INTRODUCTION

Pursuant to the provisions of 31 U. S. C. 11 and other applicable laws, the budget for the fiscal year 1958 contains the President's recommendations for the work program and financial program of the Government for the 12 months beginning July 1, 1957, and ending June 30, 1958. It also presents comparable information for the fiscal years 1956 (actual) and 1957 (partly actual and partly estimated).

The material in the budget covers both groups of funds administered by agencies of the Government—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government), although only the Federal funds are included in the computation of the budget surplus or deficit.

ARRANGEMENT OF THE BUDGET

The budget document consists of the President's budget message and his analysis of the budget and four parts which contain summary tables, detailed data, and special analyses.

In the budget message and analysis (pp. M4 through M71), appear the general statement of the President's financial program and an outline of his major recommendations. This section includes three major summary tables.

Part I of the document (pp. A1 through A13) contains seven summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in 1 or 2 pages some overall aspect of the Federal budget.

Part II (pp. 1 through 990) contains the detail of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. This part also includes material on funds of the municipal government of the District of Columbia, and a few other trust funds which require congressional action. It is arranged in chapters reflecting the organization of the Government.

Part III (pp. 991 through 1061) contains summary tables on trust and deposit funds, and detailed schedules and explanatory statements on the various trust funds.

Part IV (pp. 1063 through 1150) contains special analyses of budget data and Federal programs. These analyses supplement material appearing in other parts of the budget. Some of these give details for certain summary figures appearing in part I—for example, a classification of budget receipts by source, and a classification of budget expenditures according to functions and subfunctions. Several of the other special analyses in part IV contain materials which present different groupings or classifications of data.

An appendix, printed separately, contains more detailed information on personal services by grade and title.

EXPLANATORY STATEMENTS

Introductory statements at the beginning of each part give further explanations as follows:

Pages A2–A3—Types of funds and budget authorizations; basis of stating receipts and expenditures; concept of budget surplus or deficit.

Pages 2–5—Format of material printed for each agency and each account in part II.

Page 992—Operation of trust and deposit funds covered by part III.

Page 1064—Coverage of the special analyses printed in part IV.

Detail will not necessarily add to totals, because of rounding.

Public debt at close of year	266.1	271.3	274.4	272.8	270.6	269.2
Balances of appropriations carried forward at end of year	78.4	67.8	52.1	46.0	46.3	47.3

[1] In this and other tables in this budget, tax receipts, expenditures, and new obligational authority under the new pay-as-you-build highway program are excluded from the estimates of budget receipts and expenditures for 1957 and 1958. As a result, the estimates for these two years are not entirely comparable to the figures for prior years. The financial transactions relating to the new highway program are carried as trust fund transactions, in accordance with the legislation enacted during the past session of the Congress, and are so shown in part III of this budget document.

BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I am presenting with this message my recommended budget for the United States Government for the fiscal year 1958, which begins next July 1.

This is the fourth budget which I have transmitted to the Congress.

In my first budget message—that for the fiscal year 1955—I emphasized the administration's determination to chart a course toward two important fiscal goals—balanced budgets and tax reductions.

Reductions in spending evidenced in the 1955 budget made possible a large tax reduction and tax reform program.

The 1956 budget was balanced.

The 1957 budget will be balanced.

A balanced budget is proposed for 1958.

I believe this policy of fiscal integrity has contributed significantly to the soundness of our Nation's economic growth and that it will continue to do so during the coming fiscal year.

BUDGET TOTALS

[Fiscal years. In billions]

	1956 actual	1957 estimate[1]	1958 estimate[1]
Budget receipts	$68. 1	$70. 6	$73. 6
Budget expenditures	66. 5	68. 9	71. 8
Budget surplus	1. 6	1. 7	1. 8

[1] See footnote to table on preceding page. Includes proposed legislation.

This budget is for the first fiscal year of my second term in office. In making plans for the coming year, I have been guided by the following national objectives:

1. Peace, justice, and freedom for our own and other peoples;
2. Powerful armed forces to deter and, if need be, to defeat aggression;
3. A healthy and growing economy with prosperity widely shared;
4. Enhancement of individual opportunity and the well-being of all our people;
5. Wise conservation, development, and use of our great natural resources;
6. Fiscal integrity;
7. A well-balanced choice of programs at home and abroad; and
8. Increasing international trade and investment essential to the growth of the economies of the United States and the rest of the free world.

We have made considerable progress toward these goals. We will continue this progress in the years ahead.

BUDGET POLICY

Today, almost 12 years after World War II, the United States has demonstrated that it is possible to sustain a high employment economy independent of war and continually unbalanced Federal budgets. Adjustments to changing economic circumstances have been and are being made successfully. Productivity and living conditions have improved. With sound public and private policies, the prospect for continued economic growth is bright.

Attainment of that goal is possible only with prudent management of the Government's fiscal affairs. Our Federal budget must contribute to the Nation's financial stability and to the preservation of the purchasing power of the dollar. Maintaining a sound dollar requires of us both self-discipline and courage. At a time like the present when the economy is operating at a very high rate and is subject to inflationary pressures, Government clearly should seek to alleviate rather than aggravate those pressures. Government can do its part. But business and labor leadership must earnestly cooperate—or what Government can do in a free society at a time like this will *not* prevent inflation.

For the Government to do its part in the coming year, taxes must be retained at the present rates so that receipts will exceed budget expenditures and the public debt can be further reduced. The prospective budget surplus in the fiscal year 1958 will reinforce the restraining effect of present credit and monetary policies. The present situation also requires that less pressing expenditure programs must be held back and some meritorious proposals postponed.

Expenditure and appropriation policy.—While taking present economic conditions into consideration, the budget must also reflect the general responsibilities of a Government which will be serving 172 million people in the fiscal year 1958. In the face of continuing threats to world peace, our collective security must be strengthened through alert international policies and a strong defense. Progress toward greater equality of opportunity for all of our people as well as toward a balanced development and conservation of our national resources must go forward. Emphasis must continue upon promoting, through private enterprise, the development and productivity of our economy.

We must move forward in some areas of investment while we hold back in others. For example, the needs for schools, highways, and homes are so urgent that I am proposing to move ahead with programs to help our States, cities, and people undertake such construction at a prudent rate. However, in view of the present active competition for labor, materials, and equipment, I am not recommending some other desirable construction projects, and I have asked the head of each

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Federal agency to watch closely the timing of construction and to postpone work which can be appropriately put off until a later date.

It is also important to hold to a minimum any increase in Government personnel in the coming period. I have directed the heads of the Federal agencies to give renewed emphasis to their efforts in this regard—efforts which have resulted in a net reduction of approximately 240,000 in the civilian work force during the past 4 years. Vacant positions are to be filled by new employment only if careful review by each agency has demonstrated that the positions cannot be abolished or filled by transfer. All proposals which might produce higher Federal payrolls in the future will be critically examined and evaluated.

Continuation of balanced budgets into the future requires that the total of new authority to incur obligations, as well as the budget expenditures for the year, should be less than the total of realistically anticipated budget receipts. This policy of controlling budget authorizations, which has been followed since the beginning of this administration, has helped us move from a budget deficit of 9.4 billion dollars in the fiscal year 1953 to balanced budgets in 1956, 1957, and 1958.

In this budget the total of new authority proposed for 1958 is 73.3 billion dollars, 279 million dollars less than estimated budget receipts. Of the total recommended new authority, specific action by this session of the Congress will be necessary for 65.3 billion dollars. Other new authority, such as that for paying interest on the public

NEW AUTHORITY TO INCUR OBLIGATIONS [1]

[Fiscal years. In billions]

	1956	1957	1958
Proposed for enactment in this session:			
Recommended at this time			$56.7
Proposed for later transmission:			
Under existing legislation		$0.8	(2)
Under proposed legislation		0.8	8.6
Total		1.6	65.3
Enacted prior to this session:			
Current authorizations	$53.3	60.7	
Permanent authorizations	9.9	8.2	8.0
Total	63.2	70.5	73.3

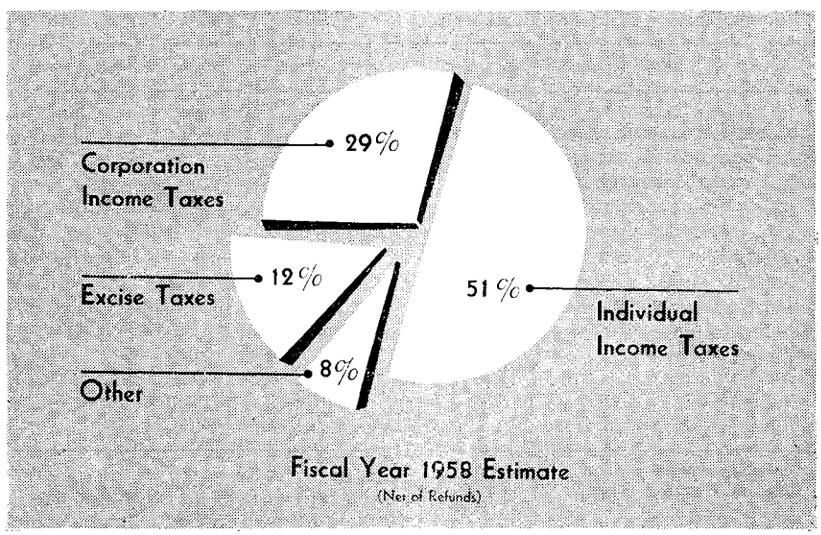
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

debt, will become available under previously enacted permanent authorizations.



The total amount of new obligational authority recommended for the fiscal year 1958 is 2.8 billion dollars greater than the present estimates for 1957. Budget expenditures are estimated to increase by 2.9 billion dollars to a total of 71.8 billion dollars in 1958. These estimates include my proposals for new legislation as well as present programs.

For both new obligational authority and expenditures, about seven-tenths of the estimated increase between 1957 and 1958 is for the military functions of the Department of Defense, reflecting the higher costs of producing, operating, and maintaining the complex new weapons and equipment being delivered in growing quantities to our defense establishment. Other major increases are for the Department of Health, Education, and Welfare, including my proposal for aiding school construction, and for the Atomic Energy Commission.

The figures contained in this budget for the fiscal years 1957 and 1958 are not precisely comparable to the actual figures for prior years. Under the provisions of legislation enacted last year, the financial transactions for the greatly expanded Federal-aid highway program are included in a self-liquidating trust fund and are not in the budget totals.

Revenue policy.—It is my firm belief that tax rates are still too high and that we should look forward to further tax reductions as soon as

SOURCE OF BUDGET RECEIPTS

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

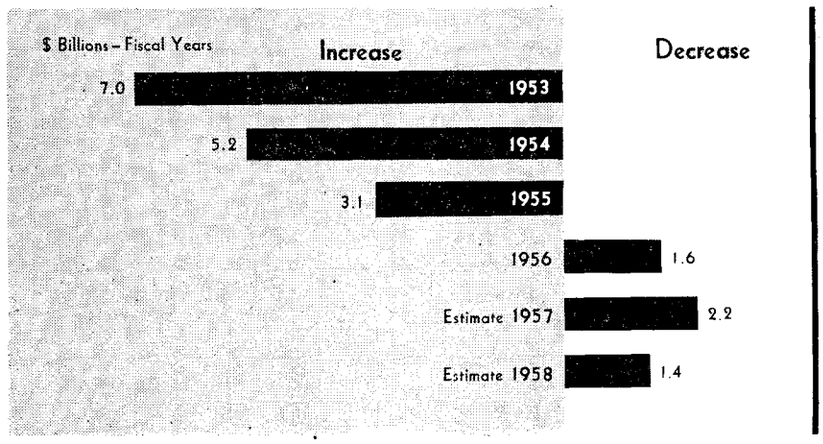
they can be accomplished within a sound budget policy. Reductions in tax rates would give relief to taxpayers and would also release funds for the activity and investment necessary for sustained economic growth through private initiative. However, the reduction of tax rates must give way under present circumstances to the cost of meeting our urgent national responsibilities.

For the present, therefore, I ask for continuation for another year of the existing excise tax rates on tobacco, liquor, and automobiles, which, under present law, would be reduced next April 1. I must also recommend that the present corporate tax rates be continued for another year. It would be neither fair nor appropriate to allow excise and corporate tax reductions to be made at a time when a general tax reduction cannot be undertaken.

In the area of taxation, I am especially interested in the problems of small business. Last August the Cabinet Committee on Small Business made a series of carefully considered recommendations in this field. Some relief in the tax burden affecting small business, as recommended by that Committee, which will give help with a minimum loss of revenue should have early consideration by the Congress. Any changes involving substantial loss of revenue should be considered at a later time when a general tax reduction is possible.

The present estimates of budget receipts for 1958 are based on the assumption that the Nation will continue to have a high level of business activity with increasing national income, and that the present tax rates will be continued. They are the best estimates we can make at this time, but, since they relate to a period 6 to 18 months away, significant changes may take place before the fiscal year 1958 is ended.

BUDGET RECEIPTS[1]



[Fiscal years. In billions]

	1956 actual	1957 estimate	1958 estimate
Individual income taxes	$35.3	$38.5	$41.0

CHANGE IN PUBLIC DEBT

Debt policy.—The budget surplus for the fiscal year 1956 of 1.6 billion dollars was used to reduce the public debt. This budget provides for further reductions in the public debt for the current fiscal year and for the fiscal year 1958.

The successive reductions in the debt from 1956 through 1958 are modest in relation to its total size. Nevertheless, I hope that these reductions, plus the collection of corporation tax payments on a more nearly current basis (as provided by the Internal Revenue Code of 1954), will make it unnecessary to ask the Congress again for a temporary increase in the legal limit of 275 billion dollars to cover seasonal borrowing during the coming fiscal year.

PUBLIC DEBT[1]

[Fiscal years. In billions]

	1956 actual	1957 estimate	1958 estimate
Public debt at start of year	$274.4	$272.8	$270.6
Change due to budget surplus (—)	—1.6	—1.7	—1.8
Change due to other factors [1]	(2)	—.5	+.4
Public debt at close of year	272.8	270.6	269.2

[1] For details, see table 4 in part I of this budget document.
[2] Less than 50 million dollars.

The reduction in the public debt in the fiscal year 1957 is estimated to be larger than the budget surplus for that year, mainly because it is anticipated that some expenditures during the year can be

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

financed by drawing down the amount of cash the Government has on hand.

For the fiscal year 1958, the reduction in the public debt will not be as much as the budget surplus. This situation results primarily from the fact that, in the aggregate, the trust funds are expected to draw down the amount of uninvested cash held for them by the Treasury.

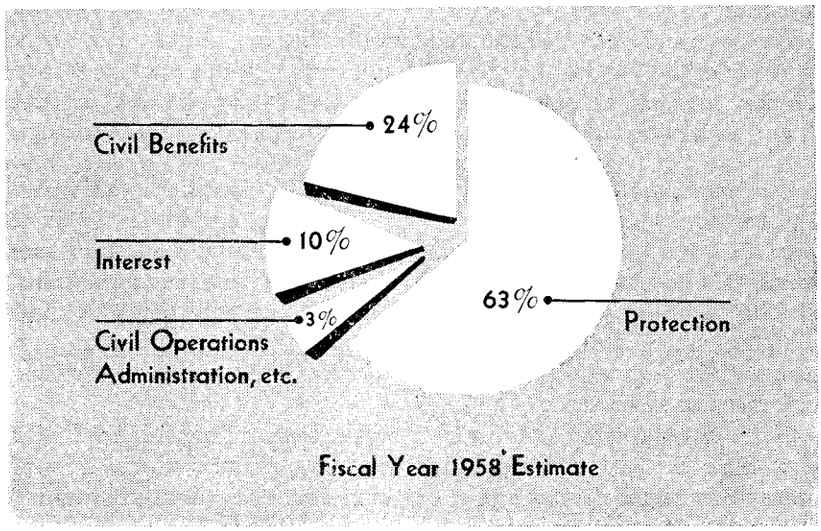
Receipts from and payments to the public.—The restraint on inflationary pressures which will be exerted by the budget surplus in the fiscal year 1958 will be reinforced by net accumulations in the trust funds which the Government administers. These trust fund accumulations, such as those for highways and for old-age and survivors and disability insurance, are the excess of current receipts over current payments. They constitute reserves for future use which are invested in Government securities.

When the Government's budget transactions are consolidated with trust fund and other transactions to give a picture of the flow of money between the public and the Government as a whole, the receipts from the public are estimated to exceed payments to the public by 3 billion dollars in the fiscal year 1958.

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC[1]

[Fiscal years. In billions]

	1956 actual	1957 estimate	1958 estimate
Receipts from the public	$77. 1	$81. 7	$85. 9
Payments to the public	72. 6	78. 2	82. 9
Excess of receipts from the public	4. 5	3. 5	3. 0



[1] For details, see special analysis A in part IV of this budget document.

The decline between the fiscal years 1956 and 1957 in the excess of receipts from the public results mainly from the estimated withdrawal of cash from the Treasury by the International Monetary Fund in 1957. The cash payments are made as the Treasury redeems the notes which were part of the United States subscription to the Fund. This subscription was made in the fiscal year 1947 and is therefore not part of current budget expenditures.

The excess of receipts from the public is estimated to be still lower in 1958 mainly because of higher net payments from trust funds.

Federal Reserve Bank of St. Louis

PURPOSE OF BUDGET EXPENDITURES

BUDGET PROGRAMS AND PERFORMANCE

By far the largest part of the budget for the coming fiscal year, 63 percent, will be devoted to maintaining and improving our own defenses and to strengthening the defenses and economies of other nations in the interest of collective security and world peace. Civil benefits will account for 24 percent of budget expenditures; interest, 10 percent; and all other operations, administration, and contingencies, 3 percent.

BUDGET EXPENDITURES BY PURPOSE[1]

[Fiscal years. In billions]

	1956 actual	1957 estimate	1958 estimate
Protection, including collective security	$42.4	$42.7	$45.3
Civil benefits	15.3	16.5	16.9
Interest	6.8	7.3	7.4
Civil operations and administration	2.0	2.3	1.8
Allowance for contingencies	----------	.2	.4
Total	66.5	68.9	71.8

[1] For details, see special analysis E in part IV of this budget document.

Protection, including collective security.—As a simple matter of self-preservation, we must maintain our own strength and promote world

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

stability by helping to build up the strength of friendly nations. At the same time, we must actively advance our other efforts for lasting peace and inform the world in all appropriate ways of our peaceful aims.

The new and more powerful weapons which are being delivered to our Armed Forces in increasing quantities and varieties are much more costly to produce, operate, and maintain than the weapons they are replacing. Furthermore, we are now engaged in the development of a whole new family of even more advanced weapons for all the services. Large expenditures will be required to bring these weapons into use. During the transition, we must continue to purchase enough of the current types to preserve our readiness until the effectiveness of the advanced weapons is demonstrated in tests. Despite these upward pressures on expenditures, future defense costs must be held to tolerable levels. Effective action must be taken to improve efficiency and to maintain a proper balance between expenditures for future military strength and expenditures for current readiness.

EXPENDITURES FOR PROTECTION, INCLUDING COLLECTIVE SECURITY

[Fiscal years. In billions]

	1956 actual	1957 estimate	1958 estimate
Major national security programs:			
Department of Defense—military functions	$35.8	$36.0	$38.0
Mutual security program—military	2.6	2.6	2.6
Atomic Energy Commission	1.7	1.9	2.3
Stockpiling and defense production expansion	.6	.4	.4
Subtotal	40.6	41.0	43.3
Related programs:			
Mutual security program—economic, technical, and other	1.6	1.5	1.8
United States Information Agency	.1	.1	.1
Federal Civil Defense Administration	.1	.1	.1
Selective Service System	(1)	(1)	(1)
Subtotal	1.8	1.7	2.0
Total	42.4	42.7	45.3

[1] Less than 50 million dollars.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The introduction of new equipment and weapons with vastly greater combat capability is also having a powerful impact on concepts of military strategy, tactics, and organization. The combat power of our divisions, wings, and warships has increased to such an extent that it is no longer valid to measure military power in terms of the number of such units.

I have given careful consideration to the many complex factors which enter into the development of a well-balanced military structure. I am convinced that the defense programs and funds for their support as recommended in this budget provide a wise and reasonable degree of protection for the Nation.

Our nuclear weapons and our ability to employ them constitute the most effective deterrent to an attack on the free nations. We shall continue to expand our nuclear arsenal until an agreement has been reached for reduction and regulation of armaments under safeguarded inspection guaranties.

At the same time, we are increasing the portion of the production of fissionable materials allocated to peaceful uses at home and abroad and we look forward to the day when all production may be used for peaceful purposes. This budget provides for increased effort on power reactor development and on new uses of atomic energy in biology, medicine, agriculture, and industry. It will also make possible greater sharing of our peaceful atomic energy developments with other nations through the atoms-for-peace program.

World events continue to demonstrate the value of our programs of mutual assistance. Continued assistance, both military and economic, to friendly nations will provide the essential margin beyond their own resources needed to support and strengthen their defenses and their economies. The intensified worldwide conflict of ideas also requires a further increase in our programs of international information.

Civil benefits.—During the past 4 years, the Government has acted affirmatively to advance the everyday well-being of our people by

EXPENDITURES FOR CIVIL BENEFITS

[Fiscal years. In billions]

	1956 actual	1957 estimate	1958 estimate
Additions to Federal assets	$3. 5	$3. 0	$3. 4
Long-range development	2. 0	1. 8	2. 3
Current expense items	9. 7	11. 7	11. 1
Total	15. 3	16. 5	16. 9

helping to improve their economic opportunities, helping to provide safeguards against economic and physical hazards, and helping to build needed public assets. The Government's leadership in assisting the people to satisfy their own needs has been so exercised that steady progress has taken place without paternalistic interference.

In the fiscal year 1958 we shall continue to move forward with many civil benefit programs already established by law.

To aid agriculture in its adjustments to new technologies and to changed world production and consumption patterns, the soil bank program will help reduce the production of surplus crops. Additional marketing research and service activities will develop new markets and new uses for our farm products. Watershed protection, aid to low-income farmers, and assistance in overcoming the problems of drought, wind erosion, and floods will be expanded.

The Federal Government is assisting the States and private enterprise to make major advances in our transportation system. Traffic control on our airways is being continually improved as new equipment is developed and becomes available. Orderly replacement by private shipping lines of the merchant ships built during World War II is underway. Through grants paid from the highway trust fund, the States, in partnership with the Federal Government, are beginning a 13-year program to complete construction of the Interstate Highway System.

Under the urban renewal program, which combines Federal, local, and private efforts, 41 urban renewal projects will have been completed by the close of the fiscal year 1958, and 531 more will be in various stages of planning or construction. Private financing of housing for military families, elderly families, cooperatives, and other groups having special difficulties in obtaining homes will be encouraged by special mortgage insurance and mortgage purchase programs.

Over the 3-year period, 1955 through 1957, nearly 400 new water-resource projects for flood control, navigation, irrigation, power, and water supply will have been started and about one-half of these projects will still be under construction in 1958. Because of the need for continued and orderly development of our resources, I recommend that construction be started at a modest rate in 1958 on some new projects for which planning is well advanced. Funds for initiating immediately the planning of new public works projects which the Congress is expected to authorize are also included in this budget.

Increased expenditures will be made for sound programs of health research and grants for hospitals, clinics, and diagnostic and rehabilitation centers.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Legislative recommendations for new civil benefits involving major expenditures are being confined to needs of the highest priority and will be discussed later in this message.

Interest.—Expenditures for interest are estimated to rise 100 million dollars to 7.4 billion dollars in the fiscal year 1958, despite reductions in the public debt in 1956, 1957, and 1958. The increase in interest charges is due to refinancing securities maturing during the coming year at the higher rates of interest which reflect the heavy demand for credit and capital throughout our prosperous economy.

Civil operations and administration.—Expenditures for the remaining operations of the Government are estimated to be 1.8 billion dollars in the fiscal year 1958, an amount 425 million dollars less than in 1957 and 185 million dollars less than in 1956. The decreases occur primarily because certain payments heretofore made by the Civil Service Commission and the Treasury Department will be charged to the appropriations of the several agencies in accordance with legislation enacted last year. These are the payments which the Government, as employer, makes to the civil service retirement fund and those which it makes for certified bills presented too late for payment in the regular way. This improved accounting procedure shows with greater accuracy the total cost of various agency programs and is responsible for part of the increase shown in the expenditures for protection and civil benefits.

Allowance for contingencies.—Sound budgeting requires that some general provision be made for contingencies which may arise in the coming period. This is especially important today, in view of uncertain world conditions. The Congress is not being asked to appropriate for purposes not known. This item makes allowance in the budget totals for probable future requests, including those to cover the cost of some legislative proposals for which the timing of expenditures is uncertain. As the needs arise, and as new legislation is passed, a specific request for funds will be made in each case. The amount allowed for expenditures is 400 million dollars, slightly over one-half of 1 percent of total budget expenditures estimated for 1958.

Management improvement.—The administration is constantly striving to improve the management of Government. Vigorous measures to increase efficiency have shown results in many Government operations.

In the Veterans Administration, for example, the staff in nonmedical activities has been reduced by 10,000 in the past 4 years. Some of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

this reduction was made possible because of smaller numbers of insurance and readjustment payments, but most of the reduction in staff reflects better procedures, including extensive mechanization of operations.

In the overseas supply activities of the Department of Defense, new procedures employing faster communications and better transportation service have been established. These improved methods of supplying overseas units substantially reduce inventory requirements and thus save both capital investment and costs of handling.

In the Post Office Department, despite an 11 percent rise in the volume of mail in the 4 fiscal years 1954 through 1957, the average employment will have increased only a little more than 3 percent. This is concrete evidence of the value of new methods, organization, and equipment.

After intensive reviews of their real property holdings, Government agencies over the past 3 fiscal years have transferred excess property costing over 131 million dollars to other agencies, thus reducing the volume of purchases needed by those agencies to meet new requirements. In addition, surplus real property worth 366 million dollars, including almost all of the Government-owned synthetic rubber plants, has been sold, thus putting most of this property on the tax rolls.

In accordance with the recommendations of the second Hoover Commission, an Office of Accounting has been established in the Bureau of the Budget to help the Federal agencies to improve further their financial management and, in that connection, to put into effect the principles of accrual accounting and cost-based budgeting approved in legislation enacted last year. Modern accrual accounting will make possible better management through improved information needed to control costs.

LEGISLATIVE PROGRAM

This year I discussed only a few of the administration's legislative recommendations in the State of the Union message. Therefore, this part of the budget message is devoted to a discussion of other major proposals for legislation on which I recommend that the Congress take action during the present session. The legislative program is one on which the Congress and the executive agencies should be able to work together successfully.

In the course of the next few months the administration will recommend to the Congress a number of important legislative proposals.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In the immediate future, I shall forward a message emphasizing the urgency of enactment of an adequate program of Federal aid for school construction, and a message on my proposals for amendment of our immigration laws. In connection with the administration's proposals on education, this budget provides for the start of a 4-year program of aid for school construction.

Two areas need earnest and prompt attention with a view to determining whether new national policies should be adopted in the light of reports and recommendations now pending in the Congress. These are numerous detailed recommendations of the second Hoover Commission which the committees were unable to consider prior to adjournment of the 84th Congress and the proposals made by the Advisory Committee on Transport Policy and Organization. Legislation to carry out the recommendations of the Committee was the subject of hearings during the last Congress. Because of the importance of strengthening our transportation system, these hearings should be completed in the present session. Proposals for legislation will again be submitted by the Secretary of Commerce.

Substantial budget increases are recommended for existing activities which will improve the health of the American people. The Congress is also urged to enact legislation under which the Federal Government can help the medical and dental schools to build more and better teaching, as well as research, facilities to prevent the already acute shortage of trained medical manpower from becoming critical. It is also time to enact the necessary statutory basis for expansion and improvement of voluntary health insurance plans under which smaller insurance companies and nonprofit associations could pool their resources and experience.

In the welfare field, additional funds are likewise provided in the budget, and the Congress is urged to enact a new program of grants to the States to help fight juvenile delinquency.

In recent years, a succession of legislative enactments has moved a long way toward the goal of universal social security coverage, but there are a number of collateral steps which will add much to the meaning of our social security system as a whole. In part, these steps can be taken by budgetary action, for example, by giving particular attention to the needs of the rapidly increasing number of older persons in our society. Other steps will require legislation. First, the unemployment insurance system should be extended and improved. Similarly, congressional action is recommended to extend the Fair Labor Standards Act to additional workers. The Secretary of Labor will make recommendations on this act when hearings are held by the committees of the Congress. The Federal 8-hour laws

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

should be revised and brought up to date and legislation should be enacted to assure equal pay for equal work. A modest program of grants under which the States can increase their efforts to improve occupational safety should be initiated. Likewise, legislation should be enacted to require the registration of employee pension and welfare funds to protect the interests of beneficiaries.

Of particular importance are recommendations to protect and foster the initiative of the small businessman. The Small Business Act should be extended. In order that small business may have better opportunity to secure adequate financing, issues of securities up to 500 thousand dollars should be exempted from the regular registration provisions of the Securities Act of 1933. Similarly, the Congress should enact legislation providing for notification to the Federal Government of proposed business mergers, and should amend the procedural provisions of the antitrust laws to facilitate their enforcement. Wage reporting for income tax and social security purposes should be consolidated and simplified. Other means of assisting small business will be discussed in the Economic Report.

I repeat my recommendation of last year for the prompt enactment of appropriate authority under which communities can be assisted in solving basic problems of persistent unemployment.

At the present time, I do not contemplate proposing an extensive program of personnel legislation comparable to the numerous constructive measures enacted in the last several years. Certain needed improvements in central personnel management are discussed in the general government section of my budget analysis. All of these measures deserve early attention and enactment by the Congress. In addition, the Secretary of Defense is now studying recommendations of his Advisory Committee on Professional and Technical Compensation. Any legislative recommendations growing out of the work of this committee respecting personnel policies and compensation systems of the military services will be presented at a later time.

We should not let another year go by without taking the necessary action to place the Post Office on a pay-as-you-go fiscal basis. The case for adjusting postal rates needs no further justification. It is supported by a vast majority of the general public as well as by most of the business community. The administration has demonstrated its capacity for improving the postal service, installing new and more efficient methods and equipment, and cutting costs in accordance with good business practice. The Congress should take the further action needed to reduce the huge postal deficit. Then the

400000—57——II

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

further improvements needed in equipment and facilities can be made so that the American people may receive the mail service they deserve and have the right to expect.

Various agencies are being asked to review with the Congress the interest rates charged by the Government in connection with different kinds of loans, several of which have a fixed statutory maximum established when interest costs were much lower than today. It is desirable that there be more consistency and that more discretion be allowed in determining what going rates should be, dependent on the period of the loans and their conditions.

Recommendations concerned with proposed legislative changes in our housing laws will be found in the section of my budget analysis carrying the heading "Commerce and housing."

With respect to farm legislation, certain changes are being recommended in the corn program. Farmers who use all the wheat grown on their own farms for seed, feed, or food should be exempt from marketing quotas and penalties. The basic authority for disposal of surplus farm commodities for foreign currencies, title I of Public Law 480 of the 83d Congress, should be extended for 1 year and an additional 1 billion dollars of authorization for losses under this title should be provided. Legislation should also be enacted authorizing the barter of nonstrategic Government-owned agricultural surpluses to the nations of Eastern Europe.

The program of the administration in the field of natural resources is fully set forth in that section of the budget analysis. It will not be repeated here, except to indicate my continuing firm support of the necessary legislative action to enable Federal agencies to participate more fully with States, local governments, and private groups in the development of partnership resources projects. I urge once again the prompt enactment of legislation which will enable the Fryingpan-Arkansas multiple-purpose project to get underway in the fiscal year 1958.

I also recommend prompt action by the Congress to decide how the Niagara power project can best be developed.

In returning the Harris-Fulbright natural gas bill to the 84th Congress without my approval, I stated that legislation conforming to the basic objectives of that bill was needed. I am still of that opinion. It is essential that consumers of natural gas be protected. We must endeavor to make sure that there will be continued exploration and development of adequate field supplies of gas, and that producers' sales prices are arrived at fairly and competitively. In this way, and with authority vested in the Federal Power Commission to regulate interstate pipelines as to the price at which gas may be charged as an item of cost in fixing their rates, the price to the public will be fair. Legislation freeing gas producers from public utility-type regulation

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

is essential if the incentives to find and develop new supplies of gas are to be preserved and sales of gas to interstate markets are not to be discouraged to the detriment of both consumers and producers, as well as the national interest.

The Congress is urged to carry out the proposals of the Judicial Conference for additional Federal judges. Also, when a district or circuit court judge who is the senior judge of the district or circuit becomes 70 and chooses not to retire, he should be relieved of his administrative duties. Furthermore, whenever a district court judge reaches 70 and chooses not to retire, the Congress should provide that upon certification by the Judicial Conference of the need therefor, the President would be authorized to appoint an additional judge. When the judge who had reached 70 dies or retires, the vacancy thus created would not be filled.

Although it is not within my province to make any recommendation, I am deeply interested in the suggestion which has been made that the Congress should consider inviting the Chief Justice of the United States to address the Congress annually on the work of the judiciary and to present the recommendations of the Judicial Conference.

I recommend again that the Congress enact suitable legislation providing for home rule in the District of Columbia. Under any such system the citizens of the District should be authorized to elect local officials, to vote in Federal elections, and to have a delegate in the House of Representatives.

I also recommend the enactment of legislation admitting Hawaii into the Union as a State, and that, subject to area limitations and other safeguards for the conduct of defense activities so vitally necessary to our national security, statehood also be conferred upon Alaska.

The platforms of both major parties have advocated an amendment of the Constitution to insure equal rights for women. I believe that the Congress should make certain that women are not denied equal rights with men. Similarly, I believe that the Congress should propose a constitutional amendment lowering the voting age in Federal elections.

As has already been indicated in the State of the Union message, continuation of military and economic assistance to the free nations of the world is a keystone of the administration's efforts to promote peace, collective security, and well-being for all peoples. Essential complements of these assistance programs are steps to increase international trade and investment. Both can be materially advanced by taking the actions necessary to avoid unfair tax duplications on business conducted overseas and by the prompt enactment of legislation approving United States membership in the proposed Organization for Trade Cooperation. This administrative agency will greatly aid the orderly operation of existing arrangements governing multilateral

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

trade to help prevent discrimination and restrictions against our foreign commerce.

Although necessity forces us to keep ever in mind the destructive power of nuclear weapons, it is equally essential that we keep in mind the firm determination of the United States to share the fruits of its efforts to develop the peaceful uses for atomic energy. Seventy-two nations have now signed the charter of the International Atomic Energy Agency, which was established under the auspices of the United Nations. Prompt action by the Congress is needed to authorize full participation by the United States in the work of this Agency. The United States has offered for distribution through this Agency 5,000 kilograms of fissionable uranium 235 out of the 20,000 kilograms previously offered for atomic research and power uses in other nations, as part of our atoms-for-peace program.

The analysis of the budget discusses present programs for veterans. A special message recommending changes needed in these programs will be transmitted to the Congress.

The remaining items to which special attention should be directed are (1) authorization to the President to make awards for distinguished civilian achievement, (2) establishment of a Federal Advisory Commission on the Arts, (3) acquisition and maintenance of an official residence for the Vice President, and (4) amendment of the Government Corporation Control Act to provide for budget and audit control over Government corporations which are authorized, directly or indirectly, to obtain or utilize Federal funds. It is also recommended that the Congress give further consideration to legislation which would place Government appropriations on an accrued expenditure basis.

The other proposals which are parts of the administration's legislative program are discussed in my analysis of the budget. The fact that they are not included in this summary presentation in no way detracts from their importance or the strength of my recommendation that they be considered and enacted by the Congress in its present session.

ANALYSIS OF THE BUDGET

I am presenting my budgetary recommendations in greater detail under nine major program headings in the analysis of the budget which follows this message. The Economic Report will contain a further discussion of some of these proposals.

It is always difficult to make plans and forecast expenditures a year or more in advance. This is particularly true when historic events are taking place in Eastern Europe, when United Nations forces are deployed in the Middle East, when uncertainties abound in other parts of the world, and when in our own land economic change is continuous. This budget has taken into account present conditions and developments which today appear most likely at home and abroad. It provides funds for all necessary Government activities on a reasonable scale, and efforts will continue to be made by every executive department and agency to improve efficiency and to maintain expenditures well within the budget estimates. It is a carefully balanced budget—balanced in its receipts and expenditures, balanced in its choice of programs. I consider it well adapted to the needs of the present and the future.

DWIGHT D. EISENHOWER.

THE PRESIDENT'S ANALYSIS OF THE BUDGET

The budget recommendations for the fiscal year 1958 are accompanied by revised estimates for the current fiscal year, 1957, and by reports on the results of Government operations for the year ended June 30, 1956.

The final results for the fiscal year 1956 show a budget surplus of 1,626 million dollars, a net decrease of 128 million dollars from the preliminary figures reported in August in the midyear review of the budget. The decline is due to the inclusion of transactions which were not fully reported by August.

The current estimate of budget receipts for the fiscal year 1957 exceeds the estimate of 69.8 billion dollars made last August by 828 million dollars. This increase is due mainly to greater indicated receipts from the individual income tax.

Budget expenditures for 1957 are now estimated to be 193 million dollars less than the 69.1 billion dollars anticipated in the midyear review. The principal changes in the estimated expenditures are:

(1) A downward revision of 1 billion dollars for the Department of Agriculture, mainly because of reduced estimates of price support disbursements and higher estimates of commodity sales.

(2) A decline of 248 million dollars for the economic portion of the mutual security program, partly because certain country programs have been revised to place greater emphasis on long-range development projects.

(3) An increase of 586 million dollars for the Housing and Home Finance Agency, mainly for advances to the Federal National Mortgage Association for its secondary market operations.

(4) An increase of 497 million dollars in the estimated net expenditures of the Export-Import Bank, due to a larger volume of loans and to lowered estimates of private participation in the Bank's loans.

Discussion of each of the major programs of the Government follows, with emphasis on recommendations for the fiscal year 1958.

MAJOR NATIONAL SECURITY

Events in recent months have dramatized the need for strong collective security. The military strength of the United States is a bulwark for world peace and freedom. A large share of the budget must go to maintain the Nation's military forces in their present high state of readiness and to introduce new weapons. Also, effective support must be given to the defense forces of other nations. Advances in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

nuclear technology must be applied to improving national defense and, in increasing degree, to peacetime uses in the United States and the rest of the free world.

[1] Less than one-half million dollars.

Department of Defense, military functions.—The defense program involves four basic military missions in which each of the military services has an active role. New and vastly superior weapons have a profound impact on each mission and on the size and composition of the military budget. The budget recommendations for the fiscal year 1958 reflect adjustments that have been made in the contributions of the individual military departments to the four basic military missions.

One mission is to maintain ready nuclear-air-retaliatory forces so strong that they will deter a potential aggressor from initiating an attack. Procurement in the fiscal year 1958 will provide for equipping the heavy bomber wings of the Strategic Air Command with 45 all-jet B–52 aircraft in place of the present smaller number of 30 B–36's.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The gradual elimination of strategic fighter wings, which are no longer considered necessary, will be completed. The striking power of the Navy will be enhanced by the addition of new and modernized attack carriers, jet aircraft capable of higher speeds and higher altitudes, atomic submarines, and guided missile ships.

A second mission is to build a defense system which will minimize the chances of a successful attack on this continent. The Continental Air Defense Command has been assigned operational control over all forces and weapons made available for the air defense mission. The Command's radar warning network, extending from the central Pacific around the northern perimeter of North America and across the Atlantic approaches, will be largely in operation during the fiscal year 1958. The interceptor squadrons of the Air Force will be further strengthened with the delivery of still better aircraft, and the anti-aircraft missile capabilities of the Army will be expanded. The Navy's antisubmarine warfare capability is being improved to meet the threat of missiles launched from submarines.

A third mission is to maintain mobile and versatile forces suitably deployed and ready for immediate action in case of aggression. Army divisions are being reorganized into more flexible units supported with the latest atomic weapons and with aviation units. In addition, the Army will increase the number of atomic support commands which are particularly suitable as back-up for the ground forces of allied countries. Taking advantage of the greater firepower and mobility gained from the new units and equipment, the number of Army divisions will be reduced by one during the fiscal year 1958. The greater mobility and effectiveness of tactical aircraft coupled with the growing guided missile capabilities of the Army, permit a reduction in the number of Air Force tactical wings. The three Marine divisions and air wings are now equipped with a variety of atomic weapons and are continually improving their capability for amphibious assault operations.

A fourth mission, to maintain control of the essential sea areas and lines of communication in case of war, is primarily the task of the Navy, although the Air Force and elements of the other services have an important part. The modern ships, aircraft, and weapons being added to the Armed Forces are improving capabilities for performing this mission as well as the first three missions. As new ships are added to the fleet, older ships will be retired and the number of active ships in the fiscal year 1958 will remain about the same.

The means of accomplishing these basic military missions constantly change as new weapons are introduced. The Secretary of Defense recently issued a clarification of the basic roles and missions of the military services. It covered the use of aircraft by the Army; the adequacy of airlift; the development, procurement, and operation of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

surface-to-air guided missiles; the operational deployment of intermediate range ballistic missiles; and the tactical air support of the Army.

New authority to incur obligations totaling 38.5 billion dollars for the fiscal year 1958 is recommended for the military functions of the Department of Defense. Expenditures are estimated to increase from 36 billion dollars in 1957 to 38 billion dollars in 1958.

DEPARTMENT OF DEFENSE—MILITARY FUNCTIONS COSTS BY MAJOR CATEGORIES

(Based on existing and proposed legislation)

[Fiscal years. In millions]

Cost category	Budget expenditures			Recommended new obligational authority for 1958
	1956 actual	1957 estimate	1958 estimate	
Military personnel:				
Active forces	$10,666	$10,321	$10,524	$10,664
Retired pay	477	515	543	555
Operation and maintenance	8,519	9,100	9,598	9,847
Major procurement and production	(12,204)	(11,731)	(12,273)	(12,030)
Aircraft	7,146	6,786	6,737	6,232
Ships	917	928	1,040	1,555
Guided missiles	1,168	1,506	2,039	2,646
Other	2,973	2,511	2,457	1,597
Military public works	2,008	1,973	2,242	2,122

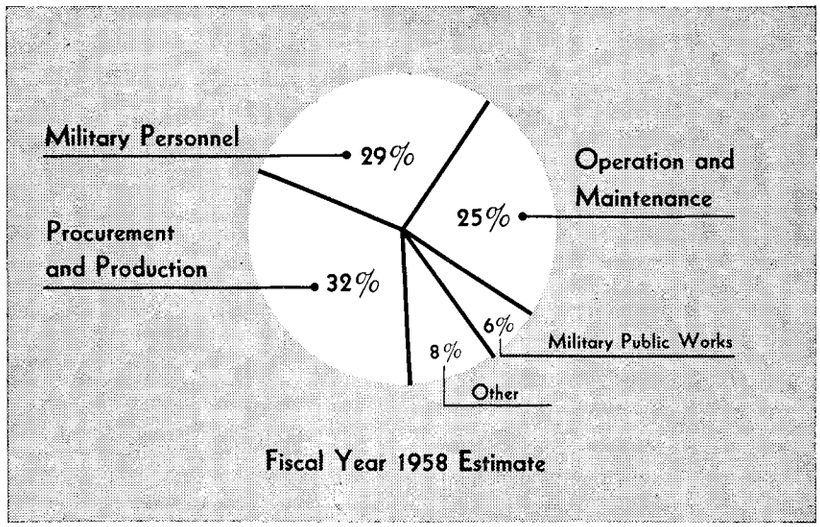
Establishmentwide activities	211	354	401	394
Working capital (revolving) funds	−643	−589	−398	----------
Total	35,791	36,000	38,000	[1] 38,500

[1] Compares with new obligational authority of 33,187 million dollars in 1956 and 36,387 million dollars in 1957.



This budget provides for an average active duty military personnel strength for the fiscal year 1958 of approximately 2.8 million. The Army, Navy, and Marine Corps will hold to about their current numbers while the Air Force will be increased by several thousand men.

Operation and maintenance costs will rise in the fiscal year 1958. The larger number of bases and other installations and the growing complexity of new weapons systems, particularly guided missiles and aircraft, are the primary reasons for this increase.

Major procurement and production expenditures in the fiscal year 1958 are estimated to be 542 million dollars more than in the current year. Expenditures for guided missiles will be up 35 percent; for ship construction, up about 12 percent; and for aircraft procurement will remain at about the same level. Expenditures for all other types of major procurement are estimated to be about 2 percent less than in the current fiscal year.

Federal Reserve Bank of St. Louis

EXPENDITURES FOR DEPARTMENT OF DEFENSE—MILITARY

The new obligational authority needed for the Air Force procurement program for the fiscal year 1958 is less than it otherwise would have been because of the additional appropriations for this purpose voted by the Congress last year. Together, these appropriations will provide sufficient funds for Air Force aircraft and related procurement in the current year and in the fiscal year 1958.

Expenditures for military public works in the United States and overseas will be about 14 percent above the current year. This budget provides for proposed legislation to authorize new bases and facilities for continental air defense, for further work on dispersing and improving heavy bomber bases, and for essential facilities for naval operating forces.

Research and development will continue at the same high level as in the current fiscal year. When the portions of appropriations for procurement, military personnel, and public works which contribute to research and development, testing and evaluation are also considered, the total devoted to these purposes will be somewhat more than the 5.2 billion dollars programed for the current fiscal year. A steady military research and development effort must be maintained over the years to assure a constant flow of new and more effective weapons for the future.

Expenditures for the reserve components will increase in the fiscal year 1958. Major emphasis will be placed on improving the quality and combat readiness of the Reserve Forces through modernization of equipment and better selection and training of reserve personnel.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The overall quality and readiness of the Reserve Forces, already higher than ever before in the peacetime history of the Nation, will be even more effective by the end of the coming fiscal year.

Civil defense.—All levels of government have made encouraging progress in preparing for civil defense since the Federal Civil Defense Act was approved in 1951. These gains have been partly offset by the increasingly destructive capabilities of nuclear weapons. In the light of these developments, the administration will transmit to the Congress recommendations for amendment of the Federal Civil Defense Act which will enable the Federal Government better to meet its responsibilities. To achieve maximum results, civil defense must continue to be a cooperative effort with State and local governments. Individual and local initiative and resourcefulness must be our ultimate reliance during an initial recovery period.

This budget provides under existing legislation for extending civil defense programs for public education, information, and training, and for a larger Federal staff to give assistance to the States and cities. Appropriations are included for an attack warning system which will quickly transmit warnings from the Air Force to certain key areas. Stockpiling of emergency hospital equipment and radiological detection equipment will be continued; and a substantial program of research on radiological defense, on shelter design, and on bomb-damage assessment will be carried forward.

Funds for civil defense activities are included in the commerce and housing section of this analysis.

Development and control of atomic energy.—Until an agreement for limitation of armaments is negotiated and an effective inspection system is functioning, this Nation will continue to increase the number and variety of nuclear weapons. In the fiscal year 1958, emphasis will be placed on weapons for tactical purposes and weapons with reduced radioactive fallout. The substantial present effort to develop military propulsion reactors will be continued.

Efforts to develop the peaceful uses of atomic energy will be greatly increased, particularly the development of reactors to produce atomic power at competitive prices.

This budget provides for increased effort by the Atomic Energy Commission to explore new power reactor concepts, to fabricate and operate reactor experiments, and to develop the basic reactor technology essential to the Nation's progress and leadership in the field. Increased support will also be given to the growing activities by private industry and public power bodies in power reactor development.

In the belief that basic responsibility for construction of large-scale commercial power reactors should not have to be assumed by the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Federal Government, no funds for construction of new large-scale reactors are proposed in this budget. A number of new proposals from non-Federal interests are now being developed. However, if acceptable proposals for non-Federal construction of promising reactor types do not materialize within a reasonable time, a request will be made to the Congress for funds for direct construction by the Federal Government.

As a further and necessary step to facilitate industry's investment in atomic powerplants, legislation will again be proposed to authorize the Government to supplement commercially available insurance against liability arising from possible nuclear accidents.

More resources will be applied to the longer term effort to develop thermonuclear power reactors. Increased research is planned for 1958 on the problems arising from the numerous and extensive applications of atomic energy, such as reactor safety, radioactive waste disposal, and the biological effects of radiation. At the same time, support of research in nuclear physics and in new uses of atomic energy in biology, medicine, agriculture, and industry will be strengthened. Also, the budget provides for increases in equipment grants and in teacher training to improve education in nuclear technology and to help alleviate the shortage of nuclear scientists and engineers.

In order to help other nations develop their own atomic energy programs, the 1958 budget provides for training centers in the United States and abroad, equipment grants, and other technical assistance from appropriations for the Atomic Energy Commission and the mutual security program. Four nations have already accepted and many others are expected to accept the United States offer to share the costs of building research reactors. A number of nations have indicated interest in procuring power reactors in this country, and the Export-Import Bank will consider applications for loans to finance such procurement. The budget also includes funds for United States participation in a second world conference on the peaceful uses of atomic energy to be held in calendar year 1958.

Stockpiling and defense production.—By the end of the current fiscal year, the stockpile of strategic and critical materials, such as rubber, aluminum, copper, and nickel, will have reached a value greater than 6 billion dollars. Further acquisitions toward the stockpile objectives will be limited in most instances to (1) materials for which contracts have already been made; (2) materials which can be procured at favorable prices and which will serve to maintain the mobilization base; and (3) materials obtained in exchange for surplus agricultural products.

Mutual security program, military.—The armed forces of 38 countries receive military equipment and training through the military

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

assistance portion of the mutual security program. This assistance bolsters the military forces of countries faced with a threat of external aggression or internal subversion.

Military assistance plans for the fiscal year 1958 have been related to the plans for this Nation's military establishment. As in the case of United States forces, a large part of the funds will be used for new types of weapons for air defense.

In the fiscal years 1957 and 1958, an increasing amount of military assistance equipment is to be furnished on a reimbursable rather than a grant basis. Changes in legislation will be recommended to facilitate these sales.

The level of unexpended balances for military assistance will have been reduced for 5 successive years. The Department of Defense has made significant improvements in the operation of this program in this fiscal year, especially in the timing of orders and the utilization of funds.

The new obligational authority of 2,450 million dollars recommended in this budget for military assistance has been included as an appropriation to the President, as in previous years. Consideration is being given as to what pattern of appropriations will best serve the aims of the Government in providing military assistance.

MUTUAL SECURITY PROGRAM

[Fiscal years. In millions]

	Budget expenditures			Recommended new obligational authority for 1958
	1956 actual	1957 estimate	1958 estimate	
Military: [1]				
Present program	$2,611	$2,600	$2,100	
Proposed legislation			500	$2,450
Economic, technical, and other: [2]				
Present program	1,587	1,500	1,150	
Proposed legislation			600	1,950
Total	4,198	4,100	4,350	[3] 4,400

[1] Budget expenditures for military assistance do not reflect proceeds from sale of military equipment previously procured with military assistance funds, since these proceeds go directly into miscellaneous receipts of the Treasury.

[2] Discussed in the international affairs and finance section of this analysis. Excludes investment guaranty program.

[3] Compares with new obligational authority of 2,703 million dollars in 1956 and 3,767 million dollars in 1957, excluding investment guaranty program.

INTERNATIONAL AFFAIRS AND FINANCE

The United States can work toward its goal of lasting peace by continuing to help its friends overseas protect their freedom from foreign domination and better their economic conditions. This budget is designed to do that. It also provides funds to promote

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

international understanding through a wider exchange of ideas and persons, and to extend a helping hand to refugees from tyranny and victims of famine.

In the conduct of our international affairs it is necessary to allow for appropriate flexibility in choosing the proper channel to meet each particular situation. In many instances the most effective way to achieve United States objectives, particularly in the political area, is to work through the United Nations. In other instances it may be more effective to utilize regional organizations such as the North Atlantic Treaty Organization and the Organization of American States. The Government will, of course, continue to conduct a major part of its economic and military assistance bilaterally, by dealing directly with other governments through conventional channels, including the Export-Import Bank. In addition, the International Bank for Reconstruction and Development and the International Monetary Fund will undoubtedly continue their active and sound programs of lending for economic development and of strengthening the exchange systems of their members, relying in part on the capital subscriptions and guaranties of the United States Government. The United States Government will also work through the many private welfare organizations operating abroad.

The Government's varied overseas activities have been, and are being, regularly reviewed. For example, recommendations to improve our mutual security operations are being developed by the President's Citizen Advisers on the Mutual Security Program. Special studies are also being conducted by the Senate Foreign Relations and House Foreign Affairs Committees. A special message on the mutual security program will be sent to the Congress after due consideration has been given to the recommendations and studies that have been completed.

Mutual security program, economic, technical, and other.—In order that the United States may continue to help cooperating countries to develop their economies and to meet the burdens of maintaining military strength, the budget provides for an appropriation of 1,950 million dollars for the fiscal year 1958 for the nonmilitary portion of the mutual security program. The military assistance portion of the mutual security program was discussed in the major national security section of this analysis. Total appropriations recommended for the two portions together in 1958 are 4,400 million dollars, compared with 3,804 million dollars enacted for 1957 and 4,860 million dollars recommended for 1957 one year ago in the 1957 budget.

Expenditures for economic assistance are estimated at a moderately higher level in the fiscal year 1958 than in the current fiscal year, carrying on our help in the development of the economic potential of less developed countries. Many of these countries have recently won their independence. Such development should add to the stability of their institutions, and tend to remove long-run causes of international friction. A significant part of the expenditures for economic development will be in the form of loans.

When the special message on mutual security is presented to the Congress, the mutual security appropriations recommended in this budget will be identified with specific activities, insofar as the kinds and amounts of assistance can be reasonably forecast. However, there are many changing situations in the world today and it is necessary to be able to meet these situations quickly and flexibly. The amount recommended for the economic portion of the Mutual Security Program includes certain funds to be appropriated on this basis.

Middle East.—An important example of this type of changing situation was discussed in the recent message on the Middle East. The message emphasized the importance of that area of the world and recommended policies designed to strengthen the countries of that area. Currently available funds can be used to meet 1957 requirements. The recommended 1958 appropriations of 4,400 million

400000—57——III

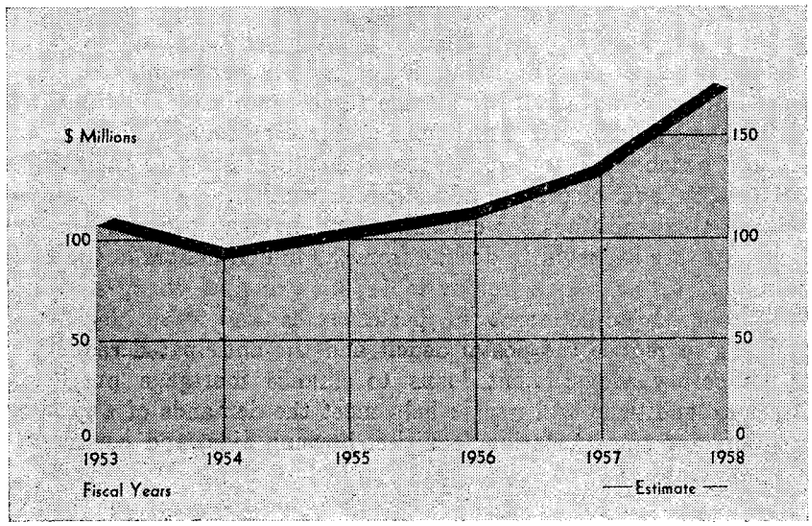
Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

dollars for the total mutual security program include 200 million dollars to be available for discretionary use in the Middle East, in addition to the specific country programs for the area. In order to make most effective use of these funds, especially in relation to solving some of the current problems, it is essential that adequate flexibility be permitted in their use.

International investments and loans.—Loans by the Export-Import Bank for development projects and for assisting the export of United States goods are expected to continue at a high level in the coming fiscal year.

The estimated increase since 1956 in expenditures of the Bank results both from the current rate of loans and from reduced estimates of private participation in the Bank's loans because of attractive alternative private investment opportunities in the United States. Despite rising collections of the Export-Import Bank from loan repayments, the increase in expenditures is estimated to result in a change from net receipts of 90 million dollars in the fiscal year 1956 to net expenditures of 243 million dollars in 1958. While this budget proposes no increase in the Bank's presently available borrowing authority, it may later become necessary to request some increase in borrowing authority to meet future needs.

The International Monetary Fund will be the major source of funds to strengthen the reserve position of the United Kingdom at the present time. The Fund is an international organization to which the United States has made substantial amounts of capital available in the past. Therefore, a drawing on these funds does not appear as an expenditure in the budget now.



The Export-Import Bank recently announced a line of credit against securities to the United Kingdom for the purchase of United States products.

The Government of the United Kingdom has also sought a waiver of the 81 million dollar interest payment that was due last month under the terms of the Anglo-American Financial Agreement of 1945 and the related lend-lease and surplus property settlement. The exact applicability of the waiver provisions is now not clear. Since there have been changes in the conditions envisaged at the time the agreement was signed, recommendations will shortly be made to the Congress for appropriate modification of the present language of the Agreement so as to carry out the spirit of the original intention. This interest payment has been excluded from the estimates of receipts for the fiscal year 1957.

Foreign information and exchange activities.—The intensified worldwide ideological conflict emphasizes the importance of the role of both the Government and private organizations in exchanging information, persons, and ideas abroad. Overseas information services

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

EXPENDITURES FOR FOREIGN INFORMATION AND EXCHANGE

and cultural exchanges are designed to facilitate sympathetic understanding of American life, culture, and institutions by other peoples. Another major role of these programs is to demonstrate to the people of other nations the way in which American policies and objectives are in keeping with their own aspirations.

This budget recommends that expenditures in the fiscal year 1958 for the entire range of foreign information and exchange activities—including exchanges under the Fulbright and Smith-Mundt legislation, and cultural and trade fair programs abroad—be increased by 42 million dollars over the 1957 estimate. This will permit extension of this work within the free world, especially in Asia and Africa, as well as providing more information to those peoples not yet free. Emphasis will be placed on person-to-person contacts on both official and unofficial levels.

Conduct of foreign affairs.—The tasks of the Department of State have been steadily extended, both in Washington and in a growing number of overseas posts. The budget recommendations continue to strengthen the staff and facilities of the Department. Estimated expenditures in 1958 for the conduct of foreign affairs, including buildings, are 194 million dollars, 40 million dollars more than in 1957.

COMMERCE AND HOUSING

The capital investment in several Federal programs for commerce and housing plays an important role in the continued growth of our economy. In the fiscal year 1958, the Government will (1) carry

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

forward improvements in transportation services, (2) acquire facilities and equipment essential to provide better and more economical postal service, and (3) assist local communities to complete an increasing number of projects to foster orderly community development and to remove slums. At the same time, the Government is taking steps to aid buyers of homes obtain a reasonable share of the savings which help to supply the credit necessary to maintain a satisfactory level of private housing construction.

Budget expenditures for commerce and housing programs, in the aggregate, are expected to decline from 2.3 billion dollars in the fiscal year 1957 to 1.7 billion dollars in 1958. Principal changes include the proposed adjustments in postal rates and other legislation designed to reduce the postal deficit and the anticipated reductions in temporary Government loans to finance mortgage purchases. Other expenditures will rise to help meet the demands of a growing economy for transportation facilities, housing aids, and community development.

Promotion of aviation.—Civil and military use of the Federal airways system continues to grow rapidly. The increasing number of commercial, private, and military aircraft must be able to fly safely and on schedule. The military jet aircraft already in use and the jet airliners that will be operating by 1960 create a whole new range of problems. The capacity of the air traffic control system must keep pace.

The comprehensive appraisal of emerging needs for aviation facilities announced in the budget message last year will be completed soon. This will set the broad outline for the Federal airways system of the future. In the meantime, we must install now the best available traffic control equipment and techniques to keep abreast of the growing demand.

The 413 million dollars of new obligational authority recommended for the Civil Aeronautics Administration for 1958 include 150 million dollars to procure and install airways facilities. These include radar installations, better communications, and airport approach lights. In addition, a supplemental appropriation of 26 million dollars will be requested in 1957 to cover the initial cost of integrating two existing short-range air navigational systems into a single system capable of meeting the navigational needs of all users of the airspace.

The recommended 1958 appropriations for the Civil Aeronautics Administration include 195 million dollars to operate the Federal airways system and to maintain high safety standards in aircraft design and operation. The 1958 estimate is about 40 percent above the 1957 amount.

Federal Reserve Bank of St. Louis

Grants to communities for airport construction and improvement will increase. To meet the need for an additional airport for the District of Columbia, a supplemental appropriation of 35 million dollars will be requested for the fiscal year 1957. Although the Congress has been studying alternative solutions, the proposal for a new airport at the Burke, Virginia, site still appears to be the best long-term solution to Washington's airport needs.

The success of this country in military and civil aeronautics depends heavily on the research and development programs of the National Advisory Committee for Aeronautics. The recommended appropriations of 118 million dollars will enable the Committee to give further emphasis to basic research upon which the development of the aircraft of the future must depend. This amount will also permit the acquisition of new, highly specialized facilities for investigation of problems encountered under widely varying conditions of flight.

Estimated budget expenditures in the fiscal year 1958 for all Federal aids to aviation, including the continuing subsidy payments by the Civil Aeronautics Board to certain airlines, will total 464 million dollars, 85 percent more than the amount spent in 1956.

Government aids to aviation confer substantial special benefits upon the users of the airspace. As the cost of providing these benefits rises, it becomes increasingly appropriate for the users to share with the general taxpayers in paying for them.

Highways.—Legislation enacted last year authorized the largest roadbuilding program in history. In accordance with this legislation, expenditures for the Federal-aid highway programs of the Department of Commerce in 1957 and later years will be made from a separately financed highway trust fund. The receipts and expenditures of the trust fund are discussed later in this section.

Budget expenditures for highways are now limited to forest highways and other direct Federal construction. They are estimated at 42 million dollars in the fiscal year 1958.

Promotion of water transportation.—The worldwide shortage of modern oceangoing ships emphasizes the importance of the ship replacement program begun 2 years ago by the Department of Commerce. Most of the United States merchant fleet was built during World War II and should be replaced over the next 15 to 20 years. In order that construction may be scheduled on an orderly basis, the Department is entering into long-term contracts with subsidized ship operators for the replacement of their ships. It is also guaranteeing ship mortgages and using other incentives which do not require substantial expenditures of Federal funds to encourage construction of other new ships.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

As the next installment in the replacement program, the budget includes 120 million dollars in 1958 appropriations for ship construction and for maritime research. The 1958 program would permit construction of a new sister ship for the superliner *United States* and several smaller ships. Construction will be well underway in 1958 on the nuclear-powered merchant ship being built jointly by the Department of Commerce and the Atomic Energy Commission under previous appropriations.

Expenditures for ship construction will not increase substantially until the fiscal year 1959, primarily because of the long period required to get work underway. Other expenditures for water transportation are primarily for the Coast Guard and for ship operating subsidies.

Postal service.—Over the past few years the Post Office Department has introduced major economies in the processing and handling of mail. These economies, however, have only partially offset the rising costs resulting from a larger mail volume, higher salaries, increased prices for supplies and equipment, and especially the extension of city delivery service to unprecedented numbers of new suburban residential developments. As a result, if present postal rates are not adjusted to cover costs, net expenditures of 642 million dollars will be required in the fiscal year 1958 to make up for insufficient postal receipts.

The adjustments in rates recommended in this budget are designed to increase postal revenues by 654 million dollars in the fiscal year 1958. If this recommendation is approved by the Congress, a supplemental appropriation, tentatively estimated at 70 million dollars, will be proposed to permit investment in equipment and facilities necessary for more efficient handling of the ever-increasing volume of mail. The budget figures reflect these recommendations. Also, the Post Office Department should be specifically reimbursed for the cost—estimated at 28 million dollars in 1958—of services it is required by law or international agreement to perform free or at reduced rates for nonprofit associations and other special groups.

Community development and facilities.—The first slum clearance project under legislation enacted in 1949 was brought to a close last spring, and an estimated 40 more projects will be completed by the end of 1958. More important, by that time 285 projects will be in process of actual clearance and redevelopment, and plans will be underway for 246 more—many of these in smaller cities. In addition to the extensive private investment in redeveloped areas, these 572 projects will ultimately involve total costs of more than 2.5 billion dollars, of which Federal capital grants will provide an estimated 1.2 billion dollars.

To underwrite the Federal share of the cost of this program, legislation is recommended to provide new obligational authority of 250

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

million dollars a year for 2 years. Budget expenditures in 1958 are estimated at 47 million dollars and will gradually increase in later years.

Public housing programs.—The Housing Act of 1956 authorized the Public Housing Administration to contract with local public agencies for construction and operation of 70,000 additional units of low-rent public housing, at the rate of 35,000 new units a year. These units will be particularly helpful in meeting the needs of low-income families displaced as more urban renewal sites are cleared.

Many small communities which need low-rent public housing units have unnecessary difficulty in qualifying for Federal aid because of the requirement for a workable program to eliminate or prevent slum conditions in their areas. Since the benefits to be obtained in small communities from this requirement do not justify the burdens and expense involved, such communities should be exempted from it.

By the end of the fiscal year 1958, the Public Housing Administration expects to dispose of all remaining war and emergency housing units from an inventory that originally exceeded 900,000 such units. In addition, a substantial start will have been made in sales of housing units and commercial properties in the Government-owned communities of Oak Ridge, Tennessee, and Richland, Washington.

College housing.—Rising college enrollments, plus the attractiveness of a very low statutory interest rate on Federal loans, have caused sharp increases in applications for loans for college dormitories and related facilities. To continue the present commitment level of 250 million dollars a year, additional borrowing authority of 175 million dollars is requested for the fiscal year 1958. Also, a more realistic formula for interest rates on these loans should be provided in legislation. This formula should be based on current Treasury borrowing costs for comparable maturities.

Aids to private housing.—The Government encourages private housing primarily through insurance of mortgages by the Federal Housing Administration and guaranties of loans by the Veterans Administration. Increased demands for credit for other purposes last year made these insured and guaranteed mortgages unattractive to many private lenders at the maximum interest rates then permitted. As a result, many potential buyers were unable to borrow for the purchase of homes, and as the demand fell off, builders curtailed the number of new homes begun. To bring interest rates on insured mortgages into line with market rates of interest, the Federal Housing Administration has permitted adjustments in all rates which were not already at their

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

statutory ceilings. Legislation is recommended to permit similar interest rates on loans guaranteed by the Veterans Administration, so that more veterans may obtain these loans.

Private lenders cooperating with the Housing and Home Finance Agency under the voluntary home mortgage credit program have provided insured or guaranteed loans for many veterans and other home buyers living in remote areas as well as for members of minority groups otherwise unable to obtain private credit. This program should be extended for 3 years beyond the present expiration date of June 30, 1957.

The Veterans Administration makes direct housing loans to veterans in areas where credit is hard to obtain. Adjustment of interest rates on guaranteed loans and extension of the voluntary home mortgage credit program should make the funds now available adequate for the direct loan program. Legislation is also proposed to adjust the interest rate on direct loans so as to keep it the same as on guaranteed loans, in conformity with past practice.

The direct loan program for all veterans and the guaranty program for World War II veterans expire in July 1958. To help make adequate mortgage funds available at that time, additional authority may be needed to permit the Federal Housing Administration to liberalize the terms under which it insures mortgages for veterans and nonveterans alike.

Federal National Mortgage Association.—Under its secondary market functions, the Federal National Mortgage Association purchases both insured and guaranteed mortgages at prevailing market prices. Adjustments in interest rates on these mortgages should encourage private lenders to reenter this market, thus reducing the volume of mortgages offered to the Association. However, as a result of the substantial purchases made over the past several months, the effective borrowing authority of the Association will be fully committed before the close of the fiscal year 1957.

To enable the Association to continue making available a reasonable minimum of mortgage funds, new obligational authority in two forms should be provided by legislation early in the present session of the Congress. First, the Government should be authorized to buy an additional 100 million dollars of preferred stock of the Association. This will allow the Association to obtain up to an additional 1 billion dollars privately, through the sale of nonguaranteed debentures to private investors. Second, the Association should be authorized to borrow an additional 700 million dollars from the Treasury. One-half of this borrowing authority should be made available in the fiscal year 1957, and the remaining half in 1958. If the Congress provides adequate authority to draw temporarily on the Treasury when necessary, it should be possible to finance privately the bulk of the secondary

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

market operations in 1958. Budget expenditures for such temporary Treasury loans are estimated at 203 million dollars in the fiscal year 1958.

In other operations of the Association, substantial commitments are anticipated in both 1957 and 1958 to purchase mortgages insured under the urban renewal, military family, elderly family, and other specially designated housing programs. Additional legislation to authorize new purchases amounting to 250 million dollars, including 50 million dollars for cooperative housing, is recommended for the fiscal year 1958.

Other aids to business.—The Small Business Administration has been providing effective assistance to help small concerns obtain adequate financing and a fair share of Government contracts. Because of the difficulties many small businesses encounter in obtaining adequate bank credit in a money market subject to heavy competing demands, applications for loans have been increasing. Available funds will shortly be exhausted, and additional appropriations of 45 million dollars in 1957 and 66 million dollars in 1958 are requested. These figures assume extension of the basic legislation for the Small Business Administration which expires on June 30, 1957.

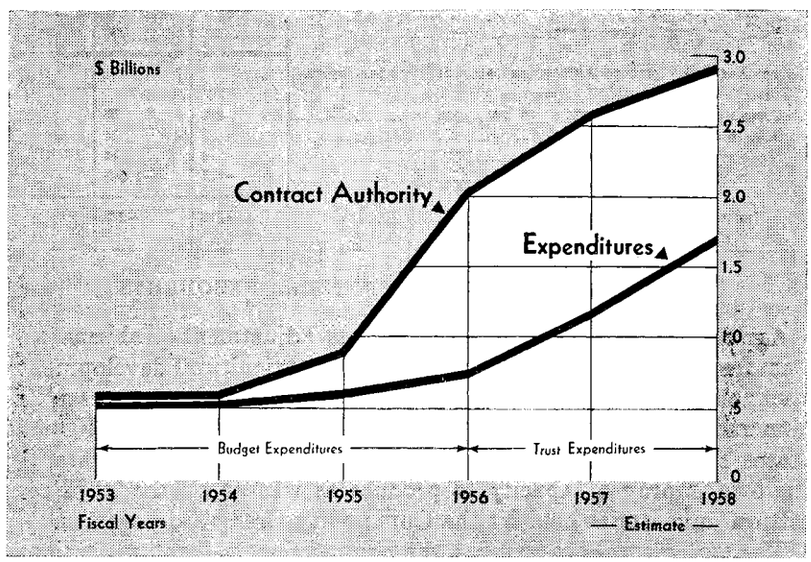
The fees of the Patent Office in the Department of Commerce should be adjusted to make the Office more nearly self-supporting. Under an 8-year program initiated last year, substantial progress is now being made to reduce the backlog of pending patent applications.

Area redevelopment—proposed legislation.—Despite continuing high levels of employment and income, pockets of unemployment persist in several areas. Legislation is again recommended to authorize the Secretary of Commerce, with the assistance of other appropriate agencies, to provide loans and other aids to communities which seem to be in chronic economic distress. This aid will help those communities in attempting to solve their basic problems.

Disaster insurance, loans, and relief.—The experimental program for Federal insurance against flood losses, which was recommended and enacted last year, will soon be underway. A supplemental appropriation of 100 million dollars is recommended for this fiscal year to finance initial operations. An additional appropriation of 4 million dollars for administrative expenses is recommended for 1958.

The 1958 recommendations also include 12 million dollars under proposed legislation for disaster loans by the Small Business Administration.

Civil defense.—For budget classification purposes, expenditures for civil defense are grouped with those for peacetime disasters. The



Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

civil defense program was discussed, however, in the major national security section of this analysis.

Highway and housing trust funds.—Under legislation enacted last year, the Federal share of the new highway program will be financed from proceeds of certain excises on motor fuels, tires, and vehicles. These receipts are deposited in a highway trust fund.

The legislation authorized Federal grants averaging about 2 billion dollars a year for a 13-year period to cover 90 percent of the cost of completing the Interstate Highway System—an integrated network of efficient and safe roads linking major centers of population and industry. Increased grants amounting to 875 million dollars for the fiscal year 1958 were also provided for primary, secondary, and urban highways not in the Interstate Highway System. Prudent planning is continuing in cooperation with the States in order to assure maximum value for each dollar spent.

FEDERAL-AID HIGHWAY PROGRAM

Expenditures from the trust fund in the fiscal year 1958 for Federal-aid highways are estimated at 1.7 billion dollars and are expected to rise gradually in later years to nearly 3 billion dollars annually. The excess of receipts over expenditures in the early years will accumulate in the trust fund for later use. Balances in the fund are expected to reach 770 million dollars by the close of the fiscal year 1958.

The privately financed mortgage purchases under the secondary market functions of the Federal National Mortgage Association are

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

trust rather than budget expenditures. They are estimated at 500 million dollars in 1958. Temporary borrowing from the Treasury and preferred stock investment by the Treasury, amounting together to 705 million dollars in 1957 and 203 million dollars in 1958, are included in budget expenditures.

AGRICULTURE AND AGRICULTURAL RESOURCES

Agriculture is confronted with serious adjustment problems that stem from international as well as domestic agricultural developments. Technological advances in agriculture by other nations are resulting in increased production which in many instances has restricted United States export markets. These problems are further complicated by our own improved capacity to produce as well as by the large agricultural inventories held by the Commodity Credit Corporation.

The agricultural programs of the Federal Government are designed to meet these problems and to foster long-run improvements and adjustments in the Nation's farm economy. The soil bank legislation enacted last year is helping to curtail crop production and support farm income; it also facilitates the shifting of cropland to uses more consistent with long-term conservation objectives. Other Federal programs are helping to move large quantities of food and other farm products into consumption at home and abroad. Research programs

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

have been enlarged to find ways to reduce marketing and production costs and to develop new industrial uses and other permanent market outlets for our farm products. Educational and credit services have been expanded to help farmers take advantage of the results of research, and special attention is being given in the rural development program to low-income farmers.

[1] Net expenditures for the Farmers' Home Administration and for rural electrification and telephone loans do not reflect loan collections, since these collections go directly into miscellaneous receipts of the Treasury. In 1958 these collections are estimated at 157 million dollars and 95 million dollars respectively.

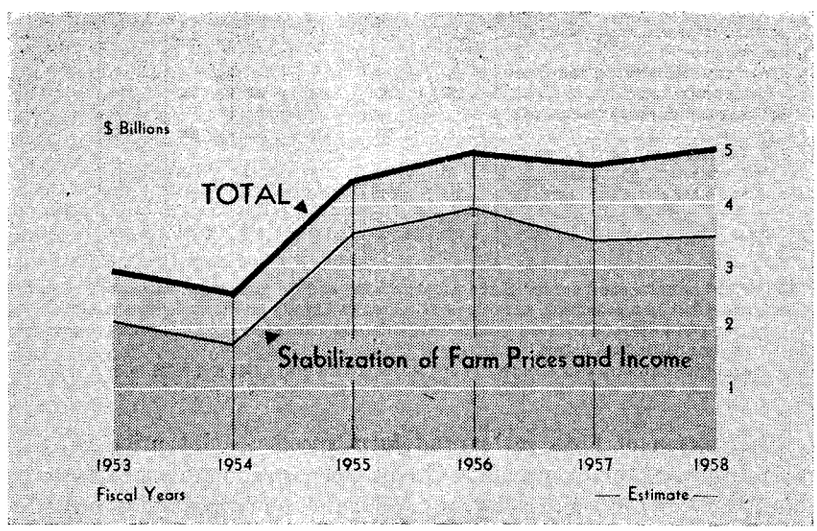
[2] Less than one-half million dollars.

[3] Compares with new obligational authority of 3,310 million dollars in 1956 and 5,096 million dollars in 1957.

Stabilization of farm prices and farm income.—Net price support expenditures of the Commodity Credit Corporation are expected to be about the same in the fiscal year 1958 as in the current year but sub-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

stantially below the amount spent in 1956. However, the decrease from 1956 is more than offset by increases in expenditures for the soil bank and other agricultural programs.



In the fiscal year 1956, retirement of all outstanding certificates of interest used in financing previous price support loans, and curtailed purchases of United States cotton by foreign buyers in anticipation of more favorable prices, contributed to the high net price support expenditures in that year.

In the fiscal year 1957, no funds will be required for the redemption of certificates of interest. In addition, increased sales of farm commodities abroad, particularly cotton, are expected to decrease net budget expenditures for price supports still further.

In the fiscal year 1958, exports of price supported commodities are expected to be less than in 1957. This factor, which tends to increase net price support expenditures, will be partially offset by the initial effects of crop acreage reductions under the soil bank. The full effects of the soil bank on price support expenditures will come in later years.

Under the acreage reserve program of the soil bank, farmers are compensated for loss of net income resulting from their voluntary withdrawal of land from crop production. Under the conservation reserve program of the soil bank, they receive rent for other cropland placed in cover crops and reforestation and also receive payments to cover part of the cost of carrying out certain conservation practices. Expenditures for both programs are estimated to total 1.3 billion dollars in 1958, somewhat more than in 1957.

NET EXPENDITURES FOR AGRICULTURAL PROGRAMS

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Under title I of the Agricultural Trade Development and Assistance Act of 1954 (P. L. 480), substantial quantities of farm products have been disposed of abroad in return for foreign currencies. This title expires on June 30, 1957. It should be extended for 1 year and the present legal limit of 3 billion dollars on the permissible loss under this program should be increased by 1 billion dollars. Extension for a 1-year period will enable the Congress to consider alternative measures that will contribute to a continued development of normal export markets.

The new obligational authority recommended for the fiscal year 1958 for price support, supply, and purchase programs of the Commodity Credit Corporation is made up of (1) 1,240 million dollars to restore the capital impairment of the Corporation experienced in 1956, mainly from price-support losses, and (2) 637 million dollars to reimburse the Corporation for costs and losses incurred in 1956 under title I of the Agricultural Trade Development and Assistance Act.

Rural electrification, rural telephones, and farm credit.—This budget continues strong support for the rural electrification and rural telephone programs. It provides for new electrification loans totaling 185 million dollars and new telephone loans totaling 80 million dollars in the fiscal year 1958, the same amount of loan approvals as anticipated in 1957. Disbursements on loans and administrative expenses are expected to result in budget expenditures of 265 million dollars in 1958, which is 31 million dollars more than in 1957 and 48 million dollars more than in 1956.

Budget expenditures for the credit programs of the Farmers' Home Administration, exclusive of farm housing loans which are included in the commerce and housing section of this analysis of the budget, are estimated at 294 million dollars in the fiscal year 1958. The substantial rise of 109 million dollars in estimated annual expenditures since 1956 reflects in part the legislation enacted last year expanding the scope of this agency's authority to refinance farm debts and to make loans to farmers whose farms are smaller than family size. The increase results also from the operating loans estimated to be made in designated counties as a part of the rural development program and from the additional credit needs of farmers suffering from continued drought and other economic disasters.

In connection with the loan program of the Farmers' Home Administration, legislation will be proposed to modify the present formula for the distribution of loan funds among States and Territories. The budget also provides for some increase in the authority to appropriate for loans under title I of the Bankhead-Jones Farm Tenant Act.

In accordance with the proposals of the Hoover Commission, legislation will be recommended to liquidate the Agricultural Marketing

Digitized for FRASER

Federal Reserve Bank of St. Louis

Act revolving fund by transferring its assets to the Treasury. As of June 30, 1956, this fund had assets of 186 million dollars, consisting of 150 million dollars of the capital stock of the central and regional banks for cooperatives and 36 million dollars of balances with the Treasury.

Agricultural land and water resources.—A substantial increase in budget expenditures for the conservation and development of land and water resources is provided for in this budget. Cost-sharing payments for conservation practices under the soil bank, which were begun in the current fiscal year, are a major addition to the previous level of conservation expenditures.

Under the Great Plains conservation program, which was authorized by legislation enacted last year, long-term contracts will be entered into with farmers whereby they agree to carry out specified soil management and land-use practices. The budget provides for 20 million dollars of new obligational authority for the Great Plains conservation program in 1958.

Spending under the program authorized by the Watershed Protection and Flood Prevention Act is estimated to increase in 1958. Funds are provided in the budget for the continuing cost of some 83 projects underway in 1957 and for the Federal share of first-year costs on approximately 80 additional projects expected to be started by local groups in 1958.

Research and other agricultural services.—The expansion of research and educational programs of the Department of Agriculture, which was undertaken at the beginning of this administration, will be continued under this budget. Efficiency in agricultural production, development of new industrial uses for farm products, and expansion of markets for farm commodities will continue to be emphasized in order to advance the long-run interests of both farmers and consumers.

As a part of the rural development program, specialized research, technical assistance, and credit will be provided to assist State and local groups to develop and improve economic opportunities in rural areas with low average family income. The Federal Government and States and local groups are now working jointly in designated pilot counties.

Federal intermediate credit banks trust fund.—In accordance with the Farm Credit Act of 1956, the production credit corporations were merged into the Federal intermediate credit banks as of January 1, 1957, and provision was made for the retirement of the Government's capital in the banks and for their eventual ownership by the production credit associations. Because of this change in financial struc-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ture, the transactions of the banks are being carried as trust fund expenditures starting January 1, 1957.

In the fiscal year 1958, the total loans and other outlays of these banks are estimated at 2,201 million dollars; total collections, principally from loan repayments, at 2,159 million dollars; the resulting net outlay of the trust fund is an estimated 42 million dollars.

At the time the Farm Credit Act of 1956 was approved last year, the lack of adequate protection of the Government's interest in the surplus of the intermediate credit banks was pointed out. The Government's interest should be protected, even though the prospect of dissolution or liquidation of any bank is remote.

NATURAL RESOURCES

The development and conservation of the resources of America are vital to the present and future strength of the Nation. They must be a concern not only of the Federal Government, but of everyone. Individual enterprise and State and local participation are essential to effective development of the Nation's soils and forests, water, minerals, fuels, and fisheries.

Federal budget expenditures for natural resources in the fiscal year 1958 are estimated at 1.5 billion dollars, 167 million dollars more than in 1957. In addition to their general economic value, many of the resource development programs produce substantial revenues for the Government.

The policies enunciated in the budget message with respect to the present active competition for labor, materials, and equipment in the construction industry and to the rate of Federal construction expenditures are especially applicable to natural resource programs.

Land and water resources.—The Presidential Advisory Committee on Water Resources Policy has recommended national policies and improved administrative organization to bring about the best use of water resources. This budget provides for certain of these recommendations which can be achieved by budgetary action. Important among these is expansion of the collection of basic data needed for planning water resource developments. Legislative proposals to carry out other recommendations of the Committee will be transmitted to the Congress as developed.

The Corps of Engineers and the Bureau of Reclamation will continue construction on 299 going projects for flood control, navigation, irrigation, water supply, and power. Construction of 38 of these projects will be completed in 1958.

This budget provides for starting construction on certain new projects which are now authorized. It is recommended that the Bureau of Reclamation start 6 irrigation and water-supply projects,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and the Corps of Engineers start 7 navigation projects, 13 flood-protection projects, 3 flood-control reservoirs, and a powerplant at an existing installation, as well as some small projects to be selected by the Secretary of the Army. Advance planning on these new projects has reached the stage where the design and scope of the major structure have been clearly determined and a sound estimate of cost has been prepared. First-year expenditures for these new starts are estimated at 12 million dollars. The total estimated cost to complete these projects is 300 million dollars.

Recommendations for related watershed and flood prevention activities of the Department of Agriculture were discussed in the section on agriculture and agricultural resources.

Work is underway on the comprehensive Upper Colorado River Basin development which the Congress authorized during the past session. Legislation is still needed, however, to permit the Fryingpan-Arkansas multiple-purpose project to proceed. Appropriations which will enable the Bureau of Reclamation to initiate this construction are included under proposed legislation for 1958.

This budget also includes 10 million dollars under proposed legislation to enable the Corps of Engineers to participate in 1958 with States, local governments, and private groups in the development of partnership water resources projects, such as the Bruces Eddy Reservoir in Idaho and the Oroville Reservoir in California, neither of which has yet been authorized. Also, where feasible and in the public interest, non-Federal interests will be encouraged to participate with the Federal Government in certain previously authorized projects now in various stages of planning or construction. Similar partnership arrangements are being considered by the Bureau of Reclamation.

In previous years this administration has recommended legislation to provide that the Federal Government make payments to owners of non-Federal water resources projects when Federal hydroelectric power developments benefit from these projects. In simple equity, the Government should pay for such benefits in the same way that licensees must pay for the benefits they derive from Federal or other projects. The Federal Power Act should be amended during this session to provide for such Federal payments.

The Small Reclamation Projects Act of 1956 is a step forward in Federal, State, and local cooperation. Appropriations to permit the Bureau of Reclamation to proceed with the program will be requested as soon as the basic legislation is amended to correct deficiencies with respect to the responsibility for approval of project proposals by the executive branch, which were pointed out at the time the legislation was approved.

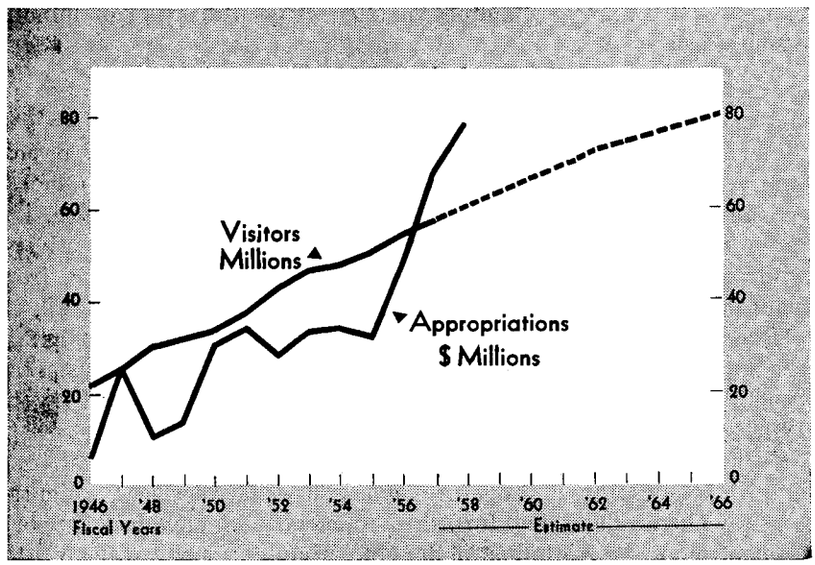
To assure efficient use of resources and to safeguard the public investment, the 1958 budget includes funds for the Bureau of Reclamation and the Corps of Engineers to make general investigations and to prepare project designs that are needed prior to construction of water resources projects. Also, an appropriation of 1 million dollars is included under proposed legislation to permit immediate initiation of planning of the most urgently needed projects expected to be authorized in river and harbor and flood-control legislation early in this session of the Congress. Presidential approval of the measure enacted during the last session was withheld primarily because many of the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

projects included had not been reviewed in accordance with established procedures.

As a further step in coping with the growing water scarcity, increased appropriations are recommended in the fiscal year 1958 for research and pilot-plant operations for converting saline water to fresh water for municipal, industrial, and agricultural uses. This research is undertaken by the Department of the Interior in cooperation with other public and private groups.

Construction of the St. Lawrence Seaway will go forward in the fiscal year 1958. To meet increased construction costs and provide for additional dredging work not originally contemplated, 35 million dollars of additional borrowing authority is recommended for 1958 under proposed legislation.



The Tennessee Valley Authority will continue construction in the fiscal year 1958 of the Wilson Lock started in 1957. Work on 7 steam-electric generating units at present plants was started in the fiscal years 1956 and 1957 with proceeds from the sale of power, as approved by the last Congress, and will be continued in 1958. Based on the best information now available, it appears that additional generating capacity will be needed to meet TVA power requirements by the end of the calendar year 1960. Legislation is recommended to authorize the TVA, subject to regular budgetary review, to finance new generating facilities by the sale of revenue bonds. After the Congress has acted upon this legislative proposal, the power requirements of the TVA will be reexamined. Pending this re-examination, an authorization of 30 million dollars for construction of a new unit of about 180,000 kilowatts at an existing steam plant is included in the budget under proposed revenue-bond legislation to meet power needs of the area.

Forest, fish and wildlife, and recreational resources.—This budget provides funds to increase soil-conservation work on the lands in the national forests, in the public domain under the Bureau of Land Management, in the national parks and wildlife refuges, and on Indian lands held in trust by the Government. The budget also provides for forestry research and reforestation, for leasing of mineral and grazing lands, and for necessary construction of schools for Indians. Consistent with the needs for expanded timber sales, provision is made for access roads.

Provision is made for carrying forward the 10-year development and improvement program of the National Park Service. This program is designed to provide the necessary facilities and personnel to accommodate an estimated 80 million visitors to the national parks in 1966.

Federal Reserve Bank of St. Louis

NATIONAL PARK SERVICE PROGRAM

National forests also offer recreational opportunities for many millions of our citizens. The 1958 budget provides for an enlarged program to develop and improve campgrounds, picnic areas, and sanitation and other facilities to accommodate the recreational users of these forests.

A reorganization of the Federal programs for fish and wildlife resources has been effected in accordance with legislation enacted by the last Congress. To assist commercial fisheries in improving their competitive position, expenditures for fishery research will be increased in the fiscal years 1957 and 1958. It is estimated that loans of 12 million dollars over the 2-year period will be made from the newly established fisheries loan fund, and a program of vocational education grants for training fishery technicians will be inaugurated in 1958.

Our sport fishery and wildlife resources make a substantial contribution to meeting the recreational needs of our citizens. A study is underway to determine future needs for fish and wildlife programs.

Mineral resources.—The Secretary of the Interior is developing a minerals program to meet the long-range needs of the Nation, now that the defense minerals programs are nearing completion. In the meantime, a program authorized in the past session of the Congress will provide 91 million dollars of assistance to segments of the mining industry in adjusting from defense needs to normal market conditions. The Geological Survey and the Bureau of Mines will also continue

400000—57——v

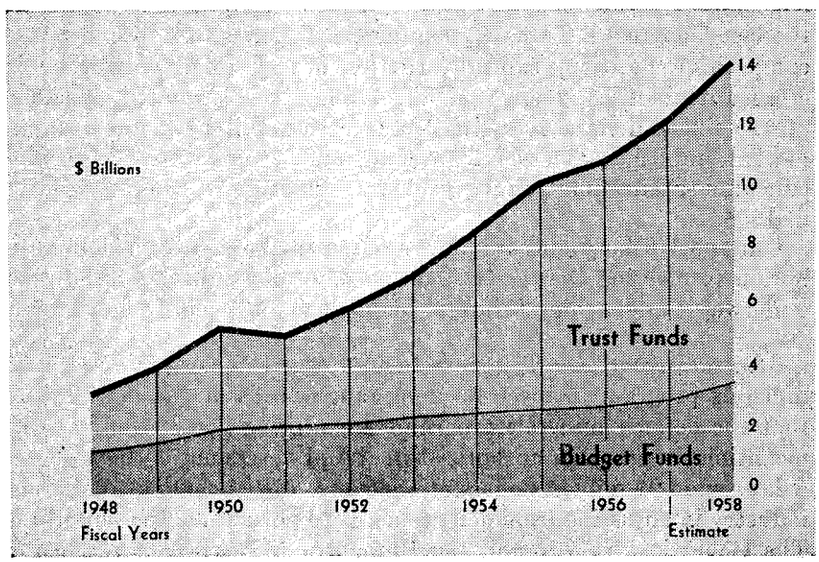
Federal Reserve Bank of St. Louis

their activities in support of exploration for new deposits, development of improved mining techniques, and effective utilization of mineral resources.

LABOR AND WELFARE



The objective of the Government's labor and welfare programs is to further the well-being of the people by increasing individual opportunity, fostering self-reliance, and providing safeguards against economic hazards. These programs aid education and science, improve health, facilitate employment and increase labor productivity, while aiding the aged, disabled, and dependent to enjoy life free from want for its necessities.

Budget expenditures in the fiscal year 1958 for labor and welfare programs are estimated at 3.5 billion dollars. In addition, estimated benefit payments of more than 10 billion dollars will be paid by the Federal social insurance and retirement trust funds.

Primary reliance has been placed upon the States and local communities to organize and operate labor and welfare services, while the Federal Government has furnished financial and technical support. Four-fifths of the 3.5 billion dollars of estimated budget expenditures for labor and welfare services in 1958 is for grants-in-aid to State and local governments.

As science lengthens the span of life and the average age of the population increases, the problems of older people—there are now 15 million past the age of 65—assume increasing significance. The

EXPENDITURES FOR LABOR AND WELFARE

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Federal Government's participation in activities that benefit older citizens is extensive. Payments for old-age and railroad retirement benefits (paid from trust funds and not included in budget expenditures), and veterans' pensions and public assistance grants for the aged are estimated to total more than 8 billion dollars in 1958. In addition, other special activities in health research, employment assistance, housing, and veterans' services benefit our aged citizens.

Last March a Federal Council on Aging was established to coordinate Federal activities, to improve working relationships with the States in this field, and to devise better means for meeting the needs of the aged. In this coming year the Federal Government will provide leadership in a cooperative effort with business, private organizations, and State and local governments to enlarge the employment opportunities which many of our older citizens need and want. The Department of Labor will continue its program to remove barriers to employment of older workers, and State employment security agencies will give increased attention to employment opportunities for such workers. This budget also provides greater emphasis on health services to older persons.

The President's Council on Youth Fitness, of which the Vice President is chairman, was established in July to promote and coordinate the numerous Federal activities in the field of physical and general youth fitness and to work with State, local, and private groups in this field.

Promotion of education.—Since the White House Conference on Education was held a year ago, the States and communities have made greater efforts to overcome their educational problems. Sixty-nine thousand classrooms, 10 percent more than last year, are expected to be built in the school year 1956–57. The number of teachers and their average salaries have also been increasing. Despite these gains, growing enrollments are straining the financial capacities of school districts in many areas of the country. Today, 31.5 million children crowd the public schools beyond their normal capacity and enrollments are increasing by well over 1 million per year.

Legislation is recommended to complete in 4 years the general school construction assistance program which was proposed as a 5-year program last year. This budget includes new obligational authority of 451 million dollars for the first year under this proposed legislation.

Last April the President's Committee on Education Beyond the High School was appointed to consider problems created by the record enrollments in colleges and universities. The budget anticipates a supplemental appropriation for the fiscal year 1957 to finance the State and regional conferences which the Committee plans to hold before it prepares its final report. It also provides in 1958 for assistance under proposed new legislation to encourage States to undertake specific planning action to meet their needs in higher education.

Expenditures for other activities of the Office of Education are primarily to carry out the 2-year extension of assistance to areas where school enrollments are seriously affected by Federal activities and to provide for educational research and for grants for vocational education.

The budget recommendations for the Department of the Interior include funds for the education of Indian children and for a recently enacted program for vocational education of adult Indians.

Labor and manpower.—The budget provides grants to the States for the administrative costs of providing employment service and unemployment compensation, and for the employment security work of the Department of Labor. The recommended grants include funds for job placement of older and handicapped workers. Better methods of scheduling placement will continue to assure longer and steadier work for domestic migrant farm workers. The budget for other labor and manpower programs continues enforcement and promotional work to insure greater compliance with labor legislation, and provides for enforcement of labor standards in the use of Mexican nationals who work on farms. Further improvements are recommended in labor statistics.

Rapid scientific and technological developments are creating new industries which are faced with shortages of skilled workers and technicians. The Department of Labor has recently undertaken training programs in a broader range of occupations. Support is provided for these programs in 1958 through the newly reorganized Bureau of Apprenticeship and Training.

In addition to the new legislation to improve the Government's labor programs which was recommended earlier in the budget message, legislation is also recommended to (1) increase, as part of the proposed area redevelopment program, assistance in labor services to local areas where there has been persistent and chronic unemployment and (2) provide insurance benefits to workers in the District of Columbia who are temporarily disabled because of nonoccupational accidents or illness and improve the District of Columbia unemployment insurance law.

Promotion of public health.—Expenditures for promotion of health during the fiscal year 1958 are estimated to be 607 million dollars, 106 million dollars more than in the current year.

The budget recommendations for the National Institutes of Health for the fiscal year 1958 provide for more research, while keeping in proper balance support of individual projects, training of additional technicians, and new laboratories and other facilities. This balance is necessary to safeguard the quality of research because of the high utilization of the present technical resources. An increase of 38 million dollars in expenditures is estimated, primarily for the new grants to assist in the construction of medical research facilities and to provide the non-Federal institutions receiving grants with more equitable payments for the indirect costs of these programs.

Expenditures for Federal aid to hospital construction are estimated at 100 million dollars in the fiscal year 1958. The increase of 17 million dollars over the 1957 estimate includes the provision of nursing homes, rehabilitation facilities, and chronic disease hospitals which are especially important to older people and to others suffering from long-term illness or disability. The budget also includes 62 million dollars in 1958 for the recently started program for grants to communities to stimulate construction of waste treatment facilities where Federal aid is appropriate.

To meet other health needs, this budget includes increased expenditures for community health services to the aged and those with chronic diseases, for research in combating air and water pollution, for accident prevention, and for health services to children and Indians. Grants for poliomyelitis vaccine will no longer be needed. Enforcement of the food and drug laws will be strengthened.

To help meet the critical need for more medical research scientists and other health personnel, the recently enacted legislation for construction grants for medical and dental research facilities should be amended to include teaching facilities. New obligational authority of 15 million dollars is recommended for this purpose. First-year expenditures are estimated at 3 million dollars.

National Science Foundation.—An increase of 25 million dollars in the appropriations for the regular program of the National Science Foundation is recommended for the fiscal year 1958. This will enable the Foundation to deal more effectively with two problems of national importance in the field of science. First, only a very small proportion of the billions of private and public funds devoted to research and development is for the basic research on which progress in the applied scientific fields of health, industrial technology, and weapons development depends. The Foundation will increase its grants for basic research projects and for special research facilities. Second,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

to help overcome the acute shortage of skilled scientists and engineers, the Foundation will make a major effort to improve training in science, particularly by increasing the number of qualified teachers, by interesting a larger number of able students to enter scientific careers, and by granting fellowships to graduate and post-doctoral students.

Although expenditures for the International Geophysical Year program will decline, most of the actual scientific operations all over the world will be carried out during the fiscal year 1958.

Other welfare services.—The appropriation for the school lunch program, mainly for cash grants to the States, is recommended at 100 million dollars for 1958, the same as for 1957. The Federal Government will also contribute to the school lunch program in 1958 by (1) making donations of surplus agricultural commodities estimated to have a value of approximately 130 million dollars, and (2) spending 70 million dollars through the Commodity Credit Corporation for the school milk program.

For the past 3 years the Federal Government has increased its financial aid and technical assistance to States and communities for rehabilitating the disabled. The number of persons rehabilitated each year has reached a record level. This budget reflects a further expansion in this program.

Legislation is recommended to (1) authorize construction of sanitation facilities for Indians, (2) transfer Freedmen's Hospital to Howard University, with provision for construction of a new teaching hospital, (3) authorize special grants for training of teachers for mentally retarded children, and (4) assist States in combating juvenile delinquency more effectively. The budget anticipates expenditures of 5 million dollars in the fiscal year 1958 for these new programs.

Provision is made in the budget to promote the principle of self-help and self-care through research into causes of dependency and through training grants for welfare personnel as authorized by the 1956 social security amendments.

Public assistance.—The social security amendments enacted in 1956 raised Federal matching funds for State public assistance to people whose needs are not met by social security insurance, and provided new grants for medical care. Largely as a result of the 1956 amendments, Federal grants for public assistance are estimated to increase 100 million dollars to a total of 1.7 billion dollars in the fiscal year 1958. Benefits will be paid by State agencies to an average of 5 million persons in 1958, including 2.5 million on the old-age assistance rolls which are declining as social insurance benefits cover more people.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Social insurance and retirement trust funds.—Expenditures for social insurance programs and for the payment of Federal civilian employees' retirement benefits do not appear in the total of budget expenditures because they are financed separately through trust funds. The total disbursements from these funds for 1958 will exceed 10.5 billion dollars, mainly for benefits under the various insurance programs. Reserves for future payments, which are invested in Government bonds, will increase to approximately 46 billion dollars at the end of the fiscal year 1958.

Benefits will be paid in 1958 from the old-age, survivors, and disability insurance trust funds to some 9,100,000 retired persons, 380,000 disabled workers, and 1,800,000 mothers and children. These numbers include women between the ages of 62 and 65 and disabled workers between the ages of 50 and 65, who will receive benefits for the first time under the social security amendments enacted in 1956. Legislation is recommended to improve coordination between old-age insurance tax and income tax reporting procedures.

The Federal Government is responsible under law for payments under the social security and railroad retirement funds for credits toward benefits which are accorded for time spent in military service. In the case of the railroad retirement account, the Comptroller General of the United States has informed the Congress that payments already made to the fund by the Federal Government under existing law exceed the estimated actual cost of future benefits for time spent in military service prior to July 1948 by more than 300 million dollars. In order to avoid further overpayments, it is recommended that legislation be enacted to change the basis for appropriations so that the Government henceforth will reimburse the fund for the actual cost of military service benefits as they are paid.

With respect to the employer and employee contributions to the railroad retirement system, provision should be made for adequate long-term financing of the system on a self-supporting basis. The congressional committees concerned reported they would take action, and the need for a sounder financial basis was pointed out in the statement issued last summer when new legislation raising benefits was signed.

VETERANS' BENEFITS AND SERVICES

The Nation's obligation to provide for the special needs of war veterans and their dependents is being met by a wide range of special services and benefits, which account for nearly one-fifth of all budget expenditures other than those for major national security programs. Expenditures for veterans programs will continue to increase in the fiscal year 1958, largely because of the rising number of veterans and their survivors who receive non-service-connected pensions.

Veterans programs generally have served their purpose well. However, the problems which face veterans change as economic and social conditions change and as the Government's general health and economic security programs expand in scope and adequacy.

Against this background, executive review is being made of agency comments on the comprehensive report of the President's Commission on Veterans' Pensions, headed by General of the Army Omar N. Bradley. A special message will be transmitted to the Congress outlining legislative proposals in this field. This budget includes 100 million dollars to cover the estimated cost in 1958 of these proposals.

Federal Reserve Bank of St. Louis

Readjustment benefits.—The education and training program now applies principally to veterans of the Korean conflict. Average enrollment of this group is expected to reach a peak in the fiscal year 1957 and then drop about 4 percent to 569,000 in 1958. As a result, expenditures are estimated to drop by 33 million dollars in 1958, even though they include the cost of education and training for some 9,000 children under the War Orphans' Educational Assistance Act which was enacted in 1956. This latter cost is not a readjustment benefit but is financed from the same appropriation.

The Veterans Administration is expected to guarantee home, farm, and business loans to about 540,000 veterans of World War II and the Korean conflict in the fiscal year 1958. Budget expenditures of 61 million dollars are estimated to result from veterans' defaults on guaranteed loans, but a large part of these expenditures will be offset by recoveries from the sale of properties which are deposited in the Treasury as miscellaneous receipts.

Most World War II veterans have had over 10 years to use their loan guaranty benefits, which were intended to assist their adjustment from military to civilian life. As a group, they have successfully reestablished themselves in civilian pursuits with the aid of a wide range of readjustment benefits. New applications under the World War II loan program, which was extended by the last Congress to permit orderly termination, should therefore end as now scheduled in July 1958. Loan guaranty benefits for veterans of the Korean conflict will continue, under current legislation, until 1965, and mortgage insurance benefits remain available to all home buyers, including veterans, through the Federal Housing Administration.

EXPENDITURES FOR VETERANS' SERVICES AND BENEFITS

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

As pointed out in the section on commerce and housing, the statutory maximum interest rate on veterans guaranteed loans should be increased to bring it more nearly into line with current market conditions. Such action is essential to encourage provision of more adequate mortgage funds from private sources for the veterans guaranty program. That section also indicates there may be need to permit liberalization of the terms of loans insured by the Federal Housing Administration when the Veterans Administration programs for World War II veterans expire.

Compensation and pensions.—Compensation benefits are paid for disabilities or deaths resulting from service; pensions are for needs not connected with service. Compensation rolls, which have been increasing since World War II, are expected to stabilize in 1958, with payments of 1.9 billion dollars to 2.1 million veterans and to 395,000 families of deceased veterans. Total compensation payments are expected to start declining slowly within a few years, as World War I and World War II veterans and dependents leave the rolls more rapidly than veterans of more recent service and their dependents become eligible.

The budget provides for pension payments in the fiscal year 1958 of over 1 billion dollars to an estimated 762,000 veterans and 488,000 families of veterans. Because many of the non-service-connected ailments accepted as establishing eligibility for pensions are normally associated with advancing age, the pension rolls will continue to grow until near the end of this century as veterans grow older and as more survivors become eligible.

Medical care and hospital construction.—Although the number of veterans receiving hospital and medical services will be about the same as in the fiscal year 1957, expenditures for hospital and medical care are expected to increase in 1958, primarily because they will include the allocable share of the Government payment to the civil service retirement fund. The budget provides for the operation of 122,500 beds in Veterans Administration hospitals. Expenditures for outpatient dental care are expected to decline in 1958.

Enactment of 54 million dollars of new authority to incur obligations is recommended to cover the replacement of 2 general hospitals, the preparation of plans for replacing a third, and the modernization of other existing facilities.

Insurance and servicemen's indemnities.—Issuance of new insurance policies to ex-servicemen without disabilities and the award of indemnities to survivors of deceased servicemen were terminated effective January 1, 1957, by the Servicemen's and Veterans' Survivor Benefits

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Act. This act provided substitute benefits in the form of new dependency and indemnity compensation benefits and of coverage in the old-age and survivors insurance system. Indemnity and insurance payments, however, will continue to be made on existing cases and to reimburse the veterans' insurance funds for claims resulting from the extra hazards of military service.

Trust funds.—The life insurance programs for veterans of the two world wars are financed through trust funds, whose operations are segregated from the regular budget transactions. About 5.2 million, or one-fourth, of the eligible veterans have retained insurance policies. Because issuance of new policies under these funds was ended in 1951, the insurance in force will continue to decline.

In the fiscal year 1957, dividend rates have been increased by approximately 12 percent, and about one-half of the total premium collections during the year will be returned to policyholders. These generous dividends have been made possible largely by the favorable mortality experience of insured veterans. The increased dividend payments will reduce the rate at which reserves are accumulated, but will not impair the soundness of the funds.

VETERANS' LIFE INSURANCE TRUST FUNDS

INTEREST

Interest payments are estimated to rise to 7.4 billion dollars in the fiscal year 1958. These payments, almost entirely for interest on the public debt, represent 10 percent of budget expenditures.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

INTEREST

[Fiscal years. In millions]

Item	Budget expenditures			1958 new obligational authority
	1956 actual	1957 estimate	1958 estimate	
Interest on public debt	$6,787	$7,200	$7,300	$7,300
Interest on refunds of receipts	54	54	54	54
Interest on uninvested funds	6	6	6	6
Total	6,846	7,260	7,360	7,360

The public debt was reduced in the fiscal year 1956 and further modest reductions are planned for 1957 and 1958. By repaying debt, the Federal Government is enlarging the supply of funds available for private financing of other activities. However, the heavy demand for private capital funds and for State and local government financing which accompanies the present record prosperity has increased the interest rates which the Treasury has to pay on securities issued to refinance the large volume of obligations maturing each year. As a result, the average rate the Treasury pays on the outstanding interest-bearing public debt has risen in the past 12 months from 2.49 percent to 2.67 percent.

Substantial reductions in interest rates cannot be expected until there is a better balance between the present pressure of heavy credit demands and the supply of savings.

GENERAL GOVERNMENT

About 2 percent of budget expenditures will be required for general government, mainly for law enforcement and for central management costs which under present accounting practices are not allocated to other major Government functions. The estimated expenditures of 1.5 billion dollars for this category in 1958 are 419 million dollars below 1957 expenditures because of a reallocation of costs. Starting in 1958, each Government program will bear its share of the Government's payment to the civil service retirement fund, and individual appropriations throughout this budget include amounts for this purpose. The payment was previously made from a single appropriation to the Civil Service Commission.

The Commission on Intergovernmental Relations recommended, as a matter of equity, that the Federal Government make payments in lieu of taxes to local governments in those areas where recent Federal acquisition of industrial and commercial type properties has created undue fiscal difficulties. Legislation containing this principle was introduced in the last session of the Congress and is again recommended.

[1] After deducting applicable receipts of 4 million dollars in 1956 and 3 million dollars in 1957 and 1958, mainly for Virgin Islands Corporation.

[2] Less than one-half million dollars.

[3] Compares with new obligational authority of 1,595 million dollars in 1956 and 1,851 million dollars in 1957.

General property management.—As part of the continuing endeavor to increase efficiency of Government services and to better the working conditions of Federal employees, additional improvements of Government buildings are planned. An important improvement will be the air conditioning of buildings in areas where temperature and humidity interfere unduly with efficient operations. Because of continuing deterioration in many Government buildings in recent years, more renovation and repairs have also become necessary. Additional space will be needed to avoid overcrowding in certain agencies.

Central personnel management and employment costs.—The Civil Service Retirement Act Amendments of 1956 require that in the fiscal year 1958 all agencies of the Government begin to pay to the retirement trust fund amounts equal to the contributions of their

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

employees. Total agency payments are estimated at 566 million dollars in 1958. Additional expenditures of 2 million dollars will be made by the Civil Service Commission for payments to annuitants under special statutes.

The Department of Labor will transfer more of the processing of accident compensation claims for Federal employees to regional offices in 1958 in order to bring administration closer to employees and to speed up payment. Legislation should be enacted to provide for each employing agency to bear its share of the cost of these benefits and to encourage still further precautionary safety measures by the agencies.

Substantial increases in benefits for civilian employees of the Government have been adopted in the last two Congresses, and the costs are generally reflected in budget requests for the employing agencies. One of these new benefits, unemployment compensation for separated civilian employees, is financed by an appropriation to the Department of Labor. An increase is recommended in this appropriation in 1958 to provide the amount estimated to be needed because of higher average benefit rates, which are based on State statutes.

Legislation is recommended to establish a system of voluntary health and medical insurance for civilian employees and their dependents. Legislation is also recommended to authorize the training of Government employees outside as well as within the employing agency.

District of Columbia and territories and possessions.—Appropriations are recommended for the full amount of the increased Federal payment to the District of Columbia authorized by the last session of the Congress. Federal expenditures for the District are estimated to rise to 43 million dollars in the fiscal year 1958, including 17 million dollars in loans for construction of public works under the long-term program authorized in 1954.

Legislation will be proposed again to carry out the treaty and agreement made in 1955 with the Republic of Panama. The Canal Zone Government will replace schools and other facilities transferred to the Republic under the treaty, and the Panama Canal Company will replace employee quarters and other facilities in the Canal Zone.

Claims and relief acts.—Payments for miscellaneous claims and relief acts are estimated at 9 million dollars in the fiscal year 1958, compared to 60 million dollars in 1957 and 230 million dollars in 1956. Most of the decrease in this item results from legislation enacted last year, under which each agency now pays bills presented after the appropriation involved has lapsed. Such bills were previously paid out of a single Treasury Department account.

CONCLUSION

This concludes the analysis of the 1958 budget. The budget document itself contains a great deal of additional budgetary information. In part I of the budget document there are seven tables presenting summary data on budget receipts, expenditures, public debt, new obligational authority, and balances. Detailed information, estimates, and schedules for each agency and each appropriation, including statements of program and performance, appear in part II. Part III of the budget document contains both summary tables and detailed appropriation and agency information for trust funds. Part IV consists of 12 "special analyses" which present additional details, classifications, and historical data.

INTRODUCTION TO PART I

Part I of the budget (pp. A1 to A13) contains seven summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

TYPES OF FEDERAL FUNDS

The Federal (Government-owned) funds are of four types as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Revolving funds are those which finance a cycle of operations, in which the expenditures generate receipts which are available for continuing use. They are divided into two subcategories—those with receipts primarily from outside the Government are called *public enterprise* funds, and those with receipts primarily from inside the Government are called *intragovernmental* funds. The former include nearly all of the Government corporations, the postal fund, and various unincorporated enterprises. The latter include various funds for stocking of supplies, for printing operations, and for the performance of services to meet the Government's own needs.

Management funds (including *consolidated working* funds) are those which are created to permit the pooling of advance payments from two or more appropriations to carry out certain activities.

BUDGET SURPLUS, DEFICIT, AND PUBLIC DEBT

Budget surplus and deficit.—The budget surplus or deficit, shown in table 1, represents the difference between the *net budget receipts* and *net budget expenditures* of a given year. Cash balances, appropriation balances, and surpluses and deficits of previous years are not a part of the calculation.

The public debt.—Table 4 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount necessary to borrow or possibly to repay is also influenced by: Changes in cash balances, the result of trust fund transactions, the use of Government corporation borrowing directly from the public as a means of financing budget expenditures of the corporations (and the repayments of such borrowing as an application of public enterprise fund receipts), and the change in the amount of checks outstanding and other items in process of clearance through the accounts.

BUDGET RECEIPTS AND EXPENDITURES

Fund classification of receipts.—Receipts for the general fund and the special funds are called *budget receipts.* Receipts for revolving funds are deducted in arriving at net expenditures of those funds; for the public enterprise funds, such receipts are identified in certain tables and called *applicable receipts.* This practice is followed because the revolving fund receipts are available to carry out the cycle of operations for which the revolving funds were created, and are applied to the expenditures of such funds.

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Internal revenue and customs receipts are stated on the basis of collections reported by collecting officers. Other receipts are reported on the basis of confirmed deposits.

Net budget receipts represent the total received for general and special funds, less (a) refunds of receipts, and (b) transfers to trust fund receipts in the four cases where the law provides an indefinite appropriation to a trust fund in an amount equal to certain tax receipts. Transfers to trust fund receipts are itemized in special analysis B.

Basis of stating budget expenditures.—Tables 1, 2, 3, and 6 include information on budget expenditures. Such expenditures cover the general fund, the special funds, and the revolving and management funds.

The *checks-issued* basis of stating expenditures, which is used regularly for net expenditures of the public enterprise funds and for the expenditures of all other fund groups, means that expenditures are reported for the fiscal year in which the checks are issued, regardless of when the obligation was incurred or the goods and services received. Modifications in this basis are made as follows: (*a*) Where payment is made in cash instead of by check, the cash payment is an expenditure; (*b*) where payment is made by the issuance of bonds or by an increase in their redemption value, instead of by the issuance of checks, the bond issuance is an expenditure; and (*c*) interest on the public debt, other than increases in the redemption values of savings bonds, is reported on an accrual basis. Interagency payments and reimbursements, including those going into intragovernmental revolving and management funds, are netted; that is, to avoid double counting they are treated only as expenditures of the agency whose appropriation or fund is ultimately bearing the charge. Some incidental reimbursements from outside the Government are similarly netted out of all expenditure figures.

Basis of reporting expenditures and applicable receipts of public enterprise funds.—The figures for *gross budget expenditures* (tables 1 and 6) include the total sums expended from public enterprise funds, while the receipts of such funds are deducted in arriving at net expenditures. The gross figures used here for the public enterprise funds are derived from the business-type budget statements of part II, which show expenditures and receipts on an accrual basis with a single adjustment (on either the expenditure or receipt side but not both) for the conversion from an accrual to a checks-issued basis. Therefore, the gross expenditures shown for such funds are not strictly on a checks-issued basis, nor are the applicable receipts strictly on a collection or deposit basis, but the net expenditures are on the checks-issued basis (net).

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Debt and investment transactions.—Receipts never include money obtained from borrowing. Similarly, retirement of debt is always excluded from budget expenditure figures. The purchase of United States Government securities, and redemptions or sales thereof, are also excluded from the expenditure and receipt figures.

Eliminations from both receipts and expenditures.—Certain payments from one fund to another are eliminated from budget receipts and expenditures. This is done to avoid inflating both sides of the budget. Payments to the general fund of earnings and dividends on capital of revolving funds, and the return of such capital to the general fund are the items so excluded.

BUDGET AUTHORIZATIONS

Table 3 summarizes the budget authorizations available and their disposition. Table 5 gives a breakdown by agency of the new authorizations becoming available each year, and table 7 gives supplementary information on the balances at start and end of the year.

The obligation basis.—Expenditures can be made only pursuant to appropriations or other authorizations granted by Congress. Government agencies are generally permitted by law to incur obligations requiring the future payment of money only when they have an appropriation or other authorization available for the purpose. Therefore, authorizations are enacted to cover *obligations* expected to be incurred within the fiscal year rather than to cover only the *expenditures* which are expected to be made during that year in payment of obligations.

Distinction between permanent and current authorizations.—Tables 3 and 5 distinguish *permanent* authorizations and *current* authorizations. The permanent items are those under which additional sums become available from time to time under action previously taken by the Congress; no further action is required each year. Most permanent authorizations are in force until repealed; a few are in effect for only a few years as specified in the law. The current authorizations are those enacted by Congress in or immediately preceding each fiscal year.

Balances.—Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time. However, balances remain available indefinitely to pay obligations lawfully incurred within the original period of availability of the appropriation. In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be as much as 1 or 2 years, and sometimes is even longer. For some revolving funds and certain other purposes, Congress has granted obligational authority well in advance of specific requirements, as a means of providing for contingencies which may arise. As a result of the foregoing factors, substantial balances of budget authorizations are carried forward from one year to the next. Such balances are not in the form of cash, but are bookkeeping authority for the incurring of obligations or the making of expenditures, for which cash must be provided through channels of financial management at the time the expenditures occur.

Relating expenditures to authorizations.—Tables 3 and 6 summarize the relationship between budget authorizations and budget expenditures. Because old and new authorizations are by law commingled in some of the accounts, no attempt is made in the summary figures to separate actual spending in 1956 between the use of new authorizations and the use of balances. However, the budget presents such a breakdown on an estimated basis for 1957 and 1958. In the case of revolving and management funds, it assumes that the portion of their expenditures chargeable to budget authorizations is equal to the portion of the authorizations credited to the revolving fund during the year. The remainder of the revolving and management fund expenditures (or negative expenditures) are here classified as being charges or credits to balances of such funds.

TYPES OF NEW OBLIGATIONAL AUTHORITY

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the appropriation to permit the payment of such obligations is said to be to *liquidate contract authorizations*. In all other cases appropriations confer authority both to incur new obligations and to pay for them.

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to make expenditures from borrowed money. Such authorizations may take these forms: (*a*) Authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (*b*) authorizations for a Government-owned corporation to borrow directly from the public; and (*c*) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation has the effect of permitting further expenditures to be made (through restoring previously used authority to borrow from the Treasury).

Reappropriations and *reauthorizations* are actions to continue available part or all of the unused balances of prior appropriations or authorizations which would otherwise expire. When the authorizations thus continued had been previously granted for current operations of the year, the continuation of their availability into a new year constitutes new obligational authority.

Total new obligational authority shown in table 3 is the sum of the various types of authorizations named above, less the portion of appropriations which is for liquidation of prior contract authorizations. This total represents the new authority becoming available in any given year for the purposes of making commitments.

PROPOSED LEGISLATION AND OTHER ITEMS FOR LATER TRANSMISSION

Tables 1, 2, 3, and 5 identify by separate columns the estimates of receipts, authorizations, and expenditures under legislative proposals recommended by the President, and other supplemental authorizations, and expenditures therefrom, which it is expected will be transmitted later. Table 6 identifies such items in a separate stub section. Such estimates include, in addition to the various supplemental estimates which are identified in part II, an allowance for items which cannot be foreseen now but which will be transmitted later when definite amounts can be determined and the needs can be more specifically identified. Congressional action upon this allowance will be requested later, not at a single time nor as a single lump-sum item, but in the form of a number of specific appropriations for individual items.

TABLE 4

EFFECT OF FINANCIAL OPERATIONS ON CASH BALANCES AND THE PUBLIC DEBT

[In millions]

Description	1956 actual	1957 estimate	1958 estimate
Effect of operations on cash balances:			
Budget surplus	$1,626	$1,728	$1,813
Trust fund operations, decrease (−) in cash balances (table 8)	−166	−57	−245
Public enterprise debt and investment transactions, net (special analysis K)	−27	−167	−125
Increase or decrease (−) in outstanding checks, deposits in transit, and similar items	320	23	−43
Total effect of operations on cash balances	1,753	1,527	1,400
Cash balances at start of year	7,295	7,424	6,800
Cash position resulting from operations	9,048	8,951	8,200
Cash balances at close of year	7,424	6,800	6,800
Decrease in public debt	1,623	2,151	1,400
Public debt at start of year	$274,374	$272,751	$270,600
Net decrease	1,623	2,151	1,400
Public debt at close of year	272,751	270,600	269,200

NOTE.—Comparison with statutory limitation on debt:

	1956 actual	1957 estimate	1958 estimate
Public debt at close of year	$272,751	$270,600	$269,200
Guaranteed obligations of Government agencies not owned by Treasury	74	120	155
Debt not subject to statutory limitation	−463	−450	−430
Debt subject to statutory limitation	272,361	270,270	268,925
Statutory limitation on debt at close of year	275,000	275,000	275,000
Maximum statutory limitation on debt during year	281,000	278,000	275,000

NOTE.—Cash balance reflected above is composed as follows:

	June 30, 1955	June 30, 1956	June 30, 1957	June 30, 1958
In Treasury	$6,216	$6,546	$6,000	$6,000
Outside Treasury	1,080	878	800	800
	7,295	7,424	6,800	6,800

INTRODUCTION TO PART II

Part II contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Included herein is also material on funds of the municipal government of the District of Columbia, and a few other trust funds which require congressional action. The contents of part II are arranged in chapters reflecting the organization of the Government.

SUMMARIES OF BUDGET AUTHORIZATIONS, EXPENDITURES AND BALANCES

At the beginning of each chapter a table in large type summarizes budget authorizations available, and a second table summarizes expenditures and other dispositions of the amounts available. Both tables segregate the items proposed for formal transmission to Congress later as supplemental estimates from those items already enacted or formally recommended in this document.

Summary of budget authorizations available.—This summary indicates the totals of each type of new obligational authority for the year, the totals of the various types of balances brought forward into the year, and any interchapter transfers or net upward adjustments of budget authorizations. The various types of authorizations are explained in the introduction to part I (pp. A2 and A3).

Summary of expenditures and balances.—This summary indicates the total expenditures for the chapter, the portion of the unspent available amounts which ceases to be available during or at the close of the year, and the balances carried forward into the next year.

For the years 1957 and 1958, there are estimated the portion of the expenditures which will come out of appropriations or other authorizations granted by Congress for that year, and the portion which will come from permanent authorizations and from balances of prior authorizations brought into the year. Additional entries are used where required for expenditures which will come from appropriations made to liquidate prior contract authorizations, and for expenditures from balances and receipts of revolving and management funds. Because old and new authorizations are commingled in some accounts, no attempt is made in the summary figures to separate actual spending in 1956 between old and new authorizations.

In preparing the estimates for 1957 and 1958, it is generally assumed that prior year balances available in commingled accounts will be obligated before the new authorizations are obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience. Where the obligation and expenditure are simultaneous, the first-in, first-out method is used to assign expenditures between old and new authorizations. In the case of revolving funds where budgetary authorizations are commingled with receipts, it is assumed that authorizations are expended in an amount equal to the sums placed in the revolving fund during the year, and that the remaining expenditures or net collections are a charge or credit to balances of the fund.

Summaries of balances.—At the bottom of the foregoing summaries, there is given (*a*) a further analysis of the authorization balances which are carried forward each year, indicating the respective amounts which are obligated and unobligated; and (*b*) a further analysis of the amounts written off or otherwise ceasing to be available each year, indicating the manner of writeoff.

STATEMENT OF AUTHORIZATIONS AND EXPENDITURES BY ORGANIZATION UNIT AND ACCOUNT TITLE

A summary listing of the organization units in each chapter shows the new obligational authority and expenditures for each. The detailed listing which follows is divided in several sections: Current authorizations (other than those for revolving and management funds), permanent authorizations, revolving and management funds, and supplemental items proposed for later transmission.

Types of authorizations other than appropriations are set forth under the applicable appropriation titles, identified by separate stub entries. Functional code numbers appear in a separate column, indicating the category in the functional tables (special analyses C and L of part IV) where each item has been included.

Two deductions appear at the end of the table. One deduction, in the authorization column, covers the appropriations which are to liquidate contract authorizations and hence to be excluded in arriving at new obligational authority. The other deduction, in the expenditure column, is for receipts of public enterprise funds, to be subtracted in arriving at *net* budget expenditures.

A separate double-page table is used for revolving and management funds. Appropriations and other budgetary authorizations to use general fund money for revolving funds are shown in this section. It also shows the total amounts provided by operations, the total amounts applied to operations, and the net expenditures (which is the difference between the two other figures).

INTERAGENCY FINANCIAL TRANSACTIONS

For funds appropriated to the President and other appropriations which are allocated by one agency to another for construction, for major procurement, for services to be carried on beyond the year, or for services which by mutual agreement are to be so handled, the amount so allocated is accounted for separately by the receiving agency. The use of the money is shown in a section of the budget under the parent account, rather than in the portion of the budget for the receiving agency.

Most other payments between agencies are accounted for in consolidated working funds or as reimbursements to appropriations. Each such payment is included in an appropriate object class of the parent account and the use of such advances and reimbursements is regularly shown in a separate schedule of the receiving agency. Such schedules of advances and reimbursements are budgeted like management funds. In a few cases where interagency payments are significant in determining the appropriation needs of the receiving agency, the reimbursements are shown in the appropriation schedule of the receiving agency instead of in separate schedules.

DETAILED MATERIAL

The schedules used for most general and special fund appropriations are explained on page 3, and the business-type statements used for many revolving funds are explained on page 4. Special explanations appear on page 5 for the cost-type budget presentations which are being increasingly used, and for a variation of the business-type statements on the source and application of funds. Some additional minor variations, not illustrated, are used for management funds and for intragovernmental revolving funds.

EXPLANATORY ILLUSTRATION OF BUDGETS FOR GENERAL AND SPECIAL FUND ACCOUNTS

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1958 appropriation acts is printed at the head of each item requiring action. The language of the 1957 appropriation acts is used as a base. Immediately following the language are citations to relevant laws and the appropriations from which the text is taken.

Salaries and Expenses, Mexican Farm Labor Program, Bureau of Employment Security

Salaries and expenses, Mexican farm labor program: For expenses, not otherwise provided for, necessary to carry out the functions of the Department of Labor under the Act of July 12, 1951 [(Public Law 78)] *(65 Stat. 119)*, as amended, including temporary employment of persons without regard to the civil service laws, [$2,125,000] *$2,683,000*. *(7 U. S. C. 1461–1468; International Executive Agreement, Aug. 11, 1951, as amended; 67 Stat. 500; Department of Labor Appropriation Act, 1957.)*

Appropriated 1957, **$2,125,000** Estimate 1958, * **$2,683,000**

* Includes $26,400 for activities previously carried under "Salaries and expenses, Office of the Secretary of Labor."
Excludes $43,300 for activities transferred in the estimates as follows:
"Salaries and expenses, Office of the Secretary of Labor" $15,800
"Salaries and expenses, Office of the Solicitor, Labor" 27,500
The amounts obligated in 1956 and 1957 are shown in the schedule as comparative transfers

Roman type shows the text used in the 1957 appropriation acts.

Italic type indicates proposed new language and figures.

Brackets enclose material which it is proposed to omit in 1958.

PROGRAM AND FINANCING

In the section for program by activities, obligations are broken down by purpose, program, project or activity. This breakdown, especially tailored for each agency and account, reflects the particular duties and responsibilities for which it receives money.

The financing section explains the method of financing the program and the disposition of amounts not used during the year.

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Determining Mexican labor requirements	$44,582	$48,700	$59,000
2. Supplying Mexican labor requirements	1,190,285	1,239,200	1,528,300
3. Determining compliance with contract provisions	331,536	388,900	634,700
4. Farm labor analysis	22,546	23,800	25,300
5. Management and administrative services	201,571	216,400	242,700
6. Field direction	151,253	183,500	193,000
Total obligations	1,941,773	2,100,500	2,683,000
Financing:			
Comparative transfers to other accounts	15,191	24,500	
Unobligated balance no longer available	36		
Appropriation (adjusted)	1,957,000	2,125,000	2,683,000

Obligations refer to orders placed, contracts awarded, and services received during the year, regardless of the time of payment. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

Comparative transfers represent obligations which were financed from one account during 1956 and 1957 but are financed from another account in 1958. Such obligations are omitted from the program by activities in the schedule for the first account and are added to the schedule for the other, to make all 3 years comparable for both accounts. This entry represents the net amount of such transfers.

Balance which expired for obligation purposes at the end of the year, and which is no longer available for expenditure.

NARRATIVE STATEMENTS

The work planned and services proposed to be carried out are described briefly under each appropriation or fund. Where practicable the narrative statements indicate the expected accomplishment in relation to the financial estimates and give some measures of program and performance. In the case of permanent appropriations, the narrative statements also explain the source of the money and the statutory basis for the appropriation.

PROGRAM AND PERFORMANCE

Mexican agricultural labor is imported for use in areas having a shortage of domestic agricultural workers. Authorization for this program was extended to June 30, 1959, by the act of August 9, 1955 (69 Stat. 615).

2. *Supplying Mexican labor requirements.*—Workers are recruited in Mexico and transported to centers in the United States where employers contract for their use. In 1956, 428,416 workers were contracted, and an estimated 480,000 will be contracted in 1957 and 490,000 in 1958. To increase the number of workers in 1957, a supplemental appropriation will be proposed. Direct costs such as transportation, subsistence, medical examinations, etc., are charged to the revolving fund. The overall cost, including revolving fund expenses, for supplying a Mexican agricultural worker averaged $11.16 in 1956 and is estimated to be $11.73 in 1957 due to a general increase in costs of transportation, subsistence, and rents.

3. *Determining compliance with contract provisions.*—Complaints of contract violations are investigated, and housing and other facilities required by the contract are inspected. Inspections will be increased and enforcement strengthened in 1958.

	1956 actual	*1957 estimate*	*1958 estimate*
Complaints	4,540	6,000	6,000
Housing and facilities inspections	2,463	6,000	10,000

Headings in the narrative statements usually agree with the schedules of obligations by activities.

OBLIGATIONS BY OBJECTS

There is shown for each account a summary of personal services and a classification of the obligations according to a uniform list of objects. These object classes, numbered from 01 to 16, reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

OBLIGATIONS BY OBJECTS

	1956 actual	1957 estimate	1958 estimate
Total number of permanent positions	225	332	382
Full-time equivalent of all other positions	126	89	102
Average number of all employees	380	394	465
Number of employees at end of year	345	376	441
Average salaries and grades:			
General schedule grades:			
Average salary	$5,205	$4,773	$4,861
Average grade	GS-7.5	GS-6.6	GS-6.9
01 Personal services:			
Permanent positions	$1,050,520	$1,438,100	$1,758,428
Positions other than permanent	492,487	223,400	259,600
Regular pay above 52-week base	3,125		7,672
Payment above basic rates	61,503	79,300	79,900
Total personal services	1,607,685	1,740,800	2,101,900
02 Travel	176,679	209,300	208,500
03 Transportation of things	6,179	7,000	8,500
04 Communication services	57,029	57,500	65,600
05 Rents and utility services	7,964	10,500	13,800
06 Printing and reproduction	7,060	6,800	8,000
07 Other contractual services	43,529	45,200	47,300
08 Supplies and materials	9,417	10,600	11,600
09 Equipment	7,520	8,100	9,200
11 Grants, subsidies, and contributions:			
Contribution to retirement fund			110,300
15 Taxes and assessments	18,711	4,600	5,300
Total obligations	1,941,773	2,100,500	2,683,000

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments.

This entry represents the number of (a) full-time and regularly scheduled part-time employees in pay status on the last workday in June and (b) intermittent employees who work at any time during June. This is the basis for reports to the Civil Service Commission.

Average salaries and grades are computed arithmetically. The average salary may fall either within or outside the salary range of the average grade.

Beginning in July 1957, employing appropriations will pay into the Civil Service Retirement and Disability Fund a sum equal to the employee's regular contribution—6½% of basic salaries of covered employees.

BUDGET AUTHORIZATIONS, EXPENDITURES AND BALANCES

This schedule shows total budget authorizations available during the year and their disposition as between expenditures, balances carried forward and balances ceasing to be available.

Expenditures during the year are distributed between those which come from authorizations of the same year, here called current authorizations (whether of a permanent or nonpermanent nature) and those which come from authorizations of a prior year. Proposed supplemental appropriations for both 1957 and 1958 are shown in separate schedules at the end of the chapter.

BUDGET AUTHORIZATIONS, EXPENDITURES AND BALANCES

BUDGET AUTHORIZATIONS AVAILABLE			
Appropriation	$1,785,000	$2,125,000	$2,683,000
Transferred from "Unemployment compensation for veterans, Bureau of Employment Security" (70 Stat. 170, 192)	172,000		
Adjusted appropriation	1,957,000	2,125,000	2,683,000
Obligated balance brought forward	132,570	91,511	105,900
Restored from certified claims account		451	
Total budget authorizations available	2,089,570	2,216,962	2,788,900
EXPENDITURES AND BALANCES			
Expenditures—			
Out of current authorizations	1,865,454	2,019,100	2,549,300
Out of prior authorizations	108,536	91,962	105,900
Total expenditures	1,973,990	2,111,062	2,655,200
Balance no longer available:			
Unobligated (expiring for obligations)	36		
Other	24,033		
Obligated balance carried forward	91,511	105,900	133,700
Total expenditures and balances	2,089,570	2,216,962	2,788,900

The obligated balance brought forward (plus the unobligated balance if it is still available for obligation) is a part of the balance available at the start of the year shown in the chapter summary data.

During the fiscal year 1957, there are being restored to the agency accounts (from a central account in Treasury) whatever sums are needed to cover unpaid obligations remaining against accounts which expired prior to 1955.

This is an example where successive annual appropriations are made. If appropriations of two or more years were merged under the law, a single figure would appear in this column for expenditures out of both current and prior authorizations.

This entry includes savings which occur because actual payments on obligations of prior years are less than amounts previously reported as obligations.

EXPLANATORY ILLUSTRATION OF BUSINESS-TYPE BUDGETS FOR REVOLVING FUNDS

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

This is a balanced presentation of the amounts becoming available during the year, either in the form of cash or other working capital, and the way in which those amounts have been used.

The statement excludes depreciation, losses on loans, and other transactions which affect neither cash nor other current assets and liabilities. It does reflect transactions which affect cash, accounts receivable, accounts payable, other accrued liabilities, inventories of supplies for administrative purposes, deferred charges and credits.

Both the funds applied and the funds provided parts of the statement are divided between "operations" and Treasury "financing."

For intragovernmental funds, net expenditures (the sum of amounts applied to operations, less amounts provided by operations) are included in budget expenditures.

For public enterprise funds, the total amount applied to operations is included in gross budget expenditures. The sum of amounts provided by operations for such funds make up the deduction (for applicable receipts) used in arriving at net budget expenditures.

STATEMENT OF INCOME AND EXPENSE

This is a statement of the income and expense and the resulting profit or loss for the year. This statement is normally on a full accrual basis, including in the expense sums for depreciation and provision for losses on receivables. It also indicates losses and charge-offs when they occur. In addition, gains or losses from the sale of equipment or other assets appear here.

At the bottom of this statement there is an analysis of the retained earnings or cumulative deficit, showing any additions to it during the year, any charges made against it, and the balance at the end of the year.

STATEMENT OF FINANCIAL CONDITION

This is a balance sheet of assets, liabilities, and investment of the Government at the close of the fiscal year. Like the other statements, it is normally on an accrual basis.

When interest is paid on part or all of the investment of the U. S. Government, this section is broken down to indicate the amount which has been invested by the Government on which the fund pays interest, the amount invested on which the fund does not pay interest, and the retained earnings or deficit.

STATUS OF CERTAIN FUND BALANCES

This is an analysis of the undisbursed balances, showing the portion that is obligated and the remainder (which is unobligated). Obligations are generally computed in the same manner as for appropriation accounts; they include both current liabilities and commitments not yet matured into liabilities and they reflect a deduction for accounts receivable.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

	1956 actual	1957 estimate	1958 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Equipment	$35,432	$50,000	
Expense	8,426,099	13,912,949	$12,679,000
Increase in selected working capital		603,785	45,834
Total applied to operations	8,461,531	14,566,734	12,124,834
To financing:			
Payment of earnings to Treasury	8,793	7,071	
Repayment of principal to Treasury	22		
Increase in cash with Treasury			118,166
Total applied to financing	8,815	7,071	118,166
Total funds applied	8,470,346	14,573,805	12,243,000
FUNDS PROVIDED			
By operations:			
Income: Sales of services	8,302,420	13,500,000	12,243,000
Decrease in selected working capital	40,814		
Total provided by operations	8,343,234	13,500,000	12,243,000
By financing:			
Decrease in cash with Treasury	127,112	1,073,805	
Total funds provided	8,470,346	14,573,805	12,243,000
BUDGET EXPENDITURES			
Funds applied to operations	8,461,531	14,566,734	12,124,834
Funds provided by operations	8,343,234	13,500,000	12,243,000
Net budget expenditures	118,297	1,066,734	−118,166
The above are charged or credited (−) to net receipts of the fund	118,297	1,066,734	−118,166

B. STATEMENT OF INCOME AND EXPENSE

Income: Sales of services	$8,302,420	$13,500,000	$12,243,000
Expense:			
Salaries	6,884,544	11,280,680	9,322,192
Travel	1,117,694	1,844,700	1,510,217
Other expense	479,861	787,569	1,246,591
Subtotal	8,426,099	13,912,949	12,079,000
Increase (−) or decrease in work-in-process inventory	−196,696	−484,449	87,500
Cost of services sold, excluding depreciation	8,229,403	13,428,500	12,166,500
Depreciation on equipment	65,946	71,500	76,500
Cost of services sold	8,295,349	13,500,000	12,243,000
Net income for the year	7,071		
ANALYSIS OF RETAINED EARNINGS			
Retained earnings, beginning of year	8,793	7,071	
Payment of earnings to Treasury (−)	−8,793	−7,071	
Retained earnings, end of year	7,071		

C. STATEMENT OF FINANCIAL CONDITION

ASSETS			
Current assets:			
Cash with Treasury	$3,544,935	$2,471,130	$2,589,296
Accounts receivable	1,012,704	1,742,500	1,585,375
Work-in-process inventory	477,926	962,375	874,875
Prepaid expense	177	500	500
Total current assets	5,035,742	5,176,505	5,050,046
Fixed assets:			
Equipment	450,702	500,702	500,702
Less portion charged off as depreciation	243,892	315,392	391,892
Net fixed assets	206,810	185,310	108,810
Total assets	5,242,552	5,361,815	5,158,856
LIABILITIES			
Current liabilities	1,235,481	1,361,815	1,158,856
INVESTMENT OF U. S. GOVERNMENT			
Non-interest-bearing investment:			
Appropriation	4,000,000	4,000,000	4,000,000
Retained earnings	7,071		
Total investment of U. S. Government	4,007,071	4,000,000	4,000,000
Total liabilities and investment of U. S. Government	5,242,552	5,361,815	5,158,856

STATUS OF CERTAIN FUND BALANCES

	1955 actual	1956 actual	1957 estimate	1958 estimate
Unexpended balance: Cash with Treasury	$3,672,047	$3,544,935	$2,471,130	$2,589,296
Net obligations outstanding:				
Current liabilities	937,509	1,235,481	1,361,815	1,158,856
Obligations other than liabilities: Unfilled purchase orders	24,567	37,645	50,000	50,000
Accounts receivable (−)	−755,465	−1,012,704	−1,742,500	−1,585,375
Accepted orders on hand	−281,230	−477,926	−962,375	−874,875
Net obligations outstanding	−74,619	−217,504	−1,293,060	−1,251,394
Unobligated portion of certain fund balances	3,746,666	3,762,439	3,764,190	3,840,690

If the enterprise acquires materials for manufacture or sale, purchases for manufacture or sale are included in expenses in this statement, whether or not the materials are used within the year.

Selected working capital items comprise the current assets (other than cash with Treasury, inventories for sale or manufacture, and without deducting any valuation allowances) less the current liabilities (other than reserves).

Net budget expenditures include the spending of appropriations for the revolving fund as well as the spending of the fund's own receipts. A negative figure here indicates collections in excess of expenditures.

If the enterprise sells stocks or products, the cost of goods sold, rather than purchases, is considered an expense in this statement.

Depreciation and other expense not shown on the Statement of sources and application of funds are indicated separately.

This entry agrees with the balance sheet. It represents cumulative profits kept in the enterprise, whether in the form of cash, inventories, receivables, or fixed assets.

This entry represents cash on deposit with the Treasury. If the fund has any cash in commercial banks, it is also included here. It excludes any balances of appropriations (or other authorizations) which have not yet been paid into the fund.

"Liabilities" normally means what is owed for goods and services which have been received. The remainder of the obligations outstanding, covering items on order which have not yet been received, is shown in the statement of balances illustrated below.

The investment of the U. S. Government indicates the Government's interest as owner, plus the Government's interest as creditor in the form of notes payable to the Treasury where a Government corporation has authorization to borrow on such notes.

Obligations other than liabilities consist of undelivered orders, unperformed contracts, loan agreements, and other lawful obligations which have not yet become current liabilities.

For intragovernmental revolving funds, accepted orders on hand which are legal obligations to the ordering appropriation or fund are deducted here in arriving at net obligations outstanding, avoiding duplication in totals for the Government.

EXPLANATORY ILLUSTRATION OF A COST-TYPE BUDGET PRESENTATION

PROGRAM AND FINANCING

In cost-type budgets, the figures opposite activities represent the goods and services consumed for operating costs in carrying out the program and the value of capital assets received as a result of purchases. The difference between these amounts and the obligations incurred is shown in a separate entry, and explained in a subsidiary schedule, as illustrated below.

This type of budget is used only where the accounting system provides for the separate recording of inventories, advances, undelivered orders, etc., and for the charging of applied costs to activities.

In those cases where the program is principally for procurement or public works, additional columns are shown to make a more complete presentation of the significant facts.

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Educational assistance, facilities and services	$38,562,136	$43,219,837	$50,735,837
2. Welfare and guidance services	3,712,098	3,792,000	4,954,000
3. Relocation services	973,475	3,472,000	3,541,000
4. Maintaining law and order	418,463	836,000	929,000
Total program costs	43,666,172	51,319,837	60,159,837
5. Relation of costs to obligation: Cost financed from obligations of other years, net (−)	−283,658	−599,617	−599,837
Total program (obligations)	43,382,514	50,720,220	59,560,000
Financing:			
Contract authorization (48 U. S. C. 50d-1)	−419,780	−420,000	−420,000
Applied to contract authorization (48 U. S. C. 50d-1)	307,495	419,780	420,000
Unobligated balance no longer available	865,766		
Appropriation	43,635,995	50,720,000	59,560,000

The computation of this entry is explained in a subsidiary schedule in the narrative statement (see illustration below).

The treatment of capital items will vary according to the accounting practices followed by the agencies. In some cases depreciation is taken into costs, and in these cases there will be a separate deduction to arrive at obligations.

RELATION OF COSTS TO OBLIGATIONS

This statement shows the balances at the start and end of the past, current, and budget years for those agency accounts which represent obligations incurred that have not yet matured into costs. It also covers other factors in the "bridge" between costs and obligations.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table.

Selected resources at end of year:	*1955 actual*	*1956 actual*	*1957 estimate*	*1958 estimate*
Inventories and items on order:				
Stores (goods unconsumed by projects)	$389,555	$400,327	$400,327	$400,327
Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	2,126,617	1,889,227	1,852,842	1,835,492
Advances (payments for goods and services on order not yet received)	20,259	27,763	27,763	27,763
Work in process (goods and services to be costed to activities when completed)	510	2,131	2,131	2,131
Total selected resources at end of year	2,536,341	2,319,448	2,283,063	2,265,713
Selected resources at start of year (−)		−2,536,341	−2,319,448	−2,283,063
Adjustments of selected resources reported at start of year		447,653		
Increase or decrease (−) in selected resources		230,760	−36,385	−17,350
Property or services transferred in (−) without charge, net		−514,418	−563,232	−582,487
Costs financed from obligations of other years, net (−)		−283,658	−599,617	−599,837

This entry covers cancellation or repricing o undelivered orders, and similar adjustments.

Annual leave of employees is an obligation under appropriations only when it is taken or paid. In the cases where it is included in appropriation costs as it accrues, the change in undrawn leave will be shown here.

This entry usually relates to items entering into the costs of the programs of this appropriation, but financed by some other appropriation.

EXPLANATORY ILLUSTRATION OF AN ALTERNATIVE FOR ONE OF THE REVOLVING FUND SCHEDULES

BUDGET AUTHORIZATIONS AND RECEIPTS, EXPENDITURES AND BALANCES

This schedule replaces the Statement of sources and application of funds illustrated on the preceding page, but in addition contains balances (both obligated and unobligated) at the start and end of the year.

When this form of schedule is used the other two statements illustrated on the preceding page are condensed considerably, and a program and financing schedule is added.

BUDGET AUTHORIZATIONS AND RECEIPTS, EXPENDITURES AND BALANCES

BUDGET AUTHORIZATIONS AND RECEIPTS AVAILABLE			
Receipts from operations:			
Sale of abaca fiber	$4,006,093	$1,400,000	$1,960,000
Sale of land, structures, and equipment	236,431		
Other income	2,504		
Decrease in selected working capital	36,328	27,580	
Total receipts from operations	4,281,356	1,427,580	1,960,000
Balance brought forward:			
Unobligated	4,354,595	5,296,214	3,568,839
Obligated	761,445	867,006	813,661
Total budget authorizations and receipts available	9,397,396	7,590,800	6,342,500
EXPENDITURES AND BALANCES			
Gross budget expenditures:			
Acquisition of land, structures, and equipment	73,184	240,000	75,000
Production cost	2,297,313	2,458,650	2,858,100
Administrative expense	115,061	100,000	94,500
Other operating expense	655,134	409,650	125,000
Adjustment of prior year expense	93,484		
Total gross budget expenditures	3,234,176	3,208,300	3,152,600
Balance carried forward:			
Unobligated	5,296,214	3,568,839	2,376,239
Obligated	867,006	813,661	813,661
Total expenditures and balances	9,397,396	7,590,800	6,342,500
BUDGET EXPENDITURES			
Gross budget expenditures	3,234,176	3,208,300	3,152,600
Receipts from operations	4,281,356	1,427,580	1,960,000
Net budget expenditures (out of balances and receipts of the fund)	−1,047,180	1,780,720	1,192,600

Because individual lines for receipts and expenditures are stated on an accrual basis, this line reflects the net adjustment to a cash basis.

Unexpended balances relate to cash and, where applicable, investments in U. S. securities and unused balances of budgetary authorizations. The split between obligated and unobligated balances is in accordance with the method shown at the bottom of the preceding page.

Payment to Estates and Widows of Deceased Members of the Senate

[For payment to Jane R. Barkley, widow of Alben W. Barkley, late a Senator from the State of Kentucky, $22,500.] (*Supplemental Appropriation Act, 1957.*)

Appropriated 1957, **$22,500**

ADMINISTRATIVE [PROVISIONS] *PROVISION*

[Notwithstanding the provisions of any other law, each Senator may fix the basic compensation of one employee in his office at a rate of not to exceed $8,040 per annum in addition to other positions authorized by law.]

[The Sergeant at Arms hereafter is authorized and directed to secure suitable office space in post office or other Federal buildings in the State of each Senator for the use of such Senator and in the city to be designated by him: *Provided,* That in the event suitable space is not available in such buildings and a Senator leases or rents office space elsewhere, the Sergeant at Arms is authorized to approve for payment, from the contingent fund of the Senate, vouchers covering bona fide statements of rentals due in an amount not exceeding $1,200 per annum for each Senator.]

[The Sergeant at Arms of the Senate hereafter is authorized and directed to approve for payment from the contingent fund of the Senate to each Senator an amount not to exceed $150 quarterly, upon certification of each such Senator, for official office expenses incurred in his State: *Provided,* That in the case of the death of any Senator the chairman of the Committee on Rules and Administration may certify for such deceased Senator for any portion of such quarterly allowances already obligated but not certified to at the time of such Senator's death, and for an amount at the same quarterly rate which may be reasonably needed for the purpose of closing such deceased Senator's State office, for payment to the person or persons designated as entitled to such payment by said chairman.]

[Effective July 1, 1956, the paragraph relating to official long distance telephone calls to and from Washington, District of Columbia, under the heading "Contingent Expenses of the Senate" in Public Law 479, Seventy-ninth Congress (2 U. S. C. 46c), as amended, is amended by striking out the word "ninety" and inserting in lieu thereof "one hundred and twenty" and by striking out the words "four hundred and fifty" and inserting in lieu thereof "six hundred".]

[The Secretary of the Senate and the Sergeant at Arms hereafter are authorized and directed to protect the funds of their respective offices by purchasing insurance in an amount necessary to protect said funds against loss. Premiums on such insurance shall be paid out of the contingent fund of the Senate, upon vouchers approved by the chairman of the Committee on Rules and Administration.]

Salaries or wages paid out of the [foregoing] items under "Contingent Expenses of the Senate" shall *hereafter* be computed at basic rates, plus increased and additional compensation, as authorized and provided by law.

[No part of the foregoing appropriations made under the heading "Contingent Expenses of the Senate" hereafter may be expended for per diem and subsistence expenses (as defined in the Travel Expense Act of 1949, as amended) at rates in excess of $12 per day; except that (1) higher rates may be established by the Committee on Rules and Administration for travel beyond the limits of the continental United States, and (2) in accordance with regulations prescribed by the Committee on Rules and Administration of the Senate, reimbursement for such expenses may be made on an actual expense basis of not to exceed $25 per day in the case of travel within the continental limits of the United States.]

[Compensation for stenographic assistance of committees paid out of the foregoing items under "Contingent Expenses of the Senate" hereafter shall be computed at such rates and in accordance with such regulations as may be prescribed by the Committee on Rules and Administration, notwithstanding, and without regard to any other provision of law.]

[The contingent fund of the Senate is hereafter made available for reimbursement for mileage, at the rate of 10 cents per mile, for one round trip in each fiscal year by the nearest route usually traveled between Washington, District of Columbia, and a Senator's residence in his home State, to not to exceed two employees in each Senator's office, such reimbursement to be made upon vouchers approved by the Senator and containing a certification by him that such travel was performed in line of official duty.]

[Unless otherwise specifically authorized by law, no part of any appropriation disbursed by the Secretary of the Senate shall be available for payment of compensation to any person holding any position, for any period for which such person received compensation for holding any other position, the compensation for which is disbursed by the Secretary of the Senate.] (*Legislative Branch Appropriation Act, 1957.*)

LIBRARY OF CONGRESS

The Library of Congress, established in 1800, is not only the library of the Congress itself, but is also the principal general library of the Government of the United States. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the oriental languages, etc., and manuscripts, maps, music, motion picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of general and basic services connected therewith, certain specialized functions are performed: the Legislative Reference Service, registration of copyrights, catalog card distribution, and the service of books in raised characters and talking books to the blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1956 and estimated for 1957 and 1958 are:

	1956 actual	*1957 estimate*	*1958 estimate*
General and basic services:			
Acquisition of library materials	$998,750	$993,558	$1,104,376
Organization of the collections	1,817,153	1,893,202	2,151,527
Reader and reference services	1,311,070	1,362,750	1,517,532
Maintenance and protective services	780,638	788,508	873,493
Executive direction and general administrative services	701,148	716,506	753,137
Specialized services:			
Copyright	1,236,836	1,287,547	1,398,471
Legislative Reference Service	1,053,867	1,067,387	1,214,742
Catalog card distribution service	1,400,188	1,487,100	1,628,485
Books for the blind	1,005,650	1,067,481	1,125,000
Total obligations	10,305,300	10,664,039	11,766,763

The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, and working funds.

Estimates for the physical equipment, maintenance and operation of the Library buildings are carried under the request of the Architect of the Capitol.

Salaries and Expenses, Library of Congress

Salaries and expenses: For necessary expenses of the Library of Congress, not otherwise provided for, including development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; [purchase of one passenger motor vehicle for replacement only;] and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; [$5,310,593] *$5,914,565. (2 U. S. C. 131–166; 5 U. S. C. 150; 17 U. S. C. 1–215; 20 U. S. C. 91; 28 U. S. C. 921; 31 U. S. C. 588, 589; Legislative Branch Appropriation Act, 1957.)*

PROGRAM AND PERFORMANCE

Personal services and incidental expenses required for the basic operations of the Library are financed from this appropriation.

1. *Acquisition of library materials.*—The development of the Library's collections is planned; materials are procured by purchase, gift, exchange, copyright deposit, transfer and official deposit; and materials are selected for addition to the permanent collections. The objectives for 1958 are institution of procedures for speedier acquisition of selected important foreign publications, and improvement in exchange relations with institutions in the more important areas of the world. The collections totaled 35,311,657 items as of June 30, 1956, and consisted of 10,776,013 books and pamphlets; 15,107,865 manuscript pieces, and 9,447,779 maps, pieces of music, reels of microfilm, photographs, and other miscellaneous items. Of the items received, about 1¼ million are added to the permanent collections annually. Those received from various sources in 1956 and estimated for 1957 and 1958 are as follows:

Description	*1956 actual*	*1957 estimate*	*1958 estimate*
Purchase	546,369	550,000	560,000
Deposit by virtue of law:			
Copyright	356,402	350,000	350,000
Other	539,475	550,000	550,000
Transfer from Federal agencies	2,121,560	2,100,000	2,100,000
Official donation from State and local agencies	82,263	85,000	90,000
Exchange	421,058	425,000	430,000
Gift from individual and unofficial sources	1,003,448	1,000,000	1,000,000
Total	5,070,575	5,060,000	5,080,000

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs and the main National Union Catalog (card catalog) are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1958 are cataloging of a larger number of the materials received during the year particularly those in Oriental languages; handling receipts of special materials and organizing them for use on a current basis; and improved cataloging methods and procedures to assure the usefulness of the collections.

CURRENT AUTHORIZATIONS—Continued

LIBRARY OF CONGRESS—Continued

Salaries and Expenses, Library of Congress—Continued

Selected performance data for 1956 and estimated for 1957 and 1958 (not including processing activities performed by the reference department and the law library) are as follows:

Description	*1956 actual*	*1957 estimate*	*1958 estimate*
Volumes fully cataloged and added to the classified collection	150,029	165,000	175,000
Items otherwise organized for use (without full cataloging)	14,870	40,000	40,000
Cards filed in catalogs	1,584,632	1,700,000	1,800,000
Volumes bound	72,905	74,500	74,500
Items repaired, cleaned, mounted, etc.	192,058	192,000	192,000
Cards filed in the National Union Catalog and its supplements	932,232	1,000,000	1,000,000

3. *Reader and reference services.*—Books and other library materials are provided within and without the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objectives of this activity for 1958 are: adequate and improved service to readers during the 52 hours of full service and the 26 hours of limited service weekly; adequate custody and maintenance of the collections; and the increased usefulness of the collections through the preparation of bibliographies, checklists, indexes, and other finding aids. The workload in all major activities is expected to increase in 1957 and 1958:

Description	*1956 actual*	*1957 estimate*	*1958 estimate*
General reader and reference service:			
Books and pamphlets served	1,088,035	1,100,000	1,100,000
Other units of material served	625,788	675,000	675,000
Units issued on loan	205,460	210,000	215,000
Reference inquiries answered	422,455	430,000	450,000
Reference letters	63,836	68,000	75,000
Law library reader and reference service:			
Books and pamphlets served	334,011	340,000	345,000
Reference inquiries answered	78,622	80,000	82,000
Reference letters	886	900	950

4. *Maintenance and protective services.*—The two Library buildings and the collections and other properties contained therein are maintained, preserved, and protected. A staff of 191, including 82 part-time charwomen, preserves, cleans, and maintains the Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stock rooms. The guard force staff of 76 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

PROGRAM AND PERFORMANCE

The Copyright Office is responsible for recording copyright claims, assignments and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for cataloging materials registered. The Register of Copyrights prints complete and indexed catalogs for each class of copyright entries. The office is conducted as a business operation. The amount requested for personal services is substantially counterbalanced by fees received for services rendered as indicated in the table which follows. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the Library of Congress is also to be credited to the copyright operation. The income and costs for 1956 and estimates for 1957 and 1958 are as follows:

	1956 actual	1957 estimate	1958 estimate
Income:			
Fees applied	$881,612	$890,428	$899,244
Estimated value of materials deposited	392,561	514,164	519,305
Total income	1,274,173	1,404,592	1,418,549
Costs:			
Salaries	1,153,065	1,214,842	1,237,626
Other costs	85,410	72,705	160,845
Total costs	1,238,475	1,287,547	1,398,471

The program and performance under each of the activities described are predicated on an estimated 229,406 copyright registrations during 1958, an estimated 227,157 during 1957, and an actual 224,908 during 1956.

1. *Receiving and accounting for applications, etc.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1956 and estimates for 1957 and 1958 are as follows:

	1956 actual	1957 estimate	1958 estimate
Registrations	224,908	227,157	229,406
Mail received and dispatched	535,743	541,100	546,457

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data for 1956 and estimates for 1957 and 1958 are as follows:

	1956 actual	1957 estimate	1958 estimate
Cases and documents examined	278,285	281,067	283,850
Registrations and recordation of documents	232,054	234,374	236,695

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 224,908 registrations cataloged in 1956 and estimates for 1957 and 1958 are 227,157 and 229,406 respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data for 1956 and estimates for 1957 and 1958 are as follows:

	1956 actual	1957 estimate	1958 estimate
Titles searched	54,764	55,313	55,861
Letters and search reports written	16,876	17,046	17,215

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects.

CURRENT AUTHORIZATIONS—Continued

LIBRARY OF CONGRESS—Continued

LEGISLATIVE REFERENCE SERVICE—continued

Salaries and Expenses, Legislative Reference Service, Library of Congress—Continued

PROGRAM AND PERFORMANCE

In performing the functions authorized by the Legislative Reorganization Act of 1946, the Legislative Reference Service prepares research reports, digests, etc., in answer to inquiries from Members and committees of Congress.

1. *Research and analysis.*—The Legislative Reorganization Act of 1946 lists 19 specific fields of congressional concern in which top-level research is authorized. These correspond in general to the spheres of committee activity. The following 13 fields are now covered: International trade, international affairs, taxation and fiscal policy, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, national defense, social welfare, and transportation and communications. Available to the Members and committees are also the preparation of charts, translations, reading lists, information in report form or otherwise, and answers to spot reference inquiries. In 1956, 59,425 congressional inquiries were answered. Since 1950, the annual increase in the number of inquiries has been between 4 and 10 percent. The total of inquiries for 1957 is estimated at 62,400; and for 1958, at 65,000.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covered 7,094 bills and resolutions during the Eighty-fourth Congress, second session. It is expected that there will be as many bills to be covered during the Eighty-fifth Congress, second session. The preparation of analytical and name indexes to an increasing number of committee hearings is to be continued.

3. *Reference files, bibliographic and congressional reader service.*—Reference files, containing clippings, pamphlets, and documents are maintained as the basis for reply to the majority of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the congressional reading room. During 1956, 75,661 reference file items were processed, 13,149 bibliographic entries prepared, 54,054 published items acquired and processed, and 3,064 readers served. With the growth in number and scope of inquiries, there has been a steady increase which is expected to continue in 1957 and 1958.

DISTRIBUTION OF CATALOG CARDS

Salaries and Expenses, Distribution of Catalog Cards, Library of Congress

Salaries and expenses: For expenses necessary for the preparation and distribution of catalog cards and other publications of the Library, [$1,487,100] *$1,628,485*. (*2 U. S. C. 131, 136, 139, 140, 150; 31 U. S. C. 588, 589; Legislative Branch Appropriation Act, 1957.*)

Appropriated 1957, **$1,487,100** Estimate 1958, **$1,628,485**

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Supplying printed cards for the Library of Congress	$181,874	$192,055	$203,734
2. Supplying printed cards for other libraries	995,218	985,096	1,073,742
3. Preparation, printing, and distribution of publications related to cataloging	101,522	90,921	90,921
4. Preparation, printing, and distribution of the National Union Catalog	73,379	157,639	198,699
5. Preparation, printing, and distribution of the Subject Catalog	48,195	61,389	61,389

Financing:			
Unobligated balance no longer available	2,171		
Appropriation	1,402,359	1,487,100	1,628,485

PROGRAM AND PERFORMANCE

The card division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 140,000,000 catalog cards representing some 3,200,000 titles, and fills orders from approximately 9,000 regular subscribers—mostly libraries—in the United States and abroad. More than 90 percent of this appropriation is recovered in the form of receipts from card and publication sales. Receipts of $1,280,172 were deposited in miscellaneous receipts of the Treasury in 1956. The objectives for 1958 are continued improvements and economies in all operations, increasing the scope and utility of the Library of Congress catalogs in book form, and the continued expansion of the National Union Catalog to include 1956 and later imprints held by other American libraries.

Federal Reserve Bank of St. Louis

1. *Supplying printed cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in fiscal year 1956 was 3,619,817; estimated for 1957, 3,870,000; and for 1958, 4,258,000.

2. *Supplying printed cards for other libraries.*—The number of cards sold in fiscal year 1956 was 24,692,621; estimated for 1957, 24,750,000; and for 1958, 25,000,000.

3. *Preparation, printing and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing, and distribution of the National Union Catalog.*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), and Music and Phonorecords (issued on a 6-month basis and annual cumulation). There were 930 paid subscriptions for all issues in calendar year 1956, and it is estimated that there will be 950 subscriptions for 1957 and 1,000 for 1958. Included under this activity is the Armed Forces Medical Library Catalog of which 365 copies were sold in calendar year 1956. It is anticipated that 400 copies will be sold in 1957 and the same number in 1958.

5. *Preparation, printing, and distribution of the Subject Catalog.*—This catalog is issued in 3 quarterly volumes with an annual cumulation. There were 360 paid subscriptions for calendar year 1956. It is estimated that there will be 365 paid subscriptions in 1957 and about 380 in 1958.

Appropriation	300,000	300,000	360,000

PROGRAM AND PERFORMANCE

This appropriation constitutes the only means of acquiring regular domestic trade publications (except for copyright deposits) and many foreign trade publications, both current and noncurrent, from approximately 100 countries or areas. The publications acquired by purchase constitute a most important part of the Library's acquisitions although they represent only a small portion of the material received annually. The objectives for 1958 are the acquisition by air mail of selected important foreign newspapers and periodicals in order to provide faster service to Congress; the increase in acquisitions of important materials from critical areas; the direct purchase of selected current titles on microfilm as an economy measure in lieu of binding; and the microfilming of deteriorating materials as a necessary preservative measure.

PROGRAM AND PERFORMANCE

The division for the blind is responsible for administering a national program to provide reading material for the blind of the United States, Territories, and insular possessions. In discharge of this responsibility it has two closely related operations.

First: It provides books in embossed characters, and Talking Books with their associated reproducers. The books are distributed through 28 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 55 State agencies.

Second: The division maintains one of the 28 regional libraries providing service to approximately 6,000 readers in the District of Columbia, Maryland, Virginia, North Carolina, and South Carolina. In addition, this regional library offers a national service of a unique collection of Braille books not generally available in the other regional libraries.

The objectives for 1958 are to increase the production of sound reproduction records and maintain the level of production of books in raised characters, Braille and Moon type; to increase the manufacture of new Talking Book machines and accomplish an effective restoration of previous models in need of repair; to check on the quality of Talking Book machines manufactured and repaired; and to continue necessary research in sound reproduction and the techniques of Braille printing.

1. *Procurement and distribution.*—Books are selected, purchased, and distributed, and Talking Book machines are purchased, repaired, and replaced.

Description	*1956 actual*	*1957 estimate*	*1958 estimate*
Talking Books purchased (titles)	143	158	164
Embossed books purchased (titles)	120	134	134
Talking Book machines:			
Purchased	10,000	7,500	8,100
Repaired	4,218	5,500	5,500
Salvage-scrapped	1,712	2,500	2,500
Records replaced	14,709	3,500	3,500

2. *Cataloging and reference services.*—Catalogs of Talking and Braille books are prepared and maintained. Supplements to both catalogs will be prepared in each of the years, 1957 and 1958. During the period 1946 to 1955 the number of readers throughout the country requiring catalogs from which to select reading matter has grown from 30,088 to 55,152 and circulation from 801,797 units (volumes or containers) to 1,395,413. During the period 1947–56, readers served by the Library of Congress regional library for the blind, increased from 2,001 to 6,096, and the number of volumes circulated, from 36,643 to 73,190; the number of readers and circulation are expected to continue to increase in 1957 and 1958.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.

Appropriations in this Act available to the Library of Congress shall be available, in an amount not to exceed $11,000, when specifically authorized by the Librarian, for expenses of attendance at meetings concerned with the function or activity for which the appropriation is made. (*Legislative Branch Appropriation Act, 1957.*)

MISCELLANEOUS

Allocations Received From Other Appropriation Accounts

NOTE.—Obligations incurred under allocations received from other appropriations are shown in the schedules of the parent appropriations, as follows:

OFFICE OF SUPERINTENDENT OF DOCUMENTS

Salaries and Expenses, Office of Superintendent of Documents

Salaries and expenses: For necessary expenses of the Office of Superintendent of Documents, including personal services in accordance with the Classification Act of 1949, as amended, and compensation of employees who shall be subject to the provisions of the Act entitled "An Act to regulate and fix rates of pay for employees and officers of the Government Printing Office", approved June 7, 1924 (44 U. S. C. 40); traveling expenses (not to exceed $1,500); price lists and bibliographies; repairs to buildings, elevators, and machinery; and supplying books to depository libraries; [$2,990,400. Hereafter, appropriations available for the Office of Superintendent of Documents shall not be used to supply depository libraries any documents, books, or other printed matter not requested by such libraries, and the requests therefor shall be subject to approval by the Superintendent of Documents] *$3,181,900.* (*Legislative Branch Appropriation Act, 1957.*)

Appropriated 1957, **$2,990,400** Estimate 1958, **$3,181,900**

Appropriation	2,937,270	2,990,400	3,181,900

PROGRAM AND PERFORMANCE

The work programs of the Office of Superintendent of Documents are of a service nature and there is no control over the volume of work which the Superintendent of Documents is required by law to perform.

1. *Sales distribution.*—Government publications are purchased from the Public Printer to be placed on sale. Acquisition costs are paid from sales receipts; hence no appropriation is required for printing sales copies. By provision of law, the sale price is set at the cost of manufacture plus 50 percent. At the end of each fiscal year, excess receipts not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For the fiscal year 1956, miscellaneous receipts returned to the Treasury were 1956 fiscal year earnings of $2,428,000, and $79,201 representing prior year earnings. It is estimated that miscellaneous receipts earned will be $2,500,000 for 1957 and $2,650,000 for 1958. The number of sales orders has been steadily increasing and in the last 10 years the volume of orders and the dollar value of publications sold has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of orders.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon the request of any Government agency without reimbursement. Another service is the mailing of Farmers' Bulletins, Soil Surveys, and other publications which are allocated to Members of Congress on a quota basis.

3. *Depository library distribution.*—One copy of every Government publication, upon request, is supplied to more than 570 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of United States Government Publications and the Numerical List and Schedule of Volumes.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of undelivered orders as reflected in the following table:

INTRAGOVERNMENTAL FUNDS—Continued

GOVERNMENT PRINTING OFFICE

[REVOLVING FUND]

Government Printing Office Revolving Fund

[The paragraph in the Legislative Appropriation Act, 1954 (67 Stat. 330), establishing the Government Printing Office Revolving Fund is hereby amended by striking out the words "purchase of uniforms for guards;" and inserting in lieu thereof the words "uniforms, or allowances therefor, as authorized by the Act of September 1, 1954 (68 Stat. 1114), as amended".]

[The paragraph in the Legislative Appropriation Act, 1954 (67 Stat. 330), establishing the Government Printing Office Revolving Fund is hereby amended by striking out the words "(except buildings and land)", where they occur, and inserting in lieu thereof "and building appurtenances (except building structures and land)".]

[The Public Printer is authorized to provide for the improvement of electrical facilities and extension of air conditioning as necessary for the operation and maintenance of the Government Printing Office. The operation shall be financed from the revolving fund in accordance with provisions of law (44 U. S. C. 63; 63 Stat. 301, August 1, 1955).]

[The statute reference in the third paragraph under this head in the Legislative Branch Appropriation Act, 1957, is hereby amended to read "67 Stat. 330, August 1, 1953".] (*Legislative Branch Appropriation Act, 1957; Supplemental Appropriation Act, 1957.*)

PROGRAM AND PERFORMANCE

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various departments and independent establishments of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U. S. C.).

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (67 Stat. 330).

All work for Government agencies other than the above is done on a reimbursable basis and financed through this fund. Receipts from sales of publications by the Superintendent of Documents are deposited to the revolving fund and cost of publications paid therefrom. All profits accruing from these transactions are deposited in the Treasury of the United States and credited to miscellaneous receipts (44 U. S. C. 63).

Total investment in the Government Printing Office is estimated at $46.3 million at the end of 1958, including $1.8 million in retained earnings.

	Total accrued expenditures	85,128,540	84,296,967	86,886,231

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, Officers, and Committees of the House, and Clerk Hire for Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in H. Res. 297, 336, 339, 342, 374, 424, 446, 448, 468, 486, and 494 of the Eighty-fourth Congress shall be the permanent law with respect thereto: *Provided further*, That the provisions of H. Res. 465 of the Eighty-fourth Congress shall be the permanent law with respect thereto.

SEC. 104. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

[SEC. 105. (a) There is hereby established a House Recording Studio and a Senate Recording Studio.]

[(b) The House Recording Studio shall assist Members of the House of Representatives in making disk, film, and tape recordings, and in performing such other functions and duties in connection with the making of such recordings as may be necessary. The Senate Recording Studio shall assist Members of the Senate and committees of the Senate in making disk, film, and tape recordings, and in performing such other functions and duties in connection with the making of such recordings as may be necessary. The House Recording Studio shall be for the exclusive use of Members of the House of Representatives (including the Delegates and the Resident Commissioner from Puerto Rico); the Senate Recording Studio shall be for the exclusive use of Members of the Senate, the Vice President, and committees of the Senate.]

[(c) The House Recording Studio shall be operated by the Clerk of the House of Representatives under the direction and control of a committee which is hereby created (hereinafter referred to as the committee) composed of three Members of the House. Two members of the committee shall be from the majority party and one member shall be from the minority party, to be appointed by the Speaker. The committee is authorized to issue such rules and regulations relating to operation of the House Recording Studio as it may deem necessary.]

[The Senate Recording Studio shall be operated by the Sergeant at Arms of the Senate under the direction and control of the Committee on Rules and Administration of the Senate. The Committee on Rules and Administration is authorized to issue such rules and regulations relating to operation of the Senate Recording Studio as it may deem necessary.]

[(d) the Clerk of the House of Representatives shall, subject to the approval of the committee, set the price of making disk, film, and tape recordings, and collect all moneys owed the House Recording Studio. The Committee on Rules and Administration of the Senate shall set the price of making disk, film, and tape recordings and all moneys owed the Senate Recording Studio shall be collected by the Sergeant at Arms of the Senate.]

[(e) No moneys shall be expended or obligated for the House Recording Studio except as shall be pursuant to such regulations as the committee may approve. No moneys shall be expended or ob'igated by the Director of the Senate Recording Studio until approval therefor has been obtained from the Sergeant at Arms of the Senate.]

[(f) The Clerk of the House of Representatives is authorized, subject to the approval of the committee, to appoint and fix the compensation of a Director of the House Recording Studio and such other employees as are deemed necessary to the operation of the House Recording Studio.]

[(g) There is hereby established in the Treasury of the United States, a revolving fund within the contingent fund of the House of Representatives for the House Recording Studio for the purposes of administering the duties of that studio. There is also established in the Treasury of the United States, a revolving fund within the contingent fund of the Senate for the Senate Recording Studio for the purposes of administering the duties of that studio.]

[(h) All moneys received by the House Recording Studio from Members of the House of Representatives for disk, film, or tape recordings, or from any other source, shall be deposited by the Clerk of the House of Representatives in the revolving fund established for the House Recording Studio by the preceding paragraph; moneys in such fund shall be available for disbursement therefrom by the Clerk of the House of Representatives for the care, maintenance, operation, and other expenses of the studio upon vouchers signed and approved in such manner as the committee shall prescribe. All moneys received by the Senate Recording Studio for disk, film, or tape recordings or from any other source, shall be deposited in the revolving

GENERAL PROVISIONS—Continued

fund established for the Senate Recording Studio by the preceding paragraph; moneys in such fund shall be available for disbursement therefrom upon vouchers signed and approved by the Sergeant at Arms for the care, maintenance, operation, and other expenses of the Senate Recording Studio.]

[(i) (1) As soon as practicable after the date of enactment of this Act but no later than September 30, 1956, the equity of the Joint Senate and House Recording Facility Revolving Fund shall be distributed equally to the Senate and House of Representatives on the basis of an audit to be made by the General Accounting Office.]

[(2) The Sergeant at Arms of the Senate and the Clerk of the House of Representatives shall, subject to the approval of the committees mentioned in subsection (c) hereof, determine the assignment of existing studio facilities to the Senate and the House of Representatives, and also the existing equipment, materials and supplies to be transferred to the respective studios. The evaluation of equipment, materials and supplies transferred to each studio shall be on the basis of market value. Any other equipment, materials and supplies determined to be obsolete or not needed for the operation of the respective studios shall be disposed of to the best interest of the Government and the proceeds thereof deposited in the Joint Senate and House Recording Facility Revolving Fund.]

[(3) Accounts receivable, which on the effective date of liquidation, are due from Members and committees of the Senate shall be transferred to the Senate Studio, and those due from Members and committees of the House of Representatives shall be transferred to the House Studio.]

[(4) A sufficient reserve shall be set aside from the Joint Senate and House Recording Facility Revolving Fund to liquidate any outstanding accounts payable.]

[(5) After appropriate adjustments for the value of assets assigned or transferred to the Senate and House of Representatives, respectively, the balance in the Joint Senate and House Recording Facility Revolving Fund shall be distributed equally to the Senate and House of Representatives for deposit to the respective revolving funds authorized by this section.]

[(j) Pending acquisition of the stock, supplies, materials, and equipment necessary to properly equip both studios, the present services and facilities shall be made available to both studios in order that each studio may carry out its duty.]

[(k) No person shall be an officer or employee of the House or Senate Recording Studio while he is engaged in any other business, profession, occupation, or employment which involves the performance of duties which are similar to those which would be performed by him as such an officer or employee of such studio unless approved in writing by the committee in the case of the House Recording Studio and the Senate Committee on Rules and Administration in the case of the Senate Recording Studio.]

[(l) The Joint Recording Facility positions and salaries established pursuant to the Legislative Branch Appropriation Act, 1948, and all subsequent Acts are hereby abolished.]

[(m) Effective with the completion of the transfer provided for by subsection (i) hereof the joint resolution entitled "Joint resolution establishing in the Treasury of the United States a revolving fund within the contingent fund of the House of Representatives", approved August 7, 1953 (2 U. S. C., sec. 123), is repealed.]

[(n) The Director of the House Recording Studio shall give bond to the Clerk of the House of Representatives with one or more sureties in the penal sum of $20,000, with condition for the faithful performance of his duties and the preservation and security of all property in his care. The Director of the Senate Recording Studio shall give bond to the Sergeant at Arms of the Senate with one or more sureties in the penal sum of $20,000, with condition for the faithful performance of his duties and the preservation and security of all property in his care.]

[(o) Such sums as may be necessary to carry out the provisions of this section are hereby authorized to be appropriated.] (*Legislative Branch Appropriation Act, 1957.*)

PROGRAM AND PERFORMANCE

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of accounting.*—Direction is given to programs for improving accounting and financial management in the executive agencies, in collaboration with the General Accounting Office and the Treasury Department. This office was established as part of the Presidential actions taken on the recommendations of the second Commission on Organization of the Executive Branch of the Government.

2. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation, enrolled bills, and proposed Executive orders and proclamations are reviewed for the President.

4. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

5. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (*a*) commerce and finance, (*b*) international, (*c*) labor and welfare, (*d*) military, and (*e*) resources and civil works.

CURRENT AUTHORIZATIONS—Continued

NATIONAL SECURITY COUNCIL

SALARIES AND EXPENSES

Salaries and Expenses, National Security Council

For expenses necessary for the National Security Council, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not in excess of $50 per diem for individuals; acceptance and utilization of voluntary and uncompensated services; and expenses of attendance at meetings concerned with work related to the activity of the Council; [$248,000] *$710,000: Provided, That, in accordance with section 505 of the Classification Act of 1949, as amended, but without regard to the numerical limitations contained therein, the National Security Council is hereafter authorized to place two additional positions in grade GS–18, one additional position in grade GS–17, and two additional positions in grade GS–16 of the general schedule established by said Act. (50 U. S. C. 402; 60 Stat. 810; General Government Matters Appropriation Act, 1957.)*

Appropriated 1957, **$248,000** Estimate 1958, **$710,000**

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Policy coordination	$243,336	$248,000	$265,000
2. Operations coordination			445,000
Total obligations	243,336	248,000	710,000
Financing:			
Unobligated balance no longer available	664		
Appropriation	244,000	248,000	710,000

PROGRAM AND PERFORMANCE

1. *Policy coordination.*—The National Security Council advises the President regarding national security policies. Also, the Central Intelligence Agency is under the direction of the Council. Members of the Council are the President, the Vice President, the Secretary of State, the Secretary of Defense, the Director of the Office of Defense Mobilization and, as directed by the President, other high officials. Salaries and expenses to provide staff services for the Council's policy coordination activities are financed from this appropriation.

2. *Operations coordination.*—The Operations Coordinating Board was established in 1953 to advise, when directed by the President, with the responsible executive agencies to assist in coordinating implementation of national security policies approved by him on the Council's recommendation. The Board is composed of the Under Secretary of State, the Deputy Secretary of Defense, the Director of Central Intelligence, the Director of the United States Information Agency, one or more representatives of the President and, as necessary, officials of other agencies. The 1958 appropriation estimate contemplates that the Board will be established within the structure of the Council and therefore includes funds for salaries and expenses to provide staff services for the Board's operations coordination activities. In prior years these costs have been financed from funds appropriated to the Board's member agencies.

CURRENT AUTHORIZATIONS—Continued

PRESIDENT'S ADVISORY COMMITTEE ON GOVERNMENT ORGANIZATION

President's Advisory Committee on Government Organization

For necessary expenses of the President's Advisory Committee on Government Organization, established by Executive Order 10432 of January 24, 1953, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed $50 per diem for individuals; expenses of attendance at meetings concerned with the purposes of the Committee; and actual transportation expenses and an allowance of not to exceed $15 per diem in lieu of subsistence while away from their homes or regular places of business, for members of the Committee and other persons serving without compensation; $57,500. (*General Government Matters Appropriation Act, 1957.*)

Appropriated 1957, **$57,500** Estimate 1958, **$57,500**

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 201. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at [$1,350] *$1,500* except station wagons for which the maximum shall be [$1,800] *$1,950*.

SEC. 202. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 203. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

SEC. 204. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 205. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of $4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of $4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. 206. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 207. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building, without specific authority in law therefor, primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 208. During the current fiscal year, the provisions of Bureau of the Budget Circular A–45, dated June 3, 1952, shall be controlling over the activities of all departments, agencies, and corporations of the Government: *Provided*, That said circular may be amended or changed during such year by the Director of the Budget with the approval of the Chairman of the Committee on Appropriations of the House of Representatives: *Provided further*, That the Bureau of the Budget shall make a report to Congress not later than January 31, [1957] *1958*, of the operations of this order upon all departments, agencies, and corporations of the Government: *Provided further*, That, notwithstanding the provisions of any other law, no officer or employee shall be required to occupy any Government-owned quarters unless the head of the agency concerned shall determine that necessary service cannot be rendered or property of the United States cannot be adequately protected otherwise.

SEC. 209. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits) and for liquidation of obligations legally incurred against such credits prior to July 1, 1953, only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury: *Provided further*, That nothing in section 1415 of the Act of July 15, 1952, or in this section shall be construed to prevent the making of new or the carrying out of existing contracts, agreements, or executive agreements for periods in excess of one year, in any case where such contracts, agreements, or executive agreements for periods in excess of one year were permitted prior to the enactment of this Act under section 32 (b) (2) of the Surplus Property Act of 1944, as amended (50 U. S. C. App. 1641 (b) (2)), and the performance of all such contracts, agreements, or executive agreements shall be subject to the availability of appropriations for the purchase of credits as provided by law.

SEC. 210. Hereafter, any appropriation required to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, may be apportioned on a basis indicating the need for a supplemental or deficiency estimate of appropriation to the extent necessary to permit payment of such pay increases as may be granted those employees (commonly known as wage-board employees) whose compensation is fixed and adjusted from time to time in accordance with prevailing rates (5 U. S. C. 1082 (7)). (General Government Matters Appropriation Act, 1957.)

PROGRAM AND PERFORMANCE

This program provides for a coordinated effort by the Federal Government to assist States and their political subdivisions affected by major disasters when they are unable to cope with the situation physically or financially.

Responsibility for the administration of this program is delegated to the Federal Civil Defense Administration. Disaster relief operations of the entire Federal Government are coordinated and funds made available to affected areas. State and local civil defense organizations are active in disaster operations and receive valuable operational training as a result.

Major disaster areas proclaimed by the President and allocation of funds made since July 1, 1955, are:

FISCAL YEAR 1956

Area	*Allocation date*	*Type*	*Amount*
North Carolina	Aug. 13, 1955	Flood	$3,200,000
New Mexico	Aug. 15, 1955	do	43,000
South Carolina	Aug. 20, 1955	Hurricane	400,000
New Mexico	Aug. 23, 1955	Flood	75,000
Rhode Island	Aug. 26, 1955	do	1,000,000
New Jersey	Aug. 27, 1955	do	1,000,000
Pennsylvania	Aug. 29, 1955	do	1,000,000
Connecticut	Aug. 30, 1955	do	1,000,000
Massachusetts	do	do	1,000,000
New York	do	do	500,000
Alaska	Dec. 22, 1955	Severe hardship	25,000
California	Dec. 23, 1955	Flood	9,500,000
Nevada	Dec. 24–27, 1955	do	370,000
Oregon	Dec. 29, 1955	do	1,350,000
Washington	Feb. 25, 1956	do	250,000
Pennsylvania	Mar. 15, 1956	do	50,000
New York	Mar. 28, 1956	do	50,000
Michigan	Apr. 5, 1956	Tornado	135,000
Oklahoma	Apr. 7, 1956	do	65,000
Idaho	Apr. 21, 1956	Flood	600,000
North Carolina	Apr. 24, 1956	Hurricane	200,000
Ohio	May 17, 1956	Local storms	1,250,000
Pennsylvania	May 21, 1956	Flood	100,000
Colorado	June 12, 1956	do	50,000
Total			23,213,000

FISCAL YEAR 1957

Area	*Allocation date*	*Type*	*Amount*
Oregon	July 20, 1956	Torrential rains	$126,000
Puerto Rico	Aug. 18, 1956	Hurricane	2,500,000
Pennsylvania	Aug. 20, 1956	Flood	300,000
Nevada	Aug. 31, 1956	do	30,000
Louisiana	Oct. 14, 1956	Hurricane	200,000
Total (Nov. 30, 1956)			3,156,000

[MUTUAL SECURITY]

The mutual security program promotes the foreign policy, security, and general welfare of the United States by assisting other free world nations to maintain and increase their military and economic strength. It is conducted under the Mutual Security Act of 1954, as amended. The execution of the program has been delegated by the President to the Secretaries of State and Defense. The Director of the International Cooperation Administration in the Department of State has been delegated responsibility for the general coordination of the mutual security program.

Grants and loans made by the United States to other countries in furtherance of the program take two principal forms. *Military assistance* includes military end items produced in the United States and abroad and the training of foreign military personnel to assure effective use of the end items furnished. It also includes those civilian-type goods, and construction materials and services (heretofore classified as a third category "direct forces support") that go directly to military forces or projects in countries whose resources are inadequate for the support of modern military establishments. *Other mutual security programs* include commodities and services to enable certain countries to maintain defense forces, economic and technical assistance to promote the economic development of the less-developed areas of the world, and contributions to the United Nations and other international agencies for several voluntary multilateral programs.

From 1956 and 1957 appropriations about $571 million of assistance is being provided in the form of surplus agricultural commodities to those countries receiving mutual security assistance. Local currency proceeds from the sale of these commodities by the recipient countries are used in turn for the various requirements of the mutual security program.

Substantial unexpended balances are required because of the time necessary for the procurement and delivery of equipment and supplies and for carrying out detailed projects in many parts of the world. A decline in the unexpended balances for military assistance over the 3-year period is partially offset by an increase for other mutual security programs.

Appropriations required in 1958 to finance the mutual security program under legislation to be proposed to the Congress appear at the end of this chapter.

[For expenses necessary to enable the President to carry out the provisions of the Mutual Security Act of 1954, as amended, as follows:]

[MILITARY ASSISTANCE]

Military Assistance, Executive
Military Assistance, Infrastructure, Executive
Direct Forces Support, Executive
Common-Use Items, Executive

[Military assistance: For assistance authorized by section 103 (a) (3), including not to exceed $23,000,000 for administrative expenses to carry out the purposes of title I, chapter 1, and section 124, $2,017,500,000 of which $67,500,000 shall be available for infrastructure as authorized by section 104 (a); and in addition not to exceed $195,500,000 of unobligated and unreserved funds heretofore appropriated under authority of section 103 (a), section 104 and section 124 of the Mutual Security Act of 1954, as amended, are continued available until June 30, 1957, for the purposes of sections 103 (a) (3) and 104: *Provided*, That none of the funds made available for military assistance under this Act shall be used to furnish military equipment to Yugoslavia except for maintenance of equipment heretofore furnished or to provide spare parts for replacement purposes;]

Appropriated 1957, **$2,017,500,000**

Appropriation (adjusted)	1,016,200,000	2,017,500,000	

PROGRAM AND PERFORMANCE

The major activities of the military assistance program are (1) the provision of materiel required to maintain the military forces of allied nations at various standards of readiness; (2) the provision of advisory services and training for their military personnel in the utilization of such materiel; (3) participation in the joint financing of certain international military facilities and activities, especially in the North Atlantic Treaty Organization area; and (4) necessary operating and administrative expenses.

Thirty-eight foreign countries are receiving grant aid under the military assistance program. The program is supporting in varying degrees in these countries ground forces equivalent to more than 200 divisions, naval strength of more than 2,000 vessels of all kinds, and air strength of approximately 300 air squadrons as well as related support units. Congress has appropriated to date approximately $24 billion, as the United States contribution in this mutual effort in which each ally must play a part commensurate with its capabilities.

1. *Materiel.*—Approximately 78 percent of the equipment and supplies programed through 1956 had been shipped through last September 30.

(a) *Common-item deliveries.*—Considerable amounts of materiel common to the requirements of the United States armed services are procured through these services by the military assistance program. Air Force deliveries of these common items, funded from 1957 and prior year appropriations will increase in 1958. Orders placed with the armed services are treated as "reservations," and obligations of military assistance funds are not recorded until delivery. A schedule relating "reservations" to the appropriation accounts of the armed services appears at the end of the Department of Defense chapter.

(b) *Offshore procurement.*—Under prior year programs, the United States has placed orders abroad for approximately $2.7 billion of materiel for the military assistance program. This offshore procurement program assists in building a defense production base in certain friendly countries. It is augmented in 1957 in order to obtain necessary military equipment and at the same time to maintain, at the minimum economic rate of production, certain plants that are vital to the maintenance of that base.

(c) *Navy shipbuilding in the United States.*—Because of the special nature of ship construction, this part of the program is accounted for separately from other military end items.

(d) *Direct procurement in the United States.*—Other supplies required by military forces, such as gasoline, jet fuel, uniforms, and medicines, are forwarded by the United States to a small number of countries unable to finance these items.

2. *Packing, handling, and transportation.*—These costs cover expenses in preparing materiel for shipment and the shipping costs to recipient countries.

3. *Training.*—To assure effective use and maintenance of the materiel, members of the forces of our allies have completed over 100,000 military training courses paid for by funds made available for the military assistance program.

4. *Mutual weapons development.*—This program continues at the 1956–57 level the effort to accelerate the research and development of advanced types of nonnuclear weapons by our allies, and to combine United States methodology with the production capability of our allies toward improving and increasing the production of military weapons.

5. *Surplus agricultural commodities.*—Through the sale of these commodities under section 402 of the Mutual Security Act, foreign currencies are generated and used to modernize certain essential military forces.

6. *Loans.*—With greater emphasis now being placed on reimbursable aid, loans for military materiel are expected to increase in 1957. Repayments will be placed in miscellaneous receipts of the Treasury.

7. *Administration.*—In addition to certain administrative costs, this activity includes reimbursements to the Department of State for administrative services rendered.

8. *Contributions to construction of facilities in other countries.*—Construction of military and logistical facilities under the jointly financed North Atlantic Treaty Organization infrastructure program will continue. Other military construction will proceed in some other countries unable to finance such construction alone.

9. *Contributions to North Atlantic Treaty Organization military headquarters.*—Our contribution to this jointly financed headquarters in 1956 was less than that estimated for 1957 because of a $2 million credit arising from the liquidation of the North Atlantic Treaty Organization working fund.

10. *Other activities.*—The increase in 1957 for other activities is partly due to a special vehicle modernization program being undertaken in the Far East.

Program and Performance

Offshore procurement.—These foreign currencies are used for military materiel and services procured abroad for the mutual defense of the United States and friendly nations. The currencies available under sections 502 and 402 of the Mutual Security Act are transferred from the consolidated foreign currency schedule under "Other mutual security programs" below. Other currencies, generated by the sale of agricultural surplus commodities under the Agricultural Trade Development and Assistance Act of 1954, are allocated to the Department of Defense for this activity.

PROGRAM AND PERFORMANCE

1. *Defense support.*—These programs provide the supplemental resources required in certain countries to carry on a defense effort of the size regarded as essential to mutual defense. The primary purpose of defense support is usually the attainment of military and political objectives rather than the economic benefits which may incidentally accrue to the recipient nation. In some cases, defense support contributes to this objective by generating local currency for a country's budget thereby making possible higher defense expenditures than would otherwise occur. In other cases, resources are provided to enlarge productive facilities and public works closely related to military requirements. Defense support also provides resources for certain development projects and foreign exchange needs essential for a minimum rate of economic growth while vital military forces are being built and maintained.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(*a*) *Europe.*—The 1957 program consists largely of assistance for Spain and Yugoslavia and technical exchange programs with the countries of Western Europe.

(*b*) *Near East and Africa.*—Increased tensions in the Near East, accompanied as they are with dangers of Soviet domination of the area, make imperative the maintenance and continued strengthening of the defensive forces in the area. In view of their strategic positions, Turkey, Pakistan, and Iran will continue to require assistance to maintain their military strength and to assist in their economic growth.

(*c*) A large proportion of defense support for Asia assists Korea, Vietnam, Taiwan, and other countries to bear a military burden far beyond their own unaided capabilities.

(*d*) *Latin America.*—The 1957 program continues assistance to Bolivia and Guatemala, undertaken because of critical economic crises. This assistance, previously classified as development assistance, was redefined by the Congress as defense support.

2. *Development assistance.*—This assistance is supplied to promote economic development and to create economic and political stability in those friendly countries with which we have no military assistance agreement. The aid is furnished to countries whose economic and political development is vital to United States policy interests. The projects undertaken are those of mutual interest which cannot adequately be financed by the country alone with private or public funds. Development assistance is often closely related to technical cooperation programs in a country.

(*a*) *Near East and Africa.*—Although a considerable increase in program requirements is anticipated in 1957 for the vital Near East area and the emerging continent of Africa, present plans are most tentative. Unsettled conditions currently prevent firm program planning for most countries in the Near East.

(*b*) *Asia.*—Development assistance is provided to several Asian countries. For example, the United States will continue to help meet the foreign exchange needs of India's development plans.

3. *Technical cooperation.*—This program provides for the interchange of knowledge, experience, techniques, and skills with the people of the less-developed areas of the world to help them carry out their economic development and increase their standards of living. Teaching, training, and exchange of information are carried out in such fields as industry, mining, agriculture, labor, education, health, sanitation, public administration, transportation, and community development. Supplies and equipment are provided only to the extent necessary to support effective teaching and demonstration. Aid is provided bilaterally, in programs administered by the International Cooperation Administration, and multilaterally, by contribution to the technical assistance program of the Organization of American States and the United Nations expanded technical assistance program. The bilateral programs are coordinated with the multilateral to achieve balanced country and regional programs and prevent duplication of effort.

4. *Other programs.*—Several miscellaneous mutual security activities are authorized by the Mutual Security Act. A special fund is provided to the President for contingent mutual security purposes. Investment and reconstruction projects are provided for Berlin. Contributions for refugee programs are made to the Intergovernmental Committee for European Migration, the United Nations Refugee Fund, and the United Nations Relief and Works Agency. The escapee program provides care for certain refugees from Iron Curtain countries. The United Nations children's fund is assisted. Ocean freight is paid for supplies shipped abroad by nonprofit relief agencies. Administrative expenses, including reimbursements to the Department of State, for economic mutual security programs and for the controlling of East-West trade in strategic materials is covered. A new program providing one-half the cost of atomic research reactors in various countries has been initiated. A special program for regional development projects in Asia will entail increased obligations in 1957. The balance of present availability will be obligated in 1958. Special emergency relief programs are required from time to time.

Program and Performance

Foreign currencies are available for mutual security or related purposes as described above under the acts as cited below.

Foreign currency, surplus agricultural commodities, section 502, Mutual Security Act of 1954, International Cooperation Administration.—Mutual security appropriations were made available by Congress in 1954 to purchase surplus agricultural commodities in this country for sale abroad to friendly countries for their currencies. The foreign currencies received from the sale of these surplus agricultural commodities are used for mutual security program objectives in accordance with agreements reached with each government.

Foreign currency, surplus agricultural commodities, section 402, Mutual Security Act of 1954, International Cooperation Administration.—Mutual security appropriations were made available by Congress in 1955, 1956, and 1957 to purchase surplus agricultural commodities in this

Federal Reserve Bank of St. Louis

country for sale abroad to friendly countries for their currencies. The foreign currencies received from the sale of these commodities to friendly countries can be used only for the purposes for which the dollar funds were originally appropriated.

Section 505 (a) Mutual Security Act of 1954.—Section 505 (a) provides for various methods of financing assistance including cash grants, credits or other terms of repayment best suited to achieve the purposes of the act.

Foreign currency, Agricultural Trade Development and Assistance Act of 1954, International Cooperation Administration.—Foreign currencies, generated by the sale of agricultural surplus commodities under the Agricultural Trade Development and Assistance Act of 1954, are allocated to the International Cooperation Administration to finance the purchase abroad of goods and services for other friendly countries, to promote balanced economic development and trade among nations by making grants to friendly countries, and to promote multilateral trade and economic development by making loans to those countries.

[Funds appropriated under each paragraph of this Act (other than appropriations under the head of military assistance), including specified amounts of unobligated balances, and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made for the same general purpose as such paragraph, which amounts are hereby continued available during the fiscal year 1957, may be consolidated in one account for each paragraph.]

[GENERAL PROVISIONS]

[SEC. 102. Payments made from funds appropriated herein for engineering fees and services to any individual engineering firm on any one project in excess of $25,000 shall be reported to the Committees on Appropriations of the Senate and House of Representatives at least twice annually.]

[SEC. 103. Pursuant to section 1415 of the Supplemental Appropriation Act, 1953, and in addition to other amounts made available pursuant to said section, not to exceed the equivalent of $2,000,000 of foreign currencies or credits owed to or owned by the United States shall remain available until expended, without reimbursement to the Treasury, for liquidation of obligations incurred against such currencies or credits prior to July 1, 1953, pursuant to authority contained in the Mutual Security Act of 1951, as amended, and Acts for which funds were authorized by that Act and, hereafter, foreign currencies generated under the provisions of this Act shall be utilized only for the purposes for which the funds providing the commodities which generated the currency were appropriated.]

[SEC. 104. None of the funds provided by this Act nor any of the counterpart funds generated as a result of assistance under this or any other Act shall be used to make payments on account of the principal or interest on any debt of any foreign government or on any loan made to such government by any other foreign government; nor shall any of these funds be expended for any purpose for which funds have been withdrawn by any recipient country to make payment on such debts: *Provided, however,* That to the extent that funds have been borrowed by any foreign government in order to make a deposit of counterpart and such deposit is in excess of the amount that would be required to be deposited pursuant to the formula prescribed by section 142 (b) of the Mutual Security Act of 1954, as amended, such counterpart may be used in such country for any agreed purpose consistent with the provisions of such Act.]

[SEC. 105. Except for the appropriation entitled "Special Presidential Fund", not more than 20 per centum of any appropriation item made available by this Act shall be obligated and/or reserved during the last two months of the fiscal year.]

[SEC. 106. Section 108 of the Mutual Security Appropriation Act, 1956 (Public Law 208, 84th Congress), is hereby amended by substituting "during the two succeeding fiscal years" for "until June 30, 1958" in the third sentence thereof, and by substituting "under the authority of the Mutual Security Act of 1954, as amended" for "in this Act" in the fifth proviso thereof.]

[SEC. 107. None of the funds contained in this Act shall be used to carry out the purposes of section 13 of the Mutual Security Act of 1956.]

[SEC. 108. The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of the Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations, the President is requested to inform the Congress insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.]

[SEC. 109. This Act may be cited as the "Mutual Security Appropriation Act, 1957".] (*70 Stat. 555–566, 733–735; Mutual Security Appropriation Act, 1957.*)

PRESIDENT'S SPECIAL INTERNATIONAL PROGRAM

President's Special International Program, Executive

For expenses necessary to enable the President to carry out the provisions of the "International Cultural Exchange and Trade Fair Participation Act of 1956", [$5,900,000] *$20,000,000, of which $11,000,000 shall be available for the Universal and International Exhibition of Brussels, 1958*, to remain available until expended[: *Provided*, That the unexpended balances of appropriations for "Emergency fund for international affairs", granted in the Supplemental Appropriation Act, 1956, and the Supplemental Appropriation Act, 1955, shall be merged with this appropriation: *Provided further*, That this paragraph shall be effective only upon enactment into law of S. 3116, Eighty-fourth Congress, or similar legislation]. (*70 Stat. 778; Supplemental Appropriation Act, 1957.*)

Appropriated 1957, [a] **$9,900,000** Estimate 1958, **$20,000,000**

[a] Includes $4,000,000 appropriated in Second Supplemental Appropriation Act, 1957.

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Artistic and athletic presentations	$2,570,037	$2,425,744	$3,100,000
2. Trade fairs and exhibitions	3,111,990	4,148,745	5,900,000
3. Universal and international exhibition of Brussels		4,000,000	10,500,000
4. Program coordination and publicity	155,940	30,149	
Total obligations	5,837,967	10,604,638	19,500,000
Financing:			
Unobligated balance brought forward	−1,330,721	−628,340	
Recovery of prior year obligations	−135,586	−76,298	
Unobligated balance carried forward	628,340		500,000
Appropriation	5,000,000	9,900,000	20,000,000

PROGRAM AND PERFORMANCE

The purpose of this fund is to strengthen the ties which unite us with other nations by demonstrating the cultural interests, developments, and achievements of the people of the United States, and the contributions being made by the United States economic and social system toward a peaceful and more fruitful life for its own people and other people throughout the world.

The Director of the United States Information Agency serves as coordinator of the following activities:

1. *Artistic and athletic presentations.*—The Department of State administers this program which supports outstanding American cultural attractions appearing abroad. This support is necessary primarily because of high international transportation costs and itineraries to places where commercial revenues are inadequate to cover operating expenses. Approved projects, with itineraries reaching all areas of the world, numbered 30 for 1956, and are estimated at 47 during 1957, and 59 during 1958.

2. *Trade fairs and exhibitions.*—The Department of Commerce administers this program, which finances United States exhibitions plus commercial and labor missions at important international trade fairs and similar exhibitions. Authorizations for 1956 and 1957 provided for United States participation in 19 and 24 trade fairs, respectively. Funds requested in 1958 will provide for 33 participations (over a 16-month period).

3. *Universal and International Exhibition of Brussels.*—The Department of State, through a United States Commissioner General, will use these funds to finance a major United States exhibit and related activities in the Universal and International Exhibition of Brussels, 1958. This Exhibition will be the first major world's fair since the New York World's Fair of 1939–40, and will include national exhibits from approximately 50 countries plus a number of international organizations. It is estimated that 35 million persons will visit the Exhibition.

4. *Program coordination and publicity.*—In order to derive maximum impact, these projects are fully publicized abroad by the United States Information Agency, which will absorb the future costs of such publicity and coordination.

Unobligated balance no longer available	1,716,616	300,000	
Appropriation	15,000,000	8,500,000	

PROGRAM AND PERFORMANCE

Under provision of the Refugee Relief Act of 1953, a maximum of 209,000 persons in specified areas of Europe, the Near East, and the Far East may be granted special nonquota immigrant visas through December 31, 1956, for resettlement in the United States. This immigration was achieved in a manner consistent with resettlement opportunities existing in the United States, particularly with regard to employment and housing.

Through June 30, 1956, a total of 121,885 visas had been issued, or approximately 90 percent of those planned at that time. Present plans call for the issuance of approximately 65,000 visas in the current fiscal year making a total issuance under the law of 187,000 or 90 percent of the visas provided for, prior to the expiration of the act on December 31, 1956. The program will be liquidated before June 30, 1957.

Program and Performance

Title I of the Agricultural Trade Development and Assistance Act of 1954 authorizes the sale of up to $3 billion of surplus agricultural commodities to friendly nations for their currencies, with reasonable precautions neither to displace United States sales for dollars nor to disrupt world commodity prices. The Commodity Credit Corporation finances the costs. The foreign currencies generated by these sales may be used (*a*) to help develop new markets for United States agricultural commodities, (*b*) to purchase strategic and critical materials, (*c*) to procure military materiel and services for the common defense, (*d*) to purchase goods and services for other friendly nations, (*e*) to promote balanced economic development and trade among nations, (*f*) to pay United States obligations abroad, (*g*) to make loans to promote multilateral trade and economic development abroad, (*h*) to finance international education exchange activities, (*i*) to translate and publish books and other other publications abroad, and (*j*) to aid American-sponsored schools, libraries, and binational centers overseas.

Most of the currencies are used without charge to appropriations; some are sold to appropriations, and the proceeds of such sales go to the Commodity Credit Corporation. A lump-sum appropriation is recommended to reimburse the Commodity Credit Corporation for its losses which are not made up through such sales.

As of November 30, 1956, sales agreements had been signed with 30 countries calling for deposits of sales proceeds totaling $1,766 million. This represents the market value of commodities in which the Commodity Credit Corporation investment is approximately $2.6 billion. Subsidiary schedules on currency uses are presented in the chapters of the Departments of State, Defense, and Agriculture, the General Services Administration, the United States Information Agency, and under "Military assistance" and "Other mutual security programs" in the funds appropriated to the President chapter.

Revolving Fund, Defense Production Act

Under section 304 (b) of the Defense Production Act of 1950, designated agencies are authorized with Presidential approval to incur obligations of $2.1 billion on a probable ultimate net cost basis for the purpose of making loans and procuring critical materials in furtherance of the defense effort. The obligations are financed by borrowings from the Treasury. The 1951 amendments to the act permit commitments in excess of $2.1 billion so long as estimated probable ultimate net cost and outstanding working capital do not exceed this amount at any one time. Programs undertaken must be certified as essential to the national defense by the Office of Defense Mobilization. As of June 30, 1956, that Office had authorized programs having a gross value of $8,916 million which required certification of borrowing authority to cover working capital requirements and the estimated net cost to the Government. Of the $8.9 billion, gross transactions of $2.7 billion remained to be completed, and $1.3 billion remained to be placed under contract.

CERTIFICATIONS AS OF JUNE 30, 1956

[In thousands]

General Services Administration	$1,456,806
Treasury Department	244,247
Department of Agriculture	65,801
Department of the Interior	27,602
Export-Import Bank of Washington	43,268
Total certifications	1,837,724
Unused authorizations	262,276
Total	2,100,000

The Office of Defense Mobilization has allocated $1.9 billion of the $2.1 billion borrowing authority in support of these transactions, of which $1 billion is probable ultimate net cost, and the balance, working capital. New programs are now under study which may require certification for probable ultimate net cost of up to $57 million in 1957–58.

Except for some research and exploration to be carried on by the Department of the Interior, such new programs as are currently foreseen will be certified to General Services Administration.

General Services Administration.—Borrowing authority of $1,456,806,000 has been certified as of June 30, 1956, to finance the expansion of productive capacity for strategic metals and minerals and machine tools. This amount includes $937,492,000 for probable ultimate net cost of specific programs of which $778,092,000 is for metals and minerals programs, and $95,700,000 is for machine-tool programs, and $63,700,000 is for Treasury interest, custodial and administrative expenses. It also includes

PUBLIC ENTERPRISE FUNDS—Continued

EXPANSION OF DEFENSE PRODUCTION—Continued

Revolving Fund, Defense Production Act—Continued

$519,314,000 of working capital required for carrying inventories for which no sale is now foreseen.

A summary of transactions involving strategic minerals and metals (including work-in-process inventory) under this fund follows:

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Inventory—July 1	$441.7	$567.3	$644.4
Deliveries during year	264.8	249.6	226.7
Total available for sale	706.5	816.9	871.1
Sales during year:			
To national stockpile	94.3	90.7	71.4
To industry	33.8	85.7	88.5
Total sales	128.1	176.4	159.9
Losses on sales (profit)	11.1	(3.9)	2.0
Inventory—June 30	567.3	644.4	709.2
Total disposition and June 30 inventory	706.5	816.9	871.1

The major Defense Production Act programs of General Services Administration are of the following types:

1. Domestic purchase programs designed to increase domestic production by fixed incentive prices available to all domestic producers of materials such as beryl, mica, mercury, and manganese. These programs are scheduled to terminate at various dates ranging from December 1957 for mercury to June 30, 1962, for beryl and mica.

2. Basic expansion programs to increase mining or refining capacity of such materials as aluminum, copper, nickel, molybdenum, fluorspar, titanium, and zinc by offering guaranteed markets under specific contracts and for specific projects. Most of these contracts underwrite a 5-year production period, and expire at various dates to December 1963.

3. Research and pilot plant programs to develop new processes for economic recovery of low-grade domestic ores or for developing new processes for producing new materials such as titanium or synthetic mica. Such projects generally require from 1 to 3 years for completion.

4. A program to increase the production of nickel from the Government-owned Nicaro nickel plant by expanding the existing capacity of this plant by 75 percent. This expansion will be completed by January 1957.

5. A program for expansion of machine tool producing capacity by (*a*) installing under lease Government-owned machine tools in the plants of private producers, and (*b*) placing pool order contracts for general purpose machine tools to be activated in the event of a future emergency.

6. A program to "round out" capacity to produce steam turbines and turbine gears by installing machinery and equipment in plants of private contractors.

Department of Agriculture.—The purchase, management, and resale of agricultural commodities, except forest products, are carried out by the Commodity Credit Corporation, which is reimbursed from this fund for the net costs involved. The Secretary of Agriculture has been allocated borrowing authority for this purpose.

During 1956, the Corporation continued the management of inventories of castor beans and oil and American-Egyptian cotton acquired under programs initiated in prior years. The bulk of the castor oil and nearly half of the American-Egyptian cotton inventories had been disposed of by June 30, 1956. The remainder of these commodities will be sold by the end of 1957. However, it is estimated that castor beans will remain in the inventory of the Commodity Credit Corporation beyond June 30, 1958.

Net realized losses on purchases and resale operations amounted to $4,357,087 during 1956 and are estimated at $4,891,060 and $138,046 during 1957 and 1958, respectively. During 1956 the Secretary of Agriculture reimbursed the Commodity Credit Corporation in the amount of $45,251,967 for the net costs of the completed linseed oil, kenaf, and American-Egyptian cottonseed programs. No reimbursement is estimated for 1957, and reimbursement of $11,649,350 for the net costs of the castor oil and American-Egyptian cotton programs is anticipated for 1958. These payments constitute the net budgetary expenditures under this fund. The funds are obtained by borrowings from the Treasury. Interest accrued on borrowings by the Secretary of Agriculture from the Treasury amounted to $1,202,676 during 1956. Such interest is estimated to amount to $1,229,614 and $1,502,650 for 1957 and 1958, respectively.

In addition to purchase and resale operations, the Secretary of Agriculture may recommend to the Office of Defense Mobilization the certification of certain loans for increasing plant capacity to process or store agricultural commodities. No loans were certified during 1956 and none is expected to be certified during 1957 or 1958.

Department of the Interior.—Operations within the Department of the Interior with regard to the expansion of defense production have been limited to the encouragement of exploration for strategic and critical minerals and metals. As of June 30, 1956, the Office of Defense Mobilization had extended to the Defense Minerals Exploration Administration borrowing authority in the amount of $28 million, increased in August 1956 to $34 million. An additional $6 million borrowing authority is estimated for 1958. From the beginning of the program through June 30, 1956, Defense Minerals Exploration Administration had entered into 911 contracts, in which the Government's share of estimated costs amounted to $26,179,002 as against a total estimated cost of $42,597,236.

The administration had certified, as of the end of June 1956, 246 discoveries on projects involving contract amounts of $13,131,462, of which the Government's share is $8,135,295. Reports received through June 30, 1956, indicate that a total of $6,207,662 of Government funds had been spent on these certified projects. If production takes place on these projects within a 10-year period, some part, at least, of the Government funds advanced will be repaid according to a royalty arrangement.

Treasury Department.—The function of making and administering loans to private business enterprises under the authority of section 302 of the Defense Production Act of 1950, as amended, was assigned to the Secretary of the Treasury by Executive Order 10489, dated September 26, 1953. Applications for loans are considered only upon certification of essentiality by the Office of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Defense Mobilization. Net loan certifications were $238,871,000 on June 30, 1956, against which actual borrowings from the Treasury amounted to $176,570,000.

Following the hurricane and flood disasters which occurred in the late summer of 1955, the President, in Executive Order 10634, dated August 25, 1955, authorized the use of the Defense Production Act lending authority to aid in the reconstruction and replacement of facilities required for national defense which were destroyed or damaged in major disasters.

The only new loans authorized by the Treasury Department under this authority in 1956 were for rehabilitation of facilities damaged in major disasters. There were 8 loans amounting to $14,316,000 authorized; bank participation in 5 of the authorizations totaled $1,407,426. The Government's share of the authorizations amounted to $12,908,574 and of this $9,452,540 was on a deferred basis.

On June 30, 1956, there were outstanding under this authority 55 loans totaling $185,358,113. In addition, there was $42,789,521 in undisbursed commitments, of which $18,110,742 represented commitments to participate in loans made by banks wherein disbursement of Treasury funds is deferred.

Loans and commitments outstanding are disposed of to private financial institutions and investors whenever possible. The budgetary receipts of $111,214,390 anticipated for 1957 reflect the culmination of efforts to secure private refinancing for 2 of the 3 loans which made up the greatest part of the oustanding portfolio. The budgetary receipts of $64,150,000 anticipated for 1958 reflect the private refinancing of the third of these loans.

Export-Import Bank of Washington.—Pursuant to section 311 of Executive Order 10480 of August 15, 1953, which superseded Executive Order 10161, the Export-Import Bank, with funds provided under section 304 of the Defense Production Act of 1950, as amended, is responsible for making and administering all loans under section 302 of the act, upon receipt of certificates of essentiality issued by the Director of the Office of Defense Mobilization or the General Services Administrator, where the expansion, development, or production so financed is carried on in foreign countries.

No certificates were received and no new loans were authorized by the bank during 1956. During the year the bank continued to administer the six active credits previously authorized under this authority.

Operating results and financial condition.—The operating loss for conducting the programs of all agencies during 1958 is currently estimated at $42.6 million as compared with $19.7 million and $38.5 million in 1956 and 1957, respectively. These losses primarily result from the resale of high-cost material at market prices and from financing experimental research projects in such materials as titanium, manganese, nickel, etc.

The deficit at the end of 1958 is estimated at $301 million as compared with $219.9 million at the end of 1956. Because of the large unexpended balance remaining in the borrowing authority, it is not necessary to seek new authorizations from the Congress to replace the deficit at this time.

Inventories of minerals and metals (stated at cost) are expected to increase from $567.3 million in 1956 to $709.2 million at the end of 1958. The inventories at the end of 1958 represent the accumulation by the Government of such materials as titanium ($141 million), tungsten ($260 million), manganese ($77.3 million), chromite ($19.6 million), mica ($18.2 million), and columbium ($48.6 million). This material is held by the Government in this account because it cannot be absorbed within existing stockpile objectives and there is no current industrial need for the material in the economy.

No new additional advances to contractors are expected to be made during 1957 or 1958. Repayments on advances made to date will reduce the balance due from contractors from $73.3 million in 1956 to $42.4 million in 1958. Repayments by borrowers on existing loans, or the sale of existing loans by the Government to private banks are expected to reduce the outstanding balance of loans from $230.2 million at the end of 1956 to $73.4 million on June 30, 1958.

The investment in land and structures will increase to approximately $143.7 million by 1958 from $111 million in 1956, as a result of expenditures of about $8 million for expansion of the Government-owned Nicaro nickel plant in Cuba and net expenditures of nearly $25 million for the machine tool program.

The net effect of operations during 1957 and 1958 will result in increasing the interest bearing investment of the Government in this program from $1,144 million at the end of 1956 to $1,194 million on June 30, 1958.

Discharge of Investment Guaranty Liabilities Fund, Mutual Security Act

In order to encourage private American industrial investment abroad, and to facilitate the distribution of informational media, Public Law 665, approved August 26, 1954, as amended, authorizes guaranties against noncommercial risks. These risks are (1) inconvertibility of local currency receipts from an investment, (2) loss of investment resulting from expropriation or confiscation, and (3) loss by reason of war. The insurance, which may have a maximum term of 20 years, is available for United States investments in any country with which the United States has agreed to institute the guaranty program.

When payment is made pursuant to a guaranty, the currency, property, or claim on account of which such payment is made becomes the property of the United States.

Although the Mutual Security Act of 1956 provided for a split of the investment guaranty program into the foreign investment guaranty fund and the informational media guaranty fund, this separation has not as yet been formally effected by the International Cooperation Administration and the United States Information Agency. Accordingly, consolidated schedules are presented in this budget.

Industrial guaranties.—As of November 30, 1956, a total of $123,496,237 investment guaranties had been issued since the inception of the program in 1948, of which $95,836,597 were outstanding. Of this total amount issued, $92,480,468 were against the risk of inconvertibility and $31,015,769 were against the risk of loss by expropriation. In 1956, the number of countries participating in this program increased from 26 to 30; additional increases are anticipated in 1957 and 1958.

The Mutual Security Act of 1956 increased the guaranty issuing authority from $200 million to $500 million and placed the program on a fractional reserve basis rather than a full reserve basis.

The act also provided authority to issue guaranties against loss by reason of war.

From the inception of the program until November 30, 1956, no disbursements had been made under any of these investment guaranties and a total of $1,700,596 in fees had been collected.

Informational media guaranties.—The informational media guaranty program is authorized under section 1011 of the United States Information and Educational Exchange Act of 1948, as amended. The informational media guaranty program makes it possible for American exporters of books, periodicals, motion pictures, and other informational media to sell their materials, through regular commercial channels, in foreign countries having a shortage of United States dollar exchange. Under the informational media guaranty program, foreign importers make payment to American exporters in local currency, following which exporters may exchange their local currency for United States dollars upon application to the United States Information Agency, in accordance with the terms of each exporter's informational media guaranty contract. As of November 30, 1956, a total of $43,250,512 informational media guaranties had been issued since the inception of the program, of which $7,709,752 were outstanding.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

	1956 actual	1957 estimate	1958 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Purchase of foreign currency	$6,425,525	$6,862,500	$12,947,600
To financing:			
Increase in Treasury cash		641,957	1,116,879
Total funds applied	6,425,525	7,504,457	14,064,479
FUNDS PROVIDED			
By operations:			
Realization of assets: Dollar proceeds of sale of foreign currency	2,500,581	4,410,500	5,185,000
Income: Fees collected	447,753	799,479	1,269,479

PROPOSED FOR LATER TRANSMISSION

Military assistance, funds appropriated to the President (under existing and proposed legislation, 1958).—Appropriations in the amount of $2,450 million are required in 1958 to finance military assistance programs already authorized or to be authorized under legislation to be proposed to the Congress. In addition, it is planned that an estimated $115 million unobligated balances in 1957 programs will be requested to be continued available in 1958.

CURRENT AUTHORIZATIONS

ADVISORY COMMITTEE ON WEATHER CONTROL

SALARIES AND EXPENSES

Salaries and Expenses, Advisory Committee on Weather Control

For necessary expenses of the Advisory Committee on Weather Control, established by the Act of August 13, 1953 (67 Stat. 559), as amended, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [$300,000] *$310,000, to remain available until July 30, 1958.*

[Salaries and expenses: The unobligated balance of the appropriation granted under this head for the fiscal year 1956 shall remain available until July 30, 1956, for necessary expenses of the Advisory Committee on Weather Control, established by the Act of August 13, 1953 (67 Stat. 559), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).] *(Department of Commerce and Related Agencies Appropriation Act, 1957; Supplemental Appropriation Act, 1957.)*

Appropriated 1957, **$300,000** Estimate 1958, **$310,000**

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
Evaluation of experiments in weather modification (total obligations)	$251,273	$323,727	$303,300
Financing:

Appropriation	275,000	300,000	310,000
Reappropriation		23,727	

PROGRAM AND PERFORMANCE

The Committee evaluates weather modification (cloud seeding) to determine whether the Federal Government should experiment with, engage in, or regulate such activities. During 1958 it is proposed to concentrate on preparing the required reports of the Committee's findings and recommendations for the President and Congress. The Committee expires July 30, 1958.

AMERICAN BATTLE MONUMENTS COMMISSION

SALARIES AND EXPENSES

Salaries and Expenses, American Battle Monuments Commission

For necessary expenses, as authorized by the Act of June 26, 1946 (36 U. S. C. 121, 123–132, 138), *as amended by the Act of July 25, 1956 (70 Stat. 640)*, including the acquisition of land or interest in land in foreign countries; purchase and repair of uniforms for caretakers of national cemeteries and monuments outside of the United States and its Territories and possessions [at a cost not exceeding $1,500]; not to exceed [$69,000] *$65,000* for expenses of travel; rent of office and garage space in foreign countries; purchase (one[, at not to exceed $2,600,] for replacement only) and hire of passenger motor vehicles; and insurance of official motor vehicles in foreign countries when required by law of such countries; [$1,140,000, of which $10,000 shall be immediately available for printing relating to the dedication of World War II memorials] *$1,300,000*: *Provided*, That where station allowance has been authorized by the Department of the Army for officers of the Army serving the Army at certain foreign stations, the same allowance shall be authorized for officers of the Armed Forces assigned to the Commission while serving at the same foreign stations, and this appropriation is hereby made available for the payment of such allowance: *Provided further*, That when traveling on business of the Commission, officers of the Armed Forces serving as members or as secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission: *Provided further*, That the Commission shall reimburse other Government agencies, including the Armed Forces, for salary, pay, and allowances of personnel assigned to it. *(General Government Matters Appropriation Act, 1957.)*

Appropriated 1957, **$1,140,000** Estimate 1958, [a] **$1,300,000**

[a] Includes $10,000 for activities previously carried under "Construction of memorials and cemeteries, American Battle Monuments Commission." The amount obligated in 1957 is shown in the schedule as a comparative transfer.

Unobligated balance no longer available	8,258		
Appropriation (adjusted)	929,000	1,140,000	1,300,000

PROGRAM AND PERFORMANCE

The Commission is responsible for the maintenance and operation of all permanent United States military cemeteries and memorials located in foreign countries.

These include 8 World War I cemeteries, a memorial chapel in each cemetery, 11 World War I memorials outside the cemeteries, 14 World War II cemeteries and memorials, and the United States National Cemetery, Mexico City, Mexico. Increase 1958 over 1957 reflects increasing workload due to completion of various features of the World War II cemeteries and memorials, and provides for furnishing photographs of individual graves to next of kin.

CURRENT AUTHORIZATIONS—Continued

AMERICAN BATTLE MONUMENTS COMMISSION—Continued

Construction of Memorials and Cemeteries, American Battle Monuments Commission—Continued

the American Armed Forces in World War II. The Commission estimates that this program will be completed by August 1959. Construction covers the development at 15 locations and includes permanent headstones, erection of a memorial structure at each location, and other features such as landscaping, roads and paths, drainage, water supply, caretakers' houses and visitors' and utility buildings required for operating purposes. The 1958 program also includes construction of a memorial in the National Cemetery in Hawaii and memorials on the east and west coasts of the United States.

OBLIGATIONS BY OBJECTS

	1956 actual	1957 estimate	1958 estimate
Total number of permanent positions	97	93	47
Full-time equivalent of all other positions	274	110	52
Average number of all employees	361	202	95

ATOMIC ENERGY COMMISSION

OPERATING EXPENSES

Operating Expenses, Atomic Energy Commission

For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1954, *as amended*, including the employment of aliens; rental in or near the District of Columbia; services authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of equipment; purchase, maintenance, and operation of aircraft; publication and dissemination of atomic information; purchase, repair, and cleaning of uniforms; purchase of newspapers and periodicals (not to exceed $5,000); official entertainment expenses (not to exceed [$15,000] *$30,000*); not to exceed [$3,500,000] *$4,000,000* for expenses of travel, including expenses of attendance at meetings of organizations concerned with the function or activity for which this appropriation is made; reimbursement of the General Services Administration for security guard services; not to exceed [$44,150,000] *$46,500,000* for personal services; purchase (not to exceed [three hundred and six] *four hundred and sixty* for replacement only, *including two at not to exceed $3,500 each*) and hire of passenger motor vehicles; [$1,740,400,000] *$2,377,000,000*, together with the unexpended balances, as of June 30, [1956] *1957*, of prior year appropriations made available under this head to the Atomic Energy Commission, and, in addition, any moneys (except sums received from disposal of property under the Atomic Energy Community Act of 1955 (42 U. S. C. 2301)) received by the Commission, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U. S. C. 484): *Provided*, That of such amounts $100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended: *Provided further*, That from this appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided further*, That no part of this appropriation shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of $90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of $45,000 per annum. (*42 U. S. C. 2011*; *Second Supplemental Appropriation Act, 1957*).

Appropriated 1957, **$1,740,400,000** Estimate 1958, **$2,377,000,000**
Appropriated (adjusted) 1957, **$1,751,900,000**

Reappropriation	344,957,297	62,727,668	22,727,668

PROGRAM AND PERFORMANCE

The Commission procures raw materials; manufactures special nuclear materials and atomic weapons; develops improved weapons; conducts research and development aimed at generation of atomic power, including power from controlled thermonuclear reactions, and protection of health against possible hazards arising from atomic energy operations; conducts investigations in the physical and life sciences related to atomic energy; establishes and enforces regulations for civilian uses of atomic energy; promotes industrial participation in atomic energy development for peaceful purposes; encourages scientific and industrial progress through the dissemination of information under the terms of the Atomic Energy Act of 1954, as amended; and participates in programs of international cooperation in peaceful applications of atomic energy.

The program is administered in the field through 10 major offices. Most of the Commission's activities are carried on in Government-owned facilities by industrial concerns and educational institutions, operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Net program costs in 1958 are estimated at $2,164.2 million, or 24 percent greater than the estimated 1957 net costs of $1,745 million, and 56.4 percent greater than actual net costs of $1,384.1 million for 1956. The upward trend reflects mainly larger scale procurement of raw materials and expanded production of nuclear weapons. Other increases occur in the efforts to develop varied types

CURRENT AUTHORIZATIONS—Continued

ATOMIC ENERGY COMMISSION—Continued

OPERATING EXPENSES—continued

Operating Expenses, Atomic Energy Commission—Continued

of atomic weapons, military reactors, and civilian power reactors; in other research; and in training, education, and information, which is identified as a separate activity for the first time in this budget.

The net program costs plus obligations incurred for costs of other years, net, result in the total obligational requirements. The obligations for operating expenses in 1958 total $2,399.7 million compared to $1,791.9 million in 1957 and $1,476.1 million in 1956.

1. *Raw materials.*—Uranium ores and concentrates are procured from domestic and foreign sources for processing in the production facilities of the Commission. Substantial additional tonnages of concentrates will be obtained from United States producers and from Canada in 1958, with minor increases from other foreign sources. Exploration efforts will be concentrated on geologic, geophysical, and geochemical investigations. Activities to improve methods of extracting uranium from ores will continue.

2. *Special nuclear materials.*—Uranium concentrates are processed into feed materials from which (*a*) plutonium is produced in the reactors at Hanford, Wash., and Savannah River, S. C., or (*b*) the isotope uranium 235 is extracted in plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. As production of feed and special nuclear materials increases, the gains in output will be accompanied by lower unit processing costs. Work will continue on development of new equipment and processes to increase yields and improve the quality of products.

3. *Weapons.*—This program encompasses the production of weapons; the design, development, and testing of new weapon types; and the storage, maintenance, and custody of stockpiled weapons. Expanded production facilities will be in operation and production of weapons will increase. There will also be an increase in the number of scientific and technical personnel employed in the development of nuclear weapons.

4. *Reactor development.*—Included in this activity are the development of civilian power reactors, the development of commercial ship reactors, the development of power and propulsion reactors to meet a variety of military requirements, studies to advance reactor technology and evaluate promising reactor concepts, and the operation of the National Reactor Testing Station in Idaho, including its technical facilities. The costs by category are as follows:

Category:	*1956 actual*	*1957 estimate*	*1958 estimate*
Civilian power reactors	$42,267,127	$59,600,000	$95,000,000
Commercial ship reactors	57,945	3,300,000	3,300,000
Army package power reactors	924,763	3,300,000	5,600,000
Naval propulsion reactors	40,821,589	70,750,000	84,000,000
Aircraft propulsion reactors	49,604,202	89,550,000	91,000,000
Advanced development, operational services, and all other	37,554,317	55,213,000	70,300,000
Total reactor development	171,229,943	281,713,000	349,200,000

The Commission's civilian power program provides a foundation of technical knowledge through the design, fabrication, and operation of power reactor experiments. Seven reactor experiments will be operated in 1957. Most of these will continue in operation in 1958 and will be joined by two additional reactor experiments and the pressurized water reactor prototype at Shippingport, Pa., which will be completed early in the year. Through the power demonstration reactor program, initiated in 1956, the Commission provides financial aid in the development of full-scale power reactors built by private industry and public power bodies. This aid provides a basis for the transition to a nuclear power industry financed by these groups.

The Commission's program for 1958 includes the continuation of work to develop atomic powerplants for use in commercial vessels. Development of the reactor which will power the first atomic merchant ship will continue in 1958, and fabrication of the nuclear fuel will be initiated.

In the military reactor programs, efforts will be continued to develop reactors for the Department of Defense, including propulsion reactors for submarines, surface combatant ships, and military aircraft and missiles, and transportable plants for the generation of heat and electric power at remote military installations. Many of the advances in military reactor development contribute significantly to the civilian power program.

To provide broad engineering support to all reactor projects, the Commission's program includes general research and development on materials, moderators, control techniques, fuel elements, chemical processing systems, and reactor safety which will be supported at a higher level in 1958. The Commission also operates two testing reactors at the National Reactor Testing Station, Arco, Idaho, which provide irradiation services for all of the Commission's program.

5. *Physical research.*—Basic and long-range investigations in the fields of physics, mathematics, chemistry, and metallurgy are undertaken to provide an ever-expanding fund of theoretical and practical knowledge in fields related to nuclear energy. Approximately 90 particle accelerators, ranging in energy from several thousand electron volts to several billion electron volts, are utilized in the program. Approximately 70 percent of the cost of research is for work done in Commission laboratories and 30 percent is for work contracted to about 100 universities and other independent institutions.

6. *Biology and medicine.*—Research is conducted on the effects of radiation on living things. It includes investigations of the biological effects of nuclear explosions, and the development of methods for minimizing exposure to radioactive materials of all kinds and for minimizing and protecting against the injurious effects of radiation. Increasing support is given to the development of methods for utilizing radioactive materials for human welfare, including fundamental investigations of the applications of radiobiology to research in agriculture and animal husbandry, and to the diagnosis and treatment of human diseases, such as cancer. The comprehensive study of permissible levels of exposure to radioactive contamination from all causes is given special emphasis. Standards are established to insure that the Commission's activities are conducted with safety to both employees and the public.

The major portion of the research is carried on at 16 laboratories which are owned by or operated for the Commission and the remainder, approximately 500 projects, is supported in more than 200 universities, colleges, hospitals, and independent laboratories. The program includes the operation of 4 facilities in the United States devoted to cancer research and 2 laboratories in Japan for the determination of the long-term effects of atomic bombs on the population.

7. *Training, education, and information.*—This activity includes operation of special schools; granting of fellowships for graduate students; assistance to high schools,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

colleges, and universities; and dissemination of technical information, including participation in international conferences on nuclear science and technology.

Four schools will be operated in 1958: The International School of Nuclear Science and Engineering at the Argonne National Laboratory, the Oak Ridge School of Reactor Technology, the Oak Ridge Institute of Nuclear Studies, and the new Puerto Rico Training Center.

Under the fellowship program started in 1957, approximately 150 college graduates will receive assistance for graduate studies in nuclear energy technology. Other fellowships to be offered include 100 in radiological physics, 8 in industrial hygiene, and 11 in industrial medicine.

Assistance to schools to provide for expanded educational programs in atomic energy will be increased over 1957. Grants will be made to universities to help them acquire reactor training equipment, teaching aids, demonstration apparatus, and special laboratory equipment. University summer courses in general radiobiology will be made available to high school science teachers, and special faculty training in reactor technology for university faculty members will be provided.

To broaden the dissemination of information on matters relating to atomic energy, the Commission operates the Technical Information Service and the American Museum of Atomic Energy at Oak Ridge, maintains libraries, performs translation services, and conducts tours with traveling atomic energy exhibits. The Commission will participate in a second international conference on atomic energy in calendar year 1958 similar to the Geneva Conference held in August 1955.

8. *Communities.*—The Commission operates 3 towns—Oak Ridge, Tenn., Richland, Wash., and Los Alamos, N. Mex.—with an estimated total population in 1957 of 70,000, and provides limited community services at other locations. Legislation has been enacted to terminate Government ownership and operation of Oak Ridge and Richland; the 1958 estimates are based on anticipated disposal of a substantial portion of Atomic Energy Commission-owned real estate by the end of 1958 with resultant reductions in requirements for property maintenance and in revenues. The estimates also include costs associated with the disposal program and provide for assistance payments to the community hospital at Richland which has been transferred to a private nonprofit organization. Since real estate revenues normally exceed operating costs by a substantial amount, the loss in revenue from property sales together with the costs of disposal will result in an estimated excess of costs over revenues of $1.6 million in 1958. This relation between costs and revenues, which are included under "Revenues applied," is indicated in the following table:

	1956 actual	*1957 estimate*	*1958 estimate*
Revenues	$20,463,284	$18,630,000	$14,879,000
Operating costs, including costs of disposal	18,770,846	18,067,000	16,515,000
Excess of revenues over costs	1,692,438	563,000	
Excess of costs over revenues			1,636,000

9. *Program direction and administration.*—The costs of general management, supervision of program operations, the negotiation and administration of contracts, the establishment and enforcement of regulations for civilian uses of atomic energy, including the issuance of licenses, and other related administrative activities performed by Commission personnel represent 2.1 percent of total program costs in 1958 as compared with 2.2 percent in 1957. The estimate for 1958 provides for a higher average level of employment in support of various activities related to the peaceful applications of atomic energy in both its domestic and its international aspects, and to the expanded effort in the development and production of atomic weapons for defense. The increase also provides for moving to and operating the new Atomic Energy Commission headquarters building near Germantown, Md.

10. *Security investigations.*—The Atomic Energy Act of 1954 requires background investigations of those persons proposed for access to restricted data of the atomic energy program. The number of full background investigations to be completed is estimated at 33,517 for 1958, compared with 36,012 for 1957 and 31,316 for 1956.

11. *Other costs.*—In furthering the objectives of the Atomic Energy Act of 1954 concerning the utilization of atomic energy for peaceful purposes, the Commission furnishes materials and services to industrial organizations and other private parties apart from those which it provides normally for its own basic programs. Costs for these are incurred only upon the request of others. Charges made for such products and services are included under "Revenues applied" as a reduction in determining the appropriations required. The items included are:

	1956 actual	*1957 estimate*	*1958 estimate*
Costs of products sold	$5,379,031	$5,654,000	$3,051,000
Costs of services performed	949,124	1,881,000	1,810,000
Total other costs	6,328,155	7,535,000	4,861,000

12. *Revenues applied.*—Revenues are obtained from services performed and the sale of products produced as a part of the Commission's own basic program (primarily the operation of the Atomic Energy Commission-owned communities and housing and the sale of special nuclear materials and related products) and from products and services for which costs are incurred only upon the request of others and are included under "Other costs." The items included are:

	1956 actual	*1957 estimate*	*1958 estimate*
Sale of special nuclear materials and related products	$3,294,684	$3,225,000	$6,297,000
Income from research hospitals	300,602	257,000	207,000
Income from training, education, and information	250,130	395,000	470,000
Income from communities	20,463,284	18,630,000	14,879,000
Income from products sold and services performed at request of others:			
Products sold	8,049,777	9,328,000	4,496,000
Services performed	1,063,675	2,120,000	1,327,000
Miscellaneous income	2,127,804	2,182,000	2,143,000
Total revenues	35,549,956	36,137,000	29,819,000
Less funds returned to Treasury	−6,464,635		
Total revenues applied	29,085,321	36,137,000	29,819,000

13. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table.

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Inventories (goods unconsumed by activities)	$103,562,912	$135,869,660	$144,498,000	$166,924,000
Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	491,567,735	559,198,115	599,085,528	814,245,196
Advances (payments for goods and services on order not yet received)	515,975	474,753

CURRENT AUTHORIZATIONS—Continued

ATOMIC ENERGY COMMISSION—Continued

OPERATING EXPENSES—continued

Operating Expenses, Atomic Energy Commission—Continued

The estimate for 1958 includes $22.4 million to increase the level of inventories, $215.2 million to increase the level of undelivered orders, and a reduction of $2.1 million in collateral funds. The inventories of various kinds are maintained primarily by contractors to support the operation of Commission-owned production plants and laboratories. The increase in inventories for 1958 is principally for special reactor materials for future use in the Atomic Energy Commission program and the industrial participation program. The increase in the level of undelivered orders is related primarily to the production of weapons and weapons components, and research and development particularly in the fields of weapons and reactor development.

[PLANT ACQUISITION AND CONSTRUCTION]

Plant Acquisition and Construction, Atomic Energy Commission

[For expenses of the Commission in connection with the purchase and construction of plant and other expenses incidental thereto necessary in carrying out the purposes of the Atomic Energy Act of 1954, including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; and hire of passenger motor vehicles; $158,300,000, to remain available until expended: *Provided*, That the obligated balance as of June 30, 1956, of amounts included in appropriations to the Atomic Energy Commission for "Plant and equipment", for the activity "Equipment not included in construction projects", shall be transferred to and merged with the appropriation for "Operating expenses", and the remaining balance of such appropriations shall be merged with this appropriation: *Provided further*, That, in the event additional feed materials capacity is constructed by private industry with its own funds, the amounts included in this appropriation for such construction may be transferred to the appropriation for "Operating expenses".] (*42 U. S. C. 2011; 70 Stat. 127, 1035; Second Supplemental Appropriation Act, 1957.*)

Appropriated 1957, **$158,300,000**
Appropriated (adjusted) 1957, **$146,800,000**

Recovery of prior year obligations	−154,449,000	−15,201,000	
Unobligated balance carried forward	375,810,475	58,695,000	
Unobligated balance under "Plant acquisition and construction, Atomic Energy Commission." transferred to schedule shown under the head "Proposed for later transmission" at the end of this chapter			48,800,000
Appropriation (adjusted)	259,227,000	146,800,000	

PROGRAM AND PERFORMANCE

From this appropriation the Commission constructs plant and facilities for its production, research, and supporting operations. Since the Atomic Energy Act of 1954 requires statutory authorization of appropriations for plant acquisition and construction, obligations are estimated in 1958 only for projects for which appropriations have already been authorized. No new obligational authority is requested at this time because the $58.7 million of unobligated balances brought forward from prior years is more than sufficient to cover the $9.9 million of obligations for these projects. The remaining $48.8 million is to be applied against 1958 obligational requirements of projects included in the anticipated authorization of appropriations for which a supplemental will be transmitted later (see under the head "Proposed for later transmission," p. 239).

1. *Facilities for raw materials.*—With the exception of the Commission's processing mill at Monticello, Utah, which was expanded in 1956, all United States mills for the processing of uranium ores are privately owned. Other obligations in 1956 and 1957 are for the construction of access roads to uranium mines and miscellaneous supporting facilities.

2. *Facilities for special nuclear materials.*—Under this activity, the Commission has (*a*) expanded the production plants at Oak Ridge, Tenn., and Hanford, Wash, and (*b*) constructed new production plants at Paducah, Ky., Portsmouth, Ohio, and Savannah River, S. C., and new feed material plants at Fernald, Ohio, and St. Louis, Mo. Obligations in 1956 and 1957 are mainly for expansion of the feed material complex, including a new facility at Weldon Spring, Mo., and for improvements to the production reactors and related facilities at Hanford and Savannah River.

3. *Facilities for weapons.*—This activity includes the construction of facilities for the production of weapons, for the storage of completed weapons, and for the development and engineering of new weapon types.

4. *Facilities for reactor development.*—The Commission constructs laboratory buildings for fundamental engineering work on reactor concepts and reactor materials, facilities for the testing of reactor experiments, reactors for the testing of materials, and prototype reactors for civilian power and military purposes. Obligations in 1956 and 1957 are primarily for (*a*) test facilities connected with military aircraft nuclear propulsion development; (*b*) land-based prototype naval ship reactors, including 2 such facilities for submarines and 1 for large surface ships; (*c*) an experimental breeder reactor and the large-scale pressurized water power reactor at Shippingport, Pa., for the civilian power program; (*d*) participation with the utility industry in the construction of other power reactor prototypes; and (*e*) an engineering test reactor. Obligations in 1958 are for the completion of certain previously authorized projects connected with the development of military aircraft propulsion reactors.

5. *Facilities for physical research.*—Large research machines and laboratory buildings are constructed to further research in physics, chemistry, and metallurgy. The major portion of the obligations in 1957 are for the completion of three multibillion electron volt accelerators which will assist in obtaining new knowledge about the atomic nucleus and the elementary particles. One of these is being built at Princeton, N. J., one at Cambridge, Mass., and one, larger than any now existing, at the Brookhaven National Laboratory, Upton, Long Island. The 1958 estimates cover the design of another multibillion electron volt accelerator, the sixth in the United States, at the Argonne National Laboratory, Lemont, Ill.

6. *Facilities for biology and medicine.*—Under this activity, research facilities are built for atomic energy research in the fields of medicine, biology, and biophysics. In 1956, the construction of a new research hospital at the Brookhaven National Laboratory was initiated.

7. *Facilities for communities.*—Housing and other community facilities are constructed in the Commission-operated towns of Richland, Wash., Oak Ridge, Tenn., and Los Alamos, N. Mex. Obligations in 1956 and 1957 are primarily for a new community hospital at Oak Ridge, for municipal facilities in Oak Ridge and Richland connected with the community disposal program, and for additional housing at Los Alamos. A few miscellaneous projects at Richland and Los Alamos are programed for 1958.

8. *Facilities for administration.*—Obligations in 1956 and 1957 are mainly for the construction of the new headquarters building at Germantown, Md. Other obligations provide for renovation or conversion of space for administrative purposes at other locations.

Any appropriation available under this or any other Act to the Atomic Energy Commission may initially be used subject to limitations in this Act during the fiscal year [1957] *1958* to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of any appropriation herein made to the Atomic Energy Commission may be transferred to any other such appropriation, but no such appropriation shall be increased by more

than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

No part of any appropriation herein made to the Atomic Energy Commission shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*42 U. S. C. 2011; Second Supplemental Appropriation Act, 1957.*)

Miscellaneous

Allocations Received From Other Appropriation Accounts

CIVIL SERVICE COMMISSION

Salaries and Expenses, Civil Service Commission

Salaries and expenses: For necessary expenses, including not to exceed [$12,000] *$22,000* for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $10,000 for medical examinations performed for veterans by private physicians on a fee basis; not to exceed [$100] *$350* for the purchase of newspapers and periodicals (excluding scientific, technical, trade or traffic periodicals, for official use); payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; not to exceed [$70,000] *$100,000* for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); reimbursement of the General Services Administration for security guard services for protection of confidential files; not to exceed [$508,000] *$609,000* for expenses of travel; and not to exceed $5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; [$17,407,500] *$20,000,000.*

No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order 9358 of July 1, 1943[, or for the compensation or expenses of any member of a board of examiners (1) who has not made affidavit that he has not appeared in any agency proceeding within the preceding two years, and will not thereafter while a board member appear in any agency proceeding, as a party, or in behalf of a party to the proceeding, before an agency in which an applicant is employed who has been rated or will be rated by such member; or (2) who, after making such affidavit, has rated an applicant who at the time of the rating is employed by an agency before which the board member has appeared as a party, or in behalf of a party, within the preceding two years: *Provided*, That the definitions of "agency", "agency proceeding", and "party" in section 2 of the Administrative Procedure Act shall apply to these terms as used herein]. *(5 U. S. C. 22–1, 631–642, 652, 654, 691–740a, 851–869, 901–954, 1010; Supp. 740b–740i, 1051–1052, 1071–1121, 1123–1132,*

Financing:			
Unobligated balance no longer available	38,941		
Appropriation (adjusted)	17,318,269	17,407,500	20,000,000

PROGRAM AND PERFORMANCE

1. *Recruiting and examining.*—Most appointments in the competitive civil service will be made under the open competitive merit system through examinations held by the offices of the Commission and its boards of examiners, made up of agency personnel operating under the supervision and direction of the Commission. Appointments through such competitive examinations will accord career or career-conditional status. Physically handicapped persons are given special placement attention. Veterans are aided in securing the benefits to which they are entitled. An employees' incentive awards program is conducted to stimulate and pursue the development of new and improved methods and ideas.

	1956 actual	*1957 estimate*	*1958 estimate*
Examinations announced by—			
The Commission	12,114	12,622	14,000
Boards of examiners	17,309	15,445	15,800
Total	29,423	28,067	29,800
Applications processed by—			
The Commission	597,092	595,800	639,830
Boards of examiners	1,107,766	1,074,086	1,075,000
Total	1,704,858	1,669,886	1,714,830
Placements made by—			
The Commission	93,761	87,955	96,500
Boards of examiners	182,072	181,545	184,000
Total	275,833	269,500	280,500

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system.

	1956 actual	*1957 estimate*	*1958 estimate*
National agency check and inquiry cases	324,605	303,028	321,100
Limited security investigations	6,990	6,450	8,174
Other personal investigations	5,858	6,477	7,487

3. *Inspections and classification audits.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. It also conducts classification surveys to insure compliance with classification standards.

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act and other benefit acts involves adjudicating annuity, death, benefit, refund, and service credit claims as well as maintaining the control accounts for the fund and making payments to annuitants and other claimants.

	1956 actual	*1957 estimate*	*1958 estimate*
Annuity and death claims	64,909	74,556	81,380
Refund claims	182,614	200,727	200,000
Service credit claims	24,840	26,867	25,980
Inquiries answered	192,332	206,180	205,740

5. *Developing programs and standards.*—The Commission develops programs, devises tests, issues standards and regulations, and proposes legislation to improve the Federal personnel system for both competitive and noncompetitive positions. Increased emphasis will be placed on strengthening the classification standards program.

6. *Regulatory, appellate, and advisory functions.*—These consist of the formulation of rules and regulations; hearing and taking action on appeals; the administration of the political activities statutes; and the recommendation of measures to the President to strengthen the Federal personnel system.

Investigations of United States Citizens for Employment by International Organizations, Civil Service Commission

Investigations of United States citizens for employment by international organizations: For expenses necessary to carry out the provisions of Executive Order No. 10422 of January 9, 1953, as amended, prescribing procedures for making available to the Secretary General of the United Nations, and the executive heads of other international organizations, certain information concerning United States citizens employed, or being considered for employment by such organizations, [$487,500], *including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), $507,000: Provided,* That this appropriation shall be available for advances or reimbursements to the applicable appropriations or funds of the Civil Service Commission and the Federal Bureau of Investigation for expenses incurred by such agencies under said Executive order: *Provided further,* That members of the International Organizations Employees Loyalty Board may be paid actual transportation expenses, and per diem in lieu of subsistence authorized by the Travel Expense Act of 1949, as amended, while traveling on official business away from their homes or regular places of business, including periods while en route to and from and at the place where their services are to be performed: *Provided further,* That nothing in sections 281 or 283 of title 18, United States Code, or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of appointment for part-time or intermittent service as a member of the International Organizations Employees Loyalty Board in the Civil Service Commission as established by Executive Order 10422, dated January 9, 1953, as amended. (*Independent Offices Appropriation Act, 1957.*)

PROGRAM AND PERFORMANCE

The Civil Service Commission and the Federal Bureau of Investigation conduct investigations of United States citizens considered for employment in international organizations of which the United States Government is a member. The reports of these investigations are forwarded to the International Organizations Employees Loyalty Board of the Civil Service Commission which makes advisory determinations under the loyalty standard. The advisory determinations are transmitted, through the Secretary of State, to the Secretary General of the United Nations or the executive heads of other international organizations.

Financing:			
Unobligated balance no longer available	22,964		
Appropriation (adjusted)	2,240,000	2,024,000	2,417,000

PROGRAM AND PERFORMANCE

Annuities are paid to persons who were employed on the construction of the Panama Canal or to their widows, and benefits are paid to widows of former employees of the Lighthouse Service.

The increase in 1958 is due to legislation, effective August 1, 1956, liberalizing annuities of Panama Canal construction employees. (70 Stat. 607.)

Payment to Civil Service Retirement and Disability Fund, Civil Service Commission

[Payment to civil-service retirement and disability fund: For financing the liability of the United States, created by the Act approved May 22, 1920, and Acts amendatory thereof (5 U. S. C., ch. 14), $525,000,000, which amount shall be placed to the credit of the "civil-service retirement and disability fund."] (*Independent Offices Appropriation Act, 1957.*)

Appropriated 1957, **$525,000,000**

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
Payment of Government share of retirement (total obligations)	$233,000,000	$525,000,000	
Financing:			
Appropriation	233,000,000	525,000,000	

PROGRAM AND PERFORMANCE

For 1957 and prior years this appropriation was the means of making the Government's payment to the retirement fund. Legislation enacted in the last session of the 84th Congress requires that beginning in July 1957 agencies pay to the fund an amount equal to deductions from employees' salaries. Agency payments will equal 6.5 percent of covered payroll. Since the total of these payments will be greater than amounts heretofore provided through this appropriation, no governmentwide appropriation is recommended for 1958.

Financial statements relating to the civil-service retirement and disability fund are printed in part III of the budget.

OBLIGATIONS BY OBJECTS

	1956 actual	1957 estimate	1958 estimate
11 Grants, subsidies, and contributions	$233,000,000	$525,000,000

Total expenditures (out of current authorizations)	233,000,000	525,000,000	

Administrative Expenses, Employees' Life Insurance Fund, Civil Service Commission (Limitation)

(Trust fund)

Not to exceed [$117,500] *$233,000* of the funds in the "Employees' Life Insurance Fund" shall be available for reimbursement to the Civil Service Commission for administrative expenses incurred by the Commission during the current fiscal year in the administration of the Federal Employees' Group Life Insurance Act. (*5 U. S. C. 2091; 69 Stat. 676; Independent Offices Appropriation Act, 1957.*)

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
Administration (total obligations)	$115,858	$117,500	$233,000
Financing:			
Limitation	115,858	117,500	233,000

PROGRAM AND PERFORMANCE

This limitation covers expenses incurred by the Civil Service Commission in the administration of the Federal Employees' Group Life Insurance Act. The use of these funds is reflected in the schedule for advances and reimbursements, Civil Service Commission. The increase in the limitation for 1958 is due to the extra workload anticipated when the fund fully maintains the additional 95,000 members of 9 employee beneficial associations.

Financial statements relating to the Federal employees' life insurance fund are printed in part III of the budget document.

A proposal for later transmission appears at the end of this chapter to increase the administrative expense limitation for 1957.

OBLIGATIONS BY OBJECTS

	1956 actual	1957 estimate	1958 estimate

FEDERAL CIVIL DEFENSE ADMINISTRATION

This Administration prepares national civil defense plans and programs as an integral part of the total program for defense of the United States against enemy attack. The Administration provides advice and guidance to States or their political subdivisions, maintains operational capability including attack warning and communications systems, makes financial contributions to States and political subdivisions for civil defense purposes, and stockpiles medical, and radiological defense equipment and supplies.

In fiscal year 1958, increased activity will take place in the public civil defense education, information, and training programs, research activities, and operational capabilities. Overall staff resources will be expanded by 56 percent. Stockpiling of emergency hospitals, medical supplies, and radiological detection equipment will continue at an increased rate. Civil defense responsibilities delegated to other agencies will be expanded to further promote the integration of civil defense into the entire Federal structure.

Operations, Federal Civil Defense Administration

Operations: For necessary expenses, not otherwise provided for, in carrying out the provisions of the Federal Civil Defense Act of 1950, as amended (50 U. S. C., App. 2251–2297), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); reimbursement of the Civil Service Commission for full field investigations of employees occupying positions of critical importance from the standpoint of national security; expenses of attendance at meetings concerned with civil defense functions; reimbursement of the General Services Administration for security guard services; not to exceed [$6,000] *$10,000* for the purchase of news-

Appropriation (adjusted)	12,487,000	15,560,000	25,000,000

PROGRAM AND PERFORMANCE

1. *Civil-defense planning.*—Intelligence on modern weapons and enemy capability is obtained and evaluated for civil-defense implications and national civil-defense plans are developed. Appropriate research programs are undertaken and liaison with other Federal agencies is maintained to assure a coordinated Federal program. Civil-defense functions which should be delegated to other Federal agencies are identified and the overall delegation program is administered.

2. *Civil-defense education services.*—Civil-defense training methods, materials, and devices are developed and made available to State and local organizations. Information on weapons effects and preventive measures that may be taken for survival are provided to the general public. The objectives of the program are to achieve public awareness of basic survival techniques and to provide the incentive for obtaining further information and participating in training activities. All available media are employed. Instructional and informational material covers such subjects as protection against fallout, reception of evacuees, Conelrad, rumor and panic, mutual aid, shelter, emergency action, first aid, and police, fire, and warden training, all designed to provide the necessary knowledge for survival in the event of nuclear attack. The Administration will initiate an advanced civil-defense course in fiscal year 1958. Each 3-month course will provide advanced training for about 50 professional civil-defense workers. The Administration will also open two new basic civil-defense training schools in 1958 to be located near large population centers. Almost 14,000 people have completed one or more basic civil-defense courses. An estimated 5,000 additional people will be trained in 1958.

3. *Operations control services.*—A nationwide attack warning and communications system extending from Air Force control centers to State and local control points is provided. The survival planning program is administered. Practical and logistic civil-defense techniques are developed and disseminated. Natural disaster assistance is coordinated. As a result of improvements started in 1957 and to be completed in 1958, the average warning time to key points will be cut from an average of 15 to less than 1 minute. Funds are provided in 1958 to integrate the warehouses into the civil-defense communication network, and to conduct a survey to determine location and specifications for protected underground control centers at headquarters and regional offices.

4. *Technical advisory services.*—Solutions to technical problems of physical damage, radiological hazards, and casualty care are devised and made available to State and local civil-defense organizations. In 1958, all activities will be expanded with specific emphasis on shelter research and radiological defense.

5. *Field representation.*—Civil-defense plans and methods developed at the national headquarters are made available to the States and municipalities through the seven regional offices. Close working relationships are developed with State and local officials and civil-defense organizations to promote civil-defense activities. The regional offices also serve as clearing points for Federal assistance to areas affected by natural disasters. A substantial increase in field staff will be made in 1958 to provide for greater assistance to States and cities in carrying out their civil-defense programs.

PROGRAM AND PERFORMANCE

Civil-defense funds of States and their political subdivisions are matched for selected types of civil-defense equipment.

Federal obligations under this program amounted to approximately $58 million from 1952 through 1956. All States participated in the program except one. The obligations for the participating States range from a high of approximately $12 million to a low of approximately $27,000.

PROGRAM AND PERFORMANCE

Materials and equipment not normally available or not present in quantities needed to cope with conditions caused by enemy attack are stockpiled in strategic locations. This program will be greatly expanded in 1958.

1. *Medical supplies and equipment.*—The purpose of this program is to establish stockpiles of medical supplies and equipment in proportion to the estimated number of surviving casualties. Medical supplies and equipment to be purchased through 1957, with the exception of emergency hospitals, will provide basic medical care for 4,250,000 casualties during the first 3 post-attack weeks.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The 1958 estimates, except for the hospitals, provide medical supplies and equipment to care for an additional 500,000 casualties. Basic equipment for approximately 1,900 emergency hospitals will be ordered through 1957. The 1958 budget proposes the procurement of 750 additional definitive hospitals and 1,600 forward treatment centers.

2. *Radiological and chemical warfare defense equipment.*—The objective of this program is to develop a state of preparedness to minimize effectiveness of radiological and chemical aspects of modern warfare. The present goal of the radiological defense program is to procure 1 million survey meters and 10 million to 20 million self-reading dosimeters of which approximately 375,000 survey meters and 900,000 dosimeters will have been procured by June 30, 1958. Most of these instruments will be loaned or granted to States and political subdivisions for training purposes.

3. *Warehousing and maintenance of stockpile.*—Stockpiled supplies and equipment are stored under the following criteria: (1) minor storage locations of approximately 10,000 to 15,000 square feet are used for pre-positioning hospitals, medical supplies, and radiological instruments; (2) major storage locations of approximately 50,000 square feet are used in support of one or more target areas; and (3) general reserve storage locations of from 100,000 to 500,000 square feet are used in support of wide geographical regions. Government-owned and controlled installations are used where possible. Through 1956 approximately $170 million of supplies and equipment had been stockpiled in 38 warehouses.

PROGRAM AND PERFORMANCE

1. *Survey plans.*—Funds are made available to States and certain metropolitan area organizations for surveys and studies leading to the development of survival plans. Such studies will provide operational plans which contemplate all effects of modern weapons and will relate such effects to particular geographical areas. Forty-two studies have been completed or are now in progress. It is estimated that at least 38 additional areas will start studies in 1957.

2. *Research.*—Research is conducted to solve various civil-defense problems. Important areas to be covered in 1958 include: Warning and communications; radiological defense; shelter; medical; fire; biological and chemical warfare; and damage assessment and reporting systems.

PROGRAM AND PERFORMANCE

Delegations of responsibility have been made to seven Federal establishments to make full use of those departments and agencies which can be of value in furthering an integrated civil-defense effort. A new delegation of responsibility to the Post Office Department to plan emergency registration services is in process in 1957. The delegations have been designed to recognize the basic needs for survival and to provide the basic support for survival in a civil-defense emergency, without duplicating activities of other Federal agencies. Such fundamental relief requirements as food, fuel, clothing, medical assistance, and emergency housing are included in the delegated responsibilities. The program for 1958 provides for an expansion of the work undertaken in 1957.

PROGRAM AND PERFORMANCE

Coal-mine operators, affected by orders issued by Federal coal-mine inspectors, may appeal to the Board for annulment or revision of, and temporary relief from, such orders. Hearings are held, applications determined, and findings and orders of the Board are issued and made public.

During 1956, the Board heard and determined 4 appeals requiring a total of 23 days of hearings.

PROGRAM AND PERFORMANCE

The Federal Communications Commission regulates wire and radio communications in interstate and foreign commerce to achieve maximum benefits for the people of the United States in the use of the radio spectrum, and the services of communications common carriers. Program increases proposed for 1958 are primarily to meet problems resulting from advances in technology and expanding use of radio and television.

1. *Applied technical research and frequency allocation.*—This activity provides the Commission with the basic information for determining the best utilization of the radio spectrum.

2. *Broadcast.*—Standard broadcast (AM), frequency modulation (FM), television (TV), and other related services are licensed and regulated by the Commission. Pertinent data are shown in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Stations regulated [1]	4,135	4,352	4,566	4,780
Applications disposed of for new stations or major change of facilities:				
AM	458	532	661	755
FM	157	124	140	140
TV	318	266	274	303

[1] As of June 30 of each year.

3. *Safety and special radio.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. Pertinent data follows:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Stations regulated [1]	160,234	174,964	205,703	227,300
License applications received	151,330	170,478	182,013	186,210

[1] As of June 30 of each year. Excluding amateur.

4. *Field engineering and monitoring.*—Field employees inspect radio stations, give operator examinations, collect engineering data, monitor the spectrum, and determine the location of lost ships, aircraft, and illegal sources of radio emission. In 1958 a new program of inspecting ship radios will be instituted.

5. *Common carrier.*—The Commission regulates the rates and practices of communications common carriers; considers proposed mergers and acquisitions of properties, extensions and reductions in service, construction of facilities, and applications for use of radio in communication services.

6. *Executive, staff, and service.*—This activity includes adjudicatory functions of the Commission.

CURRENT AUTHORIZATIONS—Continued

FEDERAL DEPOSIT INSURANCE CORPORATION

Investment in Federal Deposit Insurance Corporation

The Corporation insures accounts of depositors in insured banks up to $10,000. As of June 30, 1956, the deposit insurance fund for the protection of depositors amounted to $1.69 billion or 1.48 percent of all insured deposits, which amounted to approximately $114.6 billion on that date. No tax funds are used in its operations. Its expenses are paid and the fund is accumulated from assessments paid by insured banks and from income on investments in obligations of the U. S. Treasury. However, the Corporation is authorized to borrow from the Treasury, not to exceed $3 billion outstanding at any one time, as required for insurance purposes. No borrowings under this authorization have been made to date and none are anticipated in 1957 or 1958.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Salaries and Expenses, Federal Mediation and Conciliation Service

Salaries and expenses: For expenses necessary for the Service to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U. S. C. 171–180, 182), including expenses of the Labor-Management Panel as provided in section 205 of said Act; *expenses of boards of inquiry appointed by the President pursuant to section 206 of said Act;* temporary employment of arbitrators, conciliators, and mediators on labor relations at rates not in excess of $75 per diem; *purchase of one passenger motor vehicle for replacement only at not to exceed $3,000;* expenses of attendance at meetings concerned with labor and industrial relations; and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [$3,295,000] *$3,610,000.* (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1957.*)

Appropriated 1957, **$3,295,000** Estimate 1958, [a] **$3,610,000**

[a] Includes $10,000 for activities previously carried under "Boards of inquiry, Federal Mediation and Conciliation Service." The amount obligated in 1957 is shown in the schedule as a comparative transfer.

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Mediation and conciliation of labor disputes	$3,033,398	$3,030,090	$3,297,500
2. Presidential boards of inquiry		10,000	10,000
3. Administration	248,571	264,910	302,500
Total obligations	3,281,969	3,305,000	3,610,000
Financing:			
Comparative transfers from (−) other accounts		−10,000	
Unobligated balance no longer available	2,031		
Appropriation	3,284,000	3,295,000	3,610,000

PROGRAM AND PERFORMANCE

The Service assists labor and management in mediation and prevention of disputes affecting industries engaged in interstate commerce and defense production other than air and rail transportation.

1. *Mediation and conciliation of labor disputes.*—During the last year the number of disputes brought to the attention of the Service was over 33,000. About 23,000 were assigned for initial inquiry to determine the progress of the parties towards voluntary settlement and need for Federal mediation assistance. Over 14,000 disputes were mediated and closed during the year.

The number of dispute assignments are expected to increase moderately and the amount of time devoted to individual disputes will also increase.

The estimates for 1958 will enable the Service to provide inservice training of the mediators and for additional offices in important locations.

2. *Presidential boards of inquiry.*—Boards of inquiry may be appointed by the President when, in his judgment, an existing or threatened work stoppage in an essential industry will imperil the national health or safety.

Financing:			
Unobligated balance no longer available	4,929		
Appropriation	4,900,000	5,225,000	5,900,000

PROGRAM AND PERFORMANCE

The Federal Power Commission administers the Federal Power Act and Natural Gas Act and has additional duties relating to Federal power development.

1. *Licensing of non-Federal hydroelectric projects.*—Licenses are issued for hydroelectric projects affecting public lands and streams subject to Federal jurisdiction; construction and operation of projects are inspected; and cost of construction is determined for projects under license to private interests. Pertinent data are:

Description	*1956 actual*	*1957 estimate*	*1958 estimate*
Licensed projects	648	676	690
Applications completed during year	112	139	140
Applications pending (end of year)	115	86	56
Total claimed cost (in millions) of major projects	$3,090	$3,200	$3,400
Annual receipts from licenses	$1,413,976	$2,237,082	$1,804,000

2. *Regulation and surveys, electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities of those public utilities subject to the Commission's jurisdiction. Statistics about the electric utility industry are gathered and published. Pertinent data are:

	By calendar year		
Description	*1955 actual*	*1956 estimate*	*1957 estimate*
Number of public utilities regulated	190	190	190
Operating revenues of regulated utilities (in millions)	$6,000	$6,500	$7,000
Number of utilities reporting for statistical purposes	1,300	1,300	1,300
Operating revenues of reporting utilities (in millions)	$8,000	$8,600	$9,200

3. *Regulation and surveys, natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices. Certificates of public convenience and necessity are issued to those natural gas companies subject to the jurisdiction of the Commission. Statistics about the natural gas industry are gathered and published. There were 111 natural gas pipeline companies, with operating revenues of $2.9 billion, regulated in calendar year 1956 and approximately 5,000 independent producers. The same number is anticipated in 1957 and 1958.

During the fiscal year 1956 there were approximately 5,300 rate filings, of which approximately 4,400 were for independent producers. It is estimated that the combined rate filings of pipeline companies and independent producers will approximate 5,900 in fiscal year 1957 and 4,700 in fiscal year 1958. The number of certificate applications filed by pipeline companies in fiscal year 1956 totaled 412, and those by independent producers totaled 1,029, with approximately the same volume being estimated for 1957 and 1958.

CURRENT AUTHORIZATIONS—Continued

FEDERAL POWER COMMISSION—Continued

Salaries and Expenses, Federal Power Commission—Continued

4. *Federal project investigation and regulation.*—Of a potential 112.6 million kilowatts of hydroelectric power in the United States, 25.7 were developed as of December 31, 1955.

Studies are made of proposed Federal river development projects to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from Federal projects. Information on the power features of river development projects is furnished to Congress and to Federal and State agencies. In fiscal year 1956, 80 studies were carried on and it is estimated that there will be 110 in 1957 and 1958.

5. *International Joint Commission.*—This covers participation of the Federal Power Commission in the International Joint Commission, which adjudicates controversies between the Governments or nationals of the United States and Canada over boundary waters and waters that cross the boundary.

Federal Reserve Bank of St. Louis

discriminations, and illegal mergers and acquisitions are corrected; economic data and criteria are brought to bear on monopoly and related problems; and supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade. In 1958 additional funds are required to extend collection of financial statistics to the wholesale, retail, and mining industries.

2. *Deceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade-practice conferences; business and the public are protected from the evils of misbranding and nondisclosure of fiber content of manufactured wool products; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. Deceptive practices enforcement will be conducted on an expanded basis in 1958.

3. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

PROGRAM AND PERFORMANCE

1. *Administration and settlement of—(a) International claims.*—Public Law 285, approved August 9, 1955, authorized settlement of claims of United States nationals against the Soviet Union, Bulgaria, Hungary, Italy, and Rumania, for property and personal losses suffered as a result of war, nationalization, and defaults on governmental debts. Lump-sum settlement funds from these countries totaling about $41 million will become available as trust funds from which the Treasury will pay such claims. A 5-percent deduction will be made from these funds and deposited in the general fund of the Treasury to cover appropriations for the administrative expenses for the 4 years of this program.

No claims were finally settled in 1956; the following table shows estimated claims to be completed:

	1957	*1958*	*1959*	*Total*	*Total amount claimed*
Soviet	1,481	1,419	600	3,500	$3,580,226,570
Italian	1,272	1,148	395	2,815	26,897,653
Hungarian	739	960	1,001	2,700	223,806,315
Rumanian	338	354	308	1,000	258,876,961
Bulgarian	114	145	61	320	25,403,442
Total	3,944	4,026	2,365	10,335	4,115,210,941

(b) Korean claims.—Claims arising out of the Korean conflict under Public Law 615, approved August 21, 1955, were completed by August 21, 1956, the statutory deadline.

2. *Administration and settlement of World War II claims.*—Payment of World War II internee, prisoner of war, and sequestration claims authorized by Public Law 744, approved August 31, 1954, were completed by the statutory deadline of August 31, 1956. Public Law 997, approved August 6, 1956, authorized the settlement of claims by Philippine religious organizations in categories not previously compensable under the War Claims Act. It is anticipated that amounts claimed might exceed $16 million. Final settlements will be made in 1958.

counting systems on a governmentwide basis; for the settlement of certain claims for and against the Government; and for advising and assisting the Congress and Government agencies on matters relating to public funds. During 1956, refunds and collections in the amount of $68,172,772 were made through these activities.

In order to further strengthen office operations by improved coordination in accounting and auditing relationships with the executive agencies, by more emphasis on the development of accounting and auditing policy, and by more effective use of personnel, the Comptroller General, on March 22, 1956, realined the accounting and auditing activities, formerly performed in the division of audits and the accounting systems division, and established five staff and operating organizations to perform such functions. Effective July 1, 1956, the investigative functions, formerly performed in the office of investigations, were integrated with the accounting and auditing work.

1–3. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General who is assisted by the Assistant Comptroller General and staff assistants.

4. *Office of legislative liaison.*—The office of legislative liaison assists the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual Members.

5. *European branch.*—This branch, with headquarters in Paris, France, performs General Accounting Office functions as they relate to U. S. Government operations in the European area, including North Africa and the Near East. Suboffices are located in London, England; Frankfurt, Germany; Rome, Italy; and Madrid, Spain.

9. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

10. *Transportation division.*—This division audits freight and passenger transportation payments for account of the United States and settles claims involving transportation charges. The transportation audit recovered $52,097,027 during 1956.

13. *Office of the general counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and render all other required legal services.

14. *Accounting and auditing policy staff.*—Established March 22, 1956, this staff develops accounting policy and related requirements for observance by each agency and for the guidance of audit work performed by General Accounting Office auditors, and develops internal auditing objectives, principles, and standards for guidance of the executive agencies; reviews and develops, in cooperation with the Treasury Department and the Bureau of the Budget, central accounting processes and financial reporting; reviews agency accounting systems in whole or in part; develops and directs a coordinated program to assure effective application of modern electronic systems and other advanced methods to accounting and related financial operations of the Government; and assists and advises Congress on accounting and auditing policy matters.

15. *Office of staff management.*—Established March 22, 1956, this staff performs the staff management function for the accounting, auditing, and investigative activities which involves (*a*) formulating and executing a recruiting program to obtain a high quality professional staff of accountants, auditors, and investigators; (*b*) developing and carrying out a training and professional career development program; (*c*) exercising, in cooperation with the accounting and auditing divisions, general control over the assignment of the staff; and, (*d*) securing appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

16. *Defense accounting and auditing division.*—Established March 22, 1956, this division performs the accounting, auditing, and investigative functions of the General Accounting Office in the Department of Defense, including the military departments. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the Military Establishment in discharging its financial obligations including the audit and settlement of accounts; and, the conduct of investigations of matters relating to the receipt, disbursement, and application of public funds.

17. *Civil accounting and auditing division.*—Established March 22, 1956, this division performs the accounting, auditing, and investigative functions of the General Accounting Office in all departments and agencies of the Federal Government, other than those assigned to the defense accounting and auditing division. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the civil departments and agencies in discharging their financial obligations, including the audit and settlement of accounts; and the conduct of investigations of matters relating to the receipt, disbursement, and application of public funds.

18. *Field operations division.*—Established March 22, 1956, this division, which is composed of a central office and regional offices under the direction of regional managers, performs, outside the metropolitan area of Washington, D. C., all assigned accounting, auditing, and investigative functions.

19. *Far East branch.*—This branch, with headquarters in Tokyo, Japan, was established on June 14, 1956, to perform General Accounting Office functions as they relate to U. S. Government operations in the Far East area.

PROGRAM AND PERFORMANCE

The Corregidor Bataan Memorial Commission is to erect on Corregidor Island a memorial to servicemen who lost their lives while serving in the Pacific area during World War II. The memorial will include an institution dedicated to the preservation of the ideals of liberty.

An appropriation of $56,000 was made in 1956 for the expenses of this commission through June 30, 1957. An additional appropriation of $44,000 is requested for 1958, to continue planning and to initiate a popular subscription campaign for construction funds.

JAMESTOWN-WILLIAMSBUBG-YORKTOWN CELEBRATION COMMISSION—continued

Jamestown-Williamsburg-Yorktown Celebration Commission—Continued

PROGRAM AND PERFORMANCE

The Jamestown-Williamsburg-Yorktown Celebration in 1957 commemorates the 350th anniversary of the founding of Jamestown, the subsequent development of colonial Virginia, and the winning of our American independence at Yorktown in 1781. The Commission will develop and execute plans for the celebration in cooperation with the State of Virginia and interested historical societies. The Commission will complete its activities in 1958 fiscal year.

INDIAN CLAIMS COMMISSION

Salaries and Expenses, Indian Claims Commission

Salaries and expenses: For expenses necessary to carry out the purposes of the Act of August 13, 1946 (25 U. S. C. 70), creating an Indian Claims Commission, [$124,600] *$177,700*, of which not to exceed [$3,975] *$3,600* shall be available for expenses of travel. (*Department of the Interior and Related Agencies Appropriation Act, 1957.*)

Appropriated 1957, **$124,600** Estimate 1958, **$177,700**

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
Hearing and adjudication of Indian claims (total obligations)	$119,354	$133,600	$177,700
Financing:			
Unobligated balance no longer available	1,846		
Appropriation	121,200	124,600	177,700
Proposed supplemental due to executive pay increases		9,000	

PROGRAM AND PERFORMANCE

This independent Commission of three members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States or Alaska. Of the 852 claims filed, 108 have been completed. Payments of awards are dependent upon subsequent appropriations made through "Claims, judgments, and private relief acts" appropriation to the Treasury Department. Through August 1956 these payments totaled $9,795,334. The existence of the Commission was extended to April 10, 1957, by Public Law 767, approved July 24, 1956.

PROGRAM AND PERFORMANCE

The Commission regulates common carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, pipelines, and contract carriers by motor vehicle and water.

1. *Regulation of carriers' rates, practices, operating authorities, and finance.*—This work consists of regulating rates, granting operating authorities, approving abandonments of and extensions of railroad lines, financial reorganizations, and rate agreements between carriers.

2. *Compliance.*—Assistance is rendered in enforcing statutes and regulations affecting transportation and carriers; examinations are made to ascertain that motor carriers and freight forwarders are adequately insured; and surveys are conducted of motor carrier operating practices to reduce accidents and to promote highway safety.

3. *Supervision and analysis of carrier accounting and statistics.*—Uniform systems of accounts are formulated and policed for all types of carriers; compilations made of operating costs for use in rate making; and data maintained for use in making valuations of railroad and pipeline properties and setting up accounts of reorganized companies. Statistics are compiled from carriers' reports, and studies made of operating, financial, and other problems of transportation agencies.

4. *Supervision and interpretation of tariffs.*—Common and contract carriers' tariffs are examined for compliance with Commission's tariff circular rules. Authority is granted to publish rates on less-than-statutory notice and informal complaints and carriers' requests to pay reparation are handled.

5. *Railroad safety and car service.*—Field staff of the Commission work with carriers and shippers in handling problems of safety and efficient use of equipment in the transportation of passengers and property by railroad. This work includes inspection of safety appliances and signal installations, inspection of locomotives, and enforcing compliance with car-service regulations designed to increase the utilization of the short supply of railroad rolling stock.

6. *Defense mobilization.*—Under authority delegated by the Director of Defense Mobilization, emergency mobilization plans and programs for domestic surface transportation, storage, and port facilities are formulated and carried out.

7. *Executive and advisory functions.*—These also include the quasi-judicial and quasi-legislative functions of the Commission.

PROGRAM AND PERFORMANCE

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution.

This appropriation represents the Federal Government's pro rata share of the general expenses of the Commission.

Under the Water Pollution Amendment Act of 1956, approved July 9, 1956, the Commission also receives a grant directly through the Public Health Service.

Net transfers in (−) or out	537,928	−500,000	−500,000

PROGRAM AND PERFORMANCE

Research conducted by the Committee (National Advisory Committee for Aeronautics) is directed at developing the scientific and engineering data necessary for continued improvement in the design and performance of aircraft, missiles, and their powerplants. The Committee is currently primarily concerned with the problems of military aviation, including specific problems in the development of particular military projects, and its program is closely coordinated with the aeronautical programs of the Department of Defense. Many of its findings will be of value to civil aviation as well.

The Committee's activities are carried on mainly at its 3 laboratories and 2 flight stations and involve actual flight tests of piloted and pilotless aircraft, experimentation with the aid of wind tunnels and other specialized equipment, and theoretical studies. The increase requested in 1958 is primarily for additional research in aerodynamics, powerplants, and aircraft structures.

1. *Aerodynamic research.*—Research in this field is directed at the problem of developing the design characteristics of aircraft and missiles. The problems studied cover flight under a wide variety of conditions ranging from zero or low forward speeds of takeoff, landing, or hovering to speeds many times the speed of sound.

2. *Powerplants research.*—Research on propulsion systems to increase the speed, altitude, and range of aircraft and missiles includes work on turbojet, ramjet, rocket, and other engines, new types of fuels for such engines, and unconventional approaches such as nuclear propulsion.

3. *Aircraft structural research.*—Emphasis will continue to be placed on structural problems resulting from aerodynamic heating, increased aerodynamic and ground handling loads, and the novel configurations of modern aircraft and missiles.

4. *Operating problems research.*—Of importance to civil as well as military aviation are continuing studies on aircraft icing, aircraft noise, flight through turbulent weather, and the cause and prevention of fires in aircraft.

5. *Headquarters management and coordination.*—This activity provides for central direction of the research programs at all laboratories and research stations.

6. *Capital acquisitions.*—This activity includes acquisition of certain research equipment; facility modifications and improvements; minor construction; and the services of staff engaged in design and inspection in connection with construction of major facilities, which are funded under the construction and equipment appropriation.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year (inventories and items on order):				
Stores (goods unconsumed by projects)	$1,211,805	$1,222,676	$1,237,676	$1,412,676
Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	2,753,054	2,468,092	2,853,092	3,558,092
Advances (payments for goods and services on order not yet received)	118,327	131,312	131,312	151,312

Appropriation			12,565,000	14,000,000	41,484,000				

PROGRAM AND PERFORMANCE

This appropriation provides for the modernization of National Advisory Committee for Aeronautics research and supporting facilities and for the construction of certain additional facilities for conducting research beyond the capabilities of existing equipment.

1. *Langley Aeronautical Laboratory.*—The 1958 estimates provide for the construction of 2 new facilities for hypersonic research, the modernization of 2 existing tunnels and supporting technical facilities, and improvements to the plant and its utility systems. Major projects against which costs will be incurred in 1958 include conversion of the 19-foot pressure tunnel, initiated previously.

2. *Ames Aeronautical Laboratory.*—The 1958 program includes one new facility for hypersonic research and the modernization of several existing tunnels. The major projects against which costs will be incurred in 1958 will be from prior year programs.

3. *Lewis Flight Propulsion Laboratory.*—Included in the 1958 program are one new facility for hypersonic research, an expansion of facilities for nuclear research, the modernization of an existing research facility, and improvements to the plant. Major projects against which costs will be incurred in 1958 include the component research facility for nuclear propulsion and modifications to the propulsion systems laboratory, both initiated in prior years.

4. *High-speed Flight Station.*—Final payments for the project currently underway will be completed in 1957.

5. *Pilotless Aircraft Station.*—The 1958 program includes modernization of the instrumentation used in connection with research on pilotless rocket-propelled models.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year (inventories and items on order):

Appropriation			

PROGRAM AND PERFORMANCE

An appropriation of $75 million was made in 1950 for the construction of three large supersonic wind tunnels at laboratories of the National Advisory Committee for Aeronautics, for the development of military aircraft and missiles and their powerplants, as authorized by the Unitary Wind Tunnel Plan Act of 1949. These tunnels were placed in productive operation during 1956.

Financing:			
Unobligated balance no longer available	565	----------	----------
Appropriation	38,400	38,000	42,000

PROGRAM AND PERFORMANCE

The Authority operates 112 low-rent housing units and 30 nonresidential properties under title I of the District of Columbia Alley Dwelling Act. Operations are financed by appropriations; receipts are paid into the Treasury, as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Rental receipts	$56,661	$55,829	$55,410
Routine operating expense	32,875	32,042	34,224
Major repairs and replacements	4,960	5,958	7,776
Total expense	37,835	38,000	42,000
Net income	18,826	17,829	13,410

All operations except those under title I are subject to the supervision of the Public Housing Administration and are included in the consolidated estimates of that agency.

PROGRAM AND PERFORMANCE

The National Capital Planning Commission is the central planning agency for the Federal and District Governments for the appropriate and orderly development of the National Capital and the conservation of natural and historical features thereof. The National Capital Regional Planning Council coordinates planning in the counties and cities of the metropolitan area. A common staff serves both the Commission and the Council.

Major activities of the Commission scheduled for 1958 include: (*a*) Revision of the long-range plan for development of the central area of Washington, and (*b*) preparation of general urban renewal plans for selected portions of the blighted and obsolete areas of the city.

The regional planning council projects include: (*a*) Completion of detailed land-use statistics; (*b*) preparation of a regional park plan, and (*c*) completion of analysis of regional water supply and sewage disposal needs particularly with respect to the effect on future land use and population distribution.

PROGRAM AND PERFORMANCE

The National Capital Planning Commission acquires land for the development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway, Va.*—Land is acquired along the Potomac River, from Great Falls to Mount Vernon, one-half the cost of which is borne by the local jurisdictions. Funds made available in 1957, together with those requested for 1958, will acquire all the lands needed to complete the parkway on the Virginia side of the river.

2. *George Washington Memorial Parkway, Md.*—Funds requested for 1958 will complete the acquisition of the Maryland section from the District line to Great Falls. Funds are also requested to commence and complete the acquisition of the section of the parkway south from the District line to Fort Washington.

3. *Extension of stream valley parkways into nearby Maryland.*—Land is acquired by the Maryland-National

Capital Park and Planning Commission (one-third being paid by the National Capital Planning Commission) for extension of the District of Columbia park system into the Maryland environs. The 1958 funds will further advance the programs for Little Falls Branch, Paint Branch, Rock Creek, Northwest Branch, and Indian Creek.

4. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia (expenditures being repaid over a period of years by the District of Columbia) as part of the comprehensive plan for the park, parkway, and playground system of the National Capital. The 1958 program includes acquisitions to complete projects already well underway.

Financing:			
Unobligated balance no longer available	10,395		
Appropriation	8,800,000	8,951,500	9,575,000

PROGRAM AND PERFORMANCE

The Board resolves representation disputes and remedies unfair labor practices by employers and unions. The estimate does not include funds for representation elections in the building construction industry or for "last offer" elections in national emergency disputes because these elections have not been required to any extent in recent years.

1. *Field investigation.*—Charges of unfair labor practices and petitions for elections to resolve representation dis-

CURRENT AUTHORIZATIONS—Continued

NATIONAL LABOR RELATIONS BOARD—Continued

Salaries and Expenses, National Labor Relations Board—Con.

putes are investigated in the regional office in which they are filed. Failing settlement, dismissal, or withdrawal of these cases, they are prepared for public hearing. About 87 percent of the unfair labor practice cases and 77 percent of the election cases are closed without the need for public hearing or further formal action.

CASES PROCESSED IN FIELD [1]

	1956 actual	*1957 estimate*	*1958 estimate*
Charges of unfair labor practices	5,475	5,265	5,265
Petitions for representation elections	8,076	8,100	8,100

[1] As distinguished from the number of cases filed.

2. *Trial examiner hearing.*—Trial examiners conduct public hearings which are the basis of the findings and recommendations set forth in intermediate reports. In 1956, 223 reports were issued. For 1957, the estimate is 309, and for 1958, 360.

3. *Board adjudication.*—In unfair labor practice cases, the trial examiner's intermediate report becomes the Board order, if no exceptions are filed within 20 days. Exceptions are filed to approximately 74 percent of these reports and are referred to the Board for decision. In contested representation cases the Board may either order an election to determine the choice of bargaining representative or dismiss the case.

DECISIONS ISSUED BY THE BOARD

	1956 actual	*1957 estimate*	*1958 estimate*
Unfair labor practice	200	211	205
Representation	1,423	1,503	1,503

4. *Securing of compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order, the Board must request the courts to enforce its decision. Most of these contested decisions involve unfair labor practices. In 1956, 112 Board decisions of all kinds required court litigation. For 1957, the estimate is 94, and for 1958, 96.

Arbitration and Emergency Boards, National Mediation Board

Arbitration and emergency boards: For expenses necessary for arbitration boards established under section 7 of the Railway Labor Act, as amended (45 U. S. C. 157), and emergency boards appointed by the President pursuant to section 10 of said Act (45 U. S. C. 160), including stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), $250,000. (*45 U. S. C. 154, 157; Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1957.*)

Appropriated 1957, **$250,000** Estimate 1958, **$250,000**

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Voluntary arbitration	$132,500	$166,000	$166,000
2. Investigations of emergency disputes	72,994	84,000	84,000
Total obligations	205,494	250,000	250,000
Financing:			
Unobligated balance no longer available	19,506		
Appropriation (adjusted)	225,000	250,000	250,000

PROGRAM AND PERFORMANCE

1. *Voluntary arbitration.*—When mediation fails, the parties are urged to submit their differences to arbitration or special adjustment boards, including neutral members paid from this account.

2. *Investigation of emergency disputes.*—The President, when notified of disputes which threaten seriously to interrupt service, appoints an emergency board to investigate and report on the dispute to gain a basis for agreement.

Proposed transfer (due to pay increases) to "Salaries and expenses, National Mediation Board"		$15,500	
Appropriation	502,000	502,000	$525,000

PROGRAM AND PERFORMANCE

Railroad employee grievances resulting from application of collective bargaining contracts may be brought for settlement to the 36-man Board composed of 4 divisions. Each division has an equal number of carrier and union representatives paid by the parties and handles the grievances of a particular type of employee. The appropriation provides clerical assistance to the Board and neutral referees to sit with divisions of the Board when they are deadlocked.

PROGRAM AND PERFORMANCE

The Foundation is responsible for developing and encouraging pursuit of a national policy for the promotion of basic research and education in the sciences and for recommending to the President policies for strengthening the Nation's scientific effort. It also supports basic research, and seeks to improve scientific manpower through fellowships and programs to improve science teaching. The increased appropriation recommended provides for support to a greater percentage of meritorious scientific research proposals; for increased emphasis on training of scientific manpower; and for further expansion of support for research facilities.

1. *National science policy studies.*—To develop recommendations relating to progress of science, the Foundation studies the Nation's scientific effort, including research programs of the Federal and State governments, universities, other nonprofit institutions, and industry. Factors relating to supply, demand, and utilization of scientific manpower are also studied.

2. *Support of science*—(*a*) *Grants for support of research projects.*—The Foundation supports basic research projects principally in institutions of higher learning.

(*b*) *Grants for support of research facilities.*—It also supports research facilities of universities and other nonprofit institutions, including a radio astronomy observatory, an optical astronomy observatory, nuclear research equipment, computing facilities and biological research facilities.

(*c*) *Grants for training of scientific manpower.*—Fellowships are awarded to graduate science students and support is given to the program of education in the sciences to stimulate interest in and improve the teaching of science at high school and college levels.

(*d*) *Review of research and training programs.*—This activity includes the staff costs of development, administration, and evaluation of the above grant programs.

3. *Scientific information exchange.*—Support is provided for collecting, translating, cataloging, and disseminating information for the advancement of science, and for the development of improved methods for the exchange of scientific information.

PROGRAM AND PERFORMANCE

This appropriation supports the United States program for the International Geophysical Year, a worldwide scientific undertaking involving concurrent research by more than 50 nations, beginning in 1957. The results of this research ultimately will benefit our international relations, national defense, agriculture, commerce, and industry. This undertaking involves securing and sharing on a multilateral basis scientific data which will assist our own technological advancement in such fields as weather forecasting and control, radio communication, navigation, and upper atmospheric flight.

1. *Geophysical research related to the earth's atmosphere.*—(*a*) Basic atmospheric research—research into phenomena observable in the upper atmosphere, including studies of the aurora and airglow, cosmic rays, ionospheric physics, meteorology, and solar activity. (*b*) Earth satellite exploration of the upper atmosphere—sustained observations of scientific phenomena in the region beyond the earth's atmosphere by means of recording and transmitting instruments contained in unmanned earth-circling satellites launched by rocket devices.

2. *Geophysical research related to the planet earth.*—Research into phenomena originating on or within the earth including studies of geomagnetism, glaciology, oceanography, seismology, gravity, and longitude and latitude measurements.

3. *Related scientific support activities.*—Scientific support activities related to the foregoing activities, such as preparation of maps of the Antarctic, communication networks, rocketry, and the center for storage and maintenance of scientific data gathered under the program are included in this activity.

Limitation	6,988,000	7,000,000	8,150,000

PROGRAM AND PERFORMANCE

The Railroad Retirement Board administers the railroad retirement system, financed by employer and employee taxes. This appropriation is for that portion of the administrative expenses of the Board required in the operation of this program, and is derived from the railroad retirement trust fund. The retirement system provides annuities for age and disability and benefits for survivors.

Public Law 880, approved August 1, 1956, Public Law 1013, approved August 7, 1956, and other legislation recently enacted by Congress has had a pronounced effect on the workloads and budgetary requirements of the Board. Large recurring and nonrecurring workloads for which no provision was made in the regular 1957 appropriation will make it necessary to request a supplemental appropriation for 1957.

1. *Maintenance of accounts of employee earnings.*—Eligibility for benefits and the amount of benefits are based on individual accounts of compensation. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing and certification for payment of initial claims.*—Claims for annuities and benefits are adjudicated and certified for initial payment. The number of claims increases each year as more railroad workers, their spouses or survivors become eligible for benefits. Regular claims dispositions were 140,619 in 1956 and are estimated at 149,957 and 152,992 in 1957 and 1958, respectively.

A supplemental appropriation must provide for nonrecurring work in 1957 caused by amendments to the Railroad Retirement and Social Security Acts. This work includes processing adjustments for approximately 400,000 beneficiaries receiving increases up to 10 percent under the amended Railroad Retirement Act and processing adjustments for approximately 32,000 beneficiaries affected by provisions of the amended Social Security Act which gives wives the opportunity to elect to receive reduced benefits as early as age 62, and makes widows and disabled workers eligible for benefits at ages 62 and 50, respectively. Provision also must be made for handling an additional 74,700 wage certifications required under the disability provisions of the amended Social Security Act, and for increases in the regular claims load resulting from amendments to the acts.

3. *Monthly recertification and payment of awarded claims.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments were 7,284,101 in 1956 and are estimated at 7,851,000 and 8,300,000 in 1957 and 1958, respectively, and will continue to increase annually.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. The number of appeals were 155 in 1956 and are estimated at 185 in 1957 and 1958.

5. *Actuarial services.*—Actuarial studies and estimates are required by the Railroad Retirement Act to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments.

6. *General administration.*—Except for administrative activities of the retirement program exclusively, the cost of general administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

Financing:			
Unobligated balance no longer available	268,868		
Appropriation	4,150,000	3,675,000	3,400,000

PROGRAM AND PERFORMANCE

The Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. All contractors and subcontractors who have any business subject to the act are required to file with the Board. The Board has recovered $459,339,555 in excessive profits from the date of its establishment through June 30, 1956.

1. *Executive direction.*—The Board is responsible for executive direction, review, and final action in all cases. This includes screening all filings involving renegotiable business over $1 million and requests for exemption under the standard commercial articles and services and new durable productive equipment clauses.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations.*—The regional boards conduct renegotiation proceedings and make initial determinations. The field boards make the excessive profit determination in all cases involving less than $800,000 of renegotiable profits; however, this determination may be appealed to the statutory board. All determinations in cases involving more than $800,000 renegotiable profits are reviewed and approved by the statutory board.

PROGRAM AND PERFORMANCE

The Commission administers various acts regulating securities transactions and corporate reorganizations.

1. *Full disclosure provisions.*—Registration statements and prospectuses for the sale of securities to the public and related periodic reports are reviewed to secure compliance with statutory standards of fair disclosure. Security registration statements increased 16 percent in 1956 over 1955. This rising level is expected to continue in 1957 and 1958. It is anticipated that investigations and compliance proceedings will increase substantially in 1958 as the Commission accelerates its enforcement program.

2. *Prevention and suppression of fraud.*—Investor losses resulting from fraud, deceit, and manipulation in the sale and trading of securities are prevented or minimized by prompt investigation and through periodic inspection of the accounts of broker-dealer firms. In 1956, 362 investigations were opened. In 1957 and 1958, it is expected that 450 and 600 investigations, respectively, will be opened. A 2-year cycle for the broker-dealer inspection program will require approximately 2,100 inspections in 1958.

3. *Supervision and regulation of securities markets.*—National securities exchanges including over-the-counter markets are regulated in the interest of maintaining just and equitable principles of trade for the protection of the public investors. Short sales, stabilizing, floor trading, activities of specialists and odd-lot dealers are subject to Commission regulation.

4. *Regulation of investment and public utility holding companies.*—The financing of interstate public utility holding companies and other activities relating to servicing arrangements and accounting practices are regulated.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Foreign and domestic investment companies are registered and their activities supervised. The assets of registered investment companies have increased from $1.6 billion in 1941 to $14 billion in 1956. Beginning in 1958, a 2-year cycle for the examination of the books and records of investment companies will be instituted.

5. *Corporate reorganizations.*—Independent expert assistance is provided in proceedings under the Bankruptcy Act. During 1956, the Commission participated in 33 reorganization proceedings in respect to 50 debtor companies. It is expected that there will be 36 proceedings in 1957 and 39 proceedings in 1958.

6. *Operational and business statistics.*—Statistical and other data are prepared to provide information needed to administer the securities laws and to produce financial data for overall Government statistical purposes.

C., with Members of Congress and other U. S. Government officials, and delivery of special mail in the Washington area.

SELECTIVE SERVICE SYSTEM

Salaries and Expenses, Selective Service System

Salaries and expenses: For expenses necessary for the operation and maintenance of the Selective Service System, as authorized by title I of the Universal Military Training and Service Act (62 Stat. 604), as amended, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); travel expenses; purchase of [twenty-eight] *forty-four passenger* motor vehicles for replacement only, *including one at not to exceed $4,000;* not to exceed $250 for the purchase of newspapers and periodicals; *and* not to exceed [$75,800] *$80,000* for the National Selective Service Appeal Board[, and $180,000 for the National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists; $29,050,000]; *$30,000,000: Provided,* [That of the foregoing amount $20,586,050 shall be available for registration, classification, and induction activities of local boards: *Provided further,*] That, during the current fiscal year, the President may exempt this appropriation from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

Appropriations for the Selective Service System may be used for the destruction of records accumulated under the Selective Training and Service Act of 1940, as amended, by the Director of Selective Service after compliance with the procedures for the destruction of records prescribed pursuant to the Records Disposal Act of 1943, as amended (44 U. S. C. 366–380): *Provided,* That no records may be transferred to any other agency without the approval of the Director of Selective Service. (*Independent Offices Appropriation Act, 1957; Executive Order 9988.*)

CURRENT AUTHORIZATIONS—Continued

SELECTIVE SERVICE SYSTEM—Continued

Salaries and Expenses, Selective Service System—Continued

PROGRAM AND PERFORMANCE

The primary purpose of the Selective Service System is classification of men reaching 18 years of age under the Universal Military Training and Service Act. The System is responsible for supplying men to keep the Armed Forces at their authorized strength and to the extent that their needs are not met by voluntary enlistment. It will be required to supply up to 175,000 men for this purpose in 1958, as compared to approximately 136,000 in 1956 and 185,000 in 1957.

1. *National administration.*—The overall administration of the act including planning, training, and records management is accomplished by the national headquarters and six regional field offices.

2. *State administration.*—Administration of the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting more than 18 million registrants are accomplished by the over 42,000 uncompensated citizens assisted by about 6,000 clerks at nearly 4,000 boards. It is the responsibility of these citizens to determine who shall be deferred and for how long in the national interest in agriculture, industry, or other pursuits. They also determine the availability for military service of members of the Standby Reserve.

4. *Special boards.—*

(*a*) *National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists.* This committee acts in an advisory capacity to the Selective Service System in selecting physicians, dentists, and allied specialists for military service. It is separately administered, but funds are furnished by the Selective Service System from its appropriation. Legal authority for inducting these specialists expires June 30, 1957.

(*b*) *National Selective Service Appeal Board.* This Board acts on the classification of registrants which have been appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

Appropriation	2,128,000	1,900,000	

PROGRAM AND PERFORMANCE

The Small Business Administration aids, counsels, assists, and protects the interests of small business. In addition, it provides aid to business and homeowners who have suffered losses through natural disasters. Since existing statutory authority expires June 30, 1957, estimates for the 1958 program are not included herein. If the Congress approves an extension of the basic authority, a request for funds for 1958 will be submitted at a later date.

1. *Procurement and technical assistance.*—The primary objective is to increase the small-business share in Government procurement through advice and assistance to individual small businesses and through working with procurement agencies to set aside contracts for small businesses. In addition, managerial and technical advice is provided to small firms requesting assistance.

2. *Financial assistance.*—Small-business concerns and victims of natural disasters are aided through loans, which are administered so as to assure return of the Government investment. In 1956, 1,915 business loans and 3,309 disaster loans were approved by the agency. In addition, financial counseling is provided to small firms requesting assistance. Funds for administrative expenses of this activity are transferred from a revolving fund. Financial statements and a discussion of the lending activities of the agency are set forth under the revolving fund appropriation, Small Business Administration.

3. *Liquidation of Reconstruction Finance Corporation disaster loans.*—Disaster loans made by the Reconstruction Finance Corporation were transferred to this agency for liquidation. As of October 31, 1956, there were 2,301 loans outstanding amounting to $8,192,030. This represents a reduction of 934 loans valued at $6,564,245 from those taken over on July 1, 1954. Administrative expenses for this activity are also transferred from the revolving fund.

PROGRAM AND PERFORMANCE

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics, anthropology, geology, technology, and zoology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts; and participates in the international exchange of scientific literature. The Institution operates 2 museums, 2 scientific bureaus, 2 art galleries, the Canal Zone Biological Area, and the International Exchange Service. It is responsible also for the operation and maintenance of five main exhibition buildings and a temporary storage facility (Suitland, Md.).

During the budget year, 5 exhibition projects and 13 rehabilitation projects will be completed. The 1958 budget also provides for the procurement of additional storage cases and laboratory equipment, for continuing the staffing of the Museum of History and Technology, and for the establishment of an educational service.

Additions to the Natural History Building, Smithsonian Institution

Additions to the Natural History Building: For necessary expenses of preparing plans and specifications for additions on the east and west ends of the Natural History Building, as authorized by the Act of June 19, 1930 (46 Stat. 785), including incidental expenses of the Regents of the Smithsonian Institution, $800,000, to remain available until expended: Provided, That the preparation of the design, plans, and specifications for the additions and all work incidental thereto shall be under the supervision of the Administrator of the General Services Administration in accordance with provisions of the Public Buildings Act of May 25, 1926, as amended (40 U. S. C. 345).

Estimate 1958, **$800,000**

PROGRAM AND FINANCING

PROGRAM AND PERFORMANCE

The Museum of History and Technology will exhibit national historical and technological collections to increase and diffuse knowledge about the rise of American civilization, with special reference to national heroes and technology. The building will be located on the south side of Constitution Avenue between 12th and 14th Streets NW. Preparation of plans is in progress but construction cannot be started until existing temporary buildings are removed from the site.

PROGRAM AND PERFORMANCE

Upon petitions being filed, the Board holds formal hearings and determines whether: (1) organizations are Communist-action organizations, Communist-front organizations, or Communist-infiltrated organizations; (2) individuals are officers or members of a Communist-action organization or officers of a Communist-front organization and required to register as such; (3) the registration of particular Communist-action organizations or Communist-front organizations or of particular individuals should be canceled; and (4) a particular organization has ceased to be a Communist-infiltrated organization. To date the Board has heard only cases in which petitions against alleged Communist organizations have been filed by the Attorney General. The Board issues a report setting forth its findings as to the facts with an appropriate order. At this time the Board is reconsidering the case of the Communist Party of the United States in compliance with the mandate of the Supreme Court and the remand of that case by the court of appeals. Five Communist-front cases are before the United States court of appeals. Hearings of front and infiltrated cases will be resumed when the status of the Communist Party of the United States case permits.

Appropriation	1,483,000	1,550,000	1,700,000
Proposed supplemental due to pay increases		30,500	

PROGRAM AND PERFORMANCE

The Commission is charged with determining the impact of United States tariffs and trade policies on domestic industries and providing information, reports and recommendations to the President, Congress or public on these matters. The activities of the Commission in connection with trade agreement negotiations are expected to decline but those in connection with its study of tariff simplification and "escape clause" investigations are expected to increase during the coming year. Therefore, requirements will continue at approximately the existing level.

PROGRAM AND PERFORMANCE

The Tax Court hears and decides cases involving tax deficiencies and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

The court proposes for fiscal year 1958, a trial program of 160 weeks of circuit trial work. Trial calendars will be established in about 70 major cities, and should result in closing approximately 5,300 cases. The proposed program is required in view of the pending caseload of about 9,900 cases still before the court.

The actual and estimated work volume of the court is presented in the following tabulation:

	1955 actual	*1956 actual*	*Percent* [1]	*1957 estimate*	*Percent* [1]	*1958 estimate*	*Percent* [1]

allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158); expenses of attendance at meetings concerned with activities provided for under this appropriation (not to exceed $6,000); entertainment within the United States (not to exceed [$1,000] *$3,000*); hire of passenger motor vehicles; insurance [of] *on* official motor vehicles in foreign countries [when required by the law of such countries]; purchase of space in publications abroad, without regard to the provisions of law set forth in 44 U. S. C. 322; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; [purchase of caps for personnel employed abroad;] dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; cost of transporting to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director may prescribe; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under the Travel Expense Act of 1949, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; [$113,000,000] *$140,000,000*, of which not less than $9,000,000 shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States [and of which sum not less than $350,000 shall be available by contracts with one or more private international broadcasting licensees for the purpose of developing and broadcasting under private auspices, but under the general supervision of the United States Information Agency, radio programs to Latin America, Western Europe, Africa, as well as other areas of the free world, which programs shall be designed to cultivate friendship with the peoples of the countries in those areas, and to build improved international understanding]: *Provided*, That not to exceed [$50,000] *$250,000* may be used for representation abroad: *Provided further*, That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further*, That funds may be exchanged for payment of expenses in connection with the operation of information establishments abroad without regard to the provisions of section 3651 of the Revised Statutes (31 U. S. C. 543): *Provided further*, That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201 (c) of the Act of June 30, 1949 (40 U. S. C. 481 (c)), and the exchange allowances or proceeds of such sales shall be available for replacement of an equal number of such vehicles [and the cost, including the exchange allowance of each such replacement, except buses and station wagons, shall not exceed $1,350]: *Provided further, That not to exceed fifteen passenger carrying motor vehicles may be purchased as replacements for an equal number of truck-type vehicles for use abroad and the proceeds of the sale of such truck-type vehicles shall be available for such replacement: Provided further*, That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U. S. C. 665), the United States Information Agency is authorized in making contracts for the use of international shortwave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further*, That existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire during the current fiscal year may be extended for a period of one year in addition to the period of appointment or assignment otherwise authorized. (*Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1957.*)

PROGRAM AND PERFORMANCE

The United States Information Agency submits persuasive evidence to peoples of other nations that their own aspirations for freedom, progress, and peace are supported and advanced by the objectives and policies of the United States. The intention is to encourage foreign peoples to take action consistent with United States national objectives.

The world situation calls for increased emphasis on this program. The increase of $27 million in available operating funds will provide for: (1) Approximately $18.7 million for intensified programs in foreign countries including media and other support services. Special activities employing all media will be expanded so as to explain overseas the United States positive programs for peace, including atoms for peace, mutual aerial inspection, and the achievements of our science and enlightened capitalism; (2) about $6.1 million will be for expansion of television programs and direct radio broadcasting; (3) a net increase of $2.2 million in staff activities including research and intelligence and encouragement of related information programs overseas by private American groups.

1. *Overseas missions.*—The program is conducted through 219 posts in 82 countries and is known abroad as the United States Information Service (USIS). The overseas missions carry out country programs designed to influence local attitudes and actions in support of United States foreign policy. These programs are being intensified and strengthened in critical areas, especially in the Far East, Near East, South Asia, and Africa. USIS missions prepare materials using local facilities of all types as far as possible, but making use, also, of materials provided by the media services in Washington.

2. *Media services.*—These services provide support for overseas country programs.

(*a*) *The press service* maintains communications facilities for the transmission of daily news, editorial and feature materials for adaptation by overseas missions for special local programs. It operates two regional printing centers to service posts in the Near and Far East.

(*b*) *The motion picture service* supplies the missions with films, translated into 40 foreign languages. It adapts films for specific country or area use, and provides guid-

CURRENT AUTHORIZATIONS—Continued

UNITED STATES INFORMATION AGENCY—Con.

Salaries and Expenses, United States Information Agency—Con.

ance in the foreign production, use, and distribution of films. The service also supplies the missions with mobile units and equipment for showing motion pictures.

(c) *The information center service* supplies 163 information centers (United States operated) and 75 binational centers (operated jointly by the United States and the host country) with collections of American books and other publications, both in English and in translation, and with English teaching materials. Exhibits and visual presentation materials are provided overseas centers, missions, and exhibitions abroad. The service assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. It also provides books and periodicals for presentation to selected individuals and groups.

(d) *Radio broadcasting and television program.*—This service produces radio broadcasts in 41 foreign languages and English. Programs originate from the United States and from two points overseas. It operates a total of 76 transmitters at 7 locations in the United States and at 9 overseas locations, with a combined radio frequency power output of over 8 million watts. The service will originate a total of 51½ hours of programing daily in 1958. The service supplies the USIS missions with recorded radio programs and scripts, and with needed equipment. This service also acquires or produces television programs for placement on outlets overseas.

3. *Program direction and appraisal.*—This activity includes program and policy planning, collection of research and intelligence data, and coordination of the Government's effort with American private enterprise in the overseas information program.

4. *Administration and staff support.*—Included are physical and personnel security functions, administrative servicing, and legal counsel.

5. *Administrative support.*—This activity includes administrative services for the Agency's overseas operations, and certain special support services at headquarters are obtained through reimbursable arrangements with the Department of State.

PROGRAM AND PERFORMANCE

Remaining unobligated balances of funds appropriated in 1950 and 1951, and new appropriation requested for 1958, will make a total of $7,765,818 available for obligation. Of this total, $3,570,818 is required in 1958, and the balance in subsequent years. These funds, available until expended, will be used for:

1. *Acquisition and construction of new facilities.*—One new radio transmitter project, for which $4 million is requested, and one major project already authorized, will require obligation of $2,452,500 in 1958. Completion of other projects will require $809,027.

2. *Maintenance and improvement of existing facilities.*—The program of repairs and improvements to existing facilities, and replacement of obsolete or worn-out equipment, will be continued, requiring $1,481,308 in 1957 and 1958 out of prior year balances.

3. *Research and development.*—Investigation and study in the fields of radio propagation techniques and problems; engineering design of equipment and antenna systems; and equipment modifications to increase radio power frequency energy will continue in 1958. A total of $585,000 has been applied to research projects out of prior year appropriations.

Informational schedule relating to "Foreign currency, Agricultural Trade Development and Assistance Act of 1954, as amended, United States Information Agency"

Program and Financing

	1956 actual	1957 estimate	1958 estimate
Program by Activities			
1. Assistance to binational centers		$500,000	$1,100,000
2. Acquisition of cultural center		250,000	
3. Translation, publication, and distribution of books and other publications		150,000	100,000
Total obligations		900,000	1,200,000
Financing			
Authorization to expend from foreign receipts pursuant to Public Law 480, 1954, as amended		900,000	1,200,000

Program and Performance

Foreign currencies generated by the sale of agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954 are available to finance informational activities authorized by the United States Information and Educational Exchange Act of 1948. Under sales agreements completed as of November 30, 1956, programs totaling $2,100,000 are planned for 1957 and 1958. These include $1,600,000 for assistance to binational centers, $250,000 for the acquisition of a cultural center, and $250,000 for the translation, publication, and distribution of books and other publications.

Financing:			
Unobligated balance no longer available	$800,211	$346,130	
Appropriation (adjusted)	167,381,000	163,027,130	$165,442,000

PROGRAM AND PERFORMANCE

This appropriation provides for all administrative expenses of the agency with the exception of those applicable to the Department of Medicine and Surgery.

The appropriation of $165,442,000 proposed for 1958 is $5,616,648 less (after excluding the new requirement of $8,031,518 for contribution to the civil-service retirement fund) than the amount appropriated for 1957. Total workloads of the various programs as estimated for 1958 are not expected to change significantly from those estimated for 1957 though newly enacted legislation has had an effect on individual workload items within programs. Despite the stability of the total workload from year to year, the administrative costs, on a comparable basis, have been substantially decreased. In addition to the data below, certain factors in workload trends may be found under the appropriations for readjustment benefits, compensation and pensions, and the various insurance programs.

1. *General administration.*—The Administrator and his top staff assistants provide the executive direction of the agency; establish basic policies; interpret laws pertaining to veterans' affairs and promulgate supplementary regulations; direct and coordinate the activities of the operating departments. The Board of Veterans Appeals, established by statutory enactment, renders appellate decisions final in all cases other than insurance cases, in appeals to the Administrator on claims involving benefits under laws administered by the Veterans Administration.

2. *Insurance.*—Approximately 6 million veterans are insured under the United States Government or national service life insurance programs. Costs of administration of these programs have been reduced from approximately $41.5 million in 1953 to an estimated $24.5 million in 1958. These reductions, accompanied by only slight decreases in the number of policies maintained, have been made possible through consolidation of activities and improved operating methods and procedures.

Federal Reserve Bank of St. Louis

AVERAGE NUMBER OF POLICIES IN FORCE

	1956 actual	*1957 estimate*	*1958 estimate*
United States Government life insurance	392,300	380,000	368,000
National service life insurance	6,058,300	6,114,000	6,060,000

3. *Veterans' benefits.*—Veterans' and dependents' claims for compensation, pensions, or other benefits are adjudicated; and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents.

WORKLOAD

	1956 actual	*1957 estimate*	*1958 estimate*
Rating actions (disability)	1,219,131	1,115,000	1,161,000
Authorization actions (disability)	748,691	710,000	704,000
Rating actions (death)	84,005	85,000	86,000
Authorization actions (death)	496,652	666,000	508,000
Cases involving guardianship or fiduciary relationship	346,237	358,000	365,000
Field examinations	150,655	152,000	154,000

Eligibility of trainees for vocational rehabilitation and education is determined; guidance is furnished to trainees; and contracts are made with training institutions for tuition and other charges.

AVERAGE NUMBER OF TRAINEES

	1956 actual	*1957 estimate*	*1958 estimate*
World War II veterans	66,718	6,000	3,000
Korean conflict veterans	540,737	577,000	552,000
War orphans	-------	7,000	9,000
Vocational rehabilitation trainees	22,245	20,000	18,200

Loan guaranty operations include (1) issuance of certificates of loan guaranty or insurance; (2) servicing of loans reported in default; (3) payment of claims of lenders on defaulted loans; (4) acquisition, management, and disposal of property when necessary to protect the Government's interest; (5) the making of direct loans to veterans in certain areas; and (6) providing assistance to specified paraplegic veterans in acquiring specially adapted housing.

WORKLOAD

	1956 actual	*1957 estimate*	*1958 estimate*
Guaranteed or insured loans closed	606,957	540,000	540,000
Direct loans closed and fully disbursed	12,246	15,000	18,000
Defaults processed	65,127	73,844	80,394
Claims paid	5,659	6,150	6,961
Loan and property acquisitions	4,329	5,433	6,250
Housing grants	451	400	350

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year: Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$694,194	$478,108	$401,108	$366,277
Selected resources at start of year (−)	-------	−694,194	−478,108	−401,108
Adjustment of selected resources reported at start of year	-------	431,946	-------	34,831
Costs financed from obligations of other years, net (−)	-------	-------	−77,000	-------
Obligations incurred for costs of other years, net	-------	215,860	-------	-------

During 1958 the supply fund will assume the printing functions now performed under this appropriation. Consequently an estimated $34,831 of undelivered orders will be assumed by the supply fund.

Appropriated 1957, **$20,773,800** Estimate 1958, [a] **$22,067,000**

[a] Excludes $167,300 for activities now carried under "Maintenance and operation of supply depots, Veterans Administration."

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Medical, hospital, and domiciliary administration	$7,303,681	$7,300,000	$7,870,000
2. Administration of the construction program	1,077,022	1,083,500	1,253,000
3. Medical research	5,474,288	9,910,995	10,359,000
4. Prosthetic testing and development	987,394	990,300	1,000,000
5. Medical education and training	1,115,976	1,390,000	1,560,000
Total program costs	15,958,361	20,674,795	22,042,000
6. Relation of costs to obligations:			
(a) Costs financed from obligations of other years, net (−)	−5,429		
(b) Obligations incurred for costs of other years, net		99,005	25,000
Total program (obligations)	15,952,932	20,773,800	22,067,000
Financing:			
Unobligated balance no longer available	96,668		
Appropriation	16,049,600	20,773,800	22,067,000

PROGRAM AND PERFORMANCE

1. *Medical, hospital, and domiciliary administration.*—This covers the development, implementation, and administration of policies, plans and broad program objectives.

2. *Administration of the construction program.*—This includes the general supervision over the design, construction and operation of buildings, real property management, and accident and fire protection.

3. *Medical research.*—Medical research projects are conducted in Veterans Administration laboratories or in universities or other institutions on a contract basis, whichever is more advantageous or economical. In 1958 the amount of contractual research will approximate $117,000, or $17,000 more than in 1957.

4. *Prosthetic testing and development.*—The testing and development program for improvement of prosthetic, orthopedic, and sensory aids, is the only such program of the Federal Government. It improves the care and rehabilitation of disabled eligible veterans, including amputees, paraplegics, and the blind.

5. *Medical education and training.*—This covers (*a*) residency and internship training, (*b*) postgraduate and inservice training, and (*c*) medical illustration.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:				
Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$325,700	$100,995	$200,000	$225,000
Selected resources at start of year (−)		−325,700	−100,995	−200,000
Increase or decrease (−) in selected resources		−224,705	99,005	25,000
Adjustment of selected resources reported at start of year		219,276		
Costs financed from obligations of other years, net (−)		−5,429		
Obligations incurred for costs of other years, net			99,005	25,000

The increases in undelivered orders in 1957 and 1958 are due to increases in activities in the medical research program.

Inpatient Care, Veterans Administration

Inpatient care: For expenses necessary for the maintenance and operation of hospitals and domiciliary facilities and for the care and treatment of beneficiaries of the Veterans Administration in facilities not under the jurisdiction of the Veterans Administration as authorized by law, including the furnishing of recreational articles and facilities; maintenance and operation of farms; repairing, altering, improving or providing facilities in the several hospitals and homes under the jurisdiction of the Veterans Administration, not otherwise provided for, either by contract, or by the hire of temporary employees and purchase of materials; purchase of [ninety-six] *one hundred and forty-two* passenger motor vehicles for replacement only; not to exceed [$366,500] *$402,000* for expenses of travel of employees; uniforms or allowances therefor as authorized by the Act of September 1, 1954 (68 Stat. 1114), as amended; and aid to State or Territorial homes in conformity with the Act approved August 27, 1888, as amended (24 U. S. C. 134) for the support of veterans eligible for admission to Veterans Administration facilities for hospital or domiciliary care; [$670,116,900] *$708,656,000*, including the sum of [$7,216,900] *$6,656,000* for reimbursable services performed for other Government agencies and individuals: *Provided*, That allotments and transfers may be made from this appropriation to the Department of Health, Education, and Welfare (Public

PROGRAM AND PERFORMANCE

1. *Maintenance and operation of hospitals.*—This covers the operation of all Veterans Administration hospitals. The estimated cost for 1958 exceeds 1957 by $37,396,100 due to (1) the cost of agency contribution of 6½ percent of employees' base salary to the civil service retirement fund in accordance with Public Law 854, approved July 31, 1956, and (2) the cost of one additional workday in 1958 over 1957. The average employment listed below excludes the equivalent employment of consultants and terminal leave payments.

Veterans Administration hospitals:	*1956 actual*	*1957 estimate*	*1958 estimate*
Neuropsychiatric hospitals:			
Number of hospitals	40	40	40
Average number of operating beds	57,559	57,957	58,178
Average daily patient load	54,581	55,019	55,185
Average employment	39,116	40,020	40,300
Tuberculosis hospitals:			
Number of hospitals	21	21	21
Average number of operating beds	8,946	8,858	8,653
Average daily patient load	7,757	7,600	7,450
Average employment	9,324	9,250	9,020
General medical and surgical hospitals:			
Number of hospitals	112	112	112
Average number of operating beds	54,143	55,050	55,680
Average daily patient load	47,867	48,921	49,465
Average employment	66,920	67,730	68,590
Total, Veterans Administration hospitals:			
Number of hospitals	173	173	173
Average number of operating beds	120,648	121,865	122,511
Average daily patient load	110,205	111,540	112,100
Average employment	115,360	117,000	117,910

2. *Contract hospitalization.*—This covers the hospitalization in other Federal hospitals, for service and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, veterans in training under Public Law 16, approved March 17, 1943, and veterans in United States Territories and possessions may also receive treatment of non-service-connected disabilities.

	1956 actual	*1957 estimate*	*1958 estimate*
Average daily patient load:			
Civil hospitals	1,256	1,108	1,046
Municipal and State hospitals	684	647	622
Other Federal hospitals	1,313	1,345	1,332
Total	3,253	3,100	3,000

3. *Maintenance and operation of domiciliary facilities.*—This covers the cost of domiciliary care of veterans in Veterans Administration facilities and in State institutions. The net increase in the estimated cost over 1957 of approximately $1,408,244 results from (1) the cost of agency contribution of 6½ percent of employees' base salary to the civil service retirement fund in accordance with Public Law 854, approved July 31, 1956, and (2) basing the computation of 1958 requirements on the legal maximum reimbursable rate to the States of $700 per member. The average employment listed below excludes the equivalent employment of consultants and terminal leave payments.

	1956 actual	*1957 estimate*	*1958 estimate*
Domiciliaries:			
Number of domiciliaries	17	17	17
Average number of operating beds	17,761	17,705	17,705
Average daily member load:			
Veterans Administration domiciliaries	17,047	16,600	16,600
State homes	8,739	9,100	9,100
Average employment	3,921	3,976	3,996

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:				
Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$964,520	$1,081,756	$1,000,000	$975,000
Selected resources at start of year (−)		−964,520	−1,081,756	−1,000,000
Increase or decrease (−) in selected resources		117,236	−81,756	−25,000
Adjustment of selected resources reported at start of year		70,561	250,000	275,000
Obligations incurred for costs of other years, net		187,797	168,244	250,000

A supplemental appropriation for 1957 is proposed for later transmission and appears at the end of this chapter.

Appropriation	85,971,200	82,638,000	79,000,000

PROGRAM AND PERFORMANCE

This appropriation covers the cost of outpatient medical and dental care of veterans with service-connected disabilities and those receiving vocational-rehabilitation benefits. Such care is rendered both in Veterans Administration clinics and by private physicians and dentists on a fee basis and includes examinations to ascertain the need for hospitalization, eligibility for compensation, pension, vocational rehabilitation, and insurance benefits.

The decrease of $3,638,000 in estimated requirements for 1958 is due to a projected decrease in dental fee care offset principally by the cost of agency contribution of 6½ percent of employees' base salary to the civil service retirement fund in accordance with Public Law 854, approved July 31, 1956.

PROGRAM AND PERFORMANCE

This appropriation finances the cost of operating a system of three supply depots through which a portion of the supplies and equipment used in Veterans Administration facilities are centrally procured and distributed. The depots are located in Hines, Ill., Somerville, N. J., and Wilmington, Calif. In 1958, it is estimated that the depots will supply about 21.3 percent of the total usage of supplies and equipment which will aggregate approximately $127 million compared with 18.5 percent and $125 million in 1956, and 20.1 percent and $128 million in 1957.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year: Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$1,881	$90	$90	$90
Selected resources at start of year (−)		−1,881	−90	−90
Adjustment of selected resources available at start of year		71		
Costs financed from obligations of other years, net (−)		−1,720

PROGRAM AND PERFORMANCE

This appropriation provides for all compensation, pensions and allowances, including officers' retirement pay and annuities, and initial burial allowances. On June 30, 1956, there were an estimated 22,381,000 living veterans of all wars and peacetime service, and 12.2 percent, or 2,738,500, were receiving benefits. In addition, 1,175,763 dependents of 836,800 deceased veterans were receiving benefits. The increased cost to the total appropriation is primarily attributable to the advancing age of veterans, the increasing number of living veterans, and the enactment of Public Law 881, approved August 1, 1956. This act provides a new form of compensation for service-connected death occurring on or after January 1, 1957. The estimated cost of this law approximates $45,150,000 for 1958, and $22,520,000 during the current year. Reductions of $2,200,000 in 1958 and $2 million in 1957 are estimated as a result of the enactment of Public Law 634, approved June 29, 1956, whereby certain children will lose eligibility under this program by electing to receive educational assistance under another program.

The total appropriation requested amounts to $2,990,000,000, which is $83 million over the estimated requirements for the current fiscal year and an increase of $191,127,742 over the past year. Forecasts of average caseloads and average annual payments per case are based on analyses of trends in each category, with consideration given to specific conditions likely to affect the separate classes of beneficiaries. A supplemental of $100,000,000 for 1958 is proposed at the end of this chapter, to provide improvements in benefits, largely under this appropriation.

1. *Compensation.*—Compensation is payable to living veterans and eligible dependents of deceased veterans for disability or death connected with military service.

Living veterans.—The basic rates of disability compensation in wartime cases range from $17 for 10-percent disability to $181 per month for total disability. Additional amounts are payable for specific conditions as prescribed by law, to a maximum of $511 per case. All peacetime disability compensation is 80 percent of wartime rates.

The caseload continued to increase in 1956, but at a decreasing rate. However, the World War II decrease is accelerating so that, together with the World War I decrease, it will offset increased Korean and peacetime veteran caseloads. Accordingly, it is estimated the caseload will decrease slightly in 1957 and 1958. The total increase in peacetime service cases, which involve lower rates, will cause a small decrease in the average annual

Digitized for FRASER

Federal Reserve Bank of St. Louis

payment per compensation case. Total compensation payments are expected to start declining slowly within a few years, as World War I and II veterans and dependents leave the rolls more rapidly than veterans of the Korean conflict and of peacetime service become eligible.

LIVING VETERANS

[Average number of cases]

	1956 actual	*1957 estimate*	*1958 estimate*
Spanish-American War	371	329	292
World War I	233,203	221,442	209,129
World War II	1,613,691	1,600,605	1,586,004
Korean conflict	170,270	190,680	203,321
Peacetime service	63,647	66,985	73,992
Total	2,081,182	2,080,041	2,072,738
Average payment per case per year	$696.23	$695.18	$694.31
Total requirements	$1,448,979,809	$1,446,000,505	$1,439,115,156

Dependents of deceased veterans.—Death compensation is paid to widows, children, and dependent parents of veterans who died in service, or as a result of service-connected disease or injury.

Effective January 1, 1957, all death compensation benefits are paid according to Veterans' Administration regulations which implement title II of Public Law 881, approved August 1, 1956, except for those beneficiaries whose prior rights are protected and who find it to their advantage to continue receiving benefits under prior regulations. This act alters the compensation program in three major respects. First, widows' compensation is now partially related to military pay, in cases arising from future deaths and for beneficiaries electing to convert. The rates are $112 plus 12 percent of the basic pay of the deceased husband, with a minimum payment of $122 monthly, as contrasted with the previous flat compensation of $87 monthly. Second, the uniform rates for orphan children are increased slightly, providing indemnity compensation payments to children alone as follows: 1 child alone $70, 2 children $100, 3 children $130, and for each additional child $25. Finally, payments to parents are changed to a sliding scale basis with 15 different rates, ranging from $10 to $100 monthly with annual income a controlling factor. A single parent may receive monthly rates ranging from $15 to $75 if his or her income does not exceed $1,750. The rate for two parents living together ranges from $50 each, where the combined income is $1,000 or less, to $10 each if the combined income is as high as $2,400. Different rates are payable when parents are living apart.

The caseload continues to increase steadily and the average payment per case increases substantially due to the enactment of new laws. Public Law 634, effective October 1, 1956, results in a minor decrease, whereas Public Law 881, effective January 1, 1957, provides a substantial increase.

DEPENDENTS OF DECEASED VETERANS

[Average number of cases]

	1956 actual	*1957 estimate*	*1958 estimate*
Spanish-American War	1,170	1,096	1,050
World War I	53,563	51,595	49,671
World War II	276,056	277,226	279,600
Korean conflict	33,682	35,755	38,254
Peacetime service	19,280	22,410	26,590
Total	383,751	388,082	395,165
Average payment per case per year	$1,080.84	$1,130.22	$1,187.62
Total requirements	$414,771,971	$438,617,057	$469,306,311

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability or death. The rates and conditions of entitlement outlined below apply to World War I and subsequent periods of service; rates and conditions of entitlement applicable to prior periods are more liberal. Pension rolls are increasing and will continue to grow until near the end of this century, as veterans grow older and as more survivors become eligible.

Living veterans.—In general, pensions are payable to wartime veterans who are unable to secure substantially gainful employment as a result of permanent and total non-service-connected disability. The basic rate is $66.15 a month, increased to $78.75 if the veteran is 65 years old, or has been rated permanent and total for a continuous period of 10 years. A rate of $135.45 monthly is payable to veterans requiring regular aid and attendance. Payment of pensions is limited to veterans whose annual income is less than $1,400 if single, or $2,700 if married, or if the veteran has a minor child.

The caseload continues to increase, primarily in the World War I category, where large numbers of veterans are reaching age 65. The average annual payment per case remains almost constant.

LIVING VETERANS

[Average number of cases]

	1956 actual	*1957 estimate*	*1958 estimate*
Yellow fever experiments	1	1	1
Indian wars	168	139	112
Civil War	1		
Spanish-American War	57,244	53,103	48,000
World War I	506,740	571,711	642,213
World War II	57,207	62,578	67,817
Korean conflict	1,872	2,701	3,641
Peacetime service	310	303	287
Total	623,543	690,536	762,071
Average payment per case per year	$967.28	$967.71	$967.72
Total requirements	$603,142,304	$668,241,477	$737,473,017

Dependents of deceased veterans.—In World War II and Korean conflict cases, pensions are payable to dependents of deceased wartime veterans, whose death was not due to service-connected causes, but who at the time of death had a service-connected disability. The latter requirement does not apply to World War I cases. Rates vary considerably, depending upon the relationship and the number of dependents, and the periods of service. Eligibility for pension is subject to an annual income limitation of $1,400 for a widow or for a child, or $2,700 for a widow with a child.

The average caseload continues to increase steadily and this experience is projected through 1958. The slight decrease in average annual payment per case in 1957 and 1958 is attributable to the distribution of dependents.

VETERANS ADMINISTRATION—Continued

Compensation and Pensions, Veterans Administration—Continued

from this appropriation. Claims of $50 or less are paid in cash. Dependent's claims of $50 or more are paid in 10 equal quarterly installments. A bonus payment of $60 is paid to dependents of World War I veterans who died while in service before July 1, 1919, if an adjusted service credit is certified to the Administrator.

Subsistence allowance.—Subsistence allowance is paid to disabled veterans enrolled in vocational rehabilitation and education programs.

Initial burial allowance.—The Veterans Administration provides an allowance of $150 for funeral expenses of a deceased veteran.

Appropriation (adjusted)	821,097,000	775,000,000	829,460,000

PROGRAM AND PERFORMANCE

These benefits apply to the cost of subsistence, tuition, supplies, and equipment for the training of World War II veterans; to education and training allowances for Korean conflict veterans; to educational assistance allowance for eligibles under recently enacted War Orphans' Educational Assistance Act of 1956; gratuities, claims, and property acquisition costs on veterans' loans; special assistance to disabled veterans requiring vocational rehabilitation; and housing grants for disabled veterans.

1. *Education and training.*—Load forecasts of trainees are based upon an analysis of trends in each of the major categories of training as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
World War II education:			
Higher learning	24,466	2,400	2,000
Below college	40,417	3,350	1,000
Institutional on-farm	1,375	150	
Job training	460	100	
Total	66,718	6,000	3,000
Korean conflict veterans:			
Higher learning	268,930	292,000	267,000
Below college	174,714	185,000	180,000
Institutional on-farm	36,494	42,000	45,000
Job training	60,599	58,000	60,000
Total	540,737	557,000	552,000
War orphans		7,000	9,000
Total education and training	607,455	590,000	564,000

Costs of World War II education are distributed as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
(a) Subsistence	$19,084,069	$1,914,000	$957,000
(b) Tuition	17,422,809	1,770,000	900,000
(c) Supplies and equipment	2,120,052	186,000	93,000

2. *Loan guaranty.*—Home, farm and business loans are guaranteed or insured by the Veterans Administration. The payment of claims and the acquisition of loans and properties result from failure of veteran borrowers to maintain their mortgage obligations, thus creating liability on the part of the Government as guarantor or insurer. Budget forecasts are based on the relatively low default ratio experienced during the past year. The expected numeric increase in claims paid and properties acquired results from the increased base of veterans' loans outstanding rather than an increase in the default incidence. Costs are distributed as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
(a) Interest gratuities	$167,788		
(b) Claims paid	6,183,318	$6,722,000	$7,608,000
(c) Loan and property acquisitions	33,711,106	46,056,000	52,981,000

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Though these expenditures are paid from appropriated funds, they do not represent full loss to the Government, since the proceeds from liquidation of assets required in such actions are deposited into the general fund receipts of the Treasury as shown below (exclusive of 4 percent gratuities):

	1956 actual	*1957 estimate*	*1958 estimate*
Amounts provided by appropriation	$39,894,424	$52,778,000	$60,589,000
Less returns to general fund receipts	15,242,717	15,967,466	23,439,000
Net appropriation expenditures	24,651,707	36,810,534	37,150,000

As of June 30, 1956, cumulative costs of claims and acquisitions totaled $187,393,835. However, total cash receipts of $66,544,857 had been returned to the Treasury. Against the resulting cash deficit of $120,848,978, Veterans Administration held assets worth approximately $115,657,221. These assets consisted of real property acquired and loans and accounts receivable.

3. *Special assistance to disabled veterans.*—Average monthly vocational rehabilitation training load was 22,245 during 1956. It is estimated on the basis of current trends that the monthly average will be 20,000 in 1957 and 18,200 in 1958. Housing grants are provided veterans with specified total and permanent service-connected disabilities as assistance in acquiring suitable housing. Of the estimated 7,100 eligible 6,242 have established their basic eligibility as of June 30, 1956. Of these, 4,840 have made formal applications for a grant, and 4,574 applications have been approved.

Costs of vocational rehabilitation are distributed as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
(*a*) Tuition	$8,593,842	$7,616,000	$6,832,000
(*b*) Supplies and equipment	1,263,980	1,140,000	1,037,000

4. *Supplemental requirements.*—In the workload and cost data shown below, effect has been given to an anticipated fiscal year 1957 supplemental appropriation of approximately $77 million (shown at the end of this chapter). Additional funds will be required during 1957 as experience indicates that the number of veterans who will be in training under Public Law 550 and the average cost per veteran in training will be greater than previously expected. Additional funds will also be required to cover the cost of educational assistance allowances for eligibles under the War Orphans' Educational Assistance Act of 1956, not included in previous estimates.

Appropriation:			
Annual definite	4,868,000	5,000,000	4,500,000
Permanent indefinite	32,753	10,000	10,000

PROGRAM AND PERFORMANCE

Payments are made for claims on war-risk insurance issued to servicemen and veterans of World War I. Although no policies of this insurance remain in force, payments for death and disability claims continue. In addition to the annual appropriation, there is authorized a permanent appropriation, representing repayment of liens established on war-risk insurance.

1. *Monthly payments to beneficiaries*—(*a*) *Disability awards.*—Payments of $5.75 per month per $1,000 of war-risk insurance held are made to veterans becoming permanently and totally disabled for as long as the disability shall continue.

(*b*) *Death awards.*—Upon the death of a veteran receiving payments for disability, the remaining value of the policy is paid to the beneficiary as a death award.

WORKLOAD BY ACTIVITY

Description:	*1956 actual*	*1957 estimate*	*1958 estimate*
Average number of disability awards	6,850	6,700	6,600
Average number of death awards	70	60	55
Average annual payment per award	$571	$585	$592

2. *One-sum benefit payments* are retroactive payments for either disability or death. There were only four in 1956.

3. *Payment to United States Government life insurance fund, Veterans Administration.*—Transfers are made to the United States Government life insurance fund to reimburse the fund for claims (*a*) traceable to the extra hazards of military service and (*b*) arising on certain policies held by personnel in active military service.

4. *Transfer to Treasury miscellaneous receipts.*—This transfer corrected the erroneous crediting of interest payments on liens against the United States Government life insurance policies.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

This appropriation was established to pay certain expenses of the national service life insurance fund, and to receive premiums and pay claims on nonparticipating insurance policies issued to certain disabled veterans of World War II. There is authorized a permanent indefinite appropriation of premium receipts (38 U. S. C. 802 (c) (2)). During fiscal year 1956 the fund was reimbursed for claims arising from deaths of prisoners of war officially declared in 1954.

1. *Payments to national service life insurance fund.*—(*a*) For death claims traceable to extra hazards of service an amount is transferred from this appropriation which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to the extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund.

(*b*) Gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for national service life insurance.

(*c*) The fund is reimbursed when recovery of erroneous payments or overpayments is waived.

(*d*) The fund is reimbursed for death claims on policies under waiver of premiums while the insured is on active military duty. Under provisions of the recently enacted Servicemen's and Veterans' Survivor Benefits Act (70 Stat. 857) no application for waiver submitted after January 1, 1957, may be approved. This, together with the fact that approximately 500,000 currently effective waivers will be canceled by servicemen to qualify their dependents for higher indemnity compensation rates provided by the act, will very substantially reduce appropriation requirements for this purpose.

WORKLOAD BY ACTIVITY

Description	Average payment per case, 1956	Caseload 1956 actual	Caseload 1957 estimate	Caseload 1958 estimate
(*a*) Claims for extra hazards of service:				
(1) Death awards	$7,975	4,672	536	975
(2) Disability awards	143	26,173	24,650	23,360
(*b*) Gratuitous insurance	3,000	777	510	408
(*c*) Waiver of overpayments	2,402	75	40	40
(*d*) Death while under waiver of premiums	7,691	4,539	1,560	280

2. *Direct payments.*—(*a*) Claims are paid on nonparticipating national service life insurance policies issued to veterans with service-connected disabilities.

(*b*) In certain cases in which an applicant for insurance was rejected for medical reasons, and subsequently died in line of duty, a claim may be paid.

(*c*) Claims on deaths which occurred after application but before effective date of a national service life insurance policy are paid.

(*d*) Claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

Appropriation (adjusted)	41,627,742	26,750,000	31,450,000

PROGRAM AND PERFORMANCE

Beneficiaries of servicemen who died prior to January 1, 1957, while in active service or within a period of 120 days after separation from active service, are entitled to receive an indemnity in the amount of $10,000 less any national service life insurance and/or United States Government life insurance carried by the deceased. Payments are made to beneficiaries in 120 equal installments plus interest at the rate of 2¼ percent per annum. As a result of the recent enactment of the Servicemen's and Veterans' Survivor Benefits Act (70 Stat. 857), no new claims will be paid for deaths occurring on or after January 1, 1957. In addition, current beneficiaries are given an election to surrender their entitlement to indemnity payments in order to receive increased survivors' compensation provided by the act. Although very few new awards will be

PROGRAM AND PERFORMANCE

The Philippine Government has received $9,400,000 for the construction and equipping of a veterans hospital which is now in operation. It also receives a gradually decreasing amount per annum until December 31, 1959, for the medical care and treatment of certain veterans in the Philippines. For 1958 this amount will be $1,750,000 as compared with $2 million in 1957.

PROGRAM AND PERFORMANCE

These funds cover the construction of new hospital and domiciliary facilities and replacement of existing hospitals, including acquisition of sites, major rehabilitation, conversion and modernization of existing facilities costing in excess of $250,000 per project and the purchase of fixed and initial portable equipment at such facilities.

1. *New hospital construction.*—This activity includes post World War II new beds and conversion programs which consist of 77 projects that provide approximately 38,040 new beds and 12 projects for conversion of beds at existing hospitals.

BREAKDOWN OF NEW BEDS BY TYPE

	New hospitals	*Additions*	*Total*
Neuropsychiatric	9,465	1,370	10,835
Tuberculosis	1,200	1,180	2,380
General medical and surgical	23,575	950	24,525
Domiciliary facilities	300	-----	300
Total	34,540	3,500	38,040

The status of the construction program for new hospital beds is as follows:

STATUS OF NEW BEDS PROVIDED

	1956 actual	*1957 estimate*	*1958 estimate*
Under construction, beginning of year	1,250	1,250	1,000
Completed during year	-----	250	1,000
Total completed at end of year	33,490	33,740	34,740
Under construction at end of year	1,250	1,000	-----
Not under construction at end of year	3,300	3,300	3,300

The status of new bed and conversion programs, in terms of dollar value of construction, follows:

DOLLAR VALUE OF CONSTRUCTION PROGRAM

[Millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Completed at end of year	$704.5	$722.0	$730.7
Not completed at end of year	73.0	55.5	46.8

2. *Hospital replacement.*—This activity includes 6 projects that provide for replacement of approximately 4,126 beds (815 neuropsychiatric, 3,311 general medical and surgical) which are or were, housed in temporary, obsolete, or hazardous structures.

The following table shows the status of the construction program for replacement beds:

STATUS OF REPLACEMENT BEDS PROVIDED

	1956 actual	*1957 estimate*	*1958 estimate*
Under construction, beginning of year	0	561	561
Put under construction during year	561	0	1,815
Completed during year	0	0	561
Total completed at end of year	0	0	561
Under construction at end of year	561	561	1,815
Not under construction at end of year	3,565	3,565	1,750

3. *Rehabilitation and modernization of existing hospitals.*—This activity provides for major rehabilitation and modernization required to bring old hospitals, insofar as possible, up to the standards of the new hospitals. Also included are major alteration and repair projects with an estimated cost of more than $250,000. The status of the program is as follows:

	Number of projects	*Amount*
Physically and financially completed, June 30, 1956	18	$7,284,300
Physically completed, June 30, 1956	9	4,232,900
Under construction, June 30, 1956	29	28,501,100
Placed under construction, 1957	18	16,301,700
To be contracted, 1958	16	14,396,100
To be contracted, future years	27	43,957,100

4. *Initial portable equipment.*—This activity provides initial portable equipment for projects approved under the Hospital and Domiciliary Facilities appropriation prior to 1957.

Unobligated balance carried forward	919,652		
Appropriation			

PROGRAM AND PERFORMANCE

Up to $1,600 is paid toward the purchase of an automobile or other conveyance for certain disabled veterans. A recent law extends indefinitely the time in which the qualifying service-connected disability may occur.

Appropriations of $72,675,000 have been made for this program. By June 30, 1956, over 44,000 veterans had benefited. An estimated 668 will qualify in 1957 and 531 in 1958. Unobligated funds brought forward from previous years, totaling $919,652, will not cover the 1957 needs. Additional funds to cover the anticipated deficiency of $150,000 in 1957 are included in a request for $1 million supplemental appropriation, which will also provide $850,000 for 1958 operations. The supplemental is not shown on the accompanying schedules, but is reflected at the end of this chapter.

Refund of Repayments of Subsistence Allowances, Veterans Administration

(Indefinite appropriation)

Appropriated 1957, **$30,000**

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
Payment of refunds (total obligations)		$30,000	
Financing:			
Appropriation		30,000	

PROGRAM AND PERFORMANCE

Under Public Law 711, approved July 14, 1956, certain veterans who attend the University of California or Stanford University, and relied on an erroneous interpretation of the law, are relieved from liability to repay a portion of the subsistence allowance which they received under the Servicemen's Readjustment Act of 1944. All veterans who made repayments to the United States for this purpose will receive refunds.

There are 47 repayment cases involved for a total amount of $30,000.

OBLIGATIONS BY OBJECTS

	1956 actual	1957 estimate	1958 estimate
13 Refunds, awards, and indemnities		$30,000	

BUDGET AUTHORIZATIONS, EXPENDITURES AND BALANCES

	1956 actual	1957 estimate	1958 estimate
BUDGET AUTHORIZATIONS AVAILABLE			
Appropriation		$30,000	
EXPENDITURES AND BALANCES			
Total expenditures (out of current authorizations)		30,000	

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", "Military and naval insurance", "National service life insurance", and "Servicemen's indemnities", may be transferred, to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriation so augmented *and not to exceed $500,000 of the appropriation, "National service life insurance" for the current year, may be transferred to "Service-disabled veterans insurance fund."*

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Appropriations available to the Veterans Administration for the current fiscal year for "Inpatient care" and "Outpatient care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by Veterans Regulation Numbered 9 (a), as amended (*38 U. S. C., chap. 12A*)), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs.

Allocations Received From Other Appropriation Accounts

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriation, as follows:
"Operations, Federal Civil Defense Administration."
"Emergency supplies and equipment, Federal Civil Defense Administration."
"Building management fund, General Services Administration."
"Maintenance and operations, Army."
"Salaries, expenses, and grants, National Cancer Institute, Public Health Service."

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1958

Unobligated balance no longer available	214,521		
Limitation	2,230,000	2,230,000	2,200,000

PROGRAM AND PERFORMANCE

The Administration provides supervision, examination, facilities, and services to a coordinated agricultural credit system of farm credit banks and corporations which make credit available to farmers and their cooperatives.

1. *Supervision and examination of and facilities and services to farm credit banks and corporations.*—Provision is made for supervision and annual examination of: 12 Federal land banks (wholly farmer owned), 13 banks for cooperatives (mixed ownership), 12 Federal intermediate credit banks (mixed ownership), the Federal Farm Mortgage Corporation (wholly Government owned), 1,081 national farm loan associations, and 498 production credit associations. These credit institutions are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

PROGRAM AND PERFORMANCE

Public Law 246, approved August 5, 1955 (69 Stat. 533), established a Permanent Committee for the Oliver Wendell Holmes Devise, established the Oliver Wendell Holmes devise fund, and appropriated funds previously held in the Treasury plus interest retroactively and for the future. Income of the fund and the principal, if necessary, are to be devoted (1) to prepare a history of the Supreme Court of the United States; (2) to an annual lecture or series of lectures; and (3) to publish a memorial volume of Justice Holmes' writings. The current program is exclusively for the preparation of the history of the Supreme Court.

REVOLVING AND MANAGEMENT FUNDS

PUBLIC ENTERPRISE FUNDS

ATOMIC ENERGY COMMISSION

Defense Production Guaranties, Atomic Energy Commission

Guaranties are given on loans made by private sources to facilitate performance of defense production contracts. Loans may be purchased by the Government if necessary to keep financing in effect; however, the Atomic Energy Commission has not yet been required to do this. Administrative expenses are paid out of guaranty fees.

In 1956, guaranties of 80 percent to 95 percent were in force on 4 loans for which the total amount of credit available to the borrowers was $10,299,147. It is estimated that in 1957 and 1958 guaranties will be in force on 5 loans for which the total amount of credit available to the borrowers will be $10.7 million and $8.4 million, respectively.

Net earnings, retained to meet possible future losses, are expected to be $443,734 at the end of 1958 (50 U. S. C. app. 2061–2166).

Financing applied to program	404,112,168	1,171,425,000	895,368,500

The Export-Import Bank facilitates the financing of exports and imports. To do this it participates in or guarantees credits extended by United States exporters, commercial banks, and other financial institutions to foreign purchasers of exports from the United States. It makes direct loans to finance United States exports and imports. It also insures certain exports against risks of war and expropriation. The total amount of loans, guaranties, and insurance which the Bank may have outstanding at one time is $5 billion (12 U. S. C. 635).

The Bank is a Government-owned corporation in which the Treasury has invested $1 billion, representing the entire capital stock of the Bank. It can borrow up to $4 billion from the Treasury. On June 30, 1956, the amount borrowed from the Treasury was $1,206.5 million. Notes outstanding on June 30, 1958, are expected to be increased to $1,903.8 million.

Budget programs and policy.—The Bank's policy is to extend credit only when private capital is unavailable. It encourages private participation in the credits extended. Loans generally are made only for specific transactions or projects.

Development project loans.—The major portion of the Bank's assistance for the exportation of United States materials, equipment, and services continues to be in the form of longer term credits to foreign governments or other foreign borrowers for development projects abroad, or to provide financial assistance to meet emergency situations adversely affecting normal trade with the United States. These loans not only finance export sales, but lay the foundation for expanded future trade as foreign economies become stronger. It is estimated that 111 loans will be authorized by the Bank during 1958 to finance exports for projects abroad involving power, agriculture, transportation, and industrial development.

Substantial emergency credits to European countries were disbursed during the years immediately following World War II. Payments of principal and interest on these loans are being promptly received. Reasonable

Loan disbursements in the year	1.4	-------	-------
Loan principal repayments in the year	2.7	5.9	2.3
Loans outstanding June 30	25.0	19.1	16.8

Export and import loans.—Credits requested by exporters are authorized on a case-by-case basis to assist United States manufacturers and exporters to sell abroad on deferred payments. Such loans authorized in 1956 included credits to finance a wide range of capital goods shipped to countries throughout the world.

The Bank has continued to establish credit lines for individual exporters of capital equipment. The recipient of such a line knows in advance of new foreign sales how much assistance he will be able to obtain for such sales as are made on credit, provided that criteria on the type of export and the credit standing of the importer are met.

Guaranteed loans:			
Loan disbursements in the year	5.9	1.0	----
Loan principal repayments in the year	68.9	6.0	1.0
Loans outstanding June 30	6.0	1.0	----

Insurance.—The first policies covering the risks of war and expropriation of property of United States exporters situated abroad were issued with respect to cotton in March 1954. A total of 176 policies were issued by the Bank up to June 30, 1956, covering 21,389 bales of cotton valued at $4,512,009. It is estimated that policies covering cotton to a value of $1,300,000 will be issued in 1958.

Administrative expenses.—The limitation proposed by the Bank for administrative expenses in 1958 is $1,980,000.

Other operations.—The Bank serves as administering agent for mutual security loans, agricultural trade and development loans, and guarantees against currency transfer risk and expropriation authorized by the International Cooperation Administration and for defense production loans made by the Office of Defense Mobilization. These programs are described in the chapter for "Funds appropriated to the President." The Bank also acts as collecting agent for the Treasury on the debt settlement agreement with the Federal Republic of Germany.

Financing the budget program.—On June 30, 1958, the total amount committed is estimated to be $4,675 million, leaving a margin of $325 million for additional commitments. It is estimated that the unobligated balance at June 30, 1958, of the Bank's authorization to borrow from the Treasury will be $831.1 million.

Operating results and financial condition.—During the coming year the net income of the Bank is expected to amount to $63 million, of which $22.5 million will be paid to the Treasury as a dividend after the close of the year. The remainder of the retained earnings, available for future contingencies, are estimated to be $483.6 million at June 30, 1958.

It is anticipated that the Bank's loan disbursements and other payments will exceed loan collections and other receipts by $249 million in 1958.

Net investment of the Government in the corporation is expected to be $3,410 million at the end of 1958, consisting of $1 billion in capital stock, $1,903.8 million of borrowings from Treasury, and retained earnings of $506.2 million.

Reorganization Plan No. 2 of 1954 relating to the liquidation of the Reconstruction Finance Corporation transferring certain foreign bonds, notes, and securities to the Export-Import Bank became effective as of close of business June 30, 1954.

Liquidating proceeds of these assets are paid to the Treasury, and are not available for future borrowing. Collections of principal and interest are estimated to amount to $6,856,586 in 1957 and $6,562,500 in 1958, thereby reducing the net investment of the U. S. Government to $22,267,259.

Federal Farm Mortgage Corporation Fund

The Corporation is in liquidation. It financed land-bank-commissioner loans until July 1, 1947, and assisted Federal land banks in their financing. All except $10,000 of the $200 million investment of the United States Government has been repaid to the Treasury, and this will be repaid in 1958.

FEDERAL FARM MORTGAGE CORPORATION—Continued

Federal Farm Mortgage Corporation Fund—Continued

Budget program.—As of June 30, 1955, the Corporation liquidated its remaining loans through bulk sale to the Federal land banks in exchange for non-interest-bearing notes to be collected over a 10-year period. Its only remaining activity is the disposal of reserved mineral interests.

The minor expenses required for preserving, leasing, and disposing of reserved mineral interests will be more than covered by income.

Operating results and financial condition.—Net budget receipts are estimated at $2,058,500 in 1958.

The retained earnings of the Corporation at the end of 1958, after making a dividend payment to the Treasury of $2 million, are expected to be $8 million. Payments will continue to be made to Treasury until final liquidation.

ANALYSIS OF TRANSFERS TO OPERATING FUND

Obligations incurred (net, borrowings less repayments) (total transfers to operating fund out of prior authorizations)	$43,685,000	−$151,384,000	

Operating Fund, Federal Intermediate Credit Banks

The production credit corporations were merged in the Federal intermediate credit banks as of January 1, 1957, pursuant to the Farm Credit Act of 1956 (70 Stat. 659). The act also provides for transfer to the banks of all of the corporations' assets and liabilities, except their investments in production credit associations which are transferred to Farm Credit Administration. Provision is made for retirement of the banks' Government capital and for eventual ownership by the production credit associations.

The Federal intermediate credit banks will continue their agricultural loan and discount activities, and will provide the production credit associations with necessary supervision and services, a function formerly performed by the production credit corporations.

For comparability, the banks' entire budget is presented on a merged basis. Operations for 1956 and the first half of 1957 result in budget transactions while operations for the last half of 1957 and 1958 (as mixed-ownership corporations) will result in trust transactions. This budget, prepared just prior to the January 1 transition, is based on an estimate of the Government equity at the time of change as follows:

Cash	$29,679,958
United States securities	99,195,700
Agricultural loans and discounts	727,534,539
Total assets	856,410,197
Debentures and notes payable	−705,611,000
Other working capital	−195,673
Investment of U. S. Government (net)	150,603,524

A subsidiary schedule reflects the distribution of 1957 transactions before and after the change.

Budget program.—The banks discount agricultural loans for and lend funds to production credit associations and other financing institutions, and supervise the associations.

Loans and discounts of $2,163,888,000 are estimated for 1958 compared to $1,964,817,364 made in 1956. Loan repayments are estimated for 1958 at $2,120,708,000 and were $1,921,103,246 in 1956.

REVOLVING AND MANAGEMENT FUNDS—Continued

PUBLIC ENTERPRISE FUNDS—Continued

FARM CREDIT ADMINISTRATION—Continued

FEDERAL INTERMEDIATE CREDIT BANKS—Continued

Operating Fund, Federal Intermediate Credit Banks—Continued

Administrative supervision of the 498 production credit associations covers all phases of their lending activities including an annual credit examination of loans, and provides for review and advisory service relating to business management.

Administrative expenses are estimated at $3,375,000 in 1958 and were $3,324,598 in 1956. These expenses are paid from corporate funds and are subject to limitation.

Financing the budget program.—The banks finance their lending operations principally through the sale of their consolidated collateral trust debentures in the investment markets, and by other borrowings. The United States assumes no liability for the debentures or other such borrowings. No credit bank may have outstanding borrowings in an amount exceeding 10 times its surplus and paid-in capital. To finance their 1958 lending operations, the banks expect to issue $1,304,560,000 of debentures and to borrow $157,250,000 from commercial banks. Operating expenses are paid from corporate earnings. Net budget expenditure of $37,164,700 is estimated for 1958.

Operating results and financial condition.—Net income of $1,710,100 is estimated for 1958, of which $427,500 will be transferred to the reserve account, $320,600 paid to the Treasury as a franchise tax, and the remaining $962,000 converted to capital interest in the form of patronage refunds to production credit associations and other financing institutions. Under the provisions of the Farm Credit Act of 1956, an amount of Government capital stock equal to the amount of patronage refunds is retired. The 1956 loss of $181,763, shown for comparability, is the result of a $510,733 gain by Federal intermediate credit banks, and a $692,496 loss by the production credit corporations.

By June 30, 1958, it is estimated that the Government-owned capital will be reduced from $87,260,000 (at the time of the merger) to $77,340,000. This reduction is replaced by $9,920,000 of private capital interest, consisting of $8,726,000 acquired by the production credit associations by cash subscriptions required by the act, and $1,194,000 acquired by the associations and other financing institutions as patronage refunds. It is estimated that retained earnings which remain with the operating fund will amount to $63,295,424 at June 30, 1958, approximately the same level as at the time of the merger.

REVOLVING AND MANAGEMENT FUNDS—Continued

PUBLIC ENTERPRISE FUNDS—Continued

FARM CREDIT ADMINISTRATION—Continued

FARM CREDIT ADMINISTRATION MIXED-OWNERSHIP CORPORATIONS

BANKS FOR COOPERATIVES

The banks for cooperatives make loans to finance the operations of farmers' cooperatives. The banks' capital funds are from the Agricultural Marketing Act revolving fund and from borrowing farmers' cooperative associations (12 U. S. C. 1134). The Farm Credit Act of 1955 provides for eventual ownership of the banks by farmers' cooperatives and the retirement of the U. S. Government investment.

FEDERAL CIVIL DEFENSE ADMINISTRATION

Civil Defense Procurement Fund

This fund finances procurement of materials and organizational equipment toward which Federal contributions are made on a matching-fund basis. It is reimbursed for purchases from the Federal contributions appropriation and funds provided by the States (65 Stat. 61). The present principal of the fund consists of $5 million appropriated in 1951.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

	1956 actual	1957 estimate	1958 estimate
FUNDS APPLIED			
To operations:			
Procurement of materials:			
Public safety program	$10,443	$904,000	$1,075,000
Medical supplies and equipment program	1,160,994	2,257,000	2,887,000
Training program	110,104	1,165,000	1,452,000
Mass care equipment program	2,329	106,000	65,000
Increase in selected working capital		38,547	200,000
Total applied to operations	1,283,870	4,470,547	5,679,000
To financing:			
Increase in Treasury cash	68,836		
Total funds applied	1,352,706	4,470,547	5,679,000
FUNDS PROVIDED			
By operations:			
Reimbursements billed to States and to appropriation for contributions to the States	1,283,870	4,432,000	5,479,000
Decrease in selected working capital	68,836		
Total provided by operations	1,352,706	4,432,000	5,479,000

PROGRAM HIGHLIGHTS

[Dollars in thousands]

	1956 actual	*1957 estimate*	*1958 estimate*
Number of members	4,382	4,482	4,580
Total assets of members	$39,500,000	$44,900,000	$50,200,000
Savings invested by members	$34,100,000	$39,300,000	$44,400,000
Mortgage loans of members	$33,000,000	$37,800,000	$42,600,000
Insured institutions examined and supervised	3,600	3,720	3,820
Federal home loan bank advances outstanding	$1,173,000	$1,225,000	$1,300,000

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation. Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the division of examinations, and the Federal Savings and Loan Insurance Corporation.

Budget programs.—The Board's budget is based on six activities.

1. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services that are common to the Board and the Insurance Corporation.

2. *Examination and supervision of Federal home loan banks.*—The Board supervises and examines the operations of the Federal home loan banks.

3. *Supervision of Federal and State-chartered insured institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

4. *Chartering of Federal savings and loan associations and branches thereof.*—Federal savings and loan associations are chartered and regulated.

In addition, applications of State-chartered associations for conversion into Federal savings and loan associations are examined.

5. *Fiscal and housekeeping services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

6. *Examination of savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of over 80 percent of all insured associations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

At the beginning of the fiscal year 1957 there were 3,600 insured institutions with total assets aggregating $36.9 billion.

Administrative expenses.—Administrative expenses are estimated at $1,300,000 for 1958 compared with $1,036,700 for 1957. These amounts exclude nonadministrative expenses of the division of examinations which are shown separately.

Financial review.—The Board is not incorporated, and has no capital stock. Its assets consist of cash on deposit with the Treasurer of the United States and accounts receivable for the services which it renders. Its liabilities consist essentially of accounts payable.

Relation of cost to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

Selected resources at end of year:	*1955 actual*	*1956 actual*	*1957 estimate*	*1958 estimate*
Inventories:				
Supplies	$6,937	$8,210	$7,300	$7,500

The division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations, of associations of the savings and loan type, which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal home loan bank system that are not subject to State supervision. The division also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts or for conversion from a State to a Federal charter. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the division.

The following table reflects the work of the division:

Obligations incurred			

The Federal home loan banks, together with the building and loan associations and similar institutions which are members of the banks, constitute the Federal home loan bank system, designed to stabilize and strengthen institutions promoting private thrift and individual home ownership.

The 11 Federal home loan banks obtain their funds from capital stock, issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists entirely of subscriptions of member institutions. Authority to borrow from the Treasury in the amount of $1 billion is provided in 12 U. S. C. 1431 (64 Stat. 257). No borrowings have been made to date and none is anticipated in 1958.

Number of insured institutions	3,600	3,720	3,820
Number of insured savers	16,719,000	18,500,000	20,500,000
Insured liability	$32,127,000	$37,000,000	$41,800,000
Assets of insured members	$36,937,000	$42,000,000	$47,000,000
Reserves and undivided profits of insured institutions	$2,426,000	$2,800,000	$3,200,000
Corporation's reserve for insurance losses	$197,157	$229,161	$265,928
Percent of authorization to total income	3.4	1.8	1.8

The Federal Savings and Loan Insurance Corporation insures savings up to $10,000 in all savings and loan associations which apply and are approved for insurance. It prevents default of insured institutions through loans, purchases of assets, or cash grants, in order to eliminate conditions which might affect adversely the financial soundness of other insured institutions. When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. The Corporation also may act as receiver for State-chartered institutions declared in default if appointment is tendered by State authority. On June 30, 1956, the 3,600 insured associations had resources of $36.9 billion. The Corporation's contingent liability on the insured institutions aggregated $32.1 billion.

Income from insurance premiums and interest on investments has been sufficient to meet all insurance losses, operating expenses, dividends on capital stock, and to establish a reserve for insurance losses of $197.2 million as of June 30, 1956. The Corporation has authority to borrow up to $750 million from the Treasury, but no loans have ever been required. Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

The Corporation operates under the supervision and direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. Although the cost of examinations are paid by the institutions examined, the Corporation is assessed for its share of the costs of all services rendered by the Board.

Budget program.—The budget program comprises four activities.

1. *Underwriting.*—This activity constitutes an analysis and evaluation of the insurance risk in connection with application for insurance of accounts and other applications submitted pursuant to regulatory requirements. The assets of insured institutions have increased $14.3 billion or 63 percent in the last 2 years. The increasing interest in insurance of accounts on the part of uninsured institutions, plus the anticipated rate of growth, will increase the insured liability of the Corporation to an estimated $41.8 billion by June 30, 1958, as compared to $32.1 billion on June 30, 1956.

2. *Prevention of default and payment of insurance.*—The Corporation not only pays insurance in cases of defaulted institutions, but prevents default wherever possible. Through 1956, 38 institutions have needed financial assistance from the Corporation. Cash grants in the net amount of $4.9 million have been made to 28 institutions to prevent default; a grant to 1 institution has been authorized but not disbursed; the assets of 1 institution were purchased and liquidated without loss; certain assets of 1 institution were purchased and are in process of liquidation; and 7 institutions with aggregate assets of $9.2 million have been placed in liquidation and insurance paid. Total losses since organization amount to $5.2 million.

3. *Analysis of operations.*—The Corporation maintains a current analysis of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending, including selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance.

4. *Executive direction and fiscal and other administrative services.*—This covers all fiscal and other administrative services as well as management and direction.

Operating expenses.—Operating expenses for 1958 are estimated to be $1,236,700 as compared to $911,876 for 1956 and consist of administrative expenses of the Corporation of $700,000 and $536,700 for services rendered by the Federal Home Loan Bank Board.

Financing operations.—The 1958 program provides for net investments of $21 million in United States securities as compared with an estimated $19 million in 1957 and the actual increase of $15 million in 1956.

The Corporation is retiring its original capital stock held by the Secretary of the Treasury at par in amounts equivalent to 50 percent of annual net income. Of the

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

$100 million of original capital stock, $59 million has been retired, and with an additional payment of approximately $16.5 million in 1958 the outstanding stock will be reduced to $24.5 million. Funds for the retirement of capital stock are obtained through the redemption of United States securities held by the Corporation.

Through June 30, 1956, the Corporation has paid $41.1 million in lieu of dividends on capital stock. It is estimated that additional payments will be made to the Secretary of the Treasury of $1.3 million in 1957 and $1 million in 1958.

Operating results and financial condition.—Income of the Corporation consists primarily of insurance premiums, admission fees, and interest on investments in Government obligations. Total income, since 1934 of $254,037,256 has been applied as follows:

	Percent	*Amount*
Expense	4.1	$10,522,383
Insurance losses	2.1	5,241,369
Return on capital stock	16.2	41,116,761
Legal reserve	77.6	197,156,743

Net income before payment of a return on capital stock for 1958 is expected to be $37.4 million. This amount is $9.6 million or 34.7 percent above the net income for 1956. After providing for an interest payment in lieu of dividends on the capital stock of $1 million for 1958, at a rate determined by the Secretary of the Treasury, the balance of the net income, $36.4 million, will be credited to the insurance reserve of the Corporation.

It is estimated that the aggregate insurance liability will amount to $41.8 billion by June 30, 1958. Because of the statutory provision requiring the Corporation to accumulate a reserve of 5 percent of all insured accounts and creditor obligations, the Corporation will not transfer any earnings to the Treasury except the annual payment in lieu of dividends.

Total assets of the Corporation are estimated at $308.3 million as of June 30, 1958, an increase of $42.9 million over 1956. Investment in U. S. securities are expected to reach $296.7 million (par value) by the end of 1958, an increase of $40 million over 1956.

The Corporation is required by law to accumulate a reserve of 5 percent of all insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. As of June 30, 1956, this statutory requirement amounted to approximately $1.6 billion. The insurance reserve as of that date amounted to $197.1 million or 0.61 percent of the insured liability of $32.1 billion.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:				
Deferred charges	$1,007	$886	$413

Pursuant to recommendations of the Rubber Producing Facilities Disposal Commission, the National Science Foundation assumed responsibility from the Federal Facilities Corporation for the conduct of the Government research program in synthetic rubber. As recommended by the Commission, the Foundation established a Special Commission for Rubber Research to evaluate the existing research program and to develop recommendations as to the future role of the Federal Government in supporting synthetic rubber research. In accordance with recommendations of the special commission, the Foundation has discontinued the contract operation of the Government laboratories at Akron, Ohio, and the contract support of synthetic rubber research, but plans to support in 1957 a limited number of projects for high polymer research in universities, which will be absorbed in the regular Foundation research support program in 1958.

Financing applied to program	60,735,407	28,927,585	27,628,300

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, was created for construction, operation, and maintenance of that part of the Saint Lawrence Seaway which is within the territorial limits of the United States. The construction phase of the Corporation's operations is scheduled to be completed in sufficient time to permit opening the seaway to traffic in 1959. It is also anticipated that the seaway will be open for interim 14-foot navigation in 1958. Completion of the seaway, in conjunction with related navigation improvements to be provided by Canada, and the power-development works being provided by the Power Authority of the State of New York in cooperation with the Hydro-Electric Power Commission of Ontario, will afford a 27-foot navigation channel from Lake Erie to Montreal.

The Corporation's construction program is financed by the sale of revenue bonds to the Secretary of the Treasury payable from corporate revenues from future operations, with a limit of $105 million outstanding at any one time. Pursuant to law these bonds mature in not more than 50 years and bear interest at a rate determined by the Secretary of the Treasury.

Additional borrowing authority in the amount of $35 million is being proposed for 1958 to finance completion of construction of the seaway and to provide working capital for the initial operation and maintenance phases of the Corporation's program. This will increase the limit on revenue bonds outstanding from $105 million to $140 million.

Budget program.—In 1958 the Corporation will continue dredging and construction of a canal, two locks, and navigation channels in the 46-mile International Rapids section of the Saint Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

CONSTRUCTION PROGRAM—BY ACTIVITIES

Total costs	133,000.0	60,548.6	48,605.1	82	23,846.3
Relation of costs to obligations		42,951.4	−20,976.8	--	−21,974.6
Total program (excluding interest during construction)	133,000.0	103,500.0	27,628.3	99	1,871.7

A major part of the Corporation's construction program in 1958 consists of work on two locks, the Grasse River lock and the Eisenhower lock, located in the Long Sault Canal in the vicinity of Massena, N. Y. At the end of 1958 the locks are scheduled to be approximately 99 percent complete as compared with 60 percent at the end of 1957.

The other major portion of the construction program consists of dredging and construction of channels and canals in the vicinity of the Thousand Islands, Long Sault Canal, and the South Channel at Cornwall Island. This work is scheduled to be 66 percent complete at the end of 1958 as compared with 30 percent at the end of 1957.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year (inventories and items on order): Undelivered orders and contracts	$10,714,420	$61,999,743	$42,951,428	$21,974,628
Selected resources at start of year (−)		−10,714,420	−61,999,743	−42,951,428
Increase or decrease (−) in selected resources		51,285,323	−19,048,315	−20,976,800
Costs financed from obligations of other years, net (−)			−19,048,315	−20,976,800
Obligations incurred for costs of other years, net		51,285,323		

Financing the budget program.—The cost of the seaway is estimated to be $133 million, excluding approximately $10 million in interest during construction. As of June 30, 1956, the Corporation's borrowing authority had been obligated in an amount of $74,572,415. It is anticipated this total will amount to $103,500,000 by the end of 1957. It is estimated that the total of obligations incurred through 1958 will amount to $131,128,300. After 1958 it is expected that additional obligations will be incurred in an amount of $1,871,700, bringing the total for the entire seaway project to $133 million.

The Corporation is also authorized to use receipts from operations to finance its operation and maintenance program and repay the Government's investment, including interest thereon. However, no receipts from operations

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

are anticipated until the seaway is opened to 27-foot traffic.

Operating results and financial condition.—The Corporation's expenses for 1958 are those incurred for administrative expenses authorized by the Congress and for interest payable to the Treasury on the outstanding revenue bonds. These expenses total $4,010,000. Since all expenses will be capitalized and no income will be realized during the construction period, the Corporation will show no income for 1958.

The net budget expenditures are expected to be $46 million in 1958 as compared with $38.5 million in 1957.

The total investment of the Government in the Corporation is expected to be $96 million by the end of 1958, represented by bonds held by the Treasury.

Financing applied to program	100,704,906	85,058,084	2,519,000

This fund finances the two types of lending activities of the Small Business Administration: (1) Business loans to small-business concerns, and (2) disaster loans to business firms and homeowners who have suffered damage from floods or other catastrophes, including loans to business concerns in designated drought areas which have suffered substantial economic injury as a result of such drought. (15 U. S. C. 631 (1952 ed., supp. II) as amended by Public Laws 268 and 402, 84th Congress.)

Appropriations up to $275 million are authorized to provide funds for these lending activities, under which not to exceed $150 million may be outstanding at any one time for business loans and not to exceed $125 million may be outstanding for disaster loans. Appropriations of $175 million have been made.

It is estimated that the legislative limitation of $150 million on business loans outstanding will be reached early in calendar year 1957. The 1957 column of the tables and budget schedules below reflect activity only within this existing authority. If the limitation is increased by the Congress, a supplemental appropriation will be required to finance the loan volume expected for the balance of 1957.

Budget program—Business loans.—Pursuant to legislative authority, business loans may be made directly or in cooperation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance applied for is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that a participation is not available and no immediate participation loan may be made unless it is shown that a deferred participation loan is not available. The Small Business Administration's participation in a loan is limited to 90 percent of the amount thereof, and the agency's maximum commitment to any one borrower under either a participation or direct loan is limited to $250,000, except that in the case of a loan to a special corporation formed and capitalized by a group of small-business concerns, the maximum loan is $250,000 multiplied by the number of separate small businesses involved. Business loans are generally limited to a maturity of 10 years and bear interest at a maximum of 6 percent per annum for the Small Business Administration's share of the loan.

Within the legislative authorizations, it is the policy of the Small Business Administration to assist reliable, capable businessmen operating small firms to secure necessary credit for constructive purposes on terms that will

Federal Reserve Bank of St. Louis

meet the borrower's individual requirements. The following tabulation reflects certain data on program activities from the standpoint of the applicants or borrowers and includes funds disbursed or collected by banks on participation loans. Accordingly, the Small Business Administration share of disbursements, repayments, and loans outstanding will not agree with related data in the financial statements, which reflect transactions on the basis of only the Small Business Administration cash funds involved.

DATA ON BUSINESS LOANS

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Loan commitments during the year:			
Gross	$82.0	$91.3	------
Small Business Administration's share	68.4	77.7	------
Loans outstanding June 30 held by banks or Small Business Administration:			
Gross	79.0	173.5	$157.2
Small Business Administration's share	64.9	145.1	131.5
Loan disbursements by banks or Small Business Administration:			
Gross (estimate)	53.1	115.5	5.8
Small Business Administration's share	43.5	97.8	4.9
Loan repayments to banks or Small Business Administration:			
Gross (estimate)	13.9	21.0	22.1
Small Business Administration's share	12.2	17.6	18.5

Disaster loans.—No legislative restrictions exist on the amount which may be loaned to an individual or business suffering loss from a disaster. The maximum term for disaster loans is 20 years and the interest rate may not exceed 3 percent per annum. The following tabulation sets forth certain data on the disaster loan program. In view of the unpredictable nature of this program, it is impossible to estimate with accuracy the volume of new loans which may be committed during 1957. For budgetary purposes, a nominal amount of $12 million in commitments has been assumed:

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Loan commitments during the year	$44.4	$12.0	-----
Loans outstanding, June 30	36.3	50.5	$46.5
Loan disbursements during the year	33.2	19.0	1.2
Loan repayments during the year	1.8	4.8	5.2

Administrative expenses.—Administrative expenses are financed by transfer of funds from the revolving fund to the appropriation for salaries and expenses.

Financing the budget program.—Since existing statutory authority expires June 30, 1957, a detailed estimate for 1958 has not been included herein. If the Congress approves an extension of the basic authority of the agency, a request for funds for 1958 will be submitted at a later date. Amounts shown for 1958 reflect the liquidation of activity attributable to prior-year operations.

Operating results and financial condition.—The net loss for 1956 was $4.8 million and is estimated at $5.3 million for 1957. The cumulative deficit from operations through June 30, 1957, is estimated at $14.5 million. Income from low interest disaster loans and from a large number of relatively small business loans is not sufficient to cover expenses of the lending program. It is anticipated, however, that losses will decline in future years as income increases.

The net investment of the Government on June 30, 1957, is expected to be $160.5 million, consisting of $151.7 million in interest-bearing investments, $23.3 million in non-interest-bearing investments, and a deficit of $14.5 million.

Pursuant to section 3 of Reorganization Plan No. 2 of 1954, outstanding disaster loans made by the Reconstruction Finance Corporation were transferred on July 1, 1954, to the Small Business Administration for administration and liquidation.

Budget program.—On June 30, 1956, the total assets to be liquidated amounted to $8.2 million, and it is estimated the value of the unliquidated assets will have been reduced to $3.7 million by June 30, 1958.

Operating results and financial condition.—Liquidating proceeds are used to repay the investment of the Government. Repayment of borrowings in 1956 amounted to $2.5 million and is expected to be about $2.2 million in 1958. The net investment at the end of 1958 is estimated at $3.8 million.

Administrative expenses.—Administrative expenses are financed by a transfer of authorized funds to the Small Business Administration's appropriation for salaries and expenses.

This fund was created to finance the taking of prime contracts by the Small Defense Plants Administration from other Government agencies and subcontracting the work to small manufacturers. Authority to use the fund expired at the end of 1955. The fund is now in liquidation and is expected to be closed out in 1958 by repaying to Treasury the outstanding net investment of $1,368,655.

The Tennessee Valley Authority was created by the Congress in 1933 for the unified development and conservation of the resources of a region comprising parts of seven States. To fulfill this responsibility, TVA merges a variety of activities into an integrated approach to the Tennessee Valley's resource-use problems. All these activities seek the proper use of land and water resources and the realization of the region's agricultural, forestry, and industrial potential.

TVA is a wholly owned Government corporation. Its programs are financed by appropriations and by proceeds from the operations, principally the sale of electric power and fertilizer materials. Appropriations cover expenses of navigation and flood control operations, research on fertilizer and munitions, watershed protection and improvement activities, and a portion of capital plant additions. Proceeds (referred to in the accompanying schedules as corporate funds) are used in the business of generating, transmitting, and distributing electric energy, including related reservoir operating expenses; and in manufacturing and distributing fertilizer and fertilizer ingredients. Section 26 of the TVA Act, as amended, provides for payments into the Treasury of the United States of such proceeds as in the opinion of the TVA Board are not required for these purposes.

Budget program.—TVA activities are grouped into four major categories: (1) navigation, flood control, and power program; (2) fertilizer, agricultural, and munitions program; (3) watershed protection and improvement program; and (4) general service activities. All of these activities are interrelated. They are conducted to enable the people of the Tennessee Valley to make full and effective use of the area's resources. Work methods encourage the enterprise of individual farmers and businessmen, and strengthen State and local institutions and agencies.

Navigation, flood control, and power program.—A major objective of the TVA Act is the unified development and use of the Tennessee River system for navigation, flood control, and power. As of June 30, 1956, the total investment in TVA facilities serving these purposes was $1,689,886,001, allocated as follows: navigation, $138,262,531; flood control, $167,186,334; and power, $1,384,437,136. Principal components of this system are 26 major dams with hydroelectric generating stations, 10 navigation locks, 12 major fuel-electric generating stations, and a power transmission network of more than 10,600 circuit-miles.

Acquisition of assets.—Obligations in 1958 for assets serving navigation, flood control, and power are estimated at $120,943,000. This total includes related administrative and general expenses and is distributed between appropriated and corporate funds as follows:

SUMMARY OF ESTIMATED OBLIGATIONS

	Appropriated funds	*Corporate funds*	*Total*
Power supply facilities:			
Cleanup work on 6 steam plants in operation	$1,784,000		$1,784,000
Additional steam electric generating units at existing projects:			
Gallatin steam plant units 3–4		$28,482,000	28,482,000
John Sevier steam plant unit 4		8,200,000	8,200,000
Johnsonville steam plant units 7–10		32,897,000	32,897,000
Total power supply facilities	1,784,000	69,579,000	71,363,000
Transmission system facilities		29,800,000	29,800,000
Additions and improvements at existing facilities	450,000	1,219,000	1,669,000
Navigation facilities:			
New lock at Wilson Dam	15,344,000		15,344,000
Miscellaneous navigation facilities	212,000		212,000
Flood control facilities	468,000		468,000
Investigations for future facilities	122,000	209,000	331,000
Distribution of administrative and general expenses	294,000	1,462,000	1,756,000
Total	18,674,000	102,269,000	120,943,000

The estimate of $1,784,000 provides for completion of work on appropriation financed generating units at six steam plants.

The 1958 estimate includes $69,579,000 of corporate funds derived from power revenues for continuing construction of seven steam electric generating units at existing projects. TVA power supply facilities completed or under construction, including the seven additional units with a capacity of 1,215,000 kilowatts at existing projects will increase the system nameplate rating to 10,541,985 kilowatts by the end of calendar year 1958 and to 11,059,485 by the end of calendar year 1959. Completion of facilities being installed by the Department of the Army at the Cumberland River projects (Old Hickory hydroplant—75,000 kilowatts in 1957; 25,000 kilowatts in 1958; Cheatham hydroplant—36,000 kilowatts in 1958) and by the Aluminum Company of America at the Chilhowee project on the Little Tennessee River (50,000 kilowatts in 1957) will increase this to 10,727,985 by the end of calendar year 1958 and to 11,245,485 kilowatts at the end of calendar year 1959. After allowing for such factors as machine outages and the effects of drawdown of storage reservoirs, this system could carry a load of about 10,793,000 kilowatts in the winter of 1959–60 and is adequate for the demand estimated by that time. Authorization for $30 million to finance the construction of an additional steam electric generating unit with a capacity of about 180,000 kilowatts at an existing project is provided as a supplemental under proposed legislation for revenue bond financing. This will provide additional capacity to carry load which is expected to develop by the winter of 1960–61. The need for additional new capacity will be reappraised after the Congress has acted on revenue bond financing legislation.

The estimate of $29,800,000 for transmission system facilities provides for necessary additions, improvements, and replacements in the TVA transmission system.

The estimates for navigation facilities include $15,344,000 for continuing construction of a new navigation lock at Wilson Dam with an estimated total cost of $35 million and $212,000 for miscellaneous minor naviga-

TENNESSEE VALLEY AUTHORITY—Continued

Tennessee Valley Authority Fund—Continued

tion facilities. The new lock at Wilson Dam, started in 1957, is scheduled for initial operation in August 1959 and for completion in December 1960. Its completion will remove a serious bottleneck to navigation on the Tennessee River.

Other items in the 1958 program include investigations for future facilities, acquisition of land and land rights in the Norris Reservoir for flood control purposes, and additions and improvements at existing facilities.

Program expenses.—Estimated 1958 expenses for the navigation, flood control, and power program are shown below segregated between appropriated and corporate funds. Distribution of related administrative and general expenses is included.

SUMMARY OF ESTIMATED PROGRAM EXPENSES

	Appropriated funds	*Corporate funds*	*Total*
Navigation operations	$254,000	----------	$254,000
Flood control operations	227,000	----------	227,000
Power operations	----------	$149,680,000	149,680,000
Multipurpose reservoir operations	2,327,000	1,857,000	4,184,000
Topographic mapping	315,000	----------	315,000
Distribution of administrative and general expenses	221,000	1,612,000	1,833,000
Total	3,344,000	153,149,000	156,493,000

Navigation operations.—Improvements on the Tennessee River now provide a modern 9-foot channel from the mouth to Knoxville, Tenn., a distance of 650 miles. The river is thereby linked with the 7,000-mile inland waterways system extending from the Great Lakes to the Gulf of Mexico. TVA's continuing work in navigation is to encourage maximum use of this waterway in order that full value may be received from the Federal investment in it. Engineering work assures that physical facilities are operated, maintained, and modified to meet the needs of modern commerce. Studies of transportation economics provide a basis for appraisals of opportunities for use of the waterway. Work with shippers, carriers, and others supplies data on the shippers' problems in the utilization of Tennessee River transportation. Direct expense of navigation operations in 1958 is estimated at $254,000.

Flood control operations.—To control floods on the Tennessee River system, TVA operations consist principally of (1) maintaining and using storage space in upstream reservoirs for seasonal retention of excessive runoff, and (2) regulating the discharges from reservoirs to rates of flow which can be handled safely by downstream channels and reservoirs. The dams on the Tennessee River and its tributaries provide 11,803,000 acre-feet of storage for flood control at the beginning of the flood season. The system of dams has on 19 occasions reduced flood crests at the city of Chattanooga, which presents one of the Valley's major flood problems, saving about $53,500,000 in flood damage at this one city. Communities and agricultural land below the mouth of the Tennessee on the lower Ohio and Mississippi Rivers are also benefited, with averted damages of about $7,200,000. The TVA system, when high flows occur in the Tennessee River, is able to reduce flood heights at Cairo, Ill., from 2 to 4 feet. As a supplement to the operation of its system of reservoirs for flood control, TVA's work includes collection and analysis of flood data; studies to improve operations of the existing system; studies of potential flood control projects; and technical advice and assistance to State and local agencies to encourage their assumption of responsibility for solution of local urban and rural flood control problems. The 1958 budget program provides $227,000 for the direct expense of flood control operations.

Power operations.—TVA power operations are confined to generation and transmission of power and sales at wholesale to local distribution systems and to a small number of industries and Government agencies requiring large amounts of power. Power is distributed by 149 local public agencies and two small privately owned utility companies to more than 1,435,000 ultimate consumers. As of June 30, 1956, the installed capacity of the system was 9,279,485 kilowatts (nameplate rating), including plants of the Corps of Engineers, Department of the Army, and the Aluminum Company of America operated as a part of the TVA system. Total system input in fiscal year 1956 was over 59.6 billion kilowatt-hours and is estimated at about 62.5 billion kilowatt-hours for 1957 and about 67.5 billion kilowatt-hours for 1958. Net income from power operations (before interest) was $53,901,010 in 1956 and is estimated at $57,453,000 for 1957 and $60,432,000 for 1958. The return on power investment in 1956 of 3.9 percent was slightly below the average experienced over the 23 years of TVA's power operations. Assuming average streamflow conditions, the return on the investment in 1958 is expected to be approximately 4 percent. Dry weather with resulting low streamflows would reduce substantially the amount of net income which would be realized.

Multipurpose reservoir operations.—These activities relate to the management, operation, and maintenance of 19 multipurpose reservoirs created by TVA dams. The reservoirs have approximately 10,000 miles of shoreline; the dam reservations include 13,825 acres of land and 97 miles of gravel and hard-surface roads; approximately 405,000 acres of land surrounding the reservoirs requires management or administration of land rights. Estimated direct expenditures in 1958 total $4,184,000 and provide for water dispatching operations, water control investigations, upkeep of dam reservations, operation of reservoir lands, plant protection, and repetitive operations for malaria control. These activities serve navigation, flood control, and power. The related costs, for accounting purposes, are distributed to those operations. The navigation and flood control portions are financed from appropriated funds; the power portion is financed from corporate funds.

Topographic mapping.—Valley topographic maps serve TVA's planning, construction, and operating needs and fit into plans of the United States Geological Survey for nationwide map coverage. Of the total schedule for mapping carried on cooperatively with the United States Geological Survey, 591 quadrangles had been completed and printed by June 30, 1956. To complete the remaining 174 quadrangles in an orderly and efficient manner by the end of fiscal year 1961, expenditures of $315,000 are planned in 1958.

Fertilizer, agricultural, and munitions program.—TVA chemical facilities at Wilson Dam, Ala., form a laboratory and experimental center for developing new or improved fertilizers and processes for their manufacture, and are important for defense purposes.

Acquisition of assets.—Nearly half of the $1,286,000 estimate for chemical facilities provides for the completion of a unit started in 1957 to produce a high-analysis fertilizer from overburden material now being wasted in mining

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

operations in the Florida phosphate fields. The estimate also covers prospecting and acquisition of phosphate lands and provision for construction work necessary for improvement and modification of present facilities.

Program expenses.—Total 1958 expenses, including related administrative and general expenses, are estimated at $18,658,000. Estimates for the several activities and the distribution of costs between appropriated and corporate funds are as follows:

SUMMARY OF ESTIMATED PROGRAM EXPENSES

	Appropriated funds	*Corporate funds*	*Total*
Research on fertilizer products and processes	$1,456,000	----------	$1,456,000
Basic agronomic research	364,000	----------	364,000
Fertilizer production and distribution	----------	$14,805,000	14,805,000
Fertilizer marketing studies and demonstrations	----------	95,000	95,000
Farm test-demonstrations	910,000	417,000	1,327,000
Agricultural development projects	174,000	----------	174,000
Distribution of administrative and general expenses	112,000	325,000	437,000
Total	3,016,000	15,642,000	18,658,000

Research on fertilizer products and processes consists of (1) exploratory tests, background research, and applied research at the laboratory level; and (2) process development. The latter includes technical and economic evaluation of research results; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstration plants; and preparation of engineering and economic studies to facilitate application of the findings by other agencies and industries. Knowledge gained in fertilizer research is applied also to the related field of munitions. The 1958 estimate for this work is $1,456,000.

The 1958 estimate of $364,000 for basic agronomic research covers laboratory and field plot tests to determine under controlled conditions the relative efficiency of TVA fertilizers. This work is carried out in cooperation with State experiment stations in the 7 Valley States and 7 other States.

Estimated direct cost of fertilizer production and distribution is $14,805,000 for 1958; income is estimated at $16,370,000. TVA builds and operates fertilizer and munitions facilities to serve the following purposes: (1) to demonstrate the technical and commercial feasibility of a new or improved fertilizer process and to encourage its adoption by industry; (2) to supply these fertilizers for test-demonstration use on practical farms and for widespread educational purposes among farmers; and (3) to supply munitions materials for national defense. New or improved fertilizers are sold to farmers for educational purposes through cooperative and industry distributors. These distributors in turn furnish TVA data concerning distribution costs and farmer acceptance. Estimated fertilizer production in 1958 is as follows: concentrated superphosphate, 25,000 tons; calcium metaphosphate, 80,000 tons; ammonium nitrate, 125,000 tons; diammonium phosphate, 25,000 tons; and leached zone fertilizer, 5,000 tons.

Fertilizer marketing studies and demonstrations are aimed at developing more efficient and economical ways of moving fertilizer from plants to the farmers and on the field. The 1958 budget includes $95,000 for this purpose.

Farm test-demonstrations will be conducted in 25 States in 1958, with an estimated 3,605 farms participating. Major objectives of the program are: (1) introduction to farmers of TVA's experimental fertilizers and demonstration of their effective uses; and (2) improvement of the Valley's agriculture, forestry, and watershed-streamflow relationships. Total estimated expenses in 1958 are $1,327,000; the corporate fund portion of $417,000 represents income from farmer payments for fertilizer.

Agricultural development projects encourage the full development and use of the agricultural resources of the Tennessee Valley consistent with sound conservation practices. Research and demonstrations are carried out cooperatively with the land-grant colleges on some of the more urgent agricultural problems of the region in order to utilize State personnel and facilities in regional development as widely as possible and to encourage State institutions to assume wider responsibility for regional research. The 1958 estimate for agricultural development projects is $174,000.

Watershed protection and improvement program.—This is a new budget category which covers closely related activities formerly included in a budget category entitled "Resource development." This change has been made in the interest of clarity of presentation. Other activities of the discontinued category are now classified in programs with which they are most closely associated, except for topographic mapping which is classified separately.

TVA is responsible for the protection and improvement of the watershed of the Tennessee River in relation to overall development of the region's natural resources. To accomplish this, TVA makes investigations to identify problems of watershed protection and improvement under conditions of optimum use; conducts research to develop and test corrective measures; and participates in cooperative projects with State and local groups to apply these measures to regional and special problems. The 1958 estimate of $1,061,000 provides about equally for two types of activities—tributary watershed projects and forestry projects.

The major purpose of TVA's participation in tributary watershed development projects is to assist in finding and demonstrating ways in which State and local agencies and private groups can assume leadership and responsibility for joint solutions to problems of watershed protection and resource development in small tributary watersheds. Work planned for 1958 consists of continuation of demonstrations in the Chestuee and Beech River watersheds in Tennessee; development work in two other watersheds; and research on the effects of changes in land use on the quality and behavior of water in the streams.

The aim of the forestry projects is to aid the States, counties, landowners, and the timber industry in developing full production and use of the Valley's forest resources consistent with the needs of watershed protection. Forestry projects include research and demonstrations in forest management, reforestation, forest protection, and wood utilization. In 1958 plans call for increased production of tree seedlings. They are distributed through State agencies to private landowners, who pay a part of the production cost.

General service activities—acquisition of assets.—The credit estimate of $29,000 for general facilities is made up of a budget outlay of $1,096,000 offset by depreciation credits of $1,125,000. The $1,096,000 is for purchase of equipment used throughout the TVA program and covers primarily replacement of trucks and other heavy mobile equipment.

Program expenses.—The 1958 estimate of $1,745,000 covers reimbursable services furnished at the request and expense of other agencies. Major items are mapping services for the Department of the Army and the United States Geological Survey.

REVOLVING AND MANAGEMENT FUNDS—Continued

PUBLIC ENTERPRISE FUNDS—Continued

TENNESSEE VALLEY AUTHORITY—Continued

Tennessee Valley Authority Fund—Continued

Administrative and general expenses.—Administrative and general expenses consist primarily of costs of general administration and of personnel, fiscal, legal, and other management services which have been centralized in the interest of economy and convenience. These expenses are distributed to the various programs and are included in the program estimates shown in the summary schedule entitled "Program and financing." In total the 1958 estimate is $4,265,000.

Operating results and financial condition.—For 1958, net income from power operations is expected to amount to $60,433,000 and net expense of other programs is expected to total $9,890,000, leaving $50,543,000 to be added to accumulated program income. Total accumulated program income through 1958 is estimated at $287,630,351, made up of accumulated net income from power operations totaling $473,173,690 and accumulated net expense of other programs totaling $185,543,339. Only the power operations program is intended to be self-supporting; the net expense of other programs is covered largely by appropriations from the Treasury.

Total investment of the Government is expected to be $2,052,771,030 at the end of 1958, consisting of net appropriations of $1,719,590,566, other capital (largely property transfers) of $45,550,113, and excess of program income over program expenses of $287,630,351. The portion of TVA's investment in power is as follows:

INVESTMENT IN TVA POWER PROGRAM

[In thousands]

Investment	*1955 actual*	*1956 actual*	*1957 estimate*	*1958 estimate*
Lands, structures, and equipment:				
Completed fixed assets	$1,378,831	$1,588,464	$1,702,910	$1,760,897

Contributions in aid of construction	303	303	308	313
Total power program assets	1,533,839	1,575,560	1,623,717	1,682,170

In 1958 net budget expenditures (the excess of cash withdrawn from the Treasury over cash deposited in the Treasury) are expected to be $24,363,000.

Financing the budget program.—Of the $27,463,000 required to finance the appropriation program budget for 1958, it is estimated that $12,681,000 would be available from carryover balances of previous appropriations, leaving $14,782,000 to be provided by a requested appropriation for 1958. The corporate budget for 1958 totals $286,440,000—$273,960,000 for programs and $12,480,000 for payments to the Treasury. Total requirements would be financed by full utilization of the estimated corporate income for 1958 of $282,345,000 and the utilization of $4,095,000 of income available from prior years. Recommendations have been made to the Congress for the enactment of legislation which would authorize the issuance of revenue bonds by TVA to finance new power facilities. If Congress should approve such legislation before the end of the fiscal year the sources of capital for the power construction program would be reviewed in the light of such legislation.

Of the total estimated payments to the Treasury of $12,480,000 in 1958, $10 million would be from power proceeds. Payments from power proceeds through June 30, 1958, are estimated at $250,131,519, of which $226,500,000 will have been made after the passage of the Government Corporations Appropriation Act of 1948. Payments to the Treasury by that date will be about 23 percent greater than if equal installments were paid over a 40-year period, as follows:

[In millions]

Cumulative to—	*Minimum payments required under 1948 law*	*One-fortieth of plant investment at end of previous year*	*Actual and budgeted payments*
June 30, 1955	$28.0	$87.6	$127.5

REVOLVING AND MANAGEMENT FUNDS—Continued

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1958

TENNESSEE VALLEY AUTHORITY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
Tennessee Valley Authority fund	200	$270,000	200	$70,000	$200,000	600	$9,000	The TVA program is conducted in an area of more than 80,000 square miles, with many installations at isolated points. Travel by automobile is very frequently more economical than common carrier and sometimes the only available method of transportation. TVA's 800 units are pooled in 1 fleet and are issued to employees as requested. About 435 units will be used in power operations, maintenance, and transmission construction activities; 110 in dam and steam plant construction at isolated sites not served by common carrier; 95 units in reservoir operations; and 160 in forestry, fertilizer, agricultural, administrative and miscellaneous activities. Motor vehicles will be hired on special occasions to meet peak demands and at remote locations where the Authority does not maintain a pool of motor vehicles and personal cars are not available.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1958

TENNESSEE VALLEY AUTHORITY

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
Tennessee Valley Authority fund	1	$5,000	2	$3,500	$1,500	7	$94,600	5 helicopters will be used for transmission line patrol, malaria control spraying, reconnaissance, aerial inventories and air sampling in the vicinity of TVA steam plants for air pollution tests; 1 fixed-wing plane (proposed purchase) will be used for emergency malaria control spraying and TL trouble-shooting and reservoir aerial inspection; 1 airplane will be used for passenger service with some use for aerial mapping and reconnaissance; 1 plane will be used principally for the transportation of engineers to widely scattered projects and for the transportation of administrative officers on official business.

VETERANS ADMINISTRATION

Direct Loans to Veterans and Reserves

Investment in Direct Loans to Veterans and Reserves, Veterans Administration

AMOUNTS AVAILABLE FOR OBLIGATION

	1956 actual	1957 estimate	1958 estimate
Authorization to expend from debt receipts (obligations incurred) distributed as follows:			
Annual indefinite authorization	$92,997,475		
Permanent annual indefinite authorization		$150,000,000	

ANALYSIS OF TRANSFERS TO DIRECT LOANS TO VETERANS AND RESERVES

Obligations incurred during the year (total transfers to "Direct loans to veterans and reserves, Veterans Administration" distributed as follows:			
Annual indefinite authorization	$92,997,475		
Permanent annual indefinite authorization		$150,000,000	

Direct Loans to Veterans and Reserves, Veterans Administration

Loans are made to veterans for the purchase, construction, or improvement of homes, including farm residences, only where guaranteed private mortgages cannot be secured. The proceeds of loan repayments and loan sales are available for making additional loans. Appraisal and foreclosure expenses are met from interest income, and administrative expenses are borne by the appropriation for general operating expenses, Veterans Administration. Public Law 1020, approved August 7, 1956, extends the program to June 30, 1958, at which time outstanding loans are estimated to be $614.2 million, an increase of $181.7 million over 1956.

Borrowing authority in the amount of $584.1 million has been authorized through June 30, 1956. An additional $150 million has been authorized for 1957, at a quarterly rate of $50 million less the proceeds of loan sales in the preceding quarter. Public Law 1020 did not extend the borrowing authority for 1958. Of the maximum $150 million borrowings authorized for 1956, only $93 million was utilized because of the relative success of the voluntary home mortgage credit program. However, in view of the extension of loan-making authority through 1958 without like extension of borrowing authority, it is expected that the maximum borrowing authority will be exercised in 1957. Of the total funds to be made available from borrowings and program operations, it is expected that $114 million will be disbursed for loans in 1957, and $136.8 million in 1958.

The net budgetary expenditure for operations was $53.7 million in 1956. It is expected to be $73 million in 1957 and $90.9 million in 1958. Interest earnings of $24 million are anticipated in 1958, up $6.9 million over 1956. Expenses are expected to increase only $3.9 million, resulting in an improved net income for the year of $10.3 million, and increasing retained earnings (reserve for losses) to $40.4 million at the end of the year. The net principal

AMOUNTS AVAILABLE FOR OBLIGATION

	1956 actual	1957 estimate	1958 estimate
Appropriation (obligations incurred)	$750,000	$1,000,000	$1,500,000

ANALYSIS OF TRANSFERS TO FUND

Obligations incurred during the year (transfers to fund out of current authorizations)	$750,000	$1,000,000	$1,500,000

Service-Disabled Veterans Insurance Fund

This fund receives premiums and pays claims on nonparticipating insurance policies issued to veterans with a service-connected disability which makes them ineligible for commercial insurance. At the end of 1956, 19,600 policies were in force, representing almost $170 million of insurance. Administrative expenses of the program, which was initiated in 1951, are paid from the appropriation for general operating expenses, Veterans Administration.

Death claims and refunds have exceeded premium receipts each year due to the insurance of medically substandard lives, and an appropriation of $1,500,000 is requested for 1958 to make up losses and to provide a modest reserve against contingencies.

Soldiers' and Sailors' Civil Relief

Soldiers' and Sailors' Civil Relief Fund

This fund is used to guarantee premiums due on commercial life-insurance policies held by servicemen while they are in service and for 2 years after discharge. The Government guarantees the repayment of any indebtedness not liquidated by the insured himself, but any payment by the Government becomes a debt owed the Government by the insured (50 U. S. C. 510–590; App. 464). Administrative expenses of this activity are borne by the appropriation for general operating expenses, Veterans Administration.

VETERANS CANTEEN SERVICE

Canteen Service Revolving Fund, Veterans Administration

The Veterans Canteen Service furnishes merchandise and services for the comfort and well-being of veterans in hospitals and domiciliaries of the Administration. The 1958 estimate anticipates a further repayment to the Treasury of $332,939 leaving a balance of $52,447 out of the sum originally advanced.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

Veterans Special Term Insurance

Veterans Special Term Insurance Fund

Veterans who served subsequent to April 1951 may purchase special nonparticipating term insurance until January 1, 1957, if application is made within 120 days after separation from service. Section 501 (a) (2) of Public Law 881, the Servicemen's and Veterans' Survivor Benefits Act, prohibits further issuance of this type of insurance on or after January 1, 1957. As of June 30, 1956, almost 568,000 policies were in force providing over $5 billion protection.

Favorable mortality experience on insurance written against this fund indicates that retention of earnings will reach $51.3 million at the close of 1958, which will be represented principally by 2⅞ percent United States securities. Of the retained earnings it is anticipated that $14.5 million will be assigned to actuarial reserves and $36.8 million to surplus. The Government's initial investment of $250,000 was returned in 1956.

Administrative expenses of this program are borne by the appropriation for general operating expenses, Veterans Administration.

VOCATIONAL REHABILITATION

Vocational Rehabilitation, Veterans Administration, Revolving Fund

This fund is used to make loans up to $100 to disabled veterans eligible for vocational rehabilitation who are without sufficient funds to meet their expenses (57 Stat. 43; 38 U. S. C., ch. 12 note). Repayments are used for new loans. A return to Treasury of $400,000 during 1956 reduced the net appropriation to $700,000 on June 30, 1956.

Administrative expenses for operating the fund are borne by the appropriation for general operating expenses, Veterans Administration.

CIVIL SERVICE COMMISSION

Investigations, Civil Service Commission

This fund finances, on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (66 Stat. 107). The capital of the fund consists of $4 million appropriated in 1952.

Budget program.—Because work on some investigations will be started in one fiscal year and completed in another, work in process is recognized as an asset of the fund. Agency estimates of investigations to be requested in fiscal years 1957 and 1958 as compared to fiscal year 1956 experience are presented below. In addition, the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1956 actual	*1957 estimate*	*1958 estimate*
On hand, beginning of year	4,367	11,199	7,699
Received	42,218	50,500	45,500
Total workload	46,585	61,699	53,199
Processed	35,386	54,000	46,200
On hand, end of year	11,199	7,699	6,999
Average positions	1,114	1,800	1,627
Unit cost	$237	$250	$265

The estimated increase in cost for the fiscal year 1958 results principally from the contribution to the retirement fund beginning in that year.

Operating results.—Net earnings each year are paid into Treasury the following year.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

	1956 actual	1957 estimate	1958 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Equipment	$35,432	$50,000	
Expense	8,426,099	13,912,949	$12,079,000
Increase in selected working capital		603,785	45,834
Total applied to operations	8,461,531	14,566,734	12,124,834
To financing:			
Payment of earnings to Treasury	8,793	7,071	
Repayment of principal to Treasury	22		
Increase in cash with Treasury			118,166
Total applied to financing	8,815	7,071	118,166
Total funds applied	8,470,346	14,573,805	12,243,000
FUNDS PROVIDED			
By operations:			
Income: Sales of services	8,302,420	13,500,000	12,243,000
Decrease in selected working capital	40,814		
Total provided by operations	8,343,234	13,500,000	12,243,000
By financing:			
Decrease in cash with Treasury	127,112	1,073,805	
Total funds provided	8,470,346	14,573,805	12,243,000
BUDGET EXPENDITURES			
Funds applied to operations	8,461,531	14,566,734	12,124,834
Funds provided by operations	8,343,234	13,500,000	12,243,000
Net budget expenditures	118,297	1,066,734	−118,166
The above are charged or credited (−) to net receipts of the fund	118,297	1,066,734	−118,166

B. STATEMENT OF INCOME AND EXPENSE

Income: Sales of services	$8,302,420	$13,500,000	$12,243,000
Expense:			
Salaries	6,834,544	11,280,680	9,322,192
Travel	1,117,694	1,844,700	1,510,217
Other expense	473,861	787,569	1,246,591
Subtotal	8,426,099	13,912,949	12,079,000
Increase (−) or decrease in work-in-process inventory	−196,696	−484,449	87,500
Cost of services sold, excluding depreciation	8,229,403	13,428,500	12,166,500
Depreciation on equipment	65,946	71,500	76,500
Cost of services sold	8,295,349	13,500,000	12,243,000
Net income for the year	7,071		
ANALYSIS OF RETAINED EARNINGS			
Retained earnings, beginning of year	8,793	7,071	
Payment of earnings to Treasury (−)	−8,793	−7,071	
Retained earnings, end of year	7,071		

C. STATEMENT OF FINANCIAL CONDITION

ASSETS			
Current assets:			
Cash with Treasury	$3,544,935	$2,471,130	$2,589,296
Accounts receivable	1,012,704	1,742,500	1,585,375
Work-in-process inventory	477,926	962,375	874,875
Prepaid expense	177	500	500
Total current assets	5,035,742	5,176,505	5,050,046
Fixed assets:			
Equipment	450,702	500,702	500,702
Less portion charged off as depreciation	243,892	315,392	391,892
Net fixed assets	206,810	185,310	108,810
Total assets	5,242,552	5,361,815	5,158,856
LIABILITIES			
Current liabilities	1,235,481	1,361,815	1,158,856
INVESTMENT OF U. S. GOVERNMENT			
Non-interest-bearing investment:			
Appropriation	4,000,000	4,000,000	4,000,000
Retained earnings	7,071		
Total investment of U. S. Government	4,007,071	4,000,000	4,000,000
Total liabilities and investment of U. S. Government	5,242,552	5,361,815	5,158,856

REVOLVING AND MANAGEMENT FUNDS—Continued

INTRAGOVERNMENTAL FUNDS—Continued

VETERANS ADMINISTRATION

Supply Fund, Veterans Administration

This fund finances, on a reimbursable basis, procurement of supplies and equipment, operation of the service and reclamation shops, the book and periodical activity, the motion picture inspection and shipping activity, and, beginning in 1958, the publications and reproduction program including the purchase of forms from the General Services Administration, Government Printing Office, and contract printers.

Net income for 1956 was $350,159 which, after eliminating the deficit at the beginning of the year, will permit earnings of $235,066 to be paid to the Treasury in 1957. No net income is anticipated in 1957 or 1958 with income and expense for 1958 both estimated at $135,750,000. A return of the Government's capital investment to the Treasury of $3 million was made in 1956, with an additional return of $4 million programed in 1957 and $1 million in 1958.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

	1956 actual	1957 estimate	1958 estimate
FUNDS APPLIED			
To operations:			
Procurement and services program:			
Acquisition of operating equipment	$1,689	$9,600	$5,000
Expense:

GENERAL PROVISIONS

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System.

SEC. 103. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided, *nor to the purchase of newspapers and periodicals necessary for the care and welfare of patients and members in Veterans Administration hospitals and domiciliary facilities.*

SEC. 104. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 105. Appropriations contained in this title, available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made.

SEC. 106. No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply

GENERAL PROVISIONS—Continued

INDEPENDENT OFFICES—GENERAL PROVISIONS—Continued

to programs which have been approved by the Congress and appropriations made therefor.

SEC. 107. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; wage administration; and processing, recording, and reporting.

SEC. 108. None of the sections under the head "Independent Offices, General Provisions" in this title shall apply to the Housing and Home Finance Agency.

CORPORATIONS—GENERAL PROVISIONS

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress.

[SEC. 302. No part of any appropriation hereafter contained in this or any other Act shall be used to pay the compensation of any officers or employees who establish a requirement of maximum age for entrance into positions in the competitive civil service: *Provided*, That no person who has reached his seventieth birthday shall be appointed in the competitive civil service on other than a temporary basis.] (*Independent Offices Appropriation Act, 1957.*)

PROPOSED FOR LATER TRANSMISSION

Alaska International Rail and Highway Commission (under existing legislation, 1957).—The Commission was established by Public Law 884, approved August 1, 1956, to study the economic and military advantages and the feasibility of additional rail and highway routes between the continental United States and Alaska, as well as the feasibility of feeder rail and highway routes connecting with coastal ports and cities. It is estimated that an appropriation of $75,000 will be required for 1957.

Administrative expenses, employees' life insurance fund, Civil Service Commission (limitation) (under existing legislation, 1957).—A proposed increase in limitation of $76,500 for 1957 is anticipated to meet the continuing cost of assuming assets and liabilities of beneficial associations.

Salaries and expenses, Railroad Retirement Board (under existing legislation, 1957).—Increase in the limitation will be required in 1957 in the amount of $850,000 to carry out Public Law 1013, approved August 7, 1956, which increased benefits generally, and Public Law 880, approved August 1, 1956, broadening the scope and content of the old-age and survivors insurance program.

Small Business Administration (under proposed legislation).—An appropriation of $50 million is proposed for later transmission for 1957 for continuation of the small business lending programs. This request is contingent upon approval by the Congress of a proposed amendment to the Small Business Act of 1955 increasing the limitation on the amount of business loans outstanding at any one time.

Appropriations totaling $77,500,000 are proposed for later transmission for 1958 for continuation of the small business assistance programs, including an additional amount for the lending program. These requests are contingent upon approval by the Congress of proposed legislation extending the basic statutory authority.

Inpatient care, Veterans Administration (under existing legislation, 1957).—A supplemental appropriation of $4,200,000 is forecast for 1957 to provide for the cost of salary increases for employees under the wage rate schedule. The total salary increase for these employees during 1957, which was not included in the inpatient care appropriation, is estimated to be $5,333,000. Savings from revisions in the estimated beneficiary load for this appropriation will amount to $1,133,000; thus a net increase of $4,200,000 is forecast for 1957.

Automobiles and other conveyances for disabled veterans, Veterans Administration (under existing legislation, 1957).—It is estimated that available funds will be exhausted during 1957. A supplemental appropriation of $1 million is required, of which $150,000 is to cover 1957 needs arising from Public Law 92, approved June 21, 1955, which extends the time limit for application for these benefits. The remaining $850,000 is to maintain the program through 1958.

Plant acquisition and construction, Atomic Energy Commission (under proposed legislation, 1958).—New obligational authority will be requested in a supplemental transmission after congressional consideration of the Commission's request for authorization of appropriations. Available unobligated balances have been applied in determining the appropriation to be requested. Of the $168.8 million of total obligations anticipated, $50.1 million is expected to be proposed for improvements and additions to existing production plants which will increase production and safety and decrease unit costs, and for additional weapons production and development facilities. Proposed also are $43 million for facilities connected with the development of civilian power reactors, $20.2 million for other research and development facilities, and $55.5 million for a variety of other projects.

CURRENT AUTHORIZATIONS

The Administration serves as the central agency for management of Government real and personal property, construction of Federal buildings, procurement of common-use supplies and services, stockpiling of critical materials, custody of the National Archives and provision of archival, records, transportation, and public utility services. Program operations are grouped under 5 services and are performed mainly through 10 regional offices under central office direction.

Basic operations are provided for in 4 operating expenses appropriations. Other programs such as construction and repair of buildings, lease-purchase of buildings, operation of a nationwide system of supply depots, stockpiling of critical materials, and other operations are provided for in separate appropriations. In addition, substantial financing is provided by transfers and reimbursements from funds appropriated to other agencies. Central policy direction and coordination of all programs are provided for in an "Office of Administrator" appropriation. The direction of each of the 5 services in the Administration is provided by the basic appropriation of each service. Financial, administrative, legal, planning, and program coordination operations for all services are provided by the integrated staff organization which is financed by deposits from supporting appropriations in the "Administrative operations fund."

The Administration serves by delegation from the Office of Defense Mobilization as executor of defense production expansion programs financed by allocations of borrowing authority made available to the President. Details of these programs are shown in the funds appropriated to the President chapter of the budget.

REAL PROPERTY ACTIVITIES

Operating Expenses, Public Buildings Service, General Services Administration

Operating expenses, Public Buildings Service: For necessary expenses of real property management and related activities as provided by law; [repair and improvement of public buildings and grounds, including those occupied pursuant to the Public Buildings Purchase Contract Act of 1954 (68 Stat. 518), in the District of Columbia and area adjacent thereto, under the control of the General Services Administration; repair and improvement of buildings operated by the Treasury and Post Office Departments in the District of Columbia;] furnishings and equipment; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation, and transfer of building space; [demolition of buildings;] acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; *payments in lieu of taxes pursuant to the Act of August 12, 1955 (40 U. S. C. 521);* and not to exceed [$205,300] *$281,300* for expenses of travel; [$125,000,000] *$142,000,000, of which $3,000,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, only in such amounts as may be required for expenses during the current fiscal year of wage board pay increases which may be effected after December 2, 1956, pursuant to law (5 U. S. C. 1082 (?))*: *Provided,* [That of the foregoing amount $8,100,000 shall be available for repair and improvement and $4,500,000 for air conditioning of buildings in the District of Columbia and area adjacent thereto: *Provided further,*] That this appropriation shall be available, without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a), [for the rental, repair, alteration, and improvement of] *with respect to* buildings or parts thereof, heretofore leased under the appropriation for "Emergency operating expenses".

[For an additional amount for "Operating expenses, Public Buildings Service", including payments in lieu of taxes pursuant to the Act of August 12, 1955 (69 Stat. 721), $3,550,000.] *(Independent Offices Appropriation Act, 1957; Supplemental Appropriation Act, 1957.)*

Appropriated 1957, [a] **$131,050,000** Estimate 1958, [b] **$142,000,000**

[a] Includes $2,500,000 appropriated in Second Supplemental Appropriation Act, 1957

[b] Includes $93,100 for activities previously carried under "Salaries and expenses, Office of Administrator, General Services Administration," and excludes $24,740,000 for activities transferred in the estimates to "Repair and improvement, federally owned buildings, General Services Administration." The amounts obligated in 1956 and 1957 are shown in the schedule as comparative transfers.

PROGRAM AND FINANCING

Appropriation (adjusted)	103, 668, 000	131, 050, 000	142, 000, 000

PROGRAM AND PERFORMANCE

This appropriation provides for basic real property operations of the Administration, including the planning and direction of all real property programs; acquisition, operation, and utilization of general-purpose space; management of excess real property and disposal of surpluses; and central direction of all buildings design, construction, and repairs.

The appropriation request for 1958 is a net increase of $21,168,500 above a comparable amount for 1957 which includes proposed supplementals of $2,450,000. The net increase is composed of (1) $19,847,200 for buildings management operations, and (2) $1,321,300 spread among the other 5 activities.

1. *Buildings management.*—This activity provides for (*a*) management, operation, protection, and utilization of Government-owned space and purchase contract space as indicated in the following table:

AVERAGE NET SQUARE FEET

	1956 actual	*1957 estimate*	*1958 estimate*
Government-owned space	56, 401, 000	56, 470, 000	56, 318, 000
Purchase contract space	----------	----------	649, 000

(*b*) rental, protection, and utilization of leased space, as follows: 1956, 20,273,000 square feet; 1957, 20,554,000 square feet; 1958, 22,514,000 square feet; (*c*) operation of joint-use communication facilities; and (*d*) other related services.

The net increase for 1958 of $19,847,200 over the comparable amount for 1957 is composed of the following items:

Operation and protection of Government-owned space	$7, 718, 000
Rental, operation, protection, and repair of leased space	5, 447, 200
Operation and protection of purchase-contract space	554, 000
Cost of space supplied to other agencies, reimbursable in 1957	1, 738, 000
Emergency rapid-written communications services	310, 000
Moving, alterations, and furnishings	300, 000
Contributions to the employees' retirement fund	3, 780, 000
Total	19, 847, 200

2. *Acquisition and disposal.*—This activity provides for real property operations not otherwise provided for, including (*a*) acquisition of property by lease, purchase,

Digitized for FRASER

Federal Reserve Bank of St. Louis

exchange, or donation; (*b*) disposal of surplus property; (*c*) maintenance and utilization of excess, surplus, and industrial reserve property; (*d*) custody of a machine tool reserve; and (*e*) payments in lieu of taxes on certain properties transferred from the Reconstruction Finance Corporation. The net increase for 1958 of $308,600 is principally due to maintenance of excess and surplus properties.

3. *Design and construction.*—This activity provides for a small staff responsible for central technical direction of all programs involving design, construction, and remodeling of Federal buildings.

4. *Program planning.*—This new activity for 1958 brings together functions related to planning real property programs previously performed in other units of the Service. These are expanded to cover development of long-range plans for providing economical space and related services for Government in Washington and the field. The activity also provides for related functions of agency services, standards, statistics, and appraisals of real property.

6. *Administrative operations.*—The increase in 1958 provides $352,200 for workloads due to expansion of staff and program operations, and $125,000 for increased assistance to small business and a project for modernizing real property laws.

Repair and Improvement, Federally Owned Buildings, General Services Administration

Repair[,] *and* improvement, [and equipment of] federally owned buildings [outside the District of Columbia]: For expenses necessary for the repair, alteration, preservation, renovation, improvement, extension, equipment, and demolition of federally owned buildings and buildings occupied pursuant to the Public Buildings Purchase Contract Act of 1954 [(68 Stat. 518) outside the District of Columbia] (*40 U. S. C. 356*), not otherwise provided for, including grounds, approaches and appurtenances, wharves and piers, together with the necessary dredging adjacent thereto; acquisition of land as authorized by title III of the Act of June 16, 1949 (40 U. S. C. 297); not to exceed [$250,000] *$450,000* for expenses of travel; and care and safeguarding of sites acquired for Federal buildings; [$42,565,550] *$85,500,000*, to remain available until expended: *Provided, That the unexpended balance of appropriations heretofore granted for "Repair, improvement, and equipment of federally owned buildings outside the District of Columbia" shall be merged with this appropriation.* (*Independent Offices Appropriation Act, 1957.*)

Appropriated 1957, [a] **$42,600,550** Estimate 1958, [b] **$85,500,000**

[a] Includes $35,000 appropriated in Supplemental Appropriation Act, 1957.

[b] Includes $24,740,000 for activities previously carried under "Operating expenses, Public Buildings Service, General Services Administration." The amounts obligated in 1956 and 1957 are shown in the schedule as comparative transfers.

Unobligated balance carried forward	865,214		
Appropriation	26,150,000	42,600,550	85,500,000

PROGRAM AND PERFORMANCE

This appropriation provides for repairs, renovations, and improvements for over 4,500 Federal buildings under jurisdiction of the Administration for that purpose which contain over 101.3 million net square feet of floor space and were constructed or purchased at a cost exceeding $1.5 billion. Two major changes in this program are reflected for 1958: (1) Work on buildings in and adjacent to the District of Columbia formerly provided for under "Operating expenses, Public Buildings Service," is now provided for under this head, and (2) the former program of piecemeal repairs, renovations, and improvements of buildings is replaced by a program planned to bring all buildings which warrant continued future occupancy up to acceptable standards of condition and use during the next 7 years.

1. *Maintenance repairs.*—Normal recurring needs for repairs to buildings and equipment generated during 1958 are provided for. Reduction from comparable amount for 1957 reflects abandonment of the former provision toward "catching up with the backlog."

CURRENT AUTHORIZATIONS—Continued

REAL PROPERTY ACTIVITIES—Continued

Repair and Improvement, Federally Owned Buildings, General Services Administration—Continued

2. *Renovation projects.*—The estimate of $27,260,000 for 1958 provides for two programs: (1) $22,860,000 for the first year of a 7-year program of renovation and modernization of buildings, exclusive of air conditioning, estimated to cost $144 million phased at equal amounts for 5 years with substantial reductions thereafter; and (2) $4,400,000 for special renovation projects to provide for certain requirements for additional space to be met by (*a*) converting to general office use, space in buildings which becomes excess in their present condition, (*b*) extending existing buildings, and (*c*) remodeling for office use 3 hospital buildings which will be turned over to the Government upon completion of the Hospital Center in the District of Columbia.

3. *Air conditioning.*—The estimate of $41,850,000 for 1958 provides for the first full year of a program of air conditioning Federal buildings where warranted, including related alterations. The program is estimated to cost $328 million of which $18 million was provided in 1957 to initiate the program. The remainder is programed over 7 years similar to the preceding activity.

PROGRAM AND PERFORMANCE

This program provides for site acquisition, design, construction supervision, temporary provisions for agencies displaced by construction, and other program expense in connection with the acquisition of buildings to be financed with private capital and acquired by the Government through lease-purchase arrangements.

To date, 97 projects estimated to cost $665 million have been fully approved, of which 71 projects costing $574 million were approved subsequent to preparation of the budget for 1957. The overall 1957–58 program under existing legislation contemplates site acquisition, contracts for design, and other incidental expense for projects costing $580 million which will require a supplemental estimate

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

during 1957 of $10 million and $20 million requested for 1958.

Funds required for payments to contractors are provided under "Payments, public buildings purchase contracts, General Services Administration."

PROGRAM AND PERFORMANCE

Under the program to acquire buildings through lease-purchase arrangements, buildings costing some $295 million are expected to be under contract by the end of 1958 on which the equal annual payments for principal and interest during the contract period will total $21 million. This is an increase of $9 million over present limitations for entering into contracts, authorization for which is proposed for 1958. The appropriation estimate for 1958 provides for payments to contractors covering varying portions of the year on projects currently scheduled for occupancy prior to June 30, 1958.

PROGRAM AND PERFORMANCE

Improvements of private hospital facilities in the District of Columbia are made under legislation authorizing appropriations of $35 million.

1. *Construction.*—Under appropriations of $21.7 million, principal contracts have been awarded for construction of a hospital center, with completion scheduled for May 1957. It is contemplated that contracts for equipment, landscaping, and other features incidental to physical completion of the project may continue into 1959.

2. *Grants.*—Under appropriations of $13,010,000, grants are being made to six private agencies in the District of Columbia for improving their hospital facilities. Building costs are estimated at $27.8 million involving grants of about $13 million, all but $6.5 million of which has been made. Fifty percent of actual cost of the grants will be reimbursed by the District of Columbia.

PROGRAM AND PERFORMANCE

1. *Acquisition of land and building, Chicago, Ill.*—Condemnation proceedings for the acquisition of the Rand-McNally Building, Chicago, Ill., were started in June 1956. Acquisition by the Government will provide an economical solution to the problem of housing certain agencies in the Chicago area.

4. *Defense public works, community facilities.*—Funds are available for settlements in excess of amounts deposited with United States courts in condemnation proceedings for acquisition of land for community facilities in areas affected by defense activities during World War II.

8. *Remodeling the Congress Street Post Office, Chicago, Ill.*—A contract for remodeling the Congress Street Post Office at Chicago, Ill., to accommodate construction by the city of a superhighway through the building was awarded in 1955. This and other contracts for appurtenant work are contemplated for completion late in 1957 or early in 1958.

10. *Sites and planning, public buildings outside the District of Columbia.*—Balance available is reserved in event additional Court awards are granted for sites previously acquired by condemnation.

Current definite	2,930,600	2,884,400	4,390,000
Current indefinite		1,365,900	1,960,000

PROGRAM AND PERFORMANCE

This appropriation provides for establishment of efficient personal property management practices.

Increases proposed for 1958 are principally for further improvements of supply practices in civil agencies, acceleration of catalog identification of civilian agency supply items, improvement in utilization of excess property, and greater aid to other agencies in disposal of surpluses.

1. *Utilization and sales.*—Excess usable personal property is reported to General Services Administration for screening against needs of other agencies to achieve maximum utilization by transfers and obviate new purchases. The residue, together with surpluses not screened by General Services Administration, is either donated for educational, public health, or civilian defense purposes or released for public sale. Utilization transfers of $95 million in 1956 are expected to increase to $118 million in 1957 and $132 million in 1958. A new program of sales assistance developed with the Air Force should increase sales returns on $220 million of surplus in 1957; on $550 million surplus in 1958. Expense of these operations is provided from proceeds of sales of surplus personal property.

2. *Supply standards.*—Standards of quality and other characteristics of common-use commodities are established by specifications, qualified products lists, and item identifications for mandatory use by Government agencies. Increase requested for 1958 will provide for (*a*) development of 860 specifications, as compared with 650 in 1957 and 595 in 1956, which requires a substantial increase in developmental testing of technologically changed or new products; (*b*) completing the first year production of a 4-year program to identify all civilian agency items in the Federal Catalog System; and (*c*) reimbursement to the Department of Defense for screening and numbering services on civilian agency items.

3. *Motor vehicle management.*—Governmentwide policies and procedures are developed for improving management and utilization of motor equipment. Interagency motor equipment pools are established where surveys at locations of high vehicle density demonstrate economies or improved efficiency will result. Progress of the pool program is as follows:

	Surveys started	*Surveys completed*	*Pools established*
1956 (cumulative)	22	14	12
1957	17	17	16
1958	18	18	16

4. *Supply contracting.*—Term contracts for common-use commodities and services are established for large aggregate volume requirements against which agencies can place individual orders at uniform price advantages, whenever this procedure is advantageous to the Government.

5. *Supply management.*—Policies, regulations, procedures, and instructions for improving procurement and management of supplies and equipment by Government agencies are developed and their application and installation is coordinated through continuous liaison and by special surveys as required. The increase for 1958 will provide for improving Government supply activities by (*a*) applying to the Federal Government new techniques, methods, and practices derived from analyses of industrial supply systems; (*b*) publication of a procurement handbook as a guide to all agencies in economical purchasing; and (*c*) increasing on-site liaison to serve 12 groups of major agencies as compared with 6 groups in 1957.

Appropriation (adjusted)	14,075,000	15,070,000	20,000,000

PROGRAM AND PERFORMANCE

This appropriation provides for expenses of operating the nationwide supply system whereby common-use commodities and services are sold to Government agencies from stocks of 12 supply depots or by direct delivery from suppliers, whichever is more economical. Cost of commodities and services is initially financed from the general supply fund, subject to reimbursement by ordering agencies. Total sales for 1958 are programed at $252 million as compared with $212 million programed for 1957 and $175 million for 1956. Sales for 1957 have increased materially since the appropriation was made, necessitating a supplemental appropriation estimated at $1,030,000, which appears at the end of this chapter. The appropriation request for 1958 is $3,900,000 above the supplemented amount for 1957 and includes (*a*) $580,000 as a contingency against inability to obtain Government-owned space for expansion of warehouses, (*b*) $305,000 for physical improvements to alleviate fire hazards, (*c*) $2,221,000 for

Digitized for FRASER

Federal Reserve Bank of St. Louis

increased costs of operations and staff support for $40 million increase in sales, of which $1,074,500 is a contingency against increase in total sales above $237 million.

1. *Stores operations.*—Stocks of common-use commodities are received, warehoused, and sold at cost to Federal agencies through a nationwide system of supply depots. Continuous increase in stores sales is shown in the following figures: 1954, $52.8 million; 1955, $75.9 million; 1956, $96.4 million; 1957, $118.5 million; and 1958, $135 million.

2. *Buying operations.*—Commodities are procured (*a*) to maintain inventories in stores depots at levels to insure availability in advance of sales orders and (*b*) for direct delivery to agencies.

3. *Inspection operations.*—Delivery of commodities of specified standards is assured by inspections at contractors' plants or supply depots, and by laboratory tests and analyses of samples prior to acceptance. The increase for 1958 will keep inspections in line with the buying program of activity 2.

Unobligated balance no longer available	5,434		
Appropriation (adjusted)	6,118,500	6,893,650	7,600,000

PROGRAM AND PERFORMANCE

This appropriation provides for management of the Government's archives and records, including custody and administration of permanent records in the National Archives and other noncurrent records in Federal records centers, assistance to records management programs of Government agencies, operation of presidential libraries, and filing and publication of Federal laws and regulations. The 1958 budget estimate is an increase of $694,550 above comparative availability for 1957.

1. *Records management.*—Good records management practices in Government agencies are promoted and coordinated. Assistance, advice, and training are provided. Standards are established for retention and disposal of records. In 1956, clinics in records management techniques were held in 19 key cities for some 2,000 Federal supervisory personnel; in 1957 and 1958 special workshops will be organized to train Federal records personnel to apply these techniques.

2. *Records centers.*—Records of Government agencies which must be retained for periods of time, but are not needed for frequent reference, are brought into and administered in 10 regional records centers and 5 annexes until disposal can be effected. A national center at St. Louis administers records of former civilian employees of the Government and a locator file for currently employed personnel. The increase in 1958 is mainly to provide for increased workload shown in the following table:

	1956 actual	*1957 estimate*	*1958 estimate*
Records administered (millions of cu. ft.)	3.5	3.8	4.1
Reference services provided (millions)	1.2	1.3	1.4

3. *Archives and related services.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States. Related services consist of (*a*) publication of the Federal Register, Code of Federal Regulations, United States Government Organization Manual, the slip

laws, and the United States Statutes at Large, (*b*) preservation and servicing of historical records at the Franklin D. Roosevelt Library and the Harry S. Truman Library, and (*c*) servicing the National Historical Publications Commission. The increase for 1958 is mainly to provide for the first time for operation of the Truman Library.

4. *Nitrate film conversion.*—From the start of this program in 1954 to the completion in 1957 some 5 million feet of valuable nitrate base motion picture records will have been converted to acetate base film.

Appropriation (adjusted)	956,900	1,251,100	1,700,000

PROGRAM AND PERFORMANCE

This appropriation provides for improving management of transportation and public utilities in civilian agencies, protecting the Government's interests in cases before regulatory bodies, and furnishing services to civilian agencies in these specialized fields. The 1958 increase of $443,000 provides mainly for more aggressive planning for improvements in transportation management and emphasis on representation in rate cases.

1. *Transportation services.*—Plans and procedures for improving transportation practices of civilian agencies are developed; reasonable rates are negotiated with carriers; interests of the Government in cases before regulatory bodies are protected; and rates, routing, and related services are supplied to civilian agencies. The increase for 1958 will allow (*a*) acceleration of on-site examination of transportation operations to determine the nature and scope of problems; (*b*) more adequate participation in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

rate negotiations and litigation; and (*c*) some improvement in services to civilian agencies.

2. *Public utilities management.*—As a central management function for all agencies, equipment utilization, rate, and economic studies are made, contracts negotiated, and the Government's interests protected by participation in rate negotiations and litigations.

4. *Administrative operations.*—The increase in 1958 is mainly to provide additional legal staff to handle increased rate negotiations and litigation.

DEFENSE MATERIALS ACTIVITIES

Strategic and Critical Materials, General Services Administration

Strategic and critical materials: [Funds available for] *For necessary expenses in* carrying out the provisions of the Strategic and Critical Materials Stock Piling Act of July 23, 1946, [during the current fiscal year shall be available for] *including the acquisition of one parcel of land located at Harahan, Louisiana, now under lease to the Government and used for the storage of strategic and critical materials,* services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [not to exceed $3,175,500 for operating expenses,] not to exceed [$86,000] *$116,000* for expenses of travel, and necessary expenses for transportation and handling, within the United States (including charges at United States ports), storage, security, and maintenance of strategic and critical materials acquired for *or transferred to* the supplemental stockpile *established* pursuant to section 104 (b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U. S. C. 1704 (b)), *$130,000,000, to remain available until expended: Provided,* That any funds received as proceeds from sale or other disposition of materials on account of the rotation of stocks under said Act shall be deposited to the credit, and be available for expenditure for the purposes, of this appropriation: *Provided further,* That during the current fiscal year, there shall be no limitation on the value of surplus strategic and critical materials which, in accordance with subsection 6 (a) of the Act of July 23, 1946 (50 U. S. C. 98e (a)), may be transferred to stockpiles established in accordance with said Act: *Provided further,* That no part of funds available shall be used for construction of warehouses or tank storage facilities[: *Provided further,* That the sum of $199,349,000 of funds heretofore appropriated under this head is hereby rescinded, and such amount shall be covered into the Treasury promptly upon enactment of this Act]. (*Independent Offices Appropriation Act, 1957.*)

Estimate 1958, [a] **$130,000,000**

[a] Includes $29,600 for activities previously carried under "Salaries and expenses, Office of Administrator, General Services Administration." The amounts obligated in 1956 and 1957 are shown in the schedule as comparative transfers.

PROGRAM AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Program by activities:			
1. Acquisition and rotation of materials:			
(*a*) Cost of purchased materials	$228,823,445	$220,569,000	$245,212,500

Non-Federal sources	−83,080,838	−76,655,000	−77,447,000
Recovery of prior year obligations	−856,696	−11,360,000	−6,500,000
Unobligated balance carried forward	389,029,618	145,680,000	
Unobligated balance rescinded (70 Stat. 344)	199,349,000		
Appropriation (adjusted)	521,070,000		130,000,000

NOTE.—Reimbursements from non-Federal sources from sale of perishable materials under the rotation program (50 U. S. C. 98), $83,080,776; and refund of employee terminal leave payments (5 U. S. C. 61 (b)), $62.

PROGRAM AND PERFORMANCE

In carrying out the Strategic and Critical Materials Stock Piling Act of 1946 (50 U. S. C. 98 et seq.), the Defense Materials Service acquires and administers materials inventories in accordance with guidelines established by the Office of Defense Mobilization.

The continued high level of economic activity through 1956 has maintained a heavy industrial demand for several stockpile materials, necessitating substantial diversions of deliveries of such materials as copper, nickel, and aluminum to industrial consumption.

The requested appropriation for 1958 of $130 million plus unobligated balances from 1957 would finance the acquisition of $245 million of new materials and the cost of custody and rotation of existing inventories. The $245 million is budgeted: $69 million for direct purchases in the open market almost entirely from domestic sources,

CURRENT AUTHORIZATIONS—Continued

DEFENSE MATERIALS ACTIVITIES—Continued

Strategic and Critical Materials, General Services Administration—Continued

$71 million for materials being delivered under Defense Production Act expansion contracts, and $105 million for materials secured through barter of surplus agricultural commodities.

Based on existing objectives, the status of the stockpile at June 30, 1956 prices is expected to be as follows:

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Value of objectives:			
Minimum	$6,376.3	$6,379.8	$6,379.8
Long-term	4,482.8	4,535.5	4,535.5
Total	10,859.1	10,915.3	10,915.3
Procurement for objectives:			
Inventory:			
Minimum	4,753.3	5,038.4	5,234.0
Long-term	1,188.7	1,335.8	1,454.6
Total	5,942.0	6,374.2	6,688.6
On order:			
Minimum	264.5	128.0	80.3
Long-term	130.7	54.0	30.9
Total	395.2	182.0	111.2
Total procured:			
Minimum	5,017.8	5,166.4	5,314.3
Long-term	1,319.4	1,389.8	1,485.5
Total	6,337.2	6,556.2	6,799.8
Balance to be procured:			
Minimum	1,358.5	1,213.4	1,065.5
Long-term	3,163.4	3,145.7	3,050.0
Total	4,521.9	4,359.1	4,115.5

1. *Acquisition and rotation of materials*—(*a*) *Cost of purchased materials.*—Strategic materials acquisitions are:

OBLIGATIONS [In millions]

Description	*1956 actual*	*1957 estimate*	*1958 estimate*
a. Open market purchases	$108.4	$96.2	$68.4
b. Purchases of materials under Commodity Credit Corporation barter operations	59.4	36.3	105.4
c. Purchases of materials under Defense Production Act expansion programs	61.0	88.1	71.4
Total	228.8	220.6	245.2

Based on existing stockpile objectives, and the proposed budget, the status of procurement on June 30, 1958, of the 75 materials on the stockpile list is expected to be as follows:

NUMBER OF MATERIALS

	Minimum objective	*Long-term objective*
Percent procurement completed:		
100	51	16
90 to 99	5	5
75 to 89	6	9
50 to 74	5	12
25 to 49	3	7
Under 25	2	4
Total	[1] 72	53

[1] 3 materials have no minimum objective.

(*b*) *Expenses for donated materials.*—In addition to direct procurement, materials are acquired by free transfer from programs of other agencies such as the International Cooperation Administration. During 1957 and 1958 the value of these transfers will amount to approximately $29.6 million, and will require expenditures of about $1 million from this appropriation for transportation, handling, and other accessorial costs.

(*c*) *Cost of rotated materials.*—Inventories of such materials as rubber, fibers, and oils are rotated periodically to keep the inventory in prime condition. The volume and cost of this program is expected to remain about the same in 1957 and 1958 as for 1956 as shown in the following table:

Description	*1956 actual*	*1957 estimate*	*1958 estimate*
Gross replacement cost of materials rotated	$90,104,677	$86,955,000	$87,847,000
Receipts from sales of materials rotated	83,080,776	76,655,000	77,447,000
Net cost to appropriation	7,023,901	10,300,000	10,400,000

(*d*) *Operating expenses.*—Increases totaling $88,000 are being requested to provide for more adequate supervision and for rotation and disposal of materials.

2. *Custody of materials.*—Covers handling, storage, and physical inventory of materials delivered to the stockpile. Value of deliveries during 1957 and 1958, including donated materials, is expected to total $432.2 million and $314.4 million, respectively. This will increase the value of materials in storage against stockpile goals from $5,942 million on June 30, 1956, to $6,688.6 million on June 30, 1958.

(*a*) *Storage and handling.*—As of June 30, 1956, strategic material valued at about $6 billion and weighing about 24 million tons was stored in the national stockpile at 242 sites. It is estimated that an additional $740 million of materials weighing 5 million tons will be in storage by June 30, 1958. Obligations for cost of storage and handling including the acquisition of land at one General Services Administration warehouse site are expected to be:

Type of expense	*1957*		*1958*	
	Units	*Total cost*	*Units*	*Total cost*
National stockpile:				
Storage cost:	(Ton-years)		(Ton-years)	
Open storage	22,965,000	$1,845,345	25,376,000	$1,919,758
Closed storage	2,795,478	6,701,309	2,843,378	7,115,521
Tank storage	285,097	275,346	269,569	210,721
Miscellaneous leases	----------	17,000	----------	17,000
Nonrecurring cost	----------	3,947,118	----------	2,977,000
Total storage	26,045,575	12,786,118	28,488,947	12,240,000
Handling cost:	(Short tons)		(Short tons)	
New acquisitions	2,595,722	1,840,014	2,357,137	1,678,333
Rotation	292,539	648,168	275,300	637,146
Disposal	5,538	3,118	32,538	2,721
Relocation	385,000	340,200	333,000	231,800
Total handling	3,278,799	2,831,500	2,997,975	2,550,000
Relocation transportation	----------	1,424,000	----------	1,156,000
Acquisition of land	----------	----------	----------	68,500
Total national stockpile	----------	17,041,618	----------	16,014,500
United States supplemental stockpile:	(Ton-years)		(Ton-years)	
Open storage	389,300	31,250	825,000	66,500
Closed storage	5,500	13,750	10,600	26,500
Total United States supplemental	394,800	45,000	835,600	93,000
Total storage and handling		17,086,618		16,107,500

(*b*) *Physical inventory of materials.*—Physical inventory of stockpile materials was provided for in the 1957 budget estimates for the first time. This program is underway in several areas. Many cost elements of the initial inventorying cycle will be nonrecurring, so that costs after 1959 are expected to be sharply decreased.

(*c*) *Operating expenses.*—Increases of $248,000 are requested to cover more supervision of these activities, the increased storage volume, and the new physical inventory program.

4. *Administrative operations.*—Increase of $216,100 requested is for new emphasis on physical protection of the stockpile, new functions related to stockpile operations including additional assistance to small business, and additional workload in financial services.

PROGRAM AND PERFORMANCE

Policy direction and coordination of all programs of the Administration are provided by the Administrator with the assistance of a small central office staff. Offices of the 10 regional commissioners provided for from this item in 1957 will be financed in 1958 from the "Administrative operations fund."

PROGRAM AND PERFORMANCE

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Revenue Act of 1943 and Renegotiation Act of 1951. Of the total program estimated at some 4,100 claims with estimated payments of some $50 million, 3,871 claims had been settled through June 30, 1956, with payments of $45.6 million. Of the remaining claims it is hoped that about 70 percent will have been settled by the end of 1958.

Appropriation	710,000	2,000,000	2,000,000

PROGRAM AND PERFORMANCE

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees and costs of advertising and surveying are paid out of receipts, subject to a limit of 12 percent of the proceeds of all dispositions within each fiscal year (68 Stat. 1051). This method of disposal is estimated to produce sales of $20 million in 1957 and $35 million in 1958.

Financing applied to program	6,504	29,600	20,000

PROGRAM AND PERFORMANCE

Rentals received from occupants of sites or improvements thereon acquired for future construction of Federal buildings are used for necessary maintenance, repairs, and alterations. The balance is covered into the Treasury (40 U. S. C. 345). Net income is expected to be $470,000 and $480,000 for 1957 and 1958, respectively, a decline from 1956 due to use of certain properties under the lease-purchase program and disposals as surplus properties.

The relation of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year: Unfilled purchase orders	$100	$400		
Selected resources at start of year (−)		−100	−$400	
Costs financed from obligations of other years, net (−)			−400	
Obligations incurred for costs of other years, net		300

Financing applied to program	3,303,409	3,127,375	3,152,600

Purpose and financial organization.—Production and sale of abaca fiber is authorized by the Abaca Production Act of 1950 (50 U. S. C. 541), to provide a Western Hemisphere source for the material, which is essential for making rope, in case normal supplies are unavailable during an emergency. Pursuant to Executive Order 10539 the program was transferred July 1, 1954, to General Services Administration from Reconstruction Finance Corporation. Operating deficits of the program through 1958 will be financed from working capital and from proceeds from sales of fiber.

Analysis of budget program.—Highlights of program operations are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
(*a*) Acreage authorized for cultivation	10,000	[1] 10,000	15,000
(*b*) Acreage in standby	5,000	[1] 5,000	0
(*c*) Production—pounds	9,803,000	7,000,000	9,800,000
(*d*) Cost per pound—cents	23.7	35.1	29.2
(*e*) Sales—pounds	23,331,800	7,000,000	9,800,000
(*f*) Sales price per pound—cents	17.2	20.0	20.0
(*g*) Inventory July 1—pounds	1,122,200	1,122,200	1,122,200

[1] 5,000 acres in standby ordered reactivated by ODM as of Jan. 1, 1957.

Production operations are conducted by means of contracts with private firms operating in the Central American countries in which the plantations are located. In Janu-

ABACA FIBER PROGRAM—Continued

Abaca Fiber Program, General Services Administration—Continued

ary 1955, the Office of Defense Mobilization reduced the acreage level from 20,100 to 15,000 of which 5,000 were to be maintained in standby condition. In August 1956, because of improved market conditions and virtual elimination of Central American inventories, and requirement of additional Central American fiber for rotating the stockpile, the Office of Defense Mobilization ordered that the 5,000 acres previously in standby be reactivated as of January 1, 1957. Reactivation of this acreage is expected to result in a savings of about $200,000 in 1958, compared to the cost of maintaining the acreage in standby.

It is estimated that cash production costs will average 35.1 cents per pound harvested during 1957, and 29.2 cents per pound harvested during 1958. Sales price is expected to average 20 cents per pound each year. Loss from operations during 1957 is estimated at $1,571,748, and for 1958 at $1,660,284. This would bring the cumulative loss since 1954 to $8,939,086.

The relation of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Commodities for sale	$4,052,233	$281,788	$394,190	$327,306

PROGRAM AND PERFORMANCE

Guaranties are given on loans made by public or private financing institutions, including Federal Reserve banks, to facilitate performance of defense production contracts. Upon demand of lending institutions the Government is required to purchase the guaranteed percentage of the loan or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses (50 U. S. C., App. 2091).

Guaranties totaling $45.9 million on 6 loans are estimated to be in effect by the end of 1958, compared to $8.1 million and 6 loans on June 30, 1956. Retained earnings are anticipated to be $4.7 million by the end of 1958.

PROGRAM AND PERFORMANCE

This fund finances on a reimbursable basis buildings management activities consisting of: Management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; repair and improvement of Government-owned space in the District of Columbia and adjacent area; repair and improvement of Government-owned buildings outside the District of Columbia managed by General Services Administration; operation of joint-use communication facilities and other related building services (66 Stat. 594). Any surplus resulting from operations, after making provision for prior year losses, if any, is paid into the Treasury as miscellaneous receipts.

Operating costs for 1958 are estimated at $240.7 million, a net increase of $50.5 million over 1957. This net increase is composed of the following items:

Operation and protection of Government-owned space	$12,894,000
Rental, operation, and protection of leased space	7,353,501
Operation and protection of purchase-contract space	564,000
Repair and improvements of Government-owned buildings in District of Columbia area	$10,900,000
Repair and improvements of Government-owned buildings outside District of Columbia (General Services Administration operated)	16,965,000
Moving and alterations	190,000
Operation of communication facilities	700,000
Security guarding	250,000
Job order work	700,000
Total	50,516,501

At the end of 1956 the net investment in the fund was $8 million, composed of $3.5 million appropriated, $4.6 million capitalized assets, less $0.1 million deficit.

The relation of costs to obligations is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Operating supplies and materials	$2,026,543	$2,440,175	$2,400,000	$2,400,000
Work in process	1,528,759	2,861,982	2,900,000	2,900,000
Unfilled purchase orders	7,511,480	7,708,640	10,000,000	13,000,000
Deferred charges	41,040	31,190	31,000	31,000
Total selected resources at end of year	11,107,822	13,041,987	15,331,000	18,331,000
Selected resources at start of year (−)		−11,107,822	−13,041,987	−15,331,000
Increase in selected resources		1,934,165	2,289,013	3,000,000
Property or services transferred in (−) without charge, net		−294,585		
Obligations incurred for costs of other years, net		1,639,580	2,289,013	3,000,000

Increase of $3,000,000 in unfilled purchase orders in 1958 over 1957 is due to increase in volume of business, particularly with respect to the repair and improvement program.

PROGRAM AND PERFORMANCE

Work performed in acquisition of Federal building sites, preparation of drawings and specifications for the construction, remodeling, renovation, repair, and improvement of buildings, and supervision of construction activities are financed through reimbursement from funds appropriated, transferred, or advanced to the General Services Administration (40 U. S. C. 296).

Increase in the service activity of the fund for 1957 and 1958 is to provide for expansion in construction, repair, and improvement activities principally in connection with General Services Administration's lease-purchase and expanded repair and improvement programs and numerous large construction projects assigned to General Services Administration by other Federal agencies.

The surplus in the fund as of June 30, 1956, amounted to $129,342. This surplus will be written off by reducing charges to individual projects and programs during 1957 and 1958.

The relation of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:

PROGRAM AND PERFORMANCE

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. The fund sells the supplies or services at cost to other agencies and the District of Columbia. Expenses for operating the fund for these purposes are provided for under the appropriation "Expenses, supply distribution."

Also financed by the fund and reimbursed by the using agencies are operations of interagency motor equipment pools established in areas of high vehicle density.

The estimate for 1958 provides for continued expansion in sales of both stores items and nonstores items to the military establishments under the Administration's program for progressively expanding use of these supply facilities by Department of Defense. Activation of additional interagency motor equipment pools programed for 1958 is expected to produce substantial increase in sales of services and result in elimination of some 900 vehicles from agencies' fleets.

Actual goods and services delivered during 1956, and estimated for 1957 and 1958, follows:

[In thousands]

	1956 actual	*1957 estimate*	*1958 estimate*
Stores items (including fuel)	$101,514	$116,500	$150,000
Nonstores items	54,276	60,000	81,000
Motor equipment pool and miscellaneous sales	4,302	5,000	8,000
Total	160,092	181,500	239,000

Current investment of the U. S. Government in the fund is $64.9 million, of which $62 million represents direct appropriations, $1.4 million donated assets, and retained earnings of $1.5 million. Programed increase in sales volumes during 1957 is expected to exceed the foregoing estimate of $181.5 million by $18.5 million. This will necessitate additional capital in 1957 for inventory and financing of $10 million, which is included in the budget as a supplemental proposed for later transmission. Continued expansion in sales and improvement of service to customer agencies as programed for 1958 will also require a further increase of $25 million in capital which is provided for in this estimate.

Additional donated assets arising from transfers of motor vehicles from other agencies upon establishment of interagency motor equipment pools will be capitalized in the fund.

Any operating surplus, as determined by General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Earnings from prior years' operations amounting to $1,515,010 have been returned to the Treasury in 1957.

The relation of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Commodities for sale	$26,724,945	$30,214,290	$35,500,000	$48,900,000
Unfilled purchase orders	37,649,580	42,138,792	52,138,792	68,138,792
Deferred charges	775	2,945		
Total selected resources at end of year	64,375,300	72,356,027	87,638,792	117,038,792
Selected resources at start of year (−)		−64,375,300	−72,356,027	−87,638,792
Obligations incurred for costs of other years, net		7,980,727	15,282,765	29,400,000

The 1958 increase of $29.4 million in selected resources consists of $13.4 million of stores inventory and $16 million of undelivered orders to maintain a proper stock turn at accelerated sales level.

Financing applied to program	1,283,695	1,365,996	1,428,000

PROGRAM AND PERFORMANCE

This fund was established August 10, 1955, to account for expenses incurred rendering foreign aid procurement services to the International Cooperation Administration. Earnings credited to this fund are derived from mutually agreed upon advances based on program workload received.

The relation of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year: Unfilled purchase orders	----	$504	$500	$500
Selected resources at start of year (−)	----	----	−504	−500
Costs financed from obligations of other years, net (−)	----	----	−4	-----
Obligations incurred for costs of other years, net	-----	504	-----	-----

CONDENSED STATEMENT OF INCOME AND EXPENSE AND FINANCIAL CONDITION

	1956 actual	1957 estimate	1958 estimate
Income: Overhead charges	$1,927,138	$1,000,000	$1,750,000
Expense: Administrative	1,277,511	1,366,000	1,428,000
Net operating income or loss (−)	649,627	−366,000	322,000
Nonoperating loss (−)	−5,680		
Net income or loss (−) for the year	643,947	−366,000	322,000
Analysis of retained earnings:			
Balance at beginning of year		643,947	277,947
Balance at end of year	643,947	277,947	599,947
Assets:

GENERAL ACTIVITIES

Administrative Operations Fund, General Services Administration

Administrative operations fund: Funds available to General Services Administration for administrative operations, in support of program activities, shall be expended and accounted for, as a whole, through a single fund, which is hereby authorized: *Provided*, That costs and obligations for such administrative operations for the respective program activities shall be accounted for in accordance with systems approved by the General Accounting Office: *Provided further*, That the total amount deposited into said account for the fiscal year [1957] *1958* from funds made available to General Services Administration in this Act shall not exceed [$9,540,375] *$11,600,000*, of which not to exceed [$137,700] *$230,000* may be used for travel expenses: *Provided further*, That amounts deposited into said account for administrative operations for each program shall not exceed the amounts included in the respective program appropriations for such purposes. (*Independent Offices Appropriation Act, 1957.*)

OPERATIONS AND FINANCING

	1956 actual	1957 estimate	1958 estimate
Operations by activities:			
1. Financial services	$6,919,730	$7,624,600	$8,752,000
2. Planning and agency services	907,937	992,400	1,299,000
3. Administrative services	2,369,511	2,501,700	2,939,000
4. Legal services	769,366	848,300	1,010,000
Total obligations	10,966,544	11,967,000	14,000,000
Financing:			
Advances and reimbursements	10,966,544	11,967,000	14,000,000

NOTE.—Data for 1956 is shown here for comparative purposes only. The 1957 amount of $11,967,000 includes $196,500 from "Salaries and expenses, Office of Administrator, General Services Administration," for comparative purposes only.

PROGRAM AND PERFORMANCE

Financial, administrative, legal, and planning services required to support all programs of the Administration are provided by the integrated staff organization of General Services Administration. They are initially financed from an "Administrative operations fund" into which the various benefiting appropriations and funds make deposits for their share of the obligations incurred. Of the total amount deposited in the fund during a fiscal year, the amount from appropriations made available to General Services Administration in the annual act for the

Federal Reserve Bank of St. Louis

year is subject to a limitation. Deposits from other sources are not covered in the limitation as the scope of programs and supporting workload is seldom precisely known in advance. Estimated amounts available for 1958 and their sources, with comparable data for 1956 and 1957, are:

	1956 comparable	*1957 estimate*	*1958 estimate*
Included in limitation:			
Operating expenses, Public Buildings Service	$3,042,321	$3,293,700	$3,980,500
Repair and improvement	465,999	602,550	973,000
Sites and expenses, purchase contract projects	78,569	141,000	164,000
Operating expenses, Federal Supply Service	486,037	608,400	693,000
Expenses, supply distribution	2,688,595	2,990,000	3,561,000
Operating expenses, National Archives and Records Service	369,180	380,450	412,000
Operating expenses, Transportation and Public Utilities Service	184,506	202,900	253,000
Strategic and critical materials	1,354,507	1,313,900	1,530,000
Administrative expenses, abaca fiber program	55,917	43,000	33,500
Total included in limitation	8,725,631	9,575,900	11,600,000
Excluded from limitation:			
Expansion of defense production	1,364,471	1,523,400	1,483,000
Buildings management fund	477,812	477,300	501,000
Construction services	158,400	165,500	175,000
Advances and reimbursements, personal property activities:			
Federal Civil Defense Administration	17,027	20,500	21,500
Expenses, supply distribution	11,676	8,700	9,000
Administrative expenses, foreign aid procurements	167,071	152,000	161,000
Administrative operations	10,900	----------	----------
Other advances and reimbursements: Commodity Credit Corporation fund, not shown in this chapter	33,556	43,700	46,500
Total excluded from limitation	2,240,913	2,391,100	2,400,000
Grand total	10,966,544	11,967,000	14,000,000

The budget for the Administration contemplates substantial increases in many programs which will require increases in supporting administrative operations and certain understaffed operations to provide more adequate support.

PROGRAM AND PERFORMANCE

A central blueprinting, photostating, duplicating, and distribution service is financed by a working capital fund pending reimbursements (40 U. S. C. 293). Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1956, a total of $40,455 had been deposited, and it is estimated that $5 and $600 will be deposited in 1957 and 1958, respectively.

The relation of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

	1955 actual	*1956 actual*	*1957 estimate*	*1958 estimate*
Selected resources at end of year (inventories and items on order):				
Stock	$40,195	$50,113	$60,413	$71,313

GENERAL PROVISIONS

The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

[The Administrator is authorized, without regard to the Classification Act of 1949, as amended, to place ten positions, in addition to those otherwise authorized, in grade GS–16 in the General Schedule established by said Act, and the salary of the Comptroller shall be at the salary rate of grade GS–18 so long as such position is occupied by the present incumbent.] (*Independent Offices Appropriation Act, 1957.*)

PROPOSED FOR LATER TRANSMISSION

Operating expenses, Public Buildings Service, General Services Administration (under existing legislation, 1957).—It is estimated that an additional $2,450,000 will be required for increases in wage board rates during 1957 and for the rental of space currently occupied by tenant agencies in excess of that financed by funds available for the purpose during 1957.

BUDGET AUTHORIZATIONS, EXPENDITURES AND BALANCES

Obligated balance carried forward		150,000	
Total expenditures and balances		2,450,000	150,000

Sites and expenses, purchase contract projects, General Services Administration (under existing legislation, 1957).—Since the start of fiscal year 1957, final approval of a large number of projects has accelerated this program. A supplemental appropriation estimated at $10 million will permit some advancement in acquiring sites, contracting for plans, and other expenses.

BUDGET AUTHORIZATIONS, EXPENDITURES AND BALANCES

General supply fund, General Services Administration (under existing legislation, 1957).—Continued expansion of the sales and motor pool programs and necessity for reducing the stock-turn ratio require an increase in appropriated capital of the supply fund estimated at $35 million by the end of 1958. In addition to the $25 million included in the budget for 1958, a supplemental estimate for 1957 of $10 million will be necessary.

CURRENT AUTHORIZATIONS

The Housing and Home Finance Agency administers the major housing and community development activities of the Federal Government through (1) the Office of the Administrator; (2) the Federal Housing Administration; (3) the Public Housing Administration; (4) the Federal National Mortgage Association; (5) the Community Facilities Administration; (6) the Urban Renewal Administration; and (7) the Federal Flood Indemnity Administration.

The Administrator, serving as principal housing officer of the Federal Government, is responsible for supervision and coordination of programs and functions of these constituents. In addition to the housing and community development functions and programs assigned to the Agency, the Administrator has been responsible for certain related activities in these fields.

Most of the activities and programs of the Agency are financed from corporate funds. However, certain activities are financed from appropriations, such as: Salaries and expenses, Office of the Administrator; advances for the program of public works planning; capital grants for slum clearance and urban renewal; administrative and program expenses for the Federal Flood Indemnity Administration; salaries and expenses for the low-rent housing program; and annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects.

OFFICE OF THE ADMINISTRATOR

Salaries and Expenses, Office of the Administrator, Housing and Home Finance Agency

Salaries and expenses: For necessary expenses of the Office of the Administrator, including rent in the District of Columbia; purchase of one passenger motor vehicle, for replacement only; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed [$340,000] *$495,000* for expenses of travel; and expenses of attendance at meetings of organizations concerned with the work of the Agency; [$6,225,000] *$7,925,000*: *Provided*, That necessary expenses of inspections and of providing representatives at the site of projects being planned or undertaken by local public agencies pursuant to title I of the Housing Act of 1949, as amended, projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, as amended, and projects and facilities financed by loans to public agencies pursuant to title II of the Housing Amendments of 1955, as amended, shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions, or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made, but such nonadministrative expenses shall not exceed [$1,100,000] *$2,000,000*. (*5 U. S. C. 133y–16; 42 U. S. C. 1451; 12 U. S. C. 1749; Independent Offices Appropriation Act, 1957.*)

Appropriation	5,398,500	6,225,000	7,925,000

PROGRAM AND PERFORMANCE

The Administrator supervises and coordinates the housing programs and functions of the Agency. He is also responsible for several activities which are administered by the constituents of the Agency under delegations of authority from the Administrator. These include: Slum clearance and urban renewal which has been delegated to the Urban Renewal Commissioner; the programs of public works planning, college housing loans, public facility loans, and certain liquidating activities which have been delegated to the Community Facilities Commissioner; and the management and disposition of publicly financed war and veteran housing construction under the Lanham and related acts which have been delegated to the Public Housing Commissioner. The Administrator serves as chairman of the board of directors of the Federal National Mortgage Association. He also serves as Chairman of the National Voluntary Mortgage Credit Extension Committee and provides staff assistance to the national committee and to 15 regional committees through which the voluntary home mortgage credit program operates.

The appropriation requested for 1958 is $7,925,000. This amount is an increase of $1.7 million compared with the total amount available for 1957. The larger appropriation stems from new program activities authorized by the Housing Acts of 1954, 1955, and 1956 and expansion of existing programs, principally in the urban renewal field.

2. *Consolidated compliance activities.*—Provision is made for the consolidated investigation and compliance staff to serve the entire Agency.

3. *Voluntary home mortgage credit.*—The program to facilitate the flow of funds for Federal Housing Administration insured and Veterans Administration guaranteed home mortgage loans into areas of shortage and for minority housing financing will expire June 30, 1957. Legislation to renew this program will be requested and estimates for staff expenses are provided under proposed for later transmission.

4. *Community disposition activities.*—For detail of this activity, see community disposal operations fund under revolving and management funds.

5. (*a*), (*b*), (*c*), (*d*).—For detail of activities of these programs, see revolving and management funds.

(*e*) *School construction.*—The Housing and Home Finance Administrator, under a working agreement with the Commissioner of Education, performs certain technical services in connection with the program of school construction. Funds appropriated to the Office of Education are transferred to the Administrator for this purpose.

(*f*) *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of

college housing, public facility and defense community facilities projects. The costs of these activities are recovered by the Government through fees.

6. (*a*) *Urban renewal activities.*—For detail of activities for this program, see urban renewal fund under revolving and management funds.

(*b*) *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of slum clearance and urban renewal projects being planned or undertaken by local public agencies, including audit of relocation payments made to displaced families and businesses. The costs of these activities are recovered by the Government through fees.

PROGRAM AND PERFORMANCE

Under Defense Mobilization Order 1–14, dated November 26, 1954, and supplementary assignments from the Director, Office of Defense Mobilization, there had been delegated to the Housing and Home Finance Administrator certain functions and responsibilities in the development and administration of defense mobilization preparedness measures.

The budget program for 1958 provides for the performance of these functions by the Office of the Administrator and the several constituents of the Housing and Home Finance Agency.

PROGRAM AND PERFORMANCE

The Housing Act of 1954 authorized $5 million in matching grants to State, metropolitan, or regional planning agencies to help finance surveys, land-use studies, and urban renewal plans in small cities and metropolitan or regional areas. The Housing Act of 1956 increased the authorization for appropriations to $10 million. An aggregate of $4.5 million has been appropriated to date and the budget program contemplates the appropriation of an additional $1.5 million.

An estimated 173 projects will be approved by the end of 1958, of which 65 will have been completed.

Operations, College Housing Loans Fund, Office of the Administrator, Housing and Home Finance Agency

The college housing program provides for loans at low interest rates to finance housing and related facilities. The program is financed by a Treasury borrowing authorization limited by the basic legislation in the Housing Act of 1950 to $300 million, but increased to $500 million by the Housing Amendments of 1955, and to $750 million by the Housing Act of 1956. Not to exceed $100 million of the current authorization is available for related facilities such as dining halls, student unions and infirmaries. The interest rate on loans was fixed by the Housing Amendments of 1955 at the higher of 2.75 or 0.25 percent above the average rate on the outstanding Federal debt.

Budget program.—As a result of the rapid growth in population of college age and increasing college enrollments, educational institutions have been strained to meet financial demands for faculty salaries and for classroom and laboratory space. This program is assisting many institutions in meeting needs for dormitories and related facilities. Projects are largely self-liquidating by reason of the low debt service achieved by the long amortization period and modest interest rates. With the statutory reduction in interest rate to 2.75 percent in the fall of 1955, the program became attractive to large public institutions which had previously relied on other sources, and 389 applications were received in 1956 as compared with 460 in the preceding 4 years.

The cumulative workload effects of the large number of projects initiated in 1956 will be felt in the current and budget years. Preliminary applications are filed to determine eligibility and feasibility before detailed physical and financial planning are undertaken. If approved, a fund reservation is issued effectively committing funds to assure availability on satisfactory completion of a full application. Reservations are converted to legal loan commitments after an average interval of about 6 months for preparation and review of full applications.

A program level of $250 million in net new reservations of funds is estimated for each of the years 1957 and 1958. This program will require legislation to increase the present authorization by $175 million in 1958.

Activity at the several program stages is estimated as follows:

[Dollars in millions]

Approved	120	285	285
Financial support:			
Net new reservations	$248.2	$249.6	$249.5
Loan contracts executed	$81.0	$252.0	$289.0
Disbursements	$33.5	$85.5	$148

Following loan approval, a period of 15 to 27 months may occur before the structure is ready for occupancy and permanently financed. During this period the project will pass through the following stages which serve as check points to protect the Government's interest: (1) Completion of detailed plans and specifications and award of contracts and their approval; (2) construction and periodic inspection and audit, the latter financed with fees charged the borrower; (3) preparation, advertising and award of bonds and approval of the underlying indenture; and (4) initiation of such limited loan service as is necessary to assure proper accounting and observance of the loan contract, and reports to identify the occasional problems which may arise. Most institutions, with the assistance of the Federal loan contract, are able to secure construction financing so that loan disbursements occur at bond purchase when the project reaches substantial completion.

The increasing number of projects passing through these stages is estimated as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Construction starts	88	173	294
Substantial completions, bond purchases, and initial loan service	62	90	165
Under construction at year end	144	226	415
(Includes substantially completed contracts unready for final settlement)	(59)	(58)	(118)

Administrative expenses are estimated at $1.7 million in 1958, an increase of $600,000 above the current year.

Financing the budget program.—As measured at the fund reservation stage, net effective new commitments reach approximately $250 million in each year, and are met for the most part by additions to the borrowing authority. Final loan contracts executed increase from $81 million in the past year to $252 million and then to $289 million

in the budget year. Disbursements for bond purchases are estimated at $85.5 million in the current year and $148 million in 1958. Treasury borrowings and budgetary expenditures closely parallel the latter figures.

Operating results and financial condition.—The margin between interest paid to the Treasury and collected from borrowers now amounts to an average of 0.5 percent, and is decreasing with the disbursement of loans carrying only 0.25 percent margin in accordance with the formula in the housing amendments of 1955. While the dollar margin in 1958 is estimated at $800,000, this is outweighed by $1.7 million in administrative and servicing costs.

Current operating deficits (estimated at $2.4 million at the end of 1958) are considered inevitable during the years when new business is being written in large volume, with resulting high administrative costs, while the portfolio of earning assets is still relatively low. As the bond portfolio expands earnings will come into balance with current costs, and eventually a substantial net income should be realized each year. Accordingly, no action appears to be required in connection with the deficit at this time.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

Operations, Public Facility Loans, Office of the Administrator, Housing and Home Finance Agency

Loans to States and municipalities for essential public works or facilities are made under the authorization in title II of the Housing Amendments of 1955. Small governmental units of less than 10,000 population have a statutory priority, and loans are restricted to a maximum 40-year term and to applicants unable to obtain funds from other sources at reasonable rates. The program is financed by a Treasury borrowing authorization of $100 million.

Budget program.—Applications to date have been primarily to finance water and sewer needs stemming from the backlog caused by low levels of construction during the war years, the expansion of requirements due to increases in population, housing and industrial facilities, and from the pressure to alleviate stream pollution. Nearly 90 percent of the demand has come from communities of less than 5,000 population. The average size of applications has been increasing from the $180,000 level of 1956, and $200,000 is the assumed average for the remainder of the budget period. Actual and estimated activity in this program is as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Full applications received	40	85	110
Net loans approved:			
Number	10	78	96
Amount (in thousands)	$704	$15,600	$19,200

Administrative expenses are estimated at $490,000 for the budget year.

Financing the budget program.—Total loans and obligations against the borrowing authorization on June 30, 1958, are estimated at $35.9 million, leaving $64.1 million plus future earnings and repayments to finance further loans. Due to the lag of as much as 21 months between loan approvals and final loan disbursements, actual cumulative borrowings on the same date are estimated at $18.5 million. Disbursements are also reduced when loans are taken by private investors after project and fiscal plans have been developed with Agency assistance. Cancellations of commitments incident to such private financing are estimated at $0.8 million in 1957 and $1.2 million in 1958.

Net budget expenditures will rise in line with loan disbursements from $2.8 million in 1957 to $14.9 million in 1958.

Operating results and financial condition.—The only source of income is the net margin of approximately 1.25 percent between the interest received on loans and that paid to the Treasury. After establishing reserves for possible future losses at the rate of 1 percent of loan disbursements, the net loss for the year is estimated at $491,550, and the cumulative deficit for June 30, 1958, at nearly $1 million. After the portfolio has reached substantial size, net earnings can be expected to eliminate this deficit.

Operations, Public Facility Loans, Reconstruction Finance Program, Office of the Administrator, Housing and Home Finance Agency

Title II of the Housing Amendments of 1955 ended this program of similar purpose under section 108 of the Reconstruction Finance Corporation Liquidation Act, except as to applications filed prior to the effective date of the new act. Since no loan commitments had been made under the limited appropriation for this section, the applications in process were transferred to the new program to avoid administrative complications. The Independent Offices Appropriation Act, 1957, canceled the appropriation authorization under this section, rescinded the un-

ANALYSIS OF TRANSFERS TO FUND

Obligations incurred during the year (transfers to fund out of current authorizations)	$3,000,000	$7,500,000	$6,000,000

Public Works Planning Fund, Office of the Administrator, Housing and Home Finance Agency

The Housing Act of 1954 authorized a program of interest-free advances to State and local public agencies for the planning of local public works. As amended by the Housing Amendments of 1955, the program is financed by a revolving fund to which appropriations are authorized by steps totaling $48 million by the beginning of 1959, and subsequent maintenance of the fund at this level in undisbursed balances and outstanding active advances. Repayment of advances is required when construction begins. Of the cumulative statutory authorization of $22 million through 1957, a total of $12 million has been appropriated, and an additional appropriation of $6 million is requested to support estimated advances and outstanding commitments through 1958.

Budget program.—The program is intended to further a constant high level of public works construction by financing a reserve of well planned public works. Eligible applicants include any State or local government with the legal authority to request advances, undertake planning, and to finance and construct the facility to be planned. Statutory limitation of advances to projects to be constructed within a reasonable period of time is implemented by requiring assurance that construction is expected to begin within 3 to 5 years. While preliminary planning has been emphasized to spread available funds as far as possible, there has been increasing demand for final planning including detailed plans and specifications. Since the liberalization and expansion of the program at the beginning of 1956, the rate at which applications are received has been increasing steadily.

Actual and estimated applications and financial commitments are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Applications	194	490	600
Approvals	80	365	497
Plans completed	17	175	459
Amount of advances approved, net (millions)	$1.6	$7.5	$9.6
Amount disbursed (millions)	$0.1	$2.1	$8.7

Completion and approval of plans is expected to require on the average 6 months, followed shortly thereafter by final disbursements. Construction starts and repayments are assumed to occur in 10 percent of the cases during the first year after plan completion, with 20 percent additional in the second year, and the remainder over the following 3 years.

Water, sewer, and educational facilities comprised 70 percent of the applications filed in 1956. Local governments of less than 10,000 population accounted for 59 percent of the applications, and those between 10,000 and 50,000 population for another 32 percent.

Administrative expenses, estimated at $505,000 for 1958, are included in the appropriation for "Salaries and expenses, Office of the Administrator."

Financing the budget program.—An appropriation of $6 million is requested for 1958. Net budget expenditures rise from $2.1 million in the current year to $8.5 million in 1958 in line with the total disbursements of advances. Repayments will not have an important effect until 1959.

Operating results and financial condition.—Since the planning advances are interest free except as to repayments delayed after construction starts, the program has virtually no income. The objective is to encourage sound and essential planning, but in recognition of the certainty that local objectives will change in some instances, a 5-percent allowance for losses is made, and this allowance, amounting to $424,500 in 1958, is reflected as the net loss for the year.

Urban Renewal Fund, Office of the Administrator, Housing and Home Finance Agency

The Housing Act of 1949, as amended by the Housing Act of 1954, authorized Federal assistance to local governments for acquisition, clearance and redevelopment of slums and blighted areas, and for conservation and rehabilitation of larger areas not requiring clearance action. A Treasury borrowing authorization of $1 billion is provided for planning advances and loans. In addition, contracts for Federal capital grants defraying two-thirds of net project costs are authorized, first limited to $500 million, but enlarged in the later act by $200 million in 1956, $200 million in 1957, and an additional $100 million available at the discretion of the President.

Budget program.—As a condition precedent to Federal assistance, a community is required, by the statute, to develop a workable program to eliminate blight and achieve a stable well-planned community with well-organized neighborhoods. The Administrator's certification of the workable program is limited to 1 year, and annual recertification based on demonstrated satisfactory progress is required for continued eligibility for Federal assistance. The budget program projects the following activity.

	1956 actual	*1957 estimate*	*1958 estimate*
Workable program certifications	53	170	260
Recertifications	17	97	260

Project planning.—Workable program certifications considerably exceed the number of new urban renewal projects entering the planning stage because the Housing Act of 1956 requires such programs as a prerequisite for obtaining new annual contributions contracts for low-rent housing. Urban renewal project planning involves local study and mapping of blighted areas, and following Agency approval of preliminary plans, preparation of detailed plans for acquisition and clearance of the worst slum pockets, rehabilitation of less acutely affected areas, improvement of public facilities, and relocation of occupant families. Final project plans provide the basis for Federal loan and grant contracts. Since the project planning period tends to extend over a period of several years, assurance of sufficient grant funds at the completion of the task is given by making reservations of capital grant funds at the inception of the period. Actual and estimated activity in this stage is as follows:

[Dollars in thousands]

	1956 actual	*1957 estimate*	*1958 estimate*
Projects in planning stage:			
Approved during year	99	100	120
Terminated during year	19	20	5
Completed and entering execution	27	80	120
Active, end of year	251	251	246
Financial support:			
Planning advances approved	$8,533	$10,000	$12,000
Planning advances disbursed	$3,450	$8,000	$9,000
Capital grant reservations issued (net)	$212,344	$242,291	[1] $250,000

[1] Proposed legislation.

Project execution.—When planning is completed, the Government enters into a contract with the local public agency to provide the Federal loans and grants required to finance the project. Land is then acquired, families and businesses relocated, rehabilitation programs started, the site cleared and site improvements constructed. Initial financing is obtained through direct short-term Federal loans or, more typically, through private borrowings secured by pledge of the Federal loan commitment. These loans are retired as definitive project financing is obtained from payment of Federal capital grants, local grants and proceeds from the sale of the cleared land. Federal grants cover two-thirds of net project costs and are disbursed at various stages of partial project completion. Forty-year definitive Federal loans may be made to finance the disposal of land through long-term leases. Additional Federal grants are paid for (1) full Federal reimbursement authorized by the Housing Act of 1956 of relocation payments of up to $100 per family and $2,000 per business displaced by urban renewal projects and for (2) two-thirds of the cost of demonstration projects designed to develop, test and report new techniques for preventing or eliminating blight.

Actual and estimated program activity at the project execution stage is as follows:

[Dollars in thousands]

	1956 actual	*1957 estimate*	*1958 estimate*
Projects in execution:			
Approved for execution during year	27	80	120
Completed during year	* 1	15	25
Active, end of year	125	190	285
Federal grants:			
Contracts executed	$38,806	$161,250	$241,650
Disbursements	$13,581	$40,001	$50,500
Loan financing:			
Temporary loan commitments	$74,725	$180,000	$270,000
Definitive loan commitments	-------	$10,000	$15,000
Direct loans outstanding, end of year	$31,938	$37,938	$32,938
Guaranteed private loans outstanding, end of year	$49,484	$84,484	$134,484

Outstanding Federal loans remain relatively constant even though outstanding loan commitments rise by $141 million in the current year and $217 million in 1958. Three factors account for this situation: (1) generally low expenditures during early execution for the large numbers of new local projects entering this stage; (2) a projected increase of $85 million in outstanding non-Federal guaranteed loans during the 2 years; and (3) substantial repayments from project funds due to land disposal and Federal and local grants. Net budget expenditures, estimated at $45 million in 1958, closely parallel Federal grant payments.

Administrative expenses in the amount of $5,734,000 are included in the estimate of expenses for the Office of the Administrator.

Operating results and financial condition.—Net income or loss under this program is determined by the comparative amounts of net interest earnings and increases in the allowance for losses on planning advances not expected to result in the initiation of projects and consequent repayment. Interest earnings will be about $300,000 per year, and it is present judgment that the reserves need be increased by only $150,000 during the 2 years. Hence the cumulative deficit is expected to decline to less than $700,000 by the close of the budget year. This figure excludes cumulative subsidy-type expenditures totaling $157 million for capital grants and nearly $22 million for administrative costs through that date.

The net investment of the U. S. Government is estimated at $47.3 million at the end of 1958.

Revolving Fund (Liquidating Programs)

Revolving Fund (Liquidating Programs), Office of the Administrator, Housing and Home Finance Agency

The Independent Offices Appropriation Act, 1955, established a single revolving fund for more efficient liquidation of remaining assets under the following programs: War public works (42 U. S. C. 1531–1534); defense housing and community facilities (42 U. S. C. 1591); first and second advance planning (50 U. S. C. 167 and 40 U. S. C. 451); loans for prefabricated housing (12 U. S. C. 1701g); Alaska housing (48 U. S. C. 484); subsistence homesteads and greentowns (40 U. S. C. 40 and 49 Stat. 115); and public war and veterans' reuse housing (42 U. S. C. 1521).

Budget program.—The budget program assumes the disposition by the end of 1958 of virtually all of the real property, chiefly defense and emergency housing, once held under these programs. Proceeds from disposition will consist in the main of mortgage loan notes rather than cash. The major source of receipts to the fund in 1958 will be collections of principal and interest on outstanding loans. Actual and estimated program receipts are as follows:

[In thousands]

	1956 actual	*1957 estimate*	*1958 estimate*
Sale of real property:			
Cash	$18,643	$7,634	$1,716
Mortgage loan notes	54,075	54,212	13,336
Net income from management of real property	8,663	2,961	210
Loans, advances, and mortgages:			
Repayments	10,937	12,857	13,753
Interest and other income	6,143	8,247	9,670

Of the 47,895 units of war and emergency housing remaining on hand at the end of 1956, the budget contemplates disposition of 41,132 units in 1957 and the remaining 6,763 units in 1958. Approximately 57 percent of the total represents sales of permanent housing. The remainder consists of demolition, removal and sales of temporary projects and transfers of projects to local governments and other agencies.

Outstanding loans, mortgages, and contingent planning advances are estimated at $221 million at the end of 1958, approximately the same level as at the end of 1957 since collections during 1958 are offset by additional purchase money mortgages acquired in the sale of real property. The portfolio will be composed of $182 million in mortgages for which servicing is generally uncomplicated and economical, and $27 million in contingent planning advances and $12 million in other loans which will require much more attention.

Administrative expenses.—The 1958 estimate of $1,940,000 for administrative expenses is $225,000 below that for the current year.

Operating results and financial condition.—Although realization from liquidation is substantial, heavy book losses are sustained in each of the 3 years in disposal of real property, largely due to temporary or demountable housing projects which must be demolished or sold for off-site use. In view of the recognized liquidating character of the fund, no action is required with respect to the estimated $448 million cumulative deficit at the close of 1958.

The original investment in these programs totaled almost $2.5 billion. By the close of 1958 it is estimated that over $674 million will have been recovered by operations and disposition and returned to the Treasury; property costing $370 million will have been transferred to other agencies and programs, chiefly the Department of Defense; and funds and property aggregating $762 million will have been donated or relinquished to local governments in accordance with various statutes. Repayments to Treasury of $45 million and $22 million are estimated for 1957 and 1958, respectively. There will remain on hand about $233 million in assets, a large proportion of which will be subsequently liquidated and returned to the Treasury.

A. STATEMENT OF SOURCES AND APPLICATION OF FUNDS

	1956 actual	1957 estimate	1958 estimate
FUNDS APPLIED			
To operations:			
Loans and investments:			
Loans to local governments		$49,000	
Expense	$557,510	502,400	$411,490

Community Disposal Operations

Community Disposal Operations Fund, Office of the Administrator, Housing and Home Finance Agency

The Atomic Energy Community Act of 1955, as amended, authorized the sale of all buildings and land in Oak Ridge, Tenn., and Richland, Wash., except that which the Atomic Energy Commission retains for its own use or transfers for public use. Executive Order 10657 transferred to the Housing and Home Finance Agency the functions, duties, and responsibilities of the Atomic Energy Commission in the sale of more than 10,500 parcels of residential and commercial property with an appraised value of $83.9 million. These sales, incidental costs, and expenses are financed through the revolving fund established by the Atomic Energy Community Act of 1955, as amended.

Budget program.—Under the terms of the act it is believed that 20 percent of the nonresidential property can be sold in the current year and an equal amount in 1958; that 40 percent of the residential property at Oak Ridge can be sold in 1957 and 40 percent in the budget year and that a later start at Richland will hold current year disposals to 5 percent, and 45 percent in 1958. This will produce the following disposal activity:

[Dollars in thousands]

	Fiscal year 1957		*Fiscal year 1958*	
	Number	*Appraised value*	*Number*	*Appraised value*
Single-family and duplex houses	1,989	$11,702	3,901	$28,822
Vacant residential lots	543	594	445	393
Commercial property	41	3,223	73	6,096
Total	2,573	15,519	4,419	35,311

The appraised values above are shown as the measure of Housing and Home Finance Agency accountability. During 1956, $96,637 was realized by the Atomic Energy Commission under section 57 of the act from sale of lots leased with privilege of purchase at specific prices, and the proceeds transferred to the Housing and Home Finance Agency to defray costs of planning and organizing the general disposal program.

The act provides for Federal Housing Administration mortgage insurance to assist in private financing. Government financing is authorized when such funds are not available. Priority purchasers of single-family and duplex dwellings, if unable to meet the 10-percent downpayment requirement, may enter into deferred purchase contracts allowing up to 3 years to accumulate the necessary equity.

Under current credit conditions, this budget assumes a substantial proportion of Government financing. Specifically, the estimates follow experience with early sales offerings indicating: (1) single-family and duplex dwellings will be sold in 15 percent of the cases for cash (including private financing), 80 percent with purchase money mortgages bearing 5½ percent interest, and the remaining 5 percent under installment sales contracts at 6 percent interest; (2) commercial properties will produce cash in 20 percent of the cases, and Government financing at 6 percent interest for 90 percent of the sales price in the remainder; and (3) vacant residential lots will be sold for cash.

Sales proceeds in 1958, under these assumptions, are estimated at $6.8 million in cash and $22.8 million in mortgages and 3-year sales contracts. An estimated $8 million of the mortgages will be sold in 1958 at a 2-point discount.

The act provides for advances for necessary repairs and improvements to Government-financed residential property, the improvement loan to be included in the mortgage. The budget assumes an average $1,500 loan in 50 percent of the eligible residential sales, and amounting to $2.3 million in the budget year.

Administrative expenses.—Administrative expenses are estimated to increase from $650,000 in 1957 to $820,000 in the budget year.

REVOLVING AND MANAGEMENT FUNDS—Continued

PUBLIC ENTERPRISE FUNDS—Continued

OFFICE OF THE ADMINISTRATOR—Continued

COMMUNITY DISPOSAL OPERATIONS—Continued

Community Disposal Operations Fund, Office of the Administrator, Housing and Home Finance Agency—Continued

Financing the budget program.—The Housing and Home Finance Agency assumes accountability for properties at their appraised value at the time a sale is concluded. These amounts are estimated at $15.5 million in 1957, and $35.3 million in 1958.

The act prescribes a priority system for achieving the desired disposition with a minimum disturbance to essential continued operations of the facilities. Purchase preference is given to current lessees on commercial and other nonresidential properties, and on residential properties to occupants, other residents, project-connected persons and former residents in that order. The basic sales prices are established at the amounts of Federal Housing Administration appraisals, but priority purchasers of single-family and duplex residences receive certain credits—an automatic 15-percent deduction from the appraised value, and an additional 10-percent deduction if an indemnity provision protecting against the financial hazards of a one-industry town is waived. All priority purchasers may receive further allowances for the appraised value of property improvements made by or paid for by the priority holder.

Statutory allowances are estimated as follows:

	1957 estimate	*1958 estimate*
Priority purchasers, 15 percent	$1,755,250	$4,323,269
Waiver of indemnity, 10 percent	1,053,152	2,593,962
Credit for property improvements	337,405	1,036,747
Total	3,145,807	7,953,978

In 1958, for example, the initial disposal stage for $35.3 million of properties results in the application of $7.9 million in these statutory credits. The sale of $8 million in mortgages causes an estimated loss of $163,450. After declaration of a $14 million liquidating dividend, $26 million in cash and securities are left for subsequent disposition.

Operating results.—At the close of 2 active years of disposition operations, it is expected that slightly more than half of the properties will have passed through the first stage of liquidation. Appraised values of some $51 million will have been converted into $16.8 million in cash—of which $14 million will have been returned to the Treasury as a liquidating dividend—and approximately $23 million of mortgages and contracts held for subsequent conversion to cash. The cumulative loss of $11.9 million will be caused by $11.1 million of statutory credits and $800,000 of organization expenses and discounts on sale of mortgages.

FEDERAL FLOOD INDEMNITY ADMINISTRATION

Investment in Flood Indemnity Operations, Federal Flood Indemnity Administration

The Administrator is authorized to borrow up to $500 million, plus such additional amounts as the President shall approve, from the Secretary of the Treasury in furtherance of the programs enacted in the Federal Flood Insurance Act of 1956. No borrowings have been made to date and none are proposed for the budget year. An appropriation for subsidy contributions and payment for services performed by private organizations and public agencies is included under proposed for later transmission.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Association, operating under the Federal National Mortgage Association Charter Act (12 U. S. C. 1716, et seq.) purchases, manages, and sells residential mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration. Under amendments to the original enactment made by the Housing Act of 1954, the Association's functions are carried out through three programs for which separate accountability is required by statute. These programs—secondary market

REVOLVING AND MANAGEMENT FUNDS—Continued

PUBLIC ENTERPRISE FUNDS—Continued

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Continued

operations, special assistance functions, and management and liquidating functions—are described in the following sections:

SECONDARY MARKET OPERATIONS

Loans for Secondary Market Operations, Federal National Mortgage Association

The secondary market operations were authorized by the Housing Act of 1954 in order to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home financing. Assistance is provided by the purchase and sale of mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration on or after August 2, 1954, of such quality, type, and class as meet generally the purchase standards imposed by private investors. Purchases and sales may be made only at such prices as will prevent excessive use of the Association's facilities and permit the Association to operate on a fully self-supporting basis.

The authorizing statute contemplates that the secondary market operations will ultimately be completely owned and financed by private program participants. Accordingly, these operations are treated in the budget as a trust enterprise, and the financial statements relating thereto appear in part III of this document.

Federal National Mortgage Association secondary market operations were initially capitalized through the purchase of $92.8 million of preferred stock by the Secretary of the Treasury. This preferred stock will be retired as rapidly as feasible and in the meantime the Association will pay dividends on it to the Treasury at rates determined by the Secretary of the Treasury. Private capitalization for these operations is accumulated through a statutory requirement that private subscriptions to common stock must be made equal to 2 percent of the unpaid principal amount of mortgages sold to Federal National Mortgage Association; but this percentage may be fixed at a greater or lesser percentage than 2 percent, but not less than 1 percent, as determined by the Association from time to time, taking into consideration conditions in the mortgage market and in the general economy.

Recommendations for legislation to transfer ownership of the Association to the private owners of capital stock must be submitted to the Congress as promptly as practicable after all the Treasury preferred stock has been retired.

The Association is authorized to finance secondary market operations through borrowing from the public on the security of nonguaranteed debentures. However, the Secretary of the Treasury, so long as the preferred stock is outstanding, is authorized to purchase such debentures in an amount not exceeding $1 billion outstanding at any one time.

Budget program.—The secondary market operations, established in 1955, are now a fully recognized part of the home mortgage market and have now reached significant levels. This is borne out by a table setting forth the principal activities of the secondary market operations which follows:

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Mortgage purchases (net of discount)	$221.9	$1,025.0	$800 0
Mortgage sales (net of discount)	2.8	4.8	33.8
Repayments and other credits	2.1	15.0	40.0
Balance in portfolio at year end (cost)	226.1	1,231.3	1,957.5

Present authorizations are adequate to finance a portfolio of approximately $1.1 billion. Additional authority, for which legislation is being proposed, will be required to achieve the program levels estimated above.

The prices at which mortgages are purchased are established by Federal National Mortgage Association within the range of market prices for the particular class of mortgages involved. In establishing prices, Federal National Mortgage Association follows the policies of private institutions and varies the price depending upon geographic location, interest rate of the loan, and ratio of equity to value of the subject property. The budget assumes that mortgages will be purchased during 1957 and 1958 at average discounts of 4.2 and 2.2 points respectively, below their face value and that sales will be made at an average price one-half point above the purchase price.

Financing operations.—Substantial direct Treasury borrowings will be necessary in 1957 but borrowings from the public are estimated to provide an increasing source of program funds in 1958. Additional financing will be obtained from utilization of the cash proceeds from the Treasury subscription to preferred stock; from subscriptions of common stock by program participants; and from repayments of mortgage principal. No retirements of preferred stock are estimated for the period covered in this budget because of the heavy demand for money in the mortgage market. The amounts of the principal financing balances outstanding at year end are summarized in the following table:

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Private financing:			
Nonguaranteed debentures	$100.0	$400.0	$800.0
Common stock subscribed	7.2	21.2	31.2
Treasury financing:			
Borrowing from Treasury	94.5	699.5	902.5
Preferred stock	92.8	192.8	192.8

Operations are reflected in budget expenditures only to the extent of Treasury financing.

The above mortgage purchase program and financing schedule reflects new authorizations for the purchase of additional preferred stock in the amount of $100 million in 1957 and additional Treasury borrowing authority of $350 million in 1957 and $350 million in 1958. These amounts are shown under proposed legislation and are not included in the schedule of budget authorizations below.

Financing applied to program	19,705,309	322,850,000	239,150,000

Federal National Mortgage Association is authorized to provide special assistance to the extent that the President has determined that it is in the public interest for the financing of (1) selected types of home mortgages (pending establishment of their marketability) originated under special housing programs designed to provide housing of acceptable standards at full economic cost for segments of the national population which are unable to obtain adequate housing under established home-financing programs, and (2) home mortgages generally as a means of retarding or stopping a decline in mortgage lending and home building which threatens materially the stability of high level national economy. The Association is authorized, for these purposes, to make commitments and to purchase (1) whole mortgages up to $200 million outstanding at any one time, and (2) 20 percent participations in mortgages up to $100 million outstanding at any one time. Legislation will be proposed to merge the two authorities and to increase the amount by $200 million during the coming session of Congress.

In addition, by amendments to the Charter Act, the Association is authorized to enter into commitments to purchase and to purchase mortgages on cooperative housing insured under section 213 of the National Housing Act, as amended, up to a limit of $50 million outstanding at any one time; and to make commitments to purchase and to purchase mortgages on armed services housing insured under title VIII of that act, up to a limit of $200 million outstanding at any one time. Legislation will be proposed to increase the cooperative housing authorization by $50 million.

Federal National Mortgage Association special assistance functions are financed exclusively by Treasury borrowings, and all benefits and burdens of the program inure solely to the Secretary of the Treasury.

Budget program.—During 1957 and 1958, Federal National Mortgage Association will provide special assistance, under Presidential determination, to (1) mortgages on housing in or supporting urban renewal areas of the types to be insured under sections 220 and 221 of the National Housing Act; (2) mortgages on housing for the elderly; (3) mortgages on housing in Alaska and Guam; and (4) mortgages on programed defense, disaster, and military housing. In addition, cooperative and armed services housing will be assisted under the special authority cited above.

The following table shows estimated commitments and purchases, in terms of the total principal amounts of the mortgages involved, during the period covered by this budget:

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
New commitments:			
1. Urban renewal	$0.6	$137.6	$232.0
2. Housing for the elderly	----	20.0	50.0
3. Alaska and Guam	.3	19.8	11.0
4. Defense, disaster, military	11.1	4.6	4.2
5. Cooperative housing	7.7	40.0	40.0
6. Armed services housing	----	100.0	100.0
Total commitments	19.7	322.0	437.2
Less proposed legislation	----	------	205.0
Existing authorizations	19.7	322.0	232.2
Purchases:			
1. Urban renewal	----	22.9	83.0
2. Housing for the elderly	----	5.0	20.0
3. Alaska and Guam	.1	12.3	9.9
4. Defense, disaster, military	.3	12.9	4.0
5. Cooperative housing	----	10.0	35.0
6. Armed services housing	----	------	43.8
Total purchases	.4	63.1	195.7

The achievement of this program depends upon enactment of legislation to increase authority and to make the unused participation authority available for the purchase of whole mortgages. Mortgages will be sold to private investors as rapidly as their marketability is established. Purchases until August 7, 1957, will be at a price not less than 99 percent of par under the provisions of Public Law 1020, 84th Congress; after that date purchases are expected to be made at the price at which they would be purchased in the private market if they were immediately acceptable. No mortgage sales are projected pending the growth of the portfolio to levels for which an effective sales program is practical.

Financing operations.—Net borrowings from the Treasury are estimated at $57.5 million in 1957 and $184 million in 1958, thereby increasing the interest-bearing investment of the Government to $241.7 million at the end of 1958.

Operating results and retained earnings.—Net income from the special assistance functions is estimated at $3.4 million and $5.8 million in 1957 and 1958, respectively. Retained earnings at the end of 1958 are estimated at $5.8 million.

Federal Reserve Bank of St. Louis

The Association, under this function, is directed by statute to manage and liquidate its existing portfolio (acquired pursuant to commitments entered into prior to November 1, 1954) in an orderly manner, with a minimum of adverse effect upon the home mortgage market and a minimum loss to the Federal Government. Liquidation is accomplished through regular repayments of mortgages according to their amortization schedules, sales of mortgages to private investors as rapidly as they can be absorbed without serious disruption of normal market conditions, and other credits arising from prepayments and foreclosures.

Budget program.—Mortgage purchases and cancellation of previous commitments in the current year are estimated to completely liquidate the advance contracts and commitments entered into by the Association prior to enactment of the Federal National Mortgage Association Charter Act in 1954. The following table shows the estimated activities of this function during the period covered by this budget:

[In millions]

	1956 actual	*1957 estimate*	*1958 estimate*
Mortgage purchases	$85.7	$17.0	-------
Mortgage sales (net of discount)	4.4	24.0	$24.0
Discount on sales	.1	1.0	1.0
Repayments and other credits	169.0	175.0	185.0
Balance in portfolio at end of year	2,470.4	2,287.4	2,077.3
Undisbursed commitments at end of year	17.9	-------	-------

Financing operations.—Funds in the amount of $570 million were borrowed in 1955 from the public on the security of nonguaranteed debentures; it will be necessary to refund these borrowings in 1958. All other program financing is supported by United States Treasury borrowings. Net repayments of Treasury borrowing during the period covered by this budget were $106 million in 1956 and are estimated at $199 million and $227 million for 1957 and 1958, respectively.

Operating results and retained earnings.—All benefits and burdens of the management and liquidating function inure solely to the Secretary of the Treasury. Retained earnings in the amount of $2.5 million are estimated to be paid into the Treasury in 1958, and an additional $33 million is reserved for payment to the Treasury in 1959.

CONDENSED STATEMENT OF INCOME AND EXPENSE AND FINANCIAL CONDITION

Total charges against authority	2,488,389,558	2,287,395,051	2,077,345,051
Unused authority			

[1] On and after Nov. 1, 1954, pursuant to Public Law 560, the Federal National Mortgage Association's mortgage purchase authority is the total of its mortgage portfolio and its outstanding commitment contracts in the management and liquidating functions.

Administrative Expenses, Federal National Mortgage Association (Limitation)

Federal National Mortgage Association: Not to exceed [$3,775,000] *$5,250,000*, shall be available for administrative expenses, which shall be on an accrual basis, and shall be exclusive of interest paid, expenses (including expenses for fiscal agency services performed on a contract or fee basis) in connection with the issuance and servicing of [obligations] *securities*, depreciation, properly capitalized expenditures, fees for servicing mortgages, expenses (including services performed on a force account, contract, or fee basis, but not including other personal services) in connection with the acquisition, protection, operation, maintenance, improvement, or disposition of real or personal property belonging to said Association or in which it has an interest, cost of salaries, wages, travel, and other expenses of persons employed outside of the continental United States, expenses of services performed on a contract or fee basis in connection with the performance of legal services, and all administrative expenses reimbursable from other Government agencies, and said Association may utilize and may make payment for services and facilities of the Federal Reserve banks and other agencies of the Government: *Provided*, That the distribution of administrative expenses to the accounts of the Association shall be made in accordance with generally recognized accounting principles and practices: *Provided further*, That not to exceed [$150,000] *$225,000* shall be available for expenses of travel.

[The limitation under this head in title II of the Independent Offices Appropriation Act, 1957, on administrative expenses of the Association is increased from "$3,775,000" to "$4,025,000", and the limitation thereunder on expenses of travel is increased from "$150,000" to "$175,000": *Provided*, That $100,000 of the foregoing increase in administrative expenses shall be available only upon the enactment into law of the amendments to subsection 303 (b) of the National Housing Act, as amended, contained in S. 3855, Eighty-fourth Congress, with respect to nonrefundable capital contributions by mortgage sellers, or legislation of similar effect.] (*12 U. S. C. 1716–1723d, 5 U. S. C. 133z–15, Independent Offices Appropriation Act, 1957.*)

Program by activities:			
1. Secondary market operations	$953,105	$1,550,000	$2,450,000
2. Special assistance functions	5,921	275,000	650,000
3. Management and liquidating functions	2,536,681	2,200,000	2,150,000
Total obligations	3,495,707	4,025,000	5,250,000

PROGRAM AND FINANCING—continued

	1956 actual	1957 estimate	1958 estimate
Financing:			
Unobligated balance no longer available	$454,293		
Limitation	3,950,000	$4,025,000	$5,250,000

PROGRAM AND PERFORMANCE

The Association carries out the three fiscally separate functions described as a single integrated Government instrumentality with one administrative expense limitation and a single budget and staff. Administrative expenses under limitation, allocated among the functions, are expected to rise in 1957 and 1958 because of increased purchase activity in the secondary market and special assistance functions.

Administrative expenses	6.4	6.9	7.4
Nonadministrative expenses	34.5	35.7	37.2
Total expenses	40.9	42.6	44.6
Excess of receipts over expenses	95.2	107.6	124.7

The Federal Housing Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home financing practices, housing standards and conditions through the insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. On June 30, 1956, a total of $41.5 billion of insurance had been written, of which $19.9 billion was outstanding.

The Administration conducts a wide variety of programs through 11 separate insurance funds, the most important of which is the mutual mortgage insurance fund for the insurance of mortgages on 1- to 4-family dwellings under section 203 of the National Housing Act. Other funds cover the insurance of home repair and improvement loans, insurance of mortgages on multifamily housing including cooperative housing, insurance of mortgages on housing for urban renewal, armed services, and other special purposes, and insurance of equity investments in rental housing.

The mutual mortgage insurance fund differs from other insurance funds in that mortgagors receive participation payments from any excess of fees and premiums paid over losses and expenses allocable to the fund. Through June 30, 1956, these participation payments to homeowners have amounted to $65,187,500.

400000—57——20

The Housing Act of 1956 offers several new features and liberalizing revisions. New Federal assistance to housing for the elderly is provided through the Federal Housing Administration mortgage insurance programs. Under section 203, on properties more than 1 year old, the ratio of loan to value is increased to the same level as that for new homes. The Federal Housing Administration rental and cooperative housing programs are liberalized and new assistance is provided to the urban renewal program through the liberalization of the home repair and improvement programs and the section 221 program for the provision of low-cost housing for displaced families. The armed services housing program is extended to June 30, 1958, and the mortgage insurance authorization under this program is increased from $1,363,500,000 to $2,300,000,000.

All of the Administration's insurance programs are income producing. Income is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

Budget programs.—The Federal Housing Administration budget for 1958 is designed to carry out the Administration's part of the President's housing program, with present emphasis on the correction and prevention of slums and urban blight, the encouragement of more suitable housing for the elderly, the stimulation of cost reduction in housing built for low- and middle-income groups, the improvement of existing homes, and the provision of housing needed by employees at military and atomic-energy installations.

Summary of individual insurance programs.—A summary statement, with estimated workload, is provided below for each of the separate mortgage insurance programs.

1. *Repair and improvement loan insurance, title I.*—Financial institutions insured against losses are required to provide 10 percent co-insurance on loans for the alteration, repair, and improvement of residential properties. Loans insured are characteristically short-term, unsecured notes currently averaging around $650. Estimates are set forth below:

	1956 actual	*1957 estimate*	*1958 estimate*
Initiation: Loans insured	1,028,244	1,200,000	1,300,000
Maintenance of insurance in force (number of notes) end of year	2,630,598	2,454,998	3,054,488
Settlement:			
Claims	34,570	40,000	40,000
Average defaulted notes in process of collection	165,000	158,000	158,000

2. *Home mortgage insurance, sections 8 and 203.*—Mortgages may be insured on 1- to 4-family structures up to statutory limits of 95 percent of the first $9,000 of appraised value, and 75 percent of value above $9,000. Under these provisions, insured loans bear a higher ratio to the value of the mortgaged property in the lower price range to aid in construction of homes for families of low and moderate income. Mortgages on disaster housing can be insured by Federal Housing Administration up to a maximum of $12,000 on the basis of 100 percent of loan to value. Insured mortgages may cover new and existing properties both for rent and for sale.

A moderate increase in volume is expected in section 203 existing construction because of the provision in the Housing Act of 1956 permitting the same loan-to-value ratio for homes more than a year old as on new construction. The Federal Housing Administration trade-in house program is expected to contribute to the increase in the volume of insured mortgages on existing homes during the current and budget years. Estimates are as follows:

REVOLVING AND MANAGEMENT FUNDS—Continued

PUBLIC ENTERPRISE FUNDS—Continued

FEDERAL HOUSING ADMINISTRATION—Continued

Federal Housing Administration Fund—Continued

	1956 actual	*1957 estimate*	*1958 estimate*
Initiation:			
Unit applications examined	504,990	465,200	484,700
Inspections made (1- to 4-family units)	1,158,488	990,000	985,500
Unit mortgages insured	283,305	345,150	222,400
Maintenance of insurance in force, end of year (dwelling units)	1,854,361	2,049,651	2,173,346
Settlement:			
Mortgages terminated (dwelling units)	142,489	149,860	149,705
Properties and mortgages acquired	824	1,060	705
Properties and mortgages on hand	813	831	521

3. *Multifamily project mortgage insurance, sections 207 and 213.*—Mortgages may be insured on new or existing multifamily housing projects up to statutory limits of 90 percent or 95 percent of appraised value (or in the case of cooperative housing, estimated replacement cost). The Housing Act of 1956 permits nonprofit corporations to obtain Federal Housing Administration insured mortgages to build rental units specially designed for the elderly. Estimates under sections 207 and 213 are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Initiation:			
Unit applications examined	18,005	29,200	35,500
Average multifamily units under inspection	6,042	9,200	14,600
Unit mortgages insured	4,684	17,900	21,600
Maintenance of insurance in force—end of year (dwelling units)	71,956	86,706	105,156
Settlement:			
Mortgages terminated (dwelling units)	2,534	3,150	3,150
Properties and mortgages acquired	52	55	55
Properties and mortgages on hand	49	49	50

4. *Urban renewal housing mortgage insurance, sections 220 and 221.*—Section 220 provides insured mortgage financing for the construction or rehabilitation of housing in designated urban renewal areas. Section 221 provides mortgage insurance for housing built or rehabilitated for persons displaced by governmental action in communities having approved urban renewal plans. Some stimulus to urban renewal and relocation housing has been provided by the new legislation, which clarified the cost-certification requirements applicable to community family projects under sections 220 and 221. Under section 221 the maximum insurable mortgage amount has been raised from $7,600 to $9,000 per unit, the maximum ratio of loan to value has been increased from 95 percent to 100 percent; and the maximum term has been lengthened from 30 to 40 years. Estimates of workload are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Initiation:			
Unit applications examined	2,601	24,900	42,200
Inspections made (1- to 4-family units)	105	30,400	73,000
Average multifamily units under inspection	222	4,250	9,500
Unit mortgages insured	576	13,400	29,600
Maintenance of insurance in force—end of year (dwelling units)	576	13,976	43,576
Settlement	-----	------	------

5. *Servicemen's housing mortgage insurance, section 222.*—Section 222 authorizes the insurance of mortgages to finance the purchase of homes by servicemen who have been in the Armed Forces for a minimum of 2 years. Under this section, mortgages may be insured on single-family structures up to 95 percent of appraised value, with a maximum mortgage limitation of $17,100. Estimates are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Initiation:			
Unit applications examined	11,368	11,700	11,700
Inspections made (1- to 4-family units)	5,022	17,000	18,500
Unit mortgages insured	9,720	9,800	11,100
Maintenance of insurance in force—end of year (dwelling units)	11,707	21,457	32,507
Settlement: Mortgages terminated (dwelling units)	41	50	50

6. *Special incentive mortgage and loan insurance, sections 603, 608, 609, 610, and 611.*—The special war housing mortgage insurance provisions of title VI were continued until April 1948 for home mortgages and until March of 1950 for rental project mortgages to provide veterans' emergency housing. Other special incentive programs were added later. These included insurance of (*a*) loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing; (*b*) mortgages executed in connection with the sale by the Government of certain federally owned housing; and (*c*) short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single-family dwellings, as well as for insured long-term financing of properties so constructed. Insurance authority under title VI has terminated. The Housing Act of 1954 transferred to title II the authority to insure mortgages to finance the sale of Government-owned housing. Estimates are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Maintenance of insurance in force—end of year (dwelling units)	669,939	627,989	587,013
Settlement:			
Mortgages terminated (dwelling units)	38,657	41,950	40,976
Properties and mortgages acquired	309	231	136
Properties and mortgages on hand	1,081	662	528

7. *Yield insurance for rental housing equity investments, title VII.*—Title VII provides for the insurance of an annual return of 2¾ percent and a minimum annual amortization of 2 percent on equity investments in rental housing for families of moderate income. Estimates are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Initiation:			
Unit applications examined	--	1,000	1,000
Average multifamily units under inspection	--	200	700
Investments insured (dwelling units)	--	500	1,000
Maintenance of insurance in force—end of year (dwelling units)	--	500	1,500
Settlement	--	------	------

8. *Armed services housing mortgage insurance, title VIII.*—Rental housing is provided under title VIII, through the use of private capital under insured mortgages, for civilian and military personnel of the armed services and for personnel at atomic energy installations. Insurance authority under this section of the act has been extended until June 30, 1958, and the program has been broadened to cover Midway Island and the Canal Zone. Mortgages may be insured for not to exceed an average of $16,500 per dwelling unit in any one project. During the last half of 1956 advance statements of appraisal and eligibility involving more than 46,000 units were requested by the military. Estimates are as follows:

	1956 actual	*1957 estimate*	*1958 estimate*
Initiation:			
Unit applications examined	3,331	50,800	77,800
Inspections made (1- to 4-family units)	2,106	2,900	11,000
Unit mortgages insured	3,708	21,900	82,400
Maintenance of insurance in force, end of year (dwelling units)	84,301	103,819	183,767
Settlement:			
Mortgages terminated (dwelling units)	1,576	2,382	2,452
Properties and mortgages acquired	5	5	4
Properties and mortgages on hand	7	12	14

9. *Mortgage insurance for programed defense housing, title IX.*—Mortgage insurance for both 1- to 4-family and multifamily housing was provided for under title IX, within the limits of programed housing needs in defense areas designated by the President. The authorization to insure under this title has terminated except for commitments outstanding. Estimates are as follows:

Properties and mortgages on hand	3,552	4,363	4,668

Summary of workload and expense estimates.—Expense estimates during the current fiscal year are 4.2 percent above expenses for last year, with a further increase of about 4.7 percent estimated for the budget year. The excess of operating receipts over expenses in 1958 is estimated to increase by 16 percent over the current year.

For the budget year, headquarters administrative expenses are estimated at $7.4 million and operating (nonadministrative) expenses at $37.2 million, for a total of $44.6 million. These estimates for the separate administrative and nonadministrative expenses are shown in subsequent schedules.

Financing operations.—All Federal Housing Administration operations are financed out of income. Mortgage insurance claims are met by the issuance of debentures which are subsequently redeemed out of insurance income and the proceeds of the sale of acquired properties and mortgages. In 1956, $76,538,650 of debentures were issued. Debentures to be issued are estimated at $74,397,700 in 1957 and $58,001,900 in 1958. Debentures were retired in 1956 in the amount of $46,695,536. Retirement of debentures in 1957 and 1958, respectively, are estimated at $28,625,350 and $22,445,000.

Operating results and financial condition.—Operations in 1956 resulted in a net income of $70,314,714. This income was distributed as follows: $51,384,781 was placed in the general surplus account and $7,500,000 in the participating reserve account of the Mutual Mortgage Insurance Fund, which were established pursuant to Public Law 560, approved August 2, 1954, and $11,429,933 was placed in the general insurance reserves under the nonmutual insurance programs.

Net income is expected to be $89,859,695 in 1957 and $108,700,400 in 1958. In the 2-year period it is estimated that income totaling $144,861,640 will be added to the general surplus account and $10 million to the participating reserve account of the Mutual Mortgage Insurance Fund, while an estimated $43,698,455 of income will be placed in the insurance reserves under nonmutual funds.

Insurance reserves which totaled $397,551,324 on June 30, 1955, increased to $460,897,568 during 1956 and are expected to reach $543,557,263 by June 30, 1957, and $645,057,663 by June 30, 1958. These reserves are required to meet future insurance losses and expenses.

On June 30, 1955, the total of Federal Housing Administration capital and insurance reserves stood at $417,861,324. During 1956 the capital and reserves increased to $481,207,568 and it is estimated that they will reach $563,867,263 by June 30, 1957, and $665,367,663 by June 30, 1958.

Insurance authority.—Public Law 1020, approved August 7, 1956, amended the general mortgage insurance authorization under section 217. This amendment provides that the aggregate amount of principal obligations of all mortgages which may be insured and outstanding at any one time under insurance contracts or commitments to insure pursuant to any section or title (except sec. 2 and sec. 803) shall not exceed the sum of (*a*) the outstanding principal balances, as of July 1, 1956, of all insured mortgages (without taking into account prepayments or delinquencies), (*b*) the principal amount of all outstanding commitments to insure as of July 1, 1956, and (*c*) $3 billion. This general insurance authorization applies to all mortgage insurance programs except new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, and provides adequate amounts to carry such mortgage insurance programs through 1958 (see schedule C–1).

Section 803 (a) of the act as amended by Public Law 345, approved August 11, 1955, and Public Law 1020, approved August 7, 1956, created a separate mortgage insurance authorization with regard to all new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, including both the new armed services housing program and the extended military housing program. This insurance authorization provides that the aggregate amount of principal obligations of all mortgages insured under this program shall not exceed $2,300,000,000 and that the limitation in section 217 shall not apply to this program. This amount will be adequate to carry the program through both 1957 and 1958 as shown on schedule C–1.

The title I section 2 authorization of $1,750,000,000 for repair and improvement insurance will be sufficient to carry this program through both 1957 and 1958 (see schedule C–1).

The United States Housing Act of 1937 provided for a program of locally owned and operated low-rent public housing by authorizing loans and annual contributions to local housing authorities to assist in financing the construction of housing projects for low-income families and to maintain their low-rent character after completion and occupancy. Subsequently, Public Law 671, approved June 28, 1940 (42 U. S. C. 1501), permitted the construction of permanent housing for warworkers, subject to conversion to low-rent use after the emergency. The Housing Act of 1949, Public Law 171, approved July 15, 1949 (42 U. S. C. 1401 et seq.), increased the borrowing power of the Administration to $1.5 billion and increased the annual contributions authorization to $336 million.

Budget program.—A low-rent public housing project is initiated by a preliminary loan contract under which the Public Housing Administration advances planning funds to the local housing authority. The Public Housing Administration does not, however, incur a legal obligation to provide the financial assistance necessary to construct and maintain the low-rent character of the project until an annual contributions contract is entered into by the Public Housing Administration and the local housing authority. The annual contributions contract is consequently treated as the point of program initiation and control. The contract provides for (1) the payment of annual contributions over a 40-year period in an amount not to exceed the interest and amortization on the bonds required to finance the project and (2) temporary financing of development costs pending completion and permanent financing of the project.

The Housing Act of 1956 authorized execution of new contracts for loans and annual contributions after July 31, 1956, for a total of 70,000 units. The authorization is for two consecutive annual programs of 35,000 units and each program may be executed during a period of 2 years after it becomes available. The first program of 35,000 units was authorized to begin August 1, 1956, and will terminate on July 31, 1958. The second program of 35,000 units will become available July 1, 1957, and will terminate on June 30, 1959. The Housing Act of 1956 also continued the uncompleted authorization to execute contracts for loans and annual contributions contained in the Housing Amendments of 1955.

The budget program anticipates execution of annual contributions contracts for a total of 60,000 units during 1957, including 41,471 units authorized by the Housing Amendments of 1955 and 18,529 units authorized by the Housing Act of 1956. Of the remaining units authorized by the Housing Act of 1956, 35,000 units will be placed under contract in 1958 and 16,471 in 1959.

Development progress.—At any one time, the development phase of the low-rent program consists of a pipeline of dwelling units. The pipeline can be divided into separate sections, each of which represents a stage in the

Low-Rent Public Housing Program Fund, Public Housing Administration—Continued

development process. This status-by-stage analysis at respective fiscal year ends is shown in the following tabulation:

NUMBER OF DWELLING UNITS

Development stage:	*June 30, 1956, actual*	*June 30, 1957, estimate*	*June 30, 1958, estimate*
1. Preliminary loan contract executed but site not selected	[1] 43,221	28,221	10,221
2. Site selected but annual contributions contract not executed	38,779	13,779	13,779
3. Annual contributions contract executed but construction not started	55,269	90,269	90,269
4. Construction started but not available for occupancy	18,952	28,952	38,952

[1] Excludes an estimated 17,000 inactive units which will be removed from the workload.

This analysis indicates that the size of the pipeline over the 3-year period will decrease somewhat as regards the stages prior to the annual contributions contract but will increase materially as respects the later stages. On June 30, 1958, 24,000 units will remain in the preliminary loan and site selected stages. After the remaining 16,471 units authorized by the Housing Act of 1956 have been placed under annual contributions contracts, only 7,529 units will be left in these 2 preconstruction stages. Preliminary loans will be made and sites selected for other units and projects only after Congress has authorized execution of additional annual contributions contracts.

Further insight into the program workload is afforded by the flow of housing units through the pipeline. The number of units passing each of the five critical points in the development process during a fiscal year is a good measure of program accomplishment. A 3-year comparison is presented in the table that follows:

NUMBER OF DWELLING UNITS

Development action:	*1956 actual*	*1957 estimate*	*1958 estimate*
1. Preliminary loan contract executed	9,163	20,000	17,000
2. Site selected	17,108	35,000	35,000
3. Annual contributions contract executed	5,033	60,000	35,000
4. Construction started	7,286	25,000	35,000
5. Completed for occupancy	15,406	15,000	25,000

Sharp fluctuations shown for 1956 and 1957 reflect wide swings in program authorizations during recent years, and, in the case of annual contributions contracts executed, authorizations which do not coincide with fiscal years. The estimate for 1958 suggests an improved picture, with 35,000 units a year moving through three of the major development stages.

Loans.—The Housing Act of 1949, Public Law 171, approved July 15, 1949, authorized the Public Housing Administration to have, at any one time, outstanding borrowings of $1.5 billion from the Treasury. These borrowings and certain working capital funds available to the corporation are used for loans to local housing authorities. Pursuant to the annual contributions contract, Public Housing Administration makes a loan commitment to cover initial project development costs. The commitment is gradually increased over the development period, as progress warrants, up to maximum of 90 percent of development costs. During the current and budget year, new loan commitments consequently reflect both the increased number of annual contributions contracts and the substantial increases in the number of units actually under construction. The dollar volume of new loan commitments is estimated to increase, because of these factors, from $89 million in 1956 to $225 million in 1957 and $388 million in 1958.

The Public Housing Administration finances initial planning work and the first 3 months of construction through direct short-term development loans to local housing authorities. As soon as loans to the local authorities are of sufficient amount to make private financing practical, the local authority sells short-term temporary notes to private investors and utilizes the proceeds to repay the advance and interim notes held by the Public Housing Administration and for immediately forthcoming construction requirements. These notes are guaranteed by Public Housing Administration through the pledge by the local authority of the Public Housing Administration loan commitment. Because of this guaranty, the notes have excellent security and sold at average interest rates of slightly over 1.5 percent in 1956. These notes are issued for short periods, usually 5 months, and may be reissued several times, and in increasing amounts, before the project is completed and ready for occupancy. Consequently, during any fiscal period a considerable turnover of short-term funds takes place, with the result that the volume of loan activity by the Public Housing Administration during a fiscal year greatly exceeds the amount of loans outstanding at the fiscal year end. The anticipated sharp increase in project construction activity during 1957 and 1958 accounts for the greatly increased volume of estimated lending operations by the Administration for both years.

The following table shows the actual financing and refinancing of development loans by Public Housing Administration and private investors during 1956 and estimated transactions during 1957 and 1958.

[In millions of dollars]

	1956 actual	*1957 estimate*	*1958 estimate*
Loans and investments made by Public Housing Administration to local housing authorities and others:			
Balance at beginning of year	97	90	105
Acquisitions during the year	237	466	329
Repayments during the year	[1] 245	451	329
Balance at end of year	90	105	105
Loans by private investors to local housing authorities—guaranteed by Public Housing Administration:			
Balance at beginning of year	942	708	517
Acquisitions during the year	1,257	1,123	1,060
Repayments during the year	1,491	1,314	1,101
Balance at end of year	708	517	476

[1] Includes note cancellation of $6 million under Public Law 176.

All short-term financing, both direct and guaranteed, is retired when the local authority permanently finances the project. The reduction in the total of direct and guaranteed loans outstanding in 1957 and 1958 reflects the excess of retirements from permanent financing over new program disbursements during these years. Refunding operations affect only the distribution between direct and guaranteed loans and not the total outstanding.

Permanent financing is obtained through the sale of the local authority's long-term bonds to the public. These are usually 40-year serial bonds and are secured by the Government's pledge to pay annual contributions. They were sold in 1956 at interest rates ranging from 2.35 to 2.55 percent. It is estimated that $467 million in new local housing authority bonds will be issued in 1957 and $500 million in 1958, compared to $351 million in 1956.

Management.—The maximum annual contribution, which is equal to the interest and amortization on the bonds issued to permanently finance the project, is reduced to the extent that project operations provide net receipts which can be used for this purpose. Consequently, limited

Public Housing Administration review of project management is not only necessary to assure that the objectives of national housing legislation are being met and that the obligations of the annual contributions contract are being fulfilled but also bears directly on the cost of the program to the Federal Government. The management workload at each fiscal year end, classified according to major category and program, is shown in the table that follows:

NUMBER OF DWELLING UNITS

	1956 actual	*1957 estimate*	*1958 estimate*
Locally owned projects eligible for annual contributions	363,805	381,207	409,416
Locally owned projects paying residual receipts to the Federal Government	44,139	42,204	39,910
Federally owned and operated projects	2,089	1,672	924
Federally owned projects leased to local housing authorities	8,276	4,028	499
Total all projects	418,309	429,111	450,749

Annual contributions.—The following table summarizes the annual contributions required to assure the low-rent character of all locally owned projects eligible for annual contributions:

	1956 actual	*1957 estimate*	*1958 estimate*
Fixed annual contributions	$107,933,030	$119,590,000	$122,400,000
Deduct: Fixed annual contributions in excess of debt service requirements for Public Law 671 projects in temporary financing	714,249	29,551	29,551
Net fixed annual contributions	107,218,781	119,470,449	122,370,449
Deduct: Amounts available to reduce annual contributions:			
Accrued interest	1,111,788	4,392,576	2,450,887
Capitalized interest	2,479,514	1,946,391	487,600
Residual receipts, end of initial operating period	989,259	271,067	213,840
Residual receipts, current period	20,908,174	20,860,415	20,218,122
Total amount available to reduce annual contributions	25,488,735	27,470,449	23,370,449
Annual contributions requirements	81,730,046	[1] 92,000,000	99,000,000
Number of units	343,907	371,083	377,401

[1] $93,000,000 was appropriated. Refinancing operations and other factors decreased annual contributions requirements.

Increased annual contributions requirements in 1958 are occasioned in part by the increased number of units eligible for contributions resulting from the completion and permanent financing of new and reactivated projects and from the sale to local authorities of federally owned projects. The decline in residual receipts which are available to reduce annual contributions is due largely to a decline in amounts of accrued and capitalized interest. This is due to the fact that there are a larger number of units under interim financing during 1957 than in 1958. The number of units eligible for annual contributions and shown in the management workload exceeds the number actually receiving contributions chiefly because project completion usually precedes the first annual contributions payment date.

Under present statutory authorization, the Public Housing Administration may pay annual contributions up to $336 million per annum. The maximum amount of annual contributions which the Public Housing Administration is committed to pay, on the basis of annual contributions contracts executed through June 30, 1956, is estimated at $165 million, leaving $171 million of uncommitted authority to pay annual contributions.

Projects not eligible for annual contributions.—Three categories of low-rent projects, accounting for less than 10 percent of the total in 1958, are not eligible for annual contributions.

The first of these categories is the group of locally owned projects paying residual receipts to the Federal Government. Except for a single Public Law 412 project, all of these projects originated in programs where construction costs were met out of appropriated funds. Consequently, in the absence of interest and amortization charges, no need exists for annual contributions which otherwise would be required to pay such charges. Residual receipts, instead of being applied to reduce annual contributions, as is the case for all other locally owned projects, are paid for a period of 40 years to the Federal Government. Deficits, however, are not paid by the Federal Government. Chiefly because of the transfer of farm labor camps as directed by the Housing Act of 1956, the number of dwelling units in this group declines from 44,139 on June 30, 1956, to 39,910 on June 30, 1958.

The second category is the group of federally owned projects leased to local housing authorities. Leasing arrangements are merely temporary expedients until such time as projects are either sold to local authorities and financed by sale of local housing authority bonds under annual contributions contracts or transferred to local authorities under conditional conveyance contracts providing for payment of residual receipts to the Federal Government. The number of leased dwelling units is declining rapidly and by June 30, 1958, will be reduced to fewer than a thousand.

The third category consists of federally owned and operated projects. This group of projects is rapidly declining and by June 30, 1958, will have less than a thousand dwelling units.

Administrative expenses.—Administrative expenses for the low-rent public housing program amounted to $9,162,800 in 1956 and are estimated at $10,700,000 for 1957 and $13,300,000 for 1958. The rise for 1958 results chiefly from the accelerated rate of construction of low-rent housing projects. The remainder of the increase is occasioned by new dwelling units reaching the management stage. The administrative expenses appropriation for the low-rent public housing program is merged with administrative expenses funds of the liquidating emergency housing program into a single fund, which is shown under "Administrative expenses limitation, Public Housing Administration."

Nonadministrative expenses.—Additional expenses are incurred for the operation of federally owned and operated low-rent projects and for the inspection of low-rent projects under construction. Changes in these expenses in 1958 reflect the declining number of directly operated projects and the higher rate of construction of low-rent projects.

Rental income from federally owned and operated projects is more than sufficient to take care of project expenses. Fees are charged sufficient to pay the cost of providing inspection service for projects under construction.

Operating results and financial condition.—Operating income is not intended to be sufficient to cover all program costs. Net losses, in the budget year, are approximately equal to the appropriations for administrative expenses and annual contributions plus the losses on transfers of Public Works Administration and war-housing projects to local housing authorities.

Net obligations outstanding, as shown in the schedule of certain fund balances, drop sharply from 1956 to 1958. This is due to the fact that retirements through permanent financing of Public Housing Administration loan commitments exceed the level of new loan commitments during this period.
