

Refinancing of Public Law 412 projects now permanently financed will have a net effect of reducing the Federal Public Housing Authority's B bond holdings by $\$ 21,610,000$ in fiscal year 1947 and $\$ 2,200,000$ in fiscal year 1948. Net refunding operations are expected to decline to $\$ 2,200,000$ during fiscal year 1948 since the Authority's efforts, insofar as permanent financing operations are concerned, will be directed toward the permanent financing of Public Law 671 projects. By June 30, 1948, it is anticipated that all the Public Law 671 projects with fiscal years beginning October 1 and January 1 will be permanently financed and also 75 percent of those with fiscal years beginning April 1 and July 1. This will result in the purchase of $\$ 5,256,000$ of $B$ bonds during fiscal year 1947 and $\$ 15,036,000$ in fiscal year 1948.

Emergency corrections of war-caused construction deficiencies will also necessitate the purchase of an estimated $\$ 300,000$ of B bonds during fiscal year 1947 and $\$ 300,000$ during fiscal year 1948. It is estimated, further, that there will be permanent financing of reactivated projects in fiscal year 1948 which will result in the purchase of $\$ 176,000$ of B bonds.

The net effect of all anticipated transactions in B bonds shown in exhibit C will be a decrease of $\$ 16,054,000$ as of June 30, 1947, and an increase of $\$ 13,312,000$ as of June 30, 1948.

Federally owned projocts.-No new direct development by the Federal Public Housing Authority is contemplated, but there will be an estimated expenditure of funds amounting to $\$ 3,575,782$ in fiscal year 1947 and $\$ 1,437,492$ in fiscal year 1948 tor the liquidation of outstanding obligations, for final contract settlements, and for emergency corrections of war-caused deficiencies.

## Management Operations

Locally owned projects-P Public Laws 412 and 671—As in the case of development operations, the local housing authority is required in the management of these projects to observe certain rules established under the basic act. These rules are concerned with the eligibility of tenants, with rent-income ratios, with standards of physical operation and maintenance, and with accounting practices. The Federal Public Housing Authority reviews management operations of the local housing authority and audits its books to assure compliance with these rules.

Low-rent projects owned by local authorities have three sources of income: (a) rental income, (b) a contribution by the local community, and (c) a Federal annual contribution. Rental income of the projects depends upon the rent-paying ability of the tenants, since a system of graded rents varying according to family income is generally used. In normal low-rent operation, the rental income is not sufficient to meet the project expenses, including operating costs, payment of interest, and amortization of capital costs. This deficit is met by the local and Federal contributions. The contribution by the local community is in the form of tax remission or exemption and represents the difference between full normal taxes and the actual payment in lieu of taxes made by the project. The remainder of the deficit is met by the Federal Government, with the limitation that the local contribution must be at least 20 percent of the Federal contribution and the limitation that the Federal contribution may not exceed the maximum contribution set in the contract for financial aid. In all cases the maximum Federal contribution that may be paid is an amount equal to the yield at the going Federal rate of interest at the time the contract is made plus 1 percent upon the total development cost of the project.
The Federal annual contribution actually paid equals the operating deficit of a project, after giving effect to the local subsidy. The operating deficit is determined by subtracting the total income from the total expenses. Total expenses consist of operating expenses; amounts reserved in the period for repairs, maintenance, and replacements, and for vacancy and collection losses; and the amounts expended for debt service and payments in lieu of taxes. The contribution is paid in the first or second quarter following the close of the project fiscal year in which the deficit was incurred. A project fiscal year may close at the end of any quarter of the year and is determined by the date borne by the bonds.

It should be noted, therefore, that annual contribution requirements in a particular Federal fiscal year are determined by the local operating experience in varied project fiscal years. For example, the annual contribution requirements in the Federal fiscal year 1948 are determined by the operating experience of projects with fiscal years ending either March 31, June 30, September 30, December 31, 1947, or March 31, 1948, depending on the annual contribution date of the particular project. This means that local project operating experience occurring before the beginning of a Federal fiscal year largely deteimines the annual contribution requirements for that year.

In fiscal year 1948 there will be 271 statutory projects which are owned by local housing authorities and which are eligible for annual contribution payments. These projects, each of which is covered by a separate contract for financial aid, consist of 512 developments and 144,729 dwelling units. The only locally owned projects under management which are not eligible for annual contributions are Public Law 412 projects not under permanent financing and Public Law 671 projects which have not reached 95 percent occupancy.

The appropriation requested for annual contribution payments in fiscal year 1948 is $\$ 8,300,000$. In prior years, the unexpended balance of the appropriation of the previous year was made available to reduce the appropriation request; but, under the terms of the Legislative Reorganization Act of 1946 (Public Law 601, 79th Cong.), the unexpended balance of the appropriation for the preceding year must now be returned to the Treasury. The appropriation request this year, therefore, covers the entire estimated contribution requirements in fiscal year 1948. Actual annual contribution payments in fiscal year 1946 were $\$ 7,136,735$, and contributions in fiscal year 1947 are estimated at $\$ 6,700,000$.
The following table shows the major items making up the annual contribution requirements:

| Item | Actual, 1946 | Estimate,1947 | Estimate,1948 |
| :---: | :---: | :---: | :---: |
| public law 412 projects |  |  |  |
| Total expense Total income. | $\begin{array}{r} \$ 37,537,602 \\ 30,650,449 \end{array}$ | $\$ 37,583,805$ $31,323,738$ | \$37, 004, 191 30, 382, 511 |
| Expense less income | 6,887, 153 | 6, 260, 067 | 6,621,680 |
| Accounting adjustments | * 1388,837 42,818 | $\begin{array}{r} * 39,773 \\ 86,577 \end{array}$ |  |
| Operating contributions | 6, 791, 134 | 6, 306, 871 | 6,621, 680 |

| Expense less income | *1,936, 302 | *1,463, 026 | 735, 245 |
| Accounting adjustments. <br> Operating gain | $\begin{array}{r} 12,377 \\ 1,957,610 \end{array}$ | 1, 517,056 | 644,597 |
| Operating contributions | 33,685 | 54, 030 | 1, 379, 842 |
| Noncontinental contributions. | 3,801 |  |  |
| Contributions deferred from last fiscal year. $\qquad$ | 7,905 |  |  |
|  | 45,391 | 54, 030 | 1, 379, 842 |
| Total contributions payable | 7,136, 735 | 6,700, 000 | 8,300,000 |
| Prior year balance available in 1946. 1946 balance available in 1947 | $* 2,841,754$ $3,305,019$ |  |  |
| 1947 balance to be returned to Treasury. |  | $\begin{array}{r} 3,905,019 \\ 4,95,919 \end{array}$ |  |
| Total appropriations required. | 7,600, 000 | 8,300, 000 | 8,300, 000 |

The changes from fiscal year 1946 are based primarily on the following four factors:
(a) Operating income: It is the established policy of the Federal Public Housing Authority to remove tenants receiving incomes above a definite maximum and to fill resulting vacancies with veterans of low income who cannot afford decent private accommodations. In fiscal year 1947, however, project income is expected to increase about 2 percent because of increased rents charged tenants with higher incomes and the low rate of turnover resulting from the critical housing shortage. In fiscal year 1948 the replacement of high-income tenants with low-income veterans should result in a 3 percent decrease in project income on Public Law 412 projects, assuming that other tenants' incomes do not increase. Rents charged tenants in Public Law 671 projects are considerably higher than those charged tenants in Public Law 412 projects. Consequently, a somewhat higher rate of replacement, resulting in an 8 percent decrease in project operating income in fiscal year 1948, is anticipated for these projects.
(b) Operating expenses: Based on increases in prices and wages, which have already occurred, and on increased expenditures for repairs, maintenance, and replacements as the projects get older, it is estimated that operating expenses (excluding reserves, debt service, and payments in lieu of taxes) will increase 11 percent in fiscal year 1947 over fiscal year 1946. A further increase of 8 percent in fiscal year 1948 is based on the assumption that operating expenses, other than repairs, maintenance, and replacements, will remain in fiscal year 1948 at the fiscal year 1947 level, with an increase in expenditures estimated for repairs, maintenance, and replacements based on the age of the projects.
(c) Revision of reserves for repairs, maintenance, and replacements: The operations of low-rent projects are charged each year with a fixed amount to cover the cost of repairs, maintenance, and replacements. This fixed amount is the average anticipated expenditure for this purpose during the first 10 years of operation. The amounts not expended in the early years of this 10 -year period are set aside to meet the higher expenditures in the later years. Recent surveys of the physical condition of these projects indicate that on a number of projects the reserves will be insufficient to meet the required expenditures for repairs, maintenance, and replacements, but on other projects the reserves will be in excess of the required amounts. Necessary augmentation or reduction of reserves will be accomplished by revision of the average annuals in each of the remaining years of the initial 10 year period, and, in the case of augmentations, by a lumpsum addition to repairs, maintenance, and replacements reserves by the amount of the deficiency which has accumulated up to the current year. On Public Law 412 projects the necessary net augmentation in fiscal year 1947 is estimated at $\$ 500,000$ and in fiscal year 1948 at $\$ 230,000$. On Public Law 671 projects, because of the use of war substitute materials and equipment, net augmentation is estimated at $\$ 380,000$ in fiscal year 1947 and $\$ 1,170,000$ in fiscal year 1948, when the bulk of the deficiencies will be made up.
(d) Financing of Public Law 671 projects: In order to place the Public Law 671 projects on a sound fiscal basis, a program for the permanent financing of these projects will get under way in fiscal year 1947, but contributions will not be affected until fiscal year 1948. This action will result in increased debt service on the estimated 29
projects which will be placed in permanent financing in time to require an annual contribution. Even on the estimated 78 projects remaining in temporary financing the debt service will increase in fiscal years 1947 and 1948 because interest rates on short-term notes have been rising. As a result of these changes, together with the decrease in income and the revision in the reserve for repairs, maintenance, and replacements, it is anticipated that about 60 percent of the Public Law 671 projects will require contributions amounting to $\$ 1,379,842$ in fiscal year 1948.

The budget estimates for fiscal year 1947 are based upon project budgets approved by the regional offices and experience which has already occurred and which affects contributions payable in fiscal year 1947. The estimates for fiscal year 1948 are based on the fiscal year 1947 estimates and some actual experience, with adjustments for income, operating expenses, and debt service charges as discussed above. For comparative purposes the estimates can best be summarized in terms of average income and expense per dwelling unit per month of operation. This method of comparison eliminates differences in gross amounts brought about by increases in the number of projects eligible for annual contributions. The table following summarizes per unit month averages for locally owned Public Laws 412 and 671 projects. On Public Law 671 projects it should be noted that the difference between "Operating income" and "Total expense" is equal to the difference between "Operating gain" and "Operating contributions." The two totals are necessary since the net result of operations of some projects is a gain while on others the operations result in a deficit and contributions are requined.

The experience shown on the following table applies to operating contributions but does not include contributions for four noncontinental projects in Puerto Rico and one in Hawaii, and nonrecurring contributions. The latter contributions consist of supplemental contributions and first contributions. Supplemental contributions, which are relatively small, are made when there are approved increases in development cost. The only first contribution is an actual payment in fiscal year 1946 of $\$ 8,890$ to a Public Law 412 project on which permanent financing was delayed.

## *Deduct.

Locally owned projects-Public Law 849.-The transfer of permanent war housing projects to local housing authorities, after specific congressional authorization, will be effected by a contract providing that the net operating income be paid to the Federal Government for a term of years representing the useful life of the project. In recording these transactions on the Authority books, the fair value of the transferred projects will be shown as a loan receivable to be liquidated at least in part by the net operating income received under the contract. They will be operated by the local authorities on a low-rent basis and will be subject to Federal Public Housing Authority regulations relating to low-rent projects. The Authority will make periodic inspections to determine whether approved rent schedules are being observed and will audit project records to determine net operating income to be paid to the Federal Government, The Federal Public Housing Authority has a continuing responsibility to assure that these projects are operated in accordance witn low-rent purposes and that the Government receives the maximum finarcial return consistent with this purpose.
By the end of fiscal year 1947 it is estimated that 28 Public Law 849 projects, consisting of 9,373 units, will have been transferred to local housing authorities. In fiscal year 1948 it is expected that an additional 94 projects, with 27,406 units, will be transferred. The net operating income from the operations of these projects is estimated to be $\$ 331,500$ in fiscal year 1947. This figure is based on the estimates of operating income and operating expenses for leased war housing family dwelling units for fiscal year 1947. It is assumed that, during the first quarter of operation as low-rent projects, the operating income and operating expenses will remain at the war housing level prevailing at the time the projects are transferred. The assumption is made that in the year following the first quarter of operation there will be a 10 percent drop in operating income as high-income tenants are replaced. Based on these assumptions, it is estimated that the net operating income from transferred Public Law 849 projects in fiscal year 1948 will be $\$ 1,924,000$.
Federally owned projects.-In fiscal year 1948 there will be under management 103 federally owned projects, consisting of 41,687 units, with most of these leased to local housing authorities. Of the 50 Public Works Administration projects, 41 are leased to local authorities. Of the 21 Public Law 671 projects, all but one will be leased, while all of the 32 Public Law 412 projects are leased. Only the net operating income before reserve charges is actually received by the Federal Public Housing Authority under the lease type of management. Rents are collected from tenants, and operating expenses are paid by local housing authorities.

The average operating income per unit month received by the Federal Public Housing Authority on the federally owned projects is expected to decline as over-income families residing in such projects are replaced with low-income families. No substantial decrease, however, is anticipated before fiscal year 1948. The increase in gross income in fiscal year 1947 is due to the addition to the management program of projects recently completed.

Trends in expenses in federally owned projects are similar to those of locally owned projects, with the primary difference being in debt service. When it became apparent that the Ohio projects and a number of the Public Law 671 projects might remain in Federal ownership for an extended period, the Federal Public Housing Authority adopted the policy of instituting debt service charges. Beginning with fiscal year 1947, interest is to be charged on the unamortized cost at the 1 percent rate currently paid by the Federal Public Housing Authority, and amortization on the total development cost of the project is to be charged at the rate of 0.84 percent per year.

The federally owned project budgets are summarized below in terms of average income and expense per dwelling unit per month:

|  | Actual, 1946 | $\underset{1947}{\text { Estimate, }}$ | $\underset{1948}{\text { Estimate, }}$ |
| :---: | :---: | :---: | :---: |
| Operating income (including utility charges) | \$30.68 | \$30.68 | \$29.66 |

|  | 7.70 | 4.67 | 4.71 |

*Deduct.

## Operating Results

Net income for the United States Housing Act program is estimated at $\$ 3,207,606$ in fiscal year 1948, as compared with $\$ 4,541,731$ in fiscal year 1947 and $\$ 5,604,266$ in fiscal year 1946 (exhibit B). The major factors contributing to the decline in net income are as follows:
(a) The gross income will decline as high-income tenants are replaced with low-income tenants, and net income (before reserves and debt service) will further decline because of increased operating costs resulting from the rise in the cost of materials and labor and because of the normal increase in expenditures for repairs, maintenance, and replacements as the projects become older.
(b) Total project expense shows an increase in fiscal year 1947 due to the initiation of a policy of charging interest and debt amortization to federally owned Public Laws 412 and 671 projects. The interest expense is offset in the "Comparative statement of income and expense", by a corresponding entry under "Interest income."
(c) Administrative expenses increase through the return of this program to peacetime operation, reactivation of previously deferred low-rent projects, transfer of war housing projects to this program, and the Pay Act of 1946 .

## Financial Condition

Reference to the comparative statement of financial condition (exhibit C) discloses a considerable increase in
assets while liabilities remain comparatively stable. A decrease of approximately $\$ 20,000,000$ in liabilities is shown as of June 30, 1947, and an increase of $\$ 15,000,000$ as of June 30, 1948. This is caused by repayments and borrowings from the Treasury as funds are required. The increase in assets is caused primarily by assets transferred from the public war housing program. Brief comments on significant items shown in exhibit C follow:

Due from lessees.-This is an item representing rents due from local authorities for leased projects at the close of the fiscal year. The decrease between the fiscal years 1945 and 1946 was due to a change in policy which placed rent collections generally on a quarterly rather than on an annual basis. The sharp increase between the fiscal years 1947 and 1948 reflects principally net income due from local housing authorities on Public Law 849 projects transferred to this program for low-rent use.

Investments.-The practice of the Federal Public Housing Authority is to invest in United States Government bonds in an amount approximately equivalent to cumulative project operating reserves. No additional purchases are contemplated during the fiscal years 1947 and 1948.

Loans receivable.-The changes in local housing authority obligations have been discussed under development and capital financing operations. Loans receivable for Public Law 849 projects, amounting to $\$ 40,909,700$ as of June 30, 1947, and $\$ 159,572,100$ as of June 30, 1948, arise from the transfer of permanent war housing units to local housing authorities. The projects which are estimated to be transferred are valued at $\$ 161,827,600$. Anticipated rent income of $\$ 331,500$ for the fiscal year 1947 and $\$ 1,924,000$ for the fiscal year 1948 from the operation of these projects is applied to reduce the loan. Should rental income in subsequent years prove less than the amount required to repay the loan during the useful life of the property, the difference will be written off as a loss. The asset value of the properties transferred from the war housing program is reflected in paid-in surplus.

Deficit.-Although a continually increasing deficit is shown throughout fiscal years 1945 to 1948, cumulative undivided profits continually increase. The rate of profit, however, decreases sharply due to decreases in rental income per unit on projects which are gradually being converted from high-income war-worker occupancy to tenancy by families of low income, increases in project operating expenses, and decreases in interest earnings per unit on local housing authority obligations due to the increasing availability to local housing authorities of private financing at lower interest rates.
The major factor contributing to the increasing deficit is the cumulative increase in subsidies through annual contribution payments.

## Administrative Expenses

There is no separate and distinct organization for the administration of this program within the Federal Public Housing Authority. The administrative expenses shown in exhibit B are the proportionate share of total Federal Public Housing Authority administration costs attributable to the development and management operations under this program. The basis for this distribution is explained in the consolidated estimate of Federal Public Housing Authority administrative expenses.

It is estimated that the administration of this program will require $\$ 3,900,000$ in fiscal year 1948 and $\$ 2,781,300$ in fiscal year 1947.

## Language <br> national housing agency

FEDERAL PUBLIC HOUSING AUTHORITY
Annual Contributions, National Housing Agency, Federal Public Housing Authority-

Annual contributions: For the payment of annual contributions to public housing agencies in accordance with section 10 of the United States Housing Act of 1937, as amended (42 U. S. C. 1410), $\$ 8,300,000$ [, together with the unexpended balance of the appropriation for this purpose for the fiscal year 1946]: Provided, That except for payments required on contracts entered into prior to April 18, 1940, no part of this appropriation shall be available for payment to any public housing agency for expenditure in connec-
tion with any low-rent housing project, unless the public housing agency shall have adopted regulations prohibiting as a tenant of any such project by rental or occupancy any person other than a citizen of the United States, but such prohibition shall not be applicable in the case of a family of any serviceman or the family of any veteran who has been discharged (other than dishonorably) from, or the family of any serviceman who died in, the armed forces of the United States within four years prior to the date of application for admission to such housing [: Provided further, That not to exceed $\$ 500,000$ of the funds herein shall be used to pay contributions with respect to projects constructed under authority of Public Law 671, Seventy-sixth Congress].

Annual appropriations, general account:
Appropriated 1947, \$8,300,000
Estimate 1948, \$8,300,000

[Fiscal years ending June 30, 1946, 1947, and 1948]

*Deduct.

## Creation and Purpose

The subsistence homestead and greenbelt towns projects were developed out of funds appropriated by section 208 of the National Industrial Recovery Act of 1933 (40 U. S. C. 408) and the Emergency Relief Appropriation Act of 1935 (49 Stat. 115). The original purpose of the subsistence homestead projects was to rehabilitate families in distress by providing them with a homestead on which they could supplement income received by seasonal industrial work. The purpose of the greenbelt towns was to demonstrate a method of redistributing what was considered an overbalance of population in industrial centers by constructing small suburban communities insulated from encroachment by a greenbelt of farms and forests. Both types of projects had a secondary purpose of providing work relief and of increasing employment by providing useful projects. Executive Order 9070 of February 24, 1942, transferred to the National Housing Agency (Federal Public Housing Authority) "all functions, powers and duties of the Farm Security Administration relating to such housing projects as the Administration determines are for families not deriving their principal income from operating or working on a farm."
Thirty-one subsistence homesteads, three greenbelt towns, and eight undeveloped projects were transferred under this order. In addition, a number of loans to cooperative business enterprises connected with these projects, were transferred. The eight undeveloped projects were immediately declared surplus and turned over to Public Buildings Administration for disposal. The interest of the Federal Public Housing Authority in 16 of the subsistence homestead projects sold to tenant associations prior to the transfer of these projects is represented by mortgage holdings. Through June 30, 1946, 1 project of 50 units and 3 individual units had been declared surplus. In addition, 738 individual unit sales had been negotiated. As of July 1, 1946, 14 subsistence homestead projects and 3 greenbelt towns were under direct operation by the Federal Public Housing Authority.

## Financial Organization

Development of this program was financed from appropriated funds, and assets representing $\$ 62,214,291$ of such funds were transferred to the Federal Public Housing Authority. Administration of these projects is carried on under the terms of the Bankhead-Black Act of 1936 ( 40 U. S. C. 431), which provided that operating income may be used for operation and maintenance. These funds have also been used to cover disposition expenses, in accordance with prior authorization acts which permitted the use of operating revenues for this purpose.

## Analysis of Budget Program by Major Activities

The program status of the subsistence homestead and greenbelt towns program by fiscal years is shown in the following schedule:

|  | $\begin{gathered} \text { Actual, June } 30, \\ 1946 \end{gathered}$ |  | Estimate, June |  | $\begin{aligned} & \text { Estimate, June } \\ & 30,1948 \end{aligned}$ |  |

${ }^{1}$ Projects nove from one classification to the next only after all units have done so.

## DEVELOPMENT OPERATIONS

The Federal Public Housing Authority incurred no expenses under funds appropriated by the National Industrial Recovery and the Emergency Relief Appropriation Acts inasmuch as all development activities were concluded prior to the issuance of Executive Order 9070. The Emergency Relief Appropriation Act had stipulated that the funds therein appropriated were to remain available only until June 30, 1937.

## MANAGEMENT OPERATIONS

Projects which have not been sold are operated directly by the Federal Public Housing Authority. Community managers and operating staffs are directly responsible to the Federal Public Housing Authority. Purchasing and contracting for service and supplies for projects are conducted in accordance with generally applicable statutes and administrative orders. Housing operations as of July 1, 1946, consisted of the management of 3 greenbelt towns and 13 subsistence homestead projects.

The 3 greenbelt towns, consisting of 2,266 units will continue under management during the fiscal years 1947 and 1948. It is anticipated that income will remain at about the same level during the fiscal years 1947 and 1948. Operating income is estimated to be $\$ 1,359,000$ and $\$ 1,357,000$ for the fiscal years 1947 and 1948, respectively. While action is being taken to convert these projects to their original purpose-suburban housing for families of moderate income-such conversion can only be accomplished slowly. These projects are located in areas of critical housing shortages and a disproportionate number of tenants paying maximum rents cannot be removed until the housing situation eases. Conversion is being effected by admitting only low-income families into vacated units. Priority for vacated units is afforded eligible veterans. Operating expenses are estimated at $\$ 1,160,000$ and $\$ 1,157,000$ for the fiscal years 1947 and 1948, respectively, which represents an increase of approximately 21 percent for each of the 2 years over fiscal year 1946. This sharp increase in operating expenses is caused mainly by the necessity for undertaking maintenance and repairs previously deferred because of the war. No reserves for maintenance and repairs have been set aside out of the income from these projects and consequently
the cost of the repair program must be borne by current income.

The management program covering the 14 subsistence homestead projects is transitional since they are being disposed of as quickly as feasible. It is anticipated that all units will have been disposed of by sale or will have had lease and purchase contracts executed by December 31, 1947. No operating income is derived from a project sold in its entirety nor is any operating expense incurred with the exception of expenses of administrative clean-up work. Operating income from projects where all units are under lease and purchase contracts is sufficient only to pay project administrative and other reimbursable expenditures for individual units. On those projects where disposition is only partially completed, operating income will decrease as the number of units disposed of increases. At the same time operating expenses of the project as a whole will not decrease in proportion to the units disposed of because of the necessity for on site supervision of such projects as long as any units remain undisposed of. Therefore, it is estimated that operating income for subsistence homesteads will be $\$ 266,200$ and $\$ 62,100$, respectively, for the fiscal years 1947 and 1948, and that operating expenses will be $\$ 231,400$ and $\$ 77,700$ for the same periods.

## DISPOSITION OPERATIONS

The disposal of the subsistence homestead projects is being carried out in a manner consistent with their pur-pose-the rehabilitation of families in distress by providing them with a homestead on which they could partially support themselves while doing industrial work in the neighborhood. Projects are being sold either as units to individual tenants or in their entirety to tenant homestead associations depending on whether or not maintenance and operation of community facilities is involved. Sales prices are being determined in conformity with commitments made by the agency of the Federal Government which originally had jurisdiction over these projects, or in the absence of such commitments, are being based on the fair market value of the property. The terms of the sale provide for repayment of the purchase price over a period not to exceed 40 years with interest at 3 percent. Advance repayments of the principal are being encouraged. Schools, streets, and other public ways will, where appropriate, be dedicated to local governments. Utility installations and community, commercial, and service facilities now owned by the Federal Government will be disposed of in a manner to assure their continued operation. Land and other properties held in connection with the program and not otherwise being disposed of will be declared surplus to the War Assets Administration as rapidly as possible.

The disposal of the subsistence homestead projects has been sharply accelerated. As of June 30, 1946, 3 projects of 605 units had been disposed of while other projects had been partially disposed of to the extent of 136 units. During fiscal year 1946, lease-purchase contracts were executed for 138 individual units, and 1 project of 50 units, made untenable by floods, was declared surplus. During the fiscal year 1947, it is anticipated that lease and purchase contracts will be executed for 203 . units, and 516 units will be sold. Lease and purchase contracts will be executed for 317 units during the fiscal year 1948 and 46 units will be sold. Dedication of community facilities and public ways is expected to be completed during the fiscal year 1947.

No disposition of housing units of the greenbelt towns is anticipated during the fiscal years 1947 and 1948. Preliminary planning toward the disposal of these projects will continue and a specific plan of disposition will be completed during the fiscal year 1948. The expenditure of funds for this purpose was authorized by Public Law 519, Seventy-ninth Congress. It is believed that the interests of the Federal Government and of the people in the greenbelt towns will be best served by the development of the vacant project lands with additional housing units and facilities prior to the disposition of the existing houses and facilities. The excess project land is to be sold to private contractors for development in accordance with a predetermined community plan so that each of the three greenbelt towns will become a self-supporting community. The realization of this plan will depend to a great extent upon general building conditions. In addition, it is estimated that of the excess land of the Greenhills project at Cincinnati, Ohio, 71 partially improved building lots will be sold during the fiscal year 1947. It is anticipated that by the end of the fiscal year 1948 the excess land of the Greendale project at Milwaukee, Wis., will be sold.

## Operating Results

The anticipated financial results of operations during the fiscal years 1946, 1947, and 1948 are shown in exhibit B. Income from project operations and interest earnings is estimated at $\$ 1,749,805$ for the fiscal year 1947 and $\$ 1,490,450$ for the fiscal year 1948 . The decrease reflects the disposal of the subsistence homestead projects. The decrease in operating expense for the subsistence homestead projects from $\$ 333,001$ for the fiscal year 1946 to $\$ 77,700$ for the fiscal year 1948 is more than offset by the increased cost of operating the greenbelt town projects due to deferred maintenance and repairs. Net operating profits are offset by losses and charge-offs from the disposal of assets estimated in the amount of $\$ 1,695,476$ for the fiscal year 1947 and $\$ 334,950$ for the fiscal year 1948.

## Financial Condition

The financial condition of the program as of June 30, 1945, 1946, 1947, and 1948 is shown in exhibit C. The total paid-in capital decreases from $\$ 66,037,827$ as of June 30,1945 , to $\$ 55,448,201$ as of June 30, 1948, reflecting primarily the proceeds from the disposition of subsistence homestead projects and adjustments to the value of the assets transferred from other government agencies for property dedicated to local communities prior to the transfer but not recorded. Proceeds of sale are expected to permit deposits of general fund receipts in the Treasury in the amount of $\$ 3,202,728$ in fiscal year 1947 and $\$ 1,686$,224 in fiscal year 1948. Such deposits are estimated to reach $\$ 4,849,149$ by June 30,1947 , and $\$ 6,535,373$ by June 30, 1948. The cumulative net deficit is anticipated to increase from $\$ 4,882,238$ as of June 30,1946 , to $\$ 6,653,206$ as of June 30, 1947, and $\$ 6,988,156$ by June 30, 1948.

## Administrative Expenses

The amount of $\$ 214,400$ is estimated as the portion of the total Federal Public Housing Authority administrative expenses chargeable to the subsistence homestead and greenbelt towns program in the fiscal year 1948. The estimate for the fiscal year 1947 is $\$ 176,000$ and compares with an actual charge of $\$ 202,000$ in the fiscal year 1946. The basis for this distribution is explained
in the consolidated estimate of Federal Public Housing Authority administrative expenses.

## Language

Public Law 519, Seventy-ninth Congress, authorized the expenditure during the fiscal year 1947 of $\$ 99,500$ of the receipts derived from project operations to facilitate the disposition of the excess lands surrounding the greenbelt towns. Because of shortages of material and high costs, adequate interest has not been forthcoming from private capital to justify expenditure of the full amount of the authorization in fiscal year 1947. It is estimated that $\$ 60,000$ will be expended and $\$ 39,500$ will be needed to conclude arrangements with private investors in fiscal year 1948.

In order to permit expenditures for this purpose, the following authorizing language is proposed:

## Expenses of Liquidation of Resettlement Projects, Federal Public Housing Authority-

Liquidation of resettlement projects: Not to exceed [\$99,500] $\$ 39,500$ of the receipts derived from the operation of the projects transferred under paragraphs 1 (g) and 6 of Executive Order 9070 of February 24, 1942 ( 7 F. R. 1529), shall be available for necessary expenses in connection with and to facilitate disposition of the improved or unimproved lands in the suburban resettlement projects known as Greenbelt, Greendale, and Greenhills, pursuant to the provisions of section 5 of the Emergency Relief Appropriation Act of 1935 ( 49 Stat. 115), [including temporary employment of persons or organizations, by contract or otherwise without regard to section 3709 of the Revised Statutes and the civil-service and classification laws, 1 for making surveys, plans, and plats, and expenses of additions, alterations, and improvements to streets and utilities. (Act of July 20, 1946. Public Law 519.)

| Unexpended balance at end of year | 1, 051, 601 | 913, 771 | 850, 521 |

${ }^{1}$ The act of June 29, 1936, appropriates receipts derived each year from the operation of certain resettlement and rural-rehabilitation projects. Moneys so appropriated are available until expended for payments in lieu of taxes and for operation and maintenance (including insurance) of said projects (49 U. S. C. 433.)

## administrative expenses-FEDERAL PUBLIC HOUSING AUTHORITY

A single administrative expense budget is prepared for five of the six programs administered by the Federal Public Housing Authority, namely:

Public war housing program.
Homes conversion program.
Veterans' re-use housing program.
United States Housing Act program (low-rent, including Public Works Administration projects).
Subsistence homesteads and greenbelt towns program.
Administrative expenses of the Defense Homes Corporation are included in the budget program of that corporation. The Federal Public Housing Authority is operated as a single homogeneous organization designed to cope with all the ramifications of these varied public housing programs. Authority for establishment of the single administrative expense account is contained in the Independent Offices Appropriation Acts, 1944, 1945, and 1946, and the Government Corporations Appropriation Act, 1947 (Public Law 519, 79th Cong.), approved July 20, 1946.

## Financial Organization

Each program bears its proportionate share of the total administrative expenses. Based on various substantive laws referred to in the description of each program, administrative costs must be further apportioned to four major sources: (1) appropriations for construction, (2) receipts from operation, (3) proceeds from the disposition of housing properties, and (4) earnings from the interest differential derived under the United States Housing Act program.

Distribution of administrative expenses to program, legislative sources and activities is a part of the process by which budget estimates are prepared and approved budgets executed. There are several stages in the preparation of estimates, begioning with the establishment of objectives and policies for each program, and continuing with the expression of objectives in terms of program statistics, translation of program statistics into detailed work-load data, determination of manpower requirements to handle this work load, and calculation of costs of indicated manpower needs.

The distribution of administrative costs is based on detailed analysis and on factors determined by semiannual surveys. These surveys involve the recording of each employee's time in half-hour intervals allocated according to each activity within the several programs.

The distribution of costs by program, activity and sources of funds are shown in the following table:

Comparative statement of sources and application of funds [Fiscal years ending June 30, 1946, 1947, and 1948]

|  | Actual, 1946 | Estimate, 1947 | Estimate,1948 |

## Analysis of Budget Program by Major Activities

The activities of the entire organization of the Federal Public Housing Authority can be divided functionally into three major categories, i. e., development, management and disposition. The Authority is organized primarily into three operating branches bearing these names. In addition, there are the customary staff offices including the Office of the Commissioner, Budget Division, Administrative Planning Division, Personnel Division, Legal Branch, and the Comptroller's Office, which service the entire organization in their respective fields.

The budget can best be explained by summarizing operations under the five programs, discussed at some length previously under the separate programs, according to the development, management and disposition activities involved.

Development includes such activities as the establishment of official relations and contracts with local governments in whose jurisdiction housing is to be constructed or by whom construction is to be undertaken, acquisition of land, structural and architectural planning, awarding contracts, inspections for compliance with contract terms, audits of construction cost records and the making of final settlements with contractors. General supervision and inspection of construction by local governing bodies is the preferred and established role of the Federal Public Housing Authority, but direct construction on emergency programs has been required during the war and reconversion period.

During the 1947 fiscal year the completion of construction is scheduled for 180,800 units in the veterans' re-use housing program. Concentration on the physical completion of construction, both in the public war and veterans' reuse housing programs, has resulted in a substantial backlog of unfinished paper work in completing contract settlements and accounting records and land acquisition -settlements. In the few months between the end of active hostilities in the Pacific and the start of the veterans' re-use housing program, good progress was made on this phase of development work. As soon as the veterans' re-use housing has been completed for occupancy, the Authority will give special attention to this job. The work will be especially difficult on the veterans' re-use housing program by reason of the necessity for resort to cost-plus-a-fixedfee contracts.

A number of low-rent projects-156, consisting of 17,997 units-were deferred during the war due to scarcity of materials and manpower. Reactivation has not been feasible since the war, in spite of the acute need for the projects, because of cost and materials problems. By the last quarter of fiscal year 1947, costs are expected to be stabilized sufficiently that construction plans can proceed in some parts of the country, principally in the South. During the 1948 fiscal year conditions are expected to have improved sufficiently so that plans can go forward except in the metropolitan areas of the North and East. Program objectives provide for 128 urban and rural projects with a total of 14,792 units to be in reactivated status in fiscal year 1948, a large portion of which will be a continuation of such activity which has been requested by local governments and was started during fiscal year 1947. Reactivation work load will be confined for the most part to assisting and reviewing the action of local housing authorities engaged in acquiring land, preparing plans and specifications and awarding contracts.

Management.-Management activities are concerned with directing the operations of housing projects through project housing managers, through local housing authorities, through contract managers or through local bodies participating in the veterans' reuse housing program. The objective is to ascertain that the purposes of the various programs are carried out, that the occupants of projects are those intended to be served, that standards of operation and maintenance be adequate but not overelaborate, and that operations are conducted efficiently to assure the maximum return consistent with the type of operation or to minimize the requirements for appropriations to make contribution payments. Supervision to carry out these objectives functions principally through careful review of budgets and operating reports, and through periodic inspection of such items as maintenance and rental and occupancy actions.

In the war period inadequate attention was given to management problems under the United States Housing
mum standards required to carry out the purposes of the program. A substantial management work load will continue throughout fiscal year 1948 as illustrated by the following table:

| Program | Units in management |  |  |
| :---: | :---: | :---: | :---: |
|  | June 30, 1946, actual | June 30, 1947, estimate | June 30, 1948, estimate |
| Public war housing- | 474,816 | 353, 163 | 258, 953 |
| Homes conversion. | 48,296 | 35, 296 | 21,352 |
| Veterans' re-use housing | 12,688 | 180, 800 | 180, 800 |
| United States Housing Act. | 188, 241 | 199, 253 | 227, 011 |
| Subsistence homesteads and greenbelt towns..................................... | 3,486 | 2,970 | 2,924 |
| Totals. | 727, 527 | 771, 482 | 691, 040 |

Disposition.-Disposition activity involves the development of plans for disposal, including consultation with local governments where community interests should be considered, appraisals, negotiation and financing of sales, awarding contracts for the demolition of temporary structures, and cancellation of leases.
On June 30, 1946, there were in the public war housing program some 169,379 units classified as permanent type dwellings; by June 30, 1948, realization of disposition schedules will leave 68,395 units. Present plans call for the sale of 64,251 units, and for transfer of 122 projects of 36,779 units to local bodies for low-rent use. Transfers of the latter type will be sought only in cases where the community formally requests the transfer, which must be approved by the Congress. If requests from communities are less than estimated, the projects will be sold to occupants or private investors.
Similarly, of the 305,437 units of temporary war housing on June $30,1946,100,263$ units are expected to be disposed of by June 30 , 1948. A substantial proportion of the projects disposed of are of dormitory, stop-gap and trailer-site type. Disposal of temporary projects will involve cancellation of over 1,300 leases on approximately 5,500 acres of land in fiscal year 1948, and a similar amount in the current year.

Leases on properties remodeled to provide additional dwelling units under the homes conversion program are being canceled in advance of state expiration dates whenever a satisfactory financial settlement can be reached. Some 4,768 leases out of the total of 8,566 on June 30, 1946, are scheduled for cancellation in the 1947 and 1948 fiscal years, with the work almost evenly divided between the 2 years. The properties involved contain about 26,944 units.
The 10 subsistence homesteads projects under Federal Public Housing Authority jurisdiction on June 30, 1946; are all scheduled for disposition before June 30, 1948. The character of the three greenbelt towns is such that detailed physical planning is required; this planning will be completed and a beginning made on the sale of excess residential land.
Manpower.-The total estimated positions contained in the schedule A-1, when converted to man-years of employment may be compared as follows:

> Comparison of positions with man-years of employment

| Class | Estimate, 1947 |  | Estimate, 1948 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Positions | Man-years | Positions | Man-years |

## DEPARTMENT OF AGRICULTURE

## INTRODUCTORY STATEMENT

The Secretary of Agriculture has under his general direction and supervision seven wholly owned Government corporations-Commodity Credit Corporation, Federal Crop Insurance Corporation, Federal Surplus Commodities Corporation, Federal Farm Mortgage Corporation, Federal Intermediate Credit Banks, Production Credit Corporations, and Regional Agricultural Credit Corporation. In addition to the wholly owned Government corporations for which business-type budgets are submitted, there are two types of corporations within the Department of Agriculture which, under the act, are termed mixed-ownership corporations-Federal land banks and banks for cooperatives. The plans of these mixedownership corporations for the return or retention of Government funds during the fiscal year 1948 are included in this chapter of the Budget in accordance with the provisions of section 204 of the Government Corporation Control Act.

The Commodity Credit Corporation is engaged in a price support program, a subsidy program, a commodity export program, a foreign purchase program, and a supply program. The Federal Crop Insurance Corporation makes available broad protection against loss to producers of cotton, wheat, and flax. Insurance to pro-
ducers of corn and tobacco is being extended on an experimental basis. The operations of these two corporations are conducted through the Production and Marketing Administration of the Department of Agriculture. The Federal Surplus Commodities Corporation's activities as an agency of the Government were terminated June 30, 1945. No programs have been initiated since that date and the liquidation of its affairs will be administered through the Production and Marketing Administration.

The Federal Intermediate Credit Banks, Production Credit Corporations, and the Regional Agricultural Credit Corporation, together with the cooperatively owned Federal land banks and banks for cooperatives, and the closely allied Federal Farm Mortgage Corporation are engaged in providing credit to farmers and farmers' cooperatives. The operations of these corporations are supervised and examined by the Farm Credit Administration.
A budget program for the Farmers' Home Corporation, authorized as an agency of and within the Department of Agriculture by section 40a, title IV, of the BankheadJones Farm Tenant Act ( 7 U. S. C. 1014a), is not presented. This Corporation has not been organized, nor is its activation contemplated during the fiscal year 1948.

## COMMODITY CREDIT CORPORATION

## Creation and Purpose

Commodity Credit Corporation was created under the laws of the State of Delaware pursuant to Executive Order 6340, dated October 16, 1933, issued by virtue of the authority vested in the President by section 2a of the National Industrial Recovery Act of June 16, 1933 (48 Stat. 195). The act of January 31, 1935, directed that the Corporation should "continue until April 1, 1937, or such earlier date as may be fixed by the President by, Executive order, to be an agency of the United States." The Corporation has been continued until June 30, 1947, as an agency of the United States by successive amendments to the act of January 31, 1935 (15 U. S. C. 713). By section 401 of the President's reorganization plan No. 1 (5 U. S. C. 133t, note) the Corporation was made a part of the United States Department of Agriculture, and its operations were placed under the supervision and control of the Secretary of Agriculture.

The charter of the Commodity Credit Corporation authorizes the Corporation, among other things, to engage in buying, selling, lending, and other activities with respect to agricultural commodities, products thereof, and related facilities.

These charter powers have enabled the Corporation to engage in extensive operations for the purpose of increasing production, stabilizing prices, assuring adequate supplies, and facilitating the efficient distribution of agricultural commodities, foods, feeds, and fibers to meet the needs of the war emergency. These operations of the Corporation group themselves into the following major types of programs: A price-support program; a foreign-purchase program; a subsidy program; a supply program; a com-modity-export program; and a loan program for agricultural conservation purposes. Many of the Corporation's operations have been carried out in response to specific Congressional mandates. In carrying out its operations, the Corporation has also been subject to certain specific limitations placed upon it by the Congress.

The Corporation's price-support operations have been shaped largely by legislation making it mandatory for the Corporation to provide price support for certain agricultural commodities through loans, purchases, and other operations. Thus section 8 of the Stabilization Act of 1942, as amended (50 U. S. C. App., 968) requires, with certain exceptions, that loans be made to producers upon any crop of the basic commodities-cotton, corn, wheat, rice, tobacco, and peanuts-harvested after December 31, 1941, and before the expiration of the 2 -year period beginning with the first day of January immediately following the date upon which the President, by proclamation, or the Congress, by concurrent resolution, declares that hostilities in the present war have terminated. The rate of the loan is required to be 90 percent of parity in the case of all the basic commodities other than cotton and $921 / 2$ percent of parity in the case of cotton. In addition, the act of July 28, 1945 ( $7 \mathrm{U} . \mathrm{S}$. C. 1312, note), provides a special formula for the determination of the loan rate in the case of fire-cured, dark air-cured, and Virginia suncured tobacco. Section 8 of the Stabilization Act of 1942,
as amended (supra), superseded the loan provisions of the act of May 26, 1941 , as amended ( 7 U. S. C. 1330, 1340), which required loans to be made at the rate of 85 percent of parity upon the 1941, 1942, 1943, 1944, 1945, and 1946 crops of the basic commodities.

Section 4a of the act of July 1, 1941, as amended, the so-called "Steagall Amendment" (15 U.S. C. 713a-8'(a)), requires the Corporation, during the same period for which loans are required to be made upon the basic commodities, to provide through loans, purchases, or other operations, price support at not less than 90 percent of the parity or comparable price for producers of the nonbasic agricultural commodities for which the Secretary of Agriculture, by formal public announcement, has requested an expanded production to meet the needs of the war emergency. The "Steagall commodities" are: Hogs, eggs, chickens and turkeys, milk and butterfat, dry peas of certain varieties, dry edible beans of certain varieties, soybeans for oil, peanuts for oil, flaxseed for oil, AmericanEgyptian cotton, potatoes, and sweetpotatoes.

Legislation enunciating the policy of Congress with respect to price support for commodities other than basic commodities or "Steagall commodities" is found in section 4 b of the act of July 1, 1941 (15 U. S. C. 713a-8 (b)). Section 4b declares it to be the policy of Congress that the lending and purchase operations of the Department shall be carried out so as to bring the price and income of the producers of such commodities to a fair parity relationship with the basic commodities and the "Steagall commodities" to the extent that funds for such operations are available after taking into account the operations with respect to basic commodities and "Steagall commodities" and the ability of producers to bring supplies into line with demand.
Legislation placing restrictions upon the Corporation's operations has related for the most part to the disposition of agricultural commodities and to the payment of subsidies for the purpose of maintaining price ceilings.

The latest act continuing the Commodity Credit Corporation as an agency of the United States, the act of April 12, 1945 (7 U. S. C. 1381, note) prohibits, with certain exceptions, the disposition by the Commodity Credit Corporation of farm commodities at less than the parity or comparable price for a period of 2 years after the war. However, the act of April 12, 1945 permits the disposal of any commodity below the parity or comparable price if it has substantially deteriorated in quality or if there is danger of loss or waste through spoilage; permits the sale of wheat for feed at less than parity, but not less than the parity price for corn; and permits the sale of farm commodities below parity or the comparable price if they are sold for seed or are sold for new or byproduct uses or, in the case of peanuts, for the extraction of oil. In addition, the Third Deficiency Appropriation Act, 1946 (Public Law 521, 79th Cong.), permits the sale by the Corporation of processed surplus potatoes of the 1946 crop to foreign countries, United Nations Relief and Rehabilitation Administration, and the Army for the relief of hungry people without regard to the provisions of any other law.

The Surplus Property Act of 1944 (50 U. S. C. App. 1630), also contains a significant exception to the restriction applicable to the disposition of farm commodities. That act authorizes the Corporation to dispose of or cause to be disposed of for cash or its equivalent in goods or for adequately secured credit for export only and at competitive world prices any farm commodity or product thereof without regard to restrictions with respect to the disposal of commodities imposed upon it by any other law. No food or food product may, under the act, be exported if there is a domestic shortage or need of any such food or food product.

Section 2e of the Emergency Price Control Act of 1942, as amended ( 50 U. S. C. App. 902e), prohibited the Corporation on and after June 30, 1945, from engaging in subsidy operations for the purpose of maintaining price ceilings. This prohibition, however, was relaxed by section 3 of the act of April 12, 1945, as amended (15 U.S. C. 713, note), and by section 6 of the act of July 25, 1946 (Public Law 548, 79th Cong.), which authorized the Corporation to engage in subsidy operations within specified limitations.

The Congress has also taken action to make certain that Commodity Credit Corporation would not suffer losses in connection with its operations undertaken to supply other Government agencies with their food requirements. Thus section 4 of the act of July 16, 1943 (15 U. S. C. 713a-9), requires that the Corporation be fully reimbursed for services performed, losses sustained, operating costs incurred, or commodities purchased or delivered to or on behalf of any Government agency, from the appropriate funds of such agency.

The Corporation is subject to the restrictions contained in the Government Corporation Control Act which provides that purchases or sales of obligations issued or guaranteed by the United States in excess of a stated amount shall be subject to the approval of the Secretary of the Treasury and that the Corporation shall submit to the Congress for its consideration an annual budget program. In addition, the Corporation is subject to a commercial type audit by the General Accounting Office (15 U. S. C. 713 ; 12 U. S. C. 1804 ; 31 U. S. C. 841 ).

In addition, the Congress has limited the period during which the Corporation is authorized to function as an agency of the United States. This restriction has made it necessary to obtain Congressional action at least every 2 years authorizing the Corporation to continue as an agency of the United States. The act of April 12, 1945 ( 59 Stat. 50), continued the Corporation as an agency of the United States until June 30, 1947. Legislation seeking a Federal charter is being submitted separately for appropriate consideration.

The Secretary of Agriculture, who, pursuant to Executive Order 8219, issued August 7, 1939 (4 F. R. 3565), represents the United States as the sole owner of the capital stock of the Commodity Credit Corporation, establishes the bylaws of the Corporation, and elects the members of the board of directors and other officials of the Corporation. The Corporation is managed by an active board of directors, of which the Secretary of Agriculture is chairman. The activities of the Corporation are carried out through the facilities and personnel of the Production and Marketing Administration of the Department of Agriculture. The members of the board of directors, other than the Secretary of Agriculture, are the Under Secretary of Agriculture and the Assistant Secretary of Agriculture and seven policy-making officials of the Production and Marketing Administration. The officers
of the Corporation are also officials occupying responsible positions in that Administration.

## Financlal Organization

The Commodity Credit Corporation was originally capitalized for $\$ 3,000,000$ subscribed by the Secretary of Agriculture and the Governor of the Farm Credit Administration. The funds for such subscription were derived from the appropriation authorized by section 220 of the National Industrial Recovery Act (48 Stat. 210) and made by the Fourth Deficiency Act, fiscal year 1933 (48 Stat. 274). In accordance with the act of April 10, 1936 (15 U. S. C. 713a), the Corporation's capitalization was increased to $\$ 100,000,000$, the additional $\$ 97,000,000$ of the Corporation's stock being acquired by the Reconstruction Finance Corporation. By section 3 of the act of March E, 1938 (15 U. S. C. 713a-3), the Secretary of Agriculture, the Governor of the Farm Credit Administration, and the Reconstruction Finance Corporation were directed to transfer the ownership of the stock of the Corporation to the United States. That section also provided that all rights of the United States arising out of the ownership of such stock should be exercised by the President of the United States or by such officers or agencies as he might designate. Executive Order 8219, issued August 7, 1939 (4 F. R. 3565), transferred to the Secretary of Agriculture the authority to exercise on behalf of the United States all rights arising out of the ownership of the stock of the Commodity Credit Corporation. The act of March 8, 1938, as amended (15 U. S. C. 713a-1), provides for an annual appraisal of the Corporation's assets by the Secretary of the Treasury. The Secretary of the Treasury is directed to restore the amount of any capital impairment disclosed by the appraisal from appropriations made for that purpose ( 15 U. S. C. 713a-1) and the Corporation is directed to pay into the Treasury the amount of any net worth in excess of $\$ 100,000,000$ (15 U. S. C. 713a-2).

The act of March 8, 1938, authorized the Corporation, with the approval of the Secretary of the Treasury, to issue and have outstanding bonds, notes, debentures, and similar obligations in an aggregate amount not to exceed $\$ 500,000,000$, fully guaranteed as to principal and interest by the United States Government. The borrowing power of the Corporation was increased by successive amendments to the act of March 8, 1938 (15 U. S. C. 713a-4), and now, by virtue of the act of April 12, 1945, the Corporation is authorized to borrow $\$ 4,750,000,000$ on the credit of the United States. On June 30, 1946, notes payable outstanding amounted to $\$ 1,582,342,884$. It is not contemplated that operations during the fiscal year 1948 will require any increase in the Corporation's borrowing power. A statement of the condition of the Corporation is shown immediately following the textual material (exhibit C).

## Analysis of Budget by Major Activities

The budget of the Corporation is based on six distinct types of programs carried out under corporate and other specific authorities. These types of programs are:

1. Price-support program
2. Supply program
3. Foreign-purchase program
4. Commodity-export program
5. Subsidy program
6. Loan to the Secretary of Agriculture for agricultural conservation purposes

Basically these types of programs are not entirely independent. Purchases under the supply program may reduce or completely absorb the visible surplus of an individual agricultural commodity and in some instances make it unnecessary to carry out a price-support operation in connection with that commodity under the pricesupport program. The supply and commodity-export programs also provide outlets for commodities acquired under the price-support program which, if they were not so disposed of, would have to be held by the Corporation until other suitable outlets could be developed. Similarly, facilities, such as elevating equipment, storage, and other equipment, acquired in connection with one program, may be utilized in connection with another program.

During the war period prior to VJ-day and in the subsequent transition period a large part of the operations of the Corporation consisted of the procurement of supplies of agricultural commodities and products thereof, foods, and related facilities needed for the armed services, lendlease, United Nations Relief and Rehabilitation Administration and other relief organizations, foreign governments, and the support of our economy during the war and the transitional period. Wherever possible, pricesupport operations were directed toward bringing forth the production needed to fulfill such needs. The level of support prices was established not only with a view to meeting minimum legal requirements but also to bringing about desirable shifts in production and obtaining the needed volume of production. It was also necessary to encourage the production of certain commodities not normally produced in the United States in great volume and to undertake purchases of agricultural commodities in foreign countries. During this period price-support operations were carried out largely by purchases rather than by loans in order that commodities to be acquired under these programs might be readily available to fill wartime and transitional period needs.

## BASIC ASSUMPTIONS

Budget estimates for operations of the Corporation during fiscal years 1947 and 1948 reflect a continuation of the transitional period which is characterized by high production near present levels and the continued decrease of wartime supply and subsidy programs and an increase in price-support activities. The most acute phase of the world food shortage was experienced during the spring of 1946. It is anticipated, however, that food shortages will continue during the winter and spring of 1947. It is assumed that these shortages will be substantially reduced by restoration of production in war-torn areas during the 1947 crop year and by improvement in normal trade shortly after the completion of the 1947 harvest. This transitional period will continue well into the 1948 fiscal year, and it is anticipated that subsequent to that time the Corporation will be primarily concerned with commitments of the Government to support the price of agricultural commodities. Thus, wartime operations of the Corporation will continue to decrease and will be largely liquidated during fiscal year 1947. These facts largely account for the reduction of $\$ 386,255,012$ in the estimated application of funds in fiscal year 1947 as compared with the actual application of funds in the fiscal year 1946 (exhibit A). It is anticipated that a further reduction of $\$ 1,540,168,126$ will occur in fiscal year 1948 as compared to fiscal year 1947 but with price-support requirements increasing and other requirements decreasing.

A reasonable stability in the general level of commodity prices. both agricultural and nonagricultural, and the
maintenance of the national income near the current level has been assumed in the preparation of this budget. If the general price level rises sharply and results in material increases in the parity index, support prices will also rise sharply since they are required by law to be at a specified percentage of parity prices. When the general price level rises, farm prices generally rise more rapidly than do parity prices. If this should occur, the volume of commodities acquired by the Corporation under the price-support program would decline. Inventories which the Corporation owns could be sold at higher prices, and the estimated losses of the Corporation would be reduced.

If, on the other hand, there should be a substantial decline in national income and consumer purchasing power from the assumed levels, the estimates of funds required might be inadequate because of the increased volume of commodities acquired under the price-support operations, which would very likely more than offset any decline in the level of support prices. Also in a decline in market prices the farm prices usually drop more rapidly than do parity and related support prices.

The procurement of food and agricultural commodities by the Corporation for supply purposes will continue only so long as the world food supply is acutely short and foreign governments cannot conduct their own procurement operations without disrupting domestic markets. The Corporation has already discontinued the procurement of several types of agricultural commodities for foreign governments. It is assumed, however, that it will be necessary to procure at least a portion of the requirements of foreign governments and relief organizations through the harvest of the 1947 crops when the worst phase of the world food shortage is expected to end and food supplies in this country are expected to be sufficient to warrant termination of central procurement for export. Under these circumstances it is estimated that farmers will utilize the loan phase of the price-support operations of the Commodity Credit Corporation and that a decreased volume of purchases will be made since there will be relatively few occasions for continuing price-support operations with a view toward meeting supply-program requirements.

It has also been assumed that the Corporation will discontinue purchasing in foreign countries as soon as world supply, transportation, and financial conditions improve sufficiently to permit importers to meet domestic demands for imported agricultural materials and supplies through normal trading channels.

In considering the estimates, it should be recognized that it is very difficult to estimate requirements for the year beginning July 1, 1947. Not only are they dependent upon weather conditions and volume of production but economic conditions generally, food requirements for foreign countries, and a great many other complex factors will also have a considerable effect on the operations of the Corporation.

## PRICE-SUPPORT PROGRAM

Under its price-support program the Commodity Credit Corporation, through loans, purchases, and other operations, supports the prices of various agricultural commodities. The purpose of the program is to place a floor under the price of agricultural commodities by assuring farmers a minimum price. This program has been a vital factor in obtaining the expanded production of agricultural commodities needed to meet the requirements of the war emergency. By stabilizing prices during the
postwar period the program will aid farmers in reconverting from a war to a peacetime production. The Corporation carries out its price-support program by authority of its charter powers to buy, sell, lend, and engage in other activities with respect to agricultural commodities and their products. To a large extent the Congress has by specific legislation directed that these charter powers be used to support the price of certain agricultural commodities. This legislation has been discussed in some detail under the heading Creation and Purpose.

The price-support program may be generally divided into three categories:
(1) Mandatory loans made available upon the basic commodities-corn, cotton, peanuts, rice, tobacco, and wheat-in accordance with section 8 of the Stabilization Act of 1942, as amended (50 U. S. C. App., 968) and the act of July 28, 1945 (7 U. S. C. 1312, note).
(2) Mandatory price support through loans, purchases, or other operations pursuant to section 4 a of the act of July 1, 1941, as amended, the so-called Steagall Amendment (15 U. S.C. $713 \mathrm{a}-8$ (a)), with respect to the following "Steagall commodities": Hogs, eggs, chickens and turkeys, milk and butterfat, dry peas of certain varieties, dry edible beans of certain varieties, soybeans for oil, peanuts for oil, flaxseed for oil, American-Egyptian cotton, potatoes, and sweetpotatoes.
(3) Price-support operations with respect to agricultural commodities other than those required to be carried out by section 8 of the Stabilization Act of 1942, as amended, the act of July 28, 1945, and section 4a of the act of July 1, 1941, as amended, such as operations with respect to wool, naval stores, sugar beets, sugarcane, and a number of other agricultural commodities.

In carrying out its price-support program the Corporation utilizes normal trade facilities to the fullest practicable extent, and to this end private organizations are utilized by the Corporation when it is (a) clearly advantageous to the Corporation, (b) required by law, or (c) in accord with legislative policy. Thus, where loans are made to farmers the Corporation makes use of local banks, cooperatives, and other private lending agencies by entering into contracts with such lending agencies under which the Corporation agrees to take over loans made in accordance with the Corporation's program. In addition, the Corporation enters into contracts with processors and dealers under which they buy through normal trade channels agricultural commodities at support prices for the account of the Corporation or for their own account. In the latter event the Corporation generally agrees (subject to conditions established by the Corporation) to take over their inventories of such agricultural commodities or products processed therefrom or otherwise assures them of no loss because of the purchase of commodities at the support prices.

In the fiscal year 1946, the price-support program required $\$ 1,553,726,721$, while the estimate of requirements for this program for fiscal year 1947 is $\$ 1,539,146,581$ and for fiscal year $1948 \$ 1,844,507,000$ (exhibit A). During fiscal year 1946 and to a lesser extent in fiscal year 1947 commodities (particularly grain) procured under the pricesupport program were utilized in meeting the needs of the supply program. Thus the increase of $\$ 305,360,419$ in the apparent requirements for fiscal year 1948 as compared to those for fiscal year 1947 does not fully reflect the estimated increased price-support requirements. The reason for this is that acquisitions for supply needs (which effectively assist in the support of prices during the fiscal year 1947) will be substantially eliminated during the
fiscal year 1948. Historically, the Corporation has supported the price of nonperishable commodities primarily through loan operations.
Generally speaking, very little specific activity in the support of prices on perishable commodities has been required with the notable exceptions of potatoes in fiscal year 1946 and eggs in fiscal year 1944. Since it is generally impracticable to support the price of perishable commodities through loans, the required price support of such commodities usually will be effected by purchases. However, the trend from a price support by purchase to a price support by loan, on commodities where this type of price support can be used, is clearly reflected by the increase of expenditures for new loans made during the fiscal year 1946 from $\$ 184,615,551$ to an estimated expenditure for this purpose during the fiscal year 1947 of $\$ 726,213,000$ and during the fiscal year 1948, \$1,279,288,000.
Loans.-It is expected that with the gradual reduction of export requirements, a greater use will be made by producers of the loan phase of the price-support operations of the Corporation. In view of the acute shortage in most commodities in fiscal year 1946, relatively little use was made of the loan operation, notable exceptions being cotton, peanuts, wheat, and potatoes. Moreover, repayments during the year exceeded the new loans made, notably in corn, cotton, peanuts, and wheat; repayments on potato loans amounted to over 90 percent of the new loans made on this commodity. Thus loans outstanding were reduced to $\$ 47,876,154$ on June 30, 1946.

It is anticipated that substantial demands will be made on the loan activities of the Corporation, particularly corn, peanuts, tobacco, wheat, potatoes, and soybeans, during the fiscal year 1947. In view of the large crops it is also estimated that the repayments will not exceed new loans made, particularly in the case of corn, tobacco, and wheat. Thus it is estimated that loans outstanding will increase from $\$ 47,876,154$ as of June 30 , 1946, to $\$ 251,335,000$ as of June 30,1947 . It is estimated that during the fiscal year 1948 heavy demands will be made on the Corporation for loans on corn, wheat, potatoes, and soybeans as well as on a number of other commodities. Because of the reduced demand in foreign markets and other possible factors, it is anticipated that repayments will again be substantially less than new loans made on a number of commodities, notably cotton, tobacco, and wheat, and that the loans outstanding at the close of the year will increase to $\$ 492,433,000$.

In view of the market conditions during fiscal year 1946 and the estimated market conditions in fiscal year 1947, collateral acquired in the settlement of loans was and is expected to continue at a very low level during both years. In fiscal year 1946, $\$ 64,573,404$ of collateral was acquired in the settlement of loans, and it is estimated that only $\$ 20,528,108$ during fiscal year 1947 and $\$ 145,940,000$ during the fiscal year 1948 will be acquired in the settlement of loans.

Purchases.-During the fiscal year 1947 it is estimated that price-support purchases will amount to $\$ 725,946,000$ and that these purchases will decrease during the fiscal year 1948 to $\$ 539,084,000$. This will be due primarily to the estimated heavy decreases in the purchases of basic commodities which will be partially offset by increases in purchases of commodities supported in accordance with Congressional direction as expressed in the "Steagall Amendment" (section 4a of the act of July 1, 1941, as amended). During the fiscal year 1947, it is estimated that $\$ 405,250,000$ of basic commodities will be purchased
as compared to an estimated $\$ 30,350,000$ during the fiscal year 1948. Concurrently, during the fiscal year 1947 it is estimated that $\$ 112,058,000$ of "Steagall commodities" will be purchased, as compared to $\$ 320,084,000$ during the fiscal year 1948. The method effectively used during prior years in supporting the price of perishable commodities was through purchases for supply purposes. During the war when the price-support operation on a particular perishable commodity became necessary, it was usually possible to dispose of the commodity to meet the supply requirements. Thus the supply program effectively carried out the price-support commitments of the Corporation in those cases. A notable example of this situation is the experience in eggs where, on a number of occasions, the development of export requirements has absorbed what otherwise would have been burdensome surpluses. For these reasons, the Corporation has had but little experience in carrying out a complete price-support operation on perishable commodities, including the disposition of surplus stocks.

During the fiscal year 1946 because of a shortage in feed a rather substantial adjustment in flocks of turkeys and chickens was made and it was not necessary during that year to carry out a price-support operation. In view of the present outlook in the supply of feed and because of the anticipated increase in the supply of competitive foods during the fiscal year 1948 it is expected that substantial price-support operations will be required for poultry. The decrease in the estimated purchases of basic commodities is expected primarily because of the expected decrease in foreign demand and the greater use of loans in supporting prices of these commodities. The amount estimated for the purchase of wool during the fiscal year 1948 is slightly lower than for 1947. This includes a tentative estimate to cover the purchase of that part of the 1948 clip which, normally, would be marketed during the fiscal year 1948. However; consideration bas been given by the Congress to proposals with respect to the policy to be followed in providing a continuing pricesupport operation for wool (Senate Document $140,79 \mathrm{th}$ Cong., 2 d sess.). If the Congress establishes a permanent policy on this matter, a substantial revision in the estimate on wool may be required.

Sales.-It is estimated that the volume of sales for fiscal year 1947 will decrease materially from the actual sales made during fiscal year 1946. This reduction is due primarily to the disposition of a substantial portion of the stocks of cotton held by the Corporation during fiscal year 1946 and a general reduction in requirements for export of commodities, the price of which is being supported by the Corporation. The estimated decrease of $\$ 547,264,100$ in fiscal year 1948 as compared to fiscal year 1947 is due primarily to reductions in the sale of wool and in the basic commodities, particularly corn, cotton, and wheat. On the other hand, it is anticipated that substantial increases'in sales will be made in several of the "Steagall commodities." The primary cause of the net decrease is due to the virtual liquidation of inventories of basic commodities owned by the Corporation during the fiscal year 1947.

A sales procedure of particular interest at this time was initiated during the fiscal year 1946. In accordance with the terms of an agreement with the War Department, the Department of State and the U. S. Commercial Company, the Corporation delivers cotton to the U. S. Commercial Company for export to Germany and Japan. The cotton is manufactured into textiles by Japanese and German
agencies designated by the War Department. The Corporation is reimbursed for the raw cotton from the sales proceeds of the portion of these textiles (at least 60 percent) turned over to the U. S. Commercial Company.

Commodity Stocks. - At the beginning of the fiscal year 1946 commodity stocks held under the price-support program amounted to $\$ 873,086,584$; these were reduced to $\$ 472,987,086$ by the end of fiscal year 1946 . The principal reductions during fiscal year 1946 occurred in cotton, wheat, soybeans, tobacco and hemp. The reduction in cotton, wheat, soybeans, and tobacco is due primarily to the high price and heavy demand for these commodities; the reduction in hemp was due primarily to reduced acquisitions because of smaller price-support commitments and the liquidation of inventories acquired in prior years. In fiscal year 1947 the inventory is estimated to drop from $\$ 472,987,086$ to $\$ 227,597,000$. These reductions will be primarily in basic commodities where because of the relatively high prices at the present time and heavy demands it is estimated that it will be possible to virtually liquidate all stocks of basic commodities, i. e., from $\$ 209,569,329$ at the beginning of the fiscal year to $\$ 6,259,000$ at the end of the fiscal year. It is also expected that a reduction of $\$ 74,415,676$ will occur in wool because of the disposition of wool at prices competitive with those of imported wool rather than at support prices. It is further expected that an increase of $\$ 45,423,009$ will occur in stocks of eggs primarily because of the estimated production and consumption of eggs, considering the effect of the probable increase in the availability of competitive foods in the latter part of the fiscal year on the consumption of eggs. It is expected that the inventory of the Corporation in wheat will increase appreciably during fiscal year 1948 from the low of $\$ 1,590,000$ at the beginning of the year to $\$ 123,274,000$ at the end of the year. An estimated increase of $\$ 35,701,000$ is also expected in eggs due to the same basic causes as the increases in fiscal year 1947. The only major decrease in inventories expected in 1948 is in wool, where it is anticipated that the continued sale of wool at prices competitive with those of imported wool will result in the reduction of inventories by $\$ 52,940,000$.

Losses.-Price-support operations were carried on during the fiscal year 1946 at a profit. This was due primarily to the increase in prices throughout the entire year, with major profits being made on corn, cotton, tobacco, and wheat. Losses were suffered concurrently in the disposition of inventories of potatoes, hemp, and wool. These, together with other minor profits and losses on individual commodities, resulted in a net profit on the price-support program of $\$ 80,607,739$. Estimated losses for fiscal year 1947 are $\$ 89,986,000$. It is anticipated that major losses will occur in potatoes, hemp, and wool. The largest loss, $\$ 75,285,000$, is estimated on white potatoes because of anticipated losses in the disposition of inventories of that commodity. This is due to the record high production of potatoes in the 1946 crop which exceeded the amount that normal outlets in this country could absorb. Moreover, it has not been possible to dispose of any appreciable amounts of these inventories in the export markets. Losses on wool continued as the result of disposition of the wool at prices below support prices and competitive with those of imported wool. A loss on hemp is due primarily to the liquidation of inventories and the lack of suitable outlets for inventories acquired in prior years at prices comparable to the support prices during those years.

During the fiscal year 1948 the estimated losses of $\$ 160,870,000$ are due primarily to the inability of the

Corporation to find adequate outlets at support prices for all commodities acquired under the price-support program. This situation is expected to exist in chickens, eggs, potatoes, and turkeys. The loss on peanuts is due to an estimated loss on sale of peanuts to crushers in order to maintain the price of edible peanuts and the assumption that the supply of oil will be larger after the 1947 crop is harvested. In the case of flaxseed, with the improved world situation in fats and oils it is anticipated that outlets at support prices will not be available because of competition from other fats and oils. It is further anticipated that losses on wool will be somewhat greater in fiscal year 1948 than in fiscal year 1947. In estimating the losses on commodities such as chickens, eggs, potatoes, and turkeys, consideration must be given to a number of factors including the need for disposing of the commodities in a relatively short time. The estimated losses are based on the assumption stated earlier in this budget submission; however any major change in the parity level from the level assumed, any major increases in production over those assumed, any changes in the economic situation, or in prices of competitive foods could easily increase or decrease the losses in any one of these commodities materially. In supporting the prices on basic commodities it has occasionally been necessary to hold inventories for several years before it was possible to dispose of them with a profit or minimum loss to the Corporation. It is not possible to hold inventories of these nonbasic "Steagall commodities" for extended periods and for that reason immediate outlets must be developed and the inventories disposed of in a relatively short period of time. Despite the lower volume of sales of price-support commodities, it is estimated that losses will be greater during fiscal year 1948 than during fiscal year 1947. Most of the inventories to be sold are composed of commodities which will not be readily marketable at parity prices. Thus it may be necessary to divert inventories into other than normal uses and substantial losses usually occur under such conditions.

## SUPPLY PROGRAM

Under its supply program the Corporation procures foods, agricultural commodities and products thereof, and related materials for the purpose of supplying the requirements of United States Government agencies, foreign governments, American Red Cross, United Nations Relief and Rehabilitation Administration, and other similar organizations. The centralization of such procurement operations in the Corporation not only has made possible increased efficiency through pooled operations but also has enabled such operations to be conducted in a manner that provides maximum benefit to American agriculture in that the procurement is closely coordinated with the price-support program. The Corporation's procurement operations are conducted in accordance with procedures and policies that are calculated to assure the Corporation against loss. In this connection the Congress by section 4 of the act of July 16, 1943 (15 U. S. C. 713a-9) specifically required that the Corporation be fully reimbursed for services performed, losses sustained, and operating costs incurred or commodities purchased or delivered to or on behalf of any other Government agency. The Corporation also procures or aids in the procurement of supplies and facilities needed by farmers in connection with the production, handling, and marketing of agricultural commodities and their products, such as feed, seeds, grain bins, cotton bagging, fertilizers, and insecticides. It also
procures or aids in the procurement of foods and agricultural commodities and products thereof in order to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation's supply program is carried out under its charter authority to purchase, sell, or otherwise deal in agricultural commodities and products thereof and related materials and to engage in activities in connection with production, handling, and marketing thereof.
The volume of purchases in the supply program is expected to decline from $\$ 779,982,368$ in fiscal year 1946 to an estimated $\$ 543,644,450$ in fiscal year 1947 and an estimated $\$ 109,215,250$ in fiscal year 1948. The decrease from fiscal year 1946 to fiscal year 1947 has been due primarily to the termination of procurement for lend-lease and the armed services. Procurement for foreign governments and for relief organizations began increasing at about the time of the surrender of Germany. This operation increased through the fiscal year 1946 but was more than offset by decreases in procurements for lend-lease and the armed services. These operations are now declining. Most of the operations will be completed by not later than the end of the first quarter in fiscal year 1948, and activities subsequent to that time will generally be limited to the liquidation of the operations. Sales of commodities under the supply program amounted to $\$ 992,784,249$ in fiscal year 1946, as compared with estimates of $\$ 704,978,548$ in fiscal year 1947 and $\$ 156,438,000$ in fiscal year 1948. This reduction clearly reflects the changes in volume resulting from the termination of lend-lease and procurement for the armed services and the present trend toward termination of centralized procurement of agricultural commodities generally. The inventories of commodities owned by the Corporation under this program have been reduced from $\$ 278,539,169$ on June 30, 1945, as compared to $\$ 165,673,876$ on June 30 , 1946, and the estimate of $\$ 40,106,000$ on June $30,1947$. It is assumed that the entire commodity inventory acquired to meet requirements of foreign governments, lend-lease, UNRRA, and other relief organizations will be liquidated by the close of fiscal year 1948.

## FOREIGN-PURCHASE PROGRAM

Under its foreign-purchase program the Corporation purchases abroad such foods, agricultural commodities and products thereof, and related facilities as are needed to meet emergent requirements. These purchases have consisted largely of commodities in short supply, notably fats and oils, sugar, long staple cotton, protein meals, tea, and rice. Most of the purchases implement the allocations of agricultural commodities in short world supply made by the International Emergency Food Council. This program is carried out pursuant to the Corporation's charter authority to purchase and sell commodities both in the United States and foreign countries. The President of the United States on April 28,.1942, approved "the use by the Commodity Credit Corporation of any of its funds for the purpose of carrying out projects involving the acquisition, handling, and disposition of agricultural commodities produced in foreign countries friendly to the United States." On May 16, 1942, the Board of Economic Warfare, which had general jurisdiction over foreign economic matters, designated the Corporation, with certain exceptions, as the sole and exclusive agency for the purchase of agricultural commodities in foreign countries. The foreign-purchase program of the Corporation, with the exception of purchases of sugar in Cuba and purchases
of commodities in Canada, was transferred to the Foreign Economic Administration by Executive Order 9385 (8 F. R. 13783) dated October 6, 1943. The program was ordered returned to the Department of Agriculture by Executive Order 9630 (10 F. R. 12245) dated September 27, 1945.

Purchases of agricultural commodities and products in foreign countries amounted to $\$ 99,092,477$ during the fiscal year 1946 as compared to an estimated $\$ 318,234,000$ during the fiscal year 1947 and an estimated $\$ 195,982,000$ during the fiscal year 1948. This apparent increase above 1946 purchases is due primarily to the fact that, during the fiscal year 1946, purchases of sugar in Cuba by domestic refiners and claimants under the supply program as agents of the Corporation were not reflected on the books of the Corporation as purchases, and the net operating result rather than the gross operation of this activity is reflected in the financial statements for fiscal year 1946. Purchases of Cuban sugar during fiscal year 1947 are estimated at $\$ 233,085,000$, while during the fiscal year 1948 purchases are estimated at $\$ 145,032,000$. Thus the purchases in this program, excluding sugar, remain at about the same level during the fiscal years 1946 and 1947, varying from $\$ 82,819,005$ in 1946 to an estimated $\$ 85$,149,000 in 1947, and are being reduced to an estimated $\$ 50,950,000$ in fiscal year 1948. During the fiscal years 1947 and 1948, it is anticipated that fats and oils may be imported in substantial amounts. In addition, considerable amounts of rice are being procured abroad for shipment to the Philippines. These shipments aid in the acquisition of fats and oils for import. It is also anticjpated that all other inventories of commodities procured in prior years will be liquidated during the fiscal year 1947. During the war period a considerable number of different commodities in short supply were purchased in foreign countries, and either imported into this country and sold, or sold under combined food board allocations to claimants. With the termination of hostilities, however, and the return to more nearly normal distribution of available stocks, only those commodities in critically short supply in this country are being imported by the Corporation.

## COMMODITY-EXPORT PROGRAM

Under its commodity-export program the Corporation exports or causes to be exported agricultural commodities and products. The purpose of the program is to obtain foreign markets for agricultural commodities and products thereof produced in the United States and to aid in the disposal of surplus agricultural commodities.

Disposals of agricultural commodities and products thereof for export may be made at competitive world prices which are below domestic market prices pursuant to section 21c of the Surplus Property Act of 1944 (50 U. S. C. App., 1630). That section authorizes the Corporation to dispose of, or cause to be disposed of, for cash or its equivalent in goods or for adequately secured credit, for export only, and at competitive world prices, any farm commodity or product thereof without regard to restrictions with respect to the disposal of commodities imposed upon the Corporation by any law. No food or food product, however, may be disposed of if such food or food product is in short supply or its disposition would create a short supply. Disposals under this authority result in a loss to the Corporation.

Prior to the enactment of section 21c, the Corporation's ability to engage in export operations was substantially limited by the statutory prohibition against sales of farm
commodities below the parity or comparable price. A cotton project under which cotton is made available for export at competitive world prices was begun in fiscal year 1945. The extent of operations in fiscal year 1948 under this project will depend largely upon the quantity of cotton in the Corporation's stocks. This country normally exports a large portion of its shorter staples and lower grades of cotton and, consequently, provision is made for continuing this project during the fiscal year 1948.

During the latter part of the fiscal year 1946, the Corporation established the policy of exporting only cotton acquired in price-support operations under this program. Assuming the continuation of this policy, the losses on cotton exports will be reduced from $\$ 31,798,548$ during the fiscal year 1946, to an estimated $\$ 3,570,000$ during the fiscal year 1947, and to an estimated $\$ 1,000,000$ during the fiscal year 1948. A small wheat export project was terminated during the fiscal year 1946. Although the existence of acute surpluses in other commodities during the fiscal year 1948 is not apparent at this time, it may become necessary to export other commodities under this program if such acute surpluses develop.

## SUBSIDY PROGRAM

Under its subsidy program the Corporation makes payments or purchases for resale at a loss for the purpose of maintaining price ceilings established by the Office of Price Administration. The objective of the program is to facilitate the Government's stabilization program by providing producers of agricultural commodities and foods additional returns required to obtain maximum necessary production and distribution without increasing price ceilings. Operations of the Corporation under the program are undertaken pursuant to directives issued by the Economic Stabilization Director under authority of Executive Order 9250.

This program is carried out pursuant to the Corporation's charter authority to purchase, sell, or otherwise deal in agricultural commodities and products thereof and to engage in activities in connection with production, handling, and marketing thereof. Congress has, however, specifically limited the extent to which the Corporation may conduct operations under its subsidy program. Thus, section 2 e of the Emergency Price Control Act of 1942, as amended by the Stabilization Extension Act of 1944 (50 U. S. C. App., 902e) prohibited Commodity Credit Corporation as well as all other Government corporations from engaging in subsidy operations on and after July 1, 1945. Section 3 of the act of April 12, 1945, as amended ( $15 \mathrm{U} . \mathrm{S}$. C., 713, note) authorized the Corporation, notwithstanding the prohibition contained in section 2e of the Emergency Price Control Act of 1942, as amended, to complete operations with respect to 1944 and prior year crop activities and to fulfill obligations incurred prior to July 1, 1945, with respect to 1945 and prior fiscal year noncrop activities, and, in addition, to incur and pay obligations in amounts which do not involve subsidies in excess of (1) $\$ 568,000,000$ for operations during the fiscal year ending June 30, 1946, with respect to dairy production payments, (2) $\$ 120,000,000$ for operations during the fiscal year ending June 30, 1946, with respect to other noncrop activities, including the feed-wheat project, and (3) $\$ 225,000,000$ with respect to the 1945 crop operations, 1946 sugar crop operations, 1946 vegetables processed prior to July 1, 1946, and 1946 crop flaxseed harvested prior to July 1, 1946. Such amounts
were authorized to be adjusted under certain conditions by not more than 10 percent. By the act of July 31, 1945 (i5 U. S. C., 713, note) the Congress authorized a transfer from the Reconstruction Finance Corporation to Commodity Credit Corporation of such portion of the authority granted to the Reconstruction Finance Corporation to pay subsidies with respect to meat, flour, and butter as the Secretary of Agriculture might determine. Under this act the Reconstruction Finance Corporation's authority with respect to meat was reduced by $\$ 43,500,000$ and Commodity Credit Corporation's authority was increased by a like amount for the purpose of permitting the latter Corporation to engage in subsidy operations with respect to sheep and lambs.

Section 6 of the act of July 25, 1946 (Public Law 548, 79th Cong.), amending the Emergency Price Control Act of 1942, as amended, and the Stabilization Act of 1942, as amended, authorizes the Corporation, notwithstanding the prohibition contained in section $2 e$ of the Emergency Price Control Act of 1942, as amended by the Stabilization Extension Act of 1944, to engage in subsidy operations for the fiscal year 1947 with respect to noncrop programs, 1946 crop-program operations, and 1947 crop-program operations relating to sugar, within specified limitations. Such subsidy operations, together with subsidy operations for petroleum, petroleum products, and flour, may involve subsidy payments or losses of not to exceed $\$ 869,000,000$. The act provides that such operations shall be terminated not later than April 1, 1947, and shall not be carried out with respect to any commodity on which maximum prices are not in effect or with respect to any commodity for which a subsidy or purchase and sale operation was not in effect on June 29, 1946, and that the rate of subsidy or of loss incurred with respect to any commodity shall not be increased above that which would have been paid or incurred if the operation in effect on June 29, 1946, had been continued on the same basis. The 1946 and 1947 crop programs with respect to sugar may, however, be continued after April 1, 1947, and until such crops are processed and distributed, and no subsidy program with respect to sugar is to be considered a new subsidy. The act further provides that the Corporation or any other Government agency shall not absorb any increase in the price paid for Cuban sugar over 3.675 cents per pound, raw basis, f. o. b. Cuba.
The cost of subsidy operations during the fiscal year 1946 was $\$ 845,102,114$. Direct subsidy payments were made on milk and butterfat production, beef production, fruits, sugar, vegetables, and a number of other commodities and products. In addition, soybeans were sold at a loss in order to maintain consumer price ceilings. Wheat and barley were also purchased and sold for livestock feed purposes at a loss in order to provide emergently needed feed. The wheat operation was carried on during the months of July and August of 1945 when feed was in very short supply but wheat was relatively plentiful. The barley operation was carried on during the latter part of the fiscal year. During the fiscal year 1946 a majority of the subsidy operations were discontinued, including subsidies on beef production, Cheddar cheese, fluid milk, peanut butter, shortening, grapefruit juice, flaxseed, and vegetable oils. With the passage of Public Law 548, Seventy-ninth Congress, effective July 25, 1946, a further review of the subsidy operations of the Corporation was made. A number of additional subsidies (including dairy production payment, barley for feed, dry edible beans, raisins, prunes, and vegetables for processing) were discontinued, subject to liquidation during July 1946. Thus, the total subsidy operations for fiscal year 1947 will
be reduced to $\$ 18,690,000$. The only subsidies which were continued by the Corporation after the passage of Public Law 548 were those on peanuts and sugar. The subsidy on peanuts was discontinued on October 17, 1946, due to the removal of price controls on fats and oils. The estimates for the fiscal year 1948 include a continuation of the subsidy on the 1947 crop of sugar. The estimates on the losses on sugar are based on the assumption that the price of sugar will remain at its present level and that recoveries of duty will expire on January 1, 1947. Any increases in the price of sugar would result in comparable decrease in the loss as incurred by the Corporation.

## LOANS TO THE SECRETARY OF AGRICULTURE FOR AGRICULTURAL CONSERVATION PURFOSES

Section 391c of the Agricultural Adjustment Act of 1938, as amended ( 7 U. S. C., 1391), requires the Corporation to loan to the Secretary of Agriculture during each fiscal year such sums, not to exceed $\$ 50,000,000$ as the Secretary estimates will be required during such fiscal year to make Federal crop insurance premium advances, to make advances pursuant to the applicable provisions of sections 8 and 12 of the Soil Conservation and Domestic Allotment Act, as amended, in connection with programs applicable to the crops harvested in the calendar year in which such fiscal year ends, and to pay the administrative expenses of county agricultural conservation associations for the calendar year in which such fiscal year ends. The sum so loaned during any fiscal year is required to be transferred to the annual appropriation available for carrying out sections 7 to 17 of such act. Repayment of any such loan is directed to be made during the succeeding fiscal year from funds appropriated to carry out sections 7 to 17 of such act, with interest at a rate determined by the Secretary, but not less than the cost of money to the Corporation.

## Operating Results

During the fiscal year ending June 30, 1946, the operations of the Corporation resulted in a net loss of $\$ 830$, 380,811 ; the estimated gain for the fiscal year 1947 is $\$ 2,442,000$, and a loss of $\$ 84,773,000$ is estimated for the fiscal year 1948. Since the character of the operations of the Corporation is changing materially due to the transition from wartime to peacetime operations, a comparison of the actual and estimated total losses does not represent a true loss trend. During the fiscal year 1946 the loss due to subsidy operations amounted to $\$ 845,102,114$, while the anticipated losses due to subsidy operations in the fiscal year 1947 amount to $\$ 18,690,000$ as compared with anticipated subsidy losses of $\$ 5,290,000$ in the fiscal year 1948. Concurrently, operations other than subsidies resulted in a profit of $\$ 14,721,303$ in the fiscal year 1946 as compared with an anticipated profit of $\$ 21,132,000$ in the fiscal year 1947 and an estimated loss of $\$ 79,483,000$ in the fiscal year 1948. This shift from a profit-making to a loss-producing position on other than subsidy operations is due primarily to anticipated decreases in farm prices as compared to support prices. In addition, adjustments of the general commodity purchase program reserves made in the fiscal years 1947 and 1948 resulted in a change from a net loss to a profit on operations in 1947 and a substantial reduction of losses in 1948.
In determining the Corporation's losses, provision has been made for the difference between the Corporation's investment and the estimated sales value of inventory stocks as well as for estimated losses on accounts and
notes receivable. No provision has heretofore been made for the valuation of commodity loans receivable since failure to pay a loan results in the acquisition of collateral at the face value of the loan. Current write-offs of loans resulting from the destruction of collateral or other causes of a like nature have been taken into consideration, however, in projecting operating results for the fiscal years 1947 and 1948. The board of directors established the policy on December 6, 1946, that reserves for losses on loans receivable should hereafter be established. Subsequent submissions will reflect such evaluations.

Since the Corporation acquires substantial inventories in carrying out the programs described herein, provision is made for expenses incurred in storing, transporting, inspecting, processing, reconditioning, marketing, insuring, and securing other services of like nature. The budget estimates reflect these expenses in either the cost of purchases or as carrying charges.

Interest in the amount of $\$ 2,898,498$ was collected during the fiscal year 1946. The adjustment of accruals of interest in the amount of $\$ 5,168,063$ is the result of a change from an accrual to a cash basis for recording interest on loans. The estimated increases in interest on loans for the fiscal years 1947 and 1948 are due to the anticipated sharp increases in price-support activities.

Reimbursements for services performed for other agencies consist of amounts transferred to the Corporation by foreign governments, the United Nations Relief and Rehabilitation Administration, and activities financed by appropriated funds to cover the costs of procuring commodities or other administrative services rendered. The substantial decrease in these reimbursements during the fiscal year 1948 is due primarily to the decrease in procurement of commodities for foreign relief and for foreign governments.

The Corporation's net operating deficit was increased from $\$ 918,739,306$ as of June 30, 1945, to $\$ 1,749,120,117$ as of June 30, 1946, by the loss of $\$ 830,380,811$ incurred during the fiscal year 1946. During the fiscal year 1947 the deficit will be reduced $\$ 921,456,561$ because of the cancellation of Treasury notes authorized by Public Law 519 approved July 20, 1946; it is estimated that the deficit will be further reduced during the fiscal year 1947 by a profit of $\$ 2,442,000$ so that the net deficit as of June 30 , 1947, will be $\$ 825,221,556$. During the fiscal year 1948 it is assumed that a restoration of capital equal to the loss for the fiscal year 1946 will reduce the Corporation's deficit by $\$ 830,380,811$, while an increase of $\$ 84,773,000$ due to the estimated loss incurred during the fiscal year 1948 will result in a net deficit of $\$ 79,613 ; 745$ as of June 30, 1948.

## Financial Condition

Loans receivable.-The Corporation's loans are nonrecourse loans made to farmers or cooperative marketing associations and secured by chattel mortgages or warehouse receipts covering agricultural commodities. Loans are made directly by the Corporation or through private lending agencies and bear interest at the rate of 3 percent per annum. The actual and estimated values of loans held by private lending agencies as of June 30, 1946, 1947, and 1948, are reflected in the "Obligation to purchase loans held by private lending agencies" account. The Corporation guarantees that loans held by commercial lending agencies will be purchased on request if the loan papers are in proper order. Private lending agencies receive one-half of the interest earned during the period

Since the Corporation accepts the pledged collateral in full settlement of commodity loans, no valuation reserves have heretofore been established. A change in this policy by action of the board of directors has been mentioned under Operating Results. Actual losses for the fiscal year 1946 and estimated losses for the fiscal years 1947 and 1948 are charged off directly against actual and projected operations; such losses consist primarily of losses due to damage or destruction of collateral.

The reserve for losses on loans receivable represents the balance of a loan for the purchase of peanut equipment remaining after the application of the sales proceeds of the equipment securing the loan. This loan was made to aid in increasing the supplies of vegetable oil available to meet urgent wartime needs.

Commodities owned.-Commodities owned by the Corporation are divided into two broad classifications: (1) Commodities purchased to meet foreign, government, and relief requirements; (2) commodities purchased to meet price-support commitments. As previously noted the use and economic effects of these two types of inventories are interrelated-commodities purchased for price support may be used to meet supply requirements and purchases for supply needs effectively support domestic prices.
Inventories of commodities purchased to meet foreign, government, and relief needs have declined sharply, and it is anticipated that this trend will continue; it is anticipated, however, that inventories acquired under the pricesupport program while decreasing during the fiscal year 1947 will increase in the fiscal year 1948 because of increased price-support activities.
The Corporation acquires commodities by direct purchase or by forfeiture of commodities pledged as loan collateral. In some instances forfeited loan collateral commodities are pooled for the account of producers; under the pooling arrangement producers have an equitable interest in any net proceeds resulting from the sale of such commodities. The Corporation is presently operating pools on cotton from the 1941, 1942, 1943, 1944, and 1945 crop loans. A reserve has been established to represent the producers' equity in these pools. It is estimated that the pools will be liquidated and the proceeds distributed to the producers during fiscal years 1947 and 1948. Such distribution is reflected in the financial statements.
Reserves for anticipated losses on commodities owned represent the difference between the cumulative cost of the commodities and the anticipated selling prices.

Cash.-The cash funds of the Corporation include administrative and program funds used in current operations and $\$ 500,000,000$ made available to the Corporation by the Defense Aid Appropriation Act of 1946 as a special reserve for postwar price-support activities. When this $\$ 500,000,000$ was made available during the fiscal year 1946, the Corporation borrowed $\$ 500,000,000$ from the U.S. Treasury on non-interest-bearing notes and retired a like amount of interest-bearing notes. Under this arrangement a cash balance of $\$ 500,000,000$ was established and is now carried in the Corporation's accounts.

With the exception noted above, the Corporation's cash balances are maintained at a minimum through a day-to-day borrowing and repayment arrangement with the U. S. Treasury. All cash, except a small deposit in the Bank of Brazil and collections in transit, is on deposit in the several accounts of the Treasurer of the United

Accounts receirable.-The Corporation's accounts receivable consist principally of advances on purchases and amounts due the Corporation as a result of sales to lendlease, foreign governments, United Nations Relief and Rehabilitation Administration, and other claimants. Advances on purchases include advances incident to the purchase of wool, wheat, and sugar, as well as advances to the Copra Export Management Corporation in connection with the importation of copra from the Plilippine Islands. These advances are liquidated when final settlement is made upon receipt of the commodity. In the case of raw sugar purchases from Cuba and Puerto Rico, advances are made to producers by commercial bank for the account of the Corporation. When sugar is delivered to refiners, the refiners reimburse the Corporation for its 90 percent advance and pay producers the remainder of the purchase price.
It should be noted that accounts receivable resulting from sales to lend-lease, foreign governments, and United Nations Relief and Rehabilitation Administration are offset by advances from these agencies reflected in the trust and deposit liabilities account.
Fixed assets.-The major fixed assets consist of grain bins and related equipment, furniture and fixtures, and the Corporation's investment in the Natural Cooler Facility at Atchison, Kans. The .investment in the Natural Cooler Facility is being currently amortized at the rate of $\$ 250,000$ per month while grain bins and furniture and fixtures investments are being depreciated at rates conforming to the estimated useful life of these assets.

Borrowing authorily and financing.-The Corporation's operations are financed by borrowing from the U.S. Treasury or from private lending agencies and, in the case of most of the Corporation's loan operations, by arrangements under which the loans are made by local banks, cooperatives, and other private lending agencies upon the Corporation's guaranty to take over the loans on demand. Daily reports of disbursements and receipts are received from the Federal Reserve banks which act as fiscal agents for the Corporation. If daily disbursements exceed daily receipts, a loan in the amount of such excess is obtained from the U.S. Treasury; if receipts exceed disbursements, the excess is applied as a repayment against the Corporation's loan balance. This procedure assures that the Corporation's cash balance on deposit with the U. S. Treasury and interest on borrowings are kept at a minimum. Funds are borrowed from private lending agencies when, in addition to obtaining funds, the Corporation desires to utilize the facilities of such lending agencies in carrying out a particular operation. All borrowing agreements with private lending agencies are approved by the Secretary of the Treasury. In making loans to farmers on agricultural commodities, the facilities of commercial banks, cooperatives, and other private lending agencies are used extensively. Under the terms of agreements with such lending agencies, the Corporation guarantees that loans made in accordance with the Corporation's requirements will be taken over by the Corporation upon demand. These agreements also provide that the Corporation is to receive one-half of the interest collected by the private lending agencies if loans are repaid while carried by such agencies. If a loan is taken over by the Corporation, the Corporation pays the loan principal plus one-half of the accrued interest to the private lending agency. Since loans presently bear interest at the rate of 3 percent per annum, private lending agencies realize $1 \frac{1}{2}$ percent interest per

The balance of borrowings decreased from $\$ 2,042$,728,125 as of June 30, 1945, to $\$ 1,582,342,884$ as of June 30, 1946, and it is estimated that net outstanding borrowings will be $\$ 811,000,000$ as of June 30, 1947, and $\$ 339,000,000$ as of June 30,1948 . It should be noted, however, that the seasonal nature of the Corporation's activities, results in much higher outstanding borrowings during several periods within the fiscal year than will be outstanding as of the end of the fiscal year.

In establishing projected program borrowing requirements (schedule $\mathrm{C}-1$ ) consideration has been given to the following factors: (a) The proposed restoration of capital covering the loss of $\$ 830,380,811$ incurred during the fiscal year 1946; this restoration is treated as a reduction of outstanding borrowings during the fiscal year 1948; (b) the cancellation of Treasury notes authorized by Public Law 519, approved July 20, 1946, reduces the Corporation's outstanding borrowings in the fiscal year 1947; (c) the substantial advances made by lend-lease, United Nations Relief and Rehabilitation Administration, and foreign governments which reduced outstanding borrowings in the fiscal year 1946; deliveries made in subsequent years will not result in further reductions of borrowings since amounts due as a result of such deliveries have been prepaid; (d) the slower turn-over of the Corporation's funds due to the shift in emphasis from supply to price-support activities; (e) the need for adequate borrowing authority which may be used as the basis for announcing price-support operations well in advance of the actual operations; and (f) a need for adequate borrowing authority to meet unforeseen and sudden demands for price support consequent to abrupt changes in price levels.

The present borrowing authority of $\$ 4,750,000,000$ is considered adequate to meet all financing requirements of the Corporation during the fiscal year 1948.
Accounts payable.-Accounts payable are largely composed of amounts due to vendors for commodities acquired for the Corporation's supply program. Amounts due to other Government agencies, railroads, and other miscellaneous creditors are also included in accounts payable.
Reserves.-The reserve for postwar price support was established in accordance with Public Law 301, Seventyninth Congress, approved February 18, 1946, which provided, among other things, that $\$ 500,000,000$ should be paid to the Corporation and continued as a reserve fund for expenditure, as and when necessary, for the postwar price support of agriculture. No assumption has been made as to when this reserve will become available for use in view of the fact that the war has not been terminated either by act of Congress or declaration by the President. A policy as to the specific classes of losses or the method of charging such losses for postwar price support to this reserve has not as yet been established.

The reserve for general commodity purchases re resents a mark-up on supply program sales reserved to meet supply program losses; this reserve was established to insure compliance with the provisions of section 4 of the act of July 16, 1943 (15 U.S. C. 713a-9). This operation was placed in liquidation on July 1, 1946, and inventories required to meet firm commitments of foreign governments, United Nations Relief and Rehabilitation Administration, and other claimants were transferred to the general supply purchase operation as of July 31, 1946. For convenience of presentation, these transfers are reflected as beginning inventory of the latter operation in schedule B-1 for the fiscal year 1947. Since the general commodity purchase operation is now in liqui-
tect the Corporation from losses is now in excess of probable needs. For this reason, it is being proposed for purposes of discussion and clearance during Congressional hearings on the 1948 budget estimates that the reserve be reduced during the current fiscal year by $\$ 100,000,000$ and this proposal has been reflected in the projected financial statements for the fiscal year 1947. In the liquidation of the operation, any losses which develop will be charged against the reserve. It is anticipated that liquidation of the entire operation will be completed during the fiscal year 1948. Upon complete liquidation of the operation, it is proposed that the remaining balance of the reserve, presently estimated at $\$ 77,775,000$, be transferred into the operating results of the Corporation. This proposal is also reflected in the projected financial statements for the fiscal year 1948.

The reserve for producers' equity represents amounts due to producers as a result of sale of pooled commodities. The Corporation has pooled forfeited loan collateral from the 1941, 1942, 1943, 1944, and 1945 cotton crop loans for the account of the producers. Under the pooling arrangements an equitable interest in the profits resulting from pool operations is reserved for pool participants. The producers' equities on each pool are paid after all the inventories acquired in the individual cases have been completely liquidated and the net operating results determined.

## Administrative Expenses

Administrative expenses cover the costs of the general supervisory and operating staff engaged in the supervision of the operation of the programs carried out by the Corporation. There are not included in administrative expenses, however, necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest. Such expenses are treated as nonadministrative expenses in accordance with the authorization which, for the last 8 years, has been contained in the Commodity Credit Corporation administrative expense item in annual appropriation acts. The language proposed in the budget program for the fiscal year 1948 authorizing expenditures for administrative expenses of the Corporation contemplates that the Corporation will, consistent with its established practice, treat as nonadministrative expense all expenses of the types which have been so treated during the 1947 fiscal year. It should be noted, however, that it is proposed to charge furniture and fixtures purchased during the fiscal year 1948 ( $\$ 20,000$ ) to capital funds rather than to the administrative limitation as has been the case during the 1947 and prior fiscal years. This change is proposed since such expenditures are capitalized and are not administrative expenses of the Corporation.

The work of the Corporation is performed by the employees of the Production and Marketing Administration, and the Corporation assumes its equitable share of expenses for personnel and other expenses. The expenses assumed during the fiscal year 1946 by the Corporation are reflected in schedules B-2 and B-3, and the estimates for the fiscal year 1948 include a limitation of $\$ 8,500,000$
for costs of administration exclusive of reimbursements for services performed.

## Restoration of Capital

The act of March 8, 1938, provided that as of March 31 of each year an appraisal of all the assets and liabilities of the Corporation for the purpose of determining the net worth of the Corporation shall be made by the Secretary of the Treasury. The legislation provided for a basis of evaluating the assets. The act further provided that should such appraisal establish the net worth of the Corporation as less than $\$ 100,000,000$, the Secretary of the Treasury, on behalf of the United States, shall restore the amount of such capital impairment by a contribution to the Corporation in the amount of such impairment. The act of April 12, 1945, changed the date of appraisal from March 31 to June 30, beginning with June 30, 1945 ( 15 U. S. C. $713 \mathrm{a}-1$ ). A summary of capital impairment, restoration of capital by the Secretary of the Treasury, and payments by the Corporation into the Treasury is given in schedule C-3.

It should be noted that the last restoration of capital was effected by a cancellation of Treasury notes amounting to $\$ 921,456,561$ covering the period April 1, 1944, to June 30, 1945. The Corporation's books show that capital was impaired by a loss of $\$ 830,380,811$ incurred during the fiscal year 1946. Language to permit the Secretary of the Treasury to restore the capital impairment of the Corporation as of June 30, 1946, is included in the budget submission. The amount of the requested restoration of capital will be subject to adjustment upon receipt of the Treasury's appraisal.

## Department of Agriculture <br> Language

## Administrative Expenses, Commodity Credit Corporation, Department of Agriculture -

Commodity Credit Corporation: Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: Provided, That not to exceed [ $\$ 8,760,000] \$ 8,500,000$. (to be computed on an accrual basis) shall be available for administrative expenses of the Corporation, including not to exceed $\$ 400$ for periodicals, maps, and newspapers, and not to exceed $\$ 30,000$ for penalty mail: Provided further, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof: Provided further, That the Secretary of the Treasury is hereby authorized and directed to discharge [ $\$ 921,456,561]$ $\$ 830,980,811$ of the indebtedness of the Commodity Credit Corporation to the Secretary of the Treasury by canceling notes in such amount issued by the Corporation to the Secretary of the Treasury pursuant to section 4 of the Act of March 8, 1938, as amended pursuant to section
[Notwithstanding any other provision of law, the Commodity Credit Corporation is authorized to purchase surplus potatoes (including sweetpotatoes) produced during the year 1946 and to process and sell such potatoes to any foreign country, and, upon requisition, to the Army and the United Nations Relief and Rehabilitation Administration for the relief of hungry people. $]$ ( $\gamma$ U. ## - Deduct.

${ }^{1}$ This amount is cumulative from Oct. 17, 1933, as no appraisals were made prior to Mar. 31, 1938.
${ }^{2}$ Includes $\$ 39,436,885$ capital impairment for the year ending Mar. 31, 1943, which was not appropriated by the Congress until the following year's appraisal.
${ }^{1}$ The Act of Mar. 8, 1938 (U. S. C., 1940 ed., supp. III, title 15, sec. $713 \mathrm{~A}-1$ ), as amended by the act approved Apr. 12, 1945, changed the date of appraisal to June 30 of each year.
Therefore, the impairment as of June 30,1945 , covers a 15 -month period

- Represents estimated realized gains or losses only. See exhibit B.

## FEDERAL CROP INSURANCE CORPORATION

## Creation and Purpose

The Federal Crop Insurance Corporation was created February 16, 1938, by the Federal Crop Insurance Act ( $7 \mathrm{U} . \mathrm{S} . \mathrm{C} .1501$ et seq.) for the purpose of insuring producers of wheat against loss in yields due to unavoidable causes in an amount not to exceed 75 percent of the farm average yield. On June 21, 1941, the act was amended ( 55 Stat. 257) to include insurance of cotton commencing with the 1942 cotton crop. The Department of Agriculture Appropriation Acts of 1944 ( 57 Stat. 418) and 1945 (58 Stat. 425) directed that these programs be discontinued after the 1943 crop year except for liquidation of existing contracts.
The Federal Crop Insurance Act was further amended on December 23, 1944 (58 Stat. 918), by reinstating insurance on wheat and cotton and authorizing insurance on flax, commencing with crops planted for harvest in 1945. In addition, the act as thus amended authorized the Corporation to undertake trial programs with respect to insurance of any other agricultural commodities for which sufficient actuarial data are available. These programs were limited by law to corn and tobacco in 1945 and to not more than three additional crops each year thereafter. Each such program is limited to not more than 20 representative counties and to a period of not more than 3 years. It also provided authority to insure against loss of up to 75 percent of the investment in the crop. Otherwise, these programs are subject to the same limitations and conditions as are imposed by the act upon wheat, cotton, and flax insurance.

## Financial Organization

Capital funds.-The Federal Crop Insurance Act provides that the Corporation shall have an authorized capital stock of $\$ 100,000,000$ ( 7 U . S. C. 1504a) to be subscribed by the United States of America.

Under the Department of Agriculture Appropriation Act of 1939 ( 52 Stat. 746 ) $\$ 20,000,000$ was made available to the Secretary of the Treasury for purchase of capital stock of the. Corporation. An additional $\$ 20,000,000$ was made available for this purpose by the Second Deficiency Appropriation Act of 1940 (54 Stat. 640).

Under the First Deficiency Appropriation Act of 1945 ( 59 Stat. 77), an additional $\$ 30,000,000$ was made a vailable to the Secretary of the Treasury for purchase of capital stock of the Corporation. The Secretary of the Treasury did not subscribe for this additional stock until after June 30, 1945, as shown in the attached financial statements. Since the need for operating funds will necessitate a request for the issuance of additional capital stock, the issuance of $\$ 10,000,000$ of capital stock in each of the fiscal years 1947 and 1948 is reflected in the financial statements.

Appropriated funds.-The Federal Crop Insurance Act, as amended ( 7 U. S. C. 1516a), authorizes annual appropriations by Congress of not to exceed $\$ 12,000,000$ for any fiscal year to cover the administrative and operating expenses of the Corporation.

## Analysis of Budget Program by Major Activities

Problem and significance.-Crop insurance has been provided by the Government to protect the farmer against production risks. The need for insurance protection against crop hazards is great. It is particularly
needed by those farmers who have no financial reserve to tide them over until another crop can be produced. It also enables farmers as a group to carry their own crop losses by the payment of premiums and aids in the abolition of crop failures as a threat to our agricultural economy.
Crop catastrophes are sometimes widespread and affect a large part of the country. For this reason, private insurance agencies cannot furnish the necessary "all-risk" protection against crop losses. Therefore, the Congress, in the 1938 act and through subsequent legislation, provided the present Federal crop insurance program.
The budget of the Corporation is based on three types of operations: (1) Insurance of cotton, wheat, and flax; (2) insurance of other crops on a trial basis; and (3) administration of its insurance programs.
Insurance program.- The crop insurance program is designed to be self-supporting over a period of years, except for the cost of administration. Variations in weather and crop conditions from year to year preclude the balancing of premiums and indemnities each year. It is the policy of the Corporation to determine premium rates actuarially so that over an extended period the premiums collected will cover the amounts paid out as indemnities. Therefore, premium rates are established on the basis of the average expected loss over an extended period of years. In addition, premiums have been increased by 10 percent in order to provide a reserve against unforeseen losses.

All-risk crop insurance was available to producers of wheat for a period of 5 years, 1939-43, and to producers of cotton for 2 years, 1942-43. The Corporation was in the process of liquidation from July 12, 1943, until December 23, 1944. Accordingly, there was no insurance offered on 1944 crops or on winter wheat planted for harvest in 1945. Under the program as reinstated, the Corporation began insuring the 1945 crops of spring wheat, cotton, and flax and to insure corn and tobacco crops on a trial basis in 15 and 13 representative counties, respectively. During the 1946 fiscal year 164,444 contracts were in force on 1945 crops; the number of contracts in force increased to 451,351 for the fiscal year 1947 on 1946 crops, and it is estimated that the number of contracts in force will increase to 720,000 during the fiscal year 1948 on 1947 crops.
Since the revival of the program in 1945, the Corporation has been using a plan of progressive insurance protection. It has been found from experience that some of the heaviest losses in previous wheat and cotton programs resulted early in the season or when the damaged crop was not harvested. Frequently, in such cases, a grower could obtain greater net income from an indemnity than from a crop since he did not incur the full cost of producing and harvesting it. Under the plan of progressive insurance, protection increases progressively with the advancement of the growing stages and harvesting of the crop. The plan for progressive insurance protection avoids over-insurance and is consistent with the principle that insurance should give protection only against loss and not provide an opportunity for profit.
In the 1947 crop year cotton program, a plan is being tried that will eliminate a substantial part of the cotton storage and handling expense. Under the plan a fixed price will be used each year for converting premiums and indemnities (determined in pounds of cotton) to a dollar basis. Purchasing and holding commodities for
protection against price fluctuation will be necessary only with respect to reserves carried over from year to year.

The Federal Crop Insurance Act, as amended (7 U. S. C. 1508c), provides that after the crop year 1949, if the total amount of accumulated claims for losses on any agricultural commodity for any year exceeds the total funds available for the settlement of such losses, the claims shall be paid on a pro rata reduced basis.

Trial insurance programs.-In order to determine the method by which crop insurance could be economically established on sound principles and methods of operation, the Corporation, when its insurance programs were reestablished, was authorized to undertake trial programs on corn and tobacco in 1945 and not more than three additional crops in each succeeding year.

One year of experience has been gained from the completion of the trial insurance operations on the 1945 crops of corn and tobacco. At present the Corporation is adjusting claims for losses on the 1946 crops of corn and tobacco in the second year of the trial program. Present indications are that premiums will exceed indemnities on both of these crops and insurance will be written in the trial areas on the 1947 crops. Premium collections and adjustment of indemnitjes will be completed on both crops during the fiscal year 1948. However, no authority exists at the present time to carry on insurance operations either on an experimental or Nation-wide basis on these commodities during the 1948 crop year. In view of the fact that insurance operations have been completed on only one year's crop, final results are not available on which to evaluate the experimental programs. The general operating experience with these trial programs indicates the wisdom of trial operations to determine the acceptability of the form of insurance and to establish and eliminate any weaknesses in the original insurance program offered.

The Corporation has not undertaken additional trial insurance operations during either the 1946 or 1947 fiscal years. Consideration, however, is now being given to the advisability of establishing trial insurance on three additional crops in 1948.

Program administration.-The administration of the crop insurance program includes the preparation of insurance contracts, establishing premium rates, taking and acceptance of applications, obtaining reports of acreage planted by insured producers, calculating and collecting premiums, adjusting and paying losses, and accounting for all operations.

An objective of the Corporation is to write insurance which reflects on the average a representative group of farmers of all varying degrees of risk. The widest possible participation is necessary to effect a broad distribution of risk essential to a successful crop insurance program.

The adjustment of losses is an exceedingly important feature of program administration. Proper loss adjustment depends on a carefully selected, well trained, and properly supervised staff of competent claims adjusters. During the past 2 years since reinstatement of the program, the Corporation has been carefully developing and training its own loss adjustment organization in order to meet these requirements.

The Corporation had a total of about $\$ 167,000,000$ of insurance in force on the 1945 crops and, because of increased participation, this coverage increased to approximately $\$ 280,000,000$ on the 1946 crops. The reductions in the cost of administration by failing to properly service contracts in force and to carefully scrutinize and adjust
each loss claim could easily result in a much greater ultimate loss to the Government through program losses.

The Corporation is managed by an active board of directors appointed by and subject to the general supervision of the Secretary of Agriculture. The board members are: The Secretary of Agriculture (chairman), the Under Secretary of Agriculture, and the administrator of Production and Marketing Administration. The Corporation's officers, consisting of a manager and a secretary, are appointed by the board with the approval of the Secretary of Agriculture. The manager is responsible for the administration of the insurance program under the policy and program direction of the board and under the general administrative supervision of the administrator of the Production and Marketing Administration.

Program development and management control are centralized in the principal office of the Corporation located in the District of Columbia (7 U. S. C. 1503). Program administration is decentralized in 3 branch offices and 36 State offices. The branch offices maintain the records and files on all insurance in force; calculate the amount of insurance premiums; receive, audit, and deposit cash collections; audit and pay approved indemnity claims; and maintain books of accounts for all insurance transactions.

The State offices of the Corporation represent the Corporation in the general direction of all phases of the insurance operations in their respective areas. The widespread organization is essential to provide proper supervision and review of adjustment work performed by the Corporation's field force of part-time loss adjustment appraisers. In addition, the State offices are responsible for the final acceptance of applications for insurance; approval of rates and yields; review of field operations with a view toward recommending changes and improvements in the program operations; and assistance in the development of sales activities.

In accordance with a cooperative agreement, the county agricultural conservation committees administer the program at the local level (except for the loss adjustment work) including establishing acreage yields and rates on individual farms, organizing a force for writing insurance contracts, obtaining and checking reports of acreages seeded by insured producers, processing applications, calculating and collecting premiums, and receiving and transmitting notices of losses to the State offices of the Corporation.

## Operating Results

The actual and estimated gains and losses of the several crop insurance operations carried on by the Corporation are as follows:
[Fiscal years ending June 30, 1946, 1947, and 1948]

|  | $\begin{aligned} & \text { Actual } 1945 \\ & \text { crop } \end{aligned}$ | Estimated 1046 crop | $\underset{\text { crop }}{\text { Estimated } 1947}$ |
| :---: | :---: | :---: | :---: |
| Wheat | \$821, 542 | \$4, 477, 000 | \$2,009,000 |
| Cotton | *14, 668,076 | *17, 893, 000 | 2, 121,000 |
| Flax | 591, 614 | 111, 000 | 78,000 |
| Corn | *221, 732 | 102,000 | 61,000 |
| Tobacco. | 210,728 | 73,000 | 90, 000 |
| Other income (net) | 44,494 | 60,000 | 90,000 |
| Total gain (or loss*) | *13, 221, 430 | * $13,070,000$ | 4,449, 000 |

*Deduct.
While operations for the fiscal year 1946 resulted in a net loss and it is anticipated that a net loss will again be incurred in fiscal year 1947, losses were confined to two
crops in fiscal year 1946 and present crop reports indicate that losses will be confined to cotton in fiscal year 1947. The insurance programs on three crops are building up reserves. The operating results of any one year are dependent, of course, upon the general crop conditions in the areas in which crop insurance is in force. Since growing conditions are unpredictable and cannot be accurately forecast for the 1947 crop year, the projected operating results for the fiscal year 1948 are based on the long-term average crop conditions used as the actuarial basis for the several insurance programs. The estimated gain represents the 10 percent reserve provided for unforeseen losses previously mentioned under insurance program.

Average commodity prices as of June 30, 1946, have been used in converting quantity estimates for the fiscal years 1947 and 1948 into dollar equivalents. Any change in commodity prices will affect these estimates accordingly.

Premiums on the 1946 and 1947 crops in the amount of $\$ 2,681,426$ have been reflected as income during fiscal years 1947 and 1948 and indemnities on the 1946 crop in the amount of $\$ 145,347$ paid during fiscal year 1946 have been reflected as expense during the fiscal year 1947 in order that a more accurate presentation of the Corporation's operating results may be obtained by confining each crop year's transactions to a single fiscal year, i. e., 1946 crop year transactions are reflected in the 1947 fiscal year statements, etc.

Wheat.-Wheat insurance participation amounting to 14,390 contracts (spring wheat only) in force for the crop year 1945 has increased to 305,424 contracts in force for the crop year 1946 and is expected to increase to 450,000 contracts in force for the crop year 1947. A summary of the wheat insurance actual and projected operating results is as follows:
[Fiscal years ending June 30, 1946, 1947, and 1948]

|  | $\underset{\text { crop }}{\text { Actual }} 1945$ | $\begin{aligned} & \text { Estimated } \\ & 1946 \text { crop } \end{aligned}$ | $\begin{aligned} & \text { Estimated } \\ & 1947 \text { crop } \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Wheat premiums. Less indemnities. | $\begin{array}{r} \$ 1,512,651 \\ 691,109 \end{array}$ | $\begin{array}{r} \$ 13,777,000 \\ 9,300,000 \end{array}$ | $\begin{array}{r} \$ 20,088,000 \\ 18,079,000 \end{array}$ |
| Gain | 821, 542 | 4, 477, 000 | 2,009, 000 |

Cotton.-Cotton insurance participation increased from 95,756 contracts in force for the crop year 1945 to 114,298 contracts for the crop year 1946 and is expected to increase to 225,000 contracts for the crop year 1947. The unfavorable weather conditions in areas where participation was heaviest, which caused excessive losses on the 1945 cotton crop, are again prevalent and will affect the 1946 crop. In the plains area of Texas a severe drought which began nearly two years ago is continuing. In eastern Texas and Oklahoma excessive spring rains were followed by drought conditions that reached serious proportions by the end of July. Frequent and heavy rains in Louisiana and Mississippi have reduced the prospects for a good crop; frequent rains in central and eastern parts of the Cotton Belt have also caused a serious boll weevil threat. Accordingly, present information on the 1946 crop indicates that indemnity payments will exceed cotton premiums in the fiscal year 1947.

In view of the heary losses in cotton on the 1945 and 1946 crops, rather drastic changes were made in the insurance operations on the 1947 cotton crop. In general, the purpose of these changes was to provide more conservative insurance. The progressive insurance feature was expanded so that much smaller indemnities would be paid on losses earlier in the season than was the case for 1945
and 1946 which in turn were smaller than in the first years of insurance. Cotton operations are being reviewed critically in a further effort to correct any existing weaknesses in the program. A summary of cotton actual and projected operating results is as follows:
[Fiscal years ending June 30, 1946, 1947, and 1948]

*Deduct.
Flax.-Flax insurance participation amounting to 31,131 contracts in force for the crop year 1945 has decreased to 10,402 contracts on the 1946 crop due primarily to a decrease in acreage planted; it is anticipated, however, that contracts in force for the 1947 crop year will increase to 15,000 . Flax insurance premiums which exceeded indemnities by approximately $\$ 600,000$ in the fiscal year 1946 are expected, with the continuance of normally favorable crop conditions, to exceed indemnities in fiscal years 1947 and 1948 by more than 10 percent. A summary of actual and projected operating results for the flax insurance program is as follows:
[Fiscal years ending June 30, 1946, 1947, and 1948]

Corn and tobacco (experimental crops). -Insurance premiums on tobacco exceeded indemnities by over $\$ 200,000$ while corn indemnities exceeded premiums by more than $\$ 200,000$ during the fiscal year 1946 . It is anticipated that as a result of improvements in the insurance plans, and with normally favorable weather, premiums on both crops will exceed indemnities during the fiscal years 1947 and 1948. Summaries of the actual and projected operating results of the trial insurance programs are as follows:

*Deduct.

## Financial Condition

Accounts receivable.-Accounts receivable consist of premiums on insurance contracts, amounts due from the Commodity Credit Corporation and administrative funds, and small amounts due from others. The increase in this item is predicated on anticipated continued sharp increases in program participation.

The amount due from the Commodity Credit Corporation as of June 30, 1946, represents advances for the purchase of commodities and balance due on cotton transactions executed for the account of Federal Crop Insurance Corporation. The balance due from the administrative funds as of June 30, 1946, represents amounts paid from capital funds for storage expenses which are reimbursable from administrative funds.

Reserve for losses on accounts and notes receivable.-The reserve for losses on accounts and notes receivable represents the estimated ouncollectible premiums and is composed of $\$ 375,000$ established as a result of an analysis of outstanding accounts and notes receivable for crop years prior to 1945 and one-half of 1 percent of insurance premiums for 1945 and subsequent crop years.

Commodities owned.-As of June 30, 1946, the Corporation did not own any commodity stocks. During the fiscal year 1947 it is anticipated that the Corporation will purchase $7,943,000$ bushels of wheat, $42,000,000$ pounds of cotton, 371,000 bushels of flax, and 193,000 bushels of corn at an estimated total cost of $\$ 29,279,000$. It is anticipated that the Corporation will sell commodities valued at $\$ 22,761,000$; the remaining commodities valued at $\$ 6,518,000$ will represent inventory stocks as of June 30, 1947.

During the fiscal year 1948, it is anticipated that the Corporation will purchase $10,800,000$ bushels of wheat, $6,875,000$ pounds of cotton, 232,000 bushels of flax, and 339,000 bushels of corn at an estimated total cost of $\$ 23,477,000$. It is also anticipated that the Corporation will sell commodities valued at $\$ 19,220,000$; the remaining commodities including the June 30, 1947 carry-over will constitute inventory stocks as of June 30, 1948, valued at $\$ 10,775,000$. These inventories represent accumulated reserves under the respective insurance operations from prior years.

Accounts payable.-As of June 30, 1946, accounts payable consisted of estimated indemnities payable amounting to $\$ 1,300,775$ and returned checks unclaimed amounting to $\$ 2,554$. Indemnities payable represent the estimated cash values of unliquidated certificates of indemnities as of June 30, 1946, issued to insured producers in settlement of loss claims under crop insurance contracts. These claims resulted from losses on insured crops that occurred during the crop years from 1941 to 1943, inclusive, and during the crop years 1945 and 1946.

The Corporation's liability on indemnity claims is computed in terms of commodities and a certificate of indemnity is issued to a claimant in settlement of an indemnity claim. Until such time as the certificate is surrendered to the Corporation for payment or an established cash equivalent of the claim is determined, an estimate of the value of the outstanding certificates is necessary. In computing these estimates, average commodity prices as of the expiration date are used for expired indemnity certificates, and average prices on June 30, 1946, are used for unexpired certificates.
It is anticipated that accounts payable outstanding as of June 30, 1947, and June 30, 1948, will represent current
indemnities payable from the crop years 1946 and 1947, respectively.

Undistributed credits.-Deferred income (premium collections) consists of premium payments on contracts for the 1946 and 1947 crop years made during the fiscal year 1946. These premiums are reflected as income during the 1947 and 1948 fiscal years in order to avoid distortion of the income and expense statements for the fiscal years 1946, 1947, and 1948. The substantial amount of these advance payments, $\$ 2,681,426$, is primarily due to the payment of premiums during the period elapsing between the announcement and effective date of the ceiling price increase on wheat during the month of May 1946.

Reserve for crop insurance losses.-The reserve for crop insurance losses represents the net excess of premium earnings over indemnity payments for each crop. Each commodity reserve is carried forward from year to year and is available for the payment of any loss in excess of premium collections for that commodity in subsequent years.

## Admlnistrative Expenses

Program administration has been discussed under analysis of budget program. Since the premium income is not intended to cover administrative expenses, program operations of the Corporation and administrative expenses are reported separately. The estimated administrative expenses are $\$ 9,330,000$ for fiscal year 1948. (See schedules B-2 and B-3.) This estimate is based on the administrative work necessary in connection with the anticipated increased program participation including the writing of 236,890 new contracts on 1948 crops; collecting premiums on 613,200 contracts on the 1947 crops; adjusting and settling 224,800 indemnities on losses estimated on 1947 crops; planning and initiating the insurance program on the 1948 crops; and accounting for and evaluating the results on the 1947 insurance operations.
The appropriation language proposed in the budget for the fiscal year 1948 contemplates that the same types of administrative and operating expenses incurred in prior fiscal years will continue to be financed by the appropriation for administrative and operating expenses.
These estimates for administrative expenses do not provide for the cost of General Accounting Office audits (31 U. S. C. 841-869) since bases for making such estimates are not now available.

## Creation and Purpose

The Federal Surplus Commodities Corporation was first organized as the Federal Surplus Relief Corporation under the powers granted to the President by the National Industrial Recovery Act (par. b of sec. 2 of title I and subsec. a of sec. 201 of title II, 48 Stat. 195). It was granted a charter by the State of Delaware on October 3,1933 , as a nonprofit membership corporation with no capital stock. When the charter was granted, it had as its members persons who, from time to time, might occupy the offices of the Secretary of Agriculture of the United States, Federal Emergency Administrator of Public Works, and Federal Emergency Relief Administrator. The Corporation acted in close cooperation with the Federal Emergency Relief Administration in the purchase of foods and other relief supplies for distribution to needy families through State relief organizations. As the Corporation came to deal more and more in agricultural commodities and products thereof and to conduct its program in closer association with programs of the Department of Agriculture, the charter was amended November 16, 1935, changing the name of the Corporation to the Federal Surplus Commodities Corporation and changing its members, with the exception of the Secretary of Agriculture, to such persons who, from time to time, might occupy the offices of Administrator of the Agricultural Adjustment Administration and the Governor of the Farm Credit Administration.

Prior to the passage of the act of June 28, 1937 (15 U. S. C. 713c), the Corporation acted as an independent agency not directly responsible to any department; but effective with that act, which placed the Corporation as an agency of the United States under the control of the Secretary of Agriculture, the Secretary determined that the administration of the Corporation should be similar in all possible respects to the administration of a regular bureau of the Department of Agriculture. In order to carry out this determination it was necessary to amend the certificate of incorporation and the bylaws so as to permit the management of the Corporation to be in the Secretary of Agriculture; and the membership was again changed to such persons as, from time to time, hold the position of Secretary, Under Secretary, and Assistant Secretary of Agriculture.

Since the establishment of the Corporation, Congress has several times recognized it as an operating agency of the United States. The following acts of Congress have referred to the Corporation: The act of April 7, 1934 (48 Stat. 528), authorized the Secretary of Agriculture to make advances to the Federal Surplus Relief Corporation for the purchase of dairy and beef products for distribution for relief purposes. The act of August 24, 1935 ( 49 Stat. 750,776 ), made the appropriation authorized by the act of April 7, 1934, supra, available until June 30, 1936. The act of February 11, 1936 (49 Stat. 1109, 1117), provided that, in carrying out clause 2 of section 32 , purchase for donation to the Federal Surplus Commodities Corporation during the fiscal years 1936 and 1937 could be made without regard to section 3709 of the Revised Statutes. The act of June 22, 1936 (15 U. S. C. 712a), prohibited the

Corporation after June 30, 1937, from incurring any obligations for administrative expenses except pursuant to an annual appropriation specifically therefor and further discontinued its functions as an agency of the United States after that date unless Congress provided otherwise. The act of June 28, 1937, supra, recognized the Corporation as an agency of the Federal Government and extended it as such, under the direction of the Secretary of Agriculture until June 30, 1939, and made provision for administrative expenses. The act of February 16, 1938 ( 52 Stat. 38), authorized the continuation of the Corporation as an agency of the United States until June 30, 1942. The act of June 27, 1942 ( 15 U. S. C. 713c), provided "* * * that the Federal Surplus Commodities Corporation is hereby continued as an agency of the United States, under the direction of the Secretary of Agriculture, until June 30, 1945." The Corporation ceased to function as an agency of the United States on July 1, 1945, and has been in a state of liquidation since that date. The act of July 20, 1946, required that the Commodity Credit Corporation perform all administrative duties in connection with the final liquidation and dissolution of the Federal Surplus Commodities Corporation and pay the cost therefor out of its limitation on administrative expenses without reimbursement.

## Financial Organization

In the beginning, when functioning as the Federal Surplus Relief Corporation, operations were financed by funds received from the respective States, Territories, and the District of Columbia. These funds, which could be used only for relief purposes, were used for purchasing, processing, and distributing surplus agricultural commodities to the various States which, in turn, made delivery to certified needy persons. The Corporation also received donations of livestock, farm commodities, and processed goods which were used for relief purposes from the Agricultural Adjustment Administration. However, beginning in 1935, the Corporation received a large part of its finances from allocation of funds available to the Secretary of Agriculture for the purchase and disposition of surplus agricultural commodities. During the period 1938 to 1945 nonrecourse loans were obtained from the Disaster Loan Corporation to carry out timber salvage operations made necessary by hurricane in 1938 and severe sleet storms in eastern Texas in 1944. The Corporation has not issued any bonds. The present assets of the Corporation are primarily in cash, as reflected by the "Comparative statement of financial condition" (exhibit C).

## Analysis of Budget Program by Major Activities

The concluding program activity conducted by the Corporation involved timber salvage operations in Texas. This entire operation was in liquidation at the close of the fiscal year ending June 30, 1945, at which time the Corporation ceased by law to be an agency of the United States.

During the fiscal year 1946 the activities of the Corporation were confined solely to its financial liquidation.

Present plans provide for the complete liquidation of all liabilities and realization or assignment of all assets, disposition of all records having no permanent value and placement of those remaining in condition for filing in the National Archives, transfer of remaining assets (cash) to the general fund of the Treasury, and dissolution of the Corporation on or before June 30, 1947.

## Operating Results

During the fiscal year 1946 a net loss of $\$ 8$ was incurred, as reflected in exhibit B, from the settlement of claims on prior years' operations and from the payment of corporate fees.

In the fiscal year 1947 a loss of $\$ 208$ due to the uncollectibility of certain accounts receivable is estimated. It is anticipated that these assets will be removed from the financial statements of the Corporation by charging them off to a memorandum asset account and transferring the items in that account to the General Accounting Office for final disposal without relieving debtors of responsibility. No additional loss or expense is contemplated.

## Financial Condition

On June 30, 1946, more than 99 percent of the assets of the Corporation was in cash, and liabilities had been reduced to less than 2 percent of the net worth. The liability for overpayment by the Defense Supplies Corporation was liquidated during the subject year, and other accounts payable were reduced to a small amount which will be liquidated during the ensuing fiscal year. The "Comparative statement of financial condition" (exhibit C) for June 30, 1947, reflects no assets, liabilities, or capital, since the $\$ 2,672,355$ cash balance remaining on the date of dissolution (which it is planned will be on or before June 30,1947 ) will be transferred to the general fund of the Treasury.

## Administrative Expenses

The act of June 22, 1936, supra, provided that subsequent to June 30,1937 , the Corporation, among others, was prohibited from incurring any obligations for administrative expenses, except pursuant to a specific annual appropriation. However, the Congress has made no such annual appropriation for administrative expenses
but by the act of June 28, 1937, supra, provided "* * * that * * * funds of the Corporation, may be used * * * for administrative expenses, including rent, printing and binding, and the employment of persons and means, in the District of Columbia and elsewhere * * *."

Subsequent to June 30, 1945, when the Corporation ceased by law to be an agency of the United States, the Corporation has undertaken no programs nor engaged in any activity, governmental or nongovernmental, beyond the necessary work attendant upon closing out programs which had been in operation prior to that date and liquidating resulting financial activities.

In order to conclude the liquidation of the Corporation an authorization for administrative expenses was required. This was provided in the act of July 20, 1946, which directed the Commodity Credit Corporation to perform all administrative duties in this connection and pay the cost therefor out of its limitation on administrative expenses without reimbursement. The duties to be performed in completing the liquidation will require a minimum of essential work and will be confined to (1) investigating and settling all outstanding liabilities reflected on the records, (2) converting all other assets into cash, (3) arranging for the disposition of all records having no permanent or historical value, (4) arranging for the retention of the records of permanent value, (5) dissolving (legally) the Corporation, (6) preparing a final report on the financial activities of the Corporation, and (7) any other related work.

## Language

The language is deleted since present plans call for the complete liquidation and dissolution of the Corporation during the fiscal year 1947.

## FEDERAL FARM MORTGAGE CORPORATION

## Creation and Purpose

Economic conditions in the spring of 1933 were such that the demand for farm mortgage credit far exceeded the funds available. To provide additional farm mortgage credit, Congress passed the Emergency Farm Mortgage Act of 1933 (48 Stat. 48), effective May 12, 1933. Section 32 ( 12 U. S. C. 1016 et seq.) directed the Reconstruction Finance Corporation to make available to the land bank commissioner the sum of $\$ 200,000,000$ for the purpose of making loans to farmers on the security of a first or second lien on real or personal property in an amount which, together with prior encumbrances, might not exceed 75 percent of the appraised normal value of the property.

With the progress of the lending program of the commissioner under section 32 of the Emergency Farm Mortgage Act of 1933, and of the Federal land banks for their own account, it became apparent that the fund made available to the commissioner would not be sufficient to meet demands upon it. To meet this situation, the Federal Farm Mortgage Corporation was created on January 31, 1934 ( 12 U. S. C. 1020 et seq.), and began operations almost immediately. The Corporation is authorized to have succession until dissolved by act of Congress (12 U. S. C. 1020a).

Originally, the Federal Farm Mortgage Corporation was an independent establishment, closely allied, however, with the Farm Credit Administration. Effective July 1, 1939, the Farm Credit Administration and the Federal Farm Mortgage Corporation were placed within the Department of Agriculture and are now under the general direction and supervision of the Secretary of Agriculture, pursuant to section 401, part 4, Reorganization Plan No. 1, dated April 25, 1939 . All' officers and employees of the Corporation are officers and/or employees of either the Federal land banks or Farm Credit Administration, and serve the Corporation without compensation other than that which they receive from the respective agencies, which are reimbursed by the Corporation for the cost of such services.
The principal function of the Corporation was to provide funds for loans to farmers by the Federal land banks and by the land bank commissioner. To accomplish this, the Corporation is authorized to issue and have outstanding at any one time $\$ 2,000,000,000$ of bonds fully and unconditionally guaranteed both as to principal and interest by the United States.

On such terms and conditions as may be agreed upon, the Corporation may exchange its bonds for an equal face amount of consolidated farm loan bonds issued by the 12 Federal land banks and may likewise exchange such consolidated farm loan bonds for bonds of the Corporation (12 U. S. C. 1020c). It may purchase consolidated farm loan bonds at such prices and upon such terms as may be approved by the board of directors; may make loans to Federal land banks on the security of consolidated farm loan bonds; may make loans to Federal land banks and (not exceeding $\$ 10,000,000$ at any one time) to joint stock land banks upon the security of real estate mortgages,
sheriffs' certificates, sales contracts, and real estate, upon such terms as may be prescribed by the board of directors (12 U. S. C. 1020d).

The Corporation is further authorized ( $12 \mathrm{U} . \mathrm{S}$. C. 1020d) to invest its funds in mortgage loans made in the name of the land bank commissioner under the provisions of section 32 of the Emergency Farm Mortgage Act of 1933 (12 U. S. C. 1016). The commissioner's lending authority under this act, as amended, expires July 1, 1947. The services and facilities of the Federal land banks and national farm loan associations are utilized in administering the provisions of that act relating to commissioner loans (12 U. S. C. 1018).

## Financial Organization

Section 3 of the Federal Farm Mortgage Corporation Act (12 U. S. C. 1020b) provides that the capital of the Corporation should be in the sum of $\$ 200,000,000$ subscribed by the Governor of the Farm Credit Administration on behalf of the United States. For the purpose of such capital subscription, the $\$ 200,000,000$ fund which previously had been made available to the land bank commissioner, together with the proceeds thereof, and the notes and mortgages which had already been taken by the commissioner, were by the act expressly transferred to the Corporation. Under authority of section 4 of the act of June 25, 1940 (54 Stat. 573), and section 14 of the act of June 30, 1945 (59 Stat. 265), amending section 3 of the Federal Farm Mortgage Corporation Act, the Corporation on May 15, 1941, repaid to the Secretary of the Treasury $\$ 100,000,000$ of its capital and on July 31, 1945, retired an additional $\$ 50,000,000$, reducing the paid-in capital to $\$ 50,000,000$. Section 2 of the act of July 12, 1946 (Public Law 505), further amends section 3 of the Federal Farm Mortgage Corporation Act, and authorized the Corporation to repay to the Secretary of the Treasury on behalf of the United States from time to time, such portions of the amounts subscribed to the capital stock of the Corporation as are found by the board of directors to be in excess of the capital necessary to enable the Corporation to carry out its functions as authorized by law. The proceeds of such repayments are to be held in the Treasury of the United States as a fund available for subscription by the Governor of the Farm Credit Administration on behalf of the United States to the capital of the Corporation.

With the approval of the Secretary of the Treasury, the Corporation has authority to issue and bave outstanding at any one time bonds in an aggregate amount not exceeding $\$ 2,000,000,000$. The Corporation, with the approval of the Secretary of the Treasury, prescribes the terms and conditions of the bonds, the rates of interest which they shall bear, the manner in which they are issued, and the prices at which they are sold. The bonds are fully and unconditionally guaranteed both as to interest and principal by the United States, and all redemptions, purchases, and sales of the bonds of the Corporation by the Secretary of the Treasury are required to be treated as public debt transactions of the United

States. The Federal Farm Mortgage Corporation has issued no bonds to the public since approval of the Public Debt Act of 1941; however, when necessary, it has sold short-term bonds to the Treasury of the United States. A statement of condition of the Corporation is shown immediately following the textual material (exhibit C).

## Analysis of Budget Program by Major Activities

The budget of the Corporation is based on three types of programs: (1) Servicing land bank commissioner loans, (2) liquidating acquired collateral or security, and (3) assisting Federal land banks in their financing program.
In appraising the budgetary requirements of the Corporation for the fiscal year 1948, it is necessary to recognize the effect that the acts of June 30, 1945 (59 Stat. 265), and July 12, 1946 (Public Law 505), as well as economic conditions may have upon the activities of the Corporation. It is assumed that the lending authority of the Corporation will not be extended beyond July 1, 1947, and that the activities of the Corporation during the fiscal year 1948 will be restricted to a program of liquidation. These assumptions are discussed below in connection with the respective programs. The level at which these activities were carried on during the fiscal year 1946 and the projected level for the fiscal years 1947 and 1948 are shown in the statement of sources and application of funds in the financial statements immediately following the narrative (exhibit A).

Land bank commissioner loans.-The Emergency Farm Mortgage Act of 1933, as amended by the Farm Credit Act of 1935, provides that land bank commissioner loans could be made for any purpose for which Federal land bank loans may be made and in addition for refinancing any indebtedness, secured or unsecured, of the farmer ( 12 U.S. C. 1016f).

Land bank commissioner loans, together with all prior mortgages or other evidences of debt on the collateral security, shall not exceed 75 percent of the normal agricultural value of the farms as determined by appraisal, nor shall a loan in excess of $\$ 7,500$ be made to any one farmer. There is no difference between the concept of normal value for commissioner loans and that for Federal land bank loans, but the commissioner may accept security that is not considered eligible for a Federal land bank loan, and also may make loans based in part on dependable outside income, but shall not exceed 75 percent of the prudent investment value of the security offered (12 U. S. C. 1016b).

The act of June" 30 , 1945, authorized"several changes of major importance in the statutory powers of the Federal land banks and the Federal Farm Mortgage Corporation, which materially affect the operations of the Corporation. One of the important provisions authorizes the Federal land banks to make loans not exceeding 65 percent of the appraised normal value of the mortgaged farm considered as a unit. The previous loanable limit, which had been in effect since the original Federal Farm Loan Act was passed, was 50 percent of the appraised normal value of the mortgaged land plus 20 percent of the appraised value of the permanent, insured improvements thereon; therefore, second mortgage commissioner loans closed after June 30, 1945, are smaller in amount than loans closed prior to that date since the spread between the loanable limit of the banks and the Corporation is only 10 percent. Also, subject to stock ownership requirements and existing loan limits, the Federal land banks are empowered by the act of June 30, 1945, to purchase
from the Corporation mortgages and contracts for the sale of farms, and the Corporation is authorized to sell such assets to Federal land banks.

The act of July 12, 1946 (Public Law 505, 79th Cong.), extends the lending authority of the Corporation to July 1, 1947. This act also directed the Farm Credit Administration to make a report to the Congress by March 31, 1947, on ways and means of making available to farmers throughout the Federal land bank system, loans similar to those now closed through the Federal Farm Mortgage Corporation. The action of the Congress relative to this report, which is currently being developed, may of course have a material effect upon the operations of the Corporation during the fiscal year 1948, and may necessitate a reconsideration of its budgetary requirements.

Farmers obtained 15,746 first and second mortgage loans aggregating $\$ 14,729,530$ during the year ended June 30,1946 , as compared with 22,760 loans for $\$ 40,243,955$ in the fiscal year 1945. This brought to 661,361 the number, and to $\$ 1,201,155,293$ the amount of loans closed since May 12, 1933. After giving effect to all of the foregoing factors, it is estimated that loans in the amount of $\$ 15,632,800$ will be closed in the fiscal year 1947; no new loans to farmers will be made during the fiscal year 1948 unless legislation is enacted extending the lending authority of the land bank commissioner beyond July 1, 1947. However, the Corporation may be required to refinance some loans closed in the name of the land bank commissioner previous to July 1, 1947 (12 U. S. C. 1016g). The following financial statements do not provide for such contingencies.
During the fiscal year 1946, the first and second mortgage loan accounts decreased from 252,797 loans with unpaid principal balances totaling $\$ 308,915,339$ to 163,546 loans with unpaid principal balances totaling $\$ 174,204,349$. This decrease results primarily from the excess of principal repayments over new loans closed during the period and the sale of mortgages and contracts in the unpaid principal amount of $\$ 66,987,551$ to the Federal land banks. It is forecast that mortgages and contracts amounting to $\$ 13,000,000$ will be transferred during the fiscal year 1947 and mortgages and contracts amounting to $\$ 2,979,000$ will be transferred during the year 1948 . These transfers, together with other repayments, will leave a combined total of first and second mortgages and contracts outstanding at June 30, 1948, of $\$ 103,701,768$.
Liquidation of acguired security or collateral.--On June 30, 1946, the Corporation owned outright and held subject to redemption a total of 239 farms, in which it had a net investment (i. e., excluding unmatured prior liens not assumed) of $\$ 931,776$. This reflects declines of 63 percent in number and 65 percent in amount from the comparable June 30, 1945, figures and declines of 98 percent in number and 97 percent in investment since the September 1939 peak inventory of 10,478 properties in which the Corporation had a net investment of $\$ 31,081,937$. A continuation of the same general trend is forecast for the fiscal years 1947 and 1948 and it is expected that the net investment in acquired security and collateral will be reduced to \$347,476 by June 30, 1948.
Investments.-The Corporation had no investments at June 30, 1946, and no investment transactions are anticipated during the fiscal year 1947. However, it is expected that surplus funds of the Corporation in the amount of $\$ 25,000,000$ will be invested in United States Government securities during the fiscal year 1948.
Financing.-While its Government-owned capital and its accumulated earnings have been a source of funds for
lending purposes, the Corporation's primary source has been the issuance of bonds. Since the first issue in 1934, a total of $\$ 2,979,859,000$ has been issued, of which $\$ 12,000,000$ of 1 percent Corporation unmatured bonds was outstanding at June 30 , 1946, all of which were held by the Secretary of the Treasury. The balance of the unmatured bonds outstanding was retired during July and August of the current fiscal year.
On July 2, 1945, the Corporation issued and sold to the United States Treasury $\$ 172,300,000$ of 1 percent bonds to provide funds to assist the Federal land banks in their financing program; also, additional 1 percent bonds in the amount of $\$ 50,000,000$ were issued and sold to the Treasury on July 31, 1945, to provide funds to retire $\$ 50,000,000$ in outstanding capital stock pursuant to section 14 of the act approved June 30, 1945 ( 59 Stat. 265). The Federal land banks have completed their current refinancing program and it is not anticipated that further transactions of this nature will occur in either the fiscal year 1947 or 1948.
The Corporation's authority to issue and have bonds outstanding up to $\$ 2,000,000,000$ ( 12 U. S. C. 1020 c ) appears to be in excess of foreseeable needs. In its study of the report of the Farm Credit Administration, to be submitted in accordance with the act of July 12, 1946 (Public Law 505, 79th Cong.), the Congress should consider the advisability of reducing this authority to a more realistic figure.

## Operating Results

The total income of the Corporation for the fiscal year 1946 amounted to $\$ 12,827,696$. It is anticipated that total income during the fiscal years 1947 and 1948 will be $\$ 8,104,500$ and $\$ 6,166,200$, respectively. This decline in income will result principally from the decreasing volume of loans outstanding.
The total expense of the Corporation for the fiscal year 1946 was $\$ 6,104,008$, of which $\$ 4,888,759$ was for administrative expenses for the fiscal year 1946, $\$ 23,616$ for prior year administrative expense adjustments, and the remaining $\$ 1,191,633$ consisted of (i) the net interest cost of the Federal Farm Mortgage Corporation bonds and other interest expense amounting to $\$ 1,045,828$ and (2) other losses and charge-offs of $\$ 145,805$. It is contemplated that expenses for 1947 will amount to $\$ 4,711,300$ and that such expenses for 1948 will amount to $\$ 3,319,100$.
In view of the heavy liquidation of commissioner loans during the fiscal year 1946 through purchases by the Federal land banks (as authorized by the act of June 30, 1945), and continued substantial repayments by borrowers, the Corporation approved the establishment of revised reserve requirements for all commissioner loans closed through June 30,1946 . The revised reserve requirements were based on the loss (reserve) rates developed in the most recent comprehensive studies of loss experience in the various farm credit districts, adjusted to the extent deemed appropriate. This resulted in a downward adjustment of $\$ 40,552,708$ in the reserve for losses on mortgage loans, real estate sales paper, and related items in June 1946.
During the fiscal year 1946, operations resulted in a net income of $\$ 44,644,412$ after consideration of the downward net adjustment of $\$ 37,920,724$ in valuation reserves. It is forecast that the Corporation will have a net income of $\$ 3,300,500$ in the fiscal year 1947 and $\$ 2,-$ 657,000 in the fiscal year 1948. After giving effect to the foregoing, it is estimated that the earned surplus account
of the Corporation will amount to $\$ 105,306,340$ at June 30, 1948 (see exhibits B and C).

## Financial Condition

Loans receivable.-Mortgage loans, purchase money mortgages, sales contracts, etc., outstanding on June 30 , 1946, decreased in number and amount from those outstanding on June 30, 1945, due principally to the excess of repayments (including mortgages and contracts transferred to the Federal land banks) over new loans closed during the past fiscal year. Continued satisfactory farm commodity prices and generally improved agricultural conditions which have enabled farmer-borrowers to retire their debts in advance are also reflected in the reduction in the number of loans and real estate sales paper delinquent. As of June $30,1946,12,344$, or 7.2 percent, of the outstanding mortgage loans, purchase money mortgages, and sales contracts were delinquent as compared with 16,758 , or 6.4 percent, a year ago. Loans in foreclosure, loans in suspense because of the prior liens being in foreclosure, and loans in suspense because payments thereon have been postponed by agreements between the Corporation and the borrowers likewise decreased in number and amount during the period. The number of loans in foreclosure decreased from 432 to 186 , or 56.9 percent; loans in suspense-prior liens in foreclosure from 24 to 13 , or 45.8 percent; and loans in suspense--payments postponed by agreement from 37 to 1 , or 97.3 percent. The reserve maintained against loans receivable on June 30, 1946, is considered adequate to cover probable losses.

Bonds payable.-The $\$ 12,000,000$ of unmatured 1 percent bonds outstanding on June 30, 1946, were retired during the months of July and August 1946.

Return of capital funds to the Treasury.-The capital of the Corporation on June 30, 1946, consisted of its Govern-ment-owned capital stock of 50 million dollars and unreserved surplus of $\$ 99,348,840$. Pursuant to section 2 of the act of July 12, 1946 (Public Law 505), the board of directors of the Corporation has determined that as cash funds of the Corporation are accumulated in amounts of $\$ 1,000,000$ or multiples thereof in excess of the amounts required for normal operating purposes, such excess cash accumulations should be devoted to the retirement of capital. Based on present trends in the liquidation of the Corporations assets, it is anticipated that capital in the amount of $\$ 40,000,000$ will be retired during the fiscal year 1947 and that capital in the amount of $\$ 9,990,000$ will be retired during the fiscal year 1948.

Dividend payments.-In view of the favorable financial condition of the Corporation, its board of directors will consider the declaration and payment of a dividend to the Treasury during the fiscal year 1948. The matter will be deferred, however, until the Congress has acted upon the report of the Farm Credit Administration to be submitted in accordance with the Act of July 12, 1946 (Public Law 505, 79th Cong.).

## Administrative Expenses

Administrative expenses represents reimbursements to the Farm Credit Administration for services rendered to the Corporation, supervision of the Federal land banks in making and servicing commissioner loans, and in other advisory and administrative capacities; and includes payments to the United States Treasury and the Federal Reserve banks for expenses in handling bond transactions for the Corporation. It also represents reimbursement
to the Federal land banks for services performed as agents of the Federal Farm Mortgage Corporation and the land bank commissioner.

Estimated total administrative expenses of $\$ 4,550,000$ for the fiscal year 1947 and $\$ 3,235,000$ for the fiscal year 1948 when compared with the actual for 1946 of $\$ 4,888,759$ (exclusive of prior year adjustments) reflects a reduction of $\$ 338,759$ for 1947 and $\$ 1,653,759$ for 1948. (For further details see statement of income and expense (exhibit B ), and schedule $\mathrm{B}-1$.)

## Language

Administrative expenses, Federal Farm Mortgage Corporation-
Federal Farm Mortgage Corporation: [Provided, That not] Not to exceed [ $\$ 3,750,000] \$ 3,285,000$ (to be computed on an accrual
basis) of the funds of the Corporation shall be available for administrative expenses [of the Corporation], including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services; and the use of the services and facilities of Federal land banks, national farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the act of January 31, 1934 (12 U. S. C. 1020-1020h); and said total sum shall be exclusive of interest expense, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest $[$ : Provided further, that except for the limitation in amount hereinbefore specified the administrative expenses and other obligations of the Corporation shall be incurred, allowed, and paid in accordance with the provisions of said act of January 31, 1934, as amended (12 U. S. C. 1016-1020h)]. (31 U. S. C. 841-869). (Act of July 20, 1946, Public Law 519.)

## FEDERAL INTERMEDIATE CREDIT BANKS

## Creation and Purpose

The 12 Federal intermediate credit banks were organized pursuant to the Agricultural Credits Act of 1923 (12 U. S. C. 1021-1022). The term of existence of the banks is unlimited.

The intermediate credit banks serve as banks of discount to provide a permanent source of credit for local lending institutions to supply agriculture with the types of credit needed, at reasonable rates of interest and with maturities adapted to the normal liquidating seasons of the industry. The banks do not make loans directly to individuals or accept deposits of funds otherwise than as collateral security.

The banks are supervised by the intermediate credit commissioner, who is responsible to the Governor of the Farm Credit Administration. These officials are appointed by the President, by and with the consent of the Senate (12 U. S. C. 638; E. O. 6084, Mar. 27, 1933). The Farm Credit Administration operates under the general supervision of the Secretary of Agriculture (Reorganization Plan No. 1, part 4, sec. 401, Apr. 25, 1939).

Each of the 12 banks operates under the direction of a district farm credit board of seven members, who are ex officio the directors of the Federal intermediate credit bank, Federal land bank, district bank for cooperatives, and production credit corporation serving the district ( 12 U. S. C. 640 b and 640d). Each unit has a separate staff of executive officers and employees, but a general agent and his staff, employed by the district board, serve as joint officers and employees of all four institutions, to coordinate their activities and furnish such services as legal, information, statistical, personnel administration, etc. (12 U. S. C. 640r (a)).

## Financial Organization

To provide the system with financial stability and to enable the banks to finance their lending operations through the issuance and sale of debentures in the investment markets, the act fixed the capital at $\$ 5,000,000$ for each bank, a total of $\$ 60,000,000$ for the system ( 12 U. S. C. 1061). This capital was paid in by the Secretary of the Treasury from time to time as called by the boards of directors of the banks with the approval of the Federal Farm Loan Board (later the Farm Credit Administration). Final payment of the $\$ 60,000,000$ originally authorized was made in June 1933. Additional capital for the system was provided by the Federal Farm Mortgage Corporation Act of January 31, 1934. The act created a revolving fund of $\$ 40,000,000$ and authorized the Governor of the Farm Credit Administration, with the approval of the Secretary of the Treasury, to expend such amounts as he deemed necessary for subscriptions to the capital stock and/or paid-in surplus of the Federal intermediate credit banks (12 U. S. C. 1131i, 1061c). This fund was used in 1934 to pay in $\$ 10,000,000$ of additional capital and $\$ 30,000,000$ of paid-in surplus. These funds were returned to the United States Treasury in the fiscal year 1941, and are held in a revolving fund available for further subscriptions of capital and surplus in the event need therefor should arise.

Out of their earnings to June 30, 1946, after having paid all interest and operating costs, the intermediate
credit banks had built up surplus accounts aggregating $\$ 23,286,317$, in addition to reserves of $\$ 9,090,000$ to provide for unforeseeable losses and contingencies which might arise, and had paid franchise taxes to the United States in the aggregate amount of $\$ 6,958,555$. Therefore, as of June 30, 1946, the banks had paid-in capital and unimpaired surplus totaling $\$ 92,376,317$.

Each Federal intermediate credit bank is authorized, with the approval of the Farm Credit Administration, to borrow money and to issue and sell collateral trust debentures. Upon like approval the 12 banks are authorized to issue consolidated debentures, upon which all 12 banks are jointly and severally liable. The Secretary of the Treasury is consulted with respect to each sale of debentures offered to the public.

## Analysis of Budget Program by Major Activities

The budget of the 12 Federal intermediate credit banks is based on two distinct types of operations: (1) their lending program, and (2) their financing program.
Lending program.-The Federal intermediate credit banks are authorized and empowered, subject solely to such restrictions, limitations, and conditions as may be imposed by the Farm Credit Administration not inconsistent with the law (12 U.S. C. 1031 et seq.), to engage in three types of lending activities, namely: (a) purchasing and discounting agricultural paper for agricultural or livestock credit corporations and similar institutions, organized under State laws, as well as for State and National banking institutions; making loans to such institutions secured by such paper; and making loans to and discounting paper for production credit associations; (b) making loans to cooperative associations of agricultural producers and livestock growers, secured by staple agricultural products or livestock, or by other collateral approved by the Governor; and (c) discounting paper for and making loans to the banks for cooperatives organized under the Farm Credit Act of 1933.
During the year ended June 30, 1946, the banks made oans and discounted paper amounting to $\$ 909,298,726$ and received repayments of $\$ 877,273,257$. For 1947, lending activities are estimated at $\$ 961,574,100$, with repayments of $\$ 922,926,900$, and for 1948 at $\$ 1,007,341,700$, with repayments of $\$ 985,845,800$.
Being banks of discount, the Federal intermediate credit banks do not initiate lending programs or promote and develop a demand for their services. It is their function, expressly authorized and clearly defined in the act, to finance eligible and acceptable paper in whatever volume may be offered by institutions qualified to receive credit from the banks. Their volume of business thus is governed by the demand for credit, which is affected by general economic conditions, prices of agricultural commodities, crop and livestock yields, and other variable factors, rather than by administrative action, and their budget estimates accordingly are subject to material variations.

A materially increased demand for credit during the remainder of 1947 and a further increase during the fiscal year 1948 are expected. The volume of loans and discounts of the Federal intermediate credit banks has shown a decided upward trend, particularly during the latter
part of the year ended June 30, 1946, and that trend is expected to continue at least through 1948. Increased demand for credit is a reflection of a number of factors, including continued production at a high level, increased production costs, shifts in types of farming, replacements of worn machinery, purchases of new types of equipment required to operate farms which are being converted to more complete mechanization, and purchases of livestock for feeding as well as for restocking purposes.

In estimating the prospective volume of business of the intermediate credit banks for the fiscal year 1948, it has been assumed that there will be no extreme change in the general level of agricultural and livestock production compared with recent years. Although it is expected that there will continue to be an active market at reasonable price levels for most agricultural products, reductions in prices of some commodities, as compared with the war period, are anticipated. Changes are expected in the types of agricultural production prevailing in some areas, particularly in those sections where farmers have in the past relied largely upon one cash crop for income. The world cotton situation, for example, is likely to have a marked effect upon farming activities in a large part of the cotton growing regions of the South, where there is already evident a shift from cotton to other crops on small farms and more extensive mechanization of larger producing units. These changes will require extensive use of credit to finance necessary changes in production methods as well as for purchases of machinery to operate the larger units.

The demand for credit to finance livestock feeding operations fluctuates widely because of variations in feed supplies and costs, price relationships between feeder and finished livestock and other factors, including general economic conditions. It is expected that during the fiscal year 1947 feed-lot operations will expand materially over the level of recent years and, consequently, additional credit will be required. Whether similar conditions will prevail in the fiscal year 1948 depends largely upon the grain crop to be harvested in the fall of 1947 and the extent to which range cattle reach the Corn Belt area for feeding, as well as the price relationship between the feeder cattle market and the fat-cattle market.

Financing program.-The Federal intermediate credit banks finance their lending activities principally through the issuance and sale to the investing public of consolidated collateral trust debentures and by borrowing money ( 12 U. S. C. 1041 et seq.), rather than through the use of appropriated funds. Loans from commercial banks ordinarily are utilized only when unexpected demands arise between regular monthly debenture issue dates. The United States Government assumes no liability for the debentures or other obligations of the intermediate credit banks, and that fact is required to be set forth on the face of their debentures ( 12 U. S. C. 1043). The banks consult the Secretary of the Treasury concerning each sale of debentures before offering them to the public

During the fiscal year 1946, the banks issued debentures and borrowed money aggregating $\$ 465,155,000$ and retired obligations of $\$ 427,235,000$. For 1947, it is estimated that debentures and other borrowings will amount to $\$ 622,083,000$ and that $\$ 577,094,000$ will be retired. For 1948, borrowings are estimated at $\$ 695,576,000$, with repayments of $\$ 673,348,000$. The estimated increase in debenture financing reflects not only the estimated increase in lending activity to be financed but also some shortening of average debenture maturities. The estimates are based upon the assumption that average maturi-
ties will be 6 months. Shortening the maturities to less than 6 months would increase the amount to be sold and retired, while longer maturities would require the issuance and retirement of a lesser aggregate amount.

## Operating Results

The net income of the intermediate credit banks for the year ended June 30,1946 , was $\$ 1,467,071$, after all expenses, adjustments of valuation reserves, net charge-offs or recoveries, etc.; and it is estimated, on the basis of prospective volume of business, rate of income and cost of money, that net income will be $\$ 1,231,300$ for 1947 and $\$ 1,099,200$ for 1948.

Income.-The income of the Federal intermediate credit banks is derived principally from interest or discount on loans and discounts, and interest on investments. Gross income from loans and discounts amounted to $\$ 4,490,428$ in 1946. On the basis of their prospective volume of business, rate of income, and cost of money, it is estimated that such income will be $\$ 4,929,500$ for 1947 and \$5,344,500 for 1948.
Interest earned on investments is determined by the average amount of securities owned and the rate of interest borne by the securities. Such income amounted to $\$ 972,764$ in 1946 and is estimated at $\$ 1,040,300$ for 1947 and $\$ 1,042,400$ for 1948 . These estimates presuppose no material change in the investment holdings of the system.

The income of the banks for the fiscal year 1946 included $\$ 436,132$ of profits (excess of selling price over carrying value) on securities sold, less $\$ 185,459$ of premium written off on securities purchased during the year. No profits or premium write-offs are estimated for the fiscal year 1947 or 1948, since it is impossible to determine in advance what security transactions, if any, will occur or at what prices securities may be sold or purchased. The Secretary of the Treasury, or his designated representative, is consulted prior to each purchase or sale of securities amounting to $\$ 100,000$ or more.
Expenses.-The expenses of the banks consist principally of interest and other costs on outstanding debentures and other borrowed money, and administrative expenses. In addition to their direct expenses, the banks are assessed for the cost of supervision and examination by the Farm Credit Administration and they will be assessed for the cost of audits by the General Accounting Office. All expenses of the banks are paid out of their income.

The intermediate credit banks also pay the banks for cooperatives for servicing commodity loans discounted for them, calculated at $66 \frac{2 / 3}{}$ percent of the difference between the average cost of outstanding debentures and the discount rate charged.

Interest and other costs on debentures, together with interest paid on other borrowed money, amounted to $\$ 2,653,830$ in 1946, and are estimated at $\$ 3,101,500$ and $\$ 3,455,400$ for 1947 and 1948, respectively. The increases over actual 1946 reflect estimated increases in amounts of debentures outstanding, calculated at interest rates only fractionally above the rates paid in 1946. Actual costs may differ considerably from these figures if the average volume of debentures outstanding should vary materially from the amounts estimated or if the level of interest paid should change substantially. Higher interest costs might be brought about by a rise in interest rates, generally, or by the issuance of longer-term debentures to finance longer-term (2- to 3 -year) loans for the purchase of equipment and for other capital expenditures. Administrative expenses, which amounted to $\$ 1,580,586$ for 1946 , are esti-
mated at $\$ 1,585,000$ and $\$ 1,755,000$ for 1947 and 1948, respectively.

Franchise taxes.-Each bank, at the end of its fiscal year, is required to pay to the United States a franchise tax equal to 25 percent of the amount of its net earnings for the year after providing for all costs of operation, absorbing any losses in excess of reserves therefor, eliminating any impairment of paid-in capital or paid-in surplus, and providing reserves against unforeseen losses and assets of doubtful value in such amount as its board of directors has prescribed (12 U. S. C. 1072). Since their organization in 1923, the Federal intermediate credit banks have paid to the United States Treasury franchise taxes aggregating $\$ 6,958,555$, of which $\$ 288,018$ was paid in July 1946 , and represented the franchise tax on earnings for the fiscal year ended June 30, 1946. It is estimated that franchise taxes will amount to $\$ 231,600$ and $\$ 188,600$ for 1947 and 1948, respectively.

Net earnings for the fiscal year ended June 30, 1946, after provision for the payment of franchise taxes and reserve for contingencies amounted to $\$ 864,053$. It is estimated that such net earnings will amount to $\$ 694,700$ and $\$ 565,600$ for the fiscal years 1947 and 1948, respectively.

## Financial Condition

Loans and discounts.-Loans and discounts outstanding on June 30, 1946, aggregated $\$ 347,856,705$, net (after deducting full valuation reserves against purchase money mortgages and real estate sales contracts amounting to $\$ 9,300$ ). Of this amount $\$ 237,544$ was secured by notes under Commodity Credit Corporation loan programs and documents evidencing purchases of commodities by that Corporation. Delinquent loans and discounts amounted to $\$ 3,962,827$, of which less than $\$ 12,034$ was past due 3 months or more. All paper carried by the intermediate credit banks (except direct loans to cooperative associations, which are secured by approved collateral) is required to be endorsed by the bank, corporation, or association for which it is discounted. No loss to the intermediate credit banks on any presently outstanding loans and discounts is in prospect. It is estimated that outstanding paper will amount to $\$ 386,505,605$ and $\$ 408,003,105$ on June 30 , 1947 and 1948, respectively.

Investments.-Investments in public debt obligations of the United States amounted to $\$ 36,511,000$ (par value) on June 30, 1945. These holdings were increased to $\$ 43,150$,800 as of June 30, 1946. No change in the amount of securities held by the banks is contemplated for the years 1947 and 1948. Purchases and sale of approximately $\$ 7,738,500$ may be made during 1947, and $\$ 9,000,000$ in 1948, to rearrange the portfolios of the several banks in line with the policy of liquidating holdings as they approach call dates and reinvesting the proceeds, and to employ temporary accumulations of surplus cash. All investment securities are carried by the banks at par, or at amortized cost in the case of purchases below par, and any premium paid is written off at the time of purchase.

Investments in obligations of the United States provide the banks with a diversification of assets, which is an important factor in enabling the banks to obtain loan funds through the investment markets at reasonable cost for the benefit of agriculture. They also provide the banks with liquid assets, which can be utilized in emergencies to provide funds to finance lending operations or to meet maturing debentures. In addition, investment securities constitute a source of income which aids the banks materially in building up reserves.

Liabilities.-The principal liabilities of the banks consist of their outstanding debentures and notes payable, and interest accrued thereon but not yet due. At June 30, 1946, the banks had outstanding debentures and notes payable aggregating $\$ 310,895,000$, and estimated the amount outstanding would be $\$ 355,884,000$ and $\$ 378$,112,000 at the end of 1947 and 1948, respectively. Interest accrued but unpaid amounted to $\$ 979,739$ on June 30, 1946, and was estimated at $\$ 1,109,339$ and $\$ 1,217,139$ at June 30, 1947 and 1948, respectively.

Return of capital funds to the Treasury.-No return of present Government capital, which is in the amount fixed by statute ( 12 U. S. C. 1061), is provided for in 1948. The capital made avallable by law to the intermediate credit banks is considered adequate to enable them to carry out their authorized functions and to finance the increased volume of business expected to be offered to them through June 30, 1948.
Borrowing authority.-The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times the surplus and paid-in capital of such bank ( 12 U. S. C. 1041). Since the banks on June 30, 1946, had paid-in capital and unimpaired surplus reserves aggregating $\$ 92,376,317$ they had a legal borrowing authority of $\$ 923,763,000$. Any increase in net worth since that date increases the legal borrowing power of the banks. No additional borrowing authority is needed during 1948. Although authority is provided to incur obligations in the ratio of 10 to 1 against capital and surplus, the banks have no assurance that the investment markets would absorb their debentures in an amount approaching their legal borrowing capacity. Should the banks find it necessary to borrow materially in excess of a 4 to 1 ratio, some buyer resistance might be expected and it would be likely that interest costs would advance.

## Administrative Expenses

Administrative expenses amounted to $\$ 1,580,586$ for the fiscal year ended June 30, 1946, and are estimated at $\$ 1,585,000$ and $\$ 1,755,000$ for 1947 and 1948 , respectively.
The major portion of the increase of $\$ 170,000$ in estimated total administrative expenses for 1948 over estimated 1947 costs is reflected in the following categories:

The amount budgeted for salaries and wages includes provision for 25 additional average positions for the system, an average of 2 additional employees for each of the 12 banks, as compared with the fiscal year 1947. The increase consists of 6 credit examiners, 3 accountants, 14 stenographic and clerical employees, and a total of 2 others made up principally of fractional man-years in several categories. The banks expended 291 man-years in their operations for the fiscal year ended June 30, 1946, and, because of the administrative expense limitations imposed in the 1947 act, reduced their personnel to approximately 273 man-years for 1947 . The increased requirements for 1948, therefore, reflect the need for additional personnel not only to handle expeditiously the increased volume of
business in prospect but, also, to enable the banks to give to their loans and discounts that degree of careful consideration and attention which has enabled them in the past to maintain their services to agriculture upon a sound basis. Continuation of a sound operating program requires more exhaustive credit analyses, additional field work, and similar activities which were largely deferred during the war and which the present limited manpower of the banks will not permit in the fiscal year 1947.

The amount budgeted for purchases of equipment is for replacement of typewriters, bookkeeping machines, etc., and for automobiles, which are badly worn and, therefore, both inefficient in operation and costly to maintain. Virtually all equipment, including automobiles, owned by the banks is over 6 years old and the present estimated expense represents an accumulation of needed purchases deferred during the war emergency and further deferred in 1947.

The estimated increase for travel expense is needed to permit the banks to resume more comprehensive servicing of their outstanding loans and discounts. During the war
period all the banks reduced their travel and field work to emergency and other urgent cases and eliminated or deferred all other trips. Thus, the estimated cost for 1948 reflects some needed travel deferred from the current year.

## Language

## Administrative Expenses, Federal Intermediate Credit Banks-

Federal Intermediate Credit Banks: [Provided, That not] Not to exceed $[\$ 1,500,000] \$ 1,755,000$ (to be computed on an accrual basis) of the funds of the Banks shall be available for administrative expenses, including the purchase of not to exceed ten passenger motor vehicles, services performed for the Banks by other Government agencies (except services performed by the Banks for cooperatives in connection with loans to cooperative associations rediscounted or pledged with the Federal Intermediate Credit Banks, and services performed by any Federal Reserve bank and by the U. S. Treasury in connection with the financial transactions of the Banks), and not to exceed $\$ 5,000$ for penalty mail; and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Banks or in which they have an interest. (Act of July 20, 1946, Public Law 5.19.)

[^62]
## PRODUCTION CREDIT CORPORATIONS

## Creation and Purpose

The 12 production credit corporations were chartered in 1933 by the Governor of the Farm Credit Administration pursuant to the Farm Credit Act of 1933 (12 U. S. C. 1131). Each corporation serves one farm credit district (12 U. S. C. 640a and 1131). Establishment of the production credit system was an outgrowth of various efforts to cure long-standing weaknesses in the short-term agricultural credit field. Experience had shown that insufficient capital, inadequate supervision, and the dependence on local resources generally for loanable funds for agricultural production were the chief weaknesses.

The principal functions of these corporations are to organize, partially capitalize, and supervise local cooperative production credit associations ( $12 \mathrm{U} . \mathrm{S} . \mathrm{C} .1131 \mathrm{c}$, 1131d et seq.). These associations operate under their local farmer boards of directors and a primary objective is to achieve a status of complete local farmer ownership. The active associations, of which there were 505 on June 30, 1946, together with the 12 corporations operating under the supervision of the Farm Credit Administration constitute a permanent system for making short-term agricultural credit available to farmers and stockmen in all parts of the country and Puerto Rico.
In each district the Farm Credit Board elected or appointed as prescribed by law ( 12 U. S. C. 640b-640r) serves as the board of directors of the corporation (12 U. S. C. 1131). The board of directors represents the agricultural and public interests in the district. Members of the board do not serve as officers of the district institutions. A typical production credit corporation has a staff of about 18 officers, clerical employees, and field force. In addition, the general agent together with a limited staff employed by the district board generally furnishes at cost legal, information, personnel, statistical, and purchasing services for the corporations (12 U.S. C. 640 r (a)).

The Farm Credit Administration, through its Production Credit Division, exercises general supervision over the corporations ( 12 U. S. C. 1131 et seq.). The corporations are examined annually by the Farm Credit Administration (12 U. S. C. 1138a) and are assessed for the costs of both supervision and examination (12 U. S. C. 832 and 1138a). In addition, annual audits by the General Accounting Office are required (59 Stat. 597).

## Financial Organization

The Farm Credit Act of 1933 provides that the capital stock of each corporation shall be in such amount as the Governor of the Farm Credit Administration determines is required to meet the credit needs of the district to be served by each corporation and such amount may be increased or decreased from time to time by the Governor in accordance with such credit needs (12 U. S. C. 1131b). The initial capital stock of each corporation was provided in the sum of $\$ 7,500,000$ to be subscribed by the Governor and held by him on behalf of the United States. Payment for capital stock was made from a revolving fund of $\$ 120,000,000$ provided for the purpose (12 U, S. C. 1131 i ).

Additions to the initial capital stock were made by the Governor until March 1935 when the full $\$ 120,000,000$ had been subscribed and subscriptions in that sum were maintained for most of the period from that time to March 1944. During that period a general redistribution of capital stock was made on three occasions while transfers affecting several corporations were made on two other occasions.
The capital of the corporations and most of their surplus is invested in class A stock of production credit associations and in United States Treasury bonds. The income from the Corporations' investments is used to pay expenses and to build reserves ( 12 U. S. C. 1131c (c)). Each corporation is required to accumulate a surplus of at least 25 percent of its paid-in capital, and good progress toward this objective has been made. One corporation now has a surplus in excess of 25 percent of its paid-in capital and in the others it ranges from 10.3 to 18.7 percent. On June 30,1946 , the surplus of all the corporations aggregated $\$ 15,558,370$ or 15.4 percent of their paid-in capital. This surplus not only safeguards the paid-in capital against impairment but directly influences the amount of paid-in capital required.
Pursuant to the policy of retiring the capital stock of corporations to the extent feasible, repayments were made to the revolving fund in the United States Treasury in the sum of $\$ 5,000,000$ in April 1944, $\$ 6,700,000$ in April 1945, and $\$ 7,050,000$ in May 1946. On June 30, 1946, the aggregate paid-in capital of the corporations was $\$ 101$,250,000 .
The corporations bave no specific borrowing authority and have never had occasion to resort to borrowed funds. Each of the corporations is a separate entity and operates within its own financial structure. A comparative consolidated statement of condition is shown in Exhibit C.

## Analysis of Budget Program by Major Activitids

The primary functions of the production credit corporations are (1) to organize, (2) to partially capitalize, and (3) to supervise production credit associations. Their administrative expenses relate largely to the function of supervision. The extent of the corporations' activities is affected directly by economic conditions, the production credit associations' loan volume, and their credit, management, and operating problems.
Organizing production credit associations.-Production credit associations have been established to serve all of the continental United States and Puerto Rico, pursuant to the authority of the act ( $12 \mathrm{U} . \mathrm{S} . \mathrm{C} .1131 \mathrm{c}$ and 1131d). The territory served by an individual association depends largely upon the type of agriculture and density of farm population. The credit needs of the area served by each association are under constant study by the corporations. As a result, it is from time to time found advisable by the corporations and associations to effect changes in the territory served by individual associations, to bring about liquidation or consolidation of associations, to establish branch offices of associations so that service to farmers will be more efficient and convenient, and occasionally to organize additional associations. A typical association
serves about five or six counties and in addition to its main office has two branch or field offices.

Capitalizing production credit associations.-Associations need an adequate capital structure to soundly support their loan volume, to maintain satisfactory borrowing and discount relationships with the Federal intermediate credit banks which are their principal source of loanable funds ( 12 U. S. C. 1131h), and to assist in building reserves for future contingencies. Accordingly, the capital needs vary greatly among associations.
Loan volume, which has a most important bearing on association capital needs, is expected to increase some in 1947 and possibly somewhat further in 1948, due to a larger number of borrowers from the associations and possibly some increase in the size of loans due to higher costs, increased mechanization, and a lower margin of net farm income.
The associations' initial capital was derived through the purchase of their class A stock by the corporations ( 12 U. S. C. 1131c). As the capital owned by farmer members has increased and the associations have accumulated reserves, they have been able to reduce materially, and in two instances to pay off completely, the class A stock investment of the corporations.

The desire of farmer members to achieve complete ownership of their associations has been increasing and is expected to continue to grow, and farmer-owned capital and reserves of the associations are increasing rather rapidly. As of June 30, 1946, total accumulated earnings (reserves) and member-owned capital represented 60.2 percent of the total net worth of the associations as a group.

As a result, the production credit corporations expect to be able to make a substantial net reduction in their capital investment in production credit associations in both 1947 and 1948, notwithstanding the anticipated increase in loan volume. However, local factors and the variations in capital needs among the associations may require some increases in the corporations' capital investment in individual associations.

Long-term stability requires that the corporations be able to make immediate additional capital investments in associations to meet the credit needs of their areas. Such action may be imperative in the event of a rapid increase in loan volume or depressed economic conditions, hurricanes, floods, or other catastrophes. Without this ability on the part of the corporations, farmers and stockmen served by the associations might have to be denied sound and justifiable credit necessary for their operations at a most critical time.

The corporations are charged with the responsibility of regulating associations' investments (12 U. S. C. 1131f and $g$ ) and it is considered important to the welfare of the associations that their capital structure should not be affected by fluctuations in bond prices. Association class A stock purchased by the corporations is paid for largely by transferring bonds from the corporations to the associations. The reverse is true when corporationowned A stock is retired. As farmer-owned capital and reserves have accumulated, additional funds have become available for investment in bonds in like manner. All bonds transferred to associations by the corporations are transferred at par value under repurchase agreements and are subject to the right and obligation of the corporations to repurchase at par value. Thus premiums or discounts on bonds purchased or sold are borne by or accrue to the corporations.

Supervising production credit associations.-Under the act (12 U.S.C. 1131d et seq.) and regulations thereunder,
the corporations are charged with supervision of the associations. Thus the corporations have broad authorities, such as regulating loan and investment policies, approving loans in excess of certain amounts and to certain officials, fixing minimum reserve requirements, exercising controls over association salaries, and, as long as the corporations own stock in the associations, approving election of association directors, loan committeemen, and the secretarytreasurers. As associations' managements have gained in experience and as their locally owned capital structures have developed, the corporations have exercised their authorities and supervisory responsibilities to an increasing extent through leadership, guidance, counsel, and training rather than by direction and regulation. This policy of decentralization makes it essential that corporation personnel, especially field personnel, be of high caliber and that the association personnel be sufficiently experienced and trained to assume increased responsibilities. Officers and field representatives of the corporations work with association directors and personnel largely through contacts at the association offices and occasional group meetings for neighboring associations. The degree of training and supervision varies among associations, depending upon their need for such assistance in properly discharging their responsibilities for carrying on all phases of the association operations.

In carrying out their supervisory responsibilities, the corporations have emphasized the extension of sound credit; continual improvement of service to farmers; increased participation in association affairs by members; promotion of efficiency and economy; maintenance of effective controls over financial transactions; determination through audits that funds are properly accounted for; and preparation of annual budgets. Special attention is now being given to aiding association boards of directors in working out programs and means of speeding the attainment of farmer ownership of their associations.

To carry out the supervisory program as outlined above, a broad and continuous training program for association personnel is of major importance. The corporations have a primary responsibility for the training of association directors and key officers and have assisted the associations in the training of specialized employees such as inspectors and bookkeepers and in arranging for adequate training programs by the associations for their other personnel.

The corporations make an annual review of the credit activities of each association which serves as a basis for credit supervision during the whole year. This includes an examination of loans which is utilized by the Farm Credit Administration, together with the financial examination made by its examiners, to meet the requirements of law pertaining to examinations of associations ( 12 U.S.C. 1138a). In view of this use of the credit examinations, the associations are assessed for the costs attributable thereto as a part of examination costs.

## Operating Results

The principal source of income of the corporations, other than profits on sales of securities, is interest on their investments in public debt obligations of the United States. There has been a moderate increase in the number of associations paying dividends; however, dividends have not been a major source of income to the corporations inasmuch as it is the policy to reduce the corporations' class A stock investments as rapidly as the associations are able to do so. During the fiscal year 1946 the combined income of the corporations, exclusive of profits on sales of securities, exceeded their administrative expenses
by $\$ 207,451$ and it is anticipated that, similarly, the combined income of the corporations from interest, dividends, and assessments for credit examinations will be sufficient to cover their administrative expenses for the fisoal years 1947 and 1948. Also, during the fiscal year 1946 a net profit of $\$ 2,657,407$ was realized on security transactions as a result of bond portfolio adjustments and sales of bonds to provide cash for capital retirements. It is anticipated that the net profit on securities transactions will be much smaller in 1947 and 1948 since no important adjustments in the bond portfolios are now anticipated.
During the fiscal year 1946 as a result of collections on loans by associations in liquidation the corporations were able to reduce valuation reserves on their investment in the class A stock of these associations by $\$ 16,900$. The increase of $\$ 39,759$ in 1946 in the reserve for investment in structures results from recording full depreciation by one corporation of its undivided interest in an office building occupied by the units of the Farm Credit Administration of that district. Heretofore depreciation has been recorded annually on an amortization basis.

## Financial Condition

Investments in class $A$ stock of production credit associa-tions.-On June 30, 1946, the corporations had an investment totaling $\$ 48,068,115$ in the class A capital stock of associations. This includes $\$ 130,700$ representing the balances of their investments in class A stock of four associations which had been placed in liquidation prior to 1940, valuation reserves, however, having been established prior to June 30, 1946, to provide for all foreseeable losses. The investment in class $A$ stock is expected to be further reduced to about $\$ 38,000,000$ by June $30,1948$.

United States Government bonds.-The corporations' investment in United States Government bonds amounted to $\$ 67,824,950$ par value on June 30, 1946 (exclusive of securities sold to production credit associations under repurchase agreements). The corporations carry all of these investments at par value; accordingly, premiums paid were written off at time of purchase.

The corporations require resources substantially in excess of the amount currently invested in association class A stock to quickly meet developments in the agricultural credit field which would require strengthening of association capital structures. Resources not needed currently for class $A$ stock investments in associations are
invested in bonds, the interest from which represents the corporations' principal source of operating income.

Return of capital funds to the Treasury.-Repayments to the revolving fund during 1944, 1945, and 1946 had reduced paid-in capital of the corporations from $\$ 120,000,000$ to $\$ 101,250,000$ at June 30, 1946. Further repayments will depend upon future capital needs of the system but it is estimated that $\$ 5,300,000$ will be returned during 1947 and $\$ 4,800,000$ during 1948.

## Administrative Expenses

Administrative expenses cover the costs of carrying out the corporations' responsibilities as above described and the assessed expenses of the central office of the Farm Credit Administration, but exclude premiums written off on securities purchased and losses. The estimate of $\$ 1,650,000$ for 1947 comprises the approved $\$ 1,600,000$ plus $\$ 50,000$ to cover a part of the additional cost of personal services due to base pay increases. In the fiscal year 1948, a further increase of $\$ 52,000$ will be needed to provide for an increase of $\$ 23,439$ in the supervisory assessments by the Farm Credit Administration; the inclusion of $\$ 5,000$ for penalty mail; and other increases in the net amount of $\$ 23,561$. Largely because of decentralization which has occurred in the intervening years, the required personnel in 1948 will be more than 25 percent lower than in the prewar years, notwithstanding a substantial increase in association loan volume. Total administrative expenses of the 12 production credit corporations for the fiscal year 1948 are estimated at $\$ 1,702,000$ comprising $\$ 1,431,983$ for expenses at the district level and $\$ 270,017$ for expenses of supervision and examination by the central office of the Farm Credit Administration to be assessed to the production credit corporations.

## Language

Administrative Expenses, Production Credit Corporations-
Production Credit Corporations: [Provided, That not] Not to exceed [\$1,600,000] $\$ 1,702,000$ (to be computed on an accrual basis) of the funds of the corporations shall be available for administrative expenses, including the purchase of not to exceed twenty-four passenger motor vehicles, services performed for the corporations by other Government agencies, and not to exceed $\$ 5,000$ for penalty mail; and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the corporations or in which they have an interest. (Act of July 20, 1946, Public Law 519.)

| Administrative expenses, Production Credit Corporations. | 24 | $1 \$ 29,900$ | 24 | \$15,800 | \$14, 100 | 45 | $\left.{ }^{2}\right)$ | Used by officers and field employees of the corporations for necessary travel in connection with the supervisory responsibilities of the corporations over the Production Credit Association's, principally travel to association offices and as required to the farms of association directors, applicants for loans, and borrowers. |

1 The gross cost figure here shown represents the estimated cost of these gutomobiles delivered to the corporations. production credit corporations at a mileage rate estimated to cover cost of maintenance and operation, including depreciation, has not been treated as being under the requirements of sec. 16, act of Aug. 2, 1946 (Public Law 600 ).

## REGIONAL AGRICULTURAL CREDIT CORPORATION OF WASHINGTON, D. C.

## Creation and Purpose

Following an extreme credit stringency during 1930-31, the Reconstruction Finance Corporation was created January 22, 1932 (47 Stat. 6), with authority to make loans to aid in financing agriculture, either directly or by way of discount or rediscount of obligations. Section 201 (e) of the Emergency Relief and Construction Act of 1932, approved July 21, 1932, extended the power of the Reconstruction Finance Corporation by authorizing it to establish a regional agricultural credit corporation in any Federal land bank district (now Farm Credit Administration district) where the need existed (12 U.S. C. 1148). Under that authority, 12 regional agricultural credit corporations, 1 in each Federal land bank district, were chartered during September and October 1932 to make loans to farmers and stockmen for agricultural purposes.
These corporations were supervised and controlled by the Reconstruction Finance Corporation until May 27, 1933, when such supervision and control was transferred to the Farm Credit Administration by Executive Order 6084, dated March 27, 1933. The Farm Credit Administration has administered, supervised, and directed the activities of the regional agricultural credit corporations since that date. Effective July 1, 1939, the Farm Credit Administration and the corporations were placed within the Department of Agriculture under the general direction and supervision of the Secretary of Agriculture, pursuant to section 401, part 4, Reorganization Plan No. 1, dated April 25, 1939.

As a result of the creation and development of the production credit system and the resumption of more active lending operations by commercial banks, it became apparent that in some farm credit districts the lending activities of these corporations could be curtailed without detriment to the farmers. Accordingly, the Farm Credit Act of 1937 authorized the consolidation or merger of the regional agricultural credit corporations ( $12 \mathrm{U} . \mathrm{S} . \mathrm{C}$. 1148c). By a series of orders these corporations were merged into the Regional Agricultural Credit Corporation of Washington, D. C., the only regional agricultural credit corporation now in existence. The last of the mergers occurred on January 31, 1944.

## Financial Organization

Originally the capital stock of the regional agricultural credit corporations was subscribed and paid for by the Reconstruction Finance Corporation, as authorized by the Emergency Relief and Construction Act of 1932 ( 12 U. S. C. 1148). The stock was held by the Reconstruction Finance Corporation for and on behalf of the United States until March 22, 1938, when, pursuant to Executive Order 7848, it was transferred to the Secretary of the Treasury to be held for and on behalf of the United States. All of the stock of the Corporation is now held by the Secretary of the Treasury, but the supervision and control of the Corporation is vested in the Farm Credit Administration. However, the Reconstruction Finance Corporation continued to pay the administrative expenses of the Regional Agricultural Credit Corporation of Wash-
ington, D. C., as provided by section 201 (e) of the act of July 21, 1932 (12 U. S. C. 1148). During the period from the organization of the regional agricultural credit corporations through June 30, 1946, the Reconstruction Finance Corporation advanced $\$ 21,771,756$ for the payment of expenses incurred by the regional agricultural credit corporations, this amount being reflected as paid-in surplus on the comparative statement of financial condition of the Corporation which follows the textual material (exhibit C).

The original capital stock issued by the 12 regional agricultural credit corporations in 1932 amounted to $\$ 36,000,000$; additional stock issued during 1932 and 1933 increased this amount to $\$ 44,500,000$, which represented the maximum amount outstanding at any time. By April 30, 1938, the corporations had returned $\$ 39,500,000$ of their capital to the United States Treasury, where it was held in a revolving fund set-up under section 84 of the Farm Credit Act of 1933 (12 U. S. C. 1148a). This revolving fund was available for use in increasing the capital of any regional agricultural credit corporation. In February 1943, when the Regional Agricultural Credit Corporation of Washington, D. C., entered upon a program of making loans to finance increased production of foods and fibers needed to meet war requirements, the $\$ 39,500,000$ in the revolving fund was utilized to increase the capital of the Regional Agricultural Credit Corporation of Washington, D. C., to enable it to carry out its food production financing program. During the fiscal year 1945, $\$ 44,400,000$ of capital was repaid to the revolving fund, leaving $\$ 100,000$ of capital now outstanding.

The Corporation is authorized to rediscount eligible paper with the Reconstruction Finance Corporation, Federal Reserve banks, and the Federal intermediate credit banks (12 U.S.C.1148). The Corporation is also authorized to borrow (other than by way of discount) from the Reconstruction Finance Corporation or any Federal intermediate credit bank ( 12 U.S. C. 1148b). The Corporatiou has not recently utilized this authority and, except for unforeseen emergencies, does not contemplate a need for borrowing funds during the fiscal year 1948.

## Ańalysis of Budget Program by Major Activities

In appraising the budgetary requirements of the Corporation for the fiscal year 1948 it is assumed the Corporation will continue to engage in two distinct phases of lending operations; (1) the making of loans or advances in restricted areas which the Secretary of Agriculture shall have designated as regions in which the making of such loans or advances is necessary; and (2) the orderly liquidation of outstanding loans and advances, including those made under the food production program of 1943 and the Wenatchee fruit loans. Also it is assumed that agricultural conditions will not change substantially. The extent to which these activities were carried on during the fiscal year 1946 and the projected level for the years 1947 and 1948 are shown in the financial statements immediately following the textual material.

Restricted area loans.-Pursuant to section 2 of the Department of Agriculture Appropriation Act of 1944 (57

Stat. 428) and subsequent years, including 1947, the Secretary of Agriculture, beginning in October 1943 and from time to time thereafter, has authorized and directed the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to finance the production of specified crops and livestock in certain regions in various States designated as regions in which such loans were necessary in order to finance the production of crops or livestock that otherwise would not be produced.

During the fiscal year 1948 it will be the policy to make loans only when, because of economic emergencies or production disasters, the Corporation is so authorized by the Secretary of Agriculture, and these loans will be confined to specified areas or regions, to specified agricultural purposes, and to limited time periods. These loans will carry the full personal liability of the borrower and will be secured by crops or livestock and such additional collateral as is deemed necessary to afford reasonable assurance of repayment. Certificates of refusal of the loans by local banks or the production credit association serving the area will be required before the Corporation approves loan applications.

Through June 30, 1946, the Corporation had made loans under the restricted area program amounting to $\$ 7,894,388$, of which $\$ 786,806$ was still outstanding on that date. It is forecast that $\$ 1,000,000$ and $\$ 1,500,000$ will be advanced during the fiscal years 1947 and 1948, respectively. During the same periods it is estimated that $\$ 1,907,000$ will be collected and $\$ 114,000$ charged off, leaving a balance of $\$ 1,265,806$ outstanding at June 30, 1948.

Food production loans and advances.-Under Executive Order 9280, issued December 5, 1942, the Secretary of Agriculture was made responsible for establishing programs to obtain production of the increased quantities of food necessary to meet war requirements. To provide complete and positive assurance that there would be adequate credit to finance the extraordinary production of food, the Secretary, in January and February 1943, authorized the Corporation to make available to farmers additional credit to supplement that available from existing sources. Accordingly, two types of credit were made available to farmers, namely, F-1 loans and F-2 special war crop advances.

The loans and advances were made through the county war boards and loan representatives selected from personnel of the various agencies of the Department of Agriculture. Beginning with the calendar year 1944, the functions of servicing, accounting for, and collecting these loans and advances were performed for the Corporation principally by the emergency crop and feed loan offices of the Farm Credit Administration under the general supervision of the district vice presidents of the Corporation, who are the general agents of the 12 farm credit districts; however, effective September 1, 1946, the accounting and fiscal functions were recentralized in the Washington office. The district vice presidents, with the assistance of the field organization of the emergency crop and feed loan offices, continued to service these loans during the 1946 fall harvesting period. The loan servicing during the balance of 1947 and the entire 1948 fiscal years will be done by the Corporation with the assistance of the district vice presidents, through a small force of loan servicing personnel.
With the enactment of restrictions on the operation of this program in section 2 of the Department of Agriculture Appropriation Act, 1944 ( 57 Stat. 428), active lending operations under this program were discontinued afterJune 30,1943 , except for commitments already outstanding and
further loans and advances to aid in the collection of outstanding loans and advances. $\mathrm{F}-1$ and $\mathrm{F}-2$ type loans were discontinued after June 30, 1943.

Through June 30, 1946, the aggregate amount of credit extended through F-1 loans and F-2 advances totaled $\$ 69,261,709$ (including renewals). During this same period repayments amounted to $\$ 62,347,303$, charge-offs $\$ 590,403, \mathrm{~F}-2$ cancelations $\$ 3,409,094$, and transfers to acquired security or collateral $\$ 280,810$, totaling $\$ 66,627$,610, leaving $\$ 2,634,099$ outstanding at the end of the period. During the fiscal year 1947 it is expected that advances and renewals to aid collection will amount to $\$ 100,000$ and that during the same period the Corporation will charge off and cancel loans in the amount of $\$ 1,032,-$ 044, transfer to the acquired security account $\$ 75,000$, and receive in repayment $\$ 533,000$. For the fiscal year 1948 it is estimated that advances and renewals will amount to $\$ 100,000$, whereas charge-offs will amount to $\$ 365,000$, transfers to acquired security $\$ 35,000$, and $\$ 350,000$ will be received in repayments, leaving a balance of $\$ 444,055$ outstanding at June 30, 1948.

Wenatchee fruit loans.--In 1941 the Regional Agricultural Credit Corporation of Salt Lake City, Utah, which was later merged with the Regional Agricultural Credit Corporation of Washington, D. C., established a branch office at Wenatchee, Wash., to make loans to fruit growers in the north central area of the State of Washington. This branch office was opened at the urgent request of local organizations of fruit growers, bankers, and merchants after it had become impossible to obtain the necessary credit from other credit institutions in the area. The Regional Agricultural Credit Corporation went into the Wenatchee area after careful study by the Department of Agriculture and the local land-use planning committee. Financing by the Corporation was combined with general horticultural supervision for the rehabilitation of orchards in the area. Loans made through June 30,1946 , aggregated $\$ 34,306,683$, and the balance outstanding on that date was $\$ 359,669$.

As a result of the generally improved financial condition of the apple growers in the Wenatchee area and the availability of necessary credit from sources other than Regional Agricultural Credit Corporation of Washington, D. C., the making of new loans by the Corporation in this program will be discontinued by the close of the 1946 calendar year. The only lending activities contemplated will be those required for the servicing of loans made prior to that date. Unless unforeseen adverse agricultural conditions make it advisable for the Corporation to reinstate a lending program, the staff of the Wenatchee office will be reduced by July 1, 1947, to the minimum number required to cistribute the special and contributed reserve funds, to service the few loans that will remain unpaid, and to terminate the affairs of that office.
The Corporation expects to advance $\$ 400,000$ during the fiscal year 1947 and collections of $\$ 510,000$ are forecast for the same period, leaving an unpaid balance at June 30, 1947, of $\$ 249,669$. It is expected that advances in the aid of liquidation will amount to $\$ 50,000$ during the fiscal year 1948 and collections during the same period are forecast at a like amount, leaving the unpaid balance at June 30, 1948. unchanged.

Other loans.-The original loan program of the regional agricultural credit corporations was initiated upon their organization in 1932 (12 U. S. C. 1148), and in May 1934 they discontinued the making of new loans as a result of improvement in the agricultural lending field and the establishment of the production credit system.

The unpaid balance of these loans outstanding on June 30,1946 , amounted to $\$ 28,956$. It is expected that of this amount $\$ 5,000$ will be collected from borrowers and the remainder will be charged off during the fiscal year 1947.

## Operating Results

During the fiscal year 1946 programs carried on by the Corporation resulted in a net loss of $\$ 34,351$ after provisions for all foreseeable losses and adjustments of valuation reserves. For the fiscal year 1947 it is estimated that a net loss of $\$ 223,100$ will be sustained and that the loss for 1948 will amount to $\$ 211,900$. As a result of the losses expected during the fiscal years 1947 and 1948, it is estimated that the Corporation will reflect a deficit of $\$ 7,918,438$ on June 30 , 1948. (See exhibits B and C.)

## Financial Condition

Loan account.-On June 30, 1946, loans, notes receivable, sales contracts, and advances to borrowers amounted to $\$ 3,850,254$. Of the 6,593 loans outstanding, 421 represented restricted area loans, 5,947 represented food production loans, 133 represented Wenatchee fruit loans, and 92 represented other loans made prior to January 1, 1943. The reserve maintained against the loan account on June 30, 1946, is considered adequate to cover probable losses under reasonably normal conditions.

Government securities.-The investment in Government securities on June 30, 1946, amounted to $\$ 350,023$. These securities are held as investments of the special reserve fund for fruit loans; the Corporation holds no investments of its own. It is planned that these securities will be sold during the latter part of the 1947 fiscal year, in connection with the liquidation of the special reserve.

Return of capital funds to the Treasury.-No additional retirements are anticipated at this time, since the capital stock has been reduced to the nominal amount of $\$ 100,000$.

## Administrative Expenses

For the fiscal years 1946 and 1947 the administrative expenses of the Corporation include the cost of the restricted area program, liquidating food production loans and advances and other loans, and the restricted operations of the Wenatchee branch office. For the fiscal year 1948 the administrative expenses of the Corporation include the cost of supervision of the Corporation by the Farm Credit Administration in the amount of $\$ 41,258$ in addition to the foregoing. Estimated total administrative expense of $\$ 341,000$ for the fiscal year 1947 and $\$ 300,000$ for the fiscal year 1948, when compared with the actual for 1946 of $\$ 543,684$, reflects a reduction of $\$ 202,684$ for 1947 and $\$ 243,684$ for 1948. (For further details see statement of income and expense, exhibit B, and schedules B-1 and B-2.)
As required by existing law, the budget program for 1947 necessarily contemplates the continuance of the existing arrangement whereby the costs of administration are paid by the Reconstruction Finance Corporation (12 U. S. C. 1148); however, under the proposed authorizing language for 1948 all such expenses will be paid from corporate funds.

## Language

## Administrative Expenses, Regional Agricultural Credit Corporation

 of Washington, D. C.-Regional Agricultural Credit Corporation of Washington, District of Columbia: [Provided, That not] Not to exceed [\$341,000] $\$ 300,000$ (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including supervision and examination by the Farm Credit Administration and services performed for the Corporation by other Government agencies, and not to exceed $\$ 4,000$ for penalty mail; and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: Provided, That no other funds shall be available for administrative expenses of the Corporation. (Act of July 20, 1946, Public Law 519.)

${ }^{1}$ Under the act of July 21, 1832, 47 Stat. 713 (12 U. S. C. 1148), which authorized the creation of regional agricultural credit corporations it was provided that the Reconstruction Finance Corporation subscribe for and pay in the capital stock of the corporstions. This act further provided that all expenses incurred in connection with the operation of such corporations be paid by the Reconstruction Finance Corporation under such rules and regulations as its board of directors may prescribe; the latter amounts have been treated as paid-in surplus. Pursuant to the act of Feb. 24, 1938, 52 Stat. 79 (Public No. 432, 75th Cong.), the act of Mar. 8, 1938, 52 Stat. 107 (Public No. 442,75 th Cong.), and Executive Order 7848, dated Mar. 22, 1938, the capital of the regional agricultural credit corporations is held by the Secretary of the Treasury for and on behalf of the United States.

1946 (Public Law 600 ).

## DEPARTMENT OF AGRICULTURE MIXED-OWNERSHIP CORPORATIONS

Federal land banks.-Under an amendment to the Federal Farm Loan Act, approved January 23, 1932 (12 U. S. C. 698), the Secretary of the Treasury on behalf of the United States subscribed to 125 million dollars of capital stock in the 12 Federal land banks. This amendment also provided that the Secretary of the Treasury, under certain conditions, would subscribe to the paid-in surplus of any Federal land bank in an amount equal to extensions or deferments on loans granted during any particular period. For this purpose a total of 189 million dollars has been appropriated since 1933. Funds repaid by the banks from time to time have been placed in revolving funds in the Treasury, from which future subscriptions of capital and paid-in surplus may be made if conditions warrant. As of June 30, 1946, the Federal land banks had retired all but 40 million dollars of the 125 million dollars Government-owned capital stock and all but 36.9 million dollars of the 189 million dollars paid-in surplus. The unretired capital stock and unrepaid paid-in surplus was held in its entirety by the Federal Land Bank of St. Paul.

While a definite commitment has not been made by the Federal Land Bank of St. Paul, it is the opinion of the Farm Credit Administration that in the absence of unfore-
seen circumstances the bank will be in a position to retire the balance of the Government's subscription to capital stock aggregating 40 million dollars by May 1, 1947, and the remainder of its paid-in surplus of 36.9 million dollars by May 1, 1948.

Banks for cooperatives.-The Farm Credit Act of 1933, as amended, provides that capital funds required by the banks for cooperatives would be obtained from the revolving fund of the Agricultural Marketing Act (12 U. S. C. 1134b-1134i) and from cooperatives obtaining loans from the banks (12 U. S. C. 1134k). The amount of stock owned by farmers' cooperatives has never constituted more than a comparatively small part of the total capital needs of the banks. As of June 30, 1946, cooperatives owned stock in the banks, or in lieu thereof had deposits in the guaranty fund in the aggregate amount of $\$ 6,482,000$ or only 3.5 percent of their total capitalization.

A practical plan for increasing the capital investment of cooperatives in the banks has been sought for several years by both the banks and interested farm organizations. Although a number of tentative proposals have been made, no concrete plan has as yet been developed to a point that would justify a request for the necessary enabling legislation.

## DEPARTMENT OF COMMERCE

## INLAND WATERWAYS CORPORATION

## Creation and Purpose

The chartering of the Inland Waterways Corporation in 1924 was an outgrowth of needs which became apparent in inland water transportation during the period of the first World War. By the Federal Control Act of March 21, 1918, the Director General of Railroads was authorized to expend necessary funds for the purchase, construction, utilization, and operation of transportation facilities on inland waterways. In accordance with this authority, the Director General commandeered substantially all privately owned vessels on the inland waterways and initiated a program for the construction of new floating equipment. Under the terms of the Transportation Act of 1920, the functions exercised by the Director General of Railroads were transferred to the Secretary of War who conducted the operations through the Bureau of Inland and Coastwise Waterways Service. By 1924 it had become evident that this operation could not be effectively carried on by a typical Government administrative bureau. Accordingly, by an act of Congress, June 3, 1924 (49 U. S. C. 151), the Inland Waterways Corporation was created. The Corporation was operated under the direction and supervision of the Secretary of War until 1939, when it was transferred to the Department of Commerce.

The chief purpose and objective of the Inland Waterways Corporation is to demonstrate the feasibility of water transportation on the inland rivers and to extend the benefits of this service to the people of the United States. The Corporation offers the most complete common carrier service by barge that is offered on the Mississippi, Illinois, Warrior, and Missouri Rivers. It handles all types of freight except livestock and perishables. It operates on 3,100 miles of inland rivers through 20 terminals with 27 boats and 272 barges.

The Corporation is to carry out the policy of Congress of providing transportation services on the Mississippi, Illinois, Warrior, and Missouri Rivers until: (a) there shall have been completed navigable channels as authorized by Congress; (b) terminal facilities shall have been provided on such rivers reasonably adequate for joint rail and water service; (c) there shall have been published and filed under the provisions of the Interstate Commerce Act, as amended, such joint tariffs with rail carriers as shall make generally available the privileges of joint rail and water transportation upon terms reasonably fair to both rail and water carriers; and (d) private persons, companies, or corporations engage in, or are ready to engage in, common carrier service on such rivers. The Corporation has no specified term of existence. It is provided in the enabling legislation, however, that as soon as the foregoing conditions shall have been met the facilities of the Corporation may be sold or leased to private enterprise when such transfer can be made to the best advantage of the Government (49 U. S. C. 153).

In addition to the usual general officers, appointed by the Secretary of Commerce, the Corporation has an advisory board. This board consists of a chairman and six members, all appointed by the Secretary of Commerce. Each of the six members must be a recognized business
leader in his community. The bylaws of the Corporation provide that each of the six members of the advisory board shall represent one of the several sections of the country served by the Inland Waterways Corporation, shall serve for 5 years, and shall receive no compensation for his services other than per diem and travel.

## Financial Organization

The Corporation originally had an authorized capital stock of $\$ 5,000,000$. In 1928 this was increased to $\$ 15,-$ 000,000 ( 49 U. S. C. 152). Of this amount, $\$ 12,000,000$ has actually been appropriated through the Secretary of the Treasury and made available to the Corporation. In addition to this capital stock of $\$ 12,000,000$; the Corporation also has paid-in surplus in excess of $\$ 10$,000,000 . This paid-in surplus consists of the 1924 appraised value of the equipment and facilities turned over to the Corporation by the War Department at the time of its creation. The Corporation has no authority to issue bonds or other long-term debt obligations. A statement of the financial condition of the Corporation is shown immediately following the textual material (exhibit C).
Included in the assets of the Corporation is $\$ 1,250,000$ of capital stock of the Warrior River Terminal Company, the wholly owned subsidiary which operates a switching railroad in the area of Birmingham, Alabama. In order to meet the requirements of the Government Corporation Control Act the Warrior River Terminal Company, which is chartered under the laws of Alabama, will be merged with the parent corporation prior to June 30, 1948.

## Analysis of Budget Program by Major Activities

The budget program of the Inland Waterways Corporation for the fiscal year 1948 is divided into four categories: (1) common carrier operations, (2) capital replacement program, (3) loaning activities, and (4) chartering oper-ations-Reconstruction Finance Corporation. The level at which the various activities of the Corporation were conducted during the fiscal year 1946 and the projected level for the fiscal years 1947 and 1948 are shown in the statement of sources and application of funds in the financial statements immediately following the narrative (exhibit A).

## COMMON CARRIER OPERATIONS

The 1946 fiscal year has been one of costly adjustment for the Inland Waterways Corporation. First, it should be realized that the Corporation's business was reduced considerably by the war. Some commodities were so scarce that tonnage had to be diverted from the barges in many cases in order to obtain more rapid movement. As a result of this diversion the tons of revenue freight handled by the Corporation were reduced from $2,567,030$ in calendar year 1941 to $2,037,005$ in fiscal year 1945. Gross operating revenues increased from $\$ 7,916,395$ to $\$ 8,518,363$ in the same period and the loss increased from $\$ 192,491$ in 1941 to $\$ 193,110$ in 1945.

Not all the loss of tonnage, however, can be attributed to the scarcity of commodities. There were other dislocations to the channels of trade that were equally important. The extent of these dislocations and their effect upon the Inland Waterways Corporation are shown by the fact that merchandise traffic decreased from 55 percent of the total in the calendar year 1941 to 20 percent in fiscal year 1945. Upstream traffic, as another example, increased 'from 69 percent of the total traffic of the Corporation in calendar year 1941 to 76 percent in fiscal year 1945. Probably the most important effect of the war however, was upon wages. The level of wages increased on the average about 35 percent, while the wage of some classes of employees increased by as much as 75 percent.

Total income of $\$ 5,955,292$ for fiscal year 1946 was the lowest since 1935. Shipments resulting from war were sharply reduced without a compensating increase from peacetime shipments. Net loss for fiscal year 1946 was $\$ 2,383,406$. Income during 1947 is expected to increase $\$ 1,719,708$ to $\$ 7,675,000$, while expenses will increase $\$ 508,633$ to $\$ 8,847,331$; this will result in a loss of $\$ 1,172,331$.

It is anticipated that 1948 will be the first postwar year of profitable operations. Income is expected to reach $\$ 9,504,000$; expenses will amount to $\$ 8,990,288$; and there will remain a profit of $\$ 513,712$. From these figures it is seen that the anticipation of a profit in 1948 is based upon sharply increasing the income ( 24 percent over 1947) while holding expenses to a negligible rise (2 percent over 1947). This will be made possible in part merely by the more complete utilization of the Corporation's facilities, but it depends to a much greater extent upon the ability to increase sharply the efficiency of the organization.

The problem of increasing the efficiency of operations is being attacked upon a wide front. Terminals are being modernized and made available for use by other water carriers. More lift trucks and pallets are being purchased. The number of terminal, boat, and office employees is being reduced to the minimum required for safe and economical operations. Transportation throughout the winter months is being attempted upon the Illinois River. Solicitation of traffic is being stressed, both to obtain more traffic and to obtain a better balanced movement. The possibility of developing barge-truck shipments is being explored. The types of merchandise traffic that are available and the cost of hauling such traffic over varying distances are being analyzed. Efforts are being made to improve the rate structure, especially by continued participation in the Rail and Barge Joint Rates case before the Interstate Commerce Commission. And, probably most important, a completely new type of boatbarge combination is being developed.

## CAPITAL REPLACEMENT PROGRAM

The capital replacement program for 1947, 1948, and subsequent years is planned around the new boat-barge combination that is being developed by the Corporation. This combination consists of an articulated unit of a boat and a number of barges. The principal new feature is that the front of the boat and the ends of the barges are square so that they will fit flush together. A tapered nose is attached at the end of the foremost barge. Model basin tests of this articulated unit, recently conducted at the University of Michigan, indicate the possibility of
phenomenal increases in efficiency and consequent economies. It has been estimated, for example, that an articulated unit will be capable of 30 round trips each year between New Orleans and St. Louis as against less than 17 trips each year for the present boats, with operations running 80 percent of the time as against 60 percent for the present boats.

An articulated unit consisting of one boat and six barges is to be purchased in 1947 ; it is estimated that this will cost about $\$ 1,000,000$. Approximately $\$ 400,000$ will be spent in 1947 for the purchase of 5 navy patrol craft and the immediate transfer of engines from 2 of these craft to boats of the Corporation. About $\$ 825,000$ will be spent in 1947 in modernizing the terminals and $\$ 30,000$ will be spent upon the offices. These amounts make a total capital program for 1947 of $\$ 2,255,000$, compared to an amount of $\$ 699,762$ for 1946 . The 1946 amount represents the purchase of 32 barges from the Maritime Commission to replace some of the barges sold to the Reconstruction Finance Corporation at the beginning of the war.

The 1948 capital replacement program calls for an outlay of approximately $\$ 2,200,000$ for further modernization of floating equipment. The three remaining Diesel engines of the Navy patrol craft will be transferred to operating boats at an installation cost of about $\$ 300,000$. Purchase of an additional articulated unit and some extra barges, after experience has been gained with the original unit, will bring the total capital outlay to about $\$ 2,200,000$. The two units and extra barges will permit a complete test of the new equipment in integrated operations.

The program for 1948 also includes studies and tests of new types of boats, barges, and terminal facilities. These studies and tests are for the purpose of improving the efficiency of the Corporation itself and also for the purpose of carrying out the responsibility of the Secretary of Commerce to promote, encourage, and develop inland waterways transportation facilities. If tests being conducted by the Army and Navy with Voight-Schneider and Kirsten cycloidal propellers are successful, the Corporation plans to make an experimental installation to determine the suitability of this type of propulsion for river use. Other projects include the construction of a small drydock that will permit raising boats or barges partially out of the water for minor underwater repairs, the development of new types of boats for work in the Chicago River district and on the Missouri River, and experiments to develop new terminal equipment. All research and development work will be performed by operating officials of the Corporation.

## loaning activities

The Corporation has three loans outstanding; the balance of which at June 30, 1946, was $\$ 296,926$. These loans were made to the cities of New Orleans, La., Memphis, Tenn., and Kansas City, Mo., in accordance with the Transportation Act of 1920 ( 49 U. S. C. 141) which provides for the improvement of transportation facilities along the inland waterways through loans to States, municipalities, and transportation companies. There have been no new loans granted since 1935 and none are contemplated for the fiscal years 1947 and 1948. Payments on the outstanding loans totaled $\$ 33,678$ in 1946, whereas it is estimated that approximately $\$ 21,926$ will be repaid in the fiscal year 1947 and $\$ 23,000$ in the fiscal year 1948.

## CHARTERING OPERATIONS-RECONSTRUCTION FINANCE CORPORATION

In November 1942, the Corporation entered into a contract with the Defense Plants Corporation to supervise the construction and conversion of vessels to transport oil and other critical war materials. A later agreement provided that the Corporation would serve as chartering agent for approximately 565 barges, 100 tugboats, and 21 towboats owned by the Defense Plants Corporation. Included in this group were 60 dry-cargo barges sold by the Corporation to the Defense Plants Corporation for conversion to oil barges. During the latter part of the calendar year 1945, most of these boats and barges were taken off charter and declared surplus. Since that time the Corporation has been engaged in settling charter agreements and protecting and maintaining the inactive fleet. All expenditures by the Corporation for this function are reimbursed by the Reconstruction Finance Corporation. This activity will be discontinued upon disposition of the surplus vessels and barges, which will probably be by the end of fiscal year 1948.

## Financlal Condition

The earned surplus of the Corporation in 1938 amounted to more than $\$ 2,500,000$. Continued losses since that time have resulted in a deficit of $\$ 2,276,858$ as of June 30, 1946. The further loss estimated for the fiscal year 1947 will increase the deficit to $\$ 3,449,189$. However, the estimated profit for the fiscal year 1948 will reduce the deficit to $\$ 2,935,477$. The continued losses have necessitated the liquidation of Government securities owned by the Corporation to provide operating funds.
The facilities transferred to the Corporation in 1924 by the Secretary of War were appraised by a commercial concern and taken into the records of the Corporation at an appraised value of over $\$ 10,000,000$. Prior to 1942 , no depreciation was accrued on terminal structures and other improvements of a fixed nature. Since January 1942, a composite rate on floating equipment of slightly over 3 percent has been charged. A reappraisal of all floating equipment owned by the Corporation and a study of depreciation rates will be made during the fiscal years 1947 and 1948.
Government securities owned by the Corporation as of June 30, 1946, totaled $\$ 4,132,010$. This investment represents primarily the investment of depreciation reserves and proceeds from the sale of equipment. During the fiscal year 1947, securities totaling approximately $\$ 2,632,010$ will be liquidated to finance the purchase of new equipment and to provide operating funds.

## Administrative Expenses

Administrative expenses cover the general supervisory and supporting staff engaged in over-all administration of the program carried on by the Corporation. Since the Corporation is subject to the regulations of the Interstate Commerce Commission, the administrative expenses itemized in schedule B-2 for the fiscal year 1948 are those set forth under the title "General Expenses" in the Interstate Commerce Commission Uniform System of Accounts for Carriers by Water (effective January 1, 1942), with the exception that the audit by the General Accounting Office, as required by Public Law 248 of the 79th Congress, is deemed to be nonadministrative for this purpose.
Administrative expenses amounted to $\$ 608,228$ for the fiscal year ended June 30, 1946, and are estimated at $\$ 710,138$ and $\$ 418,100$ for 1947 and 1948 , respectively. The decrease in the fiscal year 1948 is primarily the result of the classification of traffic expense as a direct operating expense in 1948 instead of as an administrative expense as in 1946 and 1947; the 1948 classification is in accordance with the uniform system of accounts of the Interstate Commerce Commission. The estimated increase in personal services for the fiscal years 1947 and 1948 is attributable largely to bringing the salary rates of the Corporation in line with comparable rates under the Classification Act of 1923, as amended, and the Federal Employees Pay Act of 1945, as amended. The number of positions remain practically constant in the fiscal years 1946 and 1947 and show a reduction of three for the fiscal year 1948.

ANALYSIS OF DEPRECIATION RESERVE

## WARRIOR RIVER TERMINAL COMPANY

## Creation and Purpose

The Warrior River Terminal Company, originally incorporated as the Port Birmingham Railway Company under the laws of the State of Alabama, was created on February 12, 1926, by an amendment to the original charter. The Company was purchased by the Inland Waterways Corporation on May 1, 1926, in order to assure receipt and delivery of freight in the Birmingham area and to and from connecting lines beyond that area by the Warrior River barge line operators. All capital stock of the Company is owned by the Inland Waterways Corporation.
The Company operates a standard gage switching line from Port Birmingham to Ensley, Ala., which not only carries freight from the river to the Birmingham area but also transports coal from mines located along the right-of-way. The line has been completely rehabilitated since its acquisition by the Inland Waterways Corporation.

The Inland Waterways Corporation does not propose to request Federal incorporation of the Warrior River Terminal Company. Instead, the assets of the Warrior River Terminal Company will be transferred to the Inland Waterways Corporation and the Company dissolved.

## Financial Organization

The Company originally had an authorized capital stock of $\$ 150,000$, of which $\$ 100,000$ had been paid in at the time the Inland Waterways Corporation acquired the outstanding stock. In 1931, the charter was amended to provide for an increase in the capital stock to $\$ 1,250,000$. All stock issued was purchased by the Inland Waterways Corporation with the approval of the Interstate Commerce Commission. The Company also has a paid-in surplus of $\$ 97,913$, which represents a grant from the Federal Emergency Relief Administration which was used for the replacement of trestles with steel spans. The Company has no outstanding bonds or other long-term debts.

## Analysis of Budget Program by Major Activities

The budget program of the Warrior River Terminal Company is divided into two categories: (1) common carrier operations and (2) capital replacement program.

## COMMON CARRIER OPERATIONS

From 1926 to date, this operation has shown a profit each year, except 1943. During the war years a general decline in tonnage and revenue occurred as a result of the need for speed in the delivery of critical war materials. Tonnage and revenues resulting from the switching operations of the Company increased appreciably, however, in the fiscal year 1946 over 1945 and are expected to continue to increase in the fiscal years 1947 and 1948. Net income in 1946 amounted to $\$ 64,691$. It is estimated that the operations in the fiscal years 1947 and 1948 will result in a net income of over twice the 1946 figure, or $\$ 176,400$ and $\$ 168,600$, respectively. Revenues for the fiscal year 1946 totaled $\$ 290,761$ and expenses amounted to $\$ 226,070$. Estimated revenues for the fiscal years

1947 and 1948 are $\$ 455,000$ and $\$ 500,500$, respectively, while expenses are expected to increase to $\$ 278,600$ and $\$ 331,900$, respectively. These estimates are based upon the assumption of an increase in river traffic and continued heavy shipments of coal. Operating expenses, especially maintenance and transportation expenses, will increase as the result of maintenance deferred during the war period and an anticipated increase in wage rates.

## CAPITAL REPLACEMENT PROGRAM

During the fiscal year 1946 the major item in the capital replacement program was the replacement of existing 80 -pound rail by 100 -pound rail at a cost of $\$ 4,130$. In 1947 it is planned to complete the rail replacement program and purchase an additional Diesel electric locomotive. This program contemplates the expenditure of approximately $\$ 101,465$. An investment of $\$ 250,000$ is planned in the fiscal year 1948 for the purchase of 50 coal cars.
The two 1,000-horsepower Diesel electric locomotives currently in operation were adequate to take care of the traffic available prior to the war period. During the war, river traffic declined and the increased local business was handled without the purchase of additional motive power. This local business originates at the Short Creek coal mine, which is served only by the Company and is, therefore, entirely dependent on the Company for its operation. The monthly coal production of this mine is over 40,000 tons, and it will increase as the mine gets into full operation. River traffic is also expected to increase, and unless an additional locomotive is purchased the local and river patrons of the line will not receive adequate common carrier service.
Present equipment owned by the Company does not include coal cars. This results in complete dependence on the connecting carriers, the Tennessee Coal, Iron \& Railroad Co. and the Birmingham Southern Railway, to furnish cars in which to move coal. The Nation-wide shortage of coal cars, the increased use of these cars by the connecting carriers in their own operations, and the anticipated increase in coal shipments in 1947 and 1948 on the Warrier River Terminal lines make the purchase of this equipment imperative.

## Financial Condition

The earned surplus of the Company at June 30, 1946, was $\$ 418,455$. This amount is estimated to increase in the fiscal years 1947 and 1948 to $\$ 594,855$ and $\$ 763,455$ respectively. Of this latter amount, $\$ 713,738$ will be reserved and $\$ 49,717$ will be unreserved.
Ordinarily the Company pays a dividend of $\$ 75,000$ each year to the Inland Waterways Corporation. While a dividend of $\$ 75,000$ was paid in the fiscal year 1946, the Company does not contemplate declaring dividends in 1947 and 1948. The funds ordinarily used for the payment of dividends will instead be used for the purchase of equipment outlined herein.
It has been the practice of the Company to invest funds temporarily in Government securities. Holdings of $\$ 50,008$ were liquidated during the fiscal year 1946 , and
there was no investment as of June 30, 1946. It is anticipated that there will be an investment of $\$ 100,000$ of the Company's earnings at the end of fiscal years 1947 and 1948.

## Administrative Expenses

These expenses cover the general supervisory and supporting staff engaged in the over-all administration of the program carried on by the Company. Since the Corporation is subject to the regulations of the Interstate Commerce Commission, the administrative expenses .itemized in schedule B-3 for the fiscal year 1948 are the same as those set forth under Operating expense accountsgeneral, in the Interstate Commerce Commission Uniform System of Accounts for Steam Railroads (issue of 1943), with the exception that the audit by the General Accounting Office, as required by Public Law 248, Seventy-ninth Congress, is deemed to be nonadministrative for this purpose. Administrative personnel will remain constant for
the fiscal years 1946, 1947, and 1948. Administrative expenses, including personal services, amounted to $\$ 20,398$ in the fiscal year 1946 and is estimated to amount to $\$ 20,200$ in fiscal year 1947 and $\$ 20,100$ in 1948.

## Language

## Administrative Expenses, Warrior River Terminal Company-

Warrior River Terminal Company: [Provided, That not] Not to exceed $[\$ 20,200] \$ 20,100$ shall be available for administrative expenses, to be determined in the manner set forth under the title "Operating expense accounts-general" in the Uniform System of Accounts for Steam Railroads of the Interstate Commerce Commission (issue of 1943) with the exception that the cost of the audit as required by Public Law 248, Seventy-ninth Congress, shall be deemed a nonadministrative expense for the purpose hereof: Provided, That, in the event of dissolution of the Company and/or the transfer of its assets to the Inland Waterways Corporation, the funds provided herein shall be transferred and merged with the administrative expenses of the Inland Waterways Corporation for the operation of its facilities. (Act of July 20, 1946, Public Law 519.)

## DEPARTMENT OF THE INTERIOR

## THE VIRGIN ISLANDS COMPANY

## Creation and Purpose

The Virgin Islands Company was established in 1934 to aid in effecting the economic rehabilitation of the Virgin Islands and to promote the general welfare of the people.

At the time the United States acquired the Virgin Islands, and for over 100 years before, the chief crop and main source of employment on St. Croix was sugarcane. Many other cash crops have been tried since the islands were settled in 1671, including long-staple cotton, tobacco, vegetables of various kinds, and fruits, but thus far all have failed except sugarcane. Because of the light rainfall, quick run-off, and high evaporation, even sugarcane is a marginal crop, the average yields being only about one-third of those in Puerto Rico and Cuba. Sugarcane has been able to survive in spite of the long-term decline in the price of sugar because of the islands' rum industry.

When the Americans came to the Virgin Islands in 1917, the islands had already established an enviable reputation for the excellent quality of their rum. Three years after we purchased the islands, the advent of prohibition in the United States wiped out the rum industry as a source of income to the people of the islands. The West Indian Sugar Factory, Ltd., the major sugar producer, struggled along until 1930, when it collapsed after losing more than a million dollars in the last 10 years of its operations. Since this development eliminated the most important employer of labor on the most populous island, it was truly a catastrophe for the Virgin Islands and for St. Croix in particular. In the meantime, unemployment among harbor workers on the sister island of St. Thomas had been increasing as changing conditions of maritime commerce reduced the importance of the harbor as a port of call for ships desiring to refuel, obtain water and provisions, or to cable home ports.
By 1930, the economic life of the Virgin Islands had sunk so low that it was necessary to have the Red Cross feed large numbers of people and despite the introduction of a rehabilitation program, about 40 percent of the people were being sustained by the Red Cross in 1932 and 1933. In the meantime, the government of the Virgin Islands had been trying to attract private capital for the purpose of reviving the agricultural and industrial life of the islands. These efforts were supplemented by the Department of the Interior, which obtained jurisdiction over the islands from the Navy Department on February 27, 1931. Although some private groups conducted surveys, none was willing to consummate an agreement to purchase and rehabilitate the properties for the purpose of operating them.

Early in 1934, the United States Government, recognizing the revival of the islands' sugar and rum industries as the only practical alternative to a dole without end, established Federal project 16 through the Public Works Administration. This project purchased 4,710 acres of sugarcane land, 2 sugar mills, a distillery, warehouses, a small railroad, 12 old slave villages, shops, and miscellaneous agricultural buildings from the West Indian Sugar

Factory, as well as tractors, trucks, work animals, and other equipment needed to clear, rehabilitate, and work the properties.

The Virgin Islands Company, which was chartered by the Colonial Council of St. Thomas and St. John, V. I., on April 9, 1934, operates the properties acquired by the United States Government through project 16 under an agreement between the United States and the Company entered into November 25, 1934, and extended to November 25,1949 . No functions of other agencies were taken over or supplemented by the Virgin Islands Company at the time of its creation.

Through the medium of the Virgin Islands Company, the Federal Government has aimed to effect the economic rehabilitation of the people of the Virgin Islands by revitalizing agriculture and industry, both of which had reached stagnation levels. The wasting lands of the West Indian Sugar Factory which had reverted to bush in the period of disuse have been restored and the sugar mills and distillery put into operation. During the peak season the Company employs directly over 900 persons and furnishes indirect employment to many others. Subsistence levels have been raised, decent housing and subsistence plots furnished, and sanitary systems introduced.
The Company contributes direct income to the community by making payments to the municipality, on both realty and income, equivalent to taxes which would be assessed if it were a private corporation. Moreover, through the tax on the production of rum to be imported into this country substantial revenue taxes have been paid into the National Treasury. However, the most satisfying thing about the Federal program in the islands is the fact that an opportunity has been provided for the development of a self-sustaining economy for the Virgin Islands.

## Financial Organization

The capital stock of the Company consists of three shares of $\$ 10$ each, held in trust, as of June 30, 1946, by the Secretary of the Interior, the Under Secretary of the Interior, and the Governor of the Virgin Islands.

In order to avoid the necessity of direct relief in St. Croix, relief agencies have contributed funds amounting to $\$ 879,326$ to the Virgin Islands Company. The purpose of these funds was to provide necessary employment through the operations of the Company.

Funds for the rural electric division in the amount of $\$ 275,000$ were provided under a loan contract and mortgage agreement executed by the Company with the Rural Electrification Administration. Rates for electric power are established on the basis of the operating results of the project which is designed as a self-liquidating undertaking.

## Analysis of Budget Program by Major Activities

To accomplish the purpose for which the Company was established and under the authority contained in its
charter, the Company has a fourfold program of activities as follows:

1. Production and sale of sugar.
2. Production and sale of rum.
3. Assistance to small farmers and miscellaneous programs.
4. Rural electrification program.

Production and sale of sugar.-This activity employs most of the people who work for the Company. During the year 1946 there were 47,158 tons of sugarcane processed into 4,970 tons of raw sugar and sold to the Commodity Credit Corporation at $\$ 3.845$ per hundredweight, free on board, St. Croix, plus a support payment of $\$ 2.10$ per ton of sugarcane. Gradual increases in sugarcane acreage are expected to result in the harvesting of 54,000 and 62,000 tons of cane in 1947 and 1948, respectively. An ultimate tonnage of 80,000 is estimated for grinding in 1950 which should, in the opinion of the management, place the sugar industry in the islands on a self-supporting basis.
Production and sale of rum.-Rum sales were reduced during the fiscal year 1946 due to the change in the distributor of Government House rum. Efforts will be made to bring bulk sales of rum to a normal level-170,000 proof gallons per annum-in 1947 and 1948. It is also hoped that in the fiscal years 1947 and 1948 shipments of bottled rum will amount to 50,000 cases per year.

Assistance to small farmers and miscellaneous programs.The Company expects to maintain at about the present level its assistance to small farmers in plowing their land and furnishing cane seed. Any governmental agency, private concern, or individual may purchase the products of the Company, rent its equipment, or otherwise have access to the services of the Company upon approval of its duly authorized officers. The Company has followed this policy of assisting hundreds of small growers and homesteaders to help themselves by renting them tractors and farm equipment, furnishing improved varieties of cane seed for planting, and grinding facilities for the sugarcane they produce. In order to insure proper care of children whose parents are employed by the Company, nurseries and attendants for the children are provided during working hours.
In addition to these activities, the Company maintains a herd of cattle, operates a rock crusher used in local road construction, and runs a mail, cargo, and passenger schooner between St. Thomas and St. Croix. It expects to continue its cooperation with the cattlemen on the island of St. Croix in the operation of an abattoir and to continue the operation of a poultry farm by a private lessee. A market and cold storage plant on the island of St. Thomas is operated by the municipality.

Rural electrification program.- Since 1941, the Company has conducted a rural electrification project which provides alternating current to the country areas of St. Croix. Negotiations are now under way to place the Company's rural electric division on a sound financial basis by servicing additional consumers. It is anticipated that the division will begin operating on a profitable basis during the fiscal year 1948.

## Operating Results

During the fiscal year 1946, programs carried on by the Company resulted in a net loss of $\$ 78,509$. For the fiscal years 1947 and 1948, the profit is estimated to be $\$ 199,300$ and $\$ 268,400$, respectively, before providing for income taxes which are estimated to be $\$ 60,000$ and $\$ 85,000$, respectively. This increase in profits results from the
estimated increase in sales of sugar and rum. The opera tions of miscellaneous programs are expected to continue at a loss during 1947 and 1948. The sales from electricity are expected to produce enough revenue in 1948 to cover the cost of sales and provide a small profit. The net profit from the sale of rum will finance the losses on the miscellaneous programs plus other expenses.

During 1946 the income almost equaled the expenditures on the sugar program, and it is expected that the income will at least equal the expenditures in 1947 and 1948. However, inadequate rainfall is an ever-present contingency and adverse weather conditions may easily result in the loss of an entire year's crop.

Effective January 1, 1946, field labor was increased to $\$ 1.84$ on a per diem basis, and piece rates, during harvesting, of $\$ 1$ a ton for cutting, and 50 cents a ton for loading sugarcane. Most of the cane was cut on a tonnage rather than a per diem basis, enabling many of the more enterprising workers to earn from $\$ 2.50$ to $\$ 4.50$ a day. The incentive of more-effort-more-pay created by contract work accounted for the crop being taken off more quickly. Sugarcane cultivation has increased during the past few years due, principally, to the encouragement to the small grower through the Commodity Credit Corporation support payment and the benefit payments.

The increase in salaries and wages is due primarily to (1) the additional sugarcane cultivation, and (2) the increase in wages to field workers.

## Financial Condition

Accounts receivable.-On June 30, 1946, the accounts receivable from Government agencies totaled $\$ 307,773$, and from others $\$ 80,985$. The principal accounts representing the majority of these amounts reflect amounts due from the Commodity Credit Corporation for approximately 3,200 tons of sugar shipped during June 1946, and from Munson G. Shaw Co. for Government House rum shipped to the continental market.

Accrued assets.--The accrued assets represent amounts due for support and benefit payments, etc.

Ini entories.--On June 30, 1946, the Company held an inventory of $\$ 671,901$, of which $\$ 393,763$ represents rum on hand; $\$ 87,423$ the value of sugarcane growing in fields, and the balance represents stores held for sale and use.

Long-term liabilities.-Long-term liabilities are represented by $\$ 209,302$ advanced from the Rural Electrification Administration to finance the construction cost of the generating plant by the rural electric division of the Company as a self-liquidating project. No change is expected in this account in 1947 and 1948.

Loans.-In order to provide adequate working capital, the Company made three loans from the Banco de Ponce in Puerto Rico and an additional loan from the Virgin Islands National Bank. On June 30, 1946, the outstanding balance owed to both banks totaled $\$ 320,000$.

Capital, surplus, and reserves.-The paid-in capital is composed principally of funds made available to the Company through allocations by various Government agencies and has been applied to general operations.

The reserve for contingencies represents the cumulative profits, before taxes, set aside for emergencies and contingencies such as drought periods, hurricane, fires, etc., which might result in a crop failure, as well as for shipment losses on sugar and rum. On June 30, 1946, the reserve amounted to $\$ 8,192$. Future profits, after provision for income taxes, are expected to be set aside for contingencies until the sum of $\$ 500,000$ has been accumulated. A reserve of this amount is necessary in
order to carry the Company for a year in the event of a crop failure.

## Administrative Expenses

This expense covers the general supervisory staff and expenses relating to the over-all supervision of the programs carried on by the Company. It does not cover wages for the growing and harvesting of cane, and the manufacture of sugar and rum. It is necessary, during the harvesting season and at various other times during the year, to work in excess of a 40-hour workweek to insure continued operations of the sugar mill, distillery, electric plants, etc. Additional compensation because of overtime has been included in the administrative expenses.

## Language

The change in appropriation language is proposed to explain the basis for computing administrative expenses
chargeable to the limitation proposed for the fiscal year 1948 and to exclude specifically certain items of expenses which the Company's accounting system requires to be capitalized or charged to commodities produced or acquired and to property belonging to the Company.

## Department of the Interior

## Administrative Expenses, The Virgin Islands Company-

Virgin Islands Company: [Provided, That not] Not to exceed $\$ 20,000$ [shall be available for administrative expenses.] (to be computed on an accrual basis) of the funds of the Company shall be available during the fiscal year 1948 for its administrative expenses which shall be determined in accordance with the Company's prescribed accounting system in effect on July 1, 1946, and shall be exclusive of depreciation, interest expense, payment of claims, contribution to the local Government in lieu of taxes, expenditures which the Company's prescribed accounting system requires to be capitalized or charged to commodities produced or acquired and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection or disposition of facilities and other property belonging to the Company or in which it has an interest. (Act of July 20, 1946, Public Law 519.)

Schedule B-6
DIRECT OPERATING EXPENSES-PRODUCTION AND DISTRIBUTION OF ELECTRIC POWER
[Fiscal years ending June 30, 1946, 1947, and 1948]

## DEPARTMENT OF JUSTICE

## FEDERAL PRISON INDUSTRIES, INC.

## Creation and Purpose

Federal Prison Industries, Inc., was created, as an independent agency, by Executive Order 6917 dated December 11, 1934, issued pursuant to the act of June 23, 1934 (18 U. S. C. 744i-n). Under this statute and the Executive order, the Corporation as of January 1, 1935, took over the powers, duties, and functions vested in the Attorney General by the act of May 27, 1930 (18 U. S. C. $744 a-h$ ) and theretofore exercised by the Industries Division of the Bureau of Prisons, Department of Justice.

Under section 3a of reorganization plan No. II effective July 1, 1939 ( 5 U. S. C. 133t, note), the Corporation (together with its board of directors) and its functions were transferred to the Department of Justice to be administered under the general direction and supervision of the Attorney General.
The functions of the Corporation are to establish and operate industries in the United States penal and correctional institutions for the production of articles and commodities for consumption in the institutions or for sale to the departments and independent establishments of the Federal Government and not for sale to the public in competition with private enterprise. Its duties are to provide such forms of employment as will give the inmates of the institutions "a maximum opportunity to acquire a knowledge and skill in trades and occupations which will provide them with a means of earning a livelihood upon release" and to diversify these industries so as to "reduce to a minimum competition with private industry or free labor." (18 U.S. C. 744c.)

## Financial Organization

The Corporation has no capital stock. Its original capital consisted of all assets under the jurisdiction of the Industries Division of the Bureau of Prisons, Department of Justice. The net value of these assets was $\$ 4,113,380$. As of June 30, 1946, the! Corporation ${ }^{\prime}$ hadl received property from other Government"agencies without exchange of funds to a net value of $\$ 733,243$. Net earnings by the Corporation from January 1, 1935, to June 30, 1946, total \$18,457,802.

All funds of the Corporation are deposited in the Treasury of the United States in a special working capital account known as Prison Industries Fund. The Corporation is authorized by its basic statutory authority to use this fund as operating capital and for the purposes enumerated in the act of May 27, 1930. Accounts of all fiscal transactions of the Corporation must be rendered to the General Accounting Office, which exercises the same supervision over such transactions as in the case of any Government department. The Corporation has no borrowing or lending power. ( $18 \mathrm{U} . \mathrm{S} . \mathrm{C} .744 \mathrm{l}$.)
A statement of financial condition is shown as exhibit C.

## Analysis of Budget Program by Major Activities

The Corporation has two major programs, (1) the establishment and operation of diversified industries, and (2) vocational training of inmates (18 U. S. C. 744a-n).

Establishment and operation of diversified industries.The scope of the Corporation's activities varies with the number of prisoners for whom employment is to be provided. The inmate population of the institutions as of June 30, 1946, was 18,592 , and it is estimated that the average population for the fiscal years 1947 and 1948 will approximate 19,000. Approximately 86 percent of the total prison population is employed either in the maintenance and agricultural operations of the institutions themselves, or in the Corporation's industries. The remaining 14 percent are not normally employable, being the old, sick, and crippled, those in quarantine, and those held temporarily awaiting trial, transfer, or release. It is desirable that industrial employment be furnished for approximately 25 percent of the employable population, or about 21.5 percent of the total population. During the fiscal year 1946 the average number of inmates employed full time in industries was only 3,334 , but it is anticipated that full-time employment will be provided for approximately 4,000 during the fiscal years 1947 and 1948.

During the fiscal year 1946 the number of shops and industries operated by the Corporation was reduced from 48 to 39. Most of those discontinued had been producers of material used only in connection with prosecution of the war, such as the cargo net factories and the salvage shops. The 39 shops continuing in operation at the beginning of the fiscal year 1947 were located in 19 of the Federal penal and correctional institutions.
The elimination of shops devoted to production of war equipment has necessitated the establishment during the fiscal year 1947 of additional industries to furnish employment for inmates, and provision is made in the 1948 budget for the purchase of machinery and equipment for further new industries to supplement the employment now available.
The transfer of three institutions from the War Department, anticipated in the 1947 . Budget, will not occur. Adjustments have been made in the 1947 program by eliminating therefrom the estimated requirements for personnel and other expenses incident to the establishment of additional industries for these institutions. (See exhibits A and C.).

Vocational training of inmates.-During the war period, emphasis in vocational training was centered in those trades which were necessary to the production of war materials. At present, and in the ensuing years, training must be provided in wider variety if maximum results are to be accomplished in the rehabilitation of prisoners. Additional forms of training, to reach a larger number of inmates, are being organized during the current year, and are provided for in the estimates for 1948.
It is estimated that approximately 45 percent of the inmates are susceptible of training in vocations, which would indicate that such opportunities should be extended, on the basis of the 1948 estimate of population, to 8,550 inmates. The gradually expanding program in this respect is designed to give training to approximately 4,000 inmates in 1947 and 6,000 in 1948.

The congressional intent, as expressed in the statute, is that the knowledge and skill gained "by inmates during their incarceration should be such as to enable them to earn a livelihood upon their release, so that there will be no necessity for the individual to revert to criminal practices. In order to achieve the maximum benefits from this training, the Corporation undertakes to seek out employment opportunities for inmates upon their release. Some expansion is anticipated in this job placement work since opportunities may not be so numerous as during the war years. The 1948 Budget makes provision for continuance of this aspect of the vocational training program.

## Operating Results

Despite the cancellation by Government agencies of $\$ 2,000,000$ in contracts during the fiscal year 1946, operations were adjusted so that the Corporation's net earnings in the year, after deduction for all known losses and for depreciation, were $\$ 1,296,923$. While this amount was less than 50 percent of net earnings during 1945, it was over 100 percent greater than earnings for the fiscal year 1940, the last normal year prior to the defense-war period. Net sales for the fiscal year 1946 amounted to $\$ 10,692,684$, which compares with $\$ 17,557,498$ during 1945. (See exhibit B.)

Sales for the fiscal years 1947 and 1948 are estimated at $\$ 10,000,000$. In estimating sales, consideration was given to the rising prices of materials and the consequent probability that the volume of finished products sold will be considerably less than during 1946. It is estimated that the sale of these articles will provide the Corporation with earnings of approximately 12 percent, or $\$ 1,200,000$ each year in 1947 and 1948.

The Corporation has adequate funds to finance its proposed program for the fiscal years 1947 and 1948.

## Financial Condition

Plant and equipment.-As of June 30, 1946, the net value of plant and equipment was $\$ 4,105,962$. Capital expenditures of $\$ 1,795,000$ during the fiscal years 1947 and 1948 will increase the value of these assets to $\$ 5,350,962$ after deduction for depreciation. (See exhibit C.)

Plans for the fiscal years 1947 and 1948 include $\$ 425,000$ for buildings and improvements for industrial operations, $\$ 100,000$ for a new vocational training building, and $\$ 1,270,000$ for machinery and equipment.

Working capital.-Other capital assets consist of cash, accounts receivable, commodity and materials inventories, and sundry items. Actual or estimated amounts of these assets as of June 30 , are in 1946, $\$ 15,372,898$; in 1947, $\$ 9,492,605$; and in $1948, \$ 6,668,524$. Offsetting liabilities in 1947 and 1948 approximate $\$ 940,000$ in each year. (See exhibit C.)

Accounts receivable and sundry asset items are estimated to remain at the 1946 amounts of $\$ 1,219,756$ and $\$ 27,182$, respectively, for 1947 and 1948. The cash
account, however, will decline from the 1946 amount of $\$ 10,095,610$ to $\$ 4,165,317$ for 1947 and $\$ 1,291,236$ for 1948. This decrease is estimated by the Corporation because of estimated payments to be made into the Treasury of the United States, but may be offset by deferment of presently estimated investment in plant and equipment and by partial liquidation of inventories.

Inventories of $\$ 4,030,350$ for 1946 are estimated to increase to $\$ 4,080,350$ in 1947 and $\$ 4,130,350$ in 1948.

Dividend payments to the Treasury.-The board of directors at their meeting on January 10, 1946, declared a dividend of $\$ 4,774,707$, which was paid into the Treasury of the United States during the fiscal year 1946. This amount equals the original capital of the Corporation plus the net value of property transferred from other Government agencies without exchange of funds through June 30, 1945. The directors have been requested to consider the payment of additional dividends of $\$ 6,225,293$ to be declared and paid into the Treasury on or before June 30, 1947, and $\$ 3,000,000$ on or before June 30, 1948. These payments are reflected in the financial statements. The original capital having been repaid in 1946 , substantially all of the amounts subsequently to be paid are derived from earnings produced by the labor of inmates. (See exhibits A and C.)

## Administrative Expenses

This expense covers the salaries of the supervisory and clerical staff located in the District of Columbia, together with the expenses of the central office. It does not include salaries or expenses of any employees assigned to vocational training or to production at the institutions, or other costs distributed to manufacturing expense or cost of sales. During the fiscal year 1946, an average of 42.9 positions were filled, which with attendant expenses required the expenditure of $\$ 211,112$. In 1947 the Corporation is expanding its central office staff to provide supervision over the expanded industrial and vocational training programs, and employ additional accounting and auditing personnel to restore these services to their prewar standards. (See exhibits A and B, and schedule B-2.)
Provision is made for maximum employment of 61 during 1948 under this heading.

## Language

Administrative Expenses, Federal Prison Industries, Inc.-
Federal Prison Industries, Incorporated: [Provided, That not] Not to exceed [ $\$ 268,826] \$ 240,000$ (to be computed on an accrual basis) of the funds of the Corporation shall be available during the fiscal year 1948 for its administrative expenses, which shall be determined in accordance with the Corporation's prescribed accounting system in effect on July 1, 1946, and shall be exclusive of depreciation, vocational training expenses, payment of claims, expenditures which the said accounting system requires to be capitalized or charged to cost of commodities acquired or produced, including selling and shipping expenses, and expenses in connection with acquisition, construction, operation, mainterance, improvement, protection, or disposition of facilities and other property belonging to the corporation or in which it has an interest. (Act of July 20, 1946, Public Law 519.)

## DEPARTMENT OF STATE

## INTRODUCTORY STATEMENT

Five corporations were created by the Office of InterAmerican Affairs to assist in carrying out the programs of this war agency. These were created under authority contained in the Third Supplemental National Defense Appropriation Act, 1942, the First Supplemental National Defense Appropriation Act, 1943, and the National War Agencies Appropriation Act, 1944. Executive Order 9710, signed April 10, 1946, transferred these corporations to the Department of State as of May 20, 1946. All corporations were incorporated under the laws of the State of Delaware. Funds have been provided by the Office of Inter-American Affairs. These corporations have not been operated for profit, and losses reflected in the 1948 budgets represent depletion of capital.

One of these corporations, the Inter-American Naviga-
tion Corporation, will be completely liquidated in February 1947. Two others are now in dissolution. Prencinradio, Inc., will complete the required 3-year dissolution period in May 1949, and the Institute of Inter-American Transportation will complete its dissolution period in August 1949: Programs being carried on by the remaining corporations, The Institute of Inter-American Affairs and the Inter-American Educational Foundation,Inc., under agreements with Latin-American countries, will be completed during fiscal year 1949. Although these corporate activities of the Office of Inter-American Affairs are being concluded, certain aspects of the program will be continued as part of the long-range program of cooperation with the other American Republics under the leadership of the Department of State.

## THE INSTITUTE OF INTER-AMERICAN AFFAIRS

## Creation and Purpose

The Institute of Inter-American Affairs was created under the laws of the State of Delaware on March 31, 1942, pursuant to authority contained in the Third Supplemental National Defense Appropriation Act, 1942 (55 Stat. 818). This Corporation is a Government-controlled, nonprofit, membership corporation.

The general purposes of this Corporation, as set forth in its certificate of incorporation, are to aid and improve the health and general welfare of the peoples of the Western Hemisphere in collaboration with their governments. These purposes have been and are being accomplished by helping to solve critical health, sanitation, and food problems, the control and solution of which are essential to the economic development of the Western Hemisphere; to provide assistance which will expedite the procurement of materials which are in short supply; to offset serious economic dislocations, and to carry out a health and sanitation program based upon resolution 30 of the meeting of the ministers of foreign affairs of the American Republics held in Rio de Janeiro, Brazil, January $15-28,1942$. During the first half of the war period, the operations of the Corporation were directed toward those activities and programs which aided the war effort, such as health and sanitation and food production measures around the air and military bases of this country in the other American Republics and in areas from which strategic and critical materials essential to the war effort were obtained. During the last half of the war period, increased emphasis was placed on activities and programs which directly aid the economic development of the other American Republics, such as the general improvement of health and sanitation conditions and the introduction of improved methods of agriculture so as to raise the general living conditions in those countries. At the present time the principal activity of this Corporation is that of cooperating with the other American Republics in carrying out in those countries health and sanitation and food supply programs. These programs improve local conditions, strengthen hemispheric unity and further trade
expansion between the United States and the other American Republics.

The major activities of the Corporation are conducted in cooperation with the other American Republics in accordance with the terms of agreements entered into with their governments. The agreements usually provide for the programs to be performed by cooperative services established within the framework of the particular ministry or department concerned, i. e., ministry of health or ministry of agriculture. Provision is also made for the programs to be approved and conducted by mutual agreement of the parties under the general supervision of the chief of party of the technical mission sent to the particular country by the Institute. The cooperative agreements provide for contributions by both parties of funds, materials, and services. During the past year the governments of the other American Republics have been increasing their contributions, and this Government through the Institute has been decreasing its contributions to these cooperative programs. Studies are now being made by the Department of State and the Corporation to determine the advisability of continuing the programs of the Corporation beyond the fiscal year 1948 and accordingly whether application for a Federal charter should be made by the Corporation.

## Financial Organization

The Corporation has been financed by grants made by the Office of Inter-American Affairs. The total amount granted is $\$ 65,434,236$, of which amount $\$ 58,434,236$ has been paid over to the Corporation. The remainder, $\$ 7,000,000$, is estimated to be paid over in fiscal year 1948 in order that the Corporation may meet its commitments, and when appropriated for this purpose will be applied to contract authority granted the Office of Inter-American Affairs in the fiscal year 1944 and obligated during that year by the execution of grants-in-aid to the Corporation for its cooperative programs. Also, in the case of one country, the fund contributions of the local government estimated at $\$ 400,000$ are taken into the Corporation and
disbursed directly by it. In the cases of other countries, however, the fund contributions of the governments of the other American Republics amounting to $\$ 25,972,321$ are disbursed by the cooperative service established within the framework of the local governments, through which the cooperative program is carried out. Contributions, other than cash, are also made by the other American Republics to the cooperative services, estimated value of which is $\$ 4,419,607$. The total contributions to cooperative programs by the other governments under the two systems described above total $\$ 30,791,928$, or 57 percent of the amount committed by the Corporation for such programs.

No funds have been borrowed or securities issued by the Corporation. The transactions of the Corporation from its inception have been audited by the General Accounting Office, under an arrangement with the Comptroller General at the beginning of the fiscal year 1944. The Corporation is now subject to audit by the General Accounting Office, under the provisions of Public Law 248, Seventy-ninth Congress, entitled the "Government Corporation Control Act."

## Analysis of Budget Program by Major Activities

The budget program of the Corporation during the fiscal year 1948 will continue at about the same level as in the fiscal year 1947. During the fiscal year 1946, there were 26 cooperative agreements in effect; during the fiscal year 1947, 23 were in effect, and during the fiscal year 1948 there will remain 20 in effect. The cooperative programs, and other expenses related to such programs, amounted to $\$ 7,910,596$ during the fiscal year 1946, and are estimated at $\$ 8,179,516$ during the fiscal year 1947, and $\$ 6,041,252$ during the fiscal year 1948. The requirements of the Washington office (general administrative and the expenses of the operating divisions) have been estimated for the fiscal years 1947 and 1948, taking into consideration the number of cooperative agreements in effect during those years with an allowance for a reasonable period after termination of any cooperative agreements for the completion of operating, legal, and fiscal records and files and documentation of accomplishments. The active programs are discussed below, and pertinent financial data are set forth in the statement of sources and application of funds (exhibit A) and the statement of income and expenses (exhibit B).

## HEALTH AND SANITATION PROGRAMS

As a result of the third meeting of the ministers of foreign affairs of the American Republics at Rio de Janeiro in January 1942, The Institute of Inter-American Affairs, as an agency of the United States Government, entered into cooperative agreements to aid and improve the health and general welfare of the people of the Western Hemisphere in collaboration with 18 of the other American Republics in the following chronological order: Ecuador, Brazil, Haiti, Paraguay, Costa Rica, Nicaragua, El Salvador, Honduras, Peru, Bolivia, Guatemala, Colombia, Panama, Venezuela, Chile, Mexico, Dominican Republic, and Uruguay. Under extended agreements, operations are continuing in all countries except Panama, where the program terminated in September 1945. This Budget reflects expiration of most agreements by June 30, 1948. Several do not expire until the first part of the fiscal year 1949.

Program expenditures, including related expenses, amounted to $\$ 6,617,720$ in fiscal year 1946. It is esti-
mated that similar expenditures during fiscal year 1947 will amount to $\$ 7,310,880$ and during fiscal year 1948 to $\$ 5,249,350$ (see exhibit B). Total expenditures of the Corporation, under and related to health and sanitation cooperative agreements, from the inception of the Corporation to the end of the programs are estimated at $\$ 49,927,782$. Contributions, in cash and in kind, of local governments under health and sanitation agreements during the entire cooperative program are estimated at \$24,621,055.

As of June 30, 1946, reports showed that 711 health and sanitation activities carried on under cooperative agreements had been completed and 495 were in an active status. The total of 1,206 were distributed as follows: 256 (including 197 completed) involved the construction or improvement of medical and public health facilities; 465 (including 306 completed) were in the field of sanitation; and 485 (including 208 completed) were medical or other public health activities. During the remainder of the program, the construction activities will be on a much smaller scale and will emphasize the erection or improvement of buildings for the use of the local agencies engaged in public health activities. Operation of completed structures will take a more prominent phase in the program, together with health education, prevention of disease, and general sanitation.

Training of South and Central American technicians is playing an integral part in all programs providing a staff of national technicians to carry on public health and sanitation activities. This is being accomplished both by training of national doctors, nurses, and engineers in graduate schools of the leading universities in the United States, and by working with North American technicians both in their own countries and in the United States. This type of training gives the Latin-American technicians a broad knowledge of American methods and products.

The most recent information available indicates that in connection with the cooperative health and sanitation programs there were 9,440 national personnel employed, of whom 367 were physicians, 167 engineers, 171 nurses, 605 practical nurses or sanitary inspectors, 6,734 local workmen, and 1,396 technical, clerical, and other personnel. Practically all of this personnel is employed by the cooperative services through which the programs are carried on. In addition, United States citizens numbered 130 , including 15 physicians, 40 engineers, 4 architects, and 35 nurses.

The Institute of Inter-American Affairs has also authorized the allocation of funds for a number of special health projects. These are not under the general supervision of the cooperative services but supplement the public health program by cooperating with other public health agencies, such as the Pan-American Sanitary Bureau, the U. S. Office of Vital Statistics, and the Surgeon General's Office of the United States Army. These special funds have made provision for such activities as the typhuscontrol project in Mexico, the study of onchocerciasis in Mexico and northern Guatamala, the use of penicillin in the treatment of yaws in Haiti (in cooperation with the Surgeon General's Office of the United States War Department to determine the value of such treatment and control of the disease in relation to other areas in the world where United States Army and Navy personnel might be stationed).

The enthusiasm and support of the other American Republics has been manifested not only by their requests for extensions of agreements but also by substantial increases, under the extended agreements, in their contributions, which equal or exceed those of the Corporation.

Another evidence of the usefulness of these programs from a political point of view has been brought out by the receipt of commendatory correspondence from many of the United States ambassadors in Latin America who are acquainted with the programs. These ambassadors have made specific requests for the continuation of this work.

## FOOD SUPPLY PROGRAM

The objectives of this program are as follows: (1) to increase the production of food crops for local consumption; (2) to demonstrate ways of improving the level of living and increasing the purchasing power of the people, thus contributing to the economic stability of neighbor countries and evidencing that the Inter-American program continues.
The wartime emergency character of the food supply program has changed from one of direct concern with the successful prosecution of the war to operations emphasizing the improvement in chronic unfavorable economic conditions that had been aggravated by war and will continue critical in the immediate postwar years.
In July 1945, the need for agricultural assistance by the United States was recognized by the third interAmerican conference on agriculture at Caracas, Venezuela. In its final act, it stated that the work of The Institute of Inter-American Affairs and the United States Department of Agriculture has been beneficial "(a) in promoting the production of food; (b) in facilitating technicians and new agricultural techniques; (c) in furthering technical education and development by the interchange of students * * *." It further stated: "This collaboration should be continued so that it may render the maximum possible benefits * * *."
In each country in which the food supply program has operated, the type of program to be undertaken has been set forth in a cooperative agreement. The agreement provides the general basis for the program, and specific project agreements executed under the provisions of the cooperative agreement described in detail the work to be done. While choice of projects depends on local needs and circumstances, problems of food supply are nevertheless similar in all of the other American Republics. Projects involve: (1) demonstrating improved methods of irrigation, drainage, erosion control, land clearing and preparation; (2) training of nationals to carry on future activities; (3) assisting local producers in obtaining seed, fertilizer, insecticides, etc.; (4) initiating or strengthening agricultural education and extension programs; (5) assisting in construction of food storage facilities and improvement of distribution and marketing systems; and (6) demonstrating improved methods of livestock and pasture management.
During the fiscal year 1947 the food program in Venezuela was ended in accordance with the terms of the agreement of May 14, 1945. Termination reports on each individual project were prepared and signed by the chief of the food supply field party and the Minister of Agriculture of Venezuela, and an over-all termination agreement was signed by representatives of both governments on May 29, 1946. All projects were thus placed under the sole direction of the Venezuelan Government and it is expected that a large portion of the work will be continued within the Ministry of Agriculture. Programs continue in Haiti, Costa Rica, Peru, and Paraguay. It is contemplated that the programs in those countries will be continued throughout the fiscal year 1948.
Program expenditures, including related expenses, aggregated $\$ 996,881$ in the fiscal year 1946 and are esti-
mated at $\$ 954,520$ in the fiscal year 1947 and at $\$ 972,094$ in the fiscal year 1948 (see exhibit B). Total program expenditures, including expenses related to cooperative programs from the inception of the cooperative programs to the presently established termination dates of the agreements, are estimated at $\$ 9,702,925$. As compared with this, the cooperating local governments have or will contribute, in cash and in kind, an estimated sum of $\$ 4,729,726$ to the programs.

An encouraging tendency of local governments to increase their cash participation makes possible the continuation of the remaining programs operating with proportionately smaller United States financial contributions. The 4 years' experience gained in conducting operating programs in these countries indicates clearly that such programs are of real benefit in promoting economic stability and progress.
The Food Supply Division is completing the liquidation of the two terminated programs of the former Emergency Rehabilitation Division. Final payments in connection with the last of these programs are anticipated in the fiscal year 1947 (see exhibit B).

## TRANSPORTATION PROGRAM

This program is one which was carried on by the Office of Inter-American Affairs and which is being liquidated by The Institute of Inter-American Affairs in fiscal year 1947. It involves the carrying on to completion of transportation missions and training projects started by the Office of Inter-American Affairs in fiscal year 1946, funds for which have been provided The Institute of InterAmerican Affairs by the Office of Inter-American Affairs.

The objective of this program was assistance to the other American Republics, through missions of technicians and provision of instructional opportunities for officials, in maintaining, modernizing, and developing their transportation systems so as to provide a basic factor (adequate and economical transportation) so essential to raising their standard of living and increasing their buying power. Also, from the standpoint of the United States, advantages accrued from participation in programs to improve transportation facilities in the other American Republics.
During fiscal year 1947, the rail and highway missions in Colombia, Venezuela, Ecuador, and Bolivia, will be completed. Estimated expenditures for this type of work are $\$ 39,300$. Also, there will be concluded the training projects which involve the bringing to the United States for tours of inspection officials of the local, national, or state governments connected with transportation (see exhibit B).

## SPECIAL PROGRAMS

The expenditures under this heading (see exhibit B) pertain principally to certain over-all special projects carried out in conjunction with or to supplement the cooperative health and sanitation and food supply programs. The two largest projects hate been (1) a motionpicture project, the purpose of which is to supplement the field programs with appropriate educational films, and (2) a project assisting in the establishment of the InterAmerican Institute of Agricultural Sciences at Turrialba, Costa Rica. The latter project was in cooperation with the Pan American Union and the Department of Agriculture, and the Corporation's part has been carried out at the specific request of the Department of State pursuant to arrangements initially approved by the Bureau of the Budget.

## Operating Results

During the fiscal year 1946, operations carried on by the Corporation resulted in a net expenditure of $\$ 8,716,209$. Inasmuch as this Corporation is not operated for profit, this represents, in fact, depletion of capital. The depletion of capital during the fiscal year 1947 is estimated to be $\$ 9,168,516$, and during the fiscal year $1948, \$ 6,955,253$.

## Financial Condition

CAPITAL
The capital of the Corporation is derived principally from grants-in-aid made by the Office of Inter-American Affairs from funds appropriated or authorized by the Congress for the programs carried on by the Corporation. The Corporation has been required to absorb, within its present capital, expenses which were not estimated for or contemplated at the time the Office of Inter-American Affairs obtained funds in the form of cash appropriations and a contract authorization of $\$ 18,000,000$, the latter in fiscal year 1944, to be used in providing the capital of the Corporation. Some of these expenses are overtime and pay increases made pursuant to law. Also, beginning with the fiscal year 1947, the Corporation is required to pay its share of over-all fiscal, legal, personnel, and other supervisory services which were previously financed by the Office of Inter-American Affairs. (See further statements on this matter under the heading "Administrative expenses".) Taking all of these factors into consideration, it is estimated that the Corporation has a reserve for contingencies of only $\$ 18,424$.

## CASH REQUIREMENTS

As stated before, the Corporation has been financed principally by grants-in-aid from the Office of InterAmerican Affairs under contract authorization of $\$ 18,000,000$ granted and obligated during the fiscal year 1944, for which cash appropriations are still required. As of June 30, 1947, the unliquidated balance of this contract authorization will be $\$ 7,000,000$. This sum will be required in the fiscal year 1948 to liquidate finally this contract authorization and for payment over to the Corporation for its programs.
CASH CONTRIBÚTIONS UNDER COOPERATIVE AGREEMENTS
As previously explained, some of the agreements under which the Corporation carries on its cooperative programs provide that the cash contributions of the local government shall be deposited into and disbursed by the Corporation from a special account of the Corporation in conjunction with the Corporation's program cash contribution. The sum of all local government cash contributions to be made under such agreements during the period of the agreements is estimated at $\$ 400,000$. In the other type of agreement under which the Corporation operates, the
program cash contributions of both parties are paid into a cooperative service established within the framework of the appropriate ministry of the local government through which service the cooperative program is carried out. Under this type of agreement, local government cash contributions are estimated at $\$ 25,972,321$ over the period of the agreements.

## ADMINISTRATIVE EXPENSES

This expense covers the general administrative expenses of the Corporation in Washington including the supervisory staff of the Corporation which is concerned with program operations, the salaries of employees engaged directly in handling fiscal, legal, and personnel matters, and providing general office services, as well as incidental expenses such as supplies and materials, communication services, etc. In 1947, there are included payments for over-all administrative and other supervisory services formerly provided by the staff of the Office of InterAmerican Affairs without cost to the Corporation. Penalty mail service and certain travel and communications costs likewise were furnished prior to 1947 by the Office of Inter-American Affairs without cost to the Corporation.

During the fiscal year 1946, personal services averaged 236.7 positions and during the fiscal years 1947 and 1948, there are estimated 212 and 180 positions, respectively. In 1947 and 1948, the Corpocation carries administrative expenses for which it will be reimbursed by several other corpocations for which services are rendered. (For further details see statement of income and expenses, exhibit $B$ and schedule $B-1$.)

## INSTITUTE OF INTER-AMERICAN TRANSPORTATION

## Creation and Purpose

The Institute of Inter-American Transportation was created under the laws of the State of Delaware on June 26, 1943, pursuant to authority contained in the First Supplemental National Defense Appropriation Act, 1943 (56 Stat. 708). This Corporation is a Government-controlled nonprofit, stock corporation, the stock being held by the Secretary of State, as agent for the United States.
The general purpose of the Corporation, as set forth in its certificate of incorporation, is to assist and improve the means and methods of transportation in the Western Hemisphere by land, air, or water. However, the activities of the Corporation were directed only toward carrying out the terms of a cooperative agreement to rehabilitate and improve the operating efficiency of certain key sections of the National Railways of Mexico, as provided in an exchange of notes between the Governments of Mexico and the United States, dated November 18, 1942, as amended.
At the beginning of the war it was necessary to determine with accuracy the transportation potential, both as a measure of defense in case of invasion and as a means of obtaining materials of war which ordinarily came from areas made inaccessible to us by enemy action. It was quickly decided that most of the transportation facilities in the other American republics, particularly rail facilities in Mexico, were inadequate to handle the added strain of wartime traffic. It was therefore necessary for the United States to do everything in its power to rehabilitate these facilities and in order to put them into such operating condition as would permit the expeditious movement of extra wartime traffic in strategic materials.
The Corporation's operations in Mexico have been carried out through the United States Railway Mission. The activities of the Mission have been concluded and a certificate of dissolution of the Corporation was filed with the secretary of the State of Delaware on August 21, 1946. The Corporation will not apply for a Federal charter.

## Financial Organization

The former Office of Inter-American Affairs purchased 1,000 shares of capital stock at par value of $\$ 100$ per share and thereby provided the Corporation with its original capital of $\$ 100,000$. In addition to providing capital through the purchase of stock the former Office of Inter-American Affairs made grants to the Corporation amounting to $\$ 7,500,000$. Both the capital stock and the administration of the grants were taken over by the Secretary of State, pursuant to the provisions of Executive Order 9710, effective May 20, 1946. No bonds have been issued by the Corporation. The transactions of the Corporation from its inception have been audited by the General Accounting Office under an arrangement made with the Comptroller General at the beginning of fiscal year 1944. The Corporation is now subject to audit by the General Accounting Office under the provisions of the Government Corporation Control Act, Public Law 248, Seventy-ninth Congress. A statement of condition of the Corporation is shown immediately following the textual material (exhibit C).

## Analysis of Budget Program by Major Activities

The budgetary program of the Corporation for the fiscal year 1948 relates to liquidation. Under the laws of the State of Delaware, the Corporation, as a dissolved entity, is allowed a 3 -year period in which it must liquidate its assets and effect settlement of claims. This period will expire on August 21, 1949.

In accordance with a policy determination by the Department of State, active operations of the Mexican Railway Mission project were terminated on June 30, 1946. Therefore, it was only necessary to provide operating funds for this project until that date and, in addition, funds for a short time beyond June 30, 1946, for a small field staff to close out the operations in Mexico, including documentation of the work done during the term of the agreement. In addition, technical personnel were needed in the Washington office for some time to document accomplishments, complete files, and assist in the closing of the field project as well as to undertake and carry on the liquidation of the Corporation. Performance of certain administrative and legal functions will be necessary while the Corporation continues the liquidation and winding up of its affairs during the 3 years allowed by the laws of the State of Delaware. The level at which activities were carried on during the fiscal year 1946 and the comparative estimates for the fiscal years 1947 and 1948 are shown in the statement of sources and application of funds in the financial statements immediately following narrative (exhibit A).

## Mexican Railway Mission

Early in 1942 a small survey mission was sent to Mexico by the Office of Inter-American Affairs to examine the railways of that country. On the basis of reports furnished by that survey mission, the Governments of Mexico and the United States agreed to cooperate in the rehabilitation of certain sections of the National Railways of Mexico. These railways constitute the only transport system serving most of Mexico. Extending from the Texas border to Guatemala, there are lines serving all sections of the country except the northwest portion. They constituted the only means of transporting mineral and metal ores from mines to mills and smelters, and the only means in many cases of transporting agricultural and forest products from points of production to consuming or distributing points. For many years the railway had suffered from inadequate maintenance, obsolete and insufficient equipment, and from inefficient operation. They were not in condition to transport satisfactorily the normal volume of freight and passengers, and were wholly incapable of assuming the additional burden resulting from the withdrawal of ocean vessels serving Mexico and the increase in the movement of strategic materials. It was determined that it was in the interest of this Government to pay its equitable share of the cost of the improvements which had to be made in order that the materials in question might be transported to United States war plants.

By the agreement between the two Governments, it was provided that each Government would furnish an equitable part of the material and equipment required. The Mexican Government and the National Railways of Mexico agreed to direct their operating facilities toward the fullest realization of the rehabilitation program, while this Government agreed to furnish necessary technical assistance, and assist in making possible the procurement of essential equipment, and share in the rehabilitation expense. Principal activities under this agreement have consisted of close inspection and replacement of thousands of defective rails, ties, switches, and hundreds of bridges; purchase of track tools, motor rail cars, and modern repair equipment; improving and reballasting roadbeds and yards; construction of new passing tracks and auxiliary spur tracks; purchase and repair of used locomotives in the United States for use in the Railways; installation of centralized traffic control systems; training of specially selected supervisors and mechanics of the railways of the United States; and the furnishing of highly skilled United States technicians, many of them loaned by the United States railroads, for the supervision of the programs and training of executive personnel as well as employees at large in the modern phases of railway operation and maintenance.
The agreement referred specifically to certain main line portions of the Railways which form a direct rail line from the United States border at Laredo, Tex., to Suchiate, on the Mexico-Guatemala border. That line is the only overland route toward the Panama Canal. Efforts of the mission sent to Mexico to accomplish the purpose of the agreement were concentrated upon these portions of the National Railways, but it was soon obrious that constructive rehabilitation of any portion of the Railways also had to be accompanied by a measure of improvement to the feeder lines.
While the mission was originally sent to Mexico as an agency of the former Office of Inter-American Affairs, it was transferred to and continued as a part of the Institute of Inter-American Transportation upon creation of the latter on June 18, 1943.

Due to the continuing nature of the work undertaken, it is difficult to segregate the accomplishments and obligated costs into any one period. War conditions interfered in many cases with the prompt delivery of needed articles, and on one occasion a disastrous hurricane and succeeding flood interrupted and caused changes in planned operations. Although it had been feared that the warinspired increase of traffic, both by the increase of materials and by the removal of ocean transport, would result in a collapse of the Railways, no collapse has occurred. Interruptions of service by wash-outs have been of short duration, due entirely to the prompt action taken to restore damaged or destroyed properties. By June 30, 1944, shipments of strategic materials to this country had increased, a great many actually dangerous conditions had been corrected, more than 1,000 carloads of machinery and equipment had been transported across Mexico for our War Department and many more carloads of supplies followed, and a much higher degree of efficiency had been obtained in all departments of the Railways.

From July 1, 1944, to June 30, 1945, the Mission continued its supervision of recommended improvements and completed the modernization of several important repair shops and storehouses. Many miles of track were completely rehabilitated and a further improvement in shop output was obtained. The Mission members were able to spread their activities over larger territories due to
their having trained successfully local workers and officials who carried on the program in their own areas. More attention was given to the operating activities of the Railways, inasmuch as freight movements in the United States had reached a crescendo requiring the use of every available freight car, including many which had been in use in Mexico. The number of our own freight cars in Mexico was held to an agreed figure, and yet an even greater volume of freight was moved in and across Mexico.

During the fiscal year 1946 the mission continued its activities on a reduced scale, and completed its active operations on June 30, 1946. Program expenditures, including technical and other assistance but exclusive of Washington Administration, during this year were $\$ 1,679,213$. With the exception of the technical and other assistance expenditures of $\$ 383,982$, these program expenditures related to work commitments executed prior to December 31, 1944. The rehabilitation envisioned has not been completed and cannot be completed for 5 to 7 years, but great improvement has resulted to the important main lines, and preparatory work has been done which, if continued, will ultimately result in efficient operations throughout the Railways.
Reliable estimates indicate that the Railways expended much more for rehabilitation and improvement purposes during the period of the agreement than it had spent for such activities in a previous like period of normal operations. It is estimated that the Railways have contributed to the program at least $\$ 40,000,000$, in comparison with total program expenditures by this Corporation of $\$ 6,-$ 642,239 . Almost one-half of the contribution by the Railways was expended in the United States for materials, machinery, and equipment.
It should be recognized that the economy of Mexico is directly dependent upon its transportation facilities. Mexico's assistance to us during the war years was actual and invaluable; the maintenance of Mexico's economy is essential to us in peace as well, and although the work of rehabilitation was undertaken as an outright war measure, the cooperative work covered by the agreement continued until June 30, 1946, and thereafter became a responsibility of the Railways, to be carried out for the economic wellbeing of both nations. (For further details on this program see exhibits A and B.)

## Operating Restlits

During the fiscal year 1946, programs carried on by the Corporation resulted in expenses of $\$ 1,737,784$. For the fiscal year 1947, it is estimated that the expenses will be $\$ 295,585$, and for the fiscal year 1948, $\$ 15,700$. Inasmuch as this Corporation is not operated for profit the expenses reflected above represent, in fact, depletion of capital.

## Financial Condition

## RETURN OF CAPITAL FUNDS TO THE TREASURY

During the fiscal year 1946, the Corporation returned to the Treasury the sum of $\$ 487,390$, pursuant to the provisions of the First Supplemental Surplus Appropriation Rescission Act, 1946, and the Second Supplemental Surplus Appropriation Rescission Act, 1946, which provided, respectively, for the return of $\$ 315,500$ and $\$ 171,890$. The latter sum was placed in a nonexpendable reserve status prior to June 30, 1946, and was actually paid into miscellaneous receipts in the fiscal year 1947. It is estimated that in 1947 there will be deposited in miscellaneous receipts an additional $\$ 200,000$ saved from allotments
for completed field programs. Upon final liquidation of the affairs of the Corporation any funds then remaining will be deposited in miscellaneous receipts of the United States Treasury.

## Administrative Expenses

This expense covers the general administrative expenses of the Corporation in Washington, including the supervisory staff of the Corporation which is concerned with program operations, the salaries of employees engaged directly in handling fiscal, legal, and personnel matters and providing general office services, as well as incidental expenses such as supplies and materials, communication services, etc. In 1947 and 1948 there is included a payment for over-all and administrative supervisory services provided without cost to the Corporation, prior to fiscal year 1947, by the former Office of Inter-American Affairs. Penalty-mail service likewise was furnished, prior to fiscal year 1947, by the former Office of Inter-American Affairs without cost to the Corporation.

During the fiscal year 1946, personal services averaged 15.4 positions; and in the fiscal year 1948, 3 positions are estimated for as compared with 12 positions in 1947, a reduction of 9 positions. (For further details see statement of income and expenses, exhibit $B$ and schedule $B-1$.)

## INTER-AMERICAN EDUCATIONAL FOUNDATION, INC.

## Creation and Purpose

The Inter-American Educational Foundation, Inc., a Government-controlled, non-profit, membership Corporation, was created on September 25, 1943, under the laws of the State of Delaware, pursuant to authority contained in the act of July 12, 1943 (Public Law 139, 78th Cong.) entitled National War Agencies Appropriation Act, 1944 (57 Stat. 528)

The general purposes of the Foundation, as set forth in its certificate of incorporation, are to further the general welfare of and to strengthen the bonds between the peoples of the Western Hemisphere by undertaking a cooperative inter-American educational program involving modern educational techniques and teaching aids, and training of teachers and school administrators.

The cooperative programs are carried out through bilateral agreements with the governments of the other American Republics providing for (1) a technical staff or mission to be furnished by the Foundation for work in the other republics, (2) the interchange of educators, and (3) the preparation and interchange of teaching materials, such as visual aids, textbooks, and pamphlets. The agreements provide for the cooperative programs to be carried out through the ministry or department of education of the local government with the technical advice and assistance of the field staffs sent by the Foundation to the particular countries. The agreements further provide for contributions by both parties of funds, materials, and services. The programs consist of individual projects which are mutually agreed upon in writing by the representatives of the parties to the agreement and which provide for the specific kinds of work and activity to be undertaken. In some cases the agreements provide for the programs to be performed by cooperative services established within the framework of the particular ministry or department concerned, while in other cases the programs are performed by the Foundation through the appropriate ministry or department of the local government.

Active field operations under existing agreements do not extend beyond June 30, 1948, and it is not contemplated that an application for a Federal charter will be made.

## Financial Organization

Funds for carrying out the programs of the Foundation have been made available to it by grants from the Office of Inter-American Affairs, aggregating \$5,088,275. Contributions equaling $\$ 444,928$ are being made by the governments of several Latin-American countries to be disbursed directly with funds of the Foundation for mutually approved programs. In addition, several other countries have made contributions which are disbursed by cooperative services established within the framework of the ministry or department of education of the local government through which agencies the cooperative program is carried out. Contributions by the local governments to these cooperative services are estimated at $\$ 2,162,500$. It is estimated that the Foundation will contribute the sum of $\$ 2,685,205$ for cooperative programs. The total contributions to such programs by
the local governments under the two systems described above total $\$ 2,607,428$, or 97 percent of the Foundation's contributions to such programs.

No funds have been borrowed or securities issued by the Foundation. The transactions of the Foundation from its inception have been audited by the General Accounting Office, under an arrangement made with the Comptroller General at the beginning of the fiscal year 1944. This was before the Foundation became subject to audit by the General Accounting Office under the provisions of Public Law 248, 79th Congress, the Government Corporation Control Act.

## Analysis of Budget Program by Major Activities

During the fiscal year 1947, the Foundation will reach its maximum level of activity. During the fiscal year 1946, the Foundation operated in 14 countries and expended $\$ 681,267$ of program funds. In the fiscal year 1947 the Foundation will operate in 13 countries and it is estimated will expend $\$ 1,523,691$ of program funds. Under present plans the agreement with one country will be cancelled and another will terminate in the fiscal year 1947 and all others will terminate by the end of fiscal year 1948. In the fiscal year 1948 the Foundation will operate in 12 countries and it is estimated will expend $\$ 1,165,730$ of program funds. These programs are discussed in greater detail below and the financial requirements are shown below in a statement of sources and application of funds (exhibit A).

## COOPERATIVE EDUCATIONAL PROGRAM

The general objective of the Foundation is the development of cooperative educational programs in collaboration with ministries of education of the other American Republics that emphasize vocational education, the training of teachers, the improvement of rural life and agriculture, the development of community schools, health education and the teaching of the English language.

Prior to fiscal year 1946, plans for the program were developed, teaching materials were sent to all of the other American Republics, and agreements were signed or commitments made by exchange of diplomatic notes with Peru, Haiti, Guatemala, Honduras, Nicaragua, Bolivia, Costa Rica, Ecuador, Chile, Paraguay, El Salvador, the Dominican Republic, Panama, and Brazil (2 separate agreements were signed with Brazil for cooperative programs, 1 with the Ministry of Agriculture, and the other with the Ministry of Public Health and Education, which makes a total of 15 agreements with 14 countries). Educational activities have been carried on in all of the other American Republics. Activities in countries that have not sigred cooperative agreements have consisted largely of interchanges of personnel materials and special projects of a more limited scope than the cooperative educational programs.

Specialists in vocational education, health education, rural education, teacher training, and English teaching were sent to the other American Republics to work in these cooperative programs. Prior to the fiscal year 1946,
nearly 500,000 books, pamphlets, maps, charts, and other teaching materials were made available to field parties of the Foundation and to schools in all 20 of the other American Republics, and in 1946 over 60,000 of these same items were distributed through the offices of the special representatives of the Foundation. So far in 1947 about 1,600 samples of United States teaching materials have been sent to the other American Republics. Since 1944, the Foundation has been collaborating in the preparation and distribution of locally created teaching materials in the several countries in which programs are in operation. Distinguished educators, supervisors, and teachers from the other American Republics were brought to the United States to lecture, to study, and to participate in national, state, and local educational programs. The number who have participated in this program now totals 73.

Though the war brought into relief the necessity of initiating the cooperative educational program, from the beginning it was conceived to be a long range effort. It has always been planned that the other governments would gradually take over the cooperative educational programs and integrate them into their regular school activities, with whatever continuing cooperation from the United States as may be necessary.

Each country has its own peculiar educational problems and the type of program developed has consequently varied from country to country in accordance with these problems. All, however, provide for (1) the sending of United States educational specialists to work with the minister of education and his staff, (2) the development of teaching materials, and (3) the bringing of distinguished educators, supervisors and teachers to the United States to lecture, to study, and to participate in national, state, and local educational programs. The programs now in operation fall into four general classes. In one Brazilian program and in the programs in the Dominican Republic, Panama, Paraguay, and Peru the principal emphasis is on vocational education. In Costa Rica, Ecuador, El Salvador, Guatemala, Haiti, and Honduras the principal emphasis is on rural and general teacher education. In Bolivia, and in the second Brazilian program, the main emphasis is on rural education and the improvement of rural life and agriculture. In Chile the program deals almost exclusively with secondary education.

## Operating Results

During the fiscal year 1946, operations carried on by the Corporation resulted in an expenditure of $\$ 916,821$. Since this Corporation is not operated for profit, this expenditure represents, in fact, depletion of capital. The depletion of capital during the fiscal year 1947 is estimated to be $\$ 1,913,191$, and during the fiscal year 1948, $\$ 1,565,730$.

## Financial Condition

## CAPITAL

The capital of the Corporation is derived principally from grants-in-aid made from funds appropriated or authorized by the Congress for the programs carried on by the Corporation. The Corporation has been required to absorb, within its present capital, expenses which were not estimated for or contemplated at the time the former Office of Inter-American Affairs obtained funds in the form of cash appropriations and a contract authorization of $\$ 2,500,000$, the latter in fiscal year 1945, to be used in
providing the capital of the Corporation. Some of these expenses are overtime, rental of space in Washington, D. C., and pay increases made pursuant to law. Also, beginning with the fiscal year 1947, the Corporation is required to pay its pro rata share of over-all fiscal, legal, personnel, and other supervisory services, which were previously financed by the Office of Inter-American Affairs. (See further statements on this matter under the heading, Administrative expenses.)

## CASH REQUIREMENTS

As stated before, the Corporation has been partially financed by grants-in-aid from the Office of Inter-American Affairs, under contract authorization granted for the fiscal year 1945 , for which cash appropriations are still required. As of June 30, 1947, the unliquidated balance of this contract authorization will be $\$ 1,115,000$. This sum will be required for the fiscal year 1948 to liquidate finally this contract authorization and for payment over to the Corporation for its programs.

## CASH CONTRIBUTIONS UNDER COOPERATIVE AGREEMENT

As previously explained, some of the agreements under which the Corporation carries on its cooperative program provide that the cash contributions of the local government shall be deposited into and disbursed by the Corporation from a special account of the Corporation in conjunction with the Corporation's program cash contribution. The sum of all local government cash contributions to be made under such agreements during the period of the agreements is estimated at $\$ 444,928$. Prior to fiscal year 1946, the sum of $\$ 13,000$ was received under such agreements. During the fiscal year 1946, $\$ 119,821$ was received. It is estimated that $\$ 170,769$ will be received during fiscal year 1947, and the balance, $\$ 141,338$, in 1948.

In the other type of agreement under which the Corporation operates, the program cash contributions of both parties are paid into a cooperative service established within the framework of the appropriate ministry of the local government through which agency or service the cooperative program is carried out. Under this type of agreement, local government cash contributions are estimated at $\$ 2,162,500$ over the period of the agreements.

## Administrative Expenses

This expense covers the general administrative expenses of the Corporation in Washington, including the supervisory staff of the Corporation which is concerned with program operations, the salaries of employees engaged directly in handling fiscal, legal, and personnel matters and providing general office services, as well as incidental expenses such as supplies and materials, communication services, etc. In 1947 and 1948, there is included a payment for over-all administrative and supervisory services which were provided without cost to the Corporation prior to fiscal year 1947 by the Office of Inter-American Affairs. Penalty-mail service and certain travel and communication costs likewise were furnished prior to 1947 by the Office of Inter-American Affairs without cost to the Corporation.

During the fiscal year 1946, personal services averaged 73.9 positions and during the fiscal years 1947 and 1948, there are estimated 79 and 75 positions, respectively. Near-peak activity will be required in the fiscal year 1948 in order for the Corporation to meet its commitments
under existing agreements with the other American Republics, since the agreements do not extend beyond June 30, 1948, and active program operations provided for therein must be completed by that date. (For further details see statement of income and expenses, exhibit B and schedule B-1.)

## INTER-AMERICAN NAVIGATION CORPORATION

## Creation and Purpose

The Inter-American Navigation Corporation was created under the laws of the State of Delaware on July 15, 1942, pursuant to authority contained in the Third Supplemental National Defense Appropriation Act, 1942 (55 Stat. 818). This Corporation is a Governmentcontrolled, nonprofit, stock corporation, the stock being held by the Secretary of State for the United States of America.

The Corporation was formed to carry out plans approved at a meeting of the members of the Board of Economic Warfare, held on July 25, 1942, for supplementing existing shipping facilities with a small cargovessel program to be carried out through the acquisition and coordination of all existing small tonnage in the Latin-American trades, particularly the Caribbean area, and the construction in Latin-American shipyards of additional small vessels.
On April 30, 1943, an agreement was made with the War Shipping Administration under which the vessels of the Corporation were turned over to that agency for the purpose of coordinating all vessel operations in the Caribbean and Latin-American trades. The purpose for which the Corporation was formed having been accomplished, the Corporation is proceeding with liquidation and will complete dissolution on February 25, 1947. This Corporation will not apply for a Federal charter.

## Financial Organization

The Corporation was capitalized by the former Office of Inter-American Affairs through the purchase of its entire issue of 5,000 shares of capital stock, at par value of $\$ 100$ each, totaling $\$ 500,000$. These shares were transferred to the Secretary of State pursuant to Executive Order No. 9710, dated April 10, 1946. In order to provide additional operating funds, the Corporation borrowed $\$ 192,952$ from the Reconstruction. Finance Corporation. This loan has been fully repaid. No bonds have been issued by the Corporation. Capital funds amounting to $\$ 175,000$ were placed in a nonexpendable reserve status prior to June 30, 1946, for deposit into the Treasury as miscellaneous receipts in accord with rescission legislation. Deposit was actually made during September 1946. Capital has been further reduced in the amount of $\$ 55,294$ which represents the value of property consisting of engines and parts disposed of during fiscal year 1946 in accordance with the Surplus Property Act of 1944. The Maritime Commission, which was designated as disposal agent of marine equipment for all Government agencies, sold the engines and parts and the proceeds were covered into the U. S. Treasury as miscellaneous receipts. The balance of capital funds as of June 30,1946 , amounted to $\$ 48,467$.

The transactions of the Corporation from its inception have been audited by the General Accounting Office under an arrangement made with the Comptroller General at the beginning of fiscal year 1944. This was before the Corporation became subject to audit by the General

Accounting Office under the provisions of Public Law 248, 79th Congress, the Government Corporation Control Act.

## Analysis of Budget Program by Major Activities

There is no estimate of funds for 1948, as the budgetary program of this Corporation consists only of funds required for final liquidation during the fiscal year 1947. Under the laws of the State of Delaware the Corporation is allowed a 3 -year period in which it must liquidate its assets and effect settlement of claims. This period will expire on February 25, 1947. The principal claims remaining to be settled are awaiting decisions by the War Shipping Administration and involve the final determination of the Corporation's liability for the purchase price of two vessels which were lost in operations while under charter to the Corporation. To meet these contingent liabilities a reserve of $\$ 45,217$ is available. However, since present claims exceed funds available for payment by about $\$ 90,000$ it is possible that the available reserve may be inadequate. The Corporation had previously established a reserve in a higher amount, but the Second Supplemental Surplus Appropriation Rescission Act, 1946, required the Corporation to deposit in the Treasury an additional sum of $\$ 75,000$ over and above the $\$ 100,000$ recommended for rescission, thereby reducing the amount of funds available to meet contingent claims. (The increase in accounts payable from $\$ 121,810$ as of June 30 , 1945 , to $\$ 200,645$ as of June 30,1946 , is due to the inclusion in the latter amount of the sum of $\$ 175,000$ which was returned to the Treasury in September, 1946.). In addition, the Corporation will be required to pay in 1947 its pro rata share (\$500) of over-all supervision previously furnished without cost by the Office of Inter-American Affairs.

## Operating Results

The Corporation has had no income for the fiscal years 1946 and 1947 except the amount of $\$ 1,669$ representing a recovery of navigation insurance losses. The net expense of the Corporation for the fiscal year 1946 amounted to $\$ 3,007$. The net expense anticipated for the fiscal year 1947 is estimated at $\$ 48,467$. Of the latter amount $\$ 3,250$ represents estimated administrative expenses for the fiscal year 1947 and $\$ 45,217$ represents a reserve for payment of contingent liabilities. Should these liabilities not materialize this amount will be covered into the U. S. Treasury.

## Financial Condition

## return of capital funds to the treasury

During the fiscal year 1947 the Corporation will be completely liquidated. The sum of $\$ 45,217$ now established as a reserve for contingent liabilities may not be used and in that event will be returned to the Treasury of the United States at the end of the liquidation period of the Corporation.

## Administrative Expenses

Inasmuch as the Corporation will be completely liquidated in February 1947, there will be no administrative expenses beyond that date. Only one position is involved, and will be filled only during a part of the 1947 fiscal year, until the conclusion of the Corporation's liquidation period. Prior to fiscal year 1947, over-all supervision was provided by the staff of the Office of Inter-American Affairs, without cost to the Corporation. Penalty-mail service likewise was furnished prior to 1947 by the Office of Inter-American Affairs without cost to
the Corporation. The requirements for administrative expenses in 1947, including prorated over-all supervision, have been estimated on the basis of complete liquidation of the Corporation in February 1947.

## PRENCINRADIO, INC.

## Creation and Purpose

Prencinradio, Inc., was created under the laws of the State of Delaware on July 20, 1942, pursuant to authority contained in the Third Supplemental National Defense Appropriation Act, 1942 (55 Stat. 818). The certificate of incorporation limits its life to 10 years (July 20, 1952). This Corporation is a Government-controlled, nonprofit, membership corporation.

This Corporation was formed to further the general welfare of and to strengthen the bonds between the peoples of the Western Hemisphere through the effective development, operation, and use of all media and facilities, whether written, spoken, or visual, for the dissemination and interchange of knowledge and information including but not limited to the press, cinema, and radio. Its activities were confined, however, to the radio and motion picture fields.
A certificate of dissolution of the Corporation was filed with the Secretary of State of Delaware on May 14, 1946, and the 3 -year liquidation period will, therefore, expire on May 14, 1949. This Corporation does not intend to apply for a Federal charter.

## Financial Organization

All funds available for the operations of the Corporation have been derived from grants made to it by the former Office of Inter-American Affairs and its predecessor, the Office of the Coordinator of Inter-American Affairs. Such grants aggregated $\$ 1,833,200$; however, $\$ 975,000$ thereof has been deposited into the Treasury of the United States as miscellaneous receipts pursuant to the provisions of the First Supplemental Surplus Appropriation Rescission Act, 1946, and the Second Supplemental Surplus Appropriation Rescission Act, 1946. The total sum available for operations, therefore, is $\$ 858,200$, since no money has been borrowed or securities issued by the Corporation.
The transactions of the Corporation from its inception have been audited by the General Accounting Office under an arrangement made with the Comptroller General at the beginning of the fiscal year 1944. This was before the Corporation became subject to audit by the General Accounting Office under the provisions of Public Law 248, 79th Congress, the Government Corporation Control Act.

## Analysis of Budget Program by Major Activities

The budgetary requirements for the fiscal year 1948 have been based on the needs of a liquidating organization. For this reason it has been necessary to provide for contingencies both as to personnel requirements and for possible noncollection of the outstanding receivables. The scope, purpose, and history of the two projects with which this Corporation was concerned are set forth below. The financial transactions for the fiscal year 1946, and estimated transactions for the fiscal years 1947 and 1948, are shown in the statement of sources and application of funds (exhibit A).

## MOTION PICTURE PROGRAM

Prencinradio was selected as the vehicle to carry on a program to stimulate the Mexican motion picture industry in the production of motion pictures which would support the United Nations war effort and hemisphere solidarity and combat pro-Axis Spanish-speaking pictures. Accordingly, Prencinradio purchased motion picture equipment for the purpose of furnishing it to the Mexican motion picture industry on a reimbursable basis. In order to make this equipment available to the Mexican industry and at the same time assure recovery of its cost to Prencinradio, a trust agreement was entered into on March 20, 1943, between the former Office of InterAmerican Affairs, Prencinradio, Inc., and the Bank of Mexico, with the full knowledge and cooperation of the Department of State. This agreement provided generally that equipment purchased by Prencinradio would be placed in trust with the Bank of Mexico for sale to the Mexican industry at cost plus the various expenses involved in the transaction, and that the Bank should sell the equipment upon a conditional sales basis, retaining title until payment of promissory notes had been made, the Bank accounting to Prencinradio quarterly. Prencinradio has completed the furnishing of the equipment and is now effecting collections through the Bank of Mexico.

As a part of its program in Mexico, Prencinradio entered into an agreement with the Servicio Cinematografico, S. A., a Mexican corporation, under which agreement the said Mexican corporation made the services of technical experts available for the purpose of instructing a number of Mexicans as motion picture technicians, as well as the rendering of technical advice to the studios on various phases of the industry.

## RADIO PROGRAM

The radio program of Prencinradio was initiated with the view of combating Axis propaganda disseminated by the Axis powers through the medium of radio. Several radio stations expressed their desire to assist Prencinradio in disseminating radio information tending to encourage friendly relations with the United States and to combat Axis propaganda detrimental to the war effort of the United States. In order to accomplish this end it was necessary to expand the facilities of several radio stations to provide for higher powered transmission. This expansion was accomplished by Prencinradio furnishing the studios with radio equipment on a reimbursable basis, or by a loan to the studios. Agreements have been executed by Prencinradio with the various stations which provide for reimbursement of the loans or equipment either in cash or in radio time used by Prencinradio or its assignees on their stations.

## Operating Results

During the fiscal year 1946, programs carried on by the Corporation resulted in net expenses of $\$ 57,757$. For the fiscal year 1947, it is estimated that the net expenses will be $\$ 53,004$ and for the fiscal year 1948, $\$ 45,311$.

Inasmuch as this Corporation is not operated for profit the expenses reflected above represent, in fact, depletion of capital. The increase in accounts payable from $\$ 16,408$ as of June 30, 1945, to $\$ 100,047$ as of June 30, 1946, is due to inclusion in the latter amount the sum of $\$ 100,000$ which was returned to the Treasury in August 1946 in accordance with rescission legislation.

## Financial Condition

Motion picture program.-On June 30, 1946, there was due" the Corporation the sum of $\$ 66,808$ under terms of the Mexican trust agreement. It is estimated that during fiscal years 1947 and 1948 collections will reduce the trust receivable account to $\$ 7,347$, as of June 30, 1947, and to $\$ 724$ as of June 30, 1948. Final payments under the trust agreement will be made during fiscal year 1949.
Radio program.-Under the terms of one agreement, the Corporation contracted to purchase, lease, and resell various items of radio station equipment. Rentals and the repurchase of equipment may be paid by use of radio time in lieu of cash payments. As of June 30, 1945, the Corporation had purchased equipment at a cost of $\$ 8,177$ and early in fiscal year 1946, the Corporation purchased additional equipment approximating $\$ 11,823$, or a total of $\$ 20,000$, the maximum amount called for by the agreement. Equipment valued at $\$ 20,000$ was repurchased by the station during 1946 for which the Corporation accepted radio time.

On June 30, 1946, there was outstanding one loan in the amount of $\$ 30,163$. Repayment of this loan is contemplated during fiscal years 1947 and 1948. Interest at the rate of 3 percent per annum is receivable on this loan.

Under another agreement, the Corporation advanced funds for the purpose of expanding station transmission facilities with the understanding that radio time used by Prencinradio, or its assignees would be applied against such advance of funds. As of June 30, 1945, the advance amounted to $\$ 234,464$. During fiscal year 1946, an additional $\$ 21,282$ was advanced. During the same period, Prencinradio applied $\$ 46,239$ to radio time used, thereby leaving an outstanding advance as of June 30, 1946, of $\$ 209,507$. It is estimated that Prencinradio, or its assignees, will use radio time valued at $\$ 24,000$ reducing the advance to $\$ 185,507$, as of June 30,1947 , with a further use of radio time of $\$ 24,000$ during 1948, thereby leaving a balance of $\$ 161,507$ as of June 30, 1948.

Return of capital funds to the Treasury.-During fiscal yesr 1946 the Corporation caused to be deposited in
miscellaneous receipts of the United States Treasury the sum of $\$ 975,000$. It is also contemplated that $\$ 88,125$ will be returned to the Treasury during the fiscal year 1947 and, in addition, that the sum of $\$ 59,461$ may be available for deposit as miscellaneous receipts during fiscal year 1948, subject, however, to the actual collection, when due, of all receivables payable in cash. Upon final liquidation of the affairs of the Corporation any funds then remaining will be deposited in miscellaneous receipts of the United States Treasury.

## Administrative Expenses

This expense covers the salaries of employees directly engaged in handling fiscal and legal matters pertaining to the Corporation, incidental expenses such as supplies and materials, communication services, etc., and during fiscal years 1947 and 1948, a pro rata share of over-all supervision provided prior to fiscal year 1947, by the staff of the former Office of Inter-American Affairs without cost to the Corporation. Penalty mail service likewise was furnished prior to 1947 by the former Office of Inter-American Affairs without cost to the Corporation. During fiscal year 1946 an average of 2.2 positions were filled which, with other related costs of administration, resulted in a total expenditure of $\$ 6,722$. Administrative expenses for 1947 are expanded over those for fiscal year 1946, due to the fact that the Corporation is required in fiscal year 1947 to pay increases in salaries occasioned by the Federal Employees Pay Act of 1946 and costs of supervision provided by the Office of Inter-American Affairs in 1946 without charge to the Corporation. During the fiscal year 1948 the expenses are estimated to be approximately the same as for fiscal year 1947 and provide two positions. (For further details see statement of income and expenses, exhibit B and schedule $\mathrm{B}-1$.)

## WAR DEPARTMENT

## UNITED STATES SPRUCE PRODUCTION CORPORATION

## Creation and Purpose

The United States Spruce Production Corporation was organized under the laws of the State of Washington on August 20, 1918, by the director of aircraft production. Authority for creation of the Corporation and limitations on the continuation of its particular functions are to be found in chapter XVI of an act making appropriation for the support of the Army, etc., approved July 9, 1918, Public Law 193.

The objects and purposes for which the Corporation was formed, as stated in its articles of incorporation, which conform to the purposes of the said chapter XVI, were, "The purchase, production, manufacture, and sale of aircraft, aircraft equipment, or materials therefor, and to build, own, and operate railroads in connection therewith, and in general, to do all acts and things which may be incidental to the carrying out of the foregoing purposes or to the exercise of the foregoing powers, or which may be necessary, advantageous, desirable, or convenient therefor."
The Corporation took over the industrial activities of the spruce production division of the bureau of aircraft production of the United States Army Air Service. The function of that bureau was the production and allocation of aircraft lumber to the United States and its allies, Great Britain, France, and Italy. In order to carry out the required production program of the bureau it was necessary for the division to assume full control of the logging and lumber industry of the Northwest, which control vested in turn in the Corporation.
On June 28, 1922, a suit for dissolution of the Corporation was filed in the superior court of the State of Washington for Clark County and its liquidation has been under the jurisdiction and supervision of this court to which the Corporation has made regular reports. The final decree of dissolution of the Corporation was entered before the court on December 12, 1946.

## Financial Organization

The Corporation had an authorized capital stock of $\$ 10,000,000$ divided into 100,000 shares of $\$ 100$ each. 99,993 shares were issued to the director of aircraft production of the United States and seven qualifying shares to directors of the Corporation. A 1 percent call was made on these shares. There was no other outstanding proprietary interest in the Corporation. The number of directors was subsequently reduced to three. All beneficial interest in qualifying shares was assigned to the United States upon issuance.
On September 18, 1918, the Corporation authorized an issue of $\$ 90,000,000$ of 5 percent participating debenture certificates of which $\$ 25,000,000$ were executed on October 10, 1918. The debentures were authorized under a plan which called for allotment to the United States and its allies, Great Britain, France, and Italy. Upon failure of these allies to subscribed to either capital stock or deben-
tures the United States took all except qualifying shares of stock and advanced $\$ 21,500,000$ on the debentures, which were issued to the director of aircraft production of the United States. As proceeds became available from disposal of its assets the Corporation took up varying amounts of these debentures, and in April 1926, the last of these debentures was paid and cancelled.

## Analysis of Budget Program-Dissolution

In view of the dissolution of the Corporation in fiscal year 1947, no estimate is being submitted for fiscal year 1948. It is anticipated that a supplemental estimate, to increase the amount authorized to be used out of the funds of the Corporation for administrative expenses in fiscal year 1947, will be submitted to provide for payment of accrued annual leave claimed but unpaid to three former employees of the Corporation. It is anticipated that the undistributed surplus of the Corporation, after retirement of outstanding capital stock and after payment to the United States Treasury of interest payable on debentures, will be held by the Finance Officer, United States Army, Washington, D. C., in a special deposit account pending action on the anticipated supplemental estimate for fiscal year 1947.

## Operating Results

The Corporation had two conditional sales contracts outstanding at the beginning of the fiscal year 1946. Final payment was made to the Corporation in August 1945, in settlement of one of these sales contracts. The other sales contract, on which there was an unpaid balance of $\$ 133,204$ due in December 1946, was transferred, without any transfer of funds, to the custody of the Army Corps of Engineers on December 9, 1946.

## Return of Capital Funds to the Treabury

During fiscal year 1947, the entire outstanding capital stock will have been retired with the return of $\$ 100,000$ to the United States Treasury for this purpose. In addition, it is anticipated that $\$ 62,967$ will have been returned to the United States Treasury in payment of interest on debentures and in disposition of the surplus funds of the Corporation.

## GENERAL PROVISIONS

Sec. 301. Funds made available by this Act for administrative expenses shall be available, in addition to objects for which such funds are otherwise available, for personal services and rent in the District of Columbia [or elsewhere; lawbooks, books of reference, periodicals, newspapers, and maps]; printing and binding; [examination of budgets and estimates of appropriations in the field; contract stenographic reporting services;] travel expenses in accordance with the Standardized Government Travel Regulations, the Subsistence Expense Act of 1926, as amended (except as to per diem rates outside continental United States), and the Act of February 14, 1931, as amended (5 U. S. C. 73a) ; Land 1 for the objects specified under the head "General provisions" in title II of the Independent Offices Appropriation Act, [1947] 1948, all the provisions of which title [(except section 211)] unless otherwise specified in this Act, shall be applicable to the expenditure of such funds; [Provided, That the head of any agency may exercise any authority vested in him by said title II through such subordinate or subordinates as he may designate for the purpose 1 and services in accordance with section 15 of the Act of August 2, 1946 (Public Law 600), except that no funds of any corporation or agency included in this Act shall be available for payment, to other than a Government agency, for services of an independent audit of the financial records of the offces of, or installing accounting systems or conducting accounting surveys for, any Government corporation or agency unless prior approval is obtained from or such service is directed to be made by the Comptroller General of the United States: Provided, That the cost of the audit of the corporation or agency, as required by the Government Corporation Control Act of December 6, 1945 (Public Law 248), shall be considered to be nonadministrative expenses for the purposes of this Act.

Sec. 302. No part of any funds of any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building at the seat of government primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

Sec. 303. [Funds of the corporations and agencies covered by the provisions of this Act shall be available for maintenance, operation, and repair of passenger automobiles and, except as otherwise provided herein, shall be available for purchase of passenger automobiles only for replacement of worn-out vehicles] Any award, compromise, or settlement made or judgment riendered pursuant to the Federal Tort Claims Act of August 2, 1946 (Public Law 601), based upon the act or omission of an officer or employee of any corporation or agency named in section 101 of the Government Corporation Control Act or other agency included in this Act operating on funds other than those appropriated by Congress from the general fund of the Treasury shall be paid from funds of or available to such corporation or agency:

Provided, That, except as such corporation or agency may determine that earlier payment would be advantageous to the Government or to such corporation or agency, no such judgment shall be paid except such as shall have become final and conclusive against the United States by expiration of the time for appeal, failure of the parties to appeal, or otherwise.

Sec. 304. Any funds of, or available for expenditure by, any corporation or agency included in this Act, which are not subject to audit by the General Accounting Office under the provisions of the Government Corporation Control Act (Public Law 248, Seventy-ninth Congress) or other law, shall be accounted for and audited in accordance with the Budget and Accounting Act, as amended, and no such fund shall be obligated or expended unless and until an appropriate appropriation account shall have been established therefor pursuant to an appropriation warrant or a covering warrant: Provided, That this section shall not be so construed as to modify or repeal any provision of any other law respecting warranting, accounting for, and auditing of funds.

SEc. 305. No part of the funds of, or available for expenditure by, any corporation or agency included in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: Provided further, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any funds available to any corporation or agency included in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $\$ 1,000$ or imprisoned for not more than one year, or both: Provided further, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing laws. (Act of July 20, 1946, Public Law 519.)

## MIXED-OWNERSHIP GOVERNMENT CORPORATIONS

The Government Corporation Control Act defines mixed-ownership corporations to include (1) the central bank for cooperatives and the regional banks for cooperatives, (2) Federal land banks, (3) Federal home loan banks, and (4) Federal Deposit Insurance Corporation. Under the provisions of this act the annual Budget is to include recommendations with respect to the return of Government capital to the Treasury by these corporations.

The recommendations with respect to the return of capital by the central banks for cooperatives and the regional banks for cooperatives together with the Federal land banks are discussed in the Department of Agriculture chapter of this Document in connection with the wholly owned Government corporations. Similarly, the return of capital by the Federal home loan banks is covered in the chapter dealing with the National Housing Agency. The return of capital by the Federal Deposit Insurance Corporation is covered in the following section:

## Federal Deposit Insurance Corporation

The Federal Deposit Insurance Corporation was organized under authority of the Banking Act of 1933 to insure the deposits of all banks that apply and qualify for insurance under the law. There are now only about 1,200 uninsured banks in the United States and its possessions. On June 30, 1946, the number of insured banks was 13,526 and the contingent liability of the Corporation with respect to insured deposits aggregated 69 billion dollars. The insurance provided by the Corporation protects the accounts of depositors up to a maximum of $\$ 5,000$ each.

To protect some 80 million depositors in the 13,526 insured banks the Corporation requires each such bank to maintain certain standards of banking practice. In carrying out its program it examines annually 6,631 insured banks not examined by any other Federal agency and reviews the reports of examination of 6,895 banks which are examined either by the Office of the Comptroller of the Currency or the Board of Governors of the Federal Reserve System. The Corporation in certain instances also conducts special examinations of the latter group of banks.

Two methods have been utilized by the Corporation to protect depositors of insured banks: (1) by making a loan on or through the purchase of substandard assets of a bank in an unsound condition in order to facilitate its merger with another insured bank; (2) by paying deposits of a closed insured bank up to $\$ 5,000$ for each depositor. During the fiscal year 1946 no bank required financial aid from the Corporation.

By Executive Order of April 27, 1942, the Corporation was given responsibility for supervision of the activities of all Federal credit unions which prior to that time had been under the jurisdiction of the Farm Credit Administration. It does not, however, insure share balances in credit unions. On June 30, 1946, there were 3,762 Federal credit unions in operation.

All insured banks pay assessments at an annual rate of one-twelfth of 1 percent of their deposit liabilities. During the past 12 years the return from its capital invest-
ment and assessments has been sufficient to cover all insurance losses and expenses and provide for the accumulation of reserve which, on June 30, 1946, amounted to 703 million dollars. The administrative expenses of the Corporation are provided for through an authorization approving the use of a specified amount of the Corporation's assets for this purpose and do not require the appropriation of funds from the United States Treasury.

The capital stock of the Federal Deposit Insurance Corporation is without nominal or par value, is nonvoting, and is not entitled to the payment of dividends. The total amount paid for capital stock outstanding is $\$ 289,299,556.99$ of which the United States Government paid $\$ 150,000,000$ and the Federal Reserve banks paid $\$ 139,299,556.99$. In view of the substantial accumulation of surplus which on October 31, 1946, approximated $\$ 746,000,000$, it appears feasible for the Corporation to begin retiring its capital stock within the next year. The retirement of the stock held by the United States would reduce the public debt to the extent of the amount retired. Legislation will be proposed to the Congress which will authorize the Corporation to retire its stock at such times and in such amounts as may be deemed appropriate and consistent with its requirements and the general condition of the banking system.

The $\$ 5,555,500$ included for administrative expenses for the fiscal year 1948 is approximately 8 percent greater than the amount provided for 1947. The major functional increase over 1947 provides for strengthening the Corporation's examining force with respect to both bank and Federal credit union examinations so as to permit it to place its examination schedules on a current basis. The Corporation had been unable to maintain its examining schedules on a current basis during the war period due to the shortage of qualified personnel.

Administrative Expenses, Federal Deposit Insurance Corporation-Nore.-Created under sec. 12B of the Banking Act of 1933, approved June 16, 1933, ed by Public Law 305, 74th Cong., approved Aug. 23, 1935. Financed by an appropriation of $\$ 150,000,000$ made by the act of June $16,1933,48 \mathrm{Stat} .279$, to enable the Secretary of the Treasury to make payment for the capital stock of the Corporation in accordance with the provisions of paragraph (c) of sec. 12B of the Banking Act of 1933, and other receipts of the Corporation.

## PART IV

## SPECIAL ANALYSES AND TABLES

Functional Classification
Federal Activities in Public Works
The War Program
Explanation of the Estimates of Receipts

## INTRODUCTION TO PART IV

Part IV of the Budget presents the four special articles separately listed and discussed below. The article entitled, "The Government's Budget and the Nation's Budget" which appeared in the 1947 Budget has been transferred this year to the Economic Report of the President. The table summarizing the Federal Government program, as reflected by payments to and receipts from the public, appears in part I of this Budget as table 18.

## Functional Classification

The first article in part IV describes the new functional classification of expenditures and appropriations which is used for the first time in this Budget.

## Federal Activities in Public Works

This section covers Federal outlays for public works planning and construction, including grants and loans to State and local public bodies as well as direct Federal outlays for such purposes. The concept of Federal public works used herein cuts across functions and funds. Outlays of general and special accounts for both national defense and civil works activities, including loans and grants and outlays of Government corporations, are
shown on a gross basis in the tables and adjusted to a net basis in the totals.
Items are shown at the appropriation level, except in a few instances where construction forms a substantial portion of an appropriation which is not generally public works in character. Where appropriations contain both maintenance and new construction, maintenance has not been excluded.

## The War Program

This article describes various aspects of the war and defense program. Table A shows the status of the cumulative authorized war and national defense program from July 1, 1940, through June 30, 1947, for selected periods. Table B shows semiannual war expenditures, classified by agency, on the daily Treasury statement basis. Table C compares national defense expenditures for the fiscal years 1946 and 1947 with those under the more extensive prior national defense category.

## Explanation of the Estimates of Receipts

This statement, explaining the estimates of general and special account receipts has been prepared by the Treasury Department.

## FUNCTIONAL CLASSIFICATION

As a means of improving the budgetary data respecting the programs of the Federal Government, a revised functional classification of expenditures and appropriations is introduced in this Budget. By grouping together items which are functionally related, regardless of the agency which is responsible, this type of classification provides for the Congress and the public a useful summary of what the Government is doing, or expects to do, and, in general, focuses upon the ultimate purpose which the Government programs are designed to serve.

The new system of categories is the framework for discussion of specific programs in the Budget Message. A brief table for each function is included in the Message. These tables are consistent with the comprehensive functional data in the résumé, table 1 (expenditures) and table 2 (appropriations). They are supported by greater detail in the other tables in part I of the Budget. Historical perspective is afforded by a 10 -year comparison on the new basis in appendix 6.

## CHANGES INTRODUCED

The overhauling of the basic classification for expenditures and appropriations comes at a time when some change was required in any case because the cessation of hostilities dictated a shift of many activities from "National defense" to peacetime functions. Accordingly, the new category "National defense" is narrower than the old "National defense."

The new classification provides, for the first time, separate summaries of various major programs of Govern-ment-"Housing and community facilities," "Education and general research," "Natural resources," "Transportation and communication," "Finance, commerce, and industry," and "Labor." In addition, many new subcategories provide summaries of selected segments of these and other general fields.
"Public works" no longer appears as a separate category in the functional classification. Instead, public works are distributed among the functions which they serve. A special analysis in part IV cuts across functional lines and brings together all Federal public works.

Identification of more program areas reduces the category "General government" which now is limited, with a few exceptions, to activities and expenditures which cannot be allocated among the more specific functions but relate to the Government as a whole.

The former classification, although primarily functional, suffered from inclusion of some items which more properly belong in a classification by organization units, and others--particularly public works-which more properly belong in a classification which distinguishes between outlays for capital and for current operation. The new classification goes a long way toward securing an inclusive total for each designated function.

## LIMITATIONS OF NEW CLASSIFICATION

Strictly accurate totals for each function are still not possible for two reasons:
(1) The new classification treats each appropriation as a unit. Since the expenditures and appropriations must add to a grand total, each appropriation may be classified only once; and at the risk of being somewhat arbitrary, it must be classified according to its predominant char-
acteristics. Thus, the appropriation "Forest roads and trails" (Agriculture) has been classified under "Provision of highways," and not under "Conservation and development of forest resources" where it might also belong. Similarly, expenditures for veterans' hospitals have been included under "Veterans' services and benefits" although they might have been classified as "Promotion of public health." To secure a comprehensive total for a concept such as education, veterans, or health, for example, it would be necessary to provide a special tabulation counting more than once some appropriations which might be equally relevant to more than one subject.
(2) Because the new classification treats an appropriation as the smallest unit to be classified, some error is introduced in those cases where a single appropriation item relates to more than one functional category. The appropriation item is the unit used by the Congress in authorizing appropriations. In any one year, there are some 2,000 appropriations for which separate accounts are kept by the agencies. Some are general and comprehensive; others are narrow and quite specific. In most cases an appropriation item falls naturally into a single functional category, but there are many exceptions. Except in the case of certain transfers between agencies, no attempt has been made at this time to split any appropriation item between functions, because this would require extensive accounting and procedural refinements. The resulting error probably is not great, but studies are in progress to measure its magnitude and, if it is significant, to improve the analysis in later years.
No single system of classification will ever provide all the answers for a complicated set of figures such as those in the Budget of the United States. The objective should be to have several cross-cutting classifications, each developed on a logical basis. Thus part I of this Budget includes summary and detailed tables showing a classification of expenditures and appropriations by agencies of the Government and by type of account. Other tables utilize the new functional classification which cuts across the classification by agencies. Part II of the Budget includes many obligation schedules presenting data classified on the basis of objects of expenditure.

It would also be useful to present a classification by character (distinguishing current from capital expenses). The special tabulation of public works in part IV is a step toward introducing a character classification into the reporting system.

In order to assist the reader to know how each individual appropriation is classified, table 10 -which is arranged by agency-shows the code number according to function. The general outline of the functional classification with code numbers is as follows:

## FUNCTION AND SUBFUNCTION

Code
050. NATIONAL DEFENSE
051. Military defense
052. Naval defense
053. Activities supporting defense
100. VETERANS' SERVICES AND BENEFITS
101. Veterans' pensions
102. Veterans' insurance
103. Veterans' readjustment benefits
104. Veterans' hospitals, other services, and administrative costs

Code
150. INTERNATIONAL AFFAIRS AND FINANCE
151. Foreign relations
152. Foreign relief
153. International reconstruction, development, and monetary stabilization
154. Membership in various international organizations
155. Philippine war damage and rehabilitation
200. SOCIAL WELFARE, HEALTH, AND SECURITY
201. Retirement and dependents' insurance
202. Unemployment and accident compensation
203. Assistance to aged and other special groups
204. Work relief and direct relief
205. Social security administration
206. Promotion of public health
207. Crime control and correction
208. Community-welfare services
250. HOUSING AND COMMUNITY FACILITIES
251. Public housing programs
252. Aids to private housing
253. Other housing services and administration
254. Provision of community facilities
300. EDUCATION AND GENERAL RESEARCH
301. Promotion of education
302. Educational aid to special groups
303. Library and museum services
304. General-purpose research
350. AGRICULTURE AND AGRICULTURAL RESOURCES
351. Development and improvement of agriculture, excepting financial aids and conservation
352. Loan and investment programs to aid agriculture
353. Other financial aids
354. Conservation and development of agricultural land and water resources
400. NATURAL RESOURCES NOT PRIMARILY AGRICULTURAL
401. Conservation and development of land and water resources not primarily agricultural
402. Conservation and development of forest resources
403. Conservation and development of mineral resources
404. Conservation and development of fish and wildlife
405. Recreational use of natural resources
406. Development and control of atomic energy
409. General resource surveys
450. TRANSPORTATION AND COMMUNICATION
451. Promotion of the merchant marine
452. Provision of navigation aids and facilities
453. Provision of highways
454. Promotion of aqviation, including provision of airways and airports
455. Regulation of transportation
456. Other services to transportation
457. Postal service (from general fund)
458. Regulation of communication
459. Other services to communication
500. FINANCE, COMMERCE, AND INDUSTRY
501. Control of money supply and private finance
502. Loans and investments to aid private financial institutions
503. Promotion or regulation of trade and industry
504. Business loans and guarantees
505. War damage insurance.
550. LABOR
551. Mediation and regulation of employment conditions
552. Training and placement of workers
553. Labor information, statistics, and general administration
600. GENERAL GOVERNMENT
601. Legislative functions
602. Judicial functions
603. Executive direction and management
604. Federal financial management
605. Government payment toward civilian employees' general retirement system
610. Other general government
650. INTEREST ON THE PUBLIC DEBT
700. REFUNDS OF RECEIPTS

The listing of subfunctions under main headings gives a general view of the various categories. The following comparison of the expenditures for 1946 under the old and the new functional classifications affords a measure of the extent of the rearrangement. The figures for the new classification include an adjustment to the daily Treasury statement, whereas for the old classification this adjustment has been distributed among the categories.

| Comparison of 1946 Budget expenditures under old and new functional classifications |  |  |
| :---: | :---: | :---: |
| [In millions] |  |  |

## NATIONAL DEFENSE

The new "National defense" category represents 45,012 million dollars compared with 48,870 million dollars in the old "National defense." The new category is limited to activities which are properly defense in peacetime. Some aftermath-of-war activities continue in the new category, especially for terminal leave pay, for example. But as far as possible, continuing and regular activities are shown with the peacetime activities to which they belong. Thus, the construction activities of the Maritime Commission are now included with "Promotion of the merchant marine," UNRRA with "Foreign relief," training for nurses with "Promotion of public health," FBI with "Crime control and correction," defense housing with "Public housing programs," defense public works with "Provision of community facilities," Office of Scientific Research and Development with "General-purpose research," supply and distribution of farm labor with "Development and improvement of agriculture," OPA with "Promotion or regulation of trade and industry," disposal of surplus property with "Other general government." The special analysis of the war program in part IV shows the distribution of what were formerly national defense items among the categories of the new functional classification and thus provides a bridge between the old and new "National defense."

## VETERA:NS' SERVICES AND BENEFITS

The new "Veterans' services and benefits" category is larger than the old "Veterans' pensions and benefits" largely because public works for veterans' use-hospitals and other veterans' facilities-now appear along with other expenditures for veterans.

## INTERNATIONAL AFFAIRS AND FINANCE

The new "International affairs and finance" classification is larger than the old "International finance" for the obvious reason that to the previous international lending program have been added the regular activities of the State Department, together with international activities of other agencies which are separately identified in the appropriations. Furthermore, activities previously classified as "National defense"-principally UNRRA and Philippine rehabilitation-have been added.

## SOCIAL WELFARE, HEALTH, AND SECURITY

The new "Social welfare, health, and security" classification is larger than the old "Social security, relief and retirement." While social security grants are included in both categories, social security administration has been transferred from the old "General government" for inclusion in the new "Social welfare, health, and security." The Government payment toward the Federal civilian employees' general retirement system is shifted to "General government," since it is a part of the overhead expenses of the Government. (In discussing trust accounts, however, the Federal employees' retirement funds are included in "Social welfare, health, and security," since they are similar in purpose to the social-insurance programs.), A number of items formerly in "National defense"-such as training for nurses and the emergency "Sternal and child-welfare program-now appear in "Social welfare, health, and security." Three new subfunctions have been added. These are "Promotion of public health" and "Crime control and correction,"" both of which were formerly in "General government," and "Community-welfare services," which was largely in "National defense."

## HOUSING AND COMMUNITY FACILITIES

"Housing and community facilities" is a new category. The components were previously largely in "General government," "Other activities (corporations)," and "National defense." In addition, large estimated outlays in 1947 and smaller amounts in 1946 for veterans' re-use housing were formerly classified under "General public works program." The category does not include such related programs as the home loan guarantee program of the Veterans' Administration, and rent controls and other activities of the Office of Temporary Controls and its predecessors. In 1946, the war housing expenditures are net of large receipts, but in later years they are on a gross basis.

## EDUCATION AND GENERAL RESEARCH

"Education and general research" is a new category which did not appear separately in the old classification. The components, were in "National defense" and "General government." This new category does not, however, include veterans' education benefits, nor does it include research programs which are specifically related to other functional categories. For example, the large research and development expenditures made by the War and Navy Departments and by the Atomic Energy Commission are
in other categories although they comprise much research of a basic character.

## AGRICULTURE AND AGRICULTURAL RESOURCES

The new "Agriculture and agricultural resources" classification is substantially larger than the old "Aids to agriculture," because the old category was limited in the main to financial-aid programs in general and special accounts. It did not include transactions in checking accounts of agricultural corporations, which include food subsidies, loans by the Reconstruction Finance Corporation to the Rural Electrification Administration, and other loan and investment programs. The administrative and service programs of the Department of Agriculture were largely in "General government," while extensive activities designed to facilitate the war program including RFC food subsidies were in "National defense." In addition, some activities formerly classified as "General public works" are in the new category.

## natural resources not primarily agricultural

"Natural resources not primarily agricultural" is a new group which did not show up separately in the earlier classification. The largest part of the total was in "General public works," with a substantial amount in "General government" and some in "National defense."

## TRANSFORTATION AND COMMUNICATION

"Transportation and communication" is another new category of which by far the largest part was the construction fund of the Maritime Commission, previously "National defense." "General public works" and "General government" also included many of the items now in this function.

## FINANCE, COMMERCE, AND INDUSTRY

"Finance, commerce, and industry" is also new. During the war the greater part of this category was for salaries and expenses of war agencies and national defense loans, formerly classified as "National defense." Some items were in "General government" and "Other activities (corporations)."

## LABOR

"Labor" likewise is a new category.; Most of the items were formerly in "National defense," and some in "General government."

## GENERAL GOVERNMENT

Except for inclusion of net expenditures of corporations the new "General government" category is much narrower than the old-on the basis of 1946 expenditures, 972 million dollars compared with 1,308 million dollars. In the new form, it includes: (1) legislative and judicial functions and executive management and direction; (2) the Government payment toward the Federal civilian employees' general retirement system; (3) other services covered by appropriations which relate to more than one function; and (4) a few special programs necessitated by the war, for example, disposal of surplus property, which do not logically belong in any other category and are essentially general-purpose responsibilities of the Government.

Formal establishment of the new functional classification for the information of the agencies and others interested in Government reporting under the relevant sections of Executive Order 8512 will be made in the near future.

## FEDERAL ACTIVITIES IN PUBLIC WORKS

## INTRODUCTION

Consistent with the new functional classification upon which the Budget is presented this year, public works activities are classified along with other governmental activities under the functions which they serve. They are brought together in this section to show in detail the volume and character of Federal public works activities.

Federal public works provide the structures and facilities which enable the Federal Government to carry out its many and varied responsibilities. Prior to the First World War, construction activities were limited largely to public buildings for Government administration, Army and Navy facilities, and river and harbor improvements. Since that time there has been a steady expansion until today Federal participation in public works extends to such fields as the conservation and development of natural resources, the promotion of transportation, the provision of facilities for the public health and welfare, aids to housing, as well as military and naval facilities, and public buildings for administrative purposes. This participation includes both construction undertaken directly by the Federal Government and Federal financial participation through grants and loans to public and quasi-public bodies for construction.

The provision of public works is thus not an end in itself, but is a means of making possible the fulfillment of Federal responsibilities in the various programs. The significant characteristic of public works is that they provide capital assets from which benefits are derived over a long period of time. Public works construction therefore calls for careful scheduling over a period of years.

The coverage of this section is broader than that of the "General Public Works Program" used in previous Budgets and in the August 1946 Budget Review. With few exceptions, it is comparable to the corresponding special analysis on Federal Activities in Public Works presented in part III of the 1947 Budget document.

## TOTAL FEDERAL PUBLIC WORKS AND CONSTRUCTION

In the fiscal year 1948, Federal public works and construction continue the postwar trends established in fiscal year 1947. Expenditures for civil works construction are estimated to increase over those in fiscal year 1947, whereas expenditures for military and naval construction show a decline. The rates of change in 1948, however, will not be as sharp as the rates of change from 1946 to 1947.

| Type | Expenditures by fiscal years [in millions] |  |  |
| :---: | :---: | :---: | :---: |
|  | Actual, 1946 | Estimate, 1947 | Estimate,1948 |
| Military and naval construction ........- | \$1,224 | $\$ 664$ | \$495 |
| Civil public works (including loans and grants) | 643 | ${ }^{1} 1,702$ | 2.093 |
| Total | 1,867 | 2,366 | 2,588 |

## Civil Public Works

The upward trend in expenditures for civil public works reflects the widespread resumption of public works construction shortly after VJ-day, and the initiation of some new construction programs authorized by the Seventyninth Congress. In the last complete war year-fiscal year 1945 -civil works expenditures were at a low level of 300 million dollars. Even after wartime controls were relaxed, construction activity was retarded in fiscal 1946 below the level contemplated because of high costs and shortage of materials and equipment.

In the spring of 1946, the potential competitive effect of a large increase in postwar construction-both publicly and privately financed-on the home construction industry was recognized. To divert scarce building material from less essential construction to the veterans' emergency housing program, an order was issued by the Civilian Production Administration forbidding any new construction and repair work, either public or private, unless approved by the Civilian Production Administration or the Housing Expediter. This order exempted most types of federally financed construction, since these did not compete directly with housing for materials.

As demand for construction labor and materials increased, it was necessary to restrict nearly all types of Federal construction. In his midyear Budget Review, the President announced a public works postponement policy which, together with revisions in estimates as a result of congressional action, was estimated to result in a reduction of 1947 expenditures for general public works from the 1,600 million dollars estimated in last year's Budget to 900 million dollars.

To effectuate this policy, he placed expenditure limitations on the civil works program of the Corps of Engineers and the construction activities of the Bureau of Reclamation, and subsequently on most of the remaining public works programs. In addition, the Office of War Mobilization and Reconversion issued Directive 128 on August 5 , which provided for a moratorium on the starting of practically all new Federal public works and established a procedure for review and approval of such projects prior to their starting between October 1, 1946, and April 1, 1947. By means of this directive, it will be possible to limit the volume of work started prior to April 1, 1947, to that urgently required.

A more complete review of the programs of the Corps of Engineers and the Bureau of Reclamation indicated the necessity for raising the expenditure limitations for these two agencies to avoid cancellation of existing contracts and to allow for construction progress on projects under way at an efficient and economic rate. As a result of these increases, and revisions subsequently made in estimates of expenditures for programs not under expenditure control, the estimated expenditure in fiscal year 1947 for Federal public works under the "General public works program" category carried in the midyear Budget Review was increased to 1,135 million dollars.

In addition to the programs making up the 1,135 million dollars, there is included in table 1 below 567 million dollars for items not previously shown as public works,
making a total for fiscal year 1947 of 1,702 million dollars. The additional 567 million dollars is primarily for housing and civil works financed with national defense funds. The 1947 expenditures are essentially as low as possible consistent with meeting contract commitments. This rather high level for 1947 sets, for the fiscal year 1948, a base which is relatively fixed by existing firm commitments and congressional authorizations establishing rates of expenditure.

## SIZE AND CHARACTER OF THE 1948 PROGRAM

Federal civil works expenditures are estimated to reach 2,093 million dollars in fiscal year 1948 as compared with the 1,702 million dollars in fiscal year 1947 described above. Although relatively large, the program is limited in the field of direct-Federal construction largely to continuation of work on projects already appropriated for in previous years. No new major developmental projects are recommended. Construction of additional veterans' hospitals is recommended, along with other activities where both the need was demonstrated to be great and the construction period is relatively short. In the field of Federal loans and grants to non-Federal agencies for construction, the expenditures are based on commitments already made or on the rate of progress established in the authorizing legislation.

This upward trend is due to continue, and it is inevitable that expenditures will be even higher in fiscal year 1949 than in 1948, unless action is taken to change the rate of commitments now authorized for these programs.
Table 1.--Expenditures for civil public works-General and special accounts and corporation accounts
[Fiseal years. In millions]

|  |  |  |

${ }^{4}$ Less than $\$ 500,000$.

- Classified under military construction.
${ }_{2}^{1}$ Including construction by the Corps of Engineers.
the midyear Budget Review (A ugust 1946) are 1,135 millio works" classification used in
As indicated in the above table, the major portion of expenditures in fiscal year 1948 will be for construction of veterans' hospitals; resource development projects by the Corps of Engineers and Bureau of Reclamation, for irrigation, flood control, navigation, and power; for grants to States by the Public Roads Administration for
highways; and loans by the Rural Electrification Administration to cooperatives and public bodies for rural electrification lines. A total of 1,665 million dollars, or alnost 80 percent of the entire civil works expenditures for fiscal year 1948, will be for these major programs. Of the remaining 428 million dollars, over 250 million dollars is accounted for by expenditures of other units of the Federal Works Agency, and the Civil Aeronautics Administration, National Housing Agency, and the Tennessee Valley Authority.

With the exception of only a few activities such as veterans' hospitals, and Federal aid for airports and general hospitals, the 1948 program is a continuation of programs carried on by the Federal Government before the war. The level of expenditures, however, is now much greater than it was in the prewar period. In the period 1935-40 Federal public works expenditures, including the Public Works Administration program but excluding the Work Projects Administration program, averaged slightly less than a billion dollars annually. On an expenditure basis, the present program is therefore about twice as large as the prewar programs.

## COMMITMENTS FOR THE FUTURE

The present situation of a rapidly expanding public works program results almost entirely from action taken in 1945 and 1946 when legislation was enacted providing large public works authorizations for loans, grants, and direct construction, and making appropriations for starting many major projects.
The Postwar Federal-Aid Highway Act committed the Federal Government to a Federal-aid highway program totaling 1,500 million dollars of Federal funds to become available at the rate of 500 million dollars in each of the first 3 postwar years. The first of these 3 postwar years has been designated to be fiscal year 1946. To date, 175 million dollars has been appropriated toward this program, and an additional 279 million dollars is recommended for fiscal year 1948. In future years appropriations totaling 1,046 million dollars will be required to complete the authorized program.
For the veterans' hospital program, there was available as of June 30,1946 , a total of 856 million dollars of unexpended appropriations and contract authorizations for construction. An additional $\$ 29,800,000$ of appropriations and $\$ 219,550,000$ of contract authorizations are recommended for fiscal year 1948. According to present estimates, there will remain unexpended on June 30, 1948, a total of 661 million dollars of appropriations and contract authorizations.

In the field of natural resources, future commitments also loom large. Appropriations for Corps of Engineers flood control and river and harbor projects for fiscal year 1947 provided for work on a large number of projects, many of which are large multiple-purpose dams and reservoirs requiring two or more years to complete. Flood control and river and harbor projects on which work has been initiated or will be initiated in fiscal year 1948 will require about 2,200 million dollars to complete after fiscal year 1948.

Funds have been appropriated for fiscal year 1947 and previous years for work on three large river basin developments and on a number of lesser projects for irrigation and power by the Bureau of Reclamation. The total cost to complete these developments after fiscal year 1948 is estimated to be about 1,350 million dollars.

The Rural Electrification Administration, at the start of fiscal year 1948, is estimated to have a total of 325
million dollars of outstanding obligations to rural cooperatives and other groups for electrification projects for which commitments have been made. The recommended appropriations and loan authorizations of 250 million dollars for fiscal year 1948 will bring the total available for expenditure up to 575 million dollars, of which 340 million dollars is estimated for expenditure in fiscal year 1948. This will leave 235 million dollars for expenditure in later years.

In addition to these programs, the Seventy-ninth Congress, in accordance with recommendations of the President, has authorized grants to State and local agencies for construction of airports and hospitals at an average rate of 75 million dollars per year, over a 5 -year period for hospitals, and over a 7 -year period for airports. Although expenditures in fiscal year 1948 will total 50 million dollars for the airport program and 15 million dollars for the hospital program, they can be expected, at the present authorized rates to increase to 75 million dollars or 100 million dollars a year for each program in future years.
The total effect of these commitments is that public works expenditures in fiscal year 1949 and possibly in later years will exceed the 1948 level, even without the addition of any new work.

## BACKLOG OF AUTHORIZED PROJECTS

Another indication of potential amounts of Federal public works is the size of the reserve of authorized projects which is now outstanding. Agency reports indicate that on the basis of present prices, over 17 billion dollars of authorized work will be available for undertaking after fiscal year 1948, including completion of projects under way but not scheduled to be finished in fiscal year 1948. For example, completion of the authorized flood control and navigation programs of the Corps of Engineers is estimated to cost about 5 billion dollars after June 30, 1948. Included in this amount is 3 billion dollars for projects which will not have started by June 30, 1948. Other programs also have large reserves of authorized work on which no start has been made.

## SURVEYS AND DETAILED PLANS

It is proposed that surveys and advance planning of new projects be continued on a modest scale in fiscal year 1948, and funds are recommended for continuation of preliminary surveys and detailed project plans by a number of Federal agencies. For the most efficient and economical undertaking of large development projects, preliminary surveys and investigations are required well in advance of actual undertaking of work. They serve as a basis for evaluating the engineering and economic feasibility and social desirability of the developments. Similarly, advance preparation of detailed plans may prevent costly changes in design or scope of the project after actual construction work is undertaken.

Surveys.-Total appropriations of $\$ 14,293,000$ are recommended in fiscal year 1948 for the continuation of preliminary surveys on authorized projects as well as for the investigation of projects not yet authorized. The major portion of these funds is for investigations by various Federal agencies of water resource developments in river basins throughout the country. Sound development of river basins requires coordinated investigation of all uses of the resources of the areas, whether for irrigation, navigation, flood control, power development, recreation or fish and wildlife resources. It is, therefore, important that at the early stages of river basin planning and
development all interested Federal agencies make their contributions to such studies.

Table 2.-Preliminary surveys
[Fiscal years]

| Agency and program concerned | Appropriations or allotments |  |
| :---: | :---: | :---: |
|  | $\underset{1947}{\text { Actual, }}$ | $\underset{1948}{\text { Recommended, }}$ |
| Corps of Engineors | \$4, 128,000 | \$5, 500, 000 |
| Department of the Interior: |  |  |
| Geological Survey, stream gaging Bureau of Reclamation | 807,600 $5,500,000$ | 645,000 |

| Public Health Service, hospital surveys. | 2,350,000 |  |
| Civil Aeronautics Administration, airport surveys | 2,975,000 |  |
| The Panama Canal, third lock studies........... | 2, 618,000 | 750,000 |
| Tennessee Valley Authority | 101,000 | 90,000 |
| International Boundary and Water Commission, United States and Mexico | 266, 000 | 280,000 |
| Total | 19,952, 100 | 14, 292, 584 |

Detailed plans.-Appropriations totaling \$14,686,000 are recommended for detailed planning of Federal projects in fiscal year 1948, in order to have a reserve of planned projects for use when needed. The major share of these appropriations is recommended for planning and building water resource projects. In addition to the amounts shown in table 3, funds are available for some agencies, including the Bureau of Reclamation, for detailed project planning from appropriations made for construction of

Federal aid for State and local planning.-Since June 1945, the Federal Works Agency has been making advances to State and local governments to assist them in preparing detailed plans for their construction projects. Advances made through October 1946 will result in the planning of almost $\$ 1,300,000,000$ of construction works. A sizable reserve of planned projects is also being built up by non-Federal public agencies without Federal assistance. Through these means, a reserve of planned projects is being built up, which, together with the reserve of Federal projects, could be used to undertake on relatively short notice an expanded public construction program if the need should arise.

## PROGRAMS BY MAJOR FUNCTIONS

Federal public works activities are undertaken for a wide variety of purposes, including almost every major function in which the Federal Government is interested.

These range from the development of natural resources and the promotion of transportation to the provision of veterans' services and the promotion of social welfare, health, and security. The wide range of functions served by Federal public works is indicated in the following table, showing the civil public works program classified according to major function and subfunction.

FEDERAL EXPENDITURES FOR CIVIL PUBLIC WORKS
By function and subfunction
[Fiscal years. In millions]

| Function and subfunction | Actual, 1946 | Estimate, 1947 | Estimate,1948 |
| :---: | :---: | :---: | :---: |

| Total, civil public works, net | 643 | 11,702 | 2,093 |

a Less than $\$ 500,000$.
Comparable expenditures under the "General public works" elassification used in the midyear Budget Review (August 1846) are 1,135 million dollars.

## Veterans' Services and Benefits

## VETERANS HOSPITALS AND OTHER SERVICES

Included under this function are the programs for construction of veterans' hospitals and temporary educational facilities, to meet needs of veterans for hospitalization and education. Total expenditures for these purposes are estimated at 113 million dollars in fiscal year 1947 as construction of hospitals and temporary educational buildings is just getting under way.
In fiscal year 1948, an estimated 424 million dollars will be expended, chiefly for veterans' hospitals. Expenditures for veterans' hospitals will continue to be high in fiscal year 1949 and will taper off in succeeding years. Expenditures for temporary educational buildings will drop off sharply after fiscal year 1948.

Veterans' Administration, hospitals.-A direct result of World War II has been to increase the requirements for hospital space to accommodate the greatly increased number of veterans eligible for hospital care. Arrangements have been made to use other Government, State and private facilities to help fill this need, but an additional large number of beds are still required which can only be met with new construction. Accordingly, the Congress has already approved programs providing for approximately 42,000 additional beds, at an estimated cost of 695 million dollars.
The program recommended in this Budget for fiscal year 1948 provides an additional 11,900 beds at an estimated ultimate cost of 215 million dollars. The program also includes provision for repairs, additions, alterations, and renovations to existing hospitals, to meet current standards, at a total cost of 53 million dollars. An appropriation of $\$ 12,750,000$ is also recommended for construction of office buildings for use by the Veterans' Administration throughout the country.

In carrying out the program already approved by Congress, the Veterans' Administration is using the services of the Corps of Engineers for the supervision of private firms of architects and engineers who are planning and constructing 76 new hospitals with a total capacity of 39,470 beds. Expenditures by the Corps of Engineers are estimated to total $\$ 36,800,000$ in fiscal year 1947, and to rise to 290 million dollars in fiscal year 1948.

Work carried on directly by the Veterans' Administration includes some new hospital construction as well as repairs, additions, alterations, and renovation of existing hospitals. Expenditures for such work are estimated at $\$ 36,700,000$ for fiscal year 1947 and 81 million dollars for fiscal year 1948 .

The completion of this large program is expected to meet the most urgent needs for veterans' hospitals at this time. In future years, new construction will proceed at a much slower rate to meet new needs as they arise.
Federal Works Agency, veterars' educational facilities.In July 1946, the Congress authorized an appropriation of 100 million dollars to enable the Federal Works Administrator to help schools and colleges to provide temporary classroom and other nonhousing facilities for veterans. Under this program, carried on cooperatively by the Federal Works Agency and the educational institutions, surplus war structures are being dismantled and rebuilt at new locations to meet the needs of particular institutions. An appropriation of 75 million dollars was made for this activity in fiscal year 1947, and expenditures are estimated to total 40 milion dollars in fiscal year 1947. A supplemental appropriation of 25 million dollars will probably be recommended at a later date to bring the appropriation to the full amount of the authorization. As this is an emergency activity, it is expected that it will be largely completed during fiscal year 1948, and expenditures in future years will be only for clean-up activities.

## International Affairs and Finance

## FOREIGN RELATIONS

Public Roads Administration.-The small amount of expenditures under this function is for continuation of cooperative work by the Public Roads Administration on the Inter-American Highway, from the southern border of Mexico to Panama City. No appropriation for continuation of this work is recommended for fiscal year 1948, as
appropriations have already been made for the full amount of the present congressional authorization.

## Social Welfare, Health and Security

Federal construction activities in this field are largely for the provision of facilities for public health, including hospitals and health centers. Other activities include improvements at Federal penal institutions, and the completion of a number of prewar public works projects for which Federal grants were made under the Public Works Administration program. Expenditures for social welfare, health and security are estimated to total 30 million dollars in fiscal year 1948, and are expected to increase in future years as the hospital grant program gets under way.

## PROMOTION OF PUBLIC HEALTH

Public Health Service.-The principal construction activity of this agency is the Federal-aid hospital construction program authorized by the Congress in the Hospital Construction Act of 1946 (Public Law 725, 79th Cong.). This Act provides a 5 -year program of Federal grants-inaid to public and nonprofit hospitals for the construction of hospitals and health facilities. Federal grants aggregating 375 million dollars for the total program are provided for one-third of the construction costs. The making of grants is conditioned upon the development by each State of a master plan for hospital construction, with emphasis on providing priorities for the most urgent needs, particularly for rural areas. Federal grants of $\$ 3,000,000$ are authorized to finance one-third of the cost of developing master plans. Activity during fiscal year 1947 is centered upon the inventory of existing hospitals and survey of needs for new facilities. Grants for construction will begin to be made in fiscal year 1948, and $\$ 50,965,000$ is recommended to be appropriated to the Public Health Service for this program. Expenditures are estimated at 15 million dollars in fiscal year 1948. In future years, however, expenditures can be expected to increase, as liquidation of grant agreements progresses and annual expenditures approach the average rate provided in the authorizing legislation.

In addition, an appropriation to the Public Health Service of $\$ 2,650,000$ is recommended for acquisition of site and preparation of plans and specifications for research and clinical hospital buildings for the study of cancer and cardiovascular diseases. The buildings will be located at the National Institute of Health, Bethesda, Md., and will be planned and constructed by the Public Buildings Administration.
Public Buildings Administration.-In addition, an appropriation of $\$ 850,000$ to the Public Buildings Administration is recommended for planning and land acquisition for a clinical research hospital for mental diseases, also to be located at the National Institute of Health. Actual construction of these buildings will require additional appropriations by the Congress.

## WORK RELIEF AND DIRECT RELIEF

Federal Works Agency, Office of the Administrator.-An estimated 6 million dollars will be spent in fiscal year 1948 in settlement of earlier obligations and for Federal grants to local public agencies to complete projects started prior to the war under the Public Works Administration program, but deferred because of the war. It is expected
that the remainder of the work on these projects will be completed during fiscal year 1949 .

## CRIME CONTROL AND CORRECTION

Federal Prison System.-Construction requirements of the Federal Prison System are limited at present to improvements and alterations at existing institutions. In fiscal year 1947, work was begun on surveys and advance planning for future building needs of the prison system. The recommended appropriation of $\$ 300,000$ in fiscal year 1948 provides for continuation of advance surveys and plans and for a modest program of alterations and improvements to existing institutions. The estimated total of $\$ 970,800$ of expenditures in fiscal year 1948 also includes the completion of housing projects at existing institutions started during fiscal year 1947, to provide living accommodations for staff members.

## Housing and Community Facilities

## PUBLIC HOUSING PROGRAMS

National Housing Agency, Federal Public Housing Authority.-As a part of the veterans' housing program, the Federal Public Housing Authority is providing temporary housing for veterans and servicemen in projects sponsored by local public agencies, educational institutions and nonprofit organizations. Existing federally owned structures, including war housing projects, barracks, Quonset buts, and other structures built during the war, are dismantled and rebuilt into temporary homes for veterans. This program, for which $\$ 436,697,814$ in appropriations have been provided to the Authority, was started in January 1946, and will be largely completed by June 30,1947 , when practically all of the 180,800 dwelling units to be financed primarily with Federal funds will have been completed. Expenditures, which are estimated to total 368 million dollars in fiscal year 1947, will be only 29 million dollars in fiscal year 1948 . This will be largely for final project payments on work substantially completed in fiscal year 1947.

Fiscal year 1948 will see a reactivation of construction loans made to local housing authorities by the Federal Public Housing Authority for low-rent projects under the United States Housing Act. These reactivated loans will permit construction of projects for which commitments had been made before the war. Of such deferred projects, 1,985 dwelling units are estimated to be reactivated during fiscal year 1947, and 12,807 units during fiscal year 1948. Local authorities are expected to obtain a large part of the funds required for these projects by the sale of advance loan notes to the public. Gross expenditures by the Federal Public Housing Authority for financing these projects, through purchase of advance loan notes, are estimated to be $\$ 2,397,000$ in fiscal year 1947 and $\$ 3,744,000$ in fiscal year 1948.

In addition to the financing of locally owned public housing projects, the Federal Public Housing Authority is continuing some construction work on federally owned low-rent housing projects started during the war under provisions of Public Law 671, approved June 28, 1940, which provided for construction of such projects for use by war workers during the war, to be converted to lowrent use after the war. Expenditures during fiscal year 1947, estimated to total $\$ 3,576,000$, are largely for correction of construction deficiencies due to wartime materials shortages. For fiscal year 1948, the estimated expenditures of $\$ 1,437,000$ will be largely for final contract settlements.

## PROVISION OF COMMUNITY FACILITIES

Federal Works Agency, Bureau of Community Facili-ties.-During the 1930's the Federal Government, through the Work Projects Administration and Public Works Administration programs, provided financial assistance to States and local communities in construction of public works. These programs were discontinued early in the 1940's. Under the Lanham Act, assistance was given to communities during the war to provide facilities required by wartime increases in population. Since the termination of this activity, the Federal policy has been to provide no financial aid to local communities for their public works, except for Federal-aid highways, airports, and hospitals where specific legislation has been enacted recognizing a Federal responsibility in those particular fields. These activities are being carried out by the agencies responsible for the functions concerned.

Although no general responsibility for construction of community facilities is recognized, advances of funds are being provided by the Federal Works Agency to local communities for preparation of advance plans for construction projects, as authorized in title $V$ of the War Mobilization and Reconversion Act of 1944. These advances are repayable by the communities when construction is undertaken. As discussed under the section on detailed plans above, this program, carried on by the Bureau of Community Facilities, is resulting in the preparation of plans for a large reserve of State and local public works projects. A total of 65 million dollars has been appropriated for this planning program, and expenditures for fiscal year 1948 are estimated at $\$ 17,100,000$ from previously appropriated funds. Authority to make advances expires on June 30, 1947, and no appropriation is recommended in this Budget for the making of new advances during fiscal year 1948.

The Bureau of Community Facilities is also carrying on the construction of public works in the Virgin Islands to provide facilities, including roads, water supply, and sanitation projects, in this United States possession in the West Indies. Expenditures in fiscal year 1948 are estimated to total $\$ 2,100,000$, which will leave approximately 6 million dollars to be expended in later years to complete the authorized 5 -year program totaling $\$ 10,028,420$ approved by Congress.

In addition, there will be expenditures in fiscal year 1948 totaling $\$ 8,100,000$ to complete construction projects under the wartime Defense Public Works program. This will conclude expenditures for this activity.

Reconstruction Finance Corporation.-The Reconstruction Finance Corporation, under authority of section 5d of the Reconstruction Finance Corporation Act, as amended April 13, 1938, makes loans to non-Federal public agencies for public works projects such as bridges, tunnels, and water supply developments. Since the end of the war, the Reconstruction Finance Corporation has again begun to make loans of this type. Gross expenditures for such loans are estimated to total 47 million dollars in fiscal year 1948.

## Education and General Research

## EDUCATIONAL AID TO SPECIAL GROUPS

Howard University.-For the fiscal year 1948, funds are recommended for the construction of a dental building and an auditorium and fine arts building, and for preparation of plans for five additional buildings, at Howard University, Washington, D. C. This is a continuation of
the building program started in the fiscal year 1947, to provide for the needs at Howard University. Expenditures for plans and construction are estimated at $\$ 3,200$,000 for fiscal year 1948, to be financed from recommended appropriations and contract authorizations totaling $\$ 4,330,925$ for fiscal year 1948.

## GENERAL-PURPOSE RESEARCH

Public Buildings Administration.-For the fiscal year 1948 an appropriation of $\$ 100,000$ and contract authorization of $\$ 875,000$ is recommended for planning and construction of a geophysical institute at Fairbanks, Alaska, as authorized by the act of July 31, 1946 (Public Law 580, 79th Cong.).

## Agricurture and Agiscultural Resources

Under this function are included those Federal programs involving both direct construction and loans to nonFederal agencies, which are carried on by the Department of Agriculture as direct aid to the agricultural economy and for the conservation and development of agricultural resources. Because this section of the Budget on public works and construction covers only work primarily of a structural nature, a number of important land improvement programs of the Department of Agriculture are not included in this section. The largest of these programs is the soil conservation activity of the Soil Conservation Service. Although not included herein, this activity is closely related to construction activities of the Department of Agriculture, such as upstream flood control, as well as to resource development programs of the Corps of Engineers and Department of the Interior.

LOANS AND INVESTMENTS TO AID AGRICULTURE
Rural Electrification Administration.-The objective of this agency is to assist in providing electric service at reasonable rates to rural communities and farms on an area-wide basis, so as to insure, to the greatest extent practicable, that the benefits of low-cost electric service are widely and equitably distributed. Through loans and technical advice, the Rural Electrification Administration provides the means by which groups of rural people can, through cooperative action, construct, operate, and maintain the necessary distribution systems to provide service at reasonable rates. In this sense, the Rural Electrification Administration program differs from other public works activities of the Federal Government, as actual construction is undertaken by the cooperatives, with the Federal role being to make loans, give technical advice, and exercise only the degree of supervision over development of the cooperative distribution systems necessary to protect the loan equity.
During the war the rural electrification program was largely restricted to providing those minimum facilities in rural areas which were required to stimulate immediate food production. Since the close of the war, however, activities under the Rural Electrification Administration program have been greatly stepped up in response to a tremendous backlog of demands from rural groups for electric service which had grown up during the war. In the two fiscal years 1946 and 1947, the Rural Electrification Administration has been granted a total of 550 million dollars of loan authorizations. Between July 1945 and September 1946, the Rural Electrification Administration allocated loan funds to provide over 200,000 miles of distribution lines to serve over 620,000
customers. Actual loan advances totaled about 89 million dollars in fiscal year 1946, and are estimated to reach 224 million dollars in fiscal year 1947. Shortages of construction materials have delayed progress somewhat and in accordance with the President's construction curtailment program, cooperatives have been asked to defer expenditures for certain equipment and materials during fiscal year 1947, to the extent consistent with their objectives. For the fiscal year 1948, advances to Rural Electrification Administration borrowers are estimated to total 340 million dollars, to be financed from unadvanced funds totaling 325 million dollars available to Rural Electrification Administration from prior-year loan authorizations, and from a loan authorization of 225 million dollars and appropriation of 25 million dollars recommended in this Budget. These recommendations, which are at the same level as the 1947 loan authorization, are necessary to meet the continued volume of requests by rural groups for allotments for construction of rural electrification lines.
Farmers' Home Administration.-The Water Facilities program provides for loans and technical advice to farmers in the arid and semiarid areas in the West for the construction of small water facilities, such as wells, ponds, windmills, storage tanks, and cisterns. Expenditures for the fiscal year 1948 are estimated at $\$ 1,750,000$.

CONSERVATION AND DEVELOPMENT OF AGRICULTURAL LAND AND WATER RESOURCES
Department of Agriculture.-Through activities included in this category, the Department of Agriculture provides upstream flood and erosion control and supplementary water supplies to rural areas.
For flood control activities of the Department of Agriculture, an estimated $\$ 2,500,000$ will be expended in fiscal year 1948, for continuation of surveys on watersheds throughout the country, and operations work on a few watersheds, including the Los Angeles in California and the Little Sioux in Iowa. The work is carried on by the Soil Conservation Service and the Forest Service. This program is just getting under way and expenditures may be expected to increase in future years as additional work is started on authorized projects, in order to keep pace with the activities of other agencies on river basin developments.
Expenditures by the Department of Agriculture for Water Conservation and Utilization projects are estimated at $\$ 1,200,000$ in fiscal year 1948, largely for land clearing and subjugation to provide a number of new irrigated farms. This work is being carried on by the Soil Conservation Service, in cooperation with the Bureau of Reclamation which is building the irrigation structures. Expenditures by the Bureau of Reclamation are estimated at $\$ 1,250,000$ for fiscal year 1948.

## Natural Resources

One of the major purposes for which Federal public works are built is the development, control, and conservation of the Nation's natural resources. Included under this designation are the development and control of water resources for flood control, irrigation, and hydroelectric power, the conservation and development of forest and land resources, and of the mineral, recreational, and wildlife resources of our lands and waters. A natural resource development program includes some capital improvement work which cannot be strictly classed as construction; for example, range reseeding, land improvement, reforestation, and forest protection, including insect and erosion control work. Such improvement programs are not covered by
this analysis, as this section is restricted to work of a structural nature.

During the war, the Federal construction program for the development of natural resources was held to a low level. Beginning in the fiscal year 1946, however, appropriations were made to resume work on projects stopped during the war, and to start a large volume of new work. Additional large appropriations were made in fiscal year 1947 to continue work and to start additional projects. The President's restriction on public works in fiscal year 1947 has, to some extent, delayed the starting of projects, but because of projects started and contracts awarded prior to the curtailment order, expenditures for natural resources construction are estimated to rise from 173 million dollars in fiscal year 1946 to 405 million dollars in fiscal year 1947. They are estimated to rise still further to 527 million dollars in fiscal year 1948 as work on large projects already started in fiscal year 1947 is continued, even though at a minimum rate for efficient operations. The level of expenditures is expected to increase in fiscal years 1949 and 1950 even if no new work is started. This is due to the necessity, in the interest of efficient construction operations, for an increasing rate of expenditure in succeeding years, on each large project started with fiscal year 1947 appropriations.

## CONSERVATION AND DEVELOPMENT OF LAND AND WATER RESOURCES

The development and control of land and water resources is the largest construction activity in the natural resources field. It involves, among other activities, the building of major multiple-purpose structures for the control of floods and the provision of water for irrigation of arid and semiarid lands. At such structures, as well as at similar structures built in the interest of navigation, collateral benefits include development of electric power, recreation, and conservation of fish and wildlife. The Corps of Engineers is the agency primarily concerned with the control of floods, while the Bureau of Reclamation deals with irrigation in the 17 Western States. The Tennessee Valley Authority is concerned with the unified development of all of the natural resources of the Tennessee River Valley.

Corps of Engineers.-Since passage of the Flood Control Act of 1936, the flood control program of the Corps of Engineers has become Nation-wide in scope. It ranges from construction of small local protection works to protect individual communities from the menace of destructive floods, to the control of an entire river valley section such as the alluvial valley of the Mississippi River stretching from the junction of the Ohio River at Cairo, Ill., to the Gulf of Mexico. It also includes the construction of individual large reservoirs in many sections of the country. For example, major projects will be under construction during fiscal year 1948 on the Susquehanna, Roanoke, and Savannah Rivers on the Atlantic seaboard; Alabama-Coosa River and Buffalo Bayou, Tex., on the Gulf coast; the lower Mississippi Valley; the Arkansas, Missouri, and Ohio River Basins in the Central States; and in the Central Valley of California and the Los Angeles and Willamette Rivers on the Pacific coast. Expenditures in fiscal year 1947 are being held to a maximum of 192 million dollars for flood control and power construction, surveys, and maintenance under the President's restricted public works program. They are estimated to rise in fiscal year 1948 to 255 million dollars for continuation of work on projects for which appropriations have already been made, with no allowance for any new projects.

Expenditures may be even larger in succeeding years as the large projects reach their construction peak.

In addition to construction of projects, the Corps of Engineers is continuing its investigations of river basins, in accordance with congressional acts and committee resolutions, to determine the feasibility of projects for possible future authorization, and is preparing detailed plans for authorized projects to be started in later years.

Bureau of Reclamation.-This agency is authorized to construct irrigation developments in the 17 arid and semiarid States in the West. Its work ranges in scope from relatively small individual irrigation projects costing less than $\$ 2,000,000$ to large integrated basin-wide development programs, such as in the Missouri River Basin, costing over a billion dollars when completed. Most of the larger projects are multiple-purpose in character, with power features installed in many. As an aid to the marketing of power produced at these projects, the Bureau of Reclamation is developing a system of transmission lines to carry the energy to agricultural, community, and industrial load centers. The major construction activity in terms of expenditures is under way in five areas, the Central Valley of California; the Columbia Basin project; the Colorado-Big Thompson project in Colorado; the Davis Dam project in Arizona; and the Missouri River Basin. Work will also go forward on a number of lesser projects widely scattered in the Western States. New funds are recommended in fiscal year 1948 for 22 projects and basin developments.

In accordance with the public works curtailment program, expenditures in fiscal year 1947 for construction and detailed planning by the Bureau of Reclamation classified under the function "Natural resources" are being held to 128 million dollars. Like the flood control program, expenditures are estimated to increase in fiscal year 1948 in order to continue work on projects and major segments of projects now under way. The fiscal year 1948 expenditure estimate of 159 million dollars for work classified as Natural resources does not allow for the expansion of the program to include any new projects or major segments. Expenditures can be expected to rise still further in the years immediately following, even without the starting of any new projects.

An additional $\$ 1,250,000$ of expenditures by the Bureau of Reclamation for both fiscal years 1947 and 1948 for Water Conservation and Utilization projects is carried under "Agriculture and agricultural resources" in the table following this section.

In addition, the Bureau of Reclamation will continue preliminary investigations and surveys in many river basins in the Western States to determine the feasibility and economic worth of proposed basin development plans and projects for possible future authorization by Congress and possible modification of projects already authorized.

Expenditures for surveys, maintenance, and administration by the Bureau of Reclamation (not included in the Bureau of Reclamation construction total as carried in this section) are estimated to be over 17 million dollars for both fiscal years 1947 and 1948.

Tennessee Valley Authority.-The 1948 construction program for this agency represents a continuation of capital improvements for the unified development of the Tennessee Valley. In accordance with the public works curtailment program, expenditures in fiscal year 1947 for capital improvements financed from appropriated funds are estimated at $\$ 20,328,000$. In fiscal year 1948, comparable expenditures are estimated to total $\$ 32,585,000$. Approximately one-half of this expenditure is for continua-
tion of construction of the South Holston and Watauga Dams, on which construction was resumed during fiscal year 1947. Other items include improvement of other dams and multiple-use water control facilities and construction of buildings and facilities to extend and improve the chemical plant of Tennessee Valley Authority. The basic system of locks and dams on the Tennessee River has now been largely completed, and future capital improvements on the river control system will be restricted to relatively minor additions and improvements.

Capital improvements to the Tennessee Valley Authority power generating and transmission system are financed from Tennessee Valley Authority receipts which are classed as corporate funds. During fiscal year 1948, Tennessee Valley Authority will continue the placement of additional hydroelectric generating units in existing dams, and will extend and improve its network of transmission lines to meet the growing need for power in the region. Shortages of materials and equipment are retarding this program during fiscal year 1947, when an estimated $\$ 24,737,000$ will be expended. For fiscal year 1948, a somewhat smaller total of $\$ 22,788,500$ is estimated to be expended from corporate funds for power facilities. Because the Tennessee Valley Authority has a continuing responsibility to meet the power needs of a large area in and near the Tennessee Valley where it is the sole supplier of electricity, expenditures for power facilities from corporate funds can be expected to be continuing at a substantial rate in future years.

International Boundary and Water Commission, United States and Mexico.--This agency is responsible for carrying out the terms of the United States-Mexico Treaty on International Waters, signed on February 3, 1944, as well as previous treaties, which provide for the control of the waters along the United States-Mexico border. The current program consists of the construction, in cooperation with the Mexican Government, of major water control structures along the Rio Grande. Work is being started in fiscal year 1947 on the multiple-purpose Falcon Dam on the Rio Grande, for flood control, irrigation, and power development, which, in accordance with terms of the Treaty, must be started within 2 years of the approval of plans by the two Governments and must be completed within a period of $\&$ years after ratification of the Treaty. Other flood control and stream rectification works are under construction along the Rio Grande. Expenditures for construction during fiscal year 1947 are restricted to $\$ 3,500,000$ in accordance with the public works curtailment program. For fiscal year 1948, they are expected to rise to 9 million dollars as work progresses on the Falcon Dam. This program can be expected to increase for the next few years after fiscal year 1948, as work provided for by the Treaty reaches a peak.

Bonneville Power Administration.-This agency, in the Department of the Interior, is responsible for the marketing of hydroelectric power from federally owned dams in the Pacific Northwest, including both Grand Coulee and Bonneville Dams. The construction program recommended for fiscal year 1948 consists of continuing construction of lines, substations, 'and related facilities, to carry the power to existing load centers and to areas where new loads are developing. As new sources of electrical energy are provided in the Northwest, the Bonneville Power Administration program of transmission line building must go forward at an orderly rate, sufficient to provide for marketing of the additional available power. Expenditures for fiscal year 1947 are estimated at $\$ 15,600,000$ for construction, operation,
and maintenance of the system; for fiscal year 1948, this will increase to 20 million dollars, of which $\$ 4,700,000$ will be for operation and maintenance of the system.

Southwestern Power Administration.-This relatively new agency in the Department of the Interior is charged with marketing of hydroelectric power from Federal projects in the Oklahoma-Arkansas-Texas area. At present, it is marketing power from the Norfork Dam project on the White River, and the Denison Dam project on the Red River between Oklahoma and Texas. An initial appropriation of $\$ 7,500,000$ was provided in fiscal year 1947 for acquisition of a portion of the Ark-La transmission line and for construction of additional transmission lines to market the power from these projects. Of this appropriation, it is now estimated that $\$ 3,331,000$ will be expended in fiscal year 1947. For fiscal year 1948, the recommended program to be financed from 1948 appropriations provides only for purchase of the remainder of the Ark-La transmission line. Expenditures in fiscal year 1948 are estimated to total $\$ 6,370,000$, including expenditures from 1947 funds. In future years, expenditures will depend to a great degree upon progress on construction of Federal multiple-purpose dams in the Arkansas and White River Basins, and the need for additional federally owned transmission lines to connect these new power sources to the existing transmission network.

Bureau of Indian Affairs.-For fiscal year 1948, a small program of survey and construction work on Indian irrigation projects in the Western States is provided. Expenditures in fiscal year 1947 are estimated at $\$ 1,000,000$ for this program; in fiscal year 1948, they are estimated to increase to $\$ 1,780,000$, chiefly for work on the Colorado River Reservation and in the Navajo areas. Expenditures in future years for this program will depend upon the demonstrated need for irrigation facilities for the Indians and the feasibility of the particular projects proposed. If certain major projects now being studied were to be started, expenditures would increase greatly over the present level.

## MINERAL RESOURCES

Bureau of Mines.-In this category the only construction included is that by the Bureau of Mines in the Department of the Interior, in connection with the carrying out of research in the field of mineral resources. For fiscal year 1948, continuation of construction and operation of synthetic liquid fuels research facilities is recommended; expenditures for this program and other minor construction are estimated to total $\$ 8,350,000$. In future years, expenditures for construction will probably decrease as the synthetic liquid fuels facilities are completed.

## RECREATIONAL RESOURCES

National Park Service.-Construction classified under this category consists of capital improvements by the National Park Service in the national parks, monuments, and historical sites. All such construction was held up during the war, and, as a consequence, a volume of needed projects for replacements and improvements has been built up. The construction program of roads, buildings, and utilities in national park areas was resumed in fiscal year 1947, but in accordance with the public works curtailment policy, expenditures for fiscal year 1947 are estimated at 8 million dollars; for fiscal year 1948 they are estimated to increase to $\$ 11,151,000$. In future years, expenditures for capital improvements can be expected to increase if the national park areas are to be brought up to the established standards.

## Transportation and Communication

Federal construction expenditures for transportation facilities in fiscal year 1948 comprise almost one-third of the estimated total Federal expenditures for civil construction. This total of 674 million dollars is considerably greater than the 482 million dollars estimated to be expended in fiscal year 1947. Federal responsibility has long been accepted for assistance in the construction of roads and highways and rivers and harbors. With the enactment of the Federal-Aid Airport Act of 1946, the Federal Government has now accepted responsibility for aiding State and local governments in the construction of airports. Air navigation facilities have been constructed by the Federal Government for a number of years, but heretofore airport construction had been considered a local responsibility. In general, construction of roads, river and harbor projects, airports and airway facilities was restricted during the war to only those facilities which were absolutely essential for the national defense. After VJ-day, the restrictions were eased and additional appropriations were made in fiscal years 1946 and 1947 to resume work at a high level. High construction costs, materials shortages, and the August 1946 construction limitation program, however, are holding down expenditures in fiscal year 1947. During the fiscal year 1948, expenditures will be made at an increasing rate in order to continue projects already started and to provide for road and airport construction grants in accordance with the rates established by authorizing acts. Further increases are to be expected in fiscal years 1949 and 1950, as the roads and airports programs reach their peaks.

## PROVISION OF NAVIGATION AIDS AND FACILITIES

The two chief items under this category are the river and harbor program of the Corps of Engineers and the aids-to-navigation program of the United States Coast Guard. These, and a smaller program of construction at the Panama Canal, are estimated to total 158 million dollars in expenditures in fiscal year 1948.

Corps of Engineers.-During the war, the rivers and harbors activities of the Corps of Engineers were restricted largely to the task of construction and maintenance on those navigation structures, harbors, and channels which were required for prosecution of the war. The fiscal year 1947 is the first year since fiscal year 1942 in which any appreciable program of new construction was undertaken. However, in conformity with the public works curtailment program, expenditures for new construction are being held to 23 million dollars in fiscal year 1947. To this amount must be added 80 million dollars for maintenance and operation, surveys, and investigations, which totals to the 103-million-dollar expenditure limitation for fiscal year 1947 for work classified under the Transportation function. This limitation did not allow for starting during fiscal year 1947 of all of the projects for which funds had been appropriated. The program recommended for fiscal year 1948 provides for work to proceed at an economic but conservative rate on all projects for which funds were provided in the 1947 appropriation act. It does not allow for the starting of any additional projects. However, in order to continue the approved projects at an economical and efficient rate, about 55 million dollars of expenditures will be required for new construction in fiscal year 1948. Maintenance and operation, and survey and advance planning expenditures are estimated to total an additional 80 million dollars, making a total of about 135
million dollars of expenditures in fiscal year 1948 for work classified under Transportation.
The present construction program provides for dredging work on a number of the major harbors on the Atlantic and Gulf Coasts, including New York and Savannah Harbors, improvement of the intercoastal waterway along the Atlantic and Gulf Coasts, work on inland waterways such as the Ohio, upper Mississippi, and Missouri Rivers, improvements to Great Lakes harbors and channels, and preparatory work on McNary Dam on the Columbia River in Washington. Many of these projects will not be completed in fiscal year 1948, but will require substantial expenditures in subsequent years. Thus, expenditures in fiscal year 1949 and 1950 will remain at a level at least as high as that in fiscal year 1948 even without the starting of any new projects in those years.

Coast Guard.-After VJ-day, the Coast Guard once again returned to its major peacetime task of providing aids to navigation and rescue facilities on the coastal and inland waters of the United States and its possessions. The program for 1947 and the $\$ 5,669,000$ program for which appropriations are recommended in 1948 provide for urgently needed new construction at Coast Guard and lighthouse stations, and the provision of new radio aids to navigation in outlying possessions. Expenditures for fiscal year 1948 , however, are estimated at $\$ 14,653,000$, due largely to payments for work contracted for during the war and being brought to final completion.

The Panama Canal.-The 1948 construction program recommended for this agency provides for construction of housing, school and hospital improvements; roads and streets in the Canal Zone; and for studies on the expansion of canal capacity across the Isthmus. Expenditures are estimated to be $\$ 8,015,000$ in fiscal year 1948, as compared with $\$ 10,145,000$ estimated to be spent in fiscal year 1947.

## PROVISION OF HIGHWAYS

Public Roads Administration.-The postwar Federal-aid highway program was established by the passage, in December 1944, of the Federal-Aid Highway Act of 1944 which authorized Federal appropriations of $\$ 500,000,000$ annually for three postwar fiscal years. After VJ-day, the Congress designated the fiscal year 1946 as the first postwar fiscal year. This large postwar program was designed to meet pressing highway needs which had accumulated during the war years when Federal aid for highways was restricted almost entirely to roads essential to the war program.

During fiscal year 1946, however, even with the removal of wartime restrictions and limitations, road expenditures were largely for the completion of the wartime road program. During fiscal year 1947, progress on the postwar highway program continues to be slow. Although the States had expected to be well under way toward meeting the most urgent needs by the end of fiscal year 1947, scarcities of materials and high construction costs have retarded activities to a considerable extent. In view of high contract prices, a conservative policy has been followed by State governments and the Public Roads Administration in approving new construction. In addition, highway construction is being restricted, in accordance with the August 1946 public works curtailment order, to only the most urgently needed work.
The Federal-aid postwar highway program, which constitutes the bulk of expenditures in fiscal year 1948, pro-
vides a balanced approach to meeting the most important highway needs of the Nation. The 500 million dollar annual authorization is apportioned to the States, in accordance with prescribed formulas. This amount is composed of 225 million dollars for projects on the regular Federal-aid highway system, which comprises the basic network of primary highways; 150 million dollars for projects on a designated system of secondary and feeder roads including farm-to-market roads; and 125 million dollars for projects on the Federal-aid highway system in urban areas where needs for modernization and improvement are great.

The remaining programs active in fiscal year 1948 include the balance of prewar Federal-aid highway, secondary road, and grade-crossing-elimination programs, and the remainder of the wartime strategic highway and access-roads authorizations. In addition, there is included work done directly by the Public Roads Administration on public lands highways in the Western States and repair and reconstruction of highways in Hawaii. Expenditures by the Public Roads Administration for public roads in the transportation category are expected to total about 268 million dollars in fiscal year 1947. They are estimated to rise to 393 million dollars in fiscal year 1948. Expenditures will probably reach the annual authorization figure of 500 million dollars provided in the Federal-Aid Highway Act of 1944 in fiscal year 1949. It is apparent, therefore, that at least 1 billion dollars of expenditures under existing authorizations for publicroads grants are to be expected after fiscal year 1948.

Sums apportioned to the States for the 1,500 -milliondollar postwar Federal-aid highway program are available only for one year after the close of the fiscal year for which they are authorized. The low rate of obligation during the past year indicates that some States face the prospect of losing a portion of their grants. In order to avoid this contingency, the President, in this Budget, is recommending that the Congress extend for one additional year the period during which these funds may be available.

Forest roads and trails, Department of Agriculture.-This program includes the construction of forest development roads and forest highways in and through the national forests. The forest development roads, which are constructed by the Forest Service, are being built in fiscal year 1947 primarily for access to timber being harvested in the national forests in furtherance of the housing program. Forest highways, which are constructed by the Public Roads Administration, are integral links through the national forests of the Nation-wide system of primary Federal highways. Expenditures for both forest development roads and highways are estimated at about 26 million dollars in both fiscal years 1947 and 1948.

Bureau of Indian Affairs, roads.-Under this activity, secondary roads are built and maintained on Indian reservations to provide access to developed areas and to connect with the State and county road systems adjoining the reservations. Expenditures are estimated to reach $\$ 4,100,000$ in fiscal year 1948, an increase over the $\$ 3,100,000$ estimate established for fiscal year 1947.

Alaska Road Commission, roads.-This program provides for construction and maintenance of the highway system in Alaska, including the important Richardson Highway from Valdez to Fairbanks, and the Alaska section of the Alcan Highway. Expenditures in fiscal year 1948 are estimated at $\$ 3,796,000$, an increase from the $\$ 3,440$,000 estimated to be expended in fiscal year 1947.

PROMOTION OF AVIATION, INCLUDING PROVISION OF AIRWAYS AND AIRPORTS

Civil Aeronautics Administration.--Under provisions of the Federal-Aid Airport Act approved May 13, 1946 (Public Law 377, 79th Cong.) Federal aid was extended to States, Territories, and cities for the construction of airports. Total authorizations are 520 million dollars over a 7-year period. Funds for smaller airports are provided on a matching basis, while larger airports are to receive Federal aid up to a maximum of 50 percent. An appropriation of $\$ 47,975,000$ for airport survey and for construction grants was made for fiscal year 1947, but because of the time required to prepare the necessary procedures and establish a staff, only $\$ 6,700,000$ of these funds are estimated to be expended during fiscal year 1947. Because of the necessity for completing the national airport plan before needs can be fully determined, a detailed appropriation estimate for fiscal year 1948 is not included in this Budget, but one will be transmitted at a later date. However, expenditures for fiscal year 1948 are estimated at 50 million dollars for airport grants. In future years, expenditures may be expected to approach or exceed the annual average of 75 million dollars provided by the act.

Other capital expenditures of the Civil Aeronautics Administration include the provision of facilities for air navigation along the Nation's airways, and completion of previously authorized airport construction programs. Air navigation facilities expenditures are chiefly for instrument landing systems at major terminal airports and for construction of stations and housing facilities in remote areas of this country and Alaska. Total expenditures for these other programs are estimated at $\$ 23,942,000$ for fiscal year 1948.

National Advisory Committee for Aeronautics.-The construction program of this aeronautical research agency included in this category consists of improvements and new facilities at its three aeronautical research laboratories, Langley Field, Va.; Cleveland, Ohio; and Moffett Field, Calif. Expenditures in fiscal year 1947 are estimated at $\$ 10,700,000$, and in fiscal year 1948, $\$ 11,010,000$.

## General Government

## OTHER GENERAL GOVERNMENT

Public Buildings Administration.--In common with other Federal public works, Federal building construction was halted during the war. Because of the competitive nature of public building construction with housing, the postwar Federal buildings construction program has not yet been authorized by the Congress. However, the act of June 14, 1946, does provide for the use of a vailable funds by the Public Buildings Administration to prepare
designs for those new public buildings projects for which land has already been acquired. The Public Buildings Administration is thus able to prepare in advance, at least in part, for resumption of its normal building program when conditions warrant.

The future public buildings program includes the construction of post offices, Federal courthouses, customhouses, immigration and quarantine stations and marine hospitals in many cities throughout the country; and Federal office buildings in and near the District of Columbia. The first segment of this program was estimated by the Public Buildings Administration to cost 193 million dollars for buildings outside the District of Columbia and 169 million dollars for land and buildings inside the District of Columbia

For fiscal year 1948, an appropriation is recommended for completion of construction of the West Central Heating Plant in the District of Columbia. Items for a hospital center in the District of Columbia and a research hospital for the National Institute of Mental Health are carried under "Social welfare, health, and security" and an item for construction of a geophysical institute at Fairbanks, Alaska, is carried under "Education and general research." Other construction will go forward in fiscal year 1948 including a Federal office building at Nashville, Tenn., and two marine hospitals, financed from funds appropriated in previous years. In addition, advance planning of Federal public buildings will go forward. Expenditures for fiscal year 1948 for work classified under "General government'" are estimated to reach $\$ 14,774,000$. In the event of authorization of a general public buildings construction program in future years, expenditures by the Public Buildings Administration for construction can be expected to show a large increase.
Bureau of Indian Affairs.-In this category is carried the building construction on Indian reqervations and elsewhere for general administrative, health and welfare purposes by the Bureau of Indian Affairs. All such construction was halted during the war, but work was resumed during fiscal year 1947, and $\$ 1,400,000$ is estimated to be expended. For fiscal year 1948, expenditures of $\$ 1,900,000$ are estimated for advance surveys and plans, construction of educational buildings on the Navajo Reservation, major repairs to existing buildings, and other construction items. This amount represents a curtailed program for this activity, as deferred needs for buildings and utilities on Indian reservations are much greater than the amount recommended for the fiscal year 1948.

Bureau of Standards.-The 1948 construction program for this agency consists of construction of a building for radio research and for purchase of a betatron to be installed in a structure provided for in fiscal year 1947 appropriations. Expenditures for these projects in fiscal year 1948 are estimated to total 1 million dollars.

APPROPRIATIONS AND EXPENDITURES FOR FEDERAL PUBLIC WORKS AND CONSTRUCTION—GENERAL, SPECIAL AND CORPORATION ACCOUNTS

By major function, subfunction, and agency
[For the fiscal years 1946, 1947, and 1948]

*Includes only that part of the appropriation account used for construction.
${ }^{1}$ Excluding $\$ 20,000,000$ of reappropriations for construction.
Anticipated supplemental.
Appropriations and expenditures carried under "Transportation, provision of navigation aids and facilities."
4 Excludes $\$ 441,250,000$ contract authorization.
${ }^{5}$ Excludes $\$ 219,550,000$ contract authorization.

[^70]
## THE WAR PROGRAM

Table A shows the status of the cumulative authorized war and national defense program at three stages: (1) at the beginning of the fiscal year 1946, when it was at a maximum; (2) at the beginning of the fiscal year 1947, after about 60 billion dollars of appropriations and authorizations had been rescinded or otherwise carried to surplus during the preceding year; and (3) on June 30, 1947, according to present estimates. The coverage conforms to the "National defense" category used in the Budget and in the daily statement of the United States Treasury during the war years. Authorizations, expenditures, and unexpended balances are given for both the activities in the general and special accounts and the Government corporations.

Table B shows war expenditures for the period July 1, 1940, to June 30, 1947, classified according to the agency making the expenditure. The coverage corresponds to the old "National defense" category used in the Budget and in the daily statement of the United States Treasury during the war years. The figures for expenditures shown for the several agencies are not quite comparable to those reported in the daily statement, because for the purposes of this analysis United Nations Relief and Rehabilitation Administration and other expenditures have generally been distributed by spending agency. In the case of terminal leave payments and bonds issued under the Armed Forces Leave Act of 1946, however, the amounts are shown under "other" agencies rather than under the spending or issuing agency. These figures for expenditures are also not comparable with the appropriations recorded for the various agencies, since the expenditures of funds allocated from appropriations to the Presi-dent--such as the defense aid and United Nations Relief and Rehabilitation Administration appropriations-are recorded according to the agency making the expenditure.

Table C distributes the expenditures shown as war activities in the old "National defense" category among the categories where they fall under the new functional classification. Expenditures in both the general and special accounts and Government corporation war activities are shown for the fiscal years 1946 and 1947, classified by major category and subcategory of the new functional classification, with major spending agencies set out separately.

As might be expected, the figures in table C indicate that the bulk of the old "National defense" expenditures
remain in the same category. The more important shifts are to "International affairs and finance" (UNRRA and government and relief in occupied areas), "Agriculture and agricultural resources" (RFC food subsidies), "Natural resources not primarily agricultural" (Manhattan District atomic energy activities after January 1, 1947), "Transportation and communication" (United States Maritime Commission and War Shipping Administration), and to "General government" (especially War Assets Administration).

## EXPLANATION OF THE ESTIMATES OF RECEIPTS

The estimates of receipts from taxes and customs for the current and the ensuing fiscal years are prepared in December each year by the Treasury Department. The estimates of miscellaneous receipts in general are prepared by the agency depositing the receipts in the Treasury.

## TOTAL RECEIPTS

Total receipts, general and special accounts (daily Treasury statement basis) are estimated in the amounts of $\$ 41,584.6$ millions in the fiscal year 1947 and $\$ 39,717.5$ millions in the fiscal year 1948. Estimated total receipts in the fiscal year 1947 show a decline of $\$ 2,654$ millions from actual 1946 receipts; estimated total receipts for 1948 represent a further decrease of $\$ 1,867.2$ millions.

The details of the estimated and actual receipts are shown in table 7 , pages a11-a 20 . Throughout the tables shown in this exposition the figures are rounded and will not necessarily add to totals. The exposition utilizes the Budget classification of receipts. The footnotes to the table outline the differences between this classification and the Treasury classification of receipts.

| Source ${ }^{\text {a }}$ | Actual |  | Estimate |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1945 | 1946 | 1947 | 1948 |
| Direct taxes on individuals. | 41.5 | 43.0 | 44.8 | 48.1 |
| Direct taxes on corporations | 34.3 | 29.2 | 22.2 | 20.8 |
| Excise taxes | 12.4 | 15.1 | 17.5 | 15.4 |
| Employment taxes | 3.8 | 3.9 | 4.7 | 6.8 |
| Customs...-. | 0.7 | 1.0 | 1.2 | 1.3 |
| Miscellaneous receipts. | 7.3 | 7.8 | 9.6 | 7.6 |
| Total receipts | 100.0 | 100.0 | 100.0 | 100.0 |

${ }^{1}$ The Budget classification of taxes differs in several respects from the classification
used by the Treasury Department in the daily Treasury statement. In the Budget used by the Treasury Department in the daily Treasury statement. In the Budget classification, the Treasury "income tax" is divided into "direct taxes on individuals
and "direct taxes on corporations," except that the unjust enrichment tax is placed in and "direct taxes on corporations," except that the unjust enrichment tax is placed ins "excise taxes." The Budget classification removes from the Treasury "miscelaneous
internal revenue", the estate and gift taxes, which are placed in "direct taxes on indiinternal revenue", the estate and gift taxes, which are place capital stock tax, which is placed in "direct taxes on corporations.", The Budget "excise taxes" consists of the Treasury "miscellaneous internal revenue" less the capital stock, estate, and gift taxes and plus the unjust enrichment tax. "The Budget "employment taxes" consists of the Treasury "social security taxes," "taxes
upon carriers and their employees," and "railroad unemployment insurance contribuupon carriers and their employees," and "railroad unemployment insurance contribuAmounts shown for the fiscal year 1946 are on the basis of the daily Treasury statement as far as possible. Since the classification used in the daily Treasury statement does not correspond exactly to the Budget classification, it is necessary to allocate arbitrarily some of the adjustments from the detailed collections basis to the daily Treasury statement
basis. The adjustment from the collections basis to the daily Treasury statement basis basis. The adjustment from the collections basis to the daily Treasury statement basis
for "miscellaneous internal revenue" is contained in "excise taxes" and the adjustment for "income tax: other" (other than withheld by employers) is contained in "direct taxes on individuals." The total amounts for employment taxes, customs, and mis cellaneous receipts are on the basis of the daily Treasury statement. " All details of taxes, other than "income tax, withheld hy employers" and the details of "employment taxes, are on the bes.
rants issued.

Direct taxes on individuals continue as the leading source of revenue, and although remaining at relatively stable absolute amounts in 1947 and 1948, increase as a percentage of total receipts. In 1948 they account for almost half of estimated total receipts. Direct taxes on corporations decline substantially both in absolute amount and as a percentage of total receipts but maintain their position as the second most important revenue source. Excise taxes increase on both absolute and percentage bases in 1947 but decline on both bases in 1948. Receipts from employment taxes are estimated to increase
on both absolute and percentage bases. Customs increase slightly in amount and as a percentage of total receipts. Miscellaneous receipts increase on both bases in 1947 but decrease in absolute amount and on a percentage basis in 1948.

## FISCAL YEAR 1947

Actual receipts in the fiscal year 1946 and estimated receipts in the fiscal year 1947 are compared by major sources in the following table:

Total and net receipts by sources ${ }^{1}$

| [In millions of dollars] |  |  |  |
| :---: | :---: | :---: | :---: |
| Source | $\underset{1946}{\text { Actual, }}$ | $\underset{1947}{\text { Estimate, }}$ | $\begin{gathered} \text { Increase } \\ \text { (+) or de- } \\ \text { crease ( }- \text {, }, \\ 1947 \text { over } \\ 1946 \end{gathered}$ |
| Direct taxes on individuals. | 19,008.0 | 18,637.0 | -371.0 |
| Direct taxes on corporations | 12,905. 7 | 9, 227. 0 | $-3,678.7$ |

| Employment taxes. | 1,713.7 | 1,955. 3 | +241.6 |
| Customs...... | 435.5 | 495.7 | +80.2 |
| Miscellameous receipts. | 3,479.9 | 3,986.6 | +506.8 |
| Total receipts- | 44, 238.6 | 41,584, 6 | -2, 654.0 |
| Deduct net appropriation to Federal old-age and survivors insurance trust fund. | 1,200.8 | 1,354, 7 | +153.9 |
| Net receipts. | 43,037.8 | 40,229.9 | -2, 807.9 |

I See footnote to preceding table.
Actual receipts in the fiscal year 1946, for the first time in 7 years, showed a decline from receipts of the previous fiscal year. Estimated 1947 receipts continue this trend. The estimated decrease in direct taxes on corporations is mainly responsible for the decrease in 1947. The large decrease in direct taxes on corporations in the fiscal year 1947 as compared with the fiscal year 1946 reflects lower corporation profits and legislative changes.

In spite of the estimated higher levels of income on which the individual income taxes collected in the fiscal year 1947 are based, the reductions in the yield caused by the changes in the law made by the Revenue Act of 1945 resulted in a small net decrease in direct taxes on individuals. Excise taxes are expected to increase because of higher income levels and an increased supply of taxable commodities,

Direct taxes on individuals.-The yields of direct taxes on individuals are shown in the following table:
[In millions of dollars]

| Source | $\underset{1946}{\text { Actual, }}$ | $\underset{1947}{\text { Estimate, }}$ | Increase (+) or decrease (-), 1947 over 1946 |
| :---: | :---: | :---: | :---: |
| Individual income tax: |  |  |  |
| Withheld | 9,391. 7 | 9,302.0 | $-89.7$ |
| Not withheld | 8,522.8 | 8,017.0 | -505.8 |
| Back taxes. | 416.7 | 588.0 | +171.3 |
| Total individual income tax. | 18,331.2 | 17,907.0 | -424.2 |
| Estate tax | 629.6 | 678.0 | +48.4 |
| Gift tax | 47.2 | 52.0 | +4.8 |
| Total direct taxes on individuals.............- | 19, 008.0 | 18,637.0 | -371.0 |

Estimated individual income tax receipts in the fiscal year 1947 show decreases as compared with the fiscal year 1946 in all categories except back taxes. The decreases in current individual income tax receipts, in spite of rising levels of income on which such taxes were based, were caused by lower effective rates of tax resulting from the passage of the Revenue Act of 1945 . This measure reduced normal and surtax rates, increased the normal tax exemptions, and reduced the rate of withholding effective in the calendar year 1946. About 95 percent of the tax receipts in the fiscal year 1947 represent liabilities under the Revenue Act of 1945 compared with approximately 30 percent in the fiscal year 1946. The peak individual income tax liabilities of the past few years are the source of the steadily increasing receipts from back taxes. Estate and gift tax receipts increase in the fiscal year 1947 as a result of the higher valuation of property subject to tax.
Direct taxes on corporations.-The details of the taxes from this source appear in the table below:

| [In millions of dollars] |
| :--- |
| Source |

Corporation income and excess profits taxes in the fiscal year 1947 reflect incomes and tax provisions of the calendar years 1945 and 1946 while receipts in the fiscal year 1946 were based on incomes and tax provisions of the calendar years 1944 and 1945. The decrease in estimated receipts for the fiscal year 1947 as compared with the fiscal year 1946 therefore reflects a part-year effect of the repeal of the excess profits tax and the declared value excess profits tax, and a reduction of surtax rates effective with years beginning after December 31, 1945, and in addition a lower level of corporation profits estimated for the calendar year 1946 as compared with the calendar year 1944. The repeal of the capital stock tax with respect to years ending after June 30, 1945, also affects direct taxes on corporations as only small delinquent taxes will be collected in the fiscal year 1947.
Excise taxes.-Receipts from this source by major groups are listed in the following table:

| [In millions of dollars] |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| Source |  |  |  |  |  |  |

1 Less than $\$ 50,000$.
Reflecting increased effective consumer demand, receipts from liquor taxes, tobacco taxes, retailers' excise taxes, miscellaneous taxes, and manufacturers' excise taxes are estimated to increase in the fiscal year 1947 as compared with the fiscal year 1946. The greatest increase occurs
in manufacturers' excise taxes where an augmented supply of taxable commodities reinforces the higher consumer demand. Stamp taxes decline as a result of an estimated decrease in the activity in security markets.
Employment taxes.-The yields of the various employment taxes are shown below:
[In millions of dollars]

| Source | $\underset{1946}{\text { Actual, }}$ | $\underset{1947}{\text { Estimate, }}$ | Increase <br> ( + ) or decrease (-), 1947 over 1946 |
| :---: | :---: | :---: | :---: |
| Federal Insurance Contributions Act | 1,238.2 | 1,370.0 | +131.8 |
| Federal Unemployment Tax Act. | 179.9 | 185.0 | +5.1 |
| Railroad Retirement Tax Act. | 282.6 | 386.0 | +103. 4 |
| Railroad unemployment insurance codntributions | 12.9 | 14.3 | +1.4 |
| Total employment taxes. | 1,713.7 | 1,955. 3 | +241.6 |
| Deduct net appropriation to Federal old-age and survivors insurance trust fund. | 1,200.8 | 1,354.7 | +153.9 |
| Net employment taxes ..--.............-. .-. | 512.9 | 600.6 | +87.7 |

The estimated increase in receipts in the fiscal year 1947 over the fiscal year 1946 is based on higher industrial and railroad pay rolls and on an increase in the tax rate under the Railroad Retirement Tax Act. The rate change, from $31 / 2$ percent to $5 \frac{1}{4}$. percent each on the carriers and their employees beginning January 1, 1947, will increase receipts under this act in the last quarter of the fiscal year 1947.

Customs.-Customs receipts are estimated to be $\$ 495.7$ millions in the fiscal year 1947. This is an increase of $\$ 60.2$ millions over receipts of $\$ 435.5$ millions in the fiscal year 1946.

Miscellaneous receipts.-The large increase in receipts from the sale of surplus property, partially offset by a decrease in recoveries from renegotiation of war contracts, is responsible for the increase in miscellaneous receipts.

FISCAL YEAR 1948
Estimated receipts in the fiscal years 1947 and 1948 are compared by major sources in the following table:

| Total and net receipts by source ${ }^{1}$ [In millions of dollars] |  |  |  |
| :---: | :---: | :---: | :---: |
| Source | $\underset{1947}{\text { Estimate, }}$ | $\begin{gathered} \text { Estimate } \\ 1948 \end{gathered}$ | Increase $(+)$ or decrease ( - ), 1948 over. 1947 |
| Direct taxes on individuals. | 18, 637.0 | 19,120.0 | +483.0 |
| Direct taxes on corporations | 9, 227.0 | 8, 270.0 | -957.0 |
| Excise taxes. | 7,283.0 | 6,118.0 | $-1,165.0$ |
| Employment taxes. | 1,955. 3 | 2, 693.7 | +738.4 |
| Customs.- | 495.7 | 517.3 | +21.6 |
| Miscellaneous receipts. | 3,986.6 | ${ }^{2} 2,998.5$ | -988.2 |
| Total receipts | 41,584. 6 | 39,717. 5 | -1,867.2 |
| Deduct net appropriation to Federal old-age and survivors insurance trust fand. | 1,354. 7 | 1,987. 1 | +632.4 |
| Net receipts. | 40,229.9 | 37, 730.4 | -2,499.6 |

${ }^{1}$ See footnote to first table.
${ }^{2}$ Includes receipts, under proposed legislation, from (a) retirement of capital stock of the Federal Deposit insurance Corporat (b) repayment of advances on industrial

Net receipts in the fiscal year 1948 are expected to show a decrease of $\$ 2,499.6$ millions from the fiscal year 1947. Direct taxes on corporations, excise taxes and miscellaneous receipts are responsible for the decline in revenues. The first occurs, despite higher profit levels, because of tax legislation enacted in 1945 but not fully reflected in receipts until the fiscal year 1948. The decrease in receipts from excise taxes is due to the termination of war tax rates on certain excise taxes effective July 1, 1947, in
accordance with the Presidential Proclamation of December 31, 1946, declaring the termination of hostilities as of December 31, 1946. The decrease in miscellaneous receipts results from reduced recoveries from renegotiation of war contracts and smaller receipts from sales of surplus property.
Direct taxes on individuals.-The yields of direct taxes on individuals are shown in the following table:

| [In millions of dollars] |  |  |  |
| :---: | :---: | :---: | :---: |
| Source | ${ }_{1947}^{\text {Estimate, }}$ | $\underset{1948}{\text { Estimate }}$ | Increase (+) or decrease (-), 1948 over 1947 |
| Individual income tax: |  |  |  |
| Withheld | 9,302.0 | 9,614.0 | $+312.0$ |
| Not withbeld | 8,017.0 | 8,046.0 | +29.0 |
| Back taxes | 588.0 | 731.0 | +143.0 |
| Total individual income tax | 17,907.0 | 18, 391.0 | $+484.0$ |
| Estate tax | 678.0 | 679.0 | +1.0 |
| Gift tax | 52.0 | 50.0 | -2.0 |
| Total direct taxes on individuals | 18,637.0 | 19, 120.0 | +483.0 |

Individual income tax receipts from withholding and both current and back receipts from income taxes other than withheld are estimated to increase in the fiscal year 1948 as compared with the fiscal year 1947. The increases in withholding receipts and in current receipts other than withheld are the result of increases in levels of income while the increase in back tax receipts is a function of the peak tax liabilities of the last few years.

Direct taxes on corporations.-The details of the receipts from direct taxes on corporations appear in the table below:

The corporation income level affecting fiscal year 1948 receipts, namely, the combined income level of the calendar years 1946 and 1947, is estimated to be greater than the combined income level of the calendar years 1945 and 1946 which determines receipts in the fiscal year 1947. However, as fiscal year 1948 receipts reflect virtually the full year effect of the repeal of the excess profits and declared value excess profits taxes and the reduction of surtax rates enacted in the Revenue Act of 1945 whereas receipts in the fiscal year 1947 show only a one-half year effect, receipts in the fiscal year 1948 are estimated to be smaller than in 1947.

Excise taxes.-Receipts from the major groups of excise taxes are listed in the following table:

| [In millions of dollars] |  |  |  |
| :---: | :---: | :---: | :---: |
| Source | $\underset{1947}{\text { Estimate, }}$ | $\underset{1948}{\text { Estimate, }}$ | Increase <br> $(+)$ or decrease ( - ), 1948 over 1047 |
| Liquor taxes.. | 2, 585.0 | 1,877.4 | -707.6 |
| Tobacco taxes | 1,227.0 | 1,216.0 | -11.0 |
| Stamp taxes | 77.0 | 83.0 | +6.0 |
| Manufacturers' excise taxes. | 1,379.4 | 1,540. 5 | $+161.1$ |
| Retailers' excise taxes. | 1509.9 | 1,234. 1 | $-275.8$ |
| Miscellaneous taxes... | 1,504.7 | 1,167.0 | -337.7 |
| Unjust enrichment tax | ( ${ }^{1}$ | (1) |  |
| Total excise taxes | 7,283.0 | 6, 118.0 | -1,165.0 |

${ }^{1}$ Less than $\$ 50,000$.
All major sources of receipts from excise taxes decrease in the fiscal year 1948 as compared with the fiscal year 1947 except stamp taxes and manufacturers' excise taxes. The decrease in tax rates effective July 1, 1947, in accordance with the declaration of the termination of hostilities as of December 31, 1946, is primarily responsible for the large decreases in collections from liquor, retailers' excise and miscellaneous taxes. Manufacturers' excise tax receipts increase as a result of the continuing improvement in the supply of taxable items. Stamp taxes show a small increase reflecting increased activity in security markets.

Employment taxes.-The yields of the various employment taxes are shown below:
[In millions of dollars]

| Source | $\underset{1947}{\text { Estimate, }}$ | $\begin{aligned} & \text { Estimate, } \\ & 1948 \end{aligned}$ | Increase (+) or decrease (-), 1948 over 1947 |
| :---: | :---: | :---: | :---: |
| Federal Insurance Contributions Act. | 1,370.0 | 2,003.0 | $+633.0$ |
| Federal Unemployment Tax Act. | 185.0 | 191.0 | +6.0 |
| Railroad Retirement Tax Act. | 386.0 | 487.0 | +101.0 |
| Railroad unemployment insurance contributions.- | 14.3 | 12.7 | -1.6 |
| Total employment taxes | 1,955. 3 | 2,693. 7 | +738.4 |
| Deduct net appropriation to Federal old-age and survivors insurance trust fund | 1,354. 7 | 1,987. 1 | $+632.4$ |
| Net employment taxes. | 600.6 | 706.6 | +106.0 |

The increase in receipts in the fiscal year 1948 over receipts in the fiscal year 1947 is the result of an estimated increase in salaries and wages and of increases in the tax rates imposed by two of the employment taxes. Under the Federal Insurance Contributions Act the tax rate is scheduled to change from 1 percent to $2 \frac{1}{2}$ percent each on employers and employees on January 1, 1948. This increase in rates will raise receipts in the last quarter of the fiscal year by $\$ 595$ millions. Receipts under the Railroad Retirement Tax Act will be collected throughout the fiscal year 1948 at the higher rate of $5 \frac{3}{4}$ percent each on the carriers and their employees, which goes into effect on January 1, 1947, rather than at the former rate of $31 / 2$ percent on each.

Customs.-Receipts from customs duties are expected to amount to $\$ 517.3$ millions in the fiscal year 1948, an increase of $\$ 21.6$ millions over receipts in the fiscal year 1947.

Miscellaneous receipts.-Decreases in receipts from the sales of surplus property and recoveries from renegotiation of war contracts account for the estimated decrease in miscellaneous receipts in the fiscal year 1948.

## APPENDIXES

Appendix 1. Analysis of the Public Debt.
Appendix 2. Guaranteed Obligations and Contingent Liabilities of the United States, June 30, 1946.
Appendix 3. Permanent Appropriations, General and Special Accounts.
Appendix 4. Comparison of Expenditures by Organization Units, Fiscal Years 1940 Through 1946.
Appendix 5. Unexpended Balances of Ceneral and Special Account Appropriations as of June 30, 1946, and Appropriations for the Fiscal Year 1947 as of November 1, 1946.
Appendix 6. Budget Receipts and Expenditures, Fiscal Years 1939 Through 1948.
Appendix 7. Budget and Trust Account Receipts and Expenditures, 1946 Through 1948, on Basis of Daily Treasury Statement Classification.

## INTRODUCTION TO THE APPENDIXES

Appendix 1 (Analysis of the Public Debt) shows the outstanding public debt by types of indebtedness. The difference between the total public debt outstanding at the end of fiscal years 1945 and 1946 appears in table 5 as the net increase in public debt during the fiscal year 1946.

Appendix 2 (Guaranteed Obligations and Contingent Liabilities of the United States) lists guaranteed obligations and contingent liabilities as of June 30, 1946.

Appendix 3 (Permanent Appropriations, general and special accounts) shows these permanent appropriations for the fiscal years 1946, 1947, and 1948. They have been enacted by Congress at various times and the acts remain in effect until repealed or amended. This appendix does not include permanent trust appropriations. Most of the trust appropriations listed in table 17 are of the permanent type.

Appendix 4 (Comparison of Expenditures by Organization Units) compares cash expenditures of departments and agencies and their constituent units over a 7 -year
period. In several instances, there have been reorganizations and certain activities have been transferred between departments and agencies. In such cases, annual expenditures throughout the 7 -year period have been readjusted upon the pattern of organization on June 30, 1946. Footnotes indicate the date of the transfer and the name of the earlier agency.

Appendix 5 (Unexpended Balances of General and Special Account Appropriations, etc.) shows the unexpended balances of appropriations ( $a$ ) on the books of the Treasury and (b) to the credit of disbursing officers as of June 30, 1946. It also shows appropriations for the fiscal year 1947 as of November 1, 1946.
Appendix 6 (Budget Receipts and Expenditures) presents a historical comparison (1939-48) for budget receipts by source and budget expenditures by function.

Appendix 7 presents budget and trust-account receipts and expenditures for fiscal years 1946 through 1948 on the basis of the same classification of data as is used in the daily Treasury statement.

1 Excludes bonds, notes and debentures held by the Treasury and reflected in the public debt.
loans. loans.
${ }_{4}$ Funds have been deposited with the Treasurer of the United States for the payment of outstanding matured principal and interest guaranteed by the United States.

4 Offset by cash in designated depository banks amounting to $\$ 5,279,425.34$, which is secured by the pledge of collateral as provided in the regulations of the P ostal Savings System,
aving a face value of $\$ 5,684,550$; cash in the possession of System amounting to $\$ 174,560,985.05$; Government securities with a face value of $\$ 3,026,883,270$; and other assets of $\$ 5,050,549.89$
5 fiset by cash on hand and in depository banks amounting to $\$ 290,060.58 ;$ Government securities with a face value of $\$ 9,887,730 ;$ and other asse ts.
${ }^{6}$ In actual circulation, exclusive of $\$ 755,978,615.83$ redemption fund deposited in the Treasury, and $\$ 648,732,070$ of their own Federal Reserve notes held by the issuing banks. The collateral security for Federal Reserve notes issued consists of $\$ 11,119,000,000$ in gold certifcates and in credits with the Treasurer of the United States payable in gold certificates $\$ 14,361,527,000$ face amount of United States Government securities, and $\$ 26,997,000$ face amount of commercial paper.
? Includes $\$ 2,000,000$ issued by the Tennessee Valley Authority on the credit of the United States and held by the Reconstruction Finance Corporation.

Includes repurchase of obligations in transit amounting to $\$ 1,000,000$.

- Although there is no specific statutory limitation on the amount of debentures which may be issued or outstanding, limitations are provided by the National Housing Act, a annended, on the amount of insurance under the titles of that act out of which these debenture issues arise, namely, title II, mutual mortgage and rental housing insurance, and title VI, war and veterans' emergency housing insurance. The title II limitation provides that the aggregate amount of principal obligations of all mortgages insured under this title and outstanding at any one time shall not exceed $\$ 4,000,000,000$, which may be increased with the approval of the President to $\$ 5,000,000,000$. The title Vilimitation, as recently increased
with the approval of the President, provides that the aggregate amount of principal obligations of all mortgages insured under this title shall not exceed $\$ 3,800,000,000$. Repair and with the approval of the President, provides that the aggregate amount of principal obligations of all mortgages insured under thisurance under title indims in connection with which are paid in cash, is subject to the limitation that the total liability which may be outstanding at any one time plus the amount of claims paid in respect of all insurance granted under title I less the amount collected from insurance premiums and other sources and deposited in the Treasury may not exceed an aggregate of $\$ 165,000,000$.
${ }_{11}^{10}$ Authorized for financing low-rent housing.
${ }^{11}$ Includes authorization to borrow for general purposes $\$ 15,750,000,000$, and for specific purposes $\$ 4,802,500,000$, less reductions of $\$ 1,660,257,258$ and $\$ 1,764,236,437$, respectively on account of cancellation by the Treasury of the Corporation's notes pursuant to act approved Feb. 24, 1938 ( 52 Stat. 80 ). Excludes authorizations to borrow indefnite amount of titles I, II, and III of the National Housing Act; and to make advances to the Secretary of Agriculture for purchase of property in accordance with title I of the Agricultura Adjustment Act.
( 12 Includes $\$ 2,000,000$ issued on the credit of the United States under section $15, \$ 272,500$ under section $15 a$, and $\$ 61,500,000$ under section 15 c of act approved May 18,1933 ( 48 Stat. 58), as amended by act approved July 26,1939 ( 53 Stat. 1083).

13 The Commission is authorized to make commitments not exceeding $\$ 200,000,000$ for the purpose of insuring ship mortgages under title XI of the Merchant Marine Act approved
June 29,1936 ( 49 Stat. 1985 , as amended by act approved June 23,1938 ( 52 Stat. 969 ).

${ }^{13}$ Under the Labor-Federal Security Appropriation Act, 1947, salaries for the Bureau of Old-Age and Survivors Insurance are payable directly from the Federal old-age and survivors insurance trust fund. Prior to July 1, 1946, such payments were included in general expenditures, under the caption "Federal Security Agency: Social Security Administration: administrative expenses," a corresponding amount being included as a deduction from appropriations to the Federal old-age and survivors insurance trust fund, under the caption "Less reimbursements to general fund."
