INTRODUCTION

The Budget for the fiscal year 1953 contains the President's recommendations for the work program and financial program of the Government for the coming year. It also presents comparable information for the fiscal years 1951 (actual) and 1952 (partly actual and partly estimated).

The Budget contains information on both the income side of the Budget and the outgo side. With respect to the outgo of money, the Budget deals with three stages of the spending process—authorizations, obligations, and expenditures.

Congress acts on the outgo side of the Budget by granting authorizations to incur obligations for expenses, grants, capital outlay, and fixed charges. This congressional action takes several different forms, the most common of which is an appropriation. The Budget contains summaries and detailed schedules which show all new obligational authority—both appropriations and other kinds. It also contains details on obligations incurred and to be incurred.

The outgo side of the Budget is financed on the basis of expenditures, not authorizations nor obligations. Hence the surplus or deficit is determined by comparing expenditures with receipts. Expenditures result when the obligations incurred by Government agencies are paid. In some cases the expenditure and the obligation occur at the same time; in most cases, however, the expenditure follows the obligation by some time, varying from a few days, in the case of salaries and wages, to several years in the case of contracts for major construction and the procurement of new heavy equipment. The Budget contains summaries of expenditures, tables listing the expenditures by accounts, and (for the first time) detailed schedules relating expenditures in each account to obligations and authorizations.

The material in the Budget covers both groups of Treas-

ury funds—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government). By definition, however, the conventional budget totals relate only to transactions in the Federal funds.

The Budget document consists of the Budget Message and four parts which contain summary tables, detailed data, and special analyses.

In the Budget Message (pp. m5 through m81) the President makes the general presentation of his financial program and outlines his major recommendations.

Part I of the document (pp. A1 through A13) contains seven summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in one to three pages some aspect of the over-all presentation of the Federal Budget.

Part II (pp. 1 through 1035) contains the details of the Budget for Federal funds, including various types of tables and schedules, narrative statements on the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization.

Part III (pp. 1037 through 1137) contains similar detail for trust funds, and a schedule on deposit funds. It also contains memorandum information on "working funds," which presents the activity in accounts which are established when money is advanced by one agency to another for interagency services.

Part IV (pp. 1139 through 1205) contains various special analyses of Budget data. Some of these give details on information appearing in part I—for example, a breakdown of Budget receipts by source, and a breakdown of Budget expenditures according to functions and subfunctions. Many of the other special analyses in part IV contain tabulations which cut across the entire Federal program.

BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith my recommendations for the Budget of the United States for the fiscal year ending June 30, 1953.

Expenditures are estimated at 85.4 billion dollars, an increase of 14.5 billion dollars over the current fiscal year, and 45.3 billion dollars over 1950, the last full fiscal year before the attack on Korea.

Receipts under present tax laws are estimated at 71.0 billion dollars, an increase of 8.3 billion dollars over the current fiscal year, and 34.0 billion dollars over 1950.

The increase in receipts will fall short of meeting the increase in expenditures. In the absence of new revenue legislation, a deficit of 14.4 billion dollars is in prospect for the fiscal year 1953, 6.2 billion dollars greater than the estimated deficit for the current fiscal year.

BUDGET TOTALS

[Fiscal years. In billions]

Receipts (under existing tax laws).....	\$37.0	\$48.1	\$62.7	\$71.0
Expenditures.....	40.1	44.6	70.9	85.4
Deficit (–) or surplus (+).....	–3.1	+3.5	–8.2	–14.4

Eighteen months ago, the unprovoked attack upon the Republic of Korea made it clear that the Kremlin would not hesitate to resort to war in order to gain its ends. In the face of this grim evidence, this Nation and the other nations of the free world realized that they must rearm in order to survive.

Since then, we have made significant progress in rebuilding our defenses. We have more than doubled the strength of our armed forces. We have increased the number of our Army divisions from 10 to 18. We have returned to duty more than 160 combatant vessels from our “mothball” fleet. We have added more than 40 wings to our Air Force. We have greatly expanded our production of military equipment and our ability to mobilize for any emergency. We have provided our allies overseas with the critical margin of aid necessary to help them to grow stronger.

This Budget reflects the progress we have made thus far, and it lays the groundwork for further progress.

M5

It reflects our progress to date in two ways. First, the high rate of expenditures for military equipment estimated for 1953 reflects the results of the tremendous effort that has been made during the past 18 months in getting the flow of production started. Second, the smaller amount of new obligational authority which I am recommending indicates the substantial portion of the financial requirements for our military build-up that has been met in the appropriations already made by the Congress.

This Budget lays the groundwork for further progress by providing for additional increases in the strength of our armed forces, additional deliveries of arms to our allies overseas, continued requirements of our atomic energy program, and further development of our economic strength. By the end of the fiscal year 1953, we will have reached or passed the peak production rates for all of our major military items except some of the newer model aircraft and some weapons not yet in production.

This Budget calls for the largest expenditures in any year since World War II. It will involve a heavy burden for our taxpayers, because the job of building the strength we need to safeguard the security of this Nation is enormously expensive.

Despite its size, this is not a Budget for all-out mobilization. It is a Budget carefully planned to carry us a long way forward on the road to security—at a pace which is not only within our present economic capacity, but which will enable us to grow stronger in the years to come.

If new international tensions do not develop, and if no further aggressions are attempted, I hope we will be able to reduce Budget expenditures after the fiscal year 1954. By then we should have completed most of our currently planned military expansion.

BUDGET EXPENDITURES

More than three-fourths of the total expenditures included in this Budget are for major national security programs—military services, international security and foreign relations, the development of atomic energy, the promotion of defense production and economic stabilization, civil defense, and merchant marine activities. Major national security programs not only dominate this Budget but also account for practically all of the increase in total Budget expenditures since the attack on Korea. As the table on the following page indicates, expenditures for all other Government programs have declined 9 percent since the fiscal year 1950. This decline has occurred during the period when the costs of goods and services which the Government buys have been rising.

For the fiscal year 1953, expenditures for all other Government programs will be nearly a billion dollars below the level of the present fiscal year. Within this net decrease, some programs have been reduced, others have been held to current levels, and still others have been expanded.

BUDGET EXPENDITURES
[Fiscal years. Amounts in billions]

	1950 actual	1951 actual	1952 estimated	1953 estimated	Percent increase or de- crease (-) 1953 over 1950
Expenditures for major national security programs..	\$17.8	\$26.4	\$49.7	\$65.1	266
Expenditures for all other Government programs.....	22.3	18.2	21.2	20.3	-9
Total Budget expenditures.....	40.1	44.6	70.9	85.4	113

I have sharply reduced expenditures for those programs which can be deferred or eliminated, even though these programs bring clear benefits to the Nation and would be highly desirable in normal times. For example, many long-range programs for the development of our natural resources are being deferred in order to place greater emphasis on meeting current defense requirements. This Budget contains funds for only half as many general flood-control projects as my Budget of 2 years ago. New starts on flood control, reclamation, and river and harbor works have been limited to urgently needed power projects, flood-control projects in the Kansas-Missouri area, and emergency rehabilitation work which cannot be deferred. The Federal-aid highway program will remain below the authorized level of 500 million dollars, and major emphasis is being placed on improving the network of roads most essential to defense and civilian traffic. Expenditures for rural electrification and rural telephones have been reduced. All major programs for housing and community development outside critical defense housing areas will be held substantially below the levels authorized by basic legislation.

Many other programs, which are necessary for preserving the basic strength of this Nation, have been maintained at approximately their present levels. Finally, a number of programs contributing directly to the defense effort have been expanded—such as defense housing, aid for schools in defense areas, projects for expansion of electric power generation, and the port security program of the Coast Guard.

A Budget of the scope and size that I am recommending makes it imperative that each department and agency of the Government

enforce every possible economy in spending the money for which it is responsible. The Department of Defense, in particular, must continue to place the greatest emphasis upon efficiency in the administration of the military programs. In the past year, many improvements have been made in the management of the Government's affairs. Some of these improvements are outlined in the final section of this Message.

NEW OBLIGATIONAL AUTHORITY

To provide for further progress toward reaching our national objectives, I am recommending in this Budget a total of 84.3 billion dollars in new obligational authority for the fiscal year 1953. This is 9.2 billion dollars less than the amount of new obligational authority available for the current fiscal year.

This Budget also includes 3.2 billion dollars of appropriations to liquidate prior year contract authorizations.

The obligational authority either already enacted or recommended in this Budget will have an important effect on expenditures in future fiscal years. Under the expanding security program, there is an extended time lag between the enactment of obligational authority and actual expenditures. Many months elapse between the time the Congress authorizes expenditures for ships, planes, tanks, and other items of military equipment and the time when these items are produced, delivered, and completely paid for. Under these circumstances, the new funds authorized in one fiscal year may not be entirely spent until several years later. For example, of the new obligational authority recommended for 1953, nearly half will be spent in later years. By the end of the fiscal year 1953, virtually all of this authority will have been obligated, in the form of contracts for necessary goods and services for which delivery and payment cannot be made until the fiscal year 1954 or later.

According to present indications, total Budget expenditures will continue to be high in the fiscal year 1954, even though new obligational authority may decline further.

BUDGET RECEIPTS

The following table shows the source of estimated Budget receipts for the fiscal year 1953, based on existing tax legislation, compared to revised estimates of receipts for the current fiscal year and actual receipts for the fiscal year 1951.

NOTE.—Estimated receipts for 1953 exclude new tax proposals.

FINANCING THE SECURITY EFFORT

When we embarked on the defense program to keep our country strong; I stated that sound financial policy required us to pay for the increased defense costs by current taxation, and that we should avoid adding substantially to the public debt. This policy is important to the preservation of the financial strength of our Government, to the success of the stabilization program, and to the sharing of defense costs fairly.

To carry out this policy, I proposed to the Congress two separate tax measures during the latter half of 1950 and another early in 1951. The Congress responded promptly to my earlier recommendations but enacted only part of the proposals I made last year.

I recommended last year that the Congress provide at least 10 billion dollars of additional revenue and laid stress on the importance of improving the equity of the tax system. The legislation enacted by the Congress late last year will contribute little more than half of the amount I recommended.

Since then, the needs of adequate defense have become clearer. For the fiscal year 1952, total Budget expenditures are estimated at

about 71 billion dollars, and they are expected to rise nearly 15 billion dollars in the fiscal year 1953.

While revenues under present tax laws are expected to rise, they will still fall short of meeting expenditures by a substantial amount in 1952 and an even larger amount in 1953.

A pay-as-we-go tax policy is difficult to regain once we fall behind.

We cannot now undertake, on a strict pay-as-we-go basis, the dual job of making up for the inadequate revenue legislation last year and meeting the increases in expenditures immediately ahead. However, there is still time to insure more nearly adequate financing for the defense program as a whole. In my judgment this calls, at the very least, for the amount of additional revenue by which last year's legislation fell short of my recommendations.

The need for improving the equity of the tax system gives me as much concern as the need for revenue. The tax laws should not be used as a means of granting special favors or hiding special subsidies. Glaring injustices in our tax laws should be eliminated before those with modest means are asked to shoulder additional burdens.

The Congress has made some progress in this direction, but unhappily it has also added new loopholes, as I stated at the time I signed the Revenue Act of 1951. When the Congress practices favoritism in writing tax laws, it encourages self-seekers to try to gain favored treatment.

The attainment of the revenue objectives I have outlined would not fully resolve our revenue problem this year or next. The Congress should be clear about the risks involved in this course. But economic growth will continue to increase the productivity of the tax system in future years. Moreover, I hope that world conditions and the build-up of our defensive strength will permit a reduction in Federal expenditures after the fiscal year 1954. Thus, the problem of financing defense should be eased once the build-up of our defensive strength has been attained.

How we meet the situation in the meantime will depend greatly on the reaction of producers and consumers in the face of unavoidable shortages and the rise in incomes stemming from Government expenditures. One of the key factors will be the adequacy of savings to restrain demand and to meet the investment requirements of business.

We cannot, however, be complacent. It is cause for grave concern that, partly as a result of inadequate revenue legislation last year, we are now confronted with the impracticability of financing Government expenditures currently out of taxes for the next year or two.

Prudence demands that we return to a pay-as-we-go policy as quickly as practicable. In the meanwhile, we must be continually

alert to threats to economic stability and be prepared to deal with the situation as it develops.

MISCELLANEOUS RECEIPTS

The Bureau of the Budget, in cooperation with the other Federal departments and agencies, has undertaken a comprehensive study of the fees charged by Government agencies for services to private individuals and groups. The objective of this study is to place these services on a self-supporting basis wherever practicable, in accordance with the policy I first stated in my 1948 Budget Message and with the provisions of title V of Public Law 137, enacted in the first session of this Congress. Some of these results are reflected in this Budget, in the form of an additional 37 million dollars in reimbursements to appropriations and miscellaneous receipts. Some of the more significant adjustments in fee schedules, however, cannot be made without legislative authority. The legislative proposals to effect these adjustments will be submitted to the Congress as they are prepared.

BORROWING AND THE PUBLIC DEBT

On the basis of present tax rates, it is estimated that the public debt will increase from 255 billion dollars at the beginning of the current fiscal year to 260 billion dollars by June 30, 1952, and 275 billion dollars by June 30, 1953—the present statutory limit.

The prospective debt increase makes it essential that the Government continue to follow policies in the new financing and the refunding of maturing issues which reinforce the economic stabilization program. The American people can help the stabilization program by continuing to purchase savings bonds and by taking other steps to increase new savings. The millions of people who own savings bonds maturing in the near future can also help to combat inflation by keeping their bonds and allowing them to continue accumulating interest, rather than cashing them at this time. Legislation enacted last year permits the holders of these bonds to earn interest on them for another 10 years without the necessity of exchanging them for new bonds.

EXPENDITURES AND AUTHORIZATIONS BY MAJOR FUNCTION

The following table shows estimated expenditures and recommended new obligational authority for the fiscal year 1953, classified by major function. It also compares, by major function, estimated expenditures in the fiscal year 1953 with revised estimates for the current fiscal year and with actual expenditures in 1951.

MILITARY SERVICES

The cost of expanding and strengthening our armed forces continues to be the largest item in the Budget.

During the past 18 months our fighting men and their allies have repulsed two waves of aggression in Korea. At home we have not only supported our forces in Korea but also have made substantial progress in building military strength for use in the event of an all-out emergency. We now have almost 3½ million men and women in our armed forces, more than twice as many as we had when Korea was attacked. Our monthly production of guns, tanks, planes, ships, and other military hard goods has increased fivefold since Korea and will continue to increase in the months ahead.

This Budget provides not only for maintaining our present military strength, but also for building toward somewhat higher goals than we had planned a year ago. These new goals contemplate an Air Force of 143 wings, an Army of 21 divisions, a Navy with 408 major combatant vessels in the active fleet and 16 large carrier air groups, a Marine Corps of three divisions and essential supporting elements for all these services.

Expenditures for military services are estimated at 51.2 billion dollars in the fiscal year 1953 as compared to 39.8 billion dollars in 1952, 20.5 billion dollars in 1951, and 12.3 billion dollars in 1950. The increase is due largely to the fact that the rate of military production

has risen sharply from the levels of 18 months ago and will continue to rise through the fiscal year 1953. It also reflects the costs of modern weapons, which are much higher than in World War II.

I am recommending 52.4 billion dollars in new obligational authority for military services in the fiscal year 1953 as compared to 61.7 billion dollars in 1952. This reduction is possible because a substantial portion of the obligational authority required to finance our military expansion has already been provided by the Congress.

¹ Includes proposed legislation and supplementals of \$1.5 billion.

² Includes proposed legislation of \$3.5 billion.

Military personnel.—This Budget provides for an increase in total active armed strength from 3.6 million men at the end of the current fiscal year to 3.7 million men during the fiscal year 1953 and for an increase in expenditures for military personnel from 10.1 billion dollars in 1952 to 11.0 billion dollars in 1953. These expenditures include provision for pay, clothing, subsistence, and transportation of our men and women in uniform.

It is likely that we shall have to maintain relatively large military forces for a long time to come. This fact raises three problems with respect to the welfare of military personnel that will require legislative action. The first is legislation proposed by the Administration to make increases in military pay and allowances comparable to the

increases granted civilian employees of the Government last year. The military budget includes, under proposed legislation, an amount estimated to be sufficient to cover the cost of such an increase.

Second, present laws do not in many cases provide adequate benefits for the families of servicemen who die, either while serving their country or after retirement. In recognition of this need, the Congress is now considering survivors benefit legislation which would authorize a self-sustaining system based on contributions from the servicemen themselves. This legislation, however, does not provide protection if service in the armed forces is terminated before retirement. I believe that protection should be continuous and that the most equitable way to achieve this protection is to extend the coverage of the old-age and survivors insurance system to all members of the armed forces. Such coverage would provide the same basic protection for our service men and women that is now enjoyed by most other Americans. A military survivors benefit system should be designed to provide supplementary benefits scaled to the earnings in excess of those covered by the old-age and survivors insurance system. These new military benefits would supplement the payments under the old-age and survivors insurance and veterans' laws in these higher pay ranges.

Third, I am concerned about the very large future obligations which are being accumulated under the present military retirement system. At the present time, these future obligations are not funded and annual appropriations cover only the military retirement costs for that year. I believe that the Congress should examine all the Federal retirement laws and the experience which we have gained under them with a view to determining whether future obligations for military retirement should be met by a contributory system in which career military personnel and the Government share in the establishment and maintenance of a retirement fund adequate to meet the rapidly increasing costs of military retirement benefits.

Major procurement and production.—Funds for major procurement are used to provide our expanding armed forces with modern tanks, ships, aircraft, vehicles, ammunition, guided missiles, electronic equipment, and other hard goods ranging from the largest bomber to the smallest pistol cartridge.

More than half of the expenditures for major procurement in the fiscal year 1953 will be for aircraft. These very large costs reflect the fact that the airplanes which we are building are much heavier and very much more complex in design and equipment than those of even

a few years ago. In some of the new models, for example, the cost of the electronic equipment alone represents more than the entire cost of World War II planes designed for the same type of mission.

Most types of military equipment require many months to manufacture. Thus, much of the expenditures for major procurement in the fiscal year 1953 will be from funds appropriated in earlier years. On the other hand, a large portion of the new obligational authority which I am recommending for the fiscal year 1953 will be used to place contracts for military equipment that will be delivered and paid for in subsequent fiscal years. I am recommending new authority of 21.7 billion dollars for major procurement in 1953, as compared to 29.4 billion dollars enacted for the current fiscal year.

In addition to supplying our active forces with the weapons and equipment required to carry out their missions, this Budget will provide some reserves of equipment which would help supply the armed forces in the event of an all-out emergency. However, in a long-term mobilization effort such as that on which we have embarked, our policy is to rely primarily on a continuing flow of production and the ability to achieve rapid expansion of production if necessary rather than on the accumulation of large inventories of military equipment.

This policy means that we will try to avoid production peaks and troughs which would unnecessarily disrupt the economy. We will also strive for the type of balance between military and civilian production which will permit us to maintain both a strong economy and a strong military posture. At the same time, we will be producing weapons of the most advanced design and will keep fresh the know-how of military production. Our production effort therefore must be judged by how well it achieves these results as well as by the speed with which the goods are delivered.

Acquisition and construction of real property.—The rapid expansion and modernization of our armed forces necessitates considerable new military construction as well as major repair and modernization of existing facilities. Obligational authority for much of this work has already been enacted by the Congress, but, as is true with procurement funds, expenditures take place many months after the letting of contracts. Expenditures in 1953 are estimated at 3.5 billion dollars as compared to 2.7 billion dollars in the current fiscal year. These expenditures take account of the recommendations for certain additional military construction which I shall submit to the Congress in the near future.

Operation and maintenance.—The operation and maintenance of our military equipment and our military establishments require the services of many people and the purchase of many things. These funds are used to purchase fuels, lubricants, spare parts, and other supplies. They are also used to pay for storage, repairs, maintenance, and handling of armor, armament, and ammunition; to operate and maintain supply depots, service-wide transportation and communication facilities, and medical establishments of the Army, Navy, and Air Force. As we continue to expand our military strength, these tasks grow in both magnitude and complexity.

A considerable portion of these funds is for the pay of civilian employees engaged in operation and maintenance. Total civilian employment in the Department of Defense for military functions will reach approximately 1.3 million in the current fiscal year. In fiscal year 1953, it is expected to be slightly higher and will represent about half of all Federal civilian employment. Approximately 60 percent of the Department's civilian employees are engaged in industrial activities at arsenals, ship yards, ordnance depots, repair shops, and similar military installations.

Civilian components.—The civilian components of the armed forces consist of the National Guard; the Air National Guard; the Organized Reserve units; and reserve officers' training units of the Army, Navy, Air Force, and Marine Corps. A vital part of our long-range policy of increasing the potential military strength of this Nation consists of increasing the size and improving the preparedness of these units.

Since Korea it has been necessary to draw upon our Reserves for active duty. The number of men in the Organized Reserves and the National Guard units declined from 837,000 in June 1950 to 525,000 in October 1951. This Budget provides for an increase to a strength of 932,000 men in the civilian components by the end of the fiscal year 1953.

Three legislative proposals which would strengthen our civilian components are now before the Congress. The universal military training bill would provide for 6 months of military training for every able-bodied young man. The Armed Forces Reserve bill establishes three classes of Reservists—the ready, stand-by, and retired Reserves—and prescribes a more equitable and uniform policy applicable to Reserve personnel of all services. The Reserve Officers' Training Corps bill provides for a reorganization and strengthening of the college officer procurement programs of the services.

It is contemplated that, if the statutory basis is provided, the universal military training program will be put into effect on a limited basis as early in the fiscal year 1953 as possible. It will be gradually expanded until all qualified young men enter the program. With the increase in the size and strength of our Reserve forces brought about through universal military training, we can ultimately work toward a progressive decrease in the size of our Regular standing forces.

These three bills, if enacted without delay, would progressively increase the size and improve the quality of our civilian components and provide us with Reserve strength that can be rapidly mobilized in event of emergency.

Research and development.—In building our military strength we are providing our forces with the best and most advanced weapons possible. In present-day warfare, and to an even greater extent in the future, technical superiority in weapons can mean the difference between victory and defeat. A strong research and development program is essential to insure that our productive and material resources go into weapons and equipment that are superior in quality and performance to those of any aggressor and that we will be able to maintain this superiority in the years to come.

As a result of research and development work done in the past few years, our forces are now being equipped with new types of weapons and equipment far superior to those of World War II. More new and improved weapons are now going into production, and we are perfecting the development of still others which will add to our military strength in the years immediately ahead.

Expenditures of the Department of Defense for research and development are estimated at 1.4 billion dollars in 1953, an increase of 400 million dollars over 1952.

Stockpiling.—For the fiscal years 1947 through 1952 the Congress provided obligational authority totaling 5.0 billion dollars for the stockpiling of strategic and critical materials. In the four years preceding Korea, exclusive of transfers of materials acquired under other authority, 783 million dollars was spent for materials. Since Korea there has been a rapid acceleration of the rate of stockpiling. Materials contracts valued at 2.3 billion dollars were placed in the 16 months ended October 31, 1951. Deliveries in this same period amounted to 886 million dollars.

Taking into account these expenditures and transfers, as well as price changes, the stockpile inventory at the end of October was valued at 3.3 billion dollars. We expect to have in our stockpile at

the end of the fiscal year 1953, strategic and critical materials worth about 5 billion dollars at September 1951 prices and will have under contract an additional 1.7 billion dollars' worth of vital materials for delivery after 1953. This reserve of rubber, copper, tin, manganese, chromite, tungsten, cordage fibers, and more than 60 other materials will be an important source of strength in the years to come.

I am recommending 155 million dollars in new obligational authority for stockpiling in the fiscal year 1953. This is about 435 million dollars less than the Congress enacted for the current fiscal year. Two developments account in large measure for the decrease. First, additional expansion of supply will be financed from Defense Production Act borrowing authority, thereby reducing the need to place long-term contracts under stockpile authority. Second, the quantity of materials available for stockpiling in 1952, although large, will be less than originally anticipated because of the increase in consumption of materials for military purposes and expansion of productive capacity. Therefore, a portion of the funds provided in earlier years will be available to acquire materials in 1953.

Expenditures for stockpiling in fiscal year 1953 are estimated at 1.1 billion dollars as compared to 800 million dollars in 1952. This increase reflects the fact that, because of actions taken in earlier years to expand supplies, more material will be available for stockpiling in 1953.

Other activities supporting military services.—Included in this part of the Budget are the net receipts of the Reconstruction Finance Corporation for production and sale of tin, synthetic rubber, and abacá fibers and for the liquidation of certain assets and liabilities remaining from its World War II programs. Other activities supporting the military services are mainly the research programs of the National Advisory Committee for Aeronautics, the activities of the Selective Service System, and the National Security Training Commission.

INTERNATIONAL SECURITY AND FOREIGN RELATIONS

The vast rearmament program upon which this Nation has entered has a single objective—the building of defensive forces and a mobilization base which will serve as a deterrent to communist aggression and which can, if the deterrent fails, give us and our allies the strength to defeat the aggression.

For that purpose, strength within the United States is not enough. The areas most vulnerable to aggression are not in the Western Hemisphere. They are in Europe, in the Middle East, and in Asia. To deter aggression and provide for our own security require not

only building up our own strength but also building strength in these areas.

The foreign policy and international programs of the United States, as well as our own military program, recognize that fact. That is why American forces are now serving with our allies in Korea and Europe. That is why the Congress last year authorized the mutual security program of military and economic assistance to nations which have common security interests with us and a determination to preserve their freedom.

The bulk of expenditures for international security in this Budget are for military and economic assistance. Other major expenditures are for the campaign of overseas information and education, for participation in the United Nations and other international organizations, and for the regular activities that make up the conduct of foreign affairs.

Military and economic assistance.—I will soon submit to the Congress specific recommendations for the mutual security program totaling about 7.9 billion dollars. Expenditures for military, economic, and technical assistance in the fiscal year 1953 are estimated at 10.5 billion dollars, as compared with 6.9 billion dollars in the present fiscal year. The bulk of the assistance will go directly toward helping to build adequate military defenses. The program will also include substantial sums for technical assistance and development work, under the Point Four concept, to help the people of economically underdeveloped areas move forward in solving their most pressing problems. The solving of these problems is of vital importance in meeting the threat of subversion, which in many areas of the free world is graver than the threat of military attack.

The increase in mutual security program expenditures will be due to a sharp acceleration in deliveries of military equipment to our allies overseas. Expenditures for these deliveries and for certain other forms of military assistance, such as training, are estimated at 4.0 billion dollars in the current fiscal year and 8.0 billion dollars in the fiscal year 1953. During the past 18 months these deliveries have been smaller than originally planned, partly because of the demands of the Korean conflict, and partly because of the time required for the production of complex long-lead-time equipment. Our production of weapons is now increasing at a rate which will make possible deliveries in the magnitudes required for the scheduled build-up of free world forces. Accordingly, I have directed that a policy of allocating military equipment be established which will assure that United States forces in Europe and NATO forces, as well as other forces of certain foreign countries which in the case of war are most likely to be first attacked, are adequately equipped.

Our mutual security program is a vital and indispensable element in building security for the free world as a whole and for this country. Under this program, friendly nations overseas will be able to obtain the crucial margin of resources—military or economic—which they need in order to develop rapidly their own potentials of strength against aggression and subversion. The strength they can build will be joined with the strength we are building in the total fight for security and peace.

We cannot, as two world wars have proved, isolate ourselves from threats to other free men. This Nation cannot stand by and see free peoples overrun. In the end, that could only mean isolation of this country in a world organized against it by Soviet masters.

Military and economic assistance to Europe.—Through the efforts of the Europeans themselves, combined with the additional resources we are making available through our military and economic assistance programs, real progress is being made in Europe toward the urgent objective of achieving adequate defense forces.

As of 18 months ago, the North Atlantic Treaty countries in Europe had virtually no combat-ready defensive units in all of Continental Western Europe, except for certain naval forces and the ground divisions and air squadrons on occupation duty in Germany. Since then, the active strength of their forces has been substantially increased; in terms of men on active duty, their effective ground strength now exceeds that of our own Army. Air cover and naval support are being provided in increasing amounts. Moreover, the units have been brought to a higher state of effectiveness through

longer periods of service and more thorough training and through substantial additions to equipment including replacement of obsolete weapons. Finally, many of the scattered units of the various countries are now, under the command of General Eisenhower, being welded into a single fighting force, and supporting systems of communications, supply, and bases are being developed. Combined defense expenditures of the nine European members of the North Atlantic Treaty Organization have been increased sharply, from the equivalent of 4.5 billion dollars in fiscal year 1950 to an amount estimated at more than 9.0 billion dollars in the current fiscal year.

Over the coming months progress in building European defenses will be even more rapid, under plans recently developed by the North Atlantic Treaty Organization's Temporary Council Committee, under United States chairmanship. This Committee has reviewed the present status of European defenses and the further requirements estimated by the military leaders of the member nations and by General Eisenhower's international headquarters. It has developed a realistic plan of action for a rapid build-up of effective defense forces backed by well-trained and quickly mobilizable reserves. This plan of action is designed to see that nonessentials and duplications are stripped out and that the highest priority jobs are done first. In spite of these reductions, it will still be necessary for many of the member countries to make substantially larger efforts than previously planned, and we, in addition to our contribution of forces, will have to provide expedited deliveries of military equipment and economic assistance.

On the basis of this new plan of action two important conclusions emerge. First, it is now clear that within 12 more months Western Europe can have a compact force which would offer strong resistance in the event of an attack. Secondly, under the new plan it is now clear that within a few years it will be possible to attain a level of Western European defenses which would make invasion there so costly, and so unlikely of success, that the danger of its being attempted would become remote.

Our mutual security aid is an essential component required to achieve the new defense plan on schedule. We will provide planes, tanks, guns, production equipment, raw materials, and other supplies which are needed to carry out the plan but which the Europeans cannot obtain from their own resources.

The largest part of this aid will be in the form of military equipment. The equipment we provide will have the direct effect of bringing to combat readiness additional air wings, ground divisions,

and naval units defending Western Europe against aggression. To an increasing extent, the equipment we provide will be procured in Europe. This will somewhat lighten the production burden on this country, and by stimulating European military production will help to bring nearer the day when Europe will be able to maintain her forces without further assistance from us.

To enable the European countries to expand their defense programs on schedule, other aid in the form of commodities—economic aid—will be needed. The economy of Europe is undergoing a serious strain, in part because of its own expanding defense programs and in part because of world price movements associated with the defense build-up of the free world as a whole. Two of the key countries, Britain and France, have been unable in recent months to pay for essential imports except by dipping deeply into their limited dollar reserves. As the European defense programs expand, and industry and manpower are directed toward defense rather than producing for export, European dollar deficits will continue to be serious although not nearly so large as those which had to be dealt with in the immediate postwar years.

To meet these problems it will be necessary for the European countries to take additional measures to facilitate allocation of resources to defense and to prevent internal inflation. But despite such measures, the Europeans will require our aid in meeting the problem of dollar deficits without interruption of the defense build-up.

The mutual security program will also include assistance to certain European countries not included in the North Atlantic Treaty. This Budget includes funds for military and economic assistance to help maintain the independence of Yugoslavia, which stands as an example to Soviet satellites that independence can be achieved. Greece and Turkey, key barriers to Soviet expansion into the eastern Mediterranean, are maintaining large forces which are expected to be integrated soon into the North Atlantic Treaty defense system. Through military and economic assistance we will continue to assist them in carrying this heavy burden. Negotiations are also in process leading toward German participation in European defense.

Assistance to other areas of the free world.—The vulnerability to internal and external aggression of many parts of the non-European free world, especially the Middle East and Asia, requires that we make the strongest efforts to help these areas gain in strength and stability.

Our mutual security program for these areas, as compared with Europe, will place proportionately more emphasis on economic aid

and technical assistance than on supplying military equipment. So long as conditions exist to feed the fires of communist agitation—conditions of poverty, disease, illiteracy, and economic stagnation—there will be the continuous danger of subversion and internal collapse. These problems are deep rooted and stubborn, but they can be solved. Under the Act for International Development and other legislation, this country adopted a long-range policy of working directly with the underdeveloped countries to help them solve these problems and lay a firm foundation upon which they can build with their own resources. This policy has helped them to achieve progress within their own economies, and to increase their contribution of vital raw materials to the rest of the free world. In each instance our assistance is predicated on the maximum possible effort by the recipient country to solve its own problems.

In the Middle East, events during the past year have emphasized the urgency of achieving stability and more adequate defenses. Much can be accomplished by programs of technical assistance to deal with basic problems of low productivity which underlie much of the region's difficulties. This Budget provides funds for our contribution for the second year of the 3-year program for reintegration of Arab refugees, and other funds for assistance to the Arab states, Iran, and Israel.

In Asia, the mutual security program for the fiscal year 1953 will provide for a continued flow of military equipment, to assist the troops of France and of the Associated States of Vietnam, Laos, and Cambodia, in their gallant fight against the communist insurgents in Indochina. We are providing, and will continue to provide under this Budget, military equipment and other supplies to the Chinese forces defending Formosa. Philippine troops, with weapons supplied under the mutual security program, are making good progress in suppressing the communists who have been a dangerous threat to the economic and political development of the republic.

The needs of Asian countries for economic aid vary substantially from country to country. Some countries are rich in resources; here the great need is for technical assistance to help them more quickly master the complex problems of developing and organizing their resources for the welfare of their people. In Indonesia, for example, technical assistance will be provided to help this young republic develop its resources and establish essential administrative, health, and educational facilities, so as to increase the stability of its democratic government. To other countries in Asia we are supplying technical assistance and also developmental aid to supplement their own development programs. In India, for example, the government has undertaken a large-scale program of agricultural expansion, in order

to meet the increasing pressure of population in relation to food production. In spite of mobilizing every resource it can, India will require some aid from us to help solve her agricultural problem.

In Latin America it is essential that we continue our part of the jointly financed programs of technical assistance, which are making an important contribution toward solving problems of health, education, and agricultural productivity. The Latin-American economy continues to attract a large flow of private American capital. Key development projects, including those for strategic materials, will continue to be financed primarily on a loan basis, especially by the Export-Import Bank under its recently increased loan authority. This Budget also contains limited funds for military assistance to Latin America.

We are also contributing to United Nations technical assistance programs. In addition, the broad purposes of the Point Four concept are being furthered by private investment, by loans from our Export-Import Bank, many of them for strategic materials development, and by loans from the International Bank for Reconstruction and Development. In preparing the mutual security program for underdeveloped countries, careful consideration has been given to all loan possibilities.

Overseas information.—Expenditures for our overseas information and educational exchange program, basic to our Campaign of Truth, are estimated at 157 million dollars in the fiscal year 1953. The increase of 47 million dollars over the current fiscal year will be needed for expanded radio facilities, including ship-borne transmitters, capable of reaching more and more people behind the Iron Curtain, and overpowering Soviet "jamming" attempts; for transfer of the Army's information program in Japan to the State Department; and for a general intensification of our efforts in the most critical areas of the world.

This vital program is coordinated with other parts of our total security effort. Soviet propaganda and agitation use every possible device, direct and concealed, to pervert the hopes and play upon the fears of free peoples. Internal subversion, buttressed by propaganda techniques rather than the commitment of Soviet armies, has played the leading part since World War II in the expansion of the Soviet Empire. Against these menacing instruments of the cold war, the Campaign of Truth has been making substantial gains. The overseas information program, speaking through every possible medium—radio, press, motion pictures, information centers, exchange of persons—is exposing the true nature of the communist menace and explaining to the rest of the world the truth about our objectives.

Other foreign affairs.—In addition to the funds for overseas information and education, this Budget includes expenditures of 162 million dollars for the conduct of other foreign affairs. We and our allies must make sure, through the United Nations and other channels, that war does not come about from a misunderstanding of our true motives or from a failure to understand our determination to resist tyranny.

FINANCE, COMMERCE, AND INDUSTRY

The authority granted under the Defense Production Act has been indispensable in broadening the economic base for our security effort and in increasing defense output. With this authority, we are giving

¹ Less than one-half million dollars.

extensive financial aid to defense industries through Government loans, guarantees of private loans, and contracts to purchase raw materials and equipment. Through allocations, scarce materials are

channeled to essential users. Controls over prices, wages, and rents, as well as selective credit controls, are necessary for economic stabilization. Unfortunately the act is not strong enough to insure that we can hold the line on prices. I therefore urge that the act be improved as well as extended beyond the present expiration date of June 30, 1952.

Net expenditures for finance, commerce, and industry during the fiscal year 1953 are estimated at 833 million dollars, compared to 751 million dollars in 1952 and 176 million dollars in 1951. The sharp increase since 1951 has been due entirely to the expansion of programs promoting defense production and economic stabilization. The proposed extension of the Defense Production Act accounts for all except 40 million dollars of the new obligational authority of 1,171 million dollars recommended for 1953.

Expansion of production.—The expansion of defense production is primarily the job of private enterprise. The Government's responsibility is to guide and assist the expansion wherever necessary.

Under the general supervision of the Director of Defense Mobilization and the Defense Production Administrator, Federal agencies with defense responsibilities are using the authority of the Defense Production Act and related legislation to give broad financial aid to defense industries. Nine Government agencies engaged in defense procurement have guaranteed about 1.5 billion dollars in loans by private banks to meet working capital requirements of defense contractors and subcontractors.

Substantial progress also has been made in expanding defense production by loans, commitments to purchase, and purchases of equipment and materials under the borrowing authority of 2.1 billion dollars granted in the Defense Production Act. The Defense Materials Procurement Agency has already been authorized to make 600 million dollars in purchases and purchase commitments for rubber, magnesium, copper, aluminum, manganese, and other critical materials, and 260 million dollars in advances and purchases to finance the expanded production of urgently needed machine tools. Under the same authority the Department of Agriculture is financing expansions in supply of a few key agricultural products, and the Department of the Interior is making advances for exploration and development of domestic mineral resources.

The Reconstruction Finance Corporation has been authorized to use 275 million dollars from the same borrowing authority for loans, mainly to expand facilities for production of machine tools, copper, aluminum, and steel. These loans are in addition to the substantial

volume of loans for defense purposes made by the Corporation under its regular authority. Similar loans in foreign areas will be made by the Export-Import Bank.

Using these and other means, we are making great strides toward achieving increased economic strength. By the end of the fiscal year 1953, we will have steel ingot capacity of about 119 million tons compared to 109 million tons at present and 100 million tons 18 months ago. Programs already underway will enable us to nearly double 1950 primary aluminum production by the end of 1953, and further increases in capacity are being planned. Production of machine tools is making good progress. Magnesium production will soon be more than seven times the pre-Korean level. Increases in supplies of other critical raw materials such as manganese, tungsten, and molybdenum are also assured over the next few years. At the same time, we are helping friendly nations to expand their productive capacity. These efforts will continue until our total supplies are adequate to meet both military and civilian requirements.

The immediate effect on the Budget and the ultimate net cost to the Government of all these programs will be small compared to the size of the transactions and their contribution to the security effort. Most of the loan guarantees will not require any net expenditures, since premiums paid are expected to cover all expenses and losses.

According to present plans, the existing borrowing authority in the Defense Production Act will be fully obligated by the end of the fiscal year 1952. I therefore expect to recommend that the borrowing authority be increased by 900 million dollars to permit the financial assistance necessary primarily for long-range development of new sources of strategic raw materials. This will involve additional net expenditures of 285 million dollars in the fiscal year 1953.

Allocation of resources.—Defense production is absorbing a steadily increasing share of the Nation's resources. For some time, defense needs and normal civilian demand for some materials and products have been greater than the supply. Under the general supervision of the Defense Production Administration, the National Production Authority in the Department of Commerce has established allocations and other controls over the use of these items in order to increase our defense production quickly and efficiently. The Controlled Materials Plan has been a valuable aid in shifting steel, aluminum, and copper to the uses which best promote the security effort. The needs of defense and other essential users are assured preference through a priorities system. The burden on small business has been minimized through exemptions for small orders, self-certification procedures, and

speedier processing. Exports also are being channeled by the Department of Commerce to meet the most essential requirements of friendly nations.

These controls are necessary to make sure that defense programs and essential civilian activities will receive necessary equipment and materials and that other users get their fair share of any remaining supply.

Small business.—The security effort has necessarily disturbed the normal peacetime patterns of business activity. The problem of adjustment has been especially serious for many small businesses. The newly established Small Defense Plants Administration, the Department of Commerce, and other agencies are helping small business make this adjustment. Major attention is being given to increasing the opportunities of small business to participate in defense production, as either prime contractors or subcontractors, and to obtain a fair allocation of materials. Where other public and private credit facilities prove inadequate, the Reconstruction Finance Corporation will make loans upon the recommendation of the Small Defense Plants Administration. The agency is also planning to help groups of small businesses organize production pools to handle larger defense contracts. Finally, where necessary to assure adequate participation by small business, the Small Defense Plants Administration will itself take prime defense contracts, subcontracting the work to small plants. Appropriations required for the revolving fund to finance these contracting and subcontracting operations account for 25 of the 28 million dollars in appropriations recommended for the agency under proposed legislation in the fiscal year 1953.

Price, wage, and rent controls.—As military production increases, inflationary pressures also increase. This is so because military production adds to private incomes while decreasing the supply of goods which consumers can buy.

Increased taxes, coupled with price, wage, rent, and credit controls, together with voluntary restraints by consumers, business, and labor, have prevented a sharp rise in prices during the past year. The increase in inflationary pressures expected during the coming fiscal year, however, will require not only higher taxes, increased restraints on credit, and voluntary saving to absorb excess purchasing power, but also more effective direct controls. If the price-control program is to be both effective and fair, the staff of the Office of Price Stabilization must be strengthened. The agency has now reached a crucial stage in the development of its price-control program, the establish-

ment of regulations specifically designed for individual commodities, industries, and geographical areas—including definite dollars-and-cents ceilings wherever possible. The administration of these regulations during the period of increasing pressure on prices requires a larger staff able to handle complaints and applications for price adjustments promptly, and to assist businessmen in complying with the regulations.

The Wage Stabilization Board and Salary Stabilization Board have established their major policy regulations. Both Boards must expand their present staffs to enforce these regulations and to handle the increasing backlog of cases. Ineffective enforcement would give violators an unfair advantage in recruiting employees, and thus hurt both the defense effort and economic stabilization.

The influx of military personnel and defense workers into key defense areas has caused a sharp increase in the demand for rental housing. To meet the danger of excessive rent increases, the Director of Defense Mobilization and the Secretary of Defense have already authorized the imposition of rent controls in about 100 areas. In each case, special aids—discussed under Housing and Community Development—are also being provided to encourage rapid expansion in the supply of rental housing. The Office of Rent Stabilization is now administering rent controls in these and other areas covering about 6.8 million rental units. It is estimated that by the end of the fiscal year 1953, tenants in 10 million rental units will be protected by Federal rent control.

In the fiscal year 1953, under the proposed extension of the Defense Production Act, the Economic Stabilization Agency will require new obligational authority of 150 million dollars for administration of price, wage, and rent controls. Total expenditures are estimated at 149 million dollars, 37 million dollars more than estimated for the fiscal year 1952. This additional amount will be required largely to keep the agency—particularly the Office of Price Stabilization—at the level of operations which it should reach by the end of this fiscal year.

Business loans and guarantees.—At the same time that we are making certain that credit is not a bottleneck in the defense effort, we are curtailing nondefense loans. The Reconstruction Finance Corporation is making only those loans which assist military or essential civilian production. New commitments—including loans recommended by the Small Defense Plants Administration—are estimated at 166 million dollars in the fiscal year 1952 and 260 million dollars in 1953, compared to 285 million dollars in 1951. Increased collections on outstanding loans are a major reason for the anticipated decline in net expenditures.

TRANSPORTATION AND COMMUNICATION

Efficient transportation and communication services are critical factors in an economy mobilizing for defense. Current economic activity has already created traffic loads which in total exceed any peacetime peak levels. Further traffic increases are in prospect as defense production continues to expand.

¹ Less than one-half million dollars.

The Federal Government is assisting the transportation and communication industries to adjust their operations to these expanding needs. In addition, the Government has temporarily undertaken new activities to meet abnormal requirements arising out of the defense emergency. Among these are the port protection activities of the Coast Guard, the direct operation of merchant vessels by the National

Shipping Authority, and the transportation controls of the Defense Transport Administration and other agencies.

Net expenditures for transportation and communication will be reduced from 2.2 billion dollars in the present fiscal year to 1.6 billion dollars in 1953, assuming enactment of the further increases in postal rates which I am recommending.

Merchant marine.—The primary objective of our merchant marine policy is to assure an active nucleus of trained maritime labor and management, which can serve as the foundation for the expansion of shipping operations in the event of full mobilization. To achieve this objective, the Government provides operating and construction subsidies for shipping services on essential trade routes. Abnormal requirements arising from the present emergency are being met through temporary new programs rather than by adding to our permanent subsidy legislation.

One such emergency program is the construction of modern cargo ships, capable of operating at high speeds for greater safety from possible submarine attack. The Maritime Administration in the Department of Commerce is now building 35 such vessels and may have to undertake additional construction in future years. Expenditures for this new program, which were less than 1 million dollars in the fiscal year 1951, will increase to an estimated 134 million dollars in 1952 and 144 million dollars in 1953.

The present emergency has also made it necessary for the Government to undertake direct operation of merchant vessels in order to supplement privately owned shipping capacity. The National Shipping Authority, within the Maritime Administration, is operating about 470 vessels reactivated from the reserve of war-built ships. This represents nearly one-fourth of our active merchant fleet. Through this program, the Government has relieved a world-wide shortage of dry cargo vessels and has helped to stabilize cargo rates at a reasonable level. The National Shipping Authority is now handling much of the abnormal traffic resulting from the Korean conflict, coal shipments to Europe, grain shipments to India, and other emergency needs. Revenues derived from these operations are expected to exceed expenditures by 99 million dollars in 1953. These net receipts into the Authority's revolving fund will account for most of the decline in over-all maritime expenditures between 1952 and 1953.

The long-term development of a healthy, privately owned merchant marine is dependent upon the sound administration of the direct subsidy programs authorized by the Merchant Marine Act of 1936. The Federal Maritime Board now has under review the subsidy determinations for postwar years and is developing improved procedures for

determining such subsidy rates in the future. As these determinations are brought up to date, operating subsidy expenditures will reflect substantial retroactive payments for past years, as well as a more complete coverage of current obligations. Expenditures for this program are estimated at 60 million dollars for the fiscal year 1952 and 75 million dollars for 1953.

In addition to the direct subsidies for vessel operation and construction, the Merchant Marine Act provides the shipping industry with substantial indirect aid in the form of special tax concessions. While I strongly favor all assistance necessary to maintain an adequate merchant marine, I again recommend to the Congress the immediate reduction of present unwarranted tax benefits for the shipping industry as an initial step toward the elimination of this hidden form of subsidy.

Whenever the Congress finds that public policy requires Government assistance in any field, it should provide that assistance directly through appropriations and not indirectly through preferential tax measures. Such tax provisions generally fail to distribute the assistance where it is most needed and where it will produce the best results. Moreover, they provide concealed benefits which are exempt from the annual scrutiny the Congress normally gives appropriations. Because they are concealed, these benefits are difficult to reduce or to eliminate when the need for them no longer exists.

For more than a quarter of a century, the Government has operated the Inland Waterways Corporation, primarily to promote the development of common carrier barge service on the Mississippi and Warrior Rivers and their tributaries. In establishing the Corporation, the Congress intended that it be sold to private operators after it had demonstrated the economic feasibility of full-scale common carrier operations. That possibility has never been demonstrated with sufficient certainty to encourage any substantial offer for these properties. The equipment has deteriorated seriously and will require rehabilitation if the Government is to continue these services. I recommend that the Congress consider promptly whether to relax the statutory conditions which now limit sale of the Corporation or whether to appropriate sufficient funds to permit the line to be rehabilitated.

Navigation aids and facilities.—The Coast Guard, which has important peacetime responsibilities for promoting marine safety and enforcing our maritime laws, must also be ready to provide direct assistance to the Navy in the event of war. To increase its state of readiness for any future emergency, the Coast Guard is increasing the crew complement of its vessels and of its shore stations outside the continental limits. It is also expanding its reserve

training program. These emergency measures, together with its new program for protecting the Nation's ports against sabotage, will increase expenditures from 162 million dollars in the fiscal year 1951 to an estimated 230 million dollars in 1952 and 239 million dollars in 1953.

River and harbor improvements by the Corps of Engineers will be held to a low level in 1953, in keeping with the over-all policy of restricting public works activity during the present emergency. Only one new navigation project is being recommended, and construction of existing projects will be curtailed. River and harbor navigation expenditures will decline from an estimated 118 million dollars in the fiscal year 1952 to 100 million dollars in 1953.

On July 1, 1951, the Panama Canal Company was established to permit integrated operation of the Canal and its supplementary commercial activities on a more businesslike basis. The Company is now reviewing the level of its commercial charges. Apart from necessary capital outlays, its operations will be placed on a self-sustaining basis in the fiscal year 1953.

Aviation.—Federal promotion of civil aviation has contributed to the spectacular growth of air transportation since the end of World War II. During the past six years, aircraft capacity operated by scheduled and nonscheduled airlines has expanded tenfold. This increased capacity, together with its supporting ground facilities, represents an important mobilization reserve—as demonstrated by the present participation of civil carriers in carrying military personnel and supplies to Korea.

The Civil Aeronautics Administration in the Department of Commerce operates navigation and landing aids, enforces safety regulations, provides financial assistance for local airport construction, and conducts various other programs aimed at increased safety and efficiency of aviation operations. Many of these facilities and services are essential for military as well as civil aircraft and have been developed with full attention to the needs of both groups.

The present emergency, which has substantially increased air traffic, has correspondingly increased the normal workload for aviation programs. It has also required the inauguration of new activities such as the identification and control of air traffic for purposes of air defense. Despite these increased responsibilities, expenditures for the fiscal year 1953 will be held below the level of 1952. This results largely from the limitation of airport grants and airway modernization to those projects which are most essential in this emergency period.

In addition to basic facilities and services, the Federal Government also provides financial aid to the airlines for their commercial development. These subsidies, which are now merged with compensation for carrying mail, should be provided separately so that the Congress and the public may have a full opportunity to evaluate them. The Civil Aeronautics Board recently completed a study estimating the amount of subsidy contained in air-mail payments to domestic carriers and now has under way a similar study for international lines. Although these studies represent a significant step in the right direction, the full benefits of subsidy separation will be obtained only when the Board is able to make direct subsidy payments from funds appropriated for that specific purpose. I therefore recommend again that airline subsidies be completely separated from payments for carrying the mail. Any such separation should apply uniform standards to all carriers, international as well as domestic.

For the fiscal year 1951, the Civil Aeronautics Board has estimated that the subsidies to domestic airlines alone amounted to nearly 35 million dollars, or 56 percent of the total mail payments received by those lines. In view of the increased profitability of airline operations, the Board is taking immediate steps to reduce or eliminate subsidies wherever possible. The airline industry as a whole has now reached a stage of development where it needs less Government support than in former years, and this subsidy should be curtailed. As an important further step in the direction of financial independence, the industry should begin in the near future to bear its fair share of the cost of federally provided facilities through a system of airway user charges.

Highways.—The Nation's highways require major improvement if they are to handle adequately the steadily increasing levels of motor vehicle traffic. Under the Federal-aid highway program, the Bureau of Public Roads in the Department of Commerce provides grants-in-aid to assist State and local governments in the financing of needed highway construction. Partly as a result of the steel shortage, this program will remain below the authorized annual level of 500 million dollars, with expenditures estimated at 412 million dollars in the fiscal year 1952 and 400 million dollars in 1953. Within this program, special emphasis is being placed on the Interstate Highway System—a limited network of roads most essential to both civilian and defense highway traffic.

Federal-aid highway authorizations under existing legislation have been fully apportioned to the States, and this legislation should be extended in the present session of the Congress for an additional two-

year period. Although a need clearly exists for a high level of road improvement, State and local governments must continue to assume the primary responsibility for financing such construction. Under present circumstances, the Federal Government should concentrate its highway aid on those projects of national interest which are most urgently needed for defense and essential civilian transportation. A new authorization of 400 million dollars annually—100 million dollars below the present authorization—should enable the Government to discharge this responsibility.

Nearly 25 million dollars will be spent in the fiscal year 1953 for direct Federal construction of main highways through the national forests. I recommend that this program be extended for an additional two years at an annual level of 17.5 million dollars, or 2.5 million dollars below the current authorization.

In addition to its continuing highway programs, the Bureau of Public Roads now has responsibility for constructing access roads to military installations, defense plants, and sources of strategic materials. The authorization for this program was recently increased to 45 million dollars, and expenditures are estimated at 8 million dollars in the fiscal year 1952 and 27 million dollars in 1953. Only roads of special defense urgency, which are not required for normal civilian traffic, will be constructed under this authorization.

Postal service.—I am seriously concerned about the excessive levels to which the postal deficit has risen in postwar years. For the fiscal years 1946 through 1952, the cumulative postal deficit will exceed 3 billion dollars. This huge loss reflects the failure of postal rates to keep pace with the substantial postwar increases in salaries, transportation charges, and other operating costs. Postal rates were raised during the first session of the present Congress, and most of the new rates will take effect by the beginning of the fiscal year 1953. However, these increases—insufficient even in relation to the costs existing at the time of their enactment—were more than offset by salary increases which were concurrently enacted. They have since been made even more inadequate by railroad rate increases recently authorized by the Interstate Commerce Commission.

The Postmaster General is continuing his program of mechanizing operations and is taking other steps to improve the efficiency of the postal service. The Department is modernizing its motor vehicle service. It has instituted an improved money-order system, revised its accounting procedures, and made other improvements in the management of its affairs. The average output of postal employees per man-hour has increased by more than 10 percent since 1945. To

further improve efficiency, I again recommend early enactment, with certain amendments, of the Post Office Department reorganization bill. This legislation would permit appointment of postmasters by the Postmaster General under the classified civil service and would otherwise strengthen the administration of the postal operation. However, the maximum potential improvements in efficiency cannot in themselves result in any major reduction of the postal deficit. The only effective means of reducing the deficit to a reasonable level is through a substantial increase in postal rates.

On the basis of postal rates now enacted, the postal deficit for the fiscal year 1953 would be nearly 670 million dollars. With the exception of first-class mail, all postal services will be operated at a loss in 1953. According to preliminary estimates of the Post Office Department, the loss on second-class mail alone will amount to roughly 250 million dollars. The newspapers and magazines which use this class of mail now benefit from rates which cover only a small fraction of cost, thus receiving a large and unjustified subsidy. Another major subsidy goes to those who distribute advertising circulars and other material through third-class mail, on which the loss in 1953 is estimated at about 150 million dollars. Parcel post and foreign mail will sustain losses estimated at approximately 125 million dollars and 75 million dollars, respectively.

In the interest of sound fiscal and postal policy, the heavy losses experienced on these various classes of mail should be immediately reduced and eventually eliminated. The postal deficit as a whole should be reduced to a level representing the cost of Government mail, other services to Federal agencies, and similar items which are properly chargeable to general tax revenues. To achieve this objective, additional revenue of about 500 million dollars annually must be raised through increased postal rates. I recommend that a major part of this increase be authorized during the present session of the Congress and that the balance be provided one year later so as to permit a reasonable transition to the new rates. Specifically, I recommend immediate rate increases adequate to yield 300 million dollars on an annual basis. Part of this increase can be effected by administrative action of the Postmaster General and will not require action by the Congress. This Budget assumes that the new rates will become effective for only part of the fiscal year 1953 and that additional revenue actually received in that year will amount to 225 million dollars. The Postmaster General will shortly present specific rate proposals designed to carry out this recommendation, and I most strongly urge prompt and favorable action by the Congress.

NATURAL RESOURCES

Natural resources are strategic assets in our effort to build the military strength necessary to discourage aggressors. But we must look beyond the short term and provide for continued expansion of our economy. This requires an adequate supply of basic resources—minerals, fuels, water, power, agricultural and forest products. Such a supply can no longer be taken for granted. If we are to continue to

¹ Less than one-half million dollars.

strengthen our Nation, we must improve our use and conservation of existing resources and increase our efforts to find and develop new ones.

My 1953 Budget recommendations represent a balanced approach to both the national emergency needs and the long-term objectives. They continue our policy of postponing many desirable long-range projects in order to place greater emphasis on meeting current defense requirements. But they provide for those long-range developments which cannot be postponed without serious harm to our economy.

Expenditures for the development of natural resources in the fiscal year 1953 are estimated at 3.2 billion dollars, compared to 3.1 billion dollars in the current fiscal year. More than half of the 1952 and 1953 expenditures, and most of the billion-dollar increase in expenditures since 1951, will be for our expanding atomic energy program. Expenditures for flood control and irrigation and for multiple-purpose river basin development, including hydroelectric energy, account for most of the remainder of the total.

Atomic energy.—Although the past year has brought considerable progress in the industrial and other peacetime applications of atomic energy—including more widespread participation by private industry—the principal emphasis of this program continues of necessity to be placed on the national security. The major program initiated in October 1950 for expanding the productive capacity of our atomic energy plants is well under way, and major production facilities now under construction will begin to contribute to output in the fiscal year 1953. This program is under constant study in order to make the adjustments necessary to continue our leadership in this field.

Funds recommended for the Atomic Energy Commission include increased amounts for the procurement of uranium ores and concentrates, the production of fissionable materials and atomic weapons, and the development of improved and more effective weapons. The several tests of atomic weapons and devices carried out during the past 12 months demonstrate the effectiveness of recent research. Increases are also provided for an expanded effort to develop improved nuclear reactors for the production of fissionable material as well as reactors for the propulsion of submarines and aircraft. The development of propulsion reactors complements other studies under way in contributing to the ultimate goal of economical production of electricity for civilian use. The Commission will also continue its vigorous programs in basic and applied research in the physical sciences and in biology and medicine.

Land and water resources.—Pre-Korea plans for development of our land and water resources have been modified to reflect the urgent needs

of the defense emergency. The few new starts recommended since the attack on Korea have been restricted to urgently needed projects, principally those providing power benefits.

Many river basin development projects for flood control, navigation, or irrigation provide hydroelectric power which is not only a valuable asset to the civilian economy but is of utmost importance to defense production. This Budget contains funds to make it possible for power features of these multiple-purpose projects to go forward according to schedule. Funds provided for other projects already under construction will bring them to completion at an orderly and economical construction rate, or to a point where they can be stopped without losing benefits already gained or impairing the value of investments already made.

Many desirable projects have been retarded or suspended since the beginning of the Korean emergency. For example, the Budget which I transmitted to you two years ago included funds for 122 general flood-control projects. After the attack on Korea, the number was reduced to 102. The 1953 Budget recommends funds for 64 general flood-control projects, 60 of which were initiated in previous years. Some of the projects for which funds were recommended two years ago have been completed, but many of them have been suspended. Seventeen of the 64 projects in this Budget will be completed or virtually completed with the funds recommended for 1953. Thus the scope of this program has been reduced substantially since the Korean emergency. This is also true of the reclamation program. As a result of these actions, combined expenditures for flood control, irrigation, and multiple-purpose projects now under construction by the Corps of Engineers and the Bureau of Reclamation will be held to about the fiscal year 1952 level, despite the fact that expenditures on some large projects with power features will increase substantially.

Only a limited number of new starts for these programs are recommended in this Budget. They are restricted to urgently needed power projects in critical shortage areas, flood-control projects in the Kansas-Missouri area, and emergency rehabilitation work which cannot be deferred.

The Kansas-Missouri area during the past summer suffered one of the worst flood disasters in the history of our country. This Budget includes 21 million dollars for starting construction on Tuttle Creek and Glen Elder Dams, both in Kansas, and for flood protection work at Topeka, Kansas, and Cape Girardeau, Missouri. Furthermore, by Executive order I have established a Missouri Basin Survey Commission to review the many different kinds of problems that exist in the large area of the basin and to advise the country as to the best

way to proceed to achieve an orderly, businesslike development of the resources of the basin resulting in the greatest benefits for all the people of the basin and the Nation.

The accelerating pace of defense production, coupled with the anticipated expansion in civilian needs, is placing a growing demand on our power-producing facilities. Of the 735 million dollars of expenditures for projects under way by the Corps of Engineers and the Bureau of Reclamation in 1953, about 390 million dollars—or over 50 percent—will be spent on multiple-purpose projects providing power benefits. In order to further expand our power potential, four new river development projects are recommended for initiation in fiscal year 1953. These are the St. Lawrence project, Hells Canyon power project and Ice Harbor Lock and Dam on the Snake River, and the Hartwell Reservoir in South Carolina.

If there has ever been a water resource project with great strategic benefits, it is the St. Lawrence development. The large hydroelectric power potential alone offers ample justification for undertaking this project without further delay. But the emerging iron ore problem makes it a strategic necessity. Beyond one end of the waterway are the large steel-producing centers and the declining high-grade iron ore deposits of the United States. Beyond the other end are the large new discoveries of high-grade ore in Canada. In view of the importance of this project, the Government of Canada has recently announced that it is prepared to proceed independently with its construction, rather than wait indefinitely for United States participation. I have already indicated my intention to support such action by Canada, if that is the only way to obtain immediate construction of this project. However, if Canada built the waterway, she would, of course, control its operation. I feel strongly that our Nation's interest in the development of this resource on the basis which I have recommended is so vital that we should join as a full partner in its construction and operation.

The Ice Harbor and Hartwell projects are authorized, but the St. Lawrence development and Hells Canyon power project require authorization by the Congress. I again urge the Congress to authorize these two projects without delay. The 37 million dollars recommended for the four projects would permit the starting of construction on these important developments.

I also recommend 63 million dollars to begin installation of 11 additional steam-electric and hydroelectric generation units in the power system of the Tennessee Valley Authority. The additions are needed not only to meet the steady growth in the power needs of the area but also for the large increase in the requirements for the atomic energy facilities in this area.

These new projects and units will provide ultimate capacity of 3.5 million kilowatts. This capacity, together with the 8.3 million kilowatts presently installed in Federal projects and the 10.3 million kilowatts to be installed ultimately in projects under way, will make a substantial addition to our power supply.

Funds recommended for the fiscal year 1953 for the Bonneville, Southwestern, and Southeastern Power Administrations, Bureau of Reclamation, and Tennessee Valley Authority will provide properly scheduled facilities to transmit available power to load centers.

I am also including funds in this Budget to continue planning the urgently needed redevelopment of Niagara power facilities made possible by the treaty with Canada. In addition, I recommend the enactment of legislation to permit construction of facilities that would enable us to realize the full power potential of the Niagara site.

In order to make it possible to meet defense power requirements in the Pacific Northwest, I also recommend legislation to authorize the construction, operation and maintenance of fuel-fired electric-generating plants. Such plants would provide an early increase in capacity and would make more effective existing hydroelectric facilities.

Because of the large increases in costs that have been experienced on some projects I have asked the Director of the Bureau of the Budget to prepare for the consideration of the Congress, appropriation language which would require further congressional approval before work could go forward where the total cost of the authorized improvement has increased by more than 10 percent above the last estimate approved by the Congress, after allowance for changes in construction cost levels. This will permit a reappraisal to be made to determine whether we would be justified in proceeding with the work.

The Water Resources Policy Commission has submitted to me a comprehensive report and recommendations on Federal responsibility for and participation in the development, utilization, and conservation of our water resources and related land-use activities. The recommendations of the Commission have been under intensive study during the past year by representatives of the Executive Office and interested agencies. The Commission's report and this study indicate the need for improved means for comprehensive planning and coordination in the development of these resources, including wider State and local participation, as well as for broadening the scope of some programs. Legislative recommendations for better development of the Nation's water resources and related land-use activities are now being prepared.

Mineral resources.—To meet our immediate defense objectives, programs in the field of mineral resources are aimed at assuring this Nation and the free world adequate supplies of metals, minerals, and fuels at reasonable prices. To this end, the Defense Materials Procurement Agency has been established with central responsibility for procurement and development operations for the current mobilization effort.

The Bureau of Mines and the Geological Survey appraise known sources and make surveys for new sources of critically needed materials—such as uranium, nickel, cobalt, tungsten, copper, and lead—and conduct research aimed at improving mining practices and methods of extracting minerals, recovery of secondary metals, and increased efficiency in the use of substitutes. Research and operation of pilot and demonstration plants for production of synthetic liquid fuels from oil shale and coal will be continued.

National forests and public lands.—Programs of the Forest Service and the Bureau of Land Management provide for the management, development, and increasing use of the valuable timber, range, and mineral resources of our national forests and public lands.

The small increases over fiscal year 1952 will permit some expansion in timber sales activities, thus adding to the supply of forest products which are needed for defense activities.

Developmental programs for the Indians.—Most of our Indian citizens live on and make their living from the 56 million acres of land held in trust for them by the United States. Much of this land is in need of further development work, but even after development the lands will support, at an adequate American standard of living, only about half of the Indian population.

The goal of Federal Indian policy is to equip the Indians to take their place as independent, self-supporting citizens of this Nation. To do this job properly will require a substantial investment of Federal funds and time enough to complete the task on an orderly basis. For the fiscal year 1953 I am recommending new obligational authority of 57 million dollars for Indian land resources. This will provide for acceleration of soil-conservation work and further development of urgently needed water supplies and timber and range resources, as well as additional roads and other construction needed to carry out the various developmental programs for the Indians.

To insure effective use of their lands, the Indians are in need of credit facilities. I recommend legislation to augment the loan fund previously authorized in an amount sufficient to meet demands for credit over the next 5 or 10 years.

AGRICULTURE AND AGRICULTURAL RESOURCES

To meet increased military and civilian requirements, farm production was expanded in the 1951 crop year and should continue to increase in 1952.

Despite floods and droughts, farmers achieved a total production in 1951 as high as that in any previous year. In 1952, with present production goals, farmers will be aiming at a new record, 6 percent above 1951 and 50 percent above the 1935-39 average. These goals represent the maximum practicable increase in the production of corn and other feed grains which are necessary for meeting the increasing demand for meat, poultry, and dairy products. Cotton production will be continued at a high level, and the goal for wheat is materially above the 1951 production when 16 million acres of winter wheat were ruined by unfavorable weather.

Recommendations for agricultural programs in this Budget recognize the desirability of expanding farm production and maintaining the capacity of the Nation's farms to produce foods and fibers in abundance.

Total expenditures for agriculture and agricultural resources are estimated at 1.5 billion dollars in the fiscal year 1953. This compares with 2.8 billion dollars in 1950, 650 million dollars in 1951, and an estimated 1.4 billion dollars in 1952. Most of the fluctuation in expenditures is in the agricultural price support program.

Stabilization of farm prices and farm income.—Programs designed largely to aid in supporting farm prices and farm income include the agricultural price support program, the permanent appropriation for removal of surplus agricultural commodities, the International Wheat Agreement, and payments to farmers under the Sugar Act. These programs are all required under basic legislation. Expenditures depend more on crop conditions and world economic conditions than on current Budget authorizations.

The price support program is being used to encourage farm production by keeping support prices on cotton, corn, wheat, soybeans, milk, wool, and certain other commodities at maximum levels of 90 percent of parity. This level of support should help to give farmers the economic incentive necessary to maintain high production. In the crop year 1952, with present production goals, we should be able to reverse the downward trend in carry-over stocks of cotton, wheat, and corn and begin to build up reserves to meet possible crop shortages in future years. If production is not reduced by poor growing conditions, some of the increased carry-over—principally cotton and wheat—will come into Commodity Credit Corporation inventories, and its acquisition will result in a net Budget expenditure in the fiscal year 1953. The Corporation had large net receipts in 1951, and expenditures are estimated to be lower in 1952 than in 1953 because of the liquidation of inventories acquired in 1949 and 1950.

The permanent appropriation for removal of surplus agricultural commodities was established in 1935 at a time when the Nation was in the midst of a depression and farmers were faced with burdensome surpluses. Under present economic conditions only a fraction of the funds available will be needed. In the fiscal year 1953 the funds available will include the carry-over of 176 million dollars from prior years plus 181 million dollars of new authorization. Expenditures under this program, however, are estimated to be 50 million dollars in 1953.

Expenditures under the International Wheat Agreement have risen to a higher level than was anticipated at the time the agreement was negotiated. Although we expected a downward trend in world wheat prices after World War II, the Korean crisis and the increased demand for wheat have caused increased prices since 1950. The Agreement,

which expires July 31, 1953, guarantees the export each year of a certain quantity of wheat at the maximum price of \$1.80 per bushel. The loss arising from the difference between this export price and the higher domestic price of wheat is met initially from Commodity Credit Corporation funds, with reimbursement later from appropriated funds. The cost of the wheat agreement has risen from 76 million dollars in the fiscal year 1950 to 180 million dollars in 1951 and is estimated to increase somewhat in 1952 and 1953.

Financing farm ownership and operation.—All credit agencies of the Department of Agriculture are maintaining a careful review of loan policies to emphasize credit needed for defense requirements and to keep them consistent with the voluntary credit restraints followed by private lenders.

Expenditures of the Farm Credit Administration are estimated to decline from 185 million dollars in the fiscal year 1951 to 51 million dollars in the current fiscal year and 35 million dollars in 1953.

The loan programs of the Farmers' Home Administration aid low-income farm families unable to obtain credit from other sources to expand production and to achieve efficient farming units. These, as well as many other programs of the Department of Agriculture, encourage the economic development of family-size farms and the better use of underemployed farm resources.

The unusually large net expenditure for disaster loans in 1952 represents mainly loans made in the Kansas-Missouri flood area. Net expenditures for these loans are expected to decline in 1953.

Financing rural electrification and rural telephones.—The continuing shortage of critical materials has made it necessary to reduce allocations of copper and aluminum for rural electrification. The decline in Rural Electrification Administration expenditures in the fiscal years 1952 and 1953 reflects the shortage of materials. In view of the estimated carry-over into the fiscal year 1953 of 118 million dollars of unused loan authorizations, I recommend that the new loan authorization for the fiscal year 1953 be reduced to 75 million dollars. This will permit continuance of new approved electrification and telephone loans at the 1952 level of 190 million dollars, materially less than the 260 million dollars of loans approved in 1951. In this way we can avoid building up excessive commitments for loan expenditures one, two, or three years in the future when we cannot now forecast the availability of scarce materials.

Following the pattern established by the Congress, I also recommend a contingency authorization of 50 million dollars for electrifi-

cation loans to be used if the Secretary of Agriculture certifies that such funds are necessary to provide a fair distribution among the States under the allocation formula, but still keeping within the over-all level of loans approved in the fiscal year 1952.

Conservation.—An increase in funds for the Soil Conservation Service in the fiscal year 1953 is required largely because of the increasing number of new soil-conservation districts established by farmers and the increased responsibilities for supervising permanent practices financed from the conservation payments program. With the growing demands on our soil resources, we cannot afford to relax our efforts in this direction. I also recommend that the advance authorization for the agricultural conservation payment program in the crop year 1953 be continued at 256.5 million dollars, the level authorized by the Congress for the 1952 crop year.

Research and other agricultural services.—The ability of the Nation's farmers to meet the increasing demands for food and fiber products rests on the continued improvement of the technology of agriculture. My recommendations for research and other agricultural services, which hold these programs close to the fiscal year 1952 level, represent a desirable balance between the immediate needs of the security effort and the need to strengthen our economy for the years ahead.

LABOR

In order to help meet the manpower needs of defense production and essential civilian activities without jeopardizing existing labor standards, which are essential to sustained high productivity, we are shifting the emphasis of Federal labor programs.

More effort is going into assisting employers in recruiting and training. Mediators are giving special attention to settling disputes in defense industries. Safety training programs are concentrating on the prevention of accidents in hazardous defense work. Statistics on prices, wages, and employment are being collected more promptly and in more detail so that Government and industry can have a better basis for decisions on contract placement and plant location, and on price and wage stabilization programs.

In the fiscal year 1953 expenditures for all activities included under labor will amount to 246 million dollars, 6 million dollars more than in the current year. The increases are in the placement and defense production activities of the Department of Labor and in operations of the Federal Mediation and Conciliation Service and the National Labor Relations Board. Three-fourths of the total expenditures for

labor programs will be direct grants to the States for the administration of placement services and unemployment compensation.

¹ Less than one-half million dollars.

Placement and unemployment compensation administration.—Employment service and unemployment insurance administration—which is almost all under State control but is entirely financed by the Federal Government—will reflect the continuing impact of defense production. More placements and fewer claims for unemployment benefits are expected on a national basis as total employment rises. Generally, employment conditions are very good. However, in some communities, such as Detroit, serious local increases in unemployment have developed. Efforts are being made to improve these local situations through the placement of defense work in these areas.

The employment services offer the best means for the orderly recruiting of workers for defense plants. As defense production continues to expand, increasing manpower stringencies will place an even greater responsibility on the employment services. Special efforts are being made to reduce unnecessary migration and avoidable strains on housing and community facilities by recruiting all local workers, including women, older workers, members of minority groups, and the handicapped, before arranging for out-of-State recruitment. The public employment offices have the assistance of labor-management committees in helping communities with labor shortages to solve their manpower problems. These State activities will be administered by

an estimated 40,800 employees—1,200 fewer than this year. However, expenditures will increase because of salary increases for State employees.

Shifts to defense employment have contributed to a serious farm-labor shortage. To help meet this shortage, a new program to recruit farm laborers from Mexico for work in the United States was started last fall under authority of legislation passed by the Congress and in accordance with a temporary agreement with the Mexican Government, which expires February 11. The United States has been operating five recruiting stations in the interior of Mexico and five reception centers in this country. Under this program, about 150,000 workers have been brought into this country for work on farms when need has been demonstrated. Their employment has been under contracts which protect their rights and assure that American labor standards will not be undermined.

The United States and Mexico have agreed that both countries must take appropriate actions to prevent the trafficking in and employment of aliens who cross the border from Mexico illegally if we are to preserve the labor standards of American workers and of legal Mexican entrants. On our part, this requires the tightening of our immigration law with respect to illegal entrants and increased appropriations to the Immigration and Naturalization Service for more inspectors. I strongly urge prompt and favorable consideration of legislation for this purpose. A supplemental appropriation for operation of the recruiting and reception centers will be necessary if the agreement is renegotiated.

Defense production activities.—While we shall continue to rely on voluntary methods rather than Government controls in the field of manpower, the Federal Government must provide the assistance which is essential to help employers and communities in solving their labor-supply problems. Defense Production Act funds finance the Labor Department staff which directs the manpower work in the several Bureaus of the Department, and also pay for four special programs—helping employers plan training for new workers, assisting State safety inspectors to conduct accident-prevention campaigns in hazardous defense industries, recruiting workers from other States for jobs in areas with labor shortages, and providing employment information on additional labor market areas to enable Government agencies to consider labor-supply factors as they make procurement and materials allocation decisions.

Labor standards.—Sound labor standards must be maintained not only because of the human rights involved but also because they

contribute directly to the high productivity essential in a defense emergency. For this reason, the Secretary of Labor has urged that such standards as those on hours of work and employment of women and young people be held except where they need to be temporarily relaxed to meet urgent production problems.

The recent coal mine explosion in West Frankfort, Illinois, is a tragic demonstration of the need for new legislation to give Federal safety inspectors power to enforce their recommendations. Under existing law, the Bureau of Mines has only the power of persuasion.

With the establishment of the Committee on Government Contract Compliance, the Executive Branch has acted, within the limits of its present powers, to see that discrimination because of race, sex, or color does not prevent workers from getting jobs which use their highest skills. Further progress toward this objective will require action by the Congress. I therefore renew my recommendation for legislation to establish a Fair Employment Practice Commission.

Some of the most serious labor standards problems arise from movement of workers from place to place to meet the manpower needs of agriculture. The Commission on Migratory Labor which I appointed some time ago has recently recommended a series of actions by Federal, State, and local governments to overcome economic exploitation, poor housing and education, and other injustices encountered by migrants and their families.

I intend to take administrative action to carry out many of the recommendations which concern the Federal Government. For example, the Department of Labor will increase its efforts to enforce the anti-child-labor provisions of the Fair Labor Standards Act. From time to time necessary legislation will be requested to carry out other recommendations. One of the first laws needed is to regulate private employment agencies operating across State lines. The Commission on Migratory Labor found that unscrupulous agencies and labor contractors disrupt the labor supply and exploit workers by charging excessive fees, referring workers to nonexistent jobs, and misrepresenting the nature of the work.

Labor information and statistics.—The Consumers Price Index, which is an important factor in collective bargaining contracts for several million workers and in wage stabilization for all workers, has been largely based on data concerning spending habits of 1934–36. Tremendous changes in the structure of the economy have taken place since then. Therefore, the Bureau of Labor Statistics is preparing an up-to-date index, based on a study of the spending habits in 1950 of people in large and small cities. The improved index will be com-

piled on a trial basis for a number of months and will be first published for January 1953.

Unemployment trust fund.—Benefits for unemployment compensation are financed by special payroll taxes on employers which are deposited in the unemployment trust fund. Neither the receipts nor the expenditures are included in the Budget totals. In the fiscal years 1952 and 1953, the tax receipts are expected to be lower than in 1951, because firms which have had low unemployment will pay lower taxes. Despite increases in unemployment in some areas, total unemployment, and expenditures for benefits, are expected to be somewhat lower in 1952 and 1953 than last year.

The local unemployment we are now experiencing illustrates the continuing need for a strong system of unemployment insurance. I hope the Congress will give consideration to a number of basic improvements in the Federal-State system along the lines recommended in my message to the Congress of April 6, 1950.

HOUSING AND COMMUNITY DEVELOPMENT

In the years immediately following World War II, we were beginning to make good progress on a comprehensive housing and community development program. Federal insurance and guarantees of private mortgage loans, together with Federal mortgage purchases, were making it possible for millions of families to purchase better homes on reasonable terms. With these and other aids, the construction of homes reached an all-time peak of 1.4 million new units in 1950. To assist low-income families to obtain adequate housing, the Congress had authorized the construction of 135,000 low-rent public housing units a year for a six-year period. A broad program had been started to assist communities in eliminating slums with the aid of Federal loans and grants. Other activities were also well

under way to improve the quality or reduce the cost of housing and to assist groups with special housing problems.

Since the attack on Korea, we have moved rapidly to adapt these programs to meet the immediate needs of expanded military and defense installations and to establish an adequate civil defense program. Total housing construction is being reduced to free materials and manpower for more essential uses and to help stabilize prices and wages in the construction industry. Under legislation enacted during the past year, the Federal Government is helping State and local governments to provide housing and community facilities in defense areas and is assisting them in civil defense preparations.

¹ Less than one-half million dollars.

Almost a third of the new homes built in the fiscal year 1953 will be in areas serving military and defense installations. They will be rented or sold at prices which military personnel and defense workers can afford to pay. Necessary community facilities also will be built in these areas. Federal aid must be given where needed, but it will be held to a minimum. These steps are vital in helping to assure an adequate, stable supply of manpower for new or expanding defense plants as well as adequate civilian personnel for military installations.

Despite the importance of providing better housing for many of our people, housing starts in the fiscal year 1953 should be held to 850,000 or even less—depending upon the availability of materials—because of the requirements of the defense program. This amount of construction, which must first supply housing in defense areas, will provide for no more than the maintenance of present housing standards in other areas. All major Federal programs for housing and community development outside critical defense housing areas will be held substantially below the levels authorized by basic legislation.

In the fiscal year 1953, net expenditures for housing and community development are estimated at 678 million dollars, compared to the 881 million dollars estimated for 1952. Expenditures for civil defense and for defense housing and community facilities will rise sharply, but net purchases of mortgages are expected to be almost half a billion dollars lower than in the current year, and substantial net receipts, instead of net expenditures, are expected in public housing programs.

Defense housing and community facilities.—Since enactment of new legislative authority last September, the Director of Defense Mobilization has certified about 140 areas as meeting the conditions prescribed in the statute for critical defense housing areas. Additional communities will be designated as the need is demonstrated. In the certified areas, the Federal Government will make special efforts to assure that adequate housing and community facilities are constructed to meet defense requirements. According to present estimates, roughly 400,000 new housing units should be built or placed under construction to meet needs in critical defense areas during the next 18 months.

We are continuing to rely primarily on the initiative of private builders and local communities to provide the needed housing and facilities in these areas. A new and more liberal program of mortgage insurance, as well as special support from the Federal mortgage purchase program, is available to help builders obtain the necessary financing. In those areas where private builders are unable to provide

enough housing of the type needed for defense workers and military personnel and at prices and rents they can afford to pay, the Federal Government will construct such housing directly.

Federal loans and grants are also available to assist local communities in critical defense housing areas in providing facilities and services essential to the construction of housing. Federal assistance will be available only to the extent that the financial resources of such communities are inadequate to finance the facilities required.

The funds which the Congress has thus far made available for these programs provide only a small beginning on the work which must be done. Available funds for the direct construction of housing are so limited in the face of the pressing need that nearly the entire amount must be used for temporary housing near military installations. Less than 6,000 units can be supplied with present appropriations. These funds will take care of only a small part of the need at military installations and will permit very little direct construction of housing for workers at defense plants. Additional funds also will be needed for providing community facilities and services.

Accordingly, I am recommending supplemental appropriations for the current fiscal year to make available the additional funds now authorized for defense housing and community facilities. The growing need for defense housing also makes it essential that the present statutory authorization be increased so that the Congress can provide additional funds as quickly as defense requirements are demonstrated. On the basis of specific needs thus far identified, additional appropriations in 1953 estimated at 325 million dollars will be required. Of this amount, 25 million dollars is needed for community facilities.

Aids to private housing.—Soon after the attack on Korea, the down-payment requirements on federally insured or guaranteed mortgages and on other mortgages were increased and the repayment periods shortened as a method of limiting construction without resort to direct controls. These changes helped to slow down the rate of new construction and credit expansion, but the action of the Congress last fall in removing most of the authority for such controls has reversed the trend.

During the coming months, it will be necessary to reduce the level of housing construction further to make it consistent with the needs of economic stabilization and the limited availability of scarce materials. As one of the most essential methods of achieving this objective, I urge the Congress to restore previous authority over down payments and other credit terms.

In recent months the Federal National Mortgage Association has purchased a large volume of mortgages guaranteed by the Veterans

Administration in order to provide the support authorized by law for veterans' housing. The activities of the Association, however, are now increasingly directed toward providing adequate financing for construction in critical defense housing areas. By the fiscal year 1953, over one-half of the mortgages purchased will be those financing either military or other defense housing. The 1953 estimates assume that, with the continued large volume of savings, the supply of private mortgage funds will be sufficient to reduce the need for Federal support of both defense and nondefense housing.

The mortgage insurance programs of the Federal Housing Administration also have been redirected to support the defense effort. Liberal mortgage insurance terms have been made available to builders constructing homes in defense housing areas. On the other hand, a sharp reduction is in process in the number of mortgages insured in other areas consistent with the reduced construction planned for 1953.

In total, an estimated 360,000 new housing units will be constructed with the aid of financing insured by the Federal Housing Administration. In addition, nearly 150,000 existing homes will be purchased with mortgages insured by the agency. Since the premium receipts for such insurance usually equal or exceed the expenses and losses, this program normally involves little or no Budget expenditures. For the next fiscal year, it will be necessary to authorize an increase of 1 billion dollars in the total authority to insure mortgages under these various programs, principally for insurance of defense housing mortgages.

In addition to guarantees of private housing loans to veterans, the Administrator of Veterans' Affairs has limited authority to make direct housing loans to veterans in areas where adequate private financing is not available. This program was extended by the Congress until June 30, 1953, on a revolving-fund basis. Almost all of the 150 million dollars in basic authority has now been spent or committed. The estimates for 1953 assume that the sale of loans already made will provide adequate funds to meet the future need for new loans.

Public housing programs.—By the end of this fiscal year an estimated 140,000 low-rent public housing units will have been started under the Housing Act of 1949. Despite this progress, the need for the low-rent public housing program to help provide decent homes for low-income families continues to be great. As part of the restrictive policy followed on nondefense housing, I again recommend this year—as I recommended last year—that 75,000 new units be started in the next fiscal year, compared to the average of 135,000 units a year authorized in the basic statute.

While local authorities construct and operate public housing projects, the Federal Government assists them by extending direct loans and by contracting to make payments, over a period of years, high enough to assure adequate security for long-term private financing. This year local housing authorities will repay a substantial amount of Federal loans with funds raised by the sale of their own obligations to private investors. On the basis of the two offerings to date, net receipts are estimated from this program in the fiscal year 1953. Annual payments of contributions to help cover the difference between cost of operation and rental income of the projects will, however, increase substantially next year as many of the new units now under way are completed and occupied.

General housing aids.—Loans to help educational institutions ease their housing shortages have been confined exclusively to institutions having shortages resulting directly from defense activities such as Reserve officers' training programs. Loan commitments in the current fiscal year have been limited to 40 million dollars, and an additional 20 million dollars of the 300 million dollars authorized in the basic statute will be made available in 1953.

The Alaska Housing Act of 1949 gives special assistance for housing in the Territory. The increased military preparations since 1950 have emphasized the need for housing for the supporting civilian population. At my request, the Federal agencies responsible for housing and related public works in Alaska are taking steps to expedite construction of both the needed housing and the supporting community facilities. I am recommending a supplemental appropriation to the revolving fund for Alaskan housing, as well as appropriations for necessary public works. Further changes in basic authority will be requested if studies now being made reveal the need for further assistance to this strategic area.

Urban development and redevelopment.—The long-range slum clearance and urban redevelopment program, designed to assist cities in the elimination and redevelopment of their blighted areas, is now well under way. Over 200 cities have indicated their intention to proceed with redevelopment programs and have received assurance that Federal assistance will be available for their programs. Of these cities, more than 150 have submitted plans which have been approved for Federal assistance.

To prevent conflict with defense requirements, present policies provide that communities may acquire sites for redevelopment, but may not demolish existing structures or construct new structures

unless these steps are specifically determined to be consistent with defense needs. These limitations will hold the net expansion in the coming year to the minimum rate necessary to make the program effective. For the fiscal year 1953, for example, new loan commitments are not expected to exceed 100 million dollars—even though the basic statute authorizes 250 million dollars in borrowing authority for 1953—with expenditures estimated at 25 million dollars. The basic statute also authorizes contracts for capital grants of 100 million dollars a year, but no payments on such grants are now expected in the fiscal year 1953.

Civil defense.—A strong civil defense program is an indispensable part of our security effort. Neither our geographic position nor our military defenses can assure absolute protection against attack. An enemy can strike our industrial centers and inflict heavy damage in lives and property. This threat to our civilian population and to our productive facilities can be reduced, however, by strengthening the civil defense program now under way. Failure to do so could leave a fatal gap in our security structure. I am therefore recommending a substantially increased appropriation. These funds will finance minimum Federal stockpiles of essential supplies and will match State and local expenditures to prepare protective shelters in densely populated areas and to assemble necessary local equipment.

Although civil defense is primarily a State and local responsibility, the Federal Civil Defense Administration plays a key role in providing information, leadership, coordination, and financial assistance to State and local governments. Federal expenditures for civil defense in the fiscal year 1953 are estimated at 339 million dollars, compared to 44 million dollars in 1952 and less than half a million dollars in 1951. This sharp increase is necessary to overcome dangerous gaps which now exist in the program, caused by the inadequate financial support given it by the Congress last year.

Disaster insurance, loans, and relief.—The great floods last summer in Kansas and Missouri made necessary Federal assistance to relieve suffering, repair the damage, and return the stricken area to full economic activity as quickly as possible. The emergency assistance included loans by the Reconstruction Finance Corporation and the Department of Agriculture, and grants administered through the Housing and Home Finance Agency. Through the cooperative efforts of the Federal, State, and local governments and the American Red Cross, the homeless were given shelter and the threat of epidemics was avoided.

While disasters of this magnitude happen rarely, we should be better prepared for them than we are at present. Individuals and business firms should have an opportunity to purchase financial protection against this hazard. The insurance facilities now available from private companies are extremely limited. Accordingly, I repeat my recommendation of last summer for the enactment of legislation to supplement these private facilities by establishing a Federal flood insurance system. An appropriation of 50 million dollars is recommended to create a flood insurance fund.

As part of our preparation against the greater hazards of modern war, I urge the Congress to consider legislation authorizing Federal programs necessary to restore orderly community life, maintain minimum incomes, and compensate individuals and business firms for property damage arising from enemy attack. In an atomic age, the probability of such an attack is so unpredictable and the expenditures necessary to provide a minimum level of protection are potentially so large that neither private nor public insurance is feasible. Nevertheless, orderly advance planning is essential. At the request of the Senate Banking and Currency Committee, the Director of the Bureau of the Budget has submitted a draft of legislation providing minimum authority required in advance of such attack, including authority to set up a skeleton organization and to draft specific plans for partial indemnities and other necessary programs. The appropriate agencies of the Government are continuing to review and improve these proposals.

EDUCATION AND GENERAL RESEARCH

Federal expenditures for education and general research are estimated at 624 million dollars in the fiscal year 1953, compared to an estimated 238 million dollars in 1952 and 115 million dollars in 1951. These sums do not include special-purpose education and research activities included in other Budget categories.

The substantial increase in the fiscal year 1953 will strengthen basic education programs and fundamental research. The added funds are needed primarily for new legislation which I am recommending to help all the States improve elementary and secondary education, to help provide schools in those communities which are overburdened because of Federal activities, and to give financial assistance to capable young people who otherwise could not attend a college or university.

New obligational authority recommended for 1953 is 688 million dollars, but largely because of the length of time required to complete and pay for buildings under the school construction program the expenditures will be 64 million dollars less than this amount.

¹ Less than one-half million dollars.

Promotion of education—elementary and secondary.—At present, too many of our people are unable to make full use of their capabilities, whether in civilian employment or military service, because their opportunities for education and training have been limited. Schools are overcrowded, substandard instruction is common, and teachers' salaries continue low in many areas.

The most serious aspect of this situation is that it can so easily become very much worse. Our school-age population is now rising rapidly, as a result of the great increase in births which began in the war years. The number of children entering the first grade is now nearly 10 percent higher than it was only four years ago. Four years from now it will have risen another 24 percent. Meanwhile, of course, these children will be moving up through the grades, year by year, putting new strains successively on our elementary and secondary school systems.

I have urged the Congress for several years to enact legislation providing grants to the States for operation and maintenance of their local schools. These grants would assist the States in improving their

systems of elementary and secondary education by raising teachers' salaries, providing more and better textbooks, and in many other ways. The security program has reemphasized this need. In some States more than one-third of the young men called by the Selective Service System failed the educational tests for entrance into military service during the fiscal year 1951. The States with the highest rejection rates are precisely those low-income States which, despite heavier taxes in relation to income, are unable to provide a satisfactory education for their young people. Many of the men rejected for military service because of educational deficiencies are also unable to meet our needs for skilled workers in industry. At a time like this we cannot afford to waste any resources, yet this pool of inadequately used human resources is being continually enlarged because many young people are denied the opportunity for a proper education.

This is a need that we must begin to meet at once. This Budget includes a recommendation of 300 million dollars as the preliminary estimate for general aid to education in the fiscal year 1953. Because of higher costs and the greater number of school children, this amount of aid will not fully accomplish the purposes which my earlier proposal was designed to achieve. I hope that the Congress will enact legislation containing provisions to raise equalization aid to a more adequate level over the next decade.

In addition to this new program of general aid, the Budget includes 45 million dollars in estimated appropriations for operation and maintenance aid to certain local school districts where the Federal Government has a special responsibility to furnish assistance because Federal activities have imposed special burdens.

This Budget also includes estimated appropriations of 225 million dollars for the construction of school facilities in critical defense housing areas and other places specially affected by Federal activities. Of this amount, 150 million dollars is needed to continue the program already authorized, and the remainder is a preliminary estimate of needs under proposed legislation.

We are also moving forward on a detailed three-year Nation-wide survey of our school construction needs generally, as authorized by the Congress in 1950. In cooperation with the Office of Education, the States are making good progress in surveying their shortages of school facilities and their resources available to meet these shortages. The information coming in from this survey will help us to determine what the future role of the Federal Government should be in relation to school construction needs.

Meanwhile, the States and localities are doing a great deal to meet the situation. During the calendar year 1951 they broke all previous

construction records by building more than 40,000 new classrooms costing 1.3 billion dollars. It is gratifying that, despite the shortage of structural steel, we have been able to make enough available for the first half of 1952 to continue and even increase this rate of construction on the basis of modified designs which require less steel.

The present programs of Federal aid to critical areas for construction and operation of schools are based on two laws enacted in 1950. Under these laws we provide aid to local school districts for construction and for operation of schools to meet burdens resulting from peacetime and World War II Federal activities. Expenditures under both laws are estimated at 185 million dollars in 1953. Many localities receiving such aid have suffered additional financial strain because of current mobilization activities. Because of the rigid formulas in these laws, we have been unable to provide adequate aid to these localities and to others, such as the Savannah River and Paducah areas, where new atomic energy installations have resulted in a vastly increased need for schools.

Late in the last session the Congress passed legislation which would have amended these laws so as to provide more adequate and flexible authority for assisting critical defense housing areas, but the bill included certain objectionable provisions which compelled me to withhold my approval. I hope that the Congress will reenact, at this session, the much-needed amendments in an acceptable form and at the same time make other improvements in the laws. Expenditures under this proposed legislation are estimated at 35 million dollars in the fiscal year 1953 for both the construction and the operation programs.

Children of migratory workers constitute a special group whose present educational opportunities are inadequate. As has been pointed out by the Commission on Migratory Labor, because these children move with their families, they start school later, attend fewer days, make less progress, and drop out earlier than others. As a first step toward meeting this problem, we need to work out special teaching materials and methods suited to their education. I have therefore included in this Budget money to enable the Office of Education to make the necessary studies in cooperation with the States and with institutions of higher learning.

Promotion of education—colleges and universities.—In the present emergency, our military forces and our defense industries need an increasing number of people who have advanced education and training. Full strength on all fronts is essential for the long pull, and trained manpower is critically important to such strength. This need

for a substantial and rapid increase in the number of people who go to colleges and universities is a national problem requiring national action.

By temporarily postponing the induction of students into the armed forces, we took one step toward assuring that each man receives the training which will enable him to serve national needs most effectively. At present, however, family financial ability tends to be the factor that decides who, among the able, can continue his education and who will be inducted immediately. The results are not only unfair—they are detrimental to our national interest.

Elsewhere in this Budget there are Federal programs for aid to college students, such as the programs of veterans' education and the Reserve Officers' Training Corps. These programs are necessary for special purposes. They do not meet the broader needs of the Nation. A general program of scholarship aid and loans for undergraduate students is the logical and practical answer, and this Budget therefore includes 30 million dollars for initiating such a program in the fiscal year 1953. The program I am recommending is designed to provide modest payments to a limited number of students, and to give this aid only in those instances where the students otherwise could not go to college.

National Science Foundation.—During the last decade we have seen how basic scientific research can alter the foundations of world power. We have seen that this research yields a stream of new knowledge which fortifies our economic welfare as well as our national strength. We have learned that a strong, steady, and wide-ranging effort in science is as essential to our sustained national security as the production of weapons and the training of military personnel.

The National Science Foundation has been established as the Government agency responsible for a continuing analysis of the whole national endeavor in basic research, including the evaluation of the research programs of other Federal agencies. On the basis of studies now under way, the Foundation will formulate a broad national policy designed to assure that the scope and the quality of basic research in this country are adequate for national security and technological progress.

The Foundation also will stimulate or sponsor basic research in subjects which otherwise might receive inadequate attention. While the research program of the Foundation is not intended to supersede the basic research programs of other agencies, the Foundation should ultimately become the principal agency through which the Federal Government gives support to basic research that is not directly related

to the statutory functions of other Federal agencies. The proposed increase for research support by the Foundation has been taken into account in arriving at the recommendations for the basic research programs for the Department of Defense and other agencies.

In the present fiscal year the National Science Foundation is initiating a modest program of fellowships in the sciences. The 1953 Budget recommendation for the Foundation provides for an expansion of this program to help meet the increasing need for specialized and professional personnel in the present emergency.

To make its greatest contribution speedily and effectively, the Foundation needs in the fiscal year 1953 an appropriation of the full 15 million dollars authorized by law. Expenditures in 1953 are estimated at 10 million dollars below the appropriation because many research grants extend over two or three years and because the fellowship program is only beginning.

SOCIAL SECURITY, WELFARE, AND HEALTH

Expenditures for social security, welfare, and health are estimated at 2.7 billion dollars for the fiscal year 1953, slightly less than in the current year and 282 million dollars higher than in 1951. Most of the increase over 1951 occurs in proposed legislation for public assistance and in transfers to the railroad retirement trust account of payroll taxes collected from railroad employers and employees.

In the past year, our programs for protecting people against want and privation have progressed further toward a contributory social insurance basis. Old-age and survivors insurance, financed through a trust fund, has forged ahead of public assistance as a source of income for nonworking people over 65 years of age.

This marks the realization for the first time of a basic principle of the Social Security Act—that the major role of protecting people against want in old age should be assigned to social insurance, financed mutually by employers and employees through payroll taxes, and providing benefits as a matter of right without a means test.

Only 16 months ago there were 2,800,000 aged people on the public assistance rolls, while only 2,000,000 were receiving old-age and survivors insurance, and average public assistance benefits were substantially greater than old-age insurance payments. Today, more than 3,200,000 persons receive old-age insurance, while the number of aged receiving public assistance has dropped by about 100,000 from the peak reached in September 1950 and is still declining. Moreover, insurance benefit rates have been increased to a level

almost equal to average public assistance payments. The 1950 amendments to the Social Security Act—which broadened the coverage and increased the benefits—played a major role in reversing the previous trend.

Unquestionably, the healthiest form of economic security for all people is opportunity for steady employment. The overwhelming majority of people in the American labor force—white collar and blue collar, skilled and unskilled—are able to work and want to work. To that end, additional efforts should be made by private employers and Government to utilize the skills of the older workers and, where necessary, to retrain them for work commensurate with their capacities. But for those who are unable to work—older or disabled people or widows with growing children—insurance protection should be available on an adequate basis.

SOCIAL SECURITY, WELFARE, AND HEALTH

[Fiscal years. In millions]

Defense community facilities and services (Federal Security Agency)		15	15	
Total	2,380	2,680	2,662	2,578

Benefits should be increased without delay. Because of the rising wage level, the revenues of the old-age and survivors insurance system are higher than will be needed to pay the present scale of benefits to people who will retire. Under these circumstances, it is possible to

increase average primary benefit rates by about 5 dollars a month. This increase can be made without in any way increasing the contribution rates in present laws. This would raise the average benefit of a retired worker to 47 dollars a month.

In addition, I hope the Congress will not neglect other desirable improvements in our social insurance laws which will move us closer to our objective of making old-age and survivors insurance a basic protection for all employed groups, with special pension plans supplementing this basic protection. We should extend coverage to members of the armed forces, public employees, farmers, farm and household workers not regularly employed by a single employer, and other employed groups who are not covered by a publicly sponsored insurance system. Also, as soon as practicable, the present limitation of 3,600 dollars a year on earnings taxed under the insurance system should be brought up to date, and provision should be made for permanent and total disability protection.

Railroad retirement.—Expenditures of the Railroad Retirement Board consist principally of transfers to the railroad retirement trust account of taxes collected from railroad employers and employees.

The amendments enacted last October raised benefits for the 400,000 persons who were then receiving retirement payments under the Railroad Retirement Act. They also provided benefits for the first time for the wife or husband of a retired railroad employee. Expenditures for these benefits are made directly from the trust fund and do not, therefore, affect the Budget total.

These amendments were enacted by the Congress as a first step toward improving the railroad retirement system. Much more remains to be done if we are to give railroad workers and their dependents adequate protection on a sound financial basis. I am glad that the Congress adopted a resolution providing for a comprehensive study of the railroad retirement system, its benefits and financing, and its relationship to the old-age and survivors insurance program.

Public assistance.—Federal grants to the States for the existing public-assistance programs are declining. Expenditures in the fiscal year 1953 under present law are estimated at 1.1 billion dollars, 40 million dollars below the amount now estimated for the current year. The number of recipients of old-age assistance and aid to dependent children began to decline during the past year, largely because of increased employment and improved old-age and survivors insurance. This decline is expected to continue in the fiscal year 1953.

For those who are in genuine need, and who have no recourse other than public assistance, upward adjustments in monthly payments are warranted in view of advances in the cost of living. The Federal Government in assisting the States to bear the costs of public assistance has a responsibility for sharing the expense of the necessary adjustments. Many States have had difficulty in raising their benefits to adequate levels. I recommend the enactment of legislation to provide additional help on a matching basis to assist the States to attain higher benefit levels. This Budget includes 100 million dollars as a tentative estimate of the amount needed for this purpose.

Aid to special groups.—The Federal Government traditionally assumes part of the financial responsibility for two programs operated by the States for special groups. One of them provides low-cost lunches to school children, thus offering some assurance against undernourishment of our children. My Budget recommendation for this activity is based upon continuing Federal participation at the present level. The other program rehabilitates disabled people and returns them to productive employment, thus increasing our labor force and our national production of goods and services. I am recommending a moderate increase for this purpose.

The Federal Government also provides health, welfare, and educational services for our 400,000 native Indians. Because the present level of these services is clearly inadequate, this Budget provides for a 15-million-dollar increase in expenditures in the next fiscal year. In addition to permitting some improvement and expansion of basic health and educational services, this increase will enable the Bureau of Indian Affairs to conduct a constructive program to provide the Indians with training and off-reservation relocation opportunities and to help them to make satisfactory adjustments in new locations.

Promotion of public health.—The health of the American people is essential for our security and development. Like any other resource, health should be safeguarded and improved. The Federal Government has contributed to this objective in a number of ways, particularly through its extensive research programs and its financial aid to the States. But we still have a long way to go.

On the basis of available studies indicating the pressing need for such measures, I recommend that legislation be enacted to provide aid for medical education and local public health units. Furthermore, in order to help outline a course of action which will aid in meeting the

long-term health requirements of the Nation, I have established a commission to study various health problems. The Commission will consider, among other things, the availability of medical services and the adequacy of present methods of paying for them.

Public health services are provided primarily by local health agencies with extensive cooperation and assistance from the States and the Federal Government. More than half of the Federal expenditures for promotion of public health are for grants-in-aid to the States and localities by the Public Health Service and the Children's Bureau. These grants are for such activities as hospital construction, control of venereal disease and tuberculosis, mental health, maternal and child health, general health services, and detection of cancer and heart disease. Most of the remainder goes toward technical assistance to the States in the form of demonstrations, educational programs, and consultative services, and for the research programs of the Public Health Service and Children's Bureau. The estimate of expenditures for health programs in the fiscal year 1953 is lower than for the current year primarily because of smaller outlays to liquidate contract authorizations, particularly under the Federal-State hospital construction program. This reduction reflects our continuing policy of holding new construction to a minimum.

Defense community facilities and services.—This item is for Federal assistance to critical defense housing areas in providing facilities and services essential to health and welfare, including sewage disposal and water supply. Unless these basic needs are met, it will not be possible to attract all the workers needed for defense production. These health and welfare activities support the defense housing and community facilities program which is discussed in the Housing and Community Development section of this Message.

Trust funds.—In addition to the railroad retirement trust account, mentioned above, the Federal Government maintains two other large trust funds for publicly sponsored retirement and insurance systems—old-age and survivors insurance and civil-service retirement. The money in the trust funds is invested in Government securities, and the interest earnings are added to the principal in each fund. The balances in these three funds will aggregate approximately 25 billion dollars at the end of the current fiscal year.

VETERANS' SERVICES AND BENEFITS

Expenditures for veterans' services and benefits, which have declined 43 percent from the World War II peak of 7.4 billion dollars in 1947, are estimated at 4.2 billion dollars in the fiscal year 1953. The decline results from sharp reductions in expenditures for readjustment benefits and insurance outlays.

In view of the large increase in the size of our armed forces since Korea, and the continued increase in expenditures for compensation and pensions, further large declines in veterans' outlays are unlikely. Our veteran population is increasing rapidly under the policy which requires nearly all able-bodied young men coming of military age to serve their turn in the armed services. As our commitments to our growing number of veterans increase, we should constantly inquire

into how we can best meet their needs and the needs of their dependents. In considering legislation affecting veterans, we must take into account the prevailing economic and military situation, the relation of veterans' programs to the whole range of Government programs, the availability of other Government services, and the lessons learned from experience.

The chief responsibility of the Government is to give medical care to veterans who have been injured in the service, to assist them to assume their place in society as productive and self-reliant citizens, and to give necessary aid to the families of veterans deceased or injured from service causes. We should also provide other demobilized servicemen with timely readjustment assistance on a sound basis.

The needs of veterans and their families not resulting directly from military service can be best met through the welfare programs serving the whole population. These programs have been expanded and improved in recent years. Only the special and unique needs of servicemen and their dependents arising directly from military service should be provided for in special veterans' programs.

Total	5,339	5,166	4,197	4,181

Readjustment benefits.—Expenditures for education and training of World War II veterans are estimated at 626 million dollars in the fiscal year 1953, a decline of 860 million dollars from the revised estimates for the current fiscal year. The 1953 expenditures will provide for an average enrollment of 491,000 in school, job, and farm training courses. The reduction from an average enrollment of over one million in the current fiscal year reflects the fact that July 25, 1951, was the deadline for initiation of training under the program. By the end of the fiscal year 1953, approximately 7,800,000 veterans—about half of all the veterans of World War II—will have received education and training at a cost to the Government of 14.3 billion dollars. This investment is already proving to be of great benefit to the veterans and the Nation.

Other expenditures under the Servicemen's Readjustment Act are for unemployment and self-employment allowances and loan guarantees. In the fiscal year 1953, only the outlays for loan guarantee activities will continue to be large. Government expenditures for interest gratuities on guaranteed loans and on account of defaulted loans are estimated to decline slightly to 72 million dollars. An estimated 391,000 new loans amounting to 3.3 billion dollars are expected to be guaranteed. This will raise to 21.5 billion dollars the aggregate of veterans' loans for homes, farms, and businesses guaranteed by the Government since 1945.

This Budget includes 75 million dollars to cover the first year's cost of a new program of readjustment benefits for discharged servicemen who have served since the beginning of the Korean conflict. I recommend prompt enactment of such a program. However, I do not believe that extension of the Servicemen's Readjustment Act in its present form would be the proper way to meet the new need. The main assistance to be provided at this time should be a sound and constructive program of education and training. The new legislation should take account of the significant imperfections which have become apparent in our experience with the "GI bill." All possible effort should be made to incorporate into any new program the lessons learned from that experience. Studies now being made by the Congress should be of value in the consideration of pending bills to establish a new readjustment program for these veterans.

Compensation and pensions.—It is estimated that under existing laws an average of 3,179,000 individuals and families will receive veterans' compensation and pension payments totaling more than 2.1 billion dollars in the fiscal year 1953. This is a net increase of 84,000 in the average number of cases and 63 million dollars in pay-

ments over the estimates for the current fiscal year. The expenditure estimates reflect an anticipated supplemental appropriation of 42 million dollars in the fiscal year 1952 to cover expenditures for compensation and pensions, in part because of new legislation enacted by the first session of this Congress.

The total of 2.1 billion dollars under present laws for the fiscal year 1953 includes 1.5 billion dollars in compensation payments to service-disabled veterans and families of those veterans who have died from service-connected causes, as well as 618 million dollars in pension payments for non-service-connected disabilities. Under existing laws expenditures for compensation and pensions will more than double in future years, with the increase entirely in non-service-connected pensions. Legislation to increase further the number of non-service-connected pension beneficiaries should be reviewed in light of the fact that most veterans who need financial help will be covered by the old-age and survivors insurance program. In those cases where veterans are not covered by this program, the sensible remedy is to extend old-age and survivors insurance to include them.

With respect to death and disability compensation payments arising from service causes, I recommend that the Congress carefully review the rates and revise them where recent increases in the cost of living warrant. This Budget includes 100 million dollars to defray the cost of such increases. The legislation making the specific changes should take into account the new dependents' allowances for disabled veterans with families, and the increases in death compensation rates which have been enacted in recent years, as well as payments to beneficiaries under other Government programs. In particular, the Congress should carefully investigate the disparities which exist because of the fact that survivors of many servicemen receive both veterans' benefits and old-age and survivors insurance benefits on the basis of military service, while families of other veterans receive only the veterans' benefits.

Insurance and servicemen's indemnities.—After intensive investigation, the Congress early last year established a new system of \$10,000 indemnities to families of servicemen who die while on active duty or within 120 days after discharge. These indemnities are provided for every serviceman without charge in lieu of the National Service Life Insurance which was previously available on an optional basis. They provide universal protection for servicemen's dependents. At the same time they cost the Government less than National Service Life Insurance. Indemnity payments to families of servicemen will be about 9 million dollars in the fiscal year 1953.

In the Insurance Act of 1951, the Congress also provided an improved system of insurance to cover disabled and other servicemen after their discharge from the armed forces. This new insurance, financed through revolving funds, is based upon more realistic mortality tables and interest and premium rates than are used in the National Service Life Insurance program. Receipts in these funds will be 2 million dollars more than expenditures in 1953.

In addition, the Government continues to reimburse the National Service Life Insurance and United States Government Life Insurance trust funds for the cost of deaths of policyholders traceable to war hazards, and also pays claims for certain veterans who failed to meet regular standards of insurability. It is estimated that Budget expenditures for these payments will rise to 242 million dollars in the current fiscal year because of casualties in Korea, but they are expected to decline to 61 million dollars in 1953. Further reductions are expected in subsequent years, since new members of the armed forces are covered by the indemnity system.

Hospital and medical care.—With the opening of 20 new veterans' hospitals in the fiscal year 1953, the average number of patients is expected to increase by 4,400 above the current year's level. Correspondingly, current expenses for hospital and medical care of veterans are expected to increase 25 million dollars.

The number of patients in hospitals and homes in the fiscal year 1953 is estimated to average about 134,000, of which about two-thirds are non-service-connected cases. It is estimated that the out-patient case load during the year will decline seven percent, to 3,486,000 visits and treatments. Total current expenses for hospital and medical care in the fiscal year 1953 are estimated at 695 million dollars.

Hospital construction.—Expenditures for construction of hospital and domiciliary facilities for veterans are expected to decline in the fiscal year 1953 as the program to provide 36,500 new beds nears completion. My Budget recommendations include 95 million dollars in new obligational authority to complete hospitals now under construction, to permit the construction of three new hospitals under the 36,500-bed program, and to begin conversion and modernization of existing facilities.

Other services and administration.—It is estimated that expenditures for administration and miscellaneous services will be 52 million dollars less in the fiscal year 1953 than in the current year. About 21 million dollars of the reduction is due to the fact that the 1952 total included

a nonrecurring outlay for automobiles for blind and amputee veterans. The remainder is a reduction in the expenses of administering the nonmedical benefit programs. This in part reflects declining workloads and in part more efficient methods of operation as the result of consolidation of district offices and the substitution of the servicemen's indemnity program for National Service Life Insurance.

Trust funds.—The Servicemen's Indemnity Act of 1951 virtually terminated the issuance of new National Service Life Insurance policies, but did not affect 7.6 million policies now outstanding under National Service Life Insurance and United States Government Life Insurance trust funds.

In the current fiscal year, expenditures from these two trust funds are substantially greater than receipts because the second special National Service Life Insurance dividend is still being paid. By the start of the fiscal year 1953 it is expected that dividend payments out of the National Service Life Insurance fund will be on a current basis. In that year expenditures and receipts from the two trust funds will approach a balance.

GENERAL GOVERNMENT

Expenditures for general Government services and activities in the fiscal year 1953 are estimated at 1.5 billion dollars. This is a net increase of 131 million dollars over the current fiscal year. The net increase includes a rise of 148 million dollars in the Government's

contribution, as employer, to the civil-service retirement system, higher expenditures to handle the increased volume of tax collections, and decreases in several items.

A sharp decline in expenditures for public building construction reflects my Budget policy of limiting new construction to projects directly supporting our security effort.

¹ Less than one-half million dollars.

Federal financial management.—The Revenue Act of 1951 increased the amount and variety of taxes to be collected. The increased funds provided in this Budget will enable the Bureau of Internal Revenue to expand its auditing and enforcement operations to assure better compliance with the tax laws. The maintenance of public confidence in the tax collection process is essential to our tax system. To this end, steps have been taken or are in process to insure the integrity of the tax-collecting system by tightening up the supervision of all Bureau operations throughout the country, establishing an inspection service independent of the rest of the Bureau, and speeding up the prosecution of delinquent taxpayers. Furthermore, I have trans-

mitted to the Congress, under the Reorganization Act of 1949, a plan for reorganization of the Bureau for the purpose of bringing about an improved organization with clearer lines of authority and responsibility, and providing that all positions in the Bureau not now filled through civil service, except that of the Commissioner of Internal Revenue, shall be so filled hereafter.

Most of the increase in expenditures for tax enforcement will be used to intensify investigations of the tax returns and activities of racketeers and to enforce the new wagering taxes levied by the Revenue Act of 1951. To perform this work effectively, some 7,000 employees will have to be added to the Bureau staff before the end of the current fiscal year. Early approval of a supplemental appropriation will be needed to make this possible.

The Renegotiation Board, established under a statute enacted last spring, is now organizing to review profits earned under defense-related contracts and to prevent or recover excessive payments by the Government. This Budget includes an estimate of 7.3 million dollars for expenses of the Board during the fiscal year 1953.

Central property and records management.—Under the Federal Property and Administrative Services Act of 1949, the General Services Administration has brought about more efficient and effective use of the Government's real and personal property and is endeavoring to eliminate nonessential requirements, to set inventory levels at a minimum, and to apply stricter standards of use and replacement. This program has been reoriented to meet the needs of the defense agencies and other Government agencies for space, equipment, and supplies.

The volume of records preserved by operating agencies and in recently established regional records centers is continually being reduced, and the storage of the remaining records is being further centralized to release scarce office and warehouse space. By the end of the fiscal year 1953, the regional records center program will release for other uses nearly 2 million square feet of space and approximately 200,000 filing cabinets.

Civilian personnel management.—An increase in Government personnel has been required to meet the needs of our security programs. The Civil Service Commission has had to expand its examining, recruiting, and placement activities to safeguard the merit system. The use of expert boards of examiners will be extended and improved and a program of centralized recruiting in major employment centers will be inaugurated to eliminate duplication of recruiting efforts.

At present, a few Federal agencies have authority to assign a limited number of personnel for advanced training in fields directly related to the work of their agencies. In order to increase the productivity of employees in various lines of scientific, technical, and administrative work, I recommend that the Congress extend standard but limited authority to Government agencies generally, so that they may provide such training at institutions of learning, scientific laboratories, or private establishments for a small number of their personnel.

Experience under the several existing statutes authorizing positions in grades GS-16, -17, and -18 under the Classification Act shows that the total number of allowable positions in these top-level grades should be increased if the Government is to attract and retain the most competent and responsible employees.

The recent pay increases voted for Federal employees under the Classification Act of 1949 created a problem in some Federal agencies which are authorized to fix pay rates by administrative action. In cases where these rates customarily approximate those of the Classification Act and no generally comparable increases have been given, provision is made in this Budget for the necessary increases.

Federal civilian employees' retirement.—The cost of civilian employees' retirement benefits is financed by contributions from the employees and the Government. By law, Federal employees covered under the system are required to contribute to a trust fund 6 percent of their salaries, and the Government is required to contribute an amount sufficient to cover the remaining cost of benefits. The Government contribution for the fiscal year 1953 consists of a normal contribution of 2.78 percent of payroll to pay currently accruing costs, and a deficiency contribution to pay interest on and provide for amortization of the Government's accrued liability to the fund. This liability results from employees' services rendered prior to the effective date of the system, credits for military service, and insufficient appropriations for the Government contribution in some years. This Budget includes 458 million dollars for the annual contribution of the Government for the fiscal year 1953 to the Civil Service retirement and disability trust fund, 148 million dollars more than in the current fiscal year. This estimate takes into account the higher benefits for future annuitants which will result from a recent advance in the pay rates for Government employees. It also provides for the first of 30 annual payments to amortize the Government's accrued liability to the fund so that the retirement system eventually will be financed on a full reserve basis, as is contemplated by the retirement act.

Federal employees' unemployment compensation.—Legislation is needed to provide unemployment compensation benefits for Federal employees, as part of the present Federal-State system of unemployment insurance. In the past, Federal employees relied on accumulated annual leave to provide income during temporary periods of unemployment. This is a distortion of the purpose of annual leave. Moreover, the amount of protection afforded through leave accumulation varies greatly among individuals and without any particular relationship to the likelihood of unemployment. Because of recent laws which temporarily stopped the accumulation of leave, and the new leave law of 1951 reducing the amount of leave permitted to most Federal employees, many of them are now without even this uncertain protection. This applies especially to the temporary workers hired during the present emergency.

Dispersal of Government activities.—Last year I recommended a program for the dispersal of essential units of Government in the vicinity of the District of Columbia in the interests of security and reduction of congestion in the metropolitan area.

The Public Works Committee of the Senate, after extensive hearings and deliberations, reported a bill providing for the construction of a limited number of Federal buildings outside of but in the vicinity of and accessible to the District of Columbia, the construction of a circumferential highway outside of the boundaries of the District of Columbia, and the permanent decentralization of units of Government which could operate at distant locations without significant loss of efficiency. I am in full accord with the objectives set forth in the bill and the accompanying committee report. I am convinced that any program which fails to place primary emphasis on dispersal to nearby areas would not be in the interest of security, efficient administration, or good area planning.

Subsequent review of that part of the program involving dispersal has led to the conclusion that presently owned Government land should be used as sites for necessary buildings and facilities, with resulting economy. This Budget includes 15 million dollars as a preliminary estimate of the amount needed in the fiscal year 1953. I strongly urge approval of this modified program.

Payments on Federal real estate.—The Congress now has before it a proposal, drafted in the Bureau of the Budget, to establish a general system of limited payments to State and local governments in cases in which their finances have been adversely affected by Federal Government acquisitions of real estate. The problem is one of long standing.

It is becoming more acute as we acquire more property for military bases and other defense-related facilities which impose new burdens upon some local governments. The enactment of a reasonable solution will help to spread governmental costs more equitably and at the same time will strengthen our Federal-State system of government.

INTEREST

Most of the interest payments now being made by the Federal Government result from the large increase in the public debt which arose out of World War II. In the fiscal year 1953, interest will cost the Government about six times as much as it did in the prewar fiscal year 1940 and will account for over seven percent of total Budget expenditures.

INTEREST

[Fiscal years. In millions]

Item	Expenditures			Obligational authority for 1953 (permanent indefinite)
	1951 actual	1952 estimated	1953 estimated	
Interest on the public debt.....	\$5,615	\$5,850	\$6,150	\$6,150
Interest on refunds of receipts.....	93	100	101	101
Interest on trust deposits.....	6	5	4	4
Total.....	5,714	5,955	6,255	6,255

Interest on the public debt.—Expenditures for interest on the public debt in the fiscal year 1953 are estimated at 6,150 million dollars, an increase of 300 million dollars over the 1952 estimate and 535 million dollars over 1951. The rise in expenditures is due both to an increase in the amount of interest-bearing debt and to higher interest rates.

On the basis of present estimates of receipts and expenditures, the debt will increase by 20 billion dollars during the fiscal years 1952 and 1953. However, because of the lag between the borrowing of new funds and the initial interest payments, the full impact of the debt increase will not be reflected in increased interest payments until the fiscal year 1954.

During the past calendar year, the average interest rate on the total interest-bearing debt has increased by about one-tenth of one percent. With a debt of the present size, this means an increase of over 250 million dollars in the computed annual interest charge. This increase in the interest charge cannot, however, be directly associated with the increase in interest payments during the fiscal year 1953. The estimate of expenditures for the fiscal year 1953 is based upon

the present levels of interest rates since it is not possible to predict changes in rates in the future.

The continued expansion of special issues to Government trust funds and other Government agencies will further increase interest payments in the fiscal year 1953. The average interest rate on most of these issues is higher than the average rate paid on the rest of the public debt.

For the first time in several years, interest accruals on savings bonds are not expected to rise in the fiscal year 1953. In fact, they may fall slightly. Interest accruals on series E savings bonds sold during World War II have now reached maximum levels. Increased accruals on bonds sold since World War II will be more than offset by reduced accruals on maturing obligations which will, at the option of the owner, either be redeemed or extended for another 10 years under the authority of legislation enacted last spring.

Interest on refunds.—Interest is paid on refunded receipts because the Federal Government has had the temporary use of the funds. Most refunds result from the overpayment of taxes by individuals and corporations. The rate paid on such refunds is six percent, the same rate that taxpayers are charged on delinquent payments.

Refunds of tax overpayments are expected to be higher in the fiscal years 1952 and 1953 than in 1951. This will result in an increase in interest expenditures.

IMPROVING THE MANAGEMENT OF GOVERNMENT PROGRAMS

In presenting to the Congress a Budget that reflects expanding Federal programs in support of the Nation's security effort, I am keenly aware of the challenging job of management placed upon the Federal Government. I have already outlined in previous sections of this Message a number of improvements in the management and operation of various parts of the Government. There are, in addition, other developments to which I wish to draw attention here.

Since the start of the defense mobilization program, we have done a great deal to adapt the machinery of Government for the efficient performance of new tasks. Practically all agencies of the Government today have reoriented their activities, and many have modified their internal structures to carry out their new responsibilities. In addition, several new agencies have been created, primarily to assist in the coordination of our security programs. In the field of production and stabilization, the Office of Defense Mobilization, the Defense Production Administration, and the Economic Stabilization Agency were organized during the months immediately following the attack on

Korea. More recently, the Defense Materials Procurement Agency and the Small Defense Plants Administration have been established. In the field of foreign assistance, the creation of the coordinating position of the Director for Mutual Security, the termination of the Economic Cooperation Administration and the creation of the Mutual Security Agency, and the integration of the Institute of Inter-American Affairs into the Technical Cooperation Administration in the Department of State represent important developments.

The basic organizational shifts to meet the demands of our security programs have been substantially completed. We are now faced with the continuing problem of increasing the efficiency and effectiveness of our governmental machinery.

In order to assure continuing progress in this field, the Executive agencies are required to submit programs for management improvement along with their annual budget requests. These programs were examined as this Budget was prepared in order to identify the most urgent operating problems and to find opportunities for reducing operating costs. I have also had the benefit of advice from members of my Advisory Committee on Management, upon which I have placed the special duty of reviewing the status and progress of the management of our defense mobilization programs.

Because the largest share of Federal funds is spent by the Department of Defense, particular consideration is being given to its management problems. Substantial progress has been made in placing the accounting and financial administration of manufacturing and other business-type operations of the military departments on a sound and business-like basis. This will enable better management and cost control of operations such as ordnance arsenals, sea transport, and printing plants.

While principal emphasis has necessarily been placed on the organization and management of civilian and military mobilization programs, the general improvement of management in other parts of the Executive branch has gone forward. A notable action was the reorganization plan for providing single direction of the Reconstruction Finance Corporation. The Veterans Administration is consolidating into a smaller number of offices insurance activities formerly performed by 11 district offices—an action that will result in an annual saving of several million dollars. The Administrator of Veterans' Affairs has also engaged management consultants to undertake a comprehensive examination of the organization and management of the

Veterans Administration. The Post Office Department has recently inaugurated a new money-order system which will save several million dollars annually, and is taking other steps to improve the efficiency of the postal service. These are illustrative of the vigorous actions I shall continue to expect from the management improvement programs that all agencies have established at my request.

In addition to actions taken by individual departments and agencies to improve their organizations and to obtain greater operating economies, improvements of a Government-wide nature are also being made. Of major significance are those in the Government's fiscal operations, made under the joint accounting program being conducted by the Comptroller General of the United States, the Secretary of the Treasury, and the Director of the Bureau of the Budget in collaboration with all other agencies of the Government. That program, greatly advanced by the enactment of the Budget and Accounting Procedures Act of 1950, is directed mainly at providing full, accurate and timely financial information concerning the operations of the Government. This will enable Government officials to carry out their functions more effectively and economically, and will provide the taxpayer with better information as to where and how the tax dollar is spent.

Programs throughout the Government chiefly concerned with the collection of statistical data and economic analysis have also been reviewed as recommended by the Task Force on Statistical Agencies to the Commission on Organization of the Executive Branch of the Government. The objective of this appraisal was to avoid overlapping and duplication in statistical programs and to eliminate unnecessary expenditures. The Budget recommendations for these activities are designed particularly to develop an orderly Government-wide program which will meet at minimum costs the new requirements for economic information imposed by the security effort.

It is my intention to maintain a vigorous program for the improvement of Government management on all fronts. During the coming year I shall continue to make improvements in the mobilization agencies under the authority of the Defense Production Act. Under the Reorganization Act of 1949, I have already submitted to the Congress a plan to strengthen the Bureau of Internal Revenue. I expect to propose to the Congress additional reorganization plans, as well as to recommend legislation for administrative changes. A number of the recommendations of the Commission on Organization of the Executive Branch of the Government which require legislation have not yet been

acted upon by the Congress. I urge the Congress to review those recommendations and act on the ones which are still applicable and which will contribute to the more effective administration of the Government.

This Budget represents the program I am recommending for promoting peace and safeguarding security.

In the current world crisis, the price of peace is preparedness. In terms of the sacrifices which this involves, it is a heavy price, but when freedom is at stake, it is a price which all of us will gladly pay.

It is my hope—and I know this hope is shared by all the peoples of the world—that we can some day cast off the heavy burden of armaments and devote our full energies to fighting the only war in which all mankind can be victorious—the war against poverty, disease, and human misery.

This Nation will continue to do everything in its power to transform that hope into reality.

HARRY S. TRUMAN.

JANUARY 21, 1952.

PART I

SUMMARY TABLES

Table 1. Résumé of Budget Receipts, Expenditures, and Public Debt

Table 2. Résumé of New Obligational Authority (by Type and Function)

Table 3. Effect of Financial Operations on the Public Debt

Table 4. Summary of Budget Expenditures (by Agency)

Table 5. Summary of New Obligational Authority (by Agency)

Table 6. Summary of Budget Authorizations (by Type of Authorization and Agency)

Table 7. Summary of Budget Expenditures in Relation to Authorizations (by Agency)

A1

INTRODUCTION TO PART I

Part I of the Budget (pages A1 to A13) contains seven summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in one to three pages some aspect of the over-all presentation of the Federal Budget.

TYPES OF FEDERAL FUNDS

The Federal (Government-owned) funds which are covered in part I of the Budget are of three types as follows:

The *general* fund is credited with all receipts which are not earmarked by law and is charged with expenditures that are payable out of appropriations of "any money in the Treasury not otherwise appropriated" and out of borrowing. Both in number of items and in amount, most of the Government's transactions are transactions of the general fund.

Special funds are those which are credited with receipts that are earmarked by law for a specific purpose. Some special funds are subject to annual appropriation by Congress. Others are automatically available under the law.

Business enterprise and revolving funds are those which are credited with certain collections (other than taxes) which are earmarked by law to carry out a cycle of business-type operations. Also included in this group are a few funds created by law to expedite, accounting for and administration of, operations financed from two or more appropriations of an agency.

BUDGET RECEIPTS AND EXPENDITURES

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Such receipts include all money covered into the Treasury to the credit of the general fund and of special funds. Budget receipts never include money obtained from borrowing. Because business enterprise and revolving funds are covered on a net basis in the expenditures (see below), budget receipts do not include receipts of such funds.

Basis of stating budget expenditures.—Tables 1, 4, and 7 include information on budget expenditures. The *general* fund expenditures are stated on a checks-issued basis, less refunds and reimbursements received directly into the accounts. An exception to the checks-issued basis is interest on the public debt, for which expenditures are reported on the basis of amounts becoming payable during the year, whether paid or not. *Special* fund expenditures are reported on the basis of checks issued less refunds collected. In the case of *business enterprise and revolving* funds the expenditures are reported on a net basis; that is, the collections received by the fund are deducted from checks issued, and the resulting figure is shown as an expenditure. Where the collections are larger than the checks issued, the amount included in the expenditures is a negative figure.

Repayments of borrowing are always excluded from budget expenditure figures. Similarly, net investments in United States Government securities are excluded from the expenditure figures.

Eliminations from both receipts and expenditures.—Certain payments from one fund to another are eliminated from budget receipts and expenditures. This is standard accounting practice and it is done in order to avoid inflating both sides of the Budget. General fund investments in business enterprise and revolving funds, the payments of earnings and dividends on such capital, and the return of such capital to the general fund are the types of items which have been so excluded.

BUDGET SURPLUS, DEFICIT, AND PUBLIC DEBT

Budget surplus and deficit.—The budget surplus or deficit, shown in table 1, represents the difference between budget receipts and budget expenditures in the year. Cash balances at the opening or closing of the year have no effect upon the figure. Similarly, surpluses and deficits of previous years do not enter into the calculation. Therefore, a budget surplus of one year is not used in the tables to influence a budget deficit of a following year.

The public debt.—The last section of table 1 summarizes and table 3 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount of the debt which it is necessary to borrow or which it is possible to redeem is also influenced by: changes in the Treasury cash balance, the result of trust fund transactions, the use of Government corporation debt to the public as a means of financing budget expenditures of the corporations (and vice-versa in the case of repayments), and the change in the amount of outstanding checks and other items in process of clearance through the accounts.

TIMING OF AUTHORIZATIONS

Distinction between permanent and current authorizations.—Tables 2 and 6, as well as the detail in part II, distinguish permanent authorizations from current authorizations. The "permanent" items are those under which new money becomes available from time to time under action previously taken by the Congress; no further action is required each year. The "current" authorizations are those enacted by Congress in or immediately preceding each fiscal year.

Items proposed for later transmission.—While the summary tables of the Budget present a complete financial program, the details in part II are not a formal transmittal of the entire Budget. Tables 1, 2, and most of the other tables in the Budget identify by separate columns the estimate of amounts which it is expected will be transmitted later. Such items include: (a) supplemental estimates for the current year, (b) appropriations and other authorizations to carry out programs for which authorizing legislation is to be submitted in advance of recommended appropriation language, (c) proposed legislation which would affect receipts, and (d) an allowance for items which cannot be foreseen now but which will be transmitted later when definite amounts can be determined and the needs can be more specifically identified. The last-named allowance is called a "reserve for contingencies"; congressional

action upon it will be requested later, not as a single lump sum item, but in the form of a number of specific appropriations for individual items.

TYPES OF AUTHORIZATIONS

In tables 2 and 6 budget authorizations are classified according to types as follows:

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. Most appropriations confer authority both to incur obligations and to expend money. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; when this has happened, the portion of the appropriation which is to permit the payment of such obligations is said to be "for liquidation of prior contract authorizations."

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to make expenditures from borrowed money. Such authorizations may take these forms: (a) authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (b) authorizations for a Government-owned corporation to borrow directly from the public; and (c) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation restores or increases the authority to spend from debt receipts.

Reappropriations and *reauthorizations* are actions to continue available part or all of the unused balance of a prior appropriation or authorization which would otherwise expire.

Total new obligational authority shown in tables 2 and 5 is the sum of the various types of authorizations named, less the portion of appropriations which is merely for liquidation of prior contract authorizations. This total represents the new authority becoming available for the purpose of making commitments in any given year.

RELATING EXPENDITURES TO AUTHORIZATIONS

The last section of table 2 and all of table 7 are devoted to summarizing the relationship between budget authorizations and budget expenditures. Most budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time. Even those

which expire for obligational purposes at the end of 1 year remain available for making expenditures in payment of such obligations for an additional 2 years. Therefore, a substantial portion of each year's expenditures comes from authorizations of prior years, and a substantial portion of each year's authorizations is carried over into future years before it is spent.

Because old and new money are commingled in some of the accounts, no attempt is made in the summary figures to separate actual spending in 1951 between the old and the new authorizations. However, the Budget presents such a breakdown on an estimated basis for 1952 and 1953. In the case of business enterprise and revolving funds, it assumes that budget authorizations are expended in an amount equal to the portion credited to the revolving fund during the year. The remainder of the revolving fund expenditures (or expenditure credits) are not related to budget authorizations, and are here classified as being charges or credits to "receipts of the enterprise."

CLASSIFICATIONS

Budget receipts shown in table 1 are classified according to source. A more detailed itemization of this classification appears in Special Analysis C of part IV.

Expenditures and authorizations are classified by functions in tables 1 and 2, as in the Budget Message. This classification indicates the broad purposes and groups of programs for which expenditures are made by the Government. A more detailed list of the contents of each functional category appears in Special Analysis B of part IV.

Expenditures and authorizations are classified by major organization unit in tables 4 through 7. This indicates the agency which receives the budget authorization. Expenditures are shown opposite the same agency, even though a portion of the money is sometimes spent through allocations, advances, or reimbursements made to another agency. The details for each organization unit are found in part II of the Budget.

ACCOUNT RECLASSIFICATION

Since the issuance of the last Budget, a number of accounts have been reclassified from one fund group to another in order that they can be included in the fund category where they properly belong. For comparability in this Budget, such reclassified accounts are shown for the year 1951 in the same fund group and in the same manner as they are now classified for 1952 and 1953. This necessarily has caused minor differences between the figures presented here and the amounts shown in other Government reports for the past year.

TABLE 1
RÉSUMÉ OF BUDGET RECEIPTS, EXPENDITURES, AND PUBLIC DEBT

Expenditures in year (see table 7):							
Out of new obligational authority.....		40, 804	1, 712	42, 516	37, 995	5, 582	43, 577
Out of appropriations to liquidate prior contract authorizations.....		2, 636	60	2, 696	3, 237		3, 237
Out of balance of prior expenditure authorizations.....		26, 426		26, 426	38, 756	608	39, 364
Net expenditures (receipts (—)) of business enterprise and revolving funds.....		—757		—757	—734		—734
Total Budget expenditures (table 1).....		69, 109	1, 772	70, 881	79, 254	6, 190	85, 444

TABLE 3
EFFECT OF FINANCIAL OPERATIONS ON THE PUBLIC DEBT

Based on existing and proposed legislation

[For the fiscal years 1951, 1952, and 1953. In millions]

Description	1951 actual	1952 estimate	1953 estimate
Net results of financial operations for the year:			
Budget surplus (—) or deficit (+) (from table 1)	—\$3,510	+\$8,201	+\$14,446
Excess of trust receipts over expenditures (—) (from table 8) ..	—4,142	—3,590	—3,718
Issue (—) or redemption (+) of Government corporation debt to the public (from special analysis H)	—10	—98	—37
Change in Treasury cash balance, increase (+) or decrease (—) ..	+1,840	—3,357
Change in clearing account for outstanding checks, etc., increase (—) or decrease (+)	+214	—17	—75
Total, increase (+) or decrease (—) in public debt held by the public	—5,608	+1,139	+10,616
Net borrowing from (+) or repayment to (—):			
Trust funds (from special analysis H)	+3,369	+3,836	+4,079
Government-owned corporations and enterprises (from special analysis H)	+104	+25	+5
Total, increase (+) or decrease (—) in public debt held by trust funds and Government investment accounts	+3,473	+3,861	+4,084
Net increase (+) or decrease (—) in public debt	—2,135	+5,000	+14,700
Public debt at beginning of year	\$257,357	\$255,222	\$260,222
Net increase (+) or decrease (—) in public debt	—2,135	+5,000	+14,700
Public debt at end of year	255,222	260,222	274,922

MEMORANDUM

Treasury cash balance:			
At beginning of year	\$5,517	\$7,357	\$4,000
At end of year	7,357	4,000	4,000
Change in Treasury cash balance, increase (+) or decrease (—)	+1,840	—3,357
Clearing account for outstanding checks, etc.:			
At beginning of year	\$897	\$683	\$700
At end of year	683	700	775
Change in clearing account for outstanding checks, etc., increase (—) or decrease (+)	+214	—17	—75

Department of Labor
Post Office Department
Department of State
Treasury Department
District of Columbia

INTRODUCTION TO PART II

Part II contains the details of the Budget for Federal funds, including various types of tables and schedules, narrative statements on the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. This part also includes material on funds of the municipal government of the District of Columbia.

The contents of part II are arranged in chapters, and the totals are carried forward to various tables of part I. An exception occurs in the case of the figures pertaining to municipal revenues of the District of Columbia which do not enter into the totals of Federal funds, but are included within the trust fund totals in part III.

SUMMARIES OF NEW AUTHORIZATIONS AND EXPENDITURES

At the beginning of each chapter a table on the left page summarizes new authorizations, and a table on the right page summarizes expenditures. Both tables segregate the items proposed for later transmission, for which no details appear in this Budget, from those items already enacted or recommended in this Document.

Summary of new authorizations.—This summary indicates the totals of each type of authorization to incur obligations or make expenditures. The various types of authorizations are explained in the Introduction to part I (pages A2 and A3). The figures come from the detail in the chapter and are carried forward into table 6 and from there to tables 5 and 2 of part I. Grand totals are shown for the new obligational authority enacted or recommended.

The appropriation figures for 1951 shown in this summary and in the detail exclude the portions of appropriations which were subsequently rescinded by Congress. The supplemental appropriation figures for 1952 include as a separate figure the estimated supplementals required to meet the cost of changes in pay scales resulting from action already taken by Congress.

Summary of expenditures.—This summary indicates the total expenditures for the chapter. For the years 1952 and 1953, it estimates the portion of the expenditures which come out of appropriations or other authorizations currently granted by Congress, and the expenditures coming from permanent authorizations and from the balances of prior authorizations. Additional entries are used where required for expenditures which will come from appropriations currently made to liquidate prior contract authorizations, and for the net expenditures of business enterprise and revolving funds. Because old and new money are commingled in some of the accounts, no attempt is made in the summary figures to separate actual spending in 1951 between the old and the new authorizations.

The figures are taken from the detailed analysis schedules appearing throughout the chapter. The amounts shown here are carried forward into table 7 and from there the totals are taken into tables 4, 2, and 1 of part I.

In computing the figures for 1952 and 1953, both here and in the detail, it is generally assumed that the old money available in commingled accounts will be obligated before the new money is obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience. In the case of business enterprise and revolving funds which receive appropriations or other

budgetary authorizations, the table assumes that any budgetary authorizations for such funds are spent in an amount equal to the portion of the authorization actually credited to the revolving fund during the year. Therefore, the lines here for expenditures from appropriations or other budgetary authorizations include payments to business enterprise and revolving funds.

The lines here for expenditures charged (or credited) to receipts of the enterprise consist only of the portion of the total expenditures of the enterprise, not already chargeable to the budget authorizations. This is in contrast to the detailed schedule which follows, where expenditures out of budget authorizations and out of revolving fund receipts are merged into a single set of figures for each business enterprise.

STATEMENT OF AUTHORIZATIONS AND EXPENDITURES BY ACCOUNT TITLE

A double-page spread lists the organization units and account titles for the chapter, and shows the budget authorizations and expenditures for each. The accounts are divided into several sections: Current authorizations other than business enterprise and revolving funds, permanent authorizations, business enterprise and revolving funds, and supplemental items (other than pay increases) proposed for later transmission. Supplementals for pay increases are set forth in separate columns in the same portion of the statement as the regular authorizations to which they relate.

Special types of authorizations are set forth under the applicable appropriation titles, identified by separate stub entries. Functional code numbers appear in a separate column, indicating the category in the Budget Message and in the functional tables where each account shown here has been included.

A separate group of headings is used for business enterprise and revolving funds. This portion of the table shows the total amounts provided by operations, the total amounts applied to operations and the net expenditures (which is the difference between the two other figures just named). In the case of the few funds included here which are solely of an accounting nature (such as the accounts of advances for the Department of Defense), the gross figures are not shown under funds provided and funds applied, but the net expenditure figure is placed in the appropriate column.

DETAILED MATERIAL

The detailed material generally follows the order of the chapter summaries. Thus, the accounts of a given organization unit may be found in several places, if the unit has different types of authorizations and funds.

Within the detailed material, bold-face headings are generally used for account titles for which congressional action is being proposed; light-face headings are used for the accounts which require no action at this time.

The kind of material regularly used on general and special funds is illustrated and explained on the next page.

The three types of financial statements regularly used for business enterprise and revolving funds are illustrated and explained on page 5.

EXPLANATORY ILLUSTRATION OF BUDGETS FOR GENERAL AND SPECIAL FUND ACCOUNTS

APPROPRIATION LANGUAGE

The language proposed by the President for inclusion in the 1953 Appropriation Acts is printed at the head of each item requiring action. The language in the 1952 Appropriation Acts is used as a base. Immediately following the language are citations to relevant laws and the appropriation acts from which the text is taken.

SCHEDULE OF AMOUNTS AVAILABLE

For each account there is shown a brief schedule which lists the appropriations made or required, other sources of money or authority to incur obligations, deductions for the amounts not used within the year, and the amount of "Obligations incurred."

OBLIGATIONS BY ACTIVITIES

Financial requirements are broken down by purpose, program, project, or activity. This breakdown is especially tailored for each agency and account, reflecting the particular duties and responsibilities for which it receives money. Where reimbursements are received from other accounts of the Government, the obligations chargeable to such reimbursements are often placed in a separate portion of this schedule.

NARRATIVE STATEMENTS

The work planned and services proposed to be carried out are described briefly under each appropriation or fund. Where practicable the narrative statements indicate the expected accomplishment in relation to the financial estimates and gives some measures of program and performance. In the case of permanent appropriations, the narrative statements also explain the source of the money and the statutory basis for the appropriation.

OBLIGATIONS BY OBJECTS

There is shown for each account a summary of personal services and a classification of the obligations according to a uniform list of objects. These object classes, numbered from 01 to 16, reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

ANALYSIS OF EXPENDITURES

A new schedule this year shows the relationship between obligations incurred during the year and the amounts disbursed in the same period. The unliquidated obligations (i. e., obligations which have not yet been paid) at the beginning and end of the year are the principal items in making the bridge from obligations to expenditures.

This schedule also distributes the year's expenditures between those which come from authorizations of the same year, here called "current authorizations" (whether of a permanent or non-permanent nature), and those which come from authorizations of a prior year. Expenditures from the pay supplementals forecast for 1952 are also segregated.

Salaries and Expenses, Women's Bureau—

Salaries and expenses: For expenses necessary for the work of the Women's Bureau, as authorized by the Act of June 5, 1920 (29 U. S. C. 11-16), including purchase of reports and material for informational exhibits. [\$379,285, of which not more than \$317,581 shall be available for personal services] *\$364,700.* (Labor-Federal Security Appropriation Act, 1952.)

Appropriated 1952, * \$362,570 Estimate 1953, \$364,700

* The appropriation was reduced to this amount by sec. 704 of the Labor-Federal Security Appropriation Act, 1952.

AMOUNTS AVAILABLE FOR OBLIGATION

	1951 actual	1952 estimate	1953 estimate
Appropriation or estimate	\$389,000	\$362,570	\$364,700

Adjustment in obligations of prior years	474		
Total expenditures	379,555	383,347	366,700
<i>Expenditures are distributed as follows:</i>			
Out of current authorizations	344,821	322,000	323,900
Out of prior authorizations	34,734	43,577	40,570
Out of anticipated 1952 supplemental for pay increases		17,770	2,230

Roman type shows the text used in the 1952 Appropriation Acts.

Brackets enclose material which it is proposed to omit in 1953.

Italic type indicates proposed new language and figures.

The forecast of supplemental 1952 appropriations required due to changes in pay scales is included in the regular schedule. Other supplementals appear at the end of each chapter.

Balances not available after the end of the year, to be lapsed.

Direct obligations are those for which this agency gets the money directly, either by appropriation, contract authorization, reimbursements from outside the Government, or other means.

Obligations shown in this portion of the schedule are financed by other appropriations and accounts, and therefore the amounts shown here are duplicated within the direct obligations section of the paying accounts.

Headings in the narrative statements usually agree with the schedules of obligations by activities.

Executive direction, administrative services, and similar common overhead activities are merely listed, except when there is some unusual circumstance to be explained.

Permanent positions are those of a full-time nature which are of indefinite duration. They include positions which may be filled by persons with temporary appointments.

Average salaries and average grades are computed arithmetically. The average salary may fall either within or outside the salary range of the average grade.

Employment in part-time positions and those of a seasonal nature or of short duration is included here.

Payments for the extra day or days in excess of 52 weeks per year, overtime, night-work differential, holiday pay, etc., are included here.

Obligations refer to orders placed, contracts awarded, and services received during the year, regardless of the time of payment. Appropriations or other obligatory authority must be provided by the Congress before obligations can be incurred.

Since the total of obligations includes the reimbursable items, but the expenditure figures are necessarily net of reimbursements (primarily to avoid duplicate accounting for the Government as a whole), it is necessary to deduct reimbursements in arriving at expenditure figures.

Obligations which have been incurred but not yet paid are estimated as closely as possible, but the eventual payment may be in a slightly different amount from the obligation first reported. This line indicates the difference arising from this cause.

This is an example where successive annual appropriations are made. If appropriations of two or more years were merged under the law, a single figure would appear in the 1951 column for expenditures out of both current and prior authorizations.

EXPLANATORY ILLUSTRATION OF BUDGETS FOR BUSINESS ENTERPRISE AND REVOLVING FUNDS

The three financial statements shown below are regularly used for business enterprise and revolving funds. Such funds also have narrative statements on program and performance. The material on budgetary authorizations for such funds and on limitations on expenses follow the general format illustrated on the opposite page.

STATEMENT OF THE SOURCES AND APPLICATION OF FUNDS

This is a balanced presentation of the amounts becoming available during the year, either in the form of cash or other working capital, and the way in which those amounts have been used.

The statement excludes depreciation, losses on loans, and other transactions which affect neither cash nor other current assets and liabilities. It does reflect transactions which affect cash, accounts receivable, accounts payable, other accrued liabilities, inventories of supplies for administrative purposes, deferred charges and credits.

Both the funds applied and the funds provided parts of the statement are divided between "operations" and Treasury "financing." The sum of the amounts applied to operations less the amounts provided by operations equals the net expenditures, which are included within the budget expenditures for the Government as a whole.

A. Statement of sources and application of funds

[For fiscal years ending June 30, 1951, 1952, and 1953]

	1951 actual	1952 estimate	1953 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Equipment.....	\$18,238	\$18,000	\$18,000
Expenses:			
Purchase of materials.....	646,616	630,000	630,000
Other expenses.....	877,386	966,500	966,500
Total expense.....	1,524,002	1,596,500	1,596,500
Subtotal.....	1,542,240	1,614,500	1,614,500
Increase in selected working capital items.....	192,864	14,357	6,266
Total funds applied to operations.....	1,735,104	1,628,857	1,620,766
To financing: Increase in Treasury cash.....	133,633	633	
Total funds applied.....	1,870,737	1,629,500	1,620,766
FUNDS PROVIDED			
By operations:			
Realization of assets: Equipment.....	2,496	3,500	2,500
Income:			
Sales of goods and services.....	1,556,956	1,624,500	1,615,500
Rental income from quarters.....	1,285	1,500	1,500
Total income.....	1,558,241	1,626,000	1,617,000
Total funds provided by operations.....	1,570,737	1,629,500	1,619,500
By financing:			
Appropriation.....	\$300,000		
Decrease in Treasury cash.....			\$1,266
Total funds provided.....	1,870,737	\$1,629,500	1,620,766

Purchases for manufacture or sale are shown here, whether or not the materials are used within the year.

The amounts applied to operations, other than changes in working capital, are usually broken down by object class in a supporting schedule. Where there are annual congressional limitations on administrative expenses, the object schedule is usually limited to the expenses which are under limitation.

The change in selected working capital items will equal the difference between the figures on statement C for two successive years for current assets, other than Treasury cash and inventories for sale and manufacture, less current liabilities.

EFFECT ON BUDGETARY EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Funds applied to operations.....	\$1,735,104	\$1,628,857	\$1,620,766
Funds provided by operations.....	1,570,737	1,629,500	1,619,500
Net effect on budgetary expenditures.....	164,367	-633	1,266
The above amounts are charged (or credited (-)) as follows:			
To budgetary authorizations.....	300,000		
To net receipts of the enterprise.....	-135,633	-633	1,266

Net effect on budgetary expenditures includes the spending of appropriations for the revolving fund as well as the spending of the fund's own receipts. A negative figure here indicates collections in excess of expenditures.

STATEMENT OF INCOME AND EXPENSES

This is a statement of the income and expenses and the resulting profit or loss for the year. This statement is normally on a full accrual basis, including in the expenses sums for depreciation and provision for losses on receivables. It also indicates losses and charge-offs when they occur. In addition, gains or losses from the sale of equipment or other assets appear here.

At the bottom of this statement there is an analysis of the retained earnings or cumulative deficit, showing any additions to it during the year, any charges made against it, and the balance at the end of the year.

B. Statement of income and expenses

[For fiscal years ending June 30, 1951, 1952, and 1953]

	1951 actual	1952 estimate	1953 estimate
Income:			
Sales of goods and services.....	\$1,556,956	\$1,624,500	\$1,615,500
Rental income from quarters.....	1,285	1,500	1,500
Total income.....	1,558,241	1,626,000	1,617,000
Expenses:			
Cost of materials sold:			
Purchase of materials.....	646,616	630,000	630,000
Materials donated.....	3,033	2,901	3,000
Change in materials inventory.....	4,263	18	
Cost of materials sold.....	653,912	632,919	633,000
Other expenses.....	877,386	966,500	966,500
Depreciation on equipment.....	26,492	25,000	25,000
Total expenses.....	1,557,790	1,625,419	1,624,500
Net income (or loss (-)) from operations.....	10,451	2,481	-7,500
Nonoperating income:			
Proceeds from sale of fixed assets.....	2,496	3,500	2,500
Net book value of assets sold.....	872	2,000	2,000
Gain on sale of fixed assets.....	1,624	1,500	500
Net income (or loss (-)) for the year.....	12,075	3,981	-7,000
Retained earnings beginning of year.....		12,075	16,056
Retained earnings end of year.....	12,075	16,056	9,056

Income (as well as expenses) is usually based on the accrual method of accounting.

Cost of goods sold, rather than purchases, is considered an expense in this statement.

Depreciation and other expenses not shown on statement A are indicated separately.

Retained earnings here agrees with the balance sheet. It represents cumulative profits kept in the business, whether in the form of cash, inventories, receivables, or fixed assets.

STATEMENT OF FINANCIAL CONDITION

This is a balance sheet of assets, liabilities, and investment of the Government at the close of the fiscal year. Like the other statements, it is normally on an accrual basis.

The section for the Government's financial interest is broken down to indicate the amount which has been invested by the Government on which the fund pays interest (if any), the amount invested on which the fund does not pay interest, and the retained earnings or deficit.

C. Statement of financial condition

[As of June 30, 1951, 1952, and 1953]

	1951 actual	1952 estimate	1953 estimate
ASSETS			
Current assets:			
Cash with U. S. Treasury.....	\$135,633	\$136,266	\$135,000
Accounts receivable.....	345,044	340,000	340,000
Inventory of supplies and materials.....	95,019	95,001	95,001
Total current assets.....	575,696	571,267	570,001
Fixed assets:			
Equipment.....	291,451	295,451	299,451
Less: portion charged off as depreciation.....	101,648	114,648	127,648
Total fixed assets.....	189,803	180,803	171,803
Total assets.....	765,499	752,070	741,804
LIABILITIES			
Current liabilities:			
Accounts payable.....	\$124,073	\$110,000	\$104,734
Accrued expenses.....	126,338	121,000	120,000
Total liabilities.....	250,411	231,000	224,734
INVESTMENT OF U. S. GOVERNMENT			
Principal of fund:			
Appropriation.....	300,000	300,000	300,000
Donated assets, net.....	203,013	205,014	208,014
Total principal of fund.....	503,013	505,014	508,014
Retained earnings.....	12,075	16,056	9,056
Total investment of U. S. Government.....	515,088	521,070	517,070
Total liabilities and investment of U. S. Government.....	765,499	752,070	741,804

Cash with United States Treasury is the sum that the fund has on deposit with the Treasury. It excludes any balances of appropriations (or other authorizations) which have not yet been paid into the business enterprise or revolving fund.

Liabilities normally means what is owed for goods and services which have been received. The remainder of the obligations outstanding, covering items on order which have not yet been received, is shown as a footnote.

The investment of the United States Government indicates the Government's interest as owner, plus the Government's interest as creditor in the form of notes payable to the Treasury where a Government corporation has authorization to borrow on such notes.

¹ Excludes obligations outstanding for items on order of \$28,410 as of June 30, 1951; \$22,000 as of June 30, 1952; and \$22,000 as of June 30, 1953.

LIBRARY OF CONGRESS

INTRODUCTORY STATEMENT

The Library of Congress, established by an act of Congress approved April 24, 1800, is not only the library of the Congress itself, but is also the general library of the Government of the United States, complemented in special fields by other Government libraries. Its collections are comprehensive and varied, and include important manuscripts, maps, music, prints, photographs, newspapers, documents of all governments of the world, oriental literature, etc. In addition to housing the collections and performing general and basic services connected therewith, certain specialized functions are performed: the Legislative Reference Service, copyright, catalog card distribution, and the service of books in raised characters and talking books to the adult blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1951 and estimated for 1952 and 1953 are:

	1951 actual	1952 estimate	1953 estimate
General and basic services:			
Acquisitions.....	\$916,408	\$1,024,673	\$1,257,201
Organization of the collections.....	1,330,543	1,464,461	1,758,146
Reader and reference services.....	1,160,599	1,290,155	1,646,211
Maintenance and protective services.....	697,015	786,485	837,572
Executive direction and general administrative services.....	602,339	651,891	725,048
Specialized services:			
Legislative Reference Service.....	852,444	887,126	979,526
Copyright.....	926,959	1,040,880	1,087,040
Catalog-card distribution service.....	1,101,929	1,172,676	1,436,838
Books for the adult blind.....	998,902	1,000,000	1,000,000
Total obligations.....	8,587,138	9,318,347	10,727,582

The Library's first obligation is to Congress; the second to other agencies of the Government; and the third to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, working, transferred, and allocated funds.

Certain responsibilities for the physical equipment, maintenance, and operation of the Library buildings rest by law with the Architect of the Capitol, and estimates for these purposes are carried under the request of that office.

For the general and basic services, the major objective in 1953 will be to enable the Library to acquire, process, and give reference service on the much greater volume and variety of materials it must collect in order to meet the vastly enlarged informational needs of the Congress and Federal agencies under present world conditions; to strengthen the staff providing reference service on the areas that have become critical in the present emergency; to meet the increased service demand resulting from the creation of many new agencies; and to gradually reduce accumulated arrearages that prevent full use of materials already on hand. Some additions to the staff are proposed for a few operations which are threatened with a serious breakdown. No new projects are proposed. For the specialized services, the objectives in 1953 will be the strengthening of the staff, organization, and techniques to meet the demands of Congress (Legislative Reference Service) and of the public (copyright, catalog card distribution, and the service of books for the adult blind).

Salaries, Library Proper, Library of Congress—

Salaries, Library proper: For the Librarian, the Librarian Emeritus, and other personal services including special and temporary services and extra special services of regular employees (not exceeding \$5,000) at rates to be fixed by the Librarian, services as author-

ized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and personal services for printing and binding, [\$3,124,204] \$4,147,930, of which so much as may be necessary may be transferred to other agencies of the Government for the purpose of investigating the loyalty of Library employees, and for health service program as authorized by law. (2 U. S. C. 131-166; 5 U. S. C. 150; 20 U. S. C. 91; 52 Stat. 808; Legislative Branch Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

Personal services required for the basic operations of the Library are financed from this appropriation.

1. *Acquisition of Library materials.*—The development of the collections of the Library is planned; materials are procured by purchase, gift, exchange, copyright deposit, transfer, or otherwise; and materials are selected for addition to the collections. The objectives for 1953 are: greater selectivity and improved efficiency in the procurement of materials, with emphasis on the publications of the Far East, Near East, South Asia, and Eastern Europe; improvement in recording the receipt and holdings of serial publications; and the strengthening of exchange relations with institutions in critical areas. The collections totaled 29,317,852 items as of June 30, 1951, and consisted of 9,241,765 books and pamphlets; 12,163,121 manuscript pieces; and 7,912,966 maps, pieces of music, reels of microfilm, photographs, and the other miscellaneous items. A continued increase in receipts from various sources is anticipated in 1952 and 1953:

Description	1951 actual	1952 estimate	1953 estimate
Purchase.....	\$313,302	\$350,000	\$400,000
Copyright.....	356,988	374,000	390,000
Transfer and deposit (principally from Government agencies).....	1,208,410	2,000,000	2,000,000
Gift from individual and unofficial sources.....	315,936	500,000	500,000
Exchange.....	676,681	700,000	725,000
Source unidentified (mainly newspaper and periodical issues).....	2,274,059	2,500,000	2,500,000
Total.....	5,145,376	6,424,000	6,515,000

Of the pieces received about 1½ million items are added to the collections annually.

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs maintained; and binding operations controlled. The objectives for this activity in 1953 are: improvement of the cataloging of scientific publications and the cataloging of additional foreign language publications.

Selected performance data for 1951 and estimated for 1952 and 1953 are as follows:

Description	1951 actual	1952 estimate	1953 estimate
Volumes fully cataloged and added to the classified collection.....	121,160	130,000	140,000
Items otherwise organized for use (without full cataloging).....	13,412	18,000	25,000
Cards filed in catalogs.....	1,281,070	1,300,000	1,300,000
Volumes sent to bindery.....	56,860	60,000	65,000
Items repaired, cleaned, mounted, etc.....	144,477	145,000	145,000

NOTE.—These figures are for the Processing Department only and do not reflect cataloging, filing, binding, and related processing operations performed by other departments of the Library.

3. *Reader and reference service.*—Books and other library materials are provided within and without the Library and reference assistance rendered. The objectives of this activity for 1953 are: more adequate service to readers during the 52 hours of full service and the 26 hours of limited service, the expansion of the area and language specialization program in regions of critical importance, and to strengthen basic departmental operations such as the shelving of incoming materials, cataloging of nonbook materials (maps, prints, photographs), the selection and preparation of materials for binding, and the interpretation of the collections through the preparation of bibliographies and check lists. The upward trend in workload is expected to continue in 1952 and 1953.

Description	1951 actual	1952 estimate	1953 estimate
Books and pamphlets served.....	1,482,866	1,500,000	1,600,000
Other units of material served.....	610,653	650,000	675,000
Units issued on loan.....	226,059	245,000	265,000
Reference inquiries answered (includes telephone requests for reference service and loans, aid to readers, and reference correspondence).....	615,407	630,000	645,000
Reference letters.....	28,890	30,000	32,000

4. *Executive direction and general administrative services.*—Over-all executive direction is given and general administrative services are provided for the entire staff of the Library. Positions under this activity represented 7.2 percent of the total number of positions (inclusive of the full-time equivalent of part-time and temporary positions) financed by appropriated funds during 1951; estimated for 1952 and 1953, they will represent 7.15 percent and 6.56 percent respectively. Emphasis during 1953 will be placed on increased mechanization, improvements in procedures, better utilization of space, and forms control.

PROGRAM AND PERFORMANCE

The Copyright Office is responsible for recording and cataloging all copyright applications, assignments, and renewals; supplying copyright information to the public; and for collecting and accounting for copyright fees. The office is conducted as a business operation. The amount requested for personal services is approximately equal to the fees received for services rendered. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress are also to be credited to the copyright operation. The income and costs for 1951 and estimates for 1952 and 1953 are as follows:

	1951 actual	1952 estimate	1953 estimate
<i>Income:</i>			
Fees applied.....	\$797, 959	\$837, 856	\$879, 748
Estimated value of materials deposited.....	590, 398	619, 904	650, 875
Total.....	1, 388, 357	1, 457, 760	1, 530, 623
<i>Costs:</i>			
Salaries.....	889, 007	1, 001, 380	1, 042, 540
Printing and binding catalog of title entries.....	37, 952	39, 500	44, 500
Other costs.....	31, 380	24, 900	27, 950
Total.....	958, 339	1, 065, 780	1, 114, 990

The objective for 1953 is to keep current with the workload at all times, and to render prompt and efficient service to the public. The program and performance under each of the activities described are predicated on an estimated 220,800 copyright registrations during 1953, an estimated 210,300 during 1952, and an actual 200,354 during 1951. The basis for the estimated increase between 1951 and 1953 is an anticipated increase of 5 percent in registrations for each year.

1. *Receiving and accounting for applications, etc.*—All materials mailed or delivered to the Copyright Office are received, assembled, and routed; accounts maintained for all monies received; records relating to the registration of copyrights filed; and materials deposited in accordance with the Copyright Act. Performance data for 1951 and estimates for 1952 and 1953 are as follows:

Description	1951 actual	1952 estimate	1953 estimate
Registrations.....	200, 354	210, 300	220, 800
Mail received and dispatched.....	474, 741	498, 500	523, 500

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data for 1951 and estimates for 1952 and 1953 are as follows:

Description	1951 actual	1952 estimate	1953 estimate
Items examined for registration.....	264, 525	277, 750	291, 600
Registrations.....	200, 354	210, 370	221, 000
Examination and recordation of documents.....	7, 604	8, 000	8, 400

3. *Indexing and cataloging all materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. In the interest of over-all economy and the elimination of overlapping activities, the Copyright Office also prepares full catalog entries in accordance with Library of Congress cataloging rules on about 10-20 percent of the items registered.

Performance data for 1951 and estimates for 1952 and 1953 are as follows:

Description	1951 actual	1952 estimate	1953 estimate
Registrations cataloged.....	200,354	210,370	221,000

4. *Reference services.*—The Copyright Office makes available to the public, on a fee basis, information concerning copyright registrations, the provisions of the Copyright Act, including procedures, policies, and rulings. Obtaining compliance with registration requirements is also part of this activity. Performance data for 1951 and estimates for 1952 and 1953 are as follows:

Description	1951 actual	1952 estimate	1953 estimate
Titles searched.....	39,138	41,100	43,200
Letters and search reports written.....	15,780	16,600	17,500

5. *General supervision and legal services.*—The work of the Copyright Office is supervised and coordinated; this includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects, such improvement constituting the major objective under this activity in 1953.

PROGRAM AND PERFORMANCE

To carry out the objectives of the Legislative Reorganization Act of 1946, research reports and digests are prepared and inquiries from Members and committees of Congress relating to legislative problems and programs are answered. The objectives for 1953 are: the readjustment of all activities to an anticipated increase in the number of inquiries and more adequate research coverage in areas of congressional concern.

1. *Authoritative research and analysis.*—The Legislative Reorganization Act of 1946 specifies 21 fields of specific congressional concern. During 1952 the following 11 fields, all carried forward from 1951, are to be covered: international economics, international relations, taxation and fiscal policy, American Government and public administration, conservation and natural resources, social welfare, American law, labor economics, engineering and public works, transportation and communications, and housing. It is proposed in 1953 to add two additional fields: money and banking and industrial organization.

2. *General research.*—General research is performed and reports furnished; spot reference inquiries answered; graphs, charts, and illustrations prepared; and translations made. Congressional inquiries numbered 45,139 in 1951, which was 6.2 percent over 1950. A continuation of the increase of at least the existing rate is anticipated, which would make the total for 1952, 47,938, and for 1953, 50,910. Sufficient staff is requested for 1953 to provide more adequate handling of the substantial increase in inquiries since 1950.

3. *Preparation of abstracts, indexes, digests, and summaries.*—The Digest of Public General Bills covered 15,000 bills during the Eighty-first Congress, and 8,000 bills during the Eighty-second Congress (to September 4,

LIBRARY OF CONGRESS—Continued

LEGISLATIVE REFERENCE SERVICE—continued

Salaries and Expenses, Legislative Reference Service, Library of Congress—Continued

1951); a further increase is expected during the Eighty-second Congress, second session.

4. *Reference files, bibliographic and reader services.*—Reference files, containing clippings, pamphlets, and documents, are maintained; researchers supplied with bibliographic and reference tools; selective and comprehensive bibliographies prepared for Members and committees of Congress; and reader services provided by the Congressional Reading Room. During 1951, 73,951 reference file items were processed, 13,647 bibliographic entries prepared, 19,883 published items acquired and processed, and 3,142 readers served. The increase in activity represents a 30 percent increase in 1951 over 1950 and it is expected to maintain this level in 1952 and 1953.

5. *General supervision.*—The equivalent of eight positions is devoted to over-all direction and supervision of the Legislative Reference Service and sufficient staff is requested to permit more expeditious handling of mail and delivery service to congressional offices.

PROGRAM AND PERFORMANCE

The work of the Card Division is that of a mail-order house doing a business of about \$1,000,000 per annum. It maintains a stock of over 159,000,000 cards, representing some 2,000,000 titles, and fills orders for more than 9,400 subscribers in the United States and abroad. It also prepares and offers for sale certain publications. More than 97 percent of this appropriation is chargeable to the cost of card and publication sales, and this cost plus 10 percent profit is returned to the Treasury. The remaining 3 percent represents a service to the Library of Congress. The objectives for 1953 are: the greater use of card reproduction by means other than printing; expediting operations with resulting reduction in costs to card subscribers; and increasing the scope and utility of the Library's Author and Subject Catalogs in book form, by publishing a 5-year cumulation of the Author Catalog in 1953 and preliminary work for a similar cumulation of the Subject Catalog to be issued in 1954.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1951 was 4,293,453; estimated for 1952, 4,300,000, and for 1953, 4,900,000.

2. *Sale of cards to other libraries.*—The number of cards sold in 1951 was 20,702,601; estimated for 1952, 23,000,000, and for 1953, 28,750,000.

3. *Preparation and distribution of publications.*—Continued emphasis will be placed on the improvement and

wider distribution of the two Library catalogs issued periodically in book form: The Author Catalog (formerly the Cumulative Catalog) and the Subject Catalog, the latter begun in 1950, and both widely accepted as important bibliographic tools.

OBLIGATIONS BY ACTIVITIES

Maintaining Union Catalog—1951, \$77,000; 1952, \$86,430; 1953, \$104,276.

PROGRAM AND PERFORMANCE

The National Union Catalog is a centralized and co-operatively maintained record of the holdings of more than 700 research libraries of the United States and Canada. It contains more than 13,000,000 cards and is consulted daily by libraries and research institutions in all parts of the United States and the world, as well as by representatives of Government agencies, visiting scholars, and the Library's own staff, in order to locate copies of research works. The staff files cards received, notes additional locations for works already represented in the catalog, eliminates duplicate entries, edits the entries received, and responds to inquiries from other libraries.

It is proposed in 1953 to gradually reduce an arrearage of 2,750,000 unfiled cards on a project basis and to continue to acquire through photographic reproduction methods entries for materials not represented in the National Union Catalog, the inclusion of which may have special value at this juncture in history; i. e., collections of scientific materials and publications relating to critical areas. To the extent possible, the continuing program of adding cards received regularly from other libraries will be maintained as well as the reference service on the catalog.

The number of cards for, and locations of, research materials added in 1951 was 959,140. The same number is estimated for 1952 and 1953. The number of titles searched in response to inquiries in 1951 was 17,272. The same number is anticipated for 1952 and 1953. These figures do not include inquiries answered through the use of the Union Catalog by readers themselves or the use of the Union Catalog by members of the Library of Congress staff.

LIBRARY OF CONGRESS—Continued

INCREASE OF THE LIBRARY OF CONGRESS

General Increase of the Library of Congress—

General increase of the Library: For purchase of books, miscellaneous periodicals and newspapers, photocopying supplies and photocopying labor, and all other material for the increase of the Library, including payment in advance for subscription books and society publications, and for freight and expressage, postage, commissions, and traveling expenses not to exceed \$25,000, including expenses of attendance at meetings when incurred on the written authority and direction of the Librarian in the interest of collections, and all other expenses incidental to the acquisition of material for the increase of the Library by purchase, gift, bequest, or exchange, **[\$270,000]** \$388,000, to continue available during the next succeeding fiscal year. (2 U. S. C. 131, 132, 132a, 139; *Legislative Branch Appropriation Act, 1952*.)

Appropriated 1952, **\$270,000**Estimate 1953, **\$388,000**

OBLIGATIONS BY ACTIVITIES

Purchase of books and other library materials—1951, \$278,518; 1952, \$275,875; 1953, \$388,000.

PROGRAM AND PERFORMANCE

This appropriation constitutes the only means of acquiring regular domestic trade publications, except for copyright deposits, and for many needed foreign publications, both current and noncurrent, from approximately 100 countries or areas. The publications acquired by purchase constitute a most important part of the Library's acquisitions although they represent only a small proportion of the material received annually.

The increase requested in 1953 is necessary in large part to cover increased costs of publications of current materials, to carry on a special Finnish exchange project for the acquisition of strategic materials, to purchase the Naficy Collection of Iranian literature, and for a micro-filming program for the preservation of valuable newspaper and periodical holdings and for the preservation on microfilm of valuable materials in European archives.

Obligations incurred.....	67,697	112,661	95,000

OBLIGATIONS BY ACTIVITIES

Purchase of books and other library materials—1951, \$67,697; 1952, \$112,661; 1953, \$95,000.

PROGRAM AND PERFORMANCE

This appropriation constitutes the only means of acquiring regular trade publications in the legal subjects except for copyright deposits. Though a large part of the annual receipts is acquired by means other than purchase, a very substantial and essential part is purchased to fill gaps in the collections. Pieces purchased in 1951 totaled 43,682; estimated for 1952, 45,000; and estimated for 1953, 45,000. The increase proposed for 1953 is for restoration of the \$95,000 base appropriation in effect prior to 1951 in order to assure the acquisition of current legal materials in critical areas of the world, to fill in significant gaps in the collections of foreign law, to purchase additional copies of certain books and serials for interagency loan to those Federal agencies concerned with pressing international problems, and for increased costs.

PROGRAM AND PERFORMANCE

The Library of Congress program for providing books for the adult blind of the United States, its Territories and insular possessions is authorized by the act of March 3, 1931, 2 U. S. C. 135a, as amended. The moneys authorized to be appropriated annually by this act are used for providing books published either in raised characters, on sound reproduction recordings, or in any other form. Also for the purchase of sound reproduction recordings and for the purchase, maintenance, and replacement of reproducers

for such sound reproduction recordings. The books are circulated through the facilities of 28 regional distributing libraries and the talking book machines are distributed through 55 State lending agencies, with preference given to blind veterans.

The objectives for 1953 are: reactivation of the braille activities of the division; revision of regional distributing library systems in accordance with the exigencies of the service; revision of the procedure for distributing and maintaining a tabulation of talking book machines; improvement of talking book records in accordance with improvements and refinements of talking book machines; improvement in the means and manner of selecting books; establishment of an active advisory committee for book selection purposes similar to the present partially active Book-of-the-Minute Committee and Advisory Group; and preparation of new specifications for talking book records, needles, braille paper, and other equipment used in the program which have not been revised during the 10-year period immediately preceding.

1. *Procurement and distribution.*—Books are selected, purchased and distributed, and talking books are purchased, repaired and replaced.

Description	1951 actual	1952 estimate	1953 estimate
Talking books purchased (titles).....	99	200	200
Embossed books purchased (titles).....	98	200	200
Talking book machines:

(c) Publications.....	19,384	18,000	18,000
Obligations incurred.....	449,905	450,000	536,000

PROGRAM AND PERFORMANCE

Printing and binding requirements of the Library of Congress except those which are financed by special appropriations for card and copyright catalog printing are financed by this appropriation. All but a minor part of the costs are for work done by the Government Printing Office branch bindery operated in the Library Annex.

1. *Organization of the collections.*—Books are bound; manuscripts, maps, etc., are repaired; protective boxes and binders purchased; and other miscellaneous bindery operations performed. It is estimated that increased production in other divisions will increase binding requirements in 1953 to 75,000 volumes, which is approximately 10,000 volumes more than the number (64,830) bound in 1951. Increases for 1953 are to meet this increased workload and for an actual increase of 20 percent in the cost of labor, paper prices, and other supplies and to provide for additional laminating work on maps.

2. *Reference service, publications.*—The Library publishes books and pamphlets usually of a bibliographical character, and descriptive of materials contained in its collections. The increase proposed for 1953 is to meet an actual 25-percent increase in the cost of book paper prices and to publish Volume 3 of the Thomas Jefferson Catalog.

3. *Administrative printing and binding.*—Copyright applications, miscellaneous forms, and other printed matter for general administrative purposes are procured, and the Annual Report of the Librarian and the Quarterly Journal of Current Acquisitions are published. The increases proposed for 1953 are to meet an actual 25 percent increase in book paper prices and a 20 percent increase in other paper prices, and to provide for miscellaneous printed forms at the 1951 level.

OBLIGATIONS BY OBJECTS

06 Printing and reproduction—1951, \$449,905; 1952, \$450,000; 1953, \$536,000.

ANALYSIS OF EXPENDITURES

5. Printing and binding publications related to cataloging.....	73,993	40,000	40,000
Obligations incurred.....	546,882	550,500	769,207

PROGRAM AND PERFORMANCE

Approximately 70 percent of this appropriation for the printing of catalog cards and related publications is chargeable to the cost of card and publication sales, and this cost, plus 10 percent profit, is returned to the Treasury; the remaining 30 percent represents service to the Library of Congress. It is planned in 1953 to keep pace with the anticipated increase in the number of titles cataloged, and to publish a 5-year cumulation of the Author Catalog.

1. *Card printing for the Library of Congress.*—The number of cards printed in 1951 for the Library of Congress was 4,293,453; estimated for 1952, 4,300,000, and for 1953, 4,900,000.

2. *Card printing for other libraries.*—The number of cards printed in 1951 for sale to other libraries was 27,782,010; estimated for 1952, 28,459,225; for 1953, 36,467,075. The estimated increase in the number of cards printed is based in large part on the estimated increase in the number of titles to be cataloged by the larger cataloging staff requested to cut down current cataloging arrearages.

3. *Printing and binding the Author Catalog.*—The Author Catalog is a book catalog of the cards printed by the Library of Congress arranged by author. It is issued monthly and cumulated quarterly and annually. It is planned to issue a 5-year cumulation in fiscal 1953 in lieu of the annual issue for calendar 1952. The quinquennial issue will bring together in one alphabet the entries in the 1948, 1949, 1950, 1951 annual issues and the titles cataloged in 1952. There were 862 paid subscriptions for complete or partial service in 1951; it is estimated there will be 875 in 1952 and 890 in 1953.

The Army Medical Library Author Catalog is an annual supplement to the Author Catalog which lists the cards multilithed by the Library of Congress from copy supplied by the Army Medical Library. Although it is officially a supplement to the Author Catalog it has since 1948 been published and sold as a separate item. There were 240 copies sold in 1951; it is estimated that 250 will be sold in 1952 and 260 in 1953.

4. *Printing and binding the Subject Catalog.*—The Subject Catalog is a book catalog reproducing cards printed by the Library of Congress and arranged according to subject content of the publications represented. It is cumulated quarterly and annually. There were 383 paid subscriptions for 1951; it is estimated there will be 390 in 1952 and 400 in 1953.

5. *Printing and binding of publications related to cataloging.*—These publications are auxiliary to the cataloging

activities of the Library of Congress and include the Classification Schedules, Lists of Subject Headings, Rules of Descriptive Cataloging, Cataloging Service Bulletins, and similar publications. A slight reduction in the publication program is anticipated for 1952 and 1953 as compared with 1951.

OBLIGATIONS BY OBJECTS

06 Printing and reproduction—1951, \$546,882; 1952, \$550,500; 1953, \$769,207.

PROGRAM AND PERFORMANCE

The part of the appropriation dealing with photoduplicating expenses has a dual purpose: (1) providing photoduplicated materials as requested by Congress, its members and its committees, and (2) meeting the administrative photoduplicating requirements of the Library of Congress. The other part of this appropriation is for minor miscellaneous expenses required for the general ad-

ministration of the Library not properly chargeable to other Library appropriations. The increases proposed for 1953 are (1) to meet an actual increase of 20 percent in paper prices, (2) for rental of additional tabulating equipment to be applied to bibliographical controls, (3) for procurement of supplies and containers to prevent deterioration of the motion picture collection for which the Library continues to have custodial responsibility, and (4) to restore the appropriation to its 1951 base.

Obligations incurred.....	697,015	786,485	837,572

PROGRAM AND PERFORMANCE

The two Library buildings and the collections and other properties contained therein are maintained, preserved, and protected.

1. *Maintenance services.*—A staff of 200, including 89 part-time charwomen, preserves, cleans, and maintains the Library buildings, collections, and grounds; operates telephones, elevators, check stands, motor vehicles, and the laundry; procures and maintains furniture, house-keeping materials, and miscellaneous equipment; assigns space; and operates the receiving room and stock rooms. The 1953 estimates provide for 13 additional laborers to render more adequate service to acquisition and custodial divisions in the physical handling of large quantities of unopened containers and incoming materials, and to improve the cleanliness of the buildings and grounds; to receive, shelve, and clean the collections; for increased prices of housekeeping supplies; and for the replacement of obsolete automotive equipment.

2. *Protective services.*—Constant alertness by the guard force is necessary to prevent fire and theft, for the maintenance of order and for regular inspections of all areas in both buildings which contain one of the greatest accumulations of national treasures in the world. For adequate coverage 24 hours per day, 7 days per week, a total of 79 duty stations must be manned a throughout the year by the 66 guards and 13 officers currently on the guard force, which it is proposed to keep at the same level during 1952 and 1953. The 1953 estimates provide for the accelerated replacement of worn and shabby uniforms, and eight additional guards to insure peak strength at all times.

WORKING CAPITAL AND CONGRESSIONAL PRINTING AND BINDING—CON.

Working Capital and Congressional Printing and Binding, Government Printing Office—Continued

bia or elsewhere (not to exceed \$1,000); for salaries and expenses of preparing the semimonthly and session indexes of the Congressional Record under the direction of the Joint Committee on Printing (chief indexer at \$8,000, one cataloger at \$6,600, two catalogers at \$5,628 each, and one cataloger at \$5,015); and for all the necessary labor, paper, materials, and equipment needed in the prosecution and delivery and mailing of the work; in all, **[\$19,200,000]** \$25,000,000; to which sum shall be charged the printing and binding authorized to be done for Congress, including supplemental and deficiency estimates of appropriations; the printing, binding, and distribution of the Federal Register in accordance with the Act approved July 26, 1935 (44 U. S. C. 301-310) (not to exceed **[\$480,000]** \$850,000); the printing and binding of the supplement to the Code of Federal Regulations as authorized by the Act of July 26, 1935, as amended (44 U. S. C. 311) (not to exceed **[\$200,000]** \$400,000); the printing and binding for use of the Government Printing Office; the printing and binding (not to exceed \$5,000) for official use of the Architect of the Capitol upon requisition of the Secretary of the Senate; in all to an amount not exceeding **[\$9,200,000]** \$10,000,000: *Provided*, That not less than **[\$10,000,000]** \$15,000,000 of such working capital shall be returned to the Treasury as an unexpended balance not later than six months after the close of the current fiscal year: *Provided further*, That notwithstanding the provisions of section 73 of the Act of January 12, 1895 (44 U. S. C. 241), no part of the foregoing sum of **[\$9,200,000]** \$10,000,000 shall be used for printing and binding part 2 of the annual report of the Secretary of Agriculture (known as the Year-book of Agriculture).

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the current fiscal year any executive department or independent establishment of the Government ordering printing and binding or blank paper and supplies from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do; all sums received from sales of waste paper, other waste material, and condemned property; and for losses or damage to Government property; shall be deposited to the credit of the appropriation made for the working capital of the Government Printing Office and be subject to requisition by the Public Printer.

No part of any money appropriated in this Act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in the executive branch of the public service of the United States unless such detail be authorized by law. (*Legislative Branch Appropriation Act, 1952.*)

Appropriated 1952, **\$19,200,000** Estimate 1953, **\$25,000,000**

AMOUNTS AVAILABLE FOR OBLIGATION

	1951 actual	1952 estimate	1953 estimate
Appropriation or estimate	\$16,700,000	\$19,200,000	\$25,000,000

Obligations incurred	98,222,845	105,471,493	105,764,919

NOTE.—Reimbursements from non-Federal sources above are from sales of waste paper, other waste material, and condemned property, and for losses or damages to Government property (64 Stat. 607).

PROGRAM AND PERFORMANCE

The Government Printing Office executes orders for printing, binding, and blank-book work placed by Congress and the departments, independent establishments, and agencies of the Federal Government and furnishes, on order, blank paper, inks, and similar supplies.

The amount appropriated each year includes the printing and binding authorized to be done for Congress; for the printing, binding, and distribution of the Federal Register; and \$15,000,000 proposed in 1953 for working capital, which is returned to the Treasury not later than 6 months after the close of the fiscal year. All work for other agencies of the Government is reimbursed on the basis of actual cost incurred.

Obligations incurred.....	2,586,582	2,822,120	3,192,885

PROGRAM AND PERFORMANCE

The Office of Superintendent of Documents is a division of the Government Printing Office which operates under separate appropriations. The work programs are entirely of a service nature and are of such type that there is no control over the volume of work which the Superintendent of Documents is required by law to perform.

(1) *Sales distribution.*—The Superintendent of Documents is authorized by law to sell copies of Government publications purchased from the Public Printer. Acquisition costs are paid from sales receipts, so no appropriation is required for printing sales copies. By provision of law, the sale price is set at the cost of manufacture plus 50 percent. At the end of each fiscal year, excess receipts not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For the fiscal year 1951, earned revenue from this source was \$1,624,234. It is estimated that miscellaneous receipts earned will be \$1,800,000 for 1952 and \$2,100,000 for 1953. The number of sales orders has been steadily increasing, and in the last 10 years the volume of orders has more than doubled and the dollar value of publications sold has more than tripled. The current public interest in the Government's publishing program points to a continuing increase in the volume of orders.

(2) *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents under provisions of law is required to prepare mailing lists, including the mailing list for the Congressional Record, and to perform mailing operations upon the request of any Government agency and without reimbursement from those agencies. Another legal obligation is to handle the mailing of farmers' bulletins, soil surveys, and other publications which are allocated to Members of Congress on a quota basis.

(3) *Depository library distribution.*—The Superintendent of Documents is required by law to supply 1 copy of every Government publication, upon request, to more than 540 libraries which are designated depositories for Government publications.

(4) *Cataloging and indexing.*—The law provides that the Superintendent of Documents shall prepare and distribute catalogs and indexes of all publications issued by the Federal Government. The Monthly Catalog of United States Government Publications and the Numerical List and Schedule of Volumes are the two principal publications which are issued to discharge legal requirements.

	Number	Gross cost	Number	Allowance (estimated)				
Working capital and congressional printing and binding, Government Printing Office.	2	\$2,800	2	\$400	\$2,400	1	-----	To be used by the Public Printer and subordinate officials when such means of transportation is economical and advantageous to the Government.

GENERAL PROVISIONS

SEC. 102. Purchases may be made from the foregoing appropriations under the "Government Printing Office", as provided for in the Printing Act approved January 12, 1895, and without reference to the Act approved June 30, 1949 (Public Law 152) as amended by the Act approved September 5, 1950 (Public Law 754), concerning purchases for the Federal Government.

SEC. 103. In order to keep the expenditures for printing and binding for the current fiscal year within or under the appropriations for such fiscal year, the heads of the various executive departments and independent establishments are authorized to discontinue the printing of annual or special reports under their respective jurisdictions: *Provided*, That where the printing of such reports is discontinued the original copy thereof shall be kept on file in the offices of the heads of the respective departments or independent establishments for public inspection.

SEC. 104. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 105. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions relating to positions and salaries thereof carried in H. Res. 434, 464, 492, 493, 494, 534, 537, 587, 613, 626 and 693 of the Eighty-first Congress, and H. Res. 37 and 224 of the Eighty-second Congress shall be the permanent law with respect thereto.

SEC. 106. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not

meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

SEC. 107. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not, contrary to the provisions of this section, engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Legislative Branch Appropriation Act, 1952.*)

GENERAL PROVISIONS—THE JUDICIARY

SEC. 402. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

SEC. 403. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than \$6.50 per volume. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.*)

GENERAL PROVISIONS

SEC. [601].—No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 602. No representative of the United States Government in any international organization hereafter shall make any commitment requiring the appropriation of funds for a contribution by the United States in excess of 33½ per centum of the budget of any international organization for which the appropriation for the United States contribution is contained in this Act: *Provided*, That in exceptional circumstances necessitating a contribution by the United States in excess of 33½ per centum of the budget, a commitment requiring a United States appropriation of a larger proportion may be made after consultation by United States representatives in the organization or other appropriate officials of the Department of State with the Committees on Appropriations of the Senate and House of Representatives: *Provided, however*, That this section shall not apply to the United States representatives to the Inter-American organizations.]

[No representative of the United States Government to any international organization of which the United States is not now a member shall, unless specifically authorized in an appropriation Act or other law, make any commitment requiring the appropriation of funds for a contribution by the United States in excess of 33½ per centum of the budget of such international organization.]

SEC. 603. No part of any appropriation or authorization contained in this Act shall be used to pay compensation of any incumbent appointed to any civil office or position which may become vacant after August 1, 1951, through the fiscal year 1952: *Provided*, That this inhibition shall not apply—

- [(a) to not to exceed 25 per centum of all vacancies;]
- [(b) to positions filled from within the department;]
- [(c) to offices or positions required by law to be filled by appointment of the President by and with the advice and consent of the Senate;]
- [(d) to the Department of Justice, except general administration personnel;]
- [(e) to the Federal Bureau of Investigation;]
- [(f) to the Judiciary Branch;]

- [(g) to the Civil Aeronautics Administration;]
- [(h) to the operational personnel of the Weather Bureau, Coast and Geodetic Survey, and the Bureau of Public Roads;]
- [(i) to the Patent Office;]
- [(j) to the Civil Aeronautics Board;]
- [(k) to employees under the provisions of the Foreign Service Act of 1946 as amended;]
- [(l) to employees in grades CPC-1 and 2:]

[*Provided further*, That when the total number of personnel in a department subject to this section has been reduced to 90 per centum of the total provided for in the budget estimates for 1952, this section may cease to apply.]

SEC. 604. No part of any appropriation contained in this Act shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That excess factors arising from unusual requirements approved by the President may be used in applying a different ratio, but in no instance shall the number be in excess of the number that would be provided by a ratio of one such employee to eighty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided further*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting: *Provided further*, That this section shall not apply to personnel work concerning employees of the Foreign Service of the United States.]

SEC. [605].—Except for the automobiles officially assigned to the Secretary of State, the Attorney General, the Secretary of Commerce, automobiles assigned for operation by the Federal Bureau of Investigation and one-half of the chauffeur-driven automobiles in operation in the Departments on July 1, 1951, no part of any appropriation contained in this Act shall be used to pay the compensation of any civilian employee of the Government in the District of Columbia whose primary duties consist of acting as chauffeur of any Government-owned passenger motor vehicle (other than a bus or ambulance), unless such appropriation is specifically authorized to be used for paying the compensation of employees performing such duties.

SEC. 606. The Director of the Federal Bureau of Investigation, United States Department of Justice, hereafter is authorized without regard to section 505 of the Classification Act of 1949 to place two positions in grade GS-18, and seven positions in grade GS-17, in the General Schedule established by the Classification Act of 1949, and such positions shall be in lieu of any positions in the Federal Bureau of Investigation previously allocated under section 505. The compensation of the Associate Director of the Federal Bureau of Investigation hereafter shall be \$17,500 per annum.]

[The Secretary of State hereafter is authorized without regard to section 505 of the Classification Act of 1949 to place the position of Director, Office of Budget and Finance in grade GS-17 in the General Schedule established by the Classification Act of 1949 so long as the position is held by the present incumbent.]

[The Secretary of Commerce hereafter is authorized without regard to section 505 of the Classification Act of 1949 to place the position of Director, Office of Budget and Management in grade GS-17 in the General Schedule established by the Classification Act of 1949 so long as the position is held by the present incumbent.] (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.*)

PROGRAM AND PERFORMANCE

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities. Provision has been made in the 1953 estimates for an increase in staff to provide more intensive review of defense construction and procurement activities in the United States and overseas.

1. *Estimates*.—Executive control over expenditures is provided through review of budget estimates, continuing examination of agency operations and financial requirements, and apportionment of appropriations.

BUREAU OF THE BUDGET—Continued**Salaries and Expenses, Bureau of the Budget—Continued**

2. *Fiscal analysis.*—Budgetary policies are developed, and related programs of different agencies are analyzed to insure balance and consistency.

3. *Administrative management.*—Plans are developed for improved Government organization and procedures, and agencies are assisted in making improvements in their management and operations.

4. *Statistical standards.*—Proposed agency report forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved. Approximately 4,200 report forms were cleared in calendar year 1951, with the number expected to increase to 5,000 in 1952.

5. *Legislative reference.*—Proposed legislation and agency reports on pending legislation, enrolled bills, Executive orders, and proclamations are reviewed and analyzed for the President. Workload for calendar year 1951 included approximately 3,100 agency reports on general legislation, 750 congressional requests for Bureau views, 700 enrolled bills, and 170 Executive orders and proclamations.

6. *Field service activities.*—Four field offices serve the Bureau in its contact with agency field operations and with State and local governments.

7. *Administration.***OBLIGATIONS BY OBJECTS**

OBLIGATIONS BY ACTIVITIES

Policy coordination—1951, \$119,869; 1952, \$160,000; 1953, \$186,000.

PROGRAM AND PERFORMANCE

The National Security Council advises the President with respect to the integration of domestic, foreign, and military policies relating to the national security. The Central Intelligence Agency is under the direction of the Council. The Council includes the President, the Vice President, the Secretary of State, the Secretary of Defense, the Director for Mutual Security, and the Chairman of the National Security Resources Board. In addition the secretaries and under secretaries of other executive departments

and of the military departments, the Chairman of the Munitions Board, and the Chairman of the Research and Development Board may serve as members when appointed by the President and confirmed by the Senate. Other high officials attend meetings or participate in Council actions as directed by the President. The Secretary of the Treasury and the Director of Defense Mobilization participate in all Council actions, while the Chairman, Joint Chiefs of Staff, and the Director of Central Intelligence regularly attend Council meetings.

The Council staff work is performed under the direction of a civilian executive secretary by permanent Council employees and officials detailed from the participating departments and agencies. The principal staff unit of the Council is the Senior Staff composed of eight officials designated by the President based on nomination respectively of the Secretaries of State, Defense, and Treasury, The Director of Defense Mobilization, the Director for Mutual Security, the Chairman of the National Security Resources Board, the Joint Chiefs of Staff, and the Director of Central Intelligence. During fiscal year 1952 a reporting unit was established upon the direction of the President to keep currently informed on the status of all national security programs and to make status reports as required by the President or the Council.

PROGRAM AND PERFORMANCE

The Chairman of the National Security Resources Board advises the President concerning the Nation's security resources potential in the event of war including such policies and programs as are essential to the maintenance of a strong security resource position. The Board utilizes the facilities of other agencies as well as the services or facilities of private individuals and institutions in its security resource studies. The Chairman serves also as a member of the National Security Council.

Civil defense planning, previously a responsibility of the Board, was taken over by the Federal Civil Defense Administration, an independent agency, during fiscal year 1951.

DISASTER RELIEF

Disaster Relief, Executive Office of the President—

For expenses necessary to carry out the purposes of the Act of September 30, 1950 (Public Law 875), authorizing assistance to States and local governments in major disasters, \$800,000, to remain available until expended: *Provided*, That the appropriation "Emergency Fund for the President" shall not be available for obligation after June 30, 1951, and any unobligated balance remaining on that date shall be disposed of pursuant to the provisions of the Surplus Fund-Certified Claims Act of 1949: *Provided further*,

That not exceeding 2 per centum of the foregoing amount shall be available for administrative expenses.

For an additional amount for "Disaster relief", \$25,000,000, to be expended without regard to the limitation in section 8 of the Act of September 30, 1950 (Public Law 875). (42 U. S. C. 1855-1855g; Independent Offices Appropriation Act of 1952; Act of July 18, 1951 (Public Law 80); Act of Oct. 24, 1951 (Public Law 202).)

Appropriated (estimate) 1952, * \$30,800,000

* Includes \$5,000,000 appropriated in the Flood Rehabilitation Act, 1952 (Public Law 202).

For expenses necessary to enable the President to carry out the provisions of the Mutual Security Act of 1951 (Public Law 165, approved October 10, 1951), as follows:—

【Military assistance, title I: For assistance authorized by section 101 (a) (1), \$4,818,852,457, of which \$44,476,271 is for payment of obligations incurred under authority granted in the Second Supplemental Appropriation Act, 1950, and extended in the Foreign Aid Appropriation Act, 1951, to enter into contracts under the Mutual Defense Assistance Act of 1949, as amended (22 U. S. C. 1571-1604); and, in addition, unexpended balances of appropriations heretofore made for carrying out the purposes of title I of the Mutual Defense Assistance Act of 1949, as amended, shall remain available through June 30, 1952, and such unexpended balances of appropriations shall be consolidated with this appropriation;—】

【Economic and technical assistance, title I: For assistance authorized by section 101 (a) (2), \$1,012,000,000; and, in addition, \$10,000,000 to carry out the provisions of section 115 (e) of the Economic Cooperation Act of 1948, as amended, except that when determined by the Director such balances as cannot be effectively expended shall be merged with funds appropriated under section 101 (a) (2) of the Mutual Security Act of 1951; and, in addition, unexpended balances of appropriations heretofore made for carrying out the purposes of the Economic Cooperation Act of 1948, as amended (22 U. S. C. 1501-1522), shall remain available through June 30, 1952, and be consolidated with this appropriation;—】

【Assistance to Spain: For economic, technical, and military assistance, in the discretion of the President under the general objectives set forth in the declaration of policy contained in the titles of the Economic Cooperation Act of 1948 and the Mutual Security Act of 1951, for Spain, \$100,000,000;—】

【Military assistance, title II: For assistance authorized by section 201, \$396,250,000; and, in addition, unexpended balances of appropriations heretofore made for assistance to Greece and Turkey, available for the fiscal year 1951, pursuant to the Act of May 22, 1947, as amended (22 U. S. C. 1401-1410), and for assistance to Iran pursuant to the Mutual Defense Assistance Act of 1949, as amended (22 U. S. C. 1571-1604), shall remain available through June 30, 1952, and be consolidated with this appropriation;—】

【Economic and technical assistance, title II: For assistance authorized by section 203, \$160,000,000;—】

【Military assistance, title III: For assistance, authorized by section 301, \$535,250,000; and, in addition, unexpended balances of appropriations heretofore made for the purposes of title III of the Mutual Defense Assistance Act of 1949, as amended (22 U. S. C. 1602-1604), shall remain available through June 30, 1952, and be consolidated with this appropriation;—】

【Economic and technical assistance, title III: For assistance, authorized by section 302, \$237,155,866; and, in addition, unexpended balances of funds heretofore made available for carrying out the purposes of the China Area Aid Act of 1950 (22 U. S. C. 1547) shall remain available through June 30, 1952, and be consolidated with this appropriation;—】

【Contributions to United Nations Korean Reconstruction Agency, title III: For the United States contribution to the United Nations Korean Reconstruction Agency as authorized by section 303, the unobligated balances of the appropriations heretofore made, and available during the fiscal year 1951, for assistance to Korea under authority of the Far Eastern Economic Assistance Act of 1950, as

amended (22 U. S. C. 1543, 1551, 1552), shall remain available through June 30, 1952, and be consolidated with this appropriation;—】

【Military assistance, title IV: For assistance authorized by section 401, \$38,150,000;—】

【Technical assistance, title IV: For assistance authorized by section 402, \$21,245,653.】

【GENERAL PROVISIONS】

【SEC. 2. Appropriations in this Act under the heading "Mutual Security" for economic and technical assistance and allocations from any appropriations under such heading to the Director for Mutual Security or the Mutual Security Agency shall be available, without limitation on any authority conferred by the Mutual Security Act of 1951 or any Act continued in effect thereby, for rents in the District of Columbia; expenses of attendance at meetings concerned with the purposes of such appropriations; hire of passenger motor vehicles; purchase of not to exceed ten aircraft for use outside the continental limits of the United States and maintenance, operation, and hire of aircraft; purchase of not to exceed fifty passenger motor vehicles for use outside the continental limits of the United States and, in addition, passenger motor vehicles abroad may be exchanged or sold and replaced for an equal number of such vehicles; transportation of privately owned automobiles; entertainment within the United States (not to exceed \$20,000); exchange of funds without regard to section 3651 of the Revised Statutes (31 U. S. C. 543); loss by exchange; expenditures (not to exceed \$50,000) of a confidential character other than entertainment provided that a certificate of the amount of each such expenditure, the nature of which it is considered inadvisable to specify, shall be made by the Director or Deputy Director of Mutual Security, and every such certificate shall be deemed a sufficient voucher for the amount therein specified; insurance of official motor vehicles in foreign countries; acquisition of temporary quarters outside the continental limits of the United States to house employees of the United States Government by rental (without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a)), lease, or construction and necessary repairs and alterations to such temporary quarters; health and accident insurance for foreign trainees and technicians while en route or absent from their own countries participating in activities authorized under the Mutual Security Act of 1951; actual expenses of preparing and transporting to their former homes in the United States or elsewhere the remains of persons or members of the families of persons who may die while such persons are away from their homes participating in activities under the Mutual Security Act of 1951; and services of commissioned officers of the Public Health Service and of the Coast and Geodetic Survey, and for purposes of providing such services the Public Health Service may appoint not to exceed 20 officers in the Regular Corps to grades above that of senior assistant, but not above that of director, as otherwise authorized in accordance with section 711 of the Act of July 1, 1944, as amended (42 U. S. C. 211a), and the Coast and Geodetic Survey may appoint for such purposes not to exceed 20 commissioned officers in addition to those otherwise authorized: *Provided*, That not to exceed \$75,000,000 shall be available for administrative expenses of the departments and agencies concerned with the administration of the programs provided for herein and no part of such amount shall be used to pay the salary of any civilian employee at a rate greater than that paid by the State Department for comparable work or services in the same area.】

【SEC. 3. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the

United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (65 Stat. 373-387; 65 Stat. 730-733; Mutual Security Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

The mutual security program embodies military, economic, and technical assistance to other nations that will enable them most effectively to make their respective contributions to the common effort to maintain the security of the free world. To this end, the foreign-aid programs conducted under earlier legislation were merged into a unified program under the Mutual Security Act of 1951. The individual components of the unified program are not new. These components include the mutual

defense assistance program for military aid, the European recovery program for helping Europe to reestablish economic stability and rebuild its productive power; the international development program for furnishing of technical "know-how" to economically underdeveloped countries; and contributions to similar technical assistance programs carried on by the United Nations and the Organization of American States. The most important characteristic of the unified program is the predominance of military assistance and the correlation of economic aid with this purpose.

Appropriations and other authorizations made under existing legislation from the inception of the programs through June 30, 1952, approximate \$25.8 billion, roughly divided between \$12.4 billion for military assistance and \$13.4 billion for economic (including technical) assistance. Appropriations for 1952 total \$7.3 billion.

1. *Military assistance.*—Military assistance under the act of 1951 is designed to correlate the provision of United States military equipment and supplies with the raising and training of forces within the aided countries. In addition, this assistance provides for supplementary training through United States schools and training personnel to assure effective use of the materials furnished and for needed maintenance, parts, and spares.

Under title I of the act of 1951, programs are developed by Military Assistance Advisory Groups (MAAG's) composed of members of the United States military services stationed in each European country, including certain countries not in the North Atlantic Treaty Organization. From information provided to the MAAG's on the size and nature of the units in being and to be formed in the time covered, total supply requirements are determined. These are reduced by (a) the supplies and equipment owned by the country, on order, or within its production achieved with economic aid; (b) the undelivered supplies and equipment included for the country in the mutual defense assistance programs for 1950, 1951, and 1952; and (c) equipment and supplies which, in the judgment of the MAAG, can be provided by purchase or otherwise from the country's resources. The programs are screened by a Joint American Military Advisory Group (JAMAG), other United States staff agencies located in London, and the military departments in Washington, using criteria set by the Joint Chiefs of Staff.

The military assistance programs for Greece and Turkey (title II) are to be continued to maximize the military potential of these countries. The estimate includes authorization to provide military assistance to the forces of other Middle East countries, specifically Iran.

Military assistance in the area of eastern and southeastern Asia under title III is designed to aid in the preservation of national independence and maintenance of security in the countries near the Communist-controlled mainland of China. The programs for these countries contemplate the provision of military equipment and technical guidance to the forces of the Republic of the Philippines, the National Republic of China, and Thailand, and in Indochina to the French as well as the native forces.

The military assistance program for South American countries (title IV) will provide for the rehabilitation and repair of equipment already on hand, and thereafter for limited additional equipment under a hemispheric defense plan developed multilaterally by the Inter-American Defense Board. In addition, for a number of the countries whose economic condition makes it possible, reimbursable

military assistance will continue under the Mutual Defense Assistance Act of 1949.

The training activities are to assure the maintenance and use of existing United States type of equipment.

2. *Economic and technical assistance: Europe (title I)*—*(a) Country aid.*—As a result of previous aid and other developments, the European dollar gap was reduced from a \$7 billion level in 1947 to \$2.5 in 1951. But the necessity for accelerated rearmament of the West has forced the countries of Western Europe to undertake larger defense programs than their recuperating economies can yet sustain without assistance. Defense expenditures of the nine European North Atlantic Treaty Organization (NATO) countries have increased from the equivalent of \$4.4 billion in fiscal year 1950 to \$5.2 billion in 1951 and an estimated \$8 billion in 1952. During 1953, European NATO defense budgets will take another sharp jump. Over \$500 million in counterpart funds will be released to Western European countries in 1952 for financing their military production programs.

United States economic aid to the NATO countries is now allocated on the basis of defense commitments undertaken by these countries. Furthermore, in collaboration with the Department of Defense, military production programs are being developed for each country, integrating national procurement schedules with NATO requirements and United States offshore procurement. At least 10 percent of the economic aid to be extended to European countries in 1953 will be provided on credit terms; the balance will be made available as a direct grant.

(b) European Payments Union capital fund.—The European Payments Union (EPU) is a financial institution through which members of the Organization for European Economic Cooperation settle trade surpluses and deficits with one another. The aftermath of Korea and the accelerated rearmament of the West have produced large and rapid fluctuations in the balance of payments of the member countries. Steps to achieve an interim adjustment have been taken, and further corrective measures are under consideration now.

(c) Technical assistance.—This assistance will continue on the basis of specific requests for the services of United States technicians, for study and training in the United States, and for scientific and technical information. Local currency costs of projects, borne by participating countries, will considerably exceed dollar costs on the basis of past experience. Observation of American practices by the Europeans since the start of the program is leading to a more fundamental approach for further increasing European productivity.

(d) Emigration of surplus manpower.—Funds will be utilized to encourage emigration from participating countries to areas where such manpower can be effectively utilized. An amount of \$10 million will be made available to an interim organization being formed to keep intact and utilize facilities formerly operated by the International Refugee Organization. It is expected that the United States contribution will approximate one-third of the total funds to be contributed by participating countries.

(e) Ocean freight—voluntary relief packages.—Although the ocean freight subsidy on gift packages via parcel post, commercial channels, and on certain categories of CARE food packages has been discontinued to all European countries except Austria, Greece, Italy, and Trieste, voluntary nonprofit relief agencies continue to receive reimbursement of ocean freight charges on supplies shipped to ECA-grant countries which have concluded relief agreements.

(f) Basic materials development.—Funds are used in countries where Mutual Security Agency economic and technical assistance programs are being conducted to increase the production of raw materials in which the United States is actually or potentially deficient. In addition, direct purchases of such materials for the United States stockpile are made with 5 percent local currency counterpart funds.

(g) Confidential funds.—Expenditures of a confidential character other than entertainment may be made upon certification by the Administrator or Deputy Administrator.

3. *Near East and Africa (title II)*—*(a) Special technical and economic aid.*—Funds are for projects mainly in the fields of agriculture, health, and transportation, together with a program designed to stimulate an improvement in the living standards in underdeveloped areas.

(b) Bilateral technical cooperation.—This is to assist the governments in the underdeveloped areas of the world (Latin America, the Near East and Africa, and South Asia) in eliminating or reducing the present handicaps to economic development. Primary attention will be given to increasing food production.

(c) Palestine refugee program.—The Palestine Refugee Agency undertakes to find homes and jobs for Palestine refugees and continues relief operations. Since May 1950, it has provided subsistence rations for over 850,000 refugees, prevented serious outbreaks of epidemic diseases, provided employment for many thousands of refugees on useful public-works projects, supported a primary-school program for refugee children, and provided technical training. The estimate provides for making available the \$50 million appropriated for fiscal year 1952 to continue the work undertaken by the Agency.

(d) Relief of refugees coming into Israel.—The act of 1951 authorized expenditure of a sum not to exceed \$50,000,000 for specific refugee relief and resettlement projects in Israel. It is proposed to provide direct relief in the form of consumer goods to maintain a minimum ration and to implement long-term economic aid projects in such areas as agriculture, industry, housing, and public health through purchase of equipment and extension of technical assistance. An integral part of the program will be the matching contribution by the Government of Israel, this Israeli pound fund will be placed under joint Israeli United States control.

4. *Asia and Pacific (title III)*—*(a) Special technical and economic aid.*—Funds to the six countries of southeast Asia (Republic of China on Formosa, the Philippines, the Associated States of Indochina, Burma, Indonesia, and Thailand) consist in varying proportions of (1) projects mainly in the fields of agriculture, health, and transportation and emergency war relief; (2) commodities (mostly producer goods) supplied for sale to maintain essential supplies and to obtain the local currency counterpart needed to finance the local costs of the projects; (3) support of military assistance programs, including (i) "common-use" items (such as petroleum products, food for troops, and certain construction materials for barracks and airfields); (ii) additional salable commodities to help cushion the local inflationary impact of the military assistance effort, and (iii) additional projects of military importance such as improvement of roads, bridges, and harbors.

(b) Ocean freight—voluntary relief packages.—Ocean transportation charges are paid on relief packages sent from the United States by individuals and by American nonprofit agencies.

MUTUAL SECURITY—Continued

Programs for bilateral and multilateral technical cooperation in this title are identical to those described in titles II and IV, respectively.

(c) *Exchange of student program.*—The Department of State administers a program to defray the expenses of selected citizens of China and Korea to study or teach in accredited colleges, universities, and other educational institutions in the United States. In fiscal year 1951, grants were made to 2,817 students and 77 professors, teachers, research scholars, and other professional workers. In fiscal year 1952, grants will be made to approximately 2,165 students and 500 professional workers.

(d) *Contributions to United Nations Korean Reconstruction Agency.*—This Agency was expected to undertake a comprehensive post-hostilities program in Korea, toward which 24 nations pledged a total of \$250 million in cash and kind, including \$162.5 million pledged by the United States. However, because of uncertainty about the cessation of hostilities, Congress appropriated only the unobligated balance from 1951 funds, approximately \$50 million. Authorization exists to seek \$45 million more in 1952, should the military situation permit spending of a larger sum in fiscal year 1952.

5. *Latin America (title IV)*—(a) *Bilateral technical cooperation.*—Programs for bilateral technical cooperation have been described in title II.

(b) *Multilateral technical cooperation.*—While this program is world-wide and receives funds from the four economic appropriations under mutual security, the program statement has been placed herein to obviate the necessity of repeating it in each title.

Contributions to the United Nations (including the specialized agencies) and the Organization of American States for their technical cooperation programs are proposed at \$13,000,000 for 1953. This continues the level established in fiscal year 1952. Beyond the contributions of other nations to the international fund, nations in which projects are operating supply local personnel and additional local funds. These contributions average the equivalent of approximately \$3 for every \$1 contributed by the United States.

6. *Administration.*—The programs described above are administered (within policy guidelines established by the Director for Mutual Security) by the following agencies: Military aid, Department of Defense; economic aid, Mutual Security Agency; technical assistance, Department of State; and Mutual Security Agency—depending on the countries involved. Facilities and personnel of various other agencies are also utilized in carrying out technical assistance programs in specialized fields such as agriculture, reclamation, and mining.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Under section 304 (b) of the Defense Production Act of 1950, designated agencies are authorized, with Presidential approval, to incur obligations of \$2.1 billion largely for the purpose of making loans and procuring critical materials in furtherance of the defense effort. The obligations are financed by borrowings from the Treasury. The 1951 amendments to the act permit commitments in excess of \$2.1 billion so long as ultimate costs do not exceed this amount. Programs undertaken must be certified as essential to the national defense by either the Defense Production Administrator, the Secretary of Agriculture, or the Administrator of the Reconstruction Finance Corporation.

As of November 30, 1951, authorized borrowings were as follows:

Defense Materials Procurement Agency.....	\$807,295,000
Reconstruction Finance Corporation.....	275,000,000
Department of Agriculture.....	150,000,000
Department of the Interior.....	10,000,000
Total.....	1,242,295,000

The remaining \$857,705,000 of the \$2.1 billion authorized is expected to be allocated by June 30, 1952. The 1953 budget includes an anticipated supplemental appro-

priation of \$900,000,000 based upon contemplated extension of the Defense Production Act.

A recapitulation of estimated gross value of transactions and ultimate net cost follows:

	Million of dollars		
	Gross transactions	Ultimate net cost	Borrowing authority required
Programs certified to Nov. 30, 1951.....	5,166.8	278.0	1,242.3
Programs expected to be certified between Dec. 1, 1951, and June 30, 1952.....	1,462.9	274.2	857.7
Programs expected to be certified during fiscal year 1953.....	1,650.4	349.0	900.0
Total.....	8,280.1	901.2	3,000.0

The difference between the borrowing authority required and the ultimate net cost represents working capital needed to finance loans, advances to contractors, inventory purchases, etc. Following is a description of programs which were financed by borrowings through November 30, 1951.

Department of Agriculture.—The purchase and resale of agricultural commodities, except forest products, are carried out by the Commodity Credit Corporation which is reimbursed for the net costs involved. The Production and Marketing Administration has been delegated the responsibility for certifying loans for increasing plant capacity to process or store agricultural commodities, except for forest products.

During fiscal year 1951, Commodity Credit Corporation stocks of linseed and tung oil were reserved for defense needs. In addition, programs were initiated to increase supplies of castor beans and kenaf seed and fiber. During fiscal year 1952 these two programs will be expanded and new programs will be initiated to assure supplies of long staple cottonseed and sansevieria fiber. It is also contemplated that stocks of gum turpentine and rosin of the Commodity Credit Corporation will be reserved for defense purposes during fiscal year 1952. Certification of loans to the Reconstruction Finance Corporation will be expanded during fiscal year 1952.

Net realized loss on purchase and resale operations through June 30, 1952, is estimated at \$7,664,000. Loans were certified to the Reconstruction Finance Corporation totaling \$310,000 during fiscal year 1951, and are estimated to amount to \$47 million during fiscal year 1952, primarily due to increased fertilizer production.

Department of the Interior.—Certifications to the Department through November 30, 1951, have been limited to the exploration and development of strategic and critical minerals and metals for which an allocation of \$10 million has been made to the Defense Minerals Exploration Administration.

As of November 30, 1951, 216 exploration projects had been approved in which the Government's share of expenditures totals \$6,665,000 against a total cost of \$11,163,000. Additional projects to be financed by the balance of \$3,335,000 of the \$10 million already allocated are

EXPANSION OF DEFENSE PRODUCTION—Con.*Revolving Fund, Defense Production Act—Continued*

expected to number 110 with a total valuation of \$5,500,000. It is expected that an additional \$20 million will be allocated by June 30, 1952.

Defense Materials Procurement Agency.—As of November 30, 1951, programs amounting to \$807,295,000 had been certified for procurement of defense materials including aluminum, copper, cobalt, lead, manganese, magnesium, molybdenum, mica, nickel, tungsten, zinc, rubber, and machine tools. Of this amount, \$260,000,000 is for the machine tool pool order and equipment installation programs, \$200,000,000 for the rubber program, and the balance of \$347,295,000 for other mineral and metal programs. It is anticipated that an additional \$287,148,000 will be certified by June 30, 1952.

In addition to contracting for procurement, and giving financial assistance to contractors by advances or guaranteeing loans, the agency certifies direct loans to be made by the Reconstruction Finance Corporation and the Export-Import Bank, and participates in determinations for the issuance of accelerated tax amortization certificates.

Reconstruction Finance Corporation.—The Corporation has been allocated \$275 million for loans under the Defense Production Act. Of this amount, \$250 million is for facility expansion loans which must be certified by the Defense Production Administrator or the Secretary of Agriculture or their delegates. The remaining \$25 million is for working capital loans which may be made by the Administrator of the Corporation without certification from other agencies. Of the \$250 million, \$183 million is expected to be disbursed by June 30, 1952, for the following: (a) Agricultural commodities, \$5 million; (b) expansion of minerals and metals supply or productive capacity, \$120 million; (c) machine tool industry expansion, \$10 million; and (d) other industries, \$48 million. No working capital loans had been committed by November 30, 1951.

Administrative expenses.—During 1951 and 1952, the administrative expenses of the Defense Materials Procurement Agency and the Reconstruction Finance Corporation relating to programs authorized by sections 302 and 303 of the Defense Production Act were paid from borrowing authority. The expenses relating to programs carried on by the Defense Minerals Administration of the Department of the Interior were paid from appropriations made to the Secretary of Interior. Up to November 30, 1951, no administrative expenses had been incurred by the Department of Agriculture or the Export-Import Bank. The amounts shown in statement A for administrative expenses are for the Defense Materials Procurement Agency and the Reconstruction Finance Corporation based on programs certified through November 30, 1951. During 1953 it is proposed that the borrowing authority be used to pay the administrative expenses of all agencies engaged in carrying on programs financed from the authority, in order to provide a consistent pattern of financing the administrative expenses of these programs.

BUSINESS-TYPE STATEMENTS**PROGRAM AND PERFORMANCE**

Section 111 (b) of Public Law 472, Eightieth Congress, as amended, authorizes the Director of Mutual Security to issue industrial investment (including forward contracting) and informational media guaranties up to \$200,000,000 to stimulate the flow of private capital into projects abroad which further the purposes of that law. This authority has been supplemented by section 520 of the Mutual Security Act of 1951 (Public Law 165), which makes guaranty funds available for investment in any country eligible to receive assistance under the Mutual Security Act. In addition to the \$200,000,000 borrowing authority, net fees collected increase funds available for obligation.

STATUS OF GUARANTIES BY TYPES

[As of June 30, 1950, 1951, and 1952]

	1950 actual	1951 actual	1952 estimate
Industrial.....	\$22,276,566	\$28,309,018	\$45,000,000
Forward contracting.....	550,000	250,000	5,000,000
Informational media.....	2,025,961	5,075,823	10,000,000
Total outstanding.....	24,852,527	33,634,841	60,000,000

Industrial investment guaranties.—By the end of fiscal 1951, a total of \$30,369,504 guaranties had been issued, of which \$28,559,018 were outstanding. Of the amount outstanding, \$28,084,018 were against the risks of convertibility of local currency receipts from investments; one guaranty for \$225,000 was against the risk of loss by expropriation and confiscation; and one guaranty for

\$250,000 covered forward contracting for the furnishing of capital goods items and related services.

From the inception of the guaranty program until October 31, 1951, no disbursements had been made under any of these guaranties and a total of \$427,942 in fees had been collected.

Increase in the number of guaranties resulting from the 1950 amendment to the Economic Cooperation Act (Public Law 535), which broadens the scope of the act to include investments of such intangibles as patents, processes, and techniques, as well as to cover the risk of loss from expropriation or confiscation, is presently just beginning to be felt. Authority in the Mutual Security Act of 1951 (Public Law 165, sec. 520) to use guaranty funds in areas provided for in that act is expected to further increase guaranty activity.

Informational media guaranties.—The Director is authorized to issue guaranties up to \$10,000,000 in any fiscal year against nontransferability of funds in connection with American investments in enterprises producing or distributing informational media. As of October 31, 1951, \$4,317,134 disbursements have been made against the guaranties, and \$158,987 in fees have been collected.

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The objectives of the Institute of Inter-American Affairs are to further the general welfare of the American Republics by carrying out cooperative programs in technical fields such as public health, agriculture, and education. In addition to funds appropriated to the Institute, participating countries contribute to the cooperative programs.

The major activities of the Corporation are conducted in accordance with the terms of agreements entered into with the governments of the other American Republics. These agreements provide for program operation by a cooperative service, which is a part of the appropriate ministry (health, agriculture, or education) of the host government and is headed by the chief of the Institute's field party. Both the cooperating republic and the Institute contribute funds, materials, services, and facilities.

ANALYSIS OF BUDGET PROGRAMS AND FINANCIAL REVIEW

Expansion in the activities of the Institute which occurred in 1951 is not reflected in the following statements since it was financed by allocations under the international development appropriation. During 1951, the corporate fund financed programs which had been in operation in 1950.

The Institute has authority to operate until 1955 (act of September 3, 1949, Public Law 283), and the funds for its 1952 programs are included in the mutual security appropriation. An indication of the Institute's 1953 program plans will be submitted at a later date.

PROPOSED FOR LATER TRANSMISSION

Expansion of defense production (under proposed legislation, 1953).—The 1953 budget includes a proposed supplemental authorization to expend an additional \$900,000,000 from public debt receipts. Amendment of section 304 (b) of the Defense Production Act is proposed to increase borrowing authority to \$3 billion in lieu of \$2.1 billion currently authorized.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental authorization to expend from public debt receipts.....			\$900,000,000
Unliquidated obligations, end of year.....			615,600,000
Expenditures out of current authoriza- tions.....			284,400,000

Flood insurance (under proposed legislation, 1953).—The Budget includes \$50,000,000 for the fiscal year 1953 to establish a Federal flood insurance program. This is in accordance with the recommendations made by the President to the first session of the Eighty-second Congress. The program aims to supplement the limited private insurance facilities presently available.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$50,000,000
Unliquidated obligations end of year.....			49,000,000

ANALYSIS OF EXPENDITURES—continued

	1951 actual	1952 estimate	1953 estimate
Expenditures out of current authoriza- tions.....			\$1,000,000

Mutual security (under proposed legislation, 1953).—Appropriations totaling \$7.9 billion are included in this budget for 1953 under proposed legislation for continuation of the mutual security program (authorized in fiscal 1952 by Public Law 165, 82d Cong.) of military, economic, and technical assistance. The detailed program proposals for each of the three types of assistance, broken down by major geographic areas of the world, will be presented to the Congress within a few weeks. The bulk of the funds requested will be used to assist friendly countries in strengthening their defenses, through furnishing military matériel from the United States, financing additional military production in the countries themselves, and providing the economic aid necessary to permit them to undertake increased national defense expenditures. The request also includes amounts to finance other international programs essential to the security of the United States.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$7,900,000,000
Unliquidated obligations, end of year.....			4,561,030,000
Expenditures out of current authoriza- tions.....			3,339,000,000

CURRENT AUTHORIZATIONS

AMERICAN BATTLE MONUMENTS COMMISSION

Salaries and Expenses, American Battle Monuments Commission—

Salaries and expenses: For necessary expenses, as authorized by the Act of June 26, 1946 (36 U. S. C. 121, 123-132, 138), including the acquisition of land or interest in land in foreign countries; purchase and repair of uniforms for caretakers of national cemeteries and monuments outside of the United States and its Territories and possessions at a cost not exceeding \$500; rent of office and garage space in foreign countries; the purchase of one passenger motor vehicle for replacement only; and insurance of official motor vehicles in foreign countries when required by law of such countries; **[\$719,000, of which not more than \$504,000 shall be available for personal services]** *Provided*, That where station allowance has been authorized by the Department of the Army for officers of the Army serving the Army at certain foreign stations, the same allowance shall be authorized for officers of the armed forces assigned to the Commission while serving at the same foreign stations, and this appropriation is hereby made available for the payment of such allowance: *Provided further*, That when traveling on business of the Commission, officers of the armed forces serving as members or as secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission.

[The funds provided in the Independent Offices Appropriation Act, 1952, shall be available to the Commission for the employment of personnel in foreign countries (not exceeding 450) without regard to the limitations on the amounts available for personal services contained therein and without regard to the provisions of section 605 thereof.] (*Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.*)

PROGRAM AND PERFORMANCE

Provision is made for the maintenance and operation of all permanent United States military cemeteries and memorials located in foreign countries. The 1953 estimate provides general maintenance of 8 World War I cemeteries, a memorial chapel in each cemetery, 11 World War I memorials outside the cemeteries, 14 World War II cemeteries, and the Mexico City National Cemetery. The increase over 1952 is for better maintenance of these cemeteries.

ATOMIC ENERGY COMMISSION

SALARIES AND EXPENSES

Salaries and Expenses, Atomic Energy Commission—

For expenses necessary to carry out the purposes of the Atomic Energy Act of 1946, including employment of aliens; purchase of land and interests in land; services authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of not to exceed [three hundred and seventy-five] four hundred and fifty passenger motor vehicles, of which [two hundred and fifteen] three hundred and twenty-seven shall be for replacement only; purchase, maintenance, and operation of aircraft; publication and dissemination of atomic information; purchase, repair, and cleaning of uniforms; purchase of newspapers and periodicals (not to exceed \$8,000); official entertainment expenses (not to exceed \$5,000); reimbursement of the General Services Administration for security guard services; and payment of obligations incurred under prior year contract authorizations; [\$1,139,932,750, of which not more than \$25,135,000 shall be available for personal services,] \$1,312,000,000, together with the unexpended balances, as of June 30, [1951] 1952, of prior year appropriations to the Atomic Energy Commission, of which amounts \$100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended; from which appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided*, That no part of this appropriation shall be used to pay the salary of any officer or employee (except such officers and employees

whose compensation is fixed by law, and scientific and technical personnel) whose position would be subject to the Classification Act of 1949, *as amended*, if such Act were applicable to such position, at a rate in excess of the rate payable under such Act for positions of equivalent difficulty or responsibility: *Provided further*, That no part of this appropriation shall be used—

(A) to start any new construction project for which an estimate was not included in the budget for the current fiscal year;

(B) to start any new construction project the currently estimated cost of which exceeds the estimated cost included therefor in such budget; or

(C) to continue any community facility construction project whenever the currently estimated cost thereof exceeds the estimated cost included therefor in such budget;

unless the Director of the Bureau of the Budget specifically approves the start of such construction project or its continuation and a detailed explanation thereof is submitted forthwith by the Director to the Appropriations Committees of the Senate and the House of Representatives and the Joint Committee on Atomic Energy; the limitations contained in this proviso shall not apply to any construction project the total estimated cost of which does not exceed \$500,000; and, as used herein, the term "construction project" includes the purchase, alteration, or improvement of buildings, and the term "budget" includes the detailed justification supporting the budget estimates: *Provided further*, That whenever the current estimate to complete any construction project (except community facilities) exceeds by 15 per centum the estimated cost included therefor in such budget or the estimated cost of a construction project covered by clause (A) of the foregoing proviso which has been approved by the Director, the Commission shall forthwith submit a detailed explanation thereof to the Director of the Bureau of the Budget and the Committees on Appropriations of the Senate and of the House of Representatives and the Joint Committee on Atomic Energy: *Provided further*, That the two foregoing provisos shall have no application with respect to technical and production facilities (1) if the Commission certifies to the Director of the Bureau of the Budget that immediate construction or immediate continuation of construction is necessary to the national defense and security, and (2) if the Director agrees that such certification is justified: *Provided further*, That no part of the foregoing appropriation shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of \$90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of \$45,000 per annum: *Provided further*, That no part of the foregoing appropriation shall be used for any new construction project until after the Commission shall have notified all architects and engineers involved that the plans for such project should be purely utilitarian and without unnecessary refinements.

For an additional amount for "Atomic Energy Commission", \$265,965,000: *Provided*, That the limitation contained in the Independent Offices Appropriation Act, 1952, on the amount available to the Commission for personal services is hereby amended to read, "of which not to exceed \$30,400,000 shall be available for personal services": *Provided further*, That section 605 of the Independent Offices Appropriation Act, 1952, shall not be applicable to the Commission. (Atomic Energy Act of 1946 (Public Law 585, approved August 1, 1946); Supplemental Appropriation Act, 1952; Second Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.)

Obligations incurred	1,925,204,176	1,307,967,639	1,256,200,000

NOTE.—The Commission's estimates for operations (as distinguished from the plant and equipment estimates) are based on costs to be accrued during each of the fiscal years, converted in total to the required obligational authority. Operating costs shown do not include provision for depreciation of plant and equipment. Estimates for plant and equipment are shown on an obligation basis; the relationship between obligations and accrued costs for plant and equipment is shown in the statement of program and performance.

PROGRAM AND PERFORMANCE

The Commission manufactures fissionable materials and atomic weapons; conducts research and development aimed at improved weapons, more efficient production of fissionable materials, generation of useful power from atomic energy, and protection of military and civilian personnel against hazards arising from atomic energy operations; and disseminates unclassified technical information to encourage scientific progress.

The program is administered in the field through nine major offices; most of the Commission's activities are carried on in Government-owned facilities by industrial and educational contractors. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Estimated costs to be incurred in 1953 total \$1,745,443,400, an increase of 1.7 percent over estimated costs in 1952 and of 103 percent over actual costs for 1951. Approximately 44 percent of the 1953 total represents operating costs, which have increased by 24.8 percent over 1952 and 91.5 percent over 1951. This growth stems from the operation of new plants, the expansion of research and development, and increased expenditures for raw

materials. Plant and equipment costs for 1953 are expected to remain at almost the 1952 level as the construction of major facilities authorized in 1951 continues.

1. *Operations*—(a) *Source and fissionable materials*.—In converting source materials into fissionable materials, uranium ores and concentrates, largely obtained from foreign sources, are processed into feed materials both for the plants at Oak Ridge, Tenn., which extract the fissionable isotope uranium 235, and for the reactors at Hanford, Wash., which synthesize plutonium. A continuing supply of uranium depends upon discovery of new ore deposits and development of methods to make usable various low-grade sources. Exploratory drilling in the United States in 1953 will increase by 21 percent over 1952 and by 240 percent over 1951. Costs incurred for uranium procured will increase substantially. The quantities of feed and fissionable materials produced will continue to increase during 1953, while unit processing costs will decline as new plant capacity and improved techniques are placed in service. Emphasis will continue on development of new equipment and processes to increase yields and improve product quality.

(b) *Weapons*.—Substantially higher costs will be incurred in 1953 in the production of greater numbers of weapons; the development, design, and testing of new weapon types; and the storage, maintenance, and custody of stockpiled weapons. A further increase in technical personnel is anticipated at the principal weapon development centers, the Los Alamos Scientific Laboratory and the Sandia Laboratory in New Mexico. New production installations will be in operation, and activity will continue at the test sites in Nevada and at Eniwetok.

(c) *Reactor development*.—The development of new reactor designs is being directed toward reactors for producing fissionable materials at lower unit cost and with smaller consumption of uranium; propelling naval vessels and military aircraft; and generating electric power.

Development of reactors for submarine propulsion is under way. An experimental reactor has been completed to explore the principle of "breeding," that is, producing more fissionable material in a reactor than it consumes. A reactor to test materials will come into operation during 1952. The development of an aircraft reactor will be further intensified in 1953. Work on specific reactor designs constitutes about 80 percent of the scientific and technical effort in reactor development, the remainder consisting of work on common problems of reactor physics, heat transfer, shielding, and the development of materials, components, and systems of chemical processing.

A school of reactor technology is conducted for scientific and engineering personnel in both Government and industry. The Commission has followed a policy of assigning new reactor projects to industrial contractors not heretofore engaged in atomic work and has encouraged industrial proposals for the design and construction of dual purpose plutonium- power-producing reactors on a risk and profit basis.

(d) *Physical research*.—A broad program of basic and applied research in physics, chemistry, and metallurgy supports the whole range of the Commission's technical activities. This research is carried on in the Commission's laboratories and in numerous universities and colleges. The latter perform chiefly basic research but are undertaking increasing amounts of applied research as well. Upon completion of a new research reactor at Argonne National Laboratory in 1952 and of very high voltage particle accelerators at the Radiation Laboratory at Berkeley and the Brookhaven National Laboratory in

1953, additional basic physics research will be initiated. Increased emphasis is also planned for 1953 on research aimed at solving problems in the production of certain metals used in reactor construction and in the extraction of uranium from low-grade ores, and at developing information on the atomic nucleus which is needed for reactor designs. Radioisotopes will continue to be produced for research, medical, and industrial uses.

(e) *Biology and medicine.*—In these activities the Commission's primary concern is to evaluate the extent of radiation and other atomic energy hazards; to prescribe adequate protective measures for atomic energy operations; and to provide related information to other Government agencies responsible for civilian and military defense. Research is conducted on the radiation and toxic effects of materials used and produced; the effects of ionizing radiation on living organisms; and flash burns and other phenomena of nuclear explosions. This research is performed in Commission laboratories and at a large number of universities, colleges, and hospitals. Radiation-detection and monitoring instruments are developed and technical data, including recommended standards for permissible exposure, are furnished to contractors, the Department of Defense, and the Federal Civil Defense Administration.

The use of radiation in the study and treatment of cancer and other diseases and the application of radioactive materials to biological and agricultural research are encouraged; radioisotopes will continue to be furnished free to qualified users engaged in studying or treating cancer.

(f) *Community operations.*—The Commission operates the towns of Los Alamos, N. Mex., Oak Ridge, Tenn., and Richland, Wash., totaling more than 65,000 in population, and provides limited services at other locations. In 1953 the net cost of these operations is expected to be further reduced.

(g) *Program direction and administration.*—General management, executive direction, technical supervision of program operations, the negotiation and administration of contracts, and other related activities performed by the Commission will require an increase in the number of its employees in 1953 because of the increased scope of the total program. The costs incurred for these functions will represent 4.6 percent of total operating costs, compared with 5.9 percent in 1951.

2. *Plant and equipment.*—More than half of the obligations estimated for plant and equipment in 1953 are for the residual financing of the production plant under construction at Savannah River. In addition, it is planned to start construction of several different experimental reactors, a research reactor, and laboratory buildings at Los Alamos and the Radiation Laboratory at Berkeley. Other new projects consist chiefly of additions and modifications to existing production and research facilities. Costs incurred for plant and equipment in 1952 and 1953 are substantially higher in both years than in 1951 as construction work continues on the new plants authorized and largely financed in 1951. Accrued costs are reconciled to obligations in the following summary table:

PLANT AND EQUIPMENT COSTS RECONCILED TO OBLIGATIONS

	1951 actual	1952 estimate	1953 estimate
Total plant and equipment accrued costs.....	\$458,421,861	\$1,100,651,012	\$976,443,400

CIVIL SERVICE COMMISSION

Salaries and Expenses, Civil Service Commission—

Salaries and expenses: For necessary expenses, including not to exceed **[\$28,000]** \$30,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed \$10,000 for medical examinations performed for veterans by private physicians on a fee basis; travel expenses of examiners acting under the direction of the Commission, and expenses of examinations and investigations held in Washington and elsewhere; *not to exceed \$125 for the purchase of newspapers and periodicals (excluding scientific, technical, trade or traffic periodicals, for official use);* payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; not to exceed **[\$65,000]** \$81,000 for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); reimbursement of the General Services Administration for security guard services for protection of confidential files; and not to exceed \$5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; **[\$17,500,000]** \$22,097,000: *Provided*, That no details from any executive department or independent establishment in the District of Columbia or elsewhere to the Commission's central office in

CIVIL SERVICE COMMISSION—Continued

Salaries and Expenses, Civil Service Commission—Continued

Washington or to any of its regional offices shall be made during the current fiscal year, but this shall not affect the making of details for service as members of the boards of examiners outside the immediate offices of the Commission in Washington or of the regional directors, nor shall it affect the making of details of persons qualified to serve as expert examiners on special subjects: *Provided further*, That the Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees to or from its office or field force: *Provided further*, That members of the Loyalty Review Board in Washington and of the regional loyalty boards in the field may be paid actual transportation expenses, and per diem in lieu of subsistence authorized by the Travel Expense Act of 1949 while traveling on official business away from their homes or regular places of business, and while en route to and from and at the place where their services are to be performed: *Provided further*, That nothing in section 281 or 283 of title 18, United States Code, or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of his appointment for part-time or intermittent service as a member of the Loyalty Review Board or a regional loyalty board in the Civil Service Commission: *Provided further*, That not to exceed \$575,000 of this appropriation shall be available for travel expenses.]

[For an additional amount for "Salaries and expenses", \$1,400,000; and the limitation under this head in the Independent Offices Appropriation Act, 1952, on the amount available for travel expenses, is increased from "\$575,000" to "\$619,000".]

No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order Numbered 9358 of July 1, 1943, or for the compensation or expenses of any member of a board of examiners (1) who has not made affidavit that he has not appeared in any agency proceeding within the preceding two years, and will not thereafter while a board member appear in any agency proceeding, as a party, or in behalf of a party to the proceeding, before an agency in which an applicant is employed who has been rated or will be rated by such member; or (2) who, after making such affidavit, has rated an applicant who at the time of the rating is employed by an agency before which the board member has appeared as a party, or in behalf of a party, within the preceding two years: *Provided*, That the definitions of "agency", "agency proceeding", and "party" in section 2 of the Administrative Procedure Act shall apply to these terms as used herein.

No part of appropriations herein shall be used to pay the compensation of officers and employees of the Civil Service Commission who allocate or reallocate supervisory positions in the classified civil service solely on the size of the group, section, bureau, or other organization unit, or on the number of subordinates supervised. References to size of the group, section, bureau, or other organization unit or the number of subordinates supervised may be given effect only to the extent warranted by the workload of such organization unit and then only in combination with other factors, such as the kind, difficulty, and complexity of work supervised, the degree and scope of responsibility delegated to the supervisor, and the kind, degree, and value of the supervision actually exercised. (5 U. S. C. chap. 12; 18 U. S. C. 611; 31 U. S. C. 338; Executive Orders 6670, Apr. 7, 1934; 6731, June 5, 1934; 7915 and 7916, June 24, 1938; Second Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

As the central personnel agency of the Government, the Civil Service Commission holds examinations, certifies eligibles to fill vacancies in the Federal service, and determines the character and suitability of applicants for such employment. It also administers the Classification Act of 1949 and the retirement system under the act of 1920, as amended.

1. *Examining, placement, and veterans' preference.*—From December 1, 1950, on, most appointments are being made on a temporary-indefinite basis. The use of competitive examinations will be continued, except that where there are not enough qualified applicants the Commission will authorize noncompetitive examination procedures and standards. The recruiting facilities of the Commission and its agency boards and committees of examiners will be fully utilized in making temporary-indefinite appointments. Veterans are aided in securing the benefits to which they are entitled under law. The Commission also inspects personnel activities carried on by agencies subject to its review. The increase is to bring more appointments under the competitive examining procedure and to increase the number and scope of agency inspections.

Production count	1951 actual	1952 estimate	1953 estimate
Applications processed.....	682,682	506,025	681,725
Placements made.....	578,539	654,600	635,250
By the Commission.....	235,936	185,000	184,250
By boards of examiners.....	342,603	469,600	451,000
Agencies inspected.....	1,466	1,618	2,524

2. *Investigation of character and fitness for employment.*—The Commission has specific responsibilities for carrying out the Federal employees' loyalty program, including the making of loyalty checks and inquiries on new appointees, and the establishment of regional loyalty boards to adjudicate loyalty cases and of a central loyalty board to review decisions of the regional and agency boards. In addition, investigations are made of applicants for certain positions in the Federal service, including postmasters and the higher-grade administrative and technical positions.

Production count	1951 actual	1952 estimate	1953 estimate
Record check and inquiry cases.....	479,364	822,097	800,662
Regional loyalty cases adjudicated.....	1,464	2,909	3,879
Loyalty appeals adjudicated.....	94	73	115
Suitability investigations converted from loyalty cases.....	7,945	20,978	21,504
Other personnel investigations.....	5,179	6,800	7,114

3. *Administration of the personnel classification system.*—The Commission prepares and issues allocation standards for positions under the Classification Act of 1949, conducts a program of audits to insure compliance with existing standards, and establishes new minimum and maximum rates of pay for certain groups of employees. The increase recommended for audits is related to the larger number of positions to be covered in 1953.

Production count	1951 actual	1952 estimate	1953 estimate
Allocation standards established.....	664	663	630
Conducting audits.....	85,384	108,672	144,553

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act, the Panama Canal Construction Annuity Act, and the Lighthouse Service Widows' Benefit Act, involves adjudicating annuity, death and benefit claims, claims for refund of contributions to the retirement fund, and service credit claims.

Production count	1951 actual	1952 estimate	1953 estimate
Annuity and death claims.....	47,528	43,380	43,140
Refund claims.....	182,992	168,970	166,100
Service credit claims.....	28,234	27,285	27,637
Inquiries answered.....	206,035	190,426	192,305

5. *Service records.*—A service record file is maintained on approximately 15,500,000 present and former employees. The slight increase is to maintain the files on a current basis.

Production count	1951 actual	1952 estimate	1953 estimate
Reports filed.....	1,488,676	1,708,060	2,877,000
Reports audited.....	40,051	39,711	31,986
Status cases determined.....	48,677	50,092	34,787
Inquiries answered.....	89,154	89,409	89,409

6. *Federal Personnel Council.*—The Council advises the President and the Commission in the protection and improvement of the merit system.

7. *Regulatory, appellate, and advisory functions.*—These consist of the formulation of rules and regulations; hearing and taking action on appeals; the administration of the political activities statutes; and the recommendation of measures to the President to promote the accomplishment of the objectives of the rules and regulations.

8. *Executive and administrative services.*

OBLIGATIONS BY ACTIVITIES

Defense materials procurement—1952, \$784,000.

PROGRAM AND PERFORMANCE

Under Executive Order 10281, dated August 28, 1951, the Defense Materials Procurement Agency was created to procure adequate supplies of minerals, metals, and other materials for the defense program. The functions previously performed by the Defense Minerals Administration,

Department of the Interior, and certain defense production activities in the General Services Administration were transferred to this Agency. During 1952, administrative expenses of the Agency were derived by transfers of \$400,000 from the Department of the Interior and \$115,000 from the General Services Administration. In addition, \$465,000 of the borrowing authority provided by section 304 (b) of the Defense Production Act will be used to finance development of new overseas minerals sources of supply. During 1953, all expenses of the Agency will be financed from the borrowing authority.

OBLIGATIONS BY ACTIVITIES

Defense mobilization—1951, \$870,345; 1952, \$2,543,750.

PROGRAM AND PERFORMANCE

The Administration formulates and carries out plans and programs for mobilizing domestic surface transportation, storage, and port facilities in the United States. The agency assembles and analyzes data with respect to the need for transportation and storage, and the ability of existing facilities to meet the requirements; coordinates and directs the movement of passenger and freight traffic in cooperation with Government and private transportation agencies; assigns and administers priorities to insure expeditious movement of traffic; presents to the Defense Production Administrator estimated requirements for construction, operation, maintenance, and repair materials; presents to the appropriate agencies estimated requirements for manpower; and makes recommendations to the Defense Production Administrator concerning accelerated tax amortization and defense loans. The 1953 requirements for the agency are included in a proposed supplemental appropriation, under proposed legislation to extend the Defense Production Act.

DISPLACED PERSONS COMMISSION

Salaries, Expenses, and Loans, Displaced Persons Commission—

【Displaced Persons Commission: For expenses necessary to carry out the provisions of the Displaced Persons Act of 1948, as amended by the Act of June 16, 1950 (Public Law 555), including \$1,100,000 for capital for loans pursuant to section 14 of said Act; rents in the District of Columbia; travel expenses, including travel expenses outside continental United States without regard to the Standardized Government Travel Regulations, as amended, and the rates of per diem allowances under the Travel Expense Act of 1949; hire of passenger motor vehicles; printing and binding outside the continental limits of the United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); expenses incident to the primary and secondary education of American children who are dependents of Government personnel paid from this appropriation and stationed overseas; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); employment of aliens; and payment of rent in foreign countries in advance; \$7,000,000, of which not less than \$4,375,000 shall be available for the expenses of transporting to the United States displaced persons of German ethnic origin: *Provided*, That allocations may be made from this appropriation by the Commission upon approval by the Bureau of the Budget to any department, agency, corporation, or independent establishment of the Government for direct expenditure for the purposes of this appropriation, and any such expenditures may be made under the specific authority herein contained or under the authority governing the activities of the department, agency, corporation, or independent establishment to which amounts are allocated: *Provided further*, That the Commission may enter into agreements with international agencies for the use of their transportation and other facilities for the transfer of persons as provided in section 12 of the Displaced Persons Act of 1948, as amended, and with United States governmental agencies and may make payment in advance or by reimbursement for expenses incurred by such agencies in rendering assistance to the Commission in carrying out the provisions of this Act.】

【The limitation fixed in Public Law 137 granting \$1,100,000 to the Displaced Persons Commission for loans pursuant to section 14 of the Act, is hereby decreased to \$600,000, and the limitation fixed in Public Law 137 granting \$4,375,000 to the Displaced Persons Commission for the expenses of transporting to the United States displaced persons of German Ethnic origin, is hereby decreased to \$3,400,000.】 (*Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.*)

PROGRAM AND PERFORMANCE

Legislation is proposed to extend stabilization authority. The 1953 requirements are included in a proposed supplemental appropriation under proposed legislation.

1. *Office of the Economic Stabilization Administrator.*—This office develops general economic stabilization policies for the guidance of the constituent agencies, and reviews the programs developed to carry such policies into effect.

2. *Office of Price Stabilization.*—Price-control measures, consistent with the Defense Production Act of 1950, as amended, aim at stabilizing prices at the levels prevailing in the fall of 1951. During fiscal year 1952, regulations are being developed and issued to replace the general price freeze order of January 26, 1951, and to establish a system of price controls tailored to the characteristics of particular industries or segments of industries. Insofar as practicable, these tailored regulations will prescribe definite dollars-and-cents ceilings. The agency will process applications for price adjustments to relieve hardships and to conform with the provisions of the Defense Production Act of 1950, as amended. This workload is being decentralized to the field offices to the maximum extent possible.

3. *Office of Rent Stabilization.*—Rent ceilings are established and enforced. Principal emphasis in 1952 is in critical defense-housing areas. Major workload items are as follows:

WORKLOAD

	1951 actual	1952 estimate	1953 estimate
Units controlled, end of year.....	6,600,000	10,250,000	-----
Tenants' complaints.....	194,893	296,000	-----
Compliance actions.....	139,543	210,000	-----
Landlords' petitions.....	1,098,890	5,400,000	-----
Eviction cases.....	395,817	588,000	-----
Settlements for repayment to tenants.....	\$3,695,482	\$5,000,000	-----
Payments to U. S. Treasury.....	\$1,425,899	\$2,200,000	-----

4, 5, and 6. *Wage Stabilization Board, Salary Stabilization Board, and Railroad and Airline Wage Board.*—Wage and salary control regulations are established and enforced as a part of general economic stabilization. Proposed wage and salary increases are reviewed in the light of equity and their probable effect on economic stabilization. Investigations are conducted to establish facts needed in making wage and salary decisions and in developing regulations. In addition to its regulatory functions, the Wage Stabilization Board has limited responsibilities in the settlement of labor disputes. Other agencies perform a large proportion of the public contact, investigation operations, and research which are financed under this activity.

FEDERAL CIVIL DEFENSE ADMINISTRATION

INTRODUCTORY STATEMENT

The programs of this Administration are considered to be of an emergency nature and the estimates of appropriation for 1953 in the amount of \$600 million are therefore recommended to be immediately available.

This Administration is responsible for preparing national plans and programs for the civil defense of the United States, and the dissemination of civil defense information. It provides coordination and guidance to the States and their political subdivisions in the development of local defense plans, and makes financial contributions toward these programs. It also stockpiles at strategically located points supplies and equipment necessary to supplement existing local resources after an attack.

This estimate will provide for substantial completion of the stockpiling program, approximately 50 percent of the matching funds for emergency supplies and equipment required at target areas, and a start on a matching program for protective shelters in congested areas.

OPERATIONS

Operations, Federal Civil Defense Administration—

For necessary expenses, not otherwise provided for, in carrying out the provisions of the Federal Civil Defense Act of 1950 (Public Law 920, 81st Congress), including purchase (not to exceed [one] eight) and hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); reimbursement of the Civil Service Commission for full field investigations of employees occupying positions of critical importance from the standpoint of national security; expenses of attendance at

PROGRAM AND PERFORMANCE

Provision is made for technical guidance to the States and operation of educational, supply, communication, and attack warning programs to develop and maintain an effective system of civil defense.

1. *Attack warning.*—A system is now in operation to provide warning of imminent enemy attack to key points in States and cities, based on information furnished by the air defense control centers of the Air Force.

2. *Communications.*—Channels of rapid and sustained communications connecting national headquarters, regional offices, and the States are necessary for the effective control and redistribution of all forces employed in civil defense. In 1953 work will be continued to perfect the system, primarily by use of existing commercial facilities.

3. *Supply service.*—This is a system of strategically located warehouses to be in readiness to support the critical target areas with stockpiles of medical and other supplies and equipment. At least 10 will be in operation by the end of 1952 and 50 are planned for 1953.

4. *Training.*—A Staff college and three training schools are in operation. The Staff college trains key State and local officials in civil defense planning and organization. The schools give technical training to selected individuals who, upon return to their communities, establish local

training programs. Approximately 4,000 will be trained in 1952, and 10,000 in 1953.

5. *Technical guidance to States and municipalities.*—These services provide guidance for civil defense programs to be carried out by local forces and, through nine regional offices, coordinates mobilization of local resources.

6. *Health and special weapons defense.*—This work aims at defense against potential biological and chemical warfare methods, and provides plans for the care and rehabilitation of civilian casualties in the event of attack.

7. *Public information.*—The public is being informed on means of personal survival, and volunteer participation in civil defense is being stimulated.

8. *Research.*—Research is necessary to acquire knowledge leading to the construction of better and less costly protective structures and to evaluate the effectiveness of civil defense measures.

9. *Executive direction.*

PROGRAM AND PERFORMANCE

This program provides funds which are to be matched equally by the States for the procurement of supplies and equipment necessary for civil defense purposes.

1. *Attack warning.*—To give the general public warning signals at the local level, contributions are made to provide sirens and other public warning devices.

2. *Communications.*—Contributions made are to guarantee local systems of communications necessary to control and direct the use of civil defense forces following a disaster.

3. *Fire-fighting services.*—Contributions are made to provide fire apparatus above normal civil requirements based on the needs of the individual areas.

4. *Rescue services.*—Organized and equipped teams of rescue personnel are to be employed in releasing entrapped and injured survivors from debris. Matching funds will be used to procure rescue vehicles and tools.

5. *Medical supplies and equipment.*—The funds provided in 1951 are estimated to be sufficient to enable all critical areas to provide first-aid supplies and equipment for the first 4 hours following an attack.

6. *Training.*—Joint financing of training aids and related needs contribute to the training of leaders and the education of the public.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1952, \$39,050,000; 1953, \$43,700,000.

Obligations incurred.....		71,500,000	227,500,000

PROGRAM AND PERFORMANCE

Materials and equipment not normally available in a target area or not present in the quantities needed to cope with an enemy attack are to be stockpiled for distribution following an attack. Selection of sites for the warehouses has been based on the objective of furnishing supplies to a stricken area within 4 hours. Medical supplies sufficient to provide for 1,800,000 casualties will be stockpiled in 1952, and are requested for 2,700,000 casualties in 1953. The engineering supplies consist primarily of portable water pipe, purifiers, and generators; 310 miles of pipe will be procured in 1952 and 900 miles in 1953. Welfare supplies for 1953 consist of feeding kitchens, mattress pads, and blankets sufficient to care for about 8 million homeless persons in addition to those cared for by existing local resources.

OBLIGATIONS BY ACTIVITIES

Shelters—1952, \$6,500,000; 1953, \$243,500,000.

PROGRAM AND PERFORMANCE

Funds provided for modification of existing structures and construction of single-purpose structures are apportioned to the States on a statutory formula and equally matched by them. Need, location, and design of the shelters are subject to review by the Administration. Criteria for such review are derived from various studies undertaken by governmental and private agencies. Using the survey manual prepared by Federal Civil Defense Administration, 16 critical target cities have started shelter surveys of existing buildings, 17 have organized for surveys, and the remainder are expected to start during 1952. It is estimated that 31 million people are located during daytime working hours in commercial or industrial zones where the need for protective shelters is greatest. Of these, 2 million can be sheltered in existing buildings without modification, and 14 million more can be sheltered if the existing buildings are modified; the remaining 15 million can only be sheltered if entirely new buildings are constructed. The estimate provides for a start on this program, which is estimated to eventually cost \$1,730 million, of which the Federal Government will pay half.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1952, \$6,500,000; 1953, \$243,500,000.

Obligations incurred	6,672,297	6,837,300	8,329,000

PROGRAM AND PERFORMANCE

The Commission regulates interstate and international wire and radio communication.

Direct obligations are estimated to be \$8,075,000, an increase of \$1,469,450 compared with 1952. The increase is mainly the result of (1) defense-related needs for a strengthened radio-monitoring and direction-finding program, including control of electromagnetic radiations; and (2) substantially increased workloads anticipated upon lifting of the television "freeze" early in 1952.

1. *Common carrier activities.*—Existing and proposed rates and practices of common carriers, proposed mergers and acquisitions of properties, extensions and reductions in services, and construction of facilities are passed upon.

2. *Applied technical research and frequency allocation.*—Radio wave characteristics, equipment capabilities, and other technical matters are studied in relation to the allocation and assignment of frequencies for best utilization of the radio spectrum. The increase is needed mainly to enable the Interdepartmental Radio Advisory Committee to bring the frequency assignment list up to date.

3. *Field engineering and monitoring.*—Field staff inspects radio stations, conducts operator examinations, monitors the radio spectrum, collects engineering data, and locates lost ships and aircraft and illegal sources of radio emission. The increase, related mainly to the program for the control of electromagnetic radiation, will allow the installation of 4 monitoring stations, and will provide 24-hour watches at 11 of the 22 stations which do not now have round-the-clock watches.

4. *Safety and special radio services.*—Aviation, police, amateur, and other nonbroadcast uses of radio are licensed and regulated. The increase is to take care of rapidly growing workloads owing partly to the defense program. Pertinent data are summarized below:

	1950 actual	1951 actual	1952 esti- mated	1953 esti- mated
Stations regulated ^a	66,708	87,575	96,877	107,053
License applications.....	93,387	109,381	135,925	144,900

^a As of June 30 of each fiscal year.

^b Excluding amateurs.

5. *Broadcast activities.*—Broadcasting stations, including standard (AM), frequency modulation (FM), and television (TV), are licensed and regulated. The increase is proposed to handle a greatly increased workload, primarily in the field of television. Pertinent data are shown in the following table:

	1950 actual	1951 actual	1952 esti- mated	1953 esti- mated
Stations regulated ^a	3,144	3,153	3,394	3,794

Description	1951 actual	1952 estimate	1953 estimate
1. Mediation and conciliation of labor disputes.....	\$2,595,355	\$2,937,173	\$3,369,935
2. Administration.....	172,098	189,240	209,065
Obligations incurred.....	2,767,453	3,126,413	3,579,000

PROGRAM AND PERFORMANCE

The Service, through mediation and conciliation, assists in the prevention or settlement of labor-management disputes affecting interstate commerce and defense production in industries other than rail and air transportation. Obligations are estimated to be \$3,579,000 in 1953, an increase of \$452,000 compared with 1952. The increase reflects the need for additional staff to meet defense production requirements.

1. *Mediation and conciliation of labor disputes.*—During 1951 services were made available in about 14,000 labor-

FEDERAL MEDIATION AND CONCILIATION SERVICE—Continued

Salaries and Expenses, Federal Mediation and Conciliation Service—Continued

management disputes which involved numbers of employees ranging from a few to over 100,000. The number and time investment in disputes is expected to be larger in 1952 and 1953 because of wage and price controls and the rapid expansion of defense production. In addition to the settlement of specific disputes, free collective bargaining and good relationships between labor and management are promoted to enable them to settle their differences directly and amicably.

2. Administration.

Total obligations.....	4,189,078	4,382,325	4,574,000

PROGRAM AND PERFORMANCE

The Federal Power Commission administers the Federal Power Act and Natural Gas Act and has additional duties under other acts relating to Federal power development.

1. *Licensing of non-Federal hydroelectric projects.*—Licenses are issued for projects affecting public lands and streams subject to Federal jurisdiction; construction and operation of projects are inspected; and the cost of construction is determined. Pertinent data are:

Description	1951 actual	1952 estimate	1953 estimate
Number of licensed projects.....	653	683	693
Number of applications pending (end of year).....	193	193	183
Total claimed cost (in millions).....	\$1,154	\$1,293	\$1,376
Annual income to Government from licenses.....	\$1,205,254	\$1,620,743	\$1,306,359

2. *Regulation and surveys, electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce, and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities subject to the Commission's jurisdiction. Statistics and other information about the industry are gathered and published. Pertinent data are:

Description	By calendar year		
	1950 actual	1951 estimate	1952 estimate
Number of public utilities regulated.....	269	270	270
Operating revenues (in millions).....	\$4,039	\$4,250	\$4,450
Number of companies reporting for statistical purposes.....	1,454	1,450	1,450

3. *Regulation and surveys, natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts and depreciation and depletion practices. Certificates of public convenience and necessity are issued to companies subject to the jurisdiction of the Commission. Statistics

and other information about the industry are gathered and published. Pertinent data are:

Description	1951 actual	1952 estimate	1953 estimate
Number of certificate applications pending, end of year.....	129	172	200
Amount of rate increases pending, end of year (in millions).....	\$29.7	\$123	\$140

4. *Investigations relating to Federal river development projects.*—Studies are made of river basins and river development projects proposed by the Departments of the Army and Interior to determine possibilities for conservation, development, and utilization of potential power resources and recommendations are made to the constructing agencies. Review and approval are required for certain proposed rates for sale of power from such projects. Information on the power features of Federal river development projects is furnished Congress and Federal and State agencies.

Only 18.6 million kilowatts out of a potential 106 million kilowatts of hydroelectric energy in the United States were developed as of December 31, 1950. In fiscal year 1951, 174 studies were carried on and it is estimated that action can be taken on 115 of a potential 135 cases in 1952 and on 130 of an additional 160 in 1953.

5. *International Joint Commission.*—This covers participation of the Federal Power Commission in the International Joint Commission which adjudicates controversies between the United States and Canada, principally over boundary waters, and conducts investigations as directed by the two Governments.

6. *Administration.*

PROGRAM AND PERFORMANCE

The Commission seeks to maintain effective competitive conditions and to prevent the development of monopolistic and unfair trade practices, thus promoting high levels of production.

1. *Antimonopoly.*—Monopolistic restrictions of output, boycotts, corporate mergers and acquisitions and other monopolistic practices and conspiracies which restrain trade or tend toward monopoly are prevented; economic data are gathered about business organization and conduct, particularly concerning monopoly and related problems; and supervision is provided over the registration and operation of associations of American exporters engaged solely in export trade. The amendment to section 7 of the Clayton Act has resulted in a considerable increase in the number of investigations. During 1951 there were 309 investigations of monopolistic practice completed. It is estimated that there will be 335 in 1952 and in 1953. Investigations of compliance with Commission orders were completed in 314 cases during 1951, with about the same level anticipated for 1952 and 1953.

2. *Antideceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action of the Commission; manufacturers, distributors, and consumers are protected from the evils of misbranding and nondisclosure of fiber content with respect to manufactured wool products; consumers and merchants are protected from deceptive and unfair competition resulting from misbranding, false or deceptive advertising, and false invoicing of furs and fur products; and affirmative aid is provided to business for maintaining effective competition through industry trade practice conferences. During 1951, 2,324 applications for complaint were reviewed, of which 869 received full-scale investigation. Follow-up on compliance with cease-and-desist orders was completed in 370 cases. Operations during 1952 and 1953 are expected to continue at the 1951 level.

3. *Administration.*

PROGRAM AND PERFORMANCE

The General Accounting Office settles claims by or against the Government; audits the financial transactions of Government agencies; audits Government corporations; audits and settles fiscal officers' accounts; renders legal decisions relating to Government fiscal matters; conducts investigations relating to the receipt, disbursement, and application of public funds; develops, prescribes, and evaluates accounting systems on a Government-wide basis; and performs other related and necessary functions. During 1951, refunds and collections in the amount of \$48,057,228 were made through the audit, investigative, and claims activities of the General Accounting Office.

1. *Office of the Comptroller General.*—The Comptroller General serves Congress by presenting to it reports on matters relating to public funds, with recommendations and advice. The scope and variety of legislative reports and services to congressional committees continues to broaden and the number to expand.

2. *Office of the General Counsel.*—In addition to preparing decisions and reports, the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on the legality or propriety of proposed obligations and expenditures, the

GENERAL ACCOUNTING OFFICE—Continued**Salaries, General Accounting Office—Continued**

sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and like matters. Workload amounted to 18,096 cases during 1951; the backlog on June 30, 1951, was 2,288.

3. *Office of Investigations.*—This activity comprises (a) inspections at irregular intervals of most of the larger Federal installations and activities throughout the country; (b) investigations of fraudulent transactions, suspected fraud, or other serious irregularity; and (c) surveys of particular subjects of Federal expenditure on a broad and sometimes Nation-wide basis. The work is carried on in the field and at the spot where it can be best applied in the interest of the Government. Five hundred and eighty-six Federal offices and activities were visited in 422 cities during the fiscal year ended June 30, 1951.

4. *Office of the Chief Clerk.*—This office is responsible for property management and housekeeping work which encompass duplicating, procurement, distribution of mail, and messenger and labor services.

5. *Accounting Systems Division.*—During 1952 and 1953 the major work efforts of the Accounting Systems Division will continue to be directed to the cooperative work with agencies in the development of their systems, with special emphasis and attention being given to those agencies primarily concerned with the current defense effort and essential civilian services.

6. *Claims Division.*—All justiciable claims by or against the United States are settled, unless exclusive jurisdiction is specifically conferred upon another agency by law. During 1951, the number of claims settled was 295,534.

7. *Division of Personnel.*—During 1951, the work performance standards program was accelerated and standards were in use for 489 positions, covering approximately 50 percent of the employees of the office. The standard indicates the essential work operations assigned to each position, prescribes the approved manner of performance, sets out the work aims to be accomplished, and provides the means for evaluating employee performance.

8. *Transportation Division.*—This activity audits freight and passenger transportation payments for the account of the United States and the settlement of claims involving transportation charges. Over \$420,000,000 has been collected during the past 11 years.

9. *Audit Division.*—The traditional audit conducted by the General Accounting Office is directed primarily to the accountability of the officers of the Government who have been entrusted with public funds, and of duly authorized certifying officers for any illegal, improper, or incorrect payments.

Where found to be more feasible and practicable, many audits are performed immediately within the departments and agencies or at project sites. At present, site audits are performed at 944 locations, including Washington.

10. *Corporation Audits Division.*—During 1951, reports on the audit of 60 corporations subject to the Government Corporation Control Act and other agencies subject to the commercial-type audit were rendered to the Congress. The audit was current on June 30, 1951. The comprehensive audit program which consists of an audit of receipts, expenditures, and application of public funds, together with verification of the assets, liabilities, proprietary accounts, and operating results of Government agencies in accordance with generally accepted auditing principles and procedures applicable to commercial enterprises, is being expanded as rapidly as qualified personnel can be obtained.

11. *Postal Audit Division.*—This division was created to perform the comprehensive audit of the Post Office Department and the Postal Service, which function was placed in the General Accounting Office by the Post Office Department Financial Control Act of 1950 (64 Stat. 460).

12. *Reconciliation and Clearance Division.*—Provision is made for the audit, reconciliation, and adjustment of official checking accounts and such other activities as the initial examination, analysis, and segregation of fiscal officers' accounts; furnishing of information from fiscal accounts and documents; coordination, assembly, and preparation of fiscal accounts for settlement and filing; and maintenance of control over the flow of fiscal accounts and supporting documents through the Office.

13. *Accounting and Bookkeeping Division.*—This division has been abolished, although certain of its functions were transferred to other divisions in the Office.

14. *Postal Accounts Division.*—As a result of the Post Office Department Financial Control Act of 1950, this activity was transferred to the Post Office Department.

OBLIGATIONS BY ACTIVITIES

Hearing and adjudication of Indian claims—1951, \$87,995; 1952, \$93,500; 1953, \$104,700.

PROGRAM AND PERFORMANCE

This independent Commission of three members, which is required to complete its work by April 10, 1957, was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States or Alaska. Claimants were allowed a period of 5 years from August 13, 1946, within which to submit their claims. There were 852 claims filed by the end of that filing period. Payments of awards are dependent upon subsequent appropriations by Congress. As of June 30, 1951, appropriations totaling \$3,489,843 had been made to pay awards.

PROGRAM AND PERFORMANCE

The Commission regulates common carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, pipelines, and contract carriers by motor vehicle and water.

Obligations are estimated to be \$9,975,000 for 1953, an increase of \$471,065 compared with 1952. The principal increases are requested to permit faster disposition of (a) applications of motor carriers for operating authority and (b) proceedings involving the lawfulness of rates, fares, and charges; and to examine a greater number of tariff publications filed with the Commission.

1. *Applications, complaints, and other proceedings.*—This work consists of regulating rates, granting operating authorities, approving financial reorganizations, and dis-

posing of proceedings involving the lawfulness of rates, fares, and charges.

2. *Investigation, litigation, legal advice, and compliance.*—Uniform systems of accounts are formulated and policed for all types of carriers; operating costs of the various types of carriers are analyzed and evaluated in relation to rate structure; assistance is rendered in the enforcement of statutes and regulations affecting transportation and carriers; briefs and arguments are prepared in cases involving suits to set aside orders of the Commission; examinations are made to ascertain that motor carriers and freight forwarders are adequately insured; and regulations are prepared to promote highway safety.

3. *Collection and analysis of accounting and statistical data.*—Statistical compilations and research are undertaken for use in regulating carriers.

4. *Supervision of rate publications.*—Carrier tariffs are examined for compliance with the law and regulations and to insure clarity and uniformity.

5. *Railroad car service.*—A field staff works directly with carriers and shippers in handling problems related to car service in the transportation of property by railroad.

6. *Valuation of railroads and pipelines.*—This work consists of keeping inventory and cost records current and developing elements of value to be used in setting up depreciation reserves, determining costs of service, and approving financial reorganizations.

7. *Administration.*

Railroad Safety, Interstate Commerce Commission—

Railroad safety: For expenses necessary in performing functions authorized by law (45 U. S. C. 1-15, 17-21, 35-46, 61-64; 49 U. S. C.

26) to insure a maximum of safety in the operation of railroads, including authority to investigate, test experimentally, and report on the use and need of any appliances or systems intended to promote the safety of railway operation, including those pertaining to block-signal and train-control systems, as authorized by the joint resolution approved June 30, 1906, and the Sundry Civil Act of May 27, 1908 (45 U. S. C. 35-37), and to require carriers by railroad subject to the Act to install automatic train-stop or train-control devices as prescribed by the Commission (49 U. S. C. 26), including the employment of inspectors and engineers, [\$983,000, of which not more than \$743,700 shall be available for personal services] \$1,042,000. (*Independent Offices Appropriation Act, 1952.*)

Appropriated 1952, \$983,000

Estimate 1953, \$1,042,000

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN**Contribution to Interstate Commission on the Potomac River Basin—**

Contribution to Interstate Commission on the Potomac River Basin: To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), \$5,000. (*Independent Offices Appropriation Act, 1952.*)

Appropriated 1952, **\$5,000**Estimate 1953, **\$5,000****AMOUNTS AVAILABLE FOR OBLIGATION**

Appropriation or estimate—1951, \$5,000; 1952, \$5,000; 1953, \$5,000.

OBLIGATIONS BY ACTIVITIES

Contribution to the Interstate Commission on the Potomac River Basin—1951, \$5,000; 1952, \$5,000; 1953, \$5,000.

PROGRAM AND PERFORMANCE

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution. The appropriation requested is for the Federal Government's pro rata contribution to the general expenses of the Commission.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1951, \$5,000; 1952, \$5,000; 1953, \$5,000.

OBLIGATIONS BY ACTIVITIES

Administration—1951, \$118,570; 1952, \$139,350.

PROGRAM AND PERFORMANCE

The Commission adjudicates claims against the United States brought by motor carrier transportation systems arising out of their seizure or control by the Government in World War II. The Commission, in compliance with Conference Committee Report No. 1222, issued October 19, 1951, is in process of bringing its work to completion.

PROGRAM AND PERFORMANCE

The Committee (NACA) conducts scientific research in aeronautics devoted almost entirely to problems of military aviation but having applications to commercial aviation as well. The research is carried on mainly at its three major laboratories and two auxiliary flight research stations, supplemented by research sponsored at scientific and educational institutions and other Government agencies. Close coordination with the aeronautical programs of the Department of Defense is maintained through military representation on the NACA and its subcommittees and NACA representation on the aeronautics and guided missiles committees of the Research and Development Board of the Department of Defense. Most of the research is directed toward obtaining basic scientific and engineering data for continued improvement in the design of military aircraft, missiles, and their power plants.

1. *Aerodynamic research.*—This research seeks to develop the design of aircraft and missiles which can perform effectively in the transonic and supersonic speed ranges and at the low speeds of takeoff and landing. Data obtained from actual flight tests of high-speed piloted and pilotless aircraft are correlated with wind-tunnel results and theoretical studies. The increased funds are to complete the staffing of newly constructed specialized research facilities and to carry on intensified

research in research facilities used in the solution of the most urgent aerodynamic problems.

2. *Power plants research.*—The research under this head centers on the newer forms of aircraft and missile power plants, such as turbo-jet, ram-jet, turbo-propeller, and rocket engines. The increase in funds is to complete the staffing of newly constructed propulsion research facilities and to permit increased utilization of research facilities.

3. *Aircraft structural research.*—In 1953 particular emphasis will be placed on structural problems resulting from the increased aerodynamic and ground handling loads, thinner wings, the novel configurations of modern high-speed aircraft, and aerodynamic heating. The increased funds are required primarily to permit an expansion of flight research activity at the High-Speed Flight Research Station.

4. *Operating problems research.*—Continuing studies now under way on aircraft icing, flight through turbulent weather, and the causes and prevention of fires in aircraft are of vital importance to civil aviation as well as to the operation of military aircraft.

5. *Headquarters management and coordination.*

Obligations incurred.....	12,719,581	11,467,452	19,933,000

PROGRAM AND PERFORMANCE

The work of the NACA requires the continuing modernization of its research facilities and the construction of certain additional facilities for conducting research beyond the capabilities of existing equipment.

1. *Aerodynamic research.*—The proposed modifications to a pressure tunnel at the Langley Aeronautical Laboratory, although required primarily for structural research, will also increase the capacity of this tunnel for aerodynamic research.

2. *Power plants research.*—The 1953 projects consist of a high-pressure air supply and distribution system and the expansion of air facilities for full-scale jet engine research at the Lewis Flight Propulsion Laboratory.

3. *Aircraft structural and operating problems research.*—Proposed new projects include a high-temperature structural research laboratory and modifications to a pressure tunnel to permit dynamic model testing, both at the Langley Aeronautical Laboratory.

Obligations incurred.....	26,251,759	37,755,249	9,958,992

PROGRAM AND PERFORMANCE

Funds were made available in the Deficiency Appropriation Act, 1950, for the construction of three large supersonic wind tunnels at laboratories of the NACA as authorized by the Unitary Wind Tunnel Plan Act of 1949. These tunnels are to be used for the development, primarily by industry, of military aircraft and missiles.

1. *Aerodynamic research.*—This will provide for continuing the construction of two supersonic aerodynamic tunnels, one each at the Langley and Ames Aeronautical Laboratories.

2. *Power plants research.*—This will provide for continuing the construction of a supersonic propulsion tunnel at the Lewis Flight Propulsion Laboratory.

OBLIGATIONS BY ACTIVITIES

Maintenance and operation of title I properties—1951, \$37,019; 1952, \$34,400; 1953, \$47,000.

PROGRAM AND PERFORMANCE

The National Capital Housing Authority operates 112 units of low-rent housing and 31 nonresidential properties developed or acquired under title I of the District of Columbia Alley Dwelling Act of 1934. As local housing authority for the District of Columbia, it also operates 3,132 units of low-rent housing under the United States Housing Act of 1937, and 4,463 units of war housing. The latter includes 882 units of housing constructed under the veterans' re-use housing program.

All operations except those under title I of the Alley Dwelling Act are subject to the supervision of the Public Housing Administration and are included in the consolidated estimates of that agency. Operations under title I are financed by direct congressional appropriation. Under provision of the annual appropriation language, rental receipts from this activity are covered into the Treasury monthly.

The following table shows income, operating expenses, major repairs and replacements, and net income for title I properties for fiscal years 1951, 1952, and 1953.

NATIONAL CAPITAL PARK AND PLANNING COMMISSION

Land Acquisition, National Capital Park, Parkway, and Playground System, National Capital Park and Planning Commission—

Land acquisition[, National Capital park, parkway and playground system]: For necessary expenses for the National Capital Park and Planning Commission in connection with the acquisition of land for the park, parkway, and playground system of the National Capital, as authorized by [section 4 of] the Act of May 29, 1930 (46 Stat. 482), as amended by the Act of August 8, 1946 (60 Stat. 960), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and real estate appraisers, by contract or otherwise without regard to the civil service and classification laws, at rates of pay or fees not to exceed those usual for similar services; and purchase of options [and other costs incident to the acquisition of land; \$155,000.]; to remain available until expended, \$600,000, of which (a) \$75,000 shall be available for the purposes of section 1 (a) of said Act of May 29, 1930, (b) \$459,000 shall be available for the purposes of section 1 (b) thereof, and (c) \$66,000 shall be available for the purposes of section 4 thereof: Provided, That not exceeding \$17,250 \$27,500 of the funds available [under the above appropriation] for land acquisition purposes shall be used during the current fiscal year [may be used] for [regular and part-time personal services or other] necessary expenses of the Commission[, excepting services by contract] (other than payments for land) in connection with land acquisition. (Independent Offices Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

The National Capital Park and Planning Commission acquires land on behalf of the United States for parks, parkways, and recreation purposes in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along the shores of the Potomac River above and below Washington from Great Falls to Mount Vernon, one-half of the cost of which is borne by the local jurisdictions. Obligations through 1952 will complete acquisition of the lower Virginia section, 35 percent of the upper Virginia section, and virtually complete the upper Maryland section. No progress has been made on the lower Maryland section. The 1953 program calls for extension of the upper Virginia section where Fairfax County is prepared to contribute matching funds.

2. *Extension of National Capital Park system into Maryland.*—Funds are advanced to the Maryland-National Capital Park and Planning Commission for extension of the park system into the Maryland environs. Two-thirds of these funds are repaid to the United States 8 years later. The system now includes one unit of Cabin John Branch Park, one unit of Little Falls Branch Park, four units of Rock Creek Park, five units of Sligo Park, one unit of Northwest Branch Park, one unit of Paint Branch Park, and two units of Anacostia River Park. The 1953 program includes four proposed units which are in critical danger of being destroyed through private real-estate subdivision.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia, with all expenditures being repaid to the United States by the District of Columbia. Acquisitions are part of the Commission's comprehensive plan for the park, parkway, and playground system of the National Capital.

Obligations incurred.....	471,080	163,576	141,312

PROGRAM AND PERFORMANCE

The National Capital Sesquicentennial Commission in 1953, proposes to produce again “Faith of Our Fathers” in the Carter Barron Amphitheater. The 71 performances given during the 1951 season were attended by over 100,000 persons. It is expected that attendance during the 1952 season will increase and that revenues will cover performance costs.

NATIONAL LABOR RELATIONS BOARD

Salaries and Expenses, National Labor Relations Board—

Salaries and expenses: For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U. S. C. 141-167), and other laws, including expenses of attendance at meetings concerned with the work of the Board when specifically authorized by the Chairman or the General Counsel; and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); **\$8,233,959**.

of which not more than \$6,622,284 shall be available for personal services: *Provided*, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2 (3) of the Act of July 5, 1935 (49 Stat. 450), and as amended by the Labor-Management Relations Act, 1947, and as defined in section 3 (f) of the Act of June 25, 1938 (52 Stat. 1060) **\$9,800,000.** (47 U. S. C. 222; Labor-Federal Security Appropriation Act, 1952.)

Appropriated 1952, * **\$7,885,418** Estimate 1953, **\$9,800,000**

* The appropriation was reduced to this amount by sec. 704 of the Labor-Federal Security Appropriation Act, 1952.

Obligations incurred.....	8,403,044	8,419,418	9,800,000

PROGRAM AND PERFORMANCE

Under the National Labor Relations Act, the Board (1) resolves representation disputes in industry and (2) remedies and prevents unfair labor practices by employers and unions.

The statute also requires the Board to hold elections in labor disputes that threaten a national emergency, to determine whether employees wish to accept the "last offer" of their employers. Elections of this type have not been held for 3 years; no estimate has been included for this contingent function.

A major change in the agency's functions occurred with the passage of Public Law 189 in the fiscal year 1952. This law discontinued the requirement for conducting union-shop authorization elections, but deauthorization elections are continued as a function.

The estimate assumes that the building construction industry will continue to settle representation disputes without using the agency's election machinery.

1. *Field investigation of cases and informal disposition or preparation for formal processing.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated in the regional office in which they are filed. Failing settlement, dismissal, or withdrawal of these cases, they are prepared for public hearing. About 89 percent of the unfair labor practice cases and 80 percent of the election cases are closed without the need for public hearing or further formal action.

CASES PROCESSED IN FIELD

	1951 actual	1952 estimate	1953 estimate
Charges of unfair labor practices.....	5,526	5,550	6,950
Petitions for representation elections.....	9,732	11,000	11,200

2. *Trial examiner hearing of unfair labor practice cases.*—Trial examiners conduct public hearings which are the basis of the findings and recommendations set forth in intermediate reports. In fiscal year 1951, 418 reports were issued; for 1952, the estimate is 300; for 1953, 390.

3. *Board adjudication of cases.*—In unfair labor practice cases, if no exceptions are filed within 20 days of issuance of the trial examiner's intermediate report, it takes effect as a Board order. However, 80 percent of intermediate reports require Board decisions. The Board may dismiss the charge or issue an appropriate remedial order.

Representation cases that are not closed informally are referred to the Board for decision. The Board may either order an election to determine the choice of bargaining representative or dismiss the case.

DECISIONS ISSUED BY THE BOARD MEMBERS

	1951 actual	1952 estimate	1953 estimate
On charges of unfair labor practices.....	295	190	360
On petitions for representation elections.....	1,618	1,705	1,790

4. *Securing of compliance with Board orders, including enforcement through court orders.*—About 60 percent of decisions in unfair labor practice cases adjudicated by the Board itself eventually require litigation in circuit courts of appeals. In 1951, 171 decisions were so referred; for 1952 the estimate is 120; and for 1953, 200.

Obligations incurred.....	610,790	593,749	570,000

PROGRAM AND PERFORMANCE

Railroad employee grievances resulting from the application of contracts may be brought for adjustment to this 36-man Board composed of an equal number of carrier and union representatives who are paid by the parties. The Board is organized into four quasi-independent divisions having separate jurisdiction over employees in four different groups of crafts.

Obligations incurred.....	150,928	3,500,000	15,000,000

PROGRAM AND PERFORMANCE

The Foundation is responsible for developing a national policy for the promotion of basic research and education in the sciences, for supporting basic research, for awarding graduate fellowships, and for fostering the interchange of scientific information. The Foundation does not itself operate any research laboratories.

The total appropriation recommended amounts to \$15,000,000. This represents an increase of \$11,500,000 compared with the current fiscal year. The increase is requested in order to provide needed additional support for basic scientific research and to train additional scientists in numbers which are more nearly adequate to meet national requirements.

1. *Research policy development, and services.*—Studies are conducted to make possible the formulation of a national science policy. Interchange of scientific information is fostered through development of improved means of disseminating such information. A register of scientific and technical personnel is maintained, and financial support furnished to the Interdepartmental Committee on Scientific Research and Development.

2. *Research support.*—Basic research is being strengthened in the mathematical, physical, medical, biological, and engineering sciences, principally through grants to educational and other research institutions for the support of specific research projects. The Foundation is expected ultimately to assume major responsibility for Federal support of basic research through grants and contracts. In line with this policy, increased funds are recommended

NATIONAL SCIENCE FOUNDATION—Continued

Salaries and Expenses, National Science Foundation—Continued for research support by the Foundation. This increase has been taken into account in arriving at the recommendations for the basic research budgets for the Department of Defense and other agencies.

3. *Training of scientific manpower.*—To increase the supply of trained scientific personnel, the estimate provides for approximately 2,200 graduate fellowships, primarily predoctoral, to be awarded for the academic year 1953–54. In addition, an exploratory program is proposed to improve the quality of teaching in individual scientific fields.

NATIONAL SECURITY TRAINING COMMISSION**SALARIES AND EXPENSES****Salaries and Expenses, National Security Training Commission—**

For necessary expenses of the National Security Training Commission, [established by the Universal Military Training and Service Act, approved June 19, 1951,] including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not in excess of \$50 per diem and contracts with temporary or part-time employees may be renewed annually; reimbursement of the General Services Administration for security guard services; hire of passenger motor vehicles; expenses of attendance at meetings concerned with the purposes of this appropriation; rental of office space in the District of Columbia; and purchase and installation of air-conditioning equipment without regard to the provisions of the Act of October 26, 1942, as amended (40 U. S. C. 317); **[\$185,000: Provided, That the appropriation "Emergency Fund for the President, National Defense" shall be reimbursed from this appropriation for allocations made therefrom for expenses of said Commission]** **\$111,000.** (*Universal Military Training and Service Act, Public*

Law 51, 82d Cong., approved June 19, 1951; Supplemental Appropriation Act, 1952.)

Appropriated 1952, **\$185,000**

Estimate 1953, **\$111,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, \$185,000; 1953, \$111,000.

OBLIGATIONS BY ACTIVITIES

Development of policies and standards governing training in the National Security Training Corps—1952, \$185,000; 1953, \$111,000.

PROGRAM AND PERFORMANCE

The National Security Training Commission establishes policies and standards to govern the training in the National Security Training Corps, including provision for the moral and spiritual welfare of the members of the corps.

This estimate provides for the continuation of a small staff to assist the Commission in the completion of several necessary studies and of plans for the universal military training program until such time as the President or the Congress directs the initiation of the training program.

RAILROAD RETIREMENT BOARD

Payment to Railroad Retirement Account—

(Annual indefinite, general account)

Payment to railroad retirement account: For an annual premium to provide for the payment of all annuities, pensions, and death benefits, in accordance with the provisions of the Railroad Retirement Acts of 1935 and 1937, as amended (45 U. S. C. 228–228s), and for expenses necessary for the Railroad Retirement Board in the Administration of said Acts as specifically provided for under this title, for crediting to the railroad retirement account, an amount equal to amounts covered into the Treasury (minus refunds) during the current fiscal year under the Railroad Retirement Tax Act (28 U. S. C. 1500–1538). (45 U. S. C. 228a–228r; Labor-Federal Security Appropriation Act, 1952.)

Appropriated (estimate) 1952, a \$740,000,000

Estimate 1953, a \$690,000,000

* Excludes \$33,000,000 appropriated in the Railroad Retirement Board Appropriation Act, 1950.

Payment to railroad retirement account—1951, \$607,991,049; 1952, \$773,000,000; 1953, \$723,000,000.

PROGRAM AND PERFORMANCE

The railroad retirement system is supported by taxes on carriers and their employees established at a level designed to support the system on an actuarially sound basis. Appropriation of an annual premium, in an amount equal to the estimate of taxes to be collected, is made to this account for payment to the railroad retirement account (trust fund).

Effective with fiscal year 1952, this appropriation is made in an indefinite amount, with payments to the trust fund being made on a monthly basis equal to the taxes (less refunds) actually collected, thereby assuring the transfer of amounts equal to all the taxes collected each year.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions (payment to railroad retirement account)—1951, \$607,991,049; 1952, \$773,000,000; 1953, \$723,000,000.

PROGRAM AND PERFORMANCE

The Railroad Retirement Board administers the federally operated railroad retirement system, financed by employer and employee taxes. This appropriation is for that portion of the administrative expenses of the Board required in the operation of this program, and is derived from the railroad retirement account. Public Law 234, Eighty-second Congress, enacted October 30, 1951, made extensive changes in the railroad retirement system which will result in a very substantial increase in workloads in 1952, and to a lesser extent in 1953. A supplemental appropriation of \$1,600,000 for 1952 is proposed for later submission.

1. *Maintenance of accounts of employee earnings.*—Annuity and benefit payments based upon earnings in railroad employment require individual records of earnings. The workload of maintaining these records fluctuates with the level of employment in the railroad industry, rates of turn-over, and similar factors. The primary workload is the processing of compensation items, which represent the individual earnings of workers. This activity is operated jointly with a similar requirement under the railroad unemployment insurance program and the costs are shared on a measured basis.

	1951 actual	1952 estimate	1953 estimate
Compensation items.....	5,005,909	6,244,000	6,594,000

2. *Processing and certification for payment of initial claims.*—Individual claims for age and disability annui-

ties, survivors benefits, and lump-sum payments are adjudicated and certified to the Treasury for initial payment. The principal workload is the number of new claims received. This load tends to increase each year as more railroad workers are forced to seek retirement because of age or disability, and as more survivors of deceased employees become eligible for benefits.

	1951 actual	1952 estimate	1953 estimate
Claims received.....	94,761	101,550	115,000

3. *Monthly recertification of awarded claims.*—Once the individual claimant has been certified as entitled to monthly annuity or benefit payments, subsequent monthly recertification is required to assure continuation of such payments. The volume of monthly recertifications tends to grow slowly but steadily larger as the system ages. This growth will continue until the system reaches maturity a number of years hence. The primary workload is the number of monthly payments in force.

	1951 actual	1952 estimate	1953 estimate
Total number of monthly payments.....	4,779,661	5,125,000	6,396,000

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal to the appeals council, and subsequently to the Board itself.

	1951 actual	1952 estimate	1953 estimate
Appeals.....	191	200	700

5. *Actuarial services.*—Actuarial studies are required to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments. Actuarial studies and estimates are required by the Railroad Retirement Act.

6. *General administration.*—Except for administrative activities supported by and concerned with the retirement program exclusively, the cost of general administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

PROGRAM AND PERFORMANCE

The Board conducts renegotiation with contractors and subcontractors to eliminate excessive profits from business with the Government in connection with procurement activities under the national defense program. The Board expects to receive 11,300 filings in 1952 and 15,000 filings in 1953. Complete renegotiation proceedings will be required in the cases of approximately 70 percent of the contractors filing with the Board.

PROGRAM AND PERFORMANCE

The general objective of the statutes administered by the Commission is to protect the interests of the public and investors against fraud in the buying and selling of securities. Direct obligations for 1953 are estimated to be \$5,950,000, an increase of \$136,520 compared with 1952. The increase is primarily to care for increased workload in the regulation of public sale of securities.

1. *Regulation of public sale of securities.*—Provision is made for securing compliance with statutory standards of disclosure in offerings of securities registered with the Commission for public sale and in related periodic reports; prevention and suppression of fraud in the sale of securities; and enforcement of other provisions of the securities laws.

2. *Regulation of securities markets.*—National securities exchanges are registered and regulated; broker-dealers and investment advisers are registered and supervised in certain of their activities; and general supervision is exercised over securities markets.

3. *Regulation of public utility holding companies.*—This regulation extends to such matters as the geographic integration and corporate simplification of holding company systems; supervision of sale and purchase of securities and other assets; and surveillance of service-company arrangements and intrasystem transactions. On June 30, 1951, there were 444 utility companies subject to regulation by the Commission; of these, more than 50 companies are yet to be divested; whereas the other companies are to be dissolved or merged.

4. *Regulation of investment companies.*—Registered investment companies are regulated in accordance with prescribed standards. On June 30, 1951, there were 368 registered investment companies. It is expected that there will be about the same number of registered investment companies on June 30, 1952, and June 30, 1953.

5. *Assistance to courts in reorganization of bankrupt corporations.*—Independent expert assistance is provided in

proceedings under chapter X of the Bankruptcy Act. On June 30, 1951, there were 75 cases pending; it is estimated that this figure will not materially change in 1952 and 1953.

6. *Publication of corporate statistics.*—A quarterly financial report series for manufacturing corporations is compiled and published jointly with the Federal Trade Commission, and a continuing study of plant and equipment expenditures by major industry groups is conducted with the Department of Commerce.

SELECTIVE SERVICE SYSTEM

SALARIES AND EXPENSES

Salaries and Expenses, Selective Service System—

For expenses necessary for the operation and maintenance of the Selective Service System, as authorized by *title I* of the Universal Military Training and Service Act (62 Stat. 604), as amended, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed \$250 for the purchase of newspapers and periodicals; [and purchase of one passenger motor vehicle for replacement only; \$30,154,000; including not exceeding \$1,856,000 for expenses of National Administration, Planning, Training, and Records Management, not exceeding \$6,454,000 for expenses of State Administration, Planning, Training, and Records Servicing, and not exceeding \$339,500 for expenses of special boards] \$95,000 for the National Selective Service Appeal Board; and \$295,000 for the National Advisory Committee on the Selection of Doctors, Dentists, and Allied Specialists; \$39,686,000: Provided, That during the current fiscal year, the President may exempt this appropriation from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

PROGRAM AND PERFORMANCE

The Selective Service System, through the action of its 3,900 local boards, registers, classifies, and forwards men for induction into the Armed Forces. It defers from induction those whose civilian employment or training is found necessary to the national health, safety, or interest. The increase for 1953 provides for a greater number of men to be forwarded for induction than in 1952.

A supplemental estimate of \$5,200,000 is forecast for 1952 because of an increase in the number of inductions over the original estimate, the development of new programs for registration of Americans overseas, and for work by conscientious objectors, the tightening of deferment policies as the pool of available manpower shrinks, and because of a requested increase in the salaries of local board clerks comparable to that for classified employees.

SMALL DEFENSE PLANTS ADMINISTRATION

[SALARIES AND EXPENSES]

Salaries and Expenses, Small Defense Plants Administration—

For expenses necessary for organizing, and developing the program of the Small Defense Plants Administration, established by section 714 of the Defense Production Act of 1950, as amended, including expenses of attendance at meetings concerned with the purposes of this appropriation and purchase (not to exceed two) and hire of passenger motor vehicles, \$350,000. (Public Law 96, July 31, 1951; Supplemental Appropriation Act, 1952.)

Appropriated 1952, **\$350,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, \$350,000.

OBLIGATIONS BY ACTIVITIES

Organizing, and developing the program of the Small Defense Plants Administration—1952, \$350,000.

PROGRAM AND PERFORMANCE

An initial appropriation was made to organize and develop a program for assisting small-business men (a) to obtain financial aid through the Reconstruction Finance Corporation, contracts for supplying materials or products purchased by the Government, and technical and managerial aids; and (b) to secure just treatment by other Government agencies in their regulatory or procurement operations. A supplemental appropriation is anticipated for 1952 to place the programs into actual operation. Legislation is proposed to extend the authorization for these activities, for which provision is made in a proposed supplemental appropriation for 1953.

PROGRAM AND PERFORMANCE

The Smithsonian Institution conducts fundamental research in the fields of anthropology, astrophysics, and geology; taxonomic research in zoology and botany; and historical research in technology, the arts, and Americana. It maintains public exhibits; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; and participates in the international exchange of scientific literature.

1. *Management.*—The management staff plans, directs, and controls the Institution's operations and services.

2. *Operations.*—The Institution will continue to operate two museums, two scientific bureaus, two art galleries, the Canal Zone Biological Area, and the International Exchange Service.

3. *General services.*—Five main exhibition buildings are operated and maintained.

SUBVERSIVE ACTIVITIES CONTROL BOARD—Con.**Salaries and Expenses, Subversive Activities Control Board—Con.**

PROGRAM AND PERFORMANCE

The Board determines whether organizations are "Communist-action" or "Communist-front" organizations, and whether an individual is an officer of either kind of organization or a member of a "Communist-action" organization. Petitions, answers, and motions are reviewed, and hearings are conducted. Reports, Board decisions, and final orders are prepared and published. The Communist Party action case will be completed in 1952, and 15 Communist-front cases will be completed in 1953.

Obligations incurred.....	1,244,397	1,285,200	1,388,000

PROGRAM AND PERFORMANCE

1. *Research, investigations, and reports on international trade, tariffs, and commercial policies.*—The Commission assembles and interprets economic data relating to industry, commodities, and foreign trade for formulating governmental policy. This work consists largely of (a) conducting investigations bearing on tariff and other restrictions on imports; (b) supplying factual data on specific commodities as the basis for consideration of concessions by the United States in trade agreements, participating in their negotiations, and reporting on their operations, and (c) performing a continuous analysis of economic and technical information.

A moderate increase is recommended for investigations on the possible withdrawal or modification of tariff concessions. Requests for these investigations are increasing as a result of the Trade Agreements Extension Act of 1951 in which there is a specific provision for relief when imports are causing or threatening serious injury to competitive domestic industries.

2. *Executive direction and administration.*

PROGRAM AND PERFORMANCE

The Tax Court reviews determinations of tax deficiencies made by the Commissioner of Internal Revenue and decides whether there is deficiency or overpayment in income, estate, gift, and unjust enrichment taxes and in cases founded on claims under excess-profits statutes. The Court also adjudicates claims for processing tax refunds and redetermines excessive profits on renegotiated war and postwar contracts.

A continued increase in the number of new cases filed by taxpayers is anticipated during the fiscal year 1953 as shown in the following tabulation.

Cases	1951 actual	1952 estimate	1953 estimate
Filed	6,142	6,756	7,161
Reopened	160	172	181

VETERANS ADMINISTRATION

INTRODUCTORY STATEMENT

The Administration provides two broad categories of services to veterans: (1) Medical, hospital, and domiciliary care; and (2) nonmedical services, such as compensation and pensions, insurance, and special benefits for World War II veterans.

Annual definite appropriations requested for 1953, including supplementals proposed for later transmission, total \$4,249,173,500 compared with \$4,386,465,220, the sum of appropriations enacted and supplementals proposed for 1952. This is a net decrease of \$137,291,720, accounted for principally by a decrease of \$311,006,000 for readjustment benefits for World War II veterans, a decrease of \$179,498,000 in payments to the national service life insurance trust fund, and increases of \$126,094,920 for construction of hospital and domiciliary facilities and \$150,121,000 for compensation and pensions.

Readjustment benefits for World War II veterans will decrease primarily because most veterans cannot initiate new courses of training after July 25, 1951. The decline in World War II benefits will be partially offset, however, by a supplemental requirement of \$75,000,000 for proposed readjustment benefits to veterans serving during the current emergency. The drop in national service life insurance requirements is based on the assumption that hostilities will cease in Korea during 1952. The increase for hospital and domiciliary facilities is primarily to provide cash to liquidate contract authority already obligated and appropriated funds in lieu of expiring contract authority. The increase in compensation and pensions is primarily due to proposed cost-of-living increases in compensation rates, and to increases in non-service-connected payments.

VETERANS ADMINISTRATION—Continued

Administration, Medical, Hospital, and Domiciliary Services, Veterans Administration—

Administration, medical, hospital, and domiciliary services: For necessary expenses of the Veterans' Administration, including maintenance and operation of medical, hospital, and domiciliary services, in carrying out the functions pursuant to all laws for which the Administration is charged with administering, including purchase of [thirty-seven] *forty-two* passenger motor vehicles for replacement only; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); maintenance and operation of farms; recreational articles and facilities at institutions maintained by the Veterans' Administration; expenses incidental to securing employment for war veterans; funeral, burial, and other expenses incidental thereto for beneficiaries of the Veterans' Administration except burial awards authorized by Veterans' Administration Regulation Numbered 9 (a), as amended; aid to State or Territorial homes in conformity with the Act approved August 27, 1888, as amended (24 U. S. C. 134), for the support of veterans eligible for admission to Veterans' Administration facilities for hospital or domiciliary care; not to exceed \$6,000 for newspapers and periodicals; not to exceed \$45,300 \$46,100 for the preparation, shipment, installation, and display of exhibits, photographic displays, moving pictures, and other visual educational information and descriptive material, including the purchase or rental of equipment; \$873,105,770, of which not more than \$195,140,000 shall be available for personal services other than hospital, domiciliary, and out-patient care, and \$895,000,000, from which allotments and transfers may be made to the Federal Security Agency (Public Health Service), the Army, Navy, and Interior Departments, for disbursements by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans' Administration: *Provided*, That no part of this appropriation shall be used to pay in excess of seventy persons engaged in public relations work: *Provided further*, That no part of this appropriation shall be expended for the purchase of any site for or toward the construction of any new hospital or home, or for the purchase of any hospital or home; and not more than \$7,388,000 \$11,161,000 of this appropriation may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans' Administration, *not otherwise provided for*, either by contract or by the hire of temporary employees and the purchase of materials. (3 U. S. C. 43; 5 U. S. (c) General medical hospitals	1,349,340	2,713,000	2,725,000
Obligations incurred	864,520,057	907,775,770	899,440,000

PROGRAM AND PERFORMANCE

This covers the administration and operation of all programs administered by the Administration except for construction activities and operation of canteens.

Total obligations are estimated to be \$899,440,000 for 1953, consisting of \$895,000,000 in appropriated funds and \$4,440,000 in reimbursements. This is a decrease of \$8,335,770 compared with 1952.

Principal decreases are proposed for:

Insurance	\$7,110,008
Vocational rehabilitation and education	11,409,265
Readjustment allowance	516,124
Veterans claim services	1,731,923
General administration and contact	9,646,595
Out-patient medical services	4,857,900

Principal increases are proposed for:

Hospital and domiciliary services	\$25,569,500
Medical administration, research and education, and other services	1,227,300

The decreases arise from reductions in workloads for insurance operations attributable principally to the Servicemen's Indemnity and Insurance Act of 1951; reduction in the number of veterans in training under the vocational rehabilitation and education program; reduction in the number of veterans claiming unemployment and self-employment allowances; and reduction in workloads of veterans claims services. Decreases in general administration and contact are a natural result of decreasing direct benefit programs. Decreases in out-patient medical services are due to elimination of backlogs in fee-basis dental cases.

The increases arise from opening new hospitals, an increased number of patients cared for in Veterans Administration and non-Veterans Administration hospitals and domiciliary facilities, and increased research costs.

1. *Medical, hospital, and domiciliary services.*—Provision is made for the operation of 190 Administration hospitals and homes and 69 out-patient clinics at regional offices; reimbursement to other hospitals, to State homes, and to private physicians and dentists for the care of eligible veterans; medical research and education; operation of supply depots; furnishing of prosthetic appliances; and central and field office supervision.

(a) *Hospital and domiciliary services.*—Hospital and domiciliary care is provided for veterans with service-connected disabilities and, subject to the availability of beds and receipt of a statement regarding inability to defray expenses, for veterans with non-service-connected disabilities.

AVERAGE DAILY LOAD

	1951 actual	1952 estimate	1953 estimate
In Administration hospitals:			
Neuropsychiatric.....	48,054	48,600	48,810
Tuberculosis.....	6,968	7,390	8,000
General medical.....	41,283	41,535	45,190

By private physicians and dentists:			
Individuals visiting, medical.....	933,389	807,000	785,500
Examined, dental.....	163,304	189,000	163,000
Treated, dental.....	272,356	301,000	249,500
Total by private physicians and dentists.....	1,369,049	1,297,000	1,198,000

(c) *General administration.*—Executive direction and general supervision of medical, hospital, domiciliary, and supply depot activities excludes supervision of such activities as finance, personnel, legal, contact, and administrative services, but includes a central purchasing service and general supervision of the hospital construction program.

(d) *All other services.*—These include medical research and education and physical alterations at supply depots and out-patient clinics.

2. *Nonmedical services.*—(a) *Veterans and dependents' claims.*—Claims for compensation, pensions, or other benefits are adjudicated; guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents; and related work is done.

Major workloads are as follows:

Workload units	1951 actual	1952 estimate	1953 estimate
Rating actions.....	1,597,843	1,319,829	1,143,367
Authorization actions.....	1,129,081	1,068,941	1,027,424
Appeals processed.....	55,578	55,650	50,000
Cases in volving guardianship or fiduciary relationships (average).....	295,103	320,711	320,000
Field examinations.....	143,220	157,877	150,000

(b) *Insurance.*—Provision is made for Government insurance to eligible servicemen and veterans.

AVERAGE NUMBER OF POLICIES IN FORCE

	1951 actual	1952 estimate	1953 estimate
U. S. Government life insurance.....	477,551	462,000	447,000
National service life insurance.....	6,422,500	7,062,000	6,750,000
Total.....	6,900,051	7,524,000	7,197,000

(c) *Vocational rehabilitation and education.*—Eligibility of veterans is determined under the Vocational Rehabilitation Act of 1943 and the Servicemen's Readjustment Act of 1944; guidance is furnished to trainees; and contracts are made with training institutions for tuition and other charges.

AVERAGE NUMBER OF VETERANS IN TRAINING

	1951 actual	1952 estimate	1953 estimate
Under Servicemen's Readjustment Act.....	1,541,109	1,167,000	484,000
Vocational rehabilitation trainees.....	99,822	51,363	35,386
Total.....	1,640,931	1,218,363	519,386

(d) *Loan guaranty.*—Loan-guaranty operations include (1) issuance of certificates of loan guaranty or insurance, (2) payment to lenders for the veteran's account of 4 percent of the amount guaranteed or insured, (3) servicing of loans in reported default, (4) payment of claims of lenders on defaulted loans, and (5) acquisition, management, and disposal of property when necessary to protect the Government's interest.

Work units	1951 actual	1952 estimate	1953 estimate
Loans closed.....	546,702	422,080	391,210
Defaults cured.....	59,921	66,050	67,802
Claims paid.....	4,799	2,813	2,825
Loans and property acquired.....	2,695	2,264	2,264

(e) *Readjustment allowances.*—General supervision is provided for the readjustment allowance program and for reimbursements to the States for claims paid.

Claims paid	1951 actual	1952 estimate	1953 estimate
Unemployment claims.....	435,654	254,941	78,000
Self-employment claims.....	6,792	1,380	1,272
Total.....	442,446	256,321	79,272

(f) *General administration and contact.*—Administrative, finance, personnel, supply, and utilities services for all programs are provided, except those performed at hospitals and homes which are included in the costs of the hospital and domiciliary care program. The contact service provides information and assistance to veterans and their dependents on all programs of the Administration.

GENERAL ADMINISTRATION AND CONTACT

	1951 actual	1952 estimate	1953 estimate
Administrative services.....	\$31,531,135	\$30,173,635	\$26,676,824
Finance.....	24,387,315	22,680,760	21,057,508

PROGRAM AND PERFORMANCE

This provides for all compensation, pensions, and allowances, including emergency officers' retirement pay and annuities.

The total appropriation requested for 1953 is \$2,204,351,000, an increase of \$92,121,000 over the 1952 appropriation and \$30,213,000 over 1951. Principal increases are proposed for payment of compensation to

peacetime veterans and their dependents as a result of Public Law 28, 82d Congress, and pensions to World War I veterans who are becoming eligible for permanent and total disability payments as a result of increased age. Present trends indicate a supplemental requirement of \$42,000,000 for 1952. Proposed rate increases will require a supplemental of \$100,000,000 in 1953.

The workload shown on the following pages is the average number of veteran cases. The unit costs show the actual average costs per case.

(c) Supplies	11,219,850	7,677,890	14,428,194
(d) Equipment	45,595,893	31,200,046	3,550,573
2. Loan guaranty:			
(a) Interest gratuities	69,226,254	59,923,299	56,772,828
(b) Guaranty losses	7,490,833	4,574,400	4,519,300
(c) Loans and property acquired	13,390,962	11,252,080	11,252,080
3. Readjustment allowances:			
(a) Unemployment allowance	7,794,158	5,052,929	1,545,960
(b) Self-employment allowance	584,291	129,720	119,568
Obligations incurred	2,041,827,097	1,418,477,091	698,634,000

PROGRAM AND PERFORMANCE

These benefits to veterans of World War II apply to the cost of subsistence, tuition, supplies, and equipment needed for courses of training; guaranty, claims and property acquisitions, and cost of loans; and the payment of readjustment (unemployment and self-employment) allowance. Present trends indicate that there will be a supplemental requirement of \$148,000,000 in 1952.

1. *Education and training.*—Load forecasts of trainees are based upon an analysis of trends in each of the four major categories of training, as follows:

	1951 actual	1952 estimate	1953 estimate
Institutions of higher learning	410,069	200,000	91,570
Institutions below the college level	706,862	567,840	257,500
On-the-job training	150,132	81,685	22,005
On-the-farm training	284,977	212,423	120,014
Total	1,552,040	1,061,948	491,089

The sharp drop in enrollment in 1952 and 1953 results from the fact that after July 25, 1951, most World War II veterans are no longer eligible to initiate a course of training. Enrollment during fiscal years 1952 and 1953

VETERANS ADMINISTRATION—Continued**Readjustment Benefits, Veterans Administration—Continued**

will for the most part be limited to veterans completing courses begun prior to that date.

2. *Loan guaranty.*—Loan forecasts are based on current monthly trends and the assumption that construction of housing units will be held to an annual volume rate of 850,000 units.

3. *Readjustment allowances.*—The load forecasts reflect only those eligible veterans who have been discharged for less than 2 years.

PROGRAM AND PERFORMANCE

Payments are made to veterans who suffered permanent or total disability as a result of war service or during the postwar period in which they carried World War I war risk insurance. Payments are being made to beneficiaries of members of the Armed Forces who died in service or who died in the postwar period during which this type of insurance was in force. Also, transfers are made to the United States Government life insurance fund on account of certain total disability claims and death claims under United States Government life insurance.

Comparative summaries by fiscal years are as follows:

Hospital and Domiciliary Facilities, Veterans Administration—

Hospital and domiciliary facilities: For hospital and domiciliary facilities, \$27,505,080, of which not more than \$4,454,000 shall be available for personal services, to remain available until expended for the payment of obligations heretofore or herein authorized to be incurred under this head, including the improvement of facilities at Lake City, Florida, for extending, with the approval of the President, any of the facilities under the jurisdiction of the Veterans' Administration or for any of the purposes set forth in sections 1 and 2 of the Act approved March 4, 1931 (38 U. S. C. 438 j-k) or in section 101 of the Servicemen's Readjustment Act of 1944 (38 U. S. C. 693a), to remain available until expended, \$153,600,000, of which \$59,000,000 is for payment of obligations heretofore authorized to be incurred under this head: *Provided*, That not to exceed 5.5 per centum of the amounts available under this head shall be available for the employment of all necessary technical and clerical personnel for the preparation of plans and specifications for the projects as approved hereunder and in the supervision of the execution thereof, and for all travel expenses, field office equipment, and supplies in connection therewith, except that whenever the Veterans' Administration finds it necessary in the construction of any project to employ other Government agencies or persons outside the Federal service to perform such services not to exceed 9 per centum of the cost of such projects may be expended for such services: *Provided further*, That amounts available under this head for portable initial equipment are increased from \$25,000,000 to \$31,455,440 to \$33,349,581 including the purchase of one hundred and ninety-eight passenger motor vehicles. (*Independent Offices Appropriation Act, 1952.*)

1. Hospital bed-producing projects	\$80,168,009	\$82,192,129	\$62,559,360
2. Conversions at existing hospitals	2,802,304	4,838,536	2,088,737
3. Major rehabilitation and modernization at existing hospitals:			
(a) Safety of patients and employees			1,050,000
(b) Health, care, and treatment of patients			14,920,100
(c) Preservation and operation of physical plant			3,200,000
4. Non-bed-producing projects	6,498,410	23,808,767	3,896,442
5. Construction of administrative facilities at hospital sites	5,133,149	308,149	74,702
6. Initial portable equipment	9,452,528	14,244,749	1,894,141
Obligations incurred	104,054,400	125,392,330	89,683,482

PROGRAM AND PERFORMANCE

This is for the construction of new hospitals and homes and additions to existing hospitals and homes to provide

new beds and administrative facilities at hospital sites. Provision also is made for conversions at existing hospitals, for major rehabilitation and modernization at existing hospitals and for the purchase of portable initial equipment.

1. *Hospital bed-producing projects.*—Construction of 75 projects will provide 36,490 new beds. Acquisition of a site at Topeka, Kansas, is for a neuropsychiatric hospital.

NEW BEDS

	New hospitals	Additions to existing hospitals	Total
Neuropsychiatric Hospitals	8,465	1,245	9,710
Tuberculosis Hospitals	1,200	1,055	2,255
General Medical and Surgical Hospitals	23,275	950	24,225
Homes	300		300
Total	33,240	3,250	36,490

The Army Corps of Engineers is responsible for the construction of 44 projects, providing 21,918 beds. The remaining 31 projects, providing 14,572 beds, together with the conversion of existing beds, will be constructed by the Administration. The status of hospital-bed construction is as follows:

NUMBER OF BEDS

	1951 actual	1952 estimate	1953 estimate
Under construction beginning of year	20,080	18,594	7,000
Put under construction during year	4,200	500	4,000
Completed during year	5,686	12,094	6,500
Total completed at end of year	13,396	25,490	31,990
Under construction at end of year	18,594	7,000	4,500
Not under construction at end of year	4,500	4,000	

DOLLAR VALUE OF CONSTRUCTION

	1951 actual	1952 estimate	1953 estimate
	Millions	Millions	Millions
Completed prior to 1951	\$325.6		
Under construction beginning of year	418.8	\$351.4	\$147.7
Put under construction during year	82.9	16.3	92.5
Completed during year	150.3	220.0	131.3
Total completed at end of year	307.8	527.8	659.1
Under construction at end of year	351.4	147.7	108.9
Not under construction at end of year	108.8	92.5	

2. *Conversions at existing hospitals.*—Facilities are adapted to meet current needs due to the changing character of the patient load.

3. *Major rehabilitation and modernization at existing hospitals.*—This new program provides for replacement of structures and other construction required to bring old hospitals, insofar as possible, up to the standards of the new hospitals. Also included are major alteration and repair projects costing more than \$250,000, formerly classified as non-bed-producing projects.

4. *Non-bed-producing projects.*—This covers construction of alterations, improvements and repairs at hospitals and homes which do not affect the nature or size of the bed capacity. For 1953 and subsequent years, projects of this nature costing more than \$250,000 will be classified under 3 above; nonbed projects costing less than \$250,000 will be included under the new appropriation "Major alterations, improvements and repairs."

5. *Construction of administrative facilities at hospital sites.*—This provides for a regional office building in Chicago, Ill.

6. *Initial portable equipment.*—This is for approximately 32,490 beds and for major alterations and improvements to existing hospitals.

Obligations incurred.....	44,294,811	184,794,029	54,753,637

PROGRAM AND PERFORMANCE

Payments are made to the national service life insurance fund to meet (a) death claims and waivers of premium where such claims are determined to be due to the extra hazards of military or naval service; (b) claims for gratuitous insurance; (c) waivers of recovery of erroneous payments or overpayments from the fund; and (d) certain other payments.

Present trends indicate a supplemental appropriation of \$50,000,000 will be required in fiscal year 1952 for payments to the national service life insurance fund on account of deaths arising from Korean hostilities.

Obligations incurred.....	61,268,507	40,682,284	32,430,089

PROGRAM AND PERFORMANCE

1. *Burial allowances.*—The increase for funeral and burial expenses of deceased veterans forecast for 1953 is based on the upward trend apparent for the last several years.

2. *Vocational rehabilitation for disabled veterans.*—Average monthly training load was 99,872 during fiscal year 1951. It is estimated that the monthly average number in training will be 51,400 in fiscal year 1952 and 35,400 in fiscal year 1953.

3. *Housing grants for disabled veterans.*—Veterans with specified permanent and total service-connected disabilities are provided assistance in acquiring suitable housing. Of the estimated 4,500 eligible, 3,573 have established their basic eligibility as of June 30, 1951. Of these, 1,971 had made formal application for a grant, and 1,880 applications had been processed for approval. In 1,609 cases, disbursement had been completed.

PROGRAM AND PERFORMANCE

The war claims fund consists of moneys derived from enemy assets vested by the Office of Alien Property, Department of Justice. The fund is used to pay the following classes of claims arising out of World War II (and the administrative expenses in connection therewith): (1) Claims of certain American and Filipino prisoners of war for compensation for food deficiencies while imprisoned; (2) claims of certain American civilian internees for detention benefits; (3) claims of religious organizations or their personnel for reimbursement for assistance rendered

Americans, civilian and military; (4) claims of certain employees of United States contractors for injury, death, or detention benefits; and (5) claims of certain American civilian internees for disability or death benefits.

Classes (1) to (3) are administered by the War Claims Commission; classes (4) and (5) by the Bureau of Employees' Compensation, Department of Labor.

PROGRAM AND PERFORMANCE

In addition to the railroad retirement program the Railroad Retirement Board administers an unemployment and sickness insurance system, paying unemployment, sickness, and maternity benefits to qualified railroad workers, and operates an employment service program for the purpose of finding jobs for unemployment benefit claimants and of assisting railroads to fill their manpower needs. The administrative costs of this system are provided through a permanent appropriation of 0.2 percent of taxable payroll to this fund. As of June 30 of each year, any sum in this fund in excess of \$6,000,000 is transferred to the railroad unemployment insurance account in the unemployment trust fund (45 U. S. C. 361).

1. *Maintenance of accounts of employee earnings.*—The amounts of insurance payments for unemployment, sickness, and maternity are based upon individual records of

earnings. The principal workload is the processing of compensation items which is carried on simultaneously with a like requirement under the retirement program, the costs being shared proportionately between the two programs.

2. *Processing and payment of unemployment insurance claims.*—This embraces the work of paying unemployment benefits to unemployed railroad workers. Individual claims for unemployment compensation are filed locally and certified for payment through the several regional offices of the Board. The number of claims for unemployment compensation fluctuate widely due to economic changes affecting the railroad industry.

3. *Processing and payment of sickness and maternity claims.*—Unlike unemployment claims, these claims are filed by mail and certified for payment through the regional offices of the Board. The volume of claims for sickness tends to follow the general health pattern in railroad communities.

4. *Employment service activities.*—These are operated by the Board for the purpose of finding jobs for unemployment benefit claimants and of assisting railroads to fill their manpower needs.

5. *General administration.*—Except for certain basic activities solely supported and concerned only with this program, the remainder of the general administration costs are shared between this program and the retirement program on a measured basis.

BUSINESS ENTERPRISE AND REVOLVING FUNDS**ATOMIC ENERGY COMMISSION***Revolving Fund, Defense Production Guarantees, Atomic Energy Commission—*

PROGRAM AND PERFORMANCE

Guarantees are given on loans made by private sources to finance construction or operation of defense production facilities. Loans may be purchased by the Government if necessary to keep financing in effect. Revenues from guarantee fees and interest on purchased loans are used to pay administrative expenses. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses. (Defense Production Act of 1950, sec. 301.)

¹ Excludes activity on loans and guaranties as agent for the Mutual Security Agency (formerly Economic Cooperation Administration). Details with regard to these activities are shown under the Mutual Security Agency section of the Budget.

PURPOSE AND FINANCIAL ORGANIZATION

The Bank is authorized by the Export-Import Bank Act of 1945 (12 U. S. C. 635) "to aid in financing and to facilitate exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country or the agencies or nationals thereof." In carrying out its objectives the Bank is guided by the policy of supplementing and encouraging rather than competing with private capital; loans are generally for specific purposes which offer reasonable assurance of repayment.

The Bank may extend loans and guaranties not in excess at any one time of \$4.5 billion, \$1 billion of which was authorized by Public Law 158, approved October 3, 1951. This act also increased the total borrowing authority of the Bank by \$1 billion to \$3.5 billion and extended the life of the Bank to June 30, 1958. The management of the Bank is vested in a board of directors, consisting of the Secretary of State ex officio and four full-time members appointed by the President with Senate confirmation.

ANALYSIS OF BUDGET PROGRAM

The Bank's regular activity centers on a program of general credits to assist the foreign trade of the United States. Among the principal factors considered are the extent to which such credits (1) will assist United States exporters and importers; (2) will aid in expanding the productive capacity or increase the financial and economic stability of the borrowing country; and (3) in areas faced with serious dollar shortages, will promote that type of export from the United States and that type of import into a borrowing country which are most likely to result in increased dollar earnings or decreased dollar expenditures.

In addition to this general financing, the Bank cooperates with agencies of the United States Govern-

ment and with private enterprise in financing sound projects designed to insure the availability of strategic and other materials important to our economy.

General foreign trade credits.—This is the principal activity of the Bank. Credits are usually given for specific projects, after study of the economic, engineering, financial, and technical aspects, often by on-the-spot investigations in the foreign country concerned; inspection trips are made later to follow up on the development of the projects. A few general balance-of-payments credits for foreign exchange purposes are expected to be made in 1953.

Revolving credits for small exporters and importers.—A revolving credit of \$1 million is used for small United States exporters and importers who are unable to secure necessary assistance from commercial banks. Disbursements on these credits, which range upward from \$5,000, were approximately \$212,000 in 1951. Estimated disbursements are \$200,000 for 1952 and 1953. Repayments and interest in 1951 totaled \$220,000 and are estimated at \$200,000 for 1952 and 1953.

STRATEGIC AND CRITICAL MATERIALS

It is estimated that credits of at least \$100,000,000 will be authorized in 1952 and another \$100,000,000 in 1953 to assist directly in financing the production abroad of strategic and critical materials required for the defense program. Credits of \$92.6 million were authorized in 1951 for the production of tungsten, uranium, manganese, and sulfur in Latin America and Africa. No disbursements had yet been made on June 30, 1951.

The Bank now has under study a wide range of additional projects, which, in total, if approved, would exceed \$138 million. The projects involve 19 critical and strategic materials to be obtained from North, Central, and South America as well as Europe, Asia, and Africa.

Import activities.—A rising level of United States imports contributes toward repayment of the Bank's loans and toward a more stabilized balance of exports and imports. Most United States imports are currently financed by commercial banks. The bank's primary role is to aid in the foreign development and production of those commodities and materials which are increasingly needed in the United States.

Private capital participation.—The Bank makes every effort to secure a maximum of private capital participation in its credits and maintains close contact with the private capital market.

Activities under the Mutual Security Act of 1951.—The Mutual Security Act of 1951 provides that not less than 10 percent of the new funds made available under the provisions of the Economic Cooperation Act of 1948 must be extended on credit terms. Credits are established and administered by the Bank at the direction of the Director of Mutual Security on terms and conditions specified by him in consultation with the National Advisory Council on International Monetary and Financial Problems, of which the Chairman of the Board of Directors of the Bank is a member. In addition, under an agreement between the Bank and the Director of the Mutual Security Agency, the Bank issues as agent for, and upon terms specified by the Director, currency transfer guaranties and guaranties against loss from expropriation or confiscation in the case of approved United States investments. Such guaranties are authorized under the Foreign Assistance Act of 1948 and section 520 of the Mutual Security Act of 1951. The Bank also acts as agent for the Director for Mutual Security in establishing and administering credits for Spain in an amount not exceeding \$62.5 million authorized under chapter XI, title I, of the General Appropriation Act of 1951 and a credit in favor of the Government of India in the amount of \$190 million authorized by Public Law 48, Eighty-second Congress.

Administrative expenses.—Increased workload and pay act increases necessitate a request for an increase in the limitation for 1953. The increased workload results from (1) the large number of applications for loans to finance the production of strategic and critical materials, (2) the

increased number and amount of loans for the export of specific commodities, notably cotton, (3) the special credits for Spain and India, and (4) the necessity for more extensive field investigation of loan projects under way and of new loans under consideration in the Philippines, Indonesia, and other areas in which the Bank's activities are increasing.

FINANCING OPERATIONS

Against the then existing borrowing authority of the Bank of \$2.5 billion, there were outstanding on June 30, 1951, notes issued to the Treasury totaling \$1,039,600,000. During 1951, \$221.5 million were borrowed and \$146.4 million were repaid on notes. It is estimated that \$265 million will be borrowed from the Treasury in 1952 and \$182.8 million repaid, and that such borrowing will total \$275 million in 1953 with repayments of \$190.4 million. The Bank's operation will result in a net expenditure of \$85 million in 1953 as compared with \$62.6 million in 1952.

OPERATING RESULTS AND RETAINED EARNINGS

Although gross income is estimated to increase from \$66.2 million in 1951 to \$69 million in 1952 and \$71.9 million in 1953, due to expected higher interest payments to the Treasury on notes issued by the Bank, net profit is estimated at \$51 million for 1952 and \$48.4 million for 1953.

Following the close of fiscal year 1951, the board of directors declared an initial dividend of 2 percent on the \$1 billion outstanding capital stock of the Bank held by the Treasury, this dividend of \$20 million to be paid out of the Bank's net earnings of \$51.6 million for 1951. The balance of \$31.6 million of net earnings after payment of the dividend was reserved against possible future losses, bringing the total accumulated earnings so reserved to \$234.8 million.

If the Bank had in prior years paid interest or dividends to the Treasury on all funds advanced by the Treasury since establishment of the Bank at a rate representing the interest cost of those funds to the Treasury, the earned surplus of the Bank would have been \$129.4 million on June 30, 1951.

FINANCIAL CONDITION

There was a sharp drop in the outstanding total of loans advanced by commercial banks on behalf of the Bank from \$83.1 million on June 30, 1950, to \$44.9 million on June 30, 1951, principally due to stiffening interest rates which influenced the commercial banks to exercise their privilege of demanding a "take-out" by the Bank.

The investment of the Government in the Bank increased \$126.8 million in 1951, bringing the total to \$2,301.4 million on June 30, 1951. This was made up of \$1 billion of capital stock and \$254.8 million of retained earnings, reflected in the statement of financial condition as non-interest-bearing, and \$1,046.6 million of interest-bearing investment held by the Treasury.

Obligations incurred.....			

PROGRAM AND PERFORMANCE

The Corporation has authority to borrow up to \$3 billion from the Treasury for insurance purposes. No borrowings have been made to date, and none are anticipated in 1953.

RECONSTRUCTION FINANCE CORPORATION

[Submitted under the Government Corporation Control Act]

INTRODUCTORY STATEMENT

The Corporation (RFC) is engaged in certain lending activities in order to help maintain economic stability of the country, encourage small business, assist in promoting maximum employment and production, and provide relief and rehabilitation in connection with disasters.

In addition to its lending functions, the Corporation is engaged in the manufacture and sale of synthetic rubber, the production and sale of refined tin, the production and sale of abacá fiber, and the final settlement of certain Government programs initiated during World War II.

The net effect on budgetary expenditures from these programs is as follows:

SUMMARY OF EFFECT ON BUDGETARY EXPENDITURES

	1951 actual	1952 estimate	1953 estimate

PURPOSE AND FINANCIAL ORGANIZATION

Under its lending authority, the Corporation may make or participate in loans to (a) business enterprises, including railroads and air carriers; (b) financial institutions; (c) political subdivisions of States and Territories; and (d) the victims of disasters. Loans and commitments made subsequent to June 30, 1947, under this authority, are limited to \$993,097,000 outstanding at any one time.

The Corporation also makes loans for (a) defense production (Defense Production Act of 1950, as amended, and Executive Orders 10161 and 10281); (b) small defense plants (sec. 714, Public Law 96, 82d Cong.); and (c) civil defense (Federal Civil Defense Act of 1950). Loans and commitments for defense production loans are limited to amounts allocated by the President, and those for small defense plants and civil defense to \$100 million and \$250 million, respectively.

Lending activities are financed from \$100 million of capital stock issued to and held by the Secretary of the Treasury, retained earnings to the extent of \$250 million (after reasonable reserves for losses), and borrowings from the Treasury as needed. All earned surplus in excess of \$250 million and reasonable reserves for losses is required to be deposited in the Treasury as miscellaneous receipts.

ANALYSIS OF BUDGET PROGRAMS

During the present emergency, loans are restricted to those which contribute directly to the defense program or which provide for essential civilian activities.

Business loans.—Loans to business enterprises constitute the major portion of the Corporation's lending program. The volume of business loans is expected to rise as the preparedness program is intensified. Estimates of activity for fiscal years 1952 and 1953 are compared with 1951 experience in the following summary:

(In millions of dollars)

	1951 actual	1952 estimate	1953 estimate
New commitments.....	\$280.4	\$148.0	\$260.0
Disbursements.....	207.6	186.1	172.3
Outstanding at end of year:			
Loans.....	463.4	510.6	520.1
Commitments.....	230.9	95.8	90.5

Data in the foregoing table do not include banks' shares of loans made by RFC in cooperation with banks. It is the policy of the Corporation to encourage bank participation loans, and these are expected to increase as the defense program progresses. Including bank shares of participation loans, the total amount to be made available in loan authorizations to business enterprises is estimated at \$195 million in fiscal year 1952 and \$340 million in fiscal year 1953.

Small defense plants loans.—The authority under which RFC may make loans upon the recommendation of the Small Defense Plants Administrator expires June 30, 1952. It is estimated that loans amounting to \$18.4 million will be authorized prior to the expiration date.

Railroads.—The improved financial position of the railroads, combined with receptive markets for railroad securities, has materially reduced the demand for RFC loans. The estimates anticipate continuation of these conditions. Loan authorizations are estimated at \$2 million and \$3 million for fiscal years 1952 and 1953, respectively, in anticipation of assistance needed in extending a few lines to serve defense production facilities.

Financial institutions.—Activity in this field has been nominal during recent years, and the current economic outlook precludes any new activity in fiscal years 1952 and 1953. The Corporation's portfolio of loans and security purchases is being reduced. Preferred stock, notes, and debentures of banks and trust companies held by RFC amounted to \$85.7 million on June 30, 1951. It is anticipated that these will be reduced to \$53 million by June 30, 1953.

Public agency loans.—No increase is anticipated in the number of public agency loans over that experienced in fiscal year 1951. Loan authorizations are estimated at \$7 million for each of the fiscal years 1952 and 1953. In addition, special provision has been made for a loan to a publicly owned electric power project on the west coast and other loans similarly connected with the defense effort.

Disaster loans.—During fiscal year 1952, these activities will be dominated by loans made to victims of the Missouri Valley floods of July 1951. It is estimated that a total of \$35 million will be disbursed in the areas affected.

Loans to foreign governments.—The loan to the United Kingdom of Great Britain and Northern Ireland is being repaid in full during the current fiscal year. The only remaining loan is that made to the Republic of the Philippines on which a principal payment of \$25 million is due in fiscal year 1952. The balance of \$35 million is scheduled for repayment on July 1, 1953.

Defense Homes Corporation.—The assets and liabilities of the Defense Homes Corporation were transferred to RFC for liquidation under Public Law 860, Eightieth

Congress. The assets held by RFC on June 30, 1951, comprised four mortgages aggregating \$31.2 million. Principal repayments amounting to \$975,000 annually are anticipated on these mortgages during fiscal years 1952 and 1953.

Mortgages.—In the liquidation of the RFC Mortgage Company, under Public Law 132, Eightieth Congress, the Corporation acquired mortgages amounting to \$1.1 billion, insured by the Federal Housing Administration or guaranteed by the Veterans' Administration. At the end of fiscal year 1951, this portfolio had been reduced to \$81.6 million through sales and principal repayments. It is estimated that the portfolio will be further reduced to \$52 million by the end of fiscal year 1953.

ADMINISTRATIVE EXPENSES

Administrative expenses consist of salaries and related costs of supervisory and operating personnel together with rental costs of office space. These expenses are estimated at \$14.1 million in 1953, as compared to \$14.0 million authorized for fiscal year 1952.

FINANCING OPERATIONS

The Corporation's lending program in 1953 will require borrowings of \$300 million, of which \$155 million will be

repaid during the same year. In 1952, borrowings of \$250 million will be required; \$214 million will be repaid.

Dividends of \$16.3 million and \$9.0 million, representing the results of 1951 and 1952 operations, respectively, will be paid to the Treasury in 1952 and 1953.

OPERATING RESULTS AND RETAINED EARNINGS

A comparison of income and expense for the Corporation's lending program is provided in the following table:

[In millions of dollars]

	1951 actual	1952 estimate	1953 estimate
Total income.....	\$42.6	\$35.2	\$35.8
Total expense before charge-offs and adjustments in valuation reserves.....	29.5	24.4	25.6
Net income before adjustments in valuation reserves.....	10.5	8.5	6.3
Adjustment in valuation reserves.....	-2.9	-2.1
Net income.....	7.6	6.4	6.3

The Corporation is required to pay to the Treasury, as a dividend, all earned surplus in excess of \$250 million and reasonable reserves for losses.

PURPOSE AND FINANCIAL ORGANIZATION

The Corporation has the responsibility for the operation and liquidation of certain assets it acquired as a result of its activities during the last war. This responsibility consists of two broad functions: (1) Production activities, consisting of operation of the synthetic rubber, tin, and abacá programs; and (2) purely liquidation activities, encompassing orderly disposition of holdings acquired in connection with wartime programs.

The production and liquidation programs are financed with funds arising from the operation and liquidation of these programs in accordance with the Government Corporations Appropriation Act of 1949. To the extent that funds realized from these programs exceed requirements, they are deposited in the Treasury as miscellaneous receipts.

It is proposed for fiscal year 1953 to establish a production revolving fund for financing the rubber, tin, and abacá programs. The initial capital of the fund will be comprised of the assets, less the related liabilities, of the three programs involved, plus a portion of the proceeds of these activities held at the beginning of that year.

ANALYSIS OF BUDGET PROGRAMS

Production programs

In connection with the current preparedness program, the Corporation is continuing certain production activities initiated during World War II.

Synthetic rubber.—The Corporation operates all rubber-producing facilities owned by the Government and is authorized to finance research and development work in related fields. It is expected that an annual production rate of 950,000 long tons will be reached by the end of fiscal year 1952 and be maintained throughout fiscal year 1953.

Increasing the annual production rate requires capital expenditures for new facilities and process improve-

ments. Part of the contemplated expenditures provides for increasing "cold rubber" output to 75 percent of total production. Capital expenditures contemplated during 1952 total approximately \$31 million; those for 1953 total \$20 million.

Tin.—It is anticipated that the Nation's total requirements for refined tin during 1952 and 1953 will be met from the smelter operation and refined tin purchase programs of the Corporation. Sales of refined tin are estimated at \$93 million for fiscal year 1952 and \$86 million for 1953.

Capital expenditures contemplated are \$1.7 million in fiscal year 1952, mostly in connection with the recovery of waste acid at the smelter. Capital outlays estimated for 1953 are limited to replacements and operating tools.

Abacá fiber.—All abacá fiber produced on the Corporation's Central American plantations is stockpiled for the defense programs. Production is estimated at 30 million pounds annually for fiscal years 1952 and 1953. The estimated production is increased over that of recent years in anticipation of higher yields resulting from intensive fertilization and improved cultivation.

Capital expenditures of \$15 million and \$8.4 million have been estimated for fiscal years 1952 and 1953, respectively, mainly in connection with the expansion authorized under Public Law 683, Eighty-first Congress, under which the plantations are being expanded to a total of 50,000 acres under cultivation. The expansion will be near completion by the end of fiscal year 1953. Approximately 3 years are required for new abacá plantings to become productive.

Liquidation programs

Liquidation of World War II activities.—It is estimated that by the end of fiscal year 1953 remaining assets will amount to \$56.9 million. This compares with \$89.7 million as of June 30, 1951, and \$68.1 million estimated for June 30, 1952. Of the amount still unliquidated on June 30, 1953, \$22 million represent loans and receivables, \$16.2 million plants and equipment, and \$18.9 million other assets. In arriving at the amount of loans and receivables outstanding at June 30, 1953, it is contemplated that collections and charge-offs will amount to \$5.5 million each in 1952 and 1953. The decrease in the amount of plant and equipment results from disposition in fiscal 1952 of 8 of the 25 plants on hand at the beginning of that year. In 1953, it is anticipated that 5 additional plants will be disposed of, leaving 12 held at the end of 1953, all of which have lease agreements running beyond that date.

ADMINISTRATIVE EXPENSES

Administrative expenses consist of salaries and related costs of personnel engaged in the supervision and control over these programs, together with rental costs of office space. These expenses are estimated at \$4.5 million in 1953, as compared to \$4.4 million authorized in 1952.

FINANCING OPERATIONS

A payment of \$79 million, representing proceeds from production and liquidation programs, will be made to the Treasury in fiscal year 1952. This includes \$4 million of

RECONSTRUCTION FINANCE CORPORATION— Continued

the proceeds from liquidation of the Smaller War Plants Corporation's assets.

In fiscal year 1953, it is estimated that \$72.1 million will be paid into miscellaneous receipts of the Treasury. Moreover, as a result of operations of the proposed production revolving fund, an estimated \$111.6 million will be deposited with the Treasury to remain available for future requirements of the fund.

OPERATING RESULTS AND RETAINED EARNINGS

The operating results of the Corporation's production programs are summarized in the following table:

[In millions of dollars]

	1951 actual	1952 estimate	1953 estimate
Net income or loss (—):			
Synthetic rubber.....	\$11.9	\$17.6	\$13.6
Tin.....	9.6	—3.2	—2.1
Abaca.....	—2.6	—1.9	—1.2

The Corporation is not authorized to retain earnings, and proceeds in excess of amounts required for operations are deposited in the Treasury as miscellaneous receipts. In 1953, this will be modified under the proposed production revolving fund in that, for the production programs, all retained earnings of the fund must be paid into miscellaneous receipts of the Treasury within 90 days after the close of the fiscal year.

SMALLER WAR PLANTS CORPORATION

Under Executive Order 9665, the assets of the Smaller War Plants Corporation were transferred to the RFC for collection or disposal. The following categories of assets remained on June 30, 1951:

Loans.....	\$2,383,155
Notes and accounts receivable.....	515,201
Other assets.....	576,455
Total.....	3,474,811

It is anticipated that the value of assets remaining will be reduced to \$1.2 million by the end of fiscal year 1953.

LIMITATION ON EXPENSES

Administrative Expenses, Reconstruction Finance Corporation—

Not to exceed **[\$17,750,000] \$18,500,000** (to be computed on an accrual basis) of the funds of the Reconstruction Finance Corporation shall be available during the current fiscal year for its administrative expenses, including [purchase (not to exceed sixteen for replacement only) and] hire of passenger motor vehicles; and use of the services and facilities of the Federal Reserve banks: *Provided*, That as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchase of equipment and supplies, of administrative offices: *Provided further*, That the limiting amount heretofore stated for administrative expenses shall be increased by an amount which does not exceed the aggregate cost of salaries, wages, travel, and other expenses of persons employed outside the continental United States; the expenses of services performed on a contract or fee basis in connection with termination of contracts or in the performance of legal services; and all administrative expenses reimbursable from other Government agencies: *Provided further*, That the distribution of administrative expenses to the accounts of the Corporation shall be made in accordance with generally recognized accounting principles and practices: *Provided*, That on July 1, 1952, not to exceed \$37,700,000 of the sums then available to the Corporation from national defense, war and reconversion activities, plus the book value of assets of the synthetic rubber, tin, and abaca fiber programs conducted pursuant to law (50 U. S. C. 98 note, 541-546, 50 U. S. C. App. 1921-1938), and less the related liabilities of such programs, shall constitute the capital of a Production Revolving Fund, which is hereby established and which shall be available, without fiscal year limitation, for the purposes of carrying out said programs: *Provided further*, That the Corporation shall pay into miscellaneous receipts of the Treasury (1) any earned surplus of said Production Revolving Fund, within ninety days after the close of each fiscal year, and (2) interest, annually, on the amount of the average capital of said Production Revolving Fund (except such portion thereof as may represent the net book value of idle and stand-by plants, and other facilities determined by the Corporation to be excess to the needs of said programs), the rate of such interest to be determined by the Secretary of the Treasury, after taking into consideration the current average rate on outstanding interest-bearing marketable public debt obligations of the United States on June 30 of each preceding fiscal year: *Provided further*, That whenever any capital in said Production Revolving Fund is determined by the Corporation to be excess to its needs, such capital shall be paid into a non-interest-bearing fund account with the Treasury, and shall remain available therein for return to the Production Revolving Fund upon request of the Corporation.

[Disaster loans: Section 4 (c) of the Reconstruction Finance Corporation Act, as amended, is hereby amended by striking out "\$40,000,000" and inserting in lieu thereof "\$100,000,000": *Provided*, That any loan, including renewal or extension thereof, under section 4 (a) (4) of such Act for acquisition or construction (including acquisition of site therefor) of housing for the personal occupancy of the applicant, may be made for a period of not to exceed twenty years.]

[Administrative expenses: The amount authorized for administrative expenses of the Reconstruction Finance Corporation as set forth in the Supplemental Appropriation Act, 1952, is hereby increased to \$17,750,000.] (Public Law 202, approved Oct. 24, 1951; Public Law 253, approved Nov. 1, 1951; Flood Rehabilitation Act, 1952; Supplemental Appropriation Act, 1952.)

TENNESSEE VALLEY AUTHORITY

[Submitted under the Government Corporation Control Act]

Payment to Tennessee Valley Authority Fund—

For the purpose of carrying out the provisions of the Tennessee Valley Authority Act of 1933, as amended (16 U. S. C., ch. 12A), including purchase (not to exceed two) and hire, maintenance, [repair,] and operation of aircraft; the purchase (not to exceed [one] two hundred and [thirty-six] twenty, of which one hundred and [twenty-three] fifty shall be for replacement only) and hire of passenger motor vehicles, [\$238,389,600] \$200,027,000, to remain available until expended, and to be available for the payment of obligations chargeable against prior appropriations: *Provided*, That no funds appropriated for the Tennessee Valley Authority by this paragraph shall be used for the maintenance or operation of any aircraft for passenger service that is not specifically confined to the active operation of the official business of the Tennessee Valley Authority by officers or employees of such Authority]. (*Independent Offices Appropriation Act, 1952.*)

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The Tennessee Valley Authority (TVA) is a wholly owned Government corporation whose primary purposes

are to develop the Tennessee River system for navigation, flood control, and power; to provide munitions for national defense; to develop new and improved fertilizers; and to further the development of the Tennessee Valley's agricultural, forestry, industrial, and other resources.

The Corporation's programs are financed by appropriations and by proceeds from its operations, principally the sale of power and fertilizer materials. Appropriations cover expenses of navigation and flood-control operations, research on fertilizer and munitions, resource development activities, and most capital plant additions. Proceeds (referred to in the financial statements as corporate funds) are used in conducting the business of generating, transmitting, and distributing electric energy, including related reservoir operating expenses; and in manufacturing and distributing fertilizer and fertilizer ingredients. The law provides for payment into the Treasury of such proceeds as in the opinion of the TVA Board are not required for these purposes.

ANALYSIS OF BUDGET PROGRAMS

Activities are grouped into four major categories: (1) navigation, flood control, and power; (2) fertilizer and munitions development; (3) resource development; and (4) general service activities. The outstanding fact about TVA's financial needs for 1953 is the additional power capacity required to meet sharply increased defense requirements and growing civilian demands.

As shown in statement A following this narrative, the 1953 program would be financed by \$200,027,000 of appropriated funds; \$147,584,000 of corporate funds; and a \$19,430,000 decrease in Treasury cash. The total of \$367,041,000 to be applied under the 1953 program consists of \$249,359,000 for acquisition of assets, \$98,225,000 for operating expenses, and \$19,457,000 for retirement of borrowings and payments to the Treasury.

NAVIGATION, FLOOD CONTROL, AND POWER

On June 30, 1951, the total investment in facilities serving these purposes was \$803,684,855, allocated as follows: Navigation, \$141,221,198; flood control, \$167,456,104; and power, \$495,007,553. Principal components are a system of 24 major dams, 22 major hydroelectric generating stations, 10 navigation locks, 6 major fuel-electric generating stations, and a power transmission network of about 7,500 circuit-miles.

Acquisition of assets.—Expenditures in 1953 for assets serving these purposes are estimated at \$245,960,000, of which \$221,392,000 represents new obligations (\$189,371,000 from appropriated funds and \$32,021,000 from corporate funds) and \$24,568,000 for liquidation of prior-year obligations.

ESTIMATED OBLIGATIONS IN DETAIL

Projects contributing to power supply:

a. Continued:

Boone and Fort Patrick Henry Dams.....	\$10,914,000
Hydro-generating units in 5 existing dams.....	6,198,000
5 steam plants.....	89,003,000

b. Beginning:

3 hydro-generating units at existing dams.....	3,528,000
2 additional units at Kingston steam plant.....	15,000,000
4 additional units at Shawnee steam plant.....	28,000,000
2 additional units at Colbert steam plant.....	16,000,000

Total.....	168,643,000
Transmission system facilities.....	49,400,000
Additions and improvements at completed projects.....	1,040,000
Navigation facilities.....	294,000
Investigations for future projects.....	324,000
Distribution of administrative and general expenses.....	1,691,000
Total.....	221,392,000

Projects now authorized and under construction will increase the rated generating capacity of the TVA system (including plants of the Aluminum Company of America and Cumberland Basin plants of the Department of the Army) from 3,181,110 kilowatts at June 30, 1951, to about 6,730,000 kilowatts in the fall of 1954. The system capability under median water conditions at the end of calendar year 1954 will be about 6,750,000 kilowatts. The capacity requirements of the system which are made up of an estimated peak load of 6,400,000 kilowatts plus allowances for scheduled maintenance, for a reasonable minimum operating reserve to take care of unforeseen outages and system regulation, and for undetermined minor loads amount to 6,950,000 kilowatts. Without additional capacity installations after 1954, the continuing load growth could result in a serious power deficiency.

The 1953 Budget provides for attaining a system capability of about 8,300,000 kilowatts by the end of calendar year 1955. To meet unforeseen conditions which may occur before this additional capacity can be completed, this program includes provisions for obtaining a margin of about 7 percent over the total necessary to meet presently estimated capacity requirements in 1955. Capacity requirements are based on peak load which is presently expected to grow to 7,100,000 kilowatts, including provision for adequate production for civilian purposes as well as rapid expansion of defense production.

The largest item in the estimate for additions and improvements at completed projects is \$736,000 for altering the contours of shore lines for control of malaria. This amount provides for completing work in Wheeler Reservoir and continuing work in Gunterville Reservoir.

The estimate for navigation facilities provides for beginning design studies for a new lock at Wilson Dam (\$76,000), safety harbors on Pickwick and Wheeler Reservoirs (\$186,000), and minor plant items (\$32,000). The existing Wilson locks constitute the worst bottleneck on the Tennessee River.

The estimate for investigations for future projects provides for the orderly planning of additional power and multipurpose facilities in the Tennessee Valley.

Navigation operations.—Improvements constructed on the Tennessee River and its tributaries provide a 9-foot channel of 650 miles from the mouth of the river to Knoxville, linking the Tennessee Valley with the 6,000-mile inland waterways system extending from the Great Lakes to the Gulf of Mexico. Freight traffic on the Tennessee River set a new record in 1950—590,000,000 ton-miles, an increase of more than 15 percent over 1949. Total tonnage exceeded 3,000,000, an increase of more than 10 percent over 1949.

TVA's job in navigation consists of (1) providing physical facilities adequate to the needs of commerce; (2) encouraging and assisting private interests in developing terminal facilities and barge-line services; and (3) working with shippers, carriers, and others to supply data on the availability and economy of Tennessee River transportation and to coordinate water transportation with other means of transport. As shown in statement B, the net expense of navigation operations is estimated at \$2,765,000 in 1953, compared to \$2,742,000 in 1952 and \$2,658,300 in 1951.

Flood control operations.—The system of dams has on 15 occasions reduced flood crests at the city of Chattanooga, which presents one of the Valley's major flood problems, saving over \$45,000,000 in flood damage at this city alone. Communities and agricultural land below the mouth of the Tennessee on the lower Ohio and Missis-

sippi Rivers are also benefited. The system is able to reduce flood heights at Cairo, Ill., from 2 to 3½ feet and its operation is an important factor in planning the Mississippi River levees between Cairo and the mouth of the Red River. As shown in statement B, the net expense of flood-control operations was \$2,213,201 in 1951 and is estimated at \$2,312,000 in 1952 and \$2,341,000 in 1953.

Power operations.—TVA power operations are confined to generation and transmission of power and wholesale sales to local distribution systems and to certain industries and Government agencies requiring large amounts of power. Power is distributed by 147 local public agencies to more than 1,170,000 ultimate consumers. On June 30, 1951, installed capacity was 3,181,110 kilowatts, including 171,000 kilowatts in two plants of the Department of the Army on tributaries of the Cumberland River and 345,560 kilowatts in plants owned by the Aluminum Co. of America but operated as a part of the TVA system. Total system input in 1951 was over 20,000,000,000 kilowatt-hours and is estimated at about 23,918,000,000 kilowatt-hours and about 30,072,000,000 kilowatt-hours for 1952 and 1953, respectively.

Net income from power operations (before interest charges) was \$26,717,102 in 1951 and is estimated at \$26,891,000 and \$31,209,000 for 1952 and 1953, respectively. The return on power investment in 1951 was 5.4 percent reflecting favorable stream flows and the existence of markets for supplemental power even from marginal sources. During the next 2 years, assuming average streamflow and increased use of fuel-generated power, the return is expected to be from 4 to 4½ percent. Dry-year conditions would reduce substantially the amount of net income which would be realized.

FERTILIZER AND MUNITIONS

Chemical laboratories at Wilson Dam and production facilities at Wilson Dam and Columbia, Tenn., form a center of research for the development of new or improved fertilizers and processes for their manufacture, with use for national defense taking precedence. TVA is now supplying about 50 percent of the Nation's military needs for phosphorus.

Acquisition of assets.—The estimate of \$1,851,000 provides for facilities necessary for continued plant operation. Two new projects are proposed: Replacement of the worn-out No. 5 phosphorus furnace, and a new nitraphosphate production unit. The latter is to be used to demonstrate to industry an important fertilizer-production process which does not draw upon scarce sulfur supplies.

Fertilizer and munitions development.—Expenditures from appropriated funds in 1953, estimated at \$2,317,000, cover research on products and processes, basic agronomic research, and farm test-demonstrations. Corporate fund expense for the cost of manufacturing and distributing fertilizer and munitions is estimated at \$15,352,000. Income from the sale of fertilizer and munitions is estimated at \$20,804,000. After provision for depreciation and distributed administrative and general expenses, total expense is estimated at \$19,474,000 and net income at \$1,330,000.

Research on products and processes consists of (1) exploratory tests and applied research at the laboratory level; and (2) process development, including technical and economic evaluation of research results; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstra-

TENNESSEE VALLEY AUTHORITY—Continued**Payment to Tennessee Valley Authority Fund—Continued**

tion or large-scale plants; and preparation of engineering and economic studies for application by other agencies and industries. The fertilizer research is also applied to the related field of munitions. In 1953 special attention will be given to processes that may be used by industry to replace or supplement production methods hampered by shortages of sulfuric acid. Expenditures for these activities in 1953 are estimated at \$1,284,000.

The 1953 estimate of \$219,000 for basic agronomic research covers laboratory, greenhouse, and field-plot tests to determine under controlled conditions the relative efficiency of TVA fertilizers. This work is done in cooperation with State experiment stations.

Farm-test demonstrations will be conducted in 26 States in 1953 to demonstrate the effective use of TVA's experimental fertilizers. Expense is estimated at \$1,042,000 (\$814,000 from appropriated funds and \$228,000 from corporate funds) in 1953, compared to an estimate of \$1,061,000 in 1952. Income from farmer payments for fertilizer is estimated at \$228,000 in 1953 compared to \$230,000 in 1952. An estimated 3,656 farms will participate in 1953, compared to 4,399 in 1952.

Estimated direct cost of fertilizer production and distribution is \$15,124,000 for 1953, compared to an estimated \$15,175,000 for 1952. Income is estimated at \$20,576,000 in 1953 and \$20,025,000 in 1952. Large-scale manufacturing units are built and operated to demonstrate the technical and commercial feasibility of new fertilizer processes; to produce new fertilizers in quantities sufficient for widespread introduction to farmers; to produce fertilizers needed to meet national agricultural production goals; to supply fertilizers for farm-test demonstrations; and to supply munitions materials for national defense. Fertilizers produced in excess of farm-test demonstration and other TVA requirements are sold to farmers through distributors who agree to conduct educational programs and to furnish information about fertilizer distribution costs and farmer acceptance.

RESOURCE DEVELOPMENT

The 1953 estimate for these activities is \$2,265,000 (\$2,239,000 from appropriated funds and \$26,000 from corporate funds), compared to \$2,131,000 in 1952.

The estimate of \$271,000 for agricultural resource development covers economic analyses of Valley agriculture, soil survey, agricultural engineering research and demonstrations, research on forage crops and animal industry, and agricultural development in problem areas.

Emphasis in forest resource development is placed on assistance to landowners and industries in increasing production of the kinds of lumber and timber products most urgently needed for defense. The 1953 estimate of \$584,000 provides for research and demonstrations in forest management, reforestation, forest protection, and wood utilization.

The program of tributary watershed development is one of coordinated research and development work on small tributary watersheds with water-control problems. The 1953 estimate of \$672,000 provides for continuation of programs under way in two watersheds and for research on the effects of changes in land use on the quality and behavior of water in the streams.

An estimate of \$27,000 for mineral resource development provides for continuation of a cooperative regional minerals laboratory demonstration and investigations of the

suitability of Valley clays and shales for making lightweight aggregate.

TVA's cooperative activities in the fields of fish and game, stream sanitation, and recreation are estimated to cost \$255,000 in 1953. Stream sanitation investigations will be intensified to supplement pollution control work of State agencies.

An estimate of \$30,000 is proposed for industrial development assistance. Requests for technical assistance are received from businessmen, from State and area development agencies, from individual communities, and from Federal defense establishments.

Topographic mapping expenditures are estimated at \$275,000 for 1953. A substantial portion of TVA's mapping organization is being devoted to reimbursable mapping for the Department of the Army.

The 1953 estimate for surveys and studies of the Tennessee Valley is \$151,000. These provide current information on economic, social, and governmental trends in the Tennessee Valley; assist in identifying major problems and opportunities in regional development; encourage the coordinated participation of private and public agencies in regional development; and measure and evaluate regional progress.

GENERAL SERVICE ACTIVITIES

Acquisition of assets.—The estimate of \$1,548,000 for general facilities covers routine replacement of transportation, office, and other equipment used generally throughout TVA activities. A substantial portion of the estimate is for purchase (mostly replacements) of trucks and other heavy mobile equipment. A smaller amount is included for purchase of passenger vehicles, largely for replacement purposes.

Reimbursable services.—The 1953 estimate of \$8,726,000 covers services furnished at the request and expense of other agencies. Of the total, about \$6,000,000 is to operate for the Army a classified defense facility located at Wilson Dam and about \$1,400,000 to prepare maps for the Army Map Service.

ADMINISTRATIVE AND GENERAL EXPENSES

Administrative and general expenses are those common to all of TVA's organizations and functions. They consist primarily of costs of administration and management services which have been centralized in the interest of economy and convenience. These expenses are distributed to the various programs and projects and are included in the program estimates shown on statement A. A summary of the expenses and the distribution are shown in schedule B-5. The 1953 estimate is \$4,086,000, compared to \$3,854,000 in 1952. Increased estimates for administrative and general expenses are necessary to meet the greater administrative workload that results from the expanded construction program;

FINANCING OPERATIONS

Funds applied to financing.—Payments to the Treasury scheduled for 1953 include \$5,000,000 for retirement of bonds held by the Treasury which have been invested in the power program, an additional payment of \$9,000,000 against the investment in the power program, and \$5,457,000 from miscellaneous receipts originating in programs other than power.

On June 30, 1951, the total interest-bearing investment consisting of bonds sold to and held by the Treasury was \$44,000,000. After budgeted repayments of \$5,000,000 in

1952 and \$5,000,000 in 1953, the balance outstanding as of June 30, 1953, will be \$34,000,000.

Schedule C-1, "Repayment of investment in power program," summarizes the status of repayments of the Treasury's investment in power program assets under the Government Corporations Appropriation Act, 1948. After the budgeted repayments in 1952 and 1953, the balance of the repayable investment (including bonds) is estimated at \$689,709,512 as of June 30, 1953.

Funds provided by financing.—The 1953 estimate of \$219,457,000 consists of the requested appropriation of \$200,027,000 and a decrease in Treasury cash of \$19,430,000 which results primarily from the liquidation of commitments incurred in prior years.

OPERATING RESULTS AND RETAINED EARNINGS

Statement B summarizes the estimated income and expenses of the various TVA programs. The major source of income is from power operations. Income from power operations in 1953 is estimated at \$115,920,000, an increase of \$17,031,000 over 1952. Power expenses are estimated at \$85,398,000 in 1953, compared to \$72,741,000 in 1952. Net power income is estimated at \$30,522,000 in 1953, compared to \$26,148,000 in 1952. Cumulative net income from power operations is estimated at \$238,720,224 by the end of 1953. The estimated net expense of other programs in 1953 is \$6,301,000 and the cumulative net expense by the end of 1953 is estimated at \$147,038,531. The cumulative net income for all TVA programs as of June 30, 1953, is estimated at \$91,681,693.

Obligations incurred.....			

BUSINESS-TYPE STATEMENTS*Canteen Service Revolving Fund, Veterans Administration—***PROGRAM AND PERFORMANCE**

The Veterans Canteen Service furnishes merchandise and services for the comfort and well-being of veterans in hospitals and homes of the Administration. The Congress has appropriated a total of \$4,965,000 to be administered as a revolving fund for the operation of the Veterans Canteen Service. Funds in excess of the needs of the Service, totaling \$1,665,000, have been returned to the Treasurer of the United States, thereby reducing the amount of the funds appropriated to \$3,300,000. Of the amount returned, \$200,000 was repaid during fiscal year 1951. It is contemplated that additional funds in the amount of \$472,985 will be returned to the Treasury during fiscal year 1952 and funds in the amount of \$100,000 during fiscal year 1953 (38 U. S. C. 13-13g).

PROGRAM AND PERFORMANCE

Under the Insurance Act of 1951 (Public Law 23, 82d Cong.), any person released from active service who is found to be suffering from disabilities subject to compensation is eligible for insurance by the United States on a nonparticipating basis. All premiums and other collections are credited to the service-disabled veterans insurance fund, and payments on such insurance are made directly from the fund.

Soldiers' and Sailors' Civil Relief—

PROGRAM AND PERFORMANCE

Under the Soldiers' and Sailors' Civil Relief Act of 1940, premiums becoming due on commercial private life-insurance policies held by servicemen could be charged as a loan against the insurance policy while the insured was in service and for 2 years after discharge. The Government guaranteed the repayment of any indebtedness not liquidated by the insured himself, but any payment made by the Government becomes a debt owed the Government by the insured (50 U. S. C. 510-590; 50 U. S. C. App. 464).

VETERANS ADMINISTRATION—Continued*Veterans' Special Term Insurance Fund—Continued*

PROGRAM AND PERFORMANCE

The Insurance Act of 1951 (Public Law 23) provides that eligible veterans may be granted insurance by the United States on the 5-year level premium term plan without medical examination. The insurance is on a nonparticipating basis; premiums and other collections are credited to the veterans special term insurance fund, and any payments on such term insurance are made directly from the fund.

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. No part of any appropriation contained in this title for the Atomic Energy Commission shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Federal Bureau of Investigation on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided further*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained in this title shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 103. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations.

SEC. 104. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of \$50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.

SEC. 105. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 106. Appropriations contained in this title, available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made; and shall be available for the examination of estimates of appropriations and activities in the field.

SEC. 107. No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. 108. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.

SEC. 109. None of the sections under the head "Independent offices, General provisions" in this title shall apply to the Housing and Home Finance Agency or the Tennessee Valley Authority.

SEC. 110. No part of any appropriation made in this title or title II of this Act, except appropriations for the Atomic Energy Commission and the Tennessee Valley Authority, shall be available for the purchase of any passenger motor vehicle for replacement purposes unless each such passenger motor vehicle purchased replaces two passenger motor vehicles.

CORPORATIONS—GENERAL PROVISIONS

SEC. 402. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.

SEC. 403. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used for the purchase of any passenger motor vehicle for replacement purposes unless each such passenger motor vehicle purchased replaces two passenger motor vehicles. (*Independent Offices Appropriation Act, 1952.*)

GENERAL PROVISIONS

INDEPENDENT OFFICES AND CORPORATIONS

SEC. 601. No part of the funds of, or available for expenditure by any corporation or agency included in this or any other Act, including the government of the District of Columbia, shall be available to pay for annual leave accumulated by any civilian officer or employee during the calendar year 1951 and unused at the close of business on June 30, 1952: *Provided*, That after July 1, 1951, no civilian officer or employee shall be entitled to earn annual leave at a rate in excess of twenty days per year: *Provided further*, That the head of any such corporation or agency shall afford an opportunity for officers or employees to use the annual leave accumulated under this section prior to June 30, 1952: *Provided further*, That this section shall not apply to officers and employees whose post of duty is outside the continental United States: *And provided further*, That this section shall not apply with respect to the payment of compensation for accumulated annual leave in the case of officers or employees who leave their civilian positions for the purpose of entering upon active military or naval service in the Armed Forces of the United States.

SEC. 602. — No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employ-

ees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 603. — No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress.

SEC. 604. No part of the money appropriated by this Act to any corporation or agency or made available for expenditure by any corporation or agency which is in excess of 75 per centum of the amount required to pay the compensation of all persons the budget estimates for personal services heretofore submitted to the Congress for the fiscal year 1952 contemplated would be employed by such corporation or agency during such fiscal year in the performance of—

(1) functions performed by a person designated as an information specialist, information and editorial specialist, publications and information coordinator, press relations officer or counsel, photographer, radio expert, television expert, motion-picture expert, or publicity expert, or designated by any similar title, or

(2) functions performed by persons who assist persons performing the functions described in (1) in drafting, preparing, editing, typing, duplicating, or disseminating public information publications or releases, radio or television scripts, magazine articles, photographs, motion pictures, and similar material.

[shall be available to pay the compensation of persons performing the functions described in (1) or (2).] (*Independent Offices Appropriation Act, 1952.*)

SEC. 703. The provisions of section 1414 of this Act and the provisions of section 604 of the Independent Offices Appropriation Act, 1952, shall not apply to persons employed by the General Services Administration in the performance of functions or related assisting or supporting functions in connection with the publication of the Federal Register.

SEC. 704. The provisions of section 604 of the Independent Offices Appropriation Act for the fiscal year 1952 shall not apply to those persons engaged in functions of the Civil Service Commission related to (1) the preparation and issuance of material relating to the recruitment of personnel for the Federal service, and (2) the compilation of the Official Register of the United States. (*Supplemental Appropriation Act, 1952.*)

SEC. 605. No part of any appropriation or authorization contained in this Act shall be used to pay the compensation of any incumbent appointed to any civil office or position which may become vacant during the fiscal year beginning on July 1, 1951: *Provided*, That this inhibition shall not apply—

(a) to not to exceed 25 per centum of all vacancies;

(b) to positions filled from within and by transfer to agencies provided for by this Act;

(c) to offices or positions required by law to be filled by appointment of the President by and with the advice and consent of the Senate;

(d) to employees of the White House Office;

(e) to employees engaged in the care, maintenance, and so forth, of the Executive Mansion and Grounds;

(f) to all employees in veterans' medical facilities, exclusive of medical departmental personnel in the District of Columbia;

(g) to employees of the General Accounting Office;

(h) to employees of the Smithsonian Institution, including the National Gallery of Art;

(i) to employees of The Tax Court of the United States;

Provided further, That when any department or agency covered in this Act shall, as a result of the operation of this amendment reduce their employment to a figure not exceeding 90 per centum of the

GENERAL PROVISIONS—Continued

INDEPENDENT OFFICES AND CORPORATIONS—Continued

total number on their rolls as of July 1, 1951, such amendment shall cease to apply and said 90 per centum figure shall become a ceiling for employment during the fiscal year 1952 and if exceeded at any time during fiscal year 1952 this amendment shall again become operative: *And provided further*, That amounts for personal services, in those paragraphs where amounts for such personal services have been expressly limited in this Act, may be exceeded by 2 per centum of said limitation on personal services if said 2 per centum is available from the total amount of any such appropriation or authorization.] (*Independent Offices Appropriation Act, 1952.*)

[SEC. 702. Section 605 of the Independent Offices Appropriation Act, 1952 (Public Law 137, August 31, 1951), is hereby amended by striking out the second proviso thereof and inserting in lieu of said proviso the following: "*Provided further*, That when the total number of personnel subject to this section has been reduced to 90 per centum of the total provided for in the budget estimates for 1952, this section shall cease to apply".] (*The Supplemental Appropriation Act, 1952.*)

SEC. [404] —. No part of any appropriation contained in this Act shall be used to pay the compensation of any civilian employee of the Government, whose *principal* or *primary* duties consist of acting as chauffeur or driver of any Government-owned passenger motor vehicle (other than a bus or ambulance), and any funds appropriated in this Act for any such purpose shall be covered into the Treasury as miscellaneous receipts]. This section shall not apply with respect to any person whose duties consist of acting as chauffeur for the President of the United States. (*Independent Offices Appropriation Act, 1952.*)

[SEC. 701. Section 404 of the Independent Offices Appropriation Act, 1952 (Public Law 137, August 31, 1951), is hereby amended by inserting the words "principal or primary" between the word "whose" and the word "duties" in the first sentence thereof.] (*Supplemental Appropriation Act, 1952.*)

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. [1301] —. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of busses, ambulances, and station wagons), is hereby fixed at \$1,400.

SEC. [1302] —. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, or (3) is a person who owes allegiance to the United States: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort.

SEC. [1303] —. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

SEC. [1304] —. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any

person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve of the nomination of said person.

SEC. [1305] —. No part of any appropriation contained in this or any other Act shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. [1306] —. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; examination of budgets and estimates of appropriations in the field; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified [in this chapter] under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced: *Provided further*, That section 409 of the Department of Agriculture Appropriation Act, 1952, shall not apply to the administrative expense limitations fixed by that Act for Federal intermediate credit banks and for production credit corporations, or to the appropriation for the Farm Credit Administration except the portion thereof provided by direct appropriation from the General Fund of the Treasury.]

SEC. [1307] —. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building at the seat of government primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

[SEC. 1308. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this or any other Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.]

SEC. [1309] —. No payment shall be made from appropriations in this Act or any other to any officer on the retired lists of the Regular Army, Regular Navy, Regular Marine Corps, Regular Air Force, Regular Coast Guard, Coast and Geodetic Survey, and Public Health Service for a period of two years after retirement who for himself or for others is engaged in the selling of or contracting for the sale of or negotiating for the sale of to any agency of the Department of Defense, the Coast Guard, the Coast and Geodetic Survey, and the Public Health Service any supplies or war materials.

[SEC. 1310. Immediately upon the enactment of this Act and until termination of the national emergency proclaimed by the President on December 16, 1950:]

[(a) The Civil Service Commission and the heads of the executive departments, agencies, and corporations shall make full use of their authority to require that initial appointments to positions in and outside the competitive civil service shall be made on a temporary or indefinite basis in order to prevent increases in the number of permanent personnel of the Federal Government above the total

number of permanent employees existing on September 1, 1950: *Provided*, That any position vacated by a permanent employee called to military service or transferred to a national defense agency shall not be filled except on a temporary or indefinite basis. All reinstatements and promotions in the Federal civil service shall be made on a temporary or indefinite basis, and all permanent employees who are transferred from one agency to another shall retain their status as permanent employees in the agency to which transferred at the grade or basic pay level of their permanent positions in the agency from which transferred. All appointments, reinstatements, transfers, and promotions to positions subject to the Classification Act of 1949 shall be made with the condition and notice to each individual appointed, reinstated, transferred, or promoted that the classification grade of the position is subject to post-audit and correction by the appropriate departmental or agency personnel office or the Civil Service Commission. All transfers of permanent employees made on a temporary or indefinite basis since September 1, 1950, shall be changed to a permanent basis as of the effective date of this Act: *Provided*, That such employees shall retain their status as permanent employees in the agency to which transferred at the grade or basic pay level of their permanent positions in the agency from which transferred.]

[(b) The Civil Service Commission shall facilitate the transfer of Federal employees from nondefense to defense activities and encourage the retention of employees in defense activities, and shall provide reemployment rights for permanent employees in the activities from which such employees are transferred.]

[(c) The Civil Service Commission shall make full use of its authority to prevent excessively rapid promotions in the competitive civil service and to require correction of improper allocations to higher grades of positions subject to the Classification Act of 1949, as amended. No person in any executive department or agency whose position is subject to the Classification Act of 1949, as amended, shall be promoted or transferred to a higher grade subject to such Act without having served at least one year in the next lower grade: *Provided*, That the Civil Service Commission for positions in the competitive service and the head of the employing agency for positions outside the competitive service may by regulation provide for promotions of two grades in one year (1) to positions not higher than GS-5; (2) to positions not higher than GS-11 which are in a line of work properly classified under the Classification Act of 1949 at two-grade intervals; (3) to positions in the same line of work when the employee has completed a training period under a training program approved by the Civil Service Commission for positions in the competitive service, or approved by the head of the employing agency for positions outside the competitive service; and (4) of an employee of the agency concerned when there is no position in the normal line of promotion in the grade immediately below that of the position to be filled: *Provided further*, That this subsection shall not apply to any case involving an employee who is within reach for appointment to a higher grade position on a competitive civil service register, or being advanced up to a grade level from which he had been demoted or separated because of reduction in force.]

[(d) From time to time, but at least annually, each executive department and agency shall (1) review all positions which since September 1, 1950, have been created or placed in a higher grade or level of difficulty and responsibility of work or in a higher basic pay level, (2) abolish all such positions which are found to be unnecessary, (3) with respect to such positions which are found to be necessary, make such adjustments as may be appropriate in the classification grades of those positions which are subject to the Classification Act of 1949, as amended, or in the basic pay levels of those positions which are subject to other pay-fixing authority. Not later than July 31 of each year each department and agency shall submit a report to the Post Office and Civil Service Committees and Appropriations Committees of the Senate and House of Representatives concerning the action taken under this paragraph, together with information comparing the total number of employees on the payroll on June 30 and their average grade and salary with similar information for the previous June 30, and each annual and supplemental budget estimate shall include a statement comparing the average grade and salary provided for in each item of appropriation or fund allowance therein with similar figures reported for the two previous periods.]

SEC. [1311] — Appropriations and funds made available by this or any other Act for salaries, wages, or compensation, for the current fiscal year shall also be available for payment of any tax with respect thereto which is imposed on any department, agency, corporation, or other instrumentality of the United States, as an employer, by the provisions of the Social Security Act Amendments of 1950.

SEC. 1312. Personnel, and appropriations or funds available for salaries and expenses to any department, agency, or corporation in the executive branch of the Government, shall be transferred to any defense activity under the jurisdiction of such department or agency in such numbers or amounts as may be necessary for the

discharge of responsibilities relating to the national defense assigned to such department, agency, or corporation by or pursuant to law.]

SEC. 1313. None of the funds provided by this Act shall be used to pay employees at a rate in excess of that paid for comparable work under the regular appropriations provided to the Departments concerned in the regular 1952 appropriation Acts.]

SEC. 1314. Any funds provided by this Act shall not be available for the compensation of persons performing domestic information functions or related supporting functions in excess of 50 per centum of the amount provided herein.]

SEC. 1315. (a) No part of the money appropriated for the fiscal year ending June 30, 1952, by this or any other Act to the Department of Labor or the Federal Security Agency which is in excess of 75 per centum of the amount required to pay the compensation of all persons the aggregate budget estimates for personal services submitted to the Congress for the fiscal year 1952 contemplated would be employed by such Department or such agency, respectively, during such fiscal year in the performance of—

[(1) functions performed by a person designated as an information specialist, information and editorial specialist, publications and information coordinator, press relations officer or counsel, photographer, radio expert, television expert, motion-picture expert, or publicity expert, or designated by a similar title, or]

[(2) functions performed by persons who assist persons performing the functions described in (1) in drafting, preparing, editing, typing, duplicating, or disseminating public information publications or releases, radio or television scripts, magazine articles, photographs, motion pictures, and similar material.]

[shall be available to pay the compensation of persons performing the functions described in (1) or (2): *Provided*, That this section shall not apply to personnel engaged in the preparation or distribution of technical, scientific, or research publications, the reporting or dissemination of the results of research or investigations, the publishing of information or other work required by law to carry out the duties of such Department or Agency other than work intended for press, radio and television services, and popular publications.]

[(b) No provision in any Act appropriating funds for the fiscal year ending June 30, 1952, shall be deemed to limit the amount of any appropriation made to any Department, agency, or corporation which may be used to compensate persons engaged in the performance of functions described in paragraph (1) or (2) of subsection (a) of this section, if the aggregate number of persons employed during such fiscal year by such Department, agency, or corporation in the performance of such functions does not exceed four at any time, nor shall any such provision in this or any other Act limit appropriations which may be used to compensate persons in the Office of Defense Mobilization who are engaged in informing the public about the progress and purposes of the defense mobilization program, or persons in the agencies assigned functions under the Defense Production Act of 1950, as amended, who are engaged in informing consumers, agriculture, business and labor, about rules, regulations, and orders, issued by such agencies under the Defense Production Act of 1950, as amended.] (*Supplemental Appropriation Act, 1952.*)

[FEES AND CHARGES]

[It is the sense of the Congress that any work, service, publication, report, document, benefit, privilege, authority, use, franchise, license, permit, certificate, registration, or similar thing of value or utility performed, furnished, provided, granted, prepared, or issued by any Federal agency (including wholly owned Government corporations as defined in the Government Corporation Control Act of 1945) to or for any person (including groups, associations, organizations, partnerships, corporations, or businesses), except those engaged in the transaction of official business of the Government, shall be self-sustaining to the full extent possible, and the head of each Federal agency is authorized by regulation (which, in the case of agencies in the executive branch, shall be as uniform as practicable and subject to such policies as the President may prescribe) to prescribe therefor such fee, charge, or price, if any, as he shall determine, in case none exists, or redetermine, in case of an existing one, to be fair and equitable taking into consideration direct and indirect cost to the Government, value to the recipient, public policy or interest served, and other pertinent facts, and any amount so determined or redetermined shall be collected and paid into the Treasury as miscellaneous receipts: *Provided*, That nothing contained in this title shall repeal or modify existing statutes prohibiting the collection, fixing the amount, or directing the disposition of any fee, charge or price: *Provided further*, That nothing contained in this title shall repeal or modify existing statutes prescribing bases for calculation of any fee, charge or price, but this proviso shall not restrict the redetermination or recalculation in accordance with the prescribed bases of the amount of any such fee, charge or price.] (*Independent Offices Appropriation Act, 1952.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1953

INDEPENDENT OFFICES

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)

¹ Includes 4 aircraft on loan from the military services.² Passenger trips only.

PROPOSED FOR LATER TRANSMISSION

Salaries and expenses, Atomic Energy Commission (under existing legislation, 1952).—A supplemental appropriation of \$50,000,000 for 1952 will be submitted to cover certain items of program rescheduling, revisions in cost estimates of plant projects, and new plant projects arising out of recent technological developments.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$50,000,000	
Unliquidated obligations, start of year.....			\$25,000,000
Unliquidated obligations, end of year.....		25,000,000	
Total expenditures.....		25,000,000	25,000,000
Expenditures are distributed as follows:			
Out of current authorizations.....		25,000,000	
Out of prior authorizations.....			25,000,000

Salaries and expenses, Defense Production Administration (under proposed legislation, 1953).—The budget includes a supplemental appropriation of \$4,500,000 for 1953 under proposed legislation. It is based on the assumed extension of the Defense Production Act for the fiscal year 1953.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$4,500,000
Unliquidated obligations, end of year.....			450,000
Expenditures out of current authorizations.....			4,050,000

Salaries and expenses, Defense Transport Administration (under proposed legislation, 1953).—The budget includes a supplemental appropriation of \$2,800,000 for 1953 under proposed legislation, based upon a contemplated extension of the Defense Production Act.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$2,800,000
Unliquidated obligations, end of year.....			300,000
Expenditures out of current authorizations.....			2,500,000

Displaced Persons Commission (under existing legislation, 1952).—The program for screening and selecting displaced persons for admission into the United States is expected to be completed during fiscal year 1952. A supplemental appropriation of \$2,000,000 for 1952 to transport the last selectees and liquidate the Agency is proposed for later transmission.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$2,000,000	
Unliquidated obligations, start of year.....			\$890,000

ANALYSIS OF EXPENDITURES—continued

	1951 actual	1952 estimate	1953 estimate
Unliquidated obligations, end of year.....		\$890,000	
Total expenditures.....		1,110,000	\$890,000
Expenditures are distributed as follows:			
Out of current authorizations.....		1,110,000	
Out of prior authorizations.....			890,000

Salaries and expenses, Economic Stabilization Agency (under existing legislation, 1952, and proposed legislation, 1953).—The budget includes a supplemental appropriation of \$8,000,000 for 1952 under existing legislation, and one for \$150,000,000 for 1953 under proposed legislation. The 1952 supplemental is required to enable the Agency to administer price, rent, wage, and salary controls effectively. The 1953 supplemental provides for continuing these functions, based upon a contemplated extension of the Defense Production Act and rent control activities.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$8,000,000	
Unliquidated obligations, start of year.....			\$800,000
Unliquidated obligations, end of year.....		800,000	
Total expenditures.....		7,200,000	800,000
Expenditures are distributed as follows:			
Out of current authorizations.....		7,200,000	
Out of prior authorizations.....			800,000

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$150,000,000
Unliquidated obligations, end of year.....			15,000,000
Expenditures out of current authorizations.....			135,000,000

Salaries and expenses, Motor Carrier Claims Commission (under existing legislation, 1952).—A supplemental estimate for 1952 in the amount of \$70,000 will be submitted with language provisions to continue availability for obligation in 1953 of balances unobligated in 1952. This estimate is to provide for the orderly completion of the work of the Commission.

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$70,000	
Expenditures out of prior authorizations.....			\$70,000

Salaries and expenses, Selective Service System (under existing legislation, 1952).—A supplemental estimate of \$5,200,000 is forecast for 1952 because of an increase in the number of inductions over the original estimate, the development of new programs for registration of Americans overseas and for work by conscientious objectors, the tightening of deferment policies as the pool of available manpower shrinks, and because of a requested increase in the salaries of local board clerks comparable to that for classified employees.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$5,200,000	
Unliquidated obligations start of year.....			\$1,100,000
Unliquidated obligations end of year.....		1,100,000	
Total expenditures.....		4,100,000	1,100,000
Expenditures are distributed as follows:			
Out of current authorizations.....		4,100,000	
Out of prior authorizations.....			1,100,000

Salaries and expenses, Railroad Retirement Board (trust fund) (under existing legislation, 1952).—Public Law 234, Eighty-second Congress, enacted October 30, 1951, made extensive changes in the Railroad Retirement System which will result in a very substantial increase in workloads in fiscal year 1952. A supplemental authorization to expend from the trust fund for 1952 is proposed for later transmission.

Revolving fund, Small Defense Plants Administration (under existing legislation, 1952, and proposed legislation, 1953).—Supplemental appropriations of \$25,000,000 in 1952 to establish the fund and \$25,000,000 in 1953 to provide additional capital are proposed. The agency is authorized to accept prime contracts and divide them for subcontracting. The revolving fund is to be used in carrying out this function, for which the legislation has authorized appropriations up to \$50,000,000. The Administration will provide services and advances to small manufacturers to assist them in carrying out subcontracts, with subsequent reimbursement from the subcontractors. The 1953 supplemental is based on the assumed extension of the Defense Production Act throughout fiscal year 1953.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$25,000,000	
Unliquidated obligations and working capital, start of year.....			\$24,000,000
Unliquidated obligations and working capital, end of year.....		24,000,000	20,000,000
Total expenditures.....		1,000,000	4,000,000
Expenditures are distributed as follows:			
Out of current authorizations.....		1,000,000	
Out of prior authorizations.....			4,000,000

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$25,000,000
Unliquidated obligations and working capital, end of year.....			19,000,000
Expenditures out of current authorizations.....			6,000,000

Salaries and expenses, Small Defense Plants Administration (under existing legislation, 1952, and proposed legislation, 1953).—Supplemental appropriations of \$550,000 for 1952 and \$3,100,000 for 1953 are proposed. Present authorizations were provided only to permit the agency to develop a program. The 1952 supplemental will provide funds to carry out the responsibilities assigned the new agency by the Defense Production Act Amendments of 1951. The 1953 supplemental is based upon the

assumed extension of the basic legislation through fiscal year 1953.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$550,000	
Unliquidated obligations, start of year			\$50,000
Unliquidated obligations, end of year		50,000	
Total expenditures		500,000	50,000
Expenditures are distributed as follows:			
Out of current authorizations		500,000	
Out of prior authorizations			50,000

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$3,100,000
Unliquidated obligations, end of year			300,000
Expenditures out of current authorizations			2,800,000

Automobiles and other conveyances for disabled veterans, Veterans Administration (under existing legislation, 1952).—An amount of \$25,000,000 will be required for 1952 to cover the cost of benefits provided by Public Law 187, Eighty-second Congress, which extends eligibility for \$1,600 toward the purchase of an automobile to additional categories of disabled veterans.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$25,000,000	
Expenditures out of current authorizations		25,000,000	

Compensation and pensions, Veterans Administration (under existing legislation, 1952, and proposed legislation, 1953).—Additional funds in the amount of \$42,000,000 will be required in 1952 to cover uncontrollable compensation and pension loads now anticipated. A supplemental appropriation of \$100,000,000 for 1953 is anticipated to cover compensation cost-of-living increases under proposed legislation.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$42,000,000	\$100,000,000
Expenditures out of current authorizations		42,000,000	100,000,000

National service life insurance appropriation, Veterans Administration (under existing legislation, 1952).—Present trends indicate an additional requirement for 1952 of \$50,000,000 to cover the cost of deaths occurring as a result of the Korean conflict.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$50,000,000	
Expenditures out of current authorizations		50,000,000	

Readjustment benefits, Korean conflict, Veterans Administration (under proposed legislation, 1953).—A supplemental appropriation of \$75,000,000 for 1953 is anticipated to cover the cost of a new veterans' readjustment program under proposed legislation.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$75,000,000
Expenditures out of current authorizations			75,000,000

Readjustment benefits, Veterans Administration (under existing legislation, 1952).—Additional funds in the amount of \$148,000,000 will be required in 1952 to cover uncontrollable education and training loads now anticipated.

Obligations incurred.....	5,272,996	5,722,825	5,676,400

PROGRAM AND PERFORMANCE

The laws enforced by the Administration are designed to protect consumers against adulteration and misbranding of foods, drugs, cosmetics, therapeutic devices, and caustic poisons. Control is exercised through factory inspections and examinations of articles entering interstate commerce or offered for importation.

Obligations for 1953 are estimated at \$5,676,400, a decrease of \$46,425 under 1952.

1. *General enforcement operations.*—Inspections of domestic plants and examinations of interstate shipments are planned according to the relative incidence and seriousness of probable violations. This involves about 80,000 manufacturers, shippers, and warehouses. Violations are reported to the Department of Justice with appropriate recommendations for seizure or court action. For less serious violations informal warnings are given and many corrections are effected without resort to court action. Voluntary compliance with the law is promoted by every proper means. Standards of identity, quality, fill of container, and tolerances for poisonous substances in foods are promulgated after investigations and formal hearings. All enforcement operations, both import and domestic, are necessarily restricted and are performed on a highly selective basis.

Workload data are as follows:

	1951 actual	1952 estimate	1953 estimate
Plants inspected.....	8,536	8,400	8,400

Salaries and Expenses, Certification and Inspection Services, Food and Drug Administration—

(Indefinite appropriation, special account)

Salaries and expenses, certification and inspection services: For expenses necessary for the certification or inspection of certain products in accordance with sections 406, 504, 506, 507, 604, 702A, and 706 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U. S. C. 346, 354, 356, 357, 364, 372a, and 376), the aggregate of the advance deposits during the current fiscal year to cover payment of fees by applicants for certification or inspection of such products, to remain available until expended. The total amount herein appropriated shall be available for personal services; purchase of chemicals, apparatus, and scientific equipment; *purchase of one passenger motor vehicle for replacement only*; and the refund of advance deposits for which no service has been rendered. (*Labor-Federal Security Agency Appropriation Act, 1952.*)

FREEDMEN'S HOSPITAL**Salaries and Expenses, Freedmen's Hospital—**

Salaries and expenses: For expenses necessary for operation and maintenance, including repairs; [purchase of one passenger motor vehicle for replacement only;] furnishing, repairing, and cleaning of wearing apparel used by employees in the performance of their official duties; transfer of funds to the appropriation "Salaries and expenses, Howard University" for salaries of technical and profes-

sional personnel detailed to the hospital; payments to the appropriation of Howard University for [instruction of nurses and] actual cost of heat, light, and power furnished by such university; [\$2,631,500] \$2,890,000: *Provided*, That no intern or resident physician receiving compensation from this appropriation on a full-time basis shall receive compensation in the form of wages or salary from any other appropriation in this title: *Provided further*, That hereafter the District of Columbia shall pay by check to Freedmen's Hospital, upon the Surgeon General's request, in advance at the beginning of each quarter, such amount as the Surgeon General calculates will be earned on the basis of rates approved by the Bureau of the Budget for the care of patients certified by the District of Columbia. Bills rendered by the Surgeon General on the basis of such calculations shall not be subject to audit or certification in advance of payment; but proper adjustment of amounts which have been paid in advance on the basis of such calculations shall be made at the end of each quarter: *Provided further*, That the Surgeon General may delegate the responsibilities imposed upon him by the foregoing proviso. (32 D. C. Code 317-320; Labor-Federal Security Agency Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

Affiliated with Howard University as the teaching hospital for the university's medical school, this hospital furnishes patient care and trains physicians at the undergraduate level, nurses, and other professional and technical personnel.

Operation of the hospital is financed by receipts from pay patients, reimbursements from the District of Columbia for care of indigent residents, and a direct appropriation. Obligations for 1953 are estimated to be \$3,489,000, an increase of \$78,500 compared with 1952. This increase reflects higher operating costs in 1953.

1. *Maintenance and operation, inpatient services.*—Patient loads are expected to remain stable.

PROGRAM AND PERFORMANCE

This university, primarily for the education of Negroes, consists of an undergraduate college, a graduate school offering the master's degree, and eight professional schools. Federal funds provide approximately 55 percent of the operating costs.

Obligations for 1953 are estimated to be \$5,099,187, of which \$2,809,000 are appropriated funds. This is an increase of \$60,440 as compared with 1952. Principal increases are proposed for (1) installation of wiring equipment, and transformer vaults for conversion of electric current furnished Freedmen's Hospital and (2) repairs to Slowe and Carver Halls.

1. *General administration.*—The university is administered by a private board of trustees and staff of officers.

2. *Resident instruction and departmental research.*—The staff carries on instructional and research activities. During the school year 1950–51, an equivalent of 3,892 full-time students attended the university. Full-time equivalent enrollments for 1951–52 and 1952–53 are estimated at 3,547.

HOWARD UNIVERSITY—Continued

*Salaries and Expenses, Howard University—Continued

3. *Library.*—The library also supervises the specialized collection on the campus.

4. *Operation and maintenance of the physical plant.*—The plant consists of over 40 buildings and 59 acres of ground.

5. *Auxiliary enterprises and noneducational expenses.*—Dormitories, dining halls, cafeteria, and book stores and athletic program are largely self-supporting.

9. Men's dormitories.....			34,500
Obligations incurred.....	329,142	58,770	226,000

PROGRAM AND PERFORMANCE

Of the 13 projects which have been authorized, plans for 6 have been completed; 2 more will be completed in fiscal year 1952 and 1 in fiscal year 1953. The four remaining projects (law school, administration building, auditorium and fine arts building, and men's dormitories) are being held in abeyance as a result of the mobilization period. Funds for increased costs to complete plans for a preclinical medical building are included in the 1953 estimate.

Construction of Buildings, Howard University—

Construction of buildings: For construction of buildings on the grounds of Howard University, under the supervision of the General Services Administration, to remain available until expended, as follows:

For construction [of a pharmacy building] and equipment of a dental school building, together with alterations and installations in connection with such construction, including engineering and architectural services, and travel, [\$904,500] \$853,160, of which \$372,939 is for payment of obligations incurred under authority provided under this head in the Federal Security Appropriation Act, 1949, to enter into contracts for construction of said building: Provided, That the limitation on the total cost of said dental school building, as set forth under this head in said Act, is increased from "\$2,242,520" to "\$2,565,221", and such increased limitation shall not include authorized construction cost increases heretofore or hereafter determined by the Administrator of the General Services Administration pursuant to the provisions of said Act;

For payment of obligations incurred under authority provided under this head in the First Deficiency Appropriation Act, 1948, as amended by the Second Deficiency Appropriation Act, 1949, to enter into contracts for construction of an engineering building, [\$332,000] \$41,340;

For payment of obligations incurred under authority provided under this head in the Federal Security Appropriation Act, 1950, to enter into contracts for construction of a biology-greenhouse building, \$897,500. (20 U. S. C. 123; Labor-Federal Security Appropriation Act, 1952.)

11. Pharmacy building.....	-----	750,000	140,000
Obligations incurred.....	674,851	5,703,568	810,160

PROGRAM AND PERFORMANCE

Appropriated funds or contract authorizations have been made available for nine buildings and two alteration projects. Of the 11 projects, the women's dormitory has been completed and the engineering building and the power plant addition are under construction and will be completed by February 1952. A contract for the dental building was let in September 1951. Progress schedules will permit the pharmacy building and biology-greenhouse building to be started before the end of fiscal year 1952.

The budget for 1953 reflects the general policy to permit the continuation of projects begun in 1952 to meet essential civilian needs. The estimate provides for escalation costs on the engineering and dental buildings as authorized. In addition, it provides more equipment for the dental building than was originally planned, and cash to liquidate contract authorization on the biology-greenhouse building.

Total obligations.....	2,393,984	2,958,010	3,230,000

PROGRAM AND PERFORMANCE

1. *Development of vocational education.*—The States are given assistance in the appraisal and development of their programs.

2. *Services to State and local school systems.*—Studies are conducted and services are rendered as follows: (a) *School assistance in federally affected areas.*—Applications for assistance in school construction and school operation expenses in areas where facilities are overburdened by Federal activities are examined and acted upon. An increase is requested in 1953 to provide for necessary field staff.

(b) *Services to school systems.*—Studies are conducted and publications issued on subjects of school administration, and consultative and advisory services are provided State, local, and professional bodies.

(c) *Services to elementary and secondary schools.*—These services consist of studies, publications, and advice, together with maintenance of cooperative professional relationships.

(d) *Auxiliary educational services.*—These services foster such matters as visual education, and educational use of radio.

(e) *International educational programs.*—Information is developed and disseminated on the educational systems of other countries; procedures are established for the international exchange of educational personnel; and a foreign-student exchange program is administered in cooperation with the Department of State.

(f) *Special studies.*—Funds are requested to cooperate with non-Federal educational institutions and State educational agencies in developing an action program to meet the problems of educating the children of migratory workers.

3. *Services to higher educational institutions.*—These services deal with the improvement of higher education.

4. *Program development and coordination.*—Educational trends and needs are determined as a basis for studies to be undertaken. Consultative and advisory services are provided to program offices and program plans are reviewed and coordination effected. Further assistance is provided through statistical reporting and analysis services, and advisory and consultative services in the preparation and distribution of manuscripts, periodicals, and other materials useful to educational personnel.

5. *Administration.*

SCHOOL CONSTRUCTION

School Construction, Office of Education—

For providing school facilities and for grants to local educational agencies in federally affected areas, as authorized by title II of the Act of September 23, 1950 (Public Law 815), including necessary expenses of technical services rendered by other agencies, \$150,000,000, to remain available until expended, \$75,000,000, of which \$25,000,000 is for payment of obligations incurred under authority granted for the foregoing purpose in the Supplemental Appropriation Act, 1951.

Not to exceed \$2,000,000 of the appropriation in this chapter for Defense Community Facilities and Services shall be available to the Office of Education for payments to local educational agencies for the maintenance and operation of schools in critical defense housing areas pursuant to section 10 of the Act of September 30, 1950 (Public Law 874), as amended, and for providing school facilities and making grants pursuant to title III of the Act of September 23, 1950 (Public Law 815), as amended: *Provided*, That this paragraph shall be effective only upon enactment into law of H. R. 5411, Eighty-second Congress. (*Second Supplemental Appropriation Act, 1952; Labor-Federal Security Agency Appropriation Act, 1952.*)

OFFICE OF VOCATIONAL REHABILITATION**Payments to States (Including Alaska, Hawaii, and Puerto Rico), Office of Vocational Rehabilitation—**

Payments to States (including Alaska, Hawaii, and Puerto Rico): For payments to States (including Alaska, Hawaii, and Puerto Rico) in accordance with the Vocational Rehabilitation Act, as amended (29 U. S. C., ch. 4), including payments, in accordance with regulations of the Administrator, for one-half of necessary expenditures for the acquisition of vending stands or other equipment in accordance with section 3 (a) (3) (C) of said Act for the use of blind persons, such stands or other equipment to be controlled by the State agency, **[\$21,500,000]** \$23,000,000, of which not to exceed **[\$175,000]** \$193,000 shall be available to the Federal Security Administrator for providing rehabilitation services to disabled residents of the District of Columbia, as authorized by section 6 of said Act, which latter amount shall be available for administrative expenses in connection with providing such services in the District of Columbia: *Provided*, That not to exceed 15 per centum of the appropriation shall be used for administrative purposes.

Payments to States (including Alaska, Hawaii, and Puerto Rico), next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States in accordance with the Vocational Rehabilitation Act, as amended (including the objects specified in the preceding paragraph), for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation therefor for that fiscal year: *Provided*, That the payments made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the current fiscal year. (*Labor-Federal Security Agency Appropriation Act, 1952.*)

Obligations incurred.....	20,859,372	22,327,293	23,085,000

PROGRAM AND PERFORMANCE

The grants are made to assist the States to prepare disabled persons for suitable remunerative employment. The appropriation for 1953 is estimated at \$23,000,000, an increase of \$1,500,000 compared with 1952. The increase will (1) enable the States to purchase case services for 10,000 additional persons, bringing the estimated total to be provided such services in 1953 to 105,000; and (2) allow for the increases which have occurred in State salaries.

1. *Purchase of case services.*—The States are reimbursed for half of the cost of the purchase of case services for disabled clients, including medical examinations, surgical and therapeutic treatment, hospitalization, prosthetic appliances, transportation, occupational tools and licenses, vocational training, and maintenance.

2. *Counseling, guidance, and placement services.*—The State costs of these services are wholly met by the Federal payments to the States.

3. *State administration.*—The payments cover all of the administrative expenses of State vocational rehabilitation agencies.

PROGRAM AND PERFORMANCE

This Office administers the program of payments to States for vocational rehabilitation. Direct obligations for 1953 are estimated at \$732,000, an increase of \$10,000 compared with 1952.

1. *Formulation of rehabilitation standards.*—Standards of service to clients are developed in consultation with the States and professional agencies and organizations, and surveys are made to evaluate adherence to these standards.

2. *Formulation of fiscal and management standards.*—Policies, standards, and procedures are developed with respect to such matters as control of funds and solving operating problems of State agencies, and performance is reviewed to secure conformity to these standards.

3. *Preparation and distribution of informational material.*—This includes assistance to the States to develop and improve their information services.

4. *Administration.*

PUBLIC HEALTH SERVICE

INTRODUCTION

The Service attends to the Federal interest in safeguarding public health by: Providing grants-in-aid and technical and consultative services to States for such public health services as the prevention and control of disease, and hospital planning and construction; conducting scientific research and investigations in biology and medicine; enforcing foreign and interstate quarantine regulations; collecting and disseminating information on health problems; and providing medical and hospital care for legal beneficiaries. To perform these major functions the Service is organized into four bureaus: the National Institutes of Health in the research and investigations area; the Bureau of State Services in the Federal-State cooperative health program area; the Bureau of Medical Services in the medical care, hospital, and foreign quarantine area; and the Office of the Surgeon General in the area of administration, formulation of general policy and planning. The total of appropriations requested is \$302,398,000, a net decrease of \$47,282,908 compared with 1952 including proposed supplementals. The net decrease results primarily from reduced requirements for cash to liquidate contract authority for construction. Principal increases requested are for beginning operation of the new clinical center at Bethesda, Md., and to meet increased patient loads of direct beneficiaries and increased cost of commodities in the operation of Service hospitals.

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U. S. C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including [with the exception of the appropriation "Pay, and so forth, commissioned officers, Public Health Service"] purchase of reports, documents, and other material for publication; preparation and display of posters and exhibits by contract or otherwise; packing, unpacking, crating, uncrating, drayage, and transportation of personal effects of commissioned officers and transportation of their dependents on change of station; and increased allowances to Reserve officers for foreign service;] expenses for active commissioned officers in the Reserve Corps and for not to exceed one thousand five hundred commissioned officers in the Regular Corps; as follows: (Labor-Federal Security Agency Appropriation Act, 1952.)

Control of Venereal Diseases, Public Health Service—

Venereal diseases: To carry out the purposes of sections 314 (a) and 363 of the Act with respect to venereal diseases including the operation and maintenance of centers for the diagnosis, treatment, support, and clothing of persons afflicted with venereal diseases; transportation and subsistence of such persons and their attendants to and from the place of treatment or allowance in lieu thereof; diagnosis and treatment (including emergency treatment for other illnesses) of such persons through contracts with physicians and hospitals and other appropriate institutions; fees for case finding and referral to such centers of voluntary patients; reasonable expenses of preparing remains or burial of deceased patients; recreational supplies and equipment; leasing of facilities and repair and alteration of leased facilities; the purchase of not to exceed [seven] ten passenger motor vehicles for replacement only, and for grants of money, services, supplies, equipment, and use of facilities to States, as defined in the Act, and with the approval of the respective State health authorities, to counties, health districts, and other political subdivisions of the States, for the foregoing purposes, in such amounts and upon such terms and conditions as the Surgeon General may determine; [\$11,653,360] \$10,224,000. (Labor-Federal Security Agency Appropriation Act, 1952.)

Appropriated 1952, **\$11,653,360** Estimate 1953, **\$10,224,000**
Appropriated (adjusted) 1952, **\$11,532,360**

* Excludes \$103,000 for activities transferred in the estimates to "Assistance to States, general, Public Health Service." The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

Total obligations.....	12,765,164	11,584,160	10,224,000

PROGRAM AND PERFORMANCE

The venereal disease control program has continued to yield encouraging results in reducing the number of syphilis cases. Although the reported cases reached an all-time low of 214,600 in 1951, the disease remains a major public health problem. It is expected that the downward trend in reported cases can be maintained by concentrating on population groups of highest incidence and military and industrial areas.

1. *Grants to States for general venereal disease control, case finding, and treatment.*—The decrease estimated for 1953 reflects the declining incidence and a shift from in-

patient to outpatient treatment made possible by improved penicillin therapy schedules.

2. *Direct operations*—(a) *Clinical and laboratory research*.—Present research is directed toward developing immunizing agents against venereal diseases, standardizing laboratory diagnostic practices, and determining the most effective methods of treatment of all forms of venereal diseases.

(b) *Technical assistance to States*.—Assistance is rendered to the States and localities through technical consultation, development of cooperative techniques of case finding and treatment, preparation of scientific information, training aids, and educational media.

(c) *Administration*.

Total obligations.....	9,257,641	8,685,839	8,553,000

PROGRAM AND PERFORMANCE

1. *Grants to States for tuberculosis control activities*.—Grants are made to assist the States in planning and administering control measures, including training of professional workers, case finding, case follow-up, and clinic operations.

2. *Direct operations*—(a) *Cooperative applied research*.—In cooperation with the States, medical schools, and other sources of competence, studies are conducted in the field of tuberculosis.

(b) *Technical assistance to States*.—Assistance is provided through consultative services, demonstrations, community-wide X-ray, case-finding surveys in large metropolitan areas, and in the follow-up of cases after such surveys.

(c) *Administration*.

Total obligations.....	6,343,539	6,696,070	6,198,507

PROGRAM AND PERFORMANCE

This program supplements and supports the activities of State and local health departments in the control of communicable and preventable diseases other than venereal diseases and tuberculosis.

1. *General disease prevention and control.*—This includes epidemiological services, laboratory technological services, technical vector and control services, general veterinary public-health activities, production of training materials, and training.

2. *Specific disease prevention and control.*—The specific diseases include poliomyelitis, encephalitis, and other virus diseases, diarrheal diseases, typhus fever, plague and other rat-borne diseases, and "Q" fever. Malaria control activities have been discontinued; minimal surveillance will be maintained in conjunction with studies of other diseases. The estimate also reflects a decrease in typhus fever control.

3. *General epidemic and disaster aid.*—A small emergency fund is utilized to supplement State and local facilities in connection with serious disasters or outbreaks of disease.

4. *Administration.*

Engineering, Sanitation, and Industrial Hygiene, Public Health Service—

Engineering, sanitation, and industrial hygiene: For expenses, not otherwise provided, necessary to carry out those provisions of sections 301, 311, 314 (c), and 361 of the Act relating to sanitation and other aspects of environmental health, including enforcement of applicable quarantine laws and interstate quarantine regulations, and for carrying out the purposes of the Water Pollution Control Act (33 U. S. C. 466-466 (j)), including purchase of not to exceed [four] two passenger motor vehicles [for replacement only; \$3,648,158]; \$3,950,000. (Labor-Federal Security Agency Appropriation Act, 1952.)

Appropriated 1952, \$3,648,158

Estimate 1953, * \$3,950,000

* Excludes \$56,100 for activities transferred in the estimates to "Assistance to States general, Public Health Service." The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

Total obligations.....	3,617,778	3,771,540	3,950,000

PROGRAM AND PERFORMANCE

This program supplements and supports the activities of States and localities in the control of the basic essentials of individual and community life—air, water, food, and shelter.

1. *Water supply and water pollution control.*—This consists of technical assistance to States, other public bodies and industry; development of comprehensive river-basin programs; and field studies and research for the purpose of reducing water pollution. A national summary report and summary reports for 15 regions covering the Nation will be completed by the end of 1952. Of a total of 260 more detailed basin reports, 40 will be completed in 1952 and 50 in 1953. In addition, digests of the 15 regional reports designed for lay consumption will be completed in 1953.

2. *Radiological health services.*—These services consist of the collection, analysis, and dissemination of information about, and research into, the hazards of handling and disposing of radioactive substances and the training of personnel to assist in the solution of radiological health problems.

3. *Environmental research activities.*—This includes the basic and applied research, and investigations into environmental health problems carried on at Cincinnati, Ohio. The estimate provides for an expanded program of basic research and for the services and maintenance required for operation of the Environmental Health Center building which will open early in 1953.

4. *General sanitation activities.*—Consultative and technical assistance in sanitation problems concerning water, milk, shellfish, and other foods are furnished to State and local authorities. Compliance with interstate quarantine regulations is obtained through inspections and the development of sanitation guides and standards.

5. *Occupational health.*—Technical and consultative services are furnished to the States, local authorities, and industry; research and investigations are undertaken on injurious and objectionable chemical, physical, and biological agents.

6. *Administration.*

OBLIGATIONS BY ACTIVITIES

Grants for hospital construction—1951, \$142,743,508; 1952, \$106,580,943; 1953, \$75,000,000.

PROGRAM AND PERFORMANCE

Funds are allocated to States, Territories, municipalities, and nonprofit institutions to defray part of the costs of construction of hospitals and public-health centers. Grants are made on the basis of population and economic need, and the Federal share for each project is no greater than two-thirds nor less than one-third of the cost. Federal payments are made as construction proceeds.

Progress is summarized in the following table, with amounts shown cumulative.

Fiscal year	Number of projects with final approval	Allocations to States	Federal share of approved projects	Appropriations for Federal payments	Federal payments
1948.....	44	\$75,000,000	\$4,009,380	\$15,000,000	\$392,183
1949.....	501	150,000,000	90,114,528	55,090,000	9,685,328
1950.....	961	300,000,000	207,983,684	95,000,000	67,514,258

1. Operations and technical services activities.....	\$1,149,123	\$1,140,579	\$1,117,311
2 Administration.....	98,428	98,386	99,689
Obligations incurred.....	1,247,551	1,238,965	1,217,000

PROGRAM AND PERFORMANCE

1. *Operations and technical services.*—The States and communities are aided in making inventories of their hospitals and health centers, determining the additional facilities required, and developing a coordinated program to meet the indicated need. Proposed hospital and health-center projects are screened to determine eligibility. Project plans and specifications are reviewed for compliance with construction standards, and technical assistance is provided on architectural and engineering aspects.

2. *Administration.*

PUBLIC HEALTH SERVICE—Continued

Hospitals and Medical Care, Public Health Service—

Hospitals and medical care: For carrying out the functions of the Public Health Service under the Act of August 8, 1946 (5 U. S. C. 150), and under sections 321, 322, 324, 326, 331, 332, 341, 343, 344, 502, 504, and 710 of the Public Health Service Act, and Executive Order 9079 of February 26, 1942, including purchase and exchange of farm products and livestock; purchase of not to exceed [nine] fourteen passenger motor vehicles, including four ambulances, for replacement only; and firearms and ammunition; [\$30,200,000] \$32,930,000: *Provided*, That when the Public Health Service establishes or operates a health service program for any department or agency, payment for the estimated cost shall be made in advance for deposit to the credit of this appropriation. (*Labor-Federal Security Agency Appropriation Act, 1952.*)

Appropriated 1952, \$30,200,000 Estimate 1953, \$32,930,000

* Excludes \$20,350 for activities transferred in the estimates to "Salaries and expenses, Public Health Service." The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

<i>Direct Obligations</i>			
1. Grants for research and training:			
(a) Research projects	\$7,500,542	\$8,615,000	\$8,600,000
(b) Research fellowships	531,320	649,000	649,000
(c) Training stipends		86,000	86,000
2. Direct operations:			
(a) Research	5,230,841	5,612,860	6,697,520
(b) Other direct operations:			
(1) Review and approval of research and training grants	515,941	618,480	618,480
(2) Administration	227,239	224,660	225,000
Total direct obligations	14,005,883	15,806,000	16,876,000
<i>Obligations Payable Out of Reimbursements From Other Accounts</i>			
2. Direct operations:			
(a) Research	1,349,739	1,760,200	2,782,100
(b) Other direct operations:			
(1) Review and approval of research and training grants	6,871		
(2) Administration	462,467	543,800	543,800
Total obligations payable out of reimbursements from other accounts	1,819,077	2,304,000	3,325,900
Total obligations	15,824,960	18,110,000	20,201,900

PROGRAM AND PERFORMANCE

The seven research institutes of the National Institutes of Health are the Microbiological Institute, the National Cancer Institute, the National Institute of Mental Health, the National Heart Institute, the National Institute of Dental Research, the National Institute of Arthritis and Metabolic Diseases, and the National Institute of Neurological Diseases and Blindness. Funds are provided by this appropriation and by separate appropriations for cancer, mental health, heart, and dental activities.

The total of all institute appropriations requested is \$54,827,000, an increase of \$2,233,359 compared with 1952, including anticipated supplementals and less liquidation cash for prior year contract authorizations. The increase is principally for the opening of the Clinical Research Center in the last half of fiscal year 1953.

This appropriation finances laboratory and clinical research in microbiology, in arthritis and metabolic diseases, in neurological diseases and blindness, and in various basic problems in public health, medical, biological, and chemical research not included in the four appropriations mentioned above.

1. *Grants for research and training.*—These grants are made to medical schools and other institutions for research and to individuals for training purposes. The 1952 funds are supporting 1,030 research projects, 218 research fellowships, and approximately 25 trainees. The 1953 program will maintain essentially these same levels.

2. *Direct operations.*—(a) *Research.*—Basic research is conducted in fundamental physiological processes and nutrition; in virus, infectious, and tropical diseases; in testing and control of biological products; in arthritis and metabolic diseases; and in neurological diseases and blindness. The increase in the 1953 program over 1952 will provide for clinical research at the Clinical Center.

(b) *Other direct operations.*—These operations comprise the over-all direction and administration of the total program of the National Institutes of Health, and the administration of the research and training grant programs.

PUBLIC HEALTH SERVICE—Continued

Salaries, Expenses, and Grants, National Cancer Institute, Public Health Service—Continued

PROGRAM AND PERFORMANCE

1. *Grants—(a) Grants for research and training.*—These grants are made to medical and dental schools and other institutions for research projects and to individuals for training purposes. The fiscal year 1952 funds are supporting approximately 280 research projects, 170 research fellowships, 105 stipends to graduate physicians for specialized graduate training, and maximum teaching grants of \$25,000 each to 79 four-year medical schools and of \$5,000 each to 50 dental and 2-year medical schools. The 1953 program will maintain approximately the same level.

(b) *Grants for detection, diagnosis, and other control services.*—Funds are provided to States and Territories on a formula basis for strengthening State and local clinical and educational services. In addition, grants are made to local health agencies, universities, hospitals, and non-profit professional organizations to develop, initiate, or establish improved types of cancer control techniques and devices.

2. *Direct operations—(a) Research.*—Fundamental research is conducted in biology, biochemistry, biophysics, endocrinology, pathology, chemotherapy, and epidemiology. The increase in 1953 over 1952 is to initiate a broader program of clinical research through utilization of the new Clinical Research Center facilities.

(b) *Other direct operations.*—These operations include consultative services to the States and other organizations, review of applications for research grants, fellowships, and teaching stipends, and general program direction and administration.

NOTE.—Reimbursements from non-Federal sources above are for personnel detailed to the Juvenile Court, District of Columbia, in accordance with provision of the District of Columbia Appropriation Act.

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
1. Grants:			
(a) Grants for research and training:			
(1) Research projects.....	¹ \$1,198,628	¹ \$1,663,000	¹ \$1,662,000
(2) Research fellowships.....	221,656	256,000	250,000
(3) Training grants.....	¹ 3,377,432	¹ 4,000,000	3,750,000
(b) Grants for detection, diagnosis, and other preventive and control services.....	3,074,429	3,100,000	3,100,000
2. Direct operations:			
(a) Research.....	605,020	825,000	1,305,000
(b) Other direct operations:			
(1) Review and approval of research and training grants.....	99,617	126,000	123,000
(2) Training activities.....	108,152	94,987	77,000
(3) Technical assistance to States.....	377,885	447,330	405,430
(4) Administration.....	291,906	325,000	320,000
Total funds for program performance.....	9,354,725	10,837,317	10,992,430
Adjustment for obligations incurred in advance of program performance.....	¹ -2,367,481	¹ -823,000	¹ -77,000
Obligations incurred.....	6,987,244	10,014,317	10,915,430

¹ Some of the obligations for grants for research projects and training were incurred several years in advance of actual program performance. By means of the adjustment line shown in this schedule, the amounts by activity reflect the actual performance levels for each year.

PROGRAM AND PERFORMANCE

1. *Grants—(a) Grants for research and training.*—These grants are made to medical schools and other institutions for research projects, and to individuals for training purpose. The 1952 program includes approximately 122 research projects, 79 fellowships, 183 graduate teaching grants, 650 training stipends and undergraduate teaching grants in 42 medical schools. In 1953 there will be a decrease to 120 research projects, 70 fellowships, 176 graduate teaching grants, and 613 training stipends.

(b) *Grants for detection, diagnosis, and other preventive and control services.*—These grants are made to the States and Territories to initiate or expand mental health programs.

2. *Direct operations—(a) Research.*—Research is conducted in the physiology of the brain; narcotic and barbiturate addiction; epidemiology; psychological aspects of aging; biometrics; and the causes of mental illness. The increase in 1953 over 1952 will provide for initial clinical investigations in the new Clinical Research Center.

(b) *Other direct operations.*—These operations include review of applications for grants; promotion of training; consultative services to States; and demonstrations and field studies in developing preventive and outpatient services, and general program direction and administration.

Total obligations.....	8,216,752	9,267,000	9,749,000

¹ Some of the obligations for teaching grants and training stipends were incurred 1 year in advance of program performance and were paid from liquidating cash. By means of the adjustment line shown in this schedule, the amounts by activity reflect actual performance levels for each year.

PROGRAM AND PERFORMANCE

1. *Grants—(a) Grants for research and training.*—These grants are made to medical schools and other institutions

PUBLIC HEALTH SERVICE—Continued

Salaries, Expenses, and Grants, National Heart Institute, Public Health Service—Continued

for research projects, and to individuals for training purposes. The 1952 program includes approximately 355 research projects, 100 fellowships, teaching grants averaging \$14,000 each to 43 four-year medical schools, and 45 training stipends. Virtually the same level of grant activity will be maintained in 1953.

(b) *Grants for detection, diagnosis, and other control activities.*—These grants are made to States to provide services to heart-disease patients in their homes, to furnish training to physicians and public health workers, and to supply public information.

2. *Direct operations*—(a) *Research.*—Research is conducted in development of diagnostic and case-finding instruments; the peripheral vascular system; kidney and electrolyte metabolism; high blood pressure; gerontology; rheumatic heart disease; therapeutics; and epidemiology. The increase in 1953 over 1952 will provide for beginning clinical research investigations at the new Clinical Research Center.

(b) *Other direct operations.*—These operations include review of applications for grants; consultative services to States; field studies and demonstrations on improved methods of conducting local control programs; and general program direction and administration.

(4) Administration.....	59,799	61,800	55,500
Total obligations.....	1,940,936	1,636,654	1,936,000

PROGRAM AND PERFORMANCE

1. *Grants*—(a) *Grants for research and training.*—These grants are made to dental schools and other institutions for research projects and to individuals for training. The 1952 program includes approximately 35 research projects and 14 fellowships. The 1953 program will be maintained at this same level of activity.

(b) *Special cooperative projects with States in water fluoridation.*—The estimate provides for the financing of special projects to assist States in establishing chemical, technical, and engineering services to effectuate operation of State-wide water fluoridation programs.

2. *Direct operations*—(a) *Research.*—Basic research is conducted in bacteriology, pathology, histology, oral and biological chemistry, epidemiology, and biometrics.

(b) *Other direct operations.*—These operations include review of applications for grants; consultative services to States; demonstrations of newly developed

techniques; control of dental conditions; development of clinical methods and facilities; and general program direction and administration.

Construction of Research Facilities, Public Health Service—

Construction of research facilities: For construction of research facilities, to be transferred (except such part as may be necessary for incidental expenses and purchase of equipment by the Public Health Service) to the General Services Administration, and to remain available until expended, as follows:

For [continuation of] payment of obligations incurred pursuant to authority granted to enter into contracts for construction of a combined hospital and research building as authorized under this head in the Federal Security Agency Appropriation Acts of 1949 and 1950, \$10,400,000, of which \$10,000,000 is for payment of obligations incurred under authority heretofore granted under this head] \$8,230,000.

[For payment of obligations incurred under authority heretofore granted to enter into contracts for construction of auxiliary service area structures, as authorized under this head in the Federal Security Agency Appropriation Act, 1950, \$300,000.]

[For payment of obligations incurred under authority heretofore granted to enter into contracts for construction of additional auxiliary structures as authorized under this head in the Federal Security Agency Appropriation Act, 1951, \$350,000.]

[For purchase and installation of additional equipment, supplies, and furnishings for structures heretofore provided under this head, \$6,635,540.] (42 U. S. C. 248; 60 Stat. 421; Labor-Federal Security Agency Appropriation Act, 1952.)

Appropriated 1952, \$17,685,540

Estimate 1953, \$3,230,000

PROGRAM AND PERFORMANCE

The Service is expanding its medical research facilities at the National Institutes of Health in Bethesda, Md., by construction of the Clinical Center equipped with 500 beds for clinical research in cancer, heart, dental, arthritic, mental, metabolic, infectious, and tropical diseases. The project includes auxiliary structures to provide heat, emergency power, incineration, storage, laundry, animal breeding, and shop services for the National Institutes of Health. All buildings are expected to be completed and equipped for operation by the middle of fiscal year 1953.

Total obligations.....	4,051,127	4,608,208	4,628,228

PROGRAM AND PERFORMANCE

1. *Evaluation of public-health problems and methods.*—Studies planned for 1953 deal with evaluation of the financial status and needs of dental schools; investigation concerning staffing, financial support, curriculum, and methods of teaching preventive medicine in medical schools; extent of progress in the development of regional medical education and health services; analysis of special census tabulations of the distribution of certain medical personnel; basic research in morbidity and health statistics; and the health and work capacities of older persons in relation to emergency manpower needs.

2. *Development and coordination of nursing resources.*—Ways are studied of increasing nursing service throughout the country, of securing better distribution of nursing personnel, and of achieving better use of nurse time.

3. *International health activities.*—These activities consist of advice on international health programs, participation in development of general policy for the World Health Organization, administration of foreign health programs on a contract basis, recruitment of health experts for projects overseas, provision of training programs

for foreign students, and planning of United States policy on revision of international sanitary conventions.

4. *General duty and training.*—This includes officers assigned for specialized types of training and officers not assigned to specific operating programs.

5. *Management and central services.*

PROGRAM AND PERFORMANCE

The 1950 appropriation act provided \$100,000 for developing plans and specifications for the erection of a dental research building on the grounds of the National Institutes of Health in Bethesda, Md. This would be a separate building, in addition to the principal building for the Clinical Center. Review of space requirements of the National Institutes of Health has indicated that needs of the National Institute of Dental Research can be accommodated within the total space now in existence and under construction. It is proposed, therefore, to postpone this building project indefinitely.

Obligations incurred.....	10,604,641	12,096,278	12,649,080

PROGRAM AND PERFORMANCE

The hospital provides care and treatment for mentally ill who are either beneficiaries of the Government or residents of the District of Columbia, which reimburses the hospital for its residents.

Obligations for 1953 are estimated to be \$12,649,080, an increase of \$552,802 compared with 1952. This increase results primarily from higher patient loads and the increased cost of commodities.

1. *Operation and maintenance of hospital.*—This covers care and treatment, research on mental illness, maintenance of buildings, and administrative services.

AVERAGE DAILY PATIENT LOAD

	1951 actual	1952 estimate	1953 estimate
Federal beneficiaries.....	1,744	1,799	1,856
District of Columbia residents.....	5,036	5,101	5,169
Total.....	6,780	6,900	7,025

2. *Operation of farm.*—Patients derive therapeutic benefits from working on the farm. Produce value exceeds the cost of operation.

3. *Operation of cafeteria.*—Meals are sold to employees and others at not less than cost.

4. *Training program.*—The need for medical and nursing staff is met in part by training interns, residents in psychiatry, and student nurses. The numbers of trainees are as follows:

PROGRAM AND PERFORMANCE

This building will provide replacement for the Oaks and Toner Buildings, two badly deteriorated patients' quarters erected in 1890. Plans and specifications are

being prepared during the current fiscal year. Construction will begin in 1953 and be completed in 1954 by the General Services Administration. The total estimated cost is \$6,375,000.

PROGRAM AND PERFORMANCE

Federal credit unions are cooperative associations organized for the purpose of promoting thrift and creating a source of credit for provident and productive purposes for their members. The operating cost of the Bureau of Federal Credit Unions is intended ultimately to be provided by fees collected from the federally chartered credit unions. Historically, as fee income has grown, appropriations for operating costs have been reduced.

The Bureau carries on three major activities: (1) Investigating and chartering of new Federal credit unions; (2) the supervision and guidance of both new and established Federal credit unions, including periodic examinations of their financial condition and operating practices; and (3) the administrative direction of the foregoing activities.

The growth of the program is depicted in the table below:

PROGRAM AND PERFORMANCE

The Social Security Act, through the old-age and survivors insurance program, provides partial protection to workers and their families against the economic hazards

of old age and death. Under the federally operated old-age and survivors program, tax contributions from employers, employees, and self-employed individuals are deposited in a trust fund from which benefit payments and administrative costs are paid.

The volume of work handled by the Bureau has grown at a steady rate and will continue to increase as the system matures. A substantial volume of recurring work resulted from the 1950 amendments to the Social Security Act. Public Law 234, Eighty-second Congress, enacted October 30, 1951, provides that all railroad workers with less than 10 years of railroad service since 1936 are to be covered under the Federal Old-Age and Survivors Insurance program. This will result in a further increase of workloads in 1952 and subsequent years. A supplemental estimate of \$327,000 for 1952 is proposed for later submission.

1. *Maintenance of accounts of employee earnings.*—Eligibility for insurance benefits and the amount of benefits are based on wages reported by employers and self-employed individuals and recorded by the Bureau in individual accounts of earnings. Although the workload has become relatively stabilized, it will continue to grow gradually as the level of employment increases.

	1951 actual	1952 estimate	1953 estimate
Earnings items received	193, 927, 678	228, 135, 000	233, 298, 000

2. *Development, determination, and certification for payment of claims for insurance benefits.*—Claims for insurance benefits are received from prospective beneficiaries in the Bureau's field offices. When claimants' rights to benefits have been established, the Bureau authorizes the Treasury Department to pay the initial benefit. The workload will become relatively stabilized by 1953. The higher level of claims in 1951 and to a lesser extent in 1952 reflects nonrecurring workload which resulted from the liberalized provisions of the 1950 amendments to the Social Security Act.

	1951 actual	1952 estimate	1953 estimate
New claims received	1, 796, 058	1, 526, 000	1, 521, 500

3. *Recertification monthly of awarded claims.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of beneficiaries on the rolls will continue to increase until the program matures.

	1951 actual	1952 estimate	1953 estimate
Beneficiaries on rolls at end of year	4, 388, 219	5, 109, 000	5, 692, 000

4. *Hearings and appeals.*—Individuals whose claims for benefits are disallowed have the right to appeal and to be heard by referees. The annual volume of hearings is relatively stable.

	1951 actual	1952 estimate	1953 estimate
Appeals cases processed	1, 987	2, 166	2, 204

5. *Actuarial services.*—Actuarial studies and estimates are prepared for long-range program planning.

6. Administration.

PROGRAM AND PERFORMANCE

Grants for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled are made to States that have plans for these programs approved by the Federal Security Agency. The Social Security Act amendments of 1950 provided for Federal financial participation for groups formerly not aided and for more adequate assistance to persons whose other income and resources are insufficient to meet their needs. The appropriation for 1953 is estimated at \$1,140,000,000, a decrease of \$10,000,000 compared with 1952.

It is expected that the number of recipients of old-age assistance and aid to dependent children will be less in 1953 than in 1952, but that the number receiving aid to the blind will increase slightly, and that the permanently and totally disabled who receive aid will increase substantially as this new program develops. The estimated decrease in the numbers receiving old-age assistance and aid to de-

pendent children is anticipated because of the continuing effect of the old-age and survivors insurance amendments and of the current and anticipated tight labor market.

Average monthly payments are expected to increase under all programs. Factors considered in projecting such increases are the growing effect of the 1950 medical care amendments; the cost of the new mandatory exemption of \$50 of earned income in aid to the blind; and the effect of customarily belated cost-of-living increases in assistance standards.

The net effect of the changes in number of recipients and average payments is a small rise in expenditures for old-age assistance and aid to the blind, some increase in aid to the permanently and totally disabled, and a sharp drop in expenditures for aid to dependent children. The drop in expenditures for aid to dependent children more than offsets the increases anticipated under the other three programs.

1. *Payments to recipients—(a) Old-age assistance.*—The average number of recipients per month for 1953 is estimated at 3.7 percent less than was estimated for 1952. The average monthly payment is estimated to exceed by \$2.50 the amount for 1952.

	1951 actual	1952 estimate	1953 estimate
Average number of recipients per month	2,782,031	2,670,000	2,570,000
Average monthly payment	\$43.14	\$43.00	\$45.50
Total expenditures for assistance (Federal, State, and local)	\$1,440,123,731	\$1,377,720,000	\$1,403,220,000
Percent from Federal funds	55.1	54.7	54.0

(b) *Aid to dependent children.*—The average number of persons to receive assistance per month is estimated at 12.8 percent less than was estimated for 1952. The average monthly payment per person is expected to exceed by 73 cents the amount for 1952.

	1951 actual	1952 estimate	1953 estimate
Average monthly number of recipients:			
Families	649,519	585,000	510,000
Children	1,655,620	1,497,600	1,305,600
Persons	2,223,100	2,009,475	1,751,850
Average monthly payment per person	\$20.93	\$21.25	\$21.98
Total expenditures for assistance (Federal, State, and local)	\$558,228,239	\$512,460,000	\$462,060,000
Percent from Federal funds	51.7	53.0	52.2

(c) *Aid to the blind.*—The average number of recipients per month for 1953 is estimated at 3.2 percent more than was estimated for 1952. The estimated average monthly payment is \$1 more than the estimate for 1952.

	1951 actual	1952 estimate	1953 estimate
Average number of recipients per month	86,085	95,000	98,000
Average monthly payment	\$46.86	\$47.00	\$48.00
Total expenditures for assistance (Federal, State, and local)	\$48,409,163	\$53,580,000	\$56,448,000
Percent from Federal funds	50.5	50.3	50.0

(d) *Aid to the permanently and totally disabled.*—Under the 1950 amendments, grants-in-aid are made to the States to provide assistance to needy persons who are permanently and totally disabled because of physical or mental handicaps. The average monthly number of recipients for 1953 is estimated to be 40 percent more than that for 1952. The estimated average payment for 1953 is \$1.25 more than that for 1952.

	1951 actual	1952 estimate	1953 estimate
Average number of recipients per month	78,066	125,000	175,000
Average monthly payment	\$44.39	\$44.00	\$45.25
Total expenditures for assistance (Federal, State, and local)	\$31,189,718	\$66,000,000	\$95,025,000
Percent from Federal funds	46.4	52.7	51.7

2. *State and local administration.*—The grants to States include 50 percent of the administrative costs which are found by the Federal Security Agency to be necessary for the proper and efficient administration of the State public assistance programs. The Federal share is for the salaries and expenses of about 40,000 State and local personnel.

	1951 actual	1952 estimate	1953 estimate
(a) Old-age assistance	\$76,868,329	\$74,000,000	\$73,000,000
(b) Aid to dependent children	46,615,244	42,000,000	40,000,000
(c) Aid to the blind	3,860,085	4,000,000	4,000,000
(d) Aid to the permanently and totally disabled	4,821,838	7,000,000	10,000,000
Total expenditures (Federal, State, and local)	132,165,496	127,000,000	127,000,000
Percent from Federal funds	49.4	50.0	50.0

PROGRAM AND PERFORMANCE

The Bureau of Public Assistance administers Federal grants to States for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled.

The direct obligations for 1953 are estimated at \$1,649,000, a decrease of \$19,000 compared with 1952.

1. *Develop and consult on program policies and standards.*—Conditions are clarified under which States may use Federal funds in carrying out the purposes of the public assistance programs, and standards are formulated for the development of efficient administration of these programs. Consultation is provided to State agencies on specialized subjects.

2. *Review and approve State plans and grants, evaluate and advise States on operations.*—State plans and State and local operations are reviewed, and consultative services are provided to the States with regard to their current operating problems and development of their programs.

3. *Collect and interpret statistical and other data.*—These data are for the use of State agencies and for Federal purposes. Special statistical studies are conducted to evaluate the public assistance programs.

4. *Administration.*

PROGRAM AND PERFORMANCE

The Bureau investigates and reports on the welfare of children and child life, and administers grants to the States for extending and improving maternal and child health services, crippled children's services, and child welfare services. Direct obligations for 1953 are estimated at \$1,587,000, a decrease of \$8,000 compared with 1952.

1. *Development of State and local health services for children.*—Program policies and requirements related to State plans for maternal and child health and crippled children's services are developed; such plans are reviewed and approved; consultative services are given to State agencies, other public and private agencies and organizations, and educational institutions engaged in training professional personnel; and guides and recommendations are prepared on the provision of the essential child health services.

2. *Development of State and local social services for children.*—The same approach is used for the child welfare services as for the child health services.

3. *Research in child life and services for children.*—Research in subjects related to child health and welfare is conducted and interpreted to the public through pamphlets and bulletins.

4. *Dissemination of information for parents and others working with children.*—Publications are prepared and distributed on child health and welfare services, and, upon request, the States are assisted with their information programs.

5. *Administration.*

Grants to States for Maternal and Child Welfare, Social Security Administration—

Grants to States for maternal and child welfare: For grants to States for maternal and child-health services, services for crippled children, and child-welfare services as authorized in title V, parts 1, 2, and 3, of the Social Security Act, as amended (42 U. S. C., ch. 7, subch. V), **[\$31,500,000]** \$30,000,000: *Provided*, That any allotment to a State pursuant to section 502 (b) or 512 (b) of such Act shall not be included in computing for the purposes of subsections (a) and (b) of sections 504 and 514 of such Act an amount expended or estimated to be expended by the State: *Provided further*, That, in computing allotments to States under sections 502, 512, and 521 (a) of such Act for the current fiscal year, balances in allotments previously made to States which remain available in the Federal Treasury for payment to them as of July 1, 1952 shall be taken into account by (1) adding the total of such balances to the appropriation herein made, and (2) subtracting from each resulting allotment to any State under section 502 (a), 512 (a), or 521 (a) any balance in any prior allotment under such section which remains available in the Federal Treasury for payment to it as of such date but with such adjustments as may be necessary to assure that this proviso does not operate to deprive any State of any balance in an allotment previously made to it under such section. (Labor-Federal Security Agency Appropriation Act, 1952.)

Obligations incurred.....	29,886,425	31,500,000	30,009,000

PROGRAM AND PERFORMANCE

Grants to States are provided for (1) maternal and child health services, (2) crippled children's services, and (3) child-welfare services. Direct obligations for 1953 are estimated at \$30,000,000, a decrease of \$1,500,000 compared with 1952. Unexpended balances from appropriations for prior years should enable the programs to be maintained at the approximate 1952 level.

1. *Maternal and child-health services.*—The States must provide matching funds for one-half of the amount appropriated; the remainder is distributed to the States on the basis of 100 percent Federal grants for special needs. During 1953 the States will give particular attention to programs for premature babies, children with sight or hearing losses, and school health services, and reducing the excessive maternal and infant mortality in several States.

2. *Crippled children's services.*—The States are required to provide matching funds for half of the amount appropriated; the remainder is distributed to the States on the

basis of 100 percent Federal grants for special needs. The estimate provides for (1) continuation of programs of the States, for services to children with such conditions as epilepsy, cerebral palsy, rheumatic fever, cleft palate, and (2) enabling the States to participate in regional programs to provide services for children with congenital heart disease.

3. *Child-welfare services.*—Grants aid States to establish, extend, and strengthen, especially in rural areas and other areas of special need, child-welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent. States are required to pay a part of the cost of such services but the share is not specified.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

The staff of the Office of the Commissioner is engaged in the over-all executive direction, coordination, and development of the social security program and in basic research covering the broader phases of social security. The

SOCIAL SECURITY ADMINISTRATION—Continued**Salaries and Expenses, Office of the Commissioner, Social Security Administration—Continued**

direct obligations for 1953 are estimated at \$333,000, the same as in 1952.

1. *Direction and coordination of the social security program.*—This consists of (a) formulation of administrative policies; (b) appraisal of State laws, plans, and operations for compliance with Federal requirements and certification of grants to States; (c) coordinating inter-program activities; and (d) review of administrative management throughout the Social Security Administration.

2. *Appraisal and development of the social security program.*—Provision is made for (a) basic studies beyond the immediate scope of any bureau; (b) review and coordination of research and statistics work in the Administration; and (c) development of ways of improving economic security through social insurance and related measures.

OBLIGATIONS BY ACTIVITIES

Surplus property disposal and utilization—1951, \$329,288; 1952, \$97,000; 1953, \$265,000.

PROGRAM AND PERFORMANCE

The Administrator (1) determines surplus personal property needed for education and public health purposes, including research, and allocates such property to State agencies for distribution to educational and public health institutions; (2) transfers surplus real property assigned him for educational and health purposes, subject to the approval of General Services Administration; and (3) insures compliance with the terms and conditions of transfers made for educational and public health purposes. Direct obligations for 1953 are estimated at \$265,000, an increase of \$168,000 compared with 1952. The increase places on an annual basis additional staff proposed in a supplemental estimate for 1952.

Appropriated 1952, \$4,000,000

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, \$4,000,000.

OBLIGATIONS BY ACTIVITIES

Grants, loans, and direct Federal construction—1952, \$4,000,000.

PROGRAM AND PERFORMANCE

The loans, grants, and services are for additional sanitary engineering requirements especially sewage treatment works and water purification plants, in critical defense housing areas. The amount appropriated in 1952 is available for obligation until the end of fiscal year 1953.

A supplemental appropriation for 1952 is proposed for later transmission.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1952, \$4,000,000.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Obligations incurred during year		\$4,000,000	
Expenditures out of current authorizations		4,000,000	

Salaries and Expenses, Defense Community Facilities and Services, Federal Security Agency—

For necessary expenses, not otherwise provided for, of the Federal Security Agency in connection with its functions under the Defense Housing and Community Facilities and Services Act of 1951, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), \$250,000. (Second Supplemental Appropriation Act, 1952.)

Appropriated 1952, \$250,000

OFFICE OF THE ADMINISTRATOR

Working Capital Fund, Office of the Administrator, Federal Security Agency—

Working capital fund: For the establishment of a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of (1) a central reproduction service; (2) a central tabulating service; (3) a central supply service for supplies and equipment for which adequate stocks may be maintained to meet in whole or in part the requirements of the Agency; and (4) such similar services as the Administrator determines may be performed more advantageously on a reimbursable basis; \$175,000. Provided, That any stocks of such supplies and equipment on hand or on order on June 30, 1952, under the appropriation "Salaries and expenses, Division of Service Operations," shall also be used to capitalize said fund: Provided further, That said fund shall be reimbursed from available funds of bureaus, offices, and agencies for which services are performed at rates which will return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

Estimate 1953, \$175,000

REDUCTION IN CONTRACT AUTHORIZATION

The contract authorization granted under the head "Construction and equipment, building for the housing, care, and treatment of mentally sick patients, Saint Elizabeths Hospital," in the Labor-Federal Security Appropriation Act, 1949, is reduced by the amount of \$115,000.

GENERAL PROVISIONS—FEDERAL SECURITY AGENCY

SEC. 202. Appropriations under this title available for salaries and expenses shall be available for examination of estimates of appropriations in the field, and for payment in advance [when authorized by the Federal Security Administrator] for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public.

SEC. 203. Appropriations under this title available for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

SEC. 204. Appropriations under this title available for salaries and expenses shall be available for travel expenses and for expenses of attendance at meetings concerned with the function or activity for which any such appropriation is made.

SEC. 205. None of the funds appropriated by this title to the Social Security Administration for grants in aid of State agencies to cover, in whole or in part, the cost of operation of said agencies including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees. (*Labor-Federal Security Appropriation Act, 1952.*)

GENERAL PROVISIONS

SEC. [701] —. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. [702] —. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not heretofore authorized by the Congress.

[SEC. 703. No part of any appropriation or authorization contained in this Act shall be used to pay the compensation of any incumbent appointed to any civil office or position which may become vacant during the fiscal year beginning on July 1, 1951: *Provided*, That this inhibition shall not apply—]

[(a) to not to exceed 25 per centum of all vacancies;]

[(b) to positions filled from within and by transfer to the department or agency;]

[(c) to offices or positions required by law to be filled by appointment of the President by and with the advice and consent of the Senate;]

[(d) to Saint Elizabeths Hospital and Freedmen's Hospital;]

[(e) to the Public Health Service;]

[(f) to educational institutions; and]

[(g) to personnel engaged in law enforcement: *Provided further*, That when the total number of personnel subject to this section has been reduced to 90 per centum of the total provided for in the budget estimates for 1952, this section may cease to apply.]

[SEC. 704. Amounts available from appropriations and other funds in this Act, and amounts specified therein for personal services, are hereby reduced in the sums hereinafter set forth, such sums (except trust funds) to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this Act, as follows:]

[DEPARTMENT OF LABOR]**[OFFICE OF THE SECRETARY]**

[Salaries and expenses, Bureau of Labor Standards, \$31,835;]

[SEC. 705. Where the number of passenger cars for replacement only is reduced by the provisions in this Act the total number of passenger cars in the division or department concerned will be reduced by a like number: *Provided*, That in no event shall the number of passenger-carrying vehicles which may be operated during the current fiscal year at the seat of government under any appropriation or authorization in this Act exceed 50 per centum of the number in use as of June 30, 1951.]

【SEC. 706. No part of any appropriation contained in this Act, except appropriations for the Public Health Service, shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time

or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.】 (*Labor-Federal Security Appropriation Act, 1952.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1953

FEDERAL SECURITY AGENCY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
FOOD AND DRUG ADMINISTRATION								
Salaries and expenses, Food and Drug Administration.	13	\$19,700	13	\$5,200	\$14,500	222		For use of inspectors in traveling to food, drug, and cosmetic factories, canneries, warehouses, sea-food packers and other establishments where products subject to the Food, Drug, and Cosmetic Act are prepared, stored or sold, in pursuance of their duties in enforcing the Act. Do.
Salaries and expenses, certification and inspection services, Food and Drug Administration.	1	1,400	1	400	1,000	14		
Total, Food and Drug Administration.	14	21,100	14	5,600	15,500	236		
FREEDMEN'S HOSPITAL								
Salaries and expenses, Freedmen's Hospital.						5		2 passenger cars—used in the transaction of official business by authorized hospital personnel; 2 ambulances—emergency calls and transportation of patients; 1 station wagon—for transportation of student employees on affiliation.
PUBLIC HEALTH SERVICE								
Control of venereal diseases, Public Health Service.	10	14,000	10	4,000	10,000	87		Assigned to public health representatives at rapid treatment centers, health departments, and laboratories, for prosecution of venereal disease control and research activities. For use by Public Health employees in connection with the mass X-ray program and field research studies. Official use by professional and technical personnel in carrying out the responsibilities of the Service in the field of general health, demonstrations, field training and consultative services.
Control of tuberculosis, Public Health Service.						11		
Assistance to States, general, Public Health Service.	14	19,600	14	5,600	14,000	94		
Control of communicable diseases, Public Health Service.	37	51,800	37	14,800	37,000	171		To provide transportation for technical, professional, and other personnel and material necessary to investigation and control of communicable diseases. For use of field personnel engaged in environmental health and sanitation activities.
Engineering, sanitation, and industrial hygiene, Public Health Service.	2	2,800			2,800	52		
Disease and sanitation investigations and control, Territory of Alaska, Public Health Service.	1	1,400			1,400	6		
Salaries and expenses, hospital construction services, Public Health Service.	1	1,400	1	400	1,000	18		Used by hospital consultants, architects, and engineers for consultation and inspection work incident to the construction of hospitals and health facilities, by hospital analysts and auditors in performing the financial responsibilities of the construction program. For use in the conduct of business by personnel at hospitals and out-patient clinics.
Hospitals and medical care, Public Health Service.	14	29,500	14	2,300	27,200	85		
Foreign quarantine service, Public Health Service.	10	14,000	5	1,000	13,000	71		
Operating expenses, National Institutes of Health, Public Health Service.	7	17,000	5	500	16,500	36		For use of officers and employees at the various Federal quarantine stations in connection with the inspection and fumigation of ships and airplanes arriving from foreign ports. For collecting scientific data and material and for transporting research personnel from points where public transportation is not adequately available.
Salaries, expenses, and grants, National Cancer Institute, Public Health Service.						10		
Mental health activities, Public Health Service.						4		
Salaries, expenses, and grants, National Heart Institute, Public Health Service.						14		For the use of research scientists, consultants, and other technical personnel as needed in conduct of cancer research programs. For collecting scientific data and material and for transporting research personnel from points where public transportation is not adequately available. For collecting scientific data and material and for transporting research scientists, heart-control consultants, and other technical personnel as needed in conduct of heart research, control, and demonstration programs.
Dental health activities, Public Health Service.	10	14,000	10	4,000	10,000	42		
Salaries and expenses, Public Health Service.	1	1,400	1	500	900	16		
Total, Public Health Service.	107	166,900	97	33,100	133,800	717		
SAINT ELIZABETHS HOSPITAL								
Salaries and expenses, Saint Elizabeths Hospital.						13		Vehicles used for transporting patients to and from court, to and from railroad, bus and air terminals, and to and from medical facilities at the hospital and in the District of Columbia; transporting social service workers; and transporting hospital officials to and from Government agencies in connection with official business.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1953—Continued

FEDERAL SECURITY AGENCY—Continued

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
SOCIAL SECURITY ADMINISTRATION								
Salaries and expenses, Bureau of Old-Age and Survivors Insurance, Social Security Administration.	3	\$4,800	1	\$200	\$4,600	4		One 16-passenger bus used as a shuttle for transportation of personnel, work materials and written communications between 4 of the Bureau's 6 widely scattered buildings in Baltimore. 1 station wagon used to supplement bus service. 2 passenger cars used for nonscheduled transportation of personnel on official business. 3 passenger cars needed for Puerto Rico because of poor communications and transportation, dispersion of the population, and the 25 percent excise tax on automobiles, make it essential that mainland employees transferred to Puerto Rico be furnished with means of transportation for use in itinerant service trips in connection with their official duties, instead of being required to supply their own cars.
OFFICE OF THE ADMINISTRATOR								
Salaries and expenses, Office of the Administrator.						6		To carry out the programs and execute the responsibilities of the Federal Security Agency. 1 car is provided for the use of the Administrator and 5 cars for staff members of his immediate office and all constituent organizations, excluding the Public Health Service.
Total, Federal Security Agency.	124	192,800	112	38,900	153,900	981		

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1953

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
PUBLIC HEALTH SERVICE								
Control of communicable diseases, Public Health Service.						3	\$8,100	To carry out technical development and epidemic control activities, including air dispersal of insecticides and larvicides.

PROPOSED FOR LATER TRANSMISSION

General aid for operating expenses, elementary and secondary schools (under proposed legislation, 1953).—Proposed legislation, for which \$300,000,000 is included in the 1953 budget, will provide Federal grants to the States to equalize the educational opportunities for elementary and secondary school children, chiefly by increasing the number of well-qualified teachers.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$300,000,000
Unliquidated obligations, end of year			10,000,000
Expenditures out of current authorizations			290,000,000

General assistance to college students (under proposed legislation, 1953).—Legislation is proposed to provide general assistance to talented young people of college age through a program of scholarships and loans to undergraduate students. The 1953 budget includes \$30,000,000 for initiating such a program.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$30,000,000
Expenditures out of current authorizations			30,000,000

Education of children on Federal property and in emergency and critical defense housing areas. (under proposed legislation, 1953).—The purpose of proposed amendments to Public Laws 815 and 874, 81st Congress, is to make available more adequate and flexible authority to provide school construction and operation aid in critical defense housing areas, as well as to make other improvements in these laws. It is anticipated that appropriations of \$80,000,000 will be needed in 1953 for these purposes, mainly for school construction aid in critical defense housing areas.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriations			\$80,000,000
Unliquidated obligations, end of year			45,000,000
Expenditures out of current authorizations			35,000,000

Salaries and expenses, Bureau of Old-Age and Survivors Insurance, Social Security Administration (trust account) (under existing legislation, 1952).—Public 234, Eighty-second Congress, enacted October 30, 1951, provides that all railroad workers with less than 10 years of railroad service since 1936 are to be covered under the Federal Old-Age and Survivors Insurance program. This will result in an increase in workloads in 1952 and subsequent years. A supplemental estimate of \$327,000 for 1952 is proposed for later submission.

Proposed expansion of the Federal Old-Age and Survivors Insurance program (trust account) (under proposed legislation, 1953).—Estimates have been included to cover proposed legislation which would increase the benefit payments under this program in 1953 by \$225,000,000 to help beneficiaries meet increased cost of living.

Grants to States for public assistance, Social Security Administration (under proposed legislation, 1953).—A total of \$100,000,000 is included for 1953 for proposed legislation to assist the States with lower economic resources to increase their payments to help recipients of public assistance to meet the increased cost of living.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$100,000,000
Expenditures out of current authorizations			100,000,000

Salaries and expenses, defense production activities, Federal Security Agency (under proposed legislation, 1953).—The budget includes a supplemental appropriation of \$1 million under proposed legislation to extend the Defense Production Act.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$1,000,000
Deduct unliquidated obligations, end of year			150,000
Expenditures out of current authorizations			850,000

Surplus property disposal, Office of the Administrator, Federal Security Agency (under existing legislation, 1952).—A supplemental estimate of \$48,000 is included for 1952 to enable the Federal Security Agency to carry out its surplus property disposal functions.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$48,000	
Unliquidated obligations, start of year			\$8,000
Obligations incurred during year		48,000	
Deduct unliquidated obligations, end of year		8,000	
Total expenditures		40,000	8,000
Expenditures are distributed as follows:			
Out of current authorizations		40,000	
Out of prior authorizations			8,000

Defense community facilities and services, Federal Security Agency (under existing legislation, 1952).—The proposed supplemental estimate for 1952 of \$25,750,000 will provide community facilities and services related to health and welfare in critical defense housing areas as well as the necessary salaries and expenses for administering this program.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$25,750,000	
Unliquidated obligations, start of year			\$15,000,000
Deduct unliquidated obligations, end of year		15,000,000	
Total expenditures		10,750,000	15,000,000
Expenditures are distributed as follows:			
Out of current authorizations		10,750,000	
Out of prior authorizations			15,000,000

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Administration serves as the Federal Government's general agency for the provision of office and related space, the supply of common-use commodities, the custody of archival materials, and the promotion of effective management of real property, personal property, and records. Regular program operations are grouped under three services. A fourth operating service has been established to provide procurement and custody of a stockpile of critical materials. Program operations are carried out in 10 field offices.

Basic operations of the Administration are provided for in a single appropriation for "Operating expenses." Special and emergency programs such as building construction, operation of supply warehouses, stockpiling critical materials, and provision of space for emergency agencies are supported in separate appropriations.

OPERATING EXPENSES

Operating Expenses, General Services Administration—

Operating expenses: For necessary expenses of the General Services Administration not otherwise provided for, including: Repair and improvement of public buildings and grounds (*including furnishings and equipment*) under the control of the General Services Administration; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; demolition of buildings; **[furnishings and equipment;]** acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; purchase of not to exceed **[two]** ten passenger motor vehicles for replacement only; not to exceed **[\$750]** \$1,200 for purchase of newspapers and periodicals; processing and determining net renegotiation rebates; **[liquidation of activities under the Act to promote the defense of the United States (55 Stat. 31);]** and preparation of guides and other finding aids to records of the Second World War; **[\$104,500,000]** \$128,000,000.

The foregoing appropriation shall not be available to effect the moving of Government agencies from the District of Columbia into buildings acquired to accomplish the dispersal of departmental functions of the executive establishment into areas outside of but accessible to the District of Columbia.

The foregoing appropriation shall be credited with (1) advances or reimbursements for salaries and administrative expenses chargeable against other appropriations of the General Services Administration, and such salaries and expenses may be paid from this appropriation; (2) cost of maintenance, upkeep, and repair included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (3) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from this appropriation; and (4) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase within the continental limits of the United States typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the six-month period immediately preceding such quarter: *Provided*, That the purchase, utilization, and disposal of typewriting machines shall be performed in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended **[(Public Laws 152 and 754, Eighty-first**

Congress)] **].** (*Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.*)

PROGRAM AND PERFORMANCE

Basic operations of the Administration are provided for by this appropriation. The appropriation request for 1953 of \$128,000,000 is an increase of \$14,891,000 over 1952, including the proposed supplemental. The increase is primarily the result of (1) inclusion of buildings management services previously performed for other agencies on a reimbursable basis; (2) buildings management services for newly constructed buildings; (3) establishment of additional records centers; (4) advancement from the planning stage to actual performance in the management of the Government's property and records.

1. *Buildings management.*—Management, operation, maintenance, and protection of 103,964,000 square feet of building space; repairs for 41,131,000 square feet of space in the District of Columbia; operation of joint-use communication services; and other related building services are provided by direct appropriation. Additional requirements over 1952 result from (1) 6,582,000 square feet

of space, most of which was previously leased and operated on a basis of reimbursement from other agencies; (2) full support of operations in certain Government-owned buildings, construction of which was completed during 1952; and (3) partial restoration of the previous level of services curtailed in 1952.

2. *National industrial reserve.*—In cooperation with the defense agencies, a reserve of Government-owned industrial plants, machine tools, and industrial equipment is maintained. During 1952 the reserve was reduced to 20 plants and about 6,500 tons of equipment; no further change is anticipated for 1953.

3. *Real property acquisition and utilization.*—General-purpose space is assigned and controlled; where necessary, space is acquired by lease. Sites acquired for future construction of Federal buildings are utilized and leased pending construction, real property is appraised, and real property management practices of Federal agencies are examined and improvements prescribed. Increased space utilization analyses and management surveys in 1953 covering 100,000,000 square feet are expected to produce savings of many times the cost.

4. *Surplus real property management and disposal.*—Real property found to be surplus to the needs of the Government is disposed of, and in the meantime is protected and maintained. Under long-term disposal contracts, mortgages are serviced and properties inspected. Some \$40 million a year is covered into the Treasury from this source.

5. *Buildings design and supervision.*—All programs involving design, construction, and remodeling of buildings are centrally supervised by a nucleus technical staff.

6. *Public utilities management.*—To obtain minimum economical utilities services, Government-wide use of public utilities services, equipment, and rates are studied; contracts are renewed or renegotiated; and the Government is represented before Federal and State regulatory bodies. Expansion for 1953 will reduce backlogs, and result in savings many times the additional expense.

7. *Supply management.*—Policies, regulations, procedures, and instructions for the management of personal property are developed and their application coordinated through on-site surveys of 60 civil agencies with major supply programs. Performance for 1953 contemplates a 2-year cycle of surveys instead of a 3-year cycle in 1952.

8. *Purchasing.*—Term contracts are established against which agencies can place orders for commodities and services of common use wherever it is not advantageous to furnish these through supply centers.

9. *Personal property utilization and disposal.*—Purchases by Federal agencies of commodities declared excess to the needs of other agencies are being obviated through interagency transfers. Property found to be of no use is declared surplus and its disposal is authorized. Due to technological obsolescence, shortage of storage space, and other causes, an increase in work of about 40 percent is expected over 1952.

10. *Commodity specifications.*—Satisfactory standards of quality and other characteristics of common-use commodities are established by developing standard specifications for mandatory use in the Federal supply system. Performance for 1953 will keep abreast of current requests for 450 new or revised specifications and provide a small reduction in the backlog of 1,205. Tire testing will be continued toward the establishment of standards which should result in savings of approximately \$14 million per year based on 1951 purchases of tires.

OPERATING EXPENSES—Continued

Operating Expenses, General Services Administration—Continued

11. *Commodity cataloging.*—The civil-agency portion of the Federal Catalog and, in collaboration with the Munitions Board, the portion covering items common to civil and military use are being developed.

12. *Commodity inspection.*—Delivery of commodities of unsatisfactory quality is prevented by lot and plant inspections, laboratory tests, and analysis of samples prior to acceptance. Inspections of personal property declared excess by other agencies are made to determine the exact nature and condition as a prerequisite to proper utilization.

13. *Traffic management.*—To achieve economies in transportation of property, services are rendered to civil agencies by supplying traffic data on rates, freight classifications, packaging, and consolidating shipments. For 1953 it is proposed to extend the service to field offices of the agencies in order to increase the coverage from 37 percent of the \$400,000,000 annual freight traffic to 52 percent, with potential annual savings of \$4.2 million compared with \$3 million in 1952.

14. *Records management.*—Assistance is given to Federal agencies in improving records management practices through on-site surveys; promulgation of Government-wide policies, regulations, procedures, and instructions, and technical advice.

15. *Records centers.*—Records of other agencies which must be retained but are not needed for regular current reference are brought into and retained in records centers until disposal. The first four of such centers were established in 1951. Three additional centers will be established during 1952. It is proposed for 1953 (a) to establish three more centers so that there will be one in each region to administer a total of 1,876,000 cubic feet of records; and (b) to operate a records center at St. Louis solely for personnel records of separated civilian employees.

16. *Microfilming.*—Records selected because their contents must be preserved but not necessarily in their original form are microfilmed and the originals destroyed.

17. *National Archives.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States.

18. *Federal Register.*—The daily issue of the Federal Register, the Code of Federal Regulations, the United States Government Organization Manual, the slip laws, and the United States Statutes at Large are published within fixed deadlines.

19. *Roosevelt Library.*—Manuscripts, books, pictures and other historical materials received from Franklin D. Roosevelt and his contemporaries are preserved, cataloged and serviced.

20–26. *Executive direction and staff operations.*

EMERGENCY OPERATING EXPENSES

Emergency Operating Expenses, General Services Administration—

For necessary emergency expenses of the General Services Administration not otherwise provided for, for operation, maintenance, protection, repair, alterations, and improvements of public buildings and grounds (including furnishings and equipment) to the extent that such buildings and grounds are under the control of the General Services Administration for such purposes as are provided for in Public Law 152, Eighty-first Congress, as amended; rental of buildings or parts thereof in the District of Columbia and elsewhere, including repairs, alterations, and improvements necessary for proper use by the Government without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a); restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; [furnishings and equipment; protection of vital records;] and payment of per diem employees employed in connection with any of the foregoing functions at rates approved by the Administrator of General Services or his designee, not exceeding current rates for similar services in

places where such services are employed; **[\$31,500,000] \$27,845,000:** *Provided, That* of this amount, such sums as may be determined by the General Services Administrator to be necessary may be paid into other appropriations of the General Services Administration only for purposes of accounting; *Provided further, That* no part of this appropriation shall be available to effect the moving of Government agencies from the District of Columbia to accomplish the dispersal of departmental functions.

For an additional amount for "Emergency operating expenses", \$9,250,000; and appropriations granted under this head for the fiscal year 1952 shall be available to enable the General Services Administration to carry out its functions arising out of the Defense Production Act of 1950, as amended. **](Supplemental Appropriation Act, 1952.)**

8. Defense production coordination	92,710		
Total obligations	20,674,231	40,585,000	27,845,000

PROGRAM AND PERFORMANCE

Increases in basic operations, above those regularly covered by "Operating expenses," arise out of the defense program, including (a) management of general-purpose space and related services for the expansion of the Department of Defense and defense production agencies, and (b) certain emergency operations performed by the Administration in carrying out the Defense Production Act of 1950. This appropriation is presented for the first time in the annual act in 1953. However, due to the expiration on June 30, 1952, of the Defense Production Act, no provision is made for functions under that act during 1953. Funds for these functions—\$8,800,000—will be requested as a supplemental appropriation upon approval of defense production legislation for 1953.

The program for 1953 for which funds are here requested is a continuation through that year of the space to be provided as of June 30, 1952, for expansion of the Department of Defense and related agencies. However, it will be necessary to augment current funds for 1952 by proposed supplemental appropriations for presently contemplated expansions in employment of defense agencies—\$4,200,000—and for defense production agencies—\$2,200,000—during 1952.

1. *Buildings management.*—Management, operation, maintenance, protection, and related services for 15,826,-

000 square feet of space to accommodate 156,230 employees is contemplated as of June 30, 1952. The request for 1953 provides for only 12,037,000 square feet of space to accommodate 122,114 employees of the Department of Defense and related agencies. Provision for the remainder will be requested upon approval of defense production legislation for 1953.

2. *Space acquisition and utilization.*—General-purpose space required for these purposes is acquired and assigned and its utilization is controlled.

4 and 5. *Claimant agency and Federal Register functions.*—These are activities under the Defense Production Act. Provision for 1953 will be included in a supplemental appropriation upon approval of defense production legislation for that year.

7. *Staff operations.*

PROGRAM AND PERFORMANCE

Normal minor repairs costing less than \$25,000 each, are made to structures, grounds, and equipment of 5,441 Federal buildings outside the District of Columbia which were acquired at a cost of approximately \$1,000,000,000 and contain 102,500,000 gross square feet of floor space. For 1953 it is proposed to restore this program to the minimum necessary to preserve the Government's capital investment in the buildings.

PROGRAM AND PERFORMANCE

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Revenue Act of 1943 and the Renegotiation Act of 1951. The total program is estimated at some 3,900 claims with estimated payments of \$44,800,000. Funds already made available leave some \$17,600,000 to be appropriated, of which \$9,300,000 is requested for 1953.

PROGRAM AND PERFORMANCE

Operation of the Nation-wide supply system of sales at cost to agencies from stores and for direct delivery of common-use commodities and services, the procurement of which is initially financed by the general supply fund is provided. The volume of business for 1953 is estimated at \$255,279,000 in sales at cost, compared with \$180,752,000 in 1952 and \$107,950,266 in 1951. While the

EXPENSES, GENERAL SUPPLY FUND—Continued**Expenses, General Supply Fund, General Services Administration—Continued**

sales increase 41.2 percent in 1953 over 1952, operating costs increase a smaller percentage due to increased volume and operating improvements. Savings through volume purchasing and consolidated warehousing are estimated at \$16,500,000 in 1952 and \$27,700,000 in 1953.

1. *Purchasing.*—Commodities are procured for replenishment of store stocks and for direct delivery to agencies on a decentralized basis to increase participation of local and small-business firms, to reduce transportation costs, and to expedite deliveries. For 1953 it is estimated that orders will increase by 78 percent over 1952 to maintain adequate inventory levels. Direct-delivery orders are estimated to increase 23.7 percent.

2. *Stores operations.*—Stocks of common-use commodities are received, stored, and sold at cost to agencies through a Nation-wide decentralized system of supply centers. While the increase in volume of stores sales for 1953 over 1952 is estimated at 65.8 percent, operating costs increase only 34.5 percent.

3. *Equipment management and maintenance.*—Government-wide policies, regulations, and procedures are developed covering the management, conservation, and utilization of personal property, and particularly motor and other equipment. Equipment pools and maintenance facilities operated under the general supply fund are supervised.

4. *Commodity inspection.*—Protection against acquisition of unsatisfactory quality is attained by inspections at contractors' plants, laboratory tests, and analyses of samples prior to acceptance. Compared to a 78 percent increase in 1953 purchases, the cost of inspection increases only 37.9 percent.

5. *Space and related costs.*—It has been necessary for the expanded supply system to lease additional space. As the expense of leasing and maintaining space was minor prior to 1952, it is set apart to avoid distorting comparisons of operating costs, as are nonrecurring expenses of alterations, improvements, and moving of stocks and equipment in connection with new space.

6. *Staff operations.*—Compared to an increase of 41.2 percent in sales over 1952, the cost of staff operations for 1953 increases only 14.7 percent.

PROGRAM AND PERFORMANCE

Under a total authorization of \$40,000,000 sites are acquired and drawings and specifications prepared for future construction of public buildings projects.

As a result of the international situation, the program is now limited to acquisition of sites and design of defense-connected projects and those needed to meet critical civilian requirements.

Acquisition of 415 sites was authorized under the original program. As of June 30, 1951, 17 sites had been acquired and commitments made for 79 additional sites. The revised program contemplates (1) acquisition of 7 additional sites in fiscal 1952 and 2 in fiscal year 1953, leaving 310 sites for future consideration, and (2) completion of design of 16 high-priority projects, leaving 444 for future determination.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Purpose and financial organization.—Purchase of materials and services required by the various Federal agencies and the District of Columbia, through a Nation-wide system of supply centers, is initially financed by the General Supply Fund. The fund is charged with payments made for services and materials purchased and is reimbursed on a sales-at-cost basis with payments received from the various agencies to which the services and materials are sold (41 U. S. C. 7a-c). Expenses for operating the fund are provided for under the appropriation "Expenses, General Supply Fund."

Analysis of budget program.—The estimates for 1952 and 1953 provide for a progressive increase in the use of the supply centers, particularly by the military establishments. The actual cost of goods and services sold for 1951, and estimates for 1952 and 1953 follow:

Fiscal year	Stores issues	Direct delivery	Repair shops	Total
1951 actual.....	\$44,800,000	\$63,017,810	\$132,456	\$107,950,266
1952 estimated.....	95,200,000	85,300,000	252,000	180,752,000
1953 estimated.....	157,800,000	97,100,000	379,000	255,279,000

Financing operations.—During 1951 the total capital appropriated to the fund increased from \$10,000,000 to \$44,000,000 to provide for more adequate stocks of common-use items required by the agencies.

Operating results and retained earnings.—Any surplus as determined by General Accounting Office audit is returned to the Treasury as miscellaneous receipts.

¹ Included in obligation schedules under "Expenses, general supply fund, General Services Administration" for purposes of comparability. This amount excludes unliquidated obligations of \$1,302,087.

Construction Services, Public Buildings, General Services Administration—

PROGRAM AND PERFORMANCE

Purpose and financial organization.—Personal services and incidental expenses of employees engaged in the prosecution of construction and related projects for the Federal Government are financed through reimbursement from funds appropriated, transferred or advanced to the General Services Administration (60 Stat. 257).

Analysis of budget program.—Work performed includes the acquisition of Federal building sites, preparation of drawings and specifications for the construction, remodeling, renovation, repair, and improvement of buildings, and the supervision of construction activities.

The number of employees required is governed by the prevailing workload.

Operating results and retained earnings.—The surplus of \$225,624 as of June 30, 1951, will be eliminated by reduced charges to individual projects and programs. Subsequent adjustments will hold reimbursements as close as possible to actual expenses.

Working Capital Fund, General Services Administration—

PROGRAM AND PERFORMANCE

A central blueprinting, photostating, duplicating, and distribution service is financed by a working capital fund pending reimbursements (59 Stat. 115). Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1951, a total of \$17,874 had been deposited, and it is estimated that \$4,213 and \$3,640 will be deposited in 1952 and 1953, respectively.

A. Statement of sources and application of funds

[For fiscal years ending June 30, 1951, 1952, and 1953]

	1951 actual	1952 estimate	1953 estimate
FUNDS APPLIED			
To operations: Acquisition of assets.....	\$9,995	\$24,000	\$24,000
Expenses:			
Purchase of goods.....	166,488	175,000	180,000
Operating expenses.....	534,199	620,600	616,000
Total funds applied to expenses.....	700,687	795,600	796,000
Subtotal.....	710,682	819,600	820,000
Increase in selected working capital items.....		52,314

REDUCTION IN CONTRACT AUTHORIZATIONS

Contract authorizations available to the General Services Administration under the headings hereinafter set forth are hereby reduced in the following amounts:

"Construction of public buildings outside the District of Columbia", \$29,500,000.

"Federal Courts Building, District of Columbia", \$3,875,000.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1953

GENERAL SERVICES ADMINISTRATION

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Operating expenses, General Services Administration.	10	\$14, 000	10	\$2, 200	\$11, 800			For use in the transaction of official business by officials and appropriate employees of the General Services Administration in connection with: acquisition, construction, management, and disposal of real property; procurement and supply of personal property; and records management. For use in facilitating the function of materials inspection in inaccessible locations, such as storage depots, manufacturing plants and mines. For use in performance of General Services Administration functions.
General supply fund, General Services Administration.	10	14, 000			14, 000			
Strategic and critical materials, General Services Administration.	5	7, 000	5	1, 100	5, 900			
General Services Administration inventory.						203		
Total, General Services Administration.	25	35, 000	15	3, 300	31, 700	203		

PROPOSED FOR LATER TRANSMISSION

Emergency operating expenses (under existing legislation, 1952, and proposed, 1953).—A supplemental appropriation of \$6.4 million for 1952 is proposed for rent, rehabilitation, and operation of office space in connection with the defense program. A supplemental appropriation of \$8.8 million is proposed for 1953 under legislation to extend the Defense Production Act.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$6,400,000	
Unliquidated obligations, start of year			\$5,400,000
Unliquidated obligations, end of year		5,400,000	600,000
Total expenditures		1,000,000	4,800,000
Expenditures are distributed as follows:			
Out of current authorizations		1,000,000	
Out of prior authorizations			4,800,000

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$8,800,000
Unliquidated obligations, end of year			800,000
Expenditures out of current authorizations			8,000,000

Dispersal of Government activities (under proposed legislation, 1953).—Pending legislation would authorize the construction of a limited number of Federal buildings in

areas adjacent to the National Capital, and construction of a circumferential highway outside the District of Columbia. The total estimated cost is \$49,250,000. The Budget proposes a supplemental appropriation of \$15,000,000 for 1953 to begin the program.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation			\$15,000,000
Unliquidated obligations, end of year			10,000,000
Expenditures out of current authorizations			5,000,000

Federal Supply and Records Building (under existing legislation, 1952).—A supplemental appropriation of \$4.1 million for 1952 is proposed to replace facilities destroyed by the flood at Kansas City.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation		\$4,100,000	
Unliquidated obligations, start of year			\$3,800,000
Unliquidated obligations, end of year		3,800,000	
Total expenditures		300,000	3,800,000
Expenditures are distributed as follows:			
Out of current authorizations		300,000	
Out of prior authorizations			3,800,000

HOUSING AND HOME FINANCE AGENCY

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Housing and Home Finance Agency administers the major housing activities of the Federal Government through (1) the Office of the Administrator, including the Federal National Mortgage Association; (2) the Home Loan Bank Board, including the Federal Savings and Loan Insurance Corporation; (3) the Federal Housing Administration; and (4) the Public Housing Administration.

The Administrator is responsible for carrying out the Defense Housing and Community Facilities and Services Act of 1951 for the provision of housing and certain community facilities in critical defense housing areas. The Administrator is also responsible under the Defense Production Act of 1950 and delegations made pursuant thereto for activities relating to credit and materials controls in the housing field.

Salaries and expenses of the Office of the Administrator (except for the Federal National Mortgage Association and the prefabricated housing loans program), salaries and expenses for the United States Housing Act program of the Public Housing Administration, and annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects, are financed from appropriations. All other activities are financed from corporate or other funds available from operations of the Agency.

OFFICE OF THE ADMINISTRATOR

Salaries and Expenses, Office of the Administrator, Housing and Home Finance Agency—

Salaries and expenses: For necessary expenses of the Office of the Administrator, including rent in the District of Columbia; [purchase of one passenger motor vehicle, for replacement only;] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); expenses of attendance at meetings of organizations concerned with the work of the agency; and transportation expenses and not to exceed \$25 per diem in lieu of subsistence, as authorized by section 5 of the Act of August 2, 1946 (5 U. S. C. 73b-2), for persons serving without compensation as members of any advisory committee established pursuant to Title VI of the Housing Act of 1949; [\$3,010,000] \$6,250,000: *Provided*, That necessary expenses of inspections and of providing representatives at the site of projects being undertaken by local public agencies pursuant to title I of the Housing Act of 1949 and of projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made, but such nonadministrative expenses shall not exceed \$374,000. (5 U. S. C. 133y; 12 U. S. C. 1701e and 1701f; 42 U. S. C. 1451; 48 U. S. C. 484, 64 Stat. 77; 40 U. S. C. 451; 50 App. U. S. C. 1671; 5 U. S. C. 133z; Act of September 1, 1951 (Public Law 139); Independent Offices Appropriation Act, 1952.)

Appropriated 1952, \$3,010,000 Estimate 1953, a \$6,250,000

a Includes \$2,430,200 for activities previously carried under appropriations as follows:
 "Advance planning of non-Federal public works" \$630,200
 "Salaries and expenses, defense housing and community facilities and services" 1,800,000
 The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

Total obligations	5,471,367	5,377,400	6,655,000

PROGRAM AND PERFORMANCE

The Office of the Administrator supervises and coordinates the housing programs and functions of the constituent units of the Agency and exercises direct responsibility for slum clearance and urban redevelopment; housing research; programming of defense housing and community facilities; loans for Alaska housing, prefabricated housing (including loans to maintain the productive capacity of the prefabricated housing industry to meet special defense needs), and college housing; advances for planning non-Federal public works; maintenance and disposal of Lanham Act public works; provision of housing and certain community facilities in critical defense housing areas by providing financial aids to private builders and, under certain limited conditions, providing such housing and facilities by direct Federal construction; acquisition and development of isolated defense sites; credit restrictions on new housing construction and claimant agency functions for housing; and secondary mortgage market activities of the Federal National Mortgage Association. The Administrator is also responsible for the management and disposition of public financed war and veterans housing constructed under the Lanham and related acts, operating responsibility for which has been delegated to the Public Housing Commissioner.

The total appropriation requested is \$6,250,000. This represents an increase of \$1,252,000 compared with the amount available for 1952, including proposed supplemental appropriations. The increase results primarily from expanded activities in connection with defense housing and community facilities; and further progress in the program of slum clearance and urban redevelopment. The expansion of these activities offsets decreases in liquidating functions, such as the advance planning programs and the disposition of war public works.

1. *Agency-wide program supervision and coordination.*—Provision is made for general supervision and coordination of the Agency's programs and activities, and for staff assistance and services to the National Housing Council chaired by the Administrator.

2. *Housing research program.*—Research is conducted in five major areas: (1) capital cost of housing; (2) building codes and regulations; (3) residential design and construction practices; (4) housing credit and finance; and (5) market analysis and statistics. The program has been redirected for the emergency period to serve the defense effort. Technical research looks to conservation of critical materials and manpower and to the development of housing standards and types to meet special defense needs, such as demountable and portable shelter units. Economic, financial, and statistical studies are directed toward determination of housing requirements in the defense effort and the administration of the defense production programs, including credit and materials controls.

3. *Public works advance planning.*—Under the first and second planning programs, interest-free repayable advances were made for financing the cost of surveys, engineering investigations and plans preliminary to the construction of local public works. Authority to make new advances has expired for both programs. Workloads involved in liquidation consist of completion or cancellation of approved project applications, and collection of advances outstanding on projects put under construction by local communities.

4. *Programming of defense housing and community facilities.*—Information is gathered on defense housing and community facilities needs in defense localities. If a locality is designated as a critical defense housing area, financial aids to private enterprise are used to stimulate production of defense housing, and public construction may be authorized where private enterprise cannot fully meet the defense need. Similarly, loans and grants may be made to aid in production of community facilities, and direct construction may be authorized where these methods are not adequate to secure the facilities.

5, 6, 7, 8, and 9.—For detail of activities for slum clearance and urban redevelopment, Alaska housing, housing loans to educational institutions, maintenance and disposition of project properties, and loans for prefabricated housing, see business enterprise and revolving funds.

DEFENSE COMMUNITY FACILITIES AND SERVICES

Defense Community Facilities and Services, Office of the Administrator, Housing and Home Finance Agency—

During the current fiscal year not to exceed \$225,000 of the appropriation granted under this head in the Second Supplemental Appropriation Act, 1952, shall be available for administrative expenses in connection with the construction of facilities under such appropriation.

For the provision of defense community facilities and services, including loans and grants therefor, in accordance with title III of the Defense Housing and Community Facilities and Services Act of 1951, including administrative expenses (not exceeding \$105,000) in connection with the construction of such facilities, \$11,250,000, to remain available until expended: *Provided*, That necessary expenses of inspections and of providing representatives at the site of projects being constructed pursuant to said title III from any appropriations or funds available for such construction shall be considered nonadministrative, and in the case of projects financed through loans to public or nonprofit agencies shall be compensated by such agencies by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and amounts so recovered shall be credited to the appropriations or funds against which such expenses were charged.] (Second Supplemental Appropriation Act, 1952.)

PROVISION OF DEFENSE HOUSING**NOTE**

Funds for this purpose are appropriated to the Administrator, who determines the number, types, and location of units to be provided, and advances funds to the Public Housing Administration as projects are assigned for construction. Appropriation language and related schedules will be found in the budget presentation for the Public Housing Administration, under the activity title, "Public war housing program." Supplemental appropriations of \$25 million for 1952 and \$300 million for 1953 are proposed for later submission.

Advance Planning of Non-Federal Public Works, Office of the Administrator, Housing and Home Finance Agency

【Advance planning of non-Federal public works: For carrying out the provisions of the Act of October 13, 1949 (Public Law 352), relating to the advance planning of public works, to remain available until expended, for administrative expenses, including those necessary for the liquidation of activities under title V of the War Mobilization and Reconversion Act of 1944, \$550,000: *Provided*, That \$13,100,000 of the aggregate amount of authorizations to enter into contracts heretofore granted under this head is hereby rescinded.】 (5 U. S. C. 133z; *Independent Offices Appropriation Act, 1952*.)

Appropriated 1952, \$550,000

NOTE.—Estimate of \$630,200 for activities previously carried under this title has been transferred in the estimates to "Salaries and expenses, Office of the Administrator, Housing and Home Finance Agency." The amounts obligated in 1951 and 1952 are shown in the schedule at comparative transfers.

PURPOSE AND FINANCIAL ORGANIZATION

The Association was authorized under title III of the National Housing Act to provide a secondary mortgage market for Federal Housing Administration insured mortgages. The scope of its operation was expanded to include Veterans Administration guaranteed mortgages by Public Law 864, Eightieth Congress. Public Laws 52 and 211, Eighty-first Congress, further expanded the activities of the Association and Public Laws 139 and 243, Eighty-second Congress, required the Association to (1) make advance commitments, not exceeding \$200 million outstanding at any one time, for purchase of mortgages covering programed critical defense area housing, military (Wherry Act) housing, and housing for victims of a major disaster; and (2) to make advance commitments, not exceeding \$30 million outstanding at any one time, to purchase cooperative housing mortgages insured pursuant to section 213 of the National Housing Act.

The Housing and Home Finance Administrator holds the Association's \$21 million capitalization and may borrow from the Treasury up to \$2.75 billion for the purchase of mortgages. The Administrator has issued notes to the Treasury to cover the \$21 million capital stock and paid-in surplus so that the interest-bearing investment of the Government was increased for that purpose by \$21 million (see statement C), during fiscal year 1951.

ANALYSIS OF BUDGET PROGRAM

It is estimated that purchases of mortgages will amount to \$790 million during fiscal year 1952 and that credit restrictions, scarcity of building materials, and fewer authorized building starts will limit purchases for fiscal year 1953 to approximately \$693.9 million.

A special program will be undertaken for the disposal of the Association's mortgage portfolio, and in view of the expected improvement in the mortgage investment market sales for fiscal year 1953 are estimated to be \$513.4 million compared with an estimated \$150 million in fiscal year 1952.

Administrative expenses.—These expenses are expected to rise from an estimated \$3,822,000 in fiscal year 1952 to \$4,291,000 in fiscal year 1953. The principal factors which contribute to the increase are (1) the administration of the program for critical defense area housing, military (Wherry Act) housing, and housing for victims of a major disaster; (2) the maintenance of an exceptionally large mortgage portfolio which averages 18 percent more in fiscal year 1953 than the average portfolio for fiscal year

OFFICE OF THE ADMINISTRATOR—Continued**FEDERAL NATIONAL MORTGAGE ASSOCIATION—Con.****Federal National Mortgage Association, Housing and Home Finance Agency—Continued**

1952; (3) the increased emphasis on the sales of mortgages to private investors; and (4) maintaining relatively the same high level of mortgage purchases.

FINANCING OPERATIONS

Funds amounting to \$1,127,718,313 with which to pay the Reconstruction Finance Corporation for assets transferred by the Corporation to the Housing and Home Finance Administrator were borrowed from the United States Treasury in fiscal year 1951. Borrowings from the United States Treasury to finance mortgage purchase operations in 1953 are estimated at \$134,642,065 compared to \$572,230,000 in 1952 and \$432,224,000 in 1951. Repayment of borrowings to the United States Treasury which in 1951 totaled \$10,939,198 are estimated at \$45,000,000 in 1953. No repayments are contemplated in 1952. In 1952 a dividend payment of \$29 million was made to the United States Treasury and it is anticipated that an additional payment of \$25 million will be made in 1953.

OPERATING RESULTS AND RETAINED EARNINGS

Net income from operations are estimated at \$32,617,500 in 1953 compared with \$27,873,374 in 1952 and \$22,135,346

in 1951. In view of the current and anticipated high volume of operations, the Board of Directors in 1952 established a reserve for contingencies in the amount of \$5 million. After allowing for dividend payments to the United States Treasury, retained earnings are estimated at \$40,562,078 as of June 30, 1953, compared to \$32,944,578 and \$34,031,204 as of June 30, 1952 and 1951, respectively.

FINANCIAL CONDITION

Increased mortgage purchase activities, particularly with regard to military housing and housing in critical defense areas, result in loans receivable, consisting of Federal Housing Administration insured and Veterans Administration guaranteed mortgages, estimated at \$2,252,742,737 as of June 30, 1953, compared with \$2,152,278,737 in 1952 and \$1,578,878,737 in 1951. Total investment of the United States Government is expected to increase from \$1,583,034,319 in 1951 to \$2,154,177,693 in 1952 and to \$2,251,437,258 in 1953. Undisbursed commitments to purchase mortgages which amounted to \$53,864,102 in 1951 are estimated at \$150 million in 1952 and \$50 million in 1953.

MORTGAGE PURCHASE AUTHORITY

Existing mortgage purchase authority of \$2.75 billion is considered adequate to meet anticipated operations. The unused purchase authority is estimated at \$447,257,263 as of June 30, 1953, compared to \$447,721,263 in 1952 and \$1,117,257,161 in 1951 (see schedule C-1).

PURPOSE AND FINANCIAL ORGANIZATION

Section 102 of the Housing Act of 1948 authorized loans to business enterprises for the production of prefabricated housing components or for large-scale site development. Public Law 139, Eighty-second Congress, added authority to make loans and commitments, up to \$15 million outstanding at any one time, to preserve the productive capacity of existing prefabricators to meet special types of defense housing needs, such as mobile or portable housing. Funds for these loans are provided by borrowings from the Treasury.

ANALYSIS OF BUDGET PROGRAMS

The financial program contemplates some \$31.3 million in loan disbursements for 1953 as compared with \$19 million for the current year. The increase is entirely due to activity forecast under the new defense-connected program, disbursements in connection with old loans being expected to decline as they are retired during the period.

Administrative expenses.—Administrative expenses are estimated at \$243,000 for 1952 and \$268,000 for fiscal year 1953.

FINANCING OPERATIONS

The financial program as outlined in statement A reflects \$6 million in repayment of borrowings to the Treasury. Total borrowing authority, increased by \$15 million during the current year by Public Law 139, is estimated at \$61.7 million in 1953 as compared with \$47.1 million in 1951. Only \$25.7 million in charges against this authority are projected, however, and of this amount, \$15 million relates to the new program. Thus, lack of activity and repayment of outstanding loans combine to produce an estimated \$34.3 million in unused lending authority, almost entirely related to the old authorization.

OPERATING RESULTS AND RETAINED EARNINGS

While the budget program looks to a small increase in retained earnings after reserves for losses, it should be pointed out that the forecasts of repayments and earnings with respect to the old and new programs are quite different. It is believed that loans originated since the transfer of the program will repay on schedule. However, statement B reflects more than \$3 million in losses on old loans as charged off in each of the years 1952 and 1953, exhausting most of the reserves for losses established at the time of transfer.

FINANCIAL CONDITION

The statement of financial condition reflects a growing spread between indebtedness to the Treasury and loans receivable, resulting largely from losses realized on loans now in difficulty. Thus in 1953 it is estimated that notes held by the Treasury will amount to \$30.7 million, as against some \$23.2 million in loans receivable on the books. Losses will be charged against loss reserves established at the time of transfer, as reflected in statement C. However, it is considered premature to make any recommendation at this time for action with respect to the prospective deficit.

LOANS FOR PREFABRICATED HOUSING—A. *Statement of sources and application of funds*

[For fiscal years ending June 30, 1951, 1952, and 1953]

	1951 actual	1952 estimate	1953 estimate
