Loan repayments.....	\$47	\$976	\$5,163
Uncommitted balance of loan fund.....	\$4,708	\$125	\$63

PURPOSE AND FINANCIAL ORGANIZATION

The Alaska Housing Act of 1949 promotes the settlement and development of Alaska by (1) liberalizing the mortgage insurance provisions of the National Housing Act; (2) extending the powers of the Federal National Mortgage Association to facilitate further participation of private capital; and (3) authorizing a \$15 million revolving fund for use when adequate private capital is not available for construction of housing. Public Law 343 (approved Oct. 10, 1949) appropriated \$10 million to the revolving fund. The Supplemental Appropriation Act, 1952, appropriated an additional \$3,875,000. Appropriation of the remaining \$1,125,000, essential to prevent delays in the program, is to be requested as a supplemental appropriation during the current fiscal year.

ANALYSIS OF BUDGET PROGRAM

The revolving fund is used to purchase obligations of the Alaska Housing Authority for supporting specific construction projects by (1) loans to private builders; (2) direct construction by the Authority where no private sponsor can be obtained; and (3) character loans of not more than \$500 each for the improvement of native dwellings in remote areas of the Territory. Loan commitments are as follows:

[Dollars in thousands]

	1951 actual		1952 estimated		1953 estimated	
	Units	Amount	Units	Amount	Units	Amount
First-mortgage loans (with construction advances).....	100	\$1,096	543	\$7,924	355	\$4,975
Alaska Housing Authority direct contract construction.....	35	498	32	486		
Second-mortgage loans.....		14	258	781		
Character loans.....	438	193	568	250	568	250

First-mortgage loans are chiefly to provide construction financing for single-family homes. Such housing is eligible for Federal Housing Administration insurance, and insured loans will be taken over by private financial institutions or by the Federal National Mortgage Association. The Alaska Housing Authority awards contracts for construction of homes in a few small localities where no private sponsors can be found. Second mortgages are made where the considerable rise in construction costs prevents completion of projects started under pre-Korean commitments.

The size of the character-loan program tends to be limited by the problems involved in transporting materials and providing practical supervisory assistance to natives improving their dwellings in scattered remote areas.

Administrative expenses.—Administrative expenses of the Office of the Administrator in supervising the program and extending aid to the Alaska Housing Authority, estimated at \$99,100 in fiscal year 1953, are provided by appropriation and shown only by footnotes in the statements for the revolving fund.

FINANCING OPERATIONS

The amount of loans that can be made under this program is controlled by the total appropriations to the

revolving fund and the repayments to the fund as projects are completed and permanent loans are sold. The appropriation of \$3,875,000 by Public Law 254, was essential to permit a satisfactory level of loan commitments in the current fiscal year. The estimated \$5.2 million in loan repayments will be the principal source of funds in the 1953 fiscal year.

OPERATING RESULTS AND RETAINED EARNINGS

Interest on loans constitutes the only source of income. No net income is to be recognized until a \$300,000 reserve for losses has been established. By the end of fiscal year 1953 the reserve will reach this amount and a surplus of \$152,461 will be created. Confirmation of these estimates by actual operations will lead to the declaration of a dividend to the Treasury.

PROGRAM AND PERFORMANCE

Title IV of the Defense Housing and Community Facilities and Services Act of 1951 (Public Law 139) authorizes the Administrator (upon certain findings by the President) to acquire, make plans for, and dispose of land necessary to the development of isolated sites needed for defense purposes to avoid or minimize land speculation. The Second Supplemental Appropriation Act, 1952 (Public Law 254) appropriated \$6,250,000 to establish a revolving fund in the Treasury to carry out the provisions of title IV. The budget projects no obligations or expenditures for this activity, since at the present time there is no active project and there is no way of knowing when the military or defense mobilization needs may require the special procedures and powers provided by the legislation. Interest is payable to the Treasury only to the extent that funds are actually drawn from the revolving fund for use.

Units placed under construction.....		7,200	10,300

PURPOSE AND FINANCIAL ORGANIZATION

Under title IV of the Housing Act of 1950, the Administrator makes long-term low-interest loans to certain types of institutions of higher learning as an aid in providing housing for their students and faculties by new construc-

tion or conversion of existing structures. For this purpose he may issue and have outstanding notes and obligations for purchase by the Secretary of the Treasury in an amount not to exceed \$300,000,000. In view of defense needs, support is confined to defense-related college housing.

ANALYSIS OF BUDGET PROGRAM

The program planned is presently limited to \$60 million in loans, to provide for some 17,500 units in 72 projects, estimated as 90 percent dormitory units and 10 percent family dwelling units. Under the Act, the Office of Education assists by reviewing applications as to eligibility, and with respect to need in terms of single and married students and faculty.

Administrative expenses.—The estimated \$214,200 for administrative expenses required in 1953 is included in the consolidated appropriation estimates for the Office of the Administrator. Site inspection and audit costs will be met by payment of fixed fees from construction loan funds.

FINANCING OPERATIONS

Treasury borrowings, roughly approximating loan disbursements, are projected at \$32 million in the 1953 fiscal year. Under current plans, total loan commitments and the maximum eventual borrowings will reach about \$60 million by June 30, 1953, leaving an unused borrowing authorization of \$241 million.

OPERATING RESULTS AND RETAINED EARNINGS

The net margin of some three-quarters percent between the interest paid to the Treasury and that charged to the educational institutions is expected to produce cumulative earnings of about \$130,000 by the end of fiscal 1953, excluding appropriations for administrative expenses. Dividends to the Treasury, which it is believed will permit accomplishment of the program without eventual cost to the Government, will be declared as actual earnings permit.

MAINTENANCE, ETC., DEFENSE PUBLIC WORKS

Maintenance, Etc., Defense Public Works, Office of the Administrator, Housing and Home Finance Agency—

PROGRAM AND PERFORMANCE

This activity relates to operation and disposition of the residual public works projects provided by direct Federal construction under the Lanham Act. Expenses are met from proceeds of operations and sales or rentals. The

budget program contemplates disposition of the last of these properties before the end of fiscal year 1953.

PURPOSE AND FINANCIAL ORGANIZATION

Title I of the Housing Act of 1949 provides for a program of slum clearance and community development and redevelopment. The act contains a borrowing authorization of \$1 billion to finance advances of funds for the planning of local projects, temporary loans for the acquisition and clearance of land and preparation for re-use purposes, and long-term loans to refinance the local investment in portions of projects which are disposed of by lease. Title I also authorizes \$500 million in capital grants to defray up to two-thirds of net project costs.

OFFICE OF THE ADMINISTRATOR—Continued

SLUM CLEARANCE AND URBAN REDEVELOPMENT—Con.

Slum Clearance and Urban Redevelopment Program—Continued

ANALYSIS OF BUDGET PROGRAM

Planning advances are expected to total \$5.6 million in the current fiscal year, and decline to \$4.5 million in the budget year. As an increasing number of projects receive local and Federal approval, commitments for temporary loans are estimated to increase from \$47.5 million in fiscal 1952 to \$100.1 million in the 1953 fiscal year. Grant commitments of \$45.1 million and \$48.1 million are projected for the two respective years, but the time required for land acquisition, redevelopment and disposal is expected to delay payments under such commitments until fiscal 1954.

Administrative expenses.—Administrative expenses estimated at \$1,910,000 are included in the estimate of expenses for the Office of the Administrator.

FINANCING OPERATIONS

Borrowings from the Treasury to finance loan operations are sharply reduced by reliance on financing through bond issues of local governments backed by Federal loan commitments. It is assumed that 70 percent of the project costs will be so financed, holding total borrowings to \$9 million in the current year and \$25 million in fiscal 1953.

OPERATING RESULTS AND RETAINED EARNINGS

Net income to the program results solely from the interest differential on Federal loans. To allow for possible losses on planning advances, which under the Act are secured only by funds for carrying out planned projects, no net income is being recognized until a reserve of \$200,000 has been established. This point is expected to be reached and a small surplus created before the end of fiscal 1953. After actual experience with a complete cycle of redevelopment operations, any surplus in excess of probable need will be turned over to the Treasury.

PURPOSE AND FINANCIAL ORGANIZATION

The three-member Board supervises the Federal home-loan bank system, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation. Net administrative expenses of the Home Loan Bank Board are paid from assessments against the 11 Federal home-loan banks, the Examining Division, and the Federal Savings and Loan Insurance Corporation.

ANALYSIS OF BUDGET PROGRAMS

The Board's budget is based on six activities.

1. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of some staff services that are common to the Board and the insurance corporation.

2. *Examination and supervision of Federal home-loan banks.*—The Board supervises and examines the operations of the Federal home-loan banks. Expenses are met from assessments upon the banks.

3. *Supervision of Federal and State-chartered insured institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on cooperatively under arrangements made with the respective State authorities.

4. *Chartering of Federal savings and loan associations and branches thereof.*—Federal savings and loan associations are chartered and regulated. In the case of new organizations, the Board satisfies itself that proper standards are met before approving the charter. In addition, applications of State-chartered associations for conversion into Federal savings and loan associations are examined.

5. *Examination of savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home-loan bank system as are not examined by State examiners.

Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

At the beginning of the fiscal year 1952 there were 2,944 insured institutions with total assets aggregating \$14.9 billion.

6. *Fiscal and housekeeping services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

Administrative expenses.—The Board's estimated administrative expenses for the fiscal year 1953, payable wholly out of income derived from assessments and charges, amount to \$779,000. This compares with \$781,000 for the fiscal year 1952. These amounts exclude nonadministrative expenses of the Examining Division which are shown separately.

FINANCIAL REVIEW

The Board is not incorporated and has no capital stock. Its assets consist of cash on deposit with the Treasurer of the United States and accounts receivable for the services which it renders. Its liabilities consist essentially of accounts payable.

HOME LOAN BANK BOARD—Continued**EXAMINING DIVISION, HOME LOAN BANK BOARD**

The Division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations which are insured by the Federal Savings and Loan Insurance Corporation, and of such noninsured member institutions of the Federal home-loan bank system as are not subject to State supervision. When required by the Board, the Division also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts or for conversion from a State to a Federal charter. In addition, insured institutions are required to have an audit; approximately 80 percent of the number of such institutions exercise their option of having the Division expand the scope of its examination to include such audit. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the Division.

The following table reflects the work of the Division:

Obligations incurred.....			

Under the Federal Home Loan Bank Act of 1932 (47 Stat. 725), the Federal Home Loan Bank Board established Federal home-loan banks throughout the country. These, together with the building and loan associations and similar institutions which are members of the banks, constitute the Federal home-loan bank system, designed to stabilize and strengthen institutions promoting private thrift and individual home ownership.

The 11 Federal home-loan banks obtain their funds from capital stock, issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists entirely of subscriptions of member institutions. The original capital stock subscribed by the Government aggregated \$124,741,000 all of which has been fully retired by the banks. Authority to borrow from the Treasury in the amount of \$1 billion was provided in Public Law 576, Eighty-first Congress.

There follows a condensed consolidated statement of the financial condition of the banks at June 30, 1951.

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Savings and Loan Insurance Corporation, pursuant to title IV of the National Housing Act, as amended, insures savings up to \$10,000 in all savings and loan associations which apply and are approved for insurance. The Corporation acts to prevent default of insured institutions through loans, purchases of assets, or cash grants thereby making it possible to eliminate conditions in a community which might affect adversely the financial soundness of other insured institutions. The Corporation also may act as receiver for institutions declared in default. When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. On June 30, 1951, the 2,944 insured associations had resources of \$14.9 billion representing approximately 83 percent of the assets of all savings and loan associations. The Corporation's liability on the insured institutions aggregated \$13.1 billion.

Income from insurance premiums and interest on investments has been sufficient to meet all insurance losses, operating expenses, dividends on \$100,000,000 of capital stock held by the Secretary of the Treasury, and to establish a reserve for insurance losses of \$99.8 million as of June 30, 1951. The Corporation has authority to borrow

up to \$750,000,000 from the Treasury which has never been used. No appropriations are made to the Corporation.

The Corporation operates under the supervision and direction of the Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The costs of examinations are borne by the institutions examined while the cost of all other services rendered by the Board are paid by the Corporation.

ANALYSIS OF BUDGET PROGRAM

The budget program comprises five activities.

1. *Underwriting.*—Reflecting the upward trend in the number and size of insured institutions was the amount of their aggregate assets on June 30, 1951, which had increased nearly 19 percent since the close of the previous year to a new high of \$14.9 billion. At the anticipated rate of growth, the insured liability of the Corporation may reach \$16.6 billion by June 30, 1953, as compared with \$2.1 billion as of June 30, 1940.

2. *Prevention of default.*—The Corporation has not made any loans but it has prevented the default of 28 insured associations by making cash grants aggregating \$5,374,125, of which \$475,797 has been recovered leaving a net loss of \$4,898,328 to June 30, 1951. One purchase of assets was made in 1950 to prevent the default of a State-chartered institution. This required a disbursement of approximately \$4,405,000 for which the Corporation acquired title to all assets. It is anticipated that these assets will be fully liquidated during the current fiscal year without any principal loss to the Corporation. Through grant and purchase activities the savings of 57,558 investors have been protected against the losses they would have experienced if the institutions had not been insured.

As part of its preventive program, the Corporation works closely with supervisory authorities on financial problems of insured associations, collects and interprets financial data for certain areas and specific institutions, and makes intensive analyses of applicants for insurance, by field inspections when necessary.

3. *Payment of insurance.*—If an insured institution is placed in liquidation because prevention of default is neither prudent nor economical, the Corporation fulfills its insurance contract by payment of each insured account as soon as possible either in cash or by making available a transferred account in another insured institution. Since 1934 the Corporation has provided for liquidation of only seven institutions with aggregate assets of \$9,209,816. Of the 7,705 investors' accounts amounting to \$7,557,214, over 93 percent had been settled by June 30, 1951. Only 526 account holders have not requested settlement of insurance. Total losses to date from this operation are \$309,547.

4. *Analysis of operations.*—Constant study of the financial condition of member institutions, evaluation of reserves and liquidity positions, and observation of the flow of savings and of the character and volume of mortgage lending furnish valuable information to the Home Loan Bank Board and the Corporation in connection with their other activities. Also by selective review of geographical areas and phases of operations it is possible to observe factors which may result in an undue concentration of risk. Certain analyses of trends in the fields of thrift and mortgage finance are made available to member institutions and the public at large as illustrated by the Corporation's mortgage recording study, which is the only one available in the United States.

HOME LOAN BANK BOARD—Continued**FEDERAL SAYINGS AND LOAN INSURANCE CORPORATION—Continued***Federal Savings and Loan Insurance Corporation—Continued*

5. *Executive direction and fiscal and other administrative services.*—Provision is made for all fiscal and other administrative services as well as management and direction.

Administrative expenses.—The authorization of \$443,000 requested for 1953 is based upon the assumption there will be no abnormal demands on the resources of the Corporation.

Since the time and size of expenditures for payment of insurance and prevention of default are unpredictable, estimates of these expenditures are omitted from the financial statements, nor has provision been made in the requested authorization for increases in costs of administration which accompany such operations. The budget program of the Corporation is designed to preserve the present nucleus of competent and experienced personnel, to permit the Corporation to minimize or avoid unfavorable developments, and to handle the anticipated number of applications for insurance of accounts.

FINANCING OPERATIONS

During fiscal year 1953, net investment of the Corporation in United States Treasury bonds and notes is estimated at \$7,100,000. This compares with \$6,678,000 estimated in 1952, and \$10,900,000 invested in 1951.

Under Public Law 576, Eighty-first Congress, the Corporation is required to retire annually at par an amount of its capital stock equal to 50 percent of net income. In July of 1951, the Corporation retired stock in the amount of \$6,716,000 and in the early part of fiscal 1953 it expects to retire an additional \$7,503,600. The funds for these payments are obtained through the redemption of certain United States Treasury notes. As a result of these transactions it is estimated that investments held as of June 30, 1953, at par value, will aggregate \$214,990,000.

Another provision of Public Law 576, Eighty-first Congress, requires the Corporation to pay an annual interest charge, in lieu of dividends on its capital stock, to the Secretary of the Treasury. For 1951 fiscal year the Corporation paid the Secretary of the Treasury \$1,875,000; for 1952 and 1953 it is anticipated that such payments will approximate \$1,757,300 and \$1,617,600, respectively.

OPERATING RESULTS AND RETAINED EARNINGS

Revenues of the Corporation are derived primarily from insurance premiums collected from insured institutions and from income on investments in Government obliga-

tions. Total income since 1934 of \$145,166,990 has been applied as follows:

	Percent	Amount
Expenses.....	4.3	\$6,305,446
Insurance losses (net).....	3.6	5,208,473
Return on capital stock.....	23.4	33,891,438
Legal reserve.....	68.7	99,761,633

As a result of the anticipated growth of 27 percent in the aggregate savings and creditor obligations of insured institutions, and the increasing number of institutions applying for insurance, the Corporation estimates net income before payment of a return on capital stock for fiscal 1953 of \$16,785,500. This amount is \$3,354,353 or 24.97 percent above the net income for the fiscal year 1951. After providing for an interest payment in lieu of dividends on the capital stock of \$1,617,600 for 1953, the balance of the net income, estimated at \$15,167,900, will be credited to insurance reserves of the Corporation.

Because of the estimated insurance liability of \$16.6 billion on June 30, 1953, and the statutory requirement with respect to reserves, the Corporation does not contemplate returning any earned surplus to the Treasury.

FINANCIAL CONDITION

Total assets of the Corporation amounted to \$206,537,867 as of June 30, 1951, an increase of over \$11,400,000 since the beginning of the year. Investment in Government obligations of \$201,131,723 represented 97.4 percent of corporate assets. In the absence of insurance losses it is anticipated that total assets will reach \$222,126,443 by June 30, 1953.

As of June 30, 1951, the Secretary of the Treasury held the total outstanding capital stock of the Corporation amounting to \$100,000,000. In July 1951 the Corporation retired \$6,716,000 of such stock, an amount equivalent to 50 percent of the net income of the Corporation before paying an interest charge in lieu of dividends on the average stock outstanding. Based upon actual income for 1951 and estimated net income for 1952 and 1953, the amount of stock which must be retired under Public Law 576, Eighty-first Congress, will aggregate \$22,612,350 reducing the capital stock outstanding shortly after the close of fiscal 1953 to approximately \$77,387,650. It is anticipated that all capital stock may be retired in 10 to 15 years.

The National Housing Act, as amended, requires accumulation of a reserve of 5 percent of all insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. As of June 30, 1951, this statutory requirement would have amounted to approximately \$654,235,100. The reserve for insurance losses of the Corporation at that date amounted to \$99,761,633 or 0.76 percent of the insured liability.

HOME OWNERS' LOAN CORPORATION

[Submitted under the Government Corporation Control Act]

PROGRAM HIGHLIGHTS

The Corporation was organized under the Home Owners' Loan Act of 1933 for the purpose of providing credit facilities to refinance the mortgages of distressed urban home owners. The Corporation's lending authority expired on June 12, 1936, since which time the Corporation has been in liquidation.

As of June 30, 1951, all of the Corporation's loans had been terminated, its acquired properties disposed of, and its total capital stock of \$200,000,000 retired. In addition there was paid into the Treasury, during the fiscal year 1951, the sum of \$13,800,000, representing surplus from liquidation. It is expected that an additional \$192,835 of surplus funds will be paid into the Treasury during fiscal year 1952.

Of the \$3,489,453,550 in bonds issued, exclusive of refunding operations, \$3,488,156,825 had been retired as of June 30, 1951, leaving a balance outstanding of \$1,296,725, for the redemption of which and the payment of accrued interest thereon funds have been deposited with the Treasurer of the United States.

The Independent Offices Appropriation Act, 1952, made available \$75,000 of the Corporation's funds to the Home Loan Bank Board to carry out final liquidation of the Corporation.

PURPOSE AND FINANCIAL ORGANIZATION

The Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home financing practices and housing standards and conditions, through insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. On June 30, 1951, a total of \$24.4 billion of insurance had been written.

The Administration maintains eight insurance funds: (1) A fund for insuring repair and improvement loans and mortgage loans under title I; (2) a fund for insuring mortgages on individual dwellings under title I (sec. 8); (3) a mutual mortgage insurance fund for insuring mortgages on one- to fourfamily dwellings under title II; (4) a fund for insuring mortgages on multifamily housing projects, including cooperative housing, under title II; (5) a fund for emergency and special-incentive mortgage and loan insurance under title VI; (6) an investment insurance fund for operations under title VII; (7) a military housing

FEDERAL HOUSING ADMINISTRATION—Continued

insurance fund for operations under title VIII; and (8) a fund for insuring defense housing mortgages under title IX.

The mutual mortgage insurance fund differs from other insurance funds in that insured mortgages are grouped together with others having similar risk characteristics and maturity dates, and the mortgagors in each group receive any excess of fees and premiums paid over losses and expenses allocable to the group.

All of the Administration's insurance programs are income producing. Income is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

ANALYSIS OF BUDGET PROGRAMS

The estimates reflect the effect of credit restrictions under the President's program to curb inflation and conserve materials needed for defense. They also reflect the Defense Housing and Community Facilities and Services Act of 1951, approved September 1, 1951, which added title IX for defense housing, extended the military housing program, title VIII, for 2 years and made general housing credit restrictions less stringent.

1. *Repair and improvement loan insurance, title I.*—Financial institutions are insured against losses up to 10 percent on loans for the alteration, repair, and improvement of residential properties. The loans insured are characteristically short-term, unsecured notes averaging around \$478. Estimates are set forth below:

	1951 actual	1952 estimate	1953 estimate
Initiation: Loans insured.....	1,462,729	1,500,000	1,500,000
Maintenance of insurance in force (notes) end of year.....	3,425,600	4,756,900	5,990,900
Settlement:			
Claims.....	43,282	45,600	45,600
Average defaulted notes in process of collection.....	133,500	153,000	170,000

2. *Mortgage insurance for homes and multifamily housing, titles I and II.*—Mortgages may be insured on one- to four-family structures and on multifamily housing projects up to statutory limits of 80, 90, or 95 percent of appraised value, depending upon the amount and character of the loan involved. Insured mortgages may cover new and existing properties, both for rent and for sale, including nonprofit cooperative housing. Insured loans may bear a higher ratio to the value of the mortgaged property, in the lower price and rental ranges, to aid in construction of homes for families of low and moderate income. Estimates are as follows:

	1951 actual	1952 estimate	1953 estimate
Initiation:			
Unit applications examined.....	522,407	458,300	338,200
Inspections made.....	1,077,162	645,600	521,900
Average multifamily units under inspection.....	2,520	16,300	45,700
Unit mortgages insured.....	332,387	270,600	298,600
Maintenance of insurance in force—end of year.....	1,239,319	1,425,562	1,633,212
Settlement:			
Mortgages terminated.....	88,915	84,301	90,950
Properties acquired (dwelling units).....	402	430	430
Properties on hand (dwelling units).....	276	353	388

3. *Special incentive mortgage and loan insurance, and yield insurance on rental housing investments, titles VI and VII.*—Special war-housing mortgage insurance provisions of title VI were continued until April 1948 for home mortgages and until March 1950 for rental project mortgages to provide veterans emergency housing, and other special incentive programs were added. Title VI now provides for (a) insurance of loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing; (b) insurance of mortgages executed in connection with the sale by the Government of certain federally owned housing; and (c) insurance of short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single-family dwellings, as well as for insured long-term financing of properties constructed under this section. Title VII provides for insurance of an annual return of 2½ percent and a minimum annual amortization of 2 percent on equity investments in rental housing. Estimates are as follows:

	1951 actual	1952 estimate	1953 estimate
Initiation:			
Unit applications examined.....	41,744	26,200	10,800
Inspections made (1-4 family units).....	400		
Average multifamily units under inspection.....	110,942	73,500	24,000
Unit mortgages, loans, and investments insured.....	87,942	40,850	11,100
Maintenance of insurance in force (unit mortgages, loans, and investments, end of year).....	811,803	811,778	776,678
Settlement:			
Mortgages, loans, and investments terminated (dwelling units).....	41,298	40,875	46,200
Properties acquired (dwelling units).....	5,232	6,700	6,500
Properties on hand (dwelling units).....	7,761	10,733	13,167
Mortgage notes on hand (in exchange for properties).....	2,336	3,370	4,278

4. *Military and defense housing, titles VIII and IX.*—Rental housing is provided under title VIII, through use of private capital under insured mortgages, for civilian and military personnel of the armed services and for personnel at atomic energy installations. This program was originally confined to housing at or near military bases but was extended to atomic energy plants by the Defense Housing and Community Facilities and Services Act of 1951. The 1951 act also added title IX under which mortgages found to be acceptable risks in view of needs of national defense may be insured. The housing must be within the limits of programmed housing needs in defense areas designated by the President.

	1951 actual	1952 estimate	1953 estimate
Initiation:			
Unit applications examined.....	36,100	142,000	280,000
Inspections made (1-2 family units).....		110,900	418,500
Average multifamily units under inspection.....	11,943	25,300	72,700
Unit mortgages insured.....	19,943	40,500	189,400
Maintenance of insurance in force (in dwelling units, end of year).....	27,380	71,750	260,550
Settlement: Mortgages terminated (dwelling units).....		330	600

Administrative expenses.—These expenses, which totaled \$5,027,565 in 1951, are estimated at \$5,324,000 and \$5,631,000, respectively, for fiscal years 1952 and 1953. The estimates for the latter years include the cost of activities under the new Defense Housing and Community Facili-

ties and Services Act of 1951, as well as the cost of premium billings, collections, and other servicing on the insurance in force, which increased from \$13,662,100,000 to \$15,427,100,000 during 1951 and is expected to reach \$18,053,600,000 by June 30, 1953.

FINANCING OPERATIONS

Separate financial statements are submitted for the mutual mortgage insurance fund and combined statements for all nonmutual insurance funds.

With respect to the mutual mortgage insurance fund, it is estimated that \$2,945,500 of debentures will be retired in 1953, compared to \$1,429,050 in 1952, and \$449,900 in 1951. Debentures issued in 1953 as a result of mortgages and properties acquired are estimated at \$2,680,000. This compares with \$2,798,650 anticipated in 1952 and \$1,209,300 in 1951. Investments in U. S. Government securities are estimated at \$33,000,000 in 1953, compared to \$32,700,000 in 1952 and \$25,867,650 in 1951. Operations in 1951 resulted in an increase in Treasury cash of \$1,863,363. For 1952 and 1953, decreases of \$7,406,912 and \$325,100 are anticipated.

On the nonmutual insurance funds, repayments to the United States Treasury from collections obtained in the title I claims program are estimated at \$71,500 in 1953, compared to \$110,100 in 1952 and \$220,589 in 1951. It is anticipated that defaults and foreclosures will result in the issuance of \$46,221,400 in debentures in 1953 as compared to \$59,758,250 in 1952 and \$25,074,450 in 1951. In 1953, it is estimated that \$52,563,500 in debentures will be retired, compared to \$21,759,450 in 1952 and \$14,129,450 in 1951. A decrease of \$4,650,000 in investments in U. S. Government securities is anticipated in 1953 compared to increases in 1952 and 1951 of \$17,750,000 and \$24,919,250, respectively. Treasury cash is estimated to increase by \$4,825,800 in 1953 and \$4,169,962 in 1952 as compared to actual increase of \$969,736 in 1951.

OPERATING RESULTS AND RETAINED EARNINGS

Operations of the mutual mortgage insurance fund in 1951 resulted in a net income of \$25,274,036, of which \$22,302,950 was distributed to statutory reserves and \$2,971,086 to the general reinsurance reserve. Comparable figures for 1952 are estimated at \$34,397,659, distributed \$33,346,645 and \$1,051,014, respectively, and for 1953, \$42,747,500, distributed \$37,229,500 and \$5,518,000,

respectively. Funds in statutory reserves are available for losses, expenses and other charges, and distribution to mortgagors. The distributions to the general reinsurance reserve result in retained earnings amounting to \$19,161,962 in 1953, compared to \$13,318,062 and \$11,887,448 in 1952 and 1951, respectively. Since the general reinsurance reserve account is required to meet deficits in groups accounts, no funds are available for return to the Treasury.

Net income of the nonmutual insurance funds for 1951 amounted to \$29,295,874 and is estimated at \$29,395,186 for 1952, and \$37,237,900 for 1953. Retained earnings, which in 1951 amounted to \$98,006,878, are expected to reach \$126,336,744 in 1952 and \$163,541,144 in 1953. These earnings are required to meet future expenses, charges, and losses in connection with the operation of the various insurance funds and are not available for return to the Treasury.

FINANCIAL CONDITION

Total investment of the U. S. Government in the mutual mortgage insurance fund at June 30, 1951, was \$53,881,543 and is expected to be \$55,312,157 and \$61,156,057 at the end of 1952 and 1953. In the nonmutual insurance funds, total investment of the U. S. Government at June 30, 1951, was \$123,635,169. It is estimated that this will increase to \$152,920,255 and \$190,086,655 by the end of 1952 and 1953.

INSURANCE AUTHORITY

The present authority to insure mortgages will be adequate for all programs contemplated with the exception of mortgage insurance under titles II and IX of the National Housing Act. (See schedule C-1.) In addition to the insurance and insurance commitments shown in schedule C-1, there will be outstanding eligibility statements under titles II and VIII aggregating an estimated \$200 million on June 30, 1952, and \$100 million on June 30, 1953, by which time title VIII will have expired. Eligibility statements outstanding on June 30, 1951, aggregated \$178,154,958.

Proposed legislation would (1) make available unused balances of authorizations under titles I (sec. 8), VI, VII, and VIII; (2) provide additional insurance authorization of \$1 billion; and (3) make all amounts available at the President's discretion for allocation to such insurance programs as he may determine.

LIMITATION ON EXPENSES

Salaries and Expenses, Federal Housing Administration—

Federal Housing Administration: In addition to the amounts available by or pursuant to law (which shall be transferred to this authorization) for the administrative expenses of the Federal Housing Administration in carrying out duties imposed by or pursuant to law, not to exceed **\$4,949,000** **\$5,631,000** of the various funds of the Federal Housing Administration shall be available for expenditure, in accordance with the National Housing Act, as amended (12 U. S. C. 1701): *Provided*, That, except as herein otherwise provided, all expenses and obligations of said Administration shall be incurred, allowed, and paid in accordance with the provisions of said Act: *Provided further*, That funds available for expenditure shall be available for contract **[actuaries]** actuarial services (not to exceed \$1,500); and purchase of periodicals and newspapers (not to exceed \$1,500): *Provided further*, That expenditures for nonadministrative expenses classified by section 2 of Public Law 387, approved October 25, 1949, shall not exceed **\$23,300,000**.

[The amount made available under this head in title IV of the Independent Offices Appropriation Act, 1952, for administrative expenses of the Federal Housing Administration is increased by "\$41,000"; and the limitation thereunder on the amounts available for certain nonadministrative expenses of said Administration is increased from "\$23,300,000" to "\$25,175,000": *Provided*, That the National Defense Housing Insurance Fund shall be available, in addition to the purposes for which it is otherwise available under law, for administrative expenses of the Federal Housing Administration.] (Second Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.)

PUBLIC HOUSING ADMINISTRATION

[Submitted under the Government Corporation Control Act]

INTRODUCTORY STATEMENT

The Administration has direct or delegated responsibility for five programs:

1. Programs for which the Administration is directly responsible are:

(a) *United States Housing Act*.—(1) Federally aided low-rent housing under the United States Housing Act of 1937; (2) federally owned slum-clearance and other low-rent projects; (3) the expanded low-rent housing program provided by title III of the Housing Act of 1949; and (4) labor camps transferred from the Department of Agriculture by title II of the Housing Act of 1950.

(b) *Subsistence homesteads and greentowns*.—Two greentowns and residual subsistence homestead projects are operated under the Bankhead-Black Act of 1936. This program is in liquidation.

2. Programs administered under delegated authority from the Housing and Home Finance Administrator are:

(a) *Public war housing*.—This involves management and disposition of public war housing projects under the Lanham and related acts and includes development of new defense housing as authorized by the Defense Housing and Community Facilities and Services Act of 1951.

(b) *Veterans' re-use housing*.—This involves supervision over local management of temporary dwellings for veterans constructed under title V of the Lanham Act and the disposition of such properties by transfer to eligible local bodies as provided in the Housing Act of 1950.

PUBLIC HOUSING ADMINISTRATION—Continued

(c) *Homes conversion.*—Properties leased by the Government and remodeled to produce additional dwelling facilities for war workers under the Lanham Act are being liquidated.

The administrative expenses of the Administration in performing necessary functions for these five programs are separately presented in consolidated form. These expenses are paid from a single fund and distributed on a workload basis to the five programs.

Field.....		1,277		1,118		1,239
Total.....		2,321		2,125		2,257
3. Administrative expenses:						
Appropriations.....		\$8,700,000		\$10,101,000		\$11,420,000
Authorizations.....		6,024,000		3,887,000		3,613,000
Total funds available..		14,724,000		13,988,000		15,033,000

The Housing Act of 1948 (62 Stat. 1268) authorized a consolidated administrative expense budget.

Administrative expenses are distributed to each program on the basis of special surveys and analyses of employees' actual working time. The distribution of costs is shown in the financial statements which follow.

ANALYSIS OF BUDGET PROGRAM

The Administration's five programs are administered by a single integrated organization. Administrative functions break down into three major categories: Development, management, and disposition. Each of these categories is summarized below:

Development.—The Housing Act of 1949 authorizes construction starts for 135,000 locally owned low-rent housing units each year. In view of the present international situation, construction starts are projected at a rate of 53,000 units during 1952 and 75,000 units in 1953.

The following table presents the development activity by years for the low-rent program:

NUMBER OF DWELLING UNITS

	1951 actual	1952 estimate	1953 estimate
Program reservations made.....	28,046	75,000	75,000
Sites selected.....	136,341	75,000	75,000
Annual contribution contracts entered into.....	141,673	75,000	75,000
Construction started.....	88,580	53,000	75,000
Completed for occupancy.....	2,600	50,000	85,000

The Defense Housing and Community Facilities and Services Act of 1951 authorizes \$50 million for construction of federally owned housing in critical defense areas. An appropriation of \$25 million was made for 1952 with which construction can be started on some 43 projects with 3,960 units.

Management.—This applies to locally owned projects developed and operated with Federal financial assistance, and to federally owned projects. Dependent on the type of program, management is conducted by local authorities which own and operate low-rent housing projects and also lease certain of the federally owned projects; by sponsoring municipalities and educational institutions; by contract managers (real-estate brokers), and by the Administration itself in the case of federally operated projects.

On June 30, 1951, there were 514,000 dwelling units under management. By June 30, 1953, a net increase of 58,000 units is anticipated to result from the completion of units under the Housing Act of 1949 and the Defense Housing and Community Facilities and Services Act of 1951, and transfers of temporary war and veterans' re-use projects and by other disposition.

Disposition.—No disposition is contemplated in critical or potentially critical defense areas. The budget program contemplates the following disposal of dwelling units:

Program	1951 actual	1952 estimate	1953 estimate
Subsistence homesteads and greentowns:			
Sales.....	4	546	1,004
Public war housing:			
Transfers of temporary housing.....	4,678	14,664	11,992
Sales of permanent housing.....	4,550	2,000	4,000
Sales of temporary housing.....	2,566	5,371	5,078
Demolition and other.....	246	1,375	1,125
Total.....	12,040	23,410	22,195
Veterans' re-use housing:			
Transfers to local bodies.....	10,284	11,200	4,800
Sales.....	1,588		7,400
Total.....	11,872	11,200	12,200
Total disposition.....	23,916	35,156	35,399

¹ Excludes 10,130 units transferred to low-rent use.

The homes conversion program was substantially liquidated in 1951, and the few remaining properties were transferred to the public war housing program. The final liquidation of accounts receivable and payable and the handling of claims are expected to be completed during 1952.

PURPOSE AND FINANCIAL ORGANIZATION

The United States Housing Act of 1937 (42 U. S. C. 1401) provided for a program of locally owned and operated low-rent housing by authorizing loans and annual contributions to maintain the low-rent character of the projects. Subsequently, the act of June 28, 1940, permitted the construction of permanent housing for war workers, subject to conversion to low-rent use after the emergency. The program was expanded by the Housing Act of 1949 which authorized the construction of an additional 810,000 housing units over a 6-year period, increased the borrowing power of the Administration to \$1.5 billion outstanding at any one time, and increased the authorization to contract for annual contributions to \$336 million for periods up to 40 years. The Housing Act of 1950 transferred to the Administration labor supply centers, labor homes, and labor camps administered by the Secretary of Agriculture, to be used for low-income agricultural workers and their families. This act also authorized the transfer of certain permanent war housing projects to local authorities for low-rent use in accordance with the act of 1937.

ANALYSIS OF BUDGET PROGRAMS

The major activities are (a) the development and financing of low-rent projects and (b) the management of projects, including the payment of annual contributions, for which an appropriation of \$36,000,000 is requested for 1953. A supplemental appropriation of \$4 million for 1952 is proposed for later submission.

The following table shows the status of the program at the end of each fiscal year:

	1951 actual		1952 estimate		1953 estimate	
	Projects	Units	Projects	Units	Projects	Units

¹ Estimated.

Development and capital financing.—Under the United States Housing Act low-rent housing is primarily a subject for local determination and control, Federal support being generally confined to making capital loans, paying annual contributions, and reviewing local actions for conformity

with law. After the local authority has demonstrated a need for low-rent housing which is not being met by private enterprise, the Administration makes available a small preliminary loan to cover the cost of planning a project upon approval of the local governing body. The cost of the project is limited by law. The budget program provides for program reservations of 75,000 units in each year, execution of annual contribution contracts for 75,000 units in each year, and construction starts on 53,239 units in 1952 and 75,000 in 1953.

Private capital in the form of temporary loan notes is utilized during the early development period, with the remainder covered by purchase of advance loan notes by the Administration. Since the Administration guarantees privately financed notes, they have excellent security and are now being sold at interest rates just over 1 percent per year. All temporary loan notes are retired as soon as the local authority sells long-term bonds to the public for the project, which are secured by the Government's pledge to pay annual contributions.

It is estimated that a total of \$800 million of development cost on new projects will enter permanent financing in 1952 and 1953. In addition, in each year there will be about \$100 million worth of permanent financing for other locally owned projects and about \$50 million for projects which are presently federally owned and scheduled for sale and permanent financing. Thus permanent financing amounting to nearly \$1 billion is scheduled in each year in order to stay abreast of the financing requirements of the new program and to effect permanent financing arrangements for portions of the existing program.

The following table summarizes the lending activities of the Administration in 1952 and 1953:

Management.—The Administration reviews management operations of the local housing authorities, approves operating budgets, and audits books and records to assure compliance with the law and the orderly and economical operation of the projects. The dwellings are rented to low-income families at rents scaled to what the individual family can pay. Annual Federal contributions are made to cover operating deficits. The local government also contributes to achieving low rents through tax exemption and provision of municipal services. During 1952 it is expected that 158,536 dwelling units will require Federal contribution of \$14,000,000 to offset operating deficits. During 1953, an additional 80,508 units are expected to become eligible for contributions, making a total of 239,044 units requiring contributions estimated at \$36,000,000. Approximately \$18,162,000 of the increase is for 62,782

new units initiated subsequent to the Housing Act of 1949; the remaining \$3,838,000 is primarily for increase in debt service of projects under temporary financing, and need for contributions on reactivated projects, and on federally owned projects scheduled for sale to local housing authorities.

The following table shows the major items making up the annual contribution requirements for all projects:

	1951 actual	1952 estimate	1953 estimate
Maximum annual contribution in executed contracts.....	\$99,741,697	\$131,180,565	\$159,792,189
Less maximum contribution for projects not yet eligible for first contribution.....	78,529,193	104,596,652	105,643,671
Maximum contribution for projects eligible for payment.....	21,212,504	26,583,913	54,148,518
Less amounts available for reduction of contribution payments.....	14,026,384	12,583,913	18,148,518
Annual contribution requirements..	7,186,120	14,000,000	36,000,000

¹ Includes proposed supplemental appropriation of \$4,000,000.

In addition to the above, there are the following types of projects which do not receive annual contributions:

(a) *Farm labor centers.*—These centers are now being rehabilitated and are being sold under a contract which provides that full title will not be acquired until the end of a 20-year period during which time the Government will receive net income but will not pay deficits. At the present time all but two projects are scheduled for transfer to local authorities.

(b) *Public war housing projects transferred to low-rent use.*—The estimate provides for the transfer of 40 permanent public war housing projects, with 10,131 dwelling units, to local housing authorities for operation as low-rent projects. Under the terms of the transfer all net income will be returned to the Government for 40 years after the date of transfer.

(c) *Public Works Administration projects transferred to local ownership.*—The estimate also provides for the transfer of 43 Public Works Administration projects, with 16,311 units, to local ownership. The terms of sale will require that all net income be returned to the Government for 40 years after the date of transfer.

(d) *Federally owned projects.*—The remaining projects under Federal ownership will receive no annual contributions.

Administrative expenses.—Requirements are estimated at \$10,101,000 for 1952 and \$11,420,000 for 1953. The increase is due primarily to the workload created by the opening of newly completed projects. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses."

FINANCING OPERATIONS

The budget program contemplates that borrowings from the United States Treasury will increase by \$71,000,000 by the end of 1952 and will thereafter be reduced by \$110,000,000 by the end of 1953. These borrowings will be needed to finance new projects during the early stages of development prior to permanent financing with private capital.

PUBLIC WAR HOUSING PROGRAM

[DEFENSE HOUSING]

Defense Housing, Office of the Administrator, Housing and Home Finance Agency—

For the provision of defense housing in accordance with title III of the Defense Housing and Community Facilities and Services Act of 1951, including administrative expenses (not exceeding \$375,000) of the Public Housing Administration in connection therewith, \$25,000,000, to remain available until expended: *Provided*, That any moneys or reserves authorized by section 311 of said Act may be merged (for accounting purposes only) with moneys or reserves authorized by sections 303 and 605 (c) of the Act of October 14, 1940, as amended (42 U. S. C. 1543 and 1585): *Provided further*, That the amount made available under this head in title IV of the Independent Offices Appropriation Act, 1952, for administrative expenses of the Public Housing Administration, is increased from "\$12,780,000" to "\$13,155,000".] (*Second Supplemental Appropriation Act, 1952.*)

Appropriated 1952, \$25,000,000

PURPOSE AND FINANCIAL ORGANIZATION

This program was undertaken under the provisions of the Lanham Act (42 U. S. C. 1521), before and during World War II, as a means of alleviating the acute shortage of housing for war workers. About half of the original housing has been disposed of and the remainder serves the needs of veterans, servicemen and their families, and certain defense workers pending disposition in accordance with law. New projects authorized by the Defense Housing and Community Facilities and Services Act of 1951 are included in the estimates.

Expenses of operation, maintenance, and disposition or removal are paid from rental and other project income.

ANALYSIS OF BUDGET PROGRAMS

The following table shows the status of the program at the end of each fiscal year:

	1951 actual		1952 estimate		1953 estimate	
	Projects	Units	Projects	Units	Projects	Units
Under development:						
Permanent.....			8	750		
Temporary.....			27	2,460		
Total.....			35	3,210		
Available for occupancy:						
Permanent.....	368	116,344	320	104,342	316	101,092
Temporary.....	633	158,445	557	147,335	518	118,293
Total.....	1,001	274,789	877	251,677	834	219,385
Inactive temporary housing.....	85	15,275	48	8,167		21,735
Disposed of during the year:						
Permanent.....		4,614		12,130		4,000
Temporary.....		7,426		21,410		18,195
Total.....		12,040		33,540		22,195

Development.—The Second Supplemental Appropriation Act, 1952, provides \$25 million for the construction of defense housing in critical defense areas, as authorized by title III of the Defense Housing and Community Facilities and Services Act of 1951. It is estimated that 43 projects with 3,960 dwelling units will start construction during 1952. Supplemental appropriations of \$25 million for 1952 and \$300 million for 1953 are proposed for later submission.

Management.—About one-third of the projects are managed directly by the Government and the remainder are managed by local housing authorities under lease agreements which require that all net income be returned to the Government. The following table shows the management status of the program at the end of each fiscal year:

	1951 actual		1952 estimate		1953 estimate	
	Projects	Units	Projects	Units	Projects	Units
Federally operated:						
Family dwellings.....	320	93,657	281	87,930	267	78,423
Dormitories.....	1	38	1	38		
Stop-gap.....	2	259	3	349	3	349
Total.....	323	93,954	285	88,317	270	78,772
Leased:						
Family dwellings.....	655	178,919	566	161,043	540	138,528
Dormitories.....	8	478	6	304	5	230
Stop-gap.....	15	1,438	20	2,013	19	1,855
Total.....	678	180,835	592	163,360	564	140,613
Total active program....	1,001	274,789	877	251,677	834	219,385

The estimates of income and expenses projected for 1952 and 1953 are based upon project operating budgets for 1952. Rental income will increase substantially during 1952 and 1953 as a result of increases authorized by the Defense Housing and Community Facilities and Services Act of 1951, and the Defense Production Act, 1951.

Operating expenses will continue at higher than normal levels during 1952 and 1953 for temporary projects due to performance of deferred maintenance work to extend the useful life of projects needed for defense purposes.

Disposition.—The Housing Act of 1950 authorizes the transfer, under certain conditions, of (1) temporary projects to local public agencies and (2) permanent projects to local public housing agencies for operation as low-rent housing. Disposition of 33,540 units is contemplated during 1952 and 22,195 units in 1953. No disposition is contemplated in critical or potentially critical defense areas.

The following table shows the number of dwellings, proceeds, and original cost of dwellings disposed of during each fiscal year:

	1951 actual	1952 estimate	1953 estimate
Transfers:			
Permanent.....		10,130	
Temporary.....	4,678	14,664	11,992
Sales:			
Permanent.....	4,550	2,000	4,000
Temporary.....	2,566	5,371	5,078
Demolition and other.....	246	1,375	1,125
Total.....	12,040	33,540	22,195
Total proceeds from sales.....	\$10,328,464	\$6,137,000	\$12,146,000
Disposition expense.....	1,220,253	1,019,000	2,343,000
Net proceeds.....	9,108,211	5,118,000	9,803,000
Total cost of housing disposed of.....	20,275,546	113,798,550	63,580,000

Administrative expenses.—These costs are estimated at \$3,097,500 for 1952 and \$3,135,000 for 1953. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses."

FINANCING OPERATIONS

Receipts not required for operating expenses are paid to the United States Treasury. Such payments are estimated at \$35,447,017 in 1952 and \$27,500,200 in 1953.

OPERATING RESULTS AND RETAINED EARNINGS

As of June 30, 1951, the total development cost of the program, after deducting net transfers of assets to other agencies and programs, amounted to \$1,486,765,849. Cumulative net income from management operations and net proceeds from disposition (before write-off of assets disposed of) are estimated at \$431,166,235 as of June 30, 1953. Thus 29 percent of the total original development cost of the program under the jurisdiction of the Administration will have been returned to the Government.

Inasmuch as the Government's investment in the program consists of appropriated funds, no appropriation action is required with respect to the cumulative deficit.

Canceled prior to leasehold expiration.....	2,227		

PURPOSE AND FINANCIAL ORGANIZATION

The program was developed and managed under the provisions of the Lanham Act (42 U. S. C. 152). Almost 50,000 dwelling units were provided for immigrant war workers by leasing existing structures and remodeling them to provide additional dwelling units.

ANALYSIS OF BUDGET PROGRAMS

The program was substantially liquidated by the end of 1951. Fifteen remaining properties with 208 units were

950000—52—25

transferred to the public war housing program. Final liquidation of all remaining assets and liabilities is expected to be completed during 1952.

Administrative expenses.—These are estimated at \$21,000 for 1952 to effect final liquidation. This amount is merged with the funds for administrative expenses of the other programs of the Administration into a single fund which is shown under the estimate for "Administrative expenses."

FINANCING OPERATIONS

The budget provides for the return of an estimated \$6,573 to the general fund of the Treasury during 1952. This amount represents the final deposit of unobligated receipts.

OPERATING RESULTS AND RETAINED EARNINGS

After nearly 10 years of operation the homes conversion program has come to an end. The original Federal investment of \$90,260,404 will, after final liquidation of remaining assets and liabilities, have returned to the Treasury an estimated \$29,269,813 or about one-third of the original investment.

Inasmuch as the Government's investment in the program consisted of appropriated funds, no appropriation action is required with respect to the cumulative deficit.

PURPOSE AND FINANCIAL ORGANIZATION

This program was developed under the Bankhead-Black Act of 1936 (5 U. S. C. 55). Receipts from operations

are available for operation, maintenance, administration, and disposition. The program is in liquidation.

ANALYSIS OF BUDGET PROGRAMS

Management.—As of June 30, 1951, there remained under management two greentown projects with 1,510 dwelling units together with 40 rural farm dwellings at a former project site. In addition there were 16 subsistence homestead units under lease and purchase contracts. Average rental income per unit per month will increase as a result of rent raises authorized by the Defense Housing and Community Facilities and Services Act of 1951, and the Defense Production Act, 1951. Expenses will increase slightly because of a small amount of deferred and corrective maintenance.

Disposition.—Both greentown projects are scheduled for sale during 1952 and 1953. Residual land will be sold as a market develops. A small number of the 28 mortgage loan notes held on the subsistence homesteads program will be liquidated.

Administrative expenses.—These costs are estimated at \$106,000 for 1952 and \$132,000 for 1953. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses."

FINANCING OPERATIONS

Payments to the United States Treasury are estimated at \$3,136,983 in 1952 and \$1,551,919 in 1953.

OPERATING RESULTS AND RETAINED EARNINGS

As of June 30, 1951, the Government investment in this program amounted to \$60,605,474 representing book value at the date of transfer to the Administration. Cumulative net income from management operations and net proceeds from disposition (before write-off of assets disposed of) are estimated at \$31,943,907 as of June 30, 1953. Thus 53 percent of the total investment will have been returned to the Government. In addition there will remain for future disposition properties with an estimated net book value of \$2,216,020.

Inasmuch as the Government's recorded investment in the program consists of funds appropriated to the original construction agency, no appropriation action is required with respect to the cumulative deficit.

Average number of dwelling units available for occupancy	38,602	30,192	10,065
Transfers and other disposition	11,872	11,200	12,200
Number of dwelling units at year end:			
Federally operated	1,499	2,699	2,699
Operated by local bodies	32,157	19,757	7,557
Net income	\$682,166	\$1,498,344	\$358,720

PURPOSE AND FINANCIAL ORGANIZATION

This temporary postwar emergency program was undertaken under title V of the Lanham Act to alleviate the housing difficulties of servicemen, veterans, and their families, including veterans attending educational institutions, by relocation and re-use of surplus Federal structures. Approximately \$443.5 million were allotted to the Public Housing Administration for development. Funds derived from the operation of the projects are available for operation and maintenance, for disposition and removal of the projects, and for administrative expenses. Each quarter, operating funds in excess of amounts needed for liquidation of outstanding liabilities are paid to the Treasury (60 Stat. 9).

ANALYSIS OF BUDGET PROGRAMS

Development.—Construction is completed except for final settlement of contractors' claims.

Management.—With the exception of one federally operated project, all projects are managed by the participating local bodies, with the Administration exercising advisory functions. Federally financed projects are required to return all net income to the Administration. Projects financed in whole or in part by the participating local bodies are authorized to reimburse themselves from net income for their development expenditures.

One project, with 1,499 dwelling units, is directly managed by the Government. It is anticipated that during 1952 11 projects, consisting of about 1,200 units, will be transferred to the Administration by local public bodies and will be directly managed by the Government. These projects will serve military establishments.

The average number of units in active management and average net income per unit per month are shown below:

	1951 actual		1952 estimate		1953 estimate	
	Federally operated	Operated by local bodies	Federally operated	Operated by local bodies	Federally operated	Operated by local bodies
Average number of active units in program	1,587	37,015	1,969	28,223	2,699	7,366
Average net income per unit per month	\$5.40	\$5.05	\$5.53	\$6.19	\$7.31	\$4.65
Total net income from operations	\$102,865	\$2,241,151	\$130,765	\$2,098,000	\$236,820	\$411,200

The anticipated increase in average net income for 1952 and 1953 for federally operated projects takes into account the rent increases authorized by the Defense Housing and Community Facilities and Services Act of 1951, and the Defense Production Act, 1951.

Disposition.—The Housing Act of 1950 requires the transfer to local bodies, without monetary consideration, of projects on land owned or controlled by the local bodies. The act also authorizes the transfer of projects on land owned or controlled by the United States, provided the local body pays for the land. Transfer activity and other disposition are shown in the table below:

	1952 estimate		1953 estimate	
	Projects	Units	Projects	Units
In program at beginning of year:				
Federally operated	1	1,499	12	2,699
Operated by local bodies	227	32,157	153	19,757
Total	228	33,656	165	22,456
Disposition:				
Transfers	63	11,200	27	4,800
Other disposition			60	7,400
Total disposition	63	11,200	87	12,200
In program at year end:				
Federally operated	12	2,699	12	2,699
Operated by local bodies:				
Inactive			56	6,360
Active	153	19,757	10	1,197
Total	165	22,456	78	10,256

Administrative expenses.—These costs are estimated at \$266,000 for 1952 and \$116,000 for 1953. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses."

FINANCING OPERATIONS

Payments of unobligated receipts to the United States Treasury are estimated at \$3,517,483 in 1952, and \$1,705,220 in 1953.

OPERATING RESULTS AND RETAINED EARNINGS

As of June 30, 1951, total development cost of the program, including net transfers of assets from other agencies and programs, amounted to \$487,764,492. Cumulative net income from management operations and net proceeds from disposition (before write-off of assets disposed of) are estimated at \$34,837,428 as of June 30, 1953. In addition, there will remain for future disposition properties with an estimated book value of \$28,039,270.

Inasmuch as the Government's investment in the program consists of appropriated funds, no appropriation action is required with respect to the cumulative deficit.

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Department seeks to contribute to the welfare and growth of the Nation by aiding in the progressive development of our agriculture. Assistance is provided (a) in the conservation of soil, water, and forest resources; (b) by extension of agricultural credit to farmers; (c) through regulation and inspection of the marketing of several agricultural commodities; (d) by agricultural adjustment programs designed to stabilize farm prices and income; (e) through agricultural research; and (f) by dissemination of useful agricultural information to farmers and other interested persons.

These programs are carried out through the (1) Production and Marketing Administration; (2) Commodity Credit Corporation; (3) Forest Service; (4) Soil Conservation Service; (5) Rural Electrification Administration; (6) Farmers' Home Administration; (7) Commodity Exchange Authority; (8) Extension Service; (9) Farm Credit Administration; (10) Federal Crop Insurance Corporation; (11) Agricultural Research Administration; and (12) staff offices of the Department, which include (a) Office of the Secretary, (b) Bureau of Agricultural Economics, (c) Office of Information, (d) Office of the Solicitor, (e) Library, and (f) Office of Foreign Agricultural Relations.

The total of appropriations requested for 1953 is \$1,149,303,302, including permanent appropriations and supplementals proposed for later submission, compared with \$1,056,579,916, the sum of appropriations enacted and supplementals proposed for 1952. This represents a net increase of \$92,723,386. The increases include \$105,354,250 to meet costs incurred principally in fiscal year 1951 under the International Wheat Agreement; \$23,441,054 in permanent appropriations, of which \$22,113,254 is for removal of surplus agricultural commodities; \$4,174,372 for forestry; \$5,000,000 for agricultural production programs; \$2,995,409 for flood control and activities of the Soil Conservation Service; and \$1,150,089 for crop insurance activities. Principal decreases include \$19,980,000 for conservation and use of agricultural land resources and \$30,000,000 due to elimination of an item provided in the Flood Rehabilitation Act, 1952, for the disaster loan revolving fund.

Borrowing authorizations totaling \$229,000,000 are proposed. This represents a net decrease of \$33,000,000 compared with the current fiscal year. The net decrease consists of increases of \$16,000,000 for the rural telephone program and \$1,000,000 for the Farmers' Home Administration water-facilities loan program and a decrease of \$50,000,000 in the rural electrification program.

The total appropriations and loan funds proposed are distributed percentagewise among the broad functional programs of the Department approximately as follows:

	Percent
Rural electrification and telephone loans.....	6. 1
Conservation and development of resources.....	29. 6
Production, purchase, and distribution of commodities.....	38. 6
Farm loans.....	13. 5
Research.....	4. 1
Plant and animal diseases and pest control.....	1. 8
Cooperative extension work.....	2. 4
Marketing, regulatory, and service activities.....	2. 0
Crop insurance.....	. 7
All other.....	1. 2

In addition to the appropriations and loan funds discussed above, there are available to the Department in carrying out its programs the resources of its corporations. Net expenditures or receipts (—) of these corporations during the fiscal years 1951, 1952, and 1953, presented in detail in the Business Enterprise and Revolving Funds, and Other Net Expenditure Accounts section of this chapter, are summarized as follows:

	1951 actual	1952 estimate	1953 estimate
Commodity Credit Corporation.....	—\$581, 156, 305	\$205, 949, 611	\$252, 518, 763

[RESEARCH AND] AGRICULTURAL MARKETING ACT [OF 1946] (RMA—TITLE II)

Agricultural Marketing Act (RMA—Title II), Agriculture—

To enable the Secretary to improve and develop, independently or through cooperation among Federal and State agencies, and others, a sound and efficient system for the distribution and marketing of agricultural products under the provisions of titles II and III of the Act of August 14, 1946, as amended (7 U. S. C. 1621–1629), **[\$4,750,000] \$5,500,000: Provided**, That not less than \$600,000 of this amount shall be available for contracts in accordance with the provisions of section 205 of said Act: **Provided further**, That the Secretary may make available to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which it is made (but amounts made available to the Office of the Secretary, Office of the Solicitor, and Office of Information, shall not exceed those which the Bureau of the Budget, after a hearing thereon with representatives of the Department, shall determine), and any such amounts shall be in addition to amounts transferred or otherwise made available to other appropriation items of the Department: **Provided further**, That no part of this appropriation shall be available for work relating to fish or shellfish or any product thereof, except for the support of equitable transportation rates before Federal agencies concerned with such rates and for development of foreign markets. (*Department of Agriculture Appropriation Act, 1952.*)

Appropriated 1952, **\$4,750,000** Estimate 1953, **\$5,500,000**

PROGRAM AND PERFORMANCE

The Agricultural Marketing Act, formerly referred to as title II of the Research and Marketing Act, provides for research, service, and educational work applicable to the distribution and marketing of agricultural products. Funds are allotted for projects carried out by agencies within the Department, to State agencies on a matching basis under cooperative agreements, or for use under contract or cooperative agreements with qualified public or private institutions, organizations, or individuals.

Direct obligations are estimated to be \$5,500,000 for 1953, an increase of \$528,000 compared with 1952. The increase is to intensify work in developing methods of reducing food spoilage, saving manpower in distribution of food, and improving transportation, warehousing, and retail distribution.

1. *Marketing costs, margins, and efficiency.*—To provide information on costs and relative efficiency which will identify areas where more productive follow-up research work can be conducted, and to provide a basis for constructive educational and service work, studies are made of marketing and merchandising methods and transportation costs, and their effect on production and distribution patterns; alternative methods of performing marketing services; and factors influencing operating efficiency of the different units in the marketing system.

2. *Improvement and evaluation of product quality.*—To improve quality and acceptability of farm products and to lower marketing costs, studies are made of ways to reduce waste and spoilage, including better storage methods; and new and improved grades and standards are developed for more accurate indication of product quality.

3. *Improvements in market organization and facilities.*—To develop improvements in market organizations and facilities, studies are made of mechanization, work simplification, market locations, and other changes in market organization and their effects.

4. *Collection, analysis, and dissemination of market data.*—To facilitate orderly marketing of farm products, data are gathered, interpreted, and disseminated on current and prospective production, supplies, movement of goods, prices, and market demand; and studies are made to improve market news and other market information services.

5. *Administration.*—This activity includes the work of the national advisory committee and other special committees made up of representatives of producers, industry, science, and Government.

BUREAU OF AGRICULTURAL ECONOMICS

Salaries and Expenses, Bureau of Agricultural Economics—

For necessary expenses in carrying out the provisions of the Act establishing the Bureau of Agricultural Economics (7 U. S. C. 411) and related Acts, as follows:

Economic investigations: For conducting investigations and for acquiring and diffusing useful information among the people of the United States, relative to agricultural production, distribution, land utilization, and conservation in their broadest aspects, including farm management and practice, utilization of farm and food products, purchasing of farm supplies, farm population and rural life, farm labor, farm finance, insurance and taxation, adjustments in production to probable demand for the different farm and food products; land ownership and values, costs, prices and income in their relation to agriculture, including causes for their variations and trends, **[\$2,150,000] \$2,507,000: Provided,** That no part of the funds herein appropriated or made available to the Bureau of Agricultural Economics under the heading "Economic investigations" shall be used for State and county land-use planning, for conducting cultural surveys, or for the maintenance of regional offices.

Crop and livestock estimates: For collecting, compiling, abstracting, analyzing, summarizing, interpreting, and publishing data relating to agriculture, including crop and livestock estimates, acreage, yield, grades, staples of cotton, stocks, and value of farm crops and numbers, grades, and value of livestock and livestock products on farms, production, distribution, and consumption of turpentine and rosin pursuant to the Act of August 15, 1935 (5 U. S. C. 556b), and for the collection and publication of statistics of peanuts as provided by the Act approved June 24, 1936, as amended May 12, 1938 (7 U. S. C. 951-957), **[\$2,848,304] \$3,058,000: Provided,** That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intention of farmers as to the acreage to be planted in cotton, or for estimates of apple production for other than the commercial crop. (5 U. S. C. 511-512—establishing the Department of Agriculture; 7 U. S. C. 411—establishing the Bureau of Agricultural Economics; 411a, 411b, 475-476; Department of Agriculture Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

The Bureau is the Department's chief agency for economic research and statistical fact-finding, and makes available current data and analyses to other agencies, congressional committees, industrial groups, and the general public.

Direct obligations are estimated to be \$5,565,000 in 1953, an increase of \$157,696 compared with 1952. Principal increases are for research on farm costs and returns, which is essential for the most effective administration of farm programs, and for analyses of economic problems of present and potential irrigation areas.

1. *Economic investigations*—(a) *Economics of production*.—Research is conducted on the type and size of farms in relation to farmers' costs and returns and to total farm output of different products; efficiency in use of labor, equipment, land, and water; inventory and analysis of land resources; new and improved techniques; farm valuation, debt, taxation, tenure, risk, and insurance; and related problems.

(b) *Prices, income, and marketing*.—Statistical and economic studies are made to establish the relation between farm prices or income and parity standards, to analyze the economic situation and outlook for farm products, and to narrow the cost spread between producer and consumer.

(c) *Farm population and manpower*.—These studies cover changes in farm population and work force, especially the number of people on farms by age and sex, birth and death rates, levels of living in comparison with urban living standards, the size of the work force, and its movements, and number and wage rates of farm workers.

2. *Crop and livestock estimates*.—Basic current data are gathered for official estimates of production of crop and livestock products. About 500 national reports, based

on sample data obtained from thousands of volunteer reporters, are issued annually. In addition to their use by farmers, processors, handlers, and marketers, governmental agencies make use of them in connection with various adjustment and marketing activities, allocations, price support, and defense mobilization. Each month the Bureau determines and publishes parity prices for agricultural commodities and prices actually received.

- "Mutual security, Executive Office of the President."
- "Salaries and expenses, defense production activities, Agriculture."

AGRICULTURAL RESEARCH ADMINISTRATION

OFFICE OF ADMINISTRATOR

Salaries and Expenses, Office of Administrator, Agricultural Research Administration—

For necessary expenses of the Office of Administrator, including travel and subsistence expenses of advisory committees authorized by title III of the Act of August 14, 1946 (7 U. S. C. 1628-1629), and the maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center, **[\$541,440] \$581,000: Provided**, That the appropriation current at the time services are rendered may be reimbursed (by advance credits or reimbursements based on estimated or actual charges) from applicable appropriations, to cover the charges, including handling and other related services, for equipment rentals (including depreciation, maintenance, and repairs); for services, supplies, equipment, and material furnished: *Provided further*, That of the several appropriations of the Agricultural Research Administration, not to exceed \$15,000 shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further*, That the several appropriations of the Agricultural Research Administration shall be available for the construction, alteration, and repair of buildings and improvements: *Provided, however*, That unless otherwise provided, the cost of constructing any one building (excepting headhouses connecting greenhouses and experimental farm houses) shall not exceed \$5,000, the total amount for construction of buildings costing more than \$2,500 each shall be within the limits of the estimates submitted and approved therefor, and the cost of altering any one building during the fiscal year shall not exceed \$2,500 or 2 per centum of the cost of the building as certified by the Research Administrator, whichever is greater: **except** for the alteration of one building at Greenfield, Massachusetts, at a cost not to exceed \$7,500: *Provided further*, That not to exceed 7 per centum of the funds of any research appropriation of the Agricultural Research Administration, including the appropriation for the Office of the Administrator, may be transferred by the Administrator, with the approval of the Secretary, to any other such research appropriation in order to provide for a more effective research program: *Provided, however*, That no appropriation may be increased more than 7 per centum by such transfers. (5 U. S. C. 511-512, 565a; Department of Agriculture Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

This office coordinates all of the Department's research activities other than economic, administers the Agricultural Marketing Act (RMA—title II), and directs the Agricultural Research Administration, consisting of seven research bureaus and the Agricultural Research Center, Beltsville, Md.

Direct obligations are estimated to be \$581,000 for 1953, a decrease of \$1,440 compared with 1952.

1. *Administration and over-all direction of the Agricultural Research Administration.*—The Administrator, with the assistance of his staff, plans and directs the programs of the Administration; coordinates research activities of the Department; and develops, in cooperation with State and Territorial agricultural experiment stations and with the assistance of advisory committees, an integrated research program which will best meet the changing needs of agriculture and the Nation's requirements for food, feed, and fiber.

2. *Supervision of maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center.*—This activity covers supervision of the maintenance, operation, and the furnishing of facilities and services at the Center for work conducted by bureaus of the Department and other Government agencies, primarily on a reimbursable basis.

OBLIGATIONS BY ACTIVITIES

Research on agricultural problems of Alaska—1951, \$279,730; 1952, \$270,000; 1953, \$270,000.

PROGRAM AND PERFORMANCE

Agricultural research in Alaska, carried on as a joint program of the Department and the University of Alaska, includes soil analysis, horticulture, animal husbandry, agricultural economics, agricultural engineering, insect control, and field-crop improvement studies.

Soil surveys aid settlers in determining those areas where agriculture will be profitable. Milk production has been stimulated by devising measures for raising heifers to maturity more economically. Nutrition of mink, fox, and marten has been studied to aid fur farmers. New grain, forage, and vegetable varieties have proved profitable. Potato-breeding research has resulted in higher yields. Methods are being sought to control

insects and plant diseases attacking Alaska crops. Better methods of utilizing native lumber for farm and home construction are being developed. Economic studies are providing a basis for determining more profitable types of farming and necessary cost-price relationships.

Emphasis in 1953 will continue to be placed on improving the yields and quality of farm and dairy products, the improvement of marketing methods, and the design of more satisfactory farm structures.

3. Investigations on vegetable and animal fats and oils	363	350	350
Total obligations payable out of reimbursements from other accounts	6,157	2,700	2,700
Obligations incurred	397,394	584,700	627,700

PROGRAM AND PERFORMANCE

On recommendation and approval of the Munitions Board, investigations are made of the feasibility of developing domestic sources of supplies of any agricultural material or substitute for it determined by the Board to be strategic and critical.

Direct obligations are estimated to be \$625,000 for 1953, an increase of \$43,000 compared with 1952. Increases are proposed for pilot plant investigations on extracting tannin from canaigre and for production research on fiber plants for cordage and for jute substitutes.

1. *Research on domestic production of natural rubber.*—Investigations are carried on to make the guayule plant more usable, to improve the quality of rubber from it, and to develop methods for extraction and processing of the rubber.

2. *Investigations of domestic production of vegetable tannins.*—These studies aim at domestic production of crops from which materials for tanning leather can be derived.

3. *Investigations on vegetable and animal fats and oils.*—These studies seek to develop the domestic production of castor beans and to provide domestic oils as substitutes for those strategic uses which now require imported castor oil.

4. *Investigations on fiber plants.*—This work centers on the domestic production of fibers that can be used for such purposes as lines and ropes on naval vessels and as substitutes for jute.

OFFICE OF EXPERIMENT STATIONS

PAYMENTS TO STATES, HAWAII, ALASKA, AND PUERTO RICO

Payments to States, Hawaii, Alaska, and Puerto Rico, Office of Experiment Stations, Agricultural Research Administration—

For payments to the States, Hawaii, Alaska, and Puerto Rico to be paid quarterly in advance where applicable, to carry into effect the provisions of the following Acts relating to agricultural experiment stations:

Hatch, Adams, Purnell, Bankhead-Jones, and related Acts: Hatch Act, the Act approved March 2, 1887 (7 U. S. C. 362, 363, 365, 368, 377-379), \$720,000; Adams Act, the Act approved March 16, 1906 (7 U. S. C. 369), \$720,000; Purnell Act, the Act approved February 24, 1925 (7 U. S. C. 361, 366, 370, 371, 373-376, 380, 382), \$2,880,000; Bankhead-Jones Act, title I of the Act approved June 29, 1935 (7 U. S. C. 427-427g), sections 3 and 5, \$2,863,708, and sections 9 and 11 of said Act as added by the Act of August 14, 1946 (7 U. S. C. 427h, 427j), including administration by the Office of Experiment Stations in the United States Department of Agriculture, \$5,000,000, no part of which latter amount shall be used for beginning construction of any building costing in excess of \$15,000, except that a poultry breeding house may be constructed at Purdue University at a cost to this appropriation of not to exceed \$29,000; Hawaii, the Act approved May 16, 1928 (7 U. S. C. 386-386b), extending the

benefits of certain Acts of Congress to the Territory of Hawaii, \$90,000; Alaska, the Act approved February 23, 1929 (7 U. S. C. 386c), extending the benefits of the Hatch Act to the Territory of Alaska, \$15,000, and the provisions of section 2 of the Act approved June 20, 1936, as amended (7 U. S. C. 369a), Public Law 739, approved August 29, 1950, extending the benefits of the Adams and Purnell Acts to the Territory of Alaska, \$50,000; \$75,000; Puerto Rico, the Act approved March 4, 1931, as amended (7 U. S. C. 386d-386f), extending the benefits of certain Acts of Congress to Puerto Rico, \$90,000; in all, payments to States, Hawaii, Alaska, and Puerto Rico, \$12,428,708; \$12,453,708. (7 U. S. C. 427d; Department of Agriculture Appropriation Act, 1952.)

Obligations incurred.....	12,400,758	12,425,718	12,453,708

PROGRAM AND PERFORMANCE

Funds are allotted to the agricultural experiment stations of the land-grant colleges in the States, Hawaii, Alaska, and Puerto Rico for agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural life. The allotments are based partly on the basis of prescribed amounts and partly on the basis of rural and farm population and the need for research in smaller States. The States are contributing about \$4 to each \$1 paid by the Federal Government.

Obligations are estimated to be \$12,453,708 for 1953, an increase of \$27,990 compared with 1952. The increase is primarily for strengthening the research program at the Alaska Agricultural Experiment Station.

SALARIES AND EXPENSES

Salaries and Expenses, Office of Experiment Stations, Agricultural Research Administration—

For necessary expenses in connection with administration of grants and coordination of research with States pursuant to the Acts approved March 2, 1887, March 16, 1906, February 24, 1925, May 16, 1928, February 23, 1929, March 4, 1931, and June 20, 1936, and Acts amendatory thereto (7 U. S. C. 361–363, 365–383, 386–386f), and title I of the Act approved June 29, 1935, as amended by the Act of September 21, 1944 (7 U. S. C. 427–427g), and for the administration, operation, and maintenance of an agricultural experiment station in Puerto Rico, **[\$367,090] \$389,000**; and the Secretary shall prescribe the form of the annual financial statement required under the above Acts, ascertain whether the expenditures are in accordance with their provisions, coordinate the research work of the State agricultural colleges and experiment stations in the lines authorized in said Acts with research of the Department in similar lines, and make report thereon to Congress. (*Department of Agriculture Appropriation Act, 1952.*)

Appropriated 1952, **\$367,090**

Estimate 1953, **\$389,000**

PROGRAM AND PERFORMANCE

1. *Administration of grants and coordination of research with States.*—New and revised research proposals are evaluated, annual programs and budget allotments are reviewed, and the work and expenditures of each experiment station are examined in the field.

2. *Federal experiment station, Puerto Rico.*—Research is conducted primarily on tropical and subtropical crops of strategic or economic importance, including food, forage, and specialty crops such as quinine, rotenone, vanilla, and bamboo.

Direct obligations are estimated to be \$389,000 for 1953, a decrease of \$1,090 compared with 1952.

PROGRAM AND PERFORMANCE

Research is conducted on problems relating to food, clothing, shelter, and the other goods and services used in family living. The results are published in popular and technical bulletins. In addition, the Bureau issues a monthly news letter for promoting coordination of nutrition programs, quarterly reports on developments affecting rural family living, and a quarterly appraisal of the nutritional adequacy of the estimated per capita food supply.

Direct obligations are estimated to be \$1,430,000 for 1953, a decrease of \$6,075 compared with 1952.

1. *Food and nutrition investigations.*—Research is conducted on nutritional requirements, the composition and nutritive value of various foods, and principles and methods underlying consumer selection, preparation, and preservation of food.

AGRICULTURAL RESEARCH ADMINISTRATION— Continued

BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS—Continued

Salaries and Expenses, Bureau of Human Nutrition and Home Economics, Agricultural Research Administration—Continued

2. *Family economics investigations.*—Household buying problems are studied, including the quantities consumed and the adequacy and economy of the food, clothing, and other items used by various population groups.

3. *Textiles and clothing investigations.*—Chemical and physical properties of fabrics for clothing and household articles are studied, together with other technical problems of quality and design.

4. *Housing and household equipment investigations.*—Studies are carried on to improve the design of rural houses for comfort and efficiency and to help families with selection, care, and use of household equipment.

"Agricultural Marketing Act (RMA—title II), Agriculture."

"National school lunch program, Production and Marketing Administration."

"Working fund, Agriculture, Agricultural Research Administration."

BUREAU OF ANIMAL INDUSTRY

SALARIES AND EXPENSES

Salaries and Expenses, Bureau of Animal Industry, Agricultural Research Administration—

For expenses necessary to carry out the provisions of the Act, as amended, establishing a Bureau of Animal Industry, and related Acts, and for investigation concerned with the livestock and meat industries and the domestic raising of fur-bearing animals, as follows:

Animal research: For animal husbandry investigations; investigations of diseases of animals and of tuberculin, serums, antitoxins, and analogous products; and cooperation in the administration of regulations for the improvement of poultry, poultry products, and hatcheries, as authorized by law (7 U. S. C. 429], Public Law 662, approved August 4, 1950; \$3,250,000), \$3,681,000.

Animal disease control and eradication: For the control and eradication of tuberculosis and paratuberculosis of animals, avian tuberculosis, [Bang's disease of cattle] *brucellosis of domestic animals*, scabies in sheep and cattle, southern cattle ticks, hog cholera and related swine diseases, and dourine in horses, and other inspection and quarantine work authorized by law; for supervision of the transportation of livestock, including administration of the twenty-eight-hour law; for inspection of vessels; and for carrying out the provisions of the Act of March 4, 1913 (21 U. S. C. 151-158) and sections 56 to 60, inclusive, of the Act approved August 24, 1935 (7 U. S. C. 851-855), relating to veterinary biological products, [\$7,731,022, including \$30,000 for the acquisition of land and construction of buildings for inspection of livestock at Canadian border ports of entry] \$8,477,000: *Provided*, That no payment hereunder as compensation for any cattle condemned for slaughter for tuberculosis, paratuberculosis, or [Bang's disease] *brucellosis* shall exceed (1) \$25 for any grade animal or \$50 for any pure bred animal, (2) one-third of the difference between the appraised value and the value of salvage thereof, or (3) the amount paid or to be paid by the State or other cooperating agency, and no payment hereunder shall be made for any animal if at the time of test or condemnation it shall belong to or be upon the premises of any person, firm, or corporation to which it has been sold, shipped, or delivered for slaughter.

[Marketing agreements, hog cholera virus and serum: For carrying into effect sections 56 to 60, inclusive, of the Act approved August 24, 1935 (7 U. S. C. 851-855) regulating the marketing of anti-hog-cholera serum and hog-cholera virus, \$47,906.]

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat and meat-food products, [including the purchase of one passenger motor vehicle for replacement only, \$12,800,000: *Provided*, That hereafter reimbursement may be made by any person, firm, or organization for the expenses of meat inspection in excess of those which can be met from the amount appropriated for such purposes each year] \$13,660,000. (5 U. S. C. 511-512—establishing the Department of Agriculture, 563-564, 565a, 576; 7 U. S. C. 391—establishing the Bureau of Animal Industry, 394-396, 429-431, 433-434, 436-437, 851-855; 19 U. S. C. 1201, 1306; 21 U. S. C. 71-96, 101-105, 111-128, 130-131, 151-158; 31 U. S. C. 725a; 45 U. S. C. 71-74; 46 U. S. C. 466a-466b; 48 U. S. C. 198; 49 U. S. C. 177(e), 181(b); sec. 7 of the Act of Aug. 8, 1951 (Public Law 110); Public Law 238, approved Oct. 30, 1951; Department of Agriculture Appropriation Act, 1952.)

Appropriated 1952, \$23,828,928 Estimate 1953, \$25,818,000

* Includes \$571,072 for activities previously financed under "Eradication of foot-and-mouth disease and other contagious diseases of animals and poultry, Agricultural Research Administration."

AMOUNTS AVAILABLE FOR OBLIGATION

	1951 actual	1952 estimate	1953 estimate
Appropriation or estimate	\$24,238,000	\$23,828,928	\$25,818,000
Proposed supplemental due to pay increases		1,565,000	
Reimbursements from non-Federal sources	2,507,900	3,223,300	3,326,300
Reimbursements from other accounts	255,020	335,500	286,000
Total available for obligation	27,000,920	28,952,728	29,430,300
Unobligated balance, estimated savings	-469,119		
Obligations incurred	26,531,801	28,952,728	29,430,300
Comparative transfer to "Salaries and expenses, Office of Information, Agriculture"	-2,900		
Total obligations	26,528,901	28,952,728	29,430,300

NOTE.—Reimbursements from non-Federal sources above are from meat-packing and veterinary biological establishments and importers for overtime work and travel performed (5 U. S. C. 576; 7 U. S. C. 394, 396) and receipts from meat packers for expenses of meat inspection in excess of those which can be met from the amount appropriated (Department of Agriculture Appropriation Act, 1952).

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
<i>Direct Obligations</i>			
1. Animal research:			
(a) Animal husbandry	\$2,246,709	\$2,151,600	\$2,141,700
(b) Infectious and noninfectious diseases of animals	769,288	786,500	1,016,300
(c) Parasites and parasitic diseases of animals	520,680	526,900	523,000
Subtotal	3,536,677	3,465,000	3,681,000
2. Animal disease control and eradication:			
(a) Eradicating tuberculosis and brucellosis	5,747,479	6,308,710	6,268,710
(b) Eradicating scabies	109,243	173,200	173,200
(c) Eradicating cattle ticks	299,291	289,250	289,250
(d) Control of hog cholera and related swine diseases	28,842	32,940	32,940
(e) Determining the existence of diseases in the field	13,970	14,368	90,440
(f) Import-export inspection and quarantine	353,590	366,390	366,390
(g) Supervision over interstate movement of livestock	484,788	486,130	748,130
(h) Control of manufacture, importation, shipment, and marketing of viruses, serums, toxins, etc.	410,474	507,940	507,940
Subtotal	7,447,677	8,178,928	8,477,000
3. Meat inspection:			
(a) Meat inspection operations at packing plants under the Federal meat inspection service	12,509,257	13,455,700	13,365,700
(b) Determination of adulterations and other objectionable conditions in meat and meat food products by laboratory analysis	175,680	189,800	189,800
(c) Inspection of imported meats and meat food products	64,750	70,500	70,500
(d) Bacteriological, pathological, and zoological investigations relating to meat inspection	31,940	34,000	34,000
Subtotal	12,781,627	13,750,000	13,660,000
4. Obligations under reimbursements from non-Federal sources	2,507,900	3,223,300	3,326,300
Total direct obligations	26,273,881	28,617,228	29,144,300
<i>Obligations Payable Out of Reimbursements From Other Accounts</i>			
1. Animal research:			
(a) Animal husbandry	6,698	30,000	5,500
(b) Infectious and noninfectious diseases of animals	8	25,000	
(c) Parasites and parasitic diseases of animals	492	500	500
Subtotal	7,198	55,000	6,000
2. Animal disease control and eradication:			
(h) Control of manufacture, importation, shipment, and marketing of viruses, serums, toxins, etc.		5,000	5,000
3. Meat inspection:			
(a) Meat inspection operations at packing plants under the Federal meat inspection service	247,822	275,000	275,000
Total obligations payable out of reimbursements from other accounts	255,020	335,500	286,000
Total obligations	26,528,901	28,952,728	29,430,300

PROGRAM AND PERFORMANCE

Research and other programs serve primarily to protect and develop the livestock, meat, poultry, and related industries. About half of the funds are required for meat inspection, thus also furnishing protection to the consumer.

Direct obligations in 1953 are estimated to be \$29,144,300, of which \$25,818,000 is from appropriated funds and \$3,326,300 is from reimbursements from non-Federal sources. This is a net increase of \$527,072 compared with 1952. The increase is primarily to finance projects previously carried on under the appropriation "Eradication of foot-and-mouth disease and other contagious diseases of animals and poultry." The work involves research in European laboratories and inspection at public stockyards and in the field to detect immediately any possible introduction of foot-and-mouth disease into the United States, to prevent dissemination of the disease through movement of livestock, and to locate unknown centers of the disease.

1. *Animal research*—(a) *Animal husbandry*.—Research is conducted on all farm livestock, poultry, and domestic fur animals, except dairy cattle, to develop superior strains and types, establish the nutritive requirements of animals, and achieve efficient utilization of feed and forage in the production of meat, eggs, wool, fur, and other products.

(b-c) *Investigations of diseases and parasites*.—Research is conducted on diseases of farm livestock, including dairy cattle, poultry, and domestic fur animals to develop practical methods of control of such diseases.

2. *Animal disease control and eradication*.—Measures are devised to exclude from this country communicable diseases of foreign origin, to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics, to control and eradicate livestock diseases, and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine.

The volume of inspections and examinations annually is shown in the following table:

NUMBER OF UNITS

	1951 actual	1952 estimate	1953 estimate
Import-export inspection:			
All animals	486,683	450,000	450,000
Hides, glands, and other animal products	4,082,025,000	4,000,000,000	4,000,000,000
Public stockyards inspections: All animals	64,056,260	65,000,000	65,000,000
Supervision of production of veterinary biologics:			
Hog-cholera serum, cubic centimeters	2,218,244,100	2,257,242,815	1,971,518,000
Hog-cholera vaccine, doses	6,862,700	20,000,000	20,000,000
Other biologics:			
Cubic centimeters	629,794,500	656,816,000	665,400,000
Milligrams	111,167,400	122,485,000	132,734,000
Disks	212,000	150,000	135,000
Units	480,154,900	502,650,000	540,200,000
Field testing, dipping, and inspection:			
Tuberculosis	8,847,228	9,000,000	9,000,000
Brucellosis (Bang's disease)	5,640,836	6,000,000	6,000,000
Scabies (cattle and sheep)	6,306,630	6,500,000	6,500,000
Cattle fever ticks	5,703,945	5,500,000	5,500,000

3. *Meat inspection*.—Federal meat inspection assures clean and wholesome meat for human consumption. It includes (a) inspection of animals and of carcasses at the time of slaughter; (b) inspection at all stages of preparation of meat and meat-food products to assure sanitary handling; (c) enforcement of measures that insure informative labeling; (d) inspection of meat and meat-food products offered for importation; and (e) a system of certification to assure acceptance of domestic meats in foreign trade. Meat and meat-food products are examined for compliance with specifications of governmental purchasing

agencies for which reimbursements are received. Reimbursements are also received from meat-packing establishments for the cost of overtime work performed at their request. Amounts collected approximated \$2,730,000 in the past year. Beginning with the current fiscal year, costs of inspection beyond that which can be met with appropriated funds are also reimbursed by meat-packing establishments.

The volume of inspections and examinations annually is indicated by the following table:

ERADICATION OF FOOT-AND-MOUTH DISEASE AND OTHER CONTAGIOUS DISEASES OF ANIMALS AND POULTRY, AGRICULTURAL RESEARCH ADMINISTRATION

Eradication of Foot-and-Mouth Disease and Other Contagious Diseases of Animals and Poultry, Agricultural Research Administration—

For expenses necessary in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, including the payment of claims growing out of past and future purchases and destruction of animals (including poultry) affected by or exposed to, or of materials, contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations; and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947, and the Act of May 29, 1884, as amended (7 U. S. C. 391; 21 U. S. C. 111-122), including expenses in accordance with section 2 of said Act of February 28, 1947, the Secretary may transfer from other appropriations or funds available to the bureaus, corporations, or agencies of the Department such sums as he may deem necessary, to be available only in an emergency which threatens the livestock or poultry industry of the country, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts: *Provided*, That, except for payments made pursuant to said Act of February 28, 1947, the payment for such animals hereafter purchased may be made on appraisal based on the meat, egg-production, dairy, or breeding value, but in case of appraisal based on breeding value no appraisal of any such animal shall exceed three times its meat, egg-production, or dairy value, and, except in case of an extraordinary emergency, to be determined by the Secretary, the payment by the United States Government for any such animals shall not exceed one-half of any such appraisements: *Provided further*, That poultry may be appraised in groups when the basis for appraisal is the same for each bird: *Provided further*, That this appropriation shall be subject to applicable provisions contained in the item "Office of Administrator, Agricultural Research Administration": *Provided further*, That the Secretary of the Treasury is hereby authorized and directed to discharge indebtedness of the Commodity Credit Corporation to the Secretary of the Treasury by canceling notes issued by the Corporation to the Secretary of the Treasury in the amount of **[\$32,700,000]** **\$11,240,532** for funds transferred and expenses incurred under this head through fiscal year **[1950]** **1951** pursuant to authority granted in the Department of Agriculture Appropriation Act, **[1950]** **1951**. (21 U. S. C. 114a; Department of Agriculture Appropriation Act, 1952.)

NOTE.—The Budget estimate for "Salaries and expenses, Bureau of Animal Industry, Agricultural Research Administration," animal research and animal disease control and eradication, includes \$571,072 in fiscal year 1953 for activities previously financed under this head.

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
1. Cooperation with Mexico in control and eradication	\$7,776,356		
2. Enforcement of Mexican border quarantine	2,501,770		
3. Inspection at public stockyards and in the field	329,845		
4. Research	172,800		
5. Disposal of Mexican canned meats and meat products	38,252		
6. Undistributed		\$254,593	
Obligations incurred	10,819,023	254,593	

PROGRAM AND PERFORMANCE

This program was initiated after discovery of foot-and-mouth disease in Mexico late in 1946. Measures to prevent spread of the disease into the United States and to assist Mexico in control and eradication will be continued until it is assured that the disease has been completely eradicated. Due to the unpredictable course of the disease, the Department has been authorized to transfer needed amounts from any funds available to it. Repayment of these transfers has been made from supplemental appropriations and by canceling notes issued by the Commodity Credit Corporation to the Secretary of the Treasury. The above language for 1953 provides for cancellation of notes to discharge indebtedness of the Commodity Credit Corporation for amounts transferred and expenses incurred, including inventory adjustments, during 1951 under the 1951 Department of Agriculture Appropriation Act, as follows:

Payments from Commodity Credit Corporation	\$10,630,000
Interest	566,284
Handling expenses in connection with disposal of canned meat purchased in northern Mexico	317,482
	11,513,766
Less adjustments in value of canned meat inventory	273,234
Notes to be canceled	11,240,532

Cooperation with Mexico in control and eradication.—This consists of (a) quarantine restrictions to prevent the spread of foot-and-mouth disease, (b) inspection to detect infected animals, (c) eradication of any new outbreak of the disease, and (d) sanitary measures, which include disinfection of premises, trucks, cars, and other vehicles at centers of infection. From April 1948 through July 1950 more than 60,000,000 vaccinations were made in 4 successive series at intervals of 4 months. From 7 to 10 million animals are inspected each month. No slaughter has been necessary since August 1951.

Enforcement of Mexican border quarantine.—The entire length of the border, covering more than 1,900 miles, is patrolled to prevent entry of prohibited ruminants and swine from Mexico or entry of materials that might harbor the virus.

Disposal of Mexican canned meats and meat products.—Mexico lost an export market for about 500,000 animals annually with the closing of the United States border. Resulting congestion of the animal population increased the hazards of contagion in Mexico. As a further defensive measure in the eradication program, the United States agreed to purchase, for disposal in foreign markets, meat produced in northern Mexico and canned under adequate supervision. The meat purchased was entirely disposed of by July 1951 and no further purchases are contemplated.

3. Dairy herd improvement.....	834	1,000	1,000
Total obligations.....	1,575,307	1,574,000	1,622,000

PROGRAM AND PERFORMANCE

The Bureau conducts research to improve the producing efficiency of dairy cows and the quality of dairy products, to determine the nutritional requirements of dairy cattle and the value of feeds, and to extend the use of milk and its byproducts in new ways. The Bureau also enforces Federal regulations relating to process butter.

Direct obligations are estimated to be \$1,621,000 for 1953, an increase of \$48,000 compared with 1952. This increase is primarily for strengthening dairy herd improvement work and putting it on a current basis.

1. *Dairy cattle breeding, feeding, and management.*—Research is conducted to increase the efficiency of milk production of dairy cows through breeding, feeding, and management, with demonstrations of practices beneficial to specific regions, notably the irrigated region of the Northwest, the Great Plains region, the Coastal Plain

region, and the blue-grass region of Alabama, Mississippi, Tennessee, and Kentucky.

2. *Nutrition and physiology.*—This work includes studies of nutritional values of milk and their relation to the nutrition of the cow, physiological processes affecting the general economic usefulness of dairy cattle, and the relation of diet to these processes.

3. *Dairy herd improvement.*—Application of research to farm herds is tested by analyzing production data of individual animals and families of animals in 2,100 dairy herd improvement associations.

4. *Dairy products research.*—Studies are being conducted of the bacteriology and chemistry of milk; preservation of milk in evaporated, dried, and frozen form; and the manufacture of cheeses, ice cream, and other milk products.

5. *Administration of the Process Butter Act.*—This work involves continuous inspection of the manufacture of process butter.

Obligations incurred.....	7,667,378	7,700,000	7,689,000

PROGRAM AND PERFORMANCE

The Bureau conducts research in the field of chemistry and related physical sciences on utilization of agricultural commodities, residues, and byproducts in the creation of improved foods, feeds, drugs, fabrics, industrial chemicals, and other nonedible products, mainly through 4 regional research laboratories and 10 smaller field stations.

Obligations are estimated to be \$7,689,000 for 1953, a decrease of \$11,000 compared with 1952.

1. *Cereal and forage crop utilization investigations.*—Experiments are conducted to develop new products from, and outlets for, grains and forage crops.

2. *Cotton and other fiber utilization investigations.*—These investigations deal with fundamental studies of the chemical and physical properties of fibers, yarns, and fabrics; improved chemical and mechanical processing of cotton, wool, and other vegetable and animal fibers; and the development of new or improved products from vegetable and animal fibers.

3. *Fruit and vegetable utilization investigations.*—Research is conducted to devise better processing methods, to create new food products, to increase the value of by-products, and to solve waste disposal problems.

AGRICULTURAL RESEARCH ADMINISTRATION— Continued

BUREAU OF AGRICULTURAL AND INDUSTRIAL CHEMISTRY—Continued

Salaries and Expenses, Bureau of Agricultural and Industrial Chemistry, Agricultural Research Administration—Con.

4. *Oilseed utilization investigations.*—Research is conducted to improve the quantity and quality of oil and meal obtained from oilseeds and to increase processing efficiency.

5. *Sugar and special plants utilization investigations.*—Research is undertaken on improving processing of sugarcane, sugar beets, sirups, and byproducts; processing pine-tree gum; and development of foods and pharmaceuticals from special plants.

6. *Poultry, dairy, and animal products utilization investigations.*—Research centers on improvement of methods for preserving poultry products and for utilizing poultry byproducts; development of methods for the preparation of egg products having superior quality and longer storage life; industrial utilization of dairy byproducts and wastes; and development of new uses for animal fats and oils as emulsifiers, detergents, and lubricating oils.

7. *Agricultural residues utilization investigations.*—Research is conducted to develop and extend the use of agricultural residues in the manufacture of pulp, paper, container boards, building board, and heavy boxboard; filters; extenders for adhesives and plastics; abrasive materials; and industrial chemicals.

BUREAU OF PLANT INDUSTRY, SOILS, AND AGRICULTURAL ENGINEERING

Salaries and Expenses, Bureau of Plant Industry, Soils, and Agricultural Engineering, Agricultural Research Administration—

Plant, soil, and agricultural engineering research: For expenses necessary for investigations, experiments, and demonstrations concerning plants, soils, and agricultural engineering, including those related to the production, improvement, handling, processing, transportation, and storage of farm and other crops; control of weeds, plant diseases, and nematodes; discovery and introduction of new and useful plants, both foreign and native; soil and water management to improve soil productivity; the relation of soils to plant, animal, and human nutrition; classification and mapping of soils; fertilizers, liming materials, and soil amendments; farm machinery and processing equipment; farm buildings, and farm electrification; and for the acquisition (not to exceed one), operation, and maintenance of airplanes; [\$10,589,730, including not to exceed \$275,000 for the construction of a laboratory at Orlando, Florida] \$11,547,000.

National Arboretum: For the maintenance and development of the National Arboretum established under the provisions of the Act approved March 4, 1927 (20 U. S. C. 191-194), [\$136,920] \$149,000. (5 U. S. C. 511-512—establishing the Department of Agriculture; 524 establishing the Bureau; 563, 564; Department of Agriculture Appropriation Act, 1952.)

Appropriated 1952, \$10,726,650

Estimate 1953, \$11,696,000

Total obligations.....	10,842,200	11,693,650	11,898,000

PROGRAM AND PERFORMANCE

The Bureau conducts research on (1) improvement and more efficient production of crops, fruits, vegetables, and other plants, including the development of methods for controlling plant diseases; (2) soil management, irrigation, and fertilizers; and (3) application of engineering principles to agriculture. It also operates, maintains, and develops the National Arboretum.

Direct obligations are estimated to be \$11,696,000 for 1953, an increase of \$211,350 compared with 1952. The principal increases are for (1) fertilizer technology and evaluation investigations and (2) soil surveys and investigations for Bureau of Reclamation projects.

1. *Plant, soil, and agricultural engineering research.*—The research consists primarily of field, laboratory, and greenhouse experiments conducted at approximately 200 locations throughout the country, usually in cooperation with State agricultural experiment stations or other public or private agencies.

(a) *Field crop investigations.*—Research is conducted on the production and improvement of the principal field crops and the control of their diseases to insure ample supplies of quality food for an increasing population and provide fibers and raw materials in the quantities and kinds needed by industry. Improved methods for controlling weeds are also developed.

(b) *Horticultural crop investigations.*—Research is conducted on production and improvement of fruit, vegetable, nut, and ornamental crops; on the control of their diseases; and on economical methods of their handling, processing, transportation, and storage. Plant explorations are made to introduce new plants and strains from all parts of the world as new crops or for breeding varieties superior to those now grown.

(c) *Forest disease investigations.*—This research consists primarily of finding effective methods for controlling diseases of forest trees and products and the development of tree varieties with disease resistance. Losses from disease approach or exceed the losses from fire.

(d) *Soils, fertilizers, and irrigation investigations.*—These investigations are conducted to develop the best soil and water management practices; improve fertilizers and liming materials; classify and map soils with particular respect to crop production capacity and manage-

ment practices; and to determine the relation of soils to plant, animal, and human nutrition.

(e) *Agricultural engineering investigations.*—This research is aimed at improvement of farm machinery, development of better types of farm buildings and of equipment for handling and processing farm products locally, and development and adaptation of electrical equipment to farm use.

2. *National Arboretum.*—The Arboretum, located in the District of Columbia, provides an extensive collection of living ornamental shrubs and trees from this country and abroad.

BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

SALARIES AND EXPENSES

Salaries and Expenses, Bureau of Entomology and Plant Quarantine, Agricultural Research Administration—

For expenses necessary for investigations, experiments, demonstrations, and surveys for the promotion of economic entomology, for investigating and ascertaining the best means of destroying insects and related pests injurious to agriculture, for importing useful and beneficial insects and bacterial, fungal, and other diseases of insects and related pests, for investigating and ascertaining the best means of destroying insects affecting man and animals, and the best ways of utilizing beneficial insects, for carrying into effect the provisions of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), the Honey Bee Act (7 U. S. C. 281-283), the Insect Pest Act (7 U. S. C. 141-144), the Mexican Border Act (7 U. S. C. 149), the Act of May 9, 1938, relating to grasshoppers, Mormon crickets, and chinch bugs (7 U. S. C. 148-148e), and the Organic Act of 1944 (7 U. S. C. 147a), as amended, authorizing the eradication, control, and prevention of spread of injurious insects and plant pests; including the operation and maintenance of airplanes and the purchase of not to exceed two, as follows:

Insect investigations: For the investigation of insects affecting fruits, grapes, nuts, trees, shrubs, forests and forest products, truck and garden crops, cereal, forage and range crops, cotton, tobacco, sugar plants, ornamental and other plants and agricultural products, household possessions, and man and animals; for bee culture and apiary management; for classifying, identifying, and collecting information to determine the distribution and abundance of insects; for investigations in connection with introduction of natural enemies of injurious insects and related pests and for the exchange with other countries of useful and beneficial insects and other arthropods; for developing methods, equipment, and apparatus to aid in enforcing plant quarantines and in the eradication and control of insect pests and plant diseases; and for investigations of insecticides and fungicides, including methods of their manufacture and use and the effects of their application, [\$3,650,000] \$3,869,000: *Provided*, That of the amount allotted for oriental fruitfly, not to exceed \$250,000 may be used for contracts with public or private agencies for research in accordance with section 10 (a) of the Act of August 14, 1946 (7 U. S. C. 427i), and the amounts obligated for contract research shall remain available until expended.

Insect and plant-disease control: For carrying out operations or measures to eradicate, suppress, control, or to prevent or retard the spread of Japanese beetle, sweetpotato weevil, Mexican fruitflies, phony peach and peach mosaic, cereal rusts, pink bollworm and *Thurberia* weevil, golden nematode, citrus blackfly, white-fringed beetle, Hall scale, and gypsy and brown-tail moths, and grasshoppers, Mormon crickets, and chinch bugs in accordance with the Act of May 9, 1938 (7 U. S. C. 148-148e), including the enforcement of

quarantine regulations and cooperation with States to enforce plant quarantines as authorized by the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), and including the establishment of such cotton-free areas as may be necessary to stamp out any infestation of the pink bollworm as authorized by the Act of February 8, 1930 (46 Stat. 67), and for cooperation with States in the compensation of growers for losses resulting from the destruction of or for not planting potatoes and tomatoes on lands infested or exposed to infestations of the golden nematode for the purpose authorized by the Golden Nematode Act (Public Law 645, approved June 15, 1948), \$4,600,000 7 U. S. C. 150-150q), \$5,672,000: *Provided*, That no part of this appropriation shall be used to pay the cost or value of trees, farm animals, farm crops, or other property injured or destroyed, except potatoes and tomatoes as authorized under the Golden Nematode Act: *Provided further*, That, in the discretion of the Secretary, no part of this appropriation shall be expended for the control of sweetpotato weevil in any State until such State has provided cooperation necessary to accomplish this purpose, or for barberry eradication until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by States, counties, or local authorities, or by individuals or organizations for the accomplishment of this purpose, or with respect to the golden nematode except as prescribed in section 4 of the Golden Nematode Act.

Plant quarantines: For operations against the introduction of insect pests or plant diseases into the United States, including the enforcement of foreign-plant quarantines and regulations promulgated under sections 5 and 7 of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), the Insect Pest Act of 1905 (7 U. S. C. 141-144), and the Mexican Border Act of 1942 (7 U. S. C. 149), for enforcement of domestic-plant quarantines as they pertain to Territories and districts of the United States, for the enforcement of plant quarantines through inspection in transit, including the interception and disposition of materials found to have been transported in violation of Federal plant quarantine laws or regulations, and operations under the Terminal Inspection Act (7 U. S. C. 166) and enforcement of regulations governing the movement of plants into and from the District of Columbia promulgated under section 15 of the Plant Quarantine Act of August 20, 1912, as amended, and for inspection and certification of plants and plant products to meet the sanitary requirements of foreign countries, as authorized in section 102 of the Organic Act of 1944 (7 U. S. C. 147a), [\$2,600,000] \$2,759,000. (5 U. S. C. 511-512—establishing the Department of Agriculture; 563-564. The foregoing citations apply to all appropriation items under the Bureau which are not based upon specific legislative authority incorporated in the language of the item; 7 U. S. C. 145-148a, 148c-e; 16 U. S. C. 581-581c; Public Res. 47, approved May 21, 1928; Public Res. 42, approved Feb. 8, 1930; Department of Agriculture Appropriation Act, 1952.)

Appropriated 1952, \$10,850,000 Estimate 1953, \$12,300,000

* Includes \$832,000 for grasshopper, Mormon cricket, and chinch bug control and special surveys previously carried under "Control of emergency outbreaks of insects and plant diseases, Bureau of Entomology and Plant Quarantine, Agricultural Research Administration." The amounts obligated in 1951 and 1952 are shown in the schedules as comparative transfers.

PROGRAM AND PERFORMANCE

The Bureau conducts research on harmful and beneficial insects, disseminates information on their control and use, and enforces Federal plant quarantines and regulatory orders.

Obligations are estimated to be \$12,300,000 for 1953, a decrease of \$148,000 compared with 1952.

1. *Insect investigations.*—Investigations are made of insects for control of those which are injurious, for utilization of those which are beneficial, and for better management of those (such as the honey bee) which produce useful products. Insecticides are studied and new formulations developed and tested in order that growers may protect their crops and animals more effectively and economically.

2. *Insect and plant disease control.*—This work, designed to protect agriculture from destructive insects and plant diseases, includes inspection to detect and appraise infestations, certification of regulated articles, supervision of treatments required by plant quarantines, applications of pesticides, and use of other methods of combating infestations.

3. *Plant quarantines.*—Protective measures, primarily inspections at ports of entry, are carried out to prevent the introduction from abroad of insect pests and plant diseases, and American exporters of plants and plant products are served by certifying the absence of diseases.

CONTROL OF EMERGENCY OUTBREAKS OF INSECTS AND PLANT DISEASES

Control of Emergency Outbreaks of Insects and Plant Diseases, Bureau of Entomology and Plant Quarantine, Agricultural Research Administration—

For expenses necessary to carry out the provisions of the joint resolution approved May 9, 1938 (7 U. S. C. 148-148e), including the operation and maintenance of airplanes [and the purchase of not to exceed two, and surveys and], control operations in Canada in co-operation with the Canadian Government or local Canadian authorities, and the employment of Canadian citizens, [\$1,800,000, of which] \$1,000,000, which shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the purposes of said joint resolution only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds necessary to meet emergency conditions. (*Department of Agriculture Appropriation Act, 1952.*)

Appropriated 1952, \$1,800,000

Estimate 1953, * \$1,000,000

* Excludes \$832,000 for grasshopper, Mormon cricket, and chinch bug control and special surveys transferred in the estimates to "Salaries and expenses, Bureau of Entomology and Plant Quarantine, Agricultural Research Administration," insect and plant disease control.

PROGRAM AND PERFORMANCE

Flexible year-to-year programs are conducted to combat emergency outbreaks of insects and plant diseases.

The total appropriation requested is \$1,000,000. This represents, on a comparable basis, no change from fiscal year 1952. This appropriation is used only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds it necessary to meet emergency conditions.

Miscellaneous

Allocations Received From Other Appropriation Accounts—

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriations, as follows:

"Agricultural Marketing Act (RMA—title II), Agriculture."
"Control of forest pests, Agriculture."
"Working funds, Agriculture, Agricultural Research Administration."

CONTROL OF FOREST PESTS

Control of Forest Pests, Agriculture—

For expenses necessary for carrying out operations, measures, or surveys necessary to eradicate, suppress, control, or to prevent or retard the spread of insects or diseases which endanger forest trees on any lands in the United States, and for such quarantine measures relating thereto as may be necessary pursuant to the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), including the purchase (not to exceed two) and operation and maintenance of airplanes, and construction and alteration of necessary buildings: *Provided*, That the cost of constructing or altering any one building during the fiscal year shall not exceed \$2,500, as follows:

Forest Pest Control Act: For carrying out the provisions of the Act approved June 25, 1947 (16 U. S. C., Supp. I, 594-1-594-5), **[\$2,700,000] \$4,000,000**, of which \$500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the purposes of said Act only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds necessary to meet emergency conditions.

White pine blister rust: White pine blister rust, pursuant to the Act of April 26, 1940 (16 U. S. C. 594a), **[\$3,300,000] \$4,000,000**, of which \$505,000 shall be available to the Department of the Interior for the control of white pine blister rust on or endangering Federal lands under the jurisdiction of that Department or lands of Indian tribes which are under the jurisdiction of or retained under restrictions of the United States; **[\$1,750,000] \$2,213,000** to the Forest Service for the control of white pine blister rust on or endangering lands under its jurisdiction; and **[\$1,045,000] \$1,282,000** to the Bureau of Entomology and Plant Quarantine for leadership and general coordination of the entire program, method development, and for operations conducted under its direction for such control, including, but not confined to, the control of white pine blister rust on or endangering State and privately owned lands. (*Department of Agriculture Appropriation Act, 1952.*)

Appropriated 1952, **\$6,000,000**

Estimate 1953, **\$8,000,000**

Total obligations.....	7,113,420	6,000,000	8,000,000

PROGRAM AND PERFORMANCE

Obligations are estimated to be \$8,000,000 for 1953, an increase of \$2,000,000 compared with 1952.

1. *Forest Pest Control Act*.—Operations consist of (a) surveys to detect and appraise the danger of insects and plant diseases which injure or destroy forest resources and (b) suppressive measures in cooperation with land-managing agencies before extensive damage is done and while areas requiring treatment are small. Increases are proposed for combating insect infestations of timber almost entirely on Federal lands, and for continuing the program to control the Engelmann spruce bark beetle in Colorado.

2. *White pine blister rust*.—Protection of white pine trees from blister rust is provided in cooperation with land-managing agencies by removing ribes (alternate host plants) from areas where white pine grows. Since this program was initiated in 1919, ribes have been removed from approximately 14,400,000 acres. A small amount of maintenance work is needed on this acreage to keep the ribes suppressed. Approximately 11,600,000 acres require further work. Increases are proposed to control the spread of white pine blister rust on an additional 315,000 acres of white pine on national forest lands and State and private lands adjacent to or intermingled with Federal lands in the Northwest.

FOREST SERVICE

INTRODUCTORY STATEMENT

The Service carries on three primary functions: (1) Protection, development, and use of more than 181,000,000 acres of land in national forests in the United States, Alaska, and Puerto Rico; (2) cooperation with the States and private forest landowners to obtain better fire protection on approximately 427,000,000 acres of forest lands and better forest practices on about 345,000,000 acres of privately owned commercial timber lands, to encourage reforestation by distributing planting stock to landowners, and to stimulate development and management of State, county, and community forests; and (3) forest and range research to bring about increasing productivity and more profitable land use. These functions include land acquisition, construction and maintenance of roads and trails, flood control, and other cooperative projects.

Direct obligations in 1953 are estimated to be \$67,357,560, of which \$67,244,680 is from appropriated funds and \$112,880 is from reimbursements from non-Federal sources. This is a decrease of \$1,141,976 compared with 1952. Principal increases for timber sales preparation and administration, additional fire-prevention work, and for the construction of smoke-jumper headquarters, are more than offset by a decrease in forest roads and trails. Because of severe drought in the West, 1951 was one of the most difficult fire years of recent record. Present estimates indicate that a supplemental appropriation of \$3,500,000 will be needed in fiscal year 1952 for fighting forest fires.

SALARIES AND EXPENSES

Salaries and Expenses, Forest Service—

For expenses necessary, including not to exceed \$10,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); to experiment and make investigations and report on forestry, national forests, forest fires, and lumbering, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods, for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost [not to exceed \$1,000] of constructing a water-supply or sanitary system and of connecting the same with any such building, and exclusive of the cost of any tower upon which a lookout house may be erected, shall not exceed \$15,000, (\$22,500 in Alaska), with the exception that any building erected, purchased, or acquired, the cost of which was \$15,000 or more, may be improved out of the appropriations made under this Act for the Forest Service by an amount not to exceed 2 per centum of the cost of such building as certified by the Chief of the Forest Service; to protect, administer, and improve the national forests, including tree planting and other measures to prevent erosion, drift, surface wash, soil waste, and the formation of floods, and to conserve water; to ascertain the natural conditions upon and utilize the national forests, to transport and care for fish and game supplied to stock the national forests or the waters therein; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service, as follows:

National forest protection and management: For the administration, protection, use, maintenance, improvement, and development of the national forests, including the establishment and maintenance of forest tree nurseries, including the procurement of tree seed and nursery stock by purchase, production, or otherwise, seeding and tree planting and the care of plantations and young growth; the operation and maintenance of aircraft and the purchase of not to exceed three; the maintenance of roads and trails and the construction and maintenance of all other improvements necessary for the proper and economical administration, protection, development, and use of the national forests, including experimental areas under Forest Service administration, except that where direct purchases will be more

economical than construction, improvements may be purchased; the construction (not to exceed \$15,000 for any one structure), equipment, and maintenance of sanitary and recreational facilities; timber cultural operations; development and application of fish and game management plans; propagation and transplanting of plants suitable for planting on semiarid portions of the national forests; estimating and appraising of timber and other resources and development and application of plans for their effective management, sale, and use; expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U. S. C. 514); examination, classification, surveying, and appraisal of land incident to effecting exchanges authorized by law and of lands within the boundaries of the national forests that may be opened to homestead settlement and entry under the Act of June 11, 1906, and the Act of August 10, 1912 (16 U. S. C. 506-509), as provided by the Act of March 4, 1913 (16 U. S. C. 512); investigation and establishment of water rights, including the purchase thereof or of lands or interests in lands or rights-of-way for use and protection of water rights necessary or beneficial in connection with the administration and public use of the national forests; and all expenses necessary for the use, maintenance, improvement, protection, and general administration of the national forests, **[\$27,322,025] \$30,018,000**, of which not to exceed \$75,000 shall be available for the purchase of three nursery sites.

Fighting forest fires: For fighting and preventing forest fires on or threatening lands under Forest Service administration, including lands under contract for purchase or in process of condemnation for Forest Service purposes, and for liquidation of obligations incurred in the preceding fiscal year for such purpose, \$6,000,000, of which \$2,500,000 shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds necessary to meet emergency conditions.

Forest research: For forest research at forest or range experiment stations, the Forest Products Laboratory, or elsewhere, in accordance with the provisions of sections 1, 2, 7, 8, 9, and 10 of the Act approved May 22, 1928, as amended (16 U. S. C. 581, 581a, 581f-581i), including the construction and maintenance of improvements; fire, silvicultural, watershed, and other forest investigations and experiments; investigations and experiments to develop improved methods of management of forest and other ranges; experiments, investigations, and tests of forest products; a comprehensive forest survey; and investigations in forest economics; **[\$5,108,603: Provided, That hereafter funds may be received from any State, other political subdivision, organization, or individual for the purpose of establishing or operating any forest research facility located within the United States, its Territories, or possessions] \$5,397,000. (5 U. S. C. 511-512—establishing the Department of Agriculture; 524—establishing the Bureau of Forestry; 565a; 16 U. S. C. 471-583i; 31 U. S. C. 534; Act of June 20, 1910, Public Law 219, Department of Agriculture Appropriation Act, 1952.)**

Appropriated 1952, **\$38,430,628**

Estimate 1953, **\$41,415,000**

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
<i>Direct Obligations</i>			
1. National forest protection and management:			
(a) Resource protection and use.....	\$25,689,086	\$26,916,425	\$28,133,000
(b) Resource development.....	1,761,187	1,897,600	1,885,000
2. Fighting forest fires: Fire suppression.....	6,096,221	5,408,571	6,000,000
3. Forest research:			
(a) Forest and range management investigations.....	3,013,742	3,249,037	3,249,834
(b) Forest products investigations.....	1,291,255	1,261,168	1,249,268
(c) Forest resources investigations.....	854,259	906,398	897,898
4. Obligations under reimbursements from non-Federal sources.....	269,584	111,355	111,455
Total direct obligations.....	38,975,334	39,750,554	41,526,455
<i>Obligations Payable Out of Reimbursements From Other Accounts</i>			
5. Rental of equipment to and repair of equipment for other activities of Forest Service and other Federal agencies.....	3,612,275	3,785,080	3,785,680
6. Sale of supplies, materials, and equipment to other activities of Forest Service and to Federal agencies.....	288,445	252,500	252,550
7. Construction and maintenance of improvements.....	90,426	105,000	105,075
8. Protection of intermingled and adjacent forest lands.....	19,197	26,500	26,520
9. Surveys, land appraisals, mapping, cruising timber, and preparation of timber management plans, snow scale readings, etc., on national forest and other lands.....	27,727	31,800	31,830
10. Fire suppression on intermingled and adjacent lands under administration other agencies.....	121,556	125,000	125,000
11. Investigations at experimental forests and ranges.....	23,968	26,500	26,520
12. Investigations at forest products laboratory.....	37,186	53,000	53,050
13. Special economic investigations.....	55,407	63,500	63,555
Total obligations payable out of reimbursements from other accounts.....	4,276,187	4,468,880	4,469,780
Total obligations.....	43,251,521	44,219,434	45,996,235

PROGRAM AND PERFORMANCE

1. *National forest protection and management—(a) Resource protection and use.*—The national forests are protected from fire, and their resources are managed in such ways as to bring about maximum sustained production.

MAIN WORKLOAD FACTORS

Description	1951 actual	1952 estimate	1953 estimate
Area administered and protected.....acres.....	181,255,449	181,350,000	181,450,000
Timber managed and protected.....thousand board-feet.....	600,000,000	600,000,000	600,000,000
Timber harvested.....thousand board-feet.....	4,600,000	4,600,000	5,000,000
Forest fires controlled.....number, calendar year.....	10,103	11,000	11,000
Area burned.....acres, calendar year.....	371,743	425,000	350,000
Grazing use.....number of permits.....	26,708	26,700	26,700
Special use permits.....number.....	49,806	51,300	52,800
Visitors to national forests.....	27,367,000	28,500,000	29,500,000
Important watershed lands protected.....acres.....	160,000,000	160,000,000	160,000,000

FOREST SERVICE—Continued**SALARIES AND EXPENSES—continued****Salaries and Expenses, Forest Service—Continued****MAIN WORKLOAD FACTORS—continued**

Description	1951 actual	1952 estimate	1953 estimate
Big-game animals.....number..	2,500,000	2,500,000	2,500,000
Receipts (by fiscal years):			
Timber sales.....	\$52,511,511	\$56,550,000	\$62,675,000
Grazing.....	4,165,573	4,450,000	4,500,000
Land use and power.....	883,203	880,000	880,000
Total receipts.....	57,560,287	61,880,000	68,055,000

(b) *Resource development.*—Main factors are shown in following table:

MAIN WORKLOAD FACTORS

[In acres]

	1951 actual	1952 estimate	1953 estimate
Planted to trees (annual).....	25,576	25,500	27,500
Planted to trees (cumulative).....	1,304,662	1,330,162	1,357,662
Still to be planted (total).....	4,056,276	4,030,776	4,003,276
Reseeded to range grasses (annual).....	60,000	60,000	70,000
Reseeded to range grasses (cumulative).....	400,000	460,000	530,000
Still to be reseeded (total).....	3,600,000	3,540,000	3,470,000

2. *Fighting forest fires.*—This provides for employment of additional manpower and other facilities to suppress forest fires which cannot be controlled by the fire control organization provided for under the activity "National forest protection and management."

3. *Forest research.*—(a) *Forest and range management investigations.*—Research is conducted at forest experimental stations and elsewhere to provide private and public land managers and owners with a sound basis for protection and management of timber, range, and watershed lands.

(b) *Forest products investigations.*—These studies, carried out by the Forest Products Laboratory, aid in protecting and enhancing the value and utility of forest products.

(c) *Forest resources investigations.*—These investigations are conducted to inventory and appraise the condition of forest lands and to furnish other information on supply, production, and utilization.

FOREST DEVELOPMENT ROADS AND TRAILS**Forest Development Roads and Trails, Forest Service—**

For expenses necessary for carrying out the provisions of section 23 of the Federal Highway Act approved November 9, 1921, as amended (23 U. S. C. 23, 23a), relating to forest development roads and trails, including the construction, reconstruction, and maintenance of roads and trails on experimental areas under Forest Service administration, \$13,000,000, which sum is authorized to be appropriated by the Acts of June 29, 1948 (Public Law 834), and September 7, 1950 (Public Law 769), to remain available until expended: *Provided*, That this appropriation shall be available for the rental, purchase, construction, or alteration of buildings necessary for the storage and repair of equipment and supplies used for road and trail construction and maintenance, but the total cost of any such building purchased, altered, or constructed under this authorization shall not exceed \$15,000 (\$22,500 in Alaska) with the exception that any building erected, purchased, or acquired,

the cost of which was \$15,000 or more, may be improved within any fiscal year by an amount not to exceed 2 per centum of the cost of such buildings certified by the Chief of the Forest Service. (*Department of Agriculture Appropriation Act, 1952.*)

Appropriated 1952, \$13,000,000 Estimate 1953, \$13,000,000

PROGRAM AND PERFORMANCE

Roads and trails are essential for the protection and management of the national forests and for the utilization of their resources. The existing system consists of approximately 107,000 miles of earth or gravel-surfaced roads and 127,000 miles of supplemental trails.

OBLIGATIONS BY ACTIVITIES

Acquisition of lands for national forests—1951, \$248,504; 1952, \$75,000; 1953, \$75,000.

PROGRAM AND PERFORMANCE

Lands are acquired to protect the watersheds of navigable streams and to increase the production of timber. The National Forest Reservation Commission, composed of two Senators, two Representatives, the Secretaries of the Army, Interior, and Agriculture, has approved the establishment of 78 national forest purchase units in 33 States, mainly in the eastern half of the United States. Less than one-half of the land suitable for national forest purposes within these units has been acquired; there remain 23 million acres to be purchased. The present value

of forest lands thus purchased to date is conservatively estimated at \$180,000,000, which is twice their cost.

PROGRAM AND PERFORMANCE

On the basis of agreements with certain counties in California, Nevada, and Utah, national forest receipts, including the portions which would normally be paid to county road and school funds, are used for purchase by the Government of privately owned lands within the national forests to aid in the control of soil erosion and flood damage. A total of 131,616 acres have been acquired as of June 30, 1951, and an additional 513,338 acres remain to be purchased.

PROGRAM AND PERFORMANCE

This program, for the most part carried on in cooperation with the States, encourages private timber growing through assistance in preventing and suppressing forest fires, reforestation of denuded and poorly stocked areas, good management of woodlands, and farm forestry extension work. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce 90 percent of all timber cut. The fire control program applies to all forest lands within the boundaries of organized protection units. The balance of the program concentrates on small forest properties in private ownership because (a) 76 percent of the private commercial forest acreage is in small holdings averaging only about 62 acres each, (b) the small-owner group comprises 99 percent of private forest owners, and (c) present cutting practices are poorest on these small properties.

1. *Cooperation in forest-fire control.*—Assistance is furnished 43 States and Alaska in preventing and suppressing forest fires on private and State-owned lands by financial aid, training, procurement of equipment, and a Nation-wide fire-prevention campaign. All but one-sixth of the 427,000,000 acres of non-Federal acres are now covered. Acreage burned on protected areas was held to 0.95 percent

as against an estimated 17.72 percent on unprotected lands. Of the total expenditures under this program, 62 percent is contributed by States and counties, 8 percent by private owners, and 30 percent by the Federal Government.

2. *Cooperation in forest tree planting.*—To encourage woodland owners to plant trees on the more than 60 million acres of inadequately stocked private forest land, trees are provided at less than cost, with the Federal Government sharing the cost with the States to the extent of one-fourth. Since this program began in 1924, about 2,400,000 acres have been planted.

3. *Cooperation in forest management and processing.*—In cooperation with State foresters, 243 projects in 1,000 counties are operated to aid small woodland owners in applying good management to their timber holdings, covering some 25,000 owners and about 2,560,000 acres. Small processors of primary forest products receive similar technical assistance.

4. *Cooperation in farm forestry extension.*—As a part of the State agricultural extension work, forestry educational work is carried on among farmers by demonstrations, meetings, training schools, and dissemination of information.

5. *General forestry assistance.*—Assistance is given by field technicians in response to inquiries. Also included is administration of nearly 500,000 acres of federally owned forest land under long-term lease to the States.

COOPERATIVE RANGE IMPROVEMENTS

Cooperative Range Improvements, Forest Service—

For artificial revegetation, construction, and maintenance of range improvements, control of rodents, and eradication of poisonous and noxious plants on national forests, as authorized by section 12 of the Act of April 24, 1950 (Public Law 478) 16 U. S. C. 580h), \$700,000, to remain available until expended: *Provided*, That no part of this appropriation shall be available in any national forest in excess of

three times the amount available for such forest from sources (including claims recognized by the Act of December 29, 1950, and receipts under 16 U. S. C. 500) other than Federal sources. (*Department of Agriculture Appropriation Act, 1952.*)

Appropriated 1952, \$700,000

Estimate 1953, \$700,000

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriations, as follows:

"Administrative expenses, sec. 392, Agricultural Adjustment Act of 1938."
 "Control of forest pests, Agriculture."
 "Flood control, Agriculture."
 "Local administration, sec. 388, Agricultural Adjustment Act of 1938, Agriculture."
 "Agricultural Marketing Act (RMA—title II), Agriculture."
 "Mutual security, Executive Office of the President."
 "Forest highways, Bureau of Public Roads."
 "Working funds, Agriculture, general."
 "Salaries and expenses, defense production activities, Agriculture."

FLOOD CONTROL

Flood Control, Agriculture—

For expenses necessary, in accordance with the Flood Control Act, approved June 22, 1936 (Public Law 738), as amended and supplemented, to make preliminary examinations and surveys, and to perform works of improvement, and to plan the agricultural phases of the development of the Columbia Basin area, the Arkansas-White-Red River area, [and] the New England-New York area, the Colorado River area, and the Missouri River area, in accordance with the provisions of laws relating to the activities of the Department, including not to exceed \$100,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed \$100 per diem, to remain available until expended, [\$6,372,800] \$7,750,000, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood-control purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated, nor shall any part of such funds be used for the purchase of lands in the counties of Adair, Cherokee, and Sequoyah, in the State of Oklahoma, without the specific approval of the Board of County Commissioners of the county in which such lands are situated: *Provided further*, That of the funds available herein, not in excess of [\$6,000,000] \$5,556,540 (with which shall be merged the unexpended balance of funds heretofore made available for these purposes) may be expended in watersheds heretofore authorized by section 13 of the Flood Control Act of December 22, 1944, for necessary gully control, floodwater detention, and floodway structures in areas other than those over which the Department of the Army has jurisdiction and responsibility.

Flood control: For an additional amount, in accordance with the provisions of the Flood Control Act of June 22, 1936 (Public Law 738), as amended and supplemented, to expedite investigations and surveys in critical areas in the Missouri and Upper Mississippi River watersheds and the submission of reports thereof to the Congress, \$186,800, to be merged with the appropriation made under this head in the Department of Agriculture Appropriation Act, 1952. (Act of June 22, 1936 (Public Law 738, 74th Cong.), as amended and supplemented; Second Supplemental Appropriation Act, 1952; Department of Agriculture Appropriation Act, 1952.)

FLOOD CONTROL—Continued**Flood Control, Agriculture—Continued**

PROGRAM AND PERFORMANCE

Flood-control work on watersheds aims to prevent or reduce floodwater and sediment damages in upstream areas and to reduce sedimentation of river channels and reservoirs by (1) development of recommended programs of measures to retard runoff and water flow and prevent erosion which are based on examination and survey of watersheds and presented to the Congress in survey reports, and (2) installation of the recommended watershed improvement measures when approved by the Congress. The measures are complementary to the mainstream flood-control structures and works constructed by the Corps of Engineers and other agencies. In general, measures which provide conservation benefits and help increase production are installed by private owners with technical assistance and some special materials and equipment provided by the Department; measures which principally benefit downstream areas are installed at public expense, Federal, State, or local, and, when installed on private lands, are maintained by private owners and other local interests.

Direct obligations are estimated to be \$7,750,000 for 1953, a net increase of \$487,903 compared with 1952. The proposed increase will permit (1) more rapid installation of works of improvement on watersheds where flood-control operations have been authorized, and (2) preparation of the agricultural phases of comprehensive plans for development of river basin areas in cooperation with other agencies.

The principal increases consist of \$446,901 for installing flood-control watershed works of improvement and \$200,000 for the preparation of the agricultural phases of a comprehensive plan for the development of the Colorado River area.

SOIL CONSERVATION SERVICE

SALARIES AND EXPENSES

Salaries and Expenses, Soil Conservation Service—

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U. S. C. 590a-590f), title III of the Act of July 22, 1937 (7 U. S. C. 1010-1012), and the Act of August 11, 1945 (7 U. S. C. 1011 note), including research and investigations into the character, cause, extent, history, and effects of erosion, soil and moisture depletion, and methods of soil and water conservation (including the construction and hydrologic phases of farm irrigation and land drainage, and the construction, operation, and maintenance of experimental watersheds, stations, laboratories, plots, and installations); making conservation surveys and plans and establishing measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); establishment and operation of conservation nurseries; development and management of land utilization project lands and facilities; dissemination of information; purchase and erection or alteration of permanent buildings; operation and maintenance of aircraft; and furnishing of subsistence to employees; **[\$53,474,991] \$60,740,000: Provided**, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed \$2,500, except for eight buildings to be constructed or improved at a cost not to exceed \$15,000 per building and except that alterations or improvements to other existing permanent buildings costing \$2,500 or more may be made in any fiscal year in an amount not to exceed \$500 per building; *Provided further*, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government; *Provided further*, That in the State of Missouri, where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district; *Provided further*, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U. S. C. 590a-590f), in demonstration projects; *Provided further*, That not to exceed \$5,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); **Provided further**, That not to exceed \$265,000 of funds authorized for fiscal year 1951 for development of land utilization projects may remain available until expended; *Provided further*, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service.

Soil Conservation Service: For an additional amount for salaries and expenses, \$1,960,000, for emergency restoration of channel capacity in tributary stream channels and waterways, and related measures, affecting more than individual farms, in agricultural areas, damaged by excessive rains, runoff, and floodwaters, designated by the Secretary of Agriculture as disaster areas under Public Law 38, approved April 6, 1949. **(5 U. S. C. 511-512—establishing the Department of Agriculture; 565a; 7 U. S. C. 1010-1012, 1387; 16 U. S. C. 590a-590f—establishing the Soil Conservation Service; 590q-1; Flood Rehabilitation Act, 1952; Department of Agriculture Appropriation Act, 1952.)**

Appropriated 1952, **\$55,434,991**Estimate 1953, **\$60,740,000**

1. Development and improvement of conservation practices and techniques	11,247	6,000	7,500
2. Assistance to soil conservation districts and other cooperators	242,248	217,000	215,500
3. Development and management of land utilization projects	7,215		
Total obligations payable out of reimbursements from other accounts	260,710	223,000	223,000
Total obligations	54,663,743	59,246,991	61,052,000

PROGRAM AND PERFORMANCE

The Service, in cooperation with State and other agencies, aids in bringing about physical adjustments in land use to conserve soil and water resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation.

Direct obligations in 1953 are estimated to be \$60,829,000, of which \$60,740,000 is from appropriated funds and \$89,000 is from reimbursements from non-Federal sources. This is a net increase of \$1,805,009 compared with 1952. The increase is primarily to provide technical assistance to conservation districts and to provide conservation research data, land capability surveys, and land treatment assistance in reclamation areas.

1. *Development and improvement of conservation practices and techniques.*—Studies are conducted to determine soil and water loss and to develop and improve farming practices which will protect land and water resources. Development and improvement of practices is accomplished by (a) laboratory and plot work, (b) field trials, and (c) adaptation and testing of practices for application over extensive areas.

2. *Assistance to soil conservation districts and other cooperators.*—Assistance furnished soil conservation districts and other cooperators in developing and carrying out locally adapted programs in the States and Territories consists in the main of (a) conservation surveys to determine use capabilities and conservation needs of farm and ranch land; (b) technical assistance in developing and applying farm plans for the best possible use of the farmer's land, labor, equipment, and financial resources; (c) loan

of special equipment not otherwise readily available to the farmer; (d) grant of limited quantities of trees, new or improved strains of grass or legume seed, and other conservation plant materials; and (e) stream-flow forecasts as a basis for efficient seasonal utilization of water in the Western States.

ACCOMPLISHMENTS AND COSTS

Description	1951 actual	1952 estimate	1953 estimate
Conservation surveys:			
Acres surveyed	35,181,686	38,000,000	44,346,000
Amount obligated	\$3,940,578	\$4,155,829	\$4,438,536
Cost per acre	\$0.11	\$0.11	\$0.10
Conservation farm planning:			
Acres planned	36,259,299	38,500,000	45,925,000
Amount obligated	\$15,612,669	\$16,465,509	\$17,585,592
Cost per acre	\$0.43	\$0.43	\$0.38
Conservation treatment (assistance furnished in establishing practices):			
Acres treated	25,596,642	26,000,000	30,605,000
Amount obligated	\$29,013,430	\$30,356,337	\$32,388,832
Cost per acre	\$1.13	\$1.17	\$1.06
Improvement and maintenance of conservation plans: Amount obligated	\$2,989,611	\$3,156,325	\$3,371,040

3. *Development and management of land-utilization projects.*—Revegetation and other development work is done on submarginal land projects in 30 States covering 7,345,469 acres. Developed lands are made available to local farmers and ranchers at equitable rates under specific use conditions. Of the revenue amounting to approximately \$1,000,000 annually, 75 percent goes to the Treasury and 25 percent to the counties in which the lands are located.

PROGRAM AND PERFORMANCE

In cooperation with the Bureau of Reclamation, which constructs the dams, reservoirs, and principal canals, the Service develops efficient irrigation farming units on these specific projects for ultimate sale.

Direct obligations are estimated to be \$235,500 for 1953, a decrease of \$154,093 compared with 1952. The decrease would be accomplished principally by reducing the rate of development of the remaining active projects.

1. *Land development.*—Land classification and topographic surveys are made, and project lands are subdivided into farm units of economic size. The land is cleared and leveled, and farm ditches, drains, and other water-control structures are built.

2. *Land management, settlement, and technical guidance.*—In order to protect and improve Government-owned project lands, developed farm units are leased to local people under specific use conditions or are planted to protective cover crops pending their sale to qualified farm families. Technical guidance on irrigation and conservation is furnished until the project is closed.

3. *Land acquisition.*—Because of the enactment of Public Law 499, Eighty-first Congress, the Federal Government is buying out the interest of the Wyoming Rural Rehabilitation Corporation in several tracts of land in the Eden Valley project. As soon as development of these lands is completed they will be sold to project settlers.

PRODUCTION AND MARKETING ADMINISTRATION

INTRODUCTORY STATEMENT

The Production and Marketing Administration administers the Department's production and marketing programs under the following appropriations: Conservation and use of agricultural land resources; agricultural production programs, including acreage allotments and marketing quotas, production goals and assistance to farmers; Sugar Act program; national school lunch program; removal of surplus agricultural commodities, including development of new and expanded markets and uses, and marketing agreements and orders; marketing services, including marketing research, service and regulatory activities, market news, grading, standardization and inspection; Commodity Credit Corporation programs, including price support through loans, purchases and other means, foreign and other supply activities; and International Wheat Agreement. In addition, Production and Marketing Administration has the responsibility for the administration of (1) food production and distribution programs, including developing requirements, determining priorities and allocations of available supplies, and obtaining basic production required; (2) domestic utilization of farm equipment and fertilizer through requirements, allocations and distribution controls in order to accomplish required agricultural food production, distribution, and conservation.

CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES

Conservation and Use of Agricultural Land Resources, Production and Marketing Administration—

To enable the Secretary to carry into effect the provisions of sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g–590q), including not to exceed \$6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; **[\$260,000,000]** \$256,500,000, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building practices and soil- and water-conserving practices authorized under this head in the Department of Agriculture Appropriation Act, **[1951]** 1952, carried out during the period July 1, **[1950]** 1951, to December 31, **[1951]** 1952, inclusive: *Provided*, That not to exceed **[\$25,250,000]** \$35,000,000 of the total sum provided under this head shall be available during the current fiscal year for salaries and other administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged

to such limitation; but not more than \$4,966,000 shall be transferred to the appropriation account, "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That payments to claimants hereunder may be made upon the certificate of the claimant, which certificate shall be in such form as the Secretary may prescribe, that he has carried out the conservation practice or practices and has complied with all other requirements as conditions for such payments and that the statements and information contained in the application for payment are correct and true, to the best of his knowledge and belief, under the penalties of title 18, United States Code: *Provided further*, That none of the funds herein appropriated or made available for the functions assigned to the Agricultural Adjustment Agency pursuant to the Executive Order Numbered 9069, of February 23, 1942, shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That such amount shall be available for salaries and other administrative expenses in connection with the formulation and administration of the **[1952]** 1953 program of soil-building practices and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to \$256,500,000, including administration, and formulated on the basis of a distribution of the funds available for payments and grants among the several States in accordance with their conservation needs as determined by the Secretary, except that the proportion allocated to any State shall not be reduced more than 15 per centum from the distribution for the next preceding program year, and no participant shall receive more than \$2,500); but the payments or grants under such programs shall be conditioned upon the utilization of land with respect to which such payments or grants are to be made in conformity with farming practices which will encourage and provide for soil-building and soil- and water-conserving practices in the most practical and effective manner and adapted to conditions in the several States, as determined and approved by the State committees appointed pursuant to section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended (16 U. S. C. 590h (b)), for the respective States: *Provided further*, That not to exceed 5 per centum of the allocation for the agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and the funds so allotted may be placed in a single account for each State, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels.

[Conservation and use of agricultural land resources: For an additional amount, \$16,480,000 including the furnishing of services, materials, and payments for conservation and land restoration measures, to enable the Secretary to carry out flood assistance and rehabilitation in agricultural areas, damaged by excessive rains, runoff, and floodwaters, designated by the Secretary of Agriculture as disaster areas under Public Law 38, approved April 6, 1949: *Provided*, That this appropriation may be expended without regard to the adjustments required under section 8 (e) of the Soil Conservation and Domestic Allotment Act (16 U. S. C. 590h) and may be distributed among States without regard to other provisions of law: *Provided further*, That the administrative expense limitations provided under this appropriation item in the Department of Agriculture Appropriation Act, 1952, may be increased by not more than \$1,780,000, of which not more than \$180,000 may be made available to State Extension Services to provide assistance through the Co-operative Agricultural Extension Service.] (Department of Agriculture Appropriation Act, 1952; Flood Rehabilitation Act, 1952.)

PROGRAM AND PERFORMANCE

To restore and maintain the national soil and water resources, farmers are encouraged and assisted to carry out on their farms approved soil-building and soil- and water-conserving practices. Funds are distributed among the States and Territories on the basis of conservation needs.

Assistance on individual farms, averaging less than 50 percent of the cost of carrying out approved practices, consists of materials, services, and reimbursement payments. Practices for which assistance is offered generally fall into four major classes: (1) construction practices, such as terracing and leveling land; (2) establishing and improving pastures of perennial grasses and other permanent cover; (3) growing annual or permanent cover crops; and (4) applying minerals to pasture and hayland sods, such as lime, phosphate, and potash.

Loans from the Commodity Credit Corporation to the Administration are used to make advances for the purchase of conservation materials or services from January 1 to June 30 of each year; repayment with interest is made during the current fiscal year from balances available from prior years' appropriations or in the succeeding fiscal year from the new funds appropriated.

Total.....	25,007,832	40,757,803	46,000,000	46,000,000	157,765,635

Farmer-elected county and community committeemen assist in developing the program and administer it locally. At the State level the program is administered by a committee of farmers appointed by the Secretary; the State committee establishes the State program within the framework of the national program approved by the Secretary.

Direct obligations in 1953 are estimated to be \$302,700,000, of which \$256,500,000 is from appropriated funds, \$46,000,000 is a loan from Commodity Credit Corporation, and \$200,000 is from reimbursements from non-Federal sources. This is a decrease of \$19,980,000 compared with 1952.

AGRICULTURAL PRODUCTION PROGRAMS

Agricultural Production Programs, Production and Marketing Administration—

To enable the Secretary to formulate and carry out acreage allotment and marketing quota programs pursuant to provisions of title III of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301-1393), [including the measurement of the acreage planted to cotton on the farms whether or not marketing quotas are in effect, providing that not more than \$1,000,000 shall be available for this purpose,] and to provide assistance in obtaining equipment, materials, and facilities necessary to attain needed production of agricultural commodities, [\$10,000,000] \$15,000,000, of which not more than [\$2,800,000] \$3,000,000 shall be transferred to the appropriation account "Administrative expenses, section 392, Agricultural Adjustment Act of 1938". (Public Law 774, approved September 8, 1950; Public Law 96, approved July 31, 1951; Public Law 17, approved April 12, 1951; Department of Agriculture Appropriation Act, 1952.)

Obligations incurred.....	21,120,199	10,000,000	15,000,000

PROGRAM AND PERFORMANCE

Agricultural production programs include acreage allotment and marketing quota programs for basic agricultural commodities and farm production goal programs for all other crops necessary to meet increased supply requirements.

Obligations are estimated to be \$15,000,000 for 1953, an increase of \$5,000,000 compared with 1952. This increase is primarily for obtaining needed production of crops in short supply and for assistance to farmers in obtaining equipment, materials, and facilities needed to achieve the needed production.

1. *Acreage allotments and marketing quotas.*—These programs are designed to assist in stabilizing fluctuations in the supply, marketing, and price of specified basic agricultural commodities. Acreage allotments, when necessary, are established at National, State, and county levels (only at State level in the case of tobacco). In general, the acreage allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed for basic commodities whenever the supply situation specified in the basic legislation requires them. However, quotas do not become effective unless approved by two-thirds of those voting in a referendum of farmers engaged in producing the commodity for which a quota is proclaimed.

2. *Production goals and assistance to farmers.*—To produce the quantities of agricultural commodities necessary in the mobilization effort, farmers are encouraged to expand production and to plant the specific crops needed. The State production goals are translated to acreage requirements which are further distributed to county and farm levels for guidance of individual farmers. At the same time, farmers are assisted in their efforts to obtain the tools necessary to achieve the needed production including farm machinery and equipment, fertilizers, and other necessary facilities.

PROGRAM AND PERFORMANCE

To provide consumers with adequate supplies of sugar at reasonable prices and to maintain the welfare of the domestic sugar industry, quotas are established for five domestic sugar-producing areas, the Philippines, Cuba, and other foreign countries. In addition, farm marketing allotments for sugarcane and sugar beets are established by the Secretary when necessary to restrict marketings to conform to the quota for the area and normal carry-over requirements. Obligations are estimated to be \$70,000,000 for 1953, a decrease of \$72,350 compared with 1952.

1. *Payments to sugar producers.*—Payments are made (a) to domestic producers of cane and beets who meet specified conditions of employment, production, and marketing; and (b) for abandonment of planted acreage and crop deficiencies on harvested acreages.

2. *Operating expenses.*—These consist mainly of the expenses of (a) the Administration's State and county offices in establishing production controls, determining

compliance, and making payments to producers; and (b) of the Administration's departmental work in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price determinations, establishing production and marketing controls where necessary, and formulating over-all policies and procedures.

PROGRAM AND PERFORMANCE

Assistance, in the form of both funds and food, is provided to States and Territories for use in serving lunches to school children. Each State's portion of the total funds available is determined by means of a statutory formula. The program is operated according to the terms of an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and, if accepted for participation in the program, are reimbursed for a part of the food cost of each meal served.

In addition to the cash assistance, part of the school-lunch appropriation is used by the Department of Agriculture to purchase food which is distributed to schools. This program also provides the largest single outlet for surplus commodities purchased under authority of section 32 of the Agricultural Adjustment Act, as amended, and an important outlet for price-support commodities distributed in accordance with section 416 of the Agricultural Act of 1949.

During 1951 about 1,400,000,000 meals were served to more than 8,600,000 children, utilizing more than \$262,000,000 worth of agricultural commodities. About 13 percent of this amount represented stocks acquired under the surplus-removal and price-support programs of the Department. The statutory requirement that States contribute \$1.50 for each Federal dollar contributed was more than adequately met in 1951.

Obligations are estimated to be \$83,367,491 for 1953, the same as for 1952.

INTERNATIONAL WHEAT AGREEMENT

International Wheat Agreement, Agriculture—

To discharge indebtedness of the Commodity Credit Corporation to the Secretary of the Treasury for the net costs during the fiscal year [1950] 1951 (including interest thereon through June 30, 1952) under the International Wheat Agreement Act of 1949 (7 U. S. C. 1641-1642), [\$76,808,000] \$182,162,250. (Department of Agriculture Appropriation Act, 1952.)

Appropriated 1952, \$76,808,000 Estimate 1953, \$182,162,250

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, \$76,808,000; 1953, \$182,162,250.

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
Reimbursement to Commodity Credit Corporation for:			
1. Program costs.....		\$75,636,722	\$178,371,832
2. Interest costs.....		1,171,278	3,790,418
Obligations incurred.....		76,808,000	182,162,250

PROGRAM AND PERFORMANCE

The International Wheat Agreement assures supplies of wheat to importing countries and markets for wheat to exporting countries at equitable and stable prices.

In accordance with the International Wheat Agreement Act of 1949, capital funds of the Commodity Credit Corporation are used to pay (a) the difference between the price specified in the Agreement and the domestic market price, and (b) administrative and interest costs. The 1953 estimate of \$182,162,250 is for the purpose of reimbursing the Commodity Credit Corporation for costs incurred in connection with fiscal year 1951 operations when approximately 266,000,000 bushels of wheat and wheat flour (bushel equivalent) were exported pursuant to the Agreement. The following table reflects interest costs, differential payments to commercial exporters and amounts due Commodity Credit Corporation for export of price support and supply stocks of wheat and wheat flour.

	Fiscal year 1952	Fiscal year 1953
	<i>Fiscal year 1950 opera- tions</i>	<i>Fiscal year 1951 opera- tions</i>
Differential payments.....	\$36,762,870	\$99,712,669

MARKETING SERVICES

Marketing Services, Production and Marketing Administration—

For expenses necessary for acquiring and diffusing market information on agricultural commodities, food products and by-products, the standardization, classification, grading, handling, storage and marketing thereof, including the demonstration and promotion of the use of uniform standards of classification of American farm and food products throughout the world, the analysis of cotton fiber, the classing of cotton for producer members of cotton quality improvement groups, the establishment of classification standards and maintenance of an inspection service for tobacco (7 U. S. C. 471-476, 501-508, 511-511q); for investigating and certifying, in one or more jurisdictions, to shippers and other interested parties the class, quality, and condition of any agricultural commodity or food product, whether raw or processed, and any product containing an agricultural commodity or derivative thereof when offered for interstate shipment or when received at such important central markets as the Secretary may from time to time designate, or at points which may be conveniently reached therefrom under such rules and regulations as he may prescribe, including the collection of such fees as are reasonable and as nearly as may cover the cost of the service rendered; for performing the duties imposed upon the Secretary by chapter 14 of the Internal Revenue Code relating to cotton futures (26 U. S. C. 1920-1935); and for carrying into effect the United States Cotton Standards Act (7 U. S. C. 51-65), the United States Grain Standards Act (7 U. S. C. 71-87), the Naval Stores Act (7 U. S. C. 91-99), section 201 (a) to 201 (d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U. S. C. 1291), including not to exceed \$25,000 for employment at rates not to exceed \$100 per diem, pursuant to the second sentence of section 706 (a), of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), the Acts to provide standards for containers for fruits and vegetables (15 U. S. C. 251-257i), the United States Warehouse Act (7 U. S. C. 241-273), the Federal Seed Act (7 U. S. C. 1551-1610), the Packers and Stockyards Act (7 U. S. C. 181-229), the Federal Insecticide, Fungicide, and Rodenticide Act (7 U. S. C. 135-135k), and the Tobacco Plant and Seed Exportation Act (7 U. S. C. 516), [\$10,800,000: *Provided*, That hereafter there may be transferred to appropriations available for classing or grading any agricultural commodity without charge to the producers thereof such sums from nonadministrative funds of the Commodity Credit Corporation as may be necessary in addition to other funds available for these purposes, such transfers to be reimbursed from subsequent appropriations therefor] \$11,465,000. (5 U. S. C. 511-512, 541b, 575; 7 U. S. C. 415a-415e, 423, 440, 581-589; 21 U. S. C. 94a; 31 U. S. C. 725d; Department of Agriculture Appropriation Act, 1952.)

Total obligations.....	11, 999, 306	14, 388, 300	14, 295, 300

PROGRAM AND PERFORMANCE

The purpose of these services is to contribute to the orderly and efficient marketing of farm products.

Direct obligations in 1953 are estimated to be \$12,-325,300, of which \$11,465,000 is from appropriated funds and \$860,300 is from reimbursements from non-Federal sources. This is a decrease of \$74,700 compared with 1952.

1. *Market news service.*—This service, carried out co-operatively with 34 States and Hawaii, provides timely and reliable market information to farmers, consumers, and handlers of farm commodities.

2. *Inspection, grading and classing, and standardization.*—Farmers are assisted in obtaining returns for their products commensurate with quality by (a) United States quality standards; (b) an impartial inspection, classing, and grading service; and (c) broadening the general knowledge, acceptance, and use of standards through demonstrations, training courses, and other means. Approximately 71 percent of the total cost is covered by fees or other revenue.

The volume of inspection, grading, and classing in 1951 for major commodities is shown below:

Commodity	Unit	Volume
Cotton.....	Bales.....	8, 555, 675
Tobacco.....	Pounds.....	2, 020, 000, 000

Other processed fruits and vegetables.....	Pounds.....	1, 108, 308, 818
Turpentine.....	Gallons.....	8, 981, 055
Rosin.....	Drums.....	570, 643

3. *Improvement of marketing practices.*—This consists of (a) studies to improve marketing practices and processing techniques, and (b) development of basic principles for improvement of market and storage facilities.

4. *Freight rates for farm products.*—Producers are assisted in obtaining equitable transportation rates and services through participation by the Department in their behalf in cases before the Interstate Commerce Commission and through informal negotiations with carriers.

5. *Regulatory activities.*—The laws designed to protect farmers and others from financial loss or personal injury resulting from deceptive, careless, and fraudulent marketing practices are administered mainly by (a) licensing or registration, (b) supervision of operations, (c) collection and testing of samples, and (d) handling of violations.

Obligations incurred.....	619,133	662,000	725,000

PROGRAM AND PERFORMANCE

Enforcement of the Commodity Exchange Act requires supervision over futures trading in 20 commodities on 18 exchanges to prevent price manipulation and corners and insure honesty and fair dealing.

Obligations are estimated to be \$725,000 for 1953, an increase of \$63,000 compared to 1952. This increase includes \$25,000 for enforcement of limits on speculative trading and open contracts for three additional commodities.

1. *Licensing.*—Commission merchants and floor brokers are registered annually. Exchange rules and regulations are reviewed to insure that legal requirements are met.

2. *Supervision of futures trading.*—This embraces (a) study, analysis, and publication of market information and other data; (b) enforcement of speculative limits; and (c) cooperative activities with control committees of contract markets.

3. *Audits.*—Misuse of customers' funds is prevented by (a) audit and examination of books of futures commission merchants; and (b) analysis of brokers' and traders' books and financial statements.

4. *Investigations.*—Violations of the law and regulations are investigated, and trade-practice surveys are made to discover violations and compile legal evidence for administrative hearings and judicial proceedings.

5. *Establishment of speculative limits.*—These limits reduce speculation and aid in stabilizing commodity prices.

RURAL ELECTRIFICATION ADMINISTRATION

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U. S. C. 901-924), as follows:

LOAN AUTHORIZATIONS

Loans, Rural Electrification Administration, Agriculture—

For loans in accordance with said Act, and for carrying out the provisions of section 7 thereof, to be borrowed from the Secretary of the Treasury in accordance with the provisions of section 3 (a) of said Act as follows: Rural electrification program, **[\$100,000,000]** \$50,000,000; and rural telephone program, **[\$9,000,000]** \$25,000,000 and additional amounts, not to exceed **[\$75,000,000]** \$50,000,000, may be borrowed for the rural electrification program, and \$25,000,000 for the rural telephone program, under the same terms and conditions to the extent that such additional amounts are required during the fiscal year **[1952]** 1953, under the then existing conditions, for the expeditious and orderly development of the program. (*Department of Agriculture Appropriation Act, 1952.*)

PROGRAM AND PERFORMANCE

The Administration conducts two major lending programs: (a) To finance facilities for bringing electric energy to rural areas that are without central-station service; and (b) to furnish and improve telephone service in rural areas. All loans must be self-liquidating within 35 years and bear interest at the rate of 2 percent per year. Loans are also made for shorter periods at 2 percent interest to borrowers to be relented to consumers for wiring and for the installation of electrical and plumbing appliances and equipment.

Funds for making loans are borrowed from the Secretary of the Treasury. The borrowing authorization proposed for fiscal year 1953 for electrification loans is \$50,000,000 which, together with balances carried forward from prior year authorizations, will provide a loan pro-

gram of \$165,000,000, the same as for the current year and a decrease of \$56,733,799 compared with the preceding year. The proposed authorization for 1953 for telephone loans is \$25,000,000, the same as for the current year and a decrease of \$12,828,500 compared with the preceding year.

Obligations for salaries and expenses are estimated to be \$8,425,000 for 1953, an increase of \$135,000 compared with 1952, primarily for the telephone program which is entering the construction and management phases.

When the rural electrification program was initiated in 1935, less than 11 percent of all farms had electric service. On June 30, 1951, the figure had risen to approximately 84 percent.

1. *Loan analysis and system development.*—Studies are made to achieve area coverage and a self-liquidating system. Assistance is given in planning systems; preparing requests for loans; developing programs to advise consumers about the most beneficial and profitable uses of electric energy; and locating sources of power at reasonable cost.

2. *Engineering and technical standards.*—Engineering review is provided to insure that construction conforms to approved standards and is adequate to meet the needs of rural consumers. Assistance is given in establishing standards of physical operation, planning maintenance programs, and applying the best engineering practices to the technical problems of rendering good service. Standards are developed for the design and construction of telephone and power facilities. Engineering assistance is provided in studies of proposed construction by applicants for new loans.

3. *Management advisory activities.*—Such assistance is furnished on a selective basis of need to protect the long-range security of the Government loans and to encourage borrowers to assume full responsibility for their operations. Appraisals of management and other functions are performed as a part of the consideration of loan applications.

4. *Loan auditing, collecting, and accounting.*—This consists of (a) maintenance of accounting records of loan funds; (b) examination and approval of requisitions for advances; (c) computation and recording of billings and collections; (d) assistance to borrowers in establishing proper account books and maintaining sound accounting practices; and (e) auditing of borrowers' accounting records.

OBLIGATIONS BY OBJECTS

16 Investments and loans—1951, \$259,562,299; 1952, \$190,000,000; 1953, \$190,000,000.

FARMERS' HOME ADMINISTRATION

To carry into effect the provisions of titles I, II, and the related provisions of title IV of the Bankhead-Jones Farm Tenant Act, as amended (7 U. S. C. 1000-1031), the Act of August 23, 1951 (Public Law 123); the Farmers' Home Administration Act of 1946 (7 U. S. C. 1001, note; 31 U. S. C. 82h; 12 U. S. C. 371; 35 D. C. Code 535; 60 Stat. 1062-1080); the Act of July 30, 1946 (40 U. S. C. 436-439); the Act of August 28, 1937, as amended (16 U. S. C. 590r-590x, 590z-5), for the development of facilities for water storage and utilization in the arid and semiarid areas of the United States; the

FARMERS' HOME ADMINISTRATION—Con.

provisions of title V of the Housing Act of 1949 relating to financial assistance for farm housing (42 U. S. C. 1471-1483); the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (Public Law 499] 40 U. S. C. 440-444); and the Act to direct the Secretary of Agriculture to convey certain mineral interests, approved September 6, 1950 (Public Law 760] 7 U. S. C. 1033-1039), as follows:

LOAN AUTHORIZATION**Loans, Farmers' Home Administration, Agriculture—**

For loans (including payments in lieu of taxes and taxes under section 50 of the Bankhead-Jones Farm Tenant Act, as amended, and advances incident to the acquisition and preservation of security of obligations under the foregoing several authorities): Title I and section 43 of title IV of the Bankhead-Jones Farm Tenant Act, as amended, and title V of the Housing Act of 1949 (except grants under 504 (a)) \$38,000,000, of which not to exceed \$5,000,000 of the amount available for the purposes of title I and section 43 of the Bankhead-Jones Farm Tenant Act, as amended, may be distributed to States and Territories without regard to farm population and prevalence of tenancy, in addition to the amount otherwise distributed thereto, for loans in reclamation projects and to entrymen on unpatented public land (sums available for loans under title V of the Housing Act of 1949 to remain available until expended); title II of the Bankhead-Jones Farm Tenant Act, as amended, \$110,000,000; the Act of August 28, 1937, as amended, \$5,000,000] \$6,000,000: *Provided*, That not to exceed the foregoing several amounts shall be borrowed in one account from the Secretary of the Treasury, and, hereafter, such sums annually for the purposes of this paragraph as the Congress may determine by provision in appropriation acts, on the request of the Secretary of Agriculture, at such rate of interest as may be determined by the Secretary of the Treasury, but not in excess of 3 per centum per annum; and the Secretary of the Treasury is hereby authorized and directed to lend such sums to the Secretary upon the security of any obligations of borrowers from the Secretary under the provisions of said Acts: *Provided further*, That the Secretary may utilize proceeds from payments of principal and interest under such Acts to repay the Secretary of the Treasury the amounts borrowed therefrom for the purposes of such Acts: *Provided further*, That for the purpose of making loans pursuant to the foregoing authority, the Secretary of the Treasury is authorized to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include such loans to the Secretary: *Provided further*, That repayments to the Secretary of the Treasury on such loans shall be treated as a public-debt transaction] in accordance with the provisions set forth under this head in the Department of Agriculture Appropriation Act, 1952.

PROGRAM AND PERFORMANCE

For the benefit of farmers unable to secure credit from other sources at reasonable rates, the Administration makes (a) direct loans and insures loans for the purchase, enlargement, or development of family-size farms; (b) loans and grants for the improvement of dwellings and

other farm buildings; (c) loans for farm operating expenses; and (d) loans for water facilities in the arid and semiarid areas in 17 Western States.

Direct obligations for salaries and expenses are estimated to be \$29,350,000 for 1953, a decrease of \$220,000 compared with 1952.

The total borrowing authorization requested for loans amounts to \$154,000,000, representing an increase of \$1,000,000 above the current year's authorization, all of which is to be used for water facilities loans.

1. *Farm ownership and farm housing loans*—(a) *Farm ownership loans*.—Direct farm-ownership loans for the purchase or improvement of family-type farms are made to tenants, sharecroppers, farm laborers, owners of inadequate farms, and eligible veterans up to the full normal value of the farm at 4 percent interest for periods up to 40 years. Loans made by private lenders to eligible applicants are insured in amounts up to 90 percent of the normal farm value for periods up to 40 years at 3 percent interest, plus one-half of 1 percent as an insurance premium and one-half of 1 percent toward administrative expenses; the Administration services these loans, makes collections, and pays the lender.

Insured mortgage loans.....	2,205	17,870,799	1,000	8,200,000	1,000	8,200,000

(b) *Farm housing building loans*.—These are made to farm owners for periods up to 33 years at 4 percent interest to construct, improve, alter, repair, or replace farm buildings.

(c) *Farm housing enlargement and development loans*.—Loans for farm enlargement and development are made for periods up to 33 years at 4 percent interest to farm owners to enable them to develop sufficient income to support a better standard of living.

2. *Production and subsistence loans*.—Loans are made for periods up to 7 years at 5 percent interest to provide reasonable farm and home credit for the purchase of livestock, feed, seeds, farm equipment, and other farm necessities.

PROGRAM AND PERFORMANCE

The Administration provides supervision, examination, facilities, and services to a coordinated agricultural credit system of Farm Credit banks and corporations which make credit available to farmers and their cooperatives; farmers' cooperatives are provided with research facilities and technical assistance. The Administration's administrative expenses are paid from a direct appropriation and assessments from Farm Credit banks and corporations. The expense distribution, determined by cost analysis, is in proportion to the services rendered.

1. *Supervision and examination of and facilities and services to Farm Credit banks and corporations.*—Provision is made for supervision and annual examination of: Twelve Federal land banks (wholly farmer-owned), 12 production credit corporations (wholly Government-owned), 13 banks for cooperatives (mixed ownership), 12 Federal intermediate credit banks (wholly Government-owned), one Federal Farm Mortgage Corporation (wholly Government-owned), 1,200 national farm loan associations, and 500 production credit associations. These credit institutions are furnished such services as preparation of reports and budgets, assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, and development and distribution of information on farm credit.

2. *Research and technical assistance, including facilities and services to farmers' cooperatives.*—Studies are made to improve the organization and the operation of farmers' cooperatives and technical assistance is given them in cooperation with State and Federal agricultural research and extension agencies.

EXTENSION SERVICE

INTRODUCTORY STATEMENT

Extension work is a joint undertaking of the Department of Agriculture, the State land-grant colleges, and rural localities. It serves as an educational link which brings to farm people the research results of the Department and the State experiment stations. The aim is to improve the economic welfare, nutrition and health, and family and community life of rural people by helping them to help themselves in attaining more efficient farms, better homes, and higher standards of living.

Direct obligations, including payments under permanent definite appropriations, are estimated to be \$32,785,379 for 1953, an increase of \$34,384 compared with 1952. This increase is primarily to strengthen extension work in Puerto Rico in food production and conservation, nutrition, health, home industries, and 4-H Club work.

PAYMENTS TO STATES, HAWAII, ALASKA, AND PUERTO RICO

Payments to States, Hawaii, Alaska, and Puerto Rico, Extension Service—

For payments to the States, Hawaii, Alaska, and Puerto Rico, for cooperative agricultural extension work as follows:

Capper-Ketcham, Bankhead-Jones, and related Acts: Capper-Ketcham Act, the Act approved May 22, 1928 (7 U. S. C. 343a, 343b), \$1,480,000; Bankhead-Jones Act, section 21, title II, of the Act approved June 29, 1935 (7 U. S. C. 343c), \$12,000,000; Bankhead-Jones Act, section 23, title II, of the Act approved June 29, 1935, as amended by the Act of June 6, 1945 (7 U. S. C. 343d-1), \$12,500,000; additional extension work, the Act approved April 24, 1939, as amended (7 U. S. C. 343c-1), \$555,000; Alaska, the Act approved February 23, 1929 (7 U. S. C. 386c), extending the benefits of the Smith-Lever Act to the Territory of Alaska, [\$13,950] \$17,300, and the Act approved October 27, 1949 (7 U. S. C. 343d-4, 5), extending to the Territory of Alaska the benefits of the Capper-Ketcham Act and sections 21 and 23 of title II of the Bankhead-Jones Act, [\$42,150] \$42,558; Puerto Rico, section 3 of the Act of March 4, 1931 (7 U. S. C. 386f), authorizing extension of the Capper-Ketcham Act to Puerto Rico, [\$31,348] \$32,131; the Act approved August 28, 1937 (7 U. S. C. 343f-343g), extending the benefits of section 21 of the Bankhead-Jones Act to Puerto Rico, \$408,000, and the Act approved October 26, 1949 (7 U. S. C. 343d-2, 3), extending the benefits of section 23 of title II of the Bankhead-Jones Act to Puerto Rico, [\$71,502] \$101,090; and section 506a of title V of the Housing Act of 1949 (42 U. S. C. 1476), \$33,050; in all, payments to States, Hawaii, Alaska, and Puerto Rico, [\$27,135,000] \$27,169,129. (*Department of Agriculture Appropriation Act, 1952.*)

PROGRAM AND PERFORMANCE

Funds are distributed to each State, Alaska, Puerto Rico, and Hawaii on the basis of formulas stipulated in the governing acts. The costs of cooperative extension work are currently shared as follows: Federal appropriations, 40 percent; State appropriations, 35 percent; county appropriations, 22 percent; and other local sources, 3 percent.

The funds are used within the States for the employment of specialists, county agents, county home demonstration agents, and 4-H Club agents, who make available to rural people the results of agricultural and home economic research. Representing the major activity in most States, the county agents work directly with farmers in introducing improved production methods, farm management and conservation practices, and promoting improved marketing methods. Home demonstration work involving food and nutrition, family economics, home management, clothing and textiles, parent and family life education, housing and housefurnishings, and consumer education is conducted with homemakers by home demonstration agents. Another major activity is the training of rural young people through community 4-H Clubs, which now have 1,990,932 members enrolled.

PROGRAM AND PERFORMANCE

1. *General administration and business service.*—This consists of the development of programs, policies, and procedures and general business operations necessary to efficient administration.

2. *Review and analysis of State budgets, projects, and plans and examination of State expenditures from Federal payments.*—State budgets, projects, and annual plans for extension work are reviewed and analyzed; funds are allocated to the individual States; and State expenditures are examined for compliance with requirements of law.

3. *Planning and coordination of State and county extension work.*—Provision is made for the general supervision of State and county extension activities to assure a balanced and effective educational program.

4. *Development of technical subject matter for use by State extension forces.*—Cooperative programs are developed between the Service, other agencies of the Department, and the various States to provide State and county extension forces with results of research and information on national programs for agriculture. State extension services are aided in adapting the findings of agricultural technology to the needs of rural people.

5. *Field studies of extension work and the training of extension workers.*—Teaching methods and procedures are evaluated in relation to objectives. In-service training is planned and conducted for extension personnel.

6. *Preparation and distribution of visual material and extension literature to Department and State extension forces.*—Programs of visual and informational aids are developed, including the distribution of slide films, movies, photographs, charts, and publications, to help assure the application of effective teaching methods.

7. *Program development and coordination of extension agricultural economics.*—Economic research information is correlated and disseminated and assistance given the States in developing and improving their educational programs on economic problems of agriculture and rural life.

Total obligations	2,228,176	2,294,521	2,470,761

PROGRAM AND PERFORMANCE

The Office provides the over-all planning, coordination, and administration of the Department's programs, and also supplies those services which are required on a Department-wide basis. Direct obligations are estimated to be \$2,360,000 for 1953, an increase of \$175,000 compared with 1952.

The increase would primarily be used to provide more effective liaison, coordination, and direction of activities and programs of the Department and would strengthen

the over-all personnel, fiscal, and general service functions of the Department.

1. *General administration.*—The Secretary, the Under Secretary, and the Assistant Secretary, supported by their staffs, develop policies, execute legislative and administrative policy determinations, maintain liaison with Congress, coordinate activities within the Department and with other departments, and provide direction for the Department as a whole, including its participation in international programs.

2. *Personnel administration and service.*—Departmental policies and procedures are developed and promulgated on classification, job evaluation, salary and wage administration, recruitment, placement, retirement, separation, leave, safety, incentive awards, personnel utilization, organization, performance ratings, employee relations, training, discipline, investigations, and health. Operations in these fields are centrally directed and reviewed.

3. *Budgetary and financial administration and service.*—Department-wide supervision, leadership, and coordination are provided in the fields of budgetary, fiscal, property, and supply management and in related activities of the Department. Departmental policies and procedures are formulated and promulgated; programs and legislative proposals are reviewed and evaluated for budgetary, financial, and related implications; and improvements are fostered in the management and operation of work programs administered by the Department.

4. *General operations.*—Provision is made for the housing of Department activities; communications and records management; technical and engineering advice in acquisition, utilization, and maintenance of automotive, heavy, and scientific equipment; general coordination of technical operations for various mapping projects; administrative and budgetary functions for the Office of the Secretary; and administrative services in the District of Columbia, including the Department's post office.

5. *Office of Hearing Examiners.*—These examiners hold quasi-legislative and quasi-judicial hearings in proceedings within the jurisdiction of the Department.

PROGRAM AND PERFORMANCE

The Defense Production Act of 1950, as extended by the Defense Production Act amendments of 1951, expires on June 30, 1952. It is assumed that defense production legislation will be extended to June 30, 1953, in substantially its present form. On this assumption, the estimated requirements for fiscal year 1953 appear in summary form at the end of this chapter under the heading "Proposed for later transmission." In the exercise of his authority under the Defense Production Act of 1950, as amended, the Secretary delegated specific defense production activities for fiscal years 1951 and 1952 as follows:

1. *Production and Marketing Administration.*—Requirements and supply are determined, and assistance is given in obtaining materials for the necessary production of food. Distribution is made to effect the most efficient utilization of the total food supply. Analyses are made of operating policy and economic conditions in order to recommend regulations for the fulfillment of requirements. Production goals are prepared to assure adequate production of essential foods, feeds, and fiber, and this work was financed from defense production funds in 1951. In 1952, funds were made available for production goals from the appropriation, "Agricultural production programs." As claimant for farm production, farm construction, and food processing facilities, the Production and Marketing Administration presents materials, machinery, fertilizer, and insecticide requirements to the Defense Production Administrator. Recommendations and supporting data relating to manpower for agriculture are developed for use in presentations to the Department of Labor, Selective Service System, and other agencies. Applications for accelerated tax amortization for food and agricultural facilities and applications of prospective borrowers of Government funds for the purchase of expanding agricultural and food productive capacity and supply are reviewed.

2. *Forest Service.*—Technical work in the forest industry field is performed for the National Production Authority, including (a) making field investigations and reports on the adequacy of timber resources to support planned expansions as represented by production loan and tax amortization applications; (b) furnishing technical information relating to timber and timber products; and (c) conducting special studies and field surveys to determine the equipment, supplies, and manpower needed to maintain stated levels of production, the facilities available and needed to produce critical items such as laminated ship timbers, and the availability of timber supplies of particular species and quality.

3. *Office of Foreign Agricultural Relations.*—Information is furnished on foreign production and international trade, including (a) supply estimates on critical food and agricultural commodities available from overseas; (b) effects

OFFICE OF THE SECRETARY—Continued

[SALARIES AND EXPENSES, DEFENSE PRODUCTION ACTIVITIES]—CON.

Salaries and Expenses, Defense Production Activities, Agriculture—Continued

of export controls on supply abroad; (c) requirements of agricultural machinery, fertilizers, and insecticides needed in foreign countries; and (d) conditions in particular areas such as Asia and Africa to determine the available food supplies and the trade problems of deficit areas and their effects in relation to defense mobilization plans.

4. *Bureau of Agricultural Economics.*—This work consists of (a) preparation of data on farm wages and farm labor supply and requirements; (b) development of estimates of production capacities and requirements; and (c) development of basic data on current and prospective production and supplies of agricultural products, agricultural prices, and farm employment and wages.

5. *Legal, informational, and other departmental services.*—The Offices of the Solicitor and Information furnish legal and informational services in connection with defense production activities, and the Office of the Secretary provides over-all planning, coordination, and integration of the administrative and operational resources of the Department to meet defense objectives.

PROGRAM AND PERFORMANCE

The Office performs all the legal work arising from the activities of the Department and represents the Department in quasi-legislative and quasi-judicial proceedings. The Office assists the Department of Justice by preparing briefs for and participates in the trial of cases in court.

Direct obligations are estimated to be \$2,356,000 for 1953, a decrease of \$16,000 compared with 1952.

1. *Agricultural credit.*—Legal services are provided for the Farm Credit Administration and its related banks and loan associations and for the Farmers' Home Administration for its various loan programs.

OFFICE OF THE SOLICITOR—Continued**Salaries and Expenses, Office of the Solicitor, Agriculture—Con.**

2. *Commodity credit, production, and adjustment programs.*—These legal services deal with price-support activities, domestic and foreign procurement, disposal of agricultural surpluses, national school-lunch program, agricultural conservation, farm-marketing quotas, crop insurance, sugar programs, claims settlement and adjustment, international trade and commodity agreements, and import restrictions. The Solicitor serves as general counsel for both the Commodity Credit Corporation and the Federal Crop Insurance Corporation.

3. *Lands, forestry, research, and general legal services.*—In addition to general legal services rendered for the Department as a whole, legal and abstracting services are provided in connection with the acquisition and exchange of lands; operation and management of the national forests, soil-conservation districts, and other public lands; flood control; patents; and agricultural research projects.

4. *Marketing and regulatory laws.*—Legal services are furnished in connection with the administration and enforcement of quarantine acts and legal provisions relating to the marketing and distribution of agricultural commodities.

5. *Rural electrification and telephone programs.*—Legal services for the Rural Electrification Administration include review and legal approval of loan and security documents, review and legal approval of borrowers' contracts, titles, easements, franchises, rights-of-way, and participation in litigation before State regulatory bodies and in the courts.

PROGRAM AND PERFORMANCE

This Office collects, interprets, and disseminates economic data and other information on foreign production and consumption of farm products. Information obtained is used to advise American farmers and business organizations handling farm products of important developments abroad that affect their interests, and to provide Congress, other agencies of the Government, and United States representatives at international conferences with information helpful in determining questions of policy concerning agricultural affairs.

Direct obligations are estimated to be \$750,000 for 1953, an increase of \$135,000 compared with 1952. This increase is primarily for analyzing and reporting on foreign commodity problems affecting United States agriculture; to meet demand for up-to-date information and detailed analysis of foreign financial trade policies and practices; and to enable stronger participation in the implementation of foreign policy affecting agriculture and food.

1. *International agricultural trade and policies.*—The agricultural situation generally within a specific country is studied toward ascertaining its effect on American agricultural foreign trade. American agricultural interests are represented in international trade agreement negotiations, the Food and Agriculture Organization of the United Nations, and international commodity organizations. The policies and programs of foreign countries that affect the demand for American agricultural products are studied. Liaison is maintained with agricultural attachés and other American officials abroad.

2. *Foreign crops and livestock investigations.*—Data are compiled, analyzed, and published on the world production, consumption, and trade of particular agricultural commodities, farm machinery, fertilizers, and insecticides.

PROGRAM AND PERFORMANCE

The Office exercises general supervision and coordination of information activities within the Department, involving publications, printed reports, exhibits, motion pictures, radio, and television. Publications include bulletins, leaflets, periodicals, and the Yearbook of Agriculture. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Exhibits are supplied to some 35 large State and interstate fairs annually. Motion pictures for the Department are produced, and films are distributed through 75 cooperating State film libraries. The Department's activities require the editing of about 2,800 periodic crop, price, and market reports, and other press releases annually. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks.

Direct obligations are estimated to be \$1,259,000 for 1953, a decrease of \$4,268 compared with 1952.

Obligations incurred.....	805,670	784,137	739,000

PROGRAM AND PERFORMANCE

The Library, serving as the National Agricultural Library, procures and preserves books, periodicals, and published materials on agriculture. It is organized into a main office in Washington, six general branches for designated geographical areas and six specialized field branches for major field research installations.

Direct obligations in 1953 are estimated to be \$701,000, of which \$682,000 is from appropriated funds and \$19,000 is from reimbursements from non-Federal sources. This is a decrease of \$27,837 compared with 1952.

1. *General agricultural library services.*—About 40,000 volumes are added annually to the collection of about 1,050,000 volumes on agriculture and related subjects. In addition, about 275,000 separate issues of periodicals are received annually. During 1951, 180,434 reference questions were answered and 1,441,522 loans of books and other publications (including photo copies in lieu of loans) were made. A general agricultural bibliography is issued monthly.

2. *Specialized services to research.*—Special bibliographies are compiled for research purposes and branch services are given to major segments of the Department's research programs.

3. Diversion to byproducts and new uses.....	215		
Obligations incurred.....	41,342,014	100,000,000	75,000,000

PROGRAM AND PERFORMANCE

Under section 32 of the act approved August 24, 1935, as amended (7 U. S. C. 612c), an amount equal to 30 percent of customs receipts during each calendar year and unused balances to the extent of \$300,000,000 are available

for the removal from the market of agricultural surpluses and for administration of marketing agreements and orders. To prevent price collapse of agricultural commodities and their ultimate waste, surpluses are removed from the market through purchase, export, and diversion programs. Obligations are estimated to be \$75,000,000 for 1953, a decrease of \$25,000,000 below 1952.

1. *Direct purchases.*—Purchases are made principally of perishable commodities and distributed to schools, public institutions, and welfare agencies.

2. *Encouragement of exportation.*—Differential payments are made to enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices. Under the provisions of the Mutual Security Act of 1951, exports are also encouraged of commodities purchased under price support programs.

3. *Diversion to byproducts and new uses.*—Differential payments are made to enable processors to purchase surplus commodities on the domestic market, divert them to byproducts or new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities.

4. *Surplus removal operating expenses.*—These expenses are mainly in connection with purchasing, distributing, exporting, and diverting surplus commodities. In addition supervisory assistance is furnished local and State groups on the preservation of surpluses for year-round use, and in cooperation with the food trade, press and radio greater consumption of abundant foods is encouraged.

5. *Marketing agreements and orders.*—Voluntary arrangements between the Secretary and handlers of farm products, put into effect upon request from the industry after hearings, investigations, and referenda among producers, serve to strengthen prices by establishing and maintaining orderly market conditions. Orders are in effect for milk, tree fruits, tree nuts, and vegetables. Administration at the local level is financed by assessments upon handlers.

Licensing dealers and handling complaints under the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts—1951, \$332,775; 1952, \$438,835; 1953, \$438,835.

PROGRAM AND PERFORMANCE

This special fund, replenished by license fees, is used to administer the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U. S. C. 499a-499s, 491-497, 581-589), to assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (1) informal settlements; (2) formal decisions involving payments or reparation awards between parties; and (3) suspension or revocation of license or publication of the facts. About 24,500 licenses are now in effect, and complaints average 60 per week.

BUREAU OF ANIMAL INDUSTRY

Meat Inspection Fund, Bureau of Animal Industry, Agricultural Research Administration—

PROGRAM AND PERFORMANCE

In fiscal year 1948 a working capital fund was set up to provide for meat-inspection services rendered by the Federal Government. Later that year, that method of financing was repealed, and the present method of direct appropriation was substituted. As of June 30, 1952, it is planned that all uncollected receivables will have been turned over to the General Accounting Office for collection.

A. Statement of sources and application of funds

[For fiscal years ending June 30, 1951, 1952, and 1953]

Expenditures out of current authorizations (investment in the revolving fund).....		30,000,000	

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Emergency loans for periods consistent with the borrowers' ability to repay are made at 3 percent interest to farmers and stockmen suffering production disasters when the Secretary determines that the area or region involved has suffered a production disaster and finds that agricultural credit is not readily available from other sources (11 U. S. C. 1148). Loans are also made at 3 percent interest to bona fide fur farmers unable to obtain necessary credit (62 Stat. 1183) and to farmers in areas where the Regional Agricultural Credit Corporation has made credit available and the Secretary finds a continued need for it.

FEDERAL CROP INSURANCE CORPORATION

[Submitted under the Government Corporation Control Act]

NOTE.—Operating and administrative expenses of the Corporation are financed by general fund appropriation and shown under current authorizations.

The following corporations and agencies are hereby authorized to make such expenditures, within the limits of funds and borrowing

authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1952] 1953 for such corporation or agency, except as hereinafter provided:

Federal Crop Insurance Corporation. (Department of Agriculture Appropriation Act, 1952.)

Loss ratio.....	.89	1.02	.89

PURPOSE AND FINANCIAL ORGANIZATION

The Corporation was created to furnish protection for the farmer's investment in producing crops against loss from unavoidable causes (7 U. S. C. 1501-1519). All insurance programs are conducted on a gradual expansion basis to develop the experience necessary to operate successful national programs.

Capital funds.—Capital stock of \$100,000,000 is authorized to be subscribed by the United States (7 U. S. C. 1504, 1504a). The Secretary of the Treasury holds receipts for \$27,000,000 of the authorized capital stock, leaving \$73,000,000 unissued. The earned surplus as of June 30, 1951, was \$3,700,254, making a total capital of \$30,700,254.

ANALYSIS OF BUDGET PROGRAMS

The Corporation is strengthening the mutual concept of insurance, which makes county premium rates reflect the actual loss experience of each county. An insurance policy covering a single crop is used in the greater number of counties. For diversified farming areas, a policy is used which covers a number of crops.

Although developed and analyzed mainly in the headquarters office, the insurance programs are administered in the field through 32 State offices and through cooperative arrangements with the Production and Marketing Administration. Program accounting and contract servicing functions are performed by the branch office in Chicago. Appropriations of up to \$12,000,000 for any fiscal year are authorized for the administrative and operating expenses of the Corporation (7 U. S. C. 1516a). Administrative expenses for fiscal year 1953 are estimated to be \$9,100,000, compared with \$7,951,380 in 1952 and \$5,661,659 in 1951. The increase is required to service a greater number of insureds and to expand the areas of operation. The 1952 crop insurance program is being offered in 877 counties on wheat, cotton, flax, corn, tobacco, beans, citrus, and multiple crops. It is estimated that 486,800 farmers will be insured, an increase of about 142,000 over 1951. The 1953 crop insurance program provides for adding 60 counties, making a total of 937. Participation in the crop year 1953 is estimated at 548,900 contracts, or a net increase of 62,100 over 1952.

FINANCIAL REVIEW

The following table gives a summary of insurance operations for fiscal years 1951, 1952, and 1953.

Summary of insurance operations

[Fiscal years ending June 30, 1951, 1952, and 1953]

Other income and expense (-) net.....	-78,643		-208,855	-349,200
Net income (or loss (-)).....		1,584,628	-610,855	2,705,100

The total earned surplus, estimated at \$5,794,499 on June 30, 1953, consists of the insurance reserves, built up from the excess of premiums over indemnities. These reserves are accumulated in accordance with sound insur-

ance principles in good crop years and will be used by the Corporation in absorbing losses during below-average crop years.

The new insurance program was instituted beginning with crop year 1948. Since that date, operating results have generally corresponded with the crop conditions that prevailed in the insurance counties. Crop year 1950 experience was favorable in wheat, flax, tobacco, and multiple crops. It was slightly unfavorable in corn and beans and very unfavorable in cotton. An unusually wet and cold maturing and harvesting season resulted in the small losses in corn and beans. A mild winter and a rainy growing season increased the boll weevil infestation in the central and eastern part of the Cotton Belt with a resulting poor cotton crop. However, over-all insurance operations for the fiscal year 1951 show a net income of \$1,584,628.

In crop year 1951, wheat areas suffered from mild to severe damage from varying weather (excessive rain, flood, drought, and hail) and insect factors. Total wheat production is below the 10-year average with the winter wheat crop being the smallest in 8 years. Winter wheat losses were offset by more favorable spring wheat operations leaving net estimated losses on wheat at \$507,800. Severe freeze and frost damage throughout the Corn Belt in early September will result in corn losses of \$985,500 and multiple crop losses of \$566,100. Hail and extremely dry weather in the bean areas will cause net insurance losses of \$425,800 on that crop. Prospects for other insured crops range from satisfactory to excellent with the result that over-all insurance operations are expected to show a net loss of \$610,855. It is impossible to predict crop conditions for the 1952 crop year. Nevertheless, a net income of \$2,705,100 is estimated for crop year 1952, based on the assumption that 90 percent of the premiums earned will be paid out in indemnities. This assumption is predicated on the structure of premium rates which are so established as to provide a 10-percent reserve for unforeseen losses.

The Congress has directed that the premiums shall over a period of years cover the indemnities only (7 U. S. C. 1508b) and that the administrative expenses incurred in developing and operating the insurance program be provided by annual appropriations (7 U. S. C. 1516a). Because of these provisions, the administrative expenses do not appear in the corporate fund financial statements but are accounted for separately.

COMMODITY CREDIT CORPORATION—Continued*Commodity Credit Corporation—Continued***PURPOSE AND FINANCIAL ORGANIZATION ¹**

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, foods, feeds, and fibers for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation is managed by a board of directors, subject to the general supervision and direction of the Secretary of Agriculture, who is, *ex officio*, a director and the chairman of the board. Besides the Secretary, the board consists of six members appointed by the President and confirmed by the Senate. In addition, the Corporation has a bipartisan advisory board of five members appointed by the President to survey the general policies of the Corporation and advise the Secretary with respect thereto.

The Corporation has an authorized capital stock of \$100,000,000 and authority to borrow up to \$6,750,000,000 from the Treasury. All of the Corporation's stock is held by the United States. On June 30, 1951, borrowings outstanding amounted to \$2,555,000,000.

ANALYSIS OF BUDGET PROGRAMS

The budget is based on five types of programs: (1) Price support, (2) supply and foreign purchase, (3) storage facilities, (4) loan to Secretary of Agriculture for agricultural conservation purposes, and (5) commodity export.

In addition to these programs, the Secretary of Agriculture may determine that Corporation funds should be transferred for use in the eradication of foot-and-mouth and other contagious diseases of animals, subject to full reimbursement. As of June 30, 1951, advances, interest, and related charges amounted to \$140,239,912. Against this sum, reimbursements and related receipts amounting to \$128,999,380 have been applied as credits, including direct appropriations of \$59,400,000 to the Secretary of Agriculture and \$32,700,000 of notes canceled by the Secretary of the Treasury.

The Corporation's budget estimates for 1952 and 1953 are based on the assumptions (a) that national income and industrial activity will continue their upward trend; (b) that agricultural prices will tend to stabilize at or near the levels prevailing during the last 6 months of the calendar year 1951; (c) that yields will be in line with recent averages; (d) that production will continue at high levels in the crop years 1951 and 1952; and (e) that acreage allotments and marketing quotas will be in effect on peanuts and certain kinds of tobacco.

In considering these estimates, it should be recognized that it is extremely difficult to estimate fund requirements for the year beginning July 1, 1952. They are dependent upon weather conditions, the volume of agricultural production in this country and in foreign countries, economic conditions generally, food needs in the occupied areas and other foreign countries, availability of dollar exchange, and many other complex and unpredictable factors.

¹ A more detailed statement describing the creation, purposes, authorities, and financial structure of the Corporation is contained in the Budget of the United States, 1948, as supplemented by subsequent budgets.

1. *Price-support program.*—Support operations will be carried out under the Corporation's charter powers (particularly secs. 5 (a) and (d)), in conformity with the Agricultural Act of 1949 (Public Law 439, approved October 31, 1949), supplemented by Public Law 163, approved July 28, 1945, with respect to tobacco, and by Public Law 471, approved March 31, 1950, with respect to peanuts. Price-support commodities are disposed of pursuant to the authorities contained in sections 407 and 416 of the Agricultural Act of 1949 (Public Law 439, approved October 31, 1949), section 112 (e) of the Foreign Assistance Act of 1948 (Public Law 472, approved April 3, 1948), and Public Law 85, approved June 7, 1949.

The Corporation utilizes normal trade facilities to the fullest practicable extent in carrying out the price-support program. When loans are made to farmers, the Corporation makes use of local banks, cooperatives, and other private lending agencies.

Purchase agreements permit producers to secure price support without the necessity of taking out a loan. These agreements now provide that the Corporation will purchase such quantities of eligible commodities as the producer elects to deliver within the maximum quantity covered in the agreements. These agreements generally are available during the same period that loans are available, and the producer must declare his intention to deliver under the purchase agreement within a specified 30-day period. Purchase agreements have been available on food and feed grains, flaxseed, soybeans, peas, beans, tung nuts, and seeds.

The Corporation's inventories of commodities decreased substantially in 1951, primarily as a result of substantial sales of cotton, wheat, and dairy products. It is anticipated that inventories will further decrease in 1952, due principally to dispositions of cotton, wheat, grain sorghums, and beans. Inventories are expected to increase in 1953, due principally to acquisitions of corn and wheat loan collateral.

2. *Supply and foreign purchase program.*—The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies and to meet domestic requirements. Foods, agricultural commodities, and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also make available materials and facilities required in connection with the production and marketing of agricultural commodities.

The supply and foreign purchase program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and 5 (c) thereof.

Operations are conducted in accordance with procedures and policies reasonably calculated to assure compliance with section 4 of the act of July 16, 1943 (15 U. S. C. 713a-9), which requires that the Corporation be fully reimbursed for services performed, losses sustained, and operating costs incurred for commodities purchased or delivered to or on behalf of any other Government agency.

Continued decline in the volume of supply and foreign purchase program activities is expected in 1952 and 1953. Principal causes are: (a) The decline in foreign demand due to increased agricultural production in Europe; (b) the shortage of dollar exchange; (c) the use of commodities obtained as a result of price-support operations to meet supply program requirements; and (d) the increased volume of shipments by commercial firms on their own account.

3. *Storage facilities program.*—The Corporation (a) purchases and maintains granaries and equipment for care and storage of grain owned or controlled by the Corporation; (b) makes loans for the construction or expansion of farm storage facilities; (c) provides storage-use guaranties to encourage the construction of commercial storage facilities; (d) undertakes other operations necessary to provide storage adequate to carry out the Corporation's programs.

During 1951, the Corporation increased storage capacity by 93,555,556 bushels through purchase and erection of structures, by 37,629,437 bushels through loan activities, and by continuing storage-use guaranties entered into in 1950. In order to provide adequate farm storage facilities in 1952 and 1953, it is estimated that the Corporation will be required to make loans on facilities having a total capacity of 30,000,000 bushels in 1952 and of 25,000,000 bushels in 1953. The storage facilities program is carried out under the authority contained in the Corporation's charter, particularly sections 4 (h), 4 (m), and 5 (a).

4. *Loan to Secretary of Agriculture for agricultural conservation purposes.*—Section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391), requires the Corporation to lend to the Secretary of Agriculture during each fiscal year such sums, not to exceed \$50,000,000, as he estimates will be required to make advances for the purchase of conservation materials from January 1 to June 30 of each year. Repayment is usually made during the succeeding fiscal year from appropriated funds, with interest at least equal to the cost of money to the Corporation. In 1951, a loan of \$40,750,000 was made; it is estimated that a loan of \$46,000,000 will be made in each of fiscal years 1952 and 1953.

5. *Commodity export program.*—The Corporation exports, causes to be exported, or aids in the development of export markets for agricultural commodities and products. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (d) and 5 (f) and the International Wheat Agreement Act of 1949.

Under the International Wheat Agreement (7 U. S. C. 1641, 1642), the United States has agreed to supply about 255 million bushels of wheat or wheat products to participating nations at prices not in excess of \$1.80 per bushel, Fort William, Port Arthur basis. The International Wheat Agreement Act of 1949 authorizes the President, acting through the Corporation, to make available such quantities of wheat and wheat flour to importing countries, and at such prices, as may be necessary to exercise the rights, obtain the benefits, and fulfill the obligations of the United States under the International Wheat Agreement. In turn, the Corporation was authorized to use its general borrowing authority to pay current obligations and to be repaid therefor from appropriations made specifically to cover the costs of the International Wheat Agreement. Pending such reimbursement, the Corporation is authorized to establish the net costs of operations under the agreement as a receivable.

The Corporation's net costs charged to the International Wheat Agreement were \$182,162,250 for 1951 and are estimated to be \$182,800,000 for 1952 and \$185,000,000 for 1953. The budget assumes that the Corporation will be reimbursed in 1953 for the costs incurred in 1951 by an appropriation to repay borrowings from the Treasury.

Administrative expenses.—These are for the general supervisory and operating staff, estimated costs of General

Accounting Office audit, and the costs of services performed by the Production and Marketing Administration. Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition of real or personal property owned in whole or in part by the Corporation are treated as nonadministrative expenses, as provided in the language of the appropriation act. Expenses treated as nonadministrative in the 1953 estimate are the same as those so treated in 1951 and 1952. The requested authorization excludes expenses in connection with the supply and foreign purchase program; the budget for 1953 contemplates full reimbursement for these expenses. Such reimbursements will be obtained and used in the fiscal year 1953 in the same manner as in the fiscal years 1951 and 1952.

Expenses for 1951 and estimates for 1952 and 1953 are reflected in the schedule, "Limitation on administrative expenses, Commodity Credit Corporation"; the estimates for 1953 include a limitation of \$17,876,000 for costs of administration exclusive of reimbursements for services performed. There is included in the requested limitation a reserve of \$1,560,000 which would be available for expenditure only if the volume of price-support operations exceeds the volume estimated in this budget. Should the character and volume of operations reflected in the program estimates change, additional administrative funds may be required.

FINANCIAL REVIEW

The Corporation's assets, which consist principally of price support loans receivable and inventories, were valued at \$2,217,277,790 as of June 30, 1951, and are estimated at \$2,412,000,000 as of June 30, 1952, and \$2,589,000,000 as of June 30, 1953. The estimated increase in assets in 1952 is caused primarily by the increase in outstanding cotton and tobacco loans. The increase anticipated in 1953 over the 1952 level is expected to result primarily from increases in the inventories of corn and wheat and outstanding cotton loans.

The changes in the Corporation's assets are also reflected in its principal liabilities. Borrowings from the Treasury amounted to \$2,555,000,000 as of June 30, 1951; it is estimated that borrowings from the Treasury will amount to \$2,309,000,000 as of June 30, 1952, and \$2,432,000,000 as of June 30, 1953. The anticipated decrease in borrowings as of June 30, 1952, results primarily from the restoration of capital as of June 30, 1950, which was approved on August 31, 1951. The Corporation's liabilities (principally price support loans held by banks) amounted to \$137,905,066 as of June 30, 1951; it is estimated that these liabilities will amount to \$145,164,769 as of June 30, 1952, and \$184,164,769 as of June 30, 1953. In addition, the Corporation had contingent liabilities as of June 30, 1951, amounting to \$17,592,310. It is estimated that these contingent liabilities will amount to \$64,000,000 and \$80,000,000 as of June 30, 1952 and 1953, respectively, consisting of corn purchase agreements outstanding.

The Corporation's operations resulted in a net budgetary receipt of \$581,156,305 in 1951. It is estimated that operations will result in net budgetary expenditures of \$205,949,611 in 1952 and \$252,518,763 in 1953. The net gain for 1951, including both realized losses of \$389,118,645 and net downward adjustments in valuation allowances of \$545,029,402, amounted to \$155,910,757. It is estimated that a net gain of \$12,000,000 will be realized in 1952 and a net loss of \$105,000,000 will be incurred in 1953.

COMMODITY CREDIT CORPORATION—Continued*Commodity Credit Corporation—Continued*

The Corporation's operations are financed by capital funds and borrowings from the Treasury and from private lending agencies. In accordance with the charter of the Corporation, interest on the capital is being paid the Treasury. The rate in 1951 was 1.875 percent. The interest rate on borrowings from the Treasury is 1.5 percent. These interest rates are at levels which reimburse the Treasury for its borrowing costs, considering the type of borrowings involved. Funds are borrowed from private lending agencies when the Corporation desires to utilize such agencies in carrying out a particular operation in addition to obtaining funds. All borrowing agreements with private lending agencies are approved by the Secretary of the Treasury. Present indications are that the borrowing authority of \$6,750,000,000 will be adequate to cover all of the Corporation's obligations in 1953.

RESTORATION OF CAPITAL

An appraisal of the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury to determine net worth. If the net worth is less than \$100,000,000, the Secretary of the Treasury restores the amount of capital impairment; if net worth is more than \$100,000,000, the Corporation pays the surplus to the

Treasury. A summary of capital impairment, restoration of capital, and payments to the Treasury is given in schedule 4.

There was a deficit of \$575,627,276 as of June 30, 1951. Restorations have been approved of \$66,698,457 to cover the June 30, 1949, deficit and of \$421,462,507 to cover the June 30, 1950, deficit. The difference between the deficit shown on the books of the Corporation as of June 30, 1949 and 1950, and the amounts of these restorations of capital resulted from the net adjustments based on the Secretary of the Treasury's appraisal of the Corporation's assets and liabilities. These adjustments were based on the provision of the act of March 8, 1938, which defines asset values for appraisal purposes as the lower of cost or average market prices for the month of June. The Corporation, however, takes into consideration current market prices and support levels, prospective sales outlets, the effect of production and price support levels on market prices, and the costs of carrying the assets in arriving at their estimated value. While the actual amount of the restoration of capital will depend on the amount of the capital impairment established by the Secretary of the Treasury as of June 30, 1951, the estimated amount shown in the budget language proposing a restoration of capital (not to exceed \$120,000,000) is based on Treasury valuation principles rather than the deficit as shown on the books of the Corporation.

Net impairment, wartime consumer subsidies.....				2,102,328,241

¹ Pursuant to the Foreign Aid Act of 1947 (Public Law 389, 80th Cong.) and Third Supplemental Appropriation Act of 1948 (Public Law 393, 80th Cong.).

² Of this amount, \$66,698,457, representing the deficit as of June 30, 1949, as appraised by the Treasury, was restored on Sept. 6, 1950; \$421,462,507, representing the deficit as of June 30, 1950, as appraised by the Treasury, was restored on Aug. 31, 1951.

³ Estimated amount applicable to appraisal period.

⁴ The impairment of \$39,436,885 for the appraisal period ending Mar. 31, 1943, was not restored until after the following year's appraisal and is included in the amount shown for 1944 appraisal period.

⁵ The act of Mar. 8, 1938 (U. S. C., 1940 ed., supp. III, title 15, sec. 713–A–1), as amended by the act approved Apr. 12, 1945, changed the date of appraisal to June 30 of each year. Therefore, the impairment as of June 30, 1945, covers a 15-month period.

COMMODITY CREDIT CORPORATION—Continued

LIMITATION ON EXPENSES

Administrative Expenses, Commodity Credit Corporation—

Commodity Credit Corporation: Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed \$16,500,000 (and the amount in the last proviso in this paragraph is increased to \$2,500,000) \$17,876,000 shall be available for administrative expenses of the Corporation: *Provided further*, That \$1,560,000 of this authorization shall be placed in reserve to be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, only in such amounts and at such times as may become necessary to carry out price support operations which are indicated to be in excess of the budget estimates for such operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further*, That the Secretary of the Treasury is hereby authorized and directed to discharge indebtedness of the Commodity Credit Corporation to the Secretary of the Treasury by canceling notes issued by the Corporation to the Secretary of the Treasury in the amount of the capital impairment determined by the appraisal of June 30, [1950] 1951 (but not to exceed \$427,000,000) \$120,000,000, pursuant to sections 1 and 4 of the Act of March 8, 1938, as amended (15 U. S. C. 713a-1, 4): *Provided further*, That \$1,000,000 of this appropriation shall be placed in reserve, to be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, only in such amounts and at such times as may become necessary due to the existence of substantial surpluses of the basic commodities requiring mandatory price support. (7 U. S. C. 624, 1282, 1301, 1385, 1391c, 1421-1450, 1641-1642; 15 U. S. C. 712a, 713a-4-10, 714-714o; 31 U. S. C. 841, 846-852, 866-868c, 869; 50 U. S. PURPOSE AND FINANCIAL ORGANIZATION

The Corporation was established (1) to provide funds for the making of loans to farmers by the Land Bank Commissioner; (2) to make funds available to the Federal land banks to assist them during periods of emergency; and (3) to make loans to joint stock land banks. The Commissioner's lending authority expired July 1, 1947 (12 U. S. C. 1020 et seq.). The Corporation is in process of liquidating its assets.

Authorized capital stock of \$200,000,000 was subscribed to by the Governor of the Farm Credit Administration on behalf of the United States. Under subsequent statutory authority, the Corporation repaid all but \$10,000 into the surplus fund of the Treasury.

ANALYSIS OF BUDGET PROGRAM

Budgetary requirements of the Corporation for fiscal year 1953 depend upon the rate of liquidation of its assets. Liquidation during 1951 and the estimated repayment of loans for 1952 and 1953 are reflected in statements A and C.

Administrative expenses.—These are reimbursements to the Federal land banks for services performed as agents of the Corporation, payments to the Treasury and Federal Reserve banks for expenses in handling bond transactions and checking accounts for the Corporation, cost of audit by the General Accounting Office, and miscellaneous items. Total administrative expenses for 1951 were \$1,128,836 and are estimated at \$1,100,000 for 1952 and \$950,000 for 1953.

FINANCIAL REVIEW

Budgetary expenditures.—Operations in 1951 resulted in a net budgetary receipt of \$13,928,214; net budgetary receipts of \$10,746,400 are estimated for 1952 and \$8,424,800 for 1953.

Dividends paid into Treasury.—During 1951 the Corporation declared and paid into the General Fund of the Treasury dividends amounting to \$14,000,000.

Income and expenses.—Operating income for 1951 was \$2,308,641, and is estimated at \$1,732,200 for 1952 and \$1,293,200 for 1953. The resulting net income, after adjustment of valuation allowances and other additions, was \$2,654,224 in 1951, and will be about \$1,808,300 in 1952, and \$1,299,500 in 1953. Expenses, exclusive of charge-offs, for 1951 were \$1,277,581; comparable expenses for 1952 and 1953 are estimated at \$1,228,400 and \$1,073,700.

LIMITATION ON EXPENSES

Administrative Expenses, Federal Farm Mortgage Corporation—

Federal Farm Mortgage Corporation: Not to exceed **[\$1,100,000]** \$950,000 (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, and the use of the services and facilities of Federal land banks, national farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the Act of January 31, 1934 (12 U. S. C. 1020-1020h); and said total sum shall be exclusive of services and facilities furnished and examinations made by the Farm Credit Administration central office, interest expense, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: *Provided*, That promptly after June 30 of each fiscal year all cash funds in excess of the estimated operating requirements for the current fiscal year shall be declared as dividends and paid into the general fund of the Treasury: *Provided further*, That the aggregate amount of bonds the Corporation may issue and have outstanding at any one time shall not exceed \$500,000,000. (*Department of Agriculture Appropriation Act, 1952.*)

PURPOSE AND FINANCIAL ORGANIZATION

The 12 Federal intermediate credit banks, serving as banks of discount for agriculture, do not make loans directly to individuals; or accept deposits, except as collateral security. Each bank operates under a board of directors identical with the district farm credit board and is supervised by the Intermediate Credit Commissioner, who is responsible to the Governor of the Farm Credit Administration (12 U. S. C. 1021–1022; 640b and 640d). The Government's capital investment in the banks on June 30, 1951, was \$61,150,000.

ANALYSIS OF BUDGET PROGRAM

Lending activities.—The demand upon these banks for credit increased sharply in 1951 and the upward trend in the volume of business is expected to continue through 1952 and 1953. The volume of loans and discounts expected in 1953 amounts to \$2,312,140,000, an increase of 8.3 percent over the estimated amount for 1952 and 20.2 percent over the volume handled in 1951. The \$1,923,696,741 of credit extended in 1951 was the largest in the history of the banks and 27 percent more than in 1950. Among factors contributing to the current trend in loan volume are continued high production costs, increased acreages of cotton and other crops planted pursuant to goals set by the Department of Agriculture, expansion in livestock production and pasture improvements, and an increasing number of loans to new borrowers offered to the banks. The policies of the credit banks are in full harmony with the principles of the voluntary credit restraint program, and the banks are cooperating actively in all efforts designed to increase needed production and at the same time to prevent speculative and inflationary extensions of credit.

Financing activities.—To finance their lending operations the banks expect to issue consolidated collateral trust debentures amounting to \$1,146,343,000 in 1952 and \$1,275,100,000 in 1953, and to borrow \$104,000,000 in 1952 and \$103,750,000 in 1953 from commercial banks for short periods. The United States assumes no liability for the debentures or other obligations of the Federal intermediate credit banks.

Borrowing authority.—The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times its surplus and paid-in capital (12 U. S. C. 1041).

Administrative expenses.—Paid out of income, these expenses amounted to \$1,435,828 in 1951 and are estimated at \$1,549,756 for 1952 and \$1,690,000 for 1953.

FINANCIAL REVIEW

Investment of United States Government.—The Government's capital investment of \$61,150,000 in the banks at June 30, 1951, consisted of \$5,000,000 of paid-in capital for each of the 12 banks and a total of \$1,150,000 of paid-in surplus supplied to 2 of the banks late in 1951 out of the

revolving fund of \$40,000,000 created by section 15a of the Federal Farm Mortgage Corporation Act (12 U. S. C. 1131i(e)). In view of the growing volume of business, it is anticipated that several of the banks will require a total of \$2,000,000 of additional capital or paid-in surplus in 1952 to enable them to meet the credit needs of eligible borrowers within the 10 to 1 maximum debt-to-capital ratio permitted by law. No further increase during 1953 is now contemplated but future developments may necessitate additional investments in paid-in surplus.

Income.—Interest income from loans and discounts, United States securities, and other sources was \$13,840,576 in 1951, and is estimated at \$19,807,600 for 1952 and \$22,573,600 for 1953. The increases in gross interest income reflect both higher loan volume and upward revisions in lending rates due to higher money costs. Net income which was \$2,223,098 in 1951, is expected to be \$1,379,244 in 1952 and \$2,231,900 in 1953.

Interest costs.—Interest and other costs on borrowed money were \$9,954,201 in 1951, and are estimated to be \$16,542,400 in 1952 and \$18,314,600 in 1953. The average cost of outstanding debentures was 1.67 percent per annum in 1951, and is estimated by the banks at 2.35 percent for 1952 and 2.45 percent for 1953. Interest costs are affected by general money market conditions and rates are subject to considerable fluctuation.

Earned surplus.—The distribution of net income of the banks is prescribed by law (12 U. S. C. 1072). Out of such income, \$1,025,000 was transferred to reserve for contingencies in 1951, and it is expected that \$925,000 will be transferred to reserve in 1952 and \$1,285,000 in

1953. A 25-percent franchise tax of \$299,525 was paid in 1951 and payments of \$113,600 and \$236,700 are anticipated in 1952 and 1953. Total franchise taxes paid by the banks from organization to June 30, 1951, aggregate \$8,312,706. The balance of net income each year is carried to unreserved surplus. The total earned surplus is retained in the system as contemplated by law. These surplus reserves, which totaled \$40,423,769 on June 30, 1951, together with paid-in capital and paid-in surplus, form the capital structure on which the issuance of securities is based.

Loans and discounts.—Loans and discounts outstanding on June 30, 1951, amounted to \$794,633,159. It is estimated that loans and discounts outstanding will amount to \$853,341,159 on June 30, 1952, and \$897,428,159 on June 30, 1953.

Investments.—The banks held \$45,754,000 par value of United States securities at June 30, 1951, and it is estimated that such holdings will be in the same amount on June 30, 1952 and June 30, 1953. These investments are an important factor in enabling the banks to obtain funds in the investment markets at reasonable rates. They are used from time to time as collateral for debentures and to secure short-term bank borrowings.

Liabilities.—Unmatured consolidated debentures and notes payable outstanding, which account for all except about 1 percent of the banks' liabilities, totaled \$752,925,000 on June 30, 1951, and are expected to increase to \$813,370,000 on June 30, 1952, and \$856,725,000 on June 30, 1953.

PURPOSE AND FINANCIAL ORGANIZATION

To make available to farmers and stockmen permanent short-term credit facilities on a cooperative basis, the

production credit system provides in each of the 12 farm credit districts a production credit corporation. These corporations, under a district board of directors (12 U. S. C. 1131 et seq.), organize, supervise, and provide supplemental capital for the local production credit associations, which are the lending cooperatives. The capital stock of the production credit corporations comes from the revolving fund of \$90,000,000 in the Treasury. The paid-in capital of the corporations, amounting to \$39,235,000 on June 30, 1951, and most of their surpluses are invested in class A stock of production credit associations and in United States bonds. The corporations are supervised by the Production Credit Commissioner, who is responsible to the Governor of the Farm Credit Administration.

ANALYSIS OF BUDGET PROGRAM

Relations with production credit associations.—The principal factor governing administrative expenses is the supervision of these associations, including the prescribing of loan policies, interest rates and reserves; approval of certain classes of loans and dividend payments; and approval of officers, directors, and their compensation. The corporations make an annual credit review including examination of the outstanding loans of each association and make periodic operating reviews and audits. The credit reviews include a determination as to compliance with regulations X and W of the Federal Reserve Board and the national program for voluntary restraint of credit. An important objective is to have all associations on a

self-supporting basis. By working toward this end, the corporations have been able to reduce their investment in class A stock of associations from \$90,000,000 in 1934 to \$12,656,500 on June 30, 1951. At that date, more than one-third of the 500 associations were completely owned by farmers and stockmen.

Administrative expenses of the 12 corporations amounted to \$1,346,984 in 1951 and are estimated at \$1,407,015 for 1952 and \$1,465,000 for 1953.

FINANCIAL REVIEW

The Government's capital investment in the production credit corporations is expected to be reduced to \$33,735,000 by a payment of \$3,000,000 in 1952 and \$2,500,000 in 1953 to the revolving fund. The surpluses of the corporations, aggregating \$16,200,750 on June 30, 1951, safeguard this investment and directly influence the amount of paid-in capital required. Since 1949, by reason of a special payment of \$30,000,000 into the surplus fund of the Treasury in that year and a corresponding reduction in their investments, the corporations have been unable to defray all expenses from income. The net loss in 1951 was \$600,622 and is estimated at \$545,015 and \$576,400 for 1952 and 1953, respectively, reducing the earned surpluses to an aggregate of \$15,079,335 on June 30, 1953.

Purchases and sales of securities result primarily from the continued reduction of the corporations' liability under bond repurchase agreements with the associations and the return of Government capital to the revolving fund.

BANKS FOR COOPERATIVES

Under the Farm Credit Act of 1933, capital funds required by the banks for cooperatives are obtained from the revolving fund provided in the Agricultural Marketing Act (12 U. S. C. 1134b-1134i) and from farmers' cooperatives obtaining loans from these banks (12 U. S. C. 1134k). Because capital stock in any such bank owned by a cooperative which has paid its indebtedness to the bank must be retired and canceled upon request, the amount of capital stock so owned ordinarily varies with the amount of loans outstanding. As of June 30, 1951, stock owned by cooperatives and deposits of cooperatives in the guaranty fund totaled \$16,485,100 or only 8.45 percent of the total capital stock of the banks. The desirability of eventual ownership of the banks for cooperatives by the agricultural cooperatives of the country has been recognized for a number of years, but is not possible of accomplishment without authorizing legislation. After long consideration a bill to accomplish this objective was introduced in both Houses during the Eightieth Congress. This proposed legislation provided for the eventual retirement of the capital stock in the banks owned by the Federal Government through (1) the purchase of stock by cooperatives in relation to the amount of interest paid on loans from the banks, (2) the issuance of stock in the form of patronage dividends, and (3) the direct sale of stock to cooperatives. Hearings were held by both Houses and the bill reported out by the House Committee on Agriculture. No final action was taken on the bill by the Eightieth Congress. A similar bill was introduced in the House of Representatives during the Eighty-first Congress and passed by the House of Representatives. The bill was not acted upon by the Senate and, therefore, lapsed at the end of the session. Sentiment is still strong among many cooperatives for ownership of the banks for cooperatives and similar legislative proposals are expected in the future.

BANKS FOR COOPERATIVES

Combined statement of condition—June 30, 1951

Assets:	
Cash.....	\$18,047,332
U. S. Government securities (par \$42,788,000).....	43,276,427

GENERAL PROVISIONS

SEC. 401. Within the unit limit of cost fixed by law, the lump-sum appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [350] 528 passenger motor vehicles for replacement only, and for the hire of such vehicles, necessary in the conduct of the work of the Department outside the District of Columbia.

SEC. 402. Provisions of law prohibiting or restricting the employment of aliens shall not apply to (1) the temporary employment of translators when competent citizen translators are not available; (2) employment in cases of emergency of persons in the field service of the Department for periods of not more than sixty days; and (3) employment under the appropriation for the Office of Foreign Agricultural Relations.

SEC. 403. Of appropriations herein made which are available for the purchase of lands, not to exceed \$1 may be expended for each option to purchase any particular tract or tracts of land.

SEC. 404. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 405. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 406. Not less than \$575,000 shall be available for contracts in accordance with section 10 (a) of the Act of August 14, 1946 (7 U. S. C. 427i) from appropriations herein made for the Bureau of Agricultural Economics; Bureau of Animal Industry; Bureau of Dairy Industry; Bureau of Plant Industry, Soils, and Agricultural Engineering; Bureau of Entomology and Plant Quarantine; Bureau of Agricultural and Industrial Chemistry; Bureau of Human Nutrition and Home Economics; and the Forest Service.

[SEC. 407. Notwithstanding any other provisions of law, the Department is hereby authorized hereafter to employ or otherwise contract with persons at regular rates of pay for necessary hours of work for emergency forest fire fighting and pest control and for handling of animals, including dairy cattle, without regard to Sundays, Federal holidays, and the regular workweek.]

SEC. [408] 407. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That nothing in this section shall be construed to require an affidavit from any person employed for less than sixty

GENERAL PROVISIONS—Continued

days for sudden emergency work involving the loss of human life or destruction of property, the payment of salary or wages may be made to such persons from applicable appropriations for services rendered in such emergency without execution of the affidavit contemplated by this section.

No part of any appropriation contained in this Act or of the funds available for expenditure by any corporation or agency included in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.

SEC. 409. No part of any appropriation or authorization contained in this Act shall be used to pay the compensation of any incumbent appointed to any civil office or position which may become vacant during the fiscal year beginning on July 1, 1951: *Provided*, That this inhibition shall not apply—

- (a) to not to exceed 25 per centum of all vacancies;
- (b) to positions filled from within the department;
- (c) to offices or positions required by law to be filled by appointment of the President by and with the advice and consent of the Senate;
- (d) to seasonal and casual workers;
- (e) to meat inspectors;
- (f) to field employees of the Soil Conservation Service and Production and Marketing Administration who provide conservation assistance to farmers and ranchers;
- (g) to field operating and research employees engaged in work of county offices and other field locations;
- (h) to employees of the crop and livestock reporting service:

Provided further, That with the exception of the agencies and functions listed in (a) to (h) above, not more than 90 per centum of the amounts shown in the budget estimates for personal services shall be available for such purpose: *Provided further*, That when the total number of personnel subject to this section has been reduced to 90 per centum of the total provided for in the budget estimates for 1952, this section may cease to apply: *Provided further*, That in addition to the funds otherwise allowed under this section, the following agencies shall be allowed additional sums for personnel as follows: Commodity Exchange Authority, \$58,928; Extension Service, salaries and expenses, \$31,327; Office of the Secretary, \$32,832; Office of Foreign Agricultural Relations, \$26,946.]

SEC. 410. No part of any appropriation or authorization contained in this Act shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the Department and its instrumentalities, cooperators and collaborators receiving personnel services from the Department: *Provided*, That for purposes of this section employees shall be con-

sidered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil service examiners; wage administration; and processing, recording, and reporting: *Provided further*, That nothing contained in this section shall be construed as permitting any increase whatever in personnel officers over and above the number otherwise provided for in this Act.]

SEC. 411 408. Except for the car officially assigned to the Secretary of Agriculture, no part of any appropriation contained in this Act shall be used to pay the compensation of any civilian employee of the Government whose principal duties consist of acting as chauffeur of any Government-owned passenger motor vehicle (other than a bus or ambulance), unless such appropriation is specifically authorized to be used for paying the compensation of employees performing such duties.

SEC. 412. No part of the money appropriated for the Department of Agriculture by this Act or made available for expenditure by any corporation by this Act which is in excess of 75 per centum of the amount required to pay the compensation of all persons the budget estimates for personal services heretofore submitted to the Congress for the fiscal year 1952 contemplated would be employed by the Department of Agriculture or by such corporation, respectively, during such fiscal year in the performance of—

(1) functions performed by a person designated as an information specialist, information and editorial specialist, publications and information coordinator, press relations officer or counsel, photographer, radio expert, television expert, motion-picture expert, or publicity expert, or designated by any similar title, or

(2) functions performed by persons who assist persons performing the functions described in (1) in drafting, preparing, editing, typing, duplicating, or disseminating public information publications or releases, radio or television scripts, magazine articles, photographs, motion pictures, and similar material, shall be available to pay the compensation of persons performing the functions described in (1) or (2): *Provided*, That this section shall not apply to personnel engaged in the preparation and distribution of technical agricultural publications and farmers bulletins, and the Agriculture Yearbook, the reporting and dissemination of the results of research and investigations, the preparation and broadcasting of the "Farm and Home Hour" and similar radio programs, and other work required to carry out the duties and responsibilities of the Department imposed by law other than work intended primarily for press, radio and television services, and popular publications.] (*Department of Agriculture Appropriation Act, 1952.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1953

DEPARTMENT OF AGRICULTURE

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
AGRICULTURAL MARKETING ACT (RMA—TITLE II)								
Agricultural Marketing Act (RMA—title II), Agriculture.						5		For use by technical assistants where public transportation is inadequate or not available in supervising, directing, and carrying out the research and marketing service work authorized by the Agricultural Marketing Act (RMA—title II).
BUREAU OF AGRICULTURAL ECONOMICS								
Salaries and expenses, Bureau of Agricultural Economics:								
Economic investigations.....	4	\$5,600	4	\$1,200	\$4,400	9	\$200	For use of research specialists engaged in field work on farm management and land-use problems at various points throughout the United States.
Crop and livestock estimates.....	8	11,200	8	2,400	8,800	27	300	For use of statisticians in charge of the preparation of crop and livestock estimates in important agricultural areas.
Total, Bureau of Agricultural Economics.	12	16,800	12	3,600	13,200	36	500	
AGRICULTURAL RESEARCH ADMINISTRATION								
OFFICE OF ADMINISTRATOR								
Salaries and expenses, Office of Administrator, Agricultural Research Administration.						8		For transportation of the Research Administrator and members of his staff on official business in the District of Columbia, and for use of officials in supervising and inspecting the maintenance and operation of the Agricultural Research Center, Beltsville, Md., an area of approximately 11,700 acres.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1953—Continued

DEPARTMENT OF AGRICULTURE—Continued

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
AGRICULTURAL RESEARCH ADMINISTRATION—Continued								
RESEARCH ON STRATEGIC AND CRITICAL AGRICULTURAL MATERIALS								
Research on strategic and critical agricultural materials, Agriculture.						4		For use by technical workers and their assistants in planning and carrying forward the work of the Department on agricultural materials determined to be strategic and critical pursuant to sec. 7 (b) of the Stockpiling Act.
RESEARCH ON AGRICULTURAL PROBLEMS OF ALASKA								
Research on agricultural problems of Alaska, Agricultural Research Administration.						1		For use of director and technical assistants in connection with planning and carrying forward the research program on agricultural problems of Alaska.
OFFICE OF EXPERIMENT STATIONS								
Salaries and expenses, Office of Experiment Stations, Agricultural Research Administration.	1	\$1,400	1	\$400	\$1,000	1		Director and other employees of the Federal Experiment Station in Puerto Rico in conducting outlying experiments, visiting cooperative experiments, and carrying on the various lines of research throughout the island.
Virgin Islands agricultural program, Office of Experiment Stations, Agricultural Research Administration.	1	1,400			1,400			Director and other employees in conducting outlying experiments, visiting cooperative experiments, and carrying on the various lines of research and extension activities throughout the islands in connection with the agricultural program.
Total, Office of Experiment Stations.	2	2,800	1	400	2,400	1		
BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS								
Salaries and expenses, Bureau of Human Nutrition and Home Economics, Agricultural Research Administration.						1		For travel by officials of the Bureau to enable personnel to operate more adequately at the sites of various projects carried on by the Bureau at the Agricultural Research Center.
BUREAU OF ANIMAL INDUSTRY								
Salaries and expenses, Bureau of Animal Industry, Agricultural Research Administration:								
Animal research	8	11,200	8	3,200	8,000	42		Travel by officials of field experiment stations in surrounding territory and the more remote parts of stations on work relating to animal research.
Animal disease control and eradication.	105	147,000	105	42,000	105,000	527		Travel to farms, ranches, and other premises in the field; and to establishments producing anti-hog-cholera serum and hog cholera virus; ports of entry; and other points in urban areas on regulatory work.
Meat inspection	10	14,000	10	4,000	10,000	67		Travel by inspectional personnel to abattoirs and meat-packing plants in urban centers, including the field station in the District of Columbia, in carrying out the provisions of laws relating to the Federal inspection of meat and meat food products.
Eradication of foot-and-mouth disease and other contagious diseases of animals and poultry, Agricultural Research Administration.						58		Travel in Mexico and along the Mexican-United States border in connection with the control and eradication of foot-and-mouth disease.
Total, Bureau of Animal Industry.	123	172,200	123	49,200	123,000	694		
BUREAU OF DAIRY INDUSTRY								
Salaries and expenses, Bureau of Dairy Industry, Agricultural Research Administration.						4		For use of officials of the Bureau located in the field for official travel to towns adjacent to official stations to purchase supplies and to farms in vicinity of station to inspect cooperative projects.
BUREAU OF AGRICULTURAL AND INDUSTRIAL CHEMISTRY								
Salaries and expenses, Bureau of Agricultural and Industrial Chemistry, Agricultural Research Administration.	1	1,400	1	400	1,000	11		For travel by officials of the divisions and regional research laboratories of the Bureau in making field trips throughout the areas served by these organizational units in official conduct of business for the Bureau of Agricultural and Industrial Chemistry.
BUREAU OF PLANT INDUSTRY, SOILS, AND AGRICULTURAL ENGINEERING								
Salaries and expenses, Bureau of Plant Industry, Soils, and Agricultural Engineering, Agricultural Research Administration:								
Plant, soil, and agricultural engineering research.	25	35,000	25	7,500	27,500	183		Automobiles used by technical workers, their assistants, and cooperators in localities where public transportation is inadequate or nonexistent, conducting field investigations on field and horticultural crops, forest diseases, soil management, irrigation, and classification; and agricultural engineering problems.
National Arboretum						1		Do.
Total, Bureau of Plant Industry, Soils, and Agricultural Engineering.	25	35,000	25	7,500	27,500	184

Total, Agricultural Research Administration.....	173	242,200	172	64,100	178,100	1,205		
CONTROL OF FOREST PESTS								
Control of forest pests, Agriculture.....	9	13,500	9	2,900	10,600	66		Transportation of supervisory and technical personnel directing forest pest control activities.
FOREST SERVICE								
Salaries and expenses, Forest Service:								
National forest protection and management.....	75	105,000	75	22,500	82,500	464	\$2,000	Used by forest officers engaged in protection, management, utilization, and development of national forests.
Forest research.....	38	53,200	38	11,400	41,800	151		Used by technicians employed at experimental forests and ranges and by those engaged on research projects directed from experiment station headquarters, by field employees assigned to the Forest Products Laboratory, and by individuals and crews assigned to the comprehensive forest survey.
State and private forestry cooperation.....	3	4,200	3	900	3,300	16		Used by foresters engaged in the task of improving forest practices on private forest land.
Forest development roads and trails.....	10	14,000	10	3,000	11,000	50	1,000	Used by regional office engineering staff in directing and inspecting road construction and maintenance.
Total, Forest Service.....	126	176,400	126	37,800	138,600	681	3,000	
FLOOD CONTROL								
Flood control, Agriculture:								
Forest Service.....	1	1,400	2	600	800	13		Used by project personnel engaged in surveys and in the installation of works of improvement on authorized flood control projects.
Soil Conservation Service.....	5	7,000	5	1,500	5,500	95		Do.
Total, flood control.....	6	8,400	7	2,100	6,300	108		
SOIL CONSERVATION SERVICE								
Salaries and expenses, Soil Conservation Service.....	146	204,400	155	46,500	157,900	1,067		For transportation of (1) research personnel to make inspections, collect data, service scientific instruments, and supervise experimental work in outlying experimental project areas; (2) personnel engaged in the inspection and supervision of conservation district activities; and (3) personnel engaged in the management, improvement, and protection of land utilization projects.
Water conservation and utilization projects, Soil Conservation Service.....						12		For use of project personnel in connection with the planning, development, operation, and management of water conservation and utilization projects.
Total, Soil Conservation Service.....	146	204,400	155	46,500	157,900	1,079		
PRODUCTION AND MARKETING ADMINISTRATION								
ADMINISTRATIVE EXPENSES, SEC. 392, AGRICULTURAL ADJUSTMENT ACT OF 1938								
Administrative expenses, sec. 392, Agricultural Adjustment Act of 1938.....	1	1,400	1	400	1,000	3		For travel of field representatives to the recipient agencies throughout Puerto Rico in connection with the school lunch and direct distribution programs, and 1 car in the District of Columbia for transportation of officials of the Production and Marketing Administration on official business.
MARKETING SERVICES								
Marketing services, Production and Marketing Administration.....	35	49,000	35	14,000	35,000	216		For the use of (1) market news reporters in gathering and disseminating news of market conditions for various farm crops and livestock in important market and producing areas; (2) inspectors and graders engaged in inspection, classing, and grading of farm products throughout the United States, including the Cotton, Tobacco, Naval Stores, and Grain Standards Acts; (3) employees in contacting cooperating cotton ginneries, cotton plantations, and cotton compress operators, in studying marketing methods and cotton ginning; (4) employees engaged in the licensing or registration, supervision of operations of licensees to assure compliance, collection of samples for testing, and handling of violations with respect to the administration of the United States Warehouse, Federal Seed, Packers and Stockyards, Naval Stores, Federal Insecticide, Fungicide, and Rodenticide Acts; and (5) 1 car in the District of Columbia for use on official business by all officials of the Production and Marketing Administration and their staff.

MISCELLANEOUS								
Expenses and refunds, inspection and grading of farm products, Production and Marketing Administration.	25	\$35,000	25	\$10,000	\$25,000	71		For the use of inspectors engaged in inspecting and grading farm and food products—paid from funds advanced by producers for whom services are performed.
Perishable Agricultural Commodities Act Fund, Department of Agriculture.	2	2,800	2	800	2,000	4		For the use of marketing specialists in investigating complaints and violations and checking establishments for compliance with license provisions under Perishable Agricultural Commodities, and Produce Agency Acts—paid from license fees collected.
Total, miscellaneous-----	27	37,800	27	10,800	27,000	75		
COMMODITY CREDIT CORPORATION								
Administrative expenses, Commodity Credit Corporation.	4	5,600			5,600	13		For use by Federal employees for travel to warehouses, storage facilities, and piers to inspect the packing conditions, markings, and related operations in receipt, storage, and shipment of commodities owned or controlled by the Corporation, and 1 car in the District of Columbia for use of officials of the Production and Marketing Administration on official business.
Supply operations (cash paying governments, Mutual Security and other similar programs).			4	(1)		7		For use by Federal employees for travel to warehouses, storage facilities, and piers to inspect the packing conditions, marketings, and related operations in receipt, storage, and shipment of commodities owned or controlled by the Corporation.
Total, Commodity Credit Corporation.	4	5,600	4	(1)	5,600	20		
Total, Production and Marketing Administration.	67	93,800	67	25,200	68,600	314		
RURAL ELECTRIFICATION ADMINISTRATION								
Salaries and expenses, Rural Electrification Administration.						1		For use by the Administrator, Deputy Administrator, Assistant Administrator, and members of their staffs on official business in the District of Columbia and elsewhere.
FARMERS' HOME ADMINISTRATION								
Salaries and expenses, Farmers' Home Administration.	12	16,800	12	4,800	12,000	36		1 vehicle is assigned to the Washington office for transportation of departmental personnel to and from other Government offices and elsewhere on official business. 47 vehicles are used in the field by officials in assisting and advising county supervisors in the investigation of applications, making loans, rendering of farm and home management assistance to borrowers, and collecting and servicing loans under the various loan programs.
FARM CREDIT ADMINISTRATION								
Salaries and expenses, Farm Credit Administration.						2		1 passenger car for official transportation of the Governor, 1 passenger car for transporting FCA officials in Washington and making special deliveries to and from other Government buildings.
FEDERAL INTERMEDIATE CREDIT BANKS								
Limitation on administrative expenses, Federal intermediate credit banks.	1	1,400	1	300	1,100	5		Used by officers and employees of the banks for necessary travel in connection with the making of new loans and discounts, and the servicing of outstanding loans and discounts, principally for travel between points which cannot be reached advantageously or economically by common carrier.
PRODUCTION CREDIT CORPORATIONS								
Limitation on administrative expenses, production credit corporations.	4	5,600	4	1,400	4,200	28		Used by officers and field employees of the corporations for necessary travel in connection with the supervisory responsibilities of the corporations over the production credit associations, principally travel to association offices and as required to other points of duty including the farms of association directors, applicants for loans, and borrowers.
Total, Farm Credit Administration.	5	7,000	5	1,700	5,300	35		
OFFICE OF THE SECRETARY								
Salaries and expenses, Office of the Secretary.	1	1,400	1	400	1,000	3		For transportation on official business of the Secretary of Agriculture, the Under Secretary, the Assistant Secretary, and members of their immediate staffs, as well as the heads and other responsible officials of the staff offices which comprise the Office of the Secretary.
OFFICE OF FOREIGN AGRICULTURAL RELATIONS								
Salaries and expenses, Office of Foreign Agricultural Relations.						1		For use by officials of this Office to contact embassies and legations of other governments, and in transporting to Beltsville (Agricultural Research Center) foreign visitors in conjunction with the work of the Office.
Total, Department of Agriculture.	557	780,700	566	189,100	591,600	3,570	\$3,500	

¹ These 4 vehicles are to be disposed of to offset the purchases made by Commodity Credit Corporation, and the proceeds from the sale of such vehicles will be deposited into the miscellaneous receipts fund of the Treasury.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1953

DEPARTMENT OF AGRICULTURE

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
AGRICULTURAL RESEARCH ADMINISTRATION								
BUREAU OF PLANT INDUSTRY, SOILS, AND AGRICULTURAL ENGINEERING								
Salaries and expenses, Bureau of Plant Industry, Soils, and Agricultural Engineering, Agricultural Research Administration.	1	\$2,500			\$2,500		\$2,000	For experimentation in development of improved equipment and methods for spraying and dusting crops and for fertilizing, seeding, and performing other agricultural operations with airplanes.
BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE								
Salaries and expenses, Bureau of Entomology and Plant Quarantine, Agricultural Research Administration:								
Insect investigations.....						3	4,500	For experimentation in the application of insecticides to crops and forests.
Insect and plant disease control..	2	12,000	2	\$2,000	10,000	5	6,000	For investigating and demonstrating the use of special equipment for the suppression of destructive insects attacking crops and forested areas and, when not otherwise engaged, for supplementing contract aircraft in control operations.
Total, Bureau of Entomology and Plant Quarantine.	2	12,000	2	2,000	10,000	8	10,500	
Total, Agricultural Research Administration.	3	14,500	2	2,000	12,500	8	12,500	
CONTROL OF FOREST PESTS								
Control of forest pests, Agriculture....	2	6,500	2	1,000	5,500		5,600	For investigating and demonstrating the use of special equipment for the suppression of destructive insects attacking forested areas and, when not otherwise engaged, for supplementing contract aircraft in control operations.
FOREST SERVICE								
Salaries and expenses, Forest Service, national forest protection and management.	3	132,000	2	5,000	127,000	14	37,000	Used for transportation of men and supplies including "smoke jumpers," to inaccessible areas, for reconnaissance of large fires, and for detection services in remote areas and after lightning storms.
Total, Department of Agriculture.	8	153,000	6	8,000	145,000	22	55,100	

PROPOSED FOR LATER TRANSMISSION

Office of the Secretary, salaries and expenses, defense production activities (under proposed legislation, 1953).—The Budget includes a supplemental appropriation of \$4 million for 1953 under proposed legislation to extend the Defense Production Act.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$4,000,000
Unliquidated obligations, end of year.....			300,000
Expenditures out of current authorizations.....			3,700,000

Salaries and expenses, Forest Service (under existing legislation, 1952).—Because of severe drought in the West, 1951 was one of the most difficult fire years of recent record. Present estimates indicate that a supplemental appropriation of \$3,500,000 will be needed in fiscal year 1952.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$3,500,000	
Unliquidated obligations, start of year.....			\$560,000
Unliquidated obligations, end of year.....		560,000	
Total expenditures.....		2,940,000	560,000
Expenditures are distributed as follows:			
Out of current authorizations.....		2,940,000	
Out of prior authorizations.....			560,000

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Department of Commerce strengthens the trade and commerce of the United States by providing services to the business community and serves as the principal organization for carrying out operational and promotional programs of the Government relating to transportation. The Department program is made up of the work of the (1) Office of the Secretary (including the Office of Technical Services and the Office of Transportation); (2) Bureau of the Census; (3) Civil Aeronautics Administration; (4) Civil Aeronautics Board; (5) Coast and Geodetic Survey; (6) Bureau of Foreign and Domestic Commerce (including the Office of Business Economics, the Office of Industry and Commerce, and the Office of International Trade); (7) Maritime Administration and Federal Maritime Board; (8) Patent Office; (9) Bureau of Public Roads; (10) National Bureau of Standards; (11) Weather Bureau; and (12) Inland Waterways Corporation. During the national emergency, the Department also administers priority and allocation controls over supplies of materials and operates the National Production Authority and the National Shipping Authority, in addition to administering export controls and furnishing other services essential to the national defense.

The total appropriations anticipated amount to \$964,071,999, which represents a net increase of \$15,383,475 compared with the funds appropriated plus anticipated supplementals for fiscal year 1952. The principal increases are to provide for (1) increased cash requirements to liquidate prior-year obligations for highway construction programs, (2) payment of ship operating subsidies accrued during the fiscal years 1947 through 1951 and partial payments for 1952 and 1953, (3) maintenance and operation of newly commissioned airways facilities and handling increased air traffic control activities, (4) commencing the census of business, transportation, manufactures, and mineral industries and the 1952 census of governments, (5) some expansion in defense production activities, and (6) expansion of upper-air weather observational activities. These increases are partially offset by (1) reductions in air navigation facility, airport, and airport claims programs, (2) virtual completion of the Seventeenth Decennial Census activities, (3) lessened cash requirements for certain special highway programs, for the fast-ship construction program, and for the liquidation of prior-year obligations of the former Maritime Commission.

Transportation and related services account for approximately 90 percent of the total appropriations requested for the budget year. Economic analysis and specialized services to business account for the remaining 10 percent of these requests.

OFFICE OF THE SECRETARY

Salaries and Expenses, Office of the Secretary of Commerce—

Salaries and expenses: For necessary expenses of the Office of the Secretary of Commerce (hereafter in this title referred to as the Secretary) including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed \$50 per diem; and teletype news service (not exceeding \$1,000); [\$1,484,530, of which not to exceed \$1,363,230 shall be available for personal services] \$2,110,000. (5 U. S. C. 591-607; *Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952*.)

Appropriated 1952, **\$1,484,530** Estimate 1953, **\$2,110,000**
Appropriated (adjusted) 1952, **\$1,572,530**

* Includes \$129,825 for activities previously carried under "Departmental salaries and expenses, Bureau of Foreign and Domestic Commerce." The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

Collection and dissemination of technical information—1951, \$226,775; 1952, \$270,000; 1953, \$470,000.

PROGRAM AND PERFORMANCE

This organization collects and compiles valuable technical data primarily from Government research and makes this information available upon request to business, industry, and the general public. In addition, the Office refers to the armed services and other Government agencies scientific or technical information having immediate or potential practical value of significance to them. The increase requested for 1953 will provide expansion of these services.

PROGRAM AND PERFORMANCE

Defense production activities are undertaken by a number of separate agencies within the Department of Commerce. Legislation is proposed to extend the authority for these activities. The 1953 requirements are included in a proposed supplemental appropriation under proposed legislation.

1. *Industry Evaluation Board.*—The Board screens industrial resources, identifies the critical facilities, and, for the purpose of security guidance or supervision, assigns each such critical facility to the Federal agency having paramount interest. The Board also makes studies on matters related to the security of national defense economic resources.

2. *Office of Technical Services.*—The Office, on recommendation of the technical branches of the military services, builds working models of inventions having potential value to the defense effort and gives advice as to whether specific technical data should be disclosed, withheld, or given limited distribution.

3. *Office of Transportation.*—The Office exercises priorities and allocations functions for air and sea transportation delegated to the Secretary and participates in mobilization planning in the field of transportation in cooperation with other Government agencies.

4. *Office of International Trade.*—The Office determines the material requirements of those countries not assisted by the Economic Cooperation Administration and presents these requirements to the Defense Production Administration.

5. *Office of the Secretary.*—The Office provides printing, distribution, and auxiliary services for the National Production Authority.

6. *Office of Industry and Commerce.*—The Office participates in the Federal industrial dispersion program by providing advice and guidance to local communities in analyzing industrial potential within the framework of military security requirements and economic considerations.

7. *Office of Field Service.*—The field offices of the Department administer the various programs of the National Production Authority at the local level.

8. *National Production Authority.*—The Authority (a) determines priorities and allocations and requisitions materials and products to assure that military needs are met and that the remaining supplies are distributed equitably, and (b) develops measures for the expansion of production for national defense.

BUREAU OF THE CENSUS

INTRODUCTORY STATEMENT

The Bureau is one of the principal fact-finding and statistical agencies of the Federal Government. Major censuses regularly taken deal with population, housing, agriculture, governmental units, manufactures, mineral industries, the distributive trades, service establishments, and transportation. Current statistics on many of the subjects covered by these major censuses, and on foreign trade, are made available through publication of data from sample and other surveys and from tabulations of records and reports submitted to the Bureau. Its facilities are utilized by many other Federal agencies for special surveys, tabulations, and related statistical services on a reimbursable basis.

Direct obligations for 1953 are estimated to be \$12,290,000, a decrease of \$2,537,000 compared with 1952. The decrease is chiefly the result of the declining workload on the Seventeenth Decennial Census of population, agriculture, and housing. Principal increases proposed are for preparation for the quinquennial censuses of business, manufactures, transportation, and agriculture which are planned to be taken in 1954 and 1955, and for the entire cost of the 1952 census of governments.

Salaries and Expenses, Bureau of the Census—

Salaries and expenses, Bureau of the Census: For expenses necessary for collecting, compiling, and publishing current census statistics provided for by law; for searching census records and supplying information with respect to age and citizenship certification; and for general administration, including enumerators at rates to be fixed without regard to the Classification Act of 1949, *as amended*; and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed \$50 per diem; [\$6,500,000, of which not to exceed \$5,623,973 shall be available for personal services] \$7,045,000. (5 U. S. C. 601; 13 U. S. C. 1-6, 71-76, 81-86, 111, 121-123, 201-218; 15 U. S. C. 173, 177-179, 181, 184-187, 193, 194; 44 U. S. C. 249, 298; *Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.*)

Appropriated 1952, \$6,500,000

PROGRAM AND PERFORMANCE

1. *Age and citizenship certification.*—Charges to the public for this service have been increased, thereby making it unnecessary to appropriate funds in fiscal year 1953.

2. *Current census statistics.*—Current statistical information is collected and disseminated on such subjects as

volume of wholesale and retail trade, production of manufactured commodities, volume of imports and exports, finances and employment of State and local governments, cotton ginning, employment and unemployment, and characteristics of the population.

3. *General administration.*

Censuses of Business, Transportation, Manufactures, and Mineral Industries, Bureau of the Census—

Censuses of business, transportation, manufactures and mineral industries: For expenses necessary to prepare for taking, compiling and publishing the censuses of business, transportation, manufactures and mineral industries as authorized by law, including personal services by contract or otherwise at rates to be fixed by the Secretary of Commerce without regard to the Classification Act of 1949, as amended; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed \$50 per diem; and additional compensation of Federal employees temporarily detailed for field work under this appropriation; [\$200,000, of which not to exceed \$147,812 shall be available for personal services] \$1,785,000, to remain available until December 31, 1953, and to be merged with the appropriation made under this head in the Department of Commerce Appropriation Act, 1952. (13 U. S. C. 121-123; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.)

Appropriated 1952, **\$200,000**Estimate 1953, **\$1,785,000****AMOUNTS AVAILABLE FOR OBLIGATION**

A appropriation or estimate—1952, \$200,000; 1953, \$1,785,000.

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
1. Censuses of business and transportation.....		\$156,513	\$1,225,000
2. Censuses of manufactures and mineral industries.....		43,487	560,000
Obligations incurred.....		200,000	1,785,000

PROGRAM AND PERFORMANCE

The 1953 censuses of business, manufactures, transportation, and mineral industries will provide data on the volume of production and trade, the number, size, geographical distribution, and other characteristics of the Nation's business and industrial enterprises. Certain operations such as printing of reporting forms, establishing enumeration districts, maps, control files, and procedures must be undertaken before the enumeration can proceed. Funds for enumeration and tabulation of results will be requested in fiscal year 1954.

Census of Agriculture, Bureau of the Census —

Census of agriculture: For expenses necessary to prepare for taking, compiling, and publishing the 1955 census of agriculture, as authorized by law, including personal services by contract or otherwise at rates to be fixed by the Secretary of Commerce without regard to the Classification Act of 1949, as amended; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed \$50 per diem; and additional compensation of Federal employees temporarily detailed for field work under this appropriation: \$150,000, to remain available until December 31, 1954. (13 U. S. C. 201, 216.)

Estimate 1953, \$150,000

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1953, \$150,000.

OBLIGATIONS BY ACTIVITIES

Census of agriculture—1953, \$150,000.

PROGRAM AND PERFORMANCE

The next census of agriculture, applying to the year 1954, will provide data on number of farms, acreage, production of livestock and crops, land ownership and tenancy, and other characteristics of the Nation's agricultural resources. Initial planning and preparation for this census will begin in fiscal year 1953.

CIVIL AERONAUTICS ADMINISTRATION*Salaries and Expenses, Civil Aeronautics Administration—*

Salaries and expenses: For necessary expenses of the Civil Aeronautics Administration in carrying out the provisions of the Civil Aeronautics Act of 1938, as amended (49 U. S. C. 401), the Act of August 8, 1950 (Public Law 670) 49 U. S. C. 457, and other Acts incident to the enforcement of safety regulations; maintenance and operation of air navigation facilities and air traffic control; furnishing advisory service to States and other public and private agencies in connection with the construction or improvement of airports and landing areas; and the disposal of surplus airports; including hire of aircraft (not exceeding \$395,000) \$295,000; the operation and maintenance of eighty-five aircraft; contract stenographic reporting services; fees and mileage of expert and other witnesses; examination of estimates of appropriations in the field; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase (not to exceed twenty) forty, for replacement only) and hire of passenger motor vehicles; and purchase and repair of skis and snowshoes; \$99,100,000, of which not to exceed \$74,970,000 shall be available for personal services \$108,970,000, and the Departments of the Air Force, Army and Navy are author-

ized to transfer to the Civil Aeronautics Administration without charge, subject to the approval of the Bureau of the Budget, aircraft (for replacement only), aircraft engines, parts, flight equipment, and hangar, line, and shop equipment [surplus] excess to the needs of such Departments: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, and other public authorities for expenses incurred in the maintenance and operation of airport traffic control towers. (49 U. S. C. 401-705; 49 U. S. C. 171-184; 50 U. S. C. App. 1622 (a-c) and (g); *Convention on International Civil Aviation Treaty*, dated April 4, 1947; 49 U. S. C. 1151-1160; *Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.*)

Appropriated 1952, \$99,100,000

Estimate 1953, \$108,970,000

PROGRAM AND PERFORMANCE

1. *Operation of Federal airways.*—The Federal airways system is a network of visual and radio aids to air navigation and traffic control along the primary air routes and at principal airports in the continental United States, the Territories, and possessions. These aids include radio ranges and beacons, instrument landing systems, traffic-control centers and towers with associated radar equipments, light beacons and approach light lanes, communication stations, and emergency landing fields.

2. *Aviation safety.*—Inspections and certifications are made of aircraft, airmen, operators of aircraft, and air

agencies to insure the safe and competent operation of aircraft.

3. *Airport development.*—This consists of (a) periodic examinations to obtain and release up-to-date facility information; (b) specific examinations to insure compliance with agreements under which airport construction grants have been made or surplus airports transferred to local agencies; and (c) coordinating with interested agencies military plans for the joint or exclusive use of civil airports.

4. *Aviation development.*—Programs of aviation education and noncommercial flying are promoted and information on flight facilities and conditions is published for the use of all airmen.

5. *General counsel.*—This activity includes the enforcement of applicable laws and rules used by the CAA in administering the civil air regulations and, as a staff service to the Administrator, renders legal advice including preparation and interpretation of legislation and regulations.

6. *Aviation information.*—This office directs and coordinates the dissemination of information on aviation activities and advises the Administrator on public information policies.

7. *Operation of aircraft.*—A fleet of 85 aircraft is operated to (a) flight check air navigation and landing facilities, (b) maintain pilot proficiency of aviation safety agents, and (c) provide for necessary air administrative travel. Additional flying time for pilot proficiency training is obtained through the rental of aircraft.

8. *Office of the Administrator.*—This includes the offices of the Administrator and the 10 regional administrators.

9. *Staff and administrative services.*—Staff assistance in planning and evaluating agency operations and programs and general administrative services are provided in headquarters and 10 regional offices.

10. *Interfunctional.*—This activity provides common services to Washington and regional offices including rent and utilities, communications, and supplies.

PROGRAM AND PERFORMANCE

The Federal airways system is being improved by the modernization, repair, and relocation of existing facilities and by the continued implementation of the common civil-military system recommended by the Radio Technical Commission for Aeronautics. Progress in installing the common system is indicated by the following table:

CONTINENTAL UNITED STATES COMMON SYSTEM (SC-31) PROGRAM

Facility	Original SC-31 proposed totals	CAA program accomplishments					
		Revised proposed totals	Completed (cumulative)			Remaining to be completed	Future request, fiscal year 1954 and beyond
			June 30, 1951	June 30, 1952	June 30, 1953

PROGRAM AND PERFORMANCE

This is a program administered by the Air Navigation Development Board, composed of representatives of the Civil Aeronautics Administration and the Department of Defense, for the development of a system of aids to air navigation and traffic control which will meet the common needs of civil aviation and military nontactical air operations. The work involves research, experimentation, and development of new devices required for safety and regularity of flight under all-weather conditions for joint use by civil and military aircraft.

1. *Research and development on airways facilities.*—The program is divided into transition and ultimate phases. Development work on the transition program is largely completed; the program for 1953 on transition projects will be limited to the final flight testing and evaluation of equipments developed during the period 1950–52. The ultimate or long-range program is scheduled to extend through 1959. It provides for the further development of existing navigation and traffic control aids and the development of new type aids requiring basic research plus the application of the latest scientific discoveries and techniques, especially those being developed under military projects, many of which are now classified for security reasons. During 1953 basic development studies will be continued, and some contracts will be let for specific equipments based on research and studies made in 1951 and 1952.

2. Administration.

PROGRAM AND PERFORMANCE

The Board regulates the economic aspects of air carrier operations, both domestic and international; promulgates safety rules and standards; investigates aircraft accidents; and participates in the development of international air transportation.

1. *Economic regulation.*—Includes granting and denying certificates of public convenience and necessity; prescribing or approving rates and rate practices of air carriers; fixing mail rate compensation; prevention of discrimination or unfair methods of competition; and approval or disapproval of business relationships between air carriers. The major objective during 1953 is stabilization of the mail and commercial rate structures and continued reexamination of the route pattern to eliminate uneconomical service.

2. *Safety regulation.*—This consists of promulgation of new or amended Civil Air Regulations, adjudication of complaints alleging violations of these regulations, and the coordination of the civil air regulations with international safety standards and practices. The program for 1953 anticipates an increased workload, primarily in connection with new uses and new types of aircraft.

3. *Accident investigation and analysis.*—Civil aircraft accidents are investigated to determine probable cause; potential hazards are also investigated, and preventive measures are recommended and put into effect. In 1953 it is proposed to intensify accident-prevention work by a more comprehensive study of the factors which contribute to the cause of accidents.

4. *Legal staff activities.*—Legal advice and assistance is provided on all aspects of economic and safety regulatory

CIVIL AERONAUTICS BOARD—Continued**Salaries and Expenses, Civil Aeronautics Board—Continued**

activities; opinions of the Board are prepared; and litigation matters are handled. The primary increase in 1953 is in connection with Board opinions and litigation.

5. *Executive direction.*

6. *Administration and service activities.*

Total obligations.....	12,218,030	14,246,285	13,948,340

PROGRAM AND PERFORMANCE

The Survey publishes aeronautical and nautical navigation charts of selected areas of the United States, its Territories, and surrounding waters, using data obtained through field surveys. In addition, seismological and geodetic control data are obtained and disseminated, and world-wide tide and current information is compiled and published.

Direct obligations for 1953 are estimated to be \$12,615,000, a net increase of \$8,000 compared with 1952.

1. *Surveys and charts for marine and air navigation.*—Hydrographic, topographic, tide and current, magnetic, and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables. In 1951, 83,770 miles of water depths were measured, as compared with 90,000 to be measured in 1953. The hydrography completed in 1951 was 64,787 square miles with an estimate of 30,000 for 1953.

Receipts from the sale of charts and related publications were \$367,460 in 1951. It is estimated that \$378,000 will be covered into the Treasury during 1952 as well as during 1953.

CHARTS AND TABLES PRINTED AND DISTRIBUTED

	1951 actual	1952 estimate	1953 estimate
Nautical charts:

Special charts.....	1,922,163	2,000,000	2,200,000
Coast pilots, tide and current tables.....	177,198	180,500	159,500

2. *Geodetic control.*—Surveys are made to determine latitude and longitude of marked points and elevations of bench marks for use in charting and mapping and in the planning of many engineering projects, with basic control data being furnished the whole Government, as projects are integrated with those of other agencies under established priorities. Surveys were made over an area of 100,957 square miles in 1951, with 112,300 estimated to be covered in 1953. In 1951 9,354 new bench marks were established and 9,700 are estimated for 1953.

3. *Earthquake investigation.*—Earthquakes are located and investigated to determine their severity and to obtain engineering data for the design of earthquake-resistant structures. The Bureau operates 13 seismograph stations and collaborates with 15 universities for the location of distant earthquakes, operates 58 strong-motion stations in the seismic area of the Western States, and field investigates an average of 8 severe earthquakes annually.

4. *Instrument services.*—These include the design and construction, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations.

5. *Commissioned officers.*—Provision is made for the pay and allowances of the Survey's corps of active commissioned officers and for payments to retired officers.

6. *Administration.*

Allocations Received From Other Appropriation Accounts—

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriations, as follows:

"Philippine rehabilitation, Department of State."

"Payments, Armed Forces Leave Act of 1946," funds appropriated to the President.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

INTRODUCTORY STATEMENT

The Bureau participates in the formulation of Government policies affecting domestic and international trade, collects and distributes economic data, and analyzes national business trends.

Direct obligations for 1953 are estimated to be \$11,025,000 an increase of \$470,720 compared with 1952. The increase is primarily due to an expanded export-control activity.

Departmental Salaries and Expenses, Bureau of Foreign and Domestic Commerce—

Departmental salaries and expenses: For necessary expenses of the Bureau of Foreign and Domestic Commerce at the seat of government, including the purchase of commercial and trade reports, and not to exceed \$50,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [\$3,000,000, of which not to exceed \$2,641,869 shall be available for personal services] \$3,010,000: Provided, That expenses of field studies or surveys conducted by departmental personnel of the Bureau shall be payable from the amount herein appropriated. (5 U. S. C. 591, 596-597; 15 U. S. C. 171, 175; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.)

Appropriated 1952, \$3,000,000 Estimate 1953, \$3,010,000
Appropriated (adjusted) 1952, \$2,912,000

* Excludes \$129,825 for activities transferred to "Salaries and expenses, Office of Secretary of Commerce." The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Economic data are collected, analyzed, and distributed, and Government policies affecting domestic and international trade are formulated.

1. *Analyses of national economic trends.*—Basic indicators of the condition of the national economy and current analyses of business trends are prepared and distributed to the public.

2. *Promotion of industry and trade.*—Information of value to the business community is compiled, analyzed, and disseminated.

PROGRAM AND PERFORMANCE

The field offices are the medium through which the information and services of the Department are made available to the business community on a local level. These field offices also gather information on local business trends and developments for use of the Department and other agencies.

1. *Administration.*

2. *Promotion of industry and trade.*—Foreign trade services cover export and import operations, including guidance on regulations and restrictions in effect here and abroad. Domestic services include assistance on marketing and distribution problems and on Government procurement.

OBLIGATIONS BY ACTIVITIES

Export control—1951, \$2,877,048; 1952, \$5,495,180; 1953, \$6,060,000.

PROGRAM AND PERFORMANCE

Export controls are necessary to protect the domestic economy from excessive drain of scarce commodities, to safeguard the national security by regulating exports of strategic commodities, and to implement United States foreign policy. In the absence of improvement in relations with certain countries, these controls must be continued and, as necessary, extended to other areas to guard against transshipment. The Bureau of Customs is responsible for the policing of shipments at points of export.

Out of prior authorizations.....		21,020,248	14,198,565

¹ Includes disbursements in fiscal year 1951 under the headings "Construction fund, maritime activities, Department of Commerce, 1948-49" (\$16,540,830) and "Construction fund, maritime activities, Department of Commerce, 1949-50" (\$18,439,688), which appropriations have been combined with "Ship construction, Department of Commerce" by the Second Supplemental Appropriation Act, 1951 (Public Law 911, 81st Cong.).

OPERATING-DIFFERENTIAL SUBSIDIES

Operating-Differential Subsidies, Maritime Activities, Department of Commerce—

Operating-differential subsidies: For the payment of obligations incurred for operating-differential subsidies granted on or after January 1, 1947, as authorized by the Merchant Marine Act, 1936, as amended, and in appropriations heretofore made to the United States Maritime Commission, [\$20,000,000] \$50,000,000, to remain available until expended: *Provided*, That to the extent that the operating-differential subsidy accrual (computed on the basis of parity) is represented on the operator's books by a contingent accounts receivable item against the United States as a partial or complete offset to the recapture accrual, the operator (1) shall be excused from making deposits in the special reserve fund, and (2) as to the amount of such earnings the deposit of which is so excused shall be entitled to the same tax treatment as though it had been deposited in said special reserve fund. To the extent that any amount paid to the operator by the United States reduces the balance in the operator's contingent receivable account against the United States, such amount, unless it is forthwith deposited in the fund, shall be considered as withdrawn under section 607 (h) of the Merchant Marine Act, 1936, as amended: *Provided further*, That nothing contained in this Act, or in any prior appropriation Act, shall be construed to affect the authority provided in section 603 (a) of the Merchant Marine Act, 1936, as amended, (1) to grant operating-differential subsidies on a long-term basis, and (2) to obligate the United States to make future payments in accordance with the terms of such operating-differential subsidy contracts: *Provided further*, That no part of the foregoing appropriation shall be available for obligation, nor any obligation made, for the payment of an operating-differential subsidy for any number of voyages, during the current fiscal year, in excess of [fifteen hundred and twenty-two, of which three hundred and seven voyages shall be for vessels owned by companies or individuals who, on July 1, 1951, had no operating-differential subsidy contract with the Federal Maritime Board, and] sixteen hundred and fifty, which number shall include the

Operating-differential subsidies—1951, \$8,002,958; 1952, \$60,000,000; 1953, \$75,232,724.

PROGRAM AND PERFORMANCE

Contracts with United States citizens operating vessels in foreign commerce provide for payments of the differential between their operating costs and those of foreign competitors. Payments are based upon the total subsidy accrual, less the estimated annual recapturable profits (subsidy withheld). Subsidy accrual is determined by (1) the cost differentials between United States and competing foreign lines on five major elements of operating costs, and (2) the number and duration of voyages during the year by subsidized vessels. Estimated recapturable profits (subsidy withheld) represent a contingent liability to the extent that profits, averaged over the current 10-year recapture period of each contract, fall below 10 percent of capital necessarily employed.

3-YEAR COMPARISON OF OPERATING-DIFFERENTIAL SUBSIDY ACTIVITIES

Salaries and Expenses, Maritime Activities—

Salaries and expenses: For expenses necessary for carrying into effect the Merchant Marine Act, 1936, and other laws administered by the Federal Maritime Board and the Maritime Administration, **\$15,651,400**, of which not more than \$12,687,000 shall be available for personal services, **\$16,860,000** within limitations as follows:

Administrative expenses, including not to exceed \$2,000 for newspapers and periodicals; purchase of **two** five passenger motor vehicles, for replacement only; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed \$1,125 for entertainment of officials of other countries when specifically authorized by the Maritime Administrator; and \$75,000 to be available exclusively for ship structure research, testing and models; **\$8,029,400** **\$9,212,000**: *Provided*, That the Maritime Administration is authorized to dispense with the administrative audit of agents' accounts covering voyages beginning prior to April 1, 1949: *Provided further*, That the administrative expenses of ship construction shall not exceed 5 per centum of the total cost of such construction;

Maintenance of shipyard facilities, operation of warehouses, and maintenance and operation of terminals, **\$2,097,000** including the purchase of three passenger motor vehicles for replacement only, **\$2,078,000**;

Reserve fleet expenses, **\$5,525,000** **\$5,570,000**: *Provided*, That, in addition, not to exceed \$1,200,000 of the unobligated balance of the appropriation made available under this head for the fiscal year 1952 shall remain available during the current fiscal year.

Not exceeding \$1,750,000 of the unobligated balance of the appropriation “Salaries and expenses” in the Independent Offices Appropriation Act, 1951, is hereby reappropriated to the appropriation “Salaries and expenses” in the Independent Offices Appropriation Act, 1952, and the limitation under the latter appropriation on administrative expenses shall be increased by \$750,000, and the limitation under the latter appropriation on reserve fleet expenses shall be increased by \$1,000,000: *Provided*, That the amount herein reappropriated for reserve fleet expenses shall be available during the fiscal year 1952 for bottom preservation, supplies and materials, and contracts for their installation, and shall be in addition to funds appropriated therefor for the fiscal year 1952. (*Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.*)

Appropriated 1952, **\$15,651,400** Estimate 1953, **\$16,860,000**

Appropriated (adjusted) 1952, **\$15,585,790**

Total obligations.....	18,612,879	20,123,060	22,161,850

PROGRAM AND PERFORMANCE

1. *Administrative expenses.*—These are the administrative expenses incidental to all programs of the Maritime Administration and Federal Maritime Board, except those of maritime training.

2. *Maintenance of shipyard facilities.*—Maintenance and security is provided at four Government-owned reserve shipyards, which are maintained in a partial state of readiness for defense purposes.

3. *Operation of warehouses.*—Five warehouses carry materials and equipment for terminals, reserve shipyards, vessel operations, and repair and outfitting of reserve fleet ships.

4. *Maintenance and operation of terminals.*—Three Government-owned marine terminals, leased to commercial operators, are kept in maintenance and repair. Gross revenue from terminals was \$1,204,724 in 1951, and is estimated at \$1,023,770 and \$1,028,770 in 1952 and 1953, respectively.

5. *Reserve fleet expense.*—Provision is made for the preservation and security of a reserve fleet of merchant vessels, maintained for national defense purposes. It is estimated that by June 30, 1953, the basic preservation of vessels remaining in reserve will be substantially completed, that more than 50 percent of the recurring preservation normally due in 1953 will be performed, and that bottom preservation will be applied to the ships at Suisun Bay, Calif., Olympia, Wash., James River, Va., and Wilmington, N. C.

Total obligations	4,547,449	4,064,550	4,184,900

PROGRAM AND PERFORMANCE

Officers and seamen are trained for service in the maritime industry.

1. *Cadet-midshipmen training.*—The Merchant Marine Academy at Kings Point, N. Y., provides a 4-year course of training, including 1 year of activity at sea, designed to qualify graduates for licenses as merchant marine officers and for commissions as ensigns in the Naval Reserve. Besides pay and allowances, the Academy provides subsistence, quarters, tuition, and medical care for cadets.

2. *Upgrade and specialist training.*—Upgrade and specialist training for men in maritime service is provided at the Sheepshead Bay, N. Y., and Alameda, Calif., training schools. In order to supply trained personnel for the rapidly expanding active United States merchant fleet, the budget estimate provides for an additional course to train radio operators who are urgently needed as a result of the existing emergency.

3. *Correspondence training.*—The United States Maritime Service Institute gives correspondence course training to officers and crews at sea.

4. *District training supervisors' and enrolling offices.*—Offices in New York City, New Orleans, and San Francisco are engaged primarily in supervision and instruction of cadet-midshipmen during their year of active duty at sea.

5. *Medical services.*—By reimbursement to the United States Public Health Service, medical care and supplies are furnished at the training stations, and a program of preventive medicine is carried on.

6. *Custodial activity, St. Petersburg, Fla.*—This training station is maintained in an inactive status.

7. *Administration.*

No additional vessels shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the [Commission] Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slop-chest items, except with respect to such minimum amounts of bunkers as the [Commission] Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

No money made available to the Department of Commerce, for maritime activities, by this or any other Act shall be used in payment for a vessel the title to which is acquired by the Government either by requisition or purchase, or the use of which is taken either by requisition or agreement, or which is insured by the Government and lost while so insured, unless the price or hire to be paid therefor (except in cases where section 802 of the Merchant Marine Act, 1936, as amended, is applicable) is computed in accordance with subsection 902 (a) of said Act, as that subsection is interpreted by the General Accounting Office.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the

MARITIME ACTIVITIES—Continued

Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts.

[The general provisions applicable to appropriations contained in title I of this Act shall apply to appropriations for Maritime Activities contained in this title.] (*Independent Offices Appropriation Act, 1952.*)

PROGRAM AND PERFORMANCE

The Office administers the laws that govern the granting of patents for inventions and the registration of trade-marks.

Direct obligations are estimated to be \$12,200,000, a decrease of \$50,000 compared with 1952.

Receipts from fees were \$5,504,000 in 1951, and are estimated to be \$5,500,000 in 1952 and 1953.

APPLICATIONS PENDING ON JUNE 30, 1951

In pre-examining process.....	567	25	821
Total.....	201,382	6,633	35,953

PATENT AND TRADE-MARK ISSUANCES

	1951 actual	1952 estimate	1953 estimate
Patents granted (excluding designs).....	45,646	48,000	48,000
Design patents granted.....	4,604	5,000	5,000
Trade-mark registrations:			
Granted.....	17,869	18,000	18,000
Renewed.....	3,487	3,500	3,000
Republished.....	1,582	1,000	1,000

1. *Patent examining operation.*—Patent applications are examined to determine the patentability of claimed inventions. For 1953, disposal of applications is expected to exceed the intake of new applications by a margin of about 25,000, equivalent to approximately 30 percent of total production. This will permit some further liquidation of the huge backlog of over 200,000 applications pending at the beginning of the current year. Workload figures are as follows:

	1951 actual	1952 estimate	1953 estimate
Patents, excluding designs:			
New applications received.....	63,237	60,000	60,000
Applications disposed of.....	81,861	85,000	85,000
Applications pending—end of year.....	201,382	176,382	151,382
Design patents:			
New applications received.....	4,871	5,000	5,000
Applications disposed of.....	8,798	8,000	8,000
Applications pending—end of year.....	6,633	3,633	633

2. *Trade-mark examining operation.*—Trade-mark applications are examined to determine the registrability of marks. Processing of applications for renewal and republication of marks is expected to be on a current basis, with a volume of about 3,000 renewals and 1,000 republications. New workload generated by the Trade-Mark Act of 1946 will have its first impact on the Office in 1953, with the filing by registrants of an estimated 12,000 affidavits under sections 8 and 15 of the Act. Workload figures on registrations are as follows:

	1951 actual	1952 estimate	1953 estimate
New applications received.....	15,962	15,000	15,000
Applications disposed of.....	24,064	25,000	25,000
Applications pending—end of year.....	35,953	25,953	15,953

3. *Legal counsel, appeals, and interferences.*—Legal and quasi-judicial functions are performed in appeal or interference proceedings within the Office, in representation of the Commissioner before the Federal courts, and in dis-

barment and suspension of attorneys and agents from practice before the Office.

4. *Patent and trade-mark services.*—Patents and trade-marks are issued and published, and storage, reproduction, distribution, and other services are provided.

5. *Executive direction.*

6. *Staff and administrative services.*

BUREAU OF PUBLIC ROADS

INTRODUCTORY STATEMENT

The Bureau administers the Federal-aid highway program for the improvement of primary, secondary, and urban highways and cooperates with other Federal agencies in improving highways in national forests, parks, and other Federal areas.

Total appropriations requested amount to \$452,000,000. This represents an increase of \$32,000,000 compared with

BUREAU OF PUBLIC ROADS—Continued

the current fiscal year, including anticipated supplementals. The major increase is the result of greater requirements for funds to liquidate obligations incurred in prior years.

General administrative expenses: Necessary expenses of administration, including advertising (including advertising in the city of Washington for work to be performed in areas adjacent thereto), purchase of [fifty] forty passenger motor vehicles for replacement only, and the maintenance and repairs of experimental highways, shall be paid, in accordance with law, from appropriations available to the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative expenses, pursuant to the provisions of section 21 of the Act of November 9, 1921, as amended (23 U. S. C. 21), \$100,000 shall be available for all necessary expenses to enable the President to utilize the services of the Bureau of Public Roads in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics (51 Stat. 152), cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway, and for performing engineering service in Pan-American countries for and upon the request of any agency or governmental corporation of the United States. (23 U. S. C. 21; section 6 of the Act of June 29, 1948, 62 Stat. 1105; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.)

Federal-Aid Highways, Bureau of Public Roads—

Federal-aid highways: For carrying out the provisions of the Act of July 11, 1916, as amended and supplemented (23 U. S. C. 1-22, 24-105, 107-117), to remain available until expended, [including not to exceed \$9,343,500 for personal services, \$325,000,000] \$400,000,000, which sum is composed of [320,000,000] \$397,491,000, a part of the amount authorized to be appropriated for the fiscal year [1950, and \$3,214,713 and \$1,785,287] 1951, and \$2,038,463 and \$470,537, the latter sums being for reimbursement of the sums expended for the repair or reconstruction of highways and bridges which have been damaged or destroyed by floods, hurricanes, or landslides, as provided by section 4 of the Act approved June 8, 1938, and section 7 of the Act approved July 13, 1943 (23 U. S. C. 13a and 13b). (Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

1. *Grants for construction.*—Grants are made to States for the improvement of highways that are part of the Federal-aid primary, secondary, and urban highway systems; in general, these grants are matched on an equal basis by State funds. The three highway systems have a mileage of 219,196, 416,989, and 15,700, respectively. The current annual authorization is \$500,000,000.

The funds requested will be used to reimburse the States for the Federal share of the cost of work done on approved projects. Actual and estimated progress of this program is summarized in the following table:

Fiscal year	Annual authorization	Number of projects approved	Federal share of approved projects	Appropriation for payments	Payments
1950.....	\$450,000,000	5,506	\$423,555,906	\$386,509,000	\$416,274,101
1951.....	450,000,000	5,001	469,828,533	385,000,000	394,088,896
1952.....	500,000,000	4,820	450,000,000	385,000,000	408,500,000
1953.....	500,000,000	4,790	450,000,000	400,000,000	400,000,000

¹ Includes proposed supplemental estimate of \$60,000,000.

2. *Administration.*—Administrative, engineering, and research expenses are met by deductions of not to exceed 3¼ percent from the Federal-aid authorizations. Highway research is carried out independently as well as in cooperation with State highway departments.

3. Forest Service administration.....	95,320	91,700	92,000
Total direct obligations.....	10,903,534	21,000,000	21,000,000
<i>Obligations Payable Out of Reimbursements From Other Accounts</i>			
1. Construction of forest highways.....	788,669	800,000	800,000
Obligations incurred.....	11,692,203	21,800,000	21,800,000

PROGRAM AND PERFORMANCE

1. *Construction.*—Principal forest highways are located on the Federal-aid and State highway systems. Projects are jointly selected by the States, the Forest Service, and the Bureau on the basis of their contribution to the national defense or to essential civilian requirements, especially the production of timber. Actual and estimated progress of this program is summarized in the following table.

Fiscal year	Authorization	Allocated to projects	Miles completed	Appropriation for payments	Payments
1950.....	\$20,000,000	\$23,119,509	541	\$22,500,000	\$27,496,763
1951.....	20,000,000	10,193,473	567	22,500,000	19,509,204
1952.....	20,000,000	20,293,300	525	21,000,000	21,000,000
1953.....	20,000,000	20,233,500	525	21,000,000	24,636,424

2. *Administration.*—Administrative costs range from 2½ to 3 percent of total expenditures.

BUREAU OF PUBLIC ROADS—Continued**Forest Highways, Bureau of Public Roads—Continued**

3. *Forest Service administration.*—Transfers are made to the Forest Service to cover its administrative costs under this program.

NOTE.—Reimbursements from non-Federal sources above are derived from foreign countries for highway construction, pursuant to Public Law 759, 81st Cong.

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
1. Construction.....	\$422,642	\$3,447,335	\$3,796,500
2. Administration and engineering.....	133,982	203,500	203,500
Obligations incurred.....	556,624	3,650,835	4,000,000

PROGRAM AND PERFORMANCE

1. *Construction.*—Work is to be continued on the survey and construction of the Inter-American Highway in cooperation with the Central American countries, which generally bear one-third of the total cost.

The following tabulation shows the present status of the highway and proposed improvements in 1953.

	Miles	Percent of total mileage	Miles to be improved in 1953	United States share (1953 allocations)
Paved mileage.....	567	35		
All-weather mileage.....	743	47	56	\$1,200,000
Dry-weather mileage.....	43	3	25	800,000
Impassable mileage.....	237	15	15	1,600,000
Total.....	1,500	100	96	3,600,000

1 Excludes mileage of completed Inter-American Highway through Mexico.

2. *Administration and engineering.*—A small staff is maintained in Washington and in each of the Central American countries.

General provisions—Bureau of Public Roads: None of the money appropriated for the work of the Bureau of Public Roads during the current fiscal year shall be paid to any State on account of any project on which convict labor shall be employed, but this provision shall not apply to labor performed by convicts on parole or probation.

During the current fiscal year authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads may be performed for other Government agencies, cooperating foreign countries and State cooperating agencies and reimbursement for such services (which may include

depreciation on engineering and road-building equipment used) shall be credited to the appropriation concerned.

During the current fiscal year appropriations for the work of the Bureau of Public Roads shall be available for expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment for distribution to projects under the supervision of the Bureau of Public Roads, or for sale or distribution to other Government activities, cooperating foreign countries and State cooperating agencies, and the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) may be reimbursed to current applicable appropriations.

Appropriations to the Bureau of Public Roads may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Bureau, and for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of \$100 per diem. (23 U. S. C. 1-117; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.)

Allocations Received From Other Appropriation Accounts—

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriations, as follows:

"Philippine rehabilitation, Department of State."

"Assistance to Greece and Turkey, Executive Office of the President."

"Mutual security, Executive Office of the President."

"Construction, Bureau of Land Management, Department of the Interior."

NATIONAL BUREAU OF STANDARDS

INTRODUCTORY STATEMENT

The National Bureau of Standards is the principal laboratory of the Federal Government for research in physics, mathematics, chemistry, and engineering. The Bureau serves as a national laboratory on problems relating to fundamental standards of measurement in the physical sciences, determination of physical constants, properties of materials, and development of methods and instruments for precise measurement.

For expenses necessary in carrying out the provisions of the Act approved March 3, 1901, as amended (15 U. S. C. 271-278; Public Law 619, approved July 22, 1950), including [not to exceed \$700,000 for] improvements to buildings, grounds, and other plant facilities, as authorized by section 2 of the Act of July 21, 1950 (Public Law 618); building of temporary experimental structures; purchase [of] (not to exceed [two] nine, including five for replacement only) and hire of passenger motor vehicles [for replacement only]; and not to exceed \$100,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) at rates not to exceed \$50 per diem for individuals; as follows: (Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.)

Operation and Administration, National Bureau of Standards—

Operation and administration: For the general operation and administration of the Bureau; improvement and care of the grounds; plant equipment; not to exceed \$175,000 for construction and equipment of cafeteria facilities; and maintenance and protection of buildings, including repairs and alterations thereto; [\$1,100,000, of which not to exceed \$490,203 shall be available for personal services] \$1,919,000. (31 Stat. 1449; 64 Stat. 371; 15 U. S. C. 272, 278a, 278c; 64 Stat. 371; 15 U. S. C. 285, 286; 65 Stat. 593; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

This program provides for administration of the National Bureau of Standards, including maintenance and operation of its physical plant, and improvements thereto.

1. *Administration.*—This includes the executive direction and administrative services of the Bureau such as the Office of the Director, fiscal, personnel, scientific publications, and supply.

2. *Maintenance and operation of buildings and grounds.*—This includes operation, maintenance, repair, and protection of the Bureau's physical plant.

3. *Alterations and improvements.*—This includes construction and other work required to effect necessary improvements in the Bureau's facilities.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1951, \$1,189,078; 1952, \$1,142,000; 1953, \$1,919,000.

Obligations incurred.....	4,075,362	4,059,419	4,156,000

PROGRAM AND PERFORMANCE

1. *Fundamental research.*—Investigations of fundamental physical phenomena are conducted, and physical constants and properties of materials are determined when such data are of great importance to scientific or manufacturing interests.

2. *Applied research.*—Fundamental scientific knowledge is applied to develop more effective use of new scientific and technological processes, materials, and equipment. The properties and processing characteristics of industrial materials, structures, equipment, and commodities are determined. Investigations are made of fundamental physical phenomena arising in connection with development of specific technical devices.

3. *Development.*—Standards of measurement, instruments, instrumentation techniques, methods of measurement and analysis, and commodity testing techniques are developed. New testing devices and special devices for national defense and for improvement of technical operations of Federal agencies are designed and constructed. Materials and technological processes in fields of importance to national welfare and defense are developed.

4. *Testing, calibration, and specifications.*—The Bureau has custody of the national standards of measurement, and it compares standards used in scientific investigations, engineering, manufacturing, commerce, and educational institutions with standards adopted or recognized by the Government. This activity also provides for preparation of standard samples, analyses of substances, and similar services related to the standards of physical measurement; formulation of specifications and standards for commodities and equipment; acceptance and surveillance testing of commodities, materials, and equipment for the Federal Government; and technical investigative and advisory services related to regulatory or judicial functions of governmental agencies.

5. *General scientific services.*—A number of scientific services are performed for other Government agencies, including compilation and dissemination of scientific and technical data; production of substances and materials for specific needs in the Federal Government; operation of special technical installations and services.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

The Central Radio Propagation Laboratory conducts research on the propagation of radio waves of all frequencies; develops methods and techniques for applying the results of this research to practical problems; provides a center of information and consulting services on radio wave propagation problems for all other Government agencies; and develops, maintains, and provides calibration services for the national primary standards of measurement of all electrical quantities at all radio frequencies.

1. *Fundamental research.*—This is concerned with the fundamental physics of the atmosphere and effects of solar and cosmic radiation on it insofar as these phenomena affect radio propagation. The long-range improvement of radio communication is critically dependent upon progress in this phase of the program.

2. *Applied research.*—This is concerned primarily with the improvement of techniques for the prediction of

maximum usable frequencies for radio skywave transmission and the improvement of standards, instruments, and measurement methods in the entire radio frequency range.

3. *Development.*—This is concerned with the development of equipment and standards for the precise measurement of electrical quantities at radio frequencies and with the development of equipment, systems, and techniques necessary for improvement of radio communication at all frequencies.

4. *Testing, calibration, and specifications.*—This provides for the calibration of instruments against the national standards of measurement in this field.

5. *General scientific services.*—This is concerned with the collection of data on propagation of radio waves from all parts of the world, both from the Bureau's own field stations and from those of other cooperating laboratories, and with the analysis and dissemination of these data for prediction of radio propagation conditions. Consultative services are provided other Government agencies, especially the Department of Defense.

NATIONAL BUREAU OF STANDARDS—Continued

Construction of Laboratories, National Bureau of Standards—Con.

PROGRAM AND PERFORMANCE

Construction of these laboratories was authorized at a cost of \$4,275,000 for the radio laboratory, and \$1,540,000 for the guided-missile laboratory. An appropriation of \$1,900,000 was provided in fiscal year 1951 of which \$1,540,000 was for the guided-missile laboratory and \$360,000 for the cost of drawing plans and specifications for the radio laboratory. Contract authorization of \$3,915,000 was provided in fiscal year 1951 to permit the awarding of contracts for construction and equipping of the radio laboratory. An appropriation of \$3,800,000 was made in fiscal year 1952 to liquidate obligations incurred for the construction and equipping of the radio laboratory.

PROGRAM AND PERFORMANCE

The Weather Bureau observes, records, and forecasts weather conditions and river stages for the benefit of

United States commerce, industry, agriculture, and the general public.

1. *General weather services.*—Regular forecasts are issued for United States territory and waters with special emphasis on floods and severe storms. Special forecasts and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper air observations are taken at several hundred locations to serve forecasting requirements. Current weather information is disseminated widely for the benefit of aviation and other interests. Several thousand voluntary and part-time observers record river stage, temperature, and precipitation readings for use in flood-control and water-use activities. All observational records are combined to form the climatic history of the United States and possessions.

The increase for 1953 will provide for improving the upper air observational program; river basin surveys; and specialized weather service in the forest areas of southeastern United States.

2. *Research.*—Research activities are directed primarily toward the development of new operational and forecasting techniques directly applicable to major service programs, but also include studies of basic meteorology and meteorological physics.

3. *Administration.*

BUSINESS ENTERPRISE AND REVOLVING FUNDS

OFFICE OF THE SECRETARY

Defense Production Guarantees, Department of Commerce—

PROGRAM AND PERFORMANCE

Guaranties are given on loans made by private sources to finance construction or operation of defense production facilities. Loans may be purchased by the Government if necessary to keep financing in effect. Revenues from guaranty fees and interest on purchased loans are used to pay administrative expenses. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses. (*Defense Production Act of 1950, sec. 301.*)

MARITIME ACTIVITIES

WAR-RISK INSURANCE REVOLVING FUND

War Risk Insurance Revolving Fund, Maritime Activities—

For the war-risk insurance revolving fund, authorized by title XII of the Merchant Marine Act, 1936, as amended (Public Law 763, approved September 7, 1950), the Secretary of Commerce is authorized to transfer to said fund, at such times as it may become necessary in order to place into effect the insurance coverage authorized by said title, and in such amounts as he may determine, not to exceed a total of \$10,000,000 from the "Vessel operations revolving fund". (Supplemental Appropriation Act, 1952.)

PROGRAM AND PERFORMANCE

Present commercial war-risk insurance policies are subject to an automatic termination clause upon the outbreak of war between any of the four powers—United States, France, Great Britain, and the U. S. S. R. In the event of such an emergency, and adequate commercial insurance coverage is not available on reasonable terms and conditions, the Secretary of Commerce is authorized by title XII of the Merchant Marine Act, 1936, as amended, to provide war-risk insurance and certain marine-risk insurance for such vessels, crew members and their personal effects, and cargoes, as may be deemed to be in the interest of the national defense or the national economy of the United States.

The Supplemental Appropriation Act, 1952 (Public Law 253), authorizes the transfer of \$10 million from the "Vessel operations revolving fund" for the establishment of a "War-risk insurance revolving fund" in the Maritime Administration. Unless circumstances warrant, no part of the \$10 million will be transferred during fiscal years 1952 or 1953. In the meantime, war-risk insurance interim binders are being issued upon payment of non-returnable fees. These binders are conditional insurance policies for 1 year in that they provide war-risk coverage immediately upon the automatic termination of commercial insurance as the result of the outbreak of war between any of the four powers.

Federal Ship Mortgage Insurance Fund, Revolving Fund, Maritime Activities—

PROGRAM AND PERFORMANCE

Title XI of the Merchant Marine Act, 1936, as amended, authorizes the Maritime Administration to insure mortgages on certain classes of ships. Receipts from such insurance are deposited in the "Federal ship mortgage insurance revolving" fund, which is also available for the payment of any claims arising under the insurance program.

BUSINESS-TYPE STATEMENTS**PROGRAM AND PERFORMANCE**

The sum of \$5,000,000 has been appropriated for the operation of a working capital fund at the National Bureau of Standards. This fund is reimbursed from applicable appropriations of the Bureau for work done for the National Bureau of Standards and from funds of other Government agencies for facilities and services furnished to such agencies. Reimbursements include handling and related charges, reserves for depreciation of equipment, accrued leave, building construction, and alterations directly related to the work for which reimbursement is made.

Net profit or loss (—).....	\$81,734	-\$217,000	-\$496,000

PURPOSE AND FINANCIAL ORGANIZATION

The chief purpose of the Inland Waterways Corporation is to demonstrate the feasibility of water transportation on the inland rivers and to extend the benefits of this service by providing fast, dependable, and efficient barge service to the widest possible segment of the shipping public in the area. In addition to the officers appointed by the Secretary of Commerce, the Corporation has an advisory board consisting of a chairman and six recognized business leaders selected for 5-year terms by the Secretary of Commerce to represent each of the several sections of the country served by the Corporation. The Corporation originally had an authorized capital of \$5 million. In 1928, this was increased to \$15 million. Paid-in surplus of \$12,298,328 represents the appraised value of equipment and facilities transferred to the Corporation when it was chartered by the War Department (49 U. S. C. 151-153), and by other Government agencies.

ANALYSIS OF BUDGET PROGRAMS

Budgetary requirements of the Corporation vary markedly because of the usual hazards and uncertainties of water transportation. Ice conditions, floods, and high and low water are some of the natural unpredictable factors encountered. The poor condition of floating and terminal equipment, freight-car shortages, and work stoppages also disrupt operating plans and reduce revenues.

The budget program of the Corporation for fiscal year 1953 consists of (1) common carrier operations, (2) capital replacements, and (3) lending activities. The level at which the various activities of the Corporation are projected for fiscal years 1952 and 1953 represents an increase over that of 1951.

Common carrier operations.—The Corporation, operating under the trade name "Federal Barge Lines," provides the most complete common carrier barge service offered on the Mississippi, Illinois, Missouri, and Warrior Rivers. A railroad switching facility operating between Port Birmingham and Ensley, Ala., provides a connecting

INLAND WATERWAYS CORPORATION—Continued

link between the Corporation's facilities and the trunk-line railroads serving the Southeast.

Estimated freight tonnage for 1953 compared with 1951 and 1952 is shown below:

Division	1951 actual	1952 estimate	1953 estimate
	<i>Tons</i>	<i>Tons</i>	<i>Tons</i>
Lower Mississippi River.....	2,206,297	2,428,059	2,456,464
Upper Mississippi River.....	573,793	631,270	638,655
Illinois River.....	963,120	1,059,952	1,072,352
Missouri River.....	140,357	154,719	156,529
Warrior River.....	127,674	223,000	229,000
Railroad.....	1,549,393	1,313,800	1,329,000

Income for fiscal years 1952 and 1953 will average \$3.91 and \$3.98, respectively, per ton, as compared with \$3.99 per ton in 1951. Expenses averaged \$3.96 per ton in fiscal year 1951, and are estimated at \$3.98 per ton in 1952 and \$4.05 per ton in 1953.

Capital replacement program.—Since all of the capital stock authorized by Congress has been subscribed, the Corporation is entirely dependent on funds derived from operations for replacement of antiquated and worn-out floating equipment, thus precluding needed large-scale capital improvements.

Fifty-four percent of the boats and 58 percent of the barges are over 20 years old, and only 23 percent of the boats and 19 percent of the barges are less than 10 years old. Repairs are increasingly a cause of serious delays and the usefulness of barges is being curtailed gradually by their advanced state of deterioration. As this situation becomes progressively worse, the capacity to handle cargo will rapidly diminish. Cargo capacity has already been decreased by the complete or partial condemnation of 119 barges for cargo insurance representing approximately 45 percent of the barge equipment owned by the Corporation.

Capital expenditures during fiscal 1951 for barges, barge equipment, and other facilities totaled \$669,622. The program for fiscal years 1952 and 1953 contemplates expenditures of \$2,200,000 and \$200,000, respectively.

Lending activities.—The Corporation is authorized to make loans to States, municipalities, and transportation

companies that will contribute to the improvement of transportation facilities along the inland waterways (49 U. S. C. 141). On June 30, 1951, one loan of \$91,114 was outstanding to the Board of Commissioners, Port of New Orleans, a State authority. No new loans are contemplated during fiscal years 1952 and 1953.

Administrative expenses.—The Corporation is subject to the regulations of the Interstate Commerce Commission. Administrative expenses for water and railroad operations are those set forth under the title "General expenses" in the Commission's uniform system of accounts for carriers by water. Expenses in fiscal year 1953 are estimated to be \$510,000, as compared with \$481,000 and \$447,188 in fiscal years 1952 and 1951, respectively.

FINANCIAL REVIEW

It is anticipated that \$1 million will be spent from the general fund of the Treasury to increase the outstanding capital stock of the Corporation in 1952. No expenditures from the Treasury are forecast in 1953.

In 1951, the Corporation's gross operating income was \$11,157,443, and is expected to be \$11,709,000 in 1952 and \$11,873,000 in 1953. These increases represent anticipated higher transportation revenues through increased merchandise traffic, increased rates, and additional cargo capacity provided by new barges. Expenses of \$11,082,999 in 1951 applied to income resulted in an operating profit of \$74,444. Gains from the sale of equipment totaling \$7,290 resulted in a profit of \$81,734 for the year. In 1952, expenses estimated at \$11,926,000 are expected to result in losses of \$217,000. Losses of \$496,000 in 1953, with expenses of \$12,369,000, are forecast. The major portion of these increased expenses is occasioned by higher transportation, maintenance, and depreciation costs, as well as rising insurance expenses due to the condition of the barges.

The Government's investment in the Corporation consists of capital stock, property transferred without reimbursement, and the accumulated deficit from operations. The total investment on June 30, 1951, was \$12,030,392 and is anticipated to be \$12,813,392 and \$12,317,392 by June 30, 1952 and 1953, respectively.

LIMITATION ON EXPENSES

Administrative Expenses, Inland Waterways Corporation—

Inland Waterways Corporation (administered under the supervision and direction of the Secretary of Commerce): Not to exceed \$481,200. \$510,000 shall be available for administrative expenses, to be determined in the manner set forth under the title "General expenses" in the Uniform System of Accounts for Carriers by Water of the Interstate Commerce Commission (effective January 1, 1947): *Provided*, That no funds shall be used to pay compensation of employees normally subject to the Classification Act of 1949, as amended, at rates in excess of rates fixed for similar services under the provisions of said Act, nor to pay the compensation of vessel employees and such terminal and other employees as are not covered by said Act, at rates in excess of rates prevailing in the river transportation industry in the area (including prevailing leave allowances for vessel employees, but the granting of such allowances shall not be construed as establishing a different leave system within the meaning of that term as used in section 3 of the Act of December 21, 1944 (5 U. S. C. 61d)).

[The provisions of section 605 of the Independent Offices Appropriation Act, 1952 (Public Law 137, Eighty-second Congress) shall not apply to the operating personnel of the Inland Waterways Corporation.] (Second Supplemental Appropriation Act, 1952; Independent Offices Appropriation Act, 1952.)

GENERAL PROVISIONS

SEC. 302. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (Public Law 390), to the extent and in the manner prescribed by said Act.

SEC. 303. Appropriations of the Department of Commerce available for salaries and expenses shall be available for attendance at meetings of organizations concerned with the activities for which the appropriations are made.

SEC. 304. Notwithstanding the provisions of section 6 of the Act of August 24, 1912 (37 Stat. 555), or the provisions of any other law, the Secretary of Commerce may, in his absolute discretion, during the current fiscal year, terminate the employment of any officer or employee of the Department of Commerce whenever he shall deem such termination necessary or advisable in the best interests of the United States. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1953

DEPARTMENT OF COMMERCE

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
OFFICE OF THE SECRETARY								
Salaries and expenses, Office of the Secretary of Commerce.						7		1 automobile is used by the Secretary and the remainder are held in a pool for use of officials of the Office of the Secretary and the Bureau of Foreign and Domestic Commerce in the transaction of official business.
Salaries and expenses, defense production activities, Commerce.						10		These vehicles are used by program and administrative personnel of the National Production Authority in the transaction of official business.
Total, Office of the Secretary						17

Salaries and expenses, Weather Bureau.						1	5,200	Used by central office staff for field inspection and survey trips.
Total, Department of Commerce.						99	2,669,681	

¹ Does not include \$295,000 for hire of aircraft.

PROPOSED FOR LATER TRANSMISSION

Claims, Federal Airport Act, Civil Aeronautics Administration (under existing legislation, 1952 and 1953).—Supplemental appropriations of \$2,500,000 for 1952 and \$1,000,000 for 1953 to reimburse public agencies for damages to public airports caused by Federal agencies are proposed for later transmission. This will substantially complete the financing of outstanding claims.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$2,500,000	
Unliquidated obligations, start of year.....			\$1,750,000
Unliquidated obligations, end of year.....		1,750,000	750,000
Total expenditures.....		750,000	1,000,000
Expenditures are distributed as follows:			
Out of current authorizations.....		750,000	
Out of prior authorizations.....			1,000,000

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....			\$1,000,000
Unliquidated obligations, end of year.....			750,000
Expenditures out of current authorizations.....			250,000

Land acquisition, additional Washington airport, Civil Aeronautics Administration (under existing legislation, 1952).—In order to complete the acquisition of land for the additional Washington airport and to provide for preliminary engineering and administration, a supplemental appropriation of \$1,660,000 for 1952 is proposed for later transmission.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$1,660,000	
Unliquidated obligations, start of year.....			\$910,000
Unliquidated obligations, end of year.....		910,000	
Total expenditures.....		750,000	910,000
Expenditures are distributed as follows:			
Out of current authorizations.....		750,000	
Out of prior authorizations.....			910,000

Salaries and expenses, defense production activities, Department of Commerce (under existing legislation, 1952, and proposed legislation, 1953).—The budget includes a supplemental appropriation of \$45,000,000 for 1953 under proposed legislation and one for \$400,000 in 1952 under existing legislation. The 1952 supplemental is required to enable the National Production Authority to insure the availability, at the proper time, of component products necessary to produce military items. The 1953 supplemental provides for continuing the defense production activities of the Department of Commerce, based upon a contemplated extension of the Defense Production Act.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation.....		\$400,000	
Unliquidated obligations, start of year.....			\$40,000
Unliquidated obligations, end of year.....		40,000	
Total expenditures.....		360,000	40,000
Expenditures are distributed as follows:			
Out of current authorizations.....		360,000	
Out of prior authorizations.....			40,000

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation....			\$45,000,000
Unliquidated obligations, end of year....			4,500,000
Expenditures out of current authorizations.....			40,500,000

Federal-aid highways and Forest highways, Bureau of Public Roads (under existing legislation, 1952, and proposed, 1953).—A supplemental appropriation of \$60,000,000 is required for 1952 to reimburse the States for the Federal share of work done under Federal-aid highway contract authorizations. In addition, all the Federal-aid and For-

est highway funds thus far authorized have been apportioned among the States, and new authorizing legislation is therefore required to provide new obligational authority during fiscal year 1953. Amounts of \$400,000,000 for Federal-aid highways and \$17,500,000 for Forest highways are anticipated for this purpose.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Proposed supplemental appropriation....		\$60,000,000	
Expenditures out of current authorizations: Liquidation of prior contract authorization.....		60,000,000

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Armed Forces of the United States are continuing active military operations in Korea during fiscal year 1952. Although the manpower and material resources required for the Korean campaign have been large, the military strength of the United States has continued to increase during the year. The combined strength of the Army, Navy and Air Force will reach approximately 3,600,000 men. Deliveries of equipment ordered in 1951 are beginning to be made in substantial volume, and 1952 orders will result in an increasing flow of deliveries throughout 1953. Orders for production facilities, tools, military equipment and public works placed in 1951 and 1952 will exceed \$55 billion by June 30, 1952. The placement of orders for the tools and new production facilities in excess of those needed for current use but required for full mobilization will be nearly completed by June 30, 1952.

The fiscal year 1953 Budget for the Department of Defense provides funds for: (1) full operation, training and maintenance of active forces on a peacetime basis; (2) procurement of limited mobilization reserves of military equipment and supplies which together with requirements for the Mutual Security Program will maintain production on a sustaining basis; (3) an expansion of the number of wings in the Air Force; (4) an intensified research and development program; and (5) essential military public works required to support the expanded forces.

The table below shows the summary totals for the three Services and the Office of the Secretary of Defense, including an estimate for the 1953 financing of a military public works program to be recommended to Congress for authorization.

¹ Excludes 0.5 billion reserved for contingencies.

Military strength and structure.—By June 30, 1952, the Armed Forces will reach a planned strength of approximately 3.6 million, an increase of over 300,000 during fiscal year 1952. The 1953 military budget provides for a planned strength of 3.7 million. Most of the increase of 100,000 is to provide personnel to expand the Air Force. The principal increases in combat forces over those in being at the end of fiscal year 1952 will be in air power, but the combat readiness of other forces will be increased as a result of intensified unit training and the issue of modern equipment financed in prior years.

Army.—The budget contains funds for 20 divisions and supporting elements. The Army estimates provide for an average strength of 1,552,000 on active duty, and for an average strength of 298,000 in the National Guard and 215,000 in the Organized Reserve Corps in drill pay status.

Navy.—The budget will enable the Navy to maintain an active fleet of 408 major combatant and 783 other ships, 16 carrier air groups and 3 Marine Corps divisions and supporting elements. The Navy estimates are based upon an average strength of 832,000 on active duty in the Navy and 237,000 on active duty in the Marine Corps during 1953. In addition, the estimates provide for an average strength of 173,000 Naval and 32,000 Marine Corps Reserves in drill-pay status.

Air Force.—The budget will finance an expansion during 1953 of the presently approved 95-wing program toward 143 wings in subsequent years. The Air Force estimates are based on an average strength of 1,018,000 on active duty. The estimates will also provide for an average strength of 17,000 in the Air National Guard and 38,000 in the Air Force Reserve in drill-pay status.

The total recommendation for military personnel pay and support costs in the active Armed Forces during fiscal year 1953 is \$11.9 billion. This compares with a total of \$11.1 billion for the same purposes in fiscal year 1952.

Military reserves, ROTC and National Guard.—The budget provides \$800 million for the Reserve and ROTC programs and for the National Guard establishments, which compares with \$700 million in fiscal year 1952. The average strength of the organized Reserve force during fiscal year 1953 will be approximately 770,000 and the

inactive Reserves will average about twice this number. The Reserves will furnish a trained nucleus around which a much larger reserve force can be recruited and trained under universal military service in subsequent years. The ROTC programs of the Army, Navy, Marine Corps, and Air Force will produce approximately 32,000 junior officers, most of whom will then serve in the active Armed Forces.

Operation and maintenance.—To operate and maintain the various divisions, fleets, wings, and supporting elements of the Military Establishment during 1953, \$12.4 billion is recommended. In fiscal year 1952, \$13 billion will be used for similar purposes. Within the total for 1953, the Army and Navy programs are considerably lower, reflecting operations at peacetime rates and the receipt of spare parts and other operating supplies financed in previous years. The Air Force program is larger because of the support required for the planned expansion of wings.

Major procurement and production.—The largest category in this budget is the procurement and production of modern weapons and equipment such as aircraft, ships, tanks, ammunition, artillery, and electronic devices. The category totals \$21.7 billion as compared to \$29.4 billion for 1952 and \$22.0 billion for 1951. Within the 1953 total is \$14.1 billion for aircraft, \$1.1 billion for ships, and \$6.5 billion for other major items. The amounts provided in this budget for individual items, together with those previously provided, will finance procurement of limited mobilization reserves at production levels adequate to sustain a strong mobilization base when considered in combination with production for the Mutual Security Program.

Research and development.—Increased emphasis will be given to the development of new and improved weapons and equipment. The 1953 budget recommendation of \$1.7 billion for research and development activities compares with \$1.5 billion during 1952 and \$1.2 billion in 1951 for the same purposes.

Acquisition and construction of real property.—On the basis of anticipated legislation it is tentatively estimated that military public works in the amount of \$2.5 billion will require financing in fiscal year 1953, primarily for the construction of operating facilities for the expansion of the Air Force. The \$2.5 billion is a 1953 proposed estimate based on public works authorizations which will be submitted to Congress in the near future. This tentative estimate compares with \$4 billion provided in 1952.

Department-wide activities.—This category includes such departmental and service-wide activities as administration and finance, interservice projects, the retired pay of military personnel, the Office of the Secretary of Defense and contingencies. For the first time a separate estimate is included for the expenses of the Court of Military Appeals. A total of \$1.0 billion is requested for these purposes. This compares with \$1.2 billion provided in 1952.

PROGRAM AND PERFORMANCE

The Secretary, assisted by his immediate staff, sets the objectives, determines the policies, and formulates the basic programs of the Department and supervises its operations. The Joint Chiefs of Staff and Joint Staff, the Armed Forces Policy Council, the Munitions Board, and the Research and Development Board advise and assist the Secretary.

It is the objective of the Department of Defense to maintain forces in a state of readiness commensurate with world conditions and, at the same time, plan for the possible need to continue a state of increased preparedness for an indefinite time. Programs have been established to build a substantial reservoir of trained military manpower and to create military productive capacity sufficient to provide needed weapons and equipment.

Steady progress has been made in laying the groundwork for implementation of title IV of the National Security Act to improve the fiscal management of the defense establishment. Working-capital funds have been established at a number of military installations, which simplify business procedures and encourage the maximum utilization and economical use of available facilities.

The military and civilian aspects of the universal training and service program have been integrated to provide maximum manpower strength over the years—with a minimum cost in men, materials, and funds. Similarly the policies affecting Reserves have been revised in consonance with the new manpower programs. Continuing attention will be directed to the effective utilization of both civilian and military personnel in the Department of Defense to conserve critical skills to the maximum extent.

MILITARY FUNCTIONS—Continued**OFFICE OF THE SECRETARY OF DEFENSE—Continued****SALARIES AND EXPENSES—Continued****Salaries and Expenses, Office of Secretary of Defense—Continued**

The expansion of our industrial productive capacity has been designed to accomplish military objectives with a minimum of dislocation to the civilian economy and to provide a mobilization base from which to expand rapidly if necessary. Further improvements in the military supply and distribution systems will be sought for the purpose of facilitating cross servicing and achieving maximum economy.

Other programs receiving increasing attention include the extension of international aspects of security planning, the development of new weapons, and their integration in production and training plans.

PROGRAM AND PERFORMANCE

This consolidates the estimates of the Army, Navy, and Air Force and the Office of the Secretary of Defense for military and civilian personnel claims for private property lost, destroyed, abandoned, or damaged in the military service, including tort claims, claims compromised by the Attorney General, and repayment of erroneous collections. With the expanded military program, claims of all types are increasing in number.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1951, \$4,130,562; 1952, \$5,000,000; 1953, \$6,000,000.

Obligations incurred.....	324,089,227	330,893,000	345,000,000

PROGRAM AND PERFORMANCE

Provision is made for the pay of military personnel on the retired lists of the Army, Navy, Marine Corps, and Air Force. While only a slight rise is anticipated in non-disability retirements, it is estimated there will be a continually increasing rate in disability retirements resulting from combat casualties. The following tabulation shows for each fiscal year the estimated average number of personnel on the retired lists:

Type of retirement	Average number, 1951 actual	Average number, 1952 estimate	Average number, 1953 estimate
1. Nondisability.....	59,439	61,207	62,925

OBLIGATIONS BY ACTIVITIES

Description	1951 actual	1952 estimate	1953 estimate
<i>Direct Obligations</i>			
1. Pay of the Army	\$2,367,795,983	\$3,211,541,430	\$3,313,812,000
2. Subsistence of the Army	880,174,253	610,809,518	685,058,000
3. Individual clothing	964,100,861	572,239,924	250,320,000
4. Travel of the Army	155,736,214	212,625,000	202,000,000
5. Other military personnel costs	32,449,238	32,343,526	33,839,000
Total direct obligations	4,400,256,549	4,639,559,398	4,485,029,000
<i>Obligations Payable Out of Reimbursements From Other Accounts</i>			
1. Pay of the Army	1,715,975	2,243,622	2,252,802
2. Subsistence of the Army	1,157,891	370,000	370,000
4. Travel of the Army	1,035	1,000	1,000
5. Other military personnel costs	191,551	325,000	310,000
Total obligations payable out of reimbursements from other accounts	3,066,452	2,939,622	2,933,802
Total obligations	4,403,323,001	4,642,499,020	4,487,962,802

PROGRAM AND PERFORMANCE

Provision is made for pay, food, clothing, travel, and personnel activities for the benefit of the individual soldier. Army strength is shown in the following table:

Army strength

	Average number		
	1951 actual	1952 estimate	1953 estimate
Officers (excluding nurses)	96,056	135,300	135,500
Nurses (including Women's Medical Specialist Corps)	4,572	8,300	7,300

Army strength—Continued

	Average number		
	1951 actual	1952 estimate	1953 estimate
Enlisted personnel	986,704	1,385,200	1,406,800
Cadets, Military Academy	2,369	2,400	2,400
Total	1,089,701	1,531,200	1,552,000

1. *Pay of the Army.*—This provides for pay and allowances of all Army personnel and United States Military Academy cadets.

2. *Procurement of subsistence.*—This consists of regular subsistence for enlisted personnel and its inspection and transportation to first destination.

3. *Individual clothing.*—Provision is made for initial issue of clothing to enlisted personnel and a periodic maintenance allowance.

4. *Travel of the Army.*—This covers individual and group travel for all military personnel other than administrative travel. Requirements for 1953 are less than those for 1952 due to fewer troop movements than were necessary during the build up period.

5. *Other military personnel costs.*—Welfare and morale activities cover civilian personnel, facilities, athletic supplies and equipment, musical recordings, basic items of furniture and fixtures for service clubs and libraries, books, and craft shop supplies and equipment at all Army installations to supplement the provision made from non-appropriated funds. Through information and education Army personnel are furnished with factual material for understanding their responsibilities as soldiers and citizens and are given nonmilitary academic and vocational training. Provision is made for primary and secondary schooling of dependents of military and civilian personnel of the Army, outside the United States, at an average cost of \$250 per pupil, including tuition payments and the operating expenses of schools conducted by the Army. Chaplains' needs cover chapel equipment and religious supplies. Provision is made for the return of escaped military prisoners, deserters, and soldiers absent without leave; interest on soldiers' deposits; death payments to beneficiaries of military personnel; and expenses of awards and medals.

MAINTENANCE AND OPERATIONS, ARMY**Maintenance and Operations, Army—**

For expenses, not otherwise provided for, necessary for the maintenance and operation of the Army, including administration and rentals at the seat of Government; medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel on duty or leave, except elective private treatment), and other measures necessary to protect the health of the Army; disposition of remains, including those of all Army personnel who die while on active duty; information and educational services for the armed forces; recruiting expenses; subsistence of prisoners at disciplinary barracks, and of civilian employees as authorized by law; expenses of apprehension and delivery of prisoners escaped from disciplinary barracks, including payment of rewards not exceeding \$25 in any one case, and expenses of confinement of such prisoners in nonmilitary facilities; donations of not to exceed \$25 to each prisoner upon each release from confinement in a disciplinary barracks; authorized issues of articles for use of applicants for enlistment and persons in military custody; civilian clothing, not to exceed \$30 in cost, to be issued each person upon each release from an Army prison and to each soldier discharged otherwise than honorably, or sentenced by a civil court to confinement in a civil prison, or interned or discharged as an alien enemy; transportation services; communications services, including construction of communication systems; photographic services; maps and similar data for military purposes; military surveys and engineering planning; alteration, extension, and repair of structures and property; acquisition of easements, rights-of-way, and similar interests in land, and, in administering the provisions of 43 U. S. C. 315g, rentals may be paid in advance; payment of deficiency judgments and interest thereon arising out of condemnation proceedings; utility services for buildings erected at private cost, as authorized by law (10 U. S. C. 1346), and buildings on military reservations authorized by Army regulations to be used for a similar

purpose; purchase of ambulances; hire of passenger motor vehicles; contingencies for the Commandant of the National War College, to be expended in his discretion (not exceeding \$1,000); purchase, repair and cleaning of uniforms for guards at the National War College; tuition and fees incident to training of military and civilian personnel at civilian institutions; maintenance and operation of the United States Military Academy, including contingencies for the Superintendent (not exceeding \$5,200), the Commandant of Cadets (not exceeding \$1,200) and the Academic Board (not exceeding \$1,000), to be expended in their respective discretions, expenses of the Board of Visitors, and liquidation of unpaid indebtedness of separated cadets to the Treasurer of the Academy; field exercises and maneuvers, including payments in advance for rentals or options to rent land; expenses for the Reserve Officers' Training Corps and other units at educational institutions, as authorized by law (10 U. S. C. 381-390; 441-444; 1180-1182a); exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law (31 U. S. C. 95a; 50 U. S. C. App. 1705-1707; 61 Stat. 493); expenses of inter-American cooperation, as authorized for the Navy by law (5 U. S. C. 421f) for Latin-American cooperation; not to exceed \$6,152,000 for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes, and his determination shall be final and conclusive upon the accounting officers of the Government; \$4,820,000,000. (5 U. S. C. 43, 78, 181, 181-1, 181-2, 181-5, 189c, 192, 192a, 946; 10 U. S. C. 181b, 381, 389, 441, 540, 635, 1055-1089, 1092a-d, 1093, 1121, 1138, 1139, 1151, 1161, 1334, 1363; 50 U. S. C. 78; 50 U. S. C. App. 766; Department of Defense Appropriation Act, 1952.)

Appropriated 1952, \$0 Estimate 1953, \$4,820,000,000
Appropriated (adjusted) 1952, \$5,768,287,716

* Includes \$16,000 for activities previously carried under "Maintenance and operations, certain Federal water mains outside District of Columbia," and excludes \$4,557,000 for activities transferred in the estimates to other appropriations as follows:
"Salaries and expenses, Renegotiation Board" \$57,000
"Surveys, investigations, and research, Geological Survey" 4,500,000
The amounts obligated in 1951 and 1952 are shown in the schedules as comparative transfers.

PROGRAM AND PERFORMANCE

Provision is made for all essential maintenance and operational activities of the Army.

1. *Forces and facilities.*—This covers procurement, maintenance, and operational expenses of combat units

of the Army and organized service units which support them; field training of troop units; and disposition of remains. Procurement deals with organizational equipment, such as gas masks; ordnance racks, tools, and targets; special weather and field clothing; bedding; grenade carriers; aerial delivery equipment; tentage; engineer tools; photographic and meteorological equipment for operations and training. Operational needs include field maintenance and repair of equipment in the hands of troops, field training supplies and equipment, such as lumber, cement, gravel, and liquid fuels and lubricants.

2. *Training.*—This supports the Army War College, the Command and General Staff College, combat arms schools, other schools, replacement training centers, and the United States Military Academy. Included are tuition at civilian institutions and training aids, films, and publications. Actual and estimated enrollments are:

STUDENT ENROLLMENTS

	1951 actual	1952 estimate	1953 estimate
Army War College	151	152	300
Command and General Staff School	1,567	1,940	1,850
Combat arms schools:			
Infantry	34,234	59,727	70,000
Artillery	11,995	16,756	20,000
Antiaircraft and guided missiles artillery	4,654	6,190	7,500
Armored	9,235	12,433	15,000
Army General School	4,627	5,950	7,000
Administrative service schools	16,091	22,974	26,370
Language schools	1,997	1,875	2,480
Technical service schools	70,884	94,761	118,500

3. *Command and management.*—This provides for headquarters at the Department of the Army in Washington, the six Army areas, the Military District of Washington, Army Field Forces, and overseas commands.

4. *Supply distribution system.*—Military supplies and equipment are received, stored, and issued, through the operation of 73 depots and 5 ports within the United States and 89 depots and 19 ports within overseas commands. Depot maintenance activities, including complete rebuilding and major overhauling of unserviceable equipment, are performed at depots, two railroad repair shops, and five marine shops. Provision is also made for procurement of spare parts and of common-use items. Included further is support of standardization and cataloging. Standardization consists of preparation of standards, specification, and qualified products lists, and includes standardization of equipment and specification conversion. Cataloging consists of normal cataloging for the Army supply system and the Army's contribution to a uniform cataloging system for all the military services and the General Services Administration.

5. *Army-wide services.*—These consist of communications, including the Army command and administrative network, wire and radio interconnecting Army installations, and refile cost of messages filed with commercial carriers; finance activities, including the Army Finance Center and 7 Army regional accounts offices in the United States and 4 in overseas areas; audit activities, including the regional offices of the Army Audit Agency; real estate activities and engineer planning, including management and disposal of real property under control of Army and Air Force, and preparation of master engineering plans for Army installations; and other Army-wide services, including operation of disciplinary barracks, reception centers, and Army military missions abroad.

6. *Medical care.*—This covers (a) medical support of the Army, National Guard, Organized Reserves, and Reserve Officers' Training Corps; (b) maintenance and operation of medical treatment facilities in the United States and overseas; and (c) medical care and hospitalization of Army per-

sonnel in localities where Army medical facilities are not available. These activities are shown in the following tables.

MEDICAL FACILITIES AND PATIENTS

	1951 actual	1952 estimate	1953 estimate
Facilities in the United States:			
Hospitals.....	68	70	70
Infirmaries.....	15	13	13
Dispensaries.....	111	111	109
Total.....	194	194	192
Patients in Army hospitals:			
Army.....	27,356	45,039	33,562
Air Force.....	2,370	1,930	1,565
Dependents.....	3,177	3,738	3,639
Veterans Administration, Navy, and others.....	2,118	1,940	1,334
Total average daily occupied beds.....	35,021	52,647	40,100
Army patients in other hospitals:			
Navy hospitals.....	1,525	706	446
Other Federal hospitals.....	501	1,330	927
Non-Federal hospitals.....	118	5	0
Total average daily occupied beds.....	2,144	2,041	1,373

Funds are provided for an inventory of medical supplies and equipment to meet mobilization needs until procurement can catch up with requirements.

NONRECURRING PROCUREMENT OF MEDICAL SUPPLIES AND EQUIPMENT

	1951 actual	1952 estimate	1953 estimate
Mobilization reserve of medical matériel:			
Procurement during year.....	\$11,193,646	\$39,904,175	\$55,852,000
Inventory (on hand and on order) at end of year.....	(17,459,633)	(57,363,808)	(113,215,808)
Department of Defense blood plasma and plasma substitutes stockpile.....	5,627,083	13,660,000	1,250,000
Other nonrecurring procurement.....	36,982,379	31,418,945	2,049,000
Total.....	53,803,108	84,983,120	59,151,000

Tuition and other expenses of military personnel attending civilian institutions for training in medical specialties are included as well as the costs of training personnel in Army medical service schools and hospitals.

MEDICAL SERVICE PERSONNEL IN TRAINING

	1951 actual	1952 estimate	1953 estimate
In civilian institutions:			
Standard courses.....	\$146	\$127	\$112
Short courses.....	212	419	411
In medical service schools:			
Officers.....	3,551	6,645	6,994
Enlisted personnel.....	21,006	42,317	51,557
In Army hospitals:			
Interns.....	199	139	150
Residents.....	298	276	276
Others.....	41	80	109
Total.....	25,453	50,093	59,609

The medical supply system includes the operation and maintenance of medical depots and medical sections of general depots. Storage capacity in the United States will be increased to 6,110,000 square feet, compared with 4,836,000 square feet in 1952 and 4,471,000 square feet in 1951.

7. *Establishment-wide activities.*—These activities of the Department of Defense for which the Army is assigned budget responsibility include: The operation of the National War College, the Industrial College of the Armed

Forces, the Armed Forces Information School, and the Armed Forces information and education programs; provision of world-wide coverage of military maps; the inter-American relations program established to assist Latin-American countries in military instruction and to promote standardization of military equipment and organization; and the operation of the Army's attaché system. The increase is due partly to the accelerated mapping program and partly to the increased requirements for joint projects for which the Army has responsibility.

8. *Manufacturing facilities.*—This provides for overhead costs and training of apprentices at Government-owned arsenals and other manufacturing facilities.

9. *Recruiting.*—This supports recruitment, including the operation of 1,300 recruiting stations and the Recruiting Publicity Bureau, and administration and control of 75 joint Army-Air Force induction stations and of 75 Armed Forces examining stations for physical and other tests.

10. *Inactive installations, nonindustrial.*—This supports the maintenance of inactive posts, camps, and stations which would be reactivated as troop facilities in the event of mobilization.

11. *Commercial transportation.*—This includes commercial line-haul transportation for continental and oversea freight movements and the Military Sea Transportation Service.

12. *Civilian components.*—This provides for operation of training facilities for the Organized Reserve Corps and Reserve Officers' Training Corps units at camps, institutions, and home stations; operation of Military District headquarters; and Organized Reserve recruiting.

13. *Industrial mobilization.*—This is to maintain in standby condition Government-owned industrial facilities, machine tools, and other production equipment. The smaller estimate is due principally to a shift of plants and reserve tools to active status.

14. *Support for research facilities and activities.*—The overhead costs of research and development conducted at military installations are financed from this activity. The direct costs are borne by the appropriation "Research and Development."

15. *Installation support.*—General housekeeping expenses at military installations including maintenance of buildings and grounds, local communications, transportation, and post administration, have been provided under the various activities above, as follows:

Direct obligations	1951 actual	1952 estimate	1953 estimate
Distribution of installation support:			
1. Forces and facilities.....	\$348,513,797	\$364,101,560	\$343,081,000

PROCUREMENT AND PRODUCTION, ARMY

Procurement and Production, Army—

For expenses necessary for the procurement, manufacture, and modification of armament, ammunition, equipment, vehicles, vessels, and aircraft for the Army and the Reserve Officers' Training Corps;

purchase of passenger motor vehicles; expenses which in the discretion of the Secretary of the Army are necessary in providing facilities for production of equipment and supplies for national defense purposes, including construction, and the furnishing of Government-owned facilities and equipment at privately owned plants; and ammunition for military salutes at institutions to which issue of weapons for salutes is authorized; \$3,684,520,000, to remain available until expended. (5 U. S. C. 78, 181-4, 235; 10 U. S. C. 20 (note), 389; 50 U. S. C. 78; Department of Defense Appropriation Act, 1952.)

Appropriated 1952, \$0 Estimate 1953, \$3,684,520,000

PROGRAM AND PERFORMANCE

Provision is made for procurement of major supplies and equipment, including ammunition, necessary to equip, maintain, and train 20 active divisions and the reserve forces in 1953, recoup 1952 consumption in Korea, and to provide additional stocks of supplies and equip-

MILITARY FUNCTIONS—Continued**DEPARTMENT OF THE ARMY—Continued****PROCUREMENT AND PRODUCTION, ARMY—Continued****Procurement and Production, Army—Continued**

ment required as mobilization reserves. Procurement for mobilization reserves of standard goods, such as commercial cars and trucks, is not included. Maximum reliance is placed on continuation of a flexible production base capable of expansion rather than on accumulation of large reserves of supplies.

A large share of current production is being financed from appropriations for 1952 and prior fiscal years and from the Mutual Security Program primarily for delivery to the North Atlantic Treaty Organization countries. The total estimate of funds to be available will support production schedules through reorder lead time in 1954.

1. *Combat weapons.*—New procurement of such items as tanks, other combat vehicles, and artillery will be substantially lower than in the two preceding years. However, procurement of such other items as small arms, flamethrowers, and smoke generating sets will increase.

2. *Vehicles.*—Procurement of trucks and other non-combat vehicles is approximately an eighth of the 1952 level as only a relatively small reserve will be provided. No procurement of passenger vehicles is contemplated, and purchase of commercial vehicles will be limited to replacement requirements.

3. *Electronics and communication equipment.*—Provision is made for procurement of electrical transmission, receiving, detecting, and other devices essential for an efficient communications network.

4. *Ammunition and guided missiles.*—Increased ammunition procurement is needed in 1953 to replace stocks utilized to supply forces in Korea. Procurement of guided missiles is for operational as well as experimental use.

5. *Other major procurement.*—This includes such items as railroad equipment, bridges, roadbuilding equipment, generators, and materials-handling equipment.

6. *Army aircraft.*—The estimate is for procurement of liaison aircraft and helicopters to meet current requirements.

7. *Provision of production facilities.*—The requirements for rehabilitation and expansion of manufacturing facilities to establish an adequate production base are being provided from funds appropriated in 1951 and 1952.

8. *Industry preparedness measure.*—This provides for experimental and testing activities designed to solve special production problems, chiefly pilot-line test runs, engineering tests of substitutes for critical materials, tests of protective construction, manpower studies, and experiments and studies in transportation and utilities.

PROGRAM AND PERFORMANCE

Provision is made for construction of armories and other facilities for the Army National Guard and units of the Organized Reserve Corps. The facilities acquired are for joint utilization by units of Reserve components of all the armed forces to the greatest practicable extent.

1. *Public works construction, National Guard.*—The construction program requirements include new armories, the expansion of existing armories, and the construction of maintenance shops, warehouses, motor storage sheds, and site training facilities. In 1952 provision was made for constructing 113 new armories and expanding 34 existing armories, together with \$8 million of nonarmory facilities. For 1953 it is proposed to build 50 armories and to expand 20 existing armories together with \$3 million of other facilities.

2. *Public works construction, Organized Reserve Corps.*—In 1951, 44 armories were completed; in 1952, 50 additional armories are being constructed. For 1953, the estimate provides for 40 additional armories.

PROGRAM AND PERFORMANCE

These requirements cover the Army Organized Reserve Corps (ORC) and the Army Reserve Officers' Training Corps (ROTC).

The mission of the Army ORC is to provide, in an emergency, units and individuals effectively trained for mobilization. Strength in a drill pay status is expected to increase from 160,000 (55,000 officers and 105,000 enlisted personnel) at the end of 1952 to 270,000 (70,000 officers and 200,000 enlisted personnel) at the end of 1953. Members are authorized to attend drills and receive 15 days of active-duty training. In addition 15,000 officer members of the volunteer Reserve will receive 15 days of active-duty training. Additional training at service schools is provided for selected members of the active Reserve.

The primary purpose of the Army ROTC is to provide a continuous flow of junior commissioned officers into the ORC and the Regular Army. The estimate provides for 105,000 students in the basic course of the senior division, of which 60,000 would be entering the first year, and 42,000 advanced students in 237 institutions; from this number 15,500 are expected to be commissioned in 1953. It is estimated that 23,500 will attend summer camp in 1953.

MILITARY FUNCTIONS—Continued**DEPARTMENT OF THE ARMY—Continued****RESERVE PERSONNEL REQUIREMENTS—Continued****Reserve Personnel Requirements—Continued**

1. *Organized Reserve Corps.*—This covers pay and allowances, travel, subsistence, individual clothing, and other miscellaneous personnel costs for armory drills and active-duty training.

2. *Reserve Officers' Training Corps.*—This covers pay and allowances (including commutation in lieu of subsistence at 90 cents per day at institutions for advanced students) and travel, subsistence, and individual clothing at institutions and summer camps.

PROGRAM AND PERFORMANCE

The Army National Guard is expected to expand in 1953 from 225,000 to 362,000 members. The number of local units will increase from 3,800 to 4,200. The structure of major units not in active service will be maintained at 19 divisions, together with combat support units. The requested increase reflects this strength and distribution.

National Guard personnel are trained in their respective units in 48 armory drills, 15 days summer field training, and three 2-day week-end drills. In addition, selected personnel receive specialized training at Army schools. The States, Territories, and the District of Columbia also support the Army National Guard in the provision and maintenance of armories.

1. *Military personnel.*—Members of the Army National Guard who attend armory and week-end drills receive base pay; those who participate in summer field training or attend schools receive additional allowances. All guardsmen receive an allowance of uniform clothing.

2. *Maintenance and operations.*—In addition to all operating and administrative expenses, including publicity, this provides for the salaries of civilian employees of the National Guard, whether hired by the States or the Federal Government.

3. *Procurement.*—Because the Army furnishes other equipment to the National Guard, this covers only procurement of ammunition used in National Guard training.

4. *Salaries and expenses, National Guard Bureau.*—This represents the Army's portion of civilian salaries and administrative expenses for the National Guard Bureau in Washington.

5. *Operation of facilities.*—Provision is made for the expenses of operating Federal and State camp sites for summer field training and miscellaneous operating expenses of other National Guard facilities.

PROGRAM AND PERFORMANCE

This provides for the development and improvement of weapons and equipment for the various types of military operations for which the Army must be prepared, and for the necessary basic and applied scientific research. The work is carried on under contracts with industry and other private institutions, and in the research, development, and test facilities operated by the Army and other Government agencies. In 1953 increased emphasis will be put on the development of prototype equipment in the categories indicated below.

1. *Land combat matériel and techniques.*—Developments include improvements to tanks to provide integral fire-control and automatic loading equipment; improved anti-tank weapons; surface-to-surface guided missiles for tactical use; new-type land mines and mine warfare equipment, and continuing improvement of ammunition of all types.

2. *Air defense matériel and techniques.*—Developments include new antiaircraft weapons; surface-to-air guided missiles; and electronic search, detection, and fire-control equipment.

3. *Airborne landing, amphibious, and supply and maintenance matériel and techniques.*—Developments include matériel for aerial supply, special vehicles for marshy and swampy terrain, and equipment for overbeach operations.

4. *Atomic, biological, and chemical warfare matériel.*—Developments in these fields are related to essential security needs.

5. *Personnel, intelligence, and planning operations.*—Developments include clothing, equipment, and survival aids for use under extreme climatic conditions; body armor; research on the treatment of wartime casualties and diseases of special military significance; techniques to improve the classification and utilization of manpower; and research on problems of strategy, tactics, and logistics to plan the development and use of new weapons on the most economical basis consistent with combat requirements.

6. *Supporting research and other operations.*—This covers research and development of general application to Army requirements, such as research on rocket propellents and electronics, together with basic research.

7. *Boards, testing and advisory.*—Boards of the Army Field Forces test and evaluate newly developed weapons and equipment.

NATIONAL BOARD FOR PROMOTION OF RIFLE PRACTICE, ARMY

Promotion of Rifle Practice, Army—

For necessary expenses of construction, equipment, and maintenance of rifle ranges, the instruction of citizens in marksmanship, and promotion of rifle practice, in accordance with the Act of August 29, 1916 (39 Stat. 643), and the provisions of law contained in 10 U. S. C. 1184-1185 and 32 U. S. C. 181-186, including travel of rifle teams, military personnel and individuals attending regional, national, and international competitions, and not to exceed \$18,000 for incidental expenses of the National Board, \$130,000: *Provided*, That travel expenses of civilian members of the National Board shall be paid in accordance with the Standardized Government Travel Regulations, as amended. (*Department of Defense Appropriation Act, 1952.*)

Appropriated 1952, \$130,000

Estimate 1953, \$130,000

3. Administration.....	24,459	21,802	22,000
Obligations incurred.....	158,991	130,000	130,000

PROGRAM AND PERFORMANCE

The National Defense Act of 1916 established a national board for the promotion of rifle practice among civilians.

1. *Civilian rifle clubs.*—Assistance is given to 3,450 clubs and schools by the loan of arms and equipment, provision of targets and supplies to 163,500 citizens for use in record firing over prescribed courses, and issuance of medals, badges, and trophies in matches and to members of clubs who qualify in marksmanship practice.

2. *Approval of sales.*—Ammunition, targets, and supplies for marksmanship practice are sold by the Ordnance Corps to members of the National Rifle Association. Because expanded military requirements have reduced supplies available for sale, the volume of sales will be substantially smaller than in 1951.

3. *Administration.*

PROGRAM AND PERFORMANCE

This system provides internal and external long-distance telegraph and telephone service for the Territory

MILITARY FUNCTIONS—Continued**DEPARTMENT OF THE ARMY—Continued****ALASKA COMMUNICATION SYSTEM—Continued****OPERATION AND MAINTENANCE—continued**

Operation and Maintenance, Alaska Communication System—Con. of Alaska. In 1951 the dollar value of military and commercial use was \$6 million; the estimated value in 1952 is \$6.7 million; and in 1953 \$6.8 million.

1. *Construction of telephone, telegraph, and cable systems.*—In 1953 this will provide for (a) procurement of equipment and its movement into new operational buildings, and (b) procurement and installation of new switchboards for telephone service along the Anchorage-Tok Junction Highway.

2. *Construction of radio systems.*—In 1953 additional radiotelephone trunk-circuits between Seattle and Anchorage will be installed and a limited quantity of radio equipment will be moved into new buildings.

3. *Maintenance of the communication system.*—Provision is made for the routine maintenance, repair, and minor rehabilitation of the telephone, telegraph, cable, and radio systems.

4. *Maintenance of buildings and appurtenances.*—This provides for the maintenance, repair, and alteration of buildings, ground walks, fences, and utilities.

5. *Operation of the system.*—Provision is made for expenses incident to operations exclusive of pay, allowances, subsistence, and medical care of military personnel. It is planned to increase leased circuits, utilities, and supplies for new buildings and to place added emphasis on replacement of worn-out and obsolete equipment. The increase in the number of civilian employees in 1953 is for replacement of military personnel.

PROGRAM AND PERFORMANCE

This covers military pay, subsistence, allowances for clothing, permanent change of station travel, and other monetary allowances of all officers and enlisted personnel on continuous active duty. The actual average strength in 1951 and planned average strengths for 1952 and 1953 are summarized in the following table:

Personnel	Average number		
	1951 actual	1952 estimate	1953 estimate
Officers (excluding nurses)	54,604	73,383	80,492
Nurses	2,695	3,504	3,552
Enlisted personnel	503,905	707,671	740,956
Total	561,204	784,558	825,000

The actual strength by the end of fiscal year 1951 was 732,152. The strength is expected to increase to 820,000 by June 30, 1952, and to 835,875 by June 30, 1953.

PROGRAM AND PERFORMANCE

This covers military pay, allowances, clothing, subsistence, and travel for personnel of the Naval Reserve on active duty for training or drills. Training is expected to continue during 1953 on a peacetime basis to the maximum extent practicable and consistent with partial mobilization. Present tables of organization provide for participation by members of the Organized Reserve in 12, 24, or 48 paid drills per year and 2 weeks' active duty for training. Two weeks' training will be provided for 17,000 officers and enlisted personnel of the Volunteer Reserve.

Average strength of the Organized Naval Reserve for 1953 is estimated to be 173,450. This compares with an estimated average strength of 146,915 for 1952. The following table shows actual strength and duty for 1951 and planned strength and duty for 1952 and 1953:

Component	1951 actual			1952 estimate			1953 estimate

PROGRAM AND PERFORMANCE

Officer candidate training is conducted to provide new commissioned officers for career or short-term service in the Regular Navy, the Marine Corps, and their reserve components. This estimate provides for pay and allowances, subsistence, travel, and clothing for the following average numbers of officer candidates:

Officer candidates	1951 actual	1952 estimate	1953 estimate
Naval Academy midshipmen.....	3,557	3,693	3,768
Naval Reserve Officers' Training Corps regular students.....	6,881	6,741	6,526
Naval Reserve Officers' Training Corps contract students.....	4,671	7,108	8,187

PROGRAM AND PERFORMANCE

1. *Training, Navy.*—Training and instruction of naval personnel extends from the indoctrination of recruits to technical and specialized instruction and the post-graduate training of officers. Provision is also made for maintenance and operation of the Naval War College, the Armed Forces Staff College, the Postgraduate School, service schools for officers and enlisted personnel, and training centers.

2. *Training, Naval Reserve.*—This provides for administration of the Naval Reserve training programs; maintenance and operation of Naval Reserve training facilities,

MILITARY FUNCTIONS—Continued**DEPARTMENT OF THE NAVY—Continued****NAVY PERSONNEL, GENERAL EXPENSES—Continued****Navy Personnel, General Expenses—Continued**

except air installations; academic instruction of Reserve officers who have completed active duty under the Naval Aviation College program and Naval Reserve Officers' Training Corps units.

3. *Naval Academy.*—This provides for the education and training of midshipmen and the maintenance and operation of the Naval Academy and the Naval Station at Annapolis, Md.

4. *Personnel support.*—This provides for military personnel administration in the field, including appropriate offices in the district headquarters and at other personnel facilities, together with recreational and morale-building activities for naval personnel, such as ship and station libraries, motion-picture programs afloat and in remote areas, chaplains' supplies and equipment, the Family Allowance Unit at Cleveland, Ohio, the Naval Examining Center at Great Lakes, Ill., and the Reserve Officers' Performance Recording Unit at Fort Omaha, Nebr.

5. *Other personnel facilities and procurement of military personnel.*—This provides for procurement of military personnel and for maintenance and operation of recruiting stations, receiving stations, retraining commands, the Naval Home, and certain personnel facilities in caretaker status.

6. *Research and development.*—Applied personnel research is conducted to develop more effective methods of utilizing human resources for military purposes.

7. *Military occupational classification project.*—This project, conducted under direction of the Personnel Policy Board of the Department of Defense, is designed to provide a basis for determining manpower needs and the equitable division of manpower to and within the Department.

8. *Departmental administration.***OBLIGATIONS BY OBJECTS**

PROGRAM AND PERFORMANCE

This provides for pay and allowances, subsistence, individual clothing, permanent change of station travel, and other monetary allowances of all officers and enlisted personnel on continuous or extended active duty. The actual average strength in 1951, the appropriated average strength for 1952, and the planned average strength for 1953 are shown in the following table:

Personnel	Average strength		
	1951 actual	1952 estimate	1953 estimate
Officer.....	10,991	14,877	20,504
Enlisted.....	142,276	177,483	216,767
Total.....	153,267	192,360	237,271

The actual strength on July 1, 1951, was 192,609. It is planned to increase this strength to 235,320 by June 30, 1952, and to 243,730 by June 30, 1953.

PROGRAM AND PERFORMANCE

Provision is made for pay and allowances, subsistence, clothing, and travel of the personnel of Organized and Volunteer components and of officer candidate trainees engaged or participating in prescribed programs of the Marine Corps Reserve training.

Compared with the average strength of 23,921 appropriated for in fiscal year 1952, the Organized Reserve strength by the end of fiscal year 1953 is expected to reach 42,150, with an average strength for the year of 32,226, consisting of 3,185 officers and 29,041 enlisted personnel. In addition, it is planned to provide active-duty training for 4,837 members of the Volunteer Reserve, consisting of 3,232 officers and 1,605 enlisted personnel.

PROGRAM AND PERFORMANCE

Provision is made for maintenance and operation of all Marine Corps activities except Regular and Reserve military personnel requirements and air facilities.

1. *Maintenance and operation of Marine Corps facilities.*—These facilities are barracks, depots of supplies, recruit depots, schools, and other types of supporting installations.

2. *Maintenance and operation of Marine Corps Reserve facilities (except air).*—These facilities are operated and maintained for Reserve units.

3. *General expenses, Marine Corps personnel.*—Provision is made for items of a general housekeeping nature such as camp and garrison equipage and supplies; supplies for military schools and tuition at civilian schools, expenses of the recruiting service, expenses of the Marine Corps Reserve, and welfare and recreation equipment.

4. *Major procurement, Marine Corps.*—This includes engineer, motor transport, electronic, and ordnance and ammunition requirements.

5. *Military occupational classification project.*—The Marine Corps participates in the program of occupational classification of military personnel according to plans prescribed by the Personnel Policy Board of the Department of Defense.

6. *Research and development.*—This contains direct costs of research and development of new equipment required by the Marine Corps to keep abreast of field military items.

7. *Cataloging.*—This entails a description of items peculiar to the Marine Corps and cross-servicing of items procured from Army or Navy sources.

8. *Industrial mobilization.*—The Marine Corps participates in industrial mobilization activities in accordance with the objectives established by the Department of Defense.

9. *Departmental administration.*

PROGRAM AND PERFORMANCE

Naval aviation consists of Navy and Marine Corps combat, service, and training forces and includes land-based naval aviation, air transport essential for naval operations, all air weapons and air techniques, naval air stations, and other field facilities.

1 and 2. *Flight operations, Regular Navy and Naval Reserve*.—Naval and Marine Corps flight operations are programed for 1953 at peacetime levels of flying but at increased strength.

3 and 4. *Aircraft overhaul, Regular Navy and Naval Reserve*.—Overhaul workloads for 1953 accord with aircraft operating strength and level of flight operations. Workload and unit costs factors are based on 1951 and 1952 experience but reflect current prices wherever price changes have occurred.

5 and 6. *Station operations, Regular Navy and Naval Reserve*.—General operations and maintenance of Regular Navy and Marine Corps stations whose missions are predominantly air and of Naval Air Reserve stations are programed for 1953 at the level of combat, service, and

MILITARY FUNCTIONS—Continued**DEPARTMENT OF THE NAVY—Continued****AIRCRAFT AND FACILITIES—Continued****Aircraft and Facilities, Navy—Continued**

training forces, and with such essential supporting functions as equipment evaluation.

7. *Alteration and replacement of facilities.*—Provision is made for essential major repairs and replacements of structural facilities, landing aids, shop equipment, and ground electronic equipment at facilities comprising the naval aeronautical organization.

8. *Research and development.*—The aeronautical research and development, conducted by contract and at Navy facilities, is concerned with the development of new and improved types of aircraft, guided missiles, power plants, electronic equipment, related components, and supporting equipment.

9. *Industrial mobilization.*—In 1953 this relates (a) to the development of high-production techniques, and the reduction or elimination of military requirements for critical materials, and (b) to the establishment of pilot production lines for new sources of long-lead-time critical components and assemblies.

10. *Guided missile outfitting.*—It is planned in 1953 to equip a number of combat air squadrons and supporting service units with special missile-test and missile-handling equipment to make possible the employment of guided missiles as service weapons.

11. *Supporting equipment, matériel, and services.*—Support is given to aircraft operation by procurement of such matériel and supplies as weather instruments, synthetic training devices, submarine detection matériel, flight clothing, technical publications, and photographic equipment. Evaluation of newly developed electronic equipment, maintenance of shipboard catapults and arresting gear, and field personnel engaged in the inspection of newly procured aircraft and equipment are included.

12. *Departmental administration.*

PROGRAM AND PERFORMANCE

Provision is made for procurement of new aircraft for the Regular Navy, Marine Corps, and their reserve components and of ordnance for new aircraft, guided missiles, target drones, technical equipment for service training, and replacement equipment to modernize aircraft in inventory.

1. *Aircraft procurement.*—Requirements are based on planned aircraft operating strength, specific combat complements, attrition, obsolescence, and normal aircraft service life in relation to the projected operating strength of the Regular Navy, Marine Corps, and their reserve components.

2. *Ordnance for new aircraft.*—Ordnance requirements are governed by the particular models and numbers of aircraft procured.

3. *Guided missile and target drone procurement.*—The estimate provides for the first time, missiles for fleet training and service use. Requirements for target drones are related to fleet usage of aerial targets. The estimate includes an increased number of targets to meet firing schedules in keeping with intensified fleet training and guided missile evaluation.

4. *Technical equipment for service training.*—Prior to the introduction of new models of aircraft and aviation equipment into fleet units, personnel must be trained in their operation and maintenance. The estimate contemplates the procurement of advanced types of equipment to carry out intensified training with greater emphasis on advanced specialized instruction.

5. *Aircraft modernization.*—Provision is made for procurement of newly developed electronic equipment for installation in existing aircraft, with emphasis on equipping service aircraft with electronic equipment for guided missile operations. Other aircraft will be equipped with improved navigational aid, identification, and antisubmarine warfare equipment.

PROGRAM AND PERFORMANCE

1. *Maintenance and operation of active fleet.*—Provision is made for overhauls, voyage repairs, maintenance, and improvements; operating requirements for supplies and equipment; salvage services; charter and hire of auxiliary vessels, including lighters, tugs, and small craft; pay, subsistence, and incidental expenses of civilian crews

employed on naval vessels; and alteration and installation of armament on noncommissioned vessels of the Military Sea Transportation Service.

2. *Maintenance and preservation of reserve fleet.*—The 1953 plan, under the 5-year overhaul program resumed in 1951, provides for maintenance, repair, and preservation of hulls, machinery, and ordnance equipment, improvement of reserve fleet ships, and inactivation of active fleet ships.

3. *Maintenance and operation of Naval Reserve vessels.*—Provision is made for maintenance, operation, and alteration of 104 vessels assigned to Naval Reserve training.

4. *Fuel for ships.*—This includes fuel, water, and utility services for ships of the active fleet, service craft, and Naval Reserve training vessels.

5. *Electronics.*—Procurement of electronics material and equipment for ships and naval facilities includes shore-installed cryptographic and other instruments and contractual engineering services for the electronic equipment of the entire naval shore establishment.

6. *Fleet support facilities.*—This covers fleet support and plant improvements at 11 naval shipyards and 10 Bureau of Ships laboratories, maintenance and operation of 54 other shore stations, and additional facilities assigned to the operating forces. Provision is also made for procurement of ship designs, materials, and equipment (except electronics) for Regular Navy schools and advanced bases; preparation, publication, and dissemination of Ships Allowance Lists and Machinery Indexes of the active and reserve fleets; support of the Armed Services Electro-Standards Agency program; and standardization of materials and equipment.

7. *Research and development.*—This relates to the improvement of ships and ship equipment.

8. *Industrial mobilization.*—Provision is made for lease administration, security, and limited normal maintenance of industrial facilities held in standby condition; procurement of various attachments for modernization of machine tools; preparedness measures designed to reduce lead and production time so as to improve wartime supply arrangements for essential military equipment; and planning and scheduling mobilization equipment requirements.

PROGRAM AND PERFORMANCE

1. *Procurement of ordnance and ammunition.*—Provision is made for procurement of ordnance and ammunition and for acquisition of productive facilities to support the naval forces at minimum rates of output necessary for establishing required inventory positions and maintaining a base for mobilization expansion.

2. *Maintenance of ordnance and ammunition.*—This covers maintenance and essential improvements of ordnance equipment and ammunition on ships and in depots, together with support of the standardization and specification programs in the field of naval ordnance.

3. *Maintenance and operation of facilities.*—This provides for routine maintenance and operation of the Ordnance Shore Establishment of 58 active stations and 6 stations in maintenance status.

4. *Improvements and alterations to facilities.*—This applies to major repairs, alterations, and improvement of facilities, together with replacement of major station equipment.

5. *Naval Reserve.*—This provides for the annually recurring ordnance and ammunition requirements for training under the Naval Reserve program.

6. *Research and development.*—This covers research and development projects for improvement of ordnance and ammunition.

7. *Industrial mobilization.*—Provision is made for maintenance of reserve plants, machines, and machine tools;

industry preparedness measures; and support of mobilization planning by the Department of Defense.

8. *Departmental administration.*

PROGRAM AND PERFORMANCE

Shipbuilding programs authorized prior to 1948 provided for construction and procurement of hulls, machinery, and equipment for new naval vessels; conversion of existing naval vessels; procurement of facilities, tools, and equipment for construction and conversion of vessels; and departmental salaries. An extension of time for expenditures is needed for ships whose delivery dates have been delayed beyond those previously scheduled.

PROGRAM AND PERFORMANCE

This is to liquidate prior-year obligations for approved ordnance for ships remaining in the World War II ship-building program. An extension of time for expenditures is needed for ships whose delivery dates have been delayed beyond those previously scheduled.

Total obligations	146,496,979	154,359,354	138,695,000

PROGRAM AND PERFORMANCE

The total requested appropriation is \$116,500,000. This represents a decrease of \$19,270,000 compared with the current fiscal year, and a decrease of \$11,921,661 compared with the preceding fiscal year. The decrease from the current fiscal year is primarily a result of the non-recurring requirement for procurement in 1952 of a stand-by inventory of medical supplies and equipment for use during mobilization. Partially offsetting increases in the requirements for operation of medical activities arise from the expanded size of the Navy and Marine Corps.

1. *Maintenance and operation of medical treatment facilities.*—This covers operation of medical treatment facilities operated by the Bureau of Medicine and Surgery in the United States and overseas.

MEDICAL FACILITIES AND PATIENTS

	1951 actual	1952 estimate	1953 estimate
<i>Facilities world-wide:</i>			
Hospitals	27	29	30
Infirmaries	13	13	13
Dispensaries, dental clinics, and other facilities	13	15	15
<i>Patients in Navy hospitals:</i>			
Navy and Marine Corps	12,621	16,480	18,404
Army and Air Force	1,739	1,030	746
Dependents	1,350	1,870	1,980
Veterans Administration, retired, and others	1,899	1,670	1,370
Total average daily occupied beds	17,609	21,050	22,500

2. *Education and training.*—Tuition and other expenses of military personnel attending civilian institutions for training in medical specialties are included as well as the costs of training personnel in Navy medical service schools and hospitals.

MEDICAL SERVICE PERSONNEL IN TRAINING

	1951 actual	1952 estimate	1953 estimate
<i>In civilian institutions:</i>			
Standard courses	172	351	275
Short courses	193	257	286
<i>In Navy medical service schools:</i>			
Officers	269	269	286
Enlisted	3,350	5,340	5,714
<i>In Navy hospitals:</i>			
Interns	223	188	224
Residents	149	158	167
Others	529	511	510

3. *Medical services, supplies, and equipment at other facilities.*—This provides for medical services to all ships and at all shore activities under the control of other Navy bureaus including health services for civilian employees as authorized by law.

4. *Nonrecurring procurement of medical supplies and equipment.*—Funds are provided for increasing the inventory of medical supplies and equipment to meet mobilization needs until procurement can catch up with requirements and for other nonrecurring needs.

NONRECURRING PROCUREMENT OF MEDICAL SUPPLIES AND EQUIPMENT

	1951 actual	1952 estimate	1953 estimate
<i>Mobilization reserve of medical matériel:</i>			
Procurement during year	\$13,100,000	\$32,369,000	\$10,043,000
Inventory (on hand and on order) at end of year	(56,288,444)	(88,657,444)	(98,700,444)
Department of Defense blood plasma and plasma substitutes stockpile	2,649,000	6,830,000	625,000
Other nonrecurring procurement	46,056,810	14,992,000	9,198,000
Total	61,805,810	54,191,000	19,866,000

5. *Medical supply system.*—The operation of the medical supply depots is to be integrated with the Navy supply system operated by Bureau of Supplies and Accounts on July 1, 1952. This activity includes the technical medical supply functions such as ophthalmic lens laboratories and the Navy's one-third pro rata share of operating the Armed Services Medical Procurement Agency.

6. *Medical care in Non-Naval facilities.*—This covers medical care and hospitalization of Navy personnel in localities where Navy medical facilities are not available

PATIENTS IN NON-NAVAL FACILITIES

	1951 actual	1952 estimate	1953 estimate
<i>Navy patients in other hospitals:</i>			
Army and Air Force hospitals	693	696	612
Other Federal hospitals	38	318	339
Civilian hospitals	29	46	50
Total	760	1,060	1,001

7. *Care of the dead.*—Deaths in 1953 are estimated at 2,493. Provision is also made for repatriating deceased Navy and Marine Corps personnel from Korea.

8. *Research and development.*—This covers medical and dental research directly related to conditions imposed during war, under program guidance from the Research and Development Board.

9. *Industrial mobilization and procurement planning.*—The Navy has a one-third share in the industrial mobilization and procurement planning conducted by the Armed Services Medical Procurement Agency.

10. *Departmental administration.*

PROGRAM AND PERFORMANCE

Provision is made for services to the Navy shore establishments, including the Marine Corps; maintenance and operation of field activities under the Bureau of Yards and Docks; and procurement of passenger motor vehicles, other vehicles, construction and weight-handling equipment, equipment and material for mobilization reserve, and specialized engineering equipment.

1. *Engineering services.*—The Naval Shore Establishment is serviced by technical engineering field offices.

2. *Industrial mobilization.*—This provides for the Bureau of Yards and Docks' share in the industrial reserve plant program.

3. *Maintenance and operation of shore establishments.*—Provision is made for such facilities as public works centers, construction battalion centers, construction equipment depots, district public works shops, public works departments of 14 naval stations, the Civil Engineering Research and Evaluation Laboratory, and the Navy's 25,000 units of defense rental housing.

4. *Special procurement.*—This includes passenger-carrying vehicles for the Navy (exclusive of the Marine Corps), material and equipment for advance bases, and specialized engineering equipment.

5. *Construction battalion support.*—Operating support is given to construction battalion units.

6. *Research and development.*—Work is carried on in construction and utility equipment and material for

amphibious operations, determining operating requirements under different climatic and terrain conditions and developing special defense construction.

7. *Departmental administration.*

FACILITIES

Facilities, Navy—

For expenses necessary for acquisition, construction, and installation of production facilities and equipment, and test facilities and equipment (other than those for research and development), including the land necessary therefor, without regard to section 3734, Revised Statutes, as amended, and such land, and interests therein, may be acquired and construction prosecuted thereon prior to the approval of title by the Attorney General as required by section 355, Revised Statutes, as amended, such amounts as may be determined by the Secretary of the Navy, and approved by the Secretary of Defense and the Bureau of the Budget, and said amounts shall be derived by transfer from any appropriations available to the Department of the Navy, during the fiscal year [1952] 1953 for procurement of equipment for installation or use in private plants: *Provided*, That the total amount so transferred shall not exceed \$100,000,000. (*Department of Defense Appropriation Act, 1952.*)

Appropriated 1952, \$0	Estimate 1953, \$0

RESEARCH

Research, Navy—

For conduct and encouragement of research and development, not otherwise provided for; dissemination of scientific information; administration of patents, trade-marks, and copyrights; maintenance and operation of research and development facilities; development, installation, and maintenance of special devices (including specialized housing therefor); procurement of supplies, services, and equipment; departmental salaries; and other expenses necessary in carrying out the Act of August 1, 1946 (5 U. S. C. 475), to remain available until expended, **[\$69,698,000]** \$75,700,000. (*Department of Defense Appropriation Act, 1952.*)

Appropriated 1952, \$69,698,000 Estimate 1953, ^a \$75,700,000
Appropriated (adjusted) 1952, \$69,998,000

* Includes \$1,275,000 for activities previously carried under appropriations as follows:

"Ordnance and facilities, Navy"-----	\$360, 000
"Ships and facilities, Navy"-----	915, 000

The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

1. *Research and development.*—To discover new scientific knowledge for military uses, research and development is carried on in Navy laboratories and by contract in universities, private research organizations, and industrial plants.

2. *Maintenance and operation of research facilities.*—This covers maintenance and operation costs in support of research and development carried on at the Naval Research Laboratory, the Special Devices Center, and the Underwater Sound Reference Laboratory. The operation of six branch offices for field administration of research performed under contract is also included.

3. *Installation and maintenance of special devices.*—Equipment which simulates operating problems and actual war conditions is utilized for large-scale training to save time, material, and expense. Increased naval training activity is reflected in increased delivery of new training equipment in 1952 and 1953.

4. *Patents.*—Work is performed in the field to protect the interests of the Government in connection with new patent disclosures arising from research, development, and industrial activities of the Naval Establishment.

5. *Departmental administration.*

PROGRAM AND PERFORMANCE

Provision is made for maintenance and operation of installations and facilities performing service-wide supply and finance functions, including supply depots and centers, clothing depots, market and purchasing offices, supply-demand control points, fleet fueling facilities, overseas air cargo terminals, regional accounting and disbursing offices, the material catalog office, the cost-inspection service, central freight control offices, and other service-wide supply and finance facilities. Requirements are dependent upon the size of the Navy,

the operational plans for the budget year, and long-range plans for material availability.

1. *Supply distribution system.*—This provides on a service-wide basis for receipt, custody, warehousing, and issue of logistic materials and equipment in support of the fleet and the shore establishment.

2. *Material control.*—This is for the operation of supply-demand control offices to assure availability of materials with minimum essential inventory.

3. *Transportation of things.*—This covers first-destination transportation of stock fund material and all intra-Navy inland commercial transportation, except Marine Corps transportation, together with Navy ocean freight transportation requirements.

4. *Finance.*—Service-wide accounting and disbursing services are provided.

5. *Research and development.*—This relates to improvements in subsistence and clothing items as well as handling of materials.

6. *Cataloging.*—Descriptions of items are developed to determine interchangeability, to consolidate purchases, and to meet the Navy's responsibilities under the Federal catalog program.

7. *Industrial mobilization.*—Studies are conducted on availability of material and production facilities under the material control system.

8. *Departmental administration.*

PROGRAM AND PERFORMANCE

1. *Administrative headquarters for naval districts, bases, and stations.*—Provision is made for the 15 commandants of naval districts and the Potomac River Naval Command; 11 naval base headquarters, and other similar shore commands, and comparable activities at 15 naval stations. Field offices of the Board of Inspection and Survey are also included.

2. *Joint international projects.*—Projects in common defense are carried out by allied powers of the North Atlantic area. Schooling of dependents of Navy personnel in certain overseas areas is also included.

3. *Service-wide communications.*—These consist of the naval communication system and station communication departments; joint communication activities, communication publications and cryptographic aids; and other inter-activity communications costs.

4. *Hydrographic Office.*—This provides for production, distribution, and maintenance of hydrographic and oceanographic charts and publications essential for safe navigation and for the preparation of charts and data for special tactical and strategic projects.

5. *Naval Observatory.*—Astronomical data are supplied for safe navigation. Accurate time is determined, and time-signal transmissions are controlled. Continuous astronomical observations and research for the general advancement of navigation and astronomy are conducted.

6. *Inter-American affairs.*—Hemispheric defense objectives are fostered by standardization of equipment, training, and operation of other navies in accordance with Navy standards.

7. *Departmental administration.*—Provision is made for the Chief of Naval Operations, who commands the operating forces and is responsible for their training and readiness; the Judge Advocate General, as the legal adviser to the Secretary and the Naval Establishment; and the Office of the Secretary, which provides general supervision over the Naval Establishment.

8. *Printing services and equipment, Executive Office of the Secretary.*—These cover procurement of standard forms used in the administration of Navy-wide programs; printing and issuance of directives for Navy-wide distribution; and procurement of printing equipment for replacement and modernization in the Defense Printing Service (Washington) and the Navy Printing Service (field), both of which are administered under the Navy Industrial Fund.

9. *Records administration.*—Support is provided for five naval records management centers which receive, process, service, and eventually dispose of noncurrent records under the Navy-wide records management program and 11 district records management offices.

10. *Area wage and classification offices.*—These 11 offices classify all field positions subject to the Classification Act of 1949 and furnish technical guidance and assistance in the solution of wage problems.

11. *Public information.*—This supports the cost prorated to the Navy of the Office of Public Information of the Department of Defense, and the Fleet Home Town News Center, which provides personalized news stories written for the home-town newspapers of naval personnel.

12. *Contingencies of the Navy.*—This provides for expenditures, upon approval of the Secretary, for emergencies and extraordinary requirements.

4. Naval oil shale reserves.....			
Total obligations.....	4,043,961	11,948,000	13,250,000

PROGRAM AND PERFORMANCE

Four petroleum and three oil shale reserves have been set aside for the Navy by Executive order to provide a supplemental emergency source of oil for national defense. Exploration, development, and maintenance work is being conducted.

Naval Petroleum Reserve No. 1, Elk Hills, Calif., is being developed at an accelerated rate to increase the potential capacity of the reserve and to place the reserve as nearly as is practicable in a state of instant readiness. Naval Petroleum Reserve No. 2, Buena Vista Hills, Calif., is entirely under lease. Naval Petroleum Reserve No. 3, Teapot Dome, Wyo., has been shut in since 1928, but the success of several wildcat wells drilled south of the reserve increases the potentiality of this reserve and has supported a decision to test the deeper zones. One exploratory well is being drilled during fiscal year 1952.

Obligations incurred.....	8,915,124	3,357,594	8,700,000

PROGRAM AND PERFORMANCE

Exploration of Naval Petroleum Reserve No. 4 (Alaska) was begun by Navy construction battalions in 1944 and was placed on a civilian contract basis in 1946 following demobilization. Intensive geological and geophysical work and drilling have located oil and natural gas in various parts of the reserve and give encouragement to the possibility that further exploration may discover oil and gas in larger quantities.

[PUBLIC WORKS]**Public Works, Navy—**

For an additional amount for "Public works", to remain available until expended, \$51,657,000, of which \$1,243,000 shall be used for construction, installation, or repair of sewage facilities at the naval base, Newport, Rhode Island, and the remainder shall be available for liquidation of obligations incurred pursuant to authority heretofore granted under this head to enter into contracts.

[Public Works: For construction, installation, and equipment of temporary or permanent public works, naval installations, and facilities for the Navy, as authorized by the Act of June 16, 1948 (62 Stat. 459), the Act of June 17, 1950 (Public Law 564, Eighty-first Congress), the Act of September 11, 1950 (Public Law 783, Eighty-first Congress), the Act of January 6, 1951 (Public Law 910, Eighty-first Congress), and the Act of September 28, 1951 (Public Law 155, Eighty-second Congress), naval repairs and improvements to the San Francisco Naval Shipyard; including not to exceed \$5,000,000 for advance planning as authorized by section 504 of said Act of September 28, 1951; \$282,000 for the acquisition of facilities as authorized by said Act of September 11, 1950; furniture for public quarters; personnel in the Bureau of Yards and

Docks and other personal services necessary for the purposes of this appropriation; and engineering and architectural services as authorized by section 3 of the Act of April 25, 1939 (34 U. S. C. 556); to remain available until expended, \$800,000,000;] (Second Supplemental Appropriation Act 1952; Department of Defense Appropriation Act, 1952.)

Appropriated 1952, \$851,657,000

DEPARTMENT OF THE AIR FORCE**AIRCRAFT AND RELATED PROCUREMENT****Aircraft and Related Procurement, Air Force—**

For construction, procurement, and modification of aircraft and equipment, armor and armament, spare parts and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 1136, Revised Statutes, as amended, for the fore-

going and other purposes, and such land, and interests therein, may be acquired and construction prosecuted thereon prior to the approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; industrial mobilization, including maintenance of reserve plants and equipment and procurement planning; and other expenses necessary for the foregoing purposes, including rents and transportation of things; to remain available until expended; **\$11,215,800,000** **\$12,685,044,000**, of which **\$625,000,000** **\$1,685,044,000** is for payment of obligations incurred under authority heretofore granted to enter into contracts for the foregoing purposes: *Provided*, That the unexpended balances of the appropriations granted under the head "Air Corps, Army," 1948, and "General expenses, U. S. Air Force," 1949, shall remain available until June 30, 1952, for the payment of obligations incurred thereunder prior to July 1, 1948, and July 1, 1949, respectively. (*Department of Defense Appropriation Act, 1952.*)

Appropriated 1952, **\$11,882,800,000**

Estimate 1953, **\$12,685,044,000**

Appropriated (adjusted) 1952, **\$11,882,396,000**

^a Includes \$667,000,000 appropriated under "Expansion of United States air power, Office of the Secretary of Defense."

^b Excludes \$16,000,000 for activities transferred in the estimates to "Major procurement other than aircraft, Air Force." The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Provision is made for (a) procurement of new aircraft and guided missiles, initial logistic spares, and supporting equipment, together with modification of in-service aircraft; (b) industrial mobilization activities; and (c) civilian personnel required for procurement and production.

1. *Aircraft and related material.*—Aircraft procurement is based on currently planned forces in relation to projected aircraft inventory, aircraft attrition, obsolescence, development of new models, and production capabilities. Aircraft in service are modernized to insure maximum military effectiveness. Procurement in 1953 is to continue the expansion of airpower initiated in fiscal years 1951 and 1952 toward a goal of 143 wings.

2. *Guided missiles.*—Guided missiles and associated equipment to be procured include both surface and air-launched types, of which some are designed for use against land targets and others against air targets. The procurement program is governed primarily by the rate at which new or improved missiles become available for operational use as a result of progress in research and development.

3. *Industrial mobilization.*—Long-range preparedness plans for the entire Air Force are designed to achieve rapid mass production of Air Force matériel in the event of war. In 1953, approximately half of the funds will be devoted to the improvement of manufacturing methods and to studies to eliminate or reduce the use of critical materials. The remaining projects include maintenance of reserve plants or tools and mobilization studies.

MILITARY FUNCTIONS—Continued**DEPARTMENT OF THE AIR FORCE—Continued****MAJOR PROCUREMENT OTHER THAN AIRCRAFT—Continued****Major Procurement, Other Than Aircraft, Air Force—Continued****PROGRAM AND PERFORMANCE**

To equip the Regular Air Force, Air Force Reserve, and the ROTC to accomplish their missions, provision is made for the procurement of all major items of equipment other than aircraft, not otherwise provided for, and initial spares and spare parts normally furnished.

1. *Weapons and ammunition.*—This consists of all types of small arms other than airborne weapons and armament and of all types of ammunition required for combat, training, and service tests.

2. *Ground-powered and marine equipment.*—This covers motor vehicles, railroad rolling stock, construction equipment, materials handling equipment, and utility-type and rescue boats.

3. *Electronics and communications equipment.*—This is ground electronic equipment, airborne radio and radar equipment for aircraft not factory-equipped, and navigational aids, equipment for the global communications system, the aircraft control and warning system (radar fence), tactical control systems, and communications security systems.

4. *Training equipment.*—This consists of major non-expendable training aids utilized for (a) training maintenance personnel and air crews in the operational features of new aircraft and maintenance of aircraft and related equipment; and (b) in refresher training of personnel assigned to squadrons. Equipment includes mobile training units, counterpart training devices, radio and radar trainers, and aerial targets and related equipment.

5. *Other major equipment.*—This covers major complete items of meteorological, radiological, photographic, printing and reproduction, test, flying field, shop, and utilities equipment required for base, depot, and airfield support as well as tactical units.

ACQUISITION AND CONSTRUCTION OF REAL PROPERTY**Acquisition and Construction of Real Property, Air Force—**

For [the continuation of the construction of four projects authorized by Public Law 910, Eighty-first Congress, approved January 6, 1951, and Public Law 43, Eighty-second Congress, approved May 31, 1951, to remain available until expended, \$187,300,000, of which \$85,000,000 is] an additional amount for "Acquisition and construction of real property," for liquidation of obligations incurred pursuant to authority heretofore granted under this heading to enter into contracts, \$45,334,770, to remain available until expended.

Acquisition and construction of real property: For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Air Force, as authorized by the Act of March 30, 1949 (63 Stat. 17), the Act of October 27, 1949 (63 Stat. 936), as amended, the Act of May 11, 1949 (63 Stat. 66), the Act of June 17, 1950 (Public Law 564, Eighty-first Congress), the Act of January 6, 1951 (Public Law 910, Eighty-first Congress), and the Act of September 28, 1951 (Public Law 155, Eighty-second Congress), without regard to sections 1136 and 3734, Revised Statutes, as amended, and the land, and interests therein, may be acquired and construction may be prosecuted thereon prior to the approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; not to exceed \$5,000,000 for advance planning as authorized by section 504 of said Act of September 28, 1951; and hire of passenger motor vehicles; to remain available until expended, \$2,071,200,000: *Provided*, That no part of these funds shall be expended for actual construction of facilities or structures at Grandview Air Terminal, Missouri, until the city of Kansas City, Missouri, has conveyed to the United States Government the fee simple title to all lands required for the base or has given the United States Government at least a twenty-five-year lease to such land on a nominal rental basis: *Provided further*, That not to exceed \$74,745,000 of this appropriation shall be available for the foregoing purposes at McGuire Air Force Base, Wrightstown, New Jersey, for airfield pavements, fuel storage and dispensing facilities, hazard removal, communications facilities, operational facilities, aircraft maintenance facilities, training facilities, troop facilities, administrative and supporting facilities, utilities, land acquisition, medical facilities, storage facilities, and shops: *Provided further*, That not to exceed \$1,746,000 of this appropriation shall be available for the foregoing purposes at Sioux City Airport, Sioux City, Iowa, for airfield pavements, fuel storage and dispensing facilities, communications and navigational aids facilities, operational facilities, family housing, administrative and supporting facilities, utilities, and medical facilities: *Provided further*, That not to exceed \$32,981,000 of this appropriation shall be available for the foregoing purposes at Travis Air Force Base, Fairfield, California, for airfield pavements, fuel storage and dispensing facilities, communication and airfield lighting facilities, operational facilities, aircraft maintenance facilities, training facilities, troop facilities, administrative and supporting facilities, utilities, land acquisition, medical facilities, storage facilities, and shops. (The supplemental Appropriation Act, 1952; Department of Defense Appropriation Act, 1952.)

MAINTENANCE AND OPERATION

Maintenance and Operations, Air Force—

For expenses necessary for the maintenance, operation, and administration of the activities of the Air Force, including the [United States] Air Force Reserve and the Air Reserve Officers' Training Corps; maintenance, operation, and modification of aircraft; transportation of things; rents at the seat of government and elsewhere, and in administering the provisions of 43 U. S. C. 315q payments of rents may be made in advance; repair of facilities; field printing plants; procurement of ambulances; hire of passenger motor vehicles; training and instruction of military and civilian personnel of the Air Force, including tuition and related expenses; pay, allowances and travel expenses of contract surgeons; utility services for buildings erected at private cost as authorized by law (10 U. S. C. 1346), and buildings on military reservations authorized by Air Force regulations to be used for welfare and recreational purposes; rental of land or purchase of options to rent land without reference to section 3648, Revised Statutes, as amended, use or repair of private property, and other necessary expenses of combat maneuvers; organizational clothing and equipage; payment of exchange fees and exchange losses incurred by Air Force disbursing officers or their agents; losses in the accounts of Air Forces disbursing officers as authorized by law (31 U. S. C. 95a; 50 U. S. C. 1705-1707; Act of July 26, 1947, Public Law 248); burial of the dead as authorized by law (10 U. S. C. 916-916d; 5 U. S. C. 103a), including remains of personnel of the Air Force of the United States who die while on active duty, travel allowances of attendants accompanying remains, and acquisition by lease or otherwise of temporary burial sites; conduct of schoolrooms, service clubs, chapels, and other instructional, entertainment, and welfare expenses for enlisted men, not otherwise provided for; expenses for inter-American cooperation as authorized for the Navy by the Act of August 2, 1946 (5 U. S. C. 421f), for Latin-American cooperation; payments of deficiency judgments and interests thereon arising out of condemnation proceedings heretofore instituted; and special services by contract

or otherwise; **[\$3,208,442,000]** \$4,400,000,000. (Department of Defense Appropriation Act, 1952.)

Appropriated 1952, **\$3,208,442,000** Estimate 1953, **\$4,400,000,000**
Appropriated (adjusted) 1952, **\$3,208,392,350**

* Includes \$3,201,985 for activities previously carried under "Research and development, Air Force," and excludes \$1,200,000 for activities transferred in the estimates to "Major procurement other than aircraft, Air Force." The amounts obligated in 1951 and 1952 are shown in the schedule as comparative transfers.

MILITARY FUNCTIONS—Continued
DEPARTMENT OF THE AIR FORCE—Continued

MAINTENANCE AND OPERATION—Continued

Maintenance and Operations, Air Force—Continued

PROGRAM AND PERFORMANCE

1. *Operation of aircraft.*—Provision is made for (a) central procurement of aircraft materials, spares and spare parts, aviation fuel and oil, and other propellants (including stock levels required to support the Air National Guard flying-hour program); and (b) for modifications to aircraft necessary to insure proper functioning and maximum safety in flight for the Regular Air Force and Air Force Reserve. The estimate contemplates a build-up of the Air Force from 95 wings approved for 1952 toward an authorized 143 wings.

2. *Organization, base and maintenance equipment and supplies.*—To support the authorized personnel, aircraft, installations, and wings, provision is made for central procurement of minor items of equipment and consumption type supplies, including spare parts for all Air Force ground equipment. Support of the training program of the Air Force Reserve and Air ROTC and of the stock levels required for the Air National Guard is included.

3. *Logistical support.*—Provision is made for civilian personnel, contractual services, local purchase of supplies, and necessary additional support of (a) depot maintenance of the active aircraft inventory, special-purpose vehicles, and equipment; (b) operation of the Air Force depot supply system; (c) commercial transportation incident to distribution of matériel through the depot system, and ocean transportation of personnel and matériel by Military Sea Transport Service; (d) operation of the Aeronautical Chart and Information Service; (e) commercial and Government contract printing; and (f) maintenance and operation of 39 logistical facilities on a world-wide basis. Similar support is included for Air ROTC and Army air operations.

4. *Training support.*—Provision is made for training of the Regular Air Force, Air Force Reserve, and Air ROTC. Training of regular Air Force personnel consists of (a) indoctrination for those entering without prior military service; (b) technical training in specialized fields; (c) flying training; and (d) training designed to qualify personnel for positions of greater responsibility. The estimate provides for a maximum indoctrination load of 65,000 compared with 53,000 during 1952. Technical training loads will increase beyond the average of 68,400 during 1952. Pilot training in 1953 will continue at the annual rate of 10,000 to be attained late in 1952. A total of 46 major active installations will be required by the end of 1953 compared with 45 at the end of 1952. Air Force Reservists will receive training at 30 Reserve flying training centers and 225 ground training locations. The Air ROTC activities will be conducted at 187 educational institutions and 15 summer camps.

5. *Operational support.*—Provision is made for (a) the maintenance and operation of the installations and facilities required for operational missions assigned to Air Force commands; (b) the operation of aircraft control and warning systems and tactical control systems on a world-wide basis; and (c) the supporting operational requirements incident to air combat maneuvers, organizational movements for unit rotation or training, air weather service, airways and air communications service, air rescue service, and other supporting services. At the end of 1953, there will be 340 active operational support installations, an increase of 48 installations over the pro-

gramed position at the end of 1952, resulting from the strategic deployment of combat units.

6. *Research and test support.*—Provision is made for the maintenance and operation of installations and facilities supporting the Air Force research and test mission, including electronic laboratories, launching of guided missiles, armament testing, aircraft development, and operational suitability testing of materials and equipment. In addition to the support of eight active installations which have research or test as a primary mission in 1953, operational support of the technical and scientific phases of research and development conducted at other Air Force installations has been included.

7. *Medical support.*—This covers (a) medical support of the Air Force, Organized Reserves, and Reserve Officers' Training Corps; (b) maintenance and operation of medical treatment facilities in the United States and overseas; and (c) medical care and hospitalization of Air Force personnel in localities where Air Force medical facilities are not available. These activities are shown in the following table.

MEDICAL FACILITIES AND PATIENTS

	1951 actual	1952 estimate	1953 estimate
Facilities world-wide:			
Hospitals.....	86	153	161
Infirmaries.....	29	69	92
Dispensaries.....	79	135	164
Total.....	194	357	417
Patients in Air Force hospitals and infirmaries:			
Air Force.....	4,839	13,059	12,986
Army and Navy.....	604	275	878
Dependents.....	938	2,241	1,907
Others.....	34	250	296
Total average daily occupied beds.....	6,415	15,825	16,067
Air Force patients in other hospitals:			
Army hospitals.....	2,593	1,918	1,565
Other hospitals.....	278	510	475
Total average daily occupied beds.....	2,871	2,428	2,040

Funds are provided for increasing the inventory of medical supplies and equipment to meet mobilization needs until procurement can catch up with requirements and for other nonrecurring needs.

NONRECURRING PROCUREMENT OF MEDICAL SUPPLIES AND EQUIPMENT

	1951 actual	1952 estimate	1953 estimate
Mobilization reserve and readiness reserve of medical matériel:			
Procurement during year.....		\$45,601,000	\$3,304,000
Inventory (on hand and on order) at end of year.....		(45,601,000)	(48,905,000)
Department of Defense blood plasma and plasma substitutes stockpile.....	\$2,836,500	6,830,000	625,000
Other nonrecurring procurement.....	28,333,000	12,459,000	4,886,000
Total.....	31,169,500	64,890,000	8,815,000

Travel and other expenses of military personnel attending Army and Navy schools and civilian institutions for training in medical specialties are included as well as the costs of training personnel in Air Force medical services schools and hospitals.

MEDICAL SERVICE PERSONNEL IN TRAINING

	1951 actual	1952 estimate	1953 estimate
In civilian institutions:			
Standard courses.....	73	80	84
Short courses.....	1,173	1,400	1,205
In Air Force medical service schools:			
Officers.....	942	2,980	6,365
Enlisted personnel.....	513	2,235	2,336
In Army and Navy medical service schools:			
Officers.....	303	409	648
Enlisted.....	5,775	5,556	5,821

8. *Service-wide support.*—This includes administration and management of the Air Force at central and major command headquarters, including the leasing of Air Force-wide command and operational communications networks, services, and systems; maintenance and operation of Air mission and air attaché offices; and Air Force participation in joint international projects.

PROGRAM AND PERFORMANCE

Provision is made for pay and allowances of all military personnel on extended active duty in the Air Force; permanent change of station movements of military personnel, dependents, and organizations; subsistence supplies for issue as rations to enlisted personnel; individual civilian clothing for enlisted personnel on duty in specific assignments which requires the wearing of civilian clothing and for personnel discharged other than honorably; and other miscellaneous military personnel requirements, such as welfare and morale supplies, chaplains' supplies and equipment, expenses of courts, commissions and boards, expenses incident to the apprehension of deserters, and interest on soldiers' deposits.

The actual Air Force strength on July 1, 1951, was 788,381. It is planned to increase this strength to 973,350 by June 30, 1952, and to 1,061,000 by June 30, 1953.

The average strength in 1951 and the planned strengths for 1952 and 1953 are shown in the following table:

PROGRAM AND PERFORMANCE

In close coordination with the other military departments provision is made for furnishing the Air Force with superior aircraft, weapons, and other equipment with a view (a) to overcoming qualitative deficiencies; (b) to

accelerating the development of those weapons, weapons systems, or components which will substantially strengthen the Air Force; and (c) to increasing fundamental knowledge. The estimate covers the direct costs of research and development, excluding pay and other related costs of military personnel and ordinary maintenance of research facilities. Most Air Force research and development work is carried out by contractual arrangements, mainly with industrial institutions; a smaller portion is carried out by use of other governmental facilities or with the Air Force's own facilities.

1. *Aircraft*.—This applies to the study, development, and testing of (a) aircraft, including fighters, bombers, interceptors, transports, and helicopters; and (b) related equipment.

2. *Guided missiles*.—This covers the study, development, and testing of guided missiles and related equipment designed for the various basic missions of the Air Force.

3. *Propulsion*.—This provides for research, development, and testing in the field of aircraft power plants, propellers, helicopter rotors, and associated equipment.

4. *Electronics*.—Provision is made for the research and development of electronic equipment, including airborne and ground radio and radar equipment.

5. *Armament*.—This is devoted to strategic and tactical bomb systems, fire-control systems, ordnance, and related equipment.

6. *Equipment*.—This covers all necessary ground or airborne equipment not covered by the preceding activities.

7. *Sciences*.—This provides for basic and applied research and investigations in the physical and other sciences.

8. *Special projects*.—These are projects of a special nature as directed by Headquarters, United States Air Force.

9. *Laboratory operations*.—This covers civilian personnel and technical supplies and equipment not identifiable with other activities.

PROGRAM AND PERFORMANCE

Training and instruction of Air Force Reserve personnel and students enrolled in the Air Reserve Officers' Training Corps are supported by providing pay, travel allowances, subsistence, and clothing.

MILITARY FUNCTIONS—Continued**DEPARTMENT OF THE AIR FORCE—Continued****RESERVE PERSONNEL REQUIREMENTS—Continued****Reserve Personnel Requirements, Air Force—Continued**

The United States Air Force Reserve program is designed to provide trained personnel to augment Regular Air Force units and to establish Reserve units. The program is based upon an average of 18,112 officers and 20,212 airmen; it is anticipated that 23,991 officers and 28,766 airmen will be assigned to the Air Force Reserve by the end of fiscal year 1953.

The Air Reserve Officers' Training Corps program, as the largest source of junior officers for the Air Force, will be conducted during 1953 at 187 institutions. Total enrollment for fiscal year 1953 is programed at 135,900, of whom 106,800 will be basic students and 29,100 advanced, with a net enrollment of 60,000 first-year basic students. It is further contemplated that 22,500 students will attend summer training camps. The camps are designed to provide 42 days of practical training, with intensive applied training in specialized fields. It is estimated that the program will produce 27,750 Reserve officers annually by the end of fiscal year 1955. At institutions all students receive uniforms in kind or commutation; advanced-course students will receive commutation in lieu of subsistence at 90 cents per day. For summer camp, provision is made for travel, subsistence and clothing, with pay at the rate of \$2.50 per day.

PROGRAM AND PERFORMANCE

Provision is made for facilities, supplies, equipment, pay, and allowances essential for the training, operation, and maintenance of the Air National Guard as a Reserve component of the Air Force. During 1952 the Air National Guard was composed of 5 wings and 18 squadrons, with supporting elements. Air National Guard units completing 21 months of active military service will be returning to their respective States in 1953. Advance cadres will be established 6 months prior to the return of the units in order to permit immediate resumption of training and operations. A total of 376 units will be supported by these estimates at the end of the fiscal year.

1. *Major procurement*.—Provision is made for the re-equipping of Air National Guard units.

2. *Acquisition and construction of real property*.—This covers the construction of fuel storage facilities, aircraft parking aprons, flying field facilities, permanent training sites, and runway extensions due to conversion of the aircraft in the Air National Guard program from conventional to jet-type aircraft.

3. *Maintenance and operation*.—This applies to 113 Air National Guard installations, together with unit equipment. Included are the support of the flying-hour program, transportation costs of supplies and equipment, hospitalization, care of the dead, and commercial communications services. Training for Air National Guard personnel will be provided in service and technical schools, pilot training schools, and supplementary exercises for 374 officers and 793 airmen.

4. *Military personnel requirements*.—These cover pay and allowances for an average assigned strength of 16,645, composed of 1,705 officers and 14,940 airmen for 48

inactive-duty training assemblies and for 15 days' active-duty training for 3,760, composed of 487 officers and 3,273 airmen of selected units. Funds for subsistence and uniforms are included.

Expenditures are out of current authorizations (investment in the revolving fund).....	175,000,000		400,000,000

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act, as amended (5 U. S. C. 172d) to finance procurement and supply of materials and equipment. At present, the fund includes only clothing, equipage, and administrative supplies and equipment. Initial working capital was obtained from transfers of unexpended balances of expired appropriations, as requested by the Secretary of Defense and approved by the President, and from transfers of material in existing inventories.

Income is derived from reimbursements from current appropriations for materials furnished for military use and from cash sales to authorized purchasers.

The fund consists of two divisions:

1. *Clothing and Equipage Division*.—Operations are presently confined to stocks in the depot system in the United States and exclude stocks in posts, camps, and stations. In addition to procurement for annual operational requirements, stocks of clothing and equipage are procured and stored as mobilization reserves. The increases in procurement of \$415 million in 1952 over 1951 and \$392 million in 1953 over 1952 are primarily for the purpose of increasing reserve stocks.

2. *Defense Supply Service Division*.—Administrative supplies and equipment are purchased in support of the Army and Air Force offices in the Washington area.

FINANCIAL REVIEW

Reserve stocks are expected to increase from \$375,313,732 in 1952 to \$1,656,098,732 by the end of 1953. This increase will result from transfers to the fund of materials procured by other appropriations of approximately \$930 millions and deliveries to the fund of approximately \$350 millions of purchases. An appropriation of \$400 millions is requested for 1953 to provide funds primarily for additional reserve stocks.

BUSINESS-TYPE STATEMENTS**PROGRAM AND PERFORMANCE**

This fund was created under the National Security Act, as amended (5 U. S. C. 172d), to finance industrial and commercial-type activities on a reimbursable basis.

Defense printing service, Ogden.—This activity provides printing services to the Department of Defense and other authorized agencies of the Government which are located in the Sixth Army area and in the States of Colorado and Wyoming.

Manufacturing division, Philadelphia Quartermaster Depot.—This activity provides materials and services, including design and manufacture of various types of articles of military clothing, sponging, shrinking, decating of cloth; serves in an advisory capacity for methods of manufacturing in preparation of specifications to be used by commercial contractors; and performs other authorized manufacturing, modification, alteration, and repairs of clothing for the Department of the Army.

St. Louis Printing Plant.—This activity provides printing and reproduction services for Department of Defense installations located in the St. Louis area.

Rocky Mountain Arsenal.—This activity provides for the manufacturing, renovation, rebuild, demilitarization, and storage of chemical, smoke, and incendiary munitions.

Picatinny Arsenal.—This activity supplies the Department of Defense and other authorized agencies with ordnance matériel manufactured completely or partially at the arsenal, and other authorized services.

Army Management Fund—**PROGRAM AND PERFORMANCE**

This fund was created under the National Security Act, as amended (5 U. S. C. 172e), to facilitate the financing of operations which are supported by two or more appropriations. Operations presently financed in this manner are the defense telephone service and the ordnance consolidated procurement account.

A. Statement of sources and application of funds

Defense Production Guarantees, Army—**PROGRAM AND PERFORMANCE**

Guarantees are given on loans made by private sources to finance construction or operation of defense production facilities. Loans may be purchased by the Government if necessary to keep financing in effect. Revenues from guarantee fees and interest on purchased loans are used to pay administrative expenses. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses (Defense Production Act of 1950, sec. 301).

Replacing Engineer Supplies—

PROGRAM AND PERFORMANCE

Proceeds from the sale of serviceable engineer items are available for the replacement of such items. Unobligated balances of proceeds revert to the Treasury at the end of the year following that in which the proceeds were received (10 U. S. C. 1283, 1284).

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This is a working capital (revolving) fund which finances the procurement and manufacture of stocks of general stores material, spare parts of vehicular equipment, special clothing, ships' stores and commissary store stock, subsistence, fuels, lubricants, petroleum drums, and clothing and small stores. Reimbursements to the fund are received from using appropriations as stocks are withdrawn for use; other receipts to the fund are derived from sale of stocks to authorized users (5 U. S. C. 172d).

As the operational level of the Naval Establishment increases, the stocks of supplies must be augmented to support the greater material flow. Likewise, as logistic planning requires a greater degree of material readiness, it is necessary to stockpile essential supplies which cannot be immediately procured in the event of an emergency.

Defense Production Guarantees, Navy—**PROGRAM AND PERFORMANCE**

Guarantees are given on loans made by private sources to finance construction or operation of defense production facilities. Loans may be purchased by the Government if necessary to keep financing in effect. Revenues from guarantee fees and interest on purchased loans are used to pay administrative expenses. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses (Defense Production Act of 1950, sec. 301).

Naval Working Fund—

PROGRAM AND PERFORMANCE

Advances received from other Government agencies, foreign governments, and private individuals for work or services to be rendered by the Navy, are used to cover the costs. In addition, receipts from the sale of surplus stores of the Navy are used to cover selling expenses and net proceeds of such sales are transferred to the Treasury (31 U. S. C. 643).

BUSINESS-TYPE STATEMENTS**PROGRAM AND PERFORMANCE**

This fund was created under the National Security Act, as amended (5 U. S. C. 172d), to finance industrial- and commercial-type activities on a reimbursable basis.

1. *Naval ordnance plant.*—These facilities are utilized (a) to design, develop, manufacture, assemble, inspect, and test machine guns and mounts, medium-caliber gun mounts, power drives, replacement parts, spare parts, tools, and accessories; (b) to overhaul, maintain, and store ordnance materiel; (c) to inspect, catalog, preserve, and maintain a war reserve of production facilities for 40-mm. mounts and mechanisms; and (d) to maintain a gage laboratory.

2. *Military sea transportation service.*—Provision is made for ocean transportation of personnel and material for all branches of the Military Establishment on Government-owned vessels operated by military and civilian crews and the charter of vessels and space from commercial steamship companies.

3. *Defense printing service.*—Printing and related services are furnished to the military departments and the Office of the Secretary of Defense in Washington, D. C.

*Navy Management Fund—***PROGRAM AND PERFORMANCE**

This fund was created under the National Security Act, as amended (5 U. S. C. 172e), to facilitate the financing of operations supported by two or more appropriations. The corpus of the fund consists of \$1,000,000 transferred from the naval procurement fund. Principal operations financed in this manner are the consolidated district printing plants; material inspection service; departmental telephone service; cash awards for employees' suggestions; the Office of Public Information, Office of Secretary of Defense; the Electronics Production Resources Agency, which coordinates the production and allocation of electronics equipment; and administrative support to the North Atlantic Treaty Organization.

DEPARTMENT OF THE AIR FORCE

Air Force Industrial Fund—

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act, as amended (5 U. S. C. 172d), to finance industrial- or commercial-type activities on a reimbursable basis. It currently finances a printing service in the field that serves all Department of Defense activities in its vicinity. An appropriation of \$1,000,000 has been received to provide working capital. Additional working capital may be obtained by transfer of unexpended balances of expired appropriations as requested by the Secretary of Defense and approved by the President.

ANALYSIS OF EXPENDITURES

	1951 actual	1952 estimate	1953 estimate
Obligations incurred during the year.....	\$50,000,000	\$85,000,000	
Expenditures are out of current authorizations (investment in the revolving fund).....	50,000,000	85,000,000	

BUSINESS-TYPE STATEMENTS**PROGRAM AND PERFORMANCE**

This fund finances procurement of all items of individual clothing and equipment that come under the joint monetary clothing allowance system. Proceeds from sales are credited to the fund. No operating expenses are paid from the fund as these are borne by applicable Air Force appropriations. In fiscal year 1952 and fiscal year 1953, obligations for procurement will be substantially less than anticipated sales in order to reduce inventories. Obliga-

tions in subsequent years will continue to be less than anticipated sales until a balanced inventory position is reached (5 U. S. C. 172d).

Defense Production Guarantees, Air Force—

PROGRAM AND PERFORMANCE

Guaranties are given on loans made by private sources to finance construction or operation of defense production facilities. Loans may be purchased by the Government if necessary to keep financing in effect. Revenues from guaranty fees and interest on purchased loans are used to pay administrative expenses. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses. (Defense Production Act of 1950, sec. 301).

GENERAL PROVISIONS

Sec. 601. During the current fiscal year, the Secretary of Defense and the Secretaries of the Air Force, Army, and Navy, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of \$50 per day, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

Sec. 602. Section 3648, Revised Statutes, shall not apply, in the case of payments made from appropriations contained in this Act, (1) to payments made in compliance with the laws of foreign countries or their ministerial regulations, (2) to payments for rent in such countries for such periods as may be necessary to accord with local custom, or (3) to payments made for tuition.

Sec. 603. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

Sec. 604. [(a)] No part of any appropriation contained in this Act for "Pay and allowances" of military personnel shall be used for any other purpose.

[(b)] No part of any appropriation contained in this Act for "Pay and allowances" of military personnel shall be expended for the pay or allowances, accruing after November 30, 1951, of any enlisted member of the inactive or volunteer reserve who served on active duty for a period of twelve months or more in any branch of the Armed Forces during the period beginning December 7, 1941, and ending September 2, 1945, if such member shall have served on active duty for a period of sixteen months or more after June 26, 1950, unless such member shall have voluntarily consented to remain on active duty.]

Sec. 605. The appropriations in this Act otherwise available for travel or transportation which are current on date of relief from duty station of personnel traveling under orders may be charged with all expenses in connection with such travel including transportation of dependents and household goods, regardless of time of arrival at destination of such personnel.

Sec. 606. Appropriations contained in this Act available for travel shall be available for all expenses incident to attendance at meetings of technical, scientific, professional, or other similar organizations.

Sec. 607. No part of any money appropriated in this Act [or included under any contract authority granted in this Act] shall be expended for the payment of any commission on any land purchase contract in excess of 2 per centum of the purchase price.

Sec. 608. Such military and naval personnel as may be detailed for duty with agencies not a part of the Department of Defense on a

reimbursement basis may be employed in addition to the numbers otherwise authorized and appropriated for.

Sec. 609. No collection or reclamation shall be made by the United States on account of any money paid to assignees, transferees, or allottees, or to others for them, under assignments, transfers, or allotments of pay and allowances made under authority of law where liability might exist with respect to such assignments, transfers, or allotments or the use of such moneys, because of the death of assignors, transferors, or allottees.

Sec. 610. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; examination of estimates of appropriations and Department of Defense activities in the field and the use of such appropriations for such purpose shall be subject only to regulation by the standing committees concerned; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with (1) instruction and training, including tuition, specifically approved by the Secretary of the Department concerned and not otherwise provided for, of civilian employees, and (2) communication and other services and supplies as may be necessary to carry out the purposes of this Act: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive compensation at a rate below the minimum rate of pay for positions allocated to grade GS-5 under the Classification Act of 1949, as amended.

Sec. 611. The appropriations contained in this Act for the Air Force, Navy, and for the Army, which are available for the procurement or manufacture of supplies, materials, and equipment of special or technical design may be used for the development and procurement of gages, dies, jigs, and other special aids and appliances, production studies, factory plans, and other production data, including specifications and detailed drawings, and for the purchase of designs, processes and manufacturing data, copyrights and letters patent, applications therefor, and licenses thereunder pertaining to such supplies, equipment, and materials for which the appropriations are made.

Sec. 612. Any appropriation available to the Air Force, Army, or the Navy may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Air Force,

Army, or Navy custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 613. During the current fiscal year, without deposit to the credit of the Treasurer of the United States and withdrawal on money requisitions, receipts of public moneys from sales or other sources by officers of the Department of Defense on disbursing duty and charged in their official accounts, except receipts to be credited to river and harbor and flood-control appropriations, may be used by them as required for current expenditures, all necessary bookkeeping adjustments of appropriations, funds, and accounts to be made in the settlement of their disbursing accounts.

SEC. 614. The Secretary of the Army, the Secretary of the Air Force, and the Secretary of the Navy are authorized to expend out of the Appropriations in this Act available for construction or maintenance such amounts as may be required for minor construction (except family quarters), extensions to existing structures, and improvements, at facilities of the Department concerned, but the cost of any project authorized under this section which is not otherwise authorized shall not exceed \$50,000, except that the limitation on the cost of any such project which is determined by the Secretary of Defense to be urgently required in the interests of national defense, shall not exceed \$200,000: *Provided*, That the cost limitations of this section shall not apply to amounts authorized to be expended for emergency expenses on the approval of the Secretary concerned.

SEC. 615. During the current fiscal year, appropriations contained in this Act (except those for liquidation of prior contract authorizations) shall not be obligated for construction of family quarters for personnel at a cost per family unit in excess of \$14,040 on housing units for generals; \$12,040 on housing units for majors, lieutenant colonels and colonels, or equivalent; \$11,040 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or \$10,040 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed \$25,850 and in no event shall the individual cost exceed \$35,000. The last proviso of section 3 of the Act of June 12, 1948 (Public Law 626), and the last proviso in the next to last paragraph of section 3 of the Act of June 16, 1948 (Public Law 653), shall not be applicable to appropriations made herein or heretofore to carry out such Acts, in cases where the Secretary of the Department concerned determines that the erection of prefabricated family quarters will be more advantageous to the United States than multiple type dwellings of conventional construction.

SEC. 616. Appropriations for the Air Force and the Army for the current fiscal year shall be available [for carrying out the purposes of Executive Order 9112 of March 26, 1942;] for expenses in connection with the administration of occupied areas; for distribution of trophies and devices as authorized by law; for actual and necessary expenses or per diem in lieu thereof authorized by law; and, except as otherwise authorized by the Act of September 30, 1950 (Public Law 874), for primary and secondary schooling for dependents of military and civilian personnel of the Department of Defense residing on military installations or stationed in foreign countries in amounts not exceeding an average of \$250 per student, when the Secretary of the department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; and [appropriations for the Air Force for the current fiscal year shall be available] for expenses of temporary duty travel of military personnel and for travel expenses of civilians [other than on permanent change of station] traveling in connection with the activities of the [Air Force] department concerned.

SEC. 617. Appropriations for the Navy for the current fiscal year shall be available for [expenses in connection with the transfer to the United States of foreign vessels, including pay, subsistence, transportation, and repatriation of alien crews;] expenses including those heretofore incurred incident to the operation by the Navy of private plants taken over at the direction of the President, and the Secretary of the Navy may designate any naval appropriation to be charged with such expenses, proper adjustment to be made on the basis of final costs between applicable appropriations; payment of rewards, as authorized by law, for information leading to the discovery of missing naval property or the recovery thereof, and except as otherwise authorized by the Act of September 30, 1950 (Public Law 874), for contributions for the support of schools for dependents of military and civilian personnel of the Department of Defense as authorized by section 13 of the Act of August 2, 1946 (5 U. S. C. 421d).
