DEPARTMENTAL OFFICES

Current authorizations:

Office of Saline Water

SALARIES AND EXPENSES

For expenses necessary to carry out provisions of the Act of July 3, 1952, as amended (42 U. S. C. 1951–1958), authorizing studies of the conversion of saline water for beneficial consumptive uses, [$825,000] *$1,355,000. (72 Stat. 1708. Department of the Interior and Related Agencies Appropriation Act, 1959).*

Appropriated 1959, [a] **$1,170,000** Estimate 1960, **$1,355,000**

[a] Includes $345,000 appropriated in Supplemental Appropriation Act, 1959.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Administration and coordination:			
(a) Research and development	$128,072	$179,400	$220,000
(b) Demonstration plants		42,746	
2. Research and development:			
(a) Contracts and grants (non-Federal)	542,917	945,000	985,000
(b) Federal laboratories	53,997	60,000	150,000
(c) Contracts for engineering designs and demonstration plant site analysis		20,000	
Total obligations	724,986	1,247,146	1,355,000
Financing:			
Unobligated balance no longer available	14		
New obligational authority	725,000	1,247,146	1,355,000
New obligational authority:			
Appropriation	$725,000	$1,170,000	$1,355,000
Proposed supplemental due to pay increases		14,400	
Reappropriation		62,746	

This program provides for research to develop low-cost processes for converting saline water to fresh water in quantities sufficient for municipal, industrial, and agricultural use. Construction of demonstration plants for this purpose is authorized by the act of September 2, 1958, which also authorized use of this appropriation to initiate the program. Obligations for demonstration plants after 1959 appear under the heading Construction.

1. *Administration and coordination.*—This activity covers departmental administration of federally sponsored research, coordination of 100 known Federal and non-Federal research projects, and stimulation of private and public saline water research.

2. *Research and development.*—This activity relates to the federally sponsored research and evaluation work accomplished by means of contract or grant to Federal or non-Federal agencies, institutions, and consultants.

Office of Oil and Gas

SALARIES AND EXPENSES

For necessary expenses to enable the Secretary to discharge his responsibilities with respect to oil and gas, including cooperation with the petroleum industry and State authorities in the production, processing, and utilization of petroleum and its products, and natural gas[; and for controlling the interstate shipment of contraband oil as required by law (15 U. S. C. 715); $525,000], *$390,000. (Department of the Interior and Related Agencies Appropriation Act, 1959.)*

Appropriated 1959, [a] **$543,500** Estimate 1960, [b] **$390,000**

[a] Includes $18,500 appropriated in Supplemental Appropriation Act, 1959.

[b] Excludes $217,600 for activities transferred in the estimates to "Surveys, investigations, and research," Geological Survey. The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

Program and Financing

DEPARTMENTAL OFFICES—Continued

OFFICE OF OIL AND GAS—Continued

SALARIES AND EXPENSES—continued

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
New obligational authority:			
Appropriation	$585,000	$543,500	$390,000
Transferred to—			
"Salaries and expenses," Office of the Solicitor (72 Stat. 243)	−11,000		
"Trust Territory of the Pacific Islands" (72 Stat. 54)	−11,450		
Appropriation (adjusted)	562,550	543,500	390,000
Proposed supplemental due to pay increases		45,300	

This office provides coordination and advice to the Federal Government on all phases of petroleum and gas. Studies, domestic and worldwide, are made to maintain data on adequacy of petroleum and gas, to define deficient areas or elements, and to develop ways to alleviate actual or potential deficiencies.

Functions relating to the control of interstate shipments of contraband oil, formerly financed under this appropriation, have been transferred to Geological Survey.

OFFICE OF MINERALS EXPLORATION

SALARIES AND EXPENSES

For expenses necessary to provide a program for the discovery of the minerals reserves of the United States, its Territories and possessions, by encouraging exploration for minerals, including administration of contracts entered into prior to June 30, 1958, under section 303 of the Defense Production Act of 1950, as amended[; hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), when authorized by the Secretary, at rates not to exceed $75 per diem for individuals; and attendance at meetings concerned with the purposes of this appropriation, $4,000,000, of which $37,000 shall be transferred to the appropriation "Salaries and expenses", Office of the Solicitor, fiscal year 1959: *Provided*, That this paragraph shall be effective only

Transferred to "Salaries and expenses," Office of the Solicitor (72 Stat. 874)		−37,000	
Appropriation (adjusted)		3,963,000	1,500,000

This program provides for the discovery of the minerals reserves of the United States, its Territories and possessions, by encouraging exploration for minerals by private individuals.

1. *Financial assistance for exploration projects.*—This is the Government's share of the cost of accepted projects for the exploration of strategic and critical minerals. The Government contributes 50% of the cost as does the operator. If the exploration is successful, the advance is subject to repayment with interest.

2. *Administrative and technical services.*—This activity finances the Office of Minerals Exploration and the technical and clerical staffs of the Bureau of Mines and the Geological Survey assigned to it.

The Office of Minerals Mobilization provides coordination and advice to the Federal Government on all phases of metals, minerals, and solid fuels, both United States and abroad, to assure adequate development, distribution, utilization, and conservation of resources and facilities to meet essential civilian and military mobilization requirements. This includes detailed mobilization planning for the production of metals, minerals, and solid fuels as delegated by the Office of Civil and Defense Mobilization. The 1960 program will be financed by funds appropriated to that agency.

Limited amounts of tungsten, asbestos, fluorspar, and columbium-tantalum were acquired by the General Services Administration with funds transferred from this appropriation. In addition, administrative expenses, handling, storage, and other charges were borne here pending transfer of the materials to the strategic or supplemental stockpile.

The program terminated December 31, 1958.

1. *Construction in progress.*—The Administration is responsible for the marketing of electric power produced at

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

17 Federal hydroelectric generating plants in service or under construction and wheels power from certain non-Federal plants in the Pacific Northwest. Amounts are included to carry on to completion transmission facilities started in prior years.

2. *New construction.*—The 1960 construction program provides for additional transmission and substation capacity to carry to load centers the power production of generating installations scheduled to be in operation by January 1962. New facilities programed are associated with new generating capacity being put into service at Federal plants shown on the following schedule:

	First generation (fiscal year)	*Installed capacity (kilowatts, nameplate rating)*
Projects in operation	--------	5,070,250
Projects under construction:		
The Dalles	1958	1,119,000
Hills Creek	1962	30,000
Cougar	1962	25,000
Ice Harbor	1962	270,000
Total	--------	6,514,250

In addition, other new facilities are included which will enable the Administration to meet its contractual arrangements to wheel power from the non-Federal Priest Rapids and Rocky Reach dams.

The amounts of peak generating capacity on the Federal system at the beginning and end of the 1960 construction period follows:

KILOWATTS

	July 1, 1959	*Jan. 1, 1962*
Federal projects	6,599,800	7,511,800
Power wheeled for non-Federal projects	388,300	1,522,300
Total	6,988,100	9,034,100

3. *General plant.*—Provision is made for acquisition of items such as tools, office equipment, transportation, and portable communication equipment used in the construction and operation of the Federal power system.

Program costs to this appropriation are presented in the following table:

Appropriation	$8,813,000	$9,170,000	$10,250,000
Proposed supplemental due to pay increase		318,000	

This program provides for the operation and maintenance of the Administration's high voltage electric grid system, and for commercial and administrative expenses in marketing wholesale electric power from Federal dams in the Pacific Northwest.

1. *System operation and maintenance.*—This activity consists of the scheduling and dispatching of power; the operation of substations; the maintenance of transmission lines, substations, and other electrical facilities; load estimating; the integration of resources; and system engineering.

Transmission facilities of the Administration are expanded as increased generating capacity becomes available. It is necessary to man newly energized substations, schedule and dispatch the increased power supply, and provide service through additional points of delivery and interconnection. Additional maintenance personnel are required throughout the transmission area to maintain the expanded system at levels adequate to insure safe and continuous operation. Power resources and requirements work will be continued to obtain the fullest utilization of generating capacity, streamflows, and stored water. The following table shows the rising trend in several of the more important indexes of the operation and maintenance activity.

	1958 actual	*1959 estimate*	*1960 estimate*
Transmission lines, structure miles	6,848	7,208	7,460
Number of substations	183	186	195
Transformer capacity, kilovolt-amperes	10,776,000	12,700,000	13,770,000
Energy sales (millions of kilowatt hours)	28,365	29,300	30,900
Points of delivery	345	349	355

2. *Power contracts and rates.*—This activity consists of the negotiation of power sales and wheeling contracts, billing and servicing contracts, including the development of service plans, and establishment of wholesale rate schedules. Receipts which are deposited in the Treasury amounted to $67,269,170 in 1958, and are estimated at $68,700,000 and $75,300,000 for 1959 and 1960.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet delivered)	$97,830	$114,694	$69,524	$69,524
Selected resources at start of year (−)		−97,830	−114,694	−69,524
Adjustment of selected resources reported at start of year		13,252		
Costs financed from obligations of other years, net (−)			−45,170	
Obligations incurred for costs of other years, net		30,116		

A supplemental appropriation of $100,000 is anticipated for 1959 and is shown under Proposed for later transmission.

ADMINISTRATIVE PROVISIONS

Appropriations of the Bonneville Power Administration shall be available to carry out all the duties imposed upon the Administrator pursuant to law, including purchase of one aircraft for replacement only. Appropriations made herein to the Bonneville Power Administration shall be available in one fund, except that the appropriation herein made for operation and maintenance shall be available only for the service of the current fiscal year.

Other than as may be necessary to meet local emergencies, not to exceed 12 per centum of the appropriation for construction herein made for the Bonneville Power Administration shall be available for construction work by force account or on a hired-labor basis. (*16 U. S. C. 832–832l; Executive Order 8526; 43 U. S. C. 593–A; 16 U. S. C. 825s; 59 Stat. 10, 21; 62 Stat. 382; 43 U. S. C. 389, 485h; Public Works Appropriation Act, 1959.*)

SOUTHEASTERN POWER ADMINISTRATION—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE—Continued

1. *System operation and maintenance.*—Provision is made for scheduling and dispatching power generation; scheduling storage and release of water; administering contractual operation requirements; and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase of power and wheeling charges.*—Provision is made for the payment of wheeling fees and for the purchase of firming energy in connection with disposal of power from the Kerr and Jim Woodruff projects under contracts with utility companies.

3. *Power contracts and rates.*—This provides for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Receipts which are deposited in the Treasury amounted to $17,023,865 in 1958 and are estimated at $17,940,000 and $17,300,000 for 1959 and 1960.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

New obligational authority:			
Appropriation	$1,000,000	$975,000	$1,150,000
Transferred from "Operation and maintenance," Bureau of Reclamation (72 Stat. 243)	22,731	----------	----------
Appropriation (adjusted)	1,022,731	975,000	1,150,000
Proposed supplemental due to pay increases	----------	55,000	----------

Power developed at Corps of Engineers dams in four southwestern States is marketed by the Administration through transmission facilities owned by others and through its own system. The Administration also contracts for the sale, purchase, and interchange of power with other systems.

Receipts which are deposited in the Treasury amounted to $7,967,308 in 1958, and are estimated at $7,810,000 and $9,292,000 for 1959 and 1960. The increase in receipts for 1959 and 1960 results mainly from additional power sales, load growth, and the sale of unscheduled capacity under company contract rates.

1. *System operation and maintenance.*—The Administration operates and maintains a transmission system as follows:

	1958 actual	1959 estimate	1960 estimate
Transmission lines, miles	1,032	1,074	1,170
Number of substations	14	14	14
Substation capacity, kilovolt-amperes	322,050	322,050	322,050

2. *Power contracts and rates.*—This includes (*a*) negotiations of power contracts, (*b*) billing and servicing contracts, (*c*) development of wholesale power rates, and (*d*) participation in determination of the cost of amortizing the Federal Government's investment in power facilities.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table.

	1957 actual	1958 actual	1959 estimate	1960 estimate
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$47,291	$85,237	$65,000	$80,000
Accrued annual leave (leave earned but not taken by employees, charged to activity costs)	-111,235	-84,007	-63,770	-78,770
Total selected resources at end of year	-63,944	1,230	1,230	1,230
Selected resources at start of year	63,944	-1,230	-1,230	-1,230
Obligations incurred for costs of other years, net	65,174	--------	--------	

A supplemental appropriation of $7,500 is anticipated for 1959 and is shown under Proposed for later transmission.

New obligational authority:			
Appropriation:			
Definite	$3,665,487	$4,405,000	$5,000,000
Indefinite		15,000	

NOTE.—Reimbursements from non-Federal sources result from sale of power and are applied against charges for purchase of energy, wheeling, and rentals by customers of the Administration.

This fund, accumulated from power receipts, is available permanently for emergency expenses necessary to insure continuity of service. It is also available in such amounts as may be approved annually in appropriation acts to cover costs in connection with the purchase of electric power and rentals for use of facilities for transmission and distribution of power. Electric power is purchased from private utilities and cooperatives. Power is transmitted to customers through wheeling arrangements with private utilities, and through lease of the transmission capacity in facilities owned by the generating and transmission cooperatives (16 U. S. C. 825s–1).

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management administers 475 million acres of public lands in 11 Western States and Alaska for the purpose of conserving forest, range, mineral, and water resources. In addition, the Bureau has responsibility for mineral resources on 358 million acres of land under the jurisdiction of other Federal agencies and private land with mineral rights reserved to the United States.

The work of the Bureau produces revenue from various sources which is distributed as follows:

[In millions]

1959 appropriation available in 1958	−77,353	77,353	
Unobligated balance no longer available	80,768		
New obligational authority	23,324,800	24,312,000	24,377,000
New obligational authority:			
Appropriation	$22,624,800	$23,075,000	$24,377,000
Transferred from "Education and welfare services," Bureau of Indian Affairs (72 Stat. 54)	700,000		
Appropriation (adjusted)	23,324,800	23,075,000	24,377,000
Proposed supplemental due to pay increases		1,237,000	

1. *Lease and disposal of lands and mineral resources.*—Applications for all types of land use and for lease of mineral resources, principally oil and gas, are acted upon. Field investigations are made to determine the best use of resources. Land records are being modernized. An increase for 1960 is provided to meet increased workload.

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Cases pending, start of year	78,094	74,151	98,649	113,600
New and reactivated cases	132,885	164,699	185,000	200,000
Cases closed	136,828	152,824	170,049	188,000
Cases pending, end of year	74,151	98,649	113,600	125,600

2. *Management of grazing lands.*—The 187 million acres of Federal range used by 30,000 livestock growers are supervised. Proper management of these lands perpetuates forage resources thereon by reducing overuse, unseasonal use and trespass, and provides protection from fire and erosion.

3. *Forestry.*—Forty-six million acres of commercial forest lands, of which 40 million acres are in Alaska, and 115 million acres of woodland type lands, are managed. The 1960 program will permit selling 1,067 million board-feet of timber having a stumpage value of $26.75 million.

4. *Cadastral surveys.*—These surveys are required to locate and identify legal boundaries of lands under application for lease or disposal, including submerged lands on the outer Continental Shelf; for administration of timber sales; for management of forest and range lands; to provide legal descriptions for the work of other Federal agencies and to permit States to obtain title to lands granted them by law. The increase will provide for increased surveying activities in Alaska as a result of statehood.

5. *Soil and moisture conservation.*—The 1960 program will benefit 1,940,000 acres of public lands in critical condition from erosion. Cooperative programs with other agencies in river basin areas will continue.

6. *Fire suppression.*—Provision is made for fighting fires on or threatening lands under jurisdiction of the Bureau of Land Management. Costs of fire suppression during the spring and summer of 1958 have exceeded $2,200,000. A supplemental appropriation for 1959 is proposed for later transmission.

7. *Maintenance of physical facilities.*—This activity provides for physical maintenance of storehouses, equipment shelters, fire crew barracks, and like buildings.

8. *Maintenance of access roads.*—Provision is made for maintenance of 558 miles of access roads to highly valuable stands of timber in the Oregon and California grant lands of western Oregon. Funds provided for this purpose are reimbursed to the Treasury from the Oregon and California land grant fund.

9. *Weed control.*—This activity continues treatment of areas infested by halogeton and other poisonous and noxious weeds. The 1960 program provides for the treatment of 44,000 acres of public lands.

10. *General administration.*—Provision is made here for providing executive direction for the Bureau as well as furnishing such services as accounting, personnel administration, procurement, budget preparation, and internal auditing to the technical divisions of the Bureau.

CONSTRUCTION

For construction of access roads on or adjacent to the revested Oregon and California Railroad grant lands and Coos Bay Wagon Road grant lands *and on lands in the vicinity of Powderhorn Creek, Strawberry Creek, and Waugh Mountain, Colorado; Lemhi River, Idaho; Gallagher Creek, Your Name Creek, and Cottonwood Creek, Montana; Malpois Management Unit, New Mexico; John Day River, Rudio Mountain, Bonanza Unit, and Pine Creek, Oregon; and Shirley Mountain, Wyoming*; acquisition of rights-of-way and of existing connecting roads *on or* adjacent to [such] *the revested Oregon and California Railroad grant lands and Coos Bay Wagon Road grant* lands; acquisition of rights-of-way on [the revested Oregon and California Railroad grant lands, and on Coos Bay Wagon Road grant lands and] lands in the vicinity of [the Fraser River and Indian Creek, Colorado, and lands in the vicinity of Rattlesnake Mountain and Shirley Mountain, Wyoming, and lands in the vicinity of the Lemhi River, Idaho;] *McElwain Creek, Gallagher Creek, Your Name Creek, Garnet Range, Cottonwood Creek, and Union Creek, Montana; Malpois Management Unit, New Mexico; Elk Creek, Signal Tree, Kilches River, and Holmes Creek, Oregon; and* acquisition and construction of buildings and appurtenant facilities; [and construction and maintenance of recreational facilities in Alaska;] *$5,200,000*, to remain available until expended[, $4,685,000]: *Provided*, That the amount appropriated herein for road construction *on the revested Oregon and California Railroad grant lands and Coos Bay Wagon Road grant lands* shall be transferred to the Bureau of Public Roads, Department of Commerce: *Provided further*, That the amount appropriated herein for construction of access roads on the revested Oregon and California Railroad grant lands is hereby made a reimbursable charge against the Oregon and California land-grant fund and shall be reimbursed to the general fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876). *(16 U. S. C. 594; 43 U. S. C. 2; 69 Stat. 374; 70 Stat. 130; Department of the Interior and Related Agencies Appropriation Act, 1959.)*

Appropriated 1959, **$4,685,000** Estimate 1960, **$5,200,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Access roads	$5,750,967	$5,897,761	$5,100,000
2. Buildings	160,949	459,251	100,000
3. Recreational facilities	94,445	111,190	
Total obligations	6,006,361	6,468,202	5,200,000
Financing:			
Unobligated balance brought forward	−$2,309,563	−$1,783,202	
Unobligated balance carried forward	1,783,202		
Appropriation (new obligational authority)	5,480,000	4,685,000	$5,200,000

1. *Access roads.*—This estimate will continue construction of roads into stands of high value timber on the revested Oregon and California Railroad grant lands in western Oregon. The cost of these roads is reimbursed to the Treasury from the Oregon and California land-grant fund. Similar roads in the Coos Bay Wagon Road grant lands, also in western Oregon, will be constructed. Rights-of-way will be acquired and access roads constructed on public domain lands.

2. *Buildings.*—Provision is made for construction of buildings to house supplies, equipment, and personnel at isolated locations, principally in connection with fire control measures in Alaska.

3. *Recreational facilities.*—Public Law 84-507, approved May 4, 1956, authorized a 5-year program for the construction of recreational facilities along the highways of Alaska. The estimate for 1960 is included in the proposed Transitional grants to Alaska.

Administrative Provisions

Appropriations for the Bureau of Land Management shall be available for purchase of [twenty-eight] *twenty-three* passenger motor vehicles for replacement only; purchase of one aircraft [for replacement only]; purchase, erection, and dismantlement of temporary structures; and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title: *Provided*, That of appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than those expenditures for reforestation, for construction and operation and maintenance of access roads, and for acquisition of rights-of-way and of existing connecting roads adjacent to such lands, which are reimbursable to the Treasury) shall be reimbursed from the 25 per centum referred to in section C, title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund designated the "Oregon and California Land Grant Fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road Grant Fund": *Provided further*, That the amount appropriated for maintenance of access roads and $500,000 of the amount appropriated for reforestation on the Oregon and California Railroad grant lands, under the appropriation "Management of lands and resources", shall be reimbursed to the general fund of the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of said Act of August 28, 1937. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Range Improvements

(Indefinite)

For construction, purchase, and maintenance of range improvements pursuant to the provisions of sections 3 and 10 of the Act of June 28, 1934, as amended (43 U. S. C. 315), sums equal to the aggregate of all moneys received, during the current fiscal year, as range improvement fees under section 3 of said Act [and of], 25 per centum of all moneys received, during the current fiscal year, under section 15 of said Act, *and the amount designated for range improvements from grazing fees from Bankhead-Jones lands transferred to the Department of the Interior by Executive Order 10787, dated November 6, 1958;* to remain available until expended. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Appropriated (est.) 1959, **$686,713** Estimate 1960, **$776,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Improvements to—			
1. Public lands	$589,617	$749,500	$726,000
2. Farm Tenant Act lands			50,000
Total obligations	589,617	749,500	776,000
Financing:			
Unobligated balance brought forward	−202,603	−177,832	−115,045
Unobligated balance carried forward	177,832	115,045	115,045
Appropriation (new obligational authority)	564,846	686,713	776,000

This appropriation is derived from receipts from grazing of livestock on public lands and on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture. On public lands the fee from grazing includes a range improvement fee (usually 25%) which is available for range improvements when appropriated (43 U. S. C. 315i). It is proposed to follow a similar practice with respect to fees from Farm Tenant Act lands transferred under Executive Order 10787.

"Payments to Alaska, coal leases" (indefinite special fund)	43,068	110,000	110,000
Appropriation	42,929,132	50,064,670	56,144,400

1. *Expenses, sale of timber, etc., on reclamation lands.*—A portion of the receipts from timber sales on public lands set aside for reclamation purposes is used to cover the cost of sales (41 Stat. 202; 53 Stat. 1196).

2. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U. S. C. 315m).

3. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal funds (42 Stat. 1448), to be used for construction and maintenance of public roads and support of public schools (44 Stat. 740).

4. *Payments to Coos and Douglas Counties, Oreg, from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753–754).

5. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of the Oregon and California land-grant fund, plus the unearmarked portion of an additional 25%, are paid the counties in which the lands are situated, to be used as other county funds (39 Stat. 218).

6. *Payments to States (grazing fees).*—The States are paid 33⅓% of the fees from each grazing district on Indian lands ceded to the United States within the State's boundaries (43 U. S. C. 315j).

7. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U. S. C. 711).

8. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U. S. C. 315i, 315m).

9. *Payments to States from grazing receipts, etc., public lands within grazing districts.*—The States are paid 12½% of grazing-fee receipts from grazing district lands within their boundaries (43 U. S. C. 315b, 315i).

10. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing-fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U. S. C. 315).

11. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 37½% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U. S. C. 191), and from leases of potash deposits (30 U. S. C. 285), on public lands.

12. *Payments to Territory of Alaska, income and proceeds, Alaska school lands.*—Alaska was paid the income derived from sale of timber and disposition of lands or minerals on public lands reserved for school and other educational purposes (38 Stat. 1214; 53 Stat. 1243; 48 U. S. C. 353). This account will be discontinued in 1960 as the new State will assume administration of the lands.

13. *Payments to Alaska, coal leases.*—Alaska is paid 90% of all net profits from operation of Government mines, and all bonuses, royalties, and rentals under coal leases as provided by law (71 Stat. 282).

BUREAU OF INDIAN AFFAIRS

The responsibility of the United States toward the Indian people includes protection and development of trust property and the furnishing of services not otherwise available to Indians and which are normally provided other citizens through Government and private agencies. Active programs are being aimed toward the integration of like services to Indians and non-Indians through the same sources and toward increased Indian participation in the management of Indian-owned resources. States and counties are participating at an increasing rate in the service programs, usually with financing by the United States demanded because of the tax-exempt status of Indian lands. The ultimate goal of the entire program is to have the Indian people take their proper place in the social and economic life of the Nation on the same basis as other citizens.

Current authorizations:

EDUCATION AND WELFARE SERVICES

For expenses necessary to provide education and welfare services for Indians, either directly or in cooperation with States and other organizations, including payment (in advance or from date of admission), of care, tuition, assistance, and other expenses of Indians in boarding homes, institutions, or schools; grants and other assistance to needy Indians; maintenance of law and order, and payment of rewards for information or evidence concerning violations of law on Indian reservations or lands; and operation of Indian arts and crafts shops and museums; [$58,139,000] *$58,958,000. (25 U. S. C. 13; 48 U. S. C. 169, 250a, 250f, 631–640; 5 U. S. C. 5a; Department of the Interior and Related Agencies Appropriation Act, 1959.)*

1. *Educational assistance, facilities, and services.*—Financial assistance is extended to public schools enrolling Indian children. Where such facilities are inadequate or nonexistent, the Bureau operates boarding and day schools. Pupils included in the following table under Dormitories attend public schools but are domiciled in federally operated dormitories. The figures shown for public schools in 1959 and 1960 include children for whom grants are also made under Federal impact legislation administered by the Department of Health, Education, and Welfare. Assistance is also given to adult Indians through an education and training program.

NUMBER OF PUPILS

	1958 actual	*1959 estimate*	*1960 estimate*
Boarding schools	25,558	26,155	26,335
Dormitories	2,925	3,300	3,300

EDUCATION AND WELFARE SERVICES—Continued

3. *Relocation services.*—The relocation program (1) assists Indians from reservations to settle and secure permanent employment in non-Indian communities away from the reservation and (2) assists in a program of industrial development on or near reservations to provide local job opportunities. Financial assistance to move to and settle in the new community where employment opportunities have been developed is provided to those Indians who wish to relocate but do not have enough resources to leave the reservation.

NUMBER OF RELOCATIONS

	1958 actual	*1959 estimate*	*1960 estimate*
Persons relocated	5,728	6,750	6,750

4. *Maintaining law and order.*—Police services and tribal court operations are financed on Indian reservations, and special officers direct enforcement of Federal law.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*

This program promotes the economic advancement of the Indians through the utilization of their resources.

1. *Forest and range lands.*—This activity covers management, protection, and utilization of the forest, range and wildlife resources on nearly 50 million acres of Indian-owned lands.

	1958 actual	*1959 estimate*	*1960 estimate*
Timber cut:			
Million board-feet	426	500	575
Dollar value	$8,275,900	$9,500,000	$11,500,000
Number of cattle units grazed	785,000	785,000	785,000

2. *Fire suppression.*—Funds under this item provide for the payment of the cost of suppression and prevention of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

fires on or threatening Indian reservations. Approximately 60 million acres require protection.

3. *Agricultural and industrial assistance.*—Funds under this activity provide for improved methods in farming, homemaking, the management of a revolving loan credit program for small business enterprises, and formulation of plans for readjustment legislation pertaining to special trust relationships between Indian tribes and the Federal Government.

4. *Soil and moisture conservation.*—Land-use practices based on land inventories and soil conservation plans are introduced to control erosion and promote more effective utilization of soil and water resources. Approximately 24 million acres, or 42.5% of Indian-owned lands, are severely or critically eroded. The job of soil and moisture conservation is approximately 27% completed, an increase of 4% over 1957.

5. *Maintenance of roads.*—The Bureau of Indian Affairs road system which requires maintenance includes 17,360 miles of roads on Indian reservations.

6. *Development of Indian arts and crafts.*—Production and marketing of the products of Indian crafts are fostered through formation of production groups; establishing of standards; and improving of markets, design, and production methods.

7. *Management of Indian trust property.*—Banking services are provided for Indians; land is purchased, sold, exchanged, and leased; and Indian property and money rights are safeguarded. Consolidation or disposal of fractionated land holdings, especially in those areas affected by readjustment legislation, is to be accomplished.

	1958 actual	*1959 estimate*	*1960 estimate*
Cases pending, start of year	22,820	20,530	17,530
New and reactivated cases	65,102	65,000	70,000
Cases closed	67,392	68,000	78,000
Cases pending, end of year	20,530	17,530	9,530

8. *Repair and maintenance of buildings and utilities.*—Federal buildings and their related utility and communication systems are maintained.

	1958 actual	*1959 estimate*	*1960 estimate*
Square foot buildings maintained	19,658,000	20,750,000	21,550,000
Average amount available per square foot for maintaining buildings	$0.133	$0.15	$0.144

9. *Operation, repair, and maintenance of Indian irrigation systems.*—Approximately 300 irrigation systems serving about 864,000 acres of Indian and mixed-ownership lands are operated and maintained. About 81% of the cost is financed from collections from water users, leaving 19% to be met from funds appropriated under this activity.

11. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:

Obligations incurred for costs of other years, net			3,499,562	4,000,000					
Total program (obligations)			16,394,628	27,514,457	17,000,000				
Financing:									
Unobligated balance brought forward			−909,085	−1,514,457					
Unobligated balance carried forward			1,514,457						
Appropriation (new obligational authority)			17,000,000	26,000,000	17,000,000				

1. *Buildings and utilities.*—This consists of construction and additions to schools, dormitories, quarters, office and other buildings; improvement to sewer systems and waterworks; major repairs and rehabilitations of existing buildings and utilities; preparation of plans; and engineering supervision and surveys.

2. *Irrigation systems.*—This work consists of construction, extension, and rehabilitation of irrigation systems on Indian reservations for the utilization of irrigable lands.

3. *Land acquisition.*—Purchases are made to consolidate lands in heirship status.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$5,613	$4,788	$4,788	$4,788
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	5,070,523	8,820,607	12,820,607	6,820,607
Advances (payments for goods and services on order not yet received)	3,925	6,913	6,913	6,913
Work in process (goods and services to be costed to activities when completed)	264,112	11,427	11,427	11,427
Total selected resources at end of year	5,344,173	8,843,735	12,843,735	6,843,735
Selected resources at start of year (−)	−5,344,173	−8,843,735	−12,843,735	−12,843,735
Costs financed from obligations of other years, net (−)				−6,000,000
Obligations incurred for costs of other years, net		3,499,562	4,000,000

Status of Unfunded Contract Authorization

	1958 actual	1959 estimate	1960 estimate
Unfunded balance at beginning of year	$14,685,071	$14,685,071	$33,685,071
Contract authorization (new) (permanent)	12,000,000	32,000,000	12,000,000
Unfunded balance transferred to Proposed for later transmission		−1,000,000	
Unfunded balance at end of year	−14,685,071	−33,685,071	−31,085,071
Appropriation to liquidate contract authorization	12,000,000	12,000,000	14,600,000

1. *Road maintenance.*—This activity appears under Resources management appropriation in 1960.

2. *Federal-aid highway roads.*—The proposed road construction program for 1960 places emphasis on the completion of unfinished road projects necessary to the economy and community life of the areas served, and the reconstruction of roads to standards acceptable to those local governments willing to assume future maintenance responsibilities.

	1958 actual	*1959 estimate*	*1960 estimate*
Grading and draining (miles)	259	392	345
Surface (miles)	422	467	430
Bridge construction (running feet)	3,321	2,127	2,129
Surveys and plans (miles)	690	608	463

3. *Navajo-Hopi roads.*—The program for 1959 proposed the first step in bringing Routes 1 and 3 on the Navajo-Hopi reservation up to a standard acceptable to the States of Arizona and New Mexico so that they may assume future maintenance responsibilities. A supplemental of $1 million to liquidate contract authorizations for 1959 is anticipated under Proposed for later transmission.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*

Total obligations	1,199	147,000	

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans) shall be available for expenses of exhibits; purchase of not to exceed two hundred [sixty-five] *and eighty-five* passenger motor vehicles (*including twenty-five for police-type use without regard to the general purchase price limitation for the current fiscal year*) for replacement only, which may be used for the transportation of Indians; advance payments for service (including services which may extend beyond the current fiscal year) under contracts executed pursuant to the Act of June 4, 1936 (25 U. S. C. 452), *the Act of August 3, 1956* (*70 Stat. 986*), and legislation terminating Federal supervision over certain Indian tribes; purchase of ice for official use of employees; and expenses required by continuing or permanent treaty provisions. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

TRIBAL FUNDS

(Trust fund)

In addition to the tribal funds authorized to be expended by existing law, there is hereby appropriated $3,000,000 from tribal funds not otherwise available for expenditure for the benefit of Indians and Indian tribes, including pay and travel expenses of employees; care, tuition, and other assistance to Indian children attending public and private schools (which may be paid in advance or from date of admission); purchase of land and improvements on land, title to which shall be taken in the name of the United States in trust for the tribe for which purchased; lease of lands and water rights; compensation and expenses of attorneys and other persons employed by Indian tribes under approved contracts; pay, travel, and other expenses of tribal officers, councils, and committees thereof, or other tribal organizations, including mileage for use of privately owned automobiles and per diem in lieu of subsistence at rates established administratively but not to exceed those applicable to civilian employees of the Government; relief of Indians, without regard to section 7 of the Act of May 27, 1930 (46 Stat. 391), including cash grants; and employment of a recreational director for the Menominee Reservation and a curator for the Osage Museum, each of whom shall be appointed with the approval of the respective tribal councils and without regard to the classification laws: *Provided*, That in addition to the amount appropriated herein, tribal funds may be advanced to Indian tribes during the current fiscal year for such purposes as may be designated by the governing body of the particular tribe involved and approved by the Secretary: *Provided, however*, That no part of this appropriation or other tribal funds shall be used for the acquisition of land or water rights within the States of Nevada, Oregon, Washington, and Wyoming, either inside or outside the boundaries of existing Indian reservations, if such acquisition results in the property being exempted from local taxation. (*25 U. S. C. 123; Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Total financing	67,001,084	65,489,601	45,776,722

Funds held in trust for Indian tribes under the provisions of various acts are used for expenses of tribal governments, administration of Indian tribal affairs, employment of tribal attorneys, establishment and operation of tribal enterprises, and relief of Indians. The tribes are encouraged to develop plans for the beneficial use of their funds. Tribal funds are derived from various sources including revenue from tribal resources and enterprises.

Financing applied to program	2,918,385	2,326,000	2,123,000

This fund is used to assist Indians in acquiring livestock, farm, and other equipment and in establishing tribal business enterprises (25 U. S. C. 470, 471, 631). This fund and miscellaneous tribal funds provide the only source of loans for the great majority of Indians who cannot borrow from ordinary commercial credit sources because of their low economic status and lack of bankable security.

Budget program.—As of June 30, 1958, the principal of the fund amounted to $16.5 million, consisting of $13.8 million appropriated, and $2.7 million cattle settlements. Cattle settlements are payments made by the Indians for breeding stock furnished by the Government generally prior to establishment of this fund.

Operating results.—The deficit includes net writeoffs of loans receivable amounting to $104,018.79.

Unobligated balance carried forward		−134,014	−140,744
Financing applied to program			

This fund was transferred from the Housing and Home Finance Agency to the Secretary of the Interior under the provisions of Public Law 85–806, enacted August 28, 1958 (72 Stat. 974). The Secretary will use the $111,204, transferred from the Housing and Home Finance Agency, along with any other revenues that may be received from the Hoonah housing project for the purpose of liquidating said project in accordance with the provisions of law.

Budget program.—For 1958 this fund was accounted for by the Housing and Home Finance Agency as a part of the fund entitled Revolving fund (liquidating program), Office of the Administrator.

Operating results.—The retained earnings are expected to increase because of interest collections on loans receivable until such funds as may be needed are used for the purpose of liquidating the project.

Program by activities:			
Payment to Standing Rock Sioux Tribe of Indians (total costs—obligations)		$6,960,000	
Financing:			
Proposed supplemental appropriation		6,960,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 in the amount of $6,960,000 is anticipated for the purpose of developing individual and family plans, relocating, reestablishing, and providing other assistance designed to help improve the economic and social conditions of all recognized members of the Standing Rock Sioux Tribe of Indians.

BUREAU OF RECLAMATION

The Bureau plans, constructs, and operates facilities to irrigate lands, furnish domestic water supplies, and develop related hydroelectric power and flood control in the 17 Western States and Alaska.

Appropriations to the Bureau are made from the general fund and from three special funds. The special funds are (*a*) the reclamation fund, largely derived from certain irrigation and power revenues; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenues; (*b*) the Colorado River dam fund, derived from the revenues of the Boulder Canyon project; and (*c*) the Colorado River development fund, derived from transfers of money from the Colorado River dam fund. The estimates of appropriation for the budget year are summarized by source, as follows:

Appropriation title	*Estimate of appropriation*	*General fund*	*Reclamation fund*	*Colorado River dam fund*	*Colorado River development fund*
General investigations	$5,000,000	$500,000	$4,000,000	----------	$500,000
Construction and rehabilitation	135,410,000	40,410,000	95,000,000	----------	---------
Operation and maintenance	29,131,000	3,437,000	23,644,000	$2,050,000	---------
General administrative expenses	4,400,000	----------	4,400,000	----------	---------
Loan program	220,000	220,000	----------	----------	---------
Upper Colorado River Basin fund	77,035,000	77,035,000	----------	----------	---------
Total	251,196,000	121,602,000	127,044,000	2,050,000	500,000

The total appropriation request of $251,196,000 represents a decrease of $8,584,335 compared with the enacted appropriations of the current year and an increase of $51,221,777 compared with the preceding year.

Current authorizations:

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau, as follows:

GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans; formulating plans and preparing designs and specifications for authorized Federal reclamation projects or parts thereof prior to initial allocation of appropriations for construction of such projects or parts; and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects; to remain available until expended, [$4,556,000] *$5,000,000,* of which [$3,831,000] *$4,000,000* shall be derived from the reclamation fund and $500,000 shall be derived from the Colorado River development fund: *Provided,* That none of this appropriation shall be used for more than one-half of the cost of an investigation requested by a State, municipality, or other interest. (*Public Works Appropriation Act, 1959.*)

Appropriated 1959, **$4,556,000** Estimate 1960, **$5,000,000**

General fund	250,000	225,000	500,000
Appropriation	5,922,000	4,556,000	5,000,000

Surveys and investigations are made to determine the feasibility of potential reclamation projects; detailed plans are developed for authorized projects prior to appropriation of construction funds; and investigations are made for rehabilitation of existing Federal reclamation projects. Total investigations scheduled, excluding a number of investigations for which stream gaging only is in progress, are as follows:

Status	*1958 actual*	*1959 estimate*	*1960 estimate*
Prior year studies continuing	69	60	63
Prior year studies completed	11	28	18
Initiated or resumed and completed during the year	3	4	2
Initiated or resumed but not completed	19	21	12

The amount requested for the Bureau's normal planning program is $5,000,000 (an increase of $440,000 from the appropriation for the current year).

1. *Engineering and economic investigations.*—These are made to plan the development of river basins; to make feasibility investigations of potential projects prior to authorization; to make general engineering and research studies of reclamation problems either independently or in cooperation with local, State, or other Federal agencies; and to investigate new and improved engineering methods and materials, including studies of reservoir evaporation control.

2. *Advance planning.*—Detailed field data are collected, definite plans are prepared, and repayment plans completed for authorized projects, prior to obtaining appropriations for construction.

3. *Investigations of existing projects.*—These are made to determine the need and make plans for rehabilitation, financial adjustments, or water conservation on existing Federal reclamation projects.

4. *Alaskan investigations.*—These engineering and economic investigations relate to projects for the development and utilization of the water resources of Alaska (48 U. S. C. 487–487b).

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*

Appropriation (adjusted)	126,716,223	146,015,000	135,410,000

The program consists of preparation of designs and specifications for all projects subsequent to initial allocation for construction, award and servicing of construction contracts, construction of authorized projects, operation and maintenance during construction of completed features of projects, and rehabilitation of existing facilities. Investigations and advance planning for units of the Missouri River Basin project are also included.

The appropriation request of $135.4 million represents a decrease of $10.6 million from 1959.

The following workload summary table shows work continuing on 52 projects or units, with 9 scheduled for completion in 1960. No new starts are recommended for 1960. Bureau operations during the year will provide facilities for 137,400 new and supplemental acres of irrigated land and 48,000 kilowatts of new power generating capacity.

"Operation and maintenance," Southwestern Power Administration	−22,731		
"General administrative expenses," Bureau of Sport Fisheries and Wildlife	−6,315		
"General administrative expenses," Bureau of Commercial Fisheries	−759		
Appropriation (adjusted)	27,787,495	$27,500,000	$29,131,000
Proposed supplemental due to pay increases		924,000	

Provision is made for operation and maintenance of (*a*) the power-generating and transmission facilities of completed projects (except the Fort Peck transmission system financed under a revolving fund), and the irrigation and water-supply facilities on certain projects; (*b*) the Colorado River front work and levee system; and (*c*) Boulder City, Nev. Provision is also made for flood-control operations on certain projects and for soil and moisture conservation operations and halogeton control on public lands under jurisdiction of the Bureau.

The Bureau operates and maintains the power-generation and transmission facilities, and generally the storage dams and reservoirs, of completed projects. Where necessary, irrigation works are operated and maintained until the water users are able to undertake the responsibilities. In 1960 a total of 41 projects and 23 Missouri River Basin units and divisions will be operated and maintained for irrigation, power, municipal and industrial water supplies. Of these, 20 projects and 5 Missouri River Basin units have power facilities. Energy sales and revenues from power operations are as follows:

	Kilowatt-hours of energy (millions)	*Gross revenues*
Fiscal year:		
1958	29,043	$70,238,611
1959	29,906	71,373,510
1960	30,165	72,398,727

Commercial power is sold to wholesale customers such as municipalities, Rural Electrification Administration-financed cooperatives, private utilities, and other Government agencies. These revenues are deposited to the reclamation fund, the Colorado River dam fund, or the general fund.

35. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects)	$3,939,614	$4,010,595	$4,077,279	$4,104,198
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	1,917,997	1,337,438	703,876	684,976
Total selected resources at end of year	5,857,611	5,348,033	4,781,155	4,789,174
Selected resources at start of year (−)	−5,857,611	−5,348,033	−4,781,155	−4,781,155
Adjustment of selected resources reported at start of year		96,342		
Costs financed from obligations of other years, net (−)		−413,236	−566,878	
Obligations incurred for costs of other years, net				8,019

LOAN PROGRAM

For loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Acts of July 4, 1955, as amended (43 U. S. C. 421a–421d), and August 6, 1956 (43 U. S. C. 422a–422k), as amended (71 Stat. 48), including expenses necessary for carrying out the program, [$5,434,000] *$220,000*, to remain available until expended[: *Provided*, That the unexpended balance on June 30, 1958, of sums heretofore appropriated for the foregoing purposes under the head "Construction and rehabilitation" shall be merged with this appropriation]. (*Public Works Appropriation Act, 1959.*)

Appropriation 1959, [a] **$9,637,000** Estimate 1960, **$220,000**

[a] Includes $4,203,000 appropriated in Supplemental Appropriation Act, 1959.

Unobligated balance carried forward		419,318	419,318
Appropriation (new obligational authority)		9,637,000	220,000

This appropriation from the general fund provides for loans to non-Federal organizations for construction and rehabilitation of distribution systems and for loans and grants to enable non-Federal organizations to construct small irrigation projects. Repayments of these loans will be deposited in the reclamation fund.

1. *Distribution systems.*—Loans are made to irrigation districts for construction of distribution systems on authorized Federal reclamation projects.

2. *Small projects.*—Loans and grants not exceeding a total of $5,000,000 are made to non-Federal agencies for construction of small projects. Grants may be made for those purposes which would be nonreimbursable if the project were to be constructed by the Federal Government under reclamation law. An amount of $4,860,000 is proposed for later transmission and appears below.

3. *Administration.*—Funds are provided for necessary expenses to carry out the loan program.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1957, $12,302,000; 1958, $13,849,026; 1959, $13,099,537; and 1960, $4,532,523.

BUREAU OF RECLAMATION—Continued

Current authorizations—Continued

SPECIAL FUNDS—Continued

created by the Act of June 17, 1902 (43 U. S. C. 391), the Act of December 21, 1928 (43 U. S. C. 617a), and the Act of July 19, 1940 (43 U. S. C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and Maintenance" and "General Administrative Expenses" shall revert and be credited to the special fund from which derived. (*Public Works Appropriation Act, 1959.*)

ADMINISTRATIVE PROVISIONS

Appropriations to the Bureau of Reclamation shall be available for purchase of not to exceed [one hundred and ten] *eighty-four* passenger motor vehicles [of which one hundred and nine are] for replacement only; payment of claims for damage to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment, except as otherwise provided for, of compensation and expense of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts without reimbursement or return under the reclamation laws; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U. S. C. 461–467)[: *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U. S. C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amounts provided for reconnaissance, basin surveys, and general engineering and research under the head "General Investigations"].

Allotments to the Missouri River Basin project from the appropriation under the head "Construction and Rehabilitation" shall be available additionally for said project for those functions of the Bureau of Reclamation provided for under the head "General Investigations" (but this authorization shall not preclude use of the appropriation under said head within that area), and for the continuation of investigations by agencies of the Department on a general plan for the development of the Missouri River Basin. Such allotments may be expended through or in cooperation with State and other Federal agencies, and advances to such agencies are hereby authorized.

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law.

[No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U. S. C. 665).]

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefit of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual, when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

Not to exceed $225,000 may be expended from the appropriation "Construction and Rehabilitation" for work by force account on any one project or Missouri Basin unit and then only when such work is unsuitable for contract or no acceptable bid has been received and, other than otherwise provided in this paragraph or as may be necessary to meet local emergencies, not to exceed 12 per centum of the construction allotment for any project from the appropriation "Construction and Rehabilitation" contained in this Act shall be available for construction work by force account: *Provided, That, when determined by the Secretary to be in the public interest, these limitations may be exceeded.*

[Not to exceed $125,000 of the funds made available for the Solano project, California, shall be available for the construction of safety and public-use facilities which shall be nonreimbursable and nonreturnable.]

[Not to exceed $600,000 of the amount appropriated herein for the Washita Basin project, Oklahoma, shall be nonreimbursable, representing that portion of the cost of the Foss Dam and Reservoir allocated to furnish a water supply for the Clinton-Sherman Air Force Base.] (*Public Works Appropriation Act, 1959.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations, as follows:
"Construction, general," rivers and harbors and flood control, Army.
"Construction," Bureau of Indian Affairs.
"International educational exchange activities," Department of State.
"United States dollars advanced from foreign governments, United States educational exchange program," Department of State.

1. *Colorado River dam fund, Boulder Canyon project, payment of interest on advances from the Treasury.*—Interest is paid to the Treasury on moneys advanced for construction (43 U. S. C., ch. 12A).

2. *Colorado River dam fund, Boulder Canyon project, payments to States of Arizona and Nevada.*—Annual payments of $300,000 each in lieu of taxes are made to Arizona and Nevada, from operation of the Boulder Canyon project (43 U. S. C., ch. 12A).

3. *Operation, maintenance, and replacement of project works, North Platte project.*—This fund is derived from operation of project powerplants, leasing of project grazing and farm lands, sale or use of townsites, and sale or rental of surplus water (66 Stat. 755, sec. 4).

4. *Payments to the Farmers' irrigation district (North Platte project, Nebraska-Wyoming).*—Payments are made to the Farmers' irrigation district on behalf of the Northport irrigation district for water carriage (62 Stat. 273, as amended).

5. *Refunds and returns.*—Overcollections are refunded and amounts of unapplied deposits are returned (64 Stat. 689).

Financing applied to program	1,356,641	2,884,619	3,802,000

This fund defrays the operating expenses of the generation and transmission of power from Fort Peck project, Corps of Engineers, Army, and emergency expenses to insure continuous operation (16 U. S. C. 833).

Budget program.—Operating costs, funded, will be $29,124 over the current year. The increase in capital outlay is related to continued construction of the Fort Peck-Dawson County 230-kilovolt transmission line.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Supplies and deferred charges	$250,835	$145,760	$133,458	$143,458
Unpaid undelivered orders	6,960	192,804	220,000	350,000
Prepayments		20,395		
Total selected resources at end of year	257,795	358,959	353,458	493,458
Selected resources at start of year (−)		−257,795	−358,959	−353,458
Costs financed from obligations of other years, net (−)			−5,501	
Obligations incurred for costs of other years, net		101,164		140,000

Financing.—The operation of the Fort Peck project power and transmission facilities are financed by this fund and capital outlays for transmission by advances from the appropriation Construction and rehabilitation. Capital outlays for the dam, reservoir, and powerplant are financed by Corps of Engineers, Army, appropriations. The accompanying statements consolidate the financing from the Continuing fund for emergency expenses, Fort Peck project, Montana and Construction and rehabilitation.

Operating results.—Net income is estimated at $1.6 million for 1960, an increase over prior years, resulting from increased power revenues. Earnings in excess of current operating needs are retained so as to maintain a continuing emergency fund of $0.5 million. The balance is paid into the Treasury as miscellaneous receipts toward amortizing with interest the costs of the dam and reservoir allocated to power and the costs of the powerplant and transmission. Such payments totaled $1.2 million in 1958 and are estimated at $1.2 million in 1959 and $1.6 million in 1960.

Unobligated balance carried forward	−1,246,024		
Financing applied to program	36,669,950	69,344,409	77,100,050

[1] Includes contributions from city, State, and Federal governmental units as follows: 1958 actual, $1,776,612; 1959 estimate, $65,050; 1960 estimate, $65,050.

The fund defrays the cost of construction, operation, and maintenance of the Colorado River storage project and participating projects, a comprehensive basin wide development which will make possible the control and utilization of the water resources of the Upper Colorado River Basin (43 U. S. C. 620–620o). The storage project will regulate and conserve the flows of the Colorado River and its major tributaries through holdover storage in large reservoirs, thus making possible increased consumptive use in the upper basin, and will also produce hydroelectric power. Excess revenues from the sale of power will be applied to repayment of costs allocated to irrigation which are beyond the ability of the water users to repay. The participating projects consist of irrigation and municipal and industrial water supply developments.

Construction costs of the storage project and participating projects are, by law, financed through appropriations advanced to the fund. Project revenues will be credited to the fund and will cover costs of operation and maintenance. Revenues in excess of these costs will be utilized to repay to the United States project costs allocated to power, municipal and industrial water supply and irrigation.

Budget program—1. *Colorado River storage project*—(*a*) *Flaming Gorge unit.*—The diversion tunnel will be completed and concrete placement in the dam and powerhouse will be underway. Reservoir clearing operations and highway relocation will be started. Overall the unit will be 44% completed by the end of 1960.

(*b*) *Glen Canyon unit.*—Concrete placement in the dam and powerplant will be continued and procurement of major powerplant equipment will be initiated. The unit will be over 40% completed by the close of 1960.

(*c*) *Navajo unit.*—Construction will be continued on the unit and work will be over 46% completed by the end of 1960.

(*d*) *Transmission division.*—Investigations, final planning, and preparation of specifications will be continued on the Glen Canyon-Flaming Gorge transmission line. Studies will be continued on other transmission lines.

(*e*) *Advance planning.*—Detailed studies of 1 storage unit and 2 participating projects will be completed. Detailed studies of 4 other participating projects will be continued.

2. *Participating projects*—(*a*) *Paonia project.*—Work on Paonia Dam and Reservoir, including relocations, will continue.

(*b*) *Central Utah project, Vernal unit.*—Work on the unit will be continued, principally on Stanaker Dam.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Service facilities	$1,205,420	$9,167,240	$15,868,523	$14,986,523
Supplies, deferred charges, etc	48,346	894,013	260,204	458,579
Unpaid undelivered orders	3,228,385	2,003,939	2,713,454	4,445,454
Total selected recources at end of year	4,482,151	12,065,192	18,842,181	19,890,556
Selected resources at start of year (−)		−4,482,151	−12,065,192	−18,842,181
Increase or decrease (−) in selected resources		7,583,041	6,776,989	1,048,375
Adjustment due to recovery of prior year obligations		20,000		
Property or services transferred in (−) without charge		−32,857	−168,851	−17,000
Obligations incurred for costs of other years, net		7,570,184	6,608,138	1,031,375

Financing.—The cost of the authorized storage units and participating projects is estimated to be $1,055 million of which $116.2 million has been appropriated. The 1960 appropriation request of $77 million will leave a

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

balance to complete the authorized work of $861.8 million.

Operating results.—During the construction period, only minor income is realized and expense is capitalized, so the fund will show neither income nor expense for 1960.

Net effect of budget expenditures will be maintained at $65 million in 1960.

The total investment of the Government in the fund is expected to reach $204.5 million by the end of 1960.

LOAN PROGRAM

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Small projects: Loans (total program costs)		$1,990,000	$2,870,000
2. Relation of costs to obligations:			
Costs financed from obligations of other years (unpaid undelivered orders), net (−)			−2,870,000
Obligations incurred for costs of other years (unpaid undelivered orders), net		2,870,000	
Total program (obligations)		4,860,000	
Financing:			
Proposed supplemental appropriation		4,860,000	

Under existing legislation, 1959.—An amount of $4,860,000 is anticipated as a 1959 supplemental for loans to non-Federal agencies for construction and rehabilitation of small projects as authorized by law. The funds will be for loans to Roosevelt Water Conservation District, Arizona, $2,780,000; and Goleta County Water District,California, $2,080,000.

2. *Relation of costs to obligations.*—Year-end balance of unpaid undelivered orders for 1959 is $2,870,000.

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR

[SEC. 201. Appropriations in this title available for travel expenses shall be available for expenses of attendance of officers and employees at meetings or conventions of members of societies or associations concerned with the work of the bureau or office for which the appropriation concerned is made.]

SEC. [202] *201.* Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement or repair of buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided,* That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. [203] *202.* The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

SEC. [204] *203.* Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U. S. C. 686): *Provided,* That reimbursements for cost of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. [205] *204.* No part of any funds made available by this Act to the Southwestern Power Administration may be made available to any other agency, bureau, or office for any purposes other than for services rendered pursuant to law to the Southwestern Power Administration. (*Public Works Appropriation Act, 1959.*)

GEOLOGICAL SURVEY

Current authorizations:

SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its Territories and possessions, *and other areas as authorized by law (72 Stat. 837)*; classify lands as to mineral character and water and power resources; give engineering supervision to power permits and Federal Power Commission licenses; enforce departmental regulations applicable to oil, gas, and other mining leases, permits, licenses, and operating contracts; *control the interstate shipment of contraband oil as required by law (15 U. S. C. 715);* and publish and disseminate data relative to the foregoing activities; [$36,915,000] *$42,517,600,* of which [$6,950,000] *$7,450,000* shall be available only for cooperation with States or municipalities for water resources investigations: *Provided,* That no part of this appropriation shall be used to pay more than one-half the cost of any topographic mapping or water resources investigations carried on in cooperation with any State or municipality. (*43 U. S. C. 31; Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, [a] **$38,415,000** Estimate 1960, [b] **$42,517,600**

[a] Includes $1,500,000 appropriated in Supplemental Appropriation Act, 1959.

[b] Includes $217,600 for activities previously carried under "Salaries and expenses," Office of Oil and Gas. The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

The Geological Survey provides basic scientific data concerning the water, land, and mineral resources of the Nation, supervises the development and production of minerals and mineral fuels on leased Federal and Indian lands, and enforces the provisions of the Connally Hot Oil Act.

1. *Topographic surveys and mapping.*—Topographic maps portray the elevation, shape, and position of the natural and manmade features of the earth's surface; provide engineering information for (*a*) mineral, water, and other natural resources investigations, (*b*) engineering and industrial development, and (*c*) military and civil defense. This program will provide maps for those areas where investigation and development are most imminent, and areas to which the Department of Defense has assigned a high priority. In 1960 standard maps for an estimated 125,000 square miles of the United States and its Territories will be compiled, compared with 120,000 in 1959, 127,000 in 1958, and 122,000 in 1957.

2. *Geologic and mineral resource surveys and mapping.*—These investigations (*a*) provide an accurate appraisal of the Nation's mineral resources, (*b*) provide data needed to classify the public lands and to explore for mineral raw materials, and (*c*) develop new concepts and techniques needed in the search for hidden deposits of useful minerals. The work includes the collection and evaluation of data on geologic conditions for use in engineering construction and water development projects; and the preparation of large-scale geologic maps of the United States, its Territories, and possessions. Geologic mapping is now progressing at the rate of approximately 40,000 square miles annually. Geologic mapping and other research in geologic processes, in geochemistry, and in geophysics, are planned under the long-range minerals program.

3. *Water resources investigations.*—This program includes determinations of the flow, stage, and sediment discharge of rivers; reservoir contents; locations and safe yields of underground waters; the chemical quality and temperature of waters; and the availability of water supplies as related to present and future demands. These data are used to plan water-supply projects for military, industrial, and domestic purposes, as well as irrigation, hydroelectric power, navigation, flood control, highway and bridge design, and land-use projects. The 1960 program continues to emphasize studies which will develop a more thorough understanding of the principles and physical processes of water's occurrence and movement. Owing to the increase in State offerings and interest in cooperative water resources investigations, there will be some expansion in this phase of the program.

4. *Soil and moisture conservation.*—Basic data and advice concerning hydrologic and geologic problems are provided to other bureaus. The program includes surveys of rates of erosion, effects of soil and moisture treatment measures, and studies for improving the design of remedial measures.

5. *Conservation of lands and minerals.*—Prospecting, development, and production of minerals and mineral fuels on leased Federal, Indian, and outer Continental Shelf lands are regulated. Federally owned and controlled lands are classified as to their mineral and water power values. The Federal Petroleum Board conducts investigations in support of State conservation laws to prevent the interstate shipment of contraband oil. In the current year approximately 187,000 leased properties, oil wells, and mines are being supervised. These leases are expected to produce oil, gas, and other minerals, valued at $910 million, and render royalty returns of about $100 million. The States which produce the minerals receive 37½% of the royalties; the Reclamation fund, 52½%; and 10% is retained in the Treasury. In 1960 it is anticipated that the workload will aggregate 205,000 leases, wells, and mines, and the production and royalty values will reach $1 billion and $110 million, respectively. The classification functions provide the foundation for the system of public-land administration prescribed by mineral leasing and land disposal laws. Owing to the unprecedented rate of development of the Nation's oil and gas resources, increased demands are being made upon the Survey for mineral classification services. In 1960 it is expected that some 110,000 technical classification reports will be completed.

Reimbursable obligations.—Reimbursements from non-Federal sources are from States and municipalities for making cooperative topographic and geologic surveys and water resources investigations (43 U. S. C. 48), proceeds from sale to the public of copies of photographs and records (43 U. S. C. 45), proceeds from sale of personal property (40 U. S. C. 481 (c)), and reimbursements from permittees and licensees of the Federal Power Commission (16 U. S. C. 797). Reimbursements from other Federal agencies (31 U. S. C. 686) are for special purpose mapping and investigations performed at the request of the financing agency, much of which contributes to the basic objectives of the Geological Survey.

The unobligated balance carried forward each year includes $400,000 cash advance to pay the expenses of reim-

Total obligations	58,638,722	61,739,600	62,709,600

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed [ninety-two] *fifty-one* passenger motor vehicles, for replacement only; reimbursement of the General Services Administration for security guard service for protection of confidential files; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for gaging stations; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed, as authorized by law, to represent the United States in the negotiation and administration of interstate compacts. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations as follows:
"Construction," Bureau of Indian Affairs.
"Resources management," Bureau of Indian Affairs.
"General investigations," Bureau of Reclamation.
"Construction and rehabilitation," Bureau of Reclamation.
"Revolving fund, Defense Production Act," funds appropriated to the President.
"Watershed protection," Soil Conservation Service, Department of Agriculture.
"Construction of Indian health facilities," Public Health Service, Department of Health, Education, and Welfare.
"Research, development, test, and evaluation, Navy."
"American sections, International Commission," Department of State.
"United States dollars advanced from foreign governments, United States educational exchange program," Department of State.

Permanent authorizations:

PAYMENT FROM PROCEEDS, SALE OF WATER, MINERAL LEASING ACT OF 1920, SEC. 40 (D)

(Indefinite special fund)

Appropriated (estimate) 1959, **$600** Estimate 1960, **$600**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance brought foward	−$10,495	−$10,991	−$11,591
Unobligated balance carried forward	10,991	11,591	12,191
Appropriation (new obligational authority)	496	600	600

When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from the sale of water from existing wells (30 U. S. C. 221–229). No obligations are anticipated in 1960.

Intragovernmental funds:

ADVANCES AND REIMBURSEMENTS

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Topographic surveys and mapping	$491,736

SURVEYS, INVESTIGATIONS, AND RESEARCH

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Topographic surveys and mapping		$173,000	
2. Geologic and mineral resource surveys and mapping		450,000	
3. Water resources investigations		111,000	
4. Soil and moisture conservation		4,000	
5. Conservation of lands and minerals		76,000	
6. General administration		4,000	
Total obligations		818,000	
Financing:			
Proposed supplemental appropriation		818,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to finance pay raises for engineers and scientists.

BUREAU OF MINES

Current authorizations:

CONSERVATION AND DEVELOPMENT OF MINERAL RESOURCES

For expenses necessary for promoting the conservation, exploration, development, production, and utilization of mineral resources, including fuels, in the United States, its Territories, and possessions; and developing synthetics and substitutes; [$18,339,000] *$21,277,000. (30 U. S. C. 1–11; 50 U. S. C. 161–166; Department of the Interior and Related Agencies Appropriation Act, 1959.)*

Appropriated 1959,[a] **$19,589,000** Estimate 1960, **$21,277,000**

[a] Includes $1,250,000 appropriated in Supplemental Appropriation Act, 1959.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Bituminous coal	$5,929,714	$6,110,000	$6,216,000
2. Anthracite coal	816,168	930,000	938,000
3. Petroleum, natural gas, and oil shale	2,398,866	2,599,000	2,663,000
4. Ferrous metals	3,229,131	3,630,330	3,683,000
5. Nonferrous metals	4,304,976	5,222,982	5,307,000
6. Nonmetallic minerals	1,931,827	2,093,000	2,129,000

Obligations incurred for costs of other years, net	61,665		
Total program (obligations)	18,969,378	20,873,310	21,277,000
Financing:			
1959 appropriation available in 1958	−53,690	53,690	
Unobligated balance no longer available	13,495		
New obligational authority	18,929,183	20,927,000	21,277,000
New obligational authority:			
Appropriation	$19,275,183	$19,589,000	$21,277,000
Transferred to "Trust Territory of the Pacific Islands," Office of Territories (72 Stat. 54)	−346,000		
Appropriation (adjusted)	18,929,183	19,589,000	21,277,000
Proposed supplemental due to pay increases		1,338,000	

[1] Includes capital outlay as follows: 1958, $1,447,946; 1959, $1,372,000; 1960, $1,340,000.

Provision is made for conserving, evaluating, and developing mineral resources.

1. *Bituminous coal.*—Scientific research and engineering investigations are carried out on the chemical and physical properties of coal and its mining, preparation, combustion, carbonization, and gasification. Laboratory research is conducted to find feasible methods for converting coal to fluid fuels for better utilization in the Nation's machines. Coal samples are analyzed; efficiency of coal-mining methods is evaluated; and economic statistical studies are performed. Research is conducted to discover causes of explosions in coal mines and to improve methods of preventing explosions. Tests are conducted on explosives and blasting devices to determine their permissibility for use in mining operations.

2. *Anthracite coal.*—Research is conducted to develop new and improve present uses for anthracite; improved mining and preparation methods are developed; and basic economic data are prepared on the suitability of anthracite for metallurgical application, on the performance of crushers, and on the operation of a coal planer. Inspection is conducted under the Mine Drainage Act.

3. *Petroleum, natural gas, and oil shale.*—Research is conducted in laboratories and in oil and gas fields to conserve these resources by improving the processes of recovery and utilization. Research is coordinated with work done by other Government agencies, educational institutions, and industry. Economic and statistical information is analyzed to provide a factual basis for industry operations and governmental policy. Technologic research is carried on in resources production, storage, and utilization of helium. Research is conducted on oil shale and shale oil to determine the composition of the various products, to test the applicability of those products to different uses, and to determine the basic chemistry and physics of the refining processes.

4. *Ferrous metals.*—This includes: (*a*) research on use of low-grade ores, conservation of raw materials, and improved methods for steelmaking; (*b*) investigation of manganese occurrences and use of low-grade manganiferous materials; (*c*) investigation of domestic chromite deposits; (*d*) studies to lower production costs of off-grade ores; (*e*) research on use of alloying metals to produce iron and steel products and high-temperature alloys; and (*f*) the dissemination of data on the production and distribution of these metals.

5. *Nonferrous metals.*—This includes: (*a*) investigations and development of new sources of copper, lead, and zinc, recovery of tin and mercury from low-grade ore, and new uses for arsenic; (*b*) research in metallurgy to develop economic and efficient methods for processing complex low-grade and currently submarginal materials; (*c*) research on resources and utilization of light metals; (*d*) development of basic information on properties and uses of ores and metals for realization of potential military and civilian uses and to increase recovery and utilization of scrap; (*e*) development of information on domestic reserves of rare and precious metals and materials; (*f*) research to improve the quality of rare metals and related products; (*g*) research to develop economic processes for the recovery of various rare and precious metals; and (*h*) economic and statistical studies on nonferrous metals.

6. *Nonmetallic minerals.*—The Bureau's program on nonmetallic minerals is primarily designed to develop adequate supplies of various minerals that are in short supply, or of minerals, supplies of which must be imported and are therefore vulnerable in emergencies. These problems of nonmetallic mineral supply are attacked by: (*a*) field investigations of mineral deposits; (*b*) laboratory research on the benefication of nonmetallic minerals; (*c*) research on the development of synthetic minerals as substitutes; and (*d*) research to develop more efficient

BUREAU OF MINES—Continued

Current authorizations—Continued

CONSERVATION AND DEVELOPMENT OF MINERAL RESOURCES—Con.

methods of using our available nonmetallic minerals.

7. *Foreign mineral activities.*—The Bureau analyzes technical and economic data on foreign mineral resources, production, consumption, and international trade for Government use in coping with problems of mineral supply and to assist industry in planning domestic and foreign minerals ventures.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects)	$766,818	$640,780	$675,000	$675,000
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	1,227,019	1,301,139	1,277,074	1,277,074
Advances (payments for goods and services on order not yet received)		63,157		
Total selected resources at end of year	1,993,837	2,005,076	1,952,074	1,952,074
Selected resources at start of year (−)		−1,993,837	−2,005,076	−1,952,074
Adjustment of selected resources reported at start of year		50,426		
Costs financed from obligations of other years, net (−)			−53,002	
Obligations incurred for costs of other years, net		61,665		

A supplemental appropriation for 1959 is anticipated under Proposed for later transmission to provide for pay increases for engineers and scientists.

1. *Inspections, investigations, and rescue work.*—The objectives for 1960 are (a) to inspect, at least once annually, every active coal mine regularly employing more than 14 men underground, to take action to bring about compliance with mandatory provisions and make recommendations to gain compliance with the voluntary provisions of law; (b) to inspect annually, or as necessary, underground coal mines regularly employing less than 15 men, and all strip mines, and to report on hazards observed with appropriate recommendations to correct the hazards; and (c) to conduct investigations of accidents and rescue work to reduce working hazards, safeguard the health of workers, and promote efficiency in the mineral industries. The Bureau encourages accident prevention through education and safety organizations, exhibits, demonstrations, instruction in accident prevention, and first-aid and mine-rescue methods. Research is conducted on the support of mine roof and control of overburden, and equipment is tested for use in mines and plants where explosive atmospheres may be encountered. The Bureau also conducts field and laboratory studies on ventilation of mines, methods of allaying mineral dusts, prevention of dust accumulations, effective use of rock dust to prevent widespread coal-dust explosions, and safe blasting practices.

Appropriation (adjusted)	1,133,069	1,095,000	1,197,000
Proposed supplemental due to pay increases	.....	102,000	.....

This appropriation provides for the immediate Office of the Director and Deputy Director, the administrative division in Washington, and the top executive and administrative staffs in the five regional offices. The balance of the cost of administering the Bureau is charged to program funds appropriated directly or transferred from Department of Defense, Atomic Energy Commission, General Services Administration, and other agencies.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

vate sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided further*, That the sums made available for the current fiscal year to the Departments of the Army, Navy, and Air Force for the acquisition of helium from the Bureau of Mines shall be transferred to the Bureau of Mines, and said sums, together with all other payments to the Bureau of Mines for helium, shall be credited to the special helium production fund, established pursuant to the Act of March 3, 1925, as amended (50 U. S. C. 164 (c)): *Provided further*, That the Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Allocations Received From Other Accounts

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations as follows:
"Army industrial fund."
"Construction and rehabilitation," Bureau of Reclamation.
"Military construction, Army."
"Military construction, Navy."
"Operating expenses," Atomic Energy Commission.
"Procurement of equipment and missiles, Army."
"Research, development, test, and evaluation, Army."
"Research, development, test, and evaluation, Navy."
"Revolving fund, Defense Production Act," funds appropriated to the President.

Public enterprise funds:

Development and Operation of Helium Properties, Bureau of Mines

Unobligated balance carried forward	−4,074,814	−4,258,860	−2,000,489
Financing applied to program	7,348,726	6,447,469	12,019,447

[1] Excludes property transferred in without charge, net as follows: June 30, 1958, $21,605; 1959, $4,737,581; and 1960, $12,025,000.

This fund provides for the conservation, development, production, and sale of helium. Production is primarily for the Army, Navy, Air Force, and the Atomic Energy Commission, who reimburse the fund for products received. Sales are also made to non-Federal consumers for medical, scientific, and commercial use (50 U. S. C. 164).

Budget program.—Operating costs are rising in keeping with the increase in production resulting from the recent completion of a new plant and the rehabilitation of existing plants.

The increase in capital outlay provides chiefly for the development of new sources of helium, the improvement of production facilities, and the purchase of tank cars.

Operating results.—Retained earnings are used to meet the financial requirements of the above program which is expanding to meet the growing demand for helium.

Relationship of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Helium for sale	$41,519	$64,277	$69,973	$56,131

CONSERVATION AND DEVELOPMENT OF MINERAL RESOURCES

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Bituminous coal		$106,000	
2. Anthracite coal		8,000	
3. Petroleum, natural gas, and oil shale		64,000	
4. Ferrous metals		52,000	
5. Nonferrous metals		84,000	
6. Nonmetallic minerals		36,000	
Total program (costs—obligations)		350,000	
Financing:			
Proposed supplemental appropriation		350,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to cover increased pay costs for engineers and scientists.

NATIONAL PARK SERVICE

The Service administers national parks and other areas of unusual historic, scenic, scientific, or recreational character in the interest of their preservation as well as their public use and makes studies of the recreation resources of the United States in cooperation with Federal, State, and local agencies.

1960 will be the fourth year of the 10-year program, Mission 66, to provide personnel and facilities needed to serve the ever increasing number of visitors to park areas, and at the same time, preserve park values. Visitation to parks is expected to increase from 60 million in 1958 to over 80 million in 1966.

Current authorizations:

MANAGEMENT AND PROTECTION

For expenses necessary for the management and protection of the areas and facilities administered by the National Park Service, including protection of lands in process of condemnation; and for plans, investigations, and studies of the recreational resources (exclusive of preparation of detail plans and working drawings) and archeological values in river basins of the United States (except the Missouri River Basin); [$14,632,000] *$17,000,000.*

[For an additional amount, $50,000 and not to exceed $20,000 and not to exceed $25,000 of the appropriations under this head in the Department of the Interior and Related Agencies Appropriation Acts, 1957 and 1958 (Public Laws 573, Eighty-fourth Congress and 85–77) respectively, shall be available during the current fiscal year for reimbursements to the District of Columbia for benefit payments made for those fiscal years pursuant to the Act of August 21, 1957 (71 Stat. 399): *Provided*, That any costs in excess of the amounts stated herein shall be reimbursed from this appropriation for the current fiscal year.] *(5 U. S. C. 124–132; 16 U. S. C. 1, 17k–n, 431–433, 459r, 460, 460a–2, 461–467, 590a, 590f; Act of May 29, 1930 (46 Stat. 482–483); Act of June 10, 1948 (62 Stat. 350); Act of June 30, 1949 (63 Stat. 612); Department of the Interior and Related Agencies Appropriation Act, 1959; Supplemental Appropriation Act, 1959.)*

Appropriated 1959, **$14,682,000** Estimate 1960, **$17,000,000**

New obligational authority:			
Appropriation	$14,540,094	$14,682,000	$17,000,000
Transferred to "Trust Territory of the Pacific Islands" (71 Stat. 236)	−13,000		
Appropriation (adjusted)	14,527,094	14,682,000	17,000,000
Reappropriation[1]		45,000	
Proposed supplemental due to pay increases		1,188,500	

1. *Management of park and other areas.*—The 189 park and other areas comprise about 24 million acres located in 41 States, the District of Columbia, Hawaii, Puerto Rico, and the Virgin Islands. The increase proposed is to provide for (1) administration of 9 additional areas; (2) leasing commercial communication facilities; (3) reallocation of park ranger positions; (4) expansion of administrative supervision to better coordinate protection functions; (5) operation of new facilities constructed or under construction; and (6) added visitor services and protection in the parks as a result of the continued increase in visitation. Actual and estimated visitors and revenue receipts follow:

	Calendar year visitors	*Fiscal year receipts*
1957 actual	59,284,869	$5,658,040
1958 actual		5,744,920
1958 estimate	60,000,000	
1959 estimate	62,000,000	5,946,800
1960 estimate	65,000,000	6,371,800

2. *Forestry and fire control.*—Forests, brushland, or grassland on over 11 million acres are protected from fire, destructive insects, diseases, and other preventable damage. The increase proposed is to provide for (1) leasing commercial communication facilities; (2) operation of new facilities; and (3) strengthening existing protection services and to provide protection for additional areas. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

3. *Soil and moisture conservation.*—The 1960 program will permit corrective measures on 32 of the most critical problem areas.

4. *Park and recreation programs.*—Studies are made of the park, parkway, and recreation potentialities of the United States and its Territories, frequently in cooperation with Federal, State, and local agencies; technical and scientific services and guidance essential to management, protection, and public use are provided in the fields of biology, geology, history, and archeology. Surveys are made of historic American buildings and sites for the purpose of acquiring and preserving data relative thereto. Investigations are made to determine whether agencies receiving surplus Federal real property with a recreational potential are utilizing those properties in conformity with terms of the transfer agreements. Studies and investigations are carried out to establish and acquire rights to sources of water supply. The increase will augment general expense funds required for the land use program.

5. *Concessions management.*—There are approximately 160 major concessionaires operating in the parks and other areas. Contracts are negotiated or permits issued; rates established; services to be rendered are determined; and records audited. The increase will provide for closer management supervision in three of the regional offices and in the Washington office.

MAINTENANCE AND REHABILITATION OF PHYSICAL FACILITIES—Continued

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Roads and trails	$4,949,875	$5,307,000	$6,044,000
2. Buildings, utilities, and other facilities	6,667,442	7,099,000	7,956,000
3. 1959 program obligated in 1958	298,653	−298,653	
Total obligations	11,915,970	12,107,347	14,000,000
Financing:			
1959 appropriation available in 1958	−298,653	298,653	
Unobligated balance no longer available	46,469		
New obligational authority	11,663,786	12,406,000	14,000,000
New obligational authority:			
Appropriation	$11,600,000	$12,175,000	$14,000,000
Transferred to "Trust Territory of the Pacific Islands" (71 Stat. 236)	−10,000		
Transferred from "Operation and maintenance," Southeastern Power Administration (72 Stat. 241)	73,786		
Appropriation (adjusted)	11,663,786	12,175,000	14,000,000
Proposed supplemental due to pay increases		231,000	

The objectives are to maintain and operate physical facilities while safeguarding the natural, historic, and scenic values of the parks.

1. *Roads and trails.*—The increase proposed is to finance (*a*) six additional areas to be added to the system; (*b*) additional costs incident to increased wage rates, prices of supplies, equipment, etc.; (*c*) leasing commercial communication facilities; (*d*) increased mileages added to the system; and (*e*) improved maintenance of existing facilities to meet needs as a result of the continued increase in visitation. The facilities maintained are as follows:

		Beginning		
	Unit	*1958*	*1959*	*1960*
Facility:				
Roads	Miles	7,078	7,235	7,361
Trails	Miles	8,298	8,364	8,345
Airport runways	Miles	48	12	13

2. *Buildings, utilities, and other facilities.*—The increase proposed is to finance (*a*) eight additional areas to be added to the system; (*b*) operation and maintenance of new facilities constructed or under construction; and for the same purposes as indicated in 1 (*b*), (*c*), and (*e*) above.

CONSTRUCTION

For construction and improvement, without regard to the Act of August 24, 1912, as amended (16 U. S. C. 451), of buildings, utilities, and other physical facilities; the repair or replacement of roads, trails, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, or storm, or the construction of projects deferred by reason of the use of funds for such purposes; and the acquisition of lands, interests therein, improvements, and water rights; *$13,600,000,* to remain available until expended[, $20,000,000, of which not to exceed $135,000 shall be available for the construction of additional school facilities at Grand Canyon National Park, Arizona]. (*5 U.S.C. 124–132; 16 U.S.C. 1, 431–433, 459r, 461–467; Act of Aug. 31, 1954 (68 Stat. 1037); Act of Aug. 9, 1955 (69 Stat. 575, 576); Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, **$20,000,000** Estimate 1960, **$13,600,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Buildings, utilities, and other facilities	$19,271,565	$21,267,704	$10,120,000
2. Acquisition of—			
(*a*) Lands	1,508,995	1,495,632	3,250,000
(*b*) Water rights	55,861	204,160	230,000
3. Parkways	20,236	15,891	
4. Roads and trails	13,362	105,822	
Total obligations	20,870,019	23,089,209	13,600,000
Financing:			
Unobligated balance brought forward	−6,589,496	−3,119,477	−30,268
Unobligated balance carried forward	3,119,477	30,268	30,268
Appropriation (new obligational authority)	17,400,000	20,000,000	13,600,000

1. *Buildings, utilities, and other facilities.*—The 1960 program is the fourth year of a 10-year program to provide essential facilities to meet all visitor requirements by 1966. A summary of the 1960 program by major type of construction follows:

Camping and picnicking facilities	$2,742,200
Public service and administrative units	3,201,900
Utilities	1,878,000
Employee housing	838,200
Miscellaneous	1,459,700
Total	10,120,000

2. *Acquisition of lands and water rights.*—Approximately 610,000 acres of privately owned lands are located within the areas administered and should be acquired to facilitate public use of these areas. Status of land acquisition present and projected is as follows:

[Acres]

	1957	*1958*	*1959*	*1960*
Acquired during year	26,500	18,000	10,000	15,000
Private lands, end of year	638,000	620,000	610,000	595,000

Rights to water must be obtained, frequently by purchase, in many of the areas for use of visitors and employees, and for fire protection.

3 and 4. *Parkways* and *roads and trails.*—The obligations for these programs are against carryover balance of prior appropriations for programs authorized by the Federal Highway Act of 1952. Programs authorized by the Federal Highway Acts of 1956 and 1958 are obligated against the contract authority provided by those acts and are shown under the appropriation Construction (liquidation of contract authorization), National Park Service.

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed [eighty-four] *ninety-six* passenger motor vehicles (*of which eighty-four are* for replacement only), including not to exceed [seventeen for replacing United States Park Police cruisers; purchase of one aircraft;] *fifty for police-type use without regard to the general purchase price limitation for the current fiscal year* and the objects and purposes specified in the Acts of August 8, 1953 (16 U. S. C. 1b–1d) and July 1, 1955 (16 U. S. C. 18f)[: *Provided*, That all receipts for the fiscal year 1959 from the operation of the McKinley Park Hotel in Mount McKinley National Park, Alaska, may be applied to, or offset against, costs of managing, operating, and maintaining the hotel and related facilities, and any receipt or other revenues in excess of such costs shall be deposited at least annually into the Treasury of the United States as miscellaneous receipts]. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

"Purchase of Great Onyx and Crystal Cave properties, Mammoth Cave National Park"	38,007	35,000	35,000
Appropriation	180,277	154,100	115,100

1. *Educational expenses, children of employees, Yellowstone National Park.*—Revenues received from park visitors are used to provide educational facilities to dependents of park personnel (16 U. S. C. 40c). Funds in excess of needs are returned to the Treasury as miscellaneous receipts. During 1960 it is estimated there will be 59 elementary and 22 high-school students. Cost per student is $402 for elementary and $540 for high school.

2. *Operation, mangagment, maintenance, and demolition of federally acquired properties, Independence National Historical Park.*—Some of the buildings on lands acquired for establishment of the Independence National Historical Park, Philadelphia, Pa., are rented pending their conversion to park purposes or demolition. Some of the cleared sites are being used temporarily as parking lots from which income is also realized. Income from these operations is used for management and maintenance of the rental properties and for demolition of buildings (65 Stat. 644).

3. *Payment for tax losses on land acquired for Grand Teton National Park.*—Park fees are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (64 Stat. 849).

MANAGEMENT AND PROTECTION

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Forestry and fire control: Fire suppression (total obligations)		$200,000	
Financing:			
Proposed supplemental appropriation		200,000	

Under existing legislation.—A supplemental appropriation, in the amount of $200,000, is anticipated for forest-fire suppression. Funds in the amount of $100,000 were appropriated in 1959 for this purpose. Costs to date for fire-suppression activities amount to about $283,300, or $183,300 in excess of the amount available.

FISH AND WILDLIFE SERVICE

The Service, consisting of two bureaus under the direction of the Commissioner of Fish and Wildlife, conducts research, management, and demonstration programs to conserve and restore the fish and wildlife resources for both recreational and commercial use. These activities are financed in part from annual appropriations and in part from appropriations of revenues which have been permanently earmarked for these purposes. The following table shows the Service's total obligational program by activity and sources of the funds used to finance these activities.

PROGRAM

	1958 actual	*1959 estimate*	*1960 estimate*

Indefinite	446,288	454,621	
Proposed supplemental due to pay increases		790,000	

1. *Management of fishery resources.*—Ninety-one fish-cultural stations are operated for the propagation of food and game fishes. This activity also covers administration of the Black Bass Act encompassing shipments of all fishes across State boundaries.

2. *Extension and training.*—This activity covers (*a*) technical assistance to States and other public or private entities in the management of sport fishing and fish propagation; and (*b*) cooperative development, with the States, of fish-stocking programs for major public streams and lakes.

3. *Fishery research.*—Research is conducted to improve fish-cultural methods, and the management of fishery resources. Funds for this activity are supplemented by moneys from the permanent account Federal aid in fish restoration and management. In 1958, these supplementary funds totaled $24,657. It is estimated they will amount to $105,000 in 1959 and 1960.

4. *Administration of wildlife resources.*—This activity covers (*a*) 270 wildlife refuges, consisting of approximately 18,000,000 acres, operated for the conservation of migratory waterfowl and the preservation and propagation of rare birds and mammals. Of these refuges, 3,500,000 acres are primarily for waterfowl. Funds for administration of the wildlife refuge program are supplemented by moneys appropriated under the permanent accounts for management of national wildlife refuges and migratory bird conservation account. In 1958, these supplementary funds totaled $2,946,211. It is estimated they will amount to $3,261,547 in 1959, and $3,152,750 in 1960. (*b*) Enforcement of the Migratory Bird Treaty and Lacey Acts for protection of migratory birds and regulation of interstate and foreign shipments of game, funds for which are supplemented by moneys appropriated under the permanent accounts for management of national wildlife refuges, migratory bird conservation account, and Federal aid in wildlife restoration. In 1958, these supplementary funds totaled $1,030,768. It is estimated they will amount to $1,127,300 in 1959 and $1,107,300 in 1960. Funds for migratory game bird surveys are supplemented by moneys appropriated under the permanent accounts for migratory bird conservation account and Federal aid in wildlife restoration. In 1958, these funds totaled $467,702. It is estimated they will amount to $401,800 in 1959, and $224,550 in 1960. (*c*) Administration of the Alaska Game Law directed toward protection and rehabilitation of Alaskan sport fish and wildlife resources. This function is to be transferred to Alaska upon certification by the Secretary of Interior that the Alaska State Legislature has made adequate provision for exercising the function in the broad national interest. Pribilof Island receipts will no longer be available for this activity.

5. *Control of predatory animals and injurious rodents.*—Predatory animals and injurious rodents are controlled on public lands. Technical information and supervision of cooperative programs are provided to protect livestock, game, poultry, forage crops, forests, structures, foods, and feeds from destruction by harmful animals.

6. *Wildlife research.*—Research is conducted on migratory birds and in wildlife management and conservation practices. Wildlife research units are also maintained in cooperation with Wildlife Management Institute and land-grant colleges at 16 locations to give technical training in wildlife management, conduct research, and demonstrate improved management practices. Funds for this activity are supplemented by moneys appropriated under the permanent accounts for Federal aid in wildlife restoration and migratory bird conservation account. In 1958 these supplementary funds totaled $388,198. It is estimated they will amount to $537,200 in 1959 and $478,450 in 1960.

7. *Soil and moisture conservation.*—Nearly 5.5 million acres on 63 wildlife refuges are critically eroded or severely depleted. A long-range conservation plan for a majority of these refuges is underway. Work is now being performed on 54 refuges.

8. *River basin studies.*—Studies are made of proposed Federal power, navigation, irrigation, and drainage projects to insure measures are taken for the conservation and development of fish and wildlife. Funds for this activity are supplemented by moneys appropriated under the migratory bird conservation account. In 1958, these supplementary funds totaled $155,764. It is estimated they will amount to $200,400 in 1959 and 1960.

FEDERAL AID IN FISH RESTORATION AND MANAGEMENT—con.

(Receipt limitation)—Continued

equal to the revenue of the 10% excise tax on fishing rods, creels, reels, and artificial lures, baits, and flies (64 Stat. 430).

1. *Payments to States.*—These payments cover fish restoration and management projects, as well as research into fish culture; formulation of restocking plans; and acquisition, and improvement of areas adaptable as hatching, feeding, resting, or breeding places.

2. *Administration.*—State plans are examined and inspections of projects and audits of State expenditures are made.

3. *Research.*—Funds apportioned but not expended by the States within 2 years are used to supplement moneys appropriated to the Bureau of Sport Fisheries and Wildlife under the appropriation for management and investigations of resources, for research on fish of material value for sport and recreation and incidental administrative expenses.

Receipts from the sale of Federal hunting stamps are set aside in the migratory bird conservation fund (16 U. S. C. 718–718l).

1. *Enforcement of Migratory Waterfowl Hunting Stamp and Migratory Bird Treaty Acts.*—Fifteen percent of the fund is used for enforcing these acts and to pay the Post Office for supplying and accounting for the stamps. Funds used for enforcement supplement moneys appropriated to the Bureau of Sport Fisheries and Wildlife for the same purpose under the appropriation for management and investigations of resources.

2. *Acquisition, development, and maintenance of migratory bird refuges.*—Eighty-five percent of the fund is used for acquisition, construction, and management of migratory waterfowl refuges and investigations of migratory birds. The acquisition of refuge lands is expected to increase in 1960. These funds supplement moneys appropriated to the Bureau of Sport Fisheries and Wildlife for these purposes.

Indefinite	446,288	454,621	
Proposed supplemental due to pay increases		355,000	

1. *Management.*—This activity covers enforcement of international agreements pertaining to fish and whales.

2. *Marketing and technology.*—This includes (*a*) collecting and disseminating economic data on the fishing industry, including business trends and foreign trade; (*b*) exploring for fish and improving fishing gear and methods; (*c*) operation of market news offices; (*d*) compiling and publishing commercial fishery statistics; and (*e*) developing and demonstrating more efficient means of handling, processing, storing, and marketing, including inspection and grading, of fishery products. Funds for this activity are supplemented by moneys appropriated under the permanent account Promote and develop fishery products and research pertaining to American fisheries. In 1958, these supplementary funds totaled $2,486,525. It is estimated they will amount to $2,260,870 in 1959 and $1,894,365 in 1960.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Research.*—Research is conducted (*a*) to learn more about variations in abundance of important commercial food fishes and other aquatic animals; (*b*) to discover declining species and better measures for conserving, developing, and managing fishery resources; (*c*) to improve cultivation of aquatic animals, including shellfish; and (*d*) in the design of fish protective devices. Funds for this activity are supplemented by moneys appropriated under the permanent account Promote and develop fishery products and research pertaining to American fisheries. In 1958, these supplementary funds totaled $2,711,669. It is estimated they will amount to $2,455,085 in 1959 and $2,329,500 in 1960.

4. *Research on fish migration over dams.*—Investigations are conducted to determine factors influencing direction and rate of movement of anadromous fish over dams, so that these factors may be considered in designing future dams.

5. *Administration of Alaska fisheries.*—This activity covers administration of Alaska commercial fisheries including review of, and enforcement of national and international regulations. This function is to be transferred to Alaska upon certification by the Secretary of Interior that the Alaska State legislature has made adequate provision for exercising the function in the broad national interest. Pribilof Island receipts will no longer be available for this activity.

6. *Fishing vessel mortgage insurance.*—This activity provides for administration of the fishing vessel mortgage insurance program, designed to aid the fishing industry to finance the construction of fishing vessels.

FISHERIES LOAN FUND

For additional capital for the fisheries loan fund, $3,000,000. (70 Stat. 1119; 72 Stat. 1710.)

Estimate 1960, **$3,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Fisheries loan commitments	$2 271, 567	$4, 900, 000	$4, 150, 000
2. Administrative expenses	188, 724	313, 000	313, 000
Total program (obligations)	2, 560, 291	5, 213, 000	4, 463, 000
Financing:			
Amounts becoming available:			
Appropriation			3, 000, 000
Collection of loans	408, 814	600, 000	1, 000, 000
Interest on loans	110, 902	320, 000	475, 000
Total amounts becoming available	519, 716	920, 000	4, 475. 000
Unobligated balance brought forward	6, 728, 277	4, 687. 702	394, 702
Total amounts available	7, 247, 993	5, 607, 702	4, 869. 702
Unobligated balance carried forward	−4. 687, 702	−394. 702	−406, 702
Financing applied to program	2, 560, 291	5, 213, 000	4, 463, 000

This fund finances loans to segments of the fishing industry unable to obtain commercial loans on reasonable terms for financing and refinancing operations, maintenance, replacement, repair, and equipment of fishing gear and vessels, and for research into basic problems of fisheries. Loans bear interest of 5% annually and will mature in not more than 10 years. Loan commitments against the fund are made on approval of the Secretary of the Interior, and referred to the Small Business Administration for closing in the field and rendering loan servicing functions required (70 Stat. 1119).

Budget program—Loan commitments.—It is estimated that only $394,700 of the funds available for the program will remain unobligated at the end of 1959. The additional capital of $3 million is needed to finance the 1960 program. Commitments are expected to continue to increase through 1960. As of October 20, 1958, a total of 482 applications amounting to $17.2 million had been received. Of these, 260 loans totaling $6.9 million had been approved and 119 applications amounting to $3.8 million had been declined.

Administrative expenses.—These expenses include processing of loan applications, closing of loans, and collection of repayment and interest.

Financing.—The original authorization of $10 million was increased to $20 million by the act of September 2, 1958 (72 Stat. 1710). Of this amount, $10 million was appropriated in 1957, and an appropriation of $3 million is requested for 1960. Additional financing is provided from repayments and interest on outstanding loans.

Operating results.—The deficit is expected to be eliminated by future interest earnings.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the Fish and Wildlife Service shall be available for purchase of not to exceed [ninety-six] *one hundred and fourteen* passenger motor vehicles *of which one hundred and two shall be* for replacement only; purchase of not to exceed [nine] *six* aircraft for replacement only; not to exceed $30,000 for payment, in the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Fish and Wildlife Service; publication and distribution of bulletins as authorized by law (7 U. S. C. 417); rations or commutation of rations for officers and crews of vessels at rates not to exceed $3 per man per day; repair of damage to public roads within and adjacent to reservation areas caused by operations of the Fish and Wildlife Service; options for the purchase of land at not to exceed $1 for each option; facilities incident to such public recreational uses on conservation areas as are not inconsistent with their primary purposes; and the maintenance and improvement of aquaria, buildings, and other facilities under the jurisdiction of the Fish and Wildlife Service and to which the United States has title, and which are utilized pursuant to law in connection with management and investigation of fish and wildlife resources. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

OFFICE OF TERRITORIES

The Office promotes economic and political development in territorial trusteeship areas under United States jurisdiction. It originates and implements Federal policy, guides and coordinates certain operating programs, provides information and advice, and participates in foreign policy matters concerning the Territories. In addition, the Office represents the Governors in Washington; supervises the Alaska Railroad, and public works in Alaska and the Virgin Islands; and assists the Virgin Islands Corporation.

Current authorizations:

ADMINISTRATION OF TERRITORIES

For expenses necessary for the administration of Territories and for the departmental administration of the Trust Territory of the Pacific Islands, under the jurisdiction of the Department of the Interior, including expenses of the offices of the Governors of [Alaska,] Hawaii, Guam, *and* American Samoa, as authorized by law (48 U. S. C., secs. [61,] 531, 1422, 1431a (c)), *and for the purchase of one passenger motor vehicle (at not to exceed $5,000)*; salaries of the Governor of the Virgin Islands, the Government Secretary, *the Government Comptroller*, and the members of their immediate staffs as authorized by law (48 U. S. C. 1591, *72 Stat. 1095*); compensation and mileage of members of the legislatures in [Alaska,] Hawaii, Guam, American Samoa, and the Virgin Islands as authorized by law (48 U. S. C., secs. [87,] 599, 1421d (e), 1431a (c), and 1572e); compensation and expenses of the judiciary in American Samoa as authorized by law (48 U. S. C. 1431a (c)); grants to American Samoa, in addition to current local revenues, for support of governmental functions; and personal services, household equipment and furnishings, and utilities necessary in the operation of the houses of the Governors of [Alaska,] Hawaii, Guam, and American Samoa; [$2,100,000] *$2,606,000*: *Provided*, That the Territorial and local governments herein provided for are authorized to make purchases through the General Services Administration: *Provided further*, That appropriations available for the administration of Territories may be expended for the purchase, charter, maintenance, and operation of aircraft and surface vessels for official purposes and for com-

TRUST TERRITORY OF THE PACIFIC ISLANDS

For expenses necessary for the Department of the Interior in administration of the Trust Territory of the Pacific Islands pursuant to the Trusteeship Agreement approved by joint resolution of July 18, 1947 (61 Stat. 397), and the Act of June 30, 1954 (68 Stat. 330), including the expenses of the High Commissioner of the Trust Territory of the Pacific Islands; compensation and expenses of the Judiciary of the Trust Territory of the Pacific Islands; grants to the Trust Territory of the Pacific Islands in addition to local revenues, for support of governmental functions; [$4,715,000] *$5,225,000*: *Provided*, That the revolving fund for loans to locally owned private trading enterprises shall continue to be available during the fiscal year [1959] *1960*: *Provided further*, That all financial transactions of the Trust Territory, including such transactions of all agencies or instrumentalities established or utilized by such Trust Territory, shall be audited by the General Accounting Office in accordance with the provisions of the Budget and Accounting Act, 1921 (42 Stat. 23), as amended, and the Accounting and Auditing Act of 1950 (64 Stat. 834): *Provided further*, That the government of the Trust Territory of the Pacific Islands is authorized to make purchases through the General Services Administration: *Provided further*, That appropriations available for the Administration of the Trust Territory of the Pacific Islands may be expended for the purchase, charter, maintenance, and operation of aircraft and surface vessels for official purposes and for commercial transportation purposes found by the Secretary to be necessary in carrying out the provisions of article 6 (2) of the Trusteeship Agreement approved by Congress: *Provided further*, That notwithstanding the provisions of any law, the Trust Territory of the Pacific Islands is authorized to receive, during the current fiscal year, from the Department of Agriculture for distribution on the same basis as domestic distribution in any State, Territory, or possession of the United States, without exchange of funds, such surplus food commodities as may be available pursuant to section 32 of the Act of August 24, 1935, as amended (7 U. S. C. 612c), and section 416 of the Agricultural Act of 1949, as amended (7 U. S. C. 1431). (*Executive Orders 10265, 10408; Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Under the terms of the Trusteeship Agreement with the Security Council of the United Nations, the United States exercises full jurisdiction over the territory and has undertaken to promote the political, economic, and educational advancement of the inhabitants.

The territory encompasses some 3 million square miles of ocean over which are scattered 2,141 islands with a land area of 687 square miles. The population exclusive of Saipan and Tinian is approximately 60,000. The Department of the Interior is responsible for administration of all the territory except the islands of Saipan and the Tinian group which are under Navy jurisdiction as critical defense areas.

2. *Judiciary.*—Provision is made for the high court of the Trust Territory, the court of appeals, and the lesser courts of the territory.

3. *Grants.*—Grants are required in addition to local revenues for health, education, and other services as well as for maintaining and providing the necessary facilities of the government of the territory. The costs of government are distributed as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
(*a*) Health, education, and other services	$1,580,465	$1,620,000	$1,821,000
(*b*) Operation and maintenance	1,495,616	1,400,000	1,489,000
(*c*) Transportation services (including new vessel)	1,552,257	1,333,000	1,382,000
(*d*) General administration	899,025	925,000	1,048,000
(*e*) Construction	473,109	900,000	850,000
(*f*) Typhoon damage	950,000		
Total	7,350,472	6,178,000	6,590,000
Construction work in progress	426,891		
Total	7,777,363	6,178,000	6,590,000
Deduct revenue and carryover applied	1,741,863	1,578,000	1,500,000
Subtotal	6,035,500	4,600,000	5,090,000
Proposed supplemental due to pay increases		150,000	
Total grants	6,035,500	4,750,000	5,090,000

(*a*) *Health, education, and other services.*—The government of the territory operates 6 hospitals and 2 leprosaria. There are 154 public elementary and 6 intermediate schools as well as a small central high school at Truk. Total public school enrollment for 1958 was approximately 8,600.

(*b*) *Operation and maintenance.*—The physical plant of the government requires abnormally costly maintenance due to the tropical climate.

(*c*) *Transportation services.*—At present the following vessels are being operated by private concerns under contract to provide for the transportation of supplies, copra, trade goods, and passengers throughout the Trust Territory: (1) 2 vessels of approximately 4,000 tons capacity used to transport goods and passengers from one district to another and one of which is on a scrap charter that is returning a profit above operating costs and (2) 8 smaller vessels that operate within a district area transporting cargo and passengers from the headquarters to outlying islands and return. An air service between Guam and district centers is provided by three government-owned amphibious aircraft which are operated under contract with a private concern.

(*e*) *Construction.*—An extended program was started in 1955 for construction of facilities to replace the temporary, advanced-base type plant installed by the Navy during and immediately following World War II.

[1] Excludes working capital, net, transferred in without charge of $1,247,390 in 1958.

This fund is derived from the earnings of the railroad, and used for operating and maintenance expenses as well as improvements and additions (48 U. S. C. 301–308).

Budget program—1. *Rail line program.*—The railroad main line extends 470.3 miles from Seward to Fairbanks and 12.4 from Whittier to Portage Junction. Branch lines, passing tracks, spurs, and yards total 194.8 miles. Operating expense is estimated to increase from $12.7 million in 1958 to $14.2 million in 1959 and 1960, respectively. The increase in 1959 and 1960 represents additional operating costs of producing projected revenues. Revenues are expected to increase from $12.8 million in 1958 to $14.7 million in 1959 and 1960, respectively, by reason of increases in tonnage due to new military construction projects and the economic growth of the new State of Alaska.

Capital outlay totaled $5.9 million in 1958 and is estimated at $7.4 million in 1959 and $4.1 million in 1960, principally for track maintenance and repairs and for purchase of rolling stock equipment.

2. *Other program.*—These consist of costs of sale for excess property and rental of properties.

Operating results and financial conditions.—A decrease in the volume of traffic in 1958 was due to a general drop in business. The Alaska Railroad received for performing these freight and passenger services and other nonoperating programs revenue totaling $13.3 million, a decrease of 12.3% under the sum realized in 1957.

One contributing factor for the decrease in 1958 was a decline in construction projects. Local merchants were forced to reduce their inventories because of cutback in business during the early part of 1958. Earnings are retained to meet future needs.

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Advances	$258,682	$406,784	$306,784	$306,784

Loans are made to local trading companies for purchase of Micronesian products for resale in the world market, purchase of trade goods for resale in Micronesia, and purchase of vessels (55 Stat. 151).

The 1956 appropriation language for the Trust Territory of the Pacific Islands made available for 1 year $500,000 of the proceeds from liquidation of the Island Trading Company of Micronesia for establishment of this fund. The availability was continued for 1957, 1958, and 1959 and it is proposed to extend it again for 1960.

Interest charged is 4% per annum on the unpaid balance.

The Corporation promotes the economic development of the United States Virgin Islands. Appropriations not to exceed 11 million are authorized to be made to a revolving fund based on annual budgets submitted by the Corporation. An appropriation of additional funds as grants to finance non-revenue-producing activities and to reimburse the Corporation for operating losses is also authorized (48 U. S. C. 1407).

Budget program—1. *Loan program.*—Loans are made to aid farmers in agricultural diversification and to improve livestock production, and to aid business enterprises with any commercial or industrial undertaking or activity in the Virgin Islands when such loans are not available from other Federal or private sources.

2. *Sugar program.*—The principal business of the Corporation is the growing of sugarcane, and the production and sale of raw sugar. Statistics and costs are as follows (costs include depreciation and interest):

	1958 actual	*1959 estimate*	*1960 estimate*
Sugarcane production:			
Acres harvested	2,576.50	2,600	2,600
Tons per acre	14.64	29	29
Sugar manufacture: Tons of cane ground:			
Corporation cane	37,729	75,000	75,000
Purchased cane	25,548	50,000	60,000
Total	63,277	125,000	135,000
Sugar yield per ton of cane (percent)	9.63	10.5	11
Tons of sugar produced	5,985	13,125	14,850
Total cost per ton	$248.92	$140.21	$135.29
Income per ton of sugar	141.54	135.17	134.40
Loss (−) per ton	−107.38	−5.04	−.89

NOTE.—Under the crop-year basis of accounting used by the Corporation, all revenue, operating costs, and other expenses applicable to the year's crop are considered earned or incurred during the fiscal year.

3. *Power program.*—Electric generating plants are operated by the Corporation to supply each of the islands of St. Croix, St. Thomas, and St. John with electric power. Program statistics are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Generating capacity (kilowatts)	7,230	10,230	10,230
Miles of distribution lines	462	482	507
Number of consumers	8,373	8,600	9,000
Kilowatt-hours sold	19,574,626	21,500,000	23,500,000
Average income per kilowatt-hour (cents)	4.32	4.15	4.10
Average cost per kilowatt-hour (cents)	3.76	3.51	3.50
Profit per kilowatt-hour (cents)	.56	.64	.60

4. *Miscellaneous revenue-producing activities.*—These consist of (*a*) certain Navy properties transferred to the Department of the Interior under a revocable permit and assigned to the Corporation for management; (*b*) leases and rentals of property; and (*c*) miscellaneous sales of supplies and materials.

5. *Non-revenue-producing activities.*—These include water and soil conservation programs, particularly the construction of dams and land clearance, and forest development program.

6. *Administrative expenses.*—Administrative expenses for 1960 will be held within a limitation of $172,000.

Financing.—In addition to the receipts of the fund from its operations, appropriations are made for the Corporation as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Grants for non-revenue-producing activities	$130,000	$130,000	$130,000
Grants to restore impairment of capital	394,000		
Total appropriation	524,000	130,000	130,000

The financing of the non-revenue-producing activities is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Unexpended grant at start of year	$23,060	$20,649	
Additional grant for year	130,000	130,000	$130,000
Total appropriations and balances	153,060	150,649	130,000
Expense during year	132,411	150,649	130,000
Unexpended grant at end of year	20,649		

The sum of $11,000,000 has been authorized for loans to the Corporation, of which $6,513,000 has been appropriated. The budget program contemplates the enactment of $1,500,000 of supplemental authorizations for 1959 under Proposed for later transmission.

Operating results.—The net loss for 1958 amounted to $538,681. This amount is made up of a loss on sugarcane and sugar operations of $642,628; on power, a profit of $110,127 and on other activities, a loss of $6,180. The setback in the sugar program was due to a severe drought during 1957 calendar year and also in the early months of 1958. Earnings are retained to meet future requirements.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventory, supplies, deferred charges, etc	$899,067	$863,910	$910,000	$895,000
Unpaid undelivered orders	262,747	227,792	190,000	200,000
Total selected resources at end of year	1,161,814	1,091,702	1,100,000	1,095,000
Selected resources at start of year (−)		−1,161,814	−1,091,702	−1,100,000
Costs financed from obligations of other years, net (−)		−70,112		−5,000
Obligations incurred for costs of other years, net			8,298

1. *Departmental direction.*—The Office of the Secretary, Under Secretary, and the division of information provide top departmental direction and contact with the public.

2. *Program direction and coordination.*—The Secretary is aided by four assistant secretaries and the technical review staff. Staff assistance is provided on matters of policy for promoting the domestic welfare and the conservation and development of the country's natural resources.

3. *Administrative management services.*—Under the direction of the administrative assistant secretary, budget and finance, management improvement, property management, personnel, administrative services, inspection, and security operations are carried on.

4. *General services.*—Provision is made for services such as printing and binding, telephone, health, and library.

Financing applied to program	1,718,789	1,760,960	1,772,000

[1] Excludes property transferred in without charge of $864 in 1958.

This fund finances central reproduction, communications, supply, central library, health services, and such other services as may be performed more advantageously on a reimbursable basis (5 U. S. C. 502). The capital consists of $300,000 appropriated, donated assets of $176,329, and retained earnings of $27,191.

Budget program.—Operating costs are expected to continue at about the same level through 1960.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Commodities for sale	$84,182	$89,478	$89,478	$89,478
Materials and supplies	16,762	14,490	14,490	14,490
Unpaid undelivered orders	66,858	84,040	80,000	80,000
Total selected resources at end of year	167,802	188,008	183,968	183,968
Selected resources at start of year (−)	−167,802	−188,008	−183,968	−183,968
Costs financed from obligations of other years, net (−)		−4,040		
Obligations incurred for costs of other years, net	20,206

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior: *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U. S. C. 686): *Provided*, That reimbursements for cost of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title or in the Public Works Appropriation Act, [1959] *1960*, shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), when authorized by the Secretary, at rates not to exceed $75 per diem for individuals, and in total amount not to exceed $175,000; maintenance and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U. S. C. 2131 and D. C. Code 4–204). (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

[GENERAL PROVISIONS]

[SEC. 401. Unless otherwise provided by law, appropriations contained in this Act available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made.] (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

DEPARTMENT OF JUSTICE

The new obligational authority requested for the Department of Justice in 1960 totals $275.1 million, compared to $253 million estimated for 1959. Operating expenses will be higher despite increased efficiency because of increases in workloads for almost all activities. New construction has been deferred, except for one prison institution and a prison powerplant.

Protective services.—The Department is continuing its intensive efforts to reduce backlogs and to eliminate delays in litigative work. At the same time a rising volume of new cases threatens to undo previous accomplishments, and explains the modest increases that are recommended for all legal offices except the internal security division. To provide the Attorney General with better control of funds and reduce the need for supplemental requests, it is recommended that the four continuing appropriations for legal activities be consolidated into a single appropriation.

The Department has finished the administrative adjudication of claims of citizens of Japanese ancestry arising from their forced removal from their homes during World War II. The alien property program has declined sharply and is also approaching termination. Staff of the Office of Alien Property will be reduced about 50% during 1959. On the basis of the present outlook, the Office can be abolished by June 30, 1960, and the residual work assigned to one of the Department's legal divisions.

Despite an increasing number of criminal and other investigations, the Federal Bureau of Investigation is operating in 1959 with a slightly smaller staff than in 1958. However, increased investigative workloads make necessary larger appropriations to finance additional agents and clerical staffs.

Alien control.—The rapid growth in international travel, together with new amendments to the Immigration and Nationality Act, place additional burdens on the Immigration and Naturalization Service. Staff increases are provided for in this budget to serve properly all points of inspection, prevent the unauthorized entry of aliens, and apprehend persons who are illegally in the United States. Construction of new buildings to replace outmoded border stations is again deferred. The President is recommending legislation to remove present ceilings on fees for many immigration and naturalization services, and to give the Attorney General administrative discretion in setting the fees.

Correctional and penal institutions.—The 1960 budget provides for an increase of $16 million to house and maintain the increasing number of prisoners in Federal institutions. The average number of prisoners in Federal institutions has jumped markedly from 20,877 in 1958 to an estimated 22,300 in 1960. This is largely attributed to longer sentences and fewer paroles.

Funds are requested to construct a new maximum security institution for 800 prisoners and to replace a powerplant at the Chillicothe Reformatory. Planning is also proceeding, with previously authorized funds, for a youth guidance center to serve the Western States.

The correctional institution at Sandstone, Minn., has been on loan for use as a State mental hospital, but will be returned to the Federal Government by July 1, 1959. The prison camp at Safford, Ariz., authorized by the last Congress, is in operation and an additional camp has been opened at Greenville, S. C.

Financing:			
1959 appropriation available in 1958	−4,475	4,475	
Advances and reimbursements from other accounts	−109,126	−110,650	−50,000
Unobligated balance no longer available	8,417		
New obligational authority	3,322,900	3,531,000	3,750,000
New obligational authority:			
Appropriation	$3,368,300	$3,250,000	$3,750,000
Transferred to "Salaries and expenses, general legal activities" (5 U. S. C. 291)	−45,400		
Appropriation (adjusted)	3,322,900	3,250,000	3,750,000
Proposed supplemental due to pay increases		281,000	

2. *Administrative review and appeals.*—In addition to reviews of requests for pardon, these include the work of the Board of Parole and of the Board of Immigration Appeals. The following tables show the actual workloads of these boards:

BOARD OF PAROLE

	1957	*1958*
Paroles considered	12,665	12,684
Paroles denied	6,831	6,594
Paroles granted	4,426	4,094
Juvenile and youth offender considerations	1,408	1,996

BOARD OF IMMIGRATION APPEALS

	1957	*1958*
Cases pending, beginning of year	638	286
Cases received	2,746	2,273
Cases closed	3,098	2,270
Cases pending, end of year	286	289

3. *Administrative services.*—The administrative division serves as the focal point for departmentwide management and administration. This division also furnishes administrative services to the smaller offices and divisions, and for the larger divisions and bureaus when such functions can be more effectively and economically performed centrally.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1957, $33,539; 1958, $31,496; 1959, $37,000; 1960, $43,000.

SALARIES AND EXPENSES, LEGAL ACTIVITIES

For expenses necessary for legal activities of the Department of Justice, including not to exceed $5,000 for emergencies to be accounted for solely on the certificate of the Attorney General; not to exceed $50,000 for the employment of temporary deputy marshals in lieu of bailiffs; hire of passenger motor vehicles; purchase of firearms and ammunition; advances of public moneys pursuant to law (31 U. S. C. 529); fees, mileage, and expenses of witnesses, including per diem in lieu of subsistence and compensation and expenses of expert witnesses or informants pursuant to section 1 of the Act of July 28, 1950 (5 U. S. C. 341); and expenses incurred pursuant to sections 4244–4248 of title 18, United States Code; $41,950,000, of which $15,000 may be used for the emergency replacement of one prisoner-carrying bus upon certificate of the Attorney General: Provided, That the unexpended balances as of June 30, 1959, of appropriations for the fiscal years 1958 and 1959, for "Salaries and expenses, general legal activities", "Salaries and expenses, antitrust division", "Salaries and expenses, United States attorneys and marshals", "Fees and expenses of witnesses", and "Salaries and expenses, claims of persons of Japanese ancestry", shall be merged and accounted for in one account. (5 U. S. C. 22, 291, 293, 295, 302–320, 341; 15 U. S. C. 1–34; 18 U. S. C. 4008; 28 U. S. C. 501–503, 507–510, 541, 542, 550–553, 1821–1825, 2072; 31 U. S. C. 529; 48 U. S. C. 109, 110, 114; Department of Justice Appropriation Act, 1959.)

Estimate 1960, [a] **$41,950,000**

[a] Estimate is for activities previously carried under appropriations as follows:

"Salaries and expenses, general legal activities"	$12,850,000
"Salaries and expenses, antitrust division"	4,500,000
"Salaries and expenses, United States attorneys and marshals"	22,900,000
"Fees and expenses of witnesses"	1,700,000

The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:

Total litigative expenses	6,534,901	6,524,832	6,973,500
Total program costs	37,819,211	40,337,232	41,950,000
4. Relation of costs to obligations—			
Costs financed from obligations of other years (unpaid undelivered orders), net (—)		−34,715	
Obligations incurred for costs of other years (unpaid undelivered orders), net	47,398		
Total program (obligations)	37,866,609	40,302,517	41,950,000
Financing:			
Comparative transfers from (—) other accounts	−37,866,609	−40,302,517	
Appropriation (new obligational authority)			41,950,000

These embrace all of the legal activities of the Department including the United States attorneys' and the marshals' offices.

1. *Legal functions.*—These involve the supervision and control of all appellate matters and the representation of the Government's interest before the Supreme Court; the prosecution or defense on behalf of the Government of cases arising under the internal revenue laws, other tax statutes, and Federal criminal statutes; antitrust matters; civil suits and claims; cases and matters relating to the title, possession, and use of Federal land and natural resources; civil litigation pertaining to Indians and Indian affairs; the preparation of legal opinions for the President and executive agencies; review as to form and legality of proposed Executive orders and proclamations; litigation and related matters involving the internal security of the United States; and matters relating to civil rights.

The Government's legal interests in the judicial districts are represented primarily by the local United States attorneys. Most litigative matters are referred directly to the United States attorneys by the various Government departments and agencies. However, certain cases of a highly technical or specialized nature are handled or supervised by the appropriate legal divisions of the Department.

Funds are provided for the continuation of United States attorneys' and marshals' operations in Alaska at existing levels pending a determination on the functions to be assumed by the State of Alaska.

Workloads are increasing in the legal operations financed by this appropriation because of the growth and status of the national economy, population increases, and the corresponding changes in the incidence of crime; and the enactment of new legislation. Workload figures are shown in the following tables:

GENERAL TAX CASES

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Caseload:				
Pending, beginning of year	5,064	4,685	4,386	4,686
Received	5,225	5,811	6,400	7,000
Terminated	5,604	6,110	6,100	7,320
Pending, end of year	4,685	4,386	4,686	4,366

CRIMINAL CASES

Caseload:				
Pending, beginning of year	257	187	146	154
Received	4,045	3,720	3,803	3,850
Terminated	4,115	3,761	3,795	3,835
Pending, end of year	187	146	154	169

CLAIMS AND GENERAL CIVIL CASES

Caseload:				
Pending, beginning of year	29,458	14,024	14,307	14,730
Received	9,649	8,455	8,645	8,865
Terminated	25,083	8,172	8,222	8,595
Pending, end of year	14,024	14,307	14,730	15,000

ANTITRUST CASES

Caseload:			
Pending, beginning of year	116	97	102
Filed	48	55	54
Terminated	67	50	53
Pending, end of year	97	102	103

UNITED STATES ATTORNEYS CASES

Caseload:				
Pending, beginning of year	23,963	26,273	29,273	
Filed during year	55,058	58,000	60,000	
Terminated	52,748	55,000	57,000	
Pending, end of year	26,273	29,273	32,273	

2. *United States marshals' operations.*—The United States marshals are Federal law enforcement officers in each of the 94 judicial districts. They act as agents of the court, serve judicial process, and have custody of all Federal offenders until released or confined to prison by the courts. In addition, they serve as regional disbursing officers of the Department and the Judiciary and perform accounting functions in connection therewith. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Process served	646,515	652,780	675,000	700,000
Prisoners handled	157,160	180,853	190,000	200,000

3. *Litigative expenses.*—These include the travel and subsistence expenses of representatives of the United States attorneys' offices who are required to attend all sessions of the district courts and courts of appeals and attorneys from the legal divisions who frequently are needed to assist with the trial of specialized and more difficult types of cases; evidentiary costs such as: The compensation and expenses of witnesses and experts; charges for transcripts of proceedings, reproduction and duplication of exhibits for court use and the printing of records and briefs in connection with appeals and grand jury reporting; fees of commissioners and special masters; and other miscellaneous costs. Also included are costs of executing judicial orders which involve United States marshals' travel and other expenses incident to serving process and executing court orders, maintaining order in courtrooms, handling prisoners before sentence and transferring prisoners after conviction to Federal institutions or to local jails awaiting commitment to Federal institutions.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1957, $371,317; 1958, $418,715; 1959, $384,000; 1960, $384,000.

[1] Includes capital outlay as follows: 1958, $2,199,013; 1959, $1,902,420; 1960, $1,886,116.

The Federal Bureau of Investigation is the investigative branch of the Department of Justice and obtains evidence for use in civil litigation and prosecution of criminal violations of Federal law. It has primary responsibility for the internal security of the Nation. It assists all law enforcement agencies in identification and technical matters.

The appropriation request for 1960 totals $114,600,000. This will provide for an additional 75 employees (50 special agents and 25 clerks).

1. *Security and criminal investigations.*—This includes the Bureau's investigative responsibilities, the coordination and maintenance of the data gathered, and the maintenance of the Bureau's communications system. Data is disseminated to other Government agencies having an official interest in it. During 1958 the Bureau received 1,423,976 names for search through its files. Another increase is anticipated in 1960.

CASELOAD

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Investigative matters received	477,092	478,220	501,000	519,000

2. *Identification by fingerprints.*—The identification division is the national repository of identification data based on fingerprint records. Fingerprints are acquired, classified, preserved and exchanged with other duly authorized law enforcement agencies and 4,989,332 sets of fingerprints were received for handling during fiscal year 1958. The volume of fingerprint work is expected to increase. Sets of fingerprints on file on July 1, 1958, totaled 149,187,180.

3. *Criminal and scientific laboratory.*—The laboratory provides technical and scientific assistance to the Federal Bureau of Investigation and all duly constituted law enforcement agencies and other Federal agencies which desire to avail themselves of the service. During 1958, scientific examinations totaled 165,462, an increase of 3% and a new alltime high. The upward trend is expected to continue.

4. *Training schools and inspectional services.*—A Bureauwide inspectional service and a personnel training program are provided. The Bureau assists upon request in providing various types of training to local law enforcement agencies.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$408,455	$422,928	$280,000	$280,000

New obligational authority:			
Appropriation	$51,357,000	$49,500,000	$55,800,000
Proposed supplemental due to pay increases		4,208,000	

[1] Includes capital outlay as follows: 1958, $2,156,716; 1959, $1,662,879; 1960, $2,186,500.

The Service administers and enforces the laws relating to immigration and naturalization. Recent amendments to the Immigration and Nationality Act and rising volumes of international traffic will increase workloads and require additional staff.

Fees are charged for certain services and permits. Over $4 million was deposited as miscellaneous receipts to the Treasury during 1958. Authority will be sought this year for the Attorney General to adjust certain fees in line with actual costs.

1. *Inspection for admission into the United States.*—Control is maintained at border points, seaports, and airports over the entry of persons into the United States.

WORKLOAD

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Aliens admitted	1,085,725	1,101,029	1,152,000	1,222,000
Stowaways found on arrival	294	296	325	325
Citizens arrived	1,365,075	1,469,262	1,550,000	1,650,000
Alien crewmen examined on arrival	1,688,749	1,673,475	1,675,000	1,675,000
Entries over land boundaries	137,590,261	144,298,007	152,778,000	160,378,000
Aliens denied entry on primary inspection	157,174	157,720	163,000	174,000

2. *Detention and deportation.*—Aliens alleged to be in the United States unlawfully are served with orders to show cause and accorded hearings. Warrants of deportation are issued, served, and executed. Detention facilities are operated and maintained.

WORKLOAD

	1957 actual	1958 actual	1959 estimate	1960 estimate
Orders to show cause	11,223	12,938	13,400	13,800
Hearings	13,168	14,652	14,400	14,400
Aliens expelled	68,461	67,742	66,500	67,600
Average number of aliens held in detention	1,170	1,228	1,230	1,230

3. *Naturalization.*—Examinations are conducted to determine the qualifications of aliens for naturalization, including applicants for derivative citizenship. Facts and recommendations are presented to naturalization courts and derivative citizenship is adjudicated by the Service.

WORKLOAD

	1957 actual	1958 actual	1959 estimate	1960 estimate
Applications, petition for naturalization	173,156	144,976	145,000	180,000
Applications, derivative citizenship	32,758	33,594	36,000	37,600
Applications for new papers	10,737	9,471	10,800	11,000
Recommendations to courts	142,515	126,600	127,000	148,000

4. *Border patrol.*—The patrol guards the international boundaries to combat smuggling and apprehends aliens illegally in the United States. Improved enforcement is reflected in lower numbers of violators apprehended.

WORKLOAD

	1957 actual	1958 actual	1959 estimate	1960 estimate
Persons apprehended	48,433	41,956	38,700	36,800
Illegal entrants	46,177	40,399	37,000	35,000
Smugglers of aliens	405	402	400	400
Other law violators	1,851	1,155	1,300	1,400

5. *Investigating aliens' status.*—These investigations deal with admission, naturalization, deportation, and arrests for violations of the immigration and nationality laws. Objective is to achieve current status so all cases may be assigned immediately upon receipt.

WORKLOAD

Proposed supplemental due to pay increases		2,447,000	

The activities of the Federal Prison System are conducted with the use of 3 separate appropriations, 2 trust funds, and a corporation.

This appropriation will provide for the custody and care of an average of 22,300 prisoners and the maintenance and operation of 30 institutions in the United States and the 5 jails and 1 camp in Alaska. It is expected that the Alaskan institutions will continue to be operated by the Bureau of Prisons until the State is prepared to operate its own jail system. An average of 4,607 persons will be employed with the funds in this appropriation. Full medical services are provided by the United States Public Health Service.

1. *Custody, care, and treatment of prisoners in Federal institutions.*—This covers the cost of the direct care of prisoners in the penal institutions of the Federal Prison System. It includes the cost of all food, clothing, education, custodial requirements, welfare services, transportation expenses upon release, and related personal services. The funds required, exclusive of salary costs, are in direct relation to the estimated average number of prisoners expected to be maintained in 1960 which is 22,300, at an estimated cost per man per day of $0.78. The average daily population for 1958 was 20,877 as compared to 20,332 in 1957.

2. *Maintenance and operation of institutions.*—This activity reflects administrative expenses, the cost of providing all utility services, operation of motor vehicles, the repair and maintenance of all buildings and facilities, and equipment replacements. The cost of personal services involved in these operations is also included. The increased cost of utilities, maintenance supplies, the need for reducing a large backlog of deferred maintenance items, and the reactivation of the institution at Sandstone, Minn., require additional funds in 1960.

3. *Medical services.*—Funds are allocated to Public Health Service to cover the cost of medical, psychiatric, and technical services.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Federal Reserve Bank of St. Louis

The Corporation is authorized to establish and operate industries in Federal penal and correctional institutions and two disciplinary barracks under jurisdiction of the Department of Defense (18 U. S. C. 4121–4128). Its purposes are to provide employment for physically fit inmates, maximum vocational training for qualified inmates, and a placement service to assist released inmates to secure jobs. Products manufactured by the inmates are sold only to Government agencies. Earnings pay expenses of the Corporation and have permitted payment of $36 million in dividends into the Treasury since January 1, 1935.

Program highlights	*1958 actual*	*1959 estimate*	*1960 estimate*
Customers' orders received: Sales of commodities and services to Federal agencies	$39,609,525	$30,500,000	$31,000,000
Customers orders on hand June 30	$17,577,040	$17,577,040	$17,577,040
Net earnings	$4,393,217	$4,000,000	$4,100,000
Payment of dividends to Treasury	$2,000,000	$2,750,000	$3,000,000
Number of inmates employed full time	4,304	4,300	4,310
Number of inmates for whom vocational training is provided	12,065	12,200	12,300
Number of inmates receiving monetary awards	6,352	6,500	6,500
Amount of inmate awards granted	$280,816	$300,000	$300,000
Number of inmates assisted in job placements	1,897	2,250	2,500

Budget program.—During 1960 industries will operate 53 shops in 23 institutions. This is two less shops than in 1959, since it is expected to close the laundry at Alcatraz Island and the cannery at McNeil Island. During 1959 typewriter repair shops will be operated as industries at Danbury, Conn., and McNeil Island, Wash., whereas during 1958 they were operated solely as vocational training activities. During 1959 a new tank tread repair industry is to replace the furniture repair shop at Texarkana, Tex., and the clothing factory now at Atlanta will move to a new industry building in Tallahassee, Fla. During the past year industrial activities were diversified among 33 different lines of industry. The only new factory established during the year was a furniture refinishing shop at La Tuna, Tex., while at Springfield, Mo., the dental laboratory was replaced by a brush factory which brush factory previously operated as a branch of the brush factory at Leavenworth.

The following table indicates the breadth and scope of the vocational training program for 1957 and 1958.

	Number of training groups		*Number enrolled*		*Number completing courses*	
	1957	*1958*	*1957*	*1958*	*1957*	*1958*
Type of training:						
Agriculture	41	52	831	1,116	297	372
Industrial	69	78	1,432	1,612	509	572
Occupational	331	371	3,885	4,325	1,206	1,284
Trade	49	40	1,342	1,218	865	720
Special	85	72	3,524	3,794	2,152	2,250
Total	575	613	11,014	12,065	5,029	5,198

At present, 209 of the courses are accredited by the various State boards of vocational education, 27 courses are approved for apprenticeship training by State and local apprenticeship councils, and 49 courses are approved for certification by other accrediting agencies.

Because of the general unemployment situation during the year, the five placement units encountered considerable difficulties in finding jobs for released inmates. It is anticipated that during the current year placements will improve.

The 1960 budget limitation includes an administrative expense limitation of $475,000 which is 1.53% of estimated sales.

The 1960 limitation for vocational expense is $793,000, an increase of $119,000 over 1959, in order to augment the training program by employing an assistant superintendent for the Washington office, 1 additional placement officer, and 6 additional instructors.

Washington, McNeil Island	12,268	8,500	9,800	
West Virginia, Alderson	23,570	5,000	5,000	
West Virginia, Mill Point	537	11,400	5,000	
Washington office	1,918	5,000	5,000	
Miscellaneous		239	810	
Total machinery and equipment	638,391	786,000	425,000	
Total capital expenditures	1,258,933	2,881,000	1,929,000	1,813,000

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories, deferred charges, etc	$8,157,461	$8,646,566	$8,552,000	$8,552,000
Unpaid undelivered orders	3,047,400	6,132,930	6,132,930	6,132,930
Total selected resources at end of year	11,204,861	14,779,496	14,684,930	14,684,930
Selected resources at start of year (−)		−11,204,861	−14,779,496	−14,684,930
Costs financed from obligations of other years, net (−)			−94,566	
Obligations incurred for costs of other years, net		3,574,635		

Financing.—Profit from 1960 operations is expected to result in a minus budgetary expenditure of $3 million compared with $1.9 million for 1959 and $2.4 million for 1958. Dividends of $2 million were paid into the Treasury during 1958 and it is anticipated that $2.75 million will be paid for 1959 and $3 million for 1960.

Operating results.—1960 sales are estimated to increase $0.5 million to a total of $31 million and net income $0.1 million to a total of $4.1 million.

Retained earnings.—As of June 30, 1958, the Corporation's cumulative earnings amounted to $53.9 million, of which $17.9 million has been reinvested in the form of working capital, plant and equipment, and $36 million had been paid to the Treasury as corporate dividends. It is expected that retained earnings will increase to $20.3 million by June 30, 1960.

OFFICE OF ALIEN PROPERTY

LIMITATION ON SALARIES AND EXPENSES, OFFICE OF ALIEN PROPERTY

(Trust fund)

The Attorney General, or such officer as he may designate, is hereby authorized to pay out of any funds or other property or interest vested in him or transferred to him pursuant to or with respect to the Trading With the Enemy Act of October 6, 1917, as amended (50 U. S. C. App.) and the International Claims Settlement Act, as amended (22 U. S. C. 1631), necessary expenses incurred in carrying out the powers and duties conferred on the Attorney General pursuant to said Acts: *Provided*, That not to exceed [$2,500,000] *$1,500,000* shall be available in the current fiscal year for the general administrative expenses of the Office of Alien Property, including rent of private or Government-owned space in the District of Columbia[; and expenses of attendance at meetings of organizations concerned with the purposes of this authorization]: *Provided further*, That on or before November 1 of the current fiscal year, the Attorney General shall make a report to the Appropriations Committees of the Senate and the House of Representatives giving detailed information on all administrative and nonadministrative expenses incurred during the next preceding fiscal year in connection with the activities of the Office of Alien Property: *Provided further*, That of the total amount herein authorized the amount of [$100,000] *$50,000* is to be transferred to the appropriation for "Salaries and expenses, general administration", Justice. *(5 U. S. C. 295, 310, 312, 315, 341, 341e; 50 U. S. C., App. 6; Executive Order 9788, Oct. 14, 1946, 11 F. R. 11981; Department of Justice Appropriation Act, 1959.)*

This Office takes care of the Government's interests in wartime measures against alien property. Most of the Office's work will be completed by the end of 1960. The remainder will probably be assigned to one of the Department's legal divisions.

1. *Management and liquidation.*—Management of such alien enemy properties as interests in business enterprises, real estate, securities, life insurance, and tangible personal property is required until the disposition of such property.

	1958 actual	*1959 estimate*	*1960 estimate*

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 202. None of the funds appropriated by this title may be used to pay the compensation of any person hereafter employed as an attorney (except foreign counsel employed in special cases) unless such person shall be duly licensed and authorized to practice as an attorney under the laws of a State, Territory, or the District of Columbia.

SEC. 203. Seventy-five per centum of the expenditures for the offices of the United States attorney and the United States marshal for the District of Columbia from all appropriations in this title shall be reimbursed to the United States from any funds in the Treasury of the United States to the credit of the District of Columbia.

SEC. 204. Appropriations and authorizations made in this title which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations prescribed by the Attorney General.

SEC. 205. Appropriations and authorizations made in this title for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed $75 per diem for individuals.

SEC. 206. Appropriations for the current fiscal year for "Salaries and expenses, general administration", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Bureau of Prisons", shall be available for uniforms and allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131). (*Department of Justice Appropriation Act, 1959.*)

GENERAL PROVISIONS

SEC. 701. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not heretofore authorized by the Congress. (*Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1959.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1960

DEPARTMENT OF LABOR

The budget includes new obligational authority of $570 million for the Department of Labor for 1960, a decrease of $31 million from the current year. Expenditures in 1960 are estimated to be $445 million less than in 1959 due almost entirely to the expiration in 1959 of the temporary unemployment compensation program. Fifty-eight percent of the total new obligational authority requested is for grants to States for administration of the Federal-State employment security system. Another 34% is for the cost of unemployment compensation and workmen's compensation benefits for Federal employees. The remaining 8% is for the regular operating budgets for the various bureaus of the Department.

Labor and manpower.—Of new obligational authority of $370 million for the labor and manpower functions of the Department of Labor, $329 million is for grants to the States and $41 million is for the administrative costs of the Department.

The Federal-State system of employment security, consisting of 53 State agencies and about 1,800 local offices, provides unemployment compensation to individuals and assists them in securing employment. The expected reduction in the level of unemployment in 1960 will make possible a reduction in the State employment security staffs, but $3 million more is being requested for this program in 1960 primarily because of increases in State salaries. This system is administered by the States entirely with Federal funds out of the earmarked receipts of the Federal employment tax. Excess receipts not used for the administration of the program are appropriated by law to a special $200 million Federal fund in the Unemployment Trust Fund for loans to States whose benefit reserves become inadequate. Receipts not needed for the loan fund are appropriated by law to the individual State benefit accounts in the unemployment trust fund. These appropriations are shown in the Treasury chapter.

Because the earmarked receipts of the Federal Unemployment Tax Act are available only for employment security purposes, legislation will be proposed to finance this program through a trust account, as is done with the other social insurance programs.

Unemployment compensation benefit payments are made to eligible individuals in accordance with State laws which meet Federal requirements, and are financed by State employment taxes which are deposited in the unemployment trust fund. The transactions for this trust fund are shown in part III of the budget. Legislation will be proposed on unemployment compensation.

In addition to the State programs, there are two permanent unemployment insurance programs financed entirely by the Federal Government, one for Federal employees and ex-servicemen and one for Korean-conflict veterans; these are discussed below under veterans' services and benefits, and central personnel management and employment costs, respectively. Payments are made by the States as agents for the Federal Government.

Under similar arrangements, in those States entering into agreements, a temporary Federal program in 1958 and 1959 provided additional weeks of benefits equal to one-half of the weeks provided by the State. Twenty-two States, representing 76% of all individuals expected to exhaust their regular benefits, either made these payments or extended the duration of benefits under their own laws. New obligational authority of $666 million was provided in 1958 and expenditures were $48 million in 1958 and are estimated to be $412 million in 1959 for this program. The program is scheduled to terminate on April 1, 1959. Under present law these funds will be restored to the Treasury through an automatic increase in the Federal unemployment tax starting in 1963, in those States receiving Federal funds, or the funds can be restored earlier in some other manner by State action.

Within the appropriation for grants to the States, about $90 million directly supports the employment service which is one of the key elements in our free labor market. In the local offices record is made of the skills of available workers and the requirements of jobs that employers need to fill. An attempt is then made to match the two, utilizing, where necessary other offices and even the interstate clearance system. Workers are counseled and tested so that they will be properly placed. Close contact with employers is also necessary to help understand their skill requirements. Special job placement efforts are made on behalf of young people, handicapped workers, older workers, and low income farm families.

In the field of labor standards two new laws will require additional funds for administrative costs in 1960. Under the Welfare and Pension Plans Disclosure Act, enacted in 1958, administrators of plans subject to the act must file a description of each plan with the Secretary of Labor, and must file a financial report annually. The Bureau of Labor Standards will examine these reports, summarize them statistically, and make copies available for public inspection. Amendments to the act will be recommended mainly to strengthen the basic authority. The Longshoremen's and Harbor Workers' Compensation Act was amended in 1958 to require the Secretary of Labor to establish and enforce safety regulations for longshoremen and harbor workers. This will be done by the Bureau of Labor Standards in conjunction with its established safety programs. A supplemental appropriation will be requested for 1959 because of these two new laws. Additional funds are being requested to place these programs on an annual basis in 1960.

During 1958, the Wage and Hour Division made 53,796 investigations for minimum wage, overtime, and child labor violations. These investigations revealed $19.7 million in wages due, of which employers have agreed to pay $10.9 million. With a slightly smaller but more experienced staff, approximately the same level of investigation activity will be maintained in 1959 and 1960 under the current act. It will again be proposed, however, that the coverage of the Fair Labor Standards Act be extended.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Legislation also will again be proposed in 1960 to charge to employers the Bureau of Employees Compensation costs in administering the insurance provisions of the Longshoremen's and Harbor Workers' Compensation Act.

All costs of the Mexican farm labor program, except the cost of compliance, are borne—through a revolving fund—by farmers employing Mexican workers. In 1960, the full salaries of the compliance staff will be charged to appropriated funds, thus reducing costs to farmers.

Increases are requested for the Bureau of Labor Statistics for projects to maintain the validity of several statistical series and indexes. The establishment of a new governmentwide standard industrial classification will require retabulation of data on employment, hours, earnings and turnover. Similarly, new industry and establishment codes will be determined for establishments reporting injury statistics. Several surveys will be extended to the new State of Alaska.

Beginning in July 1959, responsibility for the Monthly Report on the Labor Force will be transferred from the Bureau of the Census to the Bureau of Labor Statistics. The Report estimates the size of the labor force and the total amount of employment and unemployment with detail on characteristics, occupations, type of work, and geographic location. The Bureau of the Census will continue to collect and tabulate the data, with the final responsibility for the estimates and their analysis being vested in the Bureau of Labor Statistics which will request the necessary funds for the entire program. Thus responsibility for the publication of all data on employment and unemployment will be centralized in the Department of Labor, which will continue the present weekly series of the Bureau of Employment Security on unemployment covered by the Federal-State insurance system and the monthly series of the Bureau of Labor Statistics on nonagricultural employment as shown by payroll data.

Changes in retailing since 1952 require an expansion of the present pricing program for the Consumer Price Index. With the appropriation recommended for 1960 important commodities showing wide variation in magnitude and frequency of price change will be priced more frequently. The sample of items priced also will be increased to be more representative, and the number of quotations per city will be expanded wherever prices vary considerably within a city. In addition, a complete revision of the Index will be initiated for completion in 1964, 12 years after the last revision.

In 1960 the Labor Department's portion of the construction statistics program will be shifted to the Department of Commerce to be consolidated and funded with the rest of this statistical program. At the same time the Department of Labor program for data on labor requirements will be strengthened.

Other veterans' services and administration.—Payments under the program of unemployment compensation for Korean-conflict veterans will be $36 million less in 1960 than in 1959, and no payments will be made after January 1, 1960. The purpose of the program will be fulfilled by the new program for ex-servicemen, discussed below.

Central personnel management and employment costs.—On October 28, 1958, a new law went into effect providing unemployment compensation benefits for ex-servicemen. The act redefines Federal service in the existing law to include military service, and the new program will be administered and funded as part of the existing program for former Federal Government employees. Benefits are computed under the law of each State on the same basis as benefits for former employees of private establishments. The Bureau of Employment Security supervises the program and reimburses the States for their costs.

In 1959 this program will require $118 million, including a supplemental appropriation of $41.2 million. In 1960, $9 million additional will be needed, despite the anticipated reduction in unemployment generally, since this will be the first full year for the program.

Compensation payments for Federal workers that are paid by the Bureau of Employees Compensation, will be $10 million less in 1960. Under a recent ruling in an appealed case, a one-time retroactive payment is being made in 1959 to survivors of military personnel who died during the Korean conflict.

Intragovernmental funds:

WORKING CAPITAL FUND

This fund was established within the Office of the Secretary to provide centralized services for the various bureaus in Washington and their field offices (5 U. S. C. 662a). Activities are described as follows:

Communication service consists of furnishing all communication, mail and messenger services to the various bureaus.

Central supply consists of purchasing and distribution functions of equipment and supplies.

Duplicating service consists of offset printing, mimeographing and mailing of publications, bulletins, leaflets, and statistical data.

Visual exhibits consists of preparing displays for public information as well as internal use.

Financing.—The stocks of supplies and equipment on hand or on order June 30, 1957, were used to capitalize the fund. The fund is reimbursed in advance by the bureaus, offices, and agencies for which services are performed.

Operating results.—Services rendered are charged for at rates which return in full all expense of operation, including reserves for accrued leave and depreciation of equipment.

Sources and Application of Funds (Operation)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
Communication service: Expense	$125,428	$349,700	$344,500
Central supply: Expense	211,465	216,700	213,800
Duplicating service:			
Acquisition of equipment	9,208	17,000	10,000
Expense	293,088	310,500	319,600
Cost of goods sold	112,694	100,000	100,000
Visual exhibits:

OFFICE OF THE SOLICITOR—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
New obligational authority:			
Appropriation	$2,121,000	$2,431,000	$2,695,000
Transferred from "Unemployment compensation for veterans and Federal employees," Bureau of Employment Security (72 Stat. 243)	85,725		
Appropriation (adjusted)	2,206,725	2,431,000	2,695,000
Proposed supplemental due to pay increases		212,000	

1. *Departmental program activities*—(*a*) *Litigation.*—This includes direction and supervision of enforcement of Federal labor standards statutes through court action and administrative proceedings. The disposition of court cases during 1958, resulting in 98 percent being disposed of favorable to the Government, is as follows:

Criminal cases	148
Civil cases	1,015
Walsh-Healey administrative enforcement hearing cases	38
Total cases closed	1,201
Back wages collected by litigation	$1,667,457
Fines in criminal cases	$153,193

(*b*) *Interpretations and legal advisory services.*—The Office provides legal services to departmental officials. During 1958, a total of 20,138 interpretations and opinions were rendered on the laws administered by the Department. Beginning in 1959, initial interpretations and functions under the recently enacted Welfare and Pensions Plan Disclosure Act and the new safety provisions of the Longshoremen's and Harbor Workers' Compensation Act are being performed by this activity, which will result in an increased workload.

(*c*) *Wage determinations.*—Predeterminations of prevailing wages to be paid laborers and mechanics on public construction contracts are made and coordination of the administration and enforcement by Federal contracting agencies of labor-standards provisions in statutes relating to public construction is provided.

WORKLOAD

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Requests for wage determinations:				
Federal contracts	26,916	30,314	36,860	37,410
Federal highway program	1,284	2,969	3,914	3,914

(*d*) *Legislative advisory services.*—This provides analyses and reports on legislation and drafts of proposed legislation for the Department.

2. *Field legal services.*—Services rendered at the regional level include interpretations and legal advice to regional office officials and to the public on specific request; and enforcement of the Federal labor standards statutes through court and administrative proceedings.

Federal Reserve Bank of St. Louis

administration and the enactment of appropriate labor legislation and by negotiating Federal-State agreements to eliminate duplication in inspection. Assistance was provided to 47 States in 1958 in response to 864 requests.

2. *Improving conditions of migratory workers.*—Cooperation is maintained with Federal and State agencies and voluntary organizations to improve the working and living conditions of migratory workers; a secretariat is provided for the President's Committee on Migratory Labor. Services were given to 29 States and 15 State committees on migratory labor matters in 1958; and 5 new State committees were established in that year.

3. *Reducing industrial accidents.*—This involves providing engineering consultation, technical advice, educational and promotional assistance in all phases of occupational accident prevention to States, labor unions, maritime and special industries, and Federal agencies. During 1958, a total of 1,109 safety surveys were completed and 139 training courses and talks were given for 3,688 trainees. Request for 1960 includes funds for carrying out safety activities under the 1958 amendments to the Longshoremen's and Harbor Workers' Compensation Act.

4. *Protecting young workers and advancing their employment opportunities.*—This includes research activities, serving as a center of information and advisory service in this field, promoting annual back-to-school campaign, and developing standards for child-labor regulations under the Fair Labor Standards Act.

5. *Promoting employment of the physically handicapped.*—A continuing program of public information and education is conducted through the President's committee to advance the employment of handicapped citizens; cooperation is maintained with all national groups interested in the field including the governors' committees in the States and Territories.

6. *Registration of labor union data.*—Financial and organizational data are required to be filed as a condition of union use of National Labor Relations Board facilities. About 23,000 unions file annually.

7. *Registration and disclosure of welfare and pension plan data.*—Administrators of plans subject to sections 8 (b) and (c) of the Welfare and Pension Plan Disclosure Act must file copies of the description of the plan and each annual report thereon with the Secretary of Labor, effective January 1, 1959. It is estimated that approximately 250,000 annual filings will be made.

A supplemental appropriation in the amount of $690,000 is anticipated for 1959 under Proposed for later transmission.

Proposed supplemental due to pay increases		325,000	

1. *Training promotion and service to industry.*—Industry and labor are encouraged and assisted to develop skills in the work force through the organization and improvement of programs of apprenticeship and allied training. About 145,000 business establishments, 12,000 union locals, and 2,400 local chapters of employer associations participate, providing employment and training for 230,000 apprentices and supplemental skill development for thousands of other workers.

2. *Training research and technical services.*—Research and development activities provide information on skill requirements, training technology, and apprenticeship labor standards. Training aids and other techniques to increase the effectiveness of apprenticeship and allied training are made available. About 8 pamphlets, 5 articles, and 5 reprints are published each year to call attention to skill needs of labor force conditions in various industries, and to provide information about superior programs. More than 1,000 written recommendations for improving training practices are made each year to management and labor.

Transferred from "Unemployment compensation for veterans and Federal employees" (72 Stat. 241)	5,700		
Appropriation (adjusted)	131,300	6,519,000	7,262,000
Proposed supplemental due to pay increases		577,000	

NOTE.—Advances from non-Federal sources are from the Federal unemployment account in the unemployment trust fund (71 Stat. 211; 72 Stat. 241).

The Bureau of Employment Security supervises the administration of the Federal-State system of employment security consisting of 53 State agencies and about 1,800 local offices providing unemployment compensation to individuals and assisting them in securing employment. Legislation will be proposed to provide trust fund financing for this account in 1960.

1. *Veterans' placement service.*—This service helps State local employment offices in giving suitable counseling and placement services to veterans and promotes the interest of employers in employing veterans.

2. *Farm placement service.*—In cooperation with the State farm placement offices, this service develops and uses special recruitment and placement programs to meet agriculture's need for year-round and seasonal workers.

3. *Collection and interpretation of labor market information.*—Information is analyzed on the administrative operations of the unemployment insurance and employment service programs and on the supply, demand, and utilization of labor by areas, industries, and occupations.

4. *Assistance in maintaining public employment services.*—States are assisted in (*a*) counseling and testing of youth, veterans, handicapped and older workers, and others in occupational adjustment; (*b*) recruitment and placement programs; and (*c*) interstate recruitment of workers. In 1960 emphasis will be placed on placement and employment counseling services in a growing technological economy characterized by more occupational shortages and surpluses.

5. *Unemployment insurance service.*—State laws and interpretations are reviewed to assure conformity with the Federal law requirements. Surveys are made to assist States in improving administrative procedures. The Bureau directs State and Federal agencies in the administration of Federal benefits to unemployed Federal employees and ex-servicemen. In 1960 emphasis will be placed on (*a*) perfecting administration of the new ex-servicemen's benefit program which went into effect in 1959; (*b*) analyzing the results of the temporary extension of benefits under Public Law 85–441 (72 Stat. 171) in terms of effect on operations and future program development; (*c*) strengthening State systems of tax and benefit operations, through a program of comparative costing and evaluation; and (*d*) assisting States in establishment of internal audit methods to improve management and operations. A supplemental appropriation is anticipated for 1959 in connection with this work and that in activity 3 above, and is shown under Proposed for later transmission.

6. *Field guidance, financing, and auditing of State operations.*—The 53 State employment security agencies are assisted in improving their programs, organization, and management. Agencies are audited annually. In 1960 increased attention will be given to the (*a*) audit of State agency expenditures from granted funds and to improvement of State agency management policies and practices, and (*b*) strengthening State systems of tax and benefit operations.

GRANTS TO STATES FOR UNEMPLOYMENT COMPENSATION AND EMPLOYMENT SERVICE ADMINISTRATION—Continued

ployment Compensation Board, subject to the same conditions with respect to the use of these funds for such purposes as are applicable to the procurement of buildings for other State employment security agencies, and for expenses not otherwise provided for, necessary for carrying out title IV of the Veterans' Readjustment Assistance Act of 1952 (66 Stat. 684) and title XV of the Social Security Act, as amended (68 Stat. 1130), [$305,000,000] *$328,684,000*, of which [$10,000,000] *$15,000,000* shall be available only to the extent necessary to meet increased costs of administration resulting from changes in a State law or increases in the numbers of claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant (or the allocation for the District of Columbia) was based, which increased costs of administration cannot be provided for by normal budgetary adjustments: *Provided*, That notwithstanding any provision to the contrary in section 302 (a) of the Social Security Act, as amended, the Secretary of Labor shall from time to time certify to the Secretary of the Treasury for payment to each State found to be in compliance with the requirements of the Act of June 6, 1933, and, except in the case of Puerto Rico, Guam, and the Virgin Islands, with the provisions of section 303 of the Social Security Act, as amended, such amounts as he determines to be necessary for the proper and efficient administration of its unemployment compensation law and of its public employment offices: *Provided further*, That such amounts as may be agreed upon by the Department of Labor and the Post Office Department shall be used for the payment, in such manner as said parties may jointly determine, of postage for the transmission of official mail matter in connection with the administration of unemployment compensation systems and employment services by States receiving grants herefrom.

In carrying out the provisions of said Act of June 6, 1933, the provisions of section 303 (a) (1) of the Social Security Act, as amended, relating to the establishment and maintenance of personnel standards on the merit basis, shall apply.

None of the funds appropriated by this title to the Bureau of Employment Security for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States under title III of the Social Security Act, as amended, and under the Act of June 6, 1933, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under such title and under such Act of June 6, 1933, to be charged to the appropriation therefor for that fiscal year.

[For an additional amount for "Grants to States for unemployment compensation and employment service administration", $20,600,000, of which $14,200,000 shall be available only to the extent necessary to meet increased costs of administration resulting from changes in a State law or increases in the number of claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant (or the allocation for the District of Columbia) was based, which increased costs of administration cannot be provided for by normal budgetary adjustments.] *(38 U. S. C. 695b; 29 U. S. C. 49–49n; 42 U. S. C. 1361–1370; 72 Stat. 1087; Department of Labor Appropriation Act, 1959; Supplemental Appropriation Act, 1959.)*

Appropriated 1959, **$325,600,000** Estimate 1960, **$328,684,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Unemployment compensation	$173,507,991	$178,239,000	$185,537,000
2. Employment service	84,872,515	87,144,000	90,174,000
3. State administration	28,085,892	28,595,000	30,251,000
4. Unemployment compensation for veterans and Federal employees	$6,347,281	$7,422,000	$7,722,000
5. Contingency fund		24,200,000	15,000,000
6. Obligations incurred for programs of other years, net	3,971,400		
Total obligations	296,785,079	325,600,000	328,684,000
Financing:			
Appropriation available from subsequent year	−24,174,400	−24,174,400	−24,174,400
Appropriation available in prior year	20,203,000	24,174,400	24,174,400
Unobligated balance no longer available	321		
Appropriation (new obligational authority)	292,814,000	325,600,000	328,684,000

Grants are made to the States for administration of the unemployment compensation and employment service programs. Legislation will be proposed to provide trust fund financing for this account in 1960.

While State staff is expected to decline somewhat in 1960 an increase of $3,084,000 is requested primarily for increased tax and auditing workloads and increases in the average annual salary. The average annual salary was $4,293 in October of 1958 and is expected to rise to $4,425 in 1960.

1. *Unemployment compensation.*—State funds are used to make unemployment compensation payments to unemployed workers eligible under State laws. Federal grants in 1958 provided State administrative costs of collecting $1.5 billion in taxes, paying $2.9 billion in benefits, and deciding appeals. Claim filing is expected to decrease in 1960 as unemployment decreases.

UNEMPLOYMENT COMPENSATION WORKLOADS

Basic workload	*1958 actual*	*Percent change from 1957*	*1959 estimate*	*1960 estimate*
Employer tax returns processed	8,598,000	+3	8,606,000	8,900,000
Employee wage items recorded	122,450,000	−2	123,025,000	126,000,000
Initial claims taken	18,474,000	+53	18,471,000	18,200,000
Continued claims taken	104,134,000	+67	104,073,000	101,700,000
Claims processed	10,364,000	+50	10,365,000	10,000,000
Benefit payments made	92,081,000	+70	92,075,000	88,500,000
Appeals	265,000	+20	276,000	290,000

2. *Employment service.*—Federal grants finance an employment service to find employment for persons seeking jobs and to provide workers for employers who need them. This is accomplished by selecting and referring workers to jobs, providing services to employers in the analyses of jobs and staffing problems and by testing and counseling services. In 1960 a decrease of 6% is expected in applications for jobs as a result of decreasing unemployment.

EMPLOYMENT SERVICE WORKLOADS

Basic workload	*1958 actual*	*Percent change from 1957*	*1959 estimate*	*1960 estimate*
Applications for work taken	10,413,000	+22	10,100,000	9,500,000
Counseling interviews	1,543,000	+2	1,800,000	1,800,000
Individuals tested	1,350,000	−7	1,502,000	1,502,000
Placements, nonagricultural	5,407,000	−12	5,493,000	5,493,000

3. *State administration.*—State headquarters provide leadership and planning for the unemployment compensation and employment service activities in the central and local offices as well as legal, fiscal, personnel, training, and research activities.

4. *Unemployment compensation for veterans and Federal employees.*—Claims filed under these Federal unemployment compensation programs require processing activities similar to those listed under activity 1. The slight increase in these processing costs in 1960 results from the operation for a full year of the new ex-servicemen's unem-

Federal Reserve Bank of St. Louis

ployment compensation program. The benefit payments are provided under the appropriation, Unemployment compensation for veterans and Federal employees.

5. *Contingency fund.*—This fund is used to meet unforeseen increases in the number of claims filed, in State salary rates due to changes in State compensation plans embracing employees of the State generally and changes in State unemployment compensation laws.

6. *Obligations incurred for programs of other years, net.*—Because of State legal requirements, funds for July operations must be made available to the States before the year begins. In 1958, obligations were increased by $3,971,400 because $20,203,000 had been advanced to 1957 from 1958 while $24,174,400 was advanced from 1959 to 1958.

Unemployment Compensation for Veterans and Federal Employees

For payments to unemployed *veterans and* Federal employees, either directly or through payments to States, as authorized by title XV of the Social Security Act, as amended, [$27,800,000] *and title IV of the Veterans' Readjustment Assistance Act of 1952, $135,000,000.*

Unemployment compensation for *veterans and* Federal employees, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States, as authorized by title XV of the Social Security Act, as amended, *and title IV of the Veterans' Readjustment Assistance Act of 1952,* such amounts as may be required for payment to unemployed *veterans and* Federal employees for the first quarter of the next succeeding fiscal year, and the obligations and expenditures thereunder shall be charged to the appropriation therefor for that fiscal year.

[For payments to unemployed veterans as authorized by title IV of the Veterans' Readjustment Assistance Act of 1952, $19,000,000.]

[Unemployment compensation for veterans, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States, as authorized by title IV of the Veterans' Readjustment Assistance Act of 1952, such sums as may be necessary to pay benefits for the first quarter of the next succeeding fiscal year, and the obligations and expenditures thereunder shall be charged to the appropriation therefor for that fiscal year.]

[Appropriations for the current fiscal year for "Unemployment compensation for veterans", and for "Unemployment compensation for Federal employees", are hereby merged into a single account to be known as "Unemployment compensation for veterans and Federal employees".] *(38 U. S. C. 991–999; 42 U. S. C. 1361–1370; 72 Stat. 1087; Department of Labor Appropriation Act, 1959; Independent Offices Appropriation Act, 1959.)*

Appropriated 1959, [a] **$120,800,000** Estimate 1960, **$135,000,000**

[a] Includes $74,000,000 appropriated in Supplemental Appropriation Act, 1959.

"Salaries and expenses," Wage and Hour Division	−415,892		
Appropriation (adjusted)	129,948,984	120,800,000	135,000,000

Funds are allocated to the States for payment of unemployment compensation to eligible Korean veterans, ex-servicemen, and Federal employees. In 1959 benefit payments are being made at a rate higher than the $120,800,000 appropriation will support. A supplemental appropriation of $41,200,000 for 1959 is anticipated under Proposed for later transmission.

1. *Payments to Federal employees* are paid in accordance with the State unemployment compensation laws. It is expected that Federal employment will be more stable in 1960 and that these benefits will decline to $57 million. Workloads are estimated to be approximately the same as in 1958 but the average weekly payment will increase somewhat, reflecting action to increase compensation payments in some States.

WORKLOAD

	1958 actual	*1959 estimate*	*1960 estimate*
Initial claims taken	203,105	202,000	195,000
Weeks compensated	1,800,906	2,100,000	1,842,800
Weekly average insured unemployment	36,645	42,700	37,500
Average weekly benefits	$29.20	$30.00	$31.00

2. *Payments to ex-servicemen* are authorized by Public Law 85–848 (72 Stat. 1087), which redefines Federal service in the existing law to include military service. The new program, which began October 28, 1958, filled one of the important remaining gaps in unemployment compensation coverage. The estimate of $70 million for 1960 is made on the basis of a full year's operation.

Appropriation (adjusted)	2,334,700		

Mexican agricultural labor is imported for use in areas having a shortage of domestic agricultural workers. Authorization for this program was extended to June 30, 1961, by Public Law 85–779, approved August 27, 1958 (72 Stat. 934). A transfer from the farm labor supply revolving fund is authorized to cover all costs except compliance activities.

1. *Determining Mexican labor requirements.*—The agricultural areas needing Mexican workers and the number of workers required are determined. Requests from 375 areas will be considered for approval in 1959.

2. *Supplying Mexican labor requirements.*—Workers are recruited in Mexico and transported to centers in the United States where employers contract for their use. In 1958, a total of 418,976 workers were contracted. An estimated 400,000 workers will be contracted in 1960. The overall cost, including compliance activities, for supplying a Mexican agricultural worker averaged $13.74 in 1958 and is estimated to be $14.75 in 1959 due to the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

installation of the new serology program and the reduction in the number of workers contracted.

3. *Determining compliance with contract provisions.*—In 1959 a separate appropriation was established for this activity.

4. *Farm labor analysis.*—Farm labor reports are analyzed to evaluate the Mexican labor program. Technical assistance is provided States in the preparation of these reports, which are estimated to number 6,025 in 1960 as compared with 6,525 in 1958.

Appropriation (new obligational authority)	665,700,000		

1. *Temporary unemployment compensation payments.*—Individuals who have exhausted all rights to unemployment compensation under State unemployment compensation laws, the unemployment compensation for Federal employees program, and the unemployment compensation for veterans program, receive benefits for an additional period under this temporary Federal program. Before the program expires on April 30, 1959, it is estimated that 1.8 million claims for benefits will be filed.

2. *State administration.*—The State employment security agencies administer this program as agents of the Federal Government through 1,800 local employment security offices. These agencies are reimbursed for the costs they incur by the Federal Government.

3. *Federal administration.*—The Bureau of Employment Security provides national supervision and control of the program and makes its resources available to the States for assistance in administering it.

Financing applied to program	2,889,534	3,647,341	3,669,300

This fund covers transportation and other costs directly involved in importing Mexican farm workers (7 U. S. C. 1461–1468). Public Law 85–779 dated August 27, 1958, extends the authority until June 30, 1961.

Budget program.—The program involves the recruitment and importation of Mexican workers for agricultural work on farms in the continental United States. This requires the establishment and operation of reception centers to provide housing, subsistence, and medical care. An estimated 400,000 Mexican farm workers will be imported in 1959 and 400,000 in 1960.

Relation of costs to obligations.—The relationship is derived from year-end balances and an adjustment of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Unpaid undelivered orders	$25,000	$146,821	$125,000	$125,000
Deferred charges		30,838	30,000	30,000
Supplies, etc.	103,463			
Advances	105,300			
Total selected resources at end of year	233,763	177,659	155,000	155,000
Selected resources at start of year (−)		−233,763	−177,659	−155,000
Adjustment due to conversion to accrual basis		−306,192		
Costs financed from obligations of other years, net (−)		−362,296	−22,659	

Financing.—The costs of operating this program are met by fees charged the employer for each worker con-

FARM LABOR SUPPLY REVOLVING FUND—Continued

tracted. On August 1, 1958, the fee for initially contracting a worker was established at $15 per worker, increased from $10. The fee for recontracting a worker was set at $7.50, an increase of $2.50. During 1959 and 1960, it is estimated that the rates of $15 and $7.50 will provide not only for the increased cost of importing workers but also the cost of the serological testing to be administered by the Public Health Service starting in 1959. Further, these rates will absorb some direct costs previously financed from the Mexican farm labor appropriation.

Operating results and financial condition.—Revenue from operations is estimated to exceed expenses in both 1959 and 1960. After allowing for transfers of $1,680,000 in 1959 and $1,336,700 in 1960 to the Salaries and expenses, Mexican farm labor program, appropriation to meet direct costs previously financed thereunder, retained earnings as of June 30, 1960, are estimated to be $1,077,750. The loss of $23,474 in 1958 reflects adjustments in converting from an obligational basis to an accrual basis. Earnings are retained to meet future requirements.

Appropriation (new obligational authority)	59,589,635	71,900,000	62,000,000

Benefits are paid to civil employees of the Government disabled in the performance of duty or to their dependents, to dependents of certain reservists in the Armed Forces who died while on active duty with the Armed Forces or while engaged in authorized training in time of peace, to members of the Civil Air Patrol as authorized by the act of August 3, 1956, and to others by various extensions of the Federal Employees' Compensation Act.

Benefits are also paid to employees of Government contractors and to American civilians who were captured by the Japanese. Funds for payment of all future benefits under this program were transferred from the war claims fund to the general fund of the Treasury in 1957.

Appropriation (adjusted)	7,463,382	7,424,500	9,465,000
Proposed supplemental due to pay increases		595,000	

1. *Collection, analysis, and publication of labor and economic statistics*—(*a*) *Manpower and employment.*—The level and trend of nonagricultural employment, hours, earnings, and labor turnover are analyzed. Publications include the Occupational Outlook Handbook, estimates of manpower requirements and supply, and reviews of long-range employment and labor force trends. Over $1 million of the 1960 total for this activity will be used for the Monthly Report on the Labor Force presently published by the Department of Commerce. Also in 1960 the establishment of a new governmentwide Standard Industrial Classification requires retabulation of data on employment, hours, earnings, and turnover from about 180,000 establishments for the calendar years 1958, 1959, and the first half of 1960.

(*b*) *Prices and cost of living.*—The Consumer Price Index is published, covering the urban wage earner and salaried clerical workers families of the United States, for the Nation (based on 46 cities) and for 20 selected large cities. Trends of primary market prices are published for 2,000 industrial and agricultural products. The Consumer Price Index is incorporated in many labor-management contracts for wage determining purposes, and indexes of primary market prices are used in escalating costs for commercial contracts. In 1960 emphasis will be placed on improvements in pricing at the consumer level. Attention will continue to be given to providing price information necessary for improving the national economic accounts.

(*c*) *Wages and industrial relations.*—Information is provided on wages by occupation for 18 to 20 major industrial centers, and for about 8 selected major industries; monthly developments in industrial relations and wages for key collective bargaining situations; and provisions of labor-management contracts and work stoppages.

(*d*) *Housing and public construction.*—These statistics provide current information on the volume of new housing. This function will be performed by the Bureau of the Census in 1960.

(*e*) *Measurement of productivity.*—Annual indexes of output per man-hour are prepared, together with an analysis of productivity trends, and studies of automation and other technological developments. Recently emphasis is on the study of adjustments to automation worked out between workers and management at the plant level. In 1960 increased emphasis will be given to providing indexes in greater industrial detail.

(*f*) *Industrial hazards.*—Quarterly and annual data are published on industrial injuries, together with analyses of the causes of injuries for selected industries. These constitute comprehensive and reliable basic data for industrial safety programs, both public and private. Special emphasis is placed on the development of a more extensive State-Federal program of injury statistics.

(*g*) *Foreign labor conditions.*—Summary information on labor in foreign countries is made available, including data on employment, wages, labor law, living costs, and current labor developments generally. Current emphasis is on more adequate wage statistics.

Revision of the Consumer Price Index

For expenses necessary to enable the Bureau of Labor Statistics to revise the Consumer Price Index, including temporary employees at rates to be fixed by the Secretary of Labor without regard to the civil service laws and Classification Act of 1949, as amended, $230,000, to remain available until June 30, 1964.

Estimated 1960, **$230,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activity:			
Preliminary planning and analysis (total obligations)			$230,000
Financing:			
Appropriation (new obligational authority)			230,000

The Consumer Price Index measures average changes in the retail prices of selected goods, rents, and services, weighted by quantities bought by families of wage earners and moderate income workers. A revision of the index will be made based on current patterns of consumer expenditures in order to modernize the index to meet the demands for its use in present day domestic, economic, and industrial planning. The revision will be made over a 5-year period and the 1960 appropriation will provide planning funds.

Appropriation (adjusted)	480,418	462,000	509,000
Proposed supplemental due to pay increases		44,000	

1. *Development of programs and materials to improve women's employment opportunities and economic status.*—In 1958 22.3 million women comprised one-third of the total labor force. In 1960, cooperating with other bureaus of the Department and outside organizations, the Bureau will emphasize employment opportunities for women in the manufacture of electronics equipment, technical occupations in biology for which women should be prepared, and changes in occupational opportunities resulting from the introduction of automated processes in jobs held by women. Studies will be made of the part-time employment of women, programs designed to increase the employment opportunities of older women, and ways to alleviate shortages of nurses, teachers, and clerical workers.

2. *Advisory services on legislation affecting women workers.*—State minimum-wage laws and orders, equal pay for comparable work, standards for hours of work and working conditions, and laws affecting women's civil and political status comprise the subject areas in which the Bureau regularly supplies technical advice and information to States and other interested parties. The 1960 program includes a study of campaigns for equal pay; development of a pilot community action program on day care facilities for children of working mothers; assistance to voluntary organizations on migratory labor activities; preparation of a technical report on procedures for minimum wage hearings; and a publication on international programs to advance the status of women.

Proposed supplemental due to pay increases		917,000	

The Division obtains compliance with minimum standards respecting wages, hours, and other employment conditions in industries engaged in interstate commerce and in establishments furnishing goods to the Government.

1. *Promotion of compliance and enforcement.*—Information media are used to inform employers and employees of their rights and responsibilities under the law, with planned emphasis on developing new ways and new approaches to educate both groups. Investigations are made to correct violations and to assist employers in meeting legal requirements and workers in recovering wages due. During 1958 a total of 53,796 establishments were investigated and 166,497 employees were found to be due wages in the amount of $19,655,299 of which employers have agreed to pay $10,953,896. The investigation program will continue at about the same level in 1959 and 1960 with a slight decrease in the present staff.

2. *Wage standards and determinations.*—During 1959 and 1960 five industry committees will be convened each year to recommend minimum wage rates under the Fair Labor Standards Act in Puerto Rico, the Virgin Islands, and American Samoa in conformance with existing law requiring review of all minimum wage rates on these islands not less than once every 2 years. Regulations governing subminimum wages for learners, apprentices, messengers, and handicapped workers are being constantly reexamined. It is estimated that 1,600 applications for subminimum wage certificates will be received in 1960, as compared to 1,800 in 1959. Wage determinations under the Walsh-Healey Act will be continued at the level of seven determinations in 1960.

3. *Regulations and interpretations.*—Regulations and interpretations are prepared to give effect to the Fair Labor Standards Act. Emphasis will be directed to development and revision of issuances affected by amendments to the act and changes in industry practices.

4. *Economic analysis and statistics.*—Economic research and analysis and development of statistical data, necessary in the consideration of administrative problems and legislative proposals, is provided. The report of studies of effects of the $1 minimum wage, required by law to evaluate the present minimum wage and to determine the ability of employers to absorb wage increases, will be completed in 1959. Further studies will be conducted in 1959 and 1960 to provide current data for reports to the Congress.

GENERAL PROVISIONS

SEC. 901. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 902. Apropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) [and for expenses of attendance at meetings concerned with the function or activity for which any such appropriation is made]. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1959.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1960

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
OFFICE OF THE SECRETARY								
Salaries and expenses						4	$860	Secretary, Undersecretary, and assistant secretaries. Transportation to and from official meetings and conferences in Washington, D. C., with Members of Congress and other Government officials.
Station wagon							420	To provide transportation between buildings which house 50% of the District of Columbia employees of the Department.

POST OFFICE DEPARTMENT

New obligational authority of $172 million is recommended for the Post Office Department for 1960. The decrease of $386 million from 1959 reflects predominantly additional postal revenue of $350 million anticipated under legislation to be proposed to increase postal rates.

Net budget expenditures of $752 million in 1959 will fall even more sharply to an estimated $109 million in 1960. This drop reflects not only the increases to be proposed in postal rates but also the inclusion of payments in 1959 for retroactive employee pay and railroad transportation.

The cost of the postal service is financed primarily from postal revenue. The deficit remaining is made up by an appropriation from the general fund of the Treasury. Under present legislation about 87% of the funds necessary for the operating and capital obligations of the Department in 1960 will come from users of the postal service; about 4% is requested to be appropriated by the Congress specifically to the Department to pay the loss on various public service activities performed by the Department; and the remaining 9% represents the deficiency in postal rates under existing rate legislation.

Mail volume.—The continuing expansion in economic activity is the primary reason for the increase of 4.3% anticipated in mail volume between 1959 and 1960. The 1960 forecast of 64.5 billion pieces includes 34.9 billion first-class letters and cards, 1.5 billion air-mail items, 7 billion magazines and newspapers, 1.2 billion parcels, 17.4 billion pieces of advertising and circular matter, and 2.5 billion pieces in all other categories of mail.

Postal obligations.—Obligations for 1960 are estimated to be $3,920 million, compared with $3,680 million for 1959. The increase of $240 million in 1960 over 1959 arises mainly from the higher postal volume and from increases in the capital and research programs. The average postal cost per million pieces of mail is estimated to be $60,815 in 1960 compared with $59,547 in 1959. This rise is due almost entirely to the expanded program of research and modernization of postal facilities and equipment. The 1960 budget specifically includes $88.5 million for this purpose.

Postal revenue.—Under present laws, net postal revenue for 1960 is estimated at $3,570 million, compared to $3,308 million for 1959. The totals include, in both cases, receipts from payments for public service, as recommended in the budget in accordance with the Postal Policy Act of 1958. The increase of $262 million arises predominantly from (*a*) the higher total mail volume anticipated; (*b*) the full year effect of the higher postal rates authorized by the Congress and certain additional increases accruing in 1960; and (*c*) the additional revenue expected from the parcel post rate increases now under consideration by the Inter-State Commerce Commission.

The 1958 act requires that postal rates and fees be adjusted from time to time to produce revenue "approximately equal to the total cost of operating the postal establishment, less the amount deemed to be attributable to the performance of public services." Pursuant to this requirement, new postal rate proposals to increase revenue by $350 million will be submitted to the Congress for action during the current session.

Postal deficit and budget expenditures.—The postal deficit is the difference between postal obligations and postal revenue. As the result of the rate increases and the provision for reimbursement for public services under the 1958 act, a postal deficit of $372 million is estimated for 1959. This will be further reduced for 1960 to $350 million under present law, and will be completely eliminated by enactment of the postal rate legislation to be proposed.

Net expenditures from the postal fund, the difference between checks issued and revenue, reflect not only the postal deficit but also the lag between obligations and expenditures, which varies from year to year. In 1959 these expenditures were increased by the large retroactive payments for pay and transportation, while in 1960 they will be reduced by a substantial amount. Budget expenditures include both the net expenditures from the postal fund and the payment for public services. The following table shows the effect of the changes in the postal deficit and in other factors on the net requirements for budget expenditures.

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Obligations subject to appropriation	$3,441	$3,680	$3,920
Net postal revenue:			
Existing legislation (including receipts for public services in 1959 and 1960)	−2,550	−3,308	−3,570
Proposed rate increases	------	------	−350
Postal deficit	891	372	-----
Adjustment in prior year obligations	21	------	------
Adjustment in working capital	−238	209	−64
Net expenditures from postal fund	674	581	−64
Payment for public services	------	171	172
Budget expenditures for the postal service	674	752	109

Deposit funds.—Money order and postal savings funds entrusted to the postal service are accounted for separately as deposit funds and are, therefore, excluded from the budgetary tables.

CURRENT AUTHORIZATIONS OUT OF GENERAL FUND

Current authorizations:

PAYMENT FOR PUBLIC SERVICES

For payment into the postal revenues for public services, in accordance with section 104 of the Postal Policy Act of 1958 (72 Stat. 136, 137), $172,000,000.

Estimate 1960, **$172,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Loss on free and preferred rate mail			$131,863,000
2. Loss on nonpostal services for other agencies			16,482,000
3. Loss on special services			22,655,000
4. Excess rates paid to foreign air carriers			1,000,000
Total obligations			172,000,000
Financing:			
Appropriation (new obligational authority)			172,000,000

The Postal Policy Act of 1958 (title I of Public Law 85–426, approved May 27, 1958), identifies as "public services" certain types of services traditionally rendered by the Post Office Department, and provides that the loss thereon may not hereafter be considered a charge against users of the mail. The Congress is requested to appropriate an amount to cover these losses to be paid into postal revenues out of the general fund of the Treasury. This appropriation does not augment the Department's obligating authority.

The estimates shown for 1959 in the following table are proposed for later transmission. No estimates are submitted under paragraph (a) (2) of section 104 of the law (loss on star routes and third and fourth class post offices) because there appears to be no practical way of determining gains or losses on operating elements of the postal system itself.

Activity	*1959*	*1960*	*Increase or decrease (−)*
Loss on free and preferred rate mail	$128,236,000	$131,863,000	$3,627,000
Loss on nonpostal services for other agencies	16,988,000	16,482,000	−506,000
Loss on special services	24,894,000	22,655,000	−2,239,000
Excess rates paid to foreign air carriers	1,141,000	1,000,000	−141,000

11 Grants, subsidies, and contributions			$172,000,000

Public enterprise funds:

CONTRIBUTION TO THE POSTAL FUND

(Indefinite)

For administration and operation of the Post Office Department and the postal service, there is hereby appropriated the aggregate amount of postal revenues for the fiscal year ending June 30, [1959] *1960*, as authorized by law (39 U. S. C. 786, 794a), together with an amount equal to the difference between such revenues and the total of the appropriations hereinafter specified and the sum needed may be advanced to the Post Office Department upon requisition of the Postmaster General, for the following purposes, namely: (*Treasury-Post Office Appropriation Act, 1959.*)

Appropriated (est.) 1959, **$516,893,915**

Estimate 1960, **$350,000,000**

CURRENT AUTHORIZATIONS OUT OF GENERAL FUND—Continued

Public enterprise funds—Continued

POSTAL FUND—Continued

Revenues from mail and other services of the Post Office Department are placed in the postal fund, which was established as a revolving fund in 1950 (39 U. S. C. 794a). The fund is available for obligation and expenditure by the Post Office Department primarily in accordance with limitations established in appropriation accounts (often referred to as appropriations out of the postal fund). The fund may also be used without annual action by Congress for the purchase of stamp-embossed envelopes, certain indemnities and claims, and certain judgments.

In accordance with recent authorizing legislation, appropriations from the general fund of the Treasury are requested for public services, and payments from such appropriations into the fund will be accounted for as postal revenue. The postal revenue also includes, without distinction, receipts from various Federal agencies for the handling of penalty mail; in addition, certain agencies reimburse the Post Office Department for special services rendered them.

The aggregate of postal revenue has, in the past, been insufficient to cover the expenses authorized for payment from the postal fund. An indefinite appropriation is made from the general fund of the Treasury to make up the difference. Proposed legislation for rate increases, as described above, should reduce to zero the obligations chargeable to this indefinite appropriation in 1960.

"Operations" (72 Stat. 65)		2,000,000	
Transferred to "Operations" (71 Stat. 39)	–535,000		

The request under this heading is $72,600,000, an increase of $3,241,000 compared with obligations for 1959. A net decrease of 24 positions is contemplated.

1. *Executive and administrative direction.*—This activity provides for the overall direction and administration of the postal service, including all offices and bureaus at Washington headquarters, the headquarters engineering staff, the field personnel of the internal audit division, and the money-order center at Kansas City.

It also includes claims settled administratively under the Federal Tort Claims Act, the payment of compromise settlements and damage suits, and, for 1958 and 1960, the biennial fidelity bond premium of all bonded employees.

2. *Field inspection service.*—This activity covers all field investigative and inspection functions pertaining to violation of the postal laws, the prevention and detection of mail loss and mistreatment, losses of Government funds and property; the field audit of all postmasters' accounts; personnel security and suitability investigations; and special surveys and investigations.

3. *Regional operation.*—There are 15 regional offices which direct and take final action on all aspects of postal management, personnel, operations, transportation, finance, engineering, equipment, supplies, and facilities within each region, except for specific areas reserved to the bureaus at headquarters primarily involving policy and technical guidance.

4. *Contract research, development, and engineering.*—An industrial research and engineering program for the postal establishment is carried on, including: (*a*) The design, development, and testing of new types of postal equipment and materials; (*b*) the development of better work methods, production measurement standards, and manpower utilization systems; and (*c*) recommending general location, functional design, building modifications, developing layouts, and mechanization requirements of facilities. This activity covers the portion of the program performed by contracts with private firms, research institutions, and Federal agencies.

Because of the urgent need for mechanization of mail handling processes and other improvements in postal facilities it is planned that the research program will be materially expanded and accelerated during the next few years as an essential part of the postal modernization program. Initial funds for this purpose are being requested under the postal modernization appropriation.

Transferred (72 Stat. 65) to—			
"Administration, regional operation, and research"		−2,000,000	
"Facilities"		−6,000,000	

This appropriation covers the operation of post offices, the motor vehicle service, the handling of mail in transit, contract stations, and contract vehicles. The amount requested is $3,030,750,000, an increase of $102,950,000 over 1959, due primarily to the estimated increase in mail volume and to the expansion of delivery services required to keep pace with the growth in population and suburban areas.

1. *Administration of postal installations.*—This activity is for the local management and supervision of post offices, their stations and branches, railway mail terminals, air mail transfer offices, and truck terminals. The employees included in this activity are postmasters, assistant postmasters, and supervisors. The postmasters and their assistants are primarily responsible for the overall direction and supervision of mails, finance, buildings, personnel, and related postal services in main post offices and stations and branches. The supervisors provide direct supervision over the processing of incoming and outgoing mail, financial and related postal services, and the supervision and operation of stations and branches of the main post office and terminals.

POST OFFICES BY CLASSES—AS OF JUNE 30

	1956 actual	*1957 actual*	*1958 actual*	*1959 estimate*	*1960 estimate*
1st class	3,626	3,681	3,750	3,900	4,060

Stations and branches	8,279	8,219	8,496	8,846	9,196
Total	45,794	45,231	44,804	44,744	44,684

2. *Mail handling and window service.*—This activity is for the separation and distribution of incoming, outgoing, and transit mail at post offices, stations and branches, railway terminals, air mail transfer offices, truck terminals, and railway and highway post offices. It also includes the rendering of window service to the public, the operation of contract stations, and the reimbursement to Federal Reserve banks for the processing of paid money orders and postmasters' deposits. The employees included in this activity are post office, terminal, and mobile clerks, and mail handlers.

COMPARISON OF TOTAL CLERICAL EMPLOYMENT AND WORKLOAD

	Man-years	*Mail volume (thousands)*	*Average pieces per man-year*
1956	240,685	56,441,216	234,502
1957	246,444	59,077,633	239,720
1958	252,292	60,129,911	238,335

1960 estimate	267,079	64,457,000	241,341

3. *Collection and delivery service.*—This activity provides for collection and delivery of mail on prescribed city delivery routes including parcel post deliveries, and delivery of mail on rural routes. It also includes delivery of special delivery articles. The funds requested will provide new city delivery routes in expanding suburban areas and a continuation of the service improvement program to rural patrons initiated in 1959. Beginning early in 1959 the extension of rural delivery service was changed from a 3- to a 2-family-per-mile basis.

4. *Custodial service.*—This activity is for operation, maintenance, cleaning, and minor repair of Federal buildings under jurisdiction of the Post Office Department and leased postal space. It also includes operation of mail handling elevators and repair and maintenance of Government-owned mail handling equipment and office furniture and equipment.

5. *Vehicle service.*—This activity provides for the supervision, operation, and maintenance of Government-owned vehicles used for collection and delivery of mail locally and for transporting mail between main offices and branches, stations, depots, and air fields and between cities. It also provides for purchase of parts, gasoline, motor oil, and contract labor necessary for the operation and maintenance of Government-owned vehicles, and for the cost of contract vehicles, used in lieu of Government-owned vehicles, when economically advantageous to the Government.

VEHICLE SERVICE HOURS

"Operations"	−202,599,000		
"Facilities"	−244,000		

This appropriation covers the transportation of mail by air, land, and water. The appropriation request is $527,320,000, an increase of $11,320,000 over the obligations for 1959. The railroad rate increases granted by Interstate Commerce Commission orders of December 30, 1957, and June 23, 1958, added $48,000,000 to the 1959 costs, of which only $7,000,000 are included in these estimates, and $50,000,000 to the 1960 costs. A 1959 supplemental appropriation to cover the unabsorbed costs is anticipated under Proposed for later transmission.

1. *Water transportation.*—This includes transportation of mail by powerboat within the United States and by steamship to foreign countries.

Powerboat service is utilized for the transportation of mail on the inland and coastal waterways at per annum contract rates ($820,000 in 1960) and at pound rates ($2,344,000 in 1960). Effective July 1, 1958, Alaskan contract rates were increased from an average of 5.6 cents to 6.5 cents per pound. Hawaiian contract rates were increased from 4.7 cents to 5.7 cents per pound.

DATA RELATING TO POUND RATE SERVICE BY POWERBOAT

	Pounds (thousands)	*Payments to carriers*	*Average cost per pound (cents)*
1956	38,795	$1,749,940	4.51
1957	40,901	1,881,462	4.60
1958	37,097	1,872,618	5.05
1959 estimate	38,000	2,278,000	6.00
1960 estimate	39,100	2,344,000	6.00

Foreign mail transportation covers the carriage of mails by steamship to foreign countries and between Puerto Rico and the Virgin Islands. Nearly all of the transportation cost is for services at pound rates.

DATA RELATING TO FOREIGN MAIL TRANSPORTATION

	Pounds (thousands)	*Payments to carriers*	*Average cost per pound (cents)*
1956	193,020	$9,650,991	5.00

CURRENT AUTHORIZATIONS OUT OF POSTAL FUND—Continued

TRANSPORTATION—Continued

Short-haul truck service is provided for mail diverted from railroads when lower rates or improved service will result. The expansion of this service is part of a long-range program to transport mail by the most economical and expeditious means.

DATA RELATING TO SHORT-HAUL TRUCK SERVICE

	Number of routes (close of year)	*Scheduled miles of travel (thousands)*	*Annual obligations*	*Average cost per mile (cents)*
1956	633	47,241	$10,531,732	22.29
1957	668	51,826	12,082,645	23.31
1958	656	53,130	12,829,534	24.15
1959 estimate	681	55,847	13,960,000	25.00
1960 estimate	706	59,115	15,299,000	25.88

Mobile highway post offices provide mail distribution en route in contract vehicles where adequate train service of this nature does not exist. The estimate provides for 10 additional contract routes to be established where present service does not meet the demands for efficient and economical mail transportation.

DATA RELATING TO CONTRACT HIGHWAY POST OFFICE SERVICE

	Number of routes (close of year)	*Scheduled miles of travel (thousands)*	*Annual obligations*	*Average cost per mile (cents)*
1956	152	16,908	$4,724,335	27.94
1957	171	18,564	5,173,343	27.87

curement funds obligated in 1958, as authorized by Public Law 85–386).

1. *Building occupancy.*—This activity provides for rental of real estate; utilities, fuel, and communications costs; and the acquisition of land for resale under the commercial leasing program. The recoveries from the resale of such land are shown under Advances and reimbursements and are available for this activity.

LEASED AND RENTED BUILDINGS

	Annual rent obligations	Square feet		
		Interior	Loading	Open
June 30, 1958	$37,453,866	39,871,356	1,653,254	32,577,427
June 30, 1959 estimate	40,960,000	42,406,356	2,100,254	43,351,427
June 30, 1960 estimate	47,433,000	45,508,356	2,608,254	54,845,427

2. *Supplies and services.*—This activity provides for the procurement of postal supplies, stamps and other accountable paper, rental of equipment, and certain types of contractual services; the warehousing and distribution of all postal supplies and equipment; the manufacture, storage, and repair of mail bags and other specialized mail equipment items; and the costs of personnel engaged directly in these services.

3. *Regular capital program.*—This program covers (*a*) the normal item-by-item replacement of wornout trucks, lockboxes and standard mail-handling, counterline, and similar postal equipment, (*b*) a basic minimum of rehabilitation and mechanization of existing facilities, (*c*) equipping certain new facilities becoming available in 1960 under the regular program of property acquisition, (*d*) normal expansion of the vehicle fleet to replace contract vehicles, and (*e*) a minimum program of procurement of new types of equipment such as mailsters and automatic letter-handling and stamp-dispensing devices. Additional funds to initiate an improvement program are being requested under the Postal modernization appropriation.

Postal Modernization

For postal modernization as authorized by title III of the Act of May 27, 1958 (72 Stat. 144), $88,500,000, to remain available until expended: Provided, That the funds herein appropriated shall be available for payment to the General Services Administration for the repair, alteration, preservation, renovation, improvement, and equipment of federally owned property used for postal purposes, including improved lighting, color, and ventilation for the specialized conditions in space occupied for postal purposes, and for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): Provided further, That hereafter any other appropriation available to the Post Office Department shall be reimbursed from the funds herein appropriated in such amounts as the Postmaster General may determine to be required to cover the expenses incurred on and after July 1, 1959, from such appropriation for the postal modernization program. (5 U. S. C. 22, 22a, 30q, 43, 61g, 73b–3, 133z–15, 150, 366, 369, 836–840, 901, 911–913, 921, 922, 926, 943, 944, 1111–1114, 1123, 1124, 1133, 2001, 2061–2066, 2091–2103, 2121, 2123; 6 U. S. Program by activities:			
1. Contract research, development, and engineering program			$9,740,000
2. Building and equipment improvement program			77,031,000
3. Engineering and technical services			1,729,000
Total obligations			88,500,000
Financing:			
Appropriation			88,500,000

The appropriation of $88.5 million requested under this heading will permit the initiation of the program for full-scale modernization of postal plant and equipment authorized by title III of Public Law 85–426, approved May 27, 1958. The program envisions the eventual expenditure of more than $500 million to replace obsolete and outgrown postal facilities. The improved facilities will be modern, functionally designed, and strategically located mail processing plants. Major installations will be equipped with up-to-date mechanical and electronic mail-handling devices that will move the Nation's ever-growing volume of mail quickly and economically.

The program will also accelerate some of the regular research and capital projects financed under the annual appropriations, Administration, regional operation, and research, and Facilities. As contemplated by the authorizing legislation, the funds for this program are requested to remain available without time limit to provide flexibility in reprograming as new or unforeseen developments arise.

1. *Contract research, development, and engineering program.*—This activity covers the contract and engineering work and prototype equipment required under the modernization program in 1960. As in the case of the regular research program, it will include the design, development, and testing of improved postal equipment and materials, and recommending the location, functional design, building modifications, developing layouts, and mechanization requirements of postal facilities. The work, however, will be at the accelerated rate contemplated by the modernization program.

2. *Building and equipment improvement program.*—This activity which constitutes the principal phase of the modernization program, consists chiefly of the alteration, air-conditioning, and rehabilitation of Government-owned and leased buildings, the general installation of comprehensive systems of modern mail-handling equipment, and the expansion of the program for mechanization of the city delivery service in appropriate areas.

3. *Engineering and technical services.*—The implementation of the postal modernization fund will require the temporary employment of additional personnel. Nearly 200 additional positions will be required primarily in the

Under existing legislation, 1959.—A supplemental appropriation of $41 million is anticipated to pay unabsorbed costs of railroad rate increases authorized by the Interstate Commerce Commission.

[GENERAL PROVISIONS—POST OFFICE DEPARTMENT]

[SEC. 202. During the current fiscal year, and under such regulations as may be prescribed by the Postmaster General, not to exceed an aggregate of $100,000 shall be available from any funds available to the Post Office Department, as may be determined by him, for expenses necessary to enable the Department to participate in Federal or non-Federal training programs and for necessary expenses of training officers and employees (both departmental and field postal services) in such subjects or courses of instruction in either Federal or non-Federal facilities as will contribute to the improved performance of their official duties: *Provided*, That not more than forty-five of such officers and employees may participate in any training program in a non-Federal facility which is of more than ninety days duration.]

[SEC. 203. Not exceeding $50,000 of appropriations in this title shall be available for the repair, alteration, and improvement of the mail equipment shops at Washington, District of Columbia.]

[SEC. 204. Not exceeding $22,000,000 of appropriations in this title shall be available for payment to the General Services Administration of such additional sums as may be necessary for the repair, alteration, preservation, renovation, improvement, and equipment of federally owned property used for postal purposes, of which not to exceed $20,000,000 shall be available for improving lighting, color, and ventilation for the specialized conditions in space occupied for postal purposes.] (*Treasury-Post Office Appropriation Act, 1959.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1960

	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
Postal fund						40	$1,000	2 hired cars and 2 Government-owned cars are used by the Postmaster General, the assistant postmasters general, and by officials of all bureaus of the Department for the transaction of official business. All other cars are used in the field for local transportation at the largest post offices for supervision purposes.

DEPARTMENT OF STATE

New obligational authority of $238 million is recommended for the Department of State for 1960, a decrease of $13 million from 1959. Expenditures are estimated to fall from $277 million to $243 million. The new obligational authority and expenditures for 1960 are significantly less than 1959 because of a nonrecurring payment of $24 million to the Philippine Government in 1959. In both 1959 and 1960 the Department's expenditures are estimated to exceed new obligational authority, because of the continuing work on the new State Department building which was appropriated for in 1957.

Conduct of foreign affairs.—Over 85% of the new obligational authority requested for the Department for 1960 is for the conduct of foreign affairs. Operating expenses will rise in 1960 as a result of higher average overseas wages, prices, and communications costs than in 1959. Consular and passport workloads are also increasing steadily. Expenditures are also estimated to rise because of present plans to establish new posts and to elevate consulates to embassy status in countries that are attaining their independence. In addition, the budget provides for improving the effectiveness of the Foreign Service overseas, increasing departmental staff dealing with Eastern Europe and Soviet affairs, and using nongovernmental groups for studies of foreign policy and related matters.

Contributions to international organizations will continue in 1960 at about the 1959 level.

The 1959 estimates include anticipated supplemental appropriations for the United Nations Emergency Force in the Near East, evacuation from certain areas of the Near East, participation in international conferences, and a payment to the Philippine Government in connection with the devaluation of the United States dollar in 1934.

Economic and technical development.—The appropriation requested for 1960 will finance completion of the Rama Road in Nicaragua.

Foreign information and exchange activities.—Exchange of leaders, professors, students, and specialists with other nations will continue at the 1959 level, as will special exchange of persons and grants of books and educational equipment with Finland and India. In 1960, the Department plans to continue to use foreign currencies received from the sale of surplus agricultural commodities for educational exchange and for grants to American-sponsored schools abroad. The activities financed from these currencies are in addition to those financed by appropriation of dollars.

Conservation and development of land and water resources.—The new obligational authority recommended for 1960 for the International Boundary and Water Commission will permit continuation of construction of Anzalduas Dam and related flood control works on the lower Rio Grande River, financed jointly by the United States and Mexico. New obligational authority and expenditures in 1960 will be lower than in 1959 as the Anzalduas Dam and related works near completion and as extraordinary 1959 flood repair work ends.

Conservation and development of fish and wildlife.—Contributions to international fisheries commissions to regulate fishing and preserve fish stocks in international waters are estimated to increase slightly in 1960, primarily to accelerate a project for the eradication of the parasitic sea lamprey in the Great Lakes.

ADMINISTRATION OF FOREIGN AFFAIRS

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Department of State, not otherwise provided for, including expenses authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158), not otherwise provided for; expenses necessary to meet the responsibilities and obligations of the United States in Germany (including those arising under the supreme authority assumed by the United States on June 5, 1945, and under contractual arrangements with the Federal Republic of Germany); salary of the United States member of the Board for the validation of German Bonds in the United States at the rate of $17,100 per annum; expenses of the National Commission on Educational, Scientific, and Cultural Cooperation as authorized by sections 3, 5, and 6 of the Act of July 30, 1946 (22 U. S. C. 287o, 287q, 287r); [expenses of attendance at meetings concerned with activities provided for under this appropriation;] purchase (not to exceed [six] *fifteen*, of which [three] *two* shall be for replacement only) or hire of passenger motor vehicles; printing and binding outside the continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of uniforms; payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; dues for library membership in organizations which issue publications to members only, or to members at a price lower than the others; employment of aliens[,] by contract for services abroad; refund of fees erroneously charged and paid for passports; radio communications; payment in advance for subscriptions to commercial information, telephone and similar services abroad; rent and expenses of maintaining in Morocco institutions for American convicts and persons declared insane by any consular court, and care and transportation of prisoners and persons declared insane; expenses, as authorized by law (18 U. S. C. 3192), of bringing to the United States from foreign countries persons charged with crime; and procurement by contract or otherwise, of services, supplies, and facilities, as follows: (1) translating, (2) analysis and tabulation of technical information, and (3) preparation of special maps, globes, and geographic aids; [$101,750,000] *$119,100,000*, of which not less than $9,000,000 shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States: *Provided*, That passenger motor vehicles in possession of the Foreign Service abroad may be replaced in accordance with section 7 of the Act of August 1, 1956 (70 Stat. 891) and the cost, including the exchange allowance, of each such replacement shall not exceed [$3,000] *$3,800* in the case of the chief of mission automobile at each diplomatic mission (except that [eleven] *fifteen* such vehicles may be purchased at not to exceed [$6,000] *$7,800* each) and $1,500 in the case of all other such vehicles except station wagons. (*Department of State Appropriation Act, 1959.*)

Appropriated 1959, [a] **$102,300,000** Estimate 1960, [b] **$119,100,000**

[a] Includes $550,000 appropriated in Supplemental Appropriation Act, 1959.

[b] Includes $2,800,000 for activities previously carried under "Advances and reimbursements." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate

3. Conduct of diplomatic relations with international organizations	92,669	105,969	119,652
4. Domestic public information and liaison	210,045	255,110	303,553
5. Central program services	814,342	872,267	841,709
6. Administrative and staff activities	2,651,715	2,532,654	2,593,876
Total reimbursable obligations	54,361,160	59,100,000	60,200,000
Total obligations	159,555,705	168,424,518	179,300,000

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Financing:			
Comparative transfers from (−) other accounts	−$2,522,383	−$2,664,141	
1959 appropriation available in 1958	−1,695,623	1,695,623	
Advances and reimbursements from—			
Other accounts	−54,155,759	−58,799,000	−$59,875,000
Non-Federal sources	−283,379	−301,000	−325,000
Unobligated balance no longer available	207,559		
New obligational authority	101,106,120	108,356,000	119,100,000
New obligational authority:			
Appropriation	$101,031,869	$102,300,000	$119,100,000
Transferred (72 Stat. 243) from—			
"Contributions to international organizations"	144		
"Representation allowances"	1,091		
"Emergencies in the diplomatic and consular service"	12,031		
"International fisheries commissions"	10,985		
"Educational, scientific and cultural activities"	50,000		
Appropriation (adjusted)	101,106,120	102,300,000	119,100,000
Proposed supplemental due to pay increases		6,056,000	

NOTE.—Reimbursements fron non-Federal sources are derived from payments for cablegrams and telephone service involved in procuring information for corporations, firms, and individuals (5 U. S. C. 169), from sales of personal property (40 U. S. C. 481 (c)), and from refunds of terminal leave payments (5 U. S. C. 61 (b)).

The program described below is financed by this appropriation and by reimbursements from other agencies which are provided with most of their administrative services overseas by the Department of State and from non-Federal sources, as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
United States Information Agency	$12,142,088	$12,767,000	$12,873,000
Mutual security activities	15,236,762	17,280,000	17,623,000
Other accounts	26,698,931	28,752,000	29,379,000
Non-Federal sources	283,379	301,000	325,000
Total reimbursable obligations	54,361,160	59,100,000	60,200,000

1. *Executive direction and policy formulation.*—Increases are requested to improve coordination of Government cultural, educational, and technical exchange programs, and to intensify efforts in the fields of disarmament and outer space in order to develop and urge new approaches to armaments control.

2. *Conduct of diplomatic and consular relations with foreign countries.*—This includes representation of the United States and its citizens abroad, political and economic negotiations and reporting, issuance of passports and visas, and other services both in the United States and abroad. The estimates provide for increasing mandatory costs such as local employee wages and prices overseas, and for establishing new posts and elevating consulates to embassy status in countries becoming independent. In addition, the Foreign Service would be strengthened by providing certain non-salary-support facilities in order to insure full effectiveness of existing staff, by increasing emphasis on area and "hard" language training, and by continuing on a larger scale contractual studies on disarmament and other foreign policy matters. Increases in personnel are requested chiefly for Department staff concerned with Eastern Europe and the international Communist movement, and to meet rising consular workloads such as increasing requests for immigrant and nonimmigrant visas, and the continuance of the rise in travel abroad, as reflected in the anticipated increase in passport applications in the United States:

1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
564,397	653,074	752,000	865,000

3. *Conduct of diplomatic relations with international organizations.*—Strengthening of the Department's United Nations Educational, Scientific and Cultural Organization staff is essential to providing coverage in the major areas of its work.

ADMINISTRATION OF FOREIGN AFFAIRS—Con.

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

4. *Domestic public information and liaison.*—This provides for informing the American public on international policies and also keeping the Department informed on American attitudes relative to foreign policy and issues. The increase for 1960 provides additional staff for long-range planning.

5. *Central program services.*—These provide personnel and physical security measures, translating and interpreting services, and the coordination of governmental foreign reporting requirements.

6. *Administrative and staff activities.*—The increase results primarily from the opening of new posts, elevation of existing posts to embassy status, and the increase in diplomatic activity with the latter causing an expanding communications workload. The table below showing average monthly telegraphic word groups processed in Washington reflects this increased activity:

1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*

NOTE.—Reimbursements from non-Federal sources consist of proceeds of sale of real property abroad, as authorized by 22 U. S. C. 300 and proceeds of sale of other property as authorized by 40 U. S. C. 471.

The object of the foreign buildings program is to provide consolidated office space for the Foreign Service and other Government agencies abroad, and living quarters for American employees in localities where suitable facilities are not available. Through this program the Department has acquired real property valued in excess of $158 million, consisting of some 176 office buildings, 131 principal officer residences, 233 residences for senior officers and attachés, and 1,923 staff living units. Since 1946, the program has been financed primarily through the purchase of foreign currency credits held by the Treasury Department resulting from lend-lease settlements, sale of surplus war property, and other sources. This program also finances property leases of 10 years or more (shorter term leases are included in Salaries and expenses, above), procurement of initial furniture and furnishings, and repair, maintenance, and operating costs of these facilities.

The purpose of the program for acquisition and construction is generally to replace outmoded or otherwise unsatisfactory Government-owned or leased office space. Such space is replaced with structures that are designed specifically to meet the particular needs of the Foreign Service and other overseas Government operations from the standpoint of conducting efficient operations and providing adequate security protection. In addition, housing is provided American employees in localities where housing either is not available or is substandard in relation to American living standards.

The Department has previously presented to the Congress a 10-year building program estimated to require approximately $100 million for acquiring new office and housing facilities. The status of the program is as follows:

PROJECTED STATUS OF THE 1957–65 FOREIGN BUILDINGS PROGRAM THROUGH JUNE 30, 1960

Appropriation (adjusted)	4,684,220	7,064,000	

Funds for this item were previously appropriated to Administrative expenses, Mutual Security Act, and were allocated to the Department of State to reimburse accounts which include program policy review, services to the United States regional office, Paris, and Escapee program activities. This appropriation now includes funds for participation in the Organization for European Economic Cooperation, mutual security program coordination, and public information functions which were transferred to the Department of State during 1958. The 1960 estimate under Proposed for later transmission, will be transmitted later as a part of the mutual security appropriation bill.

Appropriation (adjusted)	45,573,042	41,827,453	48,345,000

The United States contributes its share of the expenses of the United Nations and 8 of its specialized agencies, including for the first time the Intergovernmental Maritime Consultative Organization, 7 inter-American organizations, 5 regional organizations, and 10 other organizations.

The growing role of international organizations in world affairs is accompanied by added responsibilities. Along with the costs of new responsibilities, there are higher operating costs.

The estimated increase for the United Nations is required mainly for United Nations Observer Group in Lebanon in calendar year 1958 and United Nations activity in Jordan in calendar year 1959, the establishment of an economic commission in Africa, capital improvements and allowance adjustments in the New York headquarters, and an increase in the United Nations working capital fund. A supplemental appropriation is anticipated in 1959 for the United States share of the assessed portion of the costs of the United Nations emergency force in the Middle East and is shown under Proposed for later transmission.

Other major contribution increases are for: (1) The United Nations Educational, Scientific, and Cultural Organization for its major projects in education, research about the arid lands, and Eastern and Western cultures; (2) the International Civil Aviation Organization and International Labor Organization mainly for wage and price increases and other financial adjustments; (3) the Pan American Sanitary Organization for improved health techniques and stepped up eradication programs, particularly malaria; and (4) the Organization of American States to put into effect additional programs recommended by the Inter-American Committee of Presidential Representatives, particularly fellowships.

Appropriation (adjusted)	1,366,950	1,690,000	1,988,000
Proposed supplemental due to pay increases		98,670	

These missions represent the United States in the activities of the international organizations listed above to present United States policy, insure effective participation and representation with such organizations, provide continuous reporting, facilitate contact with the international secretariats, and maintain relationship with delegations of other governments. The increase would provide furniture for the new office building for the Mission to the United Nations, adequate housing for the minister and staff of the Mission at Geneva, and full staffing of the Mission to the International Atomic Energy Agency.

INTERNATIONAL ORGANIZATIONS AND CONFERENCES—Continued

Current authorizations—Continued

INTERNATIONAL *CONFERENCES AND* CONTINGENCIES—Continued

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
New obligational authority:			
Appropriation	$1,750,000	$1,600,000	$2,800,000
Transferred from "Contributions to international organizations" (72 Stat. 243)	115		
Appropriation (adjusted)	1,750,115	1,600,000	2,800,000

This appropriation provides for United States participation in recurring and emergency international conferences and other activities arising in the conduct of foreign affairs. This includes (1) participation in international conferences; (2) special missions; and (3) contributions to new or provisional international organizations. The increase is chiefly for the Administrative Radio Conference, contributions to the Baghdad Pact, and the establishment of a contingent reserve for activities which cannot be specifically planned in advance.

A supplemental request is anticipated under Proposed for later transmission to provide for conferences in the final quarter of 1959.

Program by activities:			
Participation in international conferences (total obligations)		$900,000	
Financing:			
Proposed supplemental appropriation		900,000	

Under existing legislation, 1959.—It is expected that an additional appropriation will be required to finance the participation in a number of international meetings and conferences which will occur in the final quarter of 1959 for which funds are not available.

INTERNATIONAL COMMISSIONS

Current authorizations:

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

The Commission consists of a United States section, with headquarters at El Paso, Tex., and a Mexican section, with headquarters at Ciudad Juarez, Chihuahua, and has the status of an international body. It was created in 1889 by the United States and Mexico to provide a practical means for solving mutual boundary problems.

For expenses necessary to enable the United States to meet its obligations under the treaties of 1884, 1889, 1905, 1906, 1933, and 1944 between the United States and Mexico, and to comply with the other laws applicable to the United States Section, International Boundary and Water Commission, United States and Mexico, including operation and maintenance of the Rio Grande rectification, canalization, flood control, bank protection, water supply, power, irrigation, boundary demarcation, and sanitation projects; detailed plan preparation and construction (including surveys and operation and maintenance and protection during construction); Rio Grande emergency flood protection; expenditures for the purposes set forth in sections 101 through 104 of the Act of September 13, 1950 (22 U. S. C. 277d-1–277d-4); purchase of [three] *four* passenger motor vehicles for replacement only; purchase of planographs and lithographs; uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131); and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U. S. C. 5); as follows: (*Department of State Appropriation Act, 1959.*)

CONSTRUCTION

For detailed plan preparation and construction of projects authorized by the Convention concluded February 1, 1933, between the United States and Mexico, the Acts approved August 19, 1935, as amended (22 U. S. C. 277–277f), August 29, 1935 (49 Stat. 961), June 4, 1936 (49 Stat. 1463), June 28, 1941 (22 U. S. C. 277f), September 13, 1950 (22 U. S. C. 277d–1–9), and the projects stipulated in the treaty between the United States and Mexico signed at Washington on February 3, 1944, $1,000,000 to remain available until expended: *Provided,* That no expenditures shall be made for the lower Rio Grande flood-control project for construction on any land, site, or easement in connection with this project except such as has been acquired by donation and the title thereto has been approved by the Attorney General of the United States: *Provided further,* That the Anzalduas diversion dam shall not be operated for irrigation or water supply purposes in the United States unless suitable arrangements have been made with the prospective water users for repayment to the Government of such portions of the costs of said dam as shall have been allocated to such purposes by the Secretary of State. (*Department of State Appropriation Act, 1959.*)

Appropriated 1959, **$1,000,000** Estimate 1960, **$1,000,000**

Program and Financing

	Costs to this appropriation					Analysis of 1960 financing			Appropriation required to complete
	Total estimate	To June 30, 1957	1958 actual	1959 estimate	1960 estimate	Deduct selected resources and unobligated balance, start of year	Add selected resources and unobligated balance, end of year	Appropriation required for 1960	
Program by activities:									
1. Rio Grande dams:									
(a) Falcon Dam and powerplant	$36,426,602	$35,067,966	$295,974	$1,062,662					
(b) Upper Dam (Diablo Dam and Reservoir)	1,552,602	1,444,145	65,738	42,719					
2. Lower Rio Grande flood control: Anzalduas Dam and related works	6,725,103	824,091	1,546,531	2,456,481	$1,000,000			$1,000,000	$898,000

3. Relation of costs to obligations: Costs financed from obligations of other years, net (−)			−50,872	−157,734					
Total program (obligations)			1,857,371	3,404,128	1,000,000				
Financing:									
Unobligated balance brought forward			−3,961,499	−2,404,128					
Unobligated balance carried forward			2,404,128						
Appropriation (new obligational authority)			300,000	1,000,000	1,000,000				

All construction activities of the United States section of the Commission are financed from this appropriation.

1. *Rio Grande dams.*—Construction of Falcon Dam is functionally complete; only miscellaneous cleanup work remains. The land acquisition program under the jurisdiction of the Department of Justice will continue through 1959. This work is financed from unobligated balances of prior year funds. It is expected that a report on the feasibility of United States participation in the Diablo Dam and Reservoir project, the second major international storage structure contemplated by the 1944 water treaty, will be submitted to the 86th Congress for its consideration.

2. *Lower Rio Grande flood control.*—This appropriation provides funds for continuation of construction of the Anzalduas Dam and related works as part of the Lower Rio Grande flood-control project. The dam, a low flood-control structure, is designed to effect equitable division of flood waters from the river to floodways on each side of the river. Construction of the dam began in March 1956. The United States share of the cost of the dam and related works is estimated to amount to $6,725,103.

RIO GRANDE EMERGENCY FLOOD PROTECTION

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Emergency repairs (total costs—obligations)	$2,185	$112,022	.....
Financing:			
Unobligated balance brought forward	−114,207	−112,022	.....
Unobligated balance carried forward	112,022	.....	.....
Appropriation (new obligational authority)	.....	.....	.....

This provides funds for use in flood emergencies affecting structures erected for protection of properties in the United States valued at nearly $1 billion. The entire balance has been obligated in 1959 for flood damage which occurred during October and November. No new funds will be requested under this account as emergencies can be met from other appropriations (70 Stat. 302).

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

For expenses necessary to enable the President to perform the obligations of the United States pursuant to treaties between the United States and Great Britain, in respect to Canada, signed January 11, 1909 (36 Stat. 2448), and February 24, 1925 (44 Stat. 2102), the treaty between the United States and Canada signed February 27, 1950, including [stenographic reporting services by contract] *services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a)*; hire of passenger motor vehicles; [$325,000] *$370,000*, to be disbursed under the direction of the Secretary of State, and to be available also for additional expenses of the American Sections, International Commissions, as hereinafter set forth:

International Joint Commission, United States and Canada, the salary of one Commissioner on the part of the United States who shall serve at the pleasure of the President (the other Commissioners to serve in that capacity without compensation therefor); salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses in attending hearings of the Commission at such places in the United States and Canada as the Commission or the American Commissioners shall determine to be necessary; and special and technical investigations in connection with matters falling within the Commission's jurisdiction: *Provided*, That transfers of funds may be made to other agencies of the Government for the performance of work for which this appropriation is made.

International Boundary Commission, United States, Alaska, and Canada, the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and the existing treaties between the United States and Great Britain; commutation of subsistence to employees while on field duty, not to exceed $8 per day each (but not to exceed $5 per day each when a member of a field party and subsisting in camp); hire of freight and passenger motor vehicles from temporary field employees; and payment for timber necessarily cut in keeping the boundary line clear. (*Department of State Appropriation Act, 1959.*)

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS—Continued

These funds are used for payment of the United States share of the expenses of:

1. *International Boundary Commission.*—This Commission keeps the United States-Canadian boundary line marked in accordance with existing treaties. It also maintains boundary vistas by periodic tree cutting.

2. *International Joint Commission.*—This Commission performs studies of United States-Canadian border matters, such as investigation of water and smoke pollution done in conjunction with the Public Health Service, and gathering stream flow data, undertaken in cooperation with the Geological Survey. It also acts to insure appropriate apportionment of international waters and, upon referral, investigates and makes recommendations for remedial action.

These funds cover the cost of United States participation in eight international fisheries commissions. The purpose of these commissions is to determine and undertake or recommend measures necessary for the preservation and expansion of fishery stocks.

The use of a specific toxicant to kill parasitic lampreys and their larvae, first successfully employed in 1959, will be continued and expanded in 1960 to bring under control the infestation of the Great Lakes and enable eventual restoration of commercial fisheries.

Appropriation	$1,344,000	$616,000	
Proposed supplemental due to pay increases		46,600	

This appropriation is to complete a survey by the International Joint Commission as to the economic feasibility of a tidal power project at Passamaquoddy Bay, situated between Maine and New Brunswick Province, Canada. The purpose of the survey is to determine (1) the cost of construction, (2) whether such cost would allow hydroelectric power to be produced at a reasonable price, and (3) what contribution such project would make to the national economy and defense.

Three United States Government agencies are participating. The Corps of Engineers is investigating powerplant construction and location requirements. The Federal Power Commission, together with the Corps of Engineers, is studying the potential power market and transmission problems. The Fish and Wildlife Service, in cooperation with the Government of Canada, is determining potential effect on fisheries in the area.

No appropriation is requested for 1960. Carryover funds will be obligated by the Corps of Engineers to complete field work and the report to the International Joint Commission.

Under existing legislation, 1959.—A supplemental estimate is anticipated for 1959 to provide funds for wage-board increases already granted (71 Stat. 55) and to replace funds under the regular operation and maintenance and construction appropriations which are currently being used for emergency flood fighting and repairs in addition to the Rio Grande emergency flood protection account (70 Stat. 302).

EDUCATIONAL EXCHANGE

Current authorizations:

INTERNATIONAL EDUCATIONAL EXCHANGE ACTIVITIES

For necessary expenses, not otherwise provided for, to enable the Department of State to carry out international educational exchange activities, as authorized by the United States Information and Educational Exchange Act of 1948 (22 U. S. C. 1431–1479), and the Act of August 9, 1939 (22 U. S. C. 501), and to administer the programs authorized by section 32 (b) (2) of the Surplus Property Act of 1944, as amended (50 U. S. C. App. 1641 (b)), the Act of August 24, 1949 (20 U. S. C. 222–224), and the Act of September 29, 1950 (20 U. S. C. 225), including salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158); [expenses of attendance at meetings concerned with activities provided for under this appropriation;] hire of passenger motor vehicles; entertainment within the United States (not to exceed [$1,000] *$5,000*); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and advance of funds not withstanding section 3648 of the Revised Statutes as amended; [$22,800,000] *$23,535,000*, of which not less than [$7,250,000] *$4,811,500* shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States: *Provided*, That not to exceed [$1,437,500] *$1,500,000* may be used for administrative expenses during the current fiscal year. (*Department of State Appropriation Act, 1959*)

Appropriation 1959, **$22,800,000** Estimate 1960, [a] **$23,535,000**

[a] Includes $405,000 for activities previously carried under "Mutual security, economic assistance," funds appropriated to the President. The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

Proposed supplemental due to pay increases		330,000	

The primary objective of the program is the promotion of United States foreign policy through the exchange of key persons between the United States and over 80 foreign countries in the fields of teaching, study, research, professional and governmental observation, lecturing, and the acquiring of specialized practical experience. Assistance is provided also to American-sponsored schools abroad and to some private exchange projects.

In addition to the dollars appropriated for this program a portion of the foreign currencies derived from sales abroad of surplus agricultural commodities is made available to finance exchanges of persons. The total obligations for this program are shown in the following table:

	1958 actual	*1959 estimate*	*1960 estimate*
Appropriated funds	$21,522,051	$23,535,000	$23,535,000

1. *Educational exchange fund, payments by Finland, World War I debt.*—Any sums paid by the Republic of Finland to the United States as interest on, or principal of, the debt incurred under the act of February 25, 1919, are credited to this fund to finance the educational exchange of persons between the United States and Finland and the purchase of books and equipment for the educational system of Finland. During 1958 the exchange of 35 Finns was financed in full from this fund and 58 grants to Finns and Americans under the Fulbright program were supplemented. The amount of $129,810 was used to purchase books and equipment (63 Stat. 630).

2. *Educational fund, interest payments by the Government of India.*—Interest payments up to cumulative total of $5 million on loans made to India are available for educational exchange of persons and educational materials. As of June 30, 1958, a total of $3,271,963 had been obligated for this purpose (65 Stat. 71).

Proposed supplemental appropriation		23,862,751	

Under existing legislation, 1959.—A supplemental appropriation is anticipated to provide payment to the Philippine Government in connection with the devaluation of the United States dollar in 1934. This appropriation is authorized under the act of June 19, 1934 (48 Stat. 1115), and is to be derived from receipts under section 7 of the Gold Reserve Act of 1934 (31 U. S. C. 408b).

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 102. Appropriations under this title for "Salaries and expenses", "International *conferences and* contingencies", and "Missions to international organizations" are available for reimbursement of the General Services Administration for security guard services for protection of confidential files.

SEC. 103. No part of any appropriation contained in this title shall be used to pay the salary or expenses of any person assigned to or serving in any office of any of the several States of the United States or any political subdivision thereof.

SEC. 104. None of the funds appropriated in this title shall be used (1) to pay the United States contribution to any international organization which engages in the direct or indirect promotion of the principle or doctrine of one world government or one world citizenship; (2) for the promotion, direct or indirect, of the principle or doctrine of one world government or one world citizenship.

SEC. 105. It is the sense of the Congress that the Communist Chinese Government should not be admitted to membership in the United Nations as the representative of China.

SEC. 106. The Secretary of State, under such regulations as he may prescribe, may pay the cost of transportation to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects. (*Department of State Appropriation Act, 1959.*)

TREASURY DEPARTMENT

The 1960 recommendations for new obligational authority for the Treasury Department total $8.9 billion. Of this amount, 91% is for interest payments. Federal financial management makes up 6%, and most of the remaining 3% is for the Coast Guard.

Total new obligational authority will be $4,032 million, or 31% lower in 1960 than in 1959, predominantly because of nonrecurring subscriptions to International Bank for Reconstruction and Development and International Monetary Fund of $4,550 million in 1959; however, interest on the public debt will increase by $500 million.

In line with the President's policy to reduce the burden on the general taxpayer for services which give special benefits to identifiable individuals or groups, the Department will present to the Congress draft legislation (1) to amend or repeal provisions of customs and coast guard laws which either prohibit the collection of fees or fix charges at rates which do not permit the full recovery of costs incurred, and (2) to authorize reimbursement of the Coast Guard for fuel and supplies furnished public and commercial vessels and other watercraft.

Interest.—Interest on the public debt, on refunds of receipts, and on uninvested funds are financed by permanent appropriations which do not require annual congressional action. Expenditures are estimated to be $8.1 billion in 1960, a 7% increase over 1959. The increase is caused by higher market rates of interest on a larger public debt.

International affairs and finance.—New obligational authority of $4,550 million is recommended for 1959 in legislation to increase the United States subscriptions to the International Bank for Reconstruction and Development and the International Monetary Fund. The subscription to the fund will require expenditures of $1,375 million in 1959. The remaining $3,175 million is needed only to guarantee obligations of the bank and therefore is not expected to entail any budget expenditures.

Promotion of water transportation.—The new obligational authority of $260 million for 1960 for the Coast Guard is about 8% higher than the amount enacted for 1959—primarily for increased maintenance costs and for the replacement of obsolete equipment and facilities. Expenditures in 1960, however, are estimated to increase from 1959 by only 4% because of the long lead time required for the delivery of aircraft and electronic equipment.

Federal financial management.—New obligational authority of $520 million requested for 1960 represents a net increase of about $13 million over 1959. In some work areas such as issuing of checks, recording of sale and redemption of savings bonds, and reconciling of accounts of disbursing officers, improved electronic equipment and new techniques will make it possible to meet higher workloads without proportionately increased costs. The increase for 1960 over 1959 is primarily for strengthening the enforcement of our internal revenue and customs laws.

Labor and manpower.—Federal unemployment taxes are used to pay grants to the States for the administrative expenses of the employment service and the unemployment compensation programs. Since these expenditures are made by the Department of Labor, they are discussed in that chapter. Receipts in excess of amounts necessary for administrative expenses are transferred to the unemployment trust fund to help States pay claims, and are reflected as an expenditure of Treasury. The increase of $6 million from 1959 to 1960 reflects additional receipts resulting from a higher employment level.

Other aids to business.—When the Reconstruction Finance Corporation was abolished in 1957, certain loans were transferred to Treasury for liquidation. The net receipts from their liquidation in 1960 are estimated at $3.8 million, or $2.7 million less than in 1959.

Total financing			

The Bretton Woods Agreements Act of July 31, 1945, authorized the acceptance of membership in the International Bank for Reconstruction and Development and the subscription of $3,175 million toward its total capital of $9,100 million.

The United States paid the first 20% ($635 million) of its subscription in cash and non-interest-bearing, nonnegotiable notes. The remaining 80% ($2,540 million) will not be called unless required to meet the Bank's obligations. Calls on unpaid subscriptions must be a uniform percentage of the amounts subscribed by each member country.

A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

Permanent authorizations:

OFFICE OF THE SECRETARY—Continued

Public enterprise funds:

LIQUIDATION OF CORPORATE ASSETS

The Secretary of the Treasury is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available therefor and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year [1959] *1960* for the following functions, except as hereinafter provided: (*Treasury-Post Office Appropriation Act, 1959.*)

RECONSTRUCTION FINANCE CORPORATION LIQUIDATION FUND

Program and Financing

Unobligated balance brought forward	5,633,753	510,115	440,000
Transferred (Reorganization Plan No. 1 of 1957) to—			
"Liquidation of Reconstruction Finance Corporation loans," Small Business Administration	−2,380,960		
"Revolving fund (liquidating programs)," Office of the Administrator, Housing and Home Finance Agency	−2,627,961		
Total amounts available	12,878,690	7,766,235	4,890,000
Capital transfer (repayment of investment to Treasury) (−)	−12,125,000	−7,161,235	−4,385,000
Unobligated balance carried forward	−510,115	−440,000	−405,000
Financing applied to program	243,575	165,000	100,000

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity, and its remaining assets, liabilities, and obligations were transferred to the Administrator of Small Business, the Housing and Home Finance Administrator, the Administrator of General Services, and the Secretary of the Treasury. After giving effect to these transfers, the Secretary of the Treasury is responsible for completing the liquidation of business loans and securities with individual balances of $250,000 or more, securities of and loans to railroads, and securities of financial institutions, and for the windup of corporate affairs.

Budget program.—Liquidation transactions in 1958 produced net budget receipts of $11.2 million and it is estimated that transactions in 1959 and 1960 will produce net budget receipts of $6.5 and $3.8 million, respectively.

The progress made and anticipated in the liquidation of loans, securities, and loan obligations transferred to Treasury is summarized in the following table:

[In millions]

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Outstanding at end of year:				
Financial institutions	$4.8	$1.8	-----	-----
Railroads	8.5	6.4	$6.1	$5.6
Other business enterprises:				
Loans	36.9	32.7	29.8	27.9
Undisbursed authorizations	.8	.8	.8	.8
Deferred participation commitments	4.5	3.6	3.0	2.4
Total	55.5	45.3	39.7	36.7

A limitation is placed on administrative expenses. The reduction of $65,000 from 1959 to 1960 is attributable to a declining workload.

Operating results.—Excess proceeds of liquidation are paid into the Treasury as miscellaneous receipts. During 1958 these receipts amounted to $12.1 million and it is estimated that $7.2 million and $4.4 million will be paid in 1959 and 1960, respectively.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate

Limitation on Administrative Expenses, Reconstruction Finance Corporation Liquidation Fund

Not to exceed [$160,000] *$95,000* (to be computed on an accrual basis) of the funds derived from functions transferred to the Secretary of the Treasury pursuant to Reorganization Plan No. 1 of 1957 (22 Federal Register 4633) shall be available during the current fiscal year for administrative expenses incident to the liquidation of said functions, including use of the services and facilities of the Federal Reserve banks: *Provided,* That as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchase of equipment and supplies, of administrative offices: *Provided further,* That the limiting amount heretofore stated for administrative expenses shall be increased by an amount which does not exceed the expenses of services performed on a contract or fee basis in connection with the termination of contracts or in the performance of legal services; and all administrative expenses, reimbursable from other Government agencies: *Provided further,* That the distribution of administrative expenses to the accounts shall be made in accordance with generally recognized accounting principles and practices. (*Treasury-Post Office Appropriation Act, 1959.*)

Financing applied to program	21,441	153,000	15,000

The Secretary of the Treasury is authorized to purchase securities or make loans (including participations therein and guaranties thereof) to aid in financing projects for civil-defense purposes upon certification by the Director, Office of Civil and Defense Mobilization (50 App. U. S. C. 2261, and sec. 104, Reconstruction Finance Corporation Liquidation Act). Investments under the program are limited to a total of $250 million outstanding at any one time.

Budget program.—The primary program cost continues to be the payment of interest on borrowings from Treasury. During 1959 an increase of $135,000 is anticipated in a deferred participation commitment authorized in a prior year. So far all loans and commitments have been made to assist in financing construction of hospitals. As of June 30, 1958, there were outstanding $1,111,033 in loans and $2,538,994 in commitments to participate in loans made by banks wherein disbursement of Treasury funds is deferred. It is estimated by the close of 1960 that the loans will be reduced to $881,000 and the deferred participation commitments to $2,234,000.

No loans were authorized in 1958 and it is anticipated that there will be no additional loans authorized during 1959 and 1960.

Financing.—Program activities are financed from borrowings from Treasury. The unobligated balance of such authority at the end of 1960 is estimated to increase slightly to $247.2 million.

Financing:			
Unobligated balance brought forward (authorization to expend from public debt receipts)			−$3,175,000,000
Unobligated balance carried forward (authorization to expend from public debt receipts)		$3,175,000,000	3,175,000,000
Proposed supplemental authorization to expend from public debt receipts		3,175,000,000	

Under proposed legislation, 1959.—At the recent annual meeting of the members of the International Bank for Reconstruction and Development, it was unanimously agreed to consider plans to increase the subscription of each member of the bank. Legislation will therefore be proposed to provide for the increase in the United States subscription. This additional obligational authority is in the nature of a guaranty and is not expected to require budget outlays.

INVESTMENT IN INTERNATIONAL MONETARY FUND

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Investment in international monetary fund (total obligations)		$1,375,000,000	
Financing:			
Proposed supplemental authorization to expend from public debt receipts		1,375,000,000	

Under proposed legislation, 1959.—At the recent annual meeting of the members of the International Monetary Fund, it was unanimously agreed to consider plans to increase the quota of each member of the fund. Legislation will therefore be proposed to authorize the increase in the United States subscription. Of the $1,375,000,000 increase anticipated, $343,750,000 will be paid in gold and the balance of $1,031,250,000 will be represented by non-interest-bearing notes issued by the Secretary of the Treasury.

BUREAU OF ACCOUNTS

The Bureau maintains the central revenue, appropriation, and expenditure accounts; prepares the central financial reports of the Government; and performs other fiscal functions.

Current authorizations:

SALARIES AND EXPENSES

Appropriation (adjusted)	3,182,620	3,110,000	3,464,000
Proposed supplemental due to pay increases		192,600	

1. *Processing deposits of withheld tax payments.*—Employers and certain business enterprises deposit monthly, with designated banks, excise, withheld income, railroad retirement, and withheld social security taxes, to the credit of the Treasurer of the United States. The Federal Reserve banks, acting as fiscal agents of the Treasury, issue depositary receipts which the employers attach to their returns as evidence of payment of taxes. Of the $1,257,967 obligations estimated for 1960, $582,000 will be recovered and credited to miscellaneous receipts by charges against the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund. The work volume is estimated at 9,200,000 depositary receipts in 1959 and 9,610,000 in 1960 as compared with 9,173,613 in 1958.

2. *Financial reporting and maintenance of the Government's central accounts.*—This activity includes the maintenance of central accounts of appropriations, receipts, and expenditures which provide data for financial statements. It also includes the preparation and publication of financial reports on the Government's fiscal operations, such as the annual Combined Statement of Receipts, Expenditures, and Balances; the Monthly Treasury Statement; the Secretary's Annual Report; the Treasury Bulletin; and reports on foreign currencies acquired without payment of dollars. The volume of accounting items is estimated at 4,717,000 in 1959 and 1960 as compared with 4,716,736 in 1958.

3. *Accounting and reporting development and internal audit.*—This activity includes furnishing technical accounting advice and assistance to all bureaus and offices of the Treasury, participating in the governmentwide accounting improvement program, performing internal audit in the Bureau, and coordinating Treasury fiscal internal audit.

4. *Processing investments, loans, claims, collections, and surety bonds.*—Investments in interest-bearing securities are processed for certain funds, such as the Federal old-age and survivors insurance trust fund, the unemployment trust fund, the veterans insurance trust funds, and various Government retirement funds. The work includes accounting for purchases, sales, and redemptions of securities, processing of capital stock subscriptions of Government corporations, payment of international and other claims, and examination of the financial condition of companies issuing surety bonds in favor of the United States. The number of transactions is estimated at 273,415 for 1960 as compared with 265,905 in 1959 and 256,695 in 1958.

5. *Supervision of the Federal depositary system.*—Banking facilities are provided for all agencies of the Government through the designation of selected institutions to act as official depositaries of the Government's funds. Workload is expected to increase in 1960 as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Number of depositaries utilized	3,964	4,080	4,175
Agency authorizations in effect at end of year	8,404	8,500	8,600

A supplemental appropriation is anticipated for 1959 and is shown under Proposed for later transmission.

Appropriation (adjusted)	17,899,609	17,281,000	22,280,000
Proposed supplemental due to pay increases		792,835	

The Division of Disbursement, through its 22 regional offices, makes payments for civilian Federal agencies, except the Post Office Department and certain Government corporations, and issues savings bonds for Federal employees under the payroll savings plan.

The increase in 1960 is due to salary increases, postal rate increases, and additional work volume (20.6 million more payments than 1959).

The funds required are determined by multiplying the volume of work or the number of units to be processed by the unit cost per item as shown in the following tables:

WORK VOLUME

	1958 actual	*1959 estimate*	*1960 estimate*
1. Processing payments	257,743,090	259,000,000	279,580,000

Under conditions of the law creating each trust, interest accruing and payable from the general fund of the Treasury is appropriated for transfer to the proper trust fund receipt account (31 U. S. C. 725s; 2 U. S. C. 158; 20 U. S. C. 54–55, 74a, and 101; 24 U. S. C. 46; various treaties; and 69 Stat. 533).

The following schedule details the interest obligations under this account:

	Annual rate of interest (%)	*1958 actual*	*1959 estimate*	*1960 estimate*
Bequest of Gertrude M. Hubbard, Library of Congress	4	$800	$800	$800
Library of Congress trust fund	4	146,942	169,000	176,000
Expenses of Smithsonian Institution	6	60,000	60,000	60,000
National Gallery of Art trust fund	4	200,000	200,000	200,000
Education of the blind	4	10,000	10,000	10,000
Soldiers' Home permanent fund	3	2,422,611	2,600,000	2,900,000
Indian tribal funds	3.5	5,542,458	5,750,000	5,750,000
Oliver Wendell Holmes devise fund	3.5	14,197	13,000	11,600
Total obligations	---	8,397,008	8,802,800	9,108,400

Object Classification

14 Interest	$8,397,008	$8,802,800	$9,108,400

Payment to Unemployment Trust Fund

(Indefinite)

Estimate 1960, **$5,612,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities: Payment to unemployment trust fund (total obligations)	$39,532,082	----------	$5,612,000
Financing: Appropriation (new obligational authority)	39,532,082	----------	5,612,000

At the end of each year, the Secretary of the Treasury estimates the excess of Federal unemployment tax receipts for the year over expenditures for unemployment compensation and employment service administration. This appropriation transfers the estimated excess into the unemployment trust fund, where a portion is allocated to the Federal unemployment account to bring the balance of that account to $200 million and the remainder is allocated to the trust accounts of the various States (68 Stat. 668). This payment is determined as follows:

	1958	*1959*	*1960*
Estimated Federal unemployment tax receipts	$337,500,000	$332,000,000	$344,000,000
Less:			
Tax refunds, including interest	2,810,113	2,770,000	2,870,000
Adjustment of prior year estimate	1,058,114	−267,521	----------
Adjusted tax receipts	333,631,773	329,497,521	341,130,000
Less expense incurred:			
Internal Revenue Service	3,577,219	3,879,000	3,879,000
Other Treasury bureaus	18,126	20,000	20,000
Department of Labor:			
Grants to States	290,376,346	322,182,000	324,367,000
Administrative expenses	128,000	6,703,000	7,252,000
Excess of expenses over receipts	----------	3,286,479	----------
Payment to unemployment trust fund	39,532,082	----------	5,612,000

Legislation will be proposed to provide trust fund financing for the employment security program. Enactment of this legislation will result in all unemployment tax receipts being placed directly into a trust account, and will eliminate the need for the payment to the unemployment trust fund.

Financing applied to program	31,073	51,000	51,000

This fund was created as self-insurance to cover losses in shipment of Government property such as coin, currency, securities, certain losses incurred by the Post Office Department, and losses in connection with the redemption of savings bonds (5 U. S. C. 134). Since these losses are only partially offset by recoveries, the net deficit has gradually increased to $820,053 as of June 30, 1958, and is expected to increase to $920,053 by June 30, 1960. Additional working capital of $50,000 was appropriated in 1959.

Appropriation (adjusted)	47,564,940	46,000,000	47,500,000
Proposed supplemental due to pay increases		1,481,000	

This appropriation provides funds for public debt operations and the promotion of the sale of United States savings bonds and stamps.

1. *Issuance, servicing, and retirement of savings bonds.*—This activity consists of (1) procuring, receiving, storing, and distributing bond stocks; (2) issuing bonds and maintaining records relating thereto; (3) adjudicating claims for the replacement or payment of lost, stolen, or mutilated bonds; (4) handling reissues and other transactions incident to servicing outstanding bonds; (5) retiring bonds; and (6) determining and authorizing semiannual interest payments on Series G, H, and K bonds. The 1960 estimate reflects the continuation of the program to record the sale and redemption of savings bonds by electronic processing.

UNITED STATES SAVINGS BONDS, SERIES A THROUGH K

[Number of pieces]

	1958 actual	*1959 estimate*	*1960 estimate*
Issues:			
Sales, original issue	90,680,278	92,300,000	96,700,000
Reissues, exchanges, and claims	2,422,801	2,700,000	2,800,000
Total	93,103,079	95,000,000	99,500,000
Retirements:			
Redemptions	94,407,583	92,300,000	92,900,000
Reissues, exchanges, claims, and spoils	4,812,359	5,500,000	5,600,000
Total	99,219,942	97,800,000	98,500,000

2. *Issuance, servicing, and retirement of other Treasury securities.*—This activity covers the same type of functions as described above for all United States securities other than savings bonds.

TREASURY SECURITIES OTHER THAN SAVINGS BONDS

[Number of pieces]

	1958 actual	*1959 estimate*	*1960 estimate*
Issues:			
Original issue	2,226,537	2,450,000	2,450,000
Other transactions	2,167,239	2,375,000	2,375,000
Total	4,393,776	4,825,000	4,825,000
Retirements:			
Redemptions	2,764,515	2,850,000	2,850,000
Other transactions	1,643,201	1,650,000	1,650,000
Total	4,407,716	4,500,000	4,500,000

3. *Maintenance and audit of public debt accounts.*—Control accounts are maintained over all transactions affecting the public debt. Provision is also made for the audit and verification of security stocks and the performance of other internal audit functions.

4. *Promotion of the sale of savings bonds.*—This activity consists of continuous sales promotion efforts using press, radio, other advertising media and organized groups, augmented by concentrated sales campaigns, with strong emphasis on payroll savings plans.

A supplemental appropriation is anticipated for 1959 under Proposed for later transmission.

Appropriation (adjusted)	18,040,275	17,969,000	18,650,000
Proposed supplemental due to pay increases		412,000	

NOTE.—Reimbursements from non-Federal sources above are funds received for services rendered in connection with Federal Reserve currency (31 U. S. C. 157) and sales of personal property (40 U. S. C. 481 (c)).

This Office (*a*) receives, keeps, and disburses the moneys of the United States; (*b*) processes claims for the proceeds of Government checks; (*c*) receives, stores, issues, transfers, and retires currency; (*d*) issues and redeems Government securities; (*e*) maintains fiscal accounts; and (*f*) prepares financial statements and reports.

1. *Check payment and reconciliation.*—This activity consists of maintaining checking accounts of Government disbursing officers and Government-owned corporations; processing documents crediting Government disbursing accounts; performing centralized payment functions for all checks drawn on the Treasurer of the United States; reconciling deposits claimed and checks issued as reported by disbursing officers with the deposits credited and checks paid by the Treasurer; and determining the outstanding checks in each disbursing account.

The program to convert to the use of electronic equipment in the payment of checks drawn on the Treasurer, which began in 1957, was completed during the past year. Including the reimbursable work performed by this activity, approximately 356 million checks were paid in 1958 by the Treasurer in Washington through the use of the electronic equipment, while about 42 million checks were paid by the Federal Reserve banks acting as fiscal agents of the Treasurer. The total estimated check volume of 396 million in 1959 and 408 million in 1960 will be processed through the electronic equipment.

2. *Processing check claims.*—This consists of the processing of all claims for the proceeds of Government checks, including the allowance or disallowance of claims against the United States and the enforcing of claims of the United States against banks, endorsers, principals, and sureties or other parties having liability due to the fraudulent or otherwise improper negotiation of checks.

Paid check cases	$9.26	$9.52	$9.26
Outstanding check cases	3.28	3.37	3.31
Authority cases	2.50	2.56	2.55

3. *General banking services.*—General banking services are provided for Government accountable officers and for banks in the District of Columbia.

WORKLOAD OF MEASURABLE OPERATIONS

[In thousands]

	1958 actual	1959 estimate	1960 estimate
Treasury checks and other obligations paid in cash	484	500	500
Commercial checks, drafts, and money orders processed for collection	6,074	6,200	6,200

4. *Retirement of currency.*—United States currency unfit for further circulation is verified and destroyed by the Federal Reserve banks on a reimbursable basis. Unfit currency received from local sources, as well as all mutilated currency, is processed for retirement in Washington. The pieces of currency destroyed are estimated to be 1.23 billion in 1959 and 1.25 billion in 1960 as compared to 1.23 billion in 1958.

5. *Maintenance of the Treasurer's accounts.*—Controlling accounts covering receipts and disbursements are maintained for all funds placed in the custody of the Treasurer, and reports are prepared, including the Daily Statement of the United States Treasury and a monthly statement of money held in the Treasury and paper currency in circulation.

6. *Payment and custody of securities.*—This activity consists of payment of principal and interest on public debt obligations, including those of Government corporations, and provision of safekeeping facilities for securities, trust funds, and savings bonds.

Appropriation	$49,940,000	$48,000,000	$53,865,000
Proposed supplemental due to pay increases		4,255,000	

The Bureau of Customs controls the importation of merchandise and collects the duties thereon. Gross total collections amounted to $1,121,966,901 in 1958.

The unobligated balance of $300,000 is a special fund available to this account when necessary to help pay the expenses of reimbursable customs work pending the collection of receivables from private interests. In order to make possible more realistic charges for services rendered to industry, draft legislation will be presented to the Congress to change laws which now either prohibit the collection of fees or fix charges at rates which do not permit the full recovery of costs.

1. *Assessment and collection of duties, taxes, and fees.*—The collectors of customs assess and collect the duties and taxes on imported merchandise, inspect international traffic, combat smuggling, perform certain marine activities relating to ownership and documentation of vessels of the United States and the movement of vessels in the foreign trade, and enforce the laws of other Government agencies affecting imports and exports.

SELECTED WORKLOAD DATA

	1958 actual	*1959 estimate*	*1960 estimate*
Formal entries accepted	1,175,271	1,234,000	1,296,000
Carriers of persons and merchandise arriving from foreign countries	39,466,668	40,450,000	41,460,000
Persons arriving from foreign countries	137,673,041	140,425,000	143,230,000

2. *Appraisal of imported merchandise.*—The customs appraisers examine and ascertain the value of imported merchandise, and perform other functions in support of the collectors' determinations of rates of duty to be assessed and the admissibility of merchandise into the United States.

SELECTED WORKLOAD DATA

	1958 actual	*1959 estimate*	*1960 estimate*
Packages examined by appraisers' personnel	1,375,418	1,389,000	1,403,000
Invoices received	1,822,419	1,877,000	1,933,000

3. *Investigations of violations of customs and related laws and regulations.*—The customs agents in the United States and abroad make investigations in the enforcement of the Tariff Act of 1930, the Narcotics Drug Act of 1934, the Gold Reserve Act of 1934, the Export Control Act, and other laws affecting the movement of merchandise into and out of the United States. They also secure market value information for customs appraisers. In 1958, a total of 16,282 investigations were made. The estimates for 1959 and 1960 are 16,500 and 18,000, respectively.

4. *Audit of collection and merchandise accounts.*—The comptrollers of customs examine and certify collectors' accounts of receipts and disbursements of money and receipts and disposition of merchandise, and verify collector's final assessments of duties, taxes, and allowances of drawback.

The Internal Revenue Service is the primary revenue-collecting agency of the Federal Government.

1. *Rulings, technical planning, and special technical services.*—The Service interprets statutory provisions, issues rulings, and prepares regulations and Treasury decisions. It conducts continuing research on tax loopholes, inequities, and related problems; provides special technical services; and negotiates tax treaties with foreign governments.

SELECTED WORKLOAD DATA

	1958 actual	1959 estimate	1960 estimate
Rulings and advisory opinions	67,343	66,000	66,000
Regulations, legislative analysis, drafting and reports	2,659	3,300	3,300
Research, analysis, and preparation of rulings for publication	2,745	3,000	3,000

2. *Collection of revenue.*—This activity includes the securing of delinquent returns and the collection of delinquent accounts; receiving returns and remittances; tax accounting; bookkeeping; arithmetic verification of tax returns; determination of tax liability in respect to form 1040A returns; preparation of bills; computation and scheduling of refunds; and the filing of returns and records. Gross total collections of the Internal Revenue Service amounted to $80 billion in 1958. The details of revenues collected are shown in table 1 and special analysis L of this document.

SELECTED WORKLOAD DATA

	1958 actual	1959 estimate	1960 estimate
Tax returns filed	93,573,609	95,000,000	96,000,000
Income tax computations and verifications	63,209,128	60,500,000	61,000,000
Refunds and credits processed	40,672,175	41,000,000	41,500,000
First notices and current installment bills issued	18,694,034	19,000,000	19,200,000
Taxpayer delinquent accounts issued	2,977,505	3,000,000	3,050,000
Taxpayer delinquent accounts closed	2,960,019	3,000,000	3,100,000
Delinquency and other investigations closed	1,485,058	1,570,000	1,610,000

3. *Audit of tax returns.*—This activity covers the primary enforcement work of the Service. It encompasses all examinations, audits, investigations, and informal conferences for checking correctness and completeness of taxpayers' returns and claims, and for determining the correct tax liability.

SELECTED WORKLOAD DATA

	1958 actual	1959 estimate	1960 estimate
Examined income, estate, and gift tax returns (office audits and field audits)	2,569,375	2,532,000	2,672,000
Offers in compromise disposed of	19,553	19,500	19,500

4. *Tax fraud and special investigations.*—This function covers investigations of tax fraud, including making recommendations with respect to prosecution, fraud penalty, and civil liability of taxpayers; investigations of applicants for enrollment to practice before the Treasury Department; and investigations of charges against enrolled practitioners.

SELECTED WORKLOAD DATA

	1958 actual	1959 estimate	1960 estimate
Fraud cases	18,600	19,000	18,500
Enrollment investigations	7,323	7,000	7,000

5. *Alcohol and tobacco tax regulatory work.*—Under the laws relating to liquor, tobacco, and firearms, tax liability is determined, the alcohol and tobacco industry operations and trade practices are regulated, and violators against such laws are detected and prosecuted.

SELECTED WORKLOAD DATA

	1958 actual	1959 estimate	1960 estimate
Cases made	11,331	11,250	11,250
Distilleries seized	6,344	6,200	6,200
Mash seized (wine gallons)	5,140,846	4,800,000	4,800,000
Arrests	11,631	11,700	11,700
Inspections (includes dealers with Federal Alcohol Administration permits)	45,962	43,500	43,500

6. *Taxpayer conferences and appeals.*—This activity consists of formal appellate work with respect to tax liability, interest, penalties (except alcohol, tobacco, narcotics, and firearms) in protested cases, the issuance of statutory notices, consideration of claims, and consideration of appealed offers in compromise which have been rejected by district directors. There were 21,598 cases closed during 1958, a total of 24,000 is estimated for 1959, and 25,400 for 1960.

7. *Legal services.*—This activity is responsible for all legal services, including the issuance of legal opinions for the guidance of officers of the Service, defense of petitions to the Tax Court of the United States, recommendations as to prosecution by the Department of Justice of civil and criminal suits and appeals to be taken, and the review of abatements, refunds, or credits of $100,000 or over.

SELECTED WORKLOAD DATA

	1958 actual	1959 estimate	1960 estimate
Litigation:			
Tax Court cases	4,793	5,000	5,000
District court cases	1,745	1,600	1,600
Enforcement:			
Fraud cases	2,766	1,750	1,700
Alcohol and tobacco tax cases	5,237	5,200	5,250
Claims against estates, bankruptcy and receivership proceedings	9,571	9,500	9,500
Review of overassessments and proposed refunds	278	300	300
Technical rulings and opinions	1,866	1,850	1,850

8. *Inspection.*—This activity covers the internal audit and internal security activities servicewide.

SELECTED WORKLOAD DATA

	1958 actual	1959 estimate	1960 estimate
Internal audit examinations	263	256	256
Applicant character investigations	3,986	4,000	4,000
Personnel conduct investigations	610	600	600
Special inquiry investigations	1,411	1,500	1,500
Tort claim and discrimination investigations	149	150	150

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

9. *Statistical reporting.*—Annual statistics are prepared on income and profits taxes. Statistics covering collections, refunds, additional assessments, warrants for distraint, and other data are compiled for public release or inclusion in the annual reports of the Secretary and Commissioner. The reduction in statistical reports issued in 1959 and 1960 is due primarily to the improved format of tables and a more concise presentation of text in publications, particularly the statistics of income series.

NOTE.—Reimbursements from non-Federal sources above are receipts from foreign coinage (31 U. S. C. 367 (Jan. 29, 1874, 18 Stat. 6)); proceeds from sale of medals and proof coins (31 U. S. C. 369 (as amended May 10, 1950, 64 Stat. 157)); and proceeds from the sale of personal property (40 U. S. C. 481 (c)).

The Bureau of the Mint manufactures coins, receives deposits of gold and silver bullion, safeguards the Government's holdings of monetary metals, and refines gold and silver bullion (see Bureau of the Mint permanent appropriations).

1. *Manufacture of coins.*—Production of coins is the major Mint activity. Funds requested for 1960 will permit production of approximately 1.7 billion coins. In addition, Mint facilities are utilized from time to time for production of foreign coins on a reimbursable basis.

Total	1,803,304	2,176,122	1,840,000	1,840,000

2. *Processing deposits and issues of monetary metals and coins.*—This activity includes receipt of deposits of gold and silver bullion; issue of gold bars for industrial, professional, and artistic use and settlement of international balances; disbursements of coins; moving, shipping, storing, and verifying bullion and coin; and counting and classifying uncurrent coins returned to the mints for recoinage. High silver receipts in 1958 and 1959 reflect the return of lend-lease silver by foreign governments.

SELECTED STATISTICS REGARDING DEPOSIT ACTIVITY

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Number of deposit transactions	10,713	10,700	10,700
Gold receipts and disbursements (value)	$1,539,307,546	$1,000,000,000	$1,000,000,000
Sale of gold bars for industrial, professional, and artistic use (value)	$19,795,617	$20,000,000	$20,000,000
Silver receipts (fine ounces)	166,405,813	145,000,000	42,000,000
Silver disbursements (fine ounces)	18,160,091	3,000,000	1,500,000
Uncurrent coins received (pieces)	22,677,213	23,000,000	23,000,000

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protective devices.

4. *Refining gold and silver bullion.*—Gold and silver bullion are refined in order to facilitate accountability, protection, and storage, and to bring the bullion up to a degree of purity suitable for use in the world markets. Charges are made against depositors of gold and silver for refinery services, but receipts are not available for payment of refining costs. During 1958, a total of $223,504 was deposited to miscellaneous receipts.

8. *Relation of costs to obligations.*—This relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects)	$406,547	$348,840	$348,840	$348,840
Medals and proof coins (finished goods)	21,738	20,950	20,950	20,950
Work in process	99,002	74,128	74,128	74,128
Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	198,344	265,735	154,599	154,599
Advances (payments for goods and services on order not yet received)	9,082	5,519	5,519	5,519

BUREAU OF ENGRAVING AND PRINTING

Intragovernmental funds:

BUREAU OF ENGRAVING AND PRINTING FUND

The Bureau of Engraving and Printing designs, manufactures, and supplies all major evidences and most minor evidences of a financial character issued by the United States. It is the sole source of United States currency, Federal Reserve notes, and certificates of indebtedness. In addition the Bureau prints postage, internal revenue, customs, and savings stamps, bonds, commissions, certificates, permits, warrants, etc. The Bureau also prints bonds and postage and internal revenue stamps for the governments of insular possessions.

PROGRAM HIGHLIGHTS—DELIVERIES AND COSTS

	1958 actual	*1959 estimate*	*1960 estimate*
1. Engraving and printing:			
(a) Currency:			
United States—units	1,239,272,000	1,220,000,000	1,220,000,000
Cost	$11,539,645	$11,558,000	$11,843,000
Rate per thousand	$9.312	$9.474	$9.707
Federal Reserve notes—units	446,944,000	452,280,000	500,000,000
Cost	$4,334,872	$4,364,916	$4,941,109
Rate per thousand	$9.699	$9.651	$9.882
(b) Stamps:			
Internal revenue—units	24,080,576,873	23,743,988,975	23,742,998,975
Cost	$2,556,110	$2,697,936	$2,636,887
Rate per thousand	$0.106	$0.114	$0.111
United States postage—units	23,100,463,872	26,606,200,000	27,081,200,000
Cost	$5,598,182	$7,054,611	$7,077,088
Rate per thousand	$0.242	$0.265	$0.261
Other—units	321,286,275	323,625,500	329,461,000
Cost	$219,892	$230,156	$233,155
Rate per thousand	$0.684	$0.711	$0.708
(c) Commissions, certificates, etc.—units	10,317,925	12,491,332	15,299,216
Cost	$254,570	$278,776	$323,278
Rate per thousand	$24.673	$22.318	$21.130
(d) Securities—units	27,910,517	7,055,175	6,974,175
Cost	$1,411,156	$969,682	$932,067
Rate per thousand	$50.560	$137.443	$133.645
2. Card checks purchased—units	382,350,500	410,191,500	425,949,500
Cost	$1,104,197	$1,157,793	$1,200,172
Rate per thousand	$2.888	$2.823	$2.818
3. Cost of operation and maintenance of incinerator and space utilized by other agencies	$334,687	$358,130	$362,535
4. Other direct charges for miscellaneous services	$105,955	$611,662	$30,000
Total cost	$27,459,266	$29,281,662	$29,579,291

Budget program.—The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency.*—The anticipated deliveries reflect a decrease of 0.8% in 1959 and an increase of 2% in 1960 over deliveries made in 1958. Due to the need for establishing different levels of inventories to cope with changing delivery programs and at the same time maintain stabilization in manpower requirements, it is anticipated that the Bureau's production will actually increase 8% in 1959 and decrease 1% in 1960 over 1958.

(b) *Stamps.*—Estimated production reflects an increase of 6.7% in 1959 and 7.7% in 1960 over 1958, due principally to an appreciable rise in the demand for postage stamps.

(c) *Commissions, certificates, etc.*—The anticipated requirements of the various agencies for commissions, certificates, etc., indicate an increase of about 21% in 1959 and 48% in 1960 as compared with 1958. Although this reflects a substantial increase in requirements, production costs for these items represent only approximately 1% of the overall engraving and printing program.

(d) *Securities.*—The overall estimated requirements for securities reflect a decrease of 75% in 1959 and 1960 as compared with actual deliveries made in 1958. Practically all of this decrease is in requirements for United States savings bonds, deliveries of which were discontinued in September 1957, due to the Treasury's decision to issue such bonds in punched card form. The estimated requirements for all other securities are substantially the same in 1959 and 1960 as in 1958.

2. *Card checks purchased.*—Purchases of all Government checks in punched card form are made by the Bureau under a single negotiated contract from a commercial source, based on estimated requirements submitted by agencies served.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Cost of operation and maintenance of incinerator and space utilized by other agencies.*—Charges are made to other agencies, on an actual cost basis, for use of the incinerator and for the cost of maintaining the space they occupy in the Bureau's buildings.

4. *Other direct charges for miscellaneous services.*—Charges for these services are made to agencies on an actual cost basis.

Financing.—The Bureau finances its operations out of reimbursements received from other agencies for all direct and indirect costs, including administrative expenses (31 U. S. C. 181–181e).

Operating results and financial condition.—Bureau operations during 1958 resulted in a loss of $23,259. This loss will be recovered from any earnings in subsequent years.

The capital of the fund is expected to remain at $25.3 million represented by an appropriation of $3.3 million and donated assets of $22 million.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate

COAST GUARD—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

as amended (5 U. S. C. 2131); [$171,700,000] *$190,900,000*: *Provided*, That the number of aircraft on hand at any one time shall not exceed one hundred and [twenty-eight] *thirty-two* exclusive of planes and parts stored to meet future attrition: *Provided further*, That amounts equal to the obligated balances against the appropriations for "Operating expenses" for the two preceding years, shall be transferred to and merged with this appropriation, and such merged appropriation shall be available as one fund, except for accounting purposes of the Coast Guard, for the payment of obligations properly incurred against such prior year appropriations and against this appropriation: *Provided further*, That except as otherwise authorized by the Act of September 30, 1950 (20 U. S. C. 236–244), this appropriation shall be available for expenses of primary and secondary schooling for dependents of Coast Guard personnel stationed outside the continental United States in amounts not exceeding an average of $250 per student, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents, and the Coast Guard may provide for the transportation of said dependents between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation: *Provided further, That annual accrued expenditures under this appropriation account, covering amounts becoming payable as a result of obligations incurred both in the current fiscal year and in prior fiscal years, shall not exceed $209,400,000: Provided further, That this limitation shall not include annual accrued expenditures attributable to reimbursable work performed under this appropriation account.*

[Appropriations under this head shall be available for payment of claims as authorized by Public Law 85–255, approved September 2, 1957.] (*Title 14 U. S. C.; 5 U. S. C. 133y–16, 150, 2094 (b); 33 U. The Coast Guard enforces maritime law, provides limited security of ports and waterfront facilities, saves life and property, provides navigational aids to maritime commerce in navigable waters, promotes the safety of the American merchant marine and maintains a state of military readiness to serve as a part of the Navy in time of war or national emergency.

Direct program by activities—1. *Vessel operations.*—Multifunctional vessels are strategically stationed along the coast and inland waterways for search and rescue; tending aids to navigation; operating an international ice observation and patrol service in the North Atlantic Ocean; performing limited ice breaking in navigable lakes, rivers, canals, and harbors; and for law enforcement.

WORKLOAD DATA

	1958 actual	*1959 estimate*	*1960 estimate*
Vessel operations:			
Assistance cases	3,550	4,000	4,000
Lives saved or persons rescued	526	600	650
Vessels towed to port	2,166	2,200	2,300
Search and rescue missions	4,801	5,000	5,200
Law enforcement and port secutiry missions	4,686	4,700	4,900
Aids to navigation missions	7,039	7,100	7,200
Vessels boarded and papers examined	37,362	38,000	38,000

2. *Aviation operations.*—Aircraft are maintained at air stations and detachments for search and rescue; Federal law enforcement; aerial reconnaissance for the international ice patrol; and logistic support in isolated areas.

3. *Shore stations and aids operations.*—Bases and lifeboat stations are strategically situated for search, rescue, and law enforcement, and for maintaining aids to navigation. Port security units patrol major harbor entrances; control anchorage areas; supervise the loading and unloading of dangerous cargoes; and screen merchant seamen and longshoremen to bar subversive elements from merchant vessels and critical waterfront areas.

Buoys, lighthouses, lightships, fog signal stations, light attendant stations, radiobeacons, and loran stations are maintained as navigational aids in the waters of the United States, its Territories and military bases overseas. There will be a net addition of 1,076 unmanned aids operated in 1960. Radio stations provide rapid communication incident to all Coast Guard operations and maintain a guard on the international maritime distress frequencies. Marine inspection offices and detachments administer laws and issue regulations on safety equipment, and inspection of merchant vessels, and on licensing and certification of merchant marine officers and crews. They review plans for construction or alteration of merchant vessels, investigate marine accidents, and handle disciplinary cases. These offices will also administer the small-boat safety program when inaugurated. Estimates for this program could not be included in this budget because of the time required to reevaluate the new legislation pertaining thereto.

The recent upsurge in merchant vessel construction and repair, the increasing number of oil rigs being erected on the Continental Shelf of the Gulf of Mexico and the corresponding increase in the number of small commercial craft servicing these rigs have all contributed to a serious backlog in the examination and inspection programs. Additional marine inspection personnel are needed to keep pace with the demands of industry.

Costs for the operation of three additional loran stations are included in the Coast Guard budget for 1960. These facilities are being constructed overseas in 1959 with funds provided by the Department of Defense.

WORKLOAD DATA

	1958 actual	*1959 estimate*	*1960 estimate*
Shore stations and aids operations:			
Assistance cases	14,940	15,000	15,500
Lives saved or persons rescued	1,266	1,500	1,700
Vessels towed to port	9,472	10,000	11,000
Search and rescue missions	15,757	16,000	16,500
Law enforcement and port security missions	27,229	28,000	28,000

Loran transmitting stations operated	45	48	54
Marine officer licenses issued	29,343	28,000	28,000
Seaman documents and certificates issued	56,170	60,000	60,000
Vessels inspected for certification	4,514	6,369	2,346
Other vessel inspections	33,663	36,563	41,129
Vessel plans and blueprints reviewed	29,000	39,000	44,000
Vessels numbered by Coast Guard (lieu of documentation)	461,117	507,175	557,900
Structures inspected (Outer Continental Shelf Lands Act)	60	650	650

4. *Repair and supply facilities.*—There are 62 repair and 11 supply facilities maintained at strategic points for support of Coast Guard operating units. Also, 2 facilities are maintained for testing, developing, and adapting material for safer and more effective Coast Guard use.

5. *Training and recruiting facilities.*—This activity includes the Coast Guard Academy for the training of cadets and officer candidates, recruiting stations, training units for recruits, and petty officers and outside training programs.

WORKLOAD DATA

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Training and recruiting facilities:				
Cadets	498	538	550	550
Recruits trained	5,168	3,118	3,700	3,600
Other personnel in training	4,782	4,589	5,000	5,000

6. *Administration and operational control.*—This activity provides for administrative services performed by headquarters at Washington, D. C., district and area offices, and regional inspection offices, and for liaison activities with other agencies.

7. *Other military personnel expenses.*—This activity provides for certain military personnel expenses such as social security, the pay of personnel in hospitals and in transit; expense of permanent changes of stations, including travel of dependents and transportation of household effects; and expenses of military separation, recreation, death gratuities, and burial.

8. *Supporting programs.*—This activity consists of procurement of ammunition and maintenance of ordnance; replacement of vehicles, boats, and electronic equipment; transportation of materials; and printing. These programs have such general applicability that they cannot properly be charged to specific units.

9. *Relation of costs to accrued expenditures.*—This appropriation contains a limitation on accrued expenditures in accord with Public Law 85–759, approved August 25, 1958. Since this is the first year this type of limitation has been included, and because it will be necessary to extend the control system, the amount of the limitation exceeds by 10% the amount of accrued expenditures shown in the schedules. This will allow for the development of a system to provide the necessary control of the receipt of goods and services at the widely dispersed delivery points in the Coast Guard with a minimum of additional cost.

The relationship between direct costs and direct accrued expenditures is derived from year-end balances of accrued resources and applicable adjustments as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Direct program:				
Accrued resources at end of year:				
Stores (goods and operating equipment unconsumed by projects)	$35.165,002	$32,768,084	$30,209,795	$31,388,146
Advances (payments for goods and services on order not yet received)	1,407,969	1,177,754	1,302,073	1,302,073
Uncompleted work orders	948,094	726,913	412,594	412,594
Total accrued resources at end of year	37,521,065	34,672,751	31,924,462	33,102,813
Accrued resources at start of year (−)		−37,521,065	−34,672,751	−31,924,462
Adjustments of accrued resources reported at start of year		576,592	----------	----------
Costs financed from accrued expenditures of other years, net (−)		−2,271,722	−2,748,289	----------
Expenditures accrued for costs of other years, net		----------	----------	1,178,351

Reimbursable program by activities—10. *Operation of ocean stations.*—The operation of 6 ocean stations (4 in the Atlantic and 2 in the Pacific), on the basis of 3 cutters per station, is financed by the Department of Defense as defense requirement. These vessels perform the dual function of ocean station duty and search and rescue.

11. *Miscellaneous services to other accounts.*—Various activities of the Coast Guard are financed by other agencies. They include, in part, operation of 1 vessel for

COAST GUARD—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

United States Information Agency; operation of 1 ocean-going tug for the Department of the Navy; installation and maintenance of aids to navigation for the Saint Lawrence Seaway Corporation; and operation of 2 special projects, Loran-C, and TACK, for the Department of Defense. In order to make possible more realistic charges for services rendered to industry, draft legislation will be presented to the Congress to (1) change laws which now either prohibit or limit the collection of fees and (2) authorize the Coast Guard to charge for fuel and supplies furnished public and commercial vessels.

12. *Relation of costs to accrued expenditures.*—The relationship between reimbursable costs and reimbursable accrued expenditures is derived from year-end balances of accrued resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [$18,000,000; including $2,000,000 for new dormitory facilities at the Coast Guard Academy] *$24,500,000,* to remain available until expended: *Provided, That annual accrued expenditures under this appropriation account, covering amounts becoming payable as a result of obligations incurred both in the current fiscal year and in prior fiscal years, shall not exceed $20,000,000: Provided further, That this limitation shall not include annual accrued expenditures attributable to reimbursable work performed under this appropriation account: Provided further, That not to exceed 5 per centum of any limitation on annual accrued expenditures herein made for the Coast Guard may be transferred to any other such limitation of the Coast Guard, but no limitation shall be increased or decreased by more than 5 per centum as a result of such transfers. (Title 14 U. S. C.; Treasury-Post Office Appropriation Act, 1959.)*

Appropriated 1959, [a] **$18,150,000** Estimate 1960, **$24,500,000**

[a] Includes $150,000 appropriated in Supplemental Appropriation Act, 1959.

This appropriation provides for the capital acquisition of the Coast Guard.

Direct program—1. *Vessels.*—Under the 1960 program, 15 patrol boats will be constructed to replace the least serviceable of forty-five 83-foot wooden-hull craft built during World War II. In addition, 1 lightship capable of extended service will be reengined and modernized, and 2 unsuitable buoy boats will be replaced.

2. *Aviation facilities.*—This program for the orderly replacement of overage aircraft was recommended in a joint report submitted to the Congress by the Secretary of the Treasury and the Commandant to assure the continued safe and effective operation of Coast Guard aircraft. The 1960 program entails the procurement of 2 SC–130B (Lockheed Hercules) turboprop landplanes to replace 2 Douglas Skymasters (R5D) aircraft. Spare parts will be obtained for 23 UF aircraft transferred from the Air Force at no cost but without spares. These UF's will replace P4Y's and PB1G's. In addition, certain necessary improvements will be accomplished at 1 air detachment and 5 air stations.

3. *Shore stations and navigational aids.*—This activity comprises the establishment of aids to navigation in waterways developed by the Corps of Engineers and for the installation and replacement of other aids made necessary by the natural shifting of channels and the changing needs of marine commerce. It includes improvements at certain shore facilities and the replacement of those facilities destroyed by fire, storm, or general deterioration. Under Public Law 85–241, the 60 inadequate public quarters will either be repaired or demolished. In addition, overdue replacement of substandard barracks will be accomplished.

4. *Repair and supply facilities.*—This request provides for the consolidation of facilities at 1 Coast Guard base to improve efficiency of operations, the construction of wharf facilities at 2 bases, additional mooring and other facilities at 2 other bases, and replacement of the electrical system at another base.

7. *Relation of costs to accrued expenditures.*—This appropriation contains a limitation on accrued expenditures in accord with Public Law 85–759, approved August 25, 1958. Since this is the first year this type of limitation has been included, and because it will be necessary to extend the control system, the amount of the limitation exceeds by 10% the amount of accrued expenditures shown in the schedules. This will allow for the development of a system to provide the necessary control of the receipt of goods and services at the widely dispersed delivery points in the Coast Guard with a minimum of

COAST GUARD—Continued

Current authorizations—Continued

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS—Continued

additional cost. A provision authorizing partial transfer between this limitation and that for Operating expenses is also included.

The relationship between direct costs and direct accrued expenditures is derived from year-end balances of accrued resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Direct program:				
Accrued resources at end of year:				
Advances (payments for goods and services on order not yet received)	$4,287,123	$4,535,511	$3,500,000	$1,500,000
Work in process	494,083	827,832	----------	----------
Total selected resources at end of year	4,781,206	5,363,343	3,500,000	1,500,000
Accrued resources at start of year (−)	----------	−4,781,206	−5,363,343	−3,500,000
Costs financed from accrued expenditures of other years, net (−)	----------	----------	−1,863,343	−2,000,000
Expenditures accrued for costs of other years, net	----------	582,137	----------	----------

Reimbursable program—6. *Loran to meet Department of Defense requirements.*—Funds have been provided by the Department of Defense for the construction of 6 Loran stations with support facilities. The construction program for 1960 contemplates 8 more stations.

7. *Relation of costs to accrued expenditures.*—The relationship between reimbursable costs and reimbursable accrued expenditures is derived from year-end balances of accrued resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Reimbursable program:				
Accrued resources at end of year: Work in process	$221,985	$219,434	----------	----------

The Reserve training program is designed to build up a trained Reserve to meet the mobilization manpower requirement of 40,000 trained officers and enlisted personnel.

1. *Trainee expense.*—The program for 1959 provides for an increase from 10,430 to 12,795 in the number of reservists to receive training. The 1960 program provides for a further increase to 16,440. This represents a phase in the planned build-up to 20,500 reserves in training by July 1, 1961, which in addition to 19,500 reservists with completed training, provides the full manpower requirements.

Total, all types	16,440	596,390	744,790	1,341,180

2. *Operation of training facilities.*—Twenty-five additional Organized Reserve training units will be in operation in 1960. The training pool at Alameda Base and the drill hall-gymnasium-training pool at Groton Training Station, which were completed in 1959, will be operated and maintained in 1960. In addition, provisions are made for the overhaul of training vessels and for increased maintenance costs at units providing summer training.

3. *Construction of training facilities.*—Projects for 1960 include the establishment and outfitting of 25 additional Organized Reserve training units; the renovation and equipping of selected minor shore establishments to handle a larger number of trainees for summer training; and the joint construction of training facilities with the Navy at Honolulu, T. H., and St. Louis, Mo.

4. *Administration.*—In addition to the supervisory and logistic functions for the Reserve training program this activity includes the recruiting program and the in-training and ineffectives allowance for administrative personnel at school, in transit, etc.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Inventories and items on order:

Intragovernmental funds:

COAST GUARD SUPPLY FUND

The Coast Guard supply fund, established in accordance with 14 U. S. C. 650, finances the procurement of commissary provisions, general stores, technical materials, and uniform clothing. The fund is financed by reimbursements from Coast Guard appropriations for goods purchased.

Budget program.—Costs of approximately $16.5 million to be incurred under this fund in 1960 are divided 69% for commissary provisions, 17% for general stores and technical materials, and 14% for uniform clothing.

Operating results.—Sales are expected to increase at the rate of approximately $715,000 in 1959 and $751,000 in 1960. For the most part this rise is attributable to the expansion of the Reserve training program and attendant activities.

The 10.8% rise in the inventory level between 1958 and 1960 is due to additions to present stock levels to handle increased volume. Transfers of material from other inventory accounts are not anticipated during 1960.

INTEREST ON THE PUBLIC DEBT

(Indefinite)

Appropriated (est.) 1959, **$7,500,000,000**
Estimate 1960, **$8,000,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Payment of interest (total obligations)	$7,606,774,062	$7,500,000,000	$8,000,000,000
Financing:			
Appropriation (new obligational authority)	7,606,774,062	7,500,000,000	8,000,000,000

Such amounts are appropriated as may be necessary to pay the interest each year on the public debt (31 U. S. C. 711 (2) and 732). With the exception of savings bonds and bonds of investment series A of 1965, interest is computed on an accrual basis. Interest on savings bonds and the 1965 investment series is computed on a due and payable basis.

Payment of interest during 1958 was distributed among the following categories:

Marketable	$4,581,894,298
Savings bonds	1,526,247,924
Special issues	1,223,042,207
Other nonmarketable issues	275,589,633

MEMORANDUM

STATUTORY PUBLIC DEBT RETIREMENTS

Permanent authorizations:

CUMULATIVE SINKING FUND

(Indefinite)

Appropriated (est.) 1959, **$633,349,085**

Estimate 1960, **$633,349,085**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance brought forward	−$10,791,211,268	−$11,424,560,353	−$12,057,909,438
Unobligated balance carried forward	11,424,560,353	12,057,909,438	12,691,258,523
Appropriation	633,349,085	633,349,085	633,349,085

There is appropriated to the cumulative sinking fund annually a sum equal to (1) 2½% of the amount of certain bonds and notes issued under the Liberty Bond Acts and outstanding on July 1, 1920, less an amount equal to the par amount of obligations of foreign governments held by the United States on that date, (2) an amount equal to the interest which would otherwise have been payable on bonds and notes which have been retired out of the sinking fund during the years, together with (3) 2½% of certain expenditures during the 1930's. The sinking fund is available to retire bonds and notes at maturity or to purchase them before maturity (31 U. S. C. 767, 767a and b).

DISTRICT OF COLUMBIA

New obligational authority of $69.6 million is recommended for Federal payments and loans to the District of Columbia for 1960, representing a sharp increase from the $37.4 million for 1959. Expenditures, however, are estimated to rise by a much smaller amount—$3.7 million to a 1960 level of $41.6 million.

Interest-bearing loans for capital outlays account for $35.4 million, more than one-half the new obligational authority requested for 1960. These include $19.5 million for schools and other general construction under new authority provided by the last Congress, $13.1 million for the highway fund, and $2.8 million for the water fund.

Recommended new obligational authority for the Federal payment of $32 million for the general fund of the District is the full amount of the increased annual Federal payment provided by the last Congress. It compares with appropriations of $20 million already enacted for 1959, plus an anticipated supplemental appropriation of $9 million made necessary by increases in the salaries of District employees. The 1960 budget also includes appropriations of $2.2 million to pay for water and sewage services rendered by the District to the Federal Government.

In addition, the budget provides for payment to the District of grants-in-aid for the performance of certain functions of the types performed by the several States. The Federal payments to the District for this purpose are included with the estimates for each of the corresponding payments to States in other parts of the budget.

The Congress serves as the legislative body for the District of Columbia and enacts the District's total budget, authorizing expenditures from funds available to the District from its own revenues and from payments made to it by the Federal Government. Detailed estimates for the District as a whole, including the Federal payments and loans to the District, estimates of appropriations from District revenues, and information regarding allocations to various Federal agencies for services rendered to the District, are printed in a separate volume of the budget. This volume of the budget contains detail only for the Federal payments and loans to the District.

FEDERAL FUNDS

Current authorizations:

FEDERAL PAYMENT TO DISTRICT OF COLUMBIA

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, [1959] *1960,* out of (1) the general fund of the District of Columbia (unless otherwise herein specifically provided), hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, and [$20,000,000] *$32,000,000,* which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1958, and of which $7,000,000 shall be available for capital outlay only] *1959*), (2) the highway fund (when designated as payable therefrom), established by law (D. C. Code, title 47, ch. 19), [and $431,600, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, 1958),] (3) the water fund (when designated as payable therefrom), established by law (D. C. Code, title 43, ch. 15), and [$1,732,000] *$1,532,000,* which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1958] *1959*), (4) the sanitary sewage works fund (when designated as payable therefrom), established by law (Public Law 364, 83d Congress), and [$697,000] *$686,000,* which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1958] *1959*), and (5) the motor vehicle parking fund (when designated as payable therefrom), established by law (D. C. Code, title 40, ch. 8), sums as shown herein; and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, [$5,500,000] *$35,400,000,* which, together with balances of previous appropriations for this purpose, shall remain available until expended, for loans authorized by the Act of May 18, 1954 (68 Stat. 101) *and the Act of June 6, 1958 (72 Stat. 183),* to be advanced upon request of the Commissioners to the [highway fund] *following funds: general fund, $19,500,000, highway fund, $13,100,000, and water fund, $2,800,000. (District of Columbia Appropriation Act, 1959.)*

PART III

ESTIMATES FOR TRUST FUNDS

Table 10. Trust Receipts and Expenditures
Detailed Estimates

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

INTRODUCTION TO PART III

Part III of the budget contains a summary table on trust and deposit funds, and detailed schedules and explanatory statements on the various trust funds. It excludes the detail on trust fund programs which require annual action by Congress (shown in part II) and the detail on the District of Columbia municipal government funds (contained in a separate budget volume).

TRUST AND DEPOSIT FUNDS DISTINGUISHED

The funds which are covered in this part of the budget are of two types, as follows:

Trust funds are those funds established to account for receipts which are held in trust by the Government for use in carrying out specific purposes and programs in accordance with a trust agreement or a statute. Within the category of trust funds, there is a subcategory of *trust revolving* funds, which are trust funds used to carry on a cycle of business-type operations, including certain corporations which are partly owned by the Government and partly by private interests.

Deposit funds are those funds established to account for collections that are either (*a*) held in suspense temporarily and later refunded or paid into some other fund of the Government, or (*b*) held by the Government as banker or agent for others, being paid out in lump sums at the direction of the owner. Such funds are not available for paying salaries, expenses, grants, or other expenditures of the Government.

While the transactions in these groups of funds are a part of the financial program of the Government, trust and deposit funds are not fully owned by the Government; hence these transactions are excluded from budget totals.

TRUST FUND RECEIPTS AND EXPENDITURES

Receipts.—Like budget receipts, trust fund receipts are based upon collections received and deposited, including U. S. securities received in lieu of cash and contributions to the trust funds from the general fund. The conversion of U. S. Government securities on hand into cash is excluded from receipts, but such sales and redemptions are listed in special analysis K of part IV on a net basis.

Expenditures.—Like budget expenditures, trust fund expenditures are stated on a checks-issued basis, less refunds collected. Net investments in U. S. Government securities are excluded from the figures, and are listed in special analysis K of part IV.

Trust revolving funds.—The small group of funds which constitute trust revolving funds are reported on a *net* expenditure basis. The collections of trust revolving funds, instead of being taken into the tables as receipts, are deducted from expenditures. The gross figures are shown in a supplementary summary table and in the detailed schedules.

OBLIGATIONAL AUTHORITY FOR TRUST FUNDS

Trust fund receipts must be appropriated before they can be obligated or spent, with the exception of those few cases where the law grants contract authorization in advance (for example, the highway trust fund).

Most trust funds are appropriated by permanent law, not requiring further action by Congress. Usually the appropriations equal the receipts of the year. In a few cases receipts of trust funds can be spent only in accordance with appropriations enacted by Congress from year to year. Examples are the highway trust fund, funds of the United States Soldiers' Home, and the municipal revenues of the District of Columbia (which are accounted for as trust funds by the Federal Government). In a few other cases, trust fund receipts are permanently appropriated for benefit payments, but limitations on administrative expenses payable out of the trust funds are imposed by annual action of the Congress.

DEPOSIT FUND EXPENDITURES

Table 10 includes deposit fund expenditures by department or agency. These expenditures are on a net basis; that is, the collections are deducted from checks issued, and the resulting figure is shown as an expenditure. Checks issued include those written to move money into other funds, as well as those written for refunds and the return of money to depositors. When the collections are larger than the checks issued, the amount shown as an expenditure is a negative item.

NET ACCUMULATION IN TRUST AND DEPOSIT FUNDS

Table 10 shows the net accumulation in all the trust and deposit funds. This represents the result obtained when the trust and deposit fund expenditures are subtracted from the trust receipts of the year. Since trust and deposit funds, as well as Federal funds, affect the total cash balance of the Treasury and the total public debt, the final figures on table 10 are carried forward into table 4 of part I. Data on the unexpended balances of the largest trust funds are appended to the table.

DETAIL OF TRUST FUND ESTIMATES

The detailed material in part III covers the trust funds which do not require annual action by Congress. Consolidated schedules are used for the smaller trust funds of each bureau or independent agency.

The material here follows the general format of the similar material in part II, with the principal exception that these schedules show receipts in place of showing appropriations. In cases where the receipts are not permanently appropriated as the money is collected, the schedules identify the portion of the unobligated balances on hand which is appropriated and the portion which is unappropriated. Also, no appropriation language appears here, and the narrative statement of Program and performance usually consists only of an explanation of the sources of money for the fund, the purposes for which it is authorized to be spent, and the legal citations.

Federal Reserve Bank of St. Louis

TRUST FUNDS

Trust fund receipts in 1960 are estimated to total $20.5 billion and trust fund expenditures $20.3 billion. Thus the net accumulation in the trust funds during 1960 will be $200 million.

As indicated in the following table, trust fund receipts will be rising at a faster rate than expenditures.

TOTAL TRUST FUND TRANSACTIONS

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Receipts	$16,329	$17,585	$20,477
Expenditures	16,069	18,884	20,259
Net accumulation	260	−1,299	218

While trust fund transactions are excluded from the budget receipts and expenditures, they nevertheless are a significant part of the program of the Government. For some functions—labor and welfare or commerce and housing—trust fund expenditures represent a larger part of the Government's program than do budget expenditures. Table 5 of part I of this budget shows budget expenditures, trust expenditures, and total Federal payments to the public for 1960.

A table on page 880, at the end of this statement, presents trust and deposit fund expenditures by function for years 1949 through 1960.

While there are many separate trust and deposit funds, the bulk of the transactions and the largest amounts of money are in the following trust funds:

TRANSACTIONS OF MAJOR TRUST FUNDS

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Federal old-age and survivors insurance:			
Receipts	$7,900	$8,438	$10,457

Highway trust funds:			
Receipts	2,134	2,143	2,912
Expenditures	1,602	2,553	3,136
Balance in fund at end of year	1,049	639	415
Federal National Mortgage Association:			
Gross receipts	1,228	656	763
Gross expenditures	1,333	1,015	1,248
Net trust expenditures	105	359	485

Social security insurance and staff retirement programs for retirement, disability, or death.—The first four trust funds listed above provide insurance against the loss of income due to retirement, disability, or death. Payments are made primarily from moneys derived from payroll contributions of employers, employees, and the self-employed. These receipts are invested in securities of the Federal Government and earn interest.

The first two funds were authorized by the Social Security Act of 1935, as amended, and comprise the so-called Federal old-age, survivors, and disability insurance (OASDI) program. The railroad retirement program was first established by the Railroad Retirement Act of 1935 and in its present form, closely coordinated with OASDI, serves as a combined social insurance and staff retirement system for workers in the railroad industry. While there is an increase in receipts in 1959 and 1960 in this trust fund, primarily due to reinsurance payments from the old-age and survivors insurance trust fund, the railroad fund is still operating at an actuarial deficit.

Although some temporary employees are covered under OASDI, most Federal civilian workers are under the staff retirement programs authorized by the Civil Service Retirement Act of 1920, as amended, or the Foreign Service Retirement Act of 1946, as amended. Since January 1, 1957, military personnel have been covered under OASDI on a contributory basis, as well as under the military retirement system which is financed directly from appropriations from budget funds.

The following table indicates the number of individuals receiving monthly benefits at the end of each year:

[In thousands]

	Federal old-age and survivors' insurance	*Federal disability insurance*	*Railroad retirement account*	*Civil service and foreign service*
Retired individuals: [1]				
1958 actual	8,586	---	383	230
1959 estimate	9,374	---	399	255
1960 estimate	9,903	---	413	279
Disabled individuals and their dependents:				
1958 actual	39	190	91	85
1959 estimate	66	470	93	95
1960 estimate	104	642	95	104
Survivors: [2]				
1958 actual	3,118	---	234	108
1959 estimate	3,366	---	246	139
1960 estimate	3,623	---	256	151

[1] Includes wives under age 65 with children in their care under old-age and survivors' insurance.

[2] Includes children of retired workers under old-age and survivors' insurance.

In August 1958 legislation was enacted increasing the old-age and survivors' insurance and the Federal disability benefits. In the latter program the legislation also provided monthly benefits for wives and children of disabled workers. 1960 is the first full year reflecting expenditures under these liberalizations. In addition, the legislation provided for increases in the combined employer and employee tax on payroll to the current rate of 5% beginning January 1, 1959, and to 6% beginning January 1, 1960. As a result of these increases in contributions, receipts in the Federal old-age and survivors insurance trust fund should again exceed expenditures in 1961.

Unemployment trust fund.—This program was also authorized by the Social Security Act of 1935, as amended. Payroll taxes paid by employers under State laws and the Federal Unemployment Insurance Tax Act or under the Railroad Unemployment Act are deposited in this trust fund. The States and the Railroad Retirement Board

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

draw upon this fund to pay weekly benefits to eligible unemployed workers.

Benefits paid out by the States in 1958 during the recession months offset about one-third of the wages lost due to unemployment. The Federal Government enacted a temporary program in 1958, as an emergency antirecession measure, to provide temporary extended benefits to eligible unemployed workers. This program expires April 1, 1959. Benefits under it are budget expenditures.

At present under the Federal Unemployment Tax Act an employment tax of 0.3% flows through budget funds, where it is chiefly used for grants to States for administering unemployment compensation benefits as well as employment services. Legislation will be proposed to convert this entirely to a trust fund operation, so the administration of the regular State unemployment compensation program will be financed similarly to the old-age, survivors, and disability insurance and the railroad retirement and railroad unemployment compensation programs. This proposed change would affect both budget receipts and expenditures equally.

Veterans' life insurance.—These two trust funds provide life insurance primarily for veterans of the two World Wars. Receipts of these trust funds come from premiums paid by veterans, interest on the investments, and transfers by the Federal Government from budget funds to cover losses resulting from war hazards. The bulk of the payments in 1960 is estimated to consist of $256 million in dividends to about 6.3 million policyholders and $401 million paid out to survivors of deceased veterans or veterans with disabilities or completed term policies.

Highway trust fund.—Receipts from certain excise taxes on motor fuels, tires, and vehicles are used to finance expenditures (mainly grants to the States) for Federal-aid highways.

Under existing legislation current receipts from the excise taxes plus the balance in the period would be less than expenditures in 1960 and receipts in later years would continue to fall below the expenditures. Accordingly the 1960 budget recommends an increase in the highway-related gasoline and diesel fuel taxes as well as other revisions designed to finance other highway improvements from excise taxes paid by highway users. The 1960 estimates include amounts under the proposed legislation.

Federal National Mortgage Association, secondary market operations.—In the secondary market part of its program, the Association buys and sells federally insured or guaranteed mortgages at prices prevailing in the market. In accordance with statutory objectives, these operations are self-supporting. Funds required for mortgage purchases in 1960 will be obtained: (*a*) from private sources through the sale of the Association's debentures; (*b*) through mortgage sales and repayments; (*c*) by the purchases of common stock which are required of all mortgage sellers. Net trust expenditures will increase to $359 million in 1959 and $485 million in 1960 as a result of mortgage purchases considerably in excess of sales.

The following table summarizes trust fund expenditures by functions for 1949 through 1960. The marked increase in the labor and welfare function stems mainly from the expansion and liberalization in the social security insurance programs. The major reason for the increase in commerce and housing is the Federal-aid highway program, which started as a trust fund in 1956.

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Acquisition of library materials	$78,131	$80,315	$81,000
2. Reader and reference services	868,721	913,225	919,192
3. Organization of the collections	312,487	370,075	371,808
4. Information service on copyright materials	10,797	9,000	9,000
Total obligations	1,270,136	1,372,615	1,381,000
Financing:			
Unobligated balance brought forward	661,307	716,794	727,704
Receipts:			
Library of Congress gift fund	651,283	659,725	650,000
Income from investment account	16,524	20,000	15,000
Interest on bequest of Gertrude M. Hubbard	800	800	800
Interest on permanent loan	146,942	169,000	176,000
Service fees	500,671	525,000	550,000
Cataloging project, Copyright Office	9,403	9,000	9,000
Unobligated balance carried forward	−716,694	−727,704	−747,504
Total financing	1,270,136	1,372,615	1,381,000

This schedule covers (1) funds received as gifts for immediate expenditure and receipts from the sale of recordings and photoduplication materials financed from capital originally received as gifts, (2) income from investments held by the Library of Congress trust fund board, and (3) interest at the rate of 4% per annum paid by the Treasury on the principal funds deposited therewith as described under "Library of Congress trust fund, principal accounts" (2 U. S. C. 156–160; 31 U. S. C. 725s; 37 Stat. 319).

1. *Acquisition of library materials.*—During 1958, this included the procurement of manuscripts, Hispanic materials, fine prints, books and other library materials from certain foreign areas for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries.

2. *Reader and reference services.*—These services during 1958 included the preparation of bibliographies, indexes, digests, and check lists; lectures; surveys of bibliographic services; poetry readings; musical concerts; furtherance of musical research, composition, performance and appreciation; and providing photostats, photographs, microfilm, and other forms of photoduplication, and sound recordings of folksongs and poetry to other Government agencies, libraries, and other institutions, and to the general public.

3. *Organization of the collections.*—During 1958, the preparation of the 16th edition of Dewey Classification was continued, lists of East European accessions were prepared and distributed, and experiments were conducted in cataloging materials prior to publication to permit inclusion of the entry in the publication.

4. *Information service on copyright materials.*—Depositors were supplied with preliminary information relating to copyright materials in selected subject fields.

Obligations by major source of funds for 1958 and estimates for 1959 and 1960 are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Library of Congress gift fund	$617,083	$631,600	$635,500
Service fees	484,182	517,615	525,000
Cataloging project, Copyright Office	10,797	9,000	9,000
Library of Congress trust fund, income from investment account	25,906	25,000	20,000
Payment of interest on permanent loan account	130,001	186,900	190,000
Payment of interest on bequest of Gertrude M. Hubbard	2,167	2,500	1,500
Total obligations	1,270,136	1,372,615	1,381,000

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance brought forward:			
Cash	$3,660,619	$3,780,760	$4,430,760
U. S. securities (par)	135,800	15,800	15,800
Receipts	141	650,000	
Unobligated balance carried forward:			
Cash	−3,780,760	−4,430,760	−4,446,560
U. S. securities (par)	−15,800	−15,800	
Total financing			

This schedule covers two principal accounts—permanent loan and bequest of Gertrude M. Hubbard.

Both funds represent gifts or bequests in cash which have been deposited with the Treasurer of the United States as permanent loans to the United States, the interest upon which, at 4% per annum, payable semiannually, is available to the Librarian for the purposes specified in each case.

As of June 30, 1958, the principal in the permanent loan account, which shall not exceed the sum of $5 million (2 U. S. C. 158; 31 U. S. C. 725s), was distributed as follows:

Music activities	$1,906,951
Fine arts	396,556
American history	307,040
Hispanic activities	260,578
Poetry and literature	301,150
Miscellaneous purposes	588,485
Total principal	3,760,760

The additional principal sum of $20,000, representing the bequest of Gertrude M. Hubbard, is for the purchase of engravings and etchings (37 Stat. 319).

The use of the income from these accounts is described under Library of Congress gift and trust fund income accounts.

THE JUDICIARY

Judicial Survivors Annuity Fund

THE JUDICIARY—Continued

JUDICIAL SURVIVORS ANNUITY FUND—Continued

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance brought forward:			
Cash	$26,788	$10,477	$3,877
U. S. securities (par)	760,000	1,000,000	1,200,000
Gain from premium or discount on investments	6,552		
Receipts:			
Contributions to the fund	485,907	500,400	512,000
Interest on investments	27,033	33,500	39,100
Unobligated balance carried forward:			
Cash	−10,477	−3,877	−16,077
U. S. securities (par)	−1,000,000	−1,200,000	−1,370,000
Total financing	295,803	340,500	368,900

This fund is used to pay annuities to eligible widows and dependent children of deceased judges of the United States, to make refunds to former judges who have elected to come under the judicial survivors annuity system but who have left the service, and to pay claims of survivors of member judges for any unpaid amounts credited to the individual accounts of such judges (28 U. S. C. 376). On June 30, 1958, there were 339 judicial members and 130 survivor annuitants. It is estimated that in 1959 and 1960 there will be respectively 357 and 365 judges covered by the system and that the number of survivor annuitants will total 135 and 140 in each of the respective years.

1. *Advances, Mutual Security Act.*—Payments are received from foreign nations for military supplies, equipment, and services which the United States military departments transfer from their stocks or procure under contract. In most cases, cash payments are made before delivery. However, when determined by the President to be in the best interests of the United States, payments for deliveries of materiel from stock may be made within a reasonable time after delivery, not to exceed 3 years. Normally, this period is limited to 120 days. In the case of new procurement, the foreign governments must advance sufficient funds to meet required contract payments and, in addition, must provide the United States with a dependable undertaking to assure that no loss will accrue to the United States in case of contract cancellation or termination (Mutual Security Act of 1954, as amended, 22 U. S. C. 1816).

2. *Advances for economic assistance.*—By agreement with certain governments, the International Cooperation Administration acts as an agent, utilizing dollar advances by them to arrange transportation services for commodities purchased by those countries (Mutual Security Act of 1954, as amended, 22 U. S. C. 1795 (b)).

3. *Philippine assistance.*—By agreement with the Philippine Government, the International Cooperation Administration acts as its agent, utilizing dollars advanced by the Philippines to procure commodities for them (Mutual Security Act of 1954, as amended, 22 U. S. C. 1795 (b)).

4. *Technical assistance, United States dollars advanced from foreign governments.*—Funds advanced by foreign countries are used to pay some local costs of technical cooperation programs in those countries in accordance with bilateral agreements (Mutual Security Act of 1954, as amended, 22 U. S. C. 1795 (b)).

This fund is used to pay annuities to retired employees or their survivors, to make refunds to former employees who have left the service, and to pay claims for employees who have died before retirement or before their annuities are paid in full (5 U. S. C., ch. 14). It is estimated that as of June 30, 1960, there will be 532,456 persons on the annuity roll, compared with 421,076 as of June 30, 1958, and 488,465 as of June 30, 1959.

The status of the fund is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Investments in U. S. securities at beginning of year (par)	$7,497,551,000	$8,166,751,000	$9,031,358,000

This fund finances the payment of group life insurance premiums to private insurance companies under the Federal Employees' Group Life Insurance Act of 1954 (5 U. S. C. 2091–2103) and any expenses incurred by the Civil Service Commission in administration of this act as annually authorized by Congress.

Budget program.—Through June 30, 1958, a total of $257,200,000 was withheld from the salaries of covered employees and $128,600,000 was contributed by the Government to the fund. It is estimated that, in 1960, a sum of $76,666,000 will be paid into the fund by employees and $38,333,000 by the Government. As of June 30, 1958, a total of $208,500,000 had been paid by the insurer in benefits and approximately $12 million in accrued benefits awaited filing of claims. An estimated $75 million in benefits will be paid in 1960.

Most of the difference between receipts and benefit payments is held by the insurer as a contingency reserve. As of November 16, 1957, the end of the third policy year, $100,000,000 was held in this reserve. A total of $32,716,000 has been returned by the insurer and redeposited in the Treasury of the United States after determination by the Civil Service Commission that the contingency reserve should be held at $100,000,000. The estimated returns of $38,000,000 in 1959 and $35,000,000 in 1960, netted against expense, account for the substantial increase in retained earnings which will be used to meet the cost of future benefits.

A summary statement of the operations of the contingency reserve for each of the three policy years, 1955, 1956, and 1957, follows:

STATEMENT OF ANNUAL ACCOUNTING AND CONTINGENCY RESERVE

	First policy year (Aug. 29, 1954–Nov. 19, 1955)	*Second policy year (Nov. 20, 1955–Nov. 17, 1956)*	*Third policy year (Nov. 18, 1956–Nov. 16, 1957)*
1. Premiums accrued	$112,700,000	$98,650,000	$104,250,000
2. Interest added to contingency reserve	719,775	1,695,799	2,747,948
3. Mortality and other claim charges incurred:			
(a) Life insurance	56,248,080	49,388,510	57,720,853
(b) Accidental death and dismemberment insurance	5,449,521	3,847,616	3,860,476
(c) Conversion charges	579,470	877,077	678,742
Total	62,277,071	54,113,203	62,260,071
4. Expense and risk charges incurred:			
(a) Premium and other taxes	2,203,967	2,261,694	1,297,076
(b) Office of Federal Employees' Group Life Insurance	256,967	245,258	257,710
(c) Other expenses and risk charges	1,048,110	887,850	938,250
Total	3,509,044	3,394,802	2,493,036
5. Total addition to contingency reserve	47,633,660	42,837,794	42,244,841
6. Total contingency reserve at end of year	47,633,660	90,471,454	132,716,295
7. Less premiums returned to employees' life insurance fund			32,716,295
8. Contingency reserve held by insurer at end of year	47,633,660	90,471,454	100,000,000

Pursuant to Public Law 84–356, approved August 11, 1955, the Civil Service Commission will assume by the end of 1959, life insurance assets and liabilities of 27 nonprofit associations of Federal employees with an approximate membership of 134,000, assets of $18 million, and insurance coverage of approximately $202 million.

Financing.—Premium costs are met by withholding from the salaries of employees (under age 65) 25 cents for each $1,000 of life insurance, contributions by the Government, and direct premium payments from beneficial association members.

Operating results.—Earnings are retained to meet the cost of future benefits.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Supplies	$4,741	$2,964	$5,000	$5,000
Unpaid undelivered orders	1,590	10,327	4,000	4,000
Total selected resources at end of year	6,331	13,291	9,000	9,000
Selected resources at start of year (−)		−6,331	−13,291	−9,000
Costs financed from obligations of other years, net (−)			−4,291	
Obligations incurred for costs of other years, net		6,960

Financing applied to program	2,787,865,289	1,306,391,056	

The Federal intermediate credit banks will continue their agricultural loan and discount activities, and will provide the production credit associations with necessary supervision and services, a function formerly performed by the production credit corporations. Subsequent to December 31, 1958, the budget provisions of the Government Corporation Control Act will not apply to the Federal intermediate credit banks and they may utilize their funds for administrative expenses without regard to the limitations contained in any other act of Congress governing the expenditure of appropriated funds (section 201 (a) and (b) of the Farm Credit Act of 1956). Net cash transactions will be transferred from this fund to a deposit fund of Treasury on January 1, 1959.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1957, $39,597; 1958, $67,444; and December 31, 1958, $37,500.

Financing.—The banks finance their lending operations principally through the sale of consolidated collateral trust debentures in the investment markets, and by other borrowings. The United States assumes no liability for the debentures or other such borrowings. It is estimated that the banks will issue $687,220,000 of debentures and will borrow $157,700,000 from commercial banks during the first 6 months of 1959; they issued $1,486,550,000 of debentures and borrowed $294,515,000 from commercial banks and $29,050,000 from other Farm Credit banks during 1958. No credit bank may have outstanding borrowings in an amount exceeding 10 times its surplus and paid-in capital.

Operating results and financial condition.—By January 1, 1959, it is estimated that the Government-owned capital

INDEPENDENT OFFICES—Continued

FARM CREDIT ADMINISTRATION—Continued

OPERATING FUND, FEDERAL INTERMEDIATE CREDIT BANKS—Con.

will be reduced from $87,405,000 (at the time of the merger) to $80,808,945. Private capital interest will be increased during the period since January 1, 1957, by $15,730,035, consisting of $13,112,015 acquired by the production credit associations by cash subscriptions and $2,618,020 acquired by the associations and other financing institutions as patronage refunds. The Farm Credit Act of 1956 also provides that the proceeds from retirement of capital stock will be paid into the Treasury as miscellaneous receipts until the class A capital stock of the banks which was outstanding on January 1, 1957, has been reduced to $30,000,000, after which the proceeds will be credited to the Federal intermediate credit banks investment fund.

Net income of $5,404,000 is estimated for the first half of 1959. This amount will be retained in undistributed earnings until the end of the year, at which time the earnings for the entire year will be distributed in accordance with section 206 (a) of the Farm Credit Act of 1956 by transfer to the reserve account, payment to Treasury as franchise tax, and payment to the associations and other financing institutions as patronage refunds. It is estimated that retained earnings will amount to $69,634,935 on December 31, 1958.

Total financing	202,459	445,943	100,000

This fund includes advance payments from States, counties, and municipalities for the establishment of air navigation and related facilities, as may be required in the public interest (40 U. S. C. 452). In addition, funds from private sources for the maintenance and operation of air navigation and related facilities are credited to this fund. These funds are expended through the pertinent appropriations.

The war claims fund consists of funds transferred by the Office of Alien Property, Department of Justice, from the net proceeds derived from the liquidation of former German and Japanese assets vested pursuant to the Trading With the Enemy Act. This is the master trust account from which transfers are made to other accounts, and it includes all unobligated balances from these accounts.

Pursuant to section 13 (c) of the War Claims Act of 1948, as amended, and Public Law 85–884 (72 Stat. 1708), the sum of $3,750,000 is to be transferred from the Office of Alien Property.

NATIONAL CAPITAL HOUSING AUTHORITY

Operation and Maintenance, Properties Aided by Public Housing Administration

The National Capital Housing Authority operates the low-rent public housing program in the District of Columbia, under the authority of the Housing Act of 1937, and title II of the District of Columbia Alley Dwelling Act (48 Stat. 930). The 1960 program consists of the operation of 7,736 dwelling units and the development of 1,586 additional units. Management and development

INDEPENDENT OFFICES—Continued

NATIONAL CAPITAL HOUSING AUTHORITY—Continued

OPERATION AND MAINTENANCE, PROPERTIES AIDED BY PUBLIC HOUSING ADMINISTRATION—Continued

operations are financed through rental revenue, loans, and annual contributions. There is no debt service on Federal projects conveyed to the Authority for low-rent use; all other projects are permanently financed through the sale of Housing Authority bonds which are supported by the pledge of the Public Housing Administration to pay annual contributions equal to the debt service less any excess operating receipts over operating expense.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
To operations:			
Acquisition of assets: Land, structures, and equipment	$12,591,101	$12,568,152	$8,554,926

Total financing	729,861,438	778,133,992	815,460,000

Under the railroad retirement system, workers and employers contribute toward their retirement by taxes on wages. Benefits are payable when workers reach 65, become disabled, or die. These contributions are deposited in this trust fund and invested in Government securities bearing interest of at least 3%.

The status of the fund is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Investments in U. S. securities at beginning of year (par)	$3,642,058,000	$3,608,953,000	$3,839,000,000
Uninvested cash	60,737,555	59,269,957	61,263,957
Balance of fund at beginning of year	3,702,795,555	3,668,222,957	3,900,263,957
Cash income during the year:			
Taxes	574,898,971	560,000,000	575,000,000
Payments from Federal old-age and survivors insurance and Federal disability insurance trust funds		338,441,000	275,000,000
Interest and profit on investments	120,276,748	110,000,000	112,500,000
Total annual income	695,175,719	1,008,441,000	962,500,000
Total available during year	4,397,971,274	4,676,663,957	4,862,763,957
Cash outgo during year:			
Benefit payments and claims	719,542,037	758,000,000	804,000,000
Interest payments to the Federal old-age and survivors insurance trust fund	1,588,000		
Administrative expenses [1]	8,618,280	9,400,000	9,400,000
Payments to Federal disability insurance trust fund		9,000,000	
Total annual outgo	729,748,317	776,400,000	813,400,000
Investments in U. S. securities at end of year (par)	3,608,953,000	3,839,000,000	3,986,000,000
Uninvested cash	59,269,957	61,263,957	63,363,957
Balance of fund at end of year [1]	3,668,222,957	3,900,263,957	4,049,363,957

[1] Excludes $320,000 in 1959 and $52,000 in 1960 out of $372,000 proposed for later transmission in 1959.

Income.—The income of the railroad retirement account consists of taxes paid by railroad employers and employees; interest on investments; and payments from the Federal old-age and survivors insurance trust fund. The railroad retirement system has a reinsurance arrangement of financial interchanges with the social security system.

Budget program.—(1) *Retirement and survivor benefit payments.*—Payments will increase annually until the system reaches maturity some years hence.

(2) *Administrative expenses.*—Such expenses are subject to annual limitations in appropriations acts (see "Limitation on salaries and expenses," Railroad Retirement Board, in part II of the budget).

In addition a supplemental to increase the limitation for 1959 is anticipated under Proposed for later transmission to provide for increased workloads as a result of the 1958 amendments to the Social Security Act which affect Railroad Retirement Board operations.

(3) *Payments to Federal disability insurance trust fund.*—Payments are made between this account and the Federal disability insurance trust fund and the Federal old-age and survivors insurance trust fund so as to place these funds in the same position in which they would have been if railroad employment had been included in social security coverage (65 Stat. 687 and 70 Stat. 837).

The Board administers an unemployment and sickness insurance system and an employment service to find jobs for unemployed railroad workers. The cost is provided through a permanent appropriation of 0.2% of taxable payroll. As of each June 30, the unobligated balance in this fund in excess of $6 million is transferred as shown in the following table to the railroad unemployment insurance account in the unemployment trust fund (45 U. S. C. 361).

	1958 actual	*1959 estimate*	*1960 estimate*
Permanent appropriation, 0.2% of taxable payroll	$9,449,458	$9,000,000	$9,200,000
Interest on investments		150,000	180,000
Excess in fund over $6,000,000 at end of year (−)		−476,643	−489,058
Appropriation, net	9,449,458	8,673,357	8,890,942

RAILROAD RETIREMENT BOARD—Continued

RAILROAD UNEMPLOYMENT INSURANCE ADMINISTRATION FUND—Continued

1. *Maintenance of earnings accounts.*—The amounts of insurance payments for unemployment, sickness, and maternity benefits are based upon individual records of earnings and daily wage rates. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The costs are shared on a measured basis with the retirement program. Compensation items were 2,381,071 in 1958 and are estimated to be 2,040,000 in 1959 and 2,100,000 in 1960.

2. *Processing of unemployment insurance claims.*—This involves paying benefits to unemployed railroad workers. Claims for unemployment compensation are filed locally and certified for payment through regional offices; the number fluctuates when economic changes affect the railroad industry. Unemployment claims were 2,746,247 in 1958 and are estimated at 2,500,000 in 1959 and 1,500,000 in 1960.

3. *Processing of sickness and maternity claims.*—These claims are filed by mail and certified for payment through the regional offices of the Board. The volume of sickness claims is relatively stable being 941,508 in 1958 and are estimated at 936,000 in 1959 and 1960.

4. *Claimant placement services.*—The Board conducts an employment service for unemployed benefit claimants and to assist railroads in filling their manpower needs. This resulted in savings in benefit payments of more than $2 million in 1958.

5. *Administration.*—Except for certain basic activities the costs of administration are shared between this and the retirement program on a measured basis.

This fund is used to pay adjusted-service certificates issued to veterans of World War I upon maturity or upon demand. The principal of the fund has not been invested since January 1, 1957, and all future payments will be made from principal. Only a few certificates remain unpaid (38 U. S. C. 646–657).

This fund was established in 1940 as the financing mechanism for the World War II servicemen's and veterans' insurance program authorized by the National Service Life Insurance Act of 1940. Over 22 million policies were issued under this program of which about 5.4 million, totaling approximately $35 billion, remain in force. Because issuance of new policies was ended in 1951 the insurance in force will continue to decline. The general decline in the activity of the fund is indicated in the following table:

[Dollars in millions]

	June 30, 1957	*June 30, 1958*	*June 30, 1959*	*June 30, 1960*
Number of policies in force	5,435,889	5,404,784	5,330,000	5,235,000
Amount of insurance in force	$35,673	$35,477	$34,981	$34,357

The assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans are expected to increase from $5,909 million as of June 30, 1958, to $6,179 million on June 30, 1960. The current actuarial estimate of policy obligations totals $5,424 million, leaving a balance of $485 million for contingency reserves.

The income of the fund derives from premium receipts, interest on investments, and payments which are made to the fund from the approriation "Veterans insurance and indemnities," for claims (1) resulting from extra hazards of the veterans' service, and (2) arising on certain policies held by personnel on active duty. Administrative expenses are charged to the appropriation "General operating expenses."

The fund is operated on a commercial basis to the greatest possible extent consistent with law. In the program and financing statement above, the noncash transactions, which are offset by other claims of the fund, are subtracted from program costs in order to show obligations of the fund. The following business-type statements of income and expense and financial condition include these noncash transactions relating to the status of insurance policy accounts.

Financing applied to program	122,066,754	82,975,000	84,330,000

This fund was established in 1919 to receive premiums and pay claims on insurance issued under the provisions of the War Risk Insurance Act. Approximately 350,000 policies of United States Government life insurance, providing coverage of over $1.5 billion, remain in force. The general decline in the activity of the fund is indicated in the following table:

[Dollars in millions]

	June 30, 1957	*June 30, 1958*	*June 30, 1959*	*June 30, 1960*
Number of policies in force	368,855	352,999	345,000	328,000
Amount of insurance in force	$1,608	$1,545	$1,511	$1,436

The assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decline from $1,268 million as of June 30, 1958, to $1,217 million on June 30, 1960, as an increasing number of policies mature through death or disability. The current actuarial evaluation of policy obligations totals $1,159 million, leaving a balance of $109 million for contingency reserves.

The income of the fund derives from premium receipts, interest on investments, and payments which are made to the fund from the appropriation Veterans insurance and indemnities, for claims (*a*) resulting from the extra hazards of the veteran's service, and (*b*) arising on certain policies

Federal Reserve Bank of St. Louis

held by personnel on active military duty. Administrative expenses are charged to the appropriation General operating expenses.

The fund is operated on a commercial basis to the greatest possible extent consistent with law. In the program and financing statement above, the noncash transactions, which are offset by other claims of the fund, are subtracted from program costs in order to show the obligations of the fund. The following business-type statements of income and expense and financial condition include these noncash transactions relating to the status of insurance policy accounts.

RECORDS ACTIVITIES

National Archives Trust Fund

The Archivist of the United States furnishes, for a fee, copies of records in the custody of the National Archives that are not exempt from examination as confidential or protected by subsisting copyright (44 U. S. C. 399).

Proceeds from sale of reproductions and publications, and admission fees to Presidential library museum rooms are deposited to this fund (44 U. S. C. 397).

The National Archives trust fund board receives and administers donations for the benefit of the National Archives (44 U. S. C. 300cc). Positive microfilm publications are produced for educational institutions, scholars, and others, and historical research is conducted in accordance with grants from private institutions. Current historical projects include the production of negative microfilm copies of certain captured German World War II records for the American Historical Association, and preparation of a documentary history of the ratification of the Constitution and the first 10 amendments for the Ford Foundation.

The secondary market operations of the Federal National Mortgage Association were authorized by the Housing Act of 1954 to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home mortgage financing. Mortgage purchases under these operations are financed by the proceeds from (1) the sale of debentures to private investors, or to the Secretary of the Treasury (the Secretary of the Treasury may hold not more than $2.25 billion of such debentures), (2) subscriptions by the Secretary of the Treasury to Federal National Mortgage Association preferred stock ($92.8 million in 1955 and was increased to $142.8 million in 1957; $65 million of additional preferred stock has been authorized but has not been issued), (3) mandatory subscription by mortgage sellers to the Association's common stock, (4) the sale of mortgages to the investing public, (5) repayments and prepayments of mortgage principal, and (6) income from operations. Government management is intended to be transitional, to be succeeded by private operation when the Government's investment is retired. The present interim program, financed by private as well as Government investment, is treated as a trust fund. Operations are discussed in part I of the budget in connection with the program's general fund financing and effect on budget expenditures.

Total financing	590,731	661,181	603,304

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others.

1. *Expenses and refunds, inspection and grading of farm products* provide for (*a*) inspection and certification of animal foods and inedible agricultural products in interstate and foreign commerce; (*b*) identification and marking of divided portions of meat, meat byproducts, and meat food products previously federally inspected and so marked in order that divided portions will bear Federal marks; and (*c*) examination of meat and meat food products in federally inspected meat packing plants for compliance with contract specifications (7 U. S. C. 1622h, 1624).

2. *Expenses, feed and attendants for animals in quarantine*, are paid from fees advanced by importers (21 U. S. C. 102).

3. *Miscellaneous contributed funds* received from States, local organizations, individuals, and others are available for work under cooperative agreements on miscellaneous production and utilization research activities, plant quarantine inspection, and cooperative plant pest control activities (5 U. S. C. 67, 563).

1. *Technical services and other assistance, agricultural conservation program.*—For the 1957 and 1958 program years, funds were advanced to the Soil Conservation Service from the agricultural conservation program appropriation on the basis of agreements with individual county agricultural stabilization and conservation committees for technical assistance in carrying out the agricultural conservation program in participating counties. For the 1959 and subsequent program years these agreements provide that the technical services to agricultural conservation program participants will be performed on a reimbursable basis. This assistance is over and above that which would be furnished to farmers and ranchers under the regular soil conservation programs with soil conservation districts (71 Stat. 337; 16 U. S. C. 590k).

2. *Miscellaneous contributed funds.*—Miscellaneous funds received from States, local organizations, individuals, and others are available for work under cooperative agreements (5 U. S. C. 67, 563).

1. *Expenses and refunds, inspection and grading of farm products.*—An inspection and grading service for farm products is provided upon application of interested parties. These services are supported primarily by fees and, to a limited extent, by direct appropriations to the Agricultural Marketing Service. The schedules reflect expenses paid from fees received (7 U. S. C. 91–99; 1621–1627). The volume of work performed under the trust fund is shown below.

Financing applied to program	12,999,886	15,833,985	8,601,427

These funds are administered by the Farmers' Home Administration, under agreements with 40 individual States, for use in carrying out titles I and II of the Bankhead-Jones Farm Tenant Act. In these States, operating type loans are made at 5% interest. In some States, farm ownership type loans are made from these funds and insured under the regular Farmers' Home Administration insured loan program at 3½% plus a 1% insurance charge. The entire assets of the 40 State corporations are being administered by the Farmers' Home Administration, with the exception of $5,534,158 in cash and other assets returned to States for rural rehabilitation purposes agreed upon between each corporation and the Federal Government.

Declining activity is expected in 1960 as a result of more rapid return of assets to State corporations. Actual and estimated loan operations for 1957, 1958, 1959, and 1960 are as follows:

	Operating		*Farm ownership*	
	Number	*Amount*	*Number*	*Amount*
1957	2,086	$3,383,703	721	$8,810,370

Federal Reserve Bank of St. Louis

Highway, the Bureau acts as agent for the cooperating Central American Republics in purchase of equipment, supplies, and services (55 Stat. 860).

3. *Technical assistance, United States dollars advanced from foreign governments.*—Under the Foreign Economic Assistance Act and under agreement with the International Bank for Reconstruction and Development and the Export-Import Bank of Washington, the Bureau of Public Roads renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. During the current year, these services are being rendered for Ethiopia, Iran, Nicaragua, Philippines, Turkey, Iraq, and Liberia (68 Stat. 841–861).

4. *Contributed funds, highways for Alaska.*—Alaska has contributed funds each year in an amount of not less than 10 percent of Federal funds apportioned to it. These funds have been expended in conjunction with Federal funds apportioned for construction and maintenance of roads within Federal-aid systems (70 Stat. 374). Beginning in 1960 Alaska will participate in the Federal-aid highway program on the same basis as other States.

U. S. securities (par)	−31,750	−31,750	−31,750
Total financing	344,537	58,310	7,380

1. *Supplies and expenses, United Nations Korean Reconstruction Agency.*—Funds advanced by the United Nations Korean Reconstruction Agency are used for the purchase of supplies and services (65 Stat. 376).

3. *Bequest of Maj. Gen. Fred C. Ainsworth Library.*—This fund, derived from earnings of the bequest, provides for maintenance of a permanent library of medical books at Walter Reed Hospital known as the Fred C. Ainsworth Endowment Library (31 U. S. C. 725s).

4. *Kermit Roosevelt fund, Department of the Army.*—Proceeds of this fund are used to foster better understanding between the military forces of the United States and the United Kingdom through an exchange of lecturers selected by the Chiefs of Staffs of the United States and United Kingdom (5 U. S. C. 224–228).

5. *Army general gift fund.*—Donations which are not limited to specific use by the donor are used for Army institutions as determined by the Secretary of the Army (5 U. S. C. 150–q–t).

Soldiers' Home Permanent Fund

Amounts Available for Transfer

	1958 actual	1959 estimate	1960 estimate
Unappropriated balance brought forward	$77,542,988	$85,765,890	$93,037,390
Receipts:			
Stoppages, fines, and forfeitures	8,510,330	8,400,000	8,400,000
Estates of deceased soldiers and airmen	475,300	480,000	480,000
Withheld pay	1,622,885	1,515,000	1,515,000
Interest credited	2,422,610	2,600,000	2,900,000
All other	36,108	36,000	36,000
Unobligated balance returned	3,779		
Total available	90,614,000	98,796,890	106,368,390
Transferred to—			
"Limitation on operation and maintenance and capital outlay":			
Authorized	−4,817,000	−5,531,500	−10,948,000
Proposed increase due to pay increases		−197,000	
"Payment of certified claims"	−31,110	−31,000	−31,000
Balance carried forward	85,765,890	93,037,390	95,389,390

This fund consists of receipts from fines, forfeitures, and stoppages of pay of regular enlisted personnel of the Army and Air Force, withholding of 10 cents per month from the pay of such personnel, estates of deceased soldiers and airmen, other receipts consisting largely of sales and interest of 3% on fund balance. The receipts and the balance are available for obligation and expenditure through the maintenance and operation appropriation only as appropriated annually by Congress (24 U. S. C. 44, 45; 31 U. S. C. 725s).

Payment of Claims

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Payment of certified claims (total obligations)	$31,110	$31,000	$31,000
Financing:			
Receipts from "Soldiers Home permanent fund"	31,110	31,000	31,000

Refunds are made from the permanent fund of amounts of court-martial fines and other charges erroneously deducted from the pay of soldiers and airmen after adjudication of claims therefor by the General Accounting Office (31 U. S. C. 71, 711 (12); 24 U. S. C. 44).

DEPARTMENT OF THE INTERIOR—Continued

BONNEVILLE POWER ADMINISTRATION—Continued

CONSTRUCTION OF ELECTRIC TRANSMISSION LINES AND SUBSTATIONS, CONTRIBUTIONS, BONNEVILLE POWER PROJECT—Continued

1. *Construction.*—Various public and private utilities advanced funds to provide facilities which are not provided by the Administration under its customer service policy. These facilities are of benefit to the Government as well as to the customers and serve to promote greater efficiency on the system, reduce loads on existing facilities, and improve service to customers. Also, non-Federal groups advance funds for relocating facilities of the Administration as required for highway construction and other purposes (50 Stat. 736).

3. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1957, $224,821; 1958, $19,092; 1959, $15,000.

Total financing	445,370	610,000	610,000

1. *Contributed funds.*—Users of the Federal range contribute funds toward administration and protection of grazing districts and for construction and maintenance of range improvements. Contributions are also received for making surveys and for maintenance of access roads (43 U. S. C. 315h, 315i, 775).

2. *Expenses, public survey work.*—Advances are made by individuals to pay the cost incident to surveys of lands requested by them (31 U. S. C. 711; 43 U. S. C. 759, 761, and 887; Comp. Gen. Dec. of Aug. 31, 1931; 48 Stat. 1224–1236).

3. *Trustee funds, Alaska townsites.*—Amounts received from sale of Alaska town lots are available for expenses incident to the maintenance and sale of townsites (31 U. S. C. 725s; Comp. Gen. Dec. of Nov. 18, 1935).

Total financing	603,609	1,112,000	346,300

1. *National Park Service, donations.*—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park and monument system (16 U. S. C. 6). Donations amounting to $373,637 were received from 20 contributors during 1958. It is estimated that $500,000 will be received from a private foundation during 1959 to be matched by Federal funds for the purpose of acquiring private in-holdings within the National Park system.

2. *National Park trust fund.*—The National Park Trust Fund Board administers gifts of personal property for the benefit of the National Park Service. Interest accruals or donations to the fund are used for current needs, or invested in Treasury bonds (16 U. S. C. 6a, 19).

3. *Preservation, birthplace of Abraham Lincoln.*—This fund consists of an endowment given by the Lincoln Farm Association, and the interest thereon is available for preservation of the Abraham Lincoln National Historical Park, Ky. (16 U. S. C. 211, 212).

DEPARTMENT OF JUSTICE

FEDERAL PRISON SYSTEM

COMMISSARY FUNDS, FEDERAL PRISONS (TRUST REVOLVING FUND)

Commissaries are operated for the inmates as an earned privilege. The profits received from the sale of candies, tobaccos, toiletries, etc., are used for general welfare and recreational items for the inmate. Sales for 1960 are estimated at $1,810,000. Adequate working capital is assured from retained earnings.

OFFICE OF ALIEN PROPERTY

LIMITATION ON SALARIES AND EXPENSES, OFFICE OF ALIEN PROPERTY

NOTE.—The supporting detail of the above item is shown in the Department of Justice chapter in part II, p. 765.

ALIEN PROPERTY FUND, WORLD WAR II (TRUST REVOLVING FUND)

Seized property in the United States, of the governments or nationals of Germany and Japan, vested in the name of the Attorney General, is prepared for liquidation as soon as practicable (50 U. S. C. app.). During 1958 no transfers were made to the war claims fund, but a $5 million transfer is planned for 1959. This will raise the total transfer to $230 million. In 1958, $3.1 million in claims and settlements were paid and it is anticipated that $5.5 million will be paid in 1959 and $12 million in 1960. Interest in vested property is estimated to be $185.9 million at June 30, 1960, decreasing $2.7 million from 1959 and $18.3 million from 1958.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate

Alien Property Fund, Philippines, World War II (Trust Revolving Fund)

Enemy-owned property in the Philippines is administered for the Philippine Government by the Office of Alien Property in the same manner as funds for World War II properties (Executive Order 10254). During 1958 no transfers were made to the Philippine Government; it is anticipated that $1.2 million will be transferred in 1959 and $2.5 million in 1960. The following statements include the United States dollar equivalent of currencies of the Philippines which become available without dollar purchase.

[2] Subject to return of property and payment of debt claims under the provisions of the Trading With the Enemy Act, and transfer of the remainder to the Philippine Government under the Philippine Property Act of 1946.

International Claims Settlement Act, Title II, Fund

Property in the United States of the governments or nationals of Bulgaria, Hungary, and Rumania, seized pursuant to title II of the International Claims Settlement Act of 1949 (22 U. S. C. 1621), has been vested in the name of the Attorney General like property seized from the governments and nationals of Germany and Japan. As of June 30, 1958, a total of $25.2 million has been vested and liquidated. Funds thus realized are earmarked for payment of war damages and nationalization claims assertable by United States nationals against Bulgaria, Hungary, and Rumania. A total of $21.6 million already has been covered into the United States Treasury.

Total financing	68,658	76,500	76,500

These trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death and for fines and penalty payments. In 1958 receipts were $17,000 and interest was $21,843 (33 U. S. C. 908; 31 U. S. C. 725; 33 U. S. C. 944). Receipts are used to pay additional compensation for second injuries resulting in permanent total disability and to provide maintenance for employees undergoing vocational rehabilitation. In addition, under the subactivity Administration of rehabilitation, provision is made for the costs of necessary rehabilitation services not otherwise available to disabled longshoremen and harbor workers.

Private organizations request and finance in advance special statistical studies. During 1959, the Bureau will collect and analyze store inventory prices for the American Retail Federation; maintain a consumer price index for the city of Milwaukee; maintain a bituminous mine supply price index for the National Coal Association; complete the planning phase of a survey of mathematicians employed in private industry for the Mathematical Association of America; and provide statistical training for a foreign trainee for the Institute of International Education (29 U. S. C. 9a, 9b).

1. *Benefit payments.*—The Social Security Act provides disability insurance benefits for certain disabled individuals and their dependents. An amount equal to one-half of 1% of wages paid and three-eighths of 1% of self-employment income is deposited to this fund for benefit payments and administrative expenses. The excess of income over outgo and annual interest are invested in Government securities.

2. *Administration.*—The Secretary of Health, Education, and Welfare determines, at the end of each year, that portion of the administrative expenses of the Department of Health, Education, and Welfare which is a proper charge to this fund. The amount shown herein for the administrative expenses includes interest on the unpaid charges and is subject to further refinement of the processes for allocating costs between the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund (42 U. S. C. 401).

3. *Payments to railroad retirement account.*—Payments are made between this account and the Railroad Retirement Account so as to place these funds in the same position in which they would have been if railroad employment had been included under social-security coverage.

The status of the fund is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Investments in U. S. securities at beginning of year (par)	$325,363,000	$1,054,544,000	$1,610,000,000

Under the Federal old-age and survivors insurance system, workers, employers and self-employed individuals make annual contributions in the form of taxes on earnings toward the benefits which will be payable when the worker retires or when he dies. These contributions were increased by one-half of 1% to a combined total paid by employer and employee of 4½% on January 1, 1959, and will be increased by another 1% January 1, 1960. An amount equal to the annual contributions is deposited in this trust fund for benefit payments and administrative expenses, part of which is being used for construction of a building to house the Bureau of Old-Age and Survivors Insurance. Any excess of income over outgo together with annual interest is invested in Government securities (42 U. S. C. 401).

Payments are made between this trust fund and the railroad retirement account so as to place this fund in the same position in which it would have been if railroad employment after 1936 had been included in social security coverage (45 U. S. C. 228E).

The status of the fund is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*

Under the Social Security Act all moneys deposited by a State agency from a State unemployment fund or by the Railroad Retirement Board to the credit of the railroad unemployment insurance account as well as transfers to the Federal unemployment account, are held in the unemployment trust fund. Amounts in the fund which are not required to meet current withdrawals are invested in Government securities (42 U. S. C. 1104).

The status of the fund is fully disclosed in the program and financing schedule.

The June 30, 1958, balance of $7,765,427,995 is distributed as follows:

State unemployment trust accounts	$7,353,729,497
Railroad unemployment insurance account	170,132,197
Federal unemployment account	202,034,219
Undistributed (for later credit to the State and Federal accounts)	39,532,082
Total	7,765,427,995

The Federal unemployment account is maintained at $200 million in order to make loans to States whenever benefit payments made by any State seriously deplete the balance in its unemployment trust account. Interest and repayments may increase the balance above $200 million. In 1958, the major part of the administrative expenses of the Bureau of Employment Security, Department of Labor, were paid from this account. The Federal unemployment account's financial activity for 1958 showed:

Balance brought forward, July 1, 1957	$205,380,247
Outgo: Loans	−2,635,000
Administrative expenses, Bureau of Employment Security	−6,078,600
Income: Interest	5,367,572
Balance carried forward, June 30, 1958	202,034,219

1–6. *Foreign claims settlement.*—The Foreign Claims Settlement Commission is authorized to adjudicate claims of American nationals against Bulgaria, Hungary, Italy, Rumania, Soviet Union, and Yugoslavia. Upon certification by the Commission, the Secretary of the Treasury is authorized to make payments on awards. Final payments on Yugoslav claims are expected to be made in 1959 (64 Stat. 12 and 69 Stat. 562).

7. *Losses in melting gold.*—Out of the receipts to be covered into the Treasury under section 7 of the Gold Reserve Act of 1934, an amount is made available sufficient to cover the difference between the volume of gold as carried in the general account of the Treasurer of the United States and the volume of such gold after melting and refining (48 Stat. 1061).

8. *National defense conditional gift fund.*—The Secretary of the Treasury accepts, on behalf of the United States, conditional gifts of money or other tangible property to be used for a particular defense purpose. Intangibles other than money are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which best effectuate the intent of the donors (68 Stat. 566).

9. *Payment of pre-1934 bonds of the Government of the Philippines.*—This trust account provides for payment of principal and interest on outstanding bonds of the Philippines, its provinces, cities, and municipalities issued prior to May 1, 1934, under authority of acts of Congress. The value of unmatured outstanding bonds is $4,020,850 (22 U. S. C. 1393 (g) (5)).

10. *Payment of unclaimed moneys.*—Payments are made to individuals who establish their right to moneys held in trust pending claims of owners.

11. *Unclaimed moneys of individuals whose whereabouts are known.*—Amounts are held in trust awaiting settlement of claims (31 U. S. C. 725).

Matured obligations of the District of Columbia.—Funds from inactive accounts are transferred to this account to meet matured obligations of the District of Columbia when and if presented (31 U. S. C. 725s). As of June 30, 1958, there was a balance of $8,176 in the fund.

To promote the education of the blind.—The $250,000 uninvested credit on the books of the Treasury is an unexpendable endowment fund established to promote the education of the blind in the United States. A permanent annual appropriation of $10,000, being equivalent to 4% on the principal, is paid to the American Printing House for the Blind (20 U. S. C. 101).

INTRODUCTION TO PART IV

Part IV of the budget contains special analyses of budget data and Federal programs. These analyses supplement material appearing in other parts of the budget. Most of the analyses include explanatory material which expands and elaborates these introductory notes.

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

Special analysis A presents information on the flow of money between the public and the Federal Government as a whole, including both Federal funds and trust (and deposit) funds. In addition, certain transactions of enterprises which are sponsored by the Government are included. Major intragovernmental and noncash transactions are excluded in this consolidation. This analysis also presents a reconciliation with Treasury cash deposits and withdrawals as reported in the Daily Statement of the United States Treasury. The information here is the basis for table 5 of part I, which summarizes the data for fiscal year 1960 only.

ANALYSIS OF BUDGET RECEIPTS

Special analysis B presents details on the budget receipts summarized in table 1 of part I. It includes a statement explaining the receipt estimates, together with a table giving a classification of receipts by source. The figures include receipts of *both* the general fund and the special funds. The text pertaining to taxes, customs, and refunds is prepared by the Treasury Department.

ANALYSIS OF THE BUDGET BY FUNCTION AND AGENCY

Special analysis C gives the details for the functional classification of new obligational authority and expenditures used in the budget message and in certain tables of part I. It is compiled by regrouping the figures found in the chapter summaries of part II. The code numbers listed in the chapter summaries are the key to the grouping found in this analysis.

CHARACTER ANALYSIS OF BUDGET EXPENDITURES

Special analysis D analyzes budget expenditures in terms of the duration and nature of the benefits derived. Expenditures of an *investment* type are shown in two major categories—one for acquisition and improvement of Federal assets, and the other for developmental purposes such as additions to State, local, and private assets, and expenditures for research, education, and health. Expenditures yielding *current* benefits are also grouped in two major categories—one for aids and special services to various groups, and the other for the remaining current operating expenses. No adjustments are made for depreciation, obsolescence, allowances for potential losses on loans, and other items not reflected in current expenditure data.

ANALYSES OF CERTAIN PROGRAM EXPENDITURES

Special analysis E gives detailed information on the major Federal credit programs involving direct loans, loan insurance, and loan guaranties. It provides data on commitment authority, commitments, expenditures, repayments, and outstanding loans, guaranties, and insurance.

Special analysis F provides an analysis of the construction activities of the Federal Government. It presents detailed information on direct Federal public works and Federal grants and loans for public works. It gives summary information on Federal financial assistance for certain international public works, semipublic works, and construction by private business and individuals.

Special analysis G covers Federal financial assistance to State and local governments. Three types of Federal assistance are included—direct grants-in-aid, shared revenues, and loans and repayable advances.

Special analysis H summarizes Federal expenditures for research and development. It includes both the performance of research and the construction, improvement, and equipping of research facilities. Data on Federal support of scientific training programs are appended.

Special analysis I presents the current and recommended budget levels of the principal statistical programs of the Federal Government.

Special analysis J presents a broad picture of the scope and responsibilities of the directly operated Federal medical, hospital, and domiciliary programs, and of supplemental care of Federal legal beneficiaries through contractual arrangements. It provides information on each agency program in detail, and includes data for clinical research, construction, and in-hospital training and for related Federal grant programs.

SELECTED INVESTMENTS AND INTERFUND TRANSACTIONS

Special analysis K sets forth certain investments and interfund transactions which are not reflected in the expenditures or receipts shown elsewhere in the budget. The first two groups of these are the investments by revolving and trust funds in United States Government securities (both Treasury issues and the securities of wholly owned Government enterprises), and the net borrowing or repayment of debt by wholly owned enterprises (other than their debt to the Treasury). The totals of these transactions, while not a part of budget expenditures or receipts, affect the financing requirements of the Government as a whole, and therefore are included in computations shown in table 4 of part I. The other group of transactions included in this table constitutes transfers by the revolving funds to the general fund, representing the return of capital or the distribution of earnings; such transfers are excluded from budget expenditures and budget receipts.

HISTORICAL COMPARISON OF BUDGET RECEIPTS AND EXPENDITURES

Special analysis L presents a 10-year comparison of budget receipts and expenditures. The receipts are classified by source and the expenditures by function. A technical note sets forth the change in classifications since the 1959 budget. As in special analysis C, the code numbers appearing in the chapter summaries of part II are the key to the grouping of items in the expenditure section of this analysis.

Special Analysis A

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The consolidated budget, trust fund, and other transactions of the Federal Government are estimated to show a balance in 1960, after 2 years in which payments to the public exceeded receipts from the public. (For a detailed description of the coverage, use, and limitations of this concept of Federal income and outgo, see pp. 931–932 of this analysis.)

Federal receipts from the public are estimated to exceed payments to the public by $0.6 billion, compared with an estimated excess of payments of $13.2 billion in 1959. Receipts are expected to rise to $93.5 billion, $11.9 billion higher than in the current fiscal year. Payments are estimated at $92.9 billion, a decrease of $2.0 billion from 1959.

The marked change from a large excess of cash payments to the public in 1959 to an excess of cash receipts from the public in 1960 reflects the economic recovery now in process. The improved budget outlook accounts for most of the change; another factor is the shift of the trust funds from an estimated total excess of expenditures over receipts of $1.3 billion in 1959 to a net accumulation of $0.2 billion in 1960. (For trust fund receipts and expenditures, refer to Trust Funds, part III of this document, especially pp. 879–886.)

[1] Since 1954, includes adjustment for change in public debt interest checks, coupons, and accruals outstanding.

[2] Excludes deposit funds of Government-sponsored enterprises which are allocated by major function.

[3] In 1957 and prior years the Government's payment as employer was made in a lump sum to the Civil Service Commission and was not included in any functional category as a payment to the public. From 1958, the individual agency payments are included in the applicable functional category, but the total is deducted from payments in a lump sum.

[4] Since 1954, excludes that part of clearing account which is for public debt interest checks, coupons, and accruals outstanding.

SPECIAL ANALYSIS A—Continued

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC—Continued

Federal receipts from the public by major source and payments to the public by major function: 1948–60.—From 1948 to 1960, total Federal receipts from and payments to the public will have increased at a faster rate than budget receipts and expenditures, reflecting both the larger size of existing trust fund programs (particularly old age and survivors insurance) and the creation of new trust funds, such as those for highways and for the secondary market operations of the Federal National Mortgage Association. Both receipts from and payments to the public in 1960 will be more than double the amounts in each of the years 1948, 1949, and 1950.

The largest increases in receipts from the public since 1948 are from income taxes. Individual income tax receipts will have risen by $21.4 billion and corporate income tax receipts by $11.8 billion since 1948, both more than doubling. Employment tax receipts are estimated to increase $8.7 billion over 1948 and reach $11.1 billion in 1960, over 4½ times the 1948 level. This increase reflects (1) rate and base increases in employment taxes, (2) the wider extension of social security coverage, and (3) generally higher incomes.

With two exceptions, payments for every function of the Federal Government will be higher in 1960 than in 1948. The exceptions are international affairs and finance, and veterans services and benefits, for which high expenditures in 1948 reflected special post World War II conditions. In absolute amounts, the largest increases since 1948 are $32.9 billion for major national security and $15.9 billion for labor and welfare. The largest relative changes are for commerce and housing and for agriculture and agricultural resources. Outlays for commerce (including highways) and housing in 1960 are estimated to be 12 times the 1948 total while payments for agriculture will have increased 11 times from the exceptionally low 1948 amount.

Comparison with the budget.—The excess of receipts from the public in 1960 differs from the budget surplus primarily because (1) budget expenditures for accrued interest on savings bonds exceed the interest paid out on redeemed bonds, and (2) trust fund receipts exceed trust fund expenditures. As in the budget, income taxes provide the largest portion of cash receipts from the public and cash payments to the public for major national security far exceed payments for any other function.

Federal receipts from and payments to the public exceed comparable budget totals for commerce and housing, primarily because of the highway-related gasoline and fuel taxes credited to, and the expenditures from, the highway trust fund. Similarly, receipts and payments for labor and welfare exceed budget totals substantially, because of the employment taxes and benefit payments of the social security trust funds. For interest, on the other hand, cash payments to the public are considerably smaller than budget outlays, primarily because a large amount, estimated to be $1.3 billion for 1960, is paid by the Treasury to trust funds on their holdings of public debt securities and does not go to the public directly.

Total payments	92,875	77,030	15,846
Excess of receipts	626	70	556

Federal net cash borrowing from the public.—The amount of Federal net cash borrowing from the public (or net repayment of such borrowing) is affected primarily by the excess of payments to (or receipts from) the public, and also varies with changes made in the Treasury's cash balances. Receipts from the exercise of monetary authority (mostly seigniorage on silver), which are not included in cash receipts from the public, provide a relatively small additional amount of revenue that is available.

FEDERAL GOVERNMENT NET CASH BORROWING FROM THE PUBLIC

[In millions]

Description	1958 actual	1959 estimate	1960 estimate
Excess of Federal payments to (−) or receipts from the public	−$1,520	−$13,248	$626
Receipts from exercise of monetary authority	59	60	60
Increase (−) or decrease in cash balances	−4,299	4,672	
Federal cash borrowing (−) or repayment of cash borrowing	−5,760	−8,516	686

The figures shown for net cash borrowing from the public include not only the change in Treasury issues of United States Government securities held by the public, but also the change in securities issued to the public by Government agencies and Government-sponsored enterprises. Changes in the public debt that do not represent direct cash borrowing or repayment of borrowing from the public are excluded. Major examples of such noncash debt transactions are the issuance of United States Government notes and securities to the International Monetary Fund and to the trust funds.

[1] From table 4 in part I of this document.
[2] Includes the Federal National Mortgage Association secondary market operations and (until Jan. 1, 1959) the Federal intermediate credit banks.
[3] Includes accrued interest and noncash adjustments other than the change in the clearing account.

Coverage.—This analysis presents information on the flow of money between the public and the Federal Government as a whole, representing, in effect, a consolidated cash statement of Federal transactions—other than borrowing—with the public. The public is defined to include individuals, banks, other private corporations and associations, unincorporated businesses, the Federal Reserve System, the Postal Savings System, State and local governments, foreign governments, and international organizations.

Federal cash receipts from and payments to the public include the transactions of trust and deposit funds (which are not fully owned by the Federal Government) as well as the Federal funds included in budget receipts and expenditures. (For a detailed description of the various types of funds see the introductions to part I and part III.) Major intragovernmental transactions which are reported as both expenditures and receipts of the funds being consolidated are eliminated. These major intragovernmental transactions are (1) payments between Federal funds, such as interest paid to the general fund by the Commodity Credit Corporation on its borrowing from the Treasury; (2) payments between Federal funds and trust funds, such as interest paid to the old-age and survivors insurance trust fund by the general fund on United States securities held by the trust fund; and (3) payments between trust funds, such as payments by the old-age and survivors insurance fund to the railroad retirement account.

Receipts of the Government from the exercise of monetary authority (mostly seigniorage on silver) do not represent cash received from the public and are therefore also excluded in this consolidation.

DERIVATION OF FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

[1] From table 1 in part I of this document.
[2] From table 10 in part III of this document.

In this analysis the net expenditures of five Government-sponsored enterprises—the Federal Deposit Insurance Corporation; the Federal home loan banks; the Federal land banks; the banks for cooperatives; and beginning January 1, 1959, the Federal intermediate credit banks—are estimated from their security transactions. Both their net investment in United States securities and net redemption of their own obligations indicate net receipts from operations, while their net cashing of United States securities and net sales of their own obligations indicate net expenditures. Also included on a net basis in this analysis, but as part of trust fund expenditures, are the transactions of the Federal National Mortgage Association secondary market operations (an additional Government-sponsored enterprise) and, from January 1, 1957, to January 1, 1959, the transactions of the Federal intermediate credit banks.

Budget expenditures, which are on a "checks-issued" basis, include some noncash transactions which are outstanding at the end of the year or are of an accrual nature. In deriving Federal payments to the public, these noncash items are deducted from budget expenditures in the year of accrual of the obligation. They are later included as payments in the year when the payment is made in cash. The major items of this type are (1) United States securities sometimes issued in payment of obligations and their redemption for cash at a later date (an example is the portion of the additional United States subscription to the

SPECIAL ANALYSIS A—Continued

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC—Continued

International Monetary Fund scheduled for 1959 represented by United States Treasury notes which will be redeemed in later years), (2) interest currently accruing on savings bonds and the interest which is paid in cash as the bonds are redeemed, and (3) net changes in the clearing accounts for checks, public-debt interest, and related items which are outstanding at the end of each year. In any given year the aggregate of the accruals may be larger or smaller than total disbursements for previously accrued items.

Use and limitations.—Federal Government receipts from and payments to the public data are more comprehensive than the budget data and have particular value in evaluating the impact of Federal transactions on the economy. For example, Federal receipts from the public classified by source indicate the sectors of the economy or the kinds of transactions other than borrowing which provide funds for the Government. Federal payments to the public by function indicate the relative importance of the major Government programs in terms of total cash outlays. The excess of receipts from the public or payments to the public tends to reflect the net impact of Federal financial transactions on the incomes of the public as a whole.

However, the scope and impact of Federal transactions are somewhat understated, because the totals include only the net receipts or spending of wholly owned and of Government-sponsored enterprises. These enterprises receive interest payments, repayments of loans, and other receipts from operations which are deducted from new loans and other disbursements in measuring the net expenditures of the enterprises. Thus, for enterprises whose receipts exceed expenditures, the entry is a negative expenditure. Since the totals of receipts and payments are reduced by equal amounts, the excess of Federal receipts from or payments to the public is not affected.

Users of the data in this analysis should recognize that no single measure can indicate all of the important economic effects of the many Federal financial activities. For example, a rapid expansion in new appropriations and in Government orders could stimulate a rise in business activity long before the authorized funds were paid to the public. Likewise, the enactment of a tax measure or even the expectation of a change in tax rates may affect business planning or activity well before the cash flows between the Federal Government and the public occur. Federal guaranties and insurance of private loans (summarized in special analysis E) may also affect activity in the economy, even though they normally entail only minor Government expenditures. Certain other contractual arrangements, such as the lease purchase of Government buildings, may have economic effects only partially measured by the Government payments made in any one year. Aside from the significance of interest payments to the public, the management of the public debt is a further important factor which has particular impact in the money and credit markets of the economy.

Reconciliation with Treasury cash deposits and withdrawals.—The daily statement of the Treasury presents a consolidated cash statement of Treasury operating transactions similar in general concept to Federal receipts from and payments to the public. However, it is limited in coverage to those transactions affecting the accounts of the Treasurer of the United States.

RECONCILIATION OF FEDERAL GOVERNMENT RECEIPTS FROM THE PUBLIC WITH TREASURY CASH DEPOSITS

[In millions]

Description	1958 actual	1959 estimate	1960 estimate
Federal receipts from the public	$81,893	$81,651	$93,502
Receipts from exercise of monetary authority	59	60	60

Equals: Treasury cash deposits	82,094	81,711	93,562

RECONCILIATION OF FEDERAL GOVERNMENT PAYMENTS TO THE PUBLIC WITH TREASURY CASH WITHDRAWALS

[In millions]

Description	1958 actual	1959 estimate	1960 estimate
Federal payments to the public	$83,413	$94,899	$92,875
Less—			
Payments to the public not reflected in accounts of the Treasurer of the United States (net):			
From cash held outside Treasury [1]	−140	323	
From proceeds of sales in the market of agency obligations and United States securities [2]	506		
Net difference in actual year due to reporting method	141		
Equals: Cash withdrawals from Treasury	83,188	94,577	92,875

[1] Represents increase (−) or decrease in Government agencies' balances outside Treasury.

[2] Includes only net sales by Government agencies and trust funds which were not reflected in the accounts of the Treasurer of the United States.

Receipts from exercise of monetary authority, since they affect the accounts of the Treasurer, are included in Treasury cash deposits. As indicated earlier, these receipts are omitted from Federal receipts from the public, since they do not represent cash received from the public.

The net difference due to reporting method applies equally in the reconciliation of receipts with deposits and payments with withdrawals. This arises principally from the method used to adjust for checks being cleared. Instead of adjusting receipts and payments separately, the net change in clearing accounts is deducted from payments. This procedure yields an accurate measure of the excess of receipts or payments. However, it still leaves a further adjustment to be made to both receipts and payments to reconcile them with cash deposits and withdrawals in the actual year.

The amounts shown for Federal payments to the public are more inclusive than cash withdrawals because payments by Government agencies from their own cash balances or from accounts in commercial banks are not shown in the Treasurer's account. These payments are measured by net changes in cash held outside the Treasury and by net proceeds realized by Government agencies and trust funds from sales of securities in the open market that were not reflected in the Treasurer's account.

Special Analysis B

ANALYSIS OF BUDGET RECEIPTS

Estimates based on existing and proposed legislation

This special analysis provides supporting detail for the figures on budget receipts by source which are included in the tables of the budget message and in table 1 of part I.

The estimates of receipts from taxes and customs for the current and ensuing fiscal years are prepared in December of each year by the Treasury Department. In general, the estimates of miscellaneous receipts are prepared by the agencies depositing the receipts in the Treasury.

The estimates are based on the assumption that the expansion in economic activity which resumed in the second quarter of calendar year 1958 and was strongly evident in the third and fourth quarters will continue through the period underlying fiscal year 1960 receipts. It is also assumed for fiscal year 1960 that legislation will be enacted extending corporation income and certain excise tax rates at their present levels for a year beyond June 30, 1959, as recommended by the President.

Detailed estimates of budget receipts under both existing and proposed legislation are contained on pages 936 to 939.

BUDGET RECEIPTS

Budget receipts in the fiscal year 1960 are estimated to be $77.1 billion, an increase of $9.1 billion over the amount estimated for the fiscal year 1959 and $8.0 billion over actual receipts of the fiscal year 1958. Receipts in 1960 are thus estimated to attain a record level, exceeding the previous peak of $71.0 billion achieved in the fiscal year 1957.

RECEIPTS BY MAJOR SOURCES

Actual receipts for 1958 and estimated receipts for 1959 and 1960 are compared by major sources in the following table. The amount shown for each receipt source is the net amount after deduction of refunds and transfers to trust funds.

Net budget receipts

[In millions]

Source	1958 actual	1959 estimate	1960 estimate	Increase (+) or decrease (−), 1960 over 1959
Individual income taxes	$34,724	$36,900	$40,700	+$3,800
Corporation income taxes	20,074	17,000	21,448	+4,448
Excise taxes	8,612	8,467	8,945	+478
Employment taxes	333	328	340	+12
Estate and gift taxes	1,393	1,365	1,415	+50
Taxes not otherwise classified	6	9	9	
Customs	782	840	900	+60
Miscellaneous receipts	3,193	3,091	3,343	+252
Net budget receipts	69,117	68,000	77,100	+9,100

In the estimates for 1959 and 1960, the individual income tax continues to be, by far, the most important tax source. Revenues from individual income taxes are about double the corporation income tax; together, the two income taxes are estimated to account for more than 80% of receipts in 1960.

The corporation income tax, although producing substantially less revenue than the individual income tax, provides a larger share of the increase in receipts estimated for fiscal 1960. Receipts from the corporation income tax are estimated to be $4,448 million greater in 1960 than in 1959 and thus exceed the substantial rise of $3,800 million estimated for individual income tax receipts. Significant increases in receipts are also estimated for excise taxes and miscellaneous receipts, primarily a nontax source. Some increase is expected from all the major revenue sources in 1960.

The contribution of each tax source to the increase in net budget receipts in 1960 is substantially different when the comparison is made with the last actual year, 1958, instead of with the estimates for 1959. The individual income tax provides almost $6.0 billion of the total increase of $8.0 billion estimated for 1960 over actual receipts in 1958, the corporation income tax accounts for $1.4 billion, excise taxes for $0.3 billion, and miscellaneous receipts for $0.2 billion.

Estimated budget receipts for 1960 are $6.1 billion greater than the peak level of actual receipts reached in the fiscal year 1957. The estimated rise in receipts from the individual income tax accounts for $5.1 billion or 84% of the total increase. The increase in miscellaneous receipts of $0.6 billion is next most important. The rise in corporation income tax receipts is less than $300 million.

Individual income taxes.—Individual income tax receipts in 1958 fell $896 million from the level of the preceding year. Reflecting the rise in personal incomes which commenced in the second quarter of the calendar year 1958, receipts in the fiscal year 1959 are estimated to rise $2,176 million over the depressed 1958 level and to rise further by $3,800 million in fiscal 1960 to a total of $40,700 million. The 1-year increase of $3,800 million estimated for 1960 exceeds any year-to-year gain since 1952. But the 2-year rise of $5,976 million for 1959 and 1960 falls short of the $6,873 million reached in 1956 and 1957.

Corporation income taxes.—Receipts of corporation income taxes in each fiscal year are determined primarily by corporate profits of the calendar year ending in the fiscal year. Thus receipts in the fiscal year 1959 largely reflect calendar year 1958 profits, and receipts in the fiscal year 1960, calendar year 1959 profits. Corporate profits declined sharply in the fourth quarter of the calendar year 1957 and the first half of the calendar year 1958. Substantial gains have been reported in profits for the third quarter of 1958 and are indicated for the fourth quarter also, but it is expected that the average for the calendar year 1958 will be substantially below the calendar year 1957 average. As a result, corporation income tax receipts are estimated to decrease from $20,074 million in fiscal 1958 to $17,000 million in fiscal 1959.

It is estimated that profits in the calendar year 1959 will increase over second half 1958 profits and that the average for 1959 will be substantially greater than the calendar year 1958 average. Receipts in fiscal year 1960 are expected to recoup all of the decrease estimated for fiscal 1959 and to rise to $21,448 million, thus exceeding the 1959 estimate by $4,448 million and actual receipts in 1958 by $1,374 million.

The 1-year gain estimated for fiscal 1960 exceeds the increase for any actual year not affected by legislation. However, comparisons of fiscal years are obscured by variations in the collections data caused by such factors as the acceleration of payments in the 1951–55 period.

SPECIAL ANALYSIS B—Continued

ANALYSIS OF BUDGET RECEIPTS—Continued

Estimates based on existing and proposed legislation—Continued

In terms of the profits on which the taxes are levied, the rebound estimated to occur in calendar year 1959 as compared to 1958 will have been exceeded by the profit recoveries of both calendar years 1950 and 1955.

Excise taxes.—The yield of the excise taxes is shown in the following table:

Excise tax receipts

[In millions]

Source	1958 actual	1959 estimate	1960 estimate	Increase (+) or decrease (−), 1960 over 1959
Alcohol taxes	$2,946	$3,046	$3,119	+$73
Tobacco taxes	1,734	1,802	1,848	+46
Taxes on documents, other instruments, and playing cards	109	117	117	
Manufacturers' excise taxes	3,974	3,907	5,079	+1,172
Retailers' excise taxes	342	343	358	+15
Miscellaneous excise taxes	1,741	1,421	1,353	−68
Undistributed depositary receipts and unapplied collections	−33	51	67	+16
Gross excise taxes	10,814	10,687	11,941	+1,254
Deduct—				
Refunds of receipts	86	89	90	+1
Transfer to highway trust fund	2,116	2,130	2,906	+776
Net excise taxes	8,612	8,467	8,945	+478

Gross excise taxes, before transfers to the highway trust fund and before refunds, are estimated to amount to $10,687 million in fiscal year 1959, a decline of $127 million from actual receipts in 1958. The loss in receipts from the repeal of the taxes on transportation of property and oil by pipeline, $338 million, and from other legislation of less revenue importance is greater than the overall decline estimated for 1959.

In fiscal year 1960 gross excise taxes are estimated to increase by $1,254 million over fiscal year 1959, to a total of $11,941 million. A major part of this increase is due to the proposed increase in the taxes on gasoline and diesel fuel from 3 cents to 4½ cents per gallon effective July 1, 1959, almost all of which accrues to the highway trust fund and which therefore will not affect net budget receipts. Increased net budget receipts will result from the proposed new tax on jet fuel of 4½ cents per gallon effective July 1, 1959, and from the proposal to retain all revenues from the tax on aviation gasoline in the general fund.

A substantial increase in receipts in 1960 is attributable to the assumption that the increase in business activity which started in 1958 will continue throughout the period affecting 1960 receipts. Receipts from the tax on passenger automobiles are estimated to increase substantially in the fiscal year 1960 as automobile sales in the calendar years 1959 and 1960 are expected to surpass very appreciably the greatly reduced level of calendar year 1958. Moderate gains are expected in the revenue from the alcohol and tobacco tax groups and from telephone taxes. Increases, some of which are substantial on a relative basis, are estimated for virtually all taxes where revenues are not adversely affected by legislation. The full year effect of the repeal of the taxes on transportation of property and oil by pipeline, effective August 1, 1958, causes, in addition to the $338 million decline from 1958 to 1959, a further decline of $160 million in fiscal 1960. Other legislation is responsible for less important declines in revenue.

On a net basis after deductions for transfers to the highway trust fund and for refunds, net excise taxes are estimated to show a relatively small decline of $145 million in fiscal 1959, but then rise by $478 million to $8,945 million in fiscal year 1960.

Employment taxes.—The yield of the employment taxes is shown in the following table:

Employment tax receipts

[In millions]

Source	1958 actual	1959 estimate	1960 estimate	Increase (+) or decrease (−), 1960 over 1959
Federal Insurance Contributions Act and Self-Employment Contributions Act	$7,733	$8,224	$10,216	+$1,992
Railroad Retirement Tax Act	575	560	575	+15
Federal Unemployment Tax Act	336	332	344	+12
Gross employment taxes	8,644	9,116	11,135	+2,019
Deduct—				
Refunds of receipts	4	4	4	
Transfers to Federal old-age and survivors insurance trust fund	6,870	7,354	9,276	+1,922
Transfer to Federal disability insurance trust fund	863	870	940	+70
Transfer to railroad retirement account	575	560	575	+15
Net employment taxes	333	328	340	+12

Receipts from the Federal Insurance Contributions Act and the Self-Employment Contributions Act are estimated to increase by $491 million to $8,224 million in fiscal year 1959 partly because of an estimated increase in the level of taxable wages but principally because of the increase in the tax rate of ¼% each on employers and employees and the increase in the maximum amount taxable from $4,200 to $4,800 effective January 1, 1959. In fiscal 1960 an increase of $1,992 million is estimated as a result of higher income levels, the full-year effect of the January 1, 1959, changes in law, and the part-year effect of a further increase in the tax rate of ½% each on employers and employees effective January 1, 1960.

Small declines and recoveries in 1959 and 1960, respectively, are estimated for receipts from the Railroad Retirement Tax Act and the Federal Unemployment Tax Act.

Estate and gift taxes.—Receipts are expected to decline somewhat in 1959 and then to increase in 1960. Because of the length of time after date of death permitted in the filing of estate tax returns, receipts do not immediately reflect changes in security and other asset values.

Customs.—Customs receipts are estimated to increase in both 1959 and 1960 as taxable imports increase as a result of expanded business activity.

Miscellaneous receipts.—The increase of $252 million in miscellaneous receipts estimated for 1960 is attributable for the most part to larger collections of interest on loans and of dividends and other earnings. It includes amounts under proposed legislation to increase charges for Government services which provide special benefits to the recipients.

Special Analysis C

ANALYSIS OF BUDGET BY FUNCTION AND AGENCY

This special analysis gives the details for the functional breakdown of new obligational authority and budget expenditures used in the budget message and in some of the tables of part I.

For each function and subfunction, data are listed by agencies. In order to find the appropriation items which make up the amounts shown for the agency, it is necessary to look in the chapter summary for that agency. Each entry in the chapter summary is coded to indicate the subfunction in which it is classified.

For purposes of this classification each appropriation account and each revolving and management fund is treated as a unit. Exceptions are made, and accounts are split into two or more categories, in only selected cases. This necessarily involves some close decisions in borderline cases, and it means that programs with secondary significance for some major functions will be included in another category because another objective predominates in the particular appropriation. Thus, to secure a comprehensive total of all Government programs related to education, for example, it would be necessary to provide a special tabulation, counting in this category some appropriations which might also be relevant to other categories.

Whereas this special analysis presents both authorizations and expenditures for major functions, subfunctions, and agencies over a 3-year period, special analysis L shows expenditures for the major functions and subfunctions over a 10-year period. Special analysis A shows Federal Government payments to the public, classified by major function. The functional categories are also used in the analyses summarizing Federal activities in public works and other construction, Federal aid to State and local governments, and Federal research and development programs.

The allowance for contingencies constitutes an additional entry in the tabulations for the years 1959 and 1960.

Special Analysis D

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES

INTRODUCTION

This special analysis is designed to contribute to a general understanding of the Federal budget by classifying Government expenditures according to (1) those which yield benefits beyond the current year and (2) those which, in the main, yield benefits within the year in which the expenditure is made.

Expenditures yielding benefits over a period of years, that is, those of an investment type, are shown in two major categories—the first for acquisition of assets by the Federal Government, and the second for other broad developmental purposes.

Expenditures which yield benefits currently are also grouped in two major categories—the first for aids and services to special groups, and the second for current operating expenses.

In each category shown in this analysis, expenditures for major national security (as defined in special analysis C) are reported separately from those for all other (civil) programs. Such a distinction is helpful in appraising the nature of the outlays, since military expenditures for assets and other developmental purposes are generally designed to achieve objectives different from civil outlays for these purposes.

Separate subcategories are also shown for expenditures for direct Federal programs and for grants-in-aid or loans to States and local governments. Special analysis G presents details on Federal aid to State and local governments and contains a table summarizing these aids according to the major categories of special analysis D.

Comparison with a capital budget.—This analysis is not intended to be a capital budget. A capital budget as prepared by some foreign governments and some State and local governments usually provides separate financing for major capital outlays. The capital outlays may be entirely excluded from the current budget of these governments or they may be amortized over a period of years by annual charges to the budget. In the United States Federal budget, however, investment items are treated in the same way as expenditures for other purposes; both types are included in arriving at the budget surplus or deficit.

A capital budget would also require annual allowances for such items as depreciation and obsolescence on existing physical assets, anticipated losses on loan programs, assets received as gifts or donated to others, and the profit or loss on sales of assets at a figure different from their book value. This analysis makes no such provision for depreciation or other changes in the value of assets. Hence, it does not indicate the extent to which annual new investment in a given year is offset by changes in the value of existing assets.

Additions to Federal assets are limited in this analysis to major outlays, such as those for public works construction and military missiles, ships, and aircraft. Such a definition of direct investment is less inclusive than the conventional accounting definition which would include increases in all claims or assets owned by the Federal Government.

Expenditures for other developmental purposes include outlays for research and development; education and health; additions to State, local, and private assets; and other programs that contribute to the general physical productivity of the economy or help increase the technical skills and knowledge of individuals. Since Federal expenditures are viewed here in terms of their effect on the economy as a whole, this analysis adopts a broader concept of developmental outlays than is generally employed in private accounting practice for capital items.

Recovery of certain types of expenditures.—A part of Federal expenditures for loans, for investment in commodity inventories, and for construction of powerplants is usually recovered by the Treasury. However, Federal expenditures for most other investment type programs are not generally expected to be recovered by specific revenues. Nonetheless, these and other developmental expenditures increase the wealth and income of the Nation both directly and indirectly, thus expanding Federal revenues over a period of years. In addition, there are some Government programs which are financed by the appropriation of part or all of the receipts collected from fees and charges for services, sale of products, and use of property related to the programs.

SUMMARY

In 1960, $30,039 million of estimated expenditures represent outlays for the acquisition and improvement of assets and for other developmental purposes, compared to $32,266 million in 1959. Current expenses for aids, services, and operations are estimated to be $46,892 million for 1960, compared to $48,406 million for 1959.

Table 1.—*Summary of investment, operating, and other budget expenditures*

[In millions]

	1958 actual	1959 estimate	1960 estimate
Additions to Federal assets:			
Civil	$3,050	$8,118	$5,363

Total	71,936	80,871	77,030
Civil	27,794	34,751	31,225
Major national security	44,142	46,120	45,805

ADDITIONS TO FEDERAL ASSETS

Expenditures representing direct investment by the Federal Government in loans and federally owned physical assets are estimated to total $23,142 million in 1960, compared to $26,149 million in 1959. The decrease from 1959 to 1960 is largely in expenditures for loans. Over three quarters of the 1960 total is for major national security programs, mostly for military equipment.

Loans.—Direct loans by Federal agencies consist primarily of loans to farmers and homeowners, to public and private agencies serving these two groups, and to foreign governments and private business. Most direct loan programs are financed on a revolving fund basis; that is, their receipts are available for further lending operations. In these cases, only the difference between disbursements and collections is included in budget expenditures. Hence, net expenditures for loans as reported in this analysis

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

reflect only a fraction of total direct Government lending activity. The Rural Electrification Administration, the Farmers' Home Administration, and a few other loan programs are by law on a nonrevolving basis, with collections going directly to miscellaneous receipts of the Treasury. This budget proposes that in the future these lending programs also be conducted on a revolving fund basis.

Net budget expenditures for loans in 1960 are estimated to be $629 million, compared to $4,693 million in 1959. Net expenditures for loans to domestic private borrowers account for $2,452 million of this estimated decrease. Net receipts from repayments of Commodity Credit Corporation loans for price support and grain storage programs are estimated at $814 million in 1960, while net expenditures of $805 million for these loans is expected in 1959. The bulk of Commodity Credit Corporation loan repayments consists of commodities acquired by the Corporation at loan value. Federal National Mortgage Association expenditures in 1959 reflect purchases of low-cost housing mortgages under the billion-dollar special assistance program enacted in the spring of 1958. In 1960 the Association expects to cover its mortgage purchases by equivalent receipts from mortgage sales and other sources. Thus, its expenditures in 1960 are expected to be $694 million below 1959.

An estimated decline of $1,574 million from 1959 to 1960 in loans to foreign borrowers is due mainly to the fact that an additional United States subscription to the International Monetary Fund is proposed for 1959, requiring a nonrecurring expenditure of $1,375 million in that year. In addition, more of the portfolio of the Export-Import Bank will be sold to private investors in 1960, thus reducing the Bank's net expenditures below the 1959 level.

Public works—sites and direct construction.—This category includes all Federal expenditures for sites and for civil public works projects, military installations, and other national security facilities, including those outside the continental United States, which are owned by the Federal Government. A summary of these and related programs is given in special analysis F.

Expenditures in 1960 for direct Federal public works are estimated to be $70 million less than in 1959. Over one-half of the 1960 amount, $1,973 million, will be for major national security public works. This includes expenditures for construction of military and atomic energy research and development facilities as well as for construction of missile launching sites and their supporting facilities. Civil public works expenditures, mainly for water resources and related development, public buildings and airways facilities, are estimated at $1,812 million in 1960, $200 million higher than in 1959. No funds are recommended to initiate construction on new water resource projects in 1960; total expenditures reflect primarily expenditures for construction presently underway, including projects previously accelerated to aid economic recovery.

TABLE 2.—*Additions to Federal assets*

[In millions]

	1958 actual	1959 estimate	1960 estimate
Loans:			
Civil	$1,130	$4,706	$649
Major national security	−11	−13	−20
Public works—sites and direct construction:			
Civil	1,252	1,612	1,812
Major national security	1,964	2,243	1,973
Major commodity inventories—net change:			
Civil	547	1,614	2,728
Major national security	568	299	190
Major equipment:			
Civil	39	80	72
Major national security	14,504	13,743	13,878
Other physical assets—acquisition and improvement:			
Civil	82	106	102
Major national security	1,546	1,760	1,756
Total additions to Federal assets	21,620	26,149	23,142

Major commodity inventories.—Net expenditures for purchases of commodities held for resale or in stockpiles are expected to be $2,918 million in 1960, $1,006 million more than in 1959. The figure for total purchases includes transportation costs, administrative expenses, and storage costs where these are normally included in costs of goods sold.

Net additions to the inventory of farm commodities held by the Commodity Credit Corporation under its farm price-support program are expected to require expenditures of $2,719 million in 1960, $1,126 million more than in 1959. Expenditures in 1960 for the stockpiling of strategic and critical materials (other than fissionable) and for purchases of defense materials are expected to decline by $109 million from the 1959 level of $299 million.

Major equipment.—Expenditures for major equipment in 1960 are estimated at $13,950 million, an increase of $127 million over 1959. These expenditures are almost entirely for major military procurement and production. Missile systems will take a larger share of 1960 procurement expenditures, and aircraft will take less. Ships and other weapons and equipment will take about the same amount as in 1959.

Purchases of office equipment, furniture and fixtures, automobiles, and similar items are not classified in this subcategory but are treated as current operating expenses.

Other physical assets—acquisition and improvement.—Expenditures for other physical assets are estimated to be $1,859 million in 1960. The major part of this amount will be used for the procurement of uranium concentrates and production of special nuclear materials and weapons by the Atomic Energy Commission. This subcategory also includes reforestation and range improvements, and real property purchased or acquired as collateral on defaulted loans.

Special Analysis D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

EXPENDITURES FOR OTHER DEVELOPMENTAL PURPOSES

The category "other developmental purposes" includes Federal expenditures which add to the productivity of the economy over a period of years but which do not directly add to Federal physical and financial assets. Programs which yield the bulk of their benefits immediately are excluded, even though they may also contribute to the longer run economic development of the Nation.

Expenditures for military research and development account for over three-fifths of the total estimated expenditures of $6,897 million in this category for 1960.

State and local physical assets.—In 1960 the Federal Government will spend an estimated $250 million for additions to physical assets of State and local governments, mainly through grants-in-aid for the construction of schools in federally affected areas, hospitals, airports, and other facilities. This amount excludes expenditures of over $3 billion in 1960 for the Federal-aid highway system; since 1957 such highway expenditures have been made from a separately financed trust fund.

Private physical assets.—Federal expenditures which directly add to privately owned physical assets consist predominantly of (1) payments and technical assistance for conservation and improvement of private farms, including payments under the soil bank to share the cost of conservation practices; (2) grants to States for the building of private hospitals and other health facilities; and (3) construction subsidies for merchant ships. Expenditures in this category are estimated at $780 million in 1960, compared to $610 million in 1959, reflecting primarily an estimated increase in the soil bank conservation reserve.

Education, training, and health.—An estimated $730 million of budget expenditures will be devoted to education, training, and health in 1960. These programs are developmental, since their purpose is to foster the knowledge, skills, longevity, and physical vigor of the population. Most of the programs are conducted through grants to State and local governments. They include school operating aid to school districts especially affected by activities of the Federal Government, grants and contributions under the National Defense Education Act of 1958, and grants to States for programs of vocational education, vocational rehabilitation, maternal and child welfare, public health, and agricultural extension work. Several closely related major items are classified in other categories—principally the veterans' education program (classified in aids and special services for veterans); the operating expenses of hospital services and medical care programs; and the training of military and civilian personnel in Government service.

Research and development.—The Federal Government also contributes to technological and economic progress through the conduct of varied programs of research and development. Expenditures for programs classified under this heading are estimated at $5,063 million in 1960, $616 million more than 1959. Major research and development emphasis in 1960 will be on missiles, space exploration, peaceful and military uses of atomic energy, and basic research. Over four-fifths of the 1960 amount will be devoted to research and development by the Department of Defense and the Atomic Energy Commission. (See special analysis H for the definition of Department of Defense research and development.) Expenditures by the newly established National Aeronautics and Space Administration for research and development in 1960 will be directed toward increasing our understanding of the earth's outer atmosphere, the moon and the planets, space radiation, and related phenomena. Extensive research on air-traffic control will go forward in 1960 under the new Federal Aviation Agency. National Science Foundation expenditures for research and development will increase in 1960, reflecting an expansion of basic research activities. Other research and development programs include health research, research in new uses of farm products, and basic agricultural research.

Table 3.—*Expenditures for other developmental purposes*

[In millions]

	1958 actual	1959 estimate	1960 estimate
State and local physical assets	$251	$301	$250
Private physical assets	547	610	780
Education, training, and health:			
Civil	519	673	717
Major national security	13	11	13
Research and development:			
Civil	472	654	807
Major national security	2,696	3,794	4,256
Engineering and natural resources surveys	64	74	73
Total expenditures for other developmental purposes	4,563	6,117	6,897

Consistent with the definition of research and development used in special analysis H, expenditures for routine testing, mapping and surveys, experimental production, information activities, and training programs are generally excluded from this category.

Engineering and natural resource surveys.—An estimated $73 million of expenditures in 1960 will be for investigations and surveys for public works programs, topographic mapping, land classification, forest investigations, and other basic surveys. The largest programs of these types are administered by the Geological Survey, the Bureau of Reclamation, the Coast and Geodetic Survey, and the Corps of Engineers.

CURRENT EXPENSES FOR AIDS AND SPECIAL SERVICES

This category—current expenses for aids and special services—contains the administrative and other operating expenses for the previously discussed investment-type programs, the costs of maintaining physical assets, and other current expenditures which primarily provide aids or special services to one or more specific economic groups.

Over four-fifths of budget expenditures for aids and special services in 1960 are for civil programs. The estimated total for these programs in 1960 is $14,483 million, a decline of $1,924 million from 1959. In addition to Federal expenditures for aids and special services, benefits accrue to various groups through tax provisions and other nonexpenditure aids which are not included in this analysis.

Agriculture.—Current expenses predominantly for the benefit of farmers consist chiefly of costs and losses arising from the price-support program and the sale of surplus commodities for foreign currencies, expenditures under the soil bank program, expenses of the International Wheat Agreement, Sugar Act payments, expenditures for removal of surplus commodities, and administrative expenses of loan programs and other aids for farmers. Current expenses for programs in this category are estimated at $2,750 million in 1960, $396 million less than in 1959,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

reflecting primarily termination of the soil bank acreage reserve.

Other major expenditures benefiting farmers which are classified elsewhere in this analysis are provided through loans, conservation payments, and construction of reclamation and other water development projects. Farmers also benefit from the school lunch program and from certain international and other programs which are designed primarily for other purposes.

Business.—The major types of current Federal expenditures primarily benefiting private business are Government payments to the Post Office to cover certain losses arising from the operation of the postal service; maritime operating subsidies and navigation aids to the shipping industry; and various aids to air navigation. Expenditures for aids to business are estimated to decline from $1,491 million in 1959 to $881 million in 1960, due largely to the increase in postal rates proposed in this budget.

Labor.—The largest current Federal expenditure benefiting labor in 1960 is for the Federal-State program of unemployment insurance and public employment offices. The Federal Government, through the Department of Labor, makes grants to the States to cover the full cost of administering these services. Expenditures classified here also include the mine safety work of the Bureau of Mines and some administrative expenses of the Department of Labor. Current expenses for aids and special services for labor in 1960 are estimated to total $342 million, compared to $744 million in 1959. The estimated decrease in expenditures for 1960 reflects primarily the expiration of the temporary program of extended unemployment insurance benefits enacted in 1958.

Homeowners and tenants.—Since loans and mortgage purchases for the benefit of homeowners and tenants are classified in this analysis as investment-type expenditures, current expenditures consist chiefly of (1) annual contributions to local authorities for low-rent public housing projects; (2) grants for the capital losses of slum clearance and urban renewal projects; and (3) the operating expense of the management and liquidation functions of the Federal National Mortgage Association. Receipts from the insurance of mortgages and saving and loan share accounts, and the earnings from holdings of mortgages and other housing loans exceed current expenditures for housing in both 1958 and 1959. Net expenditures of $1 million are estimated in 1960.

TABLE 4.—*Current expenses for aids and special services*

[In millions]

	1958 actual	1959 estimate	1960 estimate
Agriculture	$3,242	$3,146	$2,750
Business:			
Civil	1,238	1,432	817
Major national security	41	58	64
Labor	388	744	342
Homeowners and tenants	−40	−6	1
Veterans	4,898	5,037	4,921
International:			
Civil	1,310	1,394	1,412
Major national security	2,194	2,330	1,865
Other aids and special services	2,014	2,272	2,311
Total current expenses for aids and special services	15,286	16,407	14,483

Veterans.—Current expenditures for aids to veterans in 1960 are estimated at $4,921 million, $116 million below 1959. Compensation and pension benefits account for about two-thirds of the estimated 1960 total in this category. Compensation payments are made for disabilities or deaths resulting from service; pensions are paid in non-service-connected cases.

Other important current aids to veterans are hospital and medical care for veterans of all wars, and readjustment benefits primarily for those who served in the Korean conflict. The readjustments benefits include education and training for veterans who enroll in schools and colleges; vocational training on the job or farm; veterans' loan-guaranty programs; and veterans' unemployment compensation.

International.—In 1960, $3,221 million of total estimated expenditures in this subcategory will be for mutual security programs. Military assistance expenditures, estimated at $1,850 million in 1960, furnish military equipment and training; economic portions of the program, estimated at $1,371 million in 1960, help friendly nations to develop their economies and to meet the economic burdens imposed by the need for maintaining adequate defense forces. Other programs in this category include emergency famine relief abroad and the Inter-American Highway.

Other aids and special services.—Many other Federal programs involve current expenditures for aids and special services for more than one of the above groups or for other groups. The bulk of these expenditures consists of grants to help provide public assistance to those in need, including the aged, the blind, the permanently and totally disabled, and dependent children. Other major programs include grants to States to help finance low-priced school lunches, hospital operation and medical care by the Public Health Service, and various aids to Indians. Expenditures in this subcategory are expected to increase from $2,272 million in 1959 to $2,311 million in 1960.

OTHER SERVICES AND CURRENT OPERATING EXPENSES

All other Government expenditures, apart from the allowance for contingencies, are included in this final major category. In the main, the activities covered are the basic administrative operations of maintaining a military establishment, conducting foreign affairs, making and enforcing laws, collecting taxes, and managing and paying interest on the public debt. Expenditures in the category are estimated at $32,409 million in 1960, an increase of $410 million over 1959.

Current expenditures for major national security purposes, mostly for operation and maintenance of military facilities and for pay and subsistence of military personnel, dominate this category. By far the largest component of civil expenditures is interest, which accounts for about one-fourth of the total.

Repair, maintenance, and operation of physical assets.—Expenditures to repair, maintain, and operate physical assets are chiefly for military structures, equipment, and facilities; atomic energy facilities; and general-purpose public buildings. They are also for operating such other public assets as flood control reservoirs, irrigation works, power facilities, public lands, and national forests.

Federal Reserve Bank of St. Louis

Special Analysis D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

Net expenditures for civil repair, maintenance, and operation are estimated at $332 million in 1959 and $317 million in 1960. Outlays for the operation and maintenance of structures, weapons and equipment, and facilities for major national security programs are estimated to be $10,059 million in 1960, $92 million less than in 1959.

Regulation and control.—Most of the major departments and agencies and many smaller agencies have regulatory or law-enforcement responsibilities. These include the law-enforcement activities of the Department of Justice, the Treasury Department, and the judiciary, as well as the operations of the independent regulatory agencies. Expenditures for regulation and control are estimated to total $607 million in 1960, compared to $586 million in 1959.

Operation and administration of other civil activities.—All other governmentwide or multipurpose expenditures for civil programs are estimated to total $1,560 million for 1960, about the same as in 1959. These cover expenditures for the legislative branch and the conduct of foreign affairs; tax collection, public debt management, and other financing activities; central procurement and recordkeeping; and various other direct Federal programs not elsewhere classified.

Other major national security operation and administration.—These expenditures are estimated to increase from $11,744 million in 1959, to $11,770 million in 1960. They represent predominantly pay and subsistence for military personnel together with smaller but substantial expenditures for civilian reserve components, industrial mobilization, and various departmentwide activities of the Department of Defense.

Interest.—Almost all of these expenditures are for interest on the public debt. A relatively minor proportion is for interest on refunds of receipts and on certain uninvested funds deposited with the Treasury. Principally because of the higher interest rates on new securities issued to refund maturing obligations, expenditures for interest are expected to rise $495 million between 1959 and 1960.

Table 5.—*Other services and current operating expenses*

[In millions]

	1958 actual	1959 estimate	1960 estimate
Repair, maintenance, and operation of physical assets:

Special Analysis E

FEDERAL CREDIT PROGRAMS

Introduction

Federal credit programs make important contributions to the achievement of public policy objectives. As part of the Federal programs for improvement of housing and encouragement of home ownership, Federal agencies have insured or guaranteed more than 40% of all outstanding home-mortgage loans. Similarly, financial assistance in the form of credit is an important part of the Federal program of encouraging efficient family-size farm units. Government loans have helped to restore international economic stability and to promote the economic development of underdeveloped areas since World War II. Federal credit aids to domestic business are relatively specialized, being confined to small businesses, shipping, aviation, railroads, and defense contractors; they account for only a small part of business credit. In addition to influences in these specific areas, Federal credit programs exert a powerful influence on the general level of economic activity.

The impact of Federal credit programs on the Federal budget is relatively small when compared with the large amount of credit extended or guaranteed. The most important reason is the predominance of Federal insurance and guaranties of private loans in recent years, discussed more fully later in this analysis. Such programs normally involve little or no budget expenditures except in cases when defaults require the guaranteeing or insuring agencies to take over private loans. Secondly, a significant share of new commitments, both for insurance and guaranties and for direct loans, are canceled or expire without being used by the lending institution or the borrower. Finally, collections on loans in most cases directly offset disbursements on new loans, with the result that net expenditures are much less than gross expenditures; often net receipts occur.

Federal credit programs are intended to supplement rather than to substitute for private credit. They have expanded greatly in the postwar period. Direct loans outstanding increased from about $5 billion in 1945 to more than $18 billion on June 30, 1958. About one-half of this amount was domestic loans, which were only about 2% of the estimated private debt of $452 billion outstanding on that date. Private loans partly or wholly guaranteed by Federal agencies have increased nearly tenfold since 1945 to $58.5 billion, comprising 13% of total private debt.

The President has made a number of legislative recommendations affecting Federal credit programs. They are discussed in the budget message, especially on pages M15, M21–22, M52–54, M55, and M59.

Coverage of Special Analysis

This special analysis presents a broad picture both of direct Federal loans and mortgage purchases, and of Federal loan insurance and loan guaranty programs. It summarizes new commitments, disbursements and repayments, loans outstanding and guaranties in force, new commitment authority, and status of credit authority of 21 major Federal credit programs.

The analysis covers major credit programs of wholly owned Government enterprises, whether corporate or nonincorporate. Included also are major credit operations of other departments and agencies, not primarily engaged in lending activities, such as the Treasury Department loan to the United Kingdom in 1947. Loan programs of important quasi-public agencies are excluded from the tables, but are discussed separately. With this exception, the 21 programs included account for nearly all new commitments of Federal credit agencies in 1960.

Several changes in coverage have been made in this year's analysis. New railroad loan guaranties by the Interstate Commerce Commission, and direct loans for education by the Department of Health, Education, and Welfare were authorized in 1958, and are therefore included in the analysis for the first time. Liquidation of loans made by the former Reconstruction Finance Corporation is largely completed, and hence such loans are no longer included.

The analysis excludes interagency credit used to finance budget expenditures, such as borrowing from the Treasury by other Government agencies, whether for loan or other programs. Credit extended to help finance sales by the Federal Government is also generally excluded.

Summary

Total new commitments for major Federal credit programs for 1960 are estimated at $27.5 billion (table 1). Of this total, credit aids for housing and related programs, including loans and guaranties by the Housing and Home Finance Agency and the Veterans Administration, account for $21.6 billion, or nearly 80%. Credit aids for agricultural programs account for $2.7 billion, or 10%. The sharp increase in new commitments during the 3-year period arises primarily from increased guaranties by the Veterans Administration and the Federal Housing Administration in the Housing and Home Finance Agency.

Total budget expenditures	--------	--------	--------	1,118	4,693	629

As indicated in detail in table 3 below, expenditures of major credit programs will exceed receipts by $727 million in 1960, about $2.6 billion less than in 1959. The unusually high level of expenditures in 1959 arises from mortgage purchases by the Federal National Mortgage Asso-

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

ciation in the Housing and Home Finance Agency as part of the antirecession program, and price supports by the Commodity Credit Corporation in the Department of Agriculture. In 1960, decreased loan disbursements and increased repayments by these two agencies are responsible for most of the abrupt decline. These variations in expenditures for loans explain a significant part of the net change in budget expenditures during the period.

NEW COMMITMENTS

New commitments provide the best single measure of the trends in most Federal credit programs. They also provide the best indication of trends in the economic impact of these programs, since changes in the magnitude of new commitments usually lead to corresponding changes in the volume of loans disbursed by either public agencies or private lenders.

In this study, commitments are defined as approvals by Federal agencies of direct loans or of insurance or guaranties of private loans. They are shown on a gross basis, including commitments which do not result in an actual credit extension. The amounts shown are the principal amounts of the loans; for several guaranty and insurance programs these exceed the Government's contingent liability, since the unguaranteed or uninsured portions are also included.

As table 2 indicates, commitments for Federal guaranties and insurance of private loans account for nearly 80% of total new commitments in 1960. This high proportion arises from the legal requirements or administrative policy wherever possible of making direct loans or purchasing mortgages only where private credit, even with Government guaranty or insurance, is not available on reasonable terms, and from revisions in interest rates and other terms designed to make guaranteed and insured loans more attractive to private lenders.

Direct loans and investments.—New commitments of $5.7 billion for direct loans and investments in 1960 will be somewhat below the 1959 level. The Commodity Credit Corporation will be making fewer loans, mainly because of the shift in emphasis from a cotton loan to a cotton purchase program as a result of the Agricultural Act of 1958, and an anticipated decrease in 1959 crop production below 1958. Special assistance commitments by the Federal National Mortgage Association will also fall as the low-cost housing authorization was fully committed in 1959. The increase in 1960 over 1958 is accounted for by the expanded operations of the Development Loan Fund and the Export-Import Bank.

Guaranties and insurance.—New commitments for Federal guaranties and insurance of private loans are expected to increase sharply during the 3-year period, from $12.3 billion in 1958 to $21.8 billion in 1960. Commitments by the Veterans Administration loan guaranty program have been kept down because the maximum statutory interest rate has not kept pace with prevailing interest rates; the President's proposal for a more flexible rate will increase the supply of private mortgage funds available for this program. Increased housing construction in 1959 and 1960 will also increase the demand for mortgage insurance by the Federal Housing Administration.

Grand total	17,650		25,035		27,523	

Overlap in commitments.—Total commitments may overstate by $1 billion to $2 billion the net amount of credit assistance by the Federal Government, especially for housing credit. This is because two or more types of Federal assistance are sometimes provided for the same borrower or the same property at different stages in the financing process. No adjustment is made for this overlap, since the amount in any single year is difficult to estimate.

A substantial share of the housing initially constructed with the aid of mortgage insurance by the Federal Housing Administration in the past has later been sold to veterans who finance their purchases with mortgages guaranteed by the Veterans Administration. The Federal National Mortgage Association purchases only mortgages previously insured by the Federal Housing Administration or guaranteed by the Veterans Administration.

Similarly, local housing authorities normally finance most or all of the construction of low-rent units with temporary loans made or directly guaranteed by the Public Housing Administration. These temporary obligations, however, are refinanced by sale of long-term obligations to private investors on the security of Federal annual contribution contracts.

DISBURSEMENTS AND REPAYMENTS

Direct loans and investments can have a major impact on the Federal budget, since the difference between disbursements and repayments represents Federal expenditures or receipts. Federal guaranties and insurance of private loans, on the other hand, ordinarily have only a minor effect on Federal expenditures, since they result primarily in expenditures by private financial institutions.

Special Analysis E—Continued

FEDERAL CREDIT PROGRAMS—Continued

Only if they have been taken over by Federal agencies, as a result of defaults or otherwise, are they reflected in budget expenditures. Net expenditures for Federal credit assistance give, therefore, only a partial picture of the economic impact of these programs.

Net expenditures of all Government lending programs—with the exception of loans from trust funds or by quasi-public agencies—are included in the budget totals. In most cases, collections are offset directly against expenditures; in a few major programs, however, they go directly to miscellaneous receipts and, therefore, do not affect budget expenditures. In the case of foreign loans, disbursements and repayments in foreign currencies are included in the analysis but not generally in the budget.

In table 1 of this analysis, expenditures for loans are shown on a net basis; that is, they reflect loan disbursements less repayments of old loans. However, to indicate more clearly the total volume of loans, table 3 shows both gross loan disbursements and repayments (including those going directly to miscellaneous receipts of the Treasury). The difference between these two columns represents the net addition to or reduction in Federal loan assets (excluding primarily chargeoffs and recoveries) for the major credit programs during the fiscal year. To bring total expenditures for loans into line with budget expenditures, net expenditures of minor Federal programs and adjustments for repayments going directly to miscellaneous receipts and for net expenditures in foreign currencies are shown.

Net addition to loans and investments:						
Major agencies or programs	1,007		3,291		727	
Other agencies or programs	−36		1,375		−1	
Adjustment for repayments going directly into miscellaneous receipts	317		376		401	
Adjustment for net expenditures in foreign currencies	−170		−349		−498	
Total budget expenditures	1,118		4,693		629	

In both tables 1 and 3, expenditure figures represent disbursements and repayments of loans only, and exclude all income and expense items. Losses actually incurred and written off are not included, because no cash transaction is involved.

In 1960, gross loan disbursements of major Federal credit programs are estimated at $6.8 billion and repayments at $6.0 billion. Net expenditures of $727 million are thus a relatively small fraction of the gross level of activity. Of the total repayments, $401 million will go directly to miscellaneous receipts, chiefly repayments of loans by the Farmers' Home Administration, the Rural Electrification Administration, and the Treasury loan to the United Kingdom. Net expenditures of loans in foreign currencies are estimated at $498 million. Allowing for these adjustments, together with net receipts of $1 million for relatively minor credit programs, net budget expenditures for loans will amount to an estimated $629 million. (Expenditures for these minor programs in 1959 include a nonrecurring subscription of $1,375 million to the International Monetary Fund.)

Gross disbursements in 1960 will be substantially below 1959 because emphasis in the Commodity Credit Corporation's price support for cotton will be shifted from a loan to a purchase program; the Corporation's high level of disbursements in 1959 also reflects the record 1958 crop. Increased repayments to the Commodity Credit Corporation and increased sales of mortgages, including exchanges of mortgages for Government bonds by the Federal National Mortgage Association, account for most of the increased repayments during the 3-year period.

Current levels of repayments are small when compared with current disbursements in the case of active programs with predominantly long-term loans such as the Rural Electrification Administration, the International Cooperation Administration, the Development Loan Fund, or the college housing loan program of the Community Facilities Administration. On the other hand, repayments substantially exceed disbursements in the case of liquidating programs, such as the loan to the United Kingdom, and relatively inactive programs such as loans and advances under the Defense Production Act.

Neither current repayments nor net expenditures provide any measure of the ultimate recoverability of the loans made. As indicated in the detailed statements on individual programs, interest or premiums cover expenses and losses for many programs. In some, the legislative mandates make losses probable from time to time, such as the nonrecourse loans of the Commodity Credit Corporation and the loan-guaranty programs of the Veterans Administration.

Loans Outstanding and Guaranties in Force

The best index of the level of Federal credit programs over a period of years is provided by the total of the outstanding loans, guaranties, and insurance in force.

Outstanding loans by the end of 1960 are estimated at $22.6 billion, about $4.1 billion more than at the end of 1958. About 40% of the increase over the 2 years is in foreign loans by the Export-Import Bank, the International Cooperation Administration, and the Development Loan Fund. Increased housing loans, especially mortgage purchases by the Federal National Mortgage Association, account for most of the remainder. Slightly less than one-half of the loans outstanding are to foreign

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

borrowers, including the loan of $3.4 billion to the United Kingdom, loans of $3.6 billion by the Export-Import Bank, and $3.3 billion by the International Cooperation Administration.

Guaranties and insurance in force are estimated to increase to $82.3 billion by the end of 1960. The increase of about $24 billion since the end of 1958 reflects primarily increased guaranties and insurance of mortgage loans by the Federal Housing Administration and the Veterans Administration. These two programs account for more than 90% of all outstanding guaranties and insurance, and most of the remainder are obligations guaranteed by the Public Housing Administration.

The amounts shown include both the guaranteed and unguaranteed portion of outstanding loans in order to give a clearer picture of the economic impact of these programs and to tie in better with banking statistics. They do not, however, indicate the estimated contingent liability of the Federal Government, which is shown in table 6. The major program for which the contingent liability differs materially from the principal amount of the loans is the veterans loan guaranty program. By the end of 1960, the Government liability will be about $18.5 billion lower than the outstanding amount of such loans.

The probability that the Government will be called upon to take over any substantial part of the guaranteed or insured portion of outstanding loans is small, except possibly in a national financial emergency. Sizable assets are available to minimize any potential losses. Moreover, in the case of most mortgage insurance programs charging premiums, income in the past has been sufficient not only to cover expenses and current losses, but also to build up substantial reserves.

NEW COMMITMENT AUTHORITY

New commitment authority includes any additional loan or loan guaranty authority made available or recommended. There are several kinds of new commitment authority. Budget authorizations are those included in budget totals of new obligational authority; they consist either of appropriations or of authorizations to expend from public debt receipts. Other authorizations, which do not normally give rise to budget expenditures, consist of insurance and guaranty authorizations and conditional authorizations which become available only under specified conditions.

Table 5 summarizes new commitment authority of the 19 major credit programs which will need additional authority during the period. New commitment authority required for 1960 is estimated at $11.6 billion, compared to $13.1 billion in 1959. The Federal Housing Administration will require considerably less new insurance authority in 1960 because the proposed change to an indefinite authorization makes it necessary to provide new authority only for the excess of net commitments over the unused authority available from prior years. On the other hand, the authority required by the Veterans Administration will increase with the expected rise in the number of loans guaranteed from 250,000 in 1959 to 600,000 in 1960, arising from the increased availability of private funds with the more flexible interest rates proposed.

New commitment authority for most credit programs is provided by Congress in the basic legislation rather than in appropriation acts. For example, the lending authority of the Export-Import Bank, the borrowing authority of the Commodity Credit Corporation and the

Digitized for FRASER

Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

Public Housing Administration, and the various mortgage insurance authorizations of the Federal Housing Administration are all prescribed in the statutes governing these programs. Since new commitments can generally be financed out of uncommitted balances of prior authorizations, or out of funds made available by collections on outstanding loans, requests for new commitment authority in any one year are limited to relatively few credit programs. For example, in 1960, new commitment authority is requested for only nine major programs—the Rural Electrification Administration, the Farmers' Home Administration, the Small Business Administration, the Community Facilities Administration, the Federal Housing Administration, the Department of Health, Education, and Welfare, the Veterans Administration, the Development Loan Fund, and the International Cooperation Administration; in addition, restoration of capital impairment is requested for the Commodity Credit Corporation.

In several important cases, the authority provided by the basic statute is indefinite. The most important examples are guaranties and insurance of loans by the Veterans Administration, guaranties of defense production loans under section 301 of the Defense Production Act, and indirect guaranties of local housing authority obligations issued on the security of annual contribution contracts of the Public Housing Administration. The President is also recommending the removal of limits on the general mortgage insurance authority of the Federal Housing Administration (excluding armed services housing). In these cases, the tabulations show new authorizations equal to the net amount of the guaranteed or insured portion of new commitments.

A second type of new authority indefinite in amount exists in the case of loan programs where the authority can also be used for grants, purchase commitments, or other nonlending purposes. Major examples during the 3-year period are the programs of the Commodity Credit Corporation and mutual security loans by the International Cooperation Administration. In these programs all the new obligational authority provided could legally be used for loans, but is not likely to be so used. Mutual security loans by the International Cooperation Administration in the 3-year period account for only a relatively small part of the total assistance program, so that it would be misleading to include the total amount of the mutual security program as new obligational authority for loan assistance. The data, therefore, show amounts for new authority adequate to finance estimated new commitments. Loans and guaranties by the Commodity Credit Corporation account for a substantial part of its price-support program. Its total new obligational authority for price support operations is, therefore, included, even though some of it will be used for nonlending purposes.

STATUS OF CREDIT AUTHORITY

Unlike most other Government programs, commitment authority for the major credit programs is not normally provided for a single year, but remains available in most instances until utilized or until the statutory authority for the program expires. Hence, with only a few exceptions, the existing authority represents the cumulative total of amounts made available in prior years.

Cumulative net authority.—Three major types of commitment authority are provided for Federal credit programs. A majority of the major programs operate on a revolving-fund basis; that is, collections on outstanding loans and expirations of insurance commitments permit reuse of the original authority. Limitations on such programs are ordinarily in terms of maximum amounts of loans outstanding, maximum borrowings from the Treasury, or maximum amounts of insurance or guaranty liability. Leading examples include all lending programs of Government corporations and, under present law, the insurance programs of the Federal Housing Administration.

In the case of several noncorporate loan and loan insurance programs, a maximum limitation is placed upon the total volume of loans and loan insurance commitments. Funds collected on such loans and expirations of such insurance are not available for reuse. The most important examples are the direct loan programs of the Rural Electrification Administration and the direct loan and insurance programs of the Farmers' Home Administration. The President has proposed that these programs be put on a revolving-fund basis.

A few programs are not governed by any specific dollar limitations. These are limited only indirectly by the provisions of the statute or of the agency's regulations governing eligibility for Federal credit assistance. The amount committed depends primarily on the number of applications. The most important example is the loan guaranty and insurance program of the Veterans Administration. The loan guaranties authorized under section 301 of the Defense Production Act are also not specifically limited.

In the case of both the Commodity Credit Corporation and lending programs under the Defense Production Act, loans are financed from obligational authority which also finances nonlending programs. For the purposes of this analysis, the net authority available at the beginning of the year for these loan programs is set equal to the total available authority after deducting authority committed for nonlending programs. An exception is made for the mutual security loans by the International Cooperation Administration, because they account for only a small and indefinite part of the total assistance given under the mutual security program in recent years and in 1960; the authority at the beginning of the year is, therefore, shown as equal to loans outstanding and undisbursed commitments at the beginning of the year.

Uncommitted authority, end of year	16,786	12,028	7,472	4,005	----------	383	81	50	698	----------	2,255

[1] Includes Department of Commerce (Maritime Administration), Civil Aeronautics Board, and Interstate Commerce Commission.

[2] Includes Export-Import Bank, Treasury Department (loan to the United Kingdom), State Department (International Cooperation Administration), and the Development Loan Fund.

Credit authority available at the beginning of 1960 is estimated at $98.8 billion (see table 6). New commitment authority of $11.6 billion is estimated to become available during the year. On the other hand, estimated expirations, certain repayments, and other reductions in outstanding authority amount to $6.6 billion. The net authority available at the end of 1960 is, therefore, estimated at $103.8 billion.

Charges against authority.—In addition to the $86.2 billion of outstanding loans and guaranties (shown in detail in table 4 but excluding here the portion of those private loans not guaranteed or insured by the Federal Government which do not constitute a charge against the authority), charges against the available authority include undisbursed commitments. These are expected to total $10.1 billion on June 30, 1960, for loans and guaranties together.

Uncommitted authority.—For major Federal credit programs as a whole, commitment authority at the end of 1960 is estimated to exceed charges against the authority by $7.5 billion. Of this unused authority, 53% is accounted for by several programs administered by the Housing and Home Finance Agency, including $2.3 billion in unused Treasury borrowing authority of the secondary market activity of the Federal National Mortgage Association. A reduction of $2.4 billion in uncommitted authority of the Federal Housing Administration accounts for about half of the decline of uncommitted authority between 1959 and 1960.

Since the indefinite authority of loan guaranty programs not subject to specific limitations is shown as equal to charges against the authority, the total uncommitted authority in table 6 does not reflect the fact that these guaranty programs could be expanded substantially under present available authority. As a result of the President's proposal to remove the limits on the insurance authority of the Federal Housing Administration in 1960, the cumulative authority subject to definite limitation will decrease to 44% in 1960. However, this includes almost all programs involving major budget expenditures.

Since this analysis is limited to major active or liquidating credit programs, substantial amounts of uncommitted standby authority of other programs are excluded. The most important examples are the $3 billion borrowing authority for the Federal Deposit Insurance Corporation, $1 billion for the Federal home-loan banks, and $750 million for the Federal Savings and Loan Insurance Corporation. These are unlikely to be used unless a national financial emergency occurs.

Quasi-Public Credit Programs

The Federal Government also has a measure of responsibility for the credit programs of certain mixed-ownership corporations and other public agencies operating in whole or in part with private funds. The most important are the Federal intermediate credit banks, the banks for cooperatives, the Federal land banks, the Federal home-loan banks, and the Federal Reserve banks. The secondary mortgage market activity of the Federal National Mortgage Association—also financed in part with private funds—is discussed with the other programs of the Association in the next section.

The 12 regional banks for cooperatives make loans to agricultural cooperatives. Most of the stock in the banks is still owned by the Federal Government and the banks are supervised by the Farm Credit Administration.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

TABLE 7.—*Outstanding loans for major quasi-public credit programs classified by agency and program*

[In millions]

Agency	June 30, 1957	June 30, 1958
Farm Credit Administration:		
Banks for cooperatives	$384	$408
Federal intermediate credit banks	999	1,227
Federal land banks	1,870	1,989
Federal Home Loan Bank Board: Federal home-loan banks	1,079	929
Federal Reserve Board of Governors: Federal Reserve banks	559	42
Housing and Home Finance Agency: Federal National Mortgage Association (secondary market operations)	1,248	1,394
Total	6,139	5,989

The 12 Federal intermediate credit banks extend credit to production credit associations and privately capitalized farm-lending institutions by discounting short-term notes to help finance the production needs of farmers. To finance their operations, the banks sell short-term debentures to the public. The banks may have obligations outstanding of not more than 10 times their capital and surplus. In accordance with the Farm Credit Act of 1956, provision was made for the retirement of Government capital in the banks and for their eventual ownership by the production credit associations.

The 12 Federal land banks are now privately owned, but are sponsored by the Government and operate under the supervision of the Farm Credit Administration. These banks provide mortgage credit to farmers at reasonable interest rates through individual national farm loan associations.

The 11 Federal home-loan banks are also now privately owned, but are supervised by the Federal Home Loan Bank Board and have authority to borrow $1 billion from the Treasury, if necessary. These banks make both short-term and long-term advances to member savings and loan associations on the security of home mortgages or Treasury obligations, as well as unsecured short-term loans.

All of the stock in the 12 Federal Reserve banks is provided by the member banks, but the policies of the Federal Reserve System are controlled by the presidentially appointed Board of Governors. Moreover, the Reserve banks, after paying 6% dividends to the member banks, pay 90% of their remaining profits to the Treasury, and their entire surplus reverts to the Treasury in the event of liquidation. As part of their normal central banking functions, the Reserve banks stand ready to make short-term discounts and advances for member institutions. Authority for a small program of direct loans to industry was repealed in 1958. The amount of discounts, advances, and industrial loans outstanding on June 30, 1958, was $42 million with discounts and advances low on that date. By October 31, they were $407 million.

MAJOR FEDERAL CREDIT PROGRAMS

HOUSING AND HOME FINANCE AGENCY

Major credit programs administered by five constituents of the Housing and Home Finance Agency are included in this analysis. In addition, there are a number of minor programs—most of which are in liquidation—which are administered in the Agency.

Federal National Mortgage Association.—Since 1954, the Federal National Mortgage Association has comprised three fiscally independent activities—special assistance functions, management and liquidating functions, and secondary market operations—under a single management.

The special assistance activity is intended to assist groups or areas otherwise unable to obtain private financing and to help prevent declines in housing activity. General authority is provided to make advance commitments, and purchases of mortgages not to exceed $950 million outstanding at any one time. This authority in 1959 and 1960 will be largely directed toward supporting mortgages on housing in urban renewal areas and for the relocation of displaced families. The Association has, in addition, $500 million commitment authority for mortgages on military family housing, $200 million for cooperative housing, and $1 billion for low-cost housing. The entire low-cost housing authorization has been committed and no new commitments are projected for 1960. Commitments for armed services family housing mortgages will drop sharply to an estimated $15 million annually in 1959 and 1960, since these needs are now being met largely with private financing. Total mortgage purchase commitments under the special assistance program are estimated to recede from $949 million in 1958 and $926 million in 1959 to $437 million in 1960. The mortgage portfolio at the end of 1960 is estimated at $1.6 billion.

The management and liquidating functions of the Association consist of the liquidation of the mortgages of the predecessor association. No new commitments can be made and mortgage purchase authority expires as mortgages are sold or repaid. Authority is provided to substitute private financing for Treasury borrowing through the sale of unguaranteed debentures. Purchases under outstanding commitments were completed in 1958. Mortgage sales are estimated at $10 million during 1959 and $335 million in 1960. Sales during the latter year will be effected through the exchange of mortgages for privately held Treasury bonds. The mortgage portfolio at the end of 1960 is estimated at $1.6 billion.

The secondary mortgage market operations of the Association are partially privately owned and therefore are reflected in trust expenditures, rather than budget accounts. This unit helps to make mortgage funds available throughout the country at market rates of interest. It may purchase only Government-insured and guaranteed mortgages meeting the usual standards of private investors, and its operations must be self-supporting. The activity was financed initially by Government stock subscription, for which $208 million has been authorized; private mortgage sellers are also required to buy stock, with provision for ultimate retirement of the Government stock. The Association may issue nonguaranteed debentures; the Secretary of the Treasury may purchase up to $2,250 million of these. Mortgage purchases are expected to increase to $663 million in 1960 over purchase levels of $550 million in 1958 and $527 million in 1959. Mortgage sales are estimated to decline from $375 million in 1958 to $95 million in each of the years 1959 and 1960. At the end of 1960 the portfolio of mortgages held will total $2.2 billion. In 1960, as well as 1958 and 1959, purchases will be financed mainly from debentures and stock sold privately, with no net change in Government investment.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

Urban Renewal Administration.—Under the Housing Act of 1954, the Housing and Home Finance Administrator is authorized to make loans and grants to local public agencies for the planning and execution of slum clearance and urban renewal projects. Loans are made to cover the cost of project planning, for the temporary financing of project development, and for long-term financing of land leased rather than sold to redevelopers. In addition, private loans may be guaranteed through the pledge by local agencies of the Federal loan commitment. Borrowing authority of $1 billion is available for these purposes. Legislation is being proposed to clarify the intent of the statute that guaranteed private financing be used to the maximum extent practical and to authorize Treasury borrowings in excess of $1 billion with the approval of the President if necessary to meet guaranty commitments. Other legislative changes would authorize Federal guaranties for financing certain nonresidential projects not eligible for grants.

The level of loan activity is determined primarily by the number of projects in the development stage. Planning has been completed in an increasing number of communities, and many projects have entered the actual development stage, so that financing needs are increasing. Total commitments for loans and guaranties are estimated at $419 million in 1959 and $373 million in 1960, compared to $163 million in 1958; about 70% of these are for guaranties. Net loan expenditures are expected to remain at relatively low levels because of the short-term nature of the loans, and the increasing use of guaranteed private financing in lieu of direct Federal loans.

The current interest rate on temporary direct loans is 3⅞%. Administrative expenses are financed from a separate appropriation.

Community Facilities Administration.—The Housing Act of 1957 increased to $925 million the authorization for long-term loans to colleges and universities for the construction of dormitories and related facilities. Legislation will be proposed to increase the Treasury borrowing authorization by $200 million, for use during the balance of the current year. For 1960, legislation will be requested to: (1) exclude public institutions, which because of the tax-exempt nature of their obligations, are able to borrow from private sources at rates approaching those paid by Treasury on borrowings of comparable maturity; (2) guarantee private loans made to colleges which issue taxable obligations; and (3) permit increases in interest rates on direct loans sufficient to cover the cost of money to the Treasury, administrative expenses and losses. No new obligational authority will be requested for 1960; commitments for direct loans in the amount of $54 million will be made from funds available through repayments and the sale of bonds in the portfolio.

The Housing Amendments of 1955 authorized $100 million for loans to local governments for public facilities, such as water and sewage systems. Preference is given communities with a population of less than 10,000. Commitments under this program are estimated at $25 million in 1959 and $34 million in 1960. Interest rates are required to cover all expenses of the program. Under present market conditions, interest rates have been set at 4½% for general obligation bonds of 30-year maturity and 4⅞% for revenue bonds of the same period, with upward or downward adjustments for variation in the maturity period.

Federal Housing Administration.—The Federal Housing Administration is authorized to insure against default (*a*) the full principal amount of a wide variety of mortgage loans on new and existing housing, and (*b*) up to 90% of the principal amount on unsecured home-improvement loans. The basic program of insuring loans for 1- to 4-family housing accounts for the bulk of mortgage insurance activity, but insurance is also provided for mortgages on rental housing, housing under cooperative ownership, and housing on military reservations and in urban renewal areas. Approximately 16% of all outstanding home mortgages are insured by the Administration; it is estimated that these and other insured loans will increase from $23 billion in 1958 to $38 billion by the end of 1960.

In 1960 it is estimated that commitments will be made for insurance of mortgages on 858,500 dwelling units and for 1.2 million home-improvement loans.

The Administration's program is fully self-supporting. Insurance premiums, fees, and other income will cover all current expenses and add substantially to the reserve against future losses. Legislation is proposed to increase the general insurance authorization by $6 billion in 1959 and to provide for the removal of limits on insurance authority for 1960 and later years. The authority to insure property-improvement loans would be made permanent. Legislation is also proposed to permit increases, if necessary, in interest rates for rental housing mortgages, as well as for cooperative housing mortgages and armed services housing mortgages, and to broaden the authority for other insurance programs.

Public Housing Administration.—Under the Housing Act of 1949, the Public Housing Administration makes loans and grants to assist local authorities in the construction of low-rent public housing. These loans and grants are made under annual contribution contracts between the Administration and local authorities. The annual contribution contracts provide for (1) loan commitments by the Administration not to exceed 90% of project development costs, and (2) the payment of annual Federal contributions over a 40-year period to cover debt service on the bonds used to finance the project permanently.

Loan commitments under annual contribution contracts are either disbursed as direct Federal advances or used to guarantee private temporary loans. Most frequently, a direct Federal advance is made initially and later refunded with guaranteed financing. Ordinarily long-term bonds are sold to private investors prior to completion of construction, and all temporary financing, both direct and guaranteed, is retired. However, under some circumstances, the period of temporary financing may be indefinitely extended. The Administration's borrowing authority for these purposes is $1.5 billion. The volume of temporary financing will increase somewhat in the current year as a result of the larger number of units in development and decrease slightly in 1960 with the expiration of the authorization for additional annual contribution contracts.

Prior to completion of construction, the units are permanently financed by the local housing authority through the sale of 40-year serial bonds to private investors. While not directly guaranteed by the Federal Government, these local housing authority bonds are treated in this

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

analysis as guaranteed obligations by virtue of the Government contract to pay annual contributions covering debt service. The outstanding permanent financing is expected to increase from $2.3 billion at the end of 1958 to $2.7 billion by the end of 1960, reflecting the completion and permanent financing of units started in earlier years.

On direct Federal loans, local authorities paid in December 1958 an interest rate of 3.125%. In the past year, interest rates on private guaranteed temporary loans averaged 1.748%, while guaranteed long-term loans had an interest cost of approximately 2.887%.

VETERANS ADMINISTRATION

This analysis includes the loan guaranty and insurance programs, and the direct housing-loan program. It excludes minor lending activities of the Veterans Administration, such as policy loans made by the veterans life insurance funds and a few very small inactive programs.

Loan guaranties and insurance.—The Administrator of Veterans Affairs guarantees housing, business, and farm loans made by private lenders to veterans of World War II and the Korean conflict. The World War II authority expires on July 25, 1960, but the authority for veterans of the Korean conflict continues until 1965.

The maximum interest rate on guaranteed loans is designated by the Administrator of Veterans Affairs within limits set by law. The current rate of 4¾% represents the statutory maximum. Since it has not kept pace with prevailing market rates, the supply of private mortgage funds for this program has been limited. To meet this problem, the President proposes legislation to provide administrative discretion to set the interest rate on veterans loans on the same basis as the rates on similar loans insured by the Federal Housing Administration.

Up to June 30, 1958, approximately 5,425,000 loans of all types had been guaranteed, of which 95% were for homes, 4% for businesses, and 1% for farms; housing loans currently account for approximately 99% of new commitments. Under the more flexible interest rate proposed, it is estimated that the number of loans guaranteed annually will increase from about 250,000 in 1959 to 600,000 in 1960. There is no statutory limit on the aggregate amount of loans. It is estimated that approximately $39 billion will be outstanding by the end of 1960.

The Government is liable for all losses on most loans up to 60% of the outstanding principal amount, or $7,500, whichever is less. No charge is made by the Government for its guaranty. Administrative expenses are paid from the general operating expenses appropriation of the Veterans Administration and claims are paid from a general appropriation for veterans readjustment benefits. Net losses on claims paid up to June 30, 1958, amounted to about $42 million, or less than 1% of loans guaranteed and insured since the program's inception.

Direct housing loans.—In areas where the loan guaranty program is ineffective because of lack of private lending, the Administrator of Veterans Affairs may make loans directly to veterans for the purchase, construction or improvement of homes (including farm housing). The statutory interest ceiling is 4¾%, but the President's proposal for more flexible rates on guaranteed loans would also have the effect of varying the direct loan rate. Loans outstanding amounted to $692 million on June 30, 1958. In view of the more flexible interest rate proposed for guaranteed loans, the number of new direct loans in 1960 is expected to decline from the high levels of 1958 and 1959. No new commitments can be made after July 25, 1960, the termination date for the direct loan program.

DEPARTMENT OF AGRICULTURE

Three major credit programs of the Department of Agriculture are included in this analysis.

Rural Electrification Administration.—Since 1935, the Rural Electrification Administration has been making loans with 35-year maturities, chiefly to cooperatives, to provide electric service to farms and other rural establishments. Beginning in 1950, similar loans have been made to finance construction and improvement of rural telephone systems.

New obligational authority is provided annually in the budget to finance these programs. New commitments for 1960 will be $325 million; this is a reduction of $48 million from 1959, arising primarily from the President's legislative proposal to assist borrowers to obtain private financing. Most of the loan disbursements in 1960 will arise from commitments made in previous years; undisbursed commitments of $847 million at the end of 1960 will be reflected in disbursements in later years.

Interest rates are set by statute at 2%, substantially below the present cost of long-term money to the Treasury of about 3¾% Administrative expenses are financed by a separate appropriation. The President recommends that the 2% rate be replaced by a rate which will cover the current cost to the Treasury of equivalent term borrowing plus other reasonable costs. Collections of principal and interest are deposited in miscellaneous receipts of the Treasury, but the President recommends that the Administration be shifted to a revolving-fund basis, with repayments becoming available for new loans.

Farmers' Home Administration.—The Farmers' Home Administration makes loans to farmers unable to obtain credit on terms within their means from other sources for operating expenses and crop production, farm ownership and improvement, farm housing, and for soil and water conservation activities. Loans are intended to strengthen the family-type farm and encourage better farming methods. These loan programs are financed by annual authorizations, except that housing loans are financed from a 1957 authorization of $450 million. The Administration may also insure a maximum of $125 million a year in long-term mortgage loans under the farm ownership program and a maximum of $25 million a year under the soil and water loan program.

New direct loans are expected to amount to $185 million in 1960, compared with $269 million in 1959. The reduction reflects an anticipated increase in private lending.

The interest rate on farm operating loans, which constitute the largest number of direct loans, is 5%; this is the legal maximum. Interest rates on direct farm ownership and soil and water loans have been set at 4½%. The maximum rate stipulated by law for farm ownership loans is 5%; no maximum rate is set for the soil and water loans. The Secretary of Agriculture has recently increased interest rates on insured farm ownership and soil and water loans from 4½% to 5%, which is the statutory maximum; of this, one-half of 1% represents insurance premiums and one-half of 1% a charge for administration.

Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

Interest rates on farm housing loans have been set at 4%, the maximum provided by law.

Administrative expenses of the Farmers' Home Administration are covered by separate appropriations. Collections of interest and principal go into miscellaneous receipts of the Treasury, but the President recommends a shift to a revolving-fund basis.

The Farmers' Home Administration also administers a revolving fund from which emergency loans may be made to farmers and stockmen suffering from production disasters and unable to obtain credit on reasonable terms from other sources. The interest rate is 3% on all loans except special livestock loans, on which the rate is 5%. New commitments in 1960 are expected to be $49 million, which is $10 million less than in 1959, and repayments are estimated to exceed disbursements in both 1959 and 1960.

Commodity Credit Corporation.—In carrying out the Government's program of supporting prices of agricultural commodities, the Commodity Credit Corporation makes direct loans to farmers and guarantees loans made by private lending agencies. Loans and guaranties enable farmers to market their commodities at prices in line with the standards set forth in law. Loans are backed by commodities and borrowers may discharge their obligations without personal liability by turning over pledged commodities to the Corporation. These forfeitures of collateral are treated as repayments of loans in this analysis. The Corporation also makes loans for the construction or improvement of farm-storage facilities.

No increase is being requested in 1960 in the Corporation's existing borrowing authority of $14.5 billion. However, new authority to incur obligations of $3.4 billion is requested for 1960, which includes $2.1 billion to restore the capital impairment of the Corporation resulting from price support losses and $1.3 billion to reimburse the Corporation for estimated costs and losses under other programs financed through that agency, such as the sales of surplus agricultural commodities for foreign currencies.

New loan and loan guaranty commitments in 1960 are estimated at $2,068 million, which is $1,590 million less than the estimate for 1959. This reduction reflects mainly the shift in emphasis from a loan to a purchase program in the case of cotton, as a result of the Agricultural Act of 1958. Repayments of direct loans in 1960 are estimated at $3,047 million, $815 million more than estimated disbursements.

There are no statutory limits on interest rates. Interest rates on 1958 crop loans will be continued at 3½%. This rate is charged the borrower only if the loan is repaid in cash; if repaid by surrender of collateral, no interest is charged. For loans disbursed by private lending agencies a certificate of interest is issued by the Corporation with an interest rate of 2½%.

DEPARTMENT OF COMMERCE

Maritime Administration.—The Secretary of Commerce is authorized by title XI of the Merchant Marine Act of 1936, as amended, to insure private construction loans and mortgages on most types of cargo and passenger-carrying vessels. The objective of this program is to facilitate private financing of construction, conversion, or reconditioning of vessels. The mortgages or loans may not exceed 75% of the cost to the purchaser of vessels built with Federal subsidies and 87½% of the construction costs of nonsubsidized vessels. The Government may insure up to 100% of the amount of the ship mortgage. The aggregate unpaid principal amount of insured mortgages and loans outstanding at any one time may not exceed $1 billion.

Because of the acceleration of the ship replacement program for the merchant marine, insured loans in force will increase from $79 million in 1958 to an estimated $450 million in 1960.

The maximum interest rate on guaranteed loans is set by statute at 5%, but the Secretary of Commerce has authority to increase the limit to 6% if private financing is not available at a lower rate. Insurance premiums are three-eighths of 1% per annum on construction loans and three-fourths of 1% per annum on mortgage loans. There has been one default since the inception of the program.

CIVIL AERONAUTICS BOARD

The Civil Aeronautics Board is authorized under Public Law 85–307 to guarantee loans for aircraft purchases by local service and other small airlines. Twenty-nine airlines are presently eligible for these loan guaranties, including domestic local carriers and carriers providing services to and within the Territories and metropolitan helicopter service.

The act authorizes the Board to guarantee loans up to $5 million per airline; the guaranty may not exceed 90% of the loan. Guaranties may be made only if the Board finds that the air carrier would not otherwise be able to obtain funds for the purchase of aircraft upon reasonable terms, and only if the aircraft purchased will improve service and efficiency. New commitments in 1960 are estimated at $20 million. The authority of the Board to guarantee these loans will expire in 1962.

A guarantee fee of .375% of the unpaid balance of the guaranteed portion of the loan is charged to reimburse the Government for the costs of the program's administration.

INTERSTATE COMMERCE COMMISSION

The Transportation Act of 1958 authorizes the Interstate Commerce Commission to guarantee against loss of principal or interest, either in whole or in part, loans to railroads to finance the acquisition, construction, or maintenance of road, property, or equipment. The aggregate principal amount of loans guaranteed is limited to $500 million. The authority will expire on March 31, 1961, except for applications then pending.

There is no statutory ceiling on the interest rate private lenders may charge, but the Commission is required to find that the rate is not unreasonably high. A guaranty may be granted only if necessary funds on reasonable terms are not otherwise available, and if there is reasonable assurance of repayment.

No loans have yet been guaranteed. The budget assumes new commitments of $150 million in 1960. The statute provides for a guaranty fee, which shall not exceed the administrative expenses of the program. Actual rates for this fee have not yet been established.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

EXPANSION OF DEFENSE PRODUCTION

Under the Defense Production Act, the President is authorized to make loans or advances and to guarantee loans for expansion of defense production. Several agencies participate in these programs.

Loan guaranties.—Under section 301 of the Defense Production Act, the three military departments of the Department of Defense, the Departments of Commerce, the Interior, and Agriculture, the Atomic Energy Commission, and the General Services Administration are authorized to guarantee loans by public or private financing institutions to defense contractors and subcontractors. The Federal Reserve banks act as fiscal agents for the guaranties of private loans, and the procedure is governed by the Federal Reserve Board's regulation V. No specific limitation is placed on the amount of loan guaranties.

From the beginning of the program in September 1950 to the end of December 1958, more than 1,500 V-loans, totaling $3.1 billion were authorized by the procurement agencies. More than 90% of the guaranties have been authorized by the Departments of the Air Force, the Army, and the Navy, primarily to speed the production of aircraft and aircraft parts, electronics and communication equipment, tanks, weapons, and ammunition. Guaranties by the General Services Administration to expand production of basic materials and metals and machine tools account for nearly all of the remainder. New commitments are expected to decline to $95 million in 1960, compared to $121 million in 1959 and $162 million in 1958.

To cover administrative expenses and possible losses, charges are made for guaranties, the rate depending upon the portion of the loan guaranteed. This portion has averaged about 75%. The guaranteed portion of loans must be purchased by the procurement agency upon request of the lender. So far, income has substantially exceeded expenses. There is no statutory limit on the interest rate which financing institutions may charge, but a maximum interest rate of 6% and a commitment fee of one-half to 1% have been set administratively.

Loans and advances.—Under section 302 of the Defense Production Act, the President is authorized to make direct loans or to participate in private loans for the expansion of industrial capacity, development of technological processes or production of essential materials. The President has delegated this authority for loans to domestic borrowers to the Treasury Department and for foreign loans to the Export-Import Bank. Under section 303 of the same act, the General Services Administration has made advances on purchase commitments for strategic minerals and metals and industrial equipment. Outstanding loans will decline to $196 million by the end of 1960. No new commitments were made in 1958 and none is expected in 1959 and 1960, since most of the planned expansion is already underway. The new authority of $325 million requested for 1959 will be used to finance nonlending activities exclusively.

There is no statutory limitation on the interest rate. Rates charged on both loans and advances have been generally 5%. No ultimate net cost is expected.

SMALL BUSINESS ADMINISTRATION

The Small Business Administration, created in 1953, was strengthened considerably in 1958 when it became a permanent agency of the Government, and when the Small Business Investment Act broadened its authority substantially. The agency has four basic loan programs: (*a*) loans to small businesses; (*b*) loans to victims of disasters; (*c*) purchases of debentures of and loans to small business investment companies; and (*d*) loans to State and local development companies. In addition, it is liquidating some of the loans made by the former Reconstruction Finance Corporation.

The Small Business Act authorizes business loans up to a total of $500 million outstanding at any one time, and an increase of $200 million is recommended so that loans may continue to be made in 1960. The maximum loan to any one borrower is $350,000, and the maximum maturity generally 10 years. Loans may be made only if financial assistance is not available from private sources on reasonable terms, and only if there is reasonable assurance of repayment. Moreover, direct loans are made only when participation from private banks cannot be secured. Two-thirds of the loans made so far have been made jointly with private banks. The law provides for an interest rate of no more than 5½%, which is the current rate. It is anticipated that 6,900 loans will be approved in 1960 and 6,260 in 1959, compared with 4,014 in 1958.

The Administrator has broad authority to make loans to victims of disasters in areas which he has so designated. There is no limit on the amount that may be loaned to each borrower, but the aggregate amount outstanding at any one time may not exceed $125 million. Disaster loans may have maturities up to 20 years. Interest rates are set by law at not to exceed 3%.

The Small Business Investment Act authorizes the Administration to purchase subordinated debentures of small business investment companies up to a maximum of $150,000 for each such company. In addition, the agency may lend to small business investment companies up to 50% of the paid-in capital and surplus of the company. No legislative limitation is placed on the interest rates charged, but a rate of 5% has been established administratively. The maximum maturity has been fixed administratively at 20 years; in the case of loans, it may be extended for longer periods. New commitments in 1960 are estimated at $57.5 million, compared to $40 million in 1959.

The Small Business Investment Act also authorizes loans to State and local development companies. The amount of general purpose loans to State development companies may not exceed the total amount borrowed and outstanding by such a company from other sources. Interest rates and maximum maturities are not limited by statute, and have been fixed administratively at 5% and 20 years, respectively. Loans may also be made to State and local development companies for plant construction, conversion and expansion, if they assist an identifiable small-business concern. The maximum amount of such loans is $250,000 for each concern. Participation by private sources and by the development company itself

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

in such financing is encouraged, and the agency will make loans only if funds are not available from these sources. The interest rate is fixed administratively at 5½%, and the statutory maximum maturity is generally 10 years. New commitments for this program in 1960 are estimated at $15 million, compared to $10 million in 1959.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education.—Title II of the National Defense Education Act of 1958 (72 Stat. 1580–1605) authorizes the Commissioner of Education to enter into agreements with institutions of higher education to establish student loan funds. The Federal capital contribution provides up to 90% of these funds, with the remainder by the institutions. The funds are used for loans to students needing financial assistance to continue their education. The interest rate is set by statute at 3%. Loans are repayable over an 11-year period beginning 1 year after the borrower ceases to be a full-time student. Up to 50% of a loan, plus interest, will be canceled if the borrower becomes a teacher in a public elementary or secondary school.

In 1967 the balances in the funds will be distributed; the Federal Government will receive an amount proportional to its contribution. Thereafter, additional amounts repaid to the fund will be distributed in a similar manner.

The Commissioner is also authorized to make loans to institutions for all or part of their required capital contribution, if they are unable to secure funds from other sources on reasonable terms. Such loans have a maximum maturity of 15 years, with an interest rate adequate to cover (*a*) the cost of funds to the Treasury, (*b*) the cost of administration, and (*c*) probable losses.

Also authorized by the National Defense Education Act are loans to nonprofit, private elementary and secondary schools for the acquisition of equipment for science, mathematics, and foreign language instruction. Such loans may not exceed a maturity of 10 years and bear an interest rate equal to the current average yield on all outstanding marketable obligations of the United States plus one-quarter of 1%.

New commitments for the three programs are estimated at $38 million for both 1959 and 1960. Of this, $30 million is for Federal contributions to student loan funds. Expenditures will increase from $14 million in 1959 to $40 million in 1960.

TREASURY DEPARTMENT

The only credit program administered by the Treasury Department and included in this analysis is the 1947–48 loan to the United Kingdom. The Treasury Department is also authorized to make civil defense loans, up to $250 million outstanding at any one time, upon certification by the Director of Civil and Defense Mobilization; however, no new loans for civil defense purposes have been made since December 1955, and none are anticipated for 1959 and 1960. Treasury is also liquidating several other loan programs, including part of the former Reconstruction Finance Corporation.

Loan to the United Kingdom.—A loan of $3,750 million was made to the United Kingdom in 1947 and 1948. It is a 50-year loan at 2% interest. Repayments of principal are deposited directly into miscellaneous receipts and are not available for new loans. In accordance with the agreement of March 6, 1957, between the United States Government and Great Britain, approved by the Congress, the interest payment and the repayment of principal for 1958 were deferred to provide relief for the United Kingdom from international exchange pressures. It is anticipated that payments for 1959 and 1960 will be made on schedule.

EXPORT-IMPORT BANK OF WASHINGTON

The Export-Import Bank is the principal foreign-lending agency of the Government. Its total loan and loan guaranty authority is $7 billion; of this, $100 million may be used to insure American exporters against certain risks of expropriation and confiscation. The bank's major goal is the expansion of trade between the United States and foreign countries. It extends loans to finance American exports and imports and to develop sources of strategic materials, and to promote the economic development of underdeveloped countries. The bank also makes loans to foreign governments to meet certain emergencies which otherwise would disrupt the normal flow of trade with the United States.

In 1958, the bank started making loans in certain foreign currencies to private firms for economic development and trade expansion. The foreign currencies become available as part of the proceeds of United States surplus agricultural commodity sales abroad under the Agricultural Trade Development and Assistance Act of 1954, as amended (Public Law 480).

The bank's operations are intended to supplement private capital. Accordingly, it does not finance projects or exports for which private financing is normally available and, wherever possible, emphasizes guarantees of private loans, rather than the making of loans directly. The high level of domestic demand for private capital has restricted private participation, but greater success in obtaining private financing for loans covered by the bank's guaranty is anticipated in 1959 and 1960.

Interest rates and other loan terms are set upon advice of the National Advisory Council on International Financial and Monetary Problems. In general, the bank charges 2% more than the yield of United States Government securities with comparable maturities; rates on long-term unguaranteed loans are usually somewhat higher. The current interest rates range from 5% to 6%. Loan maturities vary from 12 or more months on export credits to a number of years on development project loans. Losses have been small and income is more than adequate to cover costs; reserves amounting to $509 million on June 30, 1958, have been set aside for future contingencies. Annual dividends in lieu of interest are being paid to the Treasury at the rate of 2¼% on capital stock.

New commitments of $1,345 million are anticipated in 1960, about the same as in 1959; of this, $140 million is in foreign currencies and is, therefore, not reflected in budget expenditures. Net expenditures will decline to $236 million as a result of increased repayments including sale of part of the portfolio to private investors. Excluding foreign currency transactions, the excess of new loans over repayments in 1960 will be $86 million. This can be entirely financed from net operating revenues without requiring further borrowing from the Treasury.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

DEPARTMENT OF STATE

The International Cooperation Administration in the Department of State makes loans under the Agricultural Trade Development and Assistance Act, 1954, as amended (Public Law 480), and under the mutual security program.

Under title I of the Agricultural Trade Development and Assistance Act, the President may enter into agreements to use the foreign currencies which accrue from the sale of surplus agricultural commodities for loans to promote multilateral trade and economic development. Strategic materials, services, or foreign currencies may be accepted in repayment of such loans. Most of the sales agreements under the program have provided for loans for development projects within the country. A portion of these loans made to foreign governments is in turn reloaned to private enterprise. In general, the terms of loans under this program are similar to those under the mutual security program discussed below.

The International Cooperation Administration also makes the bulk of the loans extended under the mutual security program, the authority for which is in the President. The Administration and its predecessor organizations—the Foreign Operations Administration, the Mutual Security Administration, the Economic Cooperation Administration, and the Technical Cooperation Administration—have made loans to foreign governments as part of a broad program to assist in the restoration of economic stability and to promote the economic development of underdeveloped areas in the free world.

About one-third of the loans were made during 1949, after passage of the Foreign Assistance Act of 1948. Most of the loans are administered by the Export-Import Bank as agent for the International Cooperation Administration. The earlier loans, made primarily to assist the European countries in the restoration of their economies subsequent to World War II, are generally for a period of 35 years, which includes a grace period of approximately 7 years on repayment of principal. Current mutual security loans generally are made for a period of 30 to 40 years, and basic materials development loans are for 10 to 20 years.

Interest rates for both programs are determined by the Administration upon advice of the National Advisory Council on International Monetary and Financial Problems. Most of the older loans carry an interest rate of 2½%. In the case of most current loans, the borrower may choose to repay in dollars or in local currencies. The current interest rate is 3½%; it is generally equal to the Treasury cost of borrowing for securities with comparable maturities.

New commitments of $327 million are estimated for 1960, all of this in foreign currencies, representing a substantial increase over 1959. This total does not include any estimate for new loans in 1960 under the mutual security program, which committed $136 million in 1958.

DEVELOPMENT LOAN FUND

The Development Loan Fund is a new source of financing for economic development abroad, authorized by the Mutual Security Act of 1957. It makes loans and guarantees loans to governments of underdeveloped nations or to organizations and persons therein. The fund was incorporated in 1958 (Public Law 85–477).

A total of $700 million has been appropriated for 1958 and 1959; an additional $225 million is included in the budget for 1959 and $700 million for 1960. Loans are repayable in either dollars or local currency, as particular circumstances may dictate. It is anticipated that loans will average a period of 20 years' duration. Interest rates are determined by the board of directors upon advice of the National Advisory Council on International Monetary and Financial Problems, and range from 3½% to 6%.

As of June 30, 1958, the Development Loan Fund had entered into 6 loan agreements involving 5 countries. The first repayments of loans will begin during 1959, but will not reach appreciable amounts until 1960.

Cost of administering the loan program is financed from the loan funds appropriated to the agency.

New commitments are expected to increase from $102 million in 1958 to $500 million in 1959 and $698 million in 1960, almost entirely in dollars. Net expenditures will reach $197 million in 1960.

Special Analysis F

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION

To carry out the functions prescribed by law, Federal, State, and local governments require a wide variety of structures ranging from schools, hospitals, and roads to multipurpose dams and military bases. The Federal Government provides for some of these facilities by direct construction. In addition, some State and local projects are aided by Federal grants and loans. Federal public works expenditures, therefore, indicate the magnitude of a segment of long-term capital investment which is important to the construction industry and to the economy as a whole. The Federal Government also provides assistance for private capital facilities through loans, loan guaranties, tax concessions, and lease contracts; however, Federal budget expenditures in connection with these programs are not an adequate measure of the volume of construction activities stimulated by such aid.

This special analysis gives major emphasis to Federal expenditures for public works, although some data are included relating to Federal programs affecting private construction.

Most public works are built by the private construction industry under contracts with public agencies. For direct Federal construction, the Federal disbursements shown in this analysis approximate the value of work put in place. In the case of State and local construction, however, Federal grant and loan disbursements may precede or follow the work put in place.

Direct Federal construction currently constitutes more than 6% of the total value of new construction. State and local public works benefiting from Federal aid represent another 7%, nearly two-thirds of which is financed from Federal grants. The Federal share varies substantially among the grant programs, depending upon the program objectives and provisions of law.

Table 1 summarizes Federal budget and trust fund expenditures for public works for the years 1951 through 1960.

Total Federal public works expenditures are currently at a level higher than that in any year since World War II, and are expected to increase further in the fiscal year 1960 to a total of $7.2 billion. Civil public works expenditures will increase by almost $700 million from the 1959 level, largely as a result of the expanding Federal-aid highway program financed from trust funds. This program accounts for about 42% of total public works expenditures in 1960. In addition, combined expenditures for water resources projects of the Corps of Engineers and the Bureau of Reclamation are expected to reach a record level in 1960, as construction progresses on work underway. Construction of military facilities of the Department of Defense, which makes up almost one-fourth of total public works expenditures in 1960, will be $310 million below the 1959 total, as the initial phase of construction for the dispersal of the Strategic Air Command bomber forces is scheduled to be completed in 1959.

Table 1.—*Federal expenditures for public works, fiscal years 1951–60*

Note.—In this and the following text tables nonconstruction costs are excluded; proposed legislation is included for the estimated years 1959 and 1960. Totals may not add because of rounding.

Federal expenditures for capital improvements of cooperatives and nonprofit groups are not included in the public works totals but are listed in table 8; they are estimated at $489 million in 1960, including loans of $399 million.

Civil Public Works

"Civil public works," as used in this analysis, relates to construction required for Federal civil programs as distinguished from those required for national security. The term encompasses flood control, navigation and irrigation projects, veterans hospitals, public buildings, and other construction undertaken directly by the Federal Government, as well as grants and loans to State and local governments for highways, hospitals, waste treatment works, and other facilities. Federal expenditures for civil public works, by agency, from budget accounts and trust funds for the years 1958 through 1960 are summarized in table 2.

CONTINUING AND NEW WORK

Civil public works activities in 1960 are shown in table 3 according to whether they will be continuing or newly undertaken. The table also indicates the total cost and the amount required to complete the projects expected to be underway in 1960.

By far the greater portion of budget expenditures in 1960 for civil public works will be for continuation of work started in prior years. In 1958 and 1959, increases were provided in various public works programs, partly to combat the recession. The programs included direct construction for water resources projects, air navigation facilities, public buildings, and roads and structures in the national parks system and national forests, and on Indian lands. Some of the federally aided programs were also expanded, such as highways, health facilities and college housing.

Table 3.—*Estimated cost of the 1960 civil public works program, by new and continuing work*

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

In view of the large volume of funds required to finance the current record level of civil works construction and the urgent requirements for national security and other civil programs, the 1960 budget does not provide additional funds for starting construction of new public works projects in a number of programs. In addition, some civil works construction programs will be stretched out where this can be done without stopping work. Despite such economies, expenditures for civil public works are estimated at a record $5.2 billion in 1960. The increase results largely from commitments on civil works programs and projects started in earlier years.

INVESTIGATIONS AND STATUS OF PLANNED AND AUTHORIZED PROJECTS

To assure economical design and construction of public works, adequate basic data, comprehensive investigations and surveys, and detailed project planning are required. Construction expenditures shown in this analysis do not include costs of basic data collection and preliminary surveys, but they do include detailed project planning costs.

Basic data.—Federal programs for the collection of basic data serve a wide variety of civil and national security purposes. A total of $64 million is recommended for the collection of general coverage data, and $81 million to serve the particular needs of the military agencies. These data include control surveys; topographic, geologic and soil surveys and maps; and hydrographic, hydrologic and climatologic data for nautical and aeronautical charts. In addition to their usefulness in the investigation and planning for Federal and other construction projects, the data serve a variety of other engineering, industrial and scientific purposes, including the determination of the size and shape of the earth, necessary for missile programs.

Preliminary surveys and investigations.—In order to determine the basic need for and the engineering and economic feasibility of individual projects, careful preliminary investigations are required. Inadequate examination of the factors involved in project formulation before authorization may result in approval of projects having questionable justification or in seriously underestimating project costs. Preliminary investigations of river basin and other construction programs will require expenditures of $16 million in 1960. In addition, an appropriation of $3 million is recommended to permit the Housing and Home Finance Agency to make grants to the States and metropolitan areas for assistance in general community planning.

Detailed planning.—Detailed planning of projects in advance of construction provides for orderly programing of project construction and may prevent expensive changes in project designs during the construction period. Such planning also provides an opportunity to verify the economic feasibility of projects, as well as their estimated cost, before construction is started. Expenditures for detailed advance planning in 1960 are estimated at $41 million, including some site costs as shown in table 3.

The budget also includes $7 million to permit the Housing and Home Finance Agency to make repayable advances to State and local agencies for the planning of public works.

Authorized reserve.—A reserve of soundly conceived authorized projects provides a basis for a wise selection of projects for advance planning and for starting in accordance with program needs and economic and budgetary policy. Projects within the reserve have been authorized by substantive legislation and thus require only financing and planning for starting. Agency reports, on the basis of present costs, indicate that $14.6 billion of authorized work will be in reserve for starting after 1960. About $9 billion of the reserve is included in the river basin programs of the Corps of Engineers and the Bureau of Reclamation.

The authorized reserve of Federal projects is shown in table 4, by status of plans and major agency. A substantial amount of planning will also be done by State and local agencies on highways and other programs for which Federal grants are made.

TABLE 4.—*Reserve of presently authorized projects and programs for undertaking after 1960*

[In billions]

Agency	Cost of authorized reserve						
	Estimated total Federal cost	Status of plans as of June 30, 1959			Status of plans as of June 30, 1960		
		Planned to stage where contract could be let	Plans in process	Plans not started	Planned to stage where contract could be let	Plans in process	Plans not started
Corps of Engineers, Army	$5.7	$0.9	$3.1	$1.7	$1.3	$2.7	$1.7
Bureau of Reclamation	3.3	.5	1.8	1.0	.5	1.7	1.1
Tennessee Valley Authority	1.7	.3	.5	.9	.5	.5	.7
Forest Service	1.3	.1	1.2	-------	.1	1.2	-------
Federal Aviation Agency	1.1	.2	.5	.4	.3	.5	.3
National Park Service	.7	(1)	.1	.6	(1)	.2	.5
Other agencies	.8	(1)	.2	.6	.1	.3	.4
Total	14.6	2.0	7.4	5.2	2.8	7.1	4.7

[1] Less than $50 million.

PROGRAMS BY MAJOR FUNCTION AND TYPE OF FACILITY

Table 5 summarizes civil public works expenditures according to the functional classification used in the budget, with subclassifications according to type of facility. Public works represent only a small portion of the total costs of some functional programs. For other functions, such as natural resources, over two-thirds of the expenditures are for construction projects. In 1960, it is expected that about 88% of total civil public works expenditures, including those from trust funds, will be for the natural resources and commerce and housing functions.

[1] Forest and public lands highways are included in highway trust funds in 1960.

NATURAL RESOURCES

Multiple-purpose control and development of rivers and streams for flood control, navigation, irrigation, hydroelectric power, municipal water supply and related purposes will require a major portion of the $1.2 billion to be spent in 1960 for natural resources construction programs. The remainder will be for the conservation and development of forests, mineral, recreational, and fish and wildlife resources, and for roads, utilities, and schools on Indian lands.

Corps of Engineers, Army.—The program of the Corps of Engineers is nationwide in scope, except for the Tennessee Valley area. Appropriations recommended for 1960 will finance continuation of work on 65 navigation projects, 21 multiple-purpose projects including power, 1 beach erosion control project, and 99 predominantly flood control projects. Work will be substantially completed in 1960 on 2 multiple-purpose projects including power, 9 flood control reservoirs, 13 local protection projects, 14 navigation improvements, and 4 bridge alterations. The Corps will add 392,000 kilowatts of power-generating capacity to the Federal system in 1960.

The Saint Lawrence Seaway Development Corporation.—Construction on that part of the Saint Lawrence Seaway which is within United States territory is nearly completed. This construction is related to navigation improvements being built by Canada and to power developments by the State of New York and the Province of Ontario. The seaway is expected to be opened to deep-draft traffic in the spring of 1959, although additional improvement of the shipping channel is contemplated.

Bureau of Reclamation.—The Bureau will continue work in the 17 Western States on 57 projects for irrigation, water supply, flood control, and hydroelectric power, of which 9 will be substantially completed in 1960. Included in the total are 19 units of the Missouri Basin project and 5 units of the Upper Colorado River storage project. During the year, irrigation water will be available on 75,600 new acres and 61,800 supplemental acres of land, and 48,000 kilowatts of new generating capacity will be installed. Under the loan program for distribution systems and small reclamation projects, 8 local irrigation and water supply projects will be underway.

International Boundary and Water Commission.—The Commission and a similar agency of Mexico participate in the construction of water conservation and control facilities on the Rio Grande River. The Anzalduas Dam, started in 1956, and related works will be continued in 1960.

Tennessee Valley Authority.—The major part of the public works expenditures by the Tennessee Valley Authority in 1960 will be for continuation of construction on steam and hydroelectric generating facilities underway. Additional generating capacity will be provided at Wheeler Dam and Colbert steam plant, financed by proceeds from operations. The expenditure estimate includes amounts based upon the anticipated enactment, early in calendar year 1959, of legislation permitting issuance of Tennessee Valley Authority revenue bonds to finance needed new power-generating facilities. Construction will continue on the new lock at Wilson Dam, financed from appropriated funds. Other construction includes work on transmission facilities, chemical facilities, and general-use buildings.

Summary of Federal electric power activities.—Federal resource development programs include provision for generation of electric power at hydroelectric facilities of Federal multiple-purpose reservoir projects and at steam-electric facilities of the Tennessee Valley Authority. At the end of the calendar year 1958, Federal agencies operated generating capacity amounting to 20.9 million kilowatts. This was about 15% of the total capacity of major electric utility systems in the United States. Additional capacity of 2.3 million kilowatts, scheduled for completion during the calendar years 1959 and 1960, will bring the Federal capacity to 23.2 million kilowatts. Over 28.3 million kilowatts of Federal generating capacity are now in operation, under construction, or programed. In addition, construction of privately owned generating capacity of 2.1 million kilowatts was financed by Rural Electrification Administration loans through the fiscal year 1958.

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

TABLE 6.—*Federal electric power generating capacity, in operation and presently scheduled (nameplate)*

[Million kilowatts]

Agency	Dec. 31, 1958	Total scheduled
Corps of Engineers, Army	5.86	10.11
Bureau of Reclamation	5.12	6.32
Tennessee Valley Authority	9.93	11.88
International Boundary and Water Commission	.03	.03
Total	20.94	28.34

The Bureau of Reclamation, Tennessee Valley Authority, and Bonneville and Southwestern Power Administrations will construct additional transmission facilities for marketing federally produced power and for integration of certain Federal power projects. The addition of 920 miles of line in 1960 will result in a Federal transmission system total of 29,700 miles. Expenditures in 1960 for construction of these facilities will amount to $75 million. (These expenditures are included in the agency figures discussed above.)

Summary of water resources and related developments.—Although the natural resources function includes the major part of water resources development, other water resource developments are carried out under the agriculture and agricultural resources and labor and welfare functional classifications. Table 7 brings together expenditures for all water resources and related developments.

TABLE 7.—*Budget expenditures for water resources and related developments*

[In millions]

Type	Functional code No.	1958 actual	1959 estimate	1960 estimate
Flood control works:				
Bureau of Reclamation	401	$0.7	$1.2	$0.7
Corps of Engineers, Army	401	197.0	223.5	242.8
Department of Agriculture	354	17.0	27.4	29.2
International Boundary and Water Commission	401	1.5	2.3	1.0
Tennessee Valley Authority	401	.4	.5	.1
Total, flood control works		216.6	254.9	273.8
Beach erosion control: Corps of Engineers, Army	401	.2	1.0	1.0
Irrigation and water conservation works:				
Bureau of Reclamation	401	85.1	79.7	75.9
Loan and grant program	401	.3	9.8	6.8
Department of Agriculture	354	.4	.3	.1
Bureau of Indian Affairs	401	3.4	5.1	3.4
Total, irrigation works		89.2	94.9	86.2
Navigation facilities:				
Corps of Engineers, Army	401	169.9	182.9	195.8
Saint Lawrence Seaway Development Corporation	401	47.9	17.3	4.5
Tennessee Valley Authority	401	15.8	8.6	2.9
Total, navigation facilities		233.6	208.8	203.2
Multiple-purpose dams and reservoirs with hydroelectric power facilities:				
Bureau of Reclamation	401	88.4	122.1	104.5
Corps of Engineers, Army	401	186.4	157.4	224.3
International Boundary and Water Commission	401	.3	.9	.1
Tennessee Valley Authority	401		4.0	15.0
Total, multiple-purpose facilities		275.1	284.4	343.9
Steam-electric powerplants: Tennessee Valley Authority	401	82.9	100.1	76.4
Power transmission facilities:				
Tennessee Valley Authority	401	21.6	24.4	33.0
Bureau of Reclamation	401	8.8	11.4	17.1
Bonneville Power Administration	401	25.5	20.2	23.6
Southwestern Power Administration	401	.9	1.0	.8
Total, power transmission facilities		56.8	57.0	74.5
Waste treatment facilities: Public Health Service, grants	213	16.9	30.0	30.0
Total, water resources and related developments		971.3	1,031.1	1,089.0

Other natural resources programs.—Under the natural resources function there are also programs for the construction of roads and trails in the national forests, national parks and Indian reservations, and on other public lands, and for the continuation of work on 8 national parkways. Provision is also made for the construction of buildings, utilities, and other facilities in the 189 park, monument, and other areas comprising the National Park System. Fiscal year 1960 marks the fourth year of a 10-year development program, known as Mission 66, which is expected to provide for the needs of over 80 million visitors to the National Park System on completion. Provision is also made for recreational facilities in the national forests.

The Bureau of Indian Affairs will continue work on irrigation projects and on schools. Work will also proceed on fish hatcheries, wildlife refuges, and other structures.

COMMERCE AND HOUSING

Structures required in support of programs under this heading include roads, airports, air navigation facilities, space research facilities, housing, post offices, and other structures. Most of the construction is carried on by State and local authorities, with Federal aid in the form of grants and loans.

Highways.—The largest program in this function is for roads. Under the Federal Aid Highway Acts of 1956 and 1958, a separately financed Federal trust fund has been established to provide for 90% of the total cost of a 41,000-mile interstate system of roads by 1970. The remaining 10% of the cost is to be provided by the States. In addition, the trust funds will finance the Federal share of the cost of the Federal-aid primary and secondary systems and urban extensions on such systems. During 1960, it is expected that 9,800 projects costing $4.7 billion will be approved. Of this amount, $3.4 billion represents the Federal share. Payments to the States from the highway trust fund in 1960 for the Federal share of the cost of completed work will approximate $3 billion. The budget proposes that public lands highways and forest highways, which are an integral part of the highway system, also be financed from the trust fund beginning with 1960.

Substantial progress toward completion of the Woodrow Wilson Memorial Bridge near the District of Columbia is expected in 1960.

Airports, air navigation, and research facilities.—The Federal Aviation Agency, created in August 1958, has assumed the functions of the Civil Aeronautics Administration, as well as the Airways Modernization Board and part of the responsibilities of the Civil Aeronautics Board. The new agency administers a program of grants for public airport construction, installs air navigation facilities, and conducts research directed toward increasing the safety of air navigation. In the District of Columbia area, the Agency is administering the construction of a new airport near Chantilly, Va., for which appropriations of $63 million have been made.

In October 1958, the National Aeronautics and Space Administration was created, supplanting the predecessor National Advisory Committee on Aeronautics and giving new emphasis to research on space problems. In response to this orientation, a space projects center has been started at Beltsville, Md., and the pilotless aircraft station at Wallops Island, Va., is being expanded to accommodate space vehicles. Improvements and additions to facilities of existing research centers will also be made in 1959 and 1960.

Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

Housing and community development.—As a result of previous commitments, expenditures for loans to public institutions for the construction of dormitories will amount to $112 million in 1960. The Public Housing Administration assists in the construction of low-rent public housing units through loans and annual contributions contracts. The 1960 budget provides for construction of 35,000 units placed under contract in prior years. Other significant expenditures consist of (*a*) loans for public facilities under the Housing Act of 1955 and (*b*) interest-free advances to State and local public agencies for the planning of local public works, under the Housing Act of 1954.

Other facilities.—The Post Office Department will continue in 1960 its program of major renovation and modernization. The Panama Canal Company will spend $7 million on employee quarters, various canal improvements and other construction. Work will continue on the Balboa Bridge over the Panama Canal. The Coast Guard will construct aids to navigation and shore facilities required to carry out the functions of that agency.

VETERANS' SERVICES AND BENEFITS

Work will continue on construction of a veterans' hospital at Palo Alto, Calif., and on replacement facilities at Downey, Ill. A neuropsychiatric hospital at Cleveland, Ohio, and a hospital replacement at Jackson, Miss., are scheduled to be started in 1959. Work will go forward in 1960 on the replacement of the hospital in Nashville, Tenn. The budget also provides for architectural plans for a 400-bed hospital building at Oteen, N. C.

This function also includes the construction of monuments and cemeteries by the Quartermaster General of the Army, and the construction of monuments and cemeteries in foreign countries by the American Battle Monuments Commission.

INTERNATIONAL AFFAIRS AND FINANCE

The extension and remodeling of the State Department building in Washington, D. C., will be nearing completion in 1960. Construction will continue on office buildings and living quarters for the United States Government abroad, and radio facilities for the Voice of America. Power and water systems are being built in the Ryukyu Islands by the Department of the Army.

LABOR AND WELFARE

A major part of the Federal public works expenditures for the labor and welfare function consists of grants to State and local authorities for hospitals, schools, and other facilities. Direct Federal expenditures are made for research facilities, museums, and other structures.

Health facilities.—The Department of Health, Education, and Welfare administers a program of grants to aid in the construction of hospitals and health research facilities. About 45% of the hospital grants and 25% of the health research facilities are made to State and local authorities. These amounts are reflected in the public works expenditures in this analysis. Grants for nonprofit groups for such facilities are in another section of this analysis, and are shown in table 8. The Department also provides hospitals on Indian reservations.

Education and research facilities.—In 1960, about $50 million will be spent by the Federal Government for assistance for school construction in areas substantially affected by Federal activities. The Smithsonian Institution will make substantial progress toward completing the Museum of History and Technology. Planning will proceed on additions to the Natural History Building in the District of Columbia.

Grants for construction of waste treatment works.—The Public Health Service administers a program of grants to communities to stimulate and assist in the construction of waste treatment facilities. Legislation is recommended to discontinue Federal grants for construction of waste treatment plants so that the States can assume full responsibility for these structures starting in 1961.

AGRICULTURE AND AGRICULTURAL RESOURCES

The Department of Agriculture provides assistance to States and local groups for the installation in upstream watersheds of works to prevent damage from soil erosion, flood water, and sedimentation, and to further the conservation, development, utilization, and disposal of water. No additional funds are recommended for 1960 to initiate construction on watershed projects under the Watershed Protection and Flood Prevention Act. However, funds available from the 1959 appropriation will permit starting a total of 100 projects over the 2-year period. The program of upstream flood prevention work in the 11 watershed areas authorized by the Flood Control Act of 1944 will continue. In addition, the Department of Agriculture will build facilities for research and will provide grain storage facilities in 1960.

GENERAL GOVERNMENT

Administrative and other buildings required to carry on the Government's business represent a major portion of the construction activities reported under this functional classification. The Congress appropriated funds to the General Services Administration for 1959 for the direct construction of 48 public buildings, including 46 heretofore approved under the lease-purchase program, and 2 special-purpose projects. Substantial progress toward completing these buildings is expected in 1960. In addition, major renovation and air conditioning of existing Federal buildings is contemplated.

Work will continue in the District of Columbia on a new office building for the House of Representatives, and on the extension of the east wing of the Capitol. Legislation is proposed in 1959 to permit the Government Printing Office to construct a $5 million annex to be used as a warehouse. The construction program of the Canal Zone Government for 1960 will include schools, streets, and sewage disposal facilities. Also, planning will begin on a medical center which is to be a partial replacement of Gorgas Hospital. In addition, the Federal Government will continue to provide assistance through grants and loans for construction of various community facilities in Samoa, the Trust Territory of the Pacific Islands, and the District of Columbia.

MAJOR NATIONAL SECURITY CONSTRUCTION

The Federal Government will spend $2 billion in 1960 for major national security construction, $270 million below the 1959 level.

Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

Military construction.—A substantial amount of construction is required to support the current and long-range programs for strengthening our military defenses. Provision is also made for the modernization, repair, and replacement of facilities at existing installations of the Department of Defense.

A major portion of the facilities needed by the Armed Forces relates to missiles and their support. Funds are provided in the 1960 program for additional NIKE-HERCULES and BOMARC air defense missiles sites and for improvement of the existing radar warning system. The budget also provides for sites and support for the ATLAS and TITAN, POLARIS and NIKE-ZEUS missile systems, as well as continued progress toward completion of the ballistic missile early warning system. With the initial phase of the dispersal and alert readiness facilities for the Strategic Air Command bomber forces scheduled for completion in 1959, the 1960 expenditures for construction by the Department of Defense are estimated at $1.7 billion, $310 million less than in 1959.

Atomic energy facilities.—In 1960, construction by the Atomic Energy Commission will relate primarily to production plants and to research and development installations started in earlier years. Progress is scheduled for the heavy water component and the plutonium recycle test reactors, as well as the gas cooled power reactor, fast power breeder pilot facility, fuels technology center, cooperative power reactor demonstration project, destroyer reactor plant, and the power reactor development acceleration project. Also, the high energy accelerator program will go forward. Projects to be started in 1960 include improvements and additions to existing production plants, and facilities for physical, medical, and biological research.

OTHER FEDERAL ACTIVITIES IN CONSTRUCTION

In the foregoing sections of this analysis the effect of Federal expenditures on construction has been limited to additions to Federal, State, and local government physical assets, which are called public works. Apart from public works there are other types of Federal activities, involving loans, loan guaranties, grants, or direct Federal expenditures, which affect construction.

ASSISTANCE TO COOPERATIVES AND NONPROFIT GROUPS

The Federal budget provides funds for construction by privately owned cooperatives and nonprofit groups whose functions are of a quasi-public nature. Expenditures for these programs are shown in table 8.

TABLE 8.—*Federal expenditures for cooperative and nonprofit groups (not included in civil public works)*

[In millions]

Program	1958 actual	1959 estimate	1960 estimate
Federal construction:			
Construction, Howard University	$2.1	$3.2	$1.4
Construction, Gallaudet College	2.0	2.5	1.1
Grants:			
Hospital construction	57.9	67.5	70.3
Hospital facilities in the District of Columbia	.9	1.9	1.4
Construction of research facilities	9.2	15.0	15.0
Loans:			
Rural electrification, gross	288.2	315.0	325.0
College housing, net	66.1	93.4	74.4
Total	426.4	498.5	488.6

The Rural Electrification Administration makes loans to rural cooperatives and private companies to finance electrical and telephone facilities. The Public Health Service provides grants not only to the publicly owned but also to privately owned hospitals and medical facilities. Similarly, the Housing and Home Finance Agency makes loans for college housing to both public and private institutions. Legislation is being recommended to assist Rural Electrification Administration borrowers and educational institutions to obtain financing from private sources. Table 8 includes only the grants and loans to nonpublic groups; those made to public groups are included in the public works totals.

AIDS FOR PRIVATE CONSTRUCTION

A wide variety of Federal incentives in the form of loans, loan guaranties, tax concessions, grants, and other assurances, is available to stimulate construction on homes, farms and businesses.

Under the lease-purchase authority provided in 1954, which expired in July 1957, the General Services Administration and the Post Office have undertaken 34 projects with maximum construction costs estimated at $63 million. Under this plan, Federal buildings are built by private interests and paid for by the Federal Government over a period of 10 to 25 years, after which the buildings will be owned by the Federal Government. The Post Office estimates that in response to its commercial leasing program, 650 buildings costing about $36 million will be built in 1959 and 1,160 buildings costing about $140 million in 1960. These structures are for long-term occupancy by the Federal Government, but are not intended for Federal ownership.

The Housing and Home Finance Agency provides assistance to communities for orderly redevelopment. Approximately 650 urban renewal projects are now underway or completed in more than 380 cities. Through the Federal Housing Administration and the Veterans Administration, programs of insurance or guaranty of mortgages on private housing are conducted, thereby providing incentives for a higher level of construction on such housing than would otherwise be the case. The Farmers' Home Administration makes direct loans for farm houses, buildings, and water facilities, and insures private loans for these purposes. The Commodity Credit Corporation provides loans for the construction or expansion of privately owned grain storage facilities.

Summary of Federal budget expenditures for public works according to categories used in special analysis D, "Investment, operating, and other budget expenditures"

[In millions]

Public works listed under—	1958 actual	1959 estimate	1960 estimate
Additions to Federal assets:			
Loans to State and local governments, net	$117	$204	$166
Public works—sites and direct construction:			
Civil	1,252	1,612	1,812
Major national security	1,964	2,243	1,973
Expenditures for other developmental purposes: State and local physical assets: Grants-in-aid	242	285	233
Total budget expenditures for public works	3,575	4,344	4,184

Special Analysis G

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Federal financial assistance to State and local governments takes the form of direct grants-in-aid, shared revenues, and net loans and repayable advances. The increase of $2 billion between 1958 and 1960 indicates the significance of support from these sources.

In 1960, total estimated assistance, exclusive of administrative costs to the Federal Government, is $7.1 billion, including net expenditures of $4.1 billion from regular budget accounts and $3.0 billion from the highway trust fund. Total financial aid, therefore, represents nearly 9% of total Federal cash payments to the public.

Included in the foregoing total is $16.5 million of expenditures in 1960 under proposed legislation authorizing a special transitional grant to Alaska and assistance to areas of chronic unemployment. In addition, other legislative proposals which are discussed later will affect expenditures in future years.

For 1960, the total of budget and trust expenditures for financial assistance to other levels of government is expected to be $454 million higher than in 1959 and $2.1 billion larger than the revised total for 1958. As in recent years, the most important factors in this increase are attributable to the scheduled acceleration of the highway program and for public assistance. Although the number of programs is large, about 70% of total expenditures for assistance to State and local governments is contained in these two programs. Stimulative grants primarily for laboratory equipment and counseling to students under the new National Defense Education Act of 1958, will total $54 million, an increase of $8 million over 1959. For a portion of 1959 and in succeeding years, grants will be made for sharing in the cost of State and local civil defense personnel and administration; these will total $12 million in 1960. A net decrease of $62 million in other programs occurs primarily in the national school lunch and special milk programs, contributions to schools and other public agencies of surplus agricultural commodities, assistance to schools in federally affected areas, public health grants, and Indian educational and welfare services.

Table 1.—*Federal aid expenditures in relation to total Federal budget expenditures and to total State-local revenues*

Fiscal year	Net budget expenditures for aid to State and local governments (millions)	Federal-aid expenditures as percent of—	
		Total Federal expenditures (net)	State-local revenues [1]
1951	$2,434	5	9
1952	2,604	4	9
1953	2,857	4	9
1954	2,657	4	8
1955	3,124	5	9
1956	3,753	6	9
1957	3,159	5	7
1958	[3] 3,576	5	7
1959 estimate	[4] 4,154	5	([2])
1960 estimate	[5] 4,133	5	([2])

[1] Based on compilations published by the Governments Division, Bureau of the Census.
[2] Not available.
[3] When grants-in-aid from the highway trust fund are added, net expenditures total $5,069 million, 6% of total Federal cash payments to the public and Federal aid as a percentage of State-local revenues will be higher.
[4] When grants-in-aid from the highway trust fund are added, net expenditures total $6,695 million, 7% of total Federal cash payments to the public, and Federal aid as a percentage of State-local revenues will be higher.
[5] When grants-in-aid from the highway trust fund are added, net expenditures total $7,148 million, 8.6% of total Federal cash payments to the public, and Federal aid as a percentage of State-local revenues will be higher.

Grant programs constitute the largest type of Federal financial assistance being $6.9 billion or 95.8% of the total expenditures for all three types of aid. Shared revenues account for $119 million or 1.7% and net loans and repayable advances for the remainder, or $178 million, which is 2.5% of the grand total.

Included in the three kinds of financial assistance from budget and trust accounts are civil public works projects which add to State-local assets and the development of our communities. These represent an increasing portion of total Federal assistance outlays—48% in 1960 as compared to 44% in 1959 and 37% in 1958. (See summary at end of detailed table and table 4.)

Development of Federal aid.—Federal aid to State and local governments, in recent decades, has become a major factor in the cooperative financing of essential government functions. The rudiments of the present system date back to the Civil War with the enactment of the Morrill Act which established the land-grant colleges and which instituted certain federally required minimum standards, characteristic of the present grant-in-aid system. Federal aid was later initiated for agriculture, highways, vocational education and rehabilitation, forestry, and public health. In the depression years, Federal aid was extended to meet economic security and other social welfare needs. The detailed table at the end of this analysis lists the various programs of Federal financial assistance to State and local governments presently available or proposed for enactment.

Pursuant to a recommendation of the Commission on Intergovernmental Relations, the President in 1956 designated the Office of the Deputy Assistant to the President for Intergovernmental Relations to give continuing attention to interlevel problems of government. As one of its assigned duties, this office has functional responsibility for problems associated with the Federal aid system as a whole. A special assistant to the President is charged with advising on the implementation of the recommendations of the Commission on Intergovernmental Relations.

The Joint Federal-State Action Committee.—The Joint Federal-State Action Committee of governors and Federal representatives, created in July 1957 by the President and the Governors' Conference, has been engaged in a review of functions—including grants-in-aid—now performed by the Federal Government which could be assumed by the States and localities. At the same time, the Joint Committee has been reviewing those Federal revenue sources which could be relinquished to the States for the financing of programs or activities transferred to State or local governments.

This Committee, in its initial progress report, recommended the transfer of complete responsibility for vocational education and waste treatment construction grants from the Federal Government to the States. At the same time, to assist the States in financing these responsibilities, the Committee recommended that the Federal tax on local telephone service be reduced 40% following a tax credit arrangement for 5 years. The report also called for strengthening of State and local activities in urban renewal, peaceful uses of atomic energy, and for larger State and local financial participation in natural disaster relief.

The continued strength of our Federal system depends upon the States and local governments assuming greater fiscal and administrative responsibilities for functions they can best perform. To this end, the President is again

SPECIAL ANALYSIS G—Continued

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS—Continued

recommending enactment of the proposals made by the Joint Committee as modified in its second report. The revised 5-year tax credit arrangement provides for: (1) a credit for new or increased taxes paid to the States on local telephone service equal to 30% of the Federal tax, or 3 percentage points of the present 10% Federal tax; and (2) the revenue equivalent of 1% of the Federal tax to be appropriated and distributed as Treasury grants to certain States as an equalizing factor. Thus, the combined credit and Treasury distribution equals 40% of the telephone tax, as originally agreed. The 1% distribution would be sufficient to supplement the credit in 37 States and the District of Columbia so as to bring each a total of at least 140% of its present grants for vocational education and waste treatment projects. The other States would receive in excess of 140% of present grants from the 3% credit alone and, therefore, would not be eligible for the supplementary Treasury funds.

The effective date of these recommended legislative charges is July 1, 1960, to permit the States to take necessary action, and hence their financial effect will be reflected in the 1961 budget.

Legislation will also be proposed in the coming session of the Congress to recognize the responsibility of State governments for cooperating with the Federal Government in protecting the public from health and safety hazards in the peaceful uses of atomic energy. The Committee's recommendation that States and localities share with the Federal Government necessary expenditures for natural disasters will be placed in effect by the Office of Civil and Defense Mobilization on July 1, 1959.

The continuing work of the Joint Action Committee is expected to result in additional recommendations for transfers of functions and revenue sources. The Committee will also study emerging problems with a view toward encouraging early action by State and local governments to assume their appropriate responsibilities in dealing with such problems.

Grants-in-aid.—Federal financial participation in programs administered by States and local governments in 1960 will total $6.9 billion (including $3.0 billion from the highway trust fund), an increase of $586 million over the estimated total for 1959. The labor and welfare category accounts for 45% of grant-in-aid expenditures in 1960; commerce and housing, 48% (including highway trust fund expenditures); agriculture and agricultural resources, 5%.

About 70%, or $5 billion, is for grants to build highways and for public assistance.

The various grant-in-aid programs provide for Federal fiscal participation in a specific function or service rendered by a State or local government. Most grant-in-aid statutes require that State and local programs meet certain standards and provide for the allocation of money among the States in accordance with various formulas. These allocation formulas vary considerably among programs. Some are statutory while others are established by the administering Federal agency on the basis of criteria listed in the laws. Some provide for distribution according to population, area, per capita income, incidence of specific diseases, road mileage, etc.; others allot equal amounts to all States. Still others allot on a fixed percentage of State expenditures up to a specified limitation contained in the Federal law.

Generally the amounts expended for most programs of Federal aid are subject to the establishment of maximum amounts in the authorizing statutes and the necessity for annual appropriations by Congress. However, in the public assistance program the amount paid to each State is determined by a statutory formula applied to actual caseloads and individual benefit rates established by each State up to the statutory maximum subject to matching. Consequently the amount appropriated in advance does not necessarily limit the total of Federal payments for a given year. Congress customarily provides a supplemental appropriation if this is necessary to cover the claims submitted by the States.

The vocational rehabilitation formula enacted in 1954 provides for variation by States in both the allotment of funds and the requisite matching share, in inverse proportion to per capita income. Under the National Defense Education Act of 1958, grants for acquisition of equipment for science, mathematics, and foreign language instruction in public elementary and secondary schools are allotted to the States according to a national formula based on the relative school-age population of the State (positive relationship) and relative income per child of school age (inverse relationship).

Legislation governing a few grant-in-aid programs permits aid to private nonprofit agencies or institutions. The program of grants to aid in the construction of hospitals and other health facilities, administered by the Department of Health, Education, and Welfare, is an illustration. It is estimated that 55% of the Federal expenditures of $128 million for these grants in 1960 will be used for nonprofit hospitals and other private health facilities. The program, nevertheless, is one in which the States have a central role through the preparation of statewide programs, the approval of individual projects, and the channeling of the Federal payments. Therefore, the entire amount authorized and spent for the program is included as Federal aid in this table. The part going to private institutions is indicated separately.

On the other hand, certain Federal programs may incidentally involve grants to particular State or local governmental agencies, even though they are not primarily programs of grants-in-aid or loans to State or local governments. For example, the Public Health Service and the National Science Foundation make research grants to colleges and universities, including some State and local institutions. These payments are not included in the tabulation.

In a few instances, grants-in-kind are made, usually involving commodities, services, or structures. Wherever these can be identified in the budget they have been included in this analysis. Principal among them are grants of agricultural commodities to schools, welfare departments, and other public agencies shown in the tabulation under agriculture and agricultural resources. These are supplementary to the cash grants to the national school

SPECIAL ANALYSIS G—Continued

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS—Continued

lunch and special milk programs, shown under labor and welfare. However, donations of previously acquired Federal property to State and local agencies have been omitted from the tabulation.

Alaskan and other transitional grants.—To assist the first new State in 47 years, the Federal Government will provide Alaska with a special form of transitional grant in 1960 and 4 years thereafter. The Federal Government has a responsibility to provide such financial assistance as is necessary to facilitate assumption by Alaska of such programs as highway construction and maintenance, airport operations, and public health services. Previously, as a territory, special provisions applied which will no longer be effective with respect to Alaska. This transitional grant is being provided to prevent curtailment or disruption of these essential services which are now federally administered.

The grant to Alaska will be authorized up to an amount not in excess of $10.5 million for 1960 and in declining amounts for 4 succeeding years. Under proposed legislation the State could receive the entire grant or could request that a share of the total be applied to continued Federal operations during an interim period. A large portion of these expenditures will be offset by elimination of special Federal programs which applied to Alaska as a territory. As a State, Alaska will be eligible like any other State for all grant programs available.

Legislation will be recommended to provide for an orderly withdrawal from the airport grant program by authorizing a transitional program of Federal grants to share the cost of basic facilities, such as runways and control towers. One-half, in place of three-fourths as now provided in the expiring law, of the funds appropriated would continue to be available to the States on the basis of the existing apportionment formula. The other one-half would be available for expenditure on a discretionary basis. Revenue-producing facilities, including terminals and hangars, would be locally financed. This program will require an estimated $65 million of new obligational authority in 1960, with smaller amounts in each of the next 3 years. No expenditures will be made in 1960 for this new program.

Shared revenues.—In the budget estimates for 1960, payments of shared revenues are estimated at $119 million, an increase of $13 million over 1959. As shown in the tabulation, the Mineral Leasing Act, national forest fund, and tax collections for American Samoa, Puerto Rico, and Guam constitute approximately 77% of all shared-revenue expenditures.

Classified as shared revenues are (*a*) payments to States and localities of a portion of the proceeds from the sale of certain Federal property, products, and services; and (*b*) payments to the Territories of certain Federal tax collections derived within their boundaries or from transactions affecting them. Shared revenues from property and products are derived mainly from public lands in the West, and the Federal law usually requires that the State or local share be used for schools or for schools and roads in the county where the Federal lands are located. The payment of tax collections to the Territories (e. g., internal-revenue collections for Puerto Rico, the Virgin Islands, and Samoa) are included in this analysis to the extent that they are included in budget receipts and expenditures. Some revenues collected under Federal laws for the benefit of the governments of Guam, Puerto Rico, and Virgin Islands are paid directly to those Territories, without affecting Federal budget accounts.

Loans and repayable advances.—Budget expenditures for loans are net amounts, representing for any year the gross amount of loans and advances minus credits for certain collections during the year. For 1960, net disbursements for loans and advances to State and local governments are estimated at $178 million, a decrease of $29 million from 1959. In a few cases, collections are not deducted from gross disbursements but, instead, are credited directly to miscellaneous receipts of the Treasury.

Loans are made to State or local governmental bodies by several Federal agencies for specified types of public improvements, such as low rent public housing, slum clearance, and urban renewal by the Housing and Home Finance Agency. Also included in the category of loans are certain advances made by the same agency for the planning of non-Federal public works and urban renewal; these advances are repayable if the planned projects are carried out.

The Temporary Unemployment Compensation Act of 1958 authorized payment of Federal extended unemployment benefits, in those States entering into agreements, equal to one-half of the benefit weeks provided by the State. Expenditures under this temporary program, which expires on April 1, 1959, totaling $48 million in 1958 and $412 million in 1959, are excluded from this analysis. Under the law these amounts must be restored to the Treasury through an automatic increase in the Federal unemployment tax starting in 1963, in those States receiving Federal payments, or they can be restored earlier from existing funds by State action.

Highway and Federal unemployment trust funds.—The Highway Revenue Act of 1956 established a trust fund into which proceeds from certain excises on motor fuels, tires, and vehicles are deposited and from which the Federal share of the new highway program is financed. The companion Federal-Aid Highway Act of 1956 authorized a greatly expanded Federal grant program to run over a 13-year period and to cover 90% of the cost of completing the Interstate Highway System. In addition, it provided for increased grants for primary, secondary, and urban highways.

In 1958, the Congress enacted special provisions applying to this fund, making additional money available to the States for acceleration of construction as an antirecession measure. Because of this factor and because of rising costs in this program, the President is recommending an increase of 1½ cents per gallon in the Federal tax on gasoline and is proposing other changes which will protect the future fiscal soundness of the highway trust fund.

The actual estimated receipts and disbursements of this trust fund are shown in table 2. During 1960, it is expected that grants-in-aid from this fund will total $3,015 million, an increase of $590 million over revised estimated expenditures for 1959, and $1,522 million higher than for actual 1958 costs.

Refunds of taxes	−90	−102	−93
Net accumulation (+) or expenditure (−)	+532	−410	−224
Balance in fund at close of year	1,049	639	415

Under the Employment Security Financing Act, any excess receipts of the Federal unemployment tax over operating costs of the Federal-State employment security program are transferred to the Federal unemployment account to maintain a $200 million loan fund. When the Federal unemployment trust account is at the $200 million level, any further excess tax receipts are credited directly to the States' unemployment trust accounts. No transfers are forecast for 1959 or 1960 but $33 million in payments were made in 1958, and are shown in this analysis as grants. In 1959 no excess is forecast; in 1960 the excess will be used toward restoring the $200 million loan fund. Transfers of funds to maintain the $200 million loan fund are not shown in this analysis since this is a Federal account, but repayable advances to the States from the account and repayments by the States are included on a net basis. States may borrow funds from this account for benefit payments when their own accounts have been depleted to a specified level. In 1959 these advances will total $116 million; no advances are forecast for 1960.

Proposed legislation.—In addition to legislation not previously mentioned, Federal aid to State and local governments would be affected by several of the recommendations for legislative change which are proposed in the 1960 budget. These include measures to expand State and local participation in the financing of (*a*) public assistance, (*b*) aid for construction and operation of schools in areas affected by Federal activities, and (*c*) urban renewal programs. They also include proposals (*d*) to increase private financing of college housing, (*e*) to establish a uniform basis for local cost-sharing in flood control projects, (*f*) to provide loans and grants to aid areas of chronic unemployment. Legislation will also be proposed to convert the financing of grants for administrative expenses of the employment security program to a trust fund basis, although this will not affect the level of expenditures under the program nor its inclusion in this analysis.

Relationship to other budget figures.—The totals for Federal aid in this analysis represent budget expenditures, as defined in the introduction to part I, except for expenditures from the Federal-aid highway and the Federal unemployment trust funds. Financial transactions relating to trust fund programs are shown in part III of the budget document.

In most cases, the expenditures in a given year correspond closely to the amount of the appropriation, but there are certain programs—chiefly construction—where there are substantial differences between appropriations (or other authority to incur obligations) for any year and expenditures in that year. This arises because construction projects usually cannot be completed and paid for within a year. In some instances the expenditures for grants or loans are made from an appropriation, which also finances direct Federal operations or Federal administrative expenses. When this occurs, the amounts tabulated in this analysis ordinarily represent an estimate of that part of the expenditure which is paid as aid to State and local governments.

The detailed tabulation of Federal expenditures for aid to State and local governments is arranged according to the functional classification used in the budget document. In order that this analysis may be related readily to the analysis of investment, operating, and other budget expenditures presented in special analysis D, that tabulation shows separately in each category the amounts of Federal aid to State and local governments. In table 3, the Federal-aid programs are recapitulated to follow the outline of special analysis D.

TABLE 3.—*Expenditures for Federal aid to State and local governments, classified as "Investment, operating, and other expenditures"*

[From budget accounts only. In millions]

Category	1958 actual	1959 estimate	1960 estimate

Natural resources	(1)	10	7
Commerce and housing	111	185	149
General government	2	6	7
Total, loans and repayable advances	117	204	166
Total, net budget and trust account expenditures for Federal aid to State and local governments for public works	1,852	2,915	3,414

[1] Less than one-half million dollars.

District of Columbia.—Many Federal-aid programs provide financial assistance for specific public services in the District of Columbia on the same basis as in the States. In addition, this analysis includes programs of particular aid for the District of Columbia in the form of a general contribution to help defray the costs of the local government, assistance in building hospitals within the District (which is additional to aid made available under the general State-aid hospital and health facility construction program), and loans for capital outlays under the District government's public works program.

Other financial relationships.—Apart from grants-in-aid, loans, and shared revenues, many other Federal expenditures and policies affect the finances of State and local governments. Types of transactions not covered in the tabulation of aids include the following:

(*a*) Reimbursements for various specific services, such as payments to public educational institutions for tuition of veterans and of students from the Armed Forces and payments to local governments for care of Federal prisoners in local institutions.

(*b*) Contractual payments, or alternatively research grants, to public institutions for research and training in specified fields.

(*c*) Provision of radiological monitoring devices to States and cities for civil defense training and operational use.

(*d*) The value of surplus educational and hospital supplies, materials, and equipment, and real estate donated or sold at substantial discounts to State and local agencies.

(*e*) The payment of property taxes, or payments in lieu of property taxes, made upon Federal property under the provisions of various laws. When such payments are based upon a percentage of revenues, however, as in the case of the Tennessee Valley Authority, they are included in the shared-revenue section of the table.

In addition, the table does not reflect various indirect financial benefits accruing to State and local governments, such as exemption from Federal income tax of interest paid on State and local debt; the indirect Federal guaranty of municipal obligations issued for low-rent housing and urban renewal; deductions of State and local income, property, and other taxes from personal and corporate incomes in computing Federal income tax; services rendered to other governmental units by Federal agencies in the ordinary course of their operations; and some programs administered cooperatively for the purposes of crop reporting or the National Guard.

Some of these financial benefits, of course, have counterparts in the form of services rendered or occasional payments made to the Federal Government by the States or their subdivisions.

Special Analysis H

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS

This analysis summarizes Federal expenditures in 1958, 1959, and 1960 for research and development—the systematic quest for new knowledge about natural and social phenomena and its application to the advancement of the Nation's industrial technology, welfare, and security. Included are expenditures for the performance of research under the head "Conduct of research and development" and for the construction, improvement, and equipping of research facilities under the head "Research and development facilities." The contribution of the Federal Government to scientific training is dealt with in a supplementary section at the end of this text.

The special analysis includes this year for the first time a substantial portion of the expenditures for research and development and supporting test and evaluation activities of the Department of Defense which have been excluded from tabular presentations in previous years because they were financed out of procurement appropriations. However, because of certain technical problems in the transition to the new budget structure of the Department of Defense in 1960, it has not been possible to reconstruct estimated expenditures for 1958 and 1959 which are fully comparable to the 1960 estimates. Nor has it been possible to include in the tables estimates of additional expenditures for research and development support remaining in procurement appropriations which amount to about $2 billion in each of the 3 years. These problems are discussed further in the section on the Department of Defense below.

Net budget expenditures for Federal scientific research and development programs, exclusive of amounts from Defense procurement funds mentioned above, are estimated to be $5,484 million in 1960. This represents a substantial increase over 1958 and 1959, although the increase is not as great as indicated because of the lack of full comparability with the 1960 estimates of the amounts included for the Department of Defense for 1958 and 1959.

Table 1.—*Total Federal research and development expenditures*
[In millions]

Purpose	1958 actual	1959 estimate	1960 estimate
Conduct of research and development [1]	$3,203	$4,483	$5,096
Research and development facilities	295	358	388
Total [1]	3,498	4,841	5,484

[1] The increase in 1960 is somewhat less than indicated because figures for 1958 and 1959 for the Department of Defense are not fully comparable with those for 1960 as a result of changes in the appropriation structure. The totals for each year also exclude about $2 billion expenditures from Department of Defense procurement funds which support research and development.

Over four-fifths of the expenditures of the Federal Government for research and development are directed primarily to national security needs. The total for this purpose is estimated at $4,572 million in 1960. The Department of Defense programs for new and improved weapons, equipment, and defense techniques account for 68% of total 1960 expenditures shown; the research and development programs of the Atomic Energy Commission account for 15%. Much of this research also contributes to the civilian economy and to improvements in the health, welfare, and technological advancement of the Nation as a whole. Of particular note is the substantial support given by the Atomic Energy Commission to the development of atomic power for civilian application.

Expenditures for other than major national security programs are estimated at $912 million in 1960 or 17% of total Federal research and development expenditures. Of this amount 30% is for programs of the National Aeronautics and Space Administration and 27% is for programs of the Department of Health, Education, and Welfare, chiefly the medical research activities conducted and supported by the Public Health Service. Substantial programs of research and development are also conducted by the Departments of Agriculture, Interior, and Commerce, the National Science Foundation, and the Federal Aviation Agency.

Of the total expenditures for conduct of research and development, by far the greatest part goes for development work and the related activities of test and evaluation. In 1960 the total amount for research, as distinguished from development, is estimated at more than $1.3 billion, of which about $500 million is for the Department of Defense and over $800 million for all other agencies. These amounts cannot be estimated with precision because it is difficult to draw a line between applied research and general technical development and because many of the major developmental projects, especially in the Department of Defense, include amounts for both research and development.

Within the amounts for research, expenditures for basic research, which has for its purpose increasing the fundamental scientific knowledge that underlies the Nation's research and development and its technological progress, will continue to increase in 1960. Including $80 million in expenditures of the National Science Foundation for basic research as well as the amounts spent by other agencies for basic research related to their scientific missions, it is estimated that about $500 million will be devoted to such research in 1960. Of this total, about $100 million is for basic research now identified in programs of the Department of Defense and an equivalent amount is for basic research in the National Aeronautics and Space Administration.

The Federal Government supports about half the research and development of the Nation. Private industry finances much of the remainder, and smaller amounts are expended from funds of foundations, educational institutions, and by State and local governments.

Of the total Federal research and development expenditures, more than half are made through contracts with private industry and through grants and contracts with universities. The remainder are made directly by Government research laboratories and other facilities.

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

Table 2.—*Division of Federal expenditures for research and development between major national security and other programs*

[In millions]

Fiscal year	Major national security	Other	Total
1940	$26	$48	$74
1941	144	54	198
1942	211	69	280
1943	472	130	602
1944	1,178	199	1,377
1945	1,372	219	1,591
1946	784	134	918
1947	768	130	898
1948	698	155	853
1949	889	191	1,080
1950	871	209	1,080
1951	1,063	235	1,298
1952	1,565	250	1,815
1953	1,830	270	2,100
1954	1,806	279	2,085
1955	1,804	281	2,085
1956 [1]	2,202	336	2,538
1957 [1]	2,596	431	3,027
1958 [1] [2]	2,988	510	3,498
1959 [1] [2]	4,108	732	4,841
1960 [1] [2]	4,572	912	5,484

[1] Figures under "Major national security" and "Total" for 1956 and subsequent years include the pay and allowances of Department of Defense military personnel assigned to research and development activities, amounting to about $200 million each year.

[2] Figures under "Major national security" and "Total" for 1958 and subsequent years include a substantial portion of the amounts for Department of Defense research and development previously financed out of procurement appropriations. Figures prior to 1958 exclude these amounts. Because of changes in appropriation structure of the Department of Defense, the expenditures shown for 1958 and 1959 are not fully comparable with those for 1960, and the increase in 1960 is somewhat less than indicated. The amounts also exclude the expenditures in support of research and development which will continue to be financed from Department of Defense procurement funds, estimated at about $2 billion each year in 1958, 1959, and 1960.

In this analysis the term conduct of research and development includes activities in which the primary aim is either to develop new knowledge or to apply existing knowledge to new uses. These activities may be carried out in Government installations or in the facilities of private, State, or local organizations using Federal funds. Generally excluded from this definition are expenditures for routine testing, mapping and surveys, experimental production, information activities and training programs including fellowships for the support of graduate students in the sciences. This special analysis also omits expenditures for the collection of general-purpose statistics by the Census Bureau, Bureau of Labor Statistics, and other agencies, some of which expenditures were included in the similar tabulations of Federal research and development programs in preceding budgets. The principal statistical programs of the Federal Government are discussed in special analysis I on this budget.

Expenditures for research and development facilities include amounts for physical facilities such as land, buildings, and major equipment, regardless of whether the facility is to be used or owned by the Federal Government or by a private, State, or local organization.

All expenditures in this special analysis are net budget expenditures as defined in the introduction to part I of the budget; the estimated amounts include expenditures from supplemental appropriations proposed for later transmission. Table 16 relates the figures in this special analysis to those in the analysis of the investment, operating, and other budget expenditures presented in special analysis D.

Department of Defense—Military Functions

The research, development, test, and evaluation programs of the Department of Defense include basic research to add to the store of knowledge on which significant future military developments may be based; applied research and technical developments to exploit military potentialities of new scientific findings; and development, test, and evaluation of new and improved weapons and equipment to increase the effectiveness of the military forces. These activities are conducted by the three military departments and the Advanced Research Projects Agency, under the direction of the Office of the Director of Research and Engineering, which is being established as provided by the Defense Reorganization Act of 1958.

Table 3.—*Estimated expenditures of the Department of Defense for research and development*

[In millions]

Function and purpose	1958 actual	1959 estimate	1960 estimate
060 Major national security:			
Conduct of research and development [1]	$2,178.6	$3,174.6	$3,602.7
Research and development facilities	135.8	107.4	89.4
Total, Department of Defense [1]	2,314.4	3,282.0	3,692.1

[1] Increase in 1960 is somewhat less than indicated because figures for 1958 and 1959 are not fully comparable with those for 1960; as a result of changes in the appropriation structure amounts for 1958 and 1959 exclude certain expenditures from prior year procurement appropriations for items reclassified as research, development, test, and evaluation in 1960. The totals for each year also exclude about $2 billion expenditures from procurement funds which support research and development.

CONDUCT OF RESEARCH AND DEVELOPMENT

As explained in the President's budget message and in the part II of the budget, the 1960 budget for military functions of the Department of Defense is presented in a new form which will permit consideration of the military budget on a more uniform basis. Although a clearer and more comprehensive presentation of the research, development, test, and evaluation activities of the Department of Defense is one of the principal objectives of the revised budget structure, the initial transition reflected in the 1960 budget has created special problems in estimating expenditures for these programs in 1960 and in reconstructing comparable figures for 1958 and 1959.

In previous years, the amounts for conduct of research and development shown for the Department of Defense in this special analysis have consisted of the amounts included in the military research and development appropriations as then constituted, plus an estimate of the military personnel costs applicable to research and development activities. As explained in the text in previous years, these estimates covered only a part of the Department's research, development, test, and evaluation activities, with the principal omission being the large amounts for these purposes included in the procurement appropriations. In the 1960 budget, a substantial portion of these amounts has been consolidated with the former research and development appropriations in the new appropriations for research, development, test, and evaluation, and most of the obligations for development, test, and evaluation remaining in the procurement appropriations have been separately identified. The items retained in the procurement appropriations in 1960 have been determined on the basis of the particular practical problems of each military department in the transition to the new structure, and include for example, major missile and aircraft systems under development in the Air Force and Navy whereas corresponding items in the Army have been included in the new research, development, test, and evaluation appropriation. Nevertheless, by combining the amounts in the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

new research, development, test, and evaluation appropriations with the amounts for development, test, and evaluation support which have been identified in the procurement appropriations, it is possible to present, on a fairly comprehensive and comparable basis, the total estimated obligations for conduct of military research and development by the Department of Defense contemplated in the 1960 budget. As shown in table 5 below, the amounts provided in 1960 will continue the higher level of effort now underway as a result of the substantial increases made in 1959.

With respect to expenditures, however, it has not been possible to reconstruct comparable 1958 and 1959 estimates for the new research, development, test, and evaluation appropriations being established in 1960, or to estimate precisely the expenditures corresponding to the amounts for development, test, and evaluation support remaining in the procurement appropriations. As shown in table 4, the expenditures that have been included in the special analysis this year consist of the amounts shown in the budget for the new research, development, test, and evaluation title of the Department of Defense budget and the estimated expenditures for military personnel and revolving and management fund transactions applicable to research and development activities, and are subject to the qualifications indicated. If fully comparable figures were available, it is believed that the expenditures for the research, development, test, and evaluation title would be considerably higher than shown in 1958 and 1959, but that 1960 would still be somewhat higher than 1959 because of the impact on 1960 expenditures of the substantial increase in obligations from 1958 and 1959. While no accurate figures are available for the expenditures from procurement appropriations for development, test, and evaluation support, it is believed that they would represent an additional amount of about $2 billion each year.

TABLE 4.—*Estimated expenditures of the Department of Defense for conduct of research and development by budget title*

[In millions]

Budget title	1958 actual	1959 estimate	1960 estimate
Research, development, test, and evaluation appropriations [1]	$2,034.2	$3,020.4	$3,384.3
Procurement appropriations	(2)	(2)	(2)
Military personnel appropriations	188.5	196.9	194.5
Revolving and management funds [3]	−44.1	−42.7	23.9
Total estimated expenditures, conduct of research and development	2,178.6	3,174.6	3,602.7

[1] Figures shown for 1958 and 1959 under the new title "Research, development, test, and evaluation" are estimates and are not fully comparable to the estimates shown for 1960. The research, development, test, and evaluation appropriations for 1960 contain certain items and programs that were funded in other appropriations in prior years. In adjusting 1958 and 1959 data to a basis comparable with the proposed 1960 appropriation structure, the adjustments were limited to the items and projects that were shifted in 1960. It was not feasible to effect complete comparability by adjustment for items and projects that would have been shifted to research, development, test, and evaluation appropriations if the concept proposed for 1960 had been introduced in 1958 and 1959.

[2] About $2 billion each year; more accurate estimates are not available.

[3] Reflects net effect on total expenditures of research, development, test, and evaluation funds advanced to and disbursed by revolving and management funds.

Planned obligations for research, development, test, and evaluation are shown by major fields in table 5. Missile development will continue in 1960 to represent the largest area of activity. Increasing emphasis on solid propellant missiles and on the problem of defense against ballistic missiles are offset in 1960 by reduced funding requirements for missile systems going into production for service use. In the field of manned aircraft, much of the effort in 1960 will center on the development of new types of aircraft such as the B–70 and F–108 which will operate in high supersonic speed ranges and on the attendant problems of structures, propulsion, navigation, communications, and other equipment and components. Other problems of special interest are improvement of antisubmarine warfare capabilities and developments supporting new battlefield concepts; projects concerned with these problems are included in several of the fields shown. Although a decrease is estimated in the field of astronautics, a number of applications of military interest will be supported, and the apparent decrease in this area will be more than offset by increases in the space programs of the National Aeronautics and Space Administration. The amounts shown for management and support include only those amounts not directly distributed to the other fields.

TABLE 5.—*Estimated obligations of the Department of Defense for conduct of research, development, test, and evaluation*

[In millions]

Budget title and program	1958 actual	1959 estimate	1960 estimate
Research, development, test, and evaluation appropriations:			
1. Military sciences	$334.4	$360.3	$371.9
2. Aircraft and related equipment	442.5	472.6	487.3
3. Missiles and related equipment	904.3	1,341.8	1,437.6
4. Military astronautics and related equipment	17.4	345.9	309.1
5. Ships and small craft and related equipment	132.1	158.7	167.7
6. Ordnance, combat vehicles, and related equipment	179.1	188.8	235.0
7. Other equipment	323.6	379.9	430.8
8. Programwide management and support	135.1	137.8	133.0
9. Emergency fund and expired accounts	34.2	136.1	150.0

2. Missiles	1,367.3	1,253.7	1,062.3
3. Other	67.2	91.6	51.2
Total direct obligations, procurement appropriations	1,656.0	1,821.7	1,843.4
Military personnel appropriations	188.5	196.9	194.5
Total direct obligations	4,347.2	5,540.5	5,760.3

[1] Estimated amounts for items identified as development, test, and evaluation support.

RESEARCH AND DEVELOPMENT FACILITIES

Estimates of expenditures for the research, development, and test facilities of the Department of Defense shown in table 3 include all military construction at installations having as their primary mission research, development, and testing, and that part of construction at other installations which is in support of research, development, test, and evaluation programs. The decline in expenditures for the period shown reflects primarily the completion of a major expansion of development and test facilities required in support of the ballistic missile and other programs. A major program currently underway is the extension of the capabilities of the Pacific missile range to accommodate space and missile programs.

MILITARY ASSISTANCE

As part of the military assistance program, the United States cooperates through the mutual weapons development program with a number of foreign countries to accelerate the development of advanced weapons. Current participants in the program, which is administered by the Department of Defense, are the United Kingdom,

Digitized for FRASER

Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

France, the Netherlands, Belgium, Norway, Italy, West Germany, Denmark, and Turkey. Negotiations are currently carried on to extend this program to additional countries. Projects are financed by the United States and the countries undertaking particular developments. In some cases the United States exchanges information and provides technical assistance in addition to or in place of financial assistance.

The projects are conducted by scientists and technicians of the participating countries and are directed at developing equipment, weapons, and techniques which fulfill mutual defense requirements and utilize outstanding research and development contributions by these countries. Expenditure estimates in table 6 represent United States participation.

TABLE 6.—*Expenditures of the mutual weapons development program for research and development*

[In millions]

Function	1958 actual	1959 estimate	1960 estimate
060 Major national security	$34.8	$35.1	$33.0

Beginning in 1959, part of the expenditures will be incurred in foreign currencies. It is estimated that approximately the equivalent of $3 million in such currencies will be expended in 1959 and $6 million in 1960.

ATOMIC ENERGY COMMISSION

The Atomic Energy Commission's program includes both basic research and applied research and development. Basic research is conducted in the physical and life sciences to secure a better understanding of nuclear processes and subatomic particles and of the effect of nuclear radiation on living organisms. The applied research and development includes efforts to improve the processes used in the production of special nuclear materials, to improve weapon types, and to find ways of obtaining useful power from nuclear reactions, including controlled thermonuclear reactions. While a large portion of this research program is of necessity aimed at military uses of atomic energy, an increasing portion is devoted to civilian applications. Moreover, the effort placed on military uses produces much information necessary to progress in the application of atomic energy for civilian purposes. The research and development program is carried on in the Commission's contractor-operated laboratories, in universities and other private research institutions, and by other industrial contractors.

Isotopes development	------	2.8	4.1	------	.2	1.5
Equipment not included above	------	------	------	28.8	32.2	35.7
Total, Atomic Energy Commission	516.1	617.6	651.9	120.9	172.7	193.7

The program of research and development for production and weapons is directed to developing improved production methods which would increase the capacity and efficiency of the plants producing special nuclear materials, and to developing concepts which lead to improved weapons and weapons with special characteristics, such as small weapons for tactical and defensive purposes and weapons largely free from radioactive fallout. In addition, research and development with devices directed toward the development of nonmilitary uses of nuclear explosions is being pursued.

In the field of reactor development, increasing effort is being devoted to developing means for producing economic electric power from atomic reactors through a variety of technical approaches. Several nuclear powerplant design studies are being undertaken. The Commission is also continuing the development of reactors for the propulsion of commercial ships. Supplementing these specific projects is the advanced development of reactor materials, fuel elements, fuel separation systems, and reactor safety, which are applicable to many reactor designs and applications. Expenditures for research and development facilities in this area are mainly for engineering laboratory buildings, facilities for testing reactor experiments, and experimental civilian atomic power reactors.

The Commission is developing numerous types of reactors for military use, principally propulsion reactors for military aircraft, missiles and naval combatant ships. Increased emphasis is being given to the development of satellite power reactors and propulsion reactors suitable for use in destroyers, including the construction of a prototype destroyer reactor. By 1960, prototypes of several other naval propulsion reactors will be completed and placed in operation. In addition, reactors are being developed in cooperation with the Army to meet a variety of specialized military requirements.

The program of research in the physical sciences seeks out fundamental scientific truths; moreover, it contributes important basic data for use in the solution of problems related to the development programs discussed above. A major portion of the effort is to develop a fundamental understanding of atomic structure and forces through the use of particle accelerators, including those in the multibillion electron volt range. Considerable effort is also placed on research on the physical, chemical, and metallurgical properties of materials used in the Commission's programs. Much of the information developed yields applications beyond the field of atomic energy. Construction expenditures include those for four new multibillion electron volt particle accelerators at Brookhaven National Laboratory, Upton, Long Island; Cambridge, Mass.; Princeton, N. J.; and Argonne Laboratory, Lemont, Ill.

Continued emphasis is being given to the development of experimental devices to achieve controlled thermonuclear reactions. Design, fabrication, and operation of improved devices of intermediate size is going forward at four Commission laboratories. Additional laboratory facilities are being constructed, primarily at Princeton University.

The program of research in biology and medicine is primarily aimed at securing an understanding of the effects of radiation on living organisms, developing methods of minimizing such effects, and analyzing the long-term effects of radiation hazards. An increasing effort is being placed on the development of methods of using atomic energy in biological research and in the diagnosis and treatment of human diseases.

Federal Reserve Bank of St. Louis

Special Analysis H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

In the field of isotope development increasing effort is being devoted to development of practical applications for use of radioisotopes in medicine, agriculture and industry. The Commission will participate in research and development projects with industrial and research organizations with the ultimate objective of exploiting the practical application of radioisotopes and applied radiation to industrial products, processes, and manufacturing methods.

National Aeronautics and Space Administration

The National Aeronautics and Space Administration is responsible for conducting space programs other than those of specific military interest and for continuing the research programs of the National Advisory Committee for Aeronautics, which was terminated when the Administration was established October 1, 1958. In carrying out its program, the Administration utilizes the capabilities of universities, industry, and other Government agencies and operates directly three research laboratories, a center for the conduct of space projects, and two flight stations; a fourth research laboratory is operated by contract.

Table 8.—*Expenditures of the National Aeronautics and Space Administration for research and development*

[In millions]

Function and purpose	1958 actual	1959 estimate	1960 estimate
500 Commerce and Housing:			
Conduct of research and development	$72.0	$128.0	$245.0
Research and development facilities	17.2	25.0	35.0
Total, National Aeronautics and Space Administration	89.2	153.0	280.0

During 1959 the Administration is inaugurating an extensive program of scientific investigations in space. Satellites, lunar probes, and deep space probes will be used to increase understanding of the earth's outer atmosphere; the medium of space; the moon and the planets; the earth's gravitational, magnetic and electric fields; radiation from space; and other phenomena. Of future practical importance are programs in the fields of meteorology and communications. The space technology program includes projects directed toward an early and substantial increase in the capability to place very heavy objects in space; these projects include high energy fuel rockets, a million pound thrust single chamber engine, and, in cooperation with the Atomic Energy Commission, a nuclear rocket engine. Special emphasis is being placed on development of the technology of manned space flight.

The increase in expenditures for conduct of research and development shown for 1960 reflects the planned intensification of the Administration's programs in all of the fields outlined above and the initiation of new programs such as preliminary studies looking toward future development of an orbiting space laboratory. Research in support of military aircraft and missile programs will be continued in 1960 at approximately the same level as previously conducted by the National Advisory Committee for Aeronautics.

Increases of research and development plant currently underway or planned for 1959 in support of the Administration's space programs include initiation of the Space Projects Center, to be located at Beltsville, Md.; extension of the capabilities of the Pilotless Aircraft Station at Wallops Island, Va., to accommodate launching of space vehicles; improvement of tracking networks; and establishment of space propulsion development and test facilities. Additions to the Space Projects Center proposed for 1960 include a central flight control and operations facility, a space sciences laboratory, and an instrument laboratory. Other new projects proposed for 1960 include special equipment for the X–15 research aircraft program; a facility for applied research in the problems of ion and plasma propulsion of spacecraft; and establishment of launching facilities at the Pacific missile range of the Department of Defense. In both years improvements of the existing facilities of the research centers will continue to be made.

Department of Health, Education, and Welfare

The major research expenditures of the Department of Health, Education, and Welfare are under programs of the Public Health Service. Research is also conducted in the Department by the Office of Education, the Food and Drug Administration, the Office of Vocational Rehabilitation, and the Social Security Administration.

Table 9.—*Expenditures for the Department of Health, Education, and Welfare for research and development*

[In millions]

Function	1958 actual	1959 estimate	1960 estimate
210 Labor and welfare	$179.2	$235.7	$250.8

The expenditures of the Public Health Service for research are chiefly by the various institutes of the National Institutes of Health, organized by disease category, as illustrated in the following.

Table 10.—*Expenditures of the Public Health Service for research and development*

[In millions]

Organizational unit and program	1958 actual	1959 estimate	1960 estimate
National Institutes of Health:			
Cancer	$38.0	$49.8	$50.3
Mental Health	17.6	18.4	21.2
Heart	24.9	29.6	31.4
Dental Research	3.8	4.7	4.7
Arthritis and Metabolic Diseases	15.0	23.6	24.0
Allergy and Infectious Diseases	16.2	19.9	20.2
Neurological Diseases and Blindness	13.6	18.4	18.7
General research and other	13.2	21.8	26.3
Grants for construction of medical and dental research facilities	12.1	20.0	20.0
Bureau of State Services	13.3	15.2	16.6
Other, Public Health Service	2.9	2.9	3.1
Total, Public Health Service	170.6	224.3	236.5

One-quarter of the Public Health Service expenditures is spent for research undertaken in Government laboratories. The balance is for grants to universities, hospitals, and other research centers for medical research in the causes and cure of diseases and for related basic research in the life sciences. These grants include funds for the conduct of research and for the support of research facilities. In 1957 a 3-year program of matching grants to universities and other nonprofit institutions was enacted, authorizing a total of $90 million in assistance for the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

construction of health research facilities. This program was recently extended for another 3-year period.

In 1960 expenditures of the Public Health Service will continue to increase over 1959, a year which experienced a substantial expansion of medical research support through appropriations for programs of the National Institutes of Health.

Expenditures of the Office of Education for research on educational problems of broad national importance will increase significantly in 1960. The Office conducts studies through its own staff and through contracts for cooperative research with colleges and universities and with State departments of education. Under the National Defense Education Act of 1958 grants to State universities were authorized for research in the area of foreign language teaching and for studies and experimentation in the more effective utilization of television, radio, motion pictures, and related mediums for educational purposes.

Elsewhere in the Department increased expenditures are estimated for research programs of the Office of Vocational Rehabilitation in the solution of vocational rehabilitation problems; the Food and Drug Administration in connection with its enforcement activities; and the Social Security Administration on the extent of public and private insurance and assistance programs and on the health and welfare needs of children.

DEPARTMENT OF AGRICULTURE

Over four-fifths of the research expenditures of the Department of Agriculture are accounted for by programs of the Agricultural Research Service. The balance is divided among research activities of the Forest Service, the Agricultural Marketing Service, and to a lesser extent the Farmer Cooperative Service, the Foreign Agricultural Service, and the departmental library.

TABLE 11.—*Expenditures of the Department of Agriculture for research and development*

[In millions]

Function	1958 actual	1959 estimate	1960 estimate
350 Agriculture and agricultural resources	$100.5	$113.9	$114.9
400 Natural resources	10.2	14.4	12.5
Total, Department of Agriculture	110.7	128.3	127.4

The Agricultural Research Service conducts research on animal husbandry, diseases and parasites and on crop production, entomology, soil and water conservation, farm economics, and agricultural engineering. One-third of its funds for the conduct of research are for grants to support State agricultural experiment stations established in land-grant colleges. In 1960 expenditures of the Agricultural Research Service will be maintained at a high level, with increasing attention to basic research in the agricultural services. Additional expenditures are estimated for completing new laboratories at Plum Island, New York, for a comprehensive attack on foot and mouth and other dangerous foreign diseases of animals and for new facilities for research on domestic diseases of animals, now under way at Ames, Iowa.

The Forest Service undertakes research in the field of forestry and wild land management to develop and improve forests, ranges, wildlife habitat and watershed management practices; to develop better measures for protecting forests from the ravages of fire, insects, and disease; to develop new and improved uses for forest products and to improve their marketing.

Research is conducted by the Agricultural Marketing Service on the distribution, storage, handling, transportation, and pricing of farm products. The Farmer Cooperative Service undertakes research on farmers' cooperatives engaged in marketing farm products, purchasing farm supplies, and supplying farm business services. The departmental library supplies data to research workers on the results of studies undertaken in the field of agricultural research.

NATIONAL SCIENCE FOUNDATION

Under basic legislation, enacted in 1950, and Executive Order 10521, issued in 1954, the National Science Foundation is responsible for the general encouragement and support by the Federal Government of basic research in this country. Grants are made to colleges, universities, and other research institutions for the conduct of fundamental investigation in the biological, medical, mathematical, physical, engineering, and social sciences.

TABLE 12.—*Expenditures of the National Science Foundation for research and development*

[In millions]

Function and program	1957 actual	1958 estimate	1959 estimate
210 Labor and welfare:			
Regular activities	$20.7	$52.3	$79.1
International Geophysical Year	14.1	7.7	1.4
Total, National Science Foundation	34.8	60.0	80.5

The 1960 budget will provide support for a greater number and higher proportion of promising research proposals submitted to the Foundation. The Foundation is also aiding the advancement of basic research by providing for the construction and maintenance of specialized facilities for scientific experimentation and investigation. Such facilities include radio and optical astronomy observatories, a solar research telescope, reactors for nuclear research, university computers, and an oceanographic research vessel. Support is also provided for specialized biological laboratories and for an experimental program to aid graduate laboratories in universities.

In addition to its direct support of research, the National Science Foundation is responsible for studying the Nation's research effort and recommending to the President policies relating to the role of the Federal Government in the encouragement, support, and conduct of research, and education in the sciences.

The Foundation has also provided financial support for the United States program for the International Geophysical Year. This worldwide program involving concurrent scientific observations by scientists of over 60 nations during the period July 1957 through December 1958 has significantly advanced the world's knowledge of the earth and its environment, including conditions above the atmosphere through the launching of earth-circling satellites. Funds for this program for establishing and maintaining observation stations and for procurement of scientific equipment have largely been reflected in expenditures prior to 1959.

Federal Reserve Bank of St. Louis

Special Analysis H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

Department of the Interior

The major research and development programs in the Department of the Interior are under the Bureau of Mines, Geological Survey, and Bureau of Commercial Fisheries and Bureau of Sport Fisheries and Wildlife of the Fish and Wildlife Service. Research activities are also conducted by the Office of Saline Water, Bureau of Reclamation, and the National Park Service. Expenditures for research and development by the Department of the Interior are directed primarily to the conservation and efficient utilization of the Nation's natural resources.

Table 13.—*Expenditures of the Department of the Interior for research and development*

[In millions]

Function	1958 actual	1959 estimate	1960 estimate
400 Natural resources	$46.6	$57.0	$59.1

The Bureau of Mines conducts scientific, technologic, and economic research into the sources, extraction, utilization, and conservation of minerals and into the improvement of working conditions in mines.

The Geological Survey investigates the availability and quality of surface and underground waters; the nature and occurrence of minerals and mineral fuels; geologic studies of construction materials and systematic geologic studies, and the improvement of cartographic techniques.

The Bureau of Commercial Fisheries conducts biological and industrial research directed toward the conservation, development, and management of commercial fishery resources.

The research activities of the Bureau of Sport Fisheries and Wildlife are primarily concerned with the development and perpetuation of the Nation's fish and wildlife resources for the purpose of promoting the maximum enjoyment and utilization of these resources.

Federal Aviation Agency

The Federal Aviation Agency, which came into existence on August 23, 1958, undertakes research to provide for the development and modernization of the national system of air traffic control and navigation to serve present and future needs of civil and military aviation. The agency has assumed the research programs formerly conducted by the Civil Aeronautics Administration and the Airways Modernization Board.

Table 14.—*Expenditures of the Federal Aviation Agency for research and development*

[In millions]

Function	1958 actual	1959 estimate	1960 estimate
500 Commerce and housing	$4.2	$32.8	$47.1

The responsibilities of the Federal Aviation Agency include research in all areas of civil and military aviation except for those needs of military agencies which are peculiar to air warfare and primarily of military concern. The program will provide for the development and selection of systems, procedures, facilities, and devices which will best serve aviation needs and promote maximum coordination of air traffic control and air defense systems.

The 1960 estimate provides for improvement in the Nation's airways system through the adaptation of existing technology to the problems of air traffic control and navigation, and long-range research and development with respect to air navigation and traffic control problems of the future. Projects include continued study of the present airways system and projections of future requirements, theoretical systems analysis of proposed facilities, development and testing of an automatic data processing and display system, long-range development of data processing techniques, participation in the development of an aviation weather system. Also included is construction of necessary facilities and operation of the National Aviation Facilities Experimental Center.

In addition, the program reflects research and development work on aeronautical instruments and equipment, and on human problems relating to aircraft design and operation.

Department of Commerce

The principal research and development program of the Department of Commerce is that of the National Bureau of Standards. Research programs are also conducted by the Maritime Administration and the Weather Bureau, and to a lesser extent by the Bureau of the Census, the Office of Business Economics, the Patent Office, and the Coast and Geodetic Survey.

Table 15.—*Expenditures of the Department of Commerce for research and development*

[In millions]

Function	1958 actual	1959 estimate	1960 estimate
210 Labor and Welfare	$8.4	$14.1	$16.7
500 Commerce and housing	4.1	6.6	8.9
600 General government	2.6	4.1	4.8
Total, Department of Commerce	15.1	24.8	30.4

Expenditures from funds appropriated to the National Bureau of Standards will increase substantially in 1960 to expand the Bureau's program to improve standards of physical measurement.

The Maritime Administration conducts research designed to improve marine engines, ship design, cargo handling machines, and techniques and nuclear propulsion for commercial purposes. The 1960 expenditure estimates reflect the completion of major projects for nuclear research during that year.

The Weather Bureau conducts programs for meteorological research, with special emphasis placed on severe storm phenomena, i. e., tornadoes and hurricanes. Work is also done on the development of weather forecasting by means of high speed electronic computers.

Other Agencies

Research is also conducted by a number of other agencies in furtherance of their assigned responsibilities. These include the Civil Service Commission, the Office of Civil and Defense Mobilization, the Federal Communications Commission, the General Services Administration, the Housing and Home Finance Agency, the Department of Labor, the Post Office Department, the Smithsonian Institution, the Small Business Administration, the State Department, the Tennessee Valley Authority, the Treasury Department, the United States Information Agency, and the Veterans Administration.

[1] Not separately identified in special analysis D.

Federal Activities Contributing to Training in the Sciences

The foregoing analysis deals with expenditures of the Federal Government for the support of research and development and for the acquisition and improvement of scientific equipment and facilities. Equally important, however, to the progress of research is the education of future scientists and engineers and the further training of those already engaged in teaching and research careers in the sciences and mathematics.

Many of the research and development programs reflected in this special analysis assist, as an important byproduct, in the education of scientists and engineers. In addition, the Federal Government contributes directly to the education of new scientists and engineers through fellowships, traineeships, training grants, State grants-in-aid, and other programs directed toward the improvement of science teaching and the encouragement of young people in scientific careers. In the following paragraphs there are described a number of programs which assist in or are directed toward increasing the general supply of scientists and engineers and to improving the effectiveness of those already teaching or undertaking research in science and mathematics in positions outside the Federal establishment. Thus there are excluded many in-service training programs by Federal agencies, which also make a substantial contribution to improving the scientific position of the Nation as a whole. While not a complete cataloging, this description indicates the range of extramural programs in which the Federal agencies are engaged and gives some data on the relative size of such programs.

Special note should be taken of the expanded programs for education in the sciences of the National Science Foundation and the related new programs of the Department of Health, Education, and Welfare under the National Defense Education Act of 1958. The Foundation programs, totaling $67 million in new obligational authority in 1960, are designed to interest more young people in science careers; to improve courses and methods of teaching science and mathematics; to supplement the training of teachers in these fields, particularly at the high school and university levels; and to provide greater opportunity for post-graduate and other advanced study in the sciences. The assistance under these programs is primarily through grants to universities or through fellowships to individuals. The programs of the Department of Health, Education, and Welfare, which provide assistance to both science education and to education in other areas of critical national concern, include $57 million in new obligational authority in 1960 for the 2d year of the 4-year program of grants to States to assist local schools in equipping and remodeling laboratories, particularly in the sciences, and to provide funds for State supervisory services. Some of the other proposed activities to be undertaken by this Department, although concerned largely with other areas of education, would also aid science education; for example, under the student loan program for which $31 million is estimated for 1960 science students are among those given preference for financial assistance.

RESEARCH ASSISTANTSHIPS

In carrying out much of their Government-financed research under grants and contracts, educational institutions employment research assistants, who are completing undergraduate, graduate or postgraduate training, to perform junior level research work on Government projects. Such employment contributes to the advanced training of students, and, through the income it provides, indirectly assists them in furthering their education. It is estimated that some 20,000 to 30,000 graduate students would be employed as research assistants in 1960 under Federal research and development grants and contracts.

FELLOWSHIPS

The National Science Foundation and the Public Health Service of the Department of Health, Education, and Welfare award fellowships to individuals for the purpose of promoting graduate education and improving teaching in the sciences. These fellowships are available primarily in the physical and life sciences but are not restricted to specific fields or subdisciplines of study.

The Department of State, through the International Education Exchange Service, also assists in science education through fellowships available in all fields. It is estimated that in 1960 the Department will award upwards of 3,000 fellowships to improve teaching, research, and graduate training in the natural and social sciences fields

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

and to promote the sharing of ideas with other nations of the free world. They are awarded both to Americans going abroad and to foreign students coming to this country.

The Public Health Service offers fellowships chiefly for predoctoral and postdoctoral study in the life sciences. In 1960 about 1,200 fellowships will be awarded as a means of increasing the number of scientists qualified to carry on research in medical and related fields.

The National Science Foundation will award in 1960 approximately 1,600 fellowships for predoctoral and postdoctoral study in the sciences, with emphasis on training in the natural sciences. The Foundation will continue the program begun in 1959 to provide fellowships for summer study in the sciences to an estimated 1,300 high school teachers and college teaching assistants. The National Science Foundation has also inaugurated in 1959 a program of cooperative graduate fellowships to be administered with the assistance of participating colleges and universities. Under this program some 1,000 students will be aided in 1960.

For purposes of this analysis fellowships in more specific areas of science are discussed below under the following category Specialized fellowships and traineeships.

SPECIALIZED FELLOWSHIPS AND TRAINEESHIPS

Specialized fellowships and traineeships are awarded by the Federal Government primarily for the purpose of providing advanced education and training opportunities in specific fields for individuals who have completed their basic professional education.

The Department of Health, Education, and Welfare, and the Atomic Energy Commission have the largest and most significant programs in this area.

It is estimated that the Department of Health, Education, and Welfare will award 2,400 specialized fellowships and traineeships for graduate study primarily in medical specialties during 1960.

The Atomic Energy Commission supports graduate students in such fields as reactor technology, radiological physics, and industrial health and medicine. In 1960 the Commission will award about 375 specialized fellowships and traineeships in these fields.

TRAINING GRANTS

Training grants are ordinarily awarded for the purpose of establishing, expanding, improving, or continuing programs of training in the sciences. As distinguished from fellowships and traineeships—awarded directly to individuals—training grants are made to institutions and serve to strengthen the capacity of the recipient institutions of higher education to perform their research and training functions.

The largest program is that of the Public Health Service, National Institutes of Health in the Department of Health, Education, and Welfare, which will offer in 1960 training grants totaling about $50 million for undergraduate and graduate training in medical and related fields. The grants may generally be used either for the establishment or strengthening of programs or for the payment of stipends to trainees selected by the recipient institutions.

Also in the Department of Health, Education, and Welfare, the Office of Vocational Rehabilitation will make grants totaling $6 million in 1960 to schools, universities, and other agencies to pay part of the cost of training projects in fields concerned with rehabilitation.

The Atomic Energy Commission operates several training grant programs for which an estimated $5 million will be allocated in 1960. The Commission makes grants to assist nonprofit educational institutions acquire teaching aids, demonstration apparatus, and laboratory equipment including educational reactors. Specialized equipment and limited operational assistance are offered to medical schools to encourage training in the use of radioisotopes. A similar program is directed to colleges and universities for the instruction of students in the biological and agricultural sciences. In addition, equipment and operational assistance is granted to schools of public health for radiation safety training.

OTHER AIDS TO SCIENCE TEACHING

Closely related to training grants with respect to providing a variety of aids for science teaching are several other programs of the Federal Government, chiefly those of the Department of Health, Education, and Welfare under the Defense Education Act and those of the National Science Foundation under its expanded science education program.

The largest single program of the Foundation in this area is the support of training institutes to provide supplementary training for high school and college science teachers. In 1960 the Foundation will allocate over $33 million for grants to universities to permit them to sponsor summer, academic year, and other specialized institutes for school and college mathematics and science teachers including provision for stipends to be paid to the participants. Some 27,000 teachers will be assisted under the various institute programs.

The Foundation also sponsors a number of other activities designed to interest able students in undertaking careers in science and science teaching, including support for visiting scientists who lecture in the high school classroom; for student participation in science fairs and exhibits; and for the development of career guidance materials. Finally, the Foundation supports several activities directed to the improvement of high school and college science courses. For these and other specialized projects in science education the Foundation will spend more than $17 million in 1960.

Under the Defense Education Act of 1958 the Department of Health, Education, and Welfare will make grants, totaling $57 million in 1960, to assist local schools in equipping and renovating laboratories, particularly in the sciences, and to aid in meeting State supervisory costs. In addition $7 million in loans to private schools is provided.

The Atomic Energy Commission operates schools and conducts courses in nuclear science and engineering, reactor operation and hazards, and the use of radioisotopes for graduate and undergraduate students and for industrial personnel and medical workers. This program is estimated to cost $2.6 million in 1960.

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

OTHER PROGRAMS

A number of agencies undertake cooperative educational programs to contribute to training in the sciences and to encourage recruitment and retention of scientific and engineering personnel. Such programs may operate through formal agreements whereby a Government agency, an educational institution, and a student cooperate in planning a program in study and complementary employment, or with informal cooperation between agency, school, and student. Related to these cooperative educational programs is the extensive summer employment of qualified students in the fields of mutual interest to the agency and to the student.

Finally there are a number of Federal activities which, while not directed toward increasing the supply of scientists and engineers, nevertheless materially assist to this end. These include such programs as the training of veterans, the Reserve Officer Training Corps, the in-service training of Government civilian and military personnel, medical and dental internships and residencies at Government hospitals, and fellowships awarded under the National Defense Education Act of 1958.

Special Analysis I

PRINCIPAL FEDERAL STATISTICAL PROGRAMS

The Budget for 1960 includes requests amounting to $38.2 million for the current programs of the major Federal statistical agencies, an increase of $1.6 million over the amount provided in 1959. In addition, funds totalling $92.8 million are requested for periodic programs, primarily the decennial censuses.

This special analysis describes the changes in the statistical program which are proposed for 1960, including changes in responsibilities and increases in funds, both of which are expected to result in improvements and better balance of the overall Federal statistical program. These improvements will be reflected in the amount and usefulness of the information provided to the Congress, the Council of Economic Advisers, the executive departments and agencies, and other public and private analysts who need data to appraise the functioning of the economy, the welfare of the people, and the status of particular Federal programs.

The need for comprehensive, timely and accurate information, collected by various agencies in the course of performing their specific functions, but integrated into a coordinated intelligence plan, has long been recognized. The increased funds requested for 1960 will further a program to bring our statistical resources to a level demanded by modern needs, although they will by no means bring it to full-scale accomplishment. The improvements build on the concept, made explicit last year, of using the national income and product accounts as a framework for appraising weaknesses and gaps in economic statistics. In addition, a few of the most essential requirements for maintaining and improving statistics to meet specialized program objectives have been included in the 1960 budget request.

PROPOSED TRANSFERS OF RESPONSIBILITIES

Construction statistics.—Arrangements have been made to improve significantly the Federal Government's collection and dissemination of construction statistics. They will be consolidated in the Department of Commerce and a substantial increase in funds to finance expanded work is recommended.

Previously, statistics on construction of residential units and public construction were compiled by the Bureau of Labor Statistics in the Department of Labor and private nonresidential construction statistics were compiled by the Business and Defense Services Administration in the Department of Commerce. Also, in 1959, appropriations to the Bureau of the Census provided an increase of $120,000 over 1958 to initiate collection of reports on the progress of construction of large projects.

Under the new plan, the Bureau of the Census will collect and release statistics on all phases of construction, including the widely used figures on housing starts and dollar volume of construction activity. In 1960, an increase of $400,000 is requested for the integrated construction statistics program. These new funds, together with the amounts previously available in the Bureau of Labor Statistics, the Business and Defense Services Administration, and the Bureau of the Census, will provide the construction statistics described below under Current programs, with needed improvements.

Labor force statistics.—Arrangements have been made to give the Department of Labor the responsibility for planning, guidance, and publication of labor force statistics obtained from the Current Population Survey. At the present time, the Census Bureau publishes labor force and overall employment and unemployment statistics, while the Bureau of Labor Statistics collects data on nonagricultural employment based on establishment payroll reports, and the Bureau of Employment Security compiles statistics on unemployment insurance claims. Under the new plan, the Department of Labor will publish current comprehensive labor force, employment and unemployment information in place of the joint release of this information previously made by the Departments of Commerce and Labor. The Bureau of the Census will continue to collect and tabulate labor force statistics from its Current Population Survey sample of households as an agent of the Bureau of Labor Statistics. These new arrangements do not involve any overall increase in funds but analysis of labor force, employment and unemployment statistics will be facilitated and usefulness of the statistics will be enhanced by consolidating the responsibility for these programs in a single agency.

CURRENT PROGRAMS

Growth in the principal current statistical programs reflects the continued demand for improvement in our statistical system. Users want more reliable statistics, in greater detail, on a faster time schedule. In 1960, principal emphasis is centered on the improvement of construction statistics, and the necessary work of repairing and maintaining at acceptable levels of accuracy a number of the important current economic indicators. The 1959 appropriations provided for minor expansion in a number of fields with some emphasis on the areas of production and distribution and national income accounts. About half of the dollar increase shown between 1959 and 1958 is accounted for by the additional costs of the pay increase and increased postal rates.

The summary of principal current statistical programs shown below consolidates the programs of the major agencies, classifying them by broad subject matter area to indicate the interrelationships of programs carried out by different agencies and to aid in evaluating the Government's overall statistical system. The increases are limited to the most urgent items.

Direct obligations for principal current statistical programs, by broad subject areas

SPECIAL ANALYSIS I—Continued

PRINCIPAL FEDERAL STATISTICAL PROGRAMS—Continued

The agencies whose programs are included in this summary, in whole or in part, are shown in the table at the end of this analysis. Many other agencies contribute to the statistical system by recording and reporting on their administrative operations or summarizing regulatory reports, claims for benefits, or other information supplied by the public. In the interests of economy, the statistical system makes as much use as possible of such administrative recordkeeping, rather than initiating duplicate collections of data. Budget information for such agencies is not uniformly included in this summary, however, because of the difficulty of allocating separate cost figures for statistical information arising as a byproduct from program operations.

Shifts of emphasis among the broad subject areas are summarized in the discussion below, which lists the more important proposals in each area. In comparison with similar summaries in the past, the classification by broad areas has been affected by the proposed transfer of responsibility for labor force data from the Department of Commerce to the Department of Labor. In former years, all statistics derived from the Current Population Survey were classified as labor statistics, since this was their principal nature. Now, those statistics subject to the transfer continue to be included with labor statistics, and the remainder have been shown as demographic statistics. Estimates of the cost of such demographic statistics have been made for 1958 and 1959 so that the figures shown in the summary in this analysis are on a comparable basis for each subject area.

Labor statistics.—Two increases over the present program are recommended for 1960, both of which concern projects that are to be undertaken by the Bureau of Labor Statistics. In the first, estimates of labor requirements for specific types of construction activity, based on modern construction methods, will be developed for use in estimating the impact of new construction programs on employment and for improving productivity statistics. An increase of about $160,000 is included for this proposal. The second project requires about $250,000 to provide for converting the monthly employment, hours and earnings, and industrial hazards series to the revised Standard Industrial Classification. As a necessity for maintaining Government statistical series on a comparable basis, the Bureau of the Budget has recommended that all agencies adopt this revised classification and introduce it into their statistical compilations for 1958 or as soon thereafter as possible.

Other programs in this subject area, for which no increases are requested in 1960, are the statistics compiled by the Bureau of Labor Statistics on wages, labor turnover, and foreign labor conditions, as well as the labor force, employment and unemployment statistics for which responsibility will be transferred to the Labor Department in 1960. This area also includes statistical work by the Agricultural Marketing Service on farm labor.

Demographic statistics.—An increase of nearly $100,000 over the 1959 estimated obligations is requested for the Office of Education in the Department of Health, Education, and Welfare, in large part to provide additional mechanical tabulation facilities. Not included in this analysis are funds under title X of the National Defense Education Act for grants to the States for improvement of educational statistics which amount to $1 million estimated obligations in 1959 and $1.5 million in the 1960 budget request.

No changes are requested for other current programs of demographic statistics, which include: National statistics of births, deaths, marriages, and divorces compiled by the National Office of Vital Statistics in the Public Health Service; the National Health Survey conducted by the Public Health Service; population characteristics, estimates and projections, migration, and income statistics prepared by the Bureau of the Census; and studies of the farm population by the Agricultural Marketing Service.

Prices and price indexes.—An increase of more than $200,000 over 1959 is recommended for the Bureau of Labor Statistics to improve price reporting for the Consumer Price Index by increasing the frequency of price collection for important commodities which show wide price fluctuations; by expanding the pricing sample to include better representation of certain types of articles; and by increasing the number of price quotations per city for items for which price variability is large. These changes will enable the Consumer Price Index to reflect sudden price changes both more accurately and more promptly. An additional request for funds for preparatory work in 1960 for a periodic revision of the Consumer Price Index is described below, under Periodic programs.

No changes are proposed for the wholesale price series compiled by the Bureau of Labor Statistics nor for the programs of the Agricultural Marketing Service on prices received and paid by farmers and on factors affecting prices, supply, and consumption of agricultural products.

Production and distribution statistics.—In 1960, about $100,000 is recommended for improving the accuracy and usability of foreign trade statistics compiled by the Bureau of the Census by providing funds to work with the Customs Bureau and importers and exporters to eliminate inaccuracies in the basic documents and to improve the summary tabulations for analysis of foreign trade. Increases in 1959 appropriations provided for some improvements in the field of agricultural production. The 1959 budget involved increases in several Census Bureau programs, as part of the integrated program to improve basic current statistics on the operation of the economy and to strengthen our national economic accounts, for improving sales and inventory statistics for manufacturing industries and for retail and wholesale trade.

In 1960 other programs in this area are expected to remain at the 1959 level. They are: The current programs of the Bureau of the Census on retail, wholesale, and service trades, manufacturing, and agriculture; the Agricultural Marketing Service programs on crop and livestock estimates; and the Agricultural Research Service program on the economics of farm production.

Construction and housing statistics.—In 1959, the Bureau of the Census initiated work, primarily methodological, looking toward the development of improved estimates of construction activity. With additional funds and the centralized responsibility for construction statistics, as explained above, the Census Bureau in 1960 will maintain the present series on housing starts and construction activity, will work toward the improvement in coverage and accuracy of these series and will initiate a new quarterly series on expenditures for maintenance, repairs, and alterations of existing properties.

Federal Reserve Bank of St. Louis

SPECIAL ANALYSIS I—Continued

PRINCIPAL FEDERAL STATISTICAL PROGRAMS—Continued

Under the proposed arrangements, there will be no program for compilation of construction and housing statistics either in the Bureau of Labor Statistics or the Business and Defense Services Administration. However, labor requirements for construction activity, as noted above, will be developed by the Bureau of Labor Statistics as part of its work on productivity estimates.

National income and business financial accounts.—An increase over the 1959 program of about $150,000 is requested for further improvement and extension of the national income accounts. In 1959, the Office of Business Economics is preparing quarterly estimates of gross national product in constant dollars, is initiating preparatory work on estimates of purchases and sales by industry, and has begun a survey of United States private investments in foreign countries. The funds requested in 1960 will provide for completing the survey of foreign investments, for developing product estimates in constant dollars by industry, and for expanding work on the estimation of purchases and sales by industry. Real net product estimates by industry, consistent with other national income and product estimates, will provide an additional tool for the analysis of current economic conditions by showing changes in the contribution each major industry makes to the net national product.

The category "National income and business financial accounts" includes all the work of the Office of Business Economics—preparing estimates of national income and product, measuring and analyzing business trends, and computing the balance of international payments. It also includes the work of the Internal Revenue Service in tabulating statistics from personal and corporate income tax returns; estimates of farm income by the Agricultural Marketing Service; statistics on the financial and other operations of State and local governments compiled by the Bureau of the Census; the quarterly financial reports program, presenting income and balance sheet data for manufacturing corporations, conducted jointly by the Federal Trade Commission and the Securities and Exchange Commission; and other economic statistical series compiled by the Securities and Exchange Commission. In 1959, for the first time, important items of information from individual income tax returns were tabulated and made available by the Internal Revenue Service within the year in which the returns were filed. This speeded-up program will be continued. No increases in funds, other than those noted above for the Office of Business Economics, have been requested for 1960 for the programs included in this category.

PERIODIC PROGRAMS

Periodic programs are summarized separately because the wide fluctuations in their costs from year to year would obscure comparisons of annual costs of the current statistical programs, and would prevent drawing reasonable conclusions on the status of these programs. Included in the periodic programs are the major censuses, scheduled by law at 5- or 10-year intervals, and initiation of a major program to revise the Consumer Price Index.

Periodic censuses.—The periodic censuses are important because they provide a wealth of information on a detailed classification basis, with many cross-classifications of characteristics which the current statistics programs cannot provide; because they supply information on small areas not available from any other source; and because they provide a frame or benchmark for many current statistical series.

Funds are requested to continue work on the censuses of business, manufactures, and mineral industries which will be taken early in 1959 covering the year 1958. These censuses, taken every 5 years, provide data on the volume of production and trade, the number, size, geographical distribution, and other characteristics of 3.3 million business and industrial enterprises. The 1959 appropriation provided for the collection of the information, and the 1960 request for $6 million new obligational authority will provide for most of the processing and tabulating work and for printing preliminary bulletins. A final request will be required in 1961 to complete the tabulation of all summary tables and for the final printing costs.

Funds requested for the decennial census program in 1960, $86.5 million, represent a large part of the cost of the agriculture, population, and housing censuses. Appropriations for preparatory work on these censuses in 1958 and 1959 amounted to nearly $11 million and it is estimated that an additional $20.5 million for tabulating and printing in later years will bring the total cost of these three censuses to $118 million. These costs are based on the expectation that the population to be enumerated—the principal "workload"—will approach 180 million by April 1, 1960. Ten years ago, the population enumerated was just over 150 million. The number of farms, on the other hand, has decreased. Also implicit in these estimates are the savings made possible by specially developed electronic equipment. The funds requested in 1960 will provide for the enumeration and part of the processing and tabulating work for these censuses. A large part of the information on characteristics of population, housing, and farms will be collected from a 25% sample. This sampling, together with the use of electronic equipment, is expected to speed up the publication of detailed results, making them more timely and thereby considerably more useful. Enumeration of farms will begin in the fall of 1959 and of population and housing in April 1960.

The 1957 census of governments will be completed this year, and no funds are requested in 1960.

Major revision of the Consumer Price Index.—Every few years a survey of consumer expenditures is a necessary part of keeping the Consumer Price Index up to date. Occasional surveys of consumer buying are necessary to make the index reflect in proper proportion the effect of current price changes in specific grades and types of articles, shifts in types of outlets patronized, and other changes in consumer expenditure patterns which affect changes in the general price level. This basic series was last revised in 1950–52. An amount of $230,000 is recommended for the Bureau of Labor Statistics to engage in preparatory work on a consumer expenditure survey and other research necessary to appraise and revise the index. An effective revision will take a number of years and several million dollars. The revised index is not expected to be ready for publication before January 1963.

Special Analysis J

FEDERAL HOSPITAL AND MEDICAL CARE PROGRAMS

This special analysis presents a broad picture of the scope and responsibilities of the directly operated Federal medical, hospital, and domiciliary programs, and of supplemental care of Federal legal beneficiaries through contractual arrangements. It summarizes Federal gross obligations for the program in 1958, 1959, and 1960 and also provides data on each agency program in more detail. Included also are gross obligations incurred for clinical research, construction, and in-hospital training and for related Federal grant programs.

Excluded are various programs not involving direct medical care at Federal expense such as Public Health Service grants and other services for disease control, the medical research activities of the National Institutes of Health, and the medical services of the vocational rehabilitation program of the Department of Health, Education, and Welfare. Also excluded are the public assistance grants for medical care, and minor direct medical care programs such as emergency first-aid rooms.

Gross obligations include those payable from all sources—general fund appropriations, trust funds, and collections from patients and other non-Federal sources. In the case of interagency reimbursements, obligations are reported under the agency conducting the program rather than under the agency which ultimately pays for it.

SUMMARY OF HOSPITAL AND MEDICAL CARE PROGRAMS

The medical services maintained by the Federal Government are increasing in number, variety, and magnitude. These services have come into being at different times during the past 150 years to serve different beneficiaries, e. g., veterans, personnel of the uniformed services and their dependents, American merchant seamen, narcotic addicts, etc. Just as the beneficiaries vary, so do the degrees of responsibility assumed by the Federal Government—ranging from complete care of veterans for disabilities incurred in war service to medical care for on-the-job injuries of Federal civilian employees. The Federal Government has potential responsibilities for all or part of the medical care of 31 million citizens. About one-eighth of all hospital beds in the country are operated by Federal agencies and gross obligations for Federal hospital and medical care programs constitute approximately 2% of the total Federal budget.

Beneficiaries.—The major groups of potential beneficiaries for whom the Federal Government has some degree of responsibility are set forth in the following summary table. Since some individuals are included in more than one category because of dual entitlement to care, the actual total number of beneficiaries is approximately 31 million.

Category	*Number*
Veterans of all wars	22,727,000
Dependents of uniformed services personnel	3,361,000
Active duty and retired uniformed services personnel	2,984,000
Federal employees for in-line-of-duty disabilities	2,382,000
American Indians and natives of Alaska	385,000
American merchant seamen	130,500
Civilian population of Panama Canal Zone	64,000
Narcotic addicts	60,000
Inmates of Federal prisons	20,900
Patients with leprosy	1,500
Total	32,115,900

Care in Federal hospitals.—To provide care for these legal beneficiaries, the agencies of the Federal Government operated 565 hospitals with 194,693 operating beds and an average daily patient load of 168,216 in 1958. One hundred five of these hospitals, with 13,700 operating beds and an average of 9,300 patients, were located in overseas areas including the Territories. In addition to hospitals, the Government also operated 18 domiciliary homes with an average daily member load of 18,037. The following table presents a comparative summary of the size and the distribution by agencies of the total Federal hospital resources and patient loads for 1958, 1959, and 1960.

Agency	Total hospitals 1958	Total operating beds, 1958	Average daily patient load		
			1958 actual	1959 estimate	1960 estimate
Veterans Administration	170	121,201	111,599	111,063	111,296
Department of Health, Education, and Welfare:					
Public Health Service:					
Division of Hospitals	16	6,539	5,282	5,280	5,274
Division of Indian Health	56	3,847	2,573	2,555	2,600
Freedmen's Hospital	1	387	324	322	306
National Institutes of Health	1	500	358	387	387
Saint Elizabeths Hospital	1	7,407	6,965	6,955	6,920
Department of Defense—Military Functions:					
Army	92	21,995	15,044	14,471	14,557
Navy	60	17,236	14,328	13,826	13,673
Air Force	135	12,237	9,450	9,215	9,433
Department of Defense—Civil Functions:					
Canal Zone Government	4	820	736	728	690
United States Soldiers' Home	1	457	375	393	400
Department of Justice: Bureau of Prisons	28	2,067	1,182	1,190	1,210
Total	565	194,693	168,216	166,385	166,746

The extent of the total hospital care in this country being provided by the Federal Government can best be illustrated by the fact that for the calendar year 1957, 1 of every 15 hospitals was federally operated and 1 of every 8 patients was cared for in Federal facilities.

Outpatient medical and dental care in Federal facilities.—To provide outpatient care for their beneficiaries, Federal agencies operate dispensaries, offices, and medical and dental clinics in addition to the hospitals listed above. The total medical and dental outpatient care in all Federal facilities is as follows:

Total treatments and examinations

Agency	1958 actual	1959 estimate	1960 estimate
Veterans Administration	1,577,977	1,586,060	1,595,000
Department of Health, Education, and Welfare:			
Public Health Service:			
Division of Hospitals	1,146,340	1,119,000	1,119,000
Division of Indian Health	574,235	606,000	640,000
Freedmen's Hospital	95,213	95,000	95,000
Department of Defense—Military Functions:			
Army	28,141,000	25,164,000	26,174,000

FEDERAL HOSPITAL AND MEDICAL CARE PROGRAMS—Continued

ficiaries in a particular area, or where appropriate facilities are not available to meet specific requirements, contractual arrangements are made to insure adequate discharge of Federal responsibilities. The following table summarizes the extent of this contractual care program.

Sponsoring agency	Inpatient average daily patient load			Outpatient treatments and examinations		
	1958 actual	1959 estimate	1960 estimate	1958 actual	1959 estimate	1960 estimate

Total	8,328	8,020	7,542	755,282	777,386	781,646

Capital improvement of Federal facilities.—The Federal agencies have continuing programs for the improvement of the physical facilities in which the care is rendered, including new construction, replacements, major rehabilitations and modernizations, major alterations, improvements, and repairs. In 1960 it is estimated that $102 million will be obligated for construction or planning of new hospitals and related facilities, replacement of existing hospitals, and modernization projects.

Gross obligations for hospital and medical care.—To provide the required hospital and medical care for legal beneficiaries, either in Federal hospitals and clinics or through contractual arrangements, and to provide and maintain modern, efficient medical facilities, the Federal Government is incurring annually approximately $1.8 billion in gross obligations as reflected in the following data.

Gross obligations

[In millions]

Purpose	1958 actual	1959 estimate	1960 estimate
Hospital and medical care in Federal facilities:			
Department of Defense—Military Functions	$579.6	$610.9	$594.8
Department of Defense—Civil Functions	10.1	11.2	11.6

Total	1,724.1	1,829.3	1,814.9

HOSPITAL AND MEDICAL CARE PROGRAMS BY AGENCY

Coverage.—The material presented to this point represents a broad summary of the scope, functions, and gross obligations of the Federal hospital and medical care programs. This section of the special analysis is designed to provide an understanding of the diversity of beneficiaries, responsibilities, and means used to provide required care by the individual departments and agencies.

DEPARTMENT OF DEFENSE—MILITARY FUNCTIONS

The Department of Defense was responsible in 1958 for the complete medical and dental care of approximately 2.7 million active duty military personnel and for limited care of approximately 3.3 million dependents and 207,000 retired personnel.

To provide care for these beneficiaries, the military services of the Department operated 287 hospitals in 1958, of which 195 were in the United States and 92 were overseas. In these hospitals, an average of more than 58,000 outpatient treatments each day were provided in 1958 and the number of patients per day averaged 36,965, including 1,007 tuberculosis and 2,031 neuropsychiatric patients. The following table shows the average number of each of the categories of patients in hospitals of each of the military services in 1958.

Average number of patients by type of beneficiary, fiscal year 1958

	Army hospitals	Navy hospitals	Air Force hospitals	Total
Active duty personnel:				
Army	8,592	574	307	9,473
Navy	480	8,942	113	9,535
Air Force	831	501	5,612	6,944
Other uniformed services	14	31	4	49
Dependents	3,387	1,589	2,618	7,594
Retired personnel	428	669	167	1,264
Other	1,312	592	202	2,106
Total	15,044	12,898	9,023	36,965

The Armed Forces also operate medical and dental clinics which play a major role in maintaining the health of the Armed Forces personnel and their dependents. In 1958 the workload in these facilities, including that on board ships, amounted to 47,448,000 medical and dental outpatient treatments or examinations and a daily average of 1,857 patients.

The operation of medical facilities by the Department of Defense is financed principally by appropriations to each of the military services for medical care and pay of military personnel and by payments made by patients or other Federal agencies for care given their beneficiaries. It is estimated obligations related to the operation of medical facilities by the Department of Defense amounted to $579.6 million in 1958.

Medical care in non-Federal facilities is primarily related to care authorized by the Dependents' Medical Care Act, Public Law 569, 84th Congress. This law, which became effective December 7, 1956, authorizes medical care at Government expense by private physicians in community hospitals for wives, children, and dependent husbands of personnel serving on active duty in the Army, Navy,

SPECIAL ANALYSIS J—Continued

FEDERAL HOSPITAL AND MEDICAL CARE PROGRAMS—Continued

Marine Corps, Air Force, Coast Guard, Public Health Service, and Coast and Geodetic Survey. Restrictions in the utilization of civilian facilities have been effected by regulations to insure optimum utilization of hospitals operated by the military services. The law has made possible hospital care at Government expense for those dependents residing so far from military medical facilities that they are unable to utilize such facilities. The number of dependents receiving care in non-Federal hospitals and the obligations in 1958 and estimated program for 1959 and 1960 are shown in the following table:

	1958 actual	1959 estimate	1960 estimate
Army:			
Average daily patient load	1,599	1,390	1,085
Obligations (millions)	$24.2	$24.0	$19.9
Navy:			
Average daily patient load	1,608	1,421	1,421
Obligations (millions)	$28.5	$27.9	$29.0
Air Force:			
Average daily patient load	2,174	2,190	1,995
Obligations (millions)	$35.6	$40.0	$38.3
Total:			
Average daily patient load	5,381	5,001	4,501
Obligations (millions)	$88.3	$91.9	$87.2

In addition to the above, approximately $3 million per year is obligated for emergency care of military personnel in non-Federal hospitals.

Construction of hospital and medical facilities.—The military construction programs each year include projects which are either replacements of inadequate hospitals, dispensaries, and dental clinics or are new facilities to serve bases being activated. Since the beginning of 1952, the construction of 65 hospitals, most of them replacements for obsolete and temporary facilities, has been authorized.

DEPARTMENT OF DEFENSE—CIVIL FUNCTIONS

United States Soldiers' Home.—The Home, established by Congress in 1851, is a 1,445-bed domiciliary home and a 488-bed hospital located in Washington, D. C., for retired or disabled regular Army and Air Force enlisted men. It provides room, board, medical, and recreational services for members. The total number of members averaged 1,739 in fiscal year 1958, of who 375 were patients in the hospital.

Gross obligations to operate the Home are derived from a trust fund from which Congress makes annual appropriations. Income for the fund is obtained primarily from withheld pay of Army and Air Force personnel, court-martial fines, estates of deceased soldiers and airmen, and interest paid on the trust fund balance. In 1958, $1.6 million, $8.5 million, $0.5 million, and $2.5 million, respectively, accrued from these sources for a total income of $13.1 million.

Phase I of a master plan for the modernization and expansion of the Home began in 1959 with the construction of a new service area including shops, warehouse, and garage. Phase II will begin in 1960 with the construction of a new 512-bed domiciliary building and the addition of a 70-bed wing on the hospital.

Canal Zone Government.—The Canal Zone Government health services are furnished through hospitals, clinics, aid stations, and dispensaries. The health services are provided primarily in two community-type general hospitals. In addition, the Canal Zone Government operates a neuropsychiatric hospital and a leprosarium.

These hospitals provide medical care for approximately 83,000 persons, of whom 19,000 are active duty military personnel and their dependents and 64,000 are the civilian population of the Canal Zone and employees of the United States Government and their dependents residing in the Republic of Panama.

The number of inpatients in these facilities averaged 736 in 1958 and is estimated to decrease slightly to 728 and 690 in 1959 and 1960, respectively. Outpatient visits averaged 748 each day in fiscal year 1958.

Funds are provided for the operation of Canal Zone hospitals and clinics by appropriation from Congress, but the entire cost thereof is collected either from patients, the Republic of Panama, other Federal agencies, or from the Panama Canal Company. Approximately 45% of the cost of operation of these hospitals is paid by the Panama Canal Company.

VETERANS ADMINISTRATION

The 3 appropriations which finance the direct operations of the Veterans Administration's hospital and medical program will provide funds in 1960 for the operation of 168 hospitals (including 6 having a separate annex at a nearby location), 17 domiciliary homes, 14 of which are located at hospitals, and 71 outpatient clinics; care on a contractual basis for eligible beneficiaries in other hospitals; and central and area office administration, medical research, education and training, and prosthetic research and development. Of the hospitals, 39 are neuropsychiatric, 18 tuberculosis, and 111 general medical and surgical.

Program	1958 actual	1959 estimate	1960 estimate
Average daily patient and member loads:			
Veterans Administration hospitals:			
Neuropsychiatric patients	61,250	61,049	61,498
Tuberculosis patients	11,394	10,414	9,450
General medical and surgical patients	38,955	39,600	40,348
Veterans Administration domiciliary homes	16,673	16,810	16,812
Care in non-Federal hospitals	1,716	1,808	1,829
Total patients and home members	129,988	129,681	129,937
Number of individuals visiting outpatient clinics:			
Veterans Administration clinics	1,577,977	1,586,060	1,595,000
Fee basis physicians and dentists	583,835	577,386	588,200
Operating costs (in millions)	$822.7	$859.9	$883.7

Almost two-thirds of all the patients in Veterans Administration hospitals are receiving care and treatment for conditions not related to their military service, ranging from 90% of the general medical and surgical patients to 75% of the tuberculosis patients and 45% of the psychiatric patients. Similarly 80% of the members in Veterans Administration domiciliary homes are non-service-connected. Under existing law such veterans who state under oath that they are unable to defray the costs of care and treatment for such diseases and disabilities are eligible for

SPECIAL ANALYSIS J—Continued

FEDERAL HOSPITAL AND MEDICAL CARE PROGRAMS—Continued

hospitalization in Veterans Administration facilities to the extent that beds are available. Care under the outpatient program is limited to service incurred conditions except for Spanish American War veterans.

Recent studies indicated that, as of June 1957, 59% of all hospitalized veterans and 48% of those hospitalized for non-service-connected conditions in the entire country were receiving their care under Veterans Administration auspices.

Veterans hospitalized by type of patient and service-connected status as of June 1957

Type of patient	All hospitalized veterans			Non-service-connected patients		
	Total	Under Veterans Administration auspices		Total	Under Veterans Administration auspices	
		Number	Percent of total		Number	Percent of total non-service-connected patients
Tuberculosis	18,200	12,200	67	15,100	9,100	60
Psychiatric	84,900	57,300	68	53,600	26,000	49
General medical, surgical, and neurological	84,700	40,700	48	80,100	36,100	45
Total	187,800	110,200	59	148,800	71,200	48

Hospitalization of Veterans Administration beneficiaries in other Federal hospitals and in non-Federal hospitals in the Territories and possessions of the United States is provided for either service-connected or non-service-connected conditions to insure coverage in areas where there is a shortage of Veterans Administration facilities. Hospitalization in non-Federal hospitals in the continental United States is provided when suitable facilities are not feasibly available in Veterans Administration hospitals and is restricted to male veterans requiring hospitalization for service-connected conditions, female veterans in need of hospitalization for treatment of either service or non-service-connected conditions, and those veterans requiring hospitalization to prevent interruption of their vocational rehabilitation training.

For fiscal year 1960 a construction program is recommended with new obligational authority of $20,159,000. This will provide $3,000,000 for the full cost of construction of a large number of minor projects (costing less than $300,000 each), $1,980,000 for planning the construction of $22,000,000 worth of larger modernization projects, $14,379,000 for construction of projects planned in 1959, and $800,000 for plans for the construction of a 400-bed hospital building at the Veterans Administration hospital at Oteen, N. C.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service, Division of Hospitals.—The activities of the Division of Hospitals include the operation of hospitals, outpatient clinics, Coast Guard medical care aboard ship and at shore stations, and care in non-Federal facilities including beneficiaries under the Dependents' Medical Care Act.

The division operates 16 hospitals including 12 general, 1 tuberculosis, and 2 narcotic hospitals plus the National Leprosarium. An average of 154 patients were treated in non-Federal facilities in 1958, and it is estimated that 150 and 146 will be treated in 1959 and 1960 respectively. Included in the average load in non-Federal facilities for the 3-year period are 99, 95, and 91 patients respectively under the Dependents' Medical Care Act. The outpatient facilities include 26 clinics and 99 offices. They provided care for 559,000 outpatients in 1958, and it is estimated that the number for 1959 and 1960 will be 544,000 for each year.

Gross obligations for medical care amounted to $43.5 million in 1958, and it is estimated that $45.6 million will be obligated in 1959 and $46.7 million in 1960. Included in these total obligations for the 3-year period are $1.8 million, $1.7 million, and $1.8 million, respectively, for the care of beneficiaries under the Dependents' Medical Care Act in non-Federal facilities.

Average daily patient load

	1958 actual	1959 estimate	1960 estimate
By type of hospital:			
General	2,743	2,710	2,724
Mental (including narcotic)	1,960	2,000	2,000
Tuberculosis	283	275	260
Leprosarium	296	295	290
Total	5,282	5,280	5,274
By type of beneficiary:			
American merchant seamen	2,228	2,200	2,200
Narcotic addicts	1,361	1,385	1,385
Patients with leprosy	298	295	290
Coast Guard personnel	316	319	319
Bureau of employees compensation	262	262	262
Veterans	249	250	250
Dependents of uniformed services	163	199	199
All other	405	370	369
Total	5,282	5,280	5,274

Public Health Service, Division of Indian Health.—The Division of Indian Health provides health services to 385,000 Indians and natives of Alaska through the operation of 52 general hospitals and 4 tuberculosis sanatoria, outpatient clinics associated with the 56 hospitals and 213 other medical facilities such as health centers and health stations. Medical care is also provided by contractual arrangements with community hospitals and private physicians. In addition, many services designed to improve health standards of the Indians are provided including public health nursing, school health, dental care, improved sanitation and water supply, and health education.

The following table shows the actual inpatient and outpatient workloads for 1958 and those estimated for 1959 and 1960:

	1958 actual	1959 estimate	1960 estimate
Indian hospitals:			
Average daily patient load	2,573	2,555	2,600
Outpatient visits	574,235	606,000	640,000
By contractual arrangements with non-Federal facilities:			
Average daily patient load	1,000	986	989
Outpatient visits	129,000	159,000	159,000

Total obligations for medical care services, excluding construction of facilities, were $40.6 million in 1958 and are estimated to total $41.8 million and $43.4 million in 1959 and 1960, respectively.

The Indian health construction program embraces construction of new hospitals, health centers, and clinics; complete modernization and extensive major renovation of existing permanent facilities; and housing for personnel.

SPECIAL ANALYSIS J—Continued

FEDERAL HOSPITAL AND MEDICAL CARE PROGRAMS—Continued

Since the transfer of responsibilities from the Department of Interior on July 1, 1955, funds have been appropriated for 5 new hospitals, modernization of 4 other hospitals, and for numerous clinics, housing units, and other smaller projects.

Public Law 151, 85th Congress, provides for assistance in building community hospitals in lieu of constructing separate Federal facilities for Indians. Including this assistance for community hospitals, obligations for construction of Indian health facilities are estimated to be $4.7 million in 1960, as compared to an estimate of $12.5 million in 1959, and actual obligations of $4.5 million in 1958.

Public Health Service, Clinical Center.—The 500-bed facility of the National Institutes of Health with related clinical research laboratories is an integral part of the medical research program and provides medical care to patients, the treatment of whom is integrated with specific research projects conducted by the seven institutes. Only those patients having illnesses which afford material suitable to specific clinical investigations being conducted are admitted to the hospital.

The center is financed from appropriations of the seven institutes and the General research and services appropriation. Total obligations amounted to $9.2 million in 1958 and are estimated at $10.1 million and $10.2 million for 1959 and 1960. The obligations for direct care only included in the above for the 3-year period are $6.5 million, $7.1 million and $7.1 million.

Saint Elizabeths Hospital.—Saint Elizabeths Hospital, originally established in 1855, is a 7,400-bed mental hospital located in Washington, D. C., which provided care for an average of 6,965 patients in 1958. Of these, 74% were residents of the District of Columbia; the remainder were various groups of Federal beneficiaries.

Average daily patient load

Category of patients	1958 actual	1959 estimate	1960 estimate
District of Columbia residents	5,132	5,095	5,040
Federal and District of Columbia prisoners	529	580	619
Veterans	354	350	350
Uniformed service personnel	338	320	298
District of Columbia nonresidents	218	218	218
Virgin Islanders	140	145	148
Other Federal patients	254	247	247
Total	6,965	6,955	6,920

Funds for the operation of the hospital in fiscal year 1960 are to be obtained from (*a*) direct appropriation for Federal beneficiaries, $3,715,000; (*b*) reimbursements from Federal agencies, $1,217,000; (*c*) reimbursements from the District of Columbia Government, $13,226,000; and (*d*) other income, $72,000.

A long-range program was developed by the General Services Administration in 1945 for replacing the old and obsolete buildings at the hospital. Three buildings have been completed, a fourth is under construction, and planning is underway for a new cafeteria and treatment building. The District of Columbia Government is required to contribute a share of the construction costs of these buildings over a 40-year period proportional to the number of patients who are District of Columbia residents.

Freedmen's Hospital.—Freedmen's Hospital, consisting of 320 general and 150 tuberculosis beds and an outpatient department, has traditionally been affiliated with the Howard University College of Medicine as a teaching hospital and has served as a community hospital for the Negro population in the Washington, D. C., metropolitan area. It is the only Federal hospital operating a school of nursing education. The inpatient and outpatient loads have remained fairly steady for the last 3 years:

	1958 actual	1959 estimate	1960 estimate
General hospital	268	266	259
Tuberculosis annex	56	56	47
Total	324	322	306
Outpatient visits	95,213	95,000	95,000

Operation of the hospital is to be financed in 1960 by (*a*) direct Federal appropriation to support the training program and care of indigent patients, $3,190,000; (*b*) income from private patients, $1,061,750; (*c*) reimbursement from the District of Columbia Government for certified indigent patients, $450,000; and (*d*) reimbursement from surrounding county governments for indigent patients, $18,250.

Legislation has been sponsored by the Department of Health, Education, and Welfare to transfer Freedmen's Hospital from the Department to Howard University. It would also authorize modernization and construction to provide a modern 500-bed hospital as well as Federal grants for operation over a period of years, on a decreasing basis, to aid the hospital to become self-sufficient.

DEPARTMENT OF LABOR

Bureau of Employees Compensation.—Federal employees injured in the course of their employment receive medical care either in Federal hospitals or through use of community hospitals and private physicians. Care furnished through hospitals and clinics of the Public Health Service are financed directly by that agency while the Bureau of Employees Compensation assumes financial responsibility for care provided in other Federal hospitals and through local community resources. Total obligations incurred by the Department of Labor for care through community resources in 1958 were $5.7 million and are estimated to be $6.2 and $6.5 million in 1959 and 1960, respectively.

DEPARTMENT OF JUSTICE

Bureau of Prisons.—Medical services are furnished to the Federal prison system by the Department of Health, Education, and Welfare, through the Public Health Service, under the act of May 13, 1930. Twenty-eight hospitals and infirmaries, which provide both inpatient and outpatient services, were operated in Federal penal institutions in 1958. Acute disorders are usually cared for in prison hospitals, but inmates with chronic illnesses are transferred to the 1,000-bed Medical Center at Springfield, Mo.

The normal bed capacity of the system in 1958 was 2,067 and is expected to increase to 2,101 by 1960. The average daily patient load was 1,182 in 1958 and is estimated to increase to 1,190 and 1,210 in 1959 and 1960, respectively. Total outpatient treatments and examinations for each fiscal year are 785,574, 801,520, and 839,000.

SPECIAL ANALYSIS J—Continued

FEDERAL HOSPITAL AND MEDICAL CARE PROGRAMS—Continued

Included in these figures is the Springfield Medical Center which had an average daily patient load of 822 in 1958, of which 457 were mental patients.

Obligations for medical care of the inmates of Federal penal institutions were $1.7 million in 1958 and are estimated at $1.9 million and $2.1 million for 1959 and 1960, respectively.

FEDERAL GRANTS FOR HOSPITAL, MEDICAL, AND DOMICILIARY CARE, AND HOSPITAL CONSTRUCTION

In addition to the operation of its own medical and hospital facilities and contracting for care of its beneficiaries in non-Federal facilities, the Federal Government makes grants-in-aid to assist States and localities in meeting their community hospital and domiciliary needs.

VETERANS ADMINISTRATION

State veterans' homes.—Domiciliary care is provided by 28 States in 33 State homes for veterans. The Veterans Administration assists financially these State homes in caring for veterans who would be eligible for care in Veterans Administration facilities by making grants of $700 per year per veteran, or one-half the per capita cost of maintenance, whichever is less. The Veterans Administration contribution to maintenance and operation of the State homes was $5,971,341 in 1958 with estimates of $6,158,000 and $6,480,000 in 1959 and 1960, respectively. The number of beneficiaries for whom care will be provided in 1960 is 9,600 as compared with 9,318 in 1958 and 9,500 in 1959.

Grants to the Republic of the Philippines.—Grants to the Republic of the Philippines are made, in accordance with the act of July 1, 1948, as amended, for the medical care and treatment of certain veterans in the Philippines. Grants totaled $1,590,000 in 1958, $1,250,000 in 1959, and $2,000,000 in 1960, the latter estimate based on the revised program enacted by Congress in Public Law 85–461.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Payments to Hawaii.—Grants are made to the Territory of Hawaii to defray the cost of care and treatment of persons afflicted with leprosy. The Territory is reimbursed to the extent of cost of the program up to the amount appropriated annually by Congress. Actual obligations were $1 million in 1958 with the same amount estimated for 1959 and 1960.

Hospital and medical facilities survey and construction program.—The purpose of the hospital and medical facilities survey and construction program is to assist, through the States, in providing adequate community hospital and other diagnostic and treatment services to the people of the Nation. This is accomplished in two steps; namely, the development of a basic plan for meeting the hospital and other medical facility needs of each State, and the construction of such facilities in the order of priority of need within each State.

The Public Health Service assisted the States in making the initial surveys of need for hospitals and related facilities and development of plans to meet these needs by contributing from one-third to one-half of the cost incurred by the States. The States bear the full cost of keeping the plans up to date. Financial assistance is also provided States and Territories, local governments, and nonprofit agencies to defray from one-third to two-thirds of the costs of construction of hospitals, rehabilitation facilities, diagnostic and treatment centers, nursing homes, public health centers, and related health facilities on the basis of population and economic need.

Appropriations are made to enable the Surgeon General to conduct research, experiments, and demonstrations relating to the effective development and utilization of community hospital services, facilities, and resources, or to make grants-in-aid to States, political subdivisions, universities, hospitals, and other public and private nonprofit institutions or organizations for such research projects.

The appropriation estimate for hospital and medical facilities construction and for research activities for 1960 is $101.2 million, of which $79 million is for hospitals and public health centers; $4 million for nursing homes; $6.5 million for diagnostic or treatment centers; $4 million for rehabilitation centers; $6.5 million for chronic disease hospitals; and $1.2 million for research.

As of June 30, 1958, approximately one billion dollars in Federal funds had been committed to construct 3,972 projects in the States and Territories. This, in turn, has been matched by over $2.2 billion of State and local funds. Approximately 2,600 of the projects to which funds have been allotted have been completed and are serving their respective communities. Nearly 1,200 projects are under construction and the remainder are in the preconstruction stage. Completion of all of these projects will add or replace 170,094 hospital and nursing home beds and 1,069 new public health centers, and will result in the construction, expansion, or remodeling of 196 diagnostic or treatment centers and 82 rehabilitation facilities.

Grants to the States and Territories under the hospital survey and construction program resulted in Federal obligations for 1958 of $131.5 million, and are expected to reach $166.8 million in 1959 and $135.2 million in 1960.

Investments of revolving funds in U. S. securities	104	101	79	−77	126	101	36	91	120	146

NOTE.—Special analysis C identifies agencies with expenditures currently included in each category; the chapter summary for each agency shows the functional classification for each item.

The following changes have been made in the functional classification from the 1959 budget to the 1960 budget:

1. A new subfunction 061, Military defense, replaces the five former categories 051 through 055. The remaining subfunctions in the major national security category have been renumbered 066, 067, and 068.

2. The "Defense support" portion of the mutual security program has been reclassified from major national security (068) to International affairs and finance (152). Category 068 has been retitled "Military assistance."

3. Category 513 has been retitled "Promotion of aviation and space flight" in recognition of the expanded activities of the new National Aeronautics and Space Administration.

4. The school milk program of the Department of Agriculture has been reclassified from Agriculture and agricultural resources (351) to Labor and welfare (217).

5. Rental payments under the conservation reserve portion of the Agriculture soil bank programs have been reclassified from category 351 to 354.

6. Expenditures of the former Office of Defense Mobilization have been reclassified from General government (603) to Commerce and housing (520), to make prior years comparable with the current classification. Category 520 has been retitled "Civil and defense mobilization."
