INTRODUCTION

Pursuant to the provisions of the Budget and Accounting Act (31 U. S. C. 1–24) and other applicable laws, the budget for the fiscal year 1960 contains the President's recommendations for the work program and financial program of the Government for the 12 months beginning July 1, 1959, and ending June 30, 1960. It also presents comparable information for the fiscal years 1958 (actual) and 1959 (partly actual and partly estimated).

The material in the budget covers both groups of funds administered by agencies of the Government—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government), although only the Federal funds are included in the computation of the budget surplus or deficit.

ARRANGEMENT OF THE BUDGET

The budget document consists of the President's budget message and four parts which contain summary tables, detailed data, and special analyses.

In the budget message (pp. M4 through M78), appear the general statement of the President's financial program and an outline of his major recommendations.

Part I of the document (pp. 1 through 8) contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

Part II (pp. 9 through 876) contains the detail of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Also included is material on a few trust funds which require congressional action. This part of the budget begins with four statements (tables 6 through 9) which supplement the tables of part I. The remainder of part II is arranged in chapters reflecting the organization of the Government.

Part III (pp. 877 through 925) contains a summary table on trust and deposit funds, and detailed schedules and explanatory statements on the various trust funds.

Part IV (pp. 927 through 1014) contains special analyses of budget data and Federal programs. These analyses supplement material appearing in other parts of the budget. Some of these give details for certain summary figures appearing in part I—for example, a classification of budget receipts by source, and a classification of budget expenditures according to functions and subfunctions. Several of the other special analyses in part IV contain materials which present different groupings or classifications of data.

An appendix, printed separately, contains more detailed information on personal services by grade and title.

The budget for the municipal government of the District of Columbia is also printed separately and the main volume of the budget contains detail only for the Federal payments and loans to the District.

EXPLANATORY STATEMENTS

Introductory statements at the beginning of each part give further explanations as follows:

Pages 2–3—Types of funds; basis of stating receipts and expenditures; concept of budget surplus or deficit; types of new obligational authority; certain budget classifications.

Pages 10–12—Operation of Federal funds and format of material printed for most accounts and funds in part II.

Page 878—Operation of trust and deposit funds covered by part III.

Page 928—Coverage of the special analyses printed in part IV.

Detail Will Not Necessarily Add to Totals, Because of Rounding.

BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

The situation we face today as a Nation differs significantly from that of a year ago. We are now entering a period of national prosperity and high employment. This is a time for the Government to conduct itself so as best to help the Nation move forward strongly and confidently in economic and social progress at home, while fulfilling our responsibilities abroad. The budget of the United States for the fiscal year 1960, transmitted herewith, will effectively and responsibly carry out the Government's role in dealing with the problems and the opportunities of the period ahead.

This budget proposes to increase our military effectiveness, to enhance domestic well-being, to help friendly nations to foster their development, to preserve fiscal soundness, and to encourage economic growth and stability, not only in the fiscal year 1960 but in the years beyond. And it clearly shows that these things can be done within our income.

We cannot, of course, undertake to satisfy all proposals for Government spending. But as we choose which ones the Government should accept, we must always remember that freedom and the long-run strength of our economy are prerequisite to attainment of our national goals. Otherwise, we cannot, for long, meet the imperatives of individual freedom, national security, and the many other necessary responsibilities of Government. In short, this budget fits the conditions of today because:

1. ***It is a balanced budget.***—My recommendations call for an approximate equality between revenues and expenditures, with a small surplus.

2. ***It is a responsible budget.***—By avoiding a deficit, it will help prevent further increases in the cost of living and the hidden and unfair tax that inflation imposes on personal savings and incomes.

3. ***It is a confident budget.***—It anticipates, in a rapidly advancing economy, increases in revenues without new general taxes, and counts upon the unity and good judgment of the American people in supporting a level of government activity which such revenues will make possible.

4. ***It is a positive budget.***—It responds to national needs, with due regard to urgencies and priorities, without being either extravagant or unduly limiting.

5. ***It is an attainable budget.***—Its proposals are realistic and can be achieved with the cooperation of the Congress.

Federal Reserve Bank of St. Louis

Any budget is a financial plan. The budget for the Government is proposed by the President, but it is acted upon by the Congress which has the duty under the Constitution to authorize and appropriate for expenditures. Therefore, responsibility for the Government's finances is a shared one. Achievement of the plan set forth in this budget from here on depends upon congressional response, popular support, and developments in our economy and in the world.

FUTURE BUDGET OUTLOOK

The actions we take now on the 1960 budget will affect the fiscal outlook for many years to come. This budget was prepared in the light of the following general prospects for Government finances for the next few years.

Growth of revenues.—Our Nation's population and labor force will continue to increase. The output per hour of work on our farms and in our factories can also be expected to grow as it has in the past. With sustained economic expansion, with employment of our people and resources at high levels, and with continued technological advance, the value of total national production and income will be substantially larger in the future than it is today.

Economic growth generates higher personal incomes and business profits. Under our graduated income tax system, with present tax rates, budget receipts should grow even faster than national income, although the rise in receipts certainly will not be uniform from year to year. Also, some tax reforms and downward tax adjustments will be essential in future years to help maintain and strengthen the incentives for continued economic growth. With a balance in our finances in 1960, we can look forward to tax reduction in the reasonably foreseeable future. In the long run, taxes should be so arranged that in periods of prosperity some annual provision is made for debt reduction, even though at a modest rate.

Control of expenditures.—The estimated 1960 expenditures, while $3.9 billion less than in 1959, will still be $12.4 billion higher than in 1955, an average increase of almost $2.5 billion a year. These figures emphasize that if we are to succeed in keeping total expenditures under control in the coming years we must recognize certain hard facts.

First, defense spending will remain extremely large as long as we must maintain military readiness in an era of world trouble and unrest. Until there is a significant and secure easing of world tensions, the actions by the Department of Defense to realign forces, close unneeded

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

installations, and cut back outmoded weapons will achieve only relatively small expenditure reductions. Keeping our military structure capable and ready to meet any threat means that we must continue to strengthen our defenses. It is but a reflection of the world in which we live to stress again the fact that modern weapons are complex and costly to develop, costly to procure, and costly to operate and maintain.

In the 1960 Budget:

I. A Balanced Budget

Receipts....	$77.1 billion
Expenditures.	77.0 billion
Surplus.	0.1 billion
New authority to incur obligations.	$76.8 billion

Second, without one single new action by the Congress to authorize additional projects or programs, Government outlays for some of our major activities are certain to keep on rising for several years after 1960 because of commitments made in the past. For example, commitments for urban renewal capital grants have exceeded net expenditures by about $200 million or more for each of the last 3 years. Money to meet these commitments will be paid out in the years immediately ahead. Similarly, continued construction of the many water resources projects underway throughout the country will raise expenditures for these programs in the next 2 years beyond the current record amount.

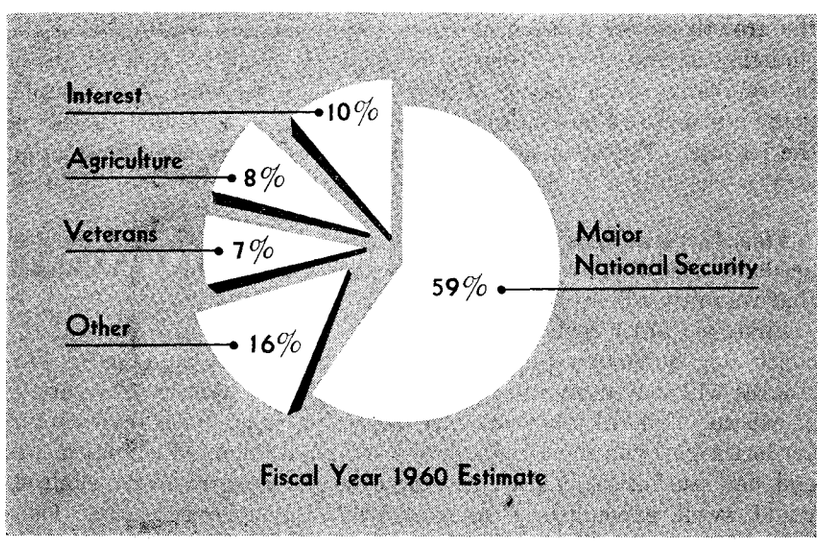
Moreover, inescapable demands resulting from new technology and the growth of our Nation, and new requirements resulting from the changing nature of our society, will generate Federal expenditures in future years. As a matter of national policy we must, for example, make our airways measure up to the operational and safety needs of the jet age. We must not forget that a rapidly growing population creates virtually automatic increases in many Federal responsibilities.

Fiscal soundness and progress.—Both domestic and defense needs require that we keep our financial house in order. This means that we must adhere to two policies:

First, we must review all government activities as a part of the continuing budgetary process from year to year. Changing circumstances will inevitably offer opportunities for economies in a variety of existing Federal programs. If we do not make such reviews and act forthrightly on their findings, the combination of old commitments and new authorizations for new or enlarged Federal responsibilities could swell expenditures unnecessarily and inconsistently. Consonant with this policy of review, reductions have been recommended

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

in this budget for 1960 appropriations which will affect expenditures not only in that year but also in later years. Furthermore, this budget contains proposals to modify certain activities and institute certain charges for special services. These recommendations are practicable and sound. They should be enacted.



Second, we must examine new programs and proposals with a critical eye. Desirability alone is not a sound criterion for adding to Federal responsibilities. The impact today and tomorrow on the entire Nation must be carefully assessed.

Our economy will continue to grow vigorously. This growth will produce additional Federal revenues, but it will not produce them without limit. We cannot take our resources for granted and we cannot spend them indiscriminately. We must deal with new conditions as they arise. We must choose what the Federal Government will do and how it will do it. If the choice is responsibly made, reductions obtained through economies and the rising revenues accompanying economic growth will produce surpluses which can be used to lessen the burden of taxes, meet the cost of essential new Government services, and reduce the public debt. The proposals in this budget have been formulated with these long-run objectives in mind.

BUDGET TOTALS

Budget expenditures are proposed to be held to $77 billion in fiscal 1960, which is $3.9 billion less than the estimated 1959 level of $80.9 billion.

PURPOSE OF BUDGET EXPENDITURES

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

With continued vigorous economic recovery, and with the relatively few new tax adjustments proposed herein, budget receipts in fiscal 1960 are expected to reach a total of $77.1 billion, an increase of $9.1 billion over fiscal 1959.

Thus a very modest surplus of about $0.1 billion is estimated for 1960, compared with a recession-induced deficit of $12.9 billion in the current fiscal year. This estimated balance assumes enactment of recommendations for extending present excises and corporation income taxes scheduled for reduction under existing law, for some new tax legislation to remove inequities and loopholes, for increased charges for special services, and for reductions in some current programs. It also assumes that certain programs can be made self-financing by stepping up the sale of portfolio assets.

In the 1960 Budget:

II. General Recommendations

1. Strengthen the effectiveness of our Armed Forces by further modernization and by improved efficiency of operations; and strengthen free world security by continued military assistance to our allies.

2. Assist free nations in their economic development through well-considered programs.

3. Promote scientific research and space exploration.

4. Carry forward current public works programs—now larger than ever before.

5. Continue at a high level programs which promote the general welfare of our people.

6. Foster community development with increased local participation.

7. Discontinue temporary emergency measures and strengthen permanent programs for economic stability.

8. Continue the adjustments needed for a freer agricultural economy with less reliance on the Federal Treasury.

9. Reduce the burden on the general public for services to special groups.

10. Encourage private lending through flexible interest rates for Government credit programs.

11. Achieve long-run economies by adapting programs to changed circumstances.

Financing of the $12.9 billion budget deficit for the current fiscal year will increase the public debt to $285 billion by June 30, 1959, $2 billion in excess of the present permanent debt limit. With a balanced budget in 1960, a $285 billion debt is indicated also for June 30, 1960. On the basis of these estimates, it will be necessary to renew the request made during the past session of Congress for a permanent debt ceiling of $285 billion and, further, to seek an increase in the temporary debt ceiling sufficient to cover heavy borrowing requirements during the first half of the fiscal year 1960, borrowings which would be repaid before June 30, 1960.

The new authority to incur obligations recommended for fiscal 1960 is $76.8 billion, which is slightly less than the estimates for expenditures and for receipts. Further reductions in new obligational authority can be attained in 1961 by the Congress enacting my recommendations for program modifications.

Federal Reserve Bank of St. Louis

BUDGET TOTALS

[Fiscal years. In billions]

	1957 actual	1958 actual	1959 estimate	1960 estimate
Budget receipts	$71.0	$69.1	$68.0	$77.1
Budget expenditures	69.4	71.9	80.9	77.0
Budget surplus (+) or deficit (−)	+1.6	−2.8	−12.9	+0.1
New obligational authority	70.2	76.3	[1] 82.4	76.8

[1] Includes $8.7 billion of anticipated supplemental requests.

A consolidation of budget and trust fund transactions on a cash basis shows that the total Federal receipts from the public in fiscal 1960 are expected to exceed payments to the public by $0.6 billion. This figure exceeds the budget surplus in 1960 mainly because (1) cash payments of interest on redeemed savings bonds are less than the accrued interest included in budget expenditures and (2) trust fund receipts exceed trust fund expenditures.

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

(See special analysis A in part IV of this document)

[Fiscal years. In billions]

	1957 actual	1958 actual	1959 estimate	1960 estimate
Receipts from the public	$82.1	$81.9	$81.7	$93.5
Payments to the public	80.0	83.4	94.9	92.9
Excess of receipts over payments	2.1	----	----	0.6
Excess of payments over receipts	----	1.5	13.2	----

BUDGET RECEIPTS

Extension of present tax rates.—The budget outlook for 1960 makes it essential to extend present tax rates on corporation profits and certain excise taxes another year beyond their present expiration date of June 30, 1959.

Development of a more equitable tax system.—Considerable progress was made last year in removing unintended benefits and hardships from the tax laws. Continued attention is necessary in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

this area. As the budget permits, additional reforms should be undertaken to increase the fairness of the tax system, to reduce the tax restraints on incentives to work and invest, and wherever feasible to simplify the laws. I hope that the committees of the Congress will work with the Treasury Department in preparing further adjustments of our tax laws for the future.

I urge the Congress to take action now on certain specific changes to maintain or increase revenues and to make the laws more equitable. The Treasury Department has recently proposed an equitable plan for taxing the income of life insurance companies. Specific proposals for corrective amendments of the laws on taxation of cooperatives will be transmitted to the Congress shortly. The Treasury will also recommend an amendment specifying the treatment processes which shall be considered mining for the purpose of computing percentage depletion in the case of mineral products. This amendment, prompted by court decisions, is designed to prevent an unintended extension of percentage depletion allowances to the sales price of finished products; a similar recommendation with respect to cement and clay products was made to the Congress last year.

In the 1960 Budget:

III. New Receipts Proposals

Highway trust fund:

1. Raise motor fuel tax to 4½ cents per gallon.

Postal fund:

2. Revise rates to bring in an additional $350 million in fiscal 1960.

Special and technical income tax adjustments:

3. Enact equitable plan for taxing income of life insurance companies.
4. Revise rules for computing percentage depletion allowances to insure that they are limited to mining processes.
5. Enact corrective legislation relating to taxation of cooperatives.

Other receipts:

6. Raise aviation gasoline tax to 4½ cents per gallon and levy new 4½-cent tax on jet fuels.
7. Adjust other fees and charges so that persons receiving special services will more nearly pay the cost of those services.

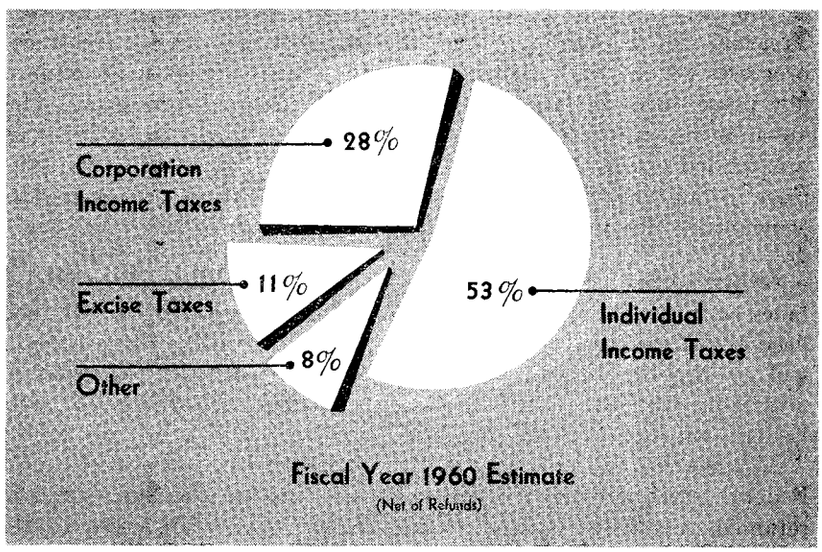
Other changes in tax rates.—In order to make highway-related taxes support our vast highway expenditures, excises on motor fuels need to be increased 1½ cents a gallon to 4½ cents. These receipts will go into the highway trust fund and preserve the pay-as-we-go principle, so that contributions from general tax funds to build Federal-aid highways will not be necessary.

At the same time, to help defray the rising costs of operating the Federal airways, receipts from excises on aviation gasoline should be retained in general budget receipts rather than transferred to the highway trust fund. The estimates of budget and trust fund receipts

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

from excise taxes reflect such proposed action. They also include a proposal to have users of the Federal airways pay a greater share of costs through increased rates on aviation gasoline and a new tax on jet fuels. These taxes, like the highway gasoline tax, should be 4½ cents per gallon. I believe it fair and sound that such taxes be reflected in the rates of transportation paid by the passengers and shippers.

BUDGET RECEIPTS



(See special analysis B in part IV of this document)

[Fiscal years. In billions]

	1958 actual	1959 estimate	1960 estimate
Individual income taxes	$34.7	$36.9	$40.7
Corporation income taxes	20.1	17.0	21.5
Excise taxes	8.6	8.5	8.9
All other receipts	5.7	5.6	6.0
Total	69.1	68.0	77.1

As part of my proposals referred to later in this message to return responsibility for certain Federal programs to the States—in this instance, responsibility for vocational education and for waste treatment facilities—Federal excise taxes on local telephone service should

SOURCES OF BUDGET RECEIPTS

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

be revised effective July 1, 1960, to allow limited credits for telephone taxes paid to the States.

Revenues.—The resurgence of our economy has been stronger than was assumed in the budget estimates that were published last September. Consequently, budget receipts for the fiscal year 1959 are now expected to total $68 billion instead of the $67 billion estimated at that time.

The estimate of $77.1 billion in receipts for 1960 is contingent on enactment of the tax recommendations mentioned earlier. Of this estimate, approximately $76.5 billion reflects the increases in receipts under present tax rates and present tax sources while $0.6 billion is from new taxes and increased nontax sources.

The anticipated rate of recovery of revenues in fiscal 1960 may be compared with the experience of the fiscal years 1955 and 1956, which reflect the recovery from the recession of the calendar year 1954. After adjusting for comparability in corporate tax payment dates, the increase in revenues from 1955 to 1956 was more than the increase estimated in this budget. With similar forces of economic recovery at work today, I have confidence that our revenue estimate is sound and will be attained.

In the 1960 Budget:

IV. Highlights of Legislative Program

Authorize:

1. A transitional 4-year program of grants for construction of civil airport facilities.
2. Loans and grants to aid areas of chronic unemployment.
3. A 6-year program of urban renewal capital grants.
4. Revenue bond financing for TVA generating facilities.
5. Statehood for Hawaii and home rule for the District of Columbia.
6. Item veto for legislation authorizing expenditures and for appropriation bills.
7. Revisions in the agricultural price support program.
8. Widening coverage of unemployment compensation.

Continue:

9. Military draft, reserve forces, and related legislation.
10. Mutual security program with strengthened investment guaranties.
11. Agricultural Trade Development and Assistance Act.
12. Current tax rates for corporation income taxes and excise taxes which are scheduled for reduction under existing law.

Strengthen and improve:

13. Housing mortgage insurance programs.
14. Minimum wage and 8-hour laws.
15. Statutory protection in labor-management relations.
16. Requirements for conduct of labor union affairs, including welfare and benefit plan reporting.

Repeal:

17. Limitations on minimum strength of military reserve forces and on disposal of unneeded military real estate.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

MAJOR PROGRAM RECOMMENDATIONS

Eleven key features of the budget recommendations are summarized below:

1. ***Strengthen the effectiveness of our Armed Forces by further modernization and by improved efficiency of operations; and strengthen free world security by continued military assistance to our allies.***—This budget assures that essential defense needs are met. The budget recommendations will bolster the defense of our country against possible attack and enable our forces to respond more quickly and vigorously to any emergency. At the same time, and as part of our effort to keep America strong, this budget reflects policies to streamline operations, to remove duplication of weapons, to accentuate the principle and practice of unification, and to minimize maintenance costs—in short, to assure the maximum defense from each dollar expended. A realignment of the Armed Forces and a continuing reappraisal of existing defense activities are underway to accomplish these objectives. This can be illustrated by the changes in the composition of expenditures for the Department of Defense. While the estimated total expenditures for the Department will increase $145 million from 1959 to 1960, those for procurement of missiles and for research, development, test, and evaluation will rise more than $800 million.

In addition to strengthening our own Armed Forces, and recognizing the inseparability of free world defense, the budget continues to provide through military assistance the critical margin of weapons and equipment required by our allies who, with us, forge a strong shield against possible aggressors.

2. ***Assist free nations in their economic development through well-considered programs.***—Today the less-developed nations—a score of which have attained independence since World War II—are struggling to improve their economic and social conditions. The success of these efforts is vital not only to the freedom and well-being of the millions of people within their boundaries but also to the population of the entire world. Fortunately, the free countries of the world are taking many actions together to promote trade with and to expand investment in such nations. As part of this joint effort, the following actions for the United States are recommended:

(*a*) Increase substantially our subscriptions to the International Bank for Reconstruction and Development and the International Monetary Fund. This should be done promptly.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(*b*) Bring the capitalization of our Development Loan Fund up to the amount originally recommended for the fiscal year 1959 by enacting a supplemental amount of $225 million.

(*c*) As a supplement to established institutions, create a joint development banking institution with our Latin American neighbors.

(*d*) Increase the emphasis on economic development in the mutual security programs through such measures as the appropriation of $700 million for the Development Loan Fund and $211 million for technical cooperation in fiscal 1960.

(*e*) Enact legislation to expand the mutual security investment guaranty program.

In the 1960 Budget:

V. Legislative Proposals to Adapt Programs to Changed Circumstances

Encourage more private financing for credit programs through flexible interest rates and other changes:

1. Veterans housing loans.
2. Rental, military, and cooperative housing mortgages.
3. Rural electrification and telephone loans.
4. College housing loans.
5. Maritime mortgages.

Authorize sale of property:

6. Surplus military and other real property.
7. Alaska communications system and related facilities.

Review and revise operating and benefit standards:

8. Foreign bidding on certain military contracts.
9. Agricultural conservation program.
10. Military service credits for railroad retirement.
11. Veterans pension and other programs.

Expand non-Federal participation:

12. Urban renewal.
13. Flood control.
14. School aid in federally affected areas.
15. Waste treatment construction grants.
16. Vocational education grants.
17. Public assistance.
18. Feed and seed assistance in disaster areas.

3. *Promote scientific research and space exploration.*—In the current fiscal year, total expenditures for basic and applied research and for scientific development have reached record amounts and a supplemental appropriation for 1959 to advance space technology is recommended.

For the fiscal year 1960, research and development expenditures will be increased still further, with emphasis on space exploration, peaceful uses of atomic energy, and basic science. Extensive space exploration investigations are being initiated, utilizing satellites and probes. Development work is going forward on high-energy fuel rockets, a million-pound thrust engine, and a nuclear rocket engine.

National Science Foundation	35	60	80
Other agencies	133	192	208
Total	3,498	4,841	5,484

[1] As explained in special analysis H, part IV, figures for 1958, 1959, and 1960 are not fully comparable because of changes in appropriation structure; they also exclude about $2 billion of procurement funds in each year in support of research and development.

4. *Carry forward current public works programs—now larger than ever before.*—Increases were provided last year in construction programs for water resources, health facilities, public buildings, airways, and highways, partly to combat the recession. As a result, Federal expenditures for civil public works in fiscal 1960 will be the highest in history. It therefore seems both possible and prudent to take a breathing spell in the initiation of new projects. Accordingly, no additional funds are proposed in 1960 for starting new water resources projects, general office buildings, and veterans hospitals. Furthermore, reduced new spending authority is recommended for grants for local public and private hospitals, health research facilities, and for waste treatment works, although expenditures under earlier authorizations will continue to be high. Highway expenditures will increase in accordance with the program planned under the Federal Aid Highway Act, and modernization of airway facilities to meet operational and safety needs will go forward at a higher level of expenditure.

The combined outlay for reclamation, flood control, and navigation projects is estimated to be higher than ever before in 1960. Expenditures are expected to increase again in fiscal 1961 and to hold at that level in 1962 even without new starts beyond those for which initial appropriations have already been made. The new water resources projects authorized for starting in 1959 will be so spread out as to schedule initiation late in the year, wherever practicable, and, in a few cases, construction may be deferred until the fiscal year 1960.

CIVIL PUBLIC WORKS

Expenditures from budget and trust funds, including grants and loans to State and local governments

(See special analysis F in part IV of this document)

[Fiscal years. In millions]

	1958 actual	1959 estimate	1960 estimate
Highways and roads	$1,589	$2,559	$3,097
Water resources and related developments	971	1,031	1,089
Office buildings and post offices	78	200	310
Aviation and space flight facilities	110	195	233
Schools and hospitals	183	215	201
Other structures	175	343	312
Total	3,106	4,543	5,242

5. *Continue at a high level programs which promote the general welfare of our people.*—This budget makes provision for programs which are of utmost importance to our individual citizens. Expenditures for health research and for constructing various types of health facilities will be at a record level in 1960. Activities to improve education, especially in science and mathematics, will be increased significantly in 1960 as a result of programs started or expanded in fiscal 1959. Grants to States for vocational rehabilitation will be higher in 1960 than in 1959, with services provided to 314,000 disabled persons. Public assistance grants to the aged, the blind, the disabled, and to dependent children will continue to rise. Strengthened programs in the Food and Drug Administration are recommended.

Proposals will be made for widening the coverage of unemployment compensation, for extending and improving the minimum wage and 8-hour laws, and for providing added protection in labor-management relations. I am again proposing legislation to strengthen safeguards on the conduct of labor union affairs, including the strengthening of the law enacted last year requiring public reporting on union welfare and pension plans.

In the housing field, the budget recommends broadening the authority of the Federal Housing Administration and removing the ceiling on the total volume of mortgage insurance it can provide. Legislation is also recommended authorizing capital grants for urban renewal projects for a 6-year period. Annual contributions to local housing authorities for low-rent public housing projects will rise in 1960 as more projects are completed. Commitments by the Federal National Mortgage Association to purchase mortgages on housing for

480000—59——II

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

urban renewal areas for relocating displaced families and for the elderly will continue to rise in 1960.

6. *Foster community development with increased local participation.*—The Federal Government is helping local communities meet many of the major problems of community development created by increasing population and growing urbanization. Federal expenditures for grants and long-term loans to assist 14 major types of capital improvements alone will reach an estimated $2.1 billion in 1960, or almost double the amount actually spent for these programs in 1958.

CAPITAL IMPROVEMENTS IN COMMUNITIES

Federal grants and long-term loans, excluding net operating expenses

[Fiscal years. In millions]

	Expenditures			Outstanding commitments, June 30, 1960[1]
	1958 actual	1959 estimate	1960 estimate	
Airport grants	$43	$50	$55	$162
Area assistance loans (proposed)			7	43
College housing loans	165	234	186	329
Development corporation loans (Small Business Administration)		4	15	6
District of Columbia construction grants and loans	11	15	16	73
Health research facilities construction grants	12	20	20	55
Hospital construction grants	105	123	128	288

Federal Reserve Bank of St. Louis

By the close of fiscal 1960, commitments for future Federal expenditures for the same programs are estimated to be over $6 billion.

These totals show how rapidly direct Federal aid to communities is growing. They exclude many other Federal programs which indirectly assist development or redevelopment of communities, such as construction of river and harbor improvements and air navigation facilities, grants for intercity highways, purchases of general housing mortgages and guaranties of housing and business loans of many types. They also exclude Federal aid to communities for nonconstruction programs in such fields as health and welfare.

Federal programs should foster orderly development in a way that will encourage private participation and will share costs equitably among the beneficiaries and the various levels of government. Legislation will be proposed to meet these objectives in the programs for urban renewal, college housing, highways, airports, schools in federally affected areas, and construction of waste treatment facilities. The budget also provides for a new program to assist industrial redevelopment of areas which have severe and persistent unemployment. The Congress is urged to enact legislation for such assistance along the line I have recommended previously.

7. Discontinue temporary emergency measures and strengthen permanent programs for economic stability.— Among the governmental actions taken last year under the stress of the recession were two temporary measures involving substantial Federal expenditures.

Funds were advanced to the States and Territories to finance extended unemployment benefits for workers who had exhausted their regular benefits. Only 17 jurisdictions chose to receive these advances for all workers who could be made eligible. Five other States enacted their own legislation extending the period of benefits for those covered under the regular State program. Of the remaining States and Territories, some obtained Federal aid for extended unemployment benefits for veterans and Federal employees alone, while 17 had no extended benefit legislation of their own and did not take advantage of the Federal program at all. In view of the rapidity of the economic recovery and the lack of uniformity of State participation, it is now estimated that expenditures over the life of this program will be $206 million less than the $666 million appropriated for it.

Another temporary measure was the authorization for Government purchases of $1 billion of mortgages on low-cost housing. This full amount has been committed. By the end of fiscal 1959, it is estimated that the Government will have spent over $600 million for such mortgages and will have over $300 million of commitments still outstanding, for which expenditures will occur in 1960.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Direct emergency Federal expenditures for unemployment benefits and for emergency stimulation of home construction are unnecessary on a continuing basis. It is better to strengthen our essential continuing programs for economic growth and stability, and this budget so contemplates.

8. ***Continue the adjustments needed for a freer agricultural economy with less reliance on the Federal Treasury.***—The agricultural sector of our economy is in the paradoxical situation of having more efficient farms than ever before and yet of being more dependent upon Federal financial aid. During the current fiscal year, budget expenditures for agriculture and agricultural resources are expected to reach a peak of $6.8 billion. For the coming year, they are estimated to decline to about $6 billion, mainly as a result of the termination of the acreage reserve of the soil bank.

About three-quarters of these expenditures are for price supports and other programs to stabilize farm prices and income. Other expenditures for agriculture consist primarily of payments for conservation; loans for rural electrification, telephones, and farm ownership and operation; and research and extension activities.

Last year, the Congress enacted some changes in price-support laws, but additional amendments are necessary to help our agricultural economy adjust to the continuing revolution in farming technology. Changes are also needed in other agricultural programs. Legislative proposals will be transmitted later which should help our agricultural economy gradually free itself from so much Government support and control.

9. ***Reduce the burden on the general public for services to special groups.***—Certain Government activities confer measurable special benefits on identifiable groups or individuals beyond the benefits to the general public. The cost of Federal services which convey special benefits should be recovered through charges paid by the beneficiaries rather than through taxes on the general public.

In furtherance of this principle, the recent Congress approved some adjustments in postal rates, and increased the fees for a few other relatively smaller services. On the other hand, it increased postal employees' pay and highway construction grants without providing the additional charges needed to finance such expenditures. As a result of these and other developments, further legislation is necessary to put the postal service on a self-supporting basis and to finance highway construction without drawing on the general revenues.

This budget recommends legislation to make the activities listed in the following table more nearly self-supporting.

Federal Reserve Bank of St. Louis

ESTIMATED SAVINGS TO THE GENERAL TAXPAYERS FROM MORE ADEQUATE FEES AND CHARGES

[In millions]

	Fiscal year 1960	Full annual effect [1]
Support highway expenditures by highway-related taxes: [2]		
Finance deficiency estimated under present law	$241.0	$818.0
Transfer financing of forest and public lands highways to trust fund	41.0	41.0
Revise postal rates	350.0	350.0
Charge specifically for use of Federal airways:		
Transfer aviation fuel taxes from highway trust fund to general fund	34.0	34.0
Increase taxes on aviation fuels	51.0	70.0
Revise fee schedule for noncompetitive oil and gas leases	--------	14.0
Raise patent and trademark fees	3.5	3.5
Miscellaneous increased fees and cost recoveries	11.5	20.8
Total	732.0	1,351.3

[1] Net change on annual basis with present workload or first full fiscal year effect.

[2] Trust fund receipts, as distinct from budgetary savings, will be increased by an estimated net amount of $690 million in 1960 and nearly $900 million in subsequent years.

10. *Encourage private lending through flexible interest rates for Government credit programs.*—In a number of important cases, present legislation on programs for making loans, purchasing mortgages, and insuring or guaranteeing private loans sets inflexible and uneconomic restrictions on interest rates. This creates unneeded and hidden subsidies and requires excessive use of Federal funds by discouraging private lending.

To correct this situation, I recommend that for interest rates on new loans and commitments:

(*a*) The 4¾% ceiling on loans guaranteed by the Veterans Administration be replaced by a maximum rate not in excess of the rate for mortgages on sales housing insured by the Federal Housing Administration. This change will also have the effect of revising the interest rate ceiling on direct housing loans of the Veterans Administration.

(*b*) The ceilings of 4½% and 5% for rental (including armed services) and for cooperative housing mortgages insured by the Federal Housing Administration be increased to levels adequate to assure private financing.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(*c*) The present statutory interest rate of 2% for loans made by the Rural Electrification Administration be replaced by a rate which will cover the current cost to the Treasury of equivalent-term borrowing and other reasonable costs.

(*d*) The statutory standard for college housing loans made by the Housing and Home Finance Agency (the rate at present is 2⅞%) be amended to authorize a rate which will cover the current cost to the Treasury of equivalent-term borrowing and other reasonable costs.

(*e*) The 3½% ceiling on ship mortgage loans by the Maritime Administration be replaced by authority to charge the full costs of the loans.

Such actions by the Congress will encourage the participation of private capital, and, in the long run, will reduce Government expenditures significantly. At the same time, Government guaranties or insurance will continue to permit interest costs to borrowers more favorable than the rates charged in the open market for similar loans.

11. ***Achieve long-run economies by adapting programs to changed circumstances.***—Changing conditions in recent decades have resulted in the enactment of hundreds of laws and the creation of vast new programs administered by new or enlarged agencies. In this same period, few Government programs or operations have been discontinued or reduced. Furthermore, in many cases, worthwhile objectives have been pursued with outmoded activities or methods and with accompanying excessive costs to taxpayers. This is a wasteful and inefficient way to conduct public business.

It is proposed in this budget that we start anew to amend the basic legislation for a number of Government programs and operations in order to adapt them to present circumstances and assure that they accomplish their objectives more effectively and with less cost.

IMPROVE CONTROL OVER THE BUDGET

Actions can and should be taken to achieve more effective control over the budget by improving present practices and procedures, especially those related to the consideration of budgetary requests.

Consider full fiscal situation.—The procedure used by the Congress for the review of fiscal matters is one which only the Congress itself can determine. Nevertheless, I believe that achievement of any overall fiscal objective is handicapped by the absence of arrangements under which the Congress can look at the fiscal situation as a whole. Such an arrangement was contemplated under a procedure established in the Legislative Reorganization Act of 1946, but apparently did not prove satisfactory to the Congress. Over the years since that arrangement fell into disuse, the executive branch has made consider-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

able progress in achieving a more comprehensive consolidated executive budget which sets forth a financial plan, including the effect of proposed legislation. I sincerely hope that the Congress will again consider ways by which it can more effectively overcome the diffused consideration which results from separate appropriation bills, the provision of new obligational authority outside of the appropriations process, and the separate deliberations on revenue bills and the debt limit.

Item veto.—The item veto is another important and needed reform, regardless of whether appropriations are made in a number of bills or in a consolidated bill. In either case, the necessity of accepting or rejecting a bill in its entirety prevents the President from considering separable provisions on their own merits. Congress has recognized the value of an item veto by granting it to governors of our territories and insular possessions. Most States have adopted this device. Presidents of both parties, starting as far back as Ulysses S. Grant, have recommended an item veto. Legislation granting an item veto to the President should apply to legislative measures authorizing expenditures as well as to appropriation bills, and should include authority to reduce the amount of an appropriation as well as to strike out an item. The use of such a veto by a President would not remove the final authority of the Congress, which would still retain its constitutional power to override any specific veto.

Public enterprises.—The appropriation and fund structure of the Government needs a new review and some overhaul. For example, major lending programs and other business-type activities are now financed through revolving funds, which enable their expenditures and applicable receipts to be more easily related to each other and thus improve their operating flexibility. However, there are several notable exceptions—among them the Rural Electrification Administration, Farmers' Home Administration, and the power marketing agencies of the Department of the Interior. Legislation will be proposed to permit these enterprises to be budgeted through revolving funds. The possibility of converting still more business-type activities to a revolving fund basis will continue to be studied, with a view to making recommendations to the Congress.

More adequate control over the financial affairs of the Government could be achieved if all Government corporations which possess authority to draw money from the Treasury or to commit the Treasury for future expenditures were brought under the budget provisions of the Government Corporation Control Act. As in past years, legislation to accomplish this purpose will be again submitted to the Congress. I urge that it be enacted.

Legislation will also be proposed to incorporate the Alaska Railroad to facilitate its operations on a business-like basis.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Accrued expenditures and other controls.—In accordance with Hoover Commission recommendations, legislation was enacted last year to enable the Congress to exercise more direct control over the level of Government spending through limitations on accrued expenditures. As an initial step, this budget proposes such limitations for six appropriations. The beginning that can thus be made in improved congressional control should be extended as rapidly as experience warrants.

This budget extends the cost-based budgeting procedures which are necessary to get a proper measure of financial performance for many of the various agencies and programs. Further extensions will be made as agency accounting systems are made adequate to support them.

Continuing improvements.—Efforts to improve financial management practices need to be continued. Considerable progress has already been made by the executive agencies under the leadership of the joint accounting program which is sponsored by the Bureau of the Budget, the Treasury Department, and the General Accounting Office. But there remain a number of unsatisfactory situations, unimportant in earlier years of smaller budgets, that are now worthy of attention.

In the past, a number of appropriation items have been placed on a permanent basis and, in some of these cases, the major result achieved has been weaker control over the expenditures concerned. In addition, even though there are a few justifiable exceptions, the practice of providing authorizations to expend from debt receipts and contract authority outside the appropriation process is generally inconsistent with sound standards of budget practice.

Other inconsistencies occur in the system for making financial authority available to Government agencies. Some guaranty programs are fully funded by specific grants of obligational authority, some are partially funded, and others have an open-end call upon the Treasury. Some collections of funds now credited to miscellaneous receipts might be more properly credited against the related expenditures deliberately incurred to generate the receipts. Criteria for the use of revolving funds and trust funds have not been consistently applied.

Another problem in budgetary control has developed over the use of foreign currencies. In view of the volume of currencies generated by transactions under the Agricultural Trade Development and Assistance Act of 1954 and the numerous competing demands for their use for supplementary United States programs, more adequate procedures parallel to those governing dollar obligations are necessary. The action required by the Congress to authorize the use of certain of these currencies, for which a supplemental request will be transmitted for

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

fiscal 1960, now relates to only a small portion of the currencies which will actually be used for Government programs.

The Director of the Bureau of the Budget is undertaking studies of the various weaknesses and inconsistencies mentioned herein to determine the most appropriate courses of action. Corrective recommendations will be made to the Congress as needed.

REVIEW OF MAJOR FUNCTIONS

The table below compares current estimates for each of the nine major functional categories in this budget with the actual figures for fiscal 1958 and the latest estimate for 1959. The recommendations and estimates for 1960 are discussed in the sections of this message which follow the table.

BUDGET EXPENDITURES

[Fiscal years. In millions]

Function	1958 actual	1959 estimate	1960	
			Estimate	Percent of total
Major national security	$44, 142	$46, 120	$45, 805	59. 5
International affairs and finance	2, 234	3, 708	2, 129	2. 8
Commerce and housing	2, 109	3, 509	2, 243	2. 9
Agriculture and agricultural resources	4, 389	6, 775	5, 996	7. 8
Natural resources	1, 543	1, 708	1, 710	2. 2
Labor and welfare	3, 447	4, 380	4, 129	5. 4
Veterans' services and benefits	5, 026	5, 198	5, 088	6. 6
Interest	7, 689	7, 601	8, 096	10. 5
General government	1, 356	1, 673	1, 735	2. 2
Allowance for contingencies	----	200	100	1
Total	71, 936	80, 871	77, 030	100. 0

MAJOR NATIONAL SECURITY

The changes in emphasis in the four major national security programs for the fiscal year 1960 reflect the growing armed strength of the United States and its allies and the continuing modernization of defense methods. The Department of Defense will significantly increase expenditures for procurement of missiles and for development and evaluation of new weapons, while reducing expenditures for other procurement and for construction. The Atomic Energy Commission is advancing all phases of its programs, particularly research in the peaceful uses of atomic energy. Our allies' progress in equipping

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

their armed forces and the deliveries under military assistance in 1959 and prior years permit a reduction in military assistance expenditures. Expenditures for stockpiling and expansion of defense production will be reduced because basic stockpiling objectives for most materials are now fulfilled and because many defense production expansion contracts have already been completed.

Total expenditures for major national security programs in fiscal 1960 are estimated to be $45.8 billion.

MAJOR NATIONAL SECURITY

[Fiscal years. In millions]

Program or agency	Budget expenditures			Recommended new obligational authority for 1960
	1958 actual	1959 estimate	1960 estimate

Federal Reserve Bank of St. Louis

Department of Defense—Military Functions.—The defense program for 1960 calls for new appropriations of $40,850 million. This is $288 million less than the appropriations estimated for 1959. However, approximately $0.7 billion of the funds appropriated by the Congress for 1959 in excess of the amounts recommended will be added to the 1960 program.

Expenditures in 1960 are estimated at $40,945 million, which is $145 million more than in 1959 and about $1.9 billion more than the amount spent in 1958—continuing the upward trend which began in 1956. Over the 5-year period from 1955 to 1960, annual expenditures for defense will have increased by over $5.4 billion.

Recent developments.—In the 1959 budget message I recommended a substantial acceleration of our defense effort in selected areas to enable our military strategy, techniques, and organization to keep pace with the rapid strides in science and technology.

During the last year we have made substantial progress in accelerating or starting key programs. The Atlas intercontinental ballistic missile has successfully completed a full-range test and the first operational Atlas missiles will be at launching sites by the end of the current fiscal year. Additional missiles will be put in place in 1960. The first units of the intermediate range missile Thor have already been deployed to the United Kingdom and additional units of both Thor and Jupiter will be deployed during the next 18 months. Construction is already well along on the first five submarines which will be equipped to fire the Polaris solid fuel ballistic missile and the first such submarine will go into operation in the calendar year 1960. Construction of the sixth Polaris submarine has begun and three more are authorized and will be started in fiscal 1960. Coming along at a rapid rate is the Titan, an advanced liquid fuel intercontinental ballistic missile. Development work is progressing rapidly on a "second generation" solid fuel intercontinental ballistic missile, the Minuteman.

For air defense, the Nike-Hercules, which is capable of being armed with a nuclear warhead, is replacing the Nike-Ajax. The Bomarc ground-to-air missile, capable of destroying attacking aircraft at extended ranges, will, when operational, augment manned interceptor planes. To meet the threat of attack by ballistic missiles, the Nike-Zeus missile is being developed at an accelerated pace and construction is underway on a new ballistic missile early warning system.

A dispersal program for our strategic bomber force and its supporting tankers is nearing completion. To improve the effectiveness of the B–52 intercontinental bombers, the production of the Hound Dog air-to-ground missile has been accelerated.

Important scientific data have been obtained from the satellites and lunar probes launched to date. The recent successful use of the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Atlas as a satellite clearly demonstrated the potential usefulness of satellites in the field of communications. The Department of Defense will continue to investigate satellite applications of specific military interest. Its space programs will be closely coordinated with those of the National Aeronautics and Space Administration.

The time has come to consolidate our position in key areas of defense affected by recent advances in missiles. Sufficient progress has been made on new weapons systems to permit us safely to eliminate marginal systems and to reduce the number of competitive projects. The solid fuel Pershing and Sergeant missiles will replace the liquid fuel Redstone and Corporal. Production of the Regulus II (a ship-based aerodynamic intermediate range missile) has been terminated, and the Rascal air-to-ground missile program has been canceled.

Because of a change in tactical concepts, the decoy missile Goose has been eliminated. The Seamaster jet powered seaplane project will be stopped. Other weapon systems of lesser importance have also been eliminated. No more appropriations are planned for the Jupiter and Thor intermediate range ballistic missiles after 1960, unless units in addition to those already being provided to our allies through the military assistance program should later be agreed upon.

Thus, by concentrating our efforts on the more advanced and more promising weapons systems, we can increase substantially the combat capabilities of our military forces with a relatively small increase in the overall cost of defense.

Reorganization of the Department of Defense.—The Department of Defense Reorganization Act of 1958, approved on August 6, 1958, is being put into effect.

A streamlined chain of command is being established running directly from the Secretary of Defense through the Joint Chiefs of Staff to unified and specified commands which have been given full operational control of the forces assigned to their commands. The organization of the Joint Chiefs of Staff has been strengthened to provide the Secretary of Defense with the military advice and assistance required for effective planning and direction. The committee system of the Joint Staff has been replaced by seven new directorates, including one for operations. Appropriate instructions have been issued to delineate the additional responsibilities of the Joint Chiefs of Staff and to outline their relationships with other agencies of the Department of Defense.

A director of defense research and engineering has been appointed to assure that all scientific and technological resources of the Department of Defense are put to the best possible use. I expect the new organization to provide more effective leadership, help to eliminate

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

duplication, and develop an integrated research and development program.

In addition, improvements have been made in the administrative procedures of the Department of Defense. Operating methods in the Office of the Secretary of Defense have been improved. Nearly 200 committees have been abolished. The responsibilities and functions of the assistant secretaries are being clarified.

The job ahead is to develop within this organizational framework the management relationships that will improve the decision-making process, clearly fix responsibilities, and provide to all agencies of the Department a full understanding of the broad national requirements that determine our military policy. The attainment of this objective will provide the teamwork that is essential for the continued maintenance of an effective and, at the same time, economical defense effort.

Military personnel policy.—This budget provides for a military force of about the same overall size and composition in fiscal 1960 as that planned for the end of the current fiscal year. This force, however, will have significantly greater combat power as new weapons continue to be added to inventories.

The number of active duty military personnel during 1960 will continue at the level planned for the end of the current fiscal year except for a small reduction in the Air Force. Since the end of the Korean conflict, we have followed the policy of reducing numbers of military personnel as more powerful weapons become available to our forces. However, it has become increasingly apparent that the Communist bloc is following a policy of deliberately and constantly probing free world positions to test our determination to resist the further forcible expansion of Communist influence. Under these circumstances, it is prudent not to plan for any significant changes during fiscal 1960 in our deployments overseas or in our ready military forces at home.

A major effort has been made during the last few years to enhance the attractiveness of military service as a career. The most recent action along this line has been the enactment of military pay adjustments and adoption of recommendations of the Advisory Committee on Professional and Technical Compensation. Although these and earlier measures increase the average cost per man, they have had highly beneficial effects in all the services. The quality of inductees and enlistees has improved. The first term reenlistment rate has increased and the experience and skill levels have been raised. These improvements point to greater stability of personnel, smaller basic and technical training loads, and, over the longer run, may permit some further reductions in military personnel.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The objective of our defense effort today is the same as it has been in the past—to deter wars, large or small. To achieve this objective we must have a well rounded military force, under unified direction and control, properly equipped and trained, and ready to respond to any type of military operations that may be forced upon us. We have such a force now, and under this budget we will continue to have such a force.

Strategic forces.—A principal element of our deterrent power is the Strategic Air Command. The 43 wings of this Command are maintained at a high state of readiness and can react quickly and effectively to meet any major threat to our national security. This Command will be further strengthened during fiscal 1960 by additional deliveries of the improved B–52 intercontinental jet bomber and by the first deliveries of the new supersonic B–58 medium jet bomber together with additional KC–135 jet tankers. In addition, a new and important weapon will be provided by the introduction of Atlas missiles.

Our deterrent forces are complemented by the tactical units of the Army, Marine Corps, and Air Force and the mobile carrier task forces of the Navy, all with striking potential of great magnitude. The submarines designed to launch the Polaris missile will add significantly to our deterrent strength as they come into the fleet.

Air defense forces.—The North American air defense system is well established and is being improved constantly. Our forward warning line, which we operate jointly with Canada, stretches from the mid-Pacific around the northern edge of the continent and across the Atlantic approaches. Behind this line we have an extensive surveillance, tracking, and communications network. Elements of the structure are being tied together for operation by the semiautomatic ground environment (SAGE) system.

All the services contribute military elements to the unified command responsible for maintaining our air defense capability. The Air Force provides warning and control and the longer range weapons systems. The Army provides the shorter range weapons and over 70 Nike-Ajax and Nike-Hercules ground-to-air missile battalions will be in operation by the end of fiscal 1960. The Navy provides sea and air based radar which extend the early warning systems. National Guard units of many States participate in air defense. In addition, other regular and reserve forces of all the services stand ready in the event of need.

These forces, together with Canada's Air Defense Command, comprise the North American Defense Command and provide an air defense shield of growing effectiveness for the entire continent.

Federal Reserve Bank of St. Louis

Sea control forces.—Historically, the Navy has been assigned the primary mission of controlling sealanes. In the conduct of amphibious warfare and antisubmarine campaigns, it is equipped to support the commands responsible for actions ranging from localized emergencies to large-scale military operations. It is ready to conduct prompt and sustained combat anywhere in the world at sea or adjacent to the sea, and is able to exploit the mobility, surprise, and concealment afforded by the world's free oceans.

The naval forces will operate 864 ships, including 389 warships, in 1960. The carrier task forces will be strengthened with new Forrestal-class carriers and higher performance aircraft possessing both conventional and atomic firepower. The cruiser, destroyer, and frigate forces are steadily acquiring a guided missile capability.

Special programs, including research and scientific studies, are underway to enhance our antisubmarine capabilities. Task forces of specially equipped ships and planes specifically designed for antisubmarine warfare are being employed.

Tactical forces.—The tactical elements of the ground, naval, and air forces combine to deal with situations short of general war or to carry out essential tasks in event of general war. These forces include 14 Army divisions organized along pentomic lines and able to deliver both nuclear and high explosive firepower. Many of these divisions are deployed overseas and are evidence of this Nation's determination to participate actively in the collective defense of the free world.

The Army divisions are supported by the tactical air wings of the Air Force, approximately half of which are deployed overseas. Other important elements of our tactical forces are the 3 divisions and 3 air wings of the Marine Corps. In areas adjacent to the seas these forces can also be supported by carrier-based aircraft.

Both the Army and Marine Corps divisions are backed up by a variety of support units organized to provide both nuclear and nonnuclear military power. Air and sea transportation for these forces are provided by the Air Force and the Navy.

The readiness of our tactical forces to respond to potential aggression was well demonstrated during the Lebanon and Quemoy crises.

Appropriation structure.—In my message to the Congress last year transmitting recommendations relative to our entire defense establishment, I pointed out the need for the Secretary of Defense to have adequate authority and flexibility to discharge his heavy responsibilities. One of the areas requiring attention is the pattern under which funds are appropriated.

Digitized for FRASER

Federal Reserve Bank of St. Louis

This budget proposes a rearrangement of appropriations for the Department of Defense in terms of major purposes rather than of organization units. These broad categories are: (1) military personnel; (2) operation and maintenance; (3) procurement; (4) military construction; and (5) research, development, test, and evaluation. This rearrangement will permit consideration of the Department of Defense budget on a more uniform and more clearly understandable basis.

Operating costs.—The annual operating costs of the Department of Defense for active and reserve military personnel, for retired pay, and for operation and maintenance are approximately the same in 1960 as in 1959. They are estimated at about $22.3 billion in 1960, not taking into account credits of $0.4 billion in revolving funds. Savings from a somewhat lower average number of military personnel and somewhat smaller inventories of aircraft and ships to be supported in 1960 are offset by higher unit costs.

The average cost per man in uniform will be somewhat higher because of (1) required increases in the Government's social security contributions as employer, (2) additional longevity pay reflecting the larger proportion of career personnel, and (3) the proficiency pay provisions of the new military pay law.

The average cost of operating and maintaining each weapon and unit of equipment will be higher because they are more complex. Other elements of increased cost are the additional SAGE centers which will be operational in 1960, the increased cost of medical care for dependents of military personnel, and the larger number of family housing units which will have to be supported by the Department in 1960.

For the past 5 years, the Department of Defense has pursued a vigorous program to provide adequate housing for military personnel and their families, both within the continental United States and overseas. This program has met with significant success and sufficient numbers of units have been built or are under construction to satisfy a major part of the military requirements. With the recommended extension of the armed services mortgage insurance program for another year and with a more adequate interest ceiling, private enterprise and local community support should be able to meet most of the remaining requirements for military housing in the continental United States. Some new Government-operated housing will still be required, however, for new installations and certain existing installations in the United States and overseas.

Procurement, research, and construction.—Expenditures for procurement, research, development, test, and evaluation, and military construction are estimated at $19 billion for 1960. There is an in-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

crease over 1959 in the combined expenditures for procurement and for research, development, test, and evaluation and a decrease in expenditures for military construction. Missile systems in 1960 will take a larger share of total procurement expenditures and aircraft will take less. Ships and other weapons and equipment will take about the same amount as in 1959.

This budget will provide for the procurement of a total of 1,610 aircraft, including jet bombers and jet tankers, land based and ship based fighters, ship based attack aircraft, trainers, helicopters, and transports. Funds are also provided for the continuation of the development of the B–70, a new high altitude supersonic intercontinental bomber, and of a new high speed interceptor.

Work will also continue, at about the same level as in 1959, on the development of a nuclear powerplant for military aircraft. Until such a powerplant is successfully developed, and the technical problems involved in operating a nuclear-powered aircraft safely are solved, there is no practical military value in attempting to build the airplane itself. It is the judgment of my scientific advisers, which I approve, that the pace of this program should continue to be geared to valid technical considerations.

In addition to providing for the missiles discussed earlier, the budget also includes funds for a wide variety of tactical missiles, for both the ground and naval forces, and for additional quantities of air-to-air missiles.

The shipbuilding program proposed for 1960 includes another Forrestal-class carrier, the eighth of its class. In line with the Navy's recommendation, this carrier will be conventionally powered. It is only good sense to wait until we have more experience with the construction of the first nuclear powered carrier authorized in the 1958 program before we start the construction of another.

The 1960 shipbuilding program also provides for 17 other new ships and for converting 13 ships to more modern types. In addition to the carrier, the ship construction program includes 6 guided missile destroyers and frigates, 3 nuclear powered attack-submarines, and 8 other vessels. Nine Polaris submarines have been authorized to date. This budget provides for the advance procurement of long lead time components for three additional Polaris submarines. Conversions include a cruiser, 8 destroyers, and 4 other vessels. This modernization will improve the antisubmarine warfare capabilities and extend the useful life of World War II destroyers.

Research will be conducted on, among other things, very early warning systems, ballistic missile defense, solid fuel chemistry, and

480000—59——111

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the use of military satellites and other military vehicles for navigation and communication purposes. I am also requesting $150 million for the Department of Defense emergency fund—the same amount as provided for 1959—to provide for the exploitation of breakthroughs or unanticipated developments which may occur during the coming year.

Provision has been made for the essential needs of our ground forces. Included in this budget are funds for weapons, ammunition, engineering and training equipment for the Army and Marine Corps ground forces to enhance the combat power of the individual soldier.

Legislation for military operations.—There are a number of existing provisions of law concerning military personnel which will require legislative action during this session of Congress to extend the expiration dates. They include induction authorities under the Universal Military Training and Service Act, the special enlistment program authorized by the Armed Forces Reserve Act, the act suspending the permanent limitation on the authorized active duty strength of the Armed Forces, and the Dependents Assistance Act.

In the Department of Defense Appropriation Act for fiscal year 1959, the Congress enacted mandatory minimum strengths for the reserve components of the Army, an unprecedented departure from past policy. This action cuts deeply into the concept of flexibility overwhelmingly endorsed by the same Congress in the Department of Defense Reorganization Act of 1958. It is entirely inconsistent with a policy of promptly adjusting our military forces and concepts to rapidly changing world conditions and revolutionary advances in science and technology. Furthermore, I consider these mandatory provisions wasteful of resources that can be more appropriately applied elsewhere. I strongly urge, therefore, that the Congress repeal these mandatory provisions at an early date, and recommend that future defense appropriations contain no similar provisions.

The Departments of the Army, Air Force, and Commerce have for some years been operating long-line communications in Alaska. With Alaska now a State, a communications system should be developed which will be more responsive to the growing needs of the Alaskan economy and people, as well as to the needs of the Government agencies operating in that State. In my judgment, such a system can best be developed by private enterprise. I will therefore soon submit to the Congress proposed legislation to authorize the sale of these Government-owned communications facilities.

For the past several years the Department of Defense Appropriation Act has contained a rider which limits competitive bidding by firms in other countries on certain military supply items. This restriction is sharply at variance with the general law, popularly known

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

as the Buy American Act. I strongly urge that the Congress not reenact this rider.

There are special problems involved in our present system of proficiency flying and its relationships to flight pay for personnel assigned to flying duty. The Secretary of Defense has been requested to make a study of these problems in the interest of improvements and economies.

Legislation on military property, construction, and procurement.—Changes in military concepts, weapons, and training requirements have markedly reduced or eliminated the need for some military installations and property while creating additional requirements for new types of facilities. Consideration should be given to legislation to streamline procedures and legal requirements for disposing of such obsolete facilities and real property. Such procedures would also reduce administrative costs of managing property and place property which is now exempt from State and local taxes on the tax rolls.

In this connection, section 601 of Public Law 155, 82d Congress, imposes restrictions on the executive branch of the Government with respect to certain real estate transactions of the Department of Defense. As stated in the budget message last year, the Attorney General has advised me that this provision of law reflects the exercise of legislative authority not warranted by the Constitution. I again recommend its immediate repeal.

The continued and rapid growth in the use of petroleum products has made questionable the need for maintenance of the relatively small naval petroleum reserves as a significant defense measure, since it would appear that the nationwide, even worldwide, petroleum industry must be relied upon to provide efficiently for our petroleum requirements in both peace and war. Accordingly, the administration will study (and I would hope the Congress would do likewise) the advisability of disposing of the anachronistic naval petroleum reserves, thereby relieving the Department of the Navy of an inappropriate responsibility and also providing additional revenue to the Federal Government.

This budget contains recommendations for $1.6 billion additional authorization for acquisition and construction of facilities for the Armed Forces. The details of this program are now under study in the Department of Defense and are subject to modifications in consonance with the program planning of the Armed Forces. The program will be held to the minimum requirements for facilities and installations essential to the modern weapons systems being made operational. I will submit at an early date both the additional authorizations and the related estimates of appropriations for the military construction programs.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Another matter which will require the attention of the Congress during this session is the expiration of the Renegotiation Act on June 30, 1959. This is the law under which excess profits gained on certain Government contracts and related subcontracts are recaptured by the Government through renegotiation. I recommend that this act be extended.

Development and control of atomic energy.—Expenditures by the Atomic Energy Commission are expected to reach an all-time high of $2.7 billion in fiscal 1960. This large amount reflects our determination to maintain our position of world leadership in the field of nuclear military armaments until such armaments are brought under adequate international control and to promote the development of peaceful applications of atomic energy.

In the light of our offer to suspend tests of nuclear weapons for a 1-year period starting October 31, 1958, and in view of the negotiations for further suspension, the budget does not provide for any weapons tests in the fiscal year 1960. Under the circumstances, testing grounds in Nevada and the Pacific will be kept on a standby basis.

A satisfactory test suspension agreement, of course, is but a first step toward reducing the grave threat of nuclear warfare. This administration intends to explore all possible means of attaining armament control under adequate inspection guaranties despite the recent suspension of negotiations on means of avoiding surprise attack. I hope that we shall succeed. Until an acceptable agreement is reached, however, financial authorizations must be provided to continue development and production of nuclear weapons at current high levels to meet a variety of military needs.

Programs for the development of nuclear reactors for a variety of military propulsion and power applications will be continued at or above the high levels already attained.

Peaceful uses of atomic energy.—At the second Conference on the Peaceful Uses of Atomic Energy in Geneva during September 1958, the United States demonstrated the range and scope of its atomic research and development in the peaceful applications of this new energy source.

We plan to pursue energetically the promising technical approaches to civilian power reactors. We will emphasize efforts to reduce the cost of the reactor fuel cycle; such a reduction is basic to the attainment of economic atomic power. This budget provides for continuation of construction and for development, modification, and operation of a number of experimental and prototype power reactors owned by the Government, including operation of the atomic power station at

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Shippingport, Pa., the world's first nuclear powerplant devoted primarily to the production of electric energy. We will also continue substantial support of power reactor projects undertaken by groups outside of the Atomic Energy Commission.

The Commission in exercising its responsibility for direction of the civilian nuclear power development program will identify desirable projects to advance that program. In carrying out these projects the Commission will continue to work with the Nation's electric power producers, both privately and publicly owned, and will continue to seek cooperation from industry in order to utilize its experience and resources. In addition, exchange of technical information with foreign countries will be expanded through participation in international undertakings, especially the European Atomic Energy Community (Euratom) and the International Atomic Energy Agency.

Further investigations into the possible use of nuclear explosions for such peaceful purposes as mining and earth moving, known as Project Plowshare, will be conducted.

Legislation will be proposed in this session to carry out the recommendations of the Joint Federal-State Action Committee in the field of atomic energy, which would recognize certain State responsibilities for the protection of public health and safety.

The budget provides for a higher level of research in the physical and life sciences. Three large particle accelerators in the multibillion electron volt range will be put in operation in 1960. These new accelerators, together with two already completed, will produce valuable new information on the basic structure of the atomic nucleus. More advanced experimental devices will be fabricated and operated to explore the control of thermonuclear reactions. Also, as part of the life science program, the budget includes funds for the operation of the new Brookhaven Medical Center, where the first nuclear reactor designed primarily for medical research purposes is located.

Stockpiling and defense production expansion.—Most of the objectives for the stockpile of strategic and critical materials have been substantially reduced as a result of new studies, and most of these reduced objectives have been met. Consequently, the need for new procurement has been sharply decreased. At the same time deliveries under contracts made during the Korean conflict to encourage expanded production of defense materials are declining. Substantial reduction in the Government's purchase commitments has also been achieved through negotiation with contractors.

For these reasons, expenditures for stockpiling and expansion of defense production are estimated to decline from $378 million in fiscal 1959 to $265 million in 1960. However, because the present authority

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

is inadequate, legislation will be needed in 1959 to authorize an additional $325 million to finance probable deliveries in the next 2 years under existing contracts for expanding defense production.

Mutual security program.—The mutual security program is designed to help strengthen the defense and bolster the political and economic stability of the free world. Through it the United States shares in worldwide efforts to meet the Communist threat and to help improve the standard of living of people in less developed nations. For the fiscal year 1960, I am recommending new obligational authority of $3,930 million for the mutual security program. Expenditures are estimated to be $3,498 million, which is $383 million less than in fiscal 1959.

The military assistance portion of the mutual security program, which is primarily related to our military defense effort, is discussed in this section of the message. The other portions of the mutual security program are directed primarily toward promoting stability and economic growth in less developed countries. They are discussed in the International Affairs and Finance section of this message.

The accomplishments, future needs, techniques, and interrelationships of military and economic assistance need to be reassessed in the light of continuing change in military technology and strategy and in economic and political conditions, and with consideration of new Communist techniques in waging the cold war. Therefore, I recently appointed a committee of outstanding citizens, with experience in government, the Armed Forces, and business, to appraise the military assistance program and the relative emphasis the United States should place on military and economic aid. Accordingly, in the present budget, provisions for the mutual security program are subject to whatever recommendations I may make in connection with my later transmission to the Congress of this program.

Military assistance.—In meeting the threats of Communist military aggression, the United States relies on two sources of strength, our own defense forces and the forces of more than 40 free-world nations, to many of whom we provide military assistance. Three of these, Korea, China, and Vietnam, are divided nations facing aggressive Communist-dominated forces across uneasy boundaries. Other recipients border on hostile Communist states, face potentially dangerous internal Communist movements, or are defenders of the great industrial communities of the free world.

Our primary concern is to insure the free world's ability to deter war and to retaliate against attack if deterrence fails. This we do

through our own military capability and by providing intermediate and short-range missiles and other weapons to a number of our allies.

But the free world also faces the Communist threat of local aggression and military subversion. This danger is best met by conventional forces of the threatened countries. If necessary, the United States and other free-world nations would send reinforcements under the terms of regional pacts and bilateral agreements. Our allies, through their own efforts, are covering the bulk of the costs of operating and maintaining their forces. The United States supplies the critical military equipment that our partners cannot supply themselves and assists in the training of their officers and men.

The estimate of new obligational authority for military assistance in the fiscal year 1960 is $1,600 million. Expenditures in 1960, which will be made primarily from obligational authority enacted in previous years, are estimated to be $1,850 million, a reduction of $462 million from the amount estimated for 1959.

Federal Reserve Bank of St. Louis

Nonmilitary defense.—Closely allied to our military preparedness are the nonmilitary civil defense and mobilization programs. These were reorganized last year under a new Office of Civil and Defense Mobilization, for which increased appropriations are recommended for 1960. These programs are discussed with other programs concerned with industry and community facilities in the Commerce and Housing section of this message, under which these expenditures are classified.

INTERNATIONAL AFFAIRS AND FINANCE

The United States is directing its diplomacy and devoting a substantial share of its economic resources to maintaining world peace and the security of free nations. In a world which still contains much want and suffering, it is a goal of our foreign policy to promote the economic stability and growth of less developed countries. This is as vital to us as it is to the countries concerned in the present world situation.

Although military danger persists, a strengthened free-world defense system enables less developed countries to concentrate much of their effort on needed economic progress. Increased international trade, private investment, public programs of lending, and technical assistance are essential to these efforts.

Expenditures for international affairs and finance are estimated to be $2.1 billion in the fiscal year 1960. This amount is $1.6 billion less than the expenditure estimate for 1959, mainly because of an additional and nonrecurring subscription of $1,375 million to the International Monetary Fund for which I am requesting authority for 1959.

Further expansion of trade was made possible when the Congress last year extended the reciprocal trade agreements legislation for 4 years. Under the authority of this act, we will seek additional agreements with friendly countries for mutually beneficial reductions of trade barriers.

The greater share of investment capital and technical ability in the United States and other highly developed countries is to be found in private hands. Less developed countries could benefit in greater measure from this large private reservoir by making investment more attractive to firms from other countries. The United States on its part invites negotiation of tax treaties designed to encourage its citizens to invest abroad. I will request legislation to expand the Mutual Security investment guaranty program, which offers guaranties to American private investors against losses on foreign investment that

[1] Compares with new obligational authority of $3,983 million enacted for 1958 and $7,070 million (including $4,945 million of anticipated supplemental authorizations) estimated for 1959. The 1959 supplementals include proposed additional U. S. subscriptions to the International Bank for Reconstruction and Development of $3,175 million and to the International Monetary Fund of $1,375 million.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

are caused by inconvertibility of currencies, expropriation, or war. The Export-Import Bank is actively seeking more private participation in its loans and is selling part of its portfolio to private investors, with the expectation of financing all of its operations in fiscal 1960 from receipts. The United States subscription to the capital of the International Bank for Reconstruction and Development helps that agency in channeling private capital into public loans to less developed countries.

In addition, studies are being conducted by the Department of State and the Business Advisory Council of the Department of Commerce on ways to increase the role of private investment, management, and technical training abroad.

International financial organizations.—To assist in economic development and in the sound expansion of trade, the United States participates with other countries in international financial organizations and also makes loans and grants directly to other nations. The multilateral and bilateral approaches complement each other and both are essential to the achievement of our objectives.

The International Bank for Reconstruction and Development extends loans for capital investment, and the International Monetary Fund promotes sound foreign exchange policies and encourages trade by assisting countries to overcome short-term foreign exchange problems. Both institutions have proved their worth as instruments of international financial cooperation. However, they cannot continue with the same effectiveness unless their present resources are supplemented. The executive directors of each institution have recommended an increase in member country subscriptions of 100% for the Bank and 50% for the Fund. I request that the Congress promptly approve the United States share of these recommended increases. Early approval will assure the other member countries that the increase in capitalization can be achieved quickly, and thus encourage prompt action by them.

For the additional United States quota in the International Monetary Fund, this budget includes $1,375 million as supplemental new obligational authority and as estimated expenditures in 1959. Of this amount, $344 million is to be paid in gold and the balance of $1,031 million is to be paid in the form of non-interest-bearing Treasury notes. The anticipated subscription to the International Bank of $3,175 million in the fiscal year 1959 is included in the budget as new obligational authority but not as an expenditure because it will be in the nature of a guaranty fund. On the strength of guaranties from all its members, the Bank is able to sell its bonds to private investors.

We are now negotiating with our Latin American neighbors concerning the establishment of an inter-American development banking

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

institution which would facilitate the flow of public and private capital to economic development projects in this hemisphere and would supplement existing lending arrangements. This negotiation may result in a later request for legislation permitting United States participation in such an institution.

The administration is also currently studying the feasibility of establishing an international development association which would be affiliated with the International Bank for Reconstruction and Development and would make loans repayable wholly or partially in the borrower's currency.

Development Loan Fund.—In 1957, the United States established the Development Loan Fund to provide capital on terms more favorable than are normally available from other sources, including repayment in foreign currencies. The Development Loan Fund finances both public and private projects that clearly contribute to the basic development of a country but do not qualify for private loans or for financing by the International Bank for Reconstruction and Development or the Export-Import Bank.

The Development Loan Fund is now making loans in substantial numbers, and will have an increasing impact in assisting less developed economies. The Fund will have committed virtually its entire capital by the end of this month. Because of the vital importance to our foreign economic objectives of continuing this type of lending, a supplemental appropriation for fiscal 1959 of $225 million is recommended. This amount has already been authorized but not appropriated by the Congress. New obligational authority of $700 million is requested for fiscal 1960.

Defense support.—Many of our allies among the less developed countries maintain large military forces required for the common defense despite the added strain placed on their national economies by the continuing cost of these forces. To help prevent the living conditions and political stability of these countries from deteriorating because of the economic burden of their military forces, the United States provides economic aid through appropriations for defense support. This aid takes the form of food, textiles and other consumer goods, machinery, and raw materials. For fiscal 1960, new obligational authority of $835 million is requested for defense support.

Technical cooperation.—Through technical cooperation under the mutual security program the United States assists less developed countries to acquire technical, administrative, and managerial skills. This improvement of skills must go hand in hand with the financial and material resources made available for development. For 1960 an increase of approximately $40 million in new obligational authority is

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

requested. This will enable the United States to train more foreign technicians and provide more American experts and demonstrational equipment, with emphasis on expanding programs in Africa. The increase will also permit the United States to pay its share of the expected greater contributions by member nations to the new United Nations special fund for technical assistance projects.

Contingencies and other assistance.—The mutual security program for 1960 includes a request for $200 million to be available for unforeseen contingencies and emergencies that may arise. In addition, appropriations will be requested for special assistance needed for the stability and progress of a number of countries not covered by other categories of aid and for such programs as our contributions to the worldwide malaria eradication program. Other special activities covered by the mutual security program are the United States contributions to the United Nations Children's Fund (UNICEF) and to refugee programs.

Legislation will be recommended to revise requirements on eligibility of countries for aid and thus provide the necessary additional flexibility to help nations that are resisting Soviet domination.

Conduct of foreign affairs.—The Department of State plans to open several new diplomatic and consular posts and to increase its staff dealing with problems of eastern Europe and international communism. Legislation will again be recommended to clarify the authority of the Secretary of State with regard to the issuance of passports. Legislation will also be recommended to reimburse Americans for certain property damage in Europe and the Far East during World War II for which compensation has not previously been authorized.

Foreign information and exchange activities.—The United States Information Agency will continue the major rebuilding of its radio facilities begun in fiscal 1959 to improve the reception overseas of the Voice of America. The cultural content of our information programs will be increased, more American books will be distributed abroad, and greater emphasis will be given to English-language teaching.

COMMERCE AND HOUSING

Over the past 6 years this administration has fostered major advances in the programs of the Federal Government for aviation, highways, urban renewal, the postal service, and aid to small business.

Expenditures for all commerce and housing programs in the fiscal year 1960 are estimated at $2.2 billion, which is $1.3 billion less than the estimated expenditures for 1959. The estimated reduction occurs

Federal Reserve Bank of St. Louis

primarily in the Federal National Mortgage Association and the Post Office Department. Reduced purchases of low-cost housing mortgages and administrative steps to increase receipts will enable the Association to finance its 1960 operations entirely from its current collections. The proposed legislation to provide more adequate postal rates and the absence of the large retroactive 1959 payments for pay and transportation will sharply reduce net budget expenditures for the postal service.

Transportation and communication.—In recent years, the Federal Government has had to take actions to meet emergency problems which have arisen in highways, railways, and aviation. These actions have sometimes been taken on a partial and piecemeal basis, without full consideration of the impact on other transportation programs. The Secretary of Commerce, at my request, is undertaking a comprehensive study of national transportation to identify emerging problems, redefine the appropriate Federal role, and recommend any legislation or administrative actions needed to assure the balanced development of our transportation system.

Space flight.—The National Aeronautics and Space Administration, organized in 1958, is initiating extensive scientific investigations with satellites and probes to increase our understanding of the earth's outer atmosphere; the moon and the planets; the earth's gravitational, magnetic, and electric fields; radiation from space; and other phenomena. Programs in the field of meteorology will look toward the ultimate establishment of a worldwide system of satellite weather observation, and in the field of communications will continue to experiment with the use of satellites to serve as relays for the intercontinental transmission of messages, voice, and television. Projects to increase our ability to place heavy objects in space include development of high energy fuel rockets, a million-pound thrust engine, and a nuclear rocket engine.

To promote rapid advancement of space technology, a supplemental appropriation of $45 million is requested for 1959. Of this amount $21 million is for accelerating development of the technology of manned space flight and $24 million is for equipment and facilities for propulsion development and tracking. For 1960, I am requesting new obligational authority of $485 million, an increase of $135 million over the 1959 total; this includes the agency's aeronautical programs as well as its outer space activities.

Aviation.—Under the new Federal Aviation Agency, traffic control activities, both civil and military, are now being combined into a single system more capable of handling safely and efficiently

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the increasing number of planes of varying speeds. Expenditures for construction and operation of needed new facilities for the Federal airways system are accelerating as programs authorized in earlier years move from plans to performance. A newly established program to augment civilian facilities with existing air defense radar is now in effect and is being accelerated. At the same time, the extensive research underway will help us to resolve the even more difficult air traffic control problems of the future.

Legislation for Federal grants to aid local airport construction expires at the end of fiscal 1959. As I stated last year in disapproving legislation greatly expanding this program, the Federal Government should now begin an orderly withdrawal from the airport grant program. Legislation will therefore be recommended to authorize a transitional program of Federal grants to share the costs of basic facilities, such as runways and control towers. One-half—instead of three-fourths as in the expiring law—of the funds appropriated would continue to be available to the States on the basis of the existing apportionment formula. The other one-half would be available for expenditure on a discretionary basis. Revenue-producing facilities, such as terminals and hangars, should be financed locally. This program will require $65 million of new obligational authority in fiscal 1960, with somewhat smaller amounts in each of the following 3 years.

For the Federal Aviation Agency as a whole, including direct programs and airport grants, I recommend that the Congress provide new obligational authority of $602 million in 1960. Expenditures are estimated to be $560 million, which is $94 million more than in 1959 and almost four times the amount spent for these purposes in 1956.

Subsidy payments by the Civil Aeronautics Board to commercial air carriers are continuing to rise, primarily because of the increasing service to small communities. Practically all of the $63 million in payments estimated for 1960 will go to local service carriers including helicopter operators. The loan-guaranty program administered by the Board, by helping local service carriers to finance new equipment, should in the long run reduce the need for subsidy. Moreover, the Board has announced its intention to suspend service at any point where adequate traffic has not developed after a fair trial. This "use it or lose it" policy should help to prevent permanent certification of uneconomic service.

Airway user charges.—The magnitude of the burden on the general taxpayers for rising airway expenditures makes it essential that users of the facilities pay a greater share of the cost. To this end, legislation will be transmitted to raise the effective tax on aviation gasoline from 2 cents to 4½ cents in 1960 and to levy the same tax on jet fuels, which are now tax-free. These increased costs should be

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

includible, along with other airline costs, in determining the rates charged the ultimate users of air transportation. Receipts from taxes on aviation gasoline should not be used for highways; they should be retained in the general fund instead of being transferred to the highway trust fund. These changes in revenue laws will increase general fund receipts by an estimated $85 million in fiscal 1960 and by somewhat larger amounts in subsequent years.

Promotion of water transportation.—The national maritime policies under which we now operate were laid down 23 years ago in the Merchant Marine Act of 1936. It is increasingly apparent that both the adequacy of and the need for those policies require reappraisal by the executive branch and the Congress. Accordingly, as a part of the general transportation study referred to earlier, the Secretary of Commerce will review the major problems of the shipping industry. As soon as his report is available, I hope the Congress will hold comprehensive hearings. We need new national policies and guidelines which can become effective at the earliest possible date.

At present, the bulk of our Merchant Marine consists of ships built during the years 1942 to 1946. Since existing law normally requires replacement of vessels at the age of 20 years, we must establish definitive policies on such questions as the realistic life span of merchant ships, the number of ships actually needed in our Merchant Marine, the extent to which their construction and operation should continue to be subsidized by the Government, and the pattern of trade routes that should be served by subsidized ships. There should also be an examination of present policies on such matters as foreign flag registration and the competition of foreign shipping.

In the meantime, the 1960 budget provides for a substantial ship construction program. New obligational authority of $129 million is recommended for construction subsidies and related programs in 1960. This appropriation will be used for replacing 14 needed cargo and combination passenger and cargo ships. It is not contemplated that any of it will be used for the passenger superliners authorized last year. I request that the Congress reconsider its action requiring that these superliners be built under direct Federal loans, which under present law would be made at an interest rate below that paid by the Government itself for comparable borrowed money.

The first nuclear powered merchant ship, the N. S. *Savannah*, is expected to be completed in January 1960. Research on improved nuclear propulsion of merchant ships is continuing. Legislation should be enacted to assure that nuclear materials may be distributed for use as fuel on United States merchant ships.

Some savings in maintenance costs will be realized by the Maritime Administration through disposal of surplus shipyards which it owns

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and through reducing preservation work on over 1,000 Liberty ships no longer suitable for mobilization.

Expenditures for operating subsidies to shipowners, estimated at $130 million, will be unchanged from 1959. A maximum of 330 ships are expected to be eligible for operating subsidies, including a limited number for new Great Lakes routes.

Urgently needed repair and modernization of Coast Guard equipment and facilities are provided for in the increase of $20 million in new obligational authority over the 1959 amount. This will not only improve the protection given life and property but will also save operating and maintenance costs in the future.

Highways.—The comprehensive highway program enacted in 1956 established the principle that highway users, rather than the general taxpayers, should pay the cost of Federal-aid highways. The larger contract authority enacted in 1958, however, will create a cumulative deficit in the highway trust fund under present law of $241 million by the end of the fiscal year 1960, and about $2.2 billion by the end of 1962.

To maintain the trust fund on a self-supporting basis, I am recommending a temporary increase of 1½ cents in highway fuel taxes, to become effective July 1, 1959, and to remain in effect through the fiscal year 1964. This increase is necessary to assure availability of the entire 1961 and 1962 Federal-aid highway authorizations without waiving provisions in the basic legislation which limit expenditures to the amounts available in the trust fund.

HIGHWAY TRUST FUND

[In millions]

Fiscal year	Expenditures	Receipts	Year-end balance
Under existing legislation:			
1957	$966	$1,482	$516
1958	1,602	2,134	1,049
1959 estimate	2,553	2,143	639

In addition, as I have previously recommended, the forest and public land highways, which are an integral part of the Federal-aid system but are now financed from general budget funds, should be transferred to trust fund financing, and the revenues from aviation gasoline taxes which are now allocated to highway construction should be retained in the general fund. The net effect of these changes is that all Federal expenditures for Federal-aid highways will be paid from the highway trust fund and the fund itself will be financed by highway users.

Postal service.—Since 1953 this administration has been using every available method to improve the efficiency of the postal service, and to place its operations on a self-supporting basis, except for a few subsidized uses authorized by law.

In the last session the Congress took an important step by enacting the first comprehensive increases in postal rates in a quarter century. The increases, however, were considerably short of the minimum necessary amounts which I had requested and were made more inadequate by pay increases for postal employees for which no additional financing was provided. As a result, new obligational authority of $522 million would be required next year, under existing legislation, to finance the postal deficit and the subsidized public services.

The Postal Policy Act of 1958 established, for the first time on a statutory basis, the principle that postal rates should be adequate to cover all costs of operating the postal establishment with certain exceptions. Consistent with this requirement, further revisions in rates should be enacted adequate to provide at least $350 million of additional revenues in 1960. Legislation for this purpose will be proposed in the near future.

An appropriation of $172 million is requested to reimburse the Post Office Department for public service costs not required to be covered by postal revenues. However, the concept of public services as defined in the act requires excessive costs to be charged against general Treasury revenues. Therefore, the Congress should correct this situation by amending the Postal Policy Act of 1958 to prevent these excessive charges and to assure a more equitable sharing of postal operating costs between mail users and the general public.

These increases in rates, together with the appropriations for public service items, should provide adequate funds, not only to meet the expanded requirements for postal service in 1960, but also to carry forward the research and capital programs already underway. As a result we can make needed progress in acquiring modern facilities and equipment adequate to take care of the steadily increasing mail volume in later years.

Housing and community development.—A year ago I presented to the Congress a carefully considered program for revision and extension of the basic statutes governing several major housing and community development programs. Adjournment of the Congress without enactment of these recommendations has made it necessary to adopt temporary expedients to handle continuing applications for urban renewal capital grants and college housing loans until new authorizations can be made available. Emergency legislation has already been proposed to the Congress to provide the funds necessary for these programs and to increase the mortgage insurance authority available for the remainder of the fiscal year. In this message I shall emphasize comprehensive long-run changes needed in this important area.

Urban renewal.—The Federal Government is providing major assistance to communities in halting urban deterioration and replacing it with orderly redevelopment. Approximately 650 urban renewal projects are now underway or completed in more than 380 cities. These will involve an ultimate net cost estimated at about $2 billion, of which over $1.3 billion will be supplied by Federal capital grants. The Federal Government also has outstanding loans and loan guaranty commitments totaling about $700 million for temporary financing of these projects.

When urban renewal legislation was not enacted by the Congress last year, authority subject to the President's discretion had to be used to make available $100 million for capital grants. Since this authorization will soon be exhausted, the emergency legislation already proposed contains an additional $100 million for 1959 and also $100 million to restore the discretionary authority for future emergencies.

The Congress should act promptly upon four major revisions in the urban renewal laws:

(*a*) Assure the States and cities of continuing Federal support for urban renewal by authorizing capital grants of $1,350 million for the next 6 years. For each of the first 3 years, 1960–62, $250 million should be authorized, with $200 million annually for 1963–65. This forward authorization, together with administrative steps already taken to allocate the available funds equitably, should enable each community to develop a long-term community-wide plan which may then be financed in realistic annual installments.

(*b*) In accordance with the predominantly local benefits received, require States and cities to assume a gradually increasing share of the expense of buying and improving the land and of other net project costs. On projects initiated in fiscal 1960, the Federal Government should continue to pay two-thirds of the net cost and the State and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

local community one-third. In succeeding fiscal years the State and local share should increase by steps to 40, 45, and finally 50% in 1963–65. The increased non-Federal share should not prove onerous, since much of this contribution normally is provided through construction of improvements otherwise necessary and the increased property values in the completed projects will usually permit the local costs to be recovered in increased tax receipts, often within 10 years or less.

(*c*) Encourage more careful planning by requiring the States or communities to assume their share of the cost of planning from the start. At present the Federal Government advances the full amount for planning and the local share is paid only if the project actually goes forward.

(*d*) Aid nonresidential urban renewal projects by authorizing $150 million in loan commitments to assist local agencies to obtain financing from private sources. Projects of this type often can yield such substantial increases in property tax revenues that local communities should be able to finance them without requiring Federal grants.

Public housing programs.—By the end of the fiscal year 1960, over 475,000 federally aided public housing units will be occupied by about 2 million people, and the additional 110,000 units already authorized will be under contract for Federal contributions but will not yet be constructed. These 585,000 units should meet most of the demand for such housing by low-income families displaced by highway construction, urban renewal, or similar governmental action in the next few years. I shall not ask for authorization for any additional units.

Insurance of private mortgages.—Through the mortgage insurance programs of the Federal Housing Administration and the loan guaranty program of the Veterans Administration, the Federal Government is underwriting private credit for a substantial share of all houses built and purchased. Twice during the past calendar year, however, orderly planning and financing of home building have been jeopardized when increases in applications for mortgage insurance exhausted or threatened to exhaust the maximum amount of insurance authorized by law. The emergency housing legislation already recommended to the Congress would increase the existing limitation by $6 billion. I urge that the limitation be completely removed in general legislation so that this self-supporting program will be available at all times to insure adequate financing of housing.

Several other major legislative actions should be taken to permit insurance programs of the Federal Housing Administration to meet demonstrated needs:

(*a*) Enact permanent authority to insure property improvement loans;

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(*b*) Authorize interest rates for insured armed services and other rental and cooperative housing mortgages adequate to assure private financing of such loans;

(*c*) Establish a new insurance program for mortgages on rental housing for elderly persons to replace the present limited program;

(*d*) Broaden the special mortgage insurance for families displaced by urban renewal and other Government programs to include more effective aids for rental housing;

(*e*) Extend for another year the authority to insure mortgages for military housing;

(*f*) Increase the maximum amounts of mortgages on sales housing eligible for insurance.

Veterans' housing loans.—The direct housing loan program of the Veterans Administration was extended and liberalized last spring as an antirecession measure. Requests for direct loans now exceed available funds in large part because the law does not permit interest rates that are adequate to attract private financing of guaranteed loans. I urge the Congress to act promptly to authorize the same flexibility in interest rates for the Veterans Administration as the Federal Housing Administration already has for comparable programs, and to extend the voluntary home mortgage credit program. These two actions should enable private lenders to meet a large share of the unsatisfied demand by veterans for Government loans, and will also reduce budget expenditures.

Mortgage purchases.—Under its special assistance programs, the Federal National Mortgage Association purchases certain types of insured or guaranteed mortgages. From 1956 through 1958 expenditures for these purchases have been exceeded by receipts from repayments and from sales of mortgages acquired under earlier purchase programs. In 1959, however, mortgage purchases will exceed repayments and sales, and net expenditures will jump to an estimated $678 million, as a result of the billion-dollar program authorized last spring by the Congress to purchase mortgages on low-cost housing at terms favorable to the borrowers.

For the fiscal year 1960, the Association will endeavor to cover its expenditures for mortgage purchases by receipts from mortgage sales and other sources. To make this possible without diverting the flow of new funds from the mortgage market, an estimated $335 million in Government-owned mortgages will be offered to investors in exchange for certain Government bonds which then will be retired.

To avoid unnecessary budget outlays in future years the Housing and Home Finance Agency is increasing its efforts to obtain private financing for programs now largely financed with special assistance funds. These efforts, aided by those of the Department of Defense, have already proved successful in obtaining adequate private credit for

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the armed services family housing program which, until last spring, had been financed mainly from Government funds. New commitments of over $400 million are anticipated for 1960, mainly for the purchase of mortgages on housing in urban renewal areas and housing for the relocation of families displaced by governmental actions. Since the agency is now permitted to control the prices at which it purchases such mortgages, the rapidly growing financing requirements can and should be met in substantial degree from private sources.

College housing.—No additional authorizations were provided for college housing loans by the Congress last year. Accordingly, while processing of loan applications has continued, only limited new commitments have been made. The emergency legislation already before the Congress would provide $200 million in new lending authority at once. This should be adequate to meet the needs for loans for at least the remainder of the fiscal year 1959.

For the fiscal year 1960, no additional new obligational authority is requested for college housing loans. However, an estimated $50 million in obligations owned by the Government will be offered to investors in exchange for certain Government bonds which then will be retired. This amount will be available for loans to take care of unusual cases during a transitional period from direct Government loans to other means of financing college housing needs.

About 60% of the demand for college housing loans in recent years has come from State universities and other public institutions. Such institutions normally can borrow privately on relatively favorable terms because of Federal tax exemptions on the income from their obligations. Nevertheless, they have been encouraged to borrow from the Federal Government by the low subsidized interest rates required by law since 1955. For the remainder of the present direct loan program, the law should be amended to remove this incentive to Federal borrowing by (*a*) denying eligibility for loans to any institution qualified to issue tax exempt securities and (*b*) placing in the law a requirement that interest rates cover costs on loans to all remaining eligible borrowers.

For the future, and in order that there may be no hiatus in providing Federal assistance where it is most needed, this budget suggests that the Congress include in general housing legislation provisions relating to college housing which would authorize a limited loan guaranty program. However, it seems to me that the continued needs of colleges and universities for housing should be considered within the framework of the general problems of education. The Department of Health, Education, and Welfare is now concluding its studies of these problems.

Small business.—Recent enactment of the Small Business Investment Act and of legislation making the Small Business Administration a permanent agency is substantially strengthening Federal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

assistance to small businesses. New loan commitments to State and local development corporations and to newly authorized small business investment companies are estimated at $73 million in 1960, thereby putting to work a much larger amount of private capital. Efforts will be continued to assist small businesses in obtaining a fair share of Federal procurement, to advise them on Government property disposals, and to provide them with technical and management assistance. The new program of grants for research on small-business problems and counseling for small firms is getting underway. The expansion in loans can be financed largely by increased receipts anticipated from loans made in prior years, so that net expenditures of $164 million for the agency's business-aid programs will be only $7 million greater than in 1959.

Area assistance.—In disapproving the area redevelopment legislation enacted in the closing days of the last Congress, I expressed the hope that the next Congress would promptly pass a more soundly conceived program. The revised legislation which this administration is proposing would:

(*a*) Place the major responsibility on local citizens;

(*b*) Authorize loans to areas where unemployment has been well above the national average for 2 or more years;

(*c*) Authorize grants for technical assistance to these areas and to localities dependent upon a single industry or situated in rural low-income areas;

(*d*) Place leadership in the Department of Commerce, with the assistance of other Federal agencies.

To finance this program, I recommend initial appropriations in fiscal 1960 of $55 million. Based on the successful, comparable programs conducted by certain States, these appropriations should be adequate to meet the Federal share for redevelopment of all areas expected to qualify under the proposed legislation.

Civil and defense mobilization.—Reorganization Plan No. 1 of 1958 merged the former Office of Defense Mobilization and the Federal Civil Defense Administration into the new Office of Civil and Defense Mobilization. This merger is now substantially completed and permits improved coordination of our nonmilitary defense. New obligational authority of $87 million is recommended for 1960.

Methods for formalizing the means by which the Office of Civil and Defense Mobilization utilizes appropriate resources of other departments and agencies are now being studied. The OCDM budget includes $12 million for financing the assigned responsibilities of such agencies in civil defense and mobilization programs.

It also includes $21 million to carry out legislation enacted last year for sharing with the States the cost of civil defense personnel

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and administration, and for providing radiological monitoring devices to States and cities for training and operational use.

During the past year the administration accelerated a program of public education on the effects of fallout with the aim of stimulating preparations for fallout protection. The new obligational authority for OCDM includes $11 million for the continuing support of this program and for research and demonstration on shelters.

AGRICULTURE AND AGRICULTURAL RESOURCES

Expenditures for agriculture and agricultural resources are surpassed in magnitude in the budget only by outlays for national security and for interest on the public debt. The continuing heavy impact of agricultural programs on the budget is mainly the result of the continued high volume of agricultural production and our long established and now largely outmoded system of farm price supports. This system of price supports is not suited to the technically more efficient agriculture that has been rapidly developing in this country. The system provides production incentives that impede needed adjustments and encourages the production of surpluses which, in turn, result in increased Government outlays for commodity loans and purchases, and for storage and interest costs.

Legislation is urgently needed, therefore, to make further revisions in the price support program. Recommendations will be sent to the Congress in a special message on agriculture. In this budget I am recommending extension of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480) and the Sugar Act, major changes in the rural credit programs, and a reduction in the advance authorization for the agricultural conservation program.

Estimated expenditures for agricultural programs in fiscal year 1960 are $6 billion, which is $779 million less than the estimate for the current year, but $1.6 billion more than was actually spent in 1958. The main part of the decrease expected in 1960 is in the soil bank program, because the acreage reserve portion terminated at the end of the 1958 crop year.

Total new authority to incur obligations requested for agriculture and agricultural resources in 1960 is $5.1 billion. This amount includes, among others, $2 billion to restore the capital impairment of the Commodity Credit Corporation resulting from price support losses, and $1.2 billion to reimburse the Corporation for estimated costs and losses under other programs financed through that agency. All of these Commodity Credit Corporation costs and losses are reflected in budget expenditures of 1959 and prior years.

Federal Reserve Bank of St. Louis

Price supports and related programs.—Expenditures for price supports and other programs to stabilize farm prices and farm income will comprise about 75% of total expenditures for agriculture and agricultural resources in 1960.

Because of the many uncertainties with respect to future production, consumption, and exports of farm commodities, it is difficult to estimate the expenditures required for price supports. The budget assumes that crop yields in 1959 will be lower on the average than the record yields of 1958, but that a part of the land that was in the acreage reserve of the soil bank will be used to produce additional price-supported crops in the 1959 crop year. The shift of this idle land to crops will be a factor contributing to continued heavy Commodity Credit Corporation expenditures under existing laws.

Because of the technological revolution that is still increasing productivity in agriculture, farmers continue to produce more than can be marketed at home and abroad. Under our present open-end price support system, this excess production results in increased Federal loans and purchases and increased carryover inventories. Total loans and commodity inventories of the Commodity Credit Corporation on June 30, 1958, amounted to $7.1 billion. This accumulation is expected to rise to $9.1 billion by June 30, 1959, and still further to nearly $10.5 billion by June 30, 1960. To prevent continuation of huge Federal outlays, legislation will be proposed to make badly needed changes in the price support system.

Titles I and II of the Agricultural Trade Development and Assistance Act of 1954 expire on December 31, 1959. Sales of farm commodities for foreign currencies under title I of this act and donations of commodities for relief purposes under title II have provided a temporary method of coping with some of the continuing excess production of farm commodities. This budget proposes extension of titles I and II of this act for 1 additional year, with an increase from $6,250 million to $7,750 million in the authorization for the Commodity Credit Corporation to incur costs and losses under title I.

The International Wheat Agreement between wheat importing and wheat exporting countries expires on July 31, 1959. The desirability of extending this agreement is currently being studied.

Although the Sugar Act, which serves to stabilize domestic sugar prices and assure adequate domestic supplies, does not expire until December 31, 1960, it is recommended that the act be extended at this time in order to give sugar producers needed time for production planning.

Agricultural credit programs.—The Rural Electrification Administration has made a major contribution to the development of rural America. Over 95% of our farms now have central station electric

Federal Reserve Bank of St. Louis

service compared with 11% in 1935. Expanding use of power in the areas served by electric cooperatives, however, requires substantial amounts of new capital every year to provide additional generating capacity and heavier transmission and distribution facilities. Rural industrial and nonfarm residential consumers, which already account for about one-half of total power sales by the REA system, are increasing their power consumption much faster than are farm consumers and comprise about 75% of the new customers being added. The prospective size of new capital requirements, together with the present state of development of the rural electric cooperatives, emphasizes the need to broaden the sources of capital from which the REA system may obtain the funds to finance needed expansion.

I am again proposing that legislation be enacted to assist both electric and telephone borrowers to obtain financing from private sources.

A reduction in the levels of the direct loan programs of the Farmers' Home Administration is recommended in this budget. Direct loans for farm ownership and for soil and water conservation are supplemented with private loans insured by the Federal Government. In order to attract additional private credit, the Secretary of Agriculture, under authority of present law, has raised the interest rate to be paid on insured farm ownership and soil and water loans from 4½ to 5%.

Legislation will also be proposed to place the Farmers' Home Administration on a revolving fund basis of operation. Under such legislation funds received in repayment of previous loans would be available for new loans and administrative expenses.

Conservation of agricultural resources.—Payments to farmers representing a sharing of the costs of conservation practices performed during the 1959 crop year will require $197 million in expenditures and $242 million in new obligational authority for fiscal 1960. These amounts are needed to pay for the advance authorization in the 1959 agricultural appropriation act, which exceeded my recommendation. For the 1960 crop year a reduced advance authorization of $100 million is recommended. This amount, along with other public programs in support of soil and water conservation, will provide substantial incentives for farmers to continue the soil and water conservation practices required to maintain our agricultural resource base.

With termination of the acreage reserve, many farm owners are expected to place larger acreage in the soil bank conservation reserve. This shift, together with an increase in rental payments, will result in an increase in expenditures from $141 million in fiscal 1959 to $343 million in 1960. The budget provides for an upper limit of $375 million on payments in the 1960 calendar year, which is the same as was provided for 1959.

Federal Reserve Bank of St. Louis

No additional funds are recommended for 1960 to initiate construction on watershed projects under the Watershed Protection and Flood Prevention Act. However, funds available from the 1959 appropriation will permit starting construction on 60 projects in 1959 and 40 more in 1960.

Research and other agricultural services.—Expenditures for research, education, and other agricultural services financed from direct appropriations will be about the same in the fiscal year 1960 as in 1959, more than double the amount spent for these purposes in 1954. Research in foreign countries to increase industrial uses of agricultural commodities will be strengthened through the use of foreign currencies obtained from the sale of farm commodities abroad.

NATURAL RESOURCES

Expenditures for the development and conservation of natural resources are estimated at $1.7 billion in 1960, approximately the same as in 1959, which itself will be higher than any previous year. About two-thirds of the expenditures in 1960 will be for the development of water resources.

Work on many resource development projects underway was accelerated in the latter part of the fiscal year 1958 to aid in economic recovery, and the higher rate of construction has continued into 1959. To carry forward projects started in 1959 and earlier years will require some increases in appropriations for 1960. In view of this record program, no funds are provided in the 1960 budget for starting construction of new water resources projects. Further, the budget contemplates stretching out construction on some projects underway where this can be done without stopping work on the projects. Other programs will be continued at or below current levels. Even with these economies, total expenditures in 1960 for resources programs will remain at a record level.

Water resources.—Flood control, navigation, irrigation, and related activities of the Corps of Engineers and the Bureau of Reclamation are expected to require expenditures of $1.1 billion in 1960—an all-time high. Of this amount, an estimated $869 million will be spent on construction.

In the years after 1960, an amount of $5 billion will be required to complete going projects, and annual expenditures in 1961 and 1962 will be even higher than in 1960. In view of this extremely high level of commitments and expenditures, the budget contemplates that in some cases work on new starts, for which appropriations were made for 1959, will be limited in that year largely to preconstruction

activities, including land acquisition. No additional funds are requested to start new projects in 1960.

In the interest of sound water resources programs in future years, funds are recommended to continue investigations and advance planning and to assemble basic data for future projects. I continue to believe that, as part of sound advance planning, the Fryingpan-Arkansas project in Colorado should again be considered for authorization, but no appropriation to start construction should be enacted until the overall budgetary situation is more favorable.

demonstration plants, initiated in fiscal 1959 under legislation enacted during the past session of the Congress, will be advanced in 1960.

One of the most pressing needs for achieving a sound water resources policy is the establishment of a consistent basis for cost sharing on flood control projects. Several distinguished commissions have emphasized the disruptive effects of requiring the Federal agencies responsible for flood protection works to operate under different and confusing cost-sharing standards. Legislation will be proposed to set a uniform basis of cost sharing for all projects not yet under construction that produce identifiable flood protection benefits to local areas. Under such legislation, non-Federal interests would bear at least 30% of the cost, with the value of lands, easements, and rights-of-way contributed locally counted as part of the non-Federal share. Operation and maintenance would be a State or local responsibility.

I again urge the Congress to take action early in this session to authorize the sale of revenue bonds by the Tennessee Valley Authority in order that the Authority may meet its needs for new generating facilities. Under such legislation the Congress would retain budgetary control of the program. This budget includes a supplemental authorization for fiscal 1959 of $200 million under the proposed revenue bond legislation.

To help improve financial management, legislation will be recommended for the establishment of revolving funds for the Bonneville, Southeastern, and Southwestern Power Administrations in the Department of the Interior. These Administrations market hydroelectric power generated at certain dams constructed by the Corps of Engineers and the Bureau of Reclamation. With this legislation, part of the receipts from these power sales would be used directly, subject to such limitations as may be included in appropriation acts, for financing the operation and maintenance expenses of the marketing agencies, thus reflecting the results of these business-type operations in the budget on a net basis.

Other resource programs.—In 1960, expenditures for conserving and developing the resources of the national forests, public domain lands, and Indian lands will be somewhat lower than in 1959. Receipts from management of these lands are estimated at $300 million in 1960, an increase of $22 million over the 1959 estimate. In accordance with this administration's policy to obtain a fair return for use of federally owned resources, legislation will be proposed to revise the fee schedule for noncompetitive oil and gas leases on lands in the public domain.

Scheduled construction on Indian reservations will permit progress in providing roads, irrigation and water systems, and buildings and utilities. The major share of building construction will go for schools

for Indian children who reside on lands held in trust by the United States.

Expenditures in 1960 for fish and wildlife resources will be at about the present level. An increase is recommended to acquire lands for additional wildlife areas in 1960. Also, to aid the fishing industry, the fishery loan fund will be augmented by $3 million and mortgages for fishing vessels will be insured by the Bureau of Commercial Fisheries in the Department of the Interior.

This budget provides for the continued improvement of our national parks and the development of the national forests for recreational use. A supplemental 1959 appropriation is recommended to enable the recently established Outdoor Recreation Resources Review Commission to undertake the first comprehensive survey of outdoor recreational resources and needs. It is anticipated that the Commission's findings and recommendations will provide guides for Federal, State, local, and private interests in considering how to meet the increasing demands for outdoor recreation.

Under present methods of utilizing natural gas, helium is largely being dissipated into the atmosphere. This unique gas is needed for atomic energy and missile programs as well as industrial welding and certain types of aircraft. Legislation is recommended to conserve for future use the Nation's vital helium. Maximum private participation and financing in accomplishing this objective are contemplated.

LABOR AND WELFARE

The Federal Government's labor and welfare services have grown significantly in the last decade as new programs have been enacted and old ones broadened and expanded. Budget expenditures for labor and welfare will have doubled between 1950 and 1960. Including payments from trust funds as well as budget funds, there is an almost fourfold increase, from $5.3 billion in 1950 to an estimated $19.1 billion in 1960. Much of the increase in budget outlays has been for grants-in-aid to States and local governments, which in 1960 will comprise three-fourths of budget expenditures for labor and welfare programs.

Total expenditures for these programs are estimated at $4.1 billion. This is $682 million more than was spent for these programs in 1958 but $251 million less than the estimate for the current year. The decrease from 1959 to 1960 occurs chiefly because of the expiration on April 1, 1959, of the antirecession legislation for temporary Federal unemployment compensation payments. Excluding these temporary payments, estimated expenditures in fiscal 1960 are $161 million greater than in 1959. Significant increases are provided in 1960 for the defense education program initiated in fiscal 1959 and for higher public assistance grants as required by legislation enacted by the last Congress.

Federal Reserve Bank of St. Louis

While continuing to support programs necessary to stimulate greater State and local effort in areas of critical national concern, this administration has consistently endeavored to strengthen our system of government by encouraging State and local governments to assume responsibility for many public needs which they can provide well without relying on Federal aid at all, or by financing a larger share from their own revenue sources. Therefore, toward this objective, legislation is again recommended to:

(*a*) Discontinue Federal grants for vocational education and for waste treatment works construction and adjust Federal revenue laws as recommended by the Joint Federal-State Action Committee so the States can assume full responsibility for these programs starting in the fiscal year 1961;

(*b*) Modify the provisions for aid to schools in areas affected by Federal activities;

(*c*) Increase State and local participation in the financing of public assistance programs.

Specific proposals will be transmitted to the Congress during this session on each of these matters and I urge the Congress to speed their enactment.

The rapid growth in our population, when added to the increasing complexity of our economy as a result of rapid technological advances, brings us face-to-face with increasingly difficult problems in the fields of health, education, and welfare. We cannot continue to deal with these problems on a year-to-year basis. We must, as a Nation, arrive at an understanding on long-term goals. At the same time we must endeavor to reach an understanding on the respective contributions that should be made by government at all levels and by private groups in order to achieve these goals. I have announced in my state of the Union message a series of studies designed to facilitate the reaching of such consensus.

Science, research, and education.—Expenditures for basic research, which provide the foundation for advancements in applied research and technology and assist in the support of our universities, will continue upward in 1960. Expenditures for the program of research grants by the National Science Foundation are expected to reach $80 million, an increase of $20 million above 1959 and more than double the 1958 amount. Basic research in other departments and agencies will continue to increase over past years. For all agencies combined, it is estimated that Federal expenditures for basic research will be about $500 million in the fiscal year 1960.

In the field of education, primarily in science and mathematics, this budget provides for increased expenditures by the National Science Foundation and the Department of Health, Education, and Welfare for programs initiated or enlarged in fiscal 1959.

480000—59——v

Digitized for FRASER

Federal Reserve Bank of St. Louis

The National Science Foundation programs are carried out through fellowships to individuals and grants to institutions of higher learning. They are chiefly directed toward providing encouragement and opportunity for capable students to undertake careers in science, improving courses of instruction in sciences, and providing advanced training for scientists and science teachers. For example, in 1960, 28,000 teachers—including one out of every six science and mathematics teachers in our high schools—will have the opportunity to attend institutes devoted to the improvement of teaching in these fields. Expenditures for the science education programs of the Foundation in the fiscal year 1960 are estimated at $60 million, an increase of $9 million above the 1959 level, and four times the expenditures in 1958.

The Department of Health, Education, and Welfare, under the National Defense Education Act of 1958, is initiating a program of repayable contributions to loan funds for college students and of grants-in-aid to States. The grants, which will run for 4 years, will help pay for the testing and counseling of high school students, the equipping of laboratories in the secondary schools, and related activities. The budget includes a supplemental appropriation for 1959 of $75 million to augment the $40 million already available in fiscal 1959 for the defense education program and provides $150 million in new obligational authority for fiscal 1960 pending further experience with the program.

Schools in federally affected areas.—Although education is primarily a responsibility of State and local governments, the Federal Government has an obligation to assist communities where large numbers of children of persons engaged in Federal activities impose an extraordinary burden on local school districts.

Programs to provide financial assistance to districts thus affected have been extended and liberalized several times since they were first started in 1950, despite the fact that they should be modified to assure greater and more equitable local responsibility. The Federal Government's responsibility is clear for those children whose parents both work and live on Federal property, and do not, therefore, pay local property taxes. On the other hand, it is only proper for the communities to bear the cost of educating children of those Federal personnel who, like all other residents, pay local taxes directly or indirectly for the support of public schools. In accordance with these principles, legislation will be recommended to place these aid programs on a more sound and equitable basis.

This budget includes appropriations of $181 million for these programs for the fiscal year 1960, the same amount as the appropriations provided by the Congress for fiscal 1959.

Federal Reserve Bank of St. Louis

Government statistical and economic services.—The rapid growth of our economy and the effective operation of markets for goods and services requires prompt and accurate national statistical information, as well as improved organization in the Government for its analysis.

This budget recommends a major increase in funds for obtaining fundamental economic and demographic data through the 18th decennial census. It also provides for improvements in the compilation of regular price, construction, manpower, and related data to help produce more sensitive and useful information on which many private and Government policies are based. Additional price data will be collected for the Consumer Price Index by the Department of Labor, and a start will be made toward a revision of the index, which is to be completed in 5 years. Preparation of statistics on construction activities will be consolidated in the Department of Commerce. The responsibility for planning and publication of current comprehensive employment and unemployment statistics will be centralized in the Department of Labor, where the work on labor requirements will be strengthened.

Labor and manpower.—The growth of our economy depends in large measure upon the full use of our manpower resources and the effective operation of the free labor market. The Federal-State employment security system, with an estimated 54,000 State employees in 1,800 local offices, makes an important contribution to the functioning of that market. This budget provides $329 million of appropriations for grants to States for administration of employment service and unemployment insurance offices.

These grants are presently financed from an earmarked Federal tax which flows through the general budget even though it is not available for general Government purposes. Legislation is proposed to place an amount equal to the proceeds from this tax directly in a trust fund from which the necessary grants can be appropriated, and any balance used as a reserve for employment security and unemployment purposes. The administration of this program would then be financed in the same way as other social insurance programs.

Our unemployment compensation system has again demonstrated its importance in providing income for the unemployed and thereby supporting the economy while alleviating hardship. Temporary assistance of the kind provided by the Temporary Unemployment Compensation Act of 1958 is in no sense a substitute for widening the coverage of unemployment compensation and extending the duration of benefits and increasing benefit amounts under the Federal-State system. I have many times urged such action. I urge it again now with added conviction as a result of last year's experience.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

I am again urging prompt enactment of effective statutory protection for workers and the public from the racketeering, corruption, and abuse of democratic processes which have been disclosed in the affairs of certain labor unions. Additional statutory protection in the field of labor-management relations will likewise be proposed to promote equity and stability in the relations among workers, unions, and employers. I shall make specific proposals in a special message on labor affairs.

Legislation is also recommended to provide equal pay for equal work, to revise the laws relating to hours of work on Federal construction projects, and to extend the coverage of the Fair Labor Standards Act so that several million more workers can receive its protection.

Last year Congress enacted legislation requiring regular reports and public disclosure of the provisions and finances of welfare and pension plans. Every effort is being made in administering the law to protect potential beneficiaries, and amendments to strengthen the basic authority will also be sought. In addition, the Administration recommended and the Congress authorized enforcement of safety codes for longshoremen and harbor workers to overcome certain hazardous conditions in the maritime industry. Supplemental appropriations for administering these new laws are recommended for 1959.

Public health.—Expenditures by the Department of Health, Education, and Welfare for health programs, including those for research and construction of health facilities in fiscal 1960 are estimated at $675 million—more than double the amount 5 years earlier.

Large and rapid increases in outlays for medical research and training by the National Institutes of Health have occurred simultaneously with expansion in related research by other agencies. In 1960, expenditures for such purposes are estimated to increase to $254 million, which is more than three times the amount 5 years ago. The impact of this expanded effort on medical schools and research institutions, as well as its implications for broader policy in education and health programs, requires careful appraisal. The Secretary of Health, Education, and Welfare is completing a review of our long-term objectives in the field of medical research and training. The results of this study in terms of program and costs, including indirect costs, will be made available to the Congress.

Another large component of the health programs consists of construction of hospitals and waste treatment works through grants, and of health research facilities through grants and direct financing. Expenditures in the fiscal year 1960 for these programs are estimated at $186 million, which is $8 million more than in the previous peak year 1959. Proposed new obligational authority has been reduced in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

a manner consistent with the policy outlined earlier in this message relative to public works. For hospital construction, the Congress provided a sharply increased 1959 appropriation for antirecession purposes, a sizable portion of which will be available for obligation in 1960.

The future of our health programs depends on an adequate supply of qualified personnel. Legislation is recommended to extend the programs, which expire on June 30, 1959, for training of professional nurses and for graduate training of public health personnel.

Social security and public assistance.—The Federal Government's responsibility for income maintenance should be mainly discharged through contributory, self-supporting social insurance. Today we have social insurance programs which help protect nearly all our people from loss of income due to old age, permanent disability, or death of the wage earner. The Federal old-age, survivors, and disability insurance system provides basic protection for nearly all workers; military personnel and railroad workers are covered in addition by special Federal systems; and Federal civilian employees are protected by special laws. The growth of the social security program since World War II is indicated below:

OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE

[Fiscal years]

	1946 actual	*1960 estimate*
Percent of workers covered	60%	90%
Total annual benefits paid out (in millions)	$321	$10, 510
Average monthly number of beneficiaries (in millions)	1. 3	13. 7

Despite this tremendous growth, and despite the primary responsibility of State and local governments for the economic security needs not met by social insurance, Federal expenditures for public assistance grants to States will continue to rise in 1960—chiefly because of the 1958 amendments to the Social Security Act. Legislation raising the Federal matching share or extending Federal participation to new groups has been enacted five times in the last six Congresses. The following table shows the growth in this program in the period since 1946:

PUBLIC ASSISTANCE GRANTS

[Fiscal years]

	1946 actual	*1960 estimate*
Federal expenditures (in millions)	$446	$2, 018
Federal share in total expenditures	44%	57%
Average monthly number of recipients (in millions)	2. 8	5. 7

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Under the authority of recent legislation, an advisory council is being appointed by the Secretary of Health, Education, and Welfare to study the whole structure and financing of our public assistance programs. I have asked the Secretary to present to this council, at the earliest possible time, the issue of what constitutes an appropriate Federal share in these programs. I have also requested him to develop recommendations, after consulting the council, which can be presented to the Congress to increase State and local participation in the cost of the public assistance programs beginning in 1961. In this connection, I believe we must keep in mind the fact that the Federal share of such expenditures has increased to more than 57% on an overall basis and runs as high as 80% in many cases. I believe that this trend is inconsistent with our American system of government. If it continues, the control of these programs will shift from our State and local governments to the Federal Government. We must keep the financing and control of these programs as close as we possibly can to the people who pay the necessary taxes and see them in daily operation.

A basic problem in the public assistance programs is achieving the goal of helping people to help themselves return to self-support. Solution of this problem requires studies into the causes of dependency and its prevention. It also requires better training of local case workers. This budget provides for cooperative work with the States in these two areas.

Other welfare services.—The rehabilitation of disabled people is rewarding in human as well as economic terms. This budget provides additional funds in 1960 for the Federal-State vocational rehabilitation program. It is estimated that services will be provided to 314,000 persons during 1960 and that the number rehabilitated will increase to 90,000.

Additional funds are included for the White House Conference on Children and Youth which I have called for 1960 so that the States, localities, private organizations, and Federal agencies can pool their knowledge of the best ways to meet the needs of our youth. Funds are also included in this budget for the 1961 White House Conference on Aging, which will provide an opportunity for all levels of Government and our many private organizations to find means through which they can contribute to a better life for our 15 million elderly citizens.

Railroad retirement insurance.—The railroad retirement system is a combination social insurance and industrial retirement program operated by the Government but self-financed from employment taxes on railroad workers and carriers. Several legislative steps should be taken to improve this system:

First, it should be placed on a sound actuarial basis. Although it is generally accepted that railroad retirement should be fully self-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

financed, studies made in recent years show that the system is incurring a substantial actuarial deficit. Therefore, taxes on railroad employment should be increased at the earliest possible time, without changing the status of such contributions for Federal income tax purposes.

Second, the wages covered for railroad retirement should be raised from $4,200 to $4,800 annually in line with the 1958 amendments for Federal old-age, survivors, and disability insurance. These two systems have been increasingly coordinated, particularly through the 1946 and 1951 amendments, but were not equally strengthened last year.

Finally, revisions should be made in the law governing Federal payments to the railroad retirement account for time spent by railroad workers in military service. According to the Comptroller General, the Government has already paid to the railroad retirement account an estimated $350 million more than will ever be required for the added cost of benefits resulting from military service previously rendered by railroad workers. Furthermore, the law requires Government contributions of several hundred million dollars on a 10-year installment basis to the old-age, survivors, and disability insurance trust funds for past military service, including the service of railroad workers for whom contributions have already been paid to the railroad retirement fund.

Legislation should be enacted to make the actual added cost of military service credits the basis of payment to the railroad account. This is the method already incorporated in law for military service by railroad workers before 1937 and is also the method specified for noncontributory service credits for old-age, survivors, and disability insurance purposes. Payment on this basis will save taxpayers an estimated $95 million in future appropriations for military service between 1948 and 1954. The past Government overpayments to the railroad system should be transferred to the old-age, survivors, and disability insurance trust funds as the annual installments of Government contributions to those funds become due. By providing the first such installment for 1960, this legislation will make unnecessary an $80 million appropriation from the general fund for that year.

VETERANS' SERVICES AND BENEFITS

The upward trend of expenditures in veterans' programs is expected to halt temporarily in the fiscal year 1960, mainly because declining workloads result in a decrease of $163 million for readjustment programs which have helped so many veterans of World War II and the Korean conflict to become reestablished in civilian life. Expenditures for disability and death compensation, which have increased in the last several years because higher rates were enacted, are expected to decrease somewhat in 1960 as the number of beneficiaries declines.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

However, expenditures for other permanent programs are continuing to increase, primarily because more veterans with disabilities not resulting from their military service are receiving hospital and medical care or pensions. The estimated total expenditures for veterans in 1960 of $5.1 billion are $110 million less than in 1959, and $62 million more than in 1958.

Total	5,026	5,198	5,088	5,054

[1] Compares with new obligational authority of $5,071 million enacted for 1958 and $5,125 million (including $122 million for anticipated supplemental authorizations) estimated for 1959.

Most of the expenditures for veterans' benefits and services cannot be controlled by ordinary appropriation processes because the eligibility conditions and benefit rates are set by basic legislation, and payments must be made if eligible veterans apply.

This Nation has always shown deep gratitude and provided special benefits and privileges for its war veterans and their dependents, particularly for those veterans killed or disabled as a result of their service and for their widows and children. I am convinced that we will always continue compensation programs which reflect this policy.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

However, I believe that certain of our national policies and legislation governing other veterans programs should be modified. This is particularly true of the benefits provided to veterans and their families for disability or deaths not resulting from or related to military service. With veterans and their families constituting nearly half of our population, the cost of these veterans' benefits is high, and will continue to increase as our veterans advance in age.

Pensions.—We must continue veterans' pensions and increase pension rates for those who are without other resources, particularly if they have families. However, eligibility should be determined according to effective tests of need, both as to income and as to net worth, so that payments will no longer be made where the veteran or his family has adequate resources for basic necessities from other sources. Properly applied, I believe this approach can better serve those who are now in need and at the same time minimize the burden placed on taxpayers by present laws. I have, accordingly, asked the Administrator of Veterans Affairs to present to the Congress legislation both to provide more equitable treatment of needy veterans and to modernize the veterans' pension program in the light of social developments and changes.

Compensation.—Other veterans programs also merit close continuing attention. The Veterans Administrator will expedite and broaden the work underway in the Veterans Administration on revising standards for rating of disabilities. For some of the seriously disabled veterans, whose activities are greatly restricted, increases in compensation rates are warranted. Likewise, improved rehabilitation services should be provided for those few peacetime ex-servicemen with substantial service-connected disabilities.

Hospital and medical care.—This budget includes $891 million of expenditures for hospital and medical care for veterans in 1960. The increase of $6 million from 1959 is provided to improve the staffing and quality of service in the hospitals. Provision is made for hospital and domiciliary care for an average of 140,800 beneficiaries per day.

More than 2 million outpatient treatments or examinations for service-connected disabilities will be provided in 1960.

An appropriation of $20 million is recommended for modernization of hospital and domiciliary facilities; with balances from prior years, this appropriation will permit expenditures of $55 million for construction and modernization.

Administration.—Administrative expenditures associated with veterans programs will be lower in 1960 than in the current year because of declining workloads and increasing efficiency. Funds are provided

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

for improving the top management and evaluation activities of the Veterans Administration. The application of modern high-speed automatic equipment to the large volume recordkeeping and clerical operations will be extended. This will produce significant administrative savings in future years.

INTEREST

Interest payments are estimated to rise $495 million to $8.1 billion in the fiscal year 1960. These payments, almost entirely for interest on the public debt, represent more than 10% of budget expenditures.

INTEREST

[Fiscal years. In millions]

Item	Budget expenditures			Recommended new obligational authority for 1960
	1958 actual	1959 estimate	1960 estimate	
Interest on public debt	$7,607	$7,500	$8,000	$8,000
Interest on refunds of receipts	74	92	87	87
Interest on uninvested funds	8	9	9	9
Total	7,689	7,601	8,096	8,096

Since the spring of 1958, market rates of interest have increased, reflecting the strong recovery of the economy. The rise in market rates requires the Treasury to pay higher interest on securities issued to refinance the heavy volume of maturing Government obligations, a large part of which were issued when interest rates were lower.

In addition to higher interest rates, the amount of interest payments depends on the size and composition of the public debt. It is anticipated that the public debt will reach $285 billion by the end of the fiscal year 1959. On the basis of the balanced budget I am presenting, the debt will be no higher at the end of 1960, although there will be a substantial temporary increase during the year.

GENERAL GOVERNMENT

Expenditures for general government activities are estimated at $1.7 billion in 1960, an increase of $62 million from 1959, primarily because of the volume of construction of Government office buildings started in earlier years, including the new office building for the House of Representatives.

GENERAL GOVERNMENT

[Fiscal years. In millions]

Federal Reserve Bank of St. Louis

General property and records management.—Initiation of new construction is being deferred in the fiscal year 1960 and no funds are recommended for starting new general office buildings. In 1959, a total of $208 million new obligational authority was enacted for this purpose. Hence, expenditures in 1960 for Government office buildings started in prior years will increase sharply.

Central personnel management.—The public interest requires a comprehensive analysis and modernization of Federal pay policies and systems. The salary and benefit systems for Federal civilian employees should combine the best practices of progressive private employers with the special needs of the Government. Government policy should promote efficiency, maintain a clear relationship at all levels between pay and work performed, and assure compensation reasonably comparable with that in private employment. Although some progress has been made in recent years, the present system falls far short of meeting these objectives. Accordingly, I again urge the Congress to establish a Joint Commission on Civilian Employee Compensation in the Federal Government.

Statehood for Hawaii and home rule for District of Columbia.—I again recommend that the Congress enact legislation to admit Hawaii into the Union as a State, and to grant home rule to the District of Columbia. It would be unconscionable if either of these actions were delayed any longer.

Alaska.—I am highly gratified to be the first President in 47 years to have had the privilege of welcoming a new State into the Union. Alaska takes its place as the equal of the other 48 States with both the privileges and the responsibilities that go with statehood. Recommendations will be transmitted to the Congress concerning certain changes needed in Federal law as a result of Alaska's admission to the Union in order to apply to Alaska the same general laws, rules, and policies as are applicable to other States.

The size of the new State, its geographic location, present Federal ownership of 99% of the land area, and Federal administration of services provided elsewhere by private enterprise and State and local governments create problems not previously encountered when new States were admitted into the Union. Furthermore, some time will elapse before Alaska can benefit fully from the revenues to be derived

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

from public lands and other resources to be made available to the State by the Statehood Act. The Federal Government is cooperating with Alaska in developing constructive solutions to these transitional problems.

In the long-run interest of both the State and the Nation, the Federal Government should not continue special programs in Alaska which, in other States, are the responsibility of State and local governments or of private enterprise. The Federal Government should provide such financial assistance as is necessary to facilitate transfer to the State of such programs as highway construction and maintenance, airport operations, and public health services. Therefore, legislation will be proposed to authorize the payment of transitional grants to the State of Alaska in an amount not to exceed $10.5 million for the fiscal year 1960 and in declining amounts for the subsequent four years. Under the proposed legislation Alaska could choose between receiving the entire transitional grant or requesting that a portion be used for financing continued Federal operations during an interim period.

Expenditures for the transitional grants to Alaska will be largely offset by the elimination of existing special Federal programs in Alaska. Alaska will, of course, be eligible to participate in regular Federal grant-in-aid programs on a comparable basis with the other States.

Other recommendations for legislation.—The last Congress enacted legislation to cover some of my most urgent proposals for amending the immigration laws. Legislation on the remaining proposals should be promptly enacted, and the expiring authority to issue visas to certain orphans and to aliens afflicted with tuberculosis should be extended.

I also recommend that the Congress direct special attention to the creation of additional Federal judgeships as proposed by the Judicial Conference, and the strengthening of Federal laws against organized crime.

To permit further timely improvements in the structure of the executive branch of the Government, I recommend that the Congress extend the Reorganization Act of 1949, as amended, which is effective only until June 1, 1959.

I again recommend that the President be authorized to make awards for distinguished civilian achievement.

CONCLUSION

This budget charts the course our Government should take as we embark on the decade of the 1960's. Since the end of World War II, the pace of achievement and universal change has quickened with each successive year, sharpening the need for adjustments in the relations of peoples and nations to each other. In the decade facing us, the challenges to representative government will be no less than in the past; indeed, the tasks which are certain to be laid upon the executive, legislative, and judicial branches will require from each increasing vision, understanding, and wisdom.

This budget is designed to serve the needs of the Nation as a whole as effectively as possible. It rejects the philosophy that the national welfare is best served by satisfying every demand for Federal expenditures.

Our objective, as a free Nation, must be to prepare for the momentous decade ahead by entering the fiscal year 1960 with a world at peace, and with a strong and free economy as the prerequisite for healthy growth in the years to follow. This can be achieved through Government actions which help foster private economic recovery and development, and which restrain the forces that would drive prices higher, and thereby cheapen our money and erode our personal savings. The first step is to avoid a budget deficit by having the Government live within its means, especially during prosperous, peacetime periods.

The 1960 budget reflects our determination to do this.

DWIGHT D. EISENHOWER.

JANUARY 19, 1959.

INTRODUCTION TO PART I

Part I of the budget contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

TYPES OF FUNDS

A basic distinction is made between Federal funds on the one hand, and trust and deposit funds on the other.

The *Federal* (Government-owned) funds are of four types as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Public enterprise (revolving) funds are those which finance a cycle of operations, in which the expenditures generate receipts coming primarily from the public and available for continuing use. They include nearly all of the Government corporations, the postal fund, and various unincorporated enterprises.

Intragovernmental revolving and management funds (including *consolidated working* funds) are those which are created to facilitate financing operations within and between Government agencies. They consist of two types—*intragovernmental revolving* funds which finance a cycle of operations, like public enterprise funds but with receipts primarily from within the Government; and *management* funds which permit the pooling of advance payments from two or more appropriations to carry out certain activities.

The other funds, for which the Government serves in a fiduciary capacity, are of two types—*trust* funds and *deposit* funds. They are explained in the introduction to part III.

BUDGET RECEIPTS, EXPENDITURES, AND SURPLUS OR DEFICIT

The budget totals and the budget surplus or deficit relate only to the Federal funds, and exclude trust and deposit funds. Tables 1, 2, and 3 are therefore limited to transactions of the Federal funds.

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Budget receipts represent the total received for the general fund and the special funds, less (*a*) refunds of receipts and (*b*) transfers to trust fund receipts in the four cases where the law provides an indefinite appropriation to a trust fund in an amount equal to certain tax receipts. Gross receipts and the deductions are itemized in special analysis B of part IV.

Internal revenue and customs receipts are stated on the basis of collections reported by collecting officers. Other receipts are reported on the basis of confirmed deposits.

Basis of stating budget expenditures.—Tables 1 and 2 include information on budget expenditures. Such expenditures cover the general fund, the special funds, the public enterprise funds, and the intragovernmental revolving and management funds. Expenditures for the public enterprise funds and for the intragovernmental funds are included in the totals on a *net* basis—that is, their collections are deducted from gross expenditures and the results are the net expenditures. Legislation will be proposed this year to establish five new public enterprise funds. Interagency payments and reimbursements to appropriations are also netted; that is, to avoid double counting they are treated only as expenditures of the agency whose appropriation or fund is ultimately bearing the charge. Some incidental reimbursements from outside the Government to appropriations are similarly netted out of expenditure figures.

Under the *checks-issued* basis which is used, expenditures are reported for the fiscal year in which the checks are issued, regardless of when the obligation was incurred or when the goods and services were received. Modifications in this basis are made as follows: (*a*) Where payment is made in cash instead of by check, the cash payment is an expenditure; (*b*) where payment is made by the issuance of bonds or by an increase in their redemption value, instead of by the issuance of checks, such an issuance or increase is an expenditure; and (*c*) interest on the public debt, other than increases in the redemption values of savings bonds, is reported on an accrual basis.

Debt and investment transactions.—Receipts never include money obtained from borrowing by any type of Federal fund. Nor are borrowings considered as a deduction in arriving at budget expenditures. Similarly, retirement of debt is always excluded from budget expenditure figures of all types of Federal funds. The purchase of U. S. Government securities, and redemptions or sales thereof, are also excluded from expenditure and receipt figures.

Eliminations from both receipts and expenditures.—Certain transfers from one fund to another are eliminated from budget receipts and expenditures. This is done to avoid inflating both sides of the budget. Payments to the general fund of earnings and dividends on capital of revolving funds, and the return of such capital to the general fund are the items so excluded. However, interest paid to Treasury by such funds is considered a cost of the fund and is therefore not eliminated.

Budget surplus or deficit.—The budget surplus or deficit shown in table 1 represents the difference between the *budget receipts* and *budget expenditures* of a given year. Cash balances, appropriation balances, and surpluses and deficits of previous years are not a part of the calculation.

NEW OBLIGATIONAL AUTHORITY

Table 3 summarizes the new obligational authority—the total of authority becoming available in a given fiscal year for entering into new obligations.

The obligation basis.—Expenditures can be made only pursuant to appropriations or other specific authority granted by Congress. Government agencies are generally permitted by law to incur obligations requiring the future

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

payment of money only when they have an appropriation or other specific authority to do so. Congressional action on the budget must therefore include authority to cover *obligations* expected to be incurred within the fiscal year, rather than to cover only the *expenditures* which are expected to be made during that year in payment of obligations.

Types of new obligational authority.—There are three basic types of new obligational authority: Appropriations, contract authorizations, and authorizations to expend from debt receipts. In addition, there are sometimes reappropriations and reauthorizations.

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the appropriation to permit the payment of such obligations is said to be to *liquidate contract authorizations* and it is not a part of new obligational authority. In all other cases appropriations confer authority both to incur new obligations and to pay for them.

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to incur obligations and make expenditures from borrowed money. Such authorizations may take these forms: (*a*) Authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (*b*) authorizations for a Government-owned corporation to borrow directly from the public; and (*c*) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation has the effect of permitting further expenditures to be made (through restoring previously used authority to borrow from the Treasury).

Reappropriations and *reauthorizations* are actions to continue available part or all of the unused balances of prior appropriations or authorizations which would otherwise expire. When the authorizations thus continued had been previously granted for current operations of the year, the continuation of their availability into a new year constitutes new obligational authority.

Distinction between permanent and current authorizations.—Some new obligational authority is *permanent*, but most is *current*. The permanent items are those under which additional sums become available from time to time under action previously taken by the Congress; no further action is required each year. Most permanent authorizations are in force until repealed; a few are in effect for only a few years as specified in the law. The current authorizations are those enacted by Congress in or immediately preceding each fiscal year.

PROPOSED FOR LATER TRANSMISSION

Tables 1, 2, and 3 identify in separate columns the portion of receipts, new obligational authority, and expenditures which are anticipated under proposed legislation and supplemental budget items under existing legislation. Such items are not provided for in the appropriation text included in this budget, but will be formally transmitted to the Congress later. Such estimates include, in addition to the various items which are identified in part II, an "allowance for contingencies" to cover items which cannot be foreseen now but which may be transmitted later if the need arises. Congressional action upon this allowance may be requested later, not at a single time nor as a single lumpsum item, but in the form of a number of specific appropriations for individual items.

EFFECT ON THE DEBT

Table 4 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount necessary to borrow or available to repay is also influenced by: Changes in cash balances; the result of trust fund transactions; the use of borrowing directly from the public (not Treasury borrowing) as a means of financing budget expenditures of certain enterprises (and the repayments of such borrowing as an application of public enterprise fund receipts); and the change in the amount of checks outstanding and other items in process of clearance through the accounts.

CONSOLIDATED STATEMENT

Table 5 brings together the total financial plan for the Government—the budget figures for Federal funds and the estimates for trust and deposit funds—for 1960; and it presents a consolidated statement of receipts from and payments to the public. The statement not only eliminates interfund payments, but also brings in certain transactions of Government-sponsored enterprises which are not otherwise reflected in the budget, converts to a cash basis those expenditures which are made in the form of debt issuances (or increases in the redemption value of debt), and eliminates noncash receipts resulting from seigniorage. Details on a 13-year basis and further explanations are given in special analysis A of part IV.

CLASSIFICATIONS

Receipts are classified in tables 1 and 5 by *source*, a classification which is set forth in detail in special analysis B of part IV.

Expenditures and new obligational authority are classified in two ways in the part I tables. A classification by *function*, used in tables 1 and 5 and the first part of table 3, groups transactions according to broad governmental purposes; subcategories of this classification as applied to Federal funds are set forth in special analysis C. A classification by *agency*, used in table 2 and the second part of table 3, shows transactions by major organizational units of the Government, with most agencies that are independent of the ten executive departments being grouped together. The main entries in this classification correspond to "chapters" in part II of the budget and to the way in which part III is organized.

INTRODUCTION TO PART II

Part II contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Included herein is also material on a few trust funds which require congressional action.

This part of the budget begins with 4 statements (tables 6 through 9) which supplement the tables of part I. The remainder of part II is arranged in chapters reflecting the organization of the Government.

Each chapter begins with a summary narrative statement and certain summary tables. These are followed by detailed material for each appropriation or fund.

SUMMARY TABLES AND THEIR CONTENTS

SUMMARIES OF AUTHORIZATIONS AND EXPENDITURES

Listing of accounts.—A principal table for each chapter shows the new obligational authority and budget expenditures by appropriation account and fund. The listing is arranged by bureau or comparable organization unit and, for each such unit, is divided into several sections: Current authorizations (other than for public enterprise and intragovernmental funds), permanent authorizations, public enterprise and intragovernmental funds, and supplemental items proposed for later transmission.

Authorizations by type.—Forms of new obligational authority other than appropriations are set forth under the applicable appropriation titles, identified by separate line entries. A recapitulation at the end of the account listing shows the authorizations divided between current and permanent and classified by type. In this recapitulation new obligational authority for public enterprise and intragovernmental funds is classified with other authority of the same type. The figures are carried forward into a governmentwide summary in table 7.

Classification by function.—Functional code numbers appear in a separate column of the chapter listings, indicating the category in the functional table (special analysis C of part IV) where each item has been included.

Transactions of public enterprise funds.—An appended table in each chapter is used for public enterprise funds. It shows the gross expenditures, the receipts from operations, and the budget expenditures (the difference between the two other figures). The figures for gross expenditures and for receipts are derived from the detailed business-type budget statements, which show expenditures and receipts on an accrual basis with a single adjustment (on either the expenditure or receipt side but not both) for the conversion from an accrual to a checks-issued basis (net). The figures from the chapters are totaled in table 9.

SUMMARIES OF BALANCES CARRIED FORWARD

An analysis of unexpended balances for each chapter shows for each account the balances of budget authorizations carried forward at start and end of the past, current, and budget years. These balances are summarized in table 8.

Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time or without time limit. In the case of those which are for a specific period of time, unobligated balances are written off at the end of that time, but obligated balances remain available indefinitely to pay outstanding obligations lawfully incurred.

In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be 1 or 2 years or even longer.

Balances are not in the form of cash, but are bookkeeping authority for the incurring of obligations or for the making of expenditures. Cash must be provided at the time the expenditures occur.

The unobligated balance for each account or fund represents the difference between the unexpended balance and the net obligations outstanding. Net obligations outstanding represent the unpaid obligations (both those which have accrued into liabilities and those which are undelivered or unperformed) less the accounts receivable and intragovernmental orders for services or materiel which have been accepted but have not yet become receivables.

RELATIONSHIP OF TRANSACTIONS AND BALANCES

The total amount available—new obligational authority plus balances brought forward and adjustments—is shown on the last of the chapter summary tables, together with the expenditures and other disposition made of the amounts available. The body of the table is arranged to "flow" from start to end of the year; obligations incurred, net, are shown for reference at the end.

Similar information, but arranged to place obligations incurred within the sequence of the table's flow, is summarized for the Government as a whole in table 6.

Writeoffs, restorations, and other adjustments in availability.—Writeoffs of unused balances of authorizations occur in four ways: (*a*) rescissions by act of Congress; (*b*) the automatic lapsing of unobligated balances when an appropriation expires for purposes of obligation; (*c*) the return of capital and transfer of dividends from revolving funds to the general fund; and (*d*) adjustments in the obligated balances of expired accounts due to the payment of obligations in smaller amounts than anticipated or to the amendment or cancelling of obligations.

Restorations of balances previously written off occur in the case of expired accounts when the balances left for payment of old obligations are insufficient to cover them, due to payments in larger amounts than anticipated, the amendment of obligations, or the discovery of previously unrecorded items.

Obligations incurred, net.—The obligations incurred are stated on a gross basis in the detailed schedules, but are summarized on a net basis, consistent with the method of stating budget expenditures and new obligational authority. Thus, the summary figures are based on total obligations incurred less reimbursements to appropriation accounts, revenues and other receipts of revolving funds, and recoveries of prior obligations.

Authority for expenditures.—Expenditures for the budget year are broken down on two tables in each chapter summary into those coming out of new obligational authority of the same year and those coming out of balances, etc. It is generally assumed that prior year balances available in commingled accounts will be obligated before the new authorizations are obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience. In the case of revolving funds it is assumed that budget authorizations are expended in an amount equal to the sums placed in the fund during the year, and that, if all of the authorization is not placed in the fund at once, it is moved to the fund and expended on a first-in, first-out basis.

Federal Reserve Bank of St. Louis

FORM OF DETAILED MATERIAL

For each appropriation, the budget includes certain detailed material, as follows: (1) appropriation language, if applicable; (2) a schedule of program and financing; (3) a narrative statement on program and performance; (4) a schedule of object classification. An exception occurs in the case of certain permanent appropriations and other older appropriation accounts on which only a residual balance remains; such accounts of a bureau or independent agency are often combined into a single presentation instead of having detailed schedules.

In the case of revolving funds, there is usually the material listed above, together with three additional schedules, covering (5) the sources and application of funds; (6) revenue, expense, and retained earnings; and (7) financial condition. For some intragovernmental revolving funds the program and financing schedule is omitted.

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1960 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for later transmission. The language of the 1959 appropriation acts is used as a base. Following the language are citations to relevant laws and the appropriation act from which the text is taken, as in this example:

ESTABLISHMENT OF METEOROLOGICAL FACILITIES

For an additional amount for the acquisition, establishment, and relocation of meteorological facilities and related equipment, including the alteration and modernization of existing facilities; [$275,000] *$3,000,000*, to remain available until [June 30, 1961] *expended*: *Provided*, That the appropriations heretofore granted under this head shall be merged with this appropriation. (*15 U. S. C. 311, 313, 313a, 317, 325, 328; P. L. 726 (72 Stat. 783, sec. 803), 85th Congress; Department of Commerce and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, [a] **$1,575,000** Estimate 1960, **$3,000,000**

[a] Includes $1,300,000 appropriated in Supplemental Appropriation Act, 1959.

Roman type shows the text used in the 1959 appropriation acts. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of two parts. In the section for program by activities, obligations are classified by purpose, program, or project. This classification, especially tailored for each agency and account, reflects the particular duties and responsibilities for which the money is used. The financing section shows the appropriation provided and other means of financing the program, and the disposition of amounts not used during the year. Only three of the possible entries are illustrated here:

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Upper-air observational facilities	$35,290	$96,200	$1,261,920
2. Weather surveillance radar	317,890	454,250	478,565
3. Surface observational facilities	379,968	218,990	613,220
4. Construction of facilities in Alaska	311,553	275,000	170,000
5. Hurricane and tornado research equipment		1,300,000	
6. Engineering and technical support	217,719	152,220	165,326
Total obligations	1,262,420	2,496,660	2,689,031
Financing:			
Unobligated balance brought forward	−2,031,780	−1,369,360	−447,700
Unobligated balance carried forward	1,369,360	447,700	758,669
Appropriation (new obligational authority)	600,000	1,575,000	3,000,000

Obligations refer to orders placed, contracts awarded, loan agreements made, and services received during the year, regardless of the time of payment. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

Where the data are available in the accounting system, cost-type budgets are presented. In such cases, the figures opposite the activity entries are the value of goods and services consumed in carrying out the program, in the case of operating costs; and they are the value of capital assets received, in the case of capital outlay programs. The program portion of a typical cost-type budget looks like this:

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Trainee expense	$5,478,434	$7,930,670	$8,530,430
2. Operation of training facilities	3,043,946	3,462,590	3,460,360
3. Construction of training facilities	1,567,375	567,870	120,590
4. Administration	1,550,938	3,038,870	2,888,620
Total program costs	11,640,693	15,000,000	15,000,000
5. Unfunded adjustment to program costs: Property or services transferred in (−) without charge, net	−50,513		
Total program costs, funded	11,590,180	15,000,000	15,000,000
6. Relation of costs to obligations: Obligations incurred for costs of other years, net	849,487		
Total program (obligations)	12,439,667	15,000,000	15,000,000

In those cases where the program is principally for procurement or public works, additional columns are often shown to make a more complete presentation. Where there is an accrued expenditure limitation there are additional entries to show the relation of costs to accrued expenditures and the relation of accrued expenditures to obligations. The financing section of a cost-type budget schedule is the same as for any other schedule.

The relation of costs to obligations is usually summarized in one or two lines on this schedule, but is amplified further in an additional text table inserted in the narrative statement which follows. A typical table is as follows:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories and items on order: Undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$382,592	$1,044,995	$1,044,995	$1,044,995
Advances (payment for goods and services on order not yet received)	102,168	265,251	265,251	265,251
Total selected resources at end of year	484,760	1,310,246	1,310,246	1,310,246
Selected resources at start of year (−)		−484,760	−1,310,246	−1,310,246
Adjustment of selected resources reported at start of year		24,001		
Obligations incurred for costs of other years (net)		849,487		

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable the narrative statement indicates the expected accomplishment in relation to the financial estimates, and it gives some measures of program and performance. Headings in the statements usually agree with the categories in the statement of program by activities.

SCHEDULE OF OBJECT CLASSIFICATION

There is shown for each account a summary of personal services and a classification of the obligations according to a uniform list of objects.

The object classes, numbered from 01 to 16, reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments. The "number of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

employees at end of year" represents the number of (*a*) full-time and regularly scheduled part-time employees in pay status on the last work day in June, and (*b*) intermittent employees who work at any time during June. This is the basis for reports of the Civil Service Commission.

Object Classification

		1958 actual	1959 estimate	1960 estimate
	Total number of permanent positions	29	23	23
	Average number of all employees	25	16	16
	Number of employees at end of year	23	14	15
	Average GS grade and salary	7.7 $5,585	8.1 $6,278	8.2 $6,331
01	Personal services:			
	Permanent positions	$166,764	$114,000	$120,289
	Other personal services	13,007	8,100	13,702
	Total personal services	179,771	122,100	133,991
02	Travel	23,480	20,850	20,950
03	Transportation of things	14,988	109,190	50,835
04	Communication services	186		375
05	Rents and utility services	4,151		
07	Other contractual services	51,831	1,877,650	328,065
08	Supplies and materials	165,621	47,000	59,325
09	Equipment	493,315	312,000	1,839,285
10	Lands and structures	318,313		247,420
11	Grants, subsidies, and contributions	10,678	7,780	8,705
15	Taxes and assessments	86	90	80
	Total obligations	1,262,420	2,496,660	2,689,031

Average grades and salaries are computed arithmetically. Thus the average salary sometimes falls outside the salary range of the average grade.

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

For all revolving funds, there is shown a presentation of funds applied and provided, other than the investment of Government capital in the fund, borrowings, and the repayment of capital and dividends.

The statement generally reflects revenues and expenditures on an accrual basis; an adjustment is made for changes in selected working capital (current assets, other than cash and inventories for sale or manufacture, less current liabilities) in either section of the statement as appropriate. Because of such an adjustment, the gross expenditures shown on the statement, less the receipts from operations, equal budget expenditures on a checks-issued basis, as in the following example:

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
Acquisition of equipment	$55,996	$50,000	$50,000
Expense	3,195,834	3,620,000	3,619,300
Total gross expenditures	3,251,830	3,670,000	3,669,300
Receipts from operations (funds provided):			
Revenue	3,192,676	5,071,800	5,466,800
Decrease in selected working capital	545,422	659,219	
Total receipts from operations	3,738,098	5,731,019	5,466,800
Budget expenditures	−486,268	−2,061,019	−1,797,500

Because the statement is built on the basis of transactions which affect working capital, it excludes depreciation, losses on loans, and other "nonfund" transactions.

STATEMENT OF REVENUE, EXPENSE, AND RETAINED EARNINGS

For revolving funds there is also presented a statement of revenue and expense, computed on an accrual basis, and the resulting net income or loss for the year. This statement is usually on a full accrual basis, including sums for depreciation, provisions for losses on receivables, etc. Where a fund consists of several programs, revenue and expense may be identified for each; otherwise they are shown only for the fund as a whole, as here illustrated:

Revenue, Expense, and Retained Earnings

Revenue	$3,192,676	$5,071,800	$5,466,800
Expense	3,216,150	3,646,224	3,650,524
Net operating income or loss (−) for the year	−23,474	1,425,576	1,816,276
Analysis of retained earnings:			
Retained earnings, beginning of year	876,072	852,598	598,174
Transferred to "Salaries and expenses, Mexican farm labor program":			
Authorized		−1,550,000	−1,336,700
Proposed for pay increases		−130,000	
Retained earnings, end of year	852,598	598,174	1,077,750

The statement includes an analysis of the retained earnings or the cumulative deficit. This analysis shows any additions to earnings, other than net income for the year, any charges made against retained earnings, and the balance of profits kept in the enterprise as of the end of the year (whether in the form of cash, inventories, other current assets, or fixed assets).

STATEMENT OF FINANCIAL CONDITION

For each revolving fund there is presented a balance sheet of assets, liabilities, and investment of the Government at the close of the year, as in this example:

Financial Condition

Assets:			
Cash with Treasury	$1,397,479	$1,778,498	$2,239,298
Accounts receivable	146	500	500
Land, structures, and equipment, net	216,260	240,036	258,812
Deferred charges	30,838	30,000	30,000
Total assets	1,644,723	2,049,034	2,528,610
Liabilities:			
Current	575,865	1,234,600	1,234,600
Government investment:			
Non-interest-bearing capital:			
Start of year		216,260	216,260
Capitalization of assets during year	216,260		
End of year	216,260	216,260	216,260
Retained earnings	852,598	598,174	1,077,750
Total Government investment	1,068,858	814,434	1,294,010

The balance sheet excludes any balances of appropriations or borrowing authorizations which have not yet been paid into the revolving fund. The section on investment of the Government is divided into three subsections as appropriate: (*a*) the interest-bearing capital, (*b*) the non-interest-bearing capital, and (*c*) the retained earnings.

Because the balance sheet is on an accrual basis, it does not reflect the obligations incurred which have not yet matured into liabilities, nor does it reflect unfilled customer orders received and available as a basis for obligation in the case of intragovernmental revolving funds. Therefore, there is appended to the balance sheet a schedule which shows the unobligated balances, relating them to the unexpended balances and showing the computation of the net obligated balance as in the following example:

Status of Certain Fund Balances

	1957 actual	1958 actual	1959 estimate	1960 estimate
Unexpended balance:				
Cash	$911,211	$1,397,479	$1,778,498	$2,239,298
Obligated balance, net:				
Current liabilities	514,955	575,865	1,234,600	1,234,600
Unpaid undelivered orders	25,000	146,821	125,000	125,000
Accounts receivable (−)	−541	−146	−500	−500
Total obligated balance	539,414	722,540	1,359,100	1,359,100
Unobligated balance	371,797	674,939	419,398	880,198

TABLE 6

SUMMARY OF BUDGET AUTHORIZATIONS, OBLIGATIONS, EXPENDITURES, AND BALANCES

Based on existing and proposed legislation

[In millions]

Description	1958 enacted	1959 estimate	1960 estimate
Current authorizations:			
Appropriations	$61,761	$67,860	$67,229
Appropriations to liquidate contract authorizations	(132)	(206)	(248)
Authorizations to expend from debt receipts	5,674	5,897	392
Contract authorizations	37	137	346
Reappropriations	171	96	48
Total current authorizations	67,642	73,990	68,014
Permanent authorizations:			
Appropriations	8,156	8,009	8,593
Authorizations to expend from debt receipts	50	157	150
Contract authorizations	496	267	49
Total permanent authorizations	8,702	8,432	8,793
Total new obligational authority	76,345	82,423	76,807
Unobligated balances brought forward, start of year	33,532	34,966	31,681
Appropriation available in prior year (−)	−353	−517	−523
Appropriation available from subsequent year	517	523	523
Unobligated balances carried forward, end of year (−)	−34,966	−31,681	−29,494
Balances no longer available for obligation (−)	−1,187	−813	−830
Obligations incurred, net	73,892	84,904	78,161
Obligated balances brought forward, start of year	35,344	37,084	41,075
Adjustment of obligations in expired accounts	−211	−36	−3
Obligated balances carried forward, end of year (−)	−37,084	−41,075	−42,207
Budget expenditures	71,936	80,871	77,030
Expenditures are distributed as follows:			
Out of new obligational authority	71,936	80,871	51,708
Out of balances of prior authorizations			25,322

LIBRARY OF CONGRESS

The Library of Congress, established in 1800, is not only the library of the Congress itself, but is also the principal general library of the Government of the United States. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the Oriental languages, etc., and manuscripts, maps, music, motion picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of the general and basic services connected therewith, including the Legislative Reference Service, certain specialized functions are performed; registration of copyrights, catalog card distribution, and the service of books in raised characters and talking books for the blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1958 and estimated for 1959 and 1960 are:

	1958 actual	*1959 estimate*	*1960 estimate*
General and basic services:			
Acquisition of library materials	$1,066,161	$1,198,520	$1,233,285
Organization of the collections	2,338,231	2,659,402	2,751,408
Reader and reference services	1,559,046	1,734,031	1,923,214
Maintenance and protective services	894,085	951,346	991,145
Executive direction and general administrative services	802,770	832,181	893,948
Total, general and basic services	6,660,293	7,375,480	7,793,000
Special service to the Congress: Legislative Reference Service	1,263,391	1,390,300	1,455,400
Specialized services:			
Copyright	1,326,505	1,397,256	1,478,500
Catalog card distribution service	1,713,003	1,878,635	1,935,800
Books for the blind	1,204,626	1,367,900	1,619,400
Total, specialized services	4,244,134	4,643,791	5,033,700
Total obligations	12,167,818	13,409,571	14,282,100

The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, working funds, and allocations.

Estimates for the physical equipment, maintenance, and operation of the Library buildings are carried under the request of the Architect of the Capitol.

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Library of Congress, not otherwise provided for, including development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; [$6,200,000] *$7,156,200. (2 U. S. C. 131–166; 5 U. S. C. 150; 17 U. S. C. 1–215; 20 U. S. C. 91; Legislative Branch Appropriation Act, 1959.)*

Appropriated 1959, **$6,200,000** Estimate 1960, **$7,156,200**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Acquisition of library materials	$619,400	$678,140	$703,285
2. Organization of the collections	2,338,231	2,552,602	2,644,608
3. Reader and reference services	1,559,046	1,734,031	1,923,214
4. Maintenance and protective services	894,085	951,346	991,145
5. Executive direction and general administrative services	802,770	832,181	893,948
Total obligations	6,213,532	6,748,300	7,156,200
Financing:

New obligational authority:			
Appropriation	$6,100,000	$6,200,000	$7,156,200
Proposed supplemental due to pay increases		548,300	

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The development of the Library's collections is planned; materials are procured by purchase, gift, exchange, copyright, deposit, transfer, and official deposit; and materials are selected for addition to the permanent collections. The objective for 1960 is to continue improvement in acquisitions procedures and in exchange relations with institutions in the more important areas of the world. The collections totaled 36,905,919 items as of June 30, 1958, and consisted of 11,411,475 books and pamphlets; 15,687,836 manuscript pieces and 9,806,608 maps, pieces of music, reels of microfilm, photographs, and other miscellaneous items. Of the items received, about 1 million are added to the permanent collections annually. Those received from various sources in 1958 and estimated for 1959 and 1960 are as follows:

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Purchase	444,668	500,000	525,000
Deposit by virtue of law:			
Copyright	374,608	375,000	380,000
Other	602,265	600,000	600,000
Transferred from Federal agencies	1,673,321	2,000,000	2,250,000
Official donation from State and local agencies	106,223	110,000	115,000
Exchange	457,930	500,000	500,000
Gift from individual and unofficial sources	852,632	1,000,000	1,000,000
Total	4,511,647	5,085,000	5,370,000

2. *Organization of the collections.*—Library materials are cataloged, classified, marked and arranged; Library of Congress catalogs and the main National Union Catalog (card catalog) are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1960 are the cataloging of a larger number of the materials received during the year, particularly those in Oriental languages; handling receipts of special materials and organizing them for use on a current basis; and improved cataloging methods and procedures to assure the usefulness of the collections.

Selected performance data for 1958 and estimated for 1959 and 1960 (not including processing activities performed by the Reference Department and the Law Library) are as follows:

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Volumes fully cataloged and added to the classified collection	133,070	155,000	165,000
Items otherwise organized for use (without full cataloging)	20,802	30,000	35,000
Cards filed in catalogs	1,538,105	1,600,000	1,600,000
Volumes bound	87,700	97,000	97,000
Items repaired, cleaned, mounted, etc	247,355	250,000	250,000
Cards received by the National Union Catalog	1,076,273	1,150,000	1,200,000
Serial parts processed	1,365,332	1,500,000	1,600,000

3. *Reader and reference services.*—Books and other library materials are provided inside and outside of the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objec-

Digitized for FRASER

Federal Reserve Bank of St. Louis

tives of this activity for 1960 are to maintain adequate service to readers in all divisions; to provide for a limited extension of the hours of service in the main reading room and the Slavic reading room; and to improve reference and bibliographic service in science and technology and on the Near East area. The workload in all major activities is expected to increase in 1959 and 1960 as follows:

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Reader and reference services:			
Materials served	1,761,515	1,800,000	1,820,000
Units issued on loan	207,141	215,000	225,000
Reference inquiries answered in person	300,913	315,000	325,000
Reference requests by telephone	193,651	200,000	210,000
Reference letters	78,623	85,000	90,000
Law Library reader and reference service:			
Books and pamphlets served	360,426	365,000	375,000
Reference inquiries answered	79,426	84,000	88,000

4. *Maintenance and protective services.*—A staff of 191, including 82 part-time charwomen, preserves, cleans, and maintains the two Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stock rooms. The guard force staff of 76 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

The Copyright Office is responsible for recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The Office is conducted as a business operation. The personal service cost is substantially counterbalanced by fees received for services rendered as indicated in the table which follows. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress is credited to the copyright operation. The income and costs for 1958 and estimates for 1959 and 1960 are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Income:			
Fees applied	$945,231	$968,861	$992,492
Estimated value of materials deposited	546,313	559,970	573,628
Total income	1,491,544	1,528,831	1,566,120
Costs:			
Salaries	1,183,189	1,236,285	1,297,143
Other costs	143,316	160,971	181,357
Total costs	1,326,505	1,397,256	1,478,500

The program and performance under each of the activities described are predicated on an estimated 250,881 copyright registrations during 1960, an estimated 244,908 during 1959, and an actual 239,935 during 1958.

1. *Receiving and accounting for applications, fees, and correspondence.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Registrations	238,935	244,908	250,881
Mail received and dispatched	556,958	570,882	584,806

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Cases and documents examined	302,763	310,332	317,901
Registrations and recordation of documents	246,518	252,681	258,844

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 238,935 registrations cataloged in 1958 and estimates for 1959 and 1960 are 244,908 and 250,881, respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and

rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Titles searched	72,808	74,628	76,448
Letters and search reports written	25,765	26,409	27,053

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects. About 20 studies and a comprehensive report compiled by the Copyright Office in its program relating to a general revision of the copyright law will be ready for printing in 1960.

The Legislative Reference Service prepares research reports, digests, etc., in answer to inquiries from Members and committees of Congress.

1. *Research and analysis.*—The Legislative Reorganization Act of 1946 lists 19 specific fields of congressional concern in which top-level research by senior specialists is authorized. These correspond in general to the spheres of committee activity. The following 14 fields are now covered by one or more senior specialists: International trade, international affairs, taxation and fiscal policy, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, national defense, social welfare, science, and transportation and communications. Also available to the Members and committees are the preparation of charts, translations, reading lists, information in report form or otherwise, and answers to spot reference inquiries. In 1958, a total of 68,243 congressional inquiries were answered. Since 1950, the average annual increase in the number of inquiries has been 6.5%. The total of inquiries for 1959 is estimated at 72,500; and for 1960, at 77,000.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covered all public bills and resolutions during the Eighty-fifth Congress, second session. It is expected that there will be as many or more bills to be covered during the Eighty-sixth Congress, second session. The preparation of name indexes for an increasing number of committee hearings is to be continued.

3. *Reference files, bibliographies and congressional reader service.*—Reference files containing clippings, pamphlets, and documents are maintained as the basis for reply to the majority of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the congressional reading room. During 1958, a total of 77,562 reference file items were processed, 13,434 bibliographic entries prepared, 76,716 published items acquired and processed, and 3,247 readers served.

The card division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 130,000,000 catalog cards representing some 3,200,000 titles, and fills orders from approximately 9,000 regular subscribers—mostly libraries—in the United States and abroad. In 1958, about 91% of this appropriation was recovered from the sale of cards and publications. Receipts of $1,558,000 were deposited in miscellaneous receipts of the Treasury. The objectives for 1960 are: (1) Meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy; (2) the continued expansion of the National Union Catalog; and (3) the printing of cards for books in Chinese and Japanese.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1958 was 4,308,694; estimated for 1959, 4,385,000; and for 1960, 4,460,000.

2. *Supplying cards for other libraries.*—The number of cards sold in 1958 was 28,351,083; estimated for 1959, 28,351,000; and for 1960, 29,500,000.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing, and distribution of the National Union Catalog.*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), and Music and Phonorecords (issued on a 6-month basis and annual cumulation). There were 989 paid subscriptions for all issues in calendar year 1958, and it is estimated that there will be 990 subscriptions for 1959 and 1,000 for 1960. Also included under this activity is the National Library of Medicine Catalog.

5. *Preparation, printing, and distribution of the Subject Catalog.*—This catalog is issued in three quarterly volumes with an annual cumulation. There were 401 paid subscriptions for calendar year 1958. It is estimated that there will be 401 paid subscriptions in 1959 and about 410 in 1960.

Unobligated balance carried forward	4,052		
Appropriation (new obligational authority)	320,000	320,000	350,000

This appropriation constitutes the only means of acquiring regular domestic trade publications (except for copyright deposits) and many foreign trade publications, both current and noncurrent, from approximately 100 countries or areas. The publications acquired by purchase constitute a most important part of the Library's acquisitions although they represent only a small portion of the material received annually. The objectives for 1960 are: (1) The continued acquisition at the present level of selected important foreign newspapers and periodicals; (2) the acquisition of important materials from critical areas; (3) the direct purchase of selected current titles on microfilm as an economy measure in lieu of binding; and (4) the microfilming of deteriorating materials as a necessary preservative measure.

Appropriation	$1,206,000	$1,355,000	$1,619,400
Proposed supplemental due to pay increases		12,900	

The division for the blind is responsible for administering a national program to provide reading material for the blind of the United States, Territories, and insular possessions. It has two closely related operations.

1. *Procurement and distribution.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 30 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 55 State agencies. The maintenance and procurement of these books are shown in the following table:

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Talking books purchased:			
(a) New titles	202	220	262
(b) Old titles re-recorded	15	23	32
Embossed books and magazines:			
(a) Press Braille, made to order, titles	172	170	204
(b) Purchased from catalog, readymade titles	60	------	------
Talking book machines:			
Purchased	8,385	11,200	11,100
Repaired	4,603	6,300	7,500
Salvaged—scrapped	4,400	4,500	6,000
Records replaced	1,910	3,700	3,700

Objectives for 1960 include the procurement of more titles of books, of more copies of the popular titles, of a sufficient number of machines to equip newly registered blind readers and to replace scrapped machines, purchase of a limited number of machines utilizing the transistor technique, and continuation of the quality inspection program on books and machines and of research in sound reproduction and Braille printing.

2. *Cataloging, reference, circulation, and training services.*—Catalogs of talking and Braille books are prepared and maintained, including a Union Catalog of Hand Copied Books in Braille which brings together a record of holdings of all libraries. The division also maintains a unique collection (about 25,000 volumes) of books in Braille not available elsewhere for loan in the United States. During the period 1946 to 1957 the number of readers throughout the country requiring catalogs from which to select reading matter has grown from 30,088 to 58,888 and circulation from 801,797 units (volumes or containers) to 1,554,935. The number of readers and circulation are expected to continue to increase in 1959 and 1960. Inquiries are received concerning library and related services available to the blind. Individuals

Public Law 85–147 (71 Stat. 368), approved August 16, 1957, authorizes an appropriation of $720,000, to remain available until expended, to arrange, index, and microfilm the papers of the Presidents of the United States in the collections of the Library of Congress. The purpose is to preserve their contents and to make them more readily available for research. The program was started in 1959 with an appropriation of $100,000. The objectives for the second year will be to provide negative and positive service copy on microfilm of material arranged and indexed, and to commence publishing an index by photo-offset in an edition of 1,000 copies. Completion of the entire program is contemplated in about 6 years.

Preservation of Early American Motion Pictures

For expenses necessary to enable the Librarian of Congress to provide for the conversion to safety base film of the George Kleine Collection of nitrate film, and the paper prints of early American motion pictures now in the custody of the Library, $60,000. (*2 U. S. C. 131; Supplemental Appropriation Act, 1959.*)

Converting paper prints and nitrate film to safety film (total obligations)		$60,000	$60,000
Financing:			
Appropriation (new obligational authority)		60,000	60,000

The Supplemental Appropriation Act, 1959, appropriated $60,000 to provide for the conversion to safety base film of the George Kleine collection of nitrate film and the paper prints of early American motion pictures now in the custody of the Library.

During 1959, nearly all of the paper prints and a substantial portion of the 1,250,000 feet of nitrate film in the George Kleine collection will be converted. The request for 1960 will continue the conversion of these two collections and may even allow for the conversion of a small segment of the 33,750,000 feet of other nitrate film which also contains important cultural records of the past.

LIBRARY OF CONGRESS—Continued

Current authorizations—Continued

ADMINISTRATIVE PROVISIONS—Continued

as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.

[Appropriations in this Act available to the Library of Congress shall be available, in an amount not to exceed $11,000, when specifically authorized by the Librarian, for expenses of attendance at meetings concerned with the function or activity for which the appropriation is made.] (*Legislative Branch Appropriation Act, 1959.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriation as follows:
"Research, development, test, and evaluation, Navy."
"Research, development, test, and evaluation, Air Force."
"Salaries and expenses," National Science Foundation.
"International educational exchange activities," Department of State.

The work programs of the Office of the Superintendent of Documents are of a service nature, and hence there is no control over the volume of work which is required by law.

1. *Sales distribution.*—Government publications are purchased from the Public Printer to be placed on sale. Acquisition costs are paid from sales receipts; hence no appropriation is required for printing sales copies. By law, the sale price is set at the cost of manufacture plus 50%. At the end of each year, excess receipts from sales not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For 1958, earnings from the sale of publications amounted to $3,142,099. It is estimated that earnings for 1959 will be $3,250,000 and $3,350,000 for 1960. These earnings more than cover the appropriation required to finance the sales program.

The sale of Government publications has been steadily increasing, and in the last 10 years the sales volume has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of sales.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon request of any Government agency. Mailing services for farmers' bulletins, soil surveys, and other publications which are allocated to Members of Congress on a quota basis are also provided.

3. *Depository library distribution.*—Upon request, 1 copy of every Government publication is supplied to more than 583 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of the United States Government Publications and the Numerical List and Schedule of Volumes.

5. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1957, $3,744; 1958, $8,532; 1959, $8,532; 1960, $8,532.

SUMMARY OF WORKLOAD

Intragovernmental funds:

GOVERNMENT PRINTING OFFICE REVOLVING FUND

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various departments and independent agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U. S. C.).

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (67 Stat. 330).

All work for Government agencies is done on a reimbursable basis and financed through the Government Printing Office revolving fund.

Receipts from sales of publications by the Superintendent of Documents are deposited to this fund and cost of publications paid therefrom. Profits accruing from these transactions are deposited in the Treasury of the United States and credited to miscellaneous receipts (44 U. S. C. 63).

Under proposed legislation, 1959.—Enabling legislation and an appropriation are anticipated for 1959 to provide for the acquisition of property and the construction of a fireproof annex building for use of the Government Printing Office.

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in H. Res. 219, 239, 378, 405, 486, 525, 550, 565, and 571 of the Eighty-fifth Congress shall be the permanent law with respect thereto.

SEC. 104. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

[SEC. 105. Effective July 1, 1958, the annual rates of basic compensation of the following members of the Capitol Police with more than four years service shall be: Lieutenants, $3,000; special officers, $3,000; sergeants, $2,700; and privates, $2,340. In computing length of service for the purposes of this paragraph, there shall be credited all service performed within any five-year period, whether or not continuous, as a member of the Capitol Police. A change in the rate of compensation based on the completion of four years service shall be effective on the first day of the first pay period which begins after such completion.] (*Legislative Branch Appropriation Act, 1959.*)

This item is not subject to the approval of the Judicial Conference.

The United States Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the United States Customs Court in all cases involving the construction of the law and facts respecting the classification of merchandise and the rate of duty imposed thereunder and all appealable questions as to the laws and regulations governing the collection of customs revenues. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The Court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only and in the matter of unfair practices in import trade, and appellate jurisdiction from decisions of the Patent Office in patent and trade-mark cases, except those involving equity.

This item is not subject to the approval of the Judicial Conference.

The United States Customs Court has exclusive jurisdiction over civil actions arising under the tariff laws, the internal revenue laws relating to imported merchandise, the several customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes or quotas on imported goods. The court also has appellate jurisdiction of cases litigating the value of imported merchandise. It tries cases without a jury, making findings of fact and applying the law.

The Court of Claims has jurisdiction of all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It also has general jurisdiction to hear and determine claims for damages other than tort actions, provided the claimants would have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts, and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from that Commission. It also has jurisdiction in special act cases referred to the court by either or both houses of Congress.

The court continues to carry a heavy load of cases and has been able to dispose of the cases which are ready to be heard as expeditiously as the Department of Justice can process them. At the beginning of the court year, October 5, 1957, there were 6,741 cases pending. As of October 4, 1958, there were 6,849 cases pending. During the above period 1,547 new cases were filed and 1,439 cases were disposed of.

"Administrative Office of the United States Courts"	−29,400		
"Salaries of supporting personnel"	−27,000		
Appropriation (adjusted)	9,018,600	9,358,500	9,358,500

The statutory salaries of all active United States circuit and district judges, the justices and judges of the Supreme Court and the circuit courts of Hawaii, and all justices and judges who have retired or resigned in pursuance of law are payable from this appropriation. This item also includes the payment of annuities to the seven surviving widows of Supreme Court justices, the Government's contribution to the judicial survivors annuity fund, and the Government's contribution to the civil service retirement fund to match the deductions from the salaries of those judges in the Territories and possessions appointed for a term of years and who do not elect to avail themselves of the provisions of 28 U. S. C. 373.

Salaries were paid to an average of 386 judges in 1958. The appropriation for 1959 will permit the payment of salaries to an average of 402 judges. On July 1, 1958, there were 386 judges on the rolls, but it is expected that the number of retirements and appointments to resulting vacancies will cause an increase early in the year in the number of judges to be paid. It is estimated that the number of judges on the rolls in 1960 will be the same as in 1959.

Appropriation (new obligational authority)	4,925,000	4,995,000	5,120,000

Grand and petit jurors who serve in the Federal courts are paid statutory fees and expenses, as are jury commissioners. United States commissioners are primarily committing magistrates and are paid fees for their services.

The amount of service and the compensation of jurors depends mainly on the number of jury trials requested by the parties to civil and criminal cases in the United States courts. The earnings of commissioners are directly related to the volume of cases presented by Federal law enforcement officials.

The call for juries is expected to continue to be heavy as the general activities of the courts remain at a high level. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES—Continued

Current authorizations—Continued

TRAVEL AND MISCELLANEOUS EXPENSES—Continued

Travel and subsistence expenses incurred by the judges, officials, and supporting personnel of the courts in attending sessions of court or transacting other official business are payable by the Government. Provision is also made for supplying, equipping, and maintaining their offices and libraries, and for the incidental expenses of operating the 11 courts of appeals and 94 district courts of the United States.

The prospective increase in the number of retired judges rendering judicial service, the proposed expansion of the probation system and clerks' offices to cope with rising caseloads, and the general increase in the cost of services and facilities for the courts require a larger appropriation in 1960 than for 1959 for the impersonal expenses of operating the courts. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

Proposed supplemental due to pay increases		76,900	

This office is responsible, under the supervision and direction of the Judicial Conference of the United States, for providing for the administration of the United States courts. The principal functions consist of providing administrative staff and services for the courts; examining the state of the dockets of the various courts and compiling and publishing statistical information concerning the business transacted by the courts; administering the probation and bankruptcy systems; and conducting the general business affairs of the courts.

The estimates for 1960 provide for the study of the rules of practice and procedure in Federal courts pursuant to Public Law 85–513; for the expansion of statistical studies and examination and survey of court dockets; for an improved program of personnel administration; and for closer coordination between the 94 probation units and the Administrative Office. New projects are being developed to cope with the serious congestion existing in a number of courts and to meet the increasing administrative and fiscal work in the judiciary. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

The district courts of the United States are constituted courts of bankruptcy and invested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. Their compensation and expenses are paid from special funds created by payments of fees and charges by parties to the proceedings. The present system is and has been self-sustaining, and no general tax dollars are involved in its operation.

A marked and steady rise in the number of new cases filed with the referees has occurred in recent years. Cases filed in 1958 totaled 91,668, or 17,907 more than in 1957. It is estimated on the basis of current trends that new cases filed in 1959 and 1960 will total 107,000 and 117,000, respectively. Provision for more referees and additional service by the present referees will be necessary to cope with the rising caseloads forecast for the current and ensuing years.

Proposed supplemental due to pay increases		212,600	

Office and other expenses of referees, including compensation of clerical employees, are payable upon authorization of the Director of the Administrative Office of the United States Courts. Workload data appear under the account for salaries of referees. These expenses are paid from special funds created by payments of fees and charges by parties to the proceedings. The system is self-sustaining, and no appropriation from the general fund of the Treasury is required.

In order to process the anticipated increase in volume of cases it is necessary to provide for expansion of the referees' staffs and their facilities in 1960. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

Program by activities:			
Fees, expenses, and costs (total obligations)		$180,000	
Financing:			
Proposed supplemental appropriation		180,000	

Under existing legislation, 1959.—An additional request is anticipated to cover increased costs for jurors and commissioners as follows: (1) $124,000 to meet a moderate rise in the use of juries and to cover the full year cost of increased fees payable under Public Law 85–299, effective September 7, 1957, and (2) $56,000 to meet the full year cost of increased fees and related costs of United States commissioners pursuant to Public Law 85–276, effective September 2, 1957.

TRAVEL AND MISCELLANEOUS EXPENSES

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Miscellaneous expenses (total obligations)		$201,000	
Financing:			
Proposed supplemental appropriation		201,000	

Under existing legislation, 1959.—A supplemental request for $201,000 is anticipated to (1) supply the courts with adequate communication services, (2) provide funds for printing records in cases appealed to the Supreme Court by poor persons who are unable to bear such costs, (3) print opinions of courts of appeals, (4) pay court reporters for transcripts at higher rates authorized by the Judicial Conference, (5) fill requests for items of equipment which have been deferred in order to reserve funds to meet fixed costs, and (6) cover postal rate increases.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Salaries and expenses (total obligations)		$75,300	
Financing:			
Proposed supplemental appropriation		75,300	

Under existing legislation, 1959.—A supplemental appropriation is anticipated to (1) provide staff and facilities for the last 4 months of 1959 to implement the act of July 11, 1958, "To empower the Judicial Conference to study and recommend changes in and additions to the rules of practice and procedure in the Federal courts," (2) cover pay increases of wage board employees, (3) pay the Treasury Department for an actuarial study of the judicial survivors annuity system, and (4) cover postal rate increases.

EXPENSES OF REFEREES

(Indefinite special fund)

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Clerk hire and miscellaneous expenses of referees (total obligations)		$139,135	
Financing:			
Proposed supplemental appropriation		139,135	

Under existing legislation, 1959.—A supplemental appropriation is anticipated in order to (1) employ 60 additional clerks during the last 3 months of the year and provide increases in other items of expense to cope with a growing volume of new cases and (2) cover postal rate increases.

GENERAL PROVISIONS—THE JUDICIARY

SEC. 302. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

SEC. 303. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than $6.50 per volume. (*Judiciary Appropriation Act, 1959.*)

EXECUTIVE OFFICE OF THE PRESIDENT

The new obligational authority recommended for 1960 for compensation of the President and for staff assistance in the White House offices and in the several agencies of the Executive Office is approximately the same as the 1959 amount, with the significant exception of the newly created Office of Civil and Defense Mobilization.

About 89% of the new obligational authority recommended for 1960 for the Executive Office is for the Office of Civil and Defense Mobilization. About 5% is for the Bureau of the Budget, which is the staff arm of the President responsible for working on governmentwide problems such as organization, accounting, statistics, and legislative reference, as well as for preparation and review of the budget. The White House staff and various special projects account for 4%.

The Office of Civil and Defense Mobilization was established by Reorganization Plan No. 1 of 1958 through the merger of the Office of Defense Mobilization and the Federal Civil Defense Administration. It coordinates all mobilization and civil defense functions of the executive branch and carries out nonmilitary defense programs in cooperation with the States and localities.

New obligational authority of $87 million is recommended for this new agency for 1960, an increase of $39 million over the comparable amount for 1959. The increase results mainly from the first full year cost of legislation enacted by the last Congress which made civil defense a joint responsibility of the Federal Government and the States, and authorized new Federal programs for (1) sharing in the cost of State and local civil defense personnel and administration and (2) providing radiological monitoring devices to States and cities for training and operational use. Part of the increase in 1960 is also due to the recently announced national policy to stimulate necessary preparation for fallout shelter protection through research, education, and demonstration.

The 1960 recommended new obligational authority includes $12 million for later transmission to finance, on a consolidated basis, the civil and defense mobilization functions of other Federal agencies under clarified and expanded assignments of responsibility.

COMPENSATION OF THE PRESIDENT

Current authorizations:

COMPENSATION OF THE PRESIDENT

For compensation of the President, including an expense allowance at the rate of $50,000 per annum as authorized by the Act of January 19, 1949 (3 U. S. C. 102), $150,000. (*General Government Matters Appropriation Act, 1959.*)

Appropriated 1959, **$150,000** Estimate 1960, **$150,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Compensation of the President (total obligations)	$150,000	$150,000	$150,000
Financing:			
Appropriation (new obligational authority)	150,000	150,000	150,000

Object Classification

01 Personal services	$150,000	$150,000	$150,000

THE WHITE HOUSE OFFICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for The White House Office, including not to exceed $215,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at such per diem rates for individuals as the President may specify, and other personal services without regard to the provisions of law regulating the employment and compensation of persons in the Government service; [expenses of attendance at meetings;] newspapers, periodicals, teletype news service, and travel; and official entertainment expenses of the President, to be accounted for solely on his certificate; [$2,051,970] *$2,221,000.* (*General Government Matters Appropriation Act, 1959.*)

Appropriated 1959, **$2,051,970** Estimate 1960, **$2,221,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Administration (total obligations)	$2,051,970	$2,152,000	$2,221,000

SPECIAL PROJECTS

Current authorizations:

SPECIAL PROJECTS

For expenses necessary to provide staff assistance for the President in connection with special projects, to be expended in his discretion and without regard to such provisions of law regarding the expenditure of Government funds or the compensation and employment of persons in the Government service as he may specify, $1,500,000: *Provided,* That not to exceed 10 per centum of this appropriation may be used to reimburse the appropriation for "Salaries and expenses, The White House Office", for administrative services. (*General Government Matters Appropriation Act, 1959.*)

Appropriated 1959, **$1,500,000** Estimate 1960, **$1,500,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of accounting.*—Direction is given to programs for improving accounting and financial management in the executive agencies, in collaboration with the General Accounting Office and the Treasury Department.

2. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation and enrolled bills are reviewed for the President.

4. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

5. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (*a*) commerce and finance, (*b*) international, (*c*) labor and welfare, (*d*) military, and (*e*) resources and civil works.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order but not yet received)	$33,591	$32,666	$32,700	$32,700
Advances (payments for goods and services on order not yet received)	4,617	5,797	5,800	5,800
Total selected resources at end of year	38,208	38,463	38,500	38,500
Selected resources at start of year (−)		−38,208	−38,463	−38,500
Adjustment of selected resources reported at start of year		−81		
Obligations incurred for costs of other years, net		174	37

1. *Policy coordination.*—The National Security Council advises the President regarding national security policies. Also, the Central Intelligence Agency is under the direction of the Council. Members of the Council are the President, the Vice President, the Secretary of State, the Secretary of Defense, the Director of the Office of Civil and Defense Mobilization, and, as directed by the President, other high officials. This appropriation provides staff services for the Council's policy coordination activities.

2. *Operations coordination.*—The Operations Coordinating Board was placed within the structure of the Council by Executive Order 10700. The Board advises with the responsible executive agencies to assist in coordinating implementation of national security policies assigned by the President to the Operations Coordinating Board for coordination. The Board is composed of the Under Secretary of State, the Deputy Secretary of Defense, the Director of Central Intelligence, the Director of the United States Information Agency, the Director of the International Cooperation Administration and one or more representatives of the President, and as necessary, officials of other agencies. This appropriation provides staff services for the Board.

3. *Relation of costs to obligations.*—The year-end balance of unpaid undelivered orders for 1958 was $72.

OFFICE OF CIVIL AND DEFENSE MOBILIZATION

This Office was created by Reorganization Plan No. 1 of 1958 through the merger of the Federal Civil Defense Administration and the Office of Defense Mobilization. It coordinates all civil defense and mobilization activities of the Federal Government and provides guidance and assistance to the States and their political subdivisions in the planning of civil defense measures as an integral part of the national plan for civil defense and defense mobilization. Operational capability for attack warning and emergency communications is provided, stockpiles of medical and engineering equipment are maintained for emergency use, financial contributions are made to States and political subdivisions for civil defense personnel and administrative costs and the provision of facilities and equipment, and radiological defense equipment is furnished to the States and localities for training and operational use. Policies are developed for the administration of the Defense Production Act and the strategic and critical materials stockpile.

In 1960 major emphasis will be devoted to programs for strengthening the capability of all governments to act effectively in emergencies, for developing an effective radiological defense, and for increasing the availability of appropriate fallout shelter.

The sole appropriation to the former Office of Defense Mobilization entitled Salaries and expenses has been merged with the former Federal Civil Defense Administration appropriation for Operations. The remaining proposed appropriations are comparable to those made to the former Federal Civil Defense Administration.

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the Office of Civil and Defense Mobilization, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); reimbursement of the General Services Administration for security guard services; expenses of attendance of cooperating officials and individuals at meetings concerned with civil defense functions; not to exceed $8,500 for the purchase of newspapers, periodicals and teletype news services; and not to exceed $6,000 for emergency and extraordinary expenses to be expended under the direction of the Director for such purposes as he deems proper, and his determination thereon shall be final and conclusive: $28,800,000, of which $185,000 shall be available for the Interdepartmental Radio Advisory Committee: Provided, That contracts for not to exceed eight persons under this appropriation for temporary or intermittent services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), may be renewed annually.

[For expenses necessary for the Office of Defense Mobilization, including newspapers and periodicals (not exceeding $500); hire of passenger motor vehicles; reimbursement of the General Services Administration for security guard service; and expenses of attendance at meetings concerned with the purposes of this appropriation; $2,285,000, of which $185,000 shall be available for the Interdepartmental Radio Advisory Committee: *Provided*, That contracts for not to exceed eight persons under this appropriation for temporary or intermittent services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), may be renewed annually.]

[For an additional amount for necessary expenses of the Office of Civil and Defense Mobilization, $2,500,000: *Provided*, That this appropriation shall be available for the purposes set forth under the appropriations granted for the fiscal year 1959, under the headings "Salaries and expenses", Office of Defense Mobilization, and "Operations", Federal Civil Defense Administration.] (*General Government Matters Appropriation Act, 1959; Supplemental Appropriation Act, 1959.*)

[OPERATIONS]

[For necessary expenses, not otherwise provided for, in carrying out the provisions of the Federal Civil Defense Act of 1950, as amended (50 U. S. C. App. 2251–2297), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); reimbursement of the Civil Service Commission for full field investigations of employees occupying positions of critical importance from the standpoint of national security; expenses of attendance at meetings concerned with civil defense functions; reimbursement of the General Services Administration for security guard services; not to exceed $8,000 for the purchase of newspapers, periodicals, and teletype news services; not to exceed $932,500 for expenses of travel; and not to exceed $6,000 for emergency and extraordinary expenses to be expended under the direction of the Administrator for such purposes as he deems proper, and his determination thereon shall be final and conclusive; $18,500,000: *Provided*, That $500,000 of the foregoing amount shall be available to discharge civil defense responsibilities delegated to other Federal agencies under the authority of section 201 (b) of the Federal Civil Defense Act of 1950, as amended.] (*Independent Offices Appropriation Act, 1959.*)

Appropriated 1959, **$23,285,000** Estimate 1960, **$28,800,000**

1. *Executive direction and policy planning.*—In addition to the top level direction of all emergency programs, this activity includes the development, coordination, and evaluation of civil and defense mobilization policies and programs and the development of overall planning assumptions, based on United States and enemy capabili-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ties and weapons effects data, for various types of emergency situations.

2. *Research and development.*—Programs designed to meet current and projected research needs are coordinated and administered. In addition, damage assessment systems required for emergency operations and control of critical resources are provided. During 1960 special emphasis will be placed upon fallout shelter research involving design and development of prototype shelters and studies of shelter availability. The administration of the research program is under this appropriation; actual research projects are financed under the Research and development appropriation.

3. *Emergency planning.*—This activity provides for the development of Federal mobilization plans and coordination of Federal, State, and local emergency operations plans. This includes supervision of Federal grant-in-aid programs for civil defense purposes; the overall coordination of civil defense and mobilization functions assigned to other Federal agencies; measures to minimize the effects of enemy attack by chemical, biological, or radiological means upon the people and national resources; and the development of shelter and other programs to reduce the vulnerability of the Nation to weapons of mass destruction. Tests are conducted to determine the adequacy of various types of emergency plans.

4. *Warning and communications.*—A nationwide attack warning system extending from the North American air defense regional headquarters to regional, State, and local control points is provided. The budget provides for maintenance of this system, with extension of attack warning to some additional 100 key target areas. The national communications system for post-attack emergency communications will be revised to provide full-time and alternate routings capable of surviving attack. A 3-year program for installation of radio facilities in State-control sites will be continued.

5. *Training, education, and public affairs.*—The office provides training methods and materials to State and local organizations and conducts training courses at the staff college and training centers. During 1960, program emphasis will be devoted to informing people on the hazards of radiological fallout and the steps that they can take to overcome it. The 1960 request provides for an expanded program of adult education to teach the principles of individual, family, and community protection, utilizing the existing adult education network in the States. About 16,000 people have completed one or more basic civil defense courses. An additional 9,000 persons will be trained in 1960.

6. *Resources and production planning.*—This office develops operating plans to stabilize the economy and manage the national resources under various emergency conditions. Plans are also developed for the restoration and rehabilitation of essential physical facilities after attack. During 1960, work will continue in exploring survival requirements, post-attack, and various methods which can be used to fill these requirements.

7. *Field operations.*—Civil and defense mobilization programs are made available to States and localities through the eight regional offices and training courses in civil defense are conducted at training centers.

8. *Management services and stockpile operations.*—In addition to centralized administrative services, this activity also finances the management of the civil defense stockpile. The stockpile is located in warehouses operated by other Federal agencies.

9. *Functions performed by other Federal agencies.*—A supplemental appropriation of $12 million is anticipated for 1960 under Proposed for later transmission for carrying out civil defense and mobilization functions assigned to other Federal agencies.

Unobligated balance carried forward	14,270,097		
Unobligated balance no longer available	1,121		
Appropriation	17,000,000		25,000,000

Financial contributions are made to States and localities for selected types of civil defense equipment and for personnel and administrative costs. Through 1958 this program was limited to equipment contributions only. All States have participated in the equipment program and a total of $82 million has been contributed by the Federal Government, of which about 50% has been used for warning and communications systems and 19% for medical supplies and equipment. Recently enacted legislation authorized financial contributions for personnel and administrative expenses of States and localities. This new program area is expected to account for about half of the total Federal contributions in 1960 and will require a supplemental appropriation for the last quarter of 1959 which is anticipated under Proposed for later transmission.

Transferred to "Salaries and expenses," (72 Stat. 243)	−119,779		
Appropriation (adjusted)	3,180,221	20,000,000	13,900,000

1. *Radiological defense equipment.*—Equipment is procured and granted to the States and localities for training and operational purposes. The objective of this program is to provide a national radiological monitoring system through equipping 1.5 million trained personnel with monitoring devices. Instruments procured through 1960 will provide for expanding the Federal agency portion of the monitoring network, will provide training instruments for use in 15,000 high schools, will provide the instruments for training State and local personnel, and will equip 73,000 monitors in States and cities.

2. *Stockpile management.*—Materials and equipment not normally available or not present in the quantities to cope with conditions caused by enemy attack are stockpiled in strategic locations. These supplies and equipment are stored under the following criteria: (1) Minor storage locations of approximately 10,000 to 20,000 square feet, generally located fairly close to target areas on a calculated risk basis, and principally for the storage of functional assemblies; (2) major storage locations of approximately 50,000 to 100,000 square feet, generally located for direct support of specific target areas, used for storage of bulk backup medical supplies as well as functional assemblies including emergency hospitals; and (3) general reserve storage locations of from 100,000 to 500,000 square feet located a greater distance from target areas, preferably in more isolated sections, used for storage of bulk backup reserve supplies in order to give reserve support to regional groupings of target areas. Government-owned and controlled installations are used wherever possible.

Through 1958 approximately $213 million of supplies and equipment had been stockpiled in 41 warehouses. Activities under this program for 1960 will be directed toward normal warehousing functions in connection with existing stocks.

1. *Survival planning.*—The refinement of present operational survival plans to conform with the national plan for civil defense and defense mobilization will be completed during 1959. The States, including the principal metropolitan areas will then have benefit of studies designed for maximum survival of people and resources in the event of an enemy attack.

2. *Research.*—This activity provides for the development and application of scientific knowledge to the strategic requirements of the nonmilitary defense of the Nation through research contracts with Federal agencies, universities, industry, and private institutions.

(*a*) *Shelter, engineering, and testing.*—Research projects directed toward the implementation of the national shelter policy including shelter designs, prototypes, and habitability studies are covered.

(*b*) *Radiological defense.*—This includes research for the development of a national radiological system designed to decrease the severity of radiation casualties and reduce the harmful effects of radiological contamination.

(*c*) *Operations.*—The objective of this program is to produce quantitative measurements of the effectiveness of the nonmilitary defense system. This includes participation in the national damage assessment system.

(*f*) *Economic, social, and other.*—This includes stockpiling studies and research in mobilization and economic recovery.

This fund finances the procurement of civil defense materials toward which contributions to the States are authorized on a matching fund basis. The fund is reimbursed for purchases from the Federal contributions appropriation and from funds provided by the States (65 Stat. 61).

The initial principal of the fund consisted of $5,000,000 appropriated in 1951. In 1958, $3,500,000 of this principal was repaid to Treasury.

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 201. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at $1,500 except station wagons for which the maximum shall be $1,950.

SEC. 202. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 203. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

SEC. 204. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 205. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of $4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of $4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. 206. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 207. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building, without specific authority in law therefor, primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 208. During the current fiscal year, the provisions of Bureau of the Budget Circular A–45, dated June 3, 1952, shall be controlling over the activities of all departments, agencies, and corporations of the Government: *Provided*, That said circular may be amended or changed during such year by the Director of the Budget with the approval of the chairman of the Committee on Appropriations of the

GENERAL PROVISIONS—Continued

DEPARTMENTS, AGENCIES, AND CORPORATIONS—Continued

House of Representatives: *Provided further,* That the Bureau of the Budget shall make a report to Congress not later than January 31, 1959, of the operations of this order upon all departments, agencies, and corporations of the Government: *Provided further,* That, notwithstanding the provisions of any other law, no officer or employee shall be required to occupy any Government-owned quarters unless the head of the agency concerned shall determine that necessary service cannot be rendered or property of the United States cannot be adequately protected otherwise.]

SEC. [209] *208.* Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits) [and for liquidation of obligations legally incurred against such credits prior to July 1, 1953], only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided,* That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury: *Provided further,* That nothing in section 1415 of the Act of July 15, 1952, or in this section shall be construed to prevent the making of new or the carrying out of existing contracts, agreements, or executive agreements for periods in excess of one year, in any case where such contracts, agreements, or executive agreements for periods in excess of one year were permitted prior to the enactment of this Act under section 32 (b) (2) of the Surplus Property Act of 1944, as amended (50 U. S. C. App. 1641 (b) (2)), and the performance of all such contracts, agreements, or executive agreements shall be subject to the availability of appropriations for the purchase of credits as provided by law.

SEC. [210] *209.* No part of any appropriation contained in this Act, or of the funds available for expenditure by any individual, corporation, or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress. (*General Government Matters Appropriation Act, 1959.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1960

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
BUREAU OF THE BUDGET								
Salaries and expenses							$1,800	For transportation of officials and staff of the Bureau of the Budget in the Washington area.
COUNCIL OF ECONOMIC ADVISERS

FUNDS APPROPRIATED TO THE PRESIDENT

The 1960 budget includes $3,949 million for several programs of the Government for which new obligational authority is granted directly to the President, who may designate officials or agencies to act for him in carrying out the activities involved. The amount for these various activities is $95 million more than in 1959, primarily because the increase recommended for the mutual security program is larger than the decrease recommended for expansion of defense production.

Military assistance.—Expenditures for military assistance to friendly nations abroad will decrease in 1960. Missiles will comprise a greater part of total deliveries than previously. Credit sales are expected to increase further.

Economic and technical development.—For economic assistance, new obligational authority recommended for 1960 is $254 million more than total availability in 1959. A large part of this increase, $85 million, is for defense support, mainly for Far Eastern and Middle Eastern countries.

New obligational authority of $700 million is recommended for 1960 for the development loan fund compared with $625 million for 1959 (including a requested $225 million supplemental appropriation). The increases in 1959 and 1960 are to provide the fund with sufficient working capital to meet an anticipated sharp rise in loan commitments.

This budget also provides increases for technical cooperation (mainly for bilateral programs), for participation in worldwide malaria eradication, and for contingencies. Provision is also made for a number of other special activities, such as the United States contributions to the Intergovernmental Committee for European Migration.

Foreign information and exchange.—New obligational authority of $7.1 million is recommended for the President's special international program for 1960, compared with $6.4 million for 1959. The program for 1960 includes (1) participation in 14 trade fairs and exhibitions in 1960 and advance planning for 8 exhibits occurring in early 1961; and (2) about 35 cultural presentation projects, such as overseas tours of orchestras and theatrical, musical, dance and sport groups. The United States presently plans to open a special exhibition in Moscow on July 4, 1959, to demonstrate American cultural, scientific, and technological achievements to the Russian people. The Soviet Government also plans a similar exhibition in New York in June 1959. These exhibitions represent another step in carrying out the recent cultural interchange agreement with Soviet Russia. Our exhibition will be largely financed from the mutual security appropriations enacted for 1959.

Expansion of defense production.—This program is authorized by the Defense Production Act to encourage the expansion of productive capacity for materials needed for defense—mainly by means of loans, purchase contracts, and commitments to purchase output not sold by the producer in the open market. Financing is provided by borrowing from the Treasury Department up to a limit of $2.1 billion.

Present market conditions are causing substantial deliveries of materials under contracts made in prior years and do not permit significant resale to industry. In addition, no sales to the strategic stockpile are planned in 1960. As a result, the $2.1 billion borrowing authority is expected to be exhausted in the first half of 1960. Legislation is being proposed to authorize cancellation of notes payable to the Treasury Department in an amount equal to realized losses. This will provide an estimated $325 million of new obligational authority in 1959 to finance outstanding commitments.

No new commitments are anticipated in 1959 or 1960. Expenditures are expected to decline from $441 million in 1958 to $288 million in 1959 and to $215 million in 1960, as contracts expire. Aluminum, copper, cobalt, and nickel represent the major materials expected to be delivered under outstanding contracts.

Disaster relief.—No new obligational authority is included for 1960 for assistance to State and local governments in the relief of damage and suffering from natural disasters. Unused prior year appropriations of $24.9 million carried into the current year should be adequate to meet needs in both 1959 and 1960.

DISASTER RELIEF

Current authorizations:

DISASTER RELIEF

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Administration	$391,722	$360,000	$363,889
2. Aid to disaster areas	12,879,897	12,000,000	12,128,400
Total obligations	13,271,619	12,360,000	12,492,289
Financing:			
Unobligated balance brought forward	−13,123,908	−24,852,289	−12,492,289
Unobligated balance carried forward	24,852,289	12,492,289	
Appropriation (new obligational authority)	25,000,000		

This program provides for a coordinated effort by the Federal Government to assist States and their political subdivisions affected by major disaster when they are unable to cope with the situation physically or financially.

Responsibility for administration of this program is delegated to the Office of Civil and Defense Mobilization. Disaster relief operations of the entire Federal Government are coordinated and funds are made available to affected areas and to reimburse Federal agencies for disaster operations.

State and local civil defense organizations are active in disaster operations and receive valuable operational training as a result. Unused prior year appropriations of $24.9 million carried into the current year should be adequate to meet needs in both 1959 and 1960.

Major disasters proclaimed by the President and allocation of funds made to States in 1958 are:

State	*Type*	*Date declared*	*Allocation*
Texas	Flood	July 11, 1957	$500,000
Louisiana	do	do	650,000
Arkansas	Tornado	July 19, 1957	400,000

[1] Excludes property transferred in without charge of $107,383 in 1958.

Under section 304 (b) of the Defense Production Act of 1950, as amended, designated agencies are authorized with Presidential approval to incur obligations and make expenditures for the purpose of securing expanded production of critical materials in furtherance of the defense effort. The program is conducted through a revolving fund, with financing by borrowings from the Treasury. The act provides that the amount borrowed shall not exceed an aggregate of $2.1 billion outstanding at any one time, but permits contingent liabilities to be considered as obligations only to the extent of the probable ultimate net costs to the United States, rather than in the full amount of the gross commitments outstanding. To the extent that money must be expended to fulfill commitments, even though the expenditures are considered to be ultimately recoverable (through repayments of loans and sale of inventories, for example), portions of the borrowing authority are required to be used for working capital on a current basis.

EXPANSION OF DEFENSE PRODUCTION—Con.

Public enterprise funds—Continued

REVOLVING FUND, DEFENSE PRODUCTION ACT—Continued

Programs must be certified as essential to the national defense by the Office of Civil and Defense Mobilization. As of June 30, 1958, that Office has certified programs having a gross value of $8,355 million. Borrowings certified, which are expected to cover expenses only through 1959, are as follows:

BORROWINGS CERTIFIED AS OF JUNE 30, 1958

[In thousands]

	Total	*Working capital*	*Probable ultimate net cost*
General Services Administration	$1,754,510	$746,413	$1,008,097
Treasury Department	202,354	200,754	1,600
Department of Agriculture	66,366	.....	66,366
Department of the Interior	37,011	.....	37,011
Export-Import Bank of Washington	32,375	32,375	.....
Total certified	2,092,616	979,542	1,113,074
Unused balance	7,384	.....	.....
Total authority	2,100,000	.....	.....

As one of the inducements for expanding production most of the contracts provided a guaranteed market for the production from the expanded facilities. As the result of changes in military requirements and the slow-down in the civilian economy in 1958 much of this production could not be marketed for industrial use in that period. Therefore, significant amounts of materials are being delivered to the Defense Production Act inventory under options granted the contractor. Inventory working capital requirements reached high levels and by December 31, 1958, the cost of the Defense Production Act inventory was over $1.2 billion.

Until recently it was assumed that a substantial portion of these materials could be transferred to the national stockpile to fill stockpiling needs. However, objectives have been reduced sharply as a result of a change in planning and programing concepts from a 5-year basis to a 3-year basis. Transfers to the strategic stockpile have been virtually suspended for an indefinite period. In addition, Defense Production Act materials are not disposed of where such sales would disrupt the domestic market. There is little foreseeable disposition for the substantial inventories being accumulated. Therefore, there is a need for substantial additional funds to fulfill outstanding commitments and acquire the additional inventories concerned. Present forecasts indicate that the fund will be completely exhausted as far as cash and borrowing authority are concerned early in 1960, thus necessitating remedial legislation.

Interest continues to accrue, payable by the fund to the Treasury, not only on the borrowings invested in loans and inventories, but also on the borrowings which have been used to cover losses. Since there is no way for the fund to recover its realized losses, the perpetuation of the interest-bearing arrangement on such expended capital merely serves to make the cumulative deficit even greater as the interest accrues each year. Legislative authority is being requested to write off the fund's notes to Treasury in a sum equal to the actual losses incurred under this program by the participating agencies through December 31, 1958, which will restore an equivalent amount of borrowing authority, estimated at $325 million. This action will cover estimated cash requirements until sometime in 1961.

General Services Administration.—Borrowing authority of $1,754,510,000 has been certified as of June 30, 1958, to finance the expansion of productive capacity for strategic metals, minerals and machine tools. This amount includes $1,008,097,000 for probable ultimate net cost of specific programs of which $766,406,000 is for metals and minerals programs, $64,900,000 for machine tool and marine turbine and gear capacity programs, and $176,791,000 for Treasury interest, custodial, and administrative expenses. It also includes $746,413,000 of working capital required for carrying inventories for which no sale is now foreseen.

The bulk of the Defense Production Act expansion programs have been contracted for and physical expansion completed. The plants are in production and the contracts are now in the administration phase with the major problems being receipt, custody, and eventual disposition of the materials. Future deliveries of materials under the contracts are expected to be substantial but will depend upon economic and business conditions. The exercise of option rights by contractors has been carefully examined with a view to reducing deliveries to the Government as far as possible within the terms of the contracts whenever basic stockpiling objectives have been attained. A reduction of $278,646,000 in gross commitments has been attained through renegotiation of contracts since July 1, 1957.

A summary of transactions involving strategic minerals and metals (including work-in-process inventory) under this fund follows:

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Inventory—July 1	$679.7	$1,144.6	$1,393.9
Deliveries during year	495.1	271.9	173.4
Total available for sale	1,174.8	1,416.5	1,567.3
Sales during year:			
To national stockpile	9.2	2.7	.....
To industry	23.8	17.9	.....
Total sales	33.0	20.6	.....
Losses (−) on sales or profits	−2.8	2.0	.....
Inventory—June 30	1,144.6	1,393.9	1,567.3
Total dispositions and June 30 inventory	1,174.8	1,416.5	1,567.3

Major Defense Production Act programs administered by General Services Administration are as follows:

1. Basic expansion programs to increase mining or refining capacity of such materials as aluminum, copper, nickel, and fluorspar by offering guaranteed markets under specific contracts and for specific projects.

2. Domestic purchase programs designed to increase domestic production by fixed incentive prices available to all domestic producers of materials such as beryl and mica.

3. Research and pilot plant programs to develop new processes for economic recovery of low-grade domestic ores and for developing new processes for producing new materials, such as titanium and synthetic mica.

4. A program for the production of nickel from the Government-owned Nicaro nickel plant.

5. A program of sales, leases and machine tools storage and standby machine tool production contracts.

As of June 30, 1958, a total of $7,550.1 million in gross value of contracts has been entered into by General Services Administration under Defense Production Act authority. Of this amount a total of $5,968.2 million has been completed as measured by procurement, guaranteed production, completion of facilities, completed research, etc. The balance of $1,581.9 million includes a total of $1,367.8 of commodity contracts some of which will not mature until 1964.

Cumulative losses from resale of commodities, Treasury interest and operating expenses through June 30, 1958, amount to $221.1 million.

Federal Reserve Bank of St. Louis

Department of Agriculture.—The purchase, management, and resale of agricultural commodities, except forest products, are carried out by the Commodity Credit Corporation, which is reimbursed from this fund for the net costs involved. The Secretary of Agriculture has been allocated borrowing authority for this purpose.

During 1958, the Corporation continued the management of inventories of castor beans and American-Egyptian cotton acquired under programs initiated in prior years. The castor oil and nearly all of the American-Egyptian cotton inventories had been disposed of by June 30, 1958. The remainder of the cotton will be sold during 1959. However, it is contemplated that a small amount of castor beans will remain in the inventory of the Commodity Credit Corporation beyond June 30, 1960.

Net realized losses on purchase and resale operations amounted to $300,716 during 1958 and is estimated at $68,140 and $152,812 during 1959 and 1960, respectively. Net budgetary expenditures of $4,941,074 for 1960 include payment of cumulative interest. Further interest expense of a little more than $1.5 million a year will be eliminated with the proposed cancellation of Treasury notes covering realized losses.

In addition to purchase and resale operations, the Secretary of Agriculture may recommend to the Office of Civil and Defense Mobilization the certification of certain loans for increasing plant capacity to process or store agricultural commodities. No loans were certified during 1958 and none are expected to be certified during 1959 and 1960.

Export-Import Bank of Washington.—Pursuant to section 311 of Executive Order No. 10480 of August 15, 1953, which superseded Order No. 10161, the Export-Import Bank, with funds provided under section 304 of the Defense Production Act of 1950, as amended, is responsible for making and administering all loans under section 302 of the act, upon receipt of certificates of essentiality issued by the Director of Defense Mobilization or the General Services Administrator, where the expansion, development or production so financed is carried on in foreign countries.

No certifications were received and no new loans were authorized by the bank during 1958. It is contemplated that there will be no additional certifications to the Export-Import Bank in connection with these operations. No additional obligational authority will be required. It is estimated that net budget receipts for 1960 will be $5,121,900.

During 1958, borrowing authority allocated to Export-Import Bank under the Defense Production Act of 1950, was reduced from $50 to $35 million. As of June 30, 1958, the outstanding balance of notes due the Treasury was $29,569,026.

Treasury Department.—The function of making and administering loans to private business enterprises under the authority of section 302 of the Defense Production Act of 1950, as amended, was assigned to the Secretary of the Treasury by Executive Order 10489, dated September 26, 1953. Applications for loans are considered only upon certification of essentiality by Office of Civil and Defense Mobilization. Net loan certifications were $198,699,085 on June 30, 1958, against which actual borrowings from the Treasury amounted to $166,510,000.

There were no new loan commitments authorized under this authority during 1958 and none are anticipated for 1960. However, a certificate of essentiality has been issued in 1959 for one of the present borrowers in the gross amount of $2,000,000 with the Government share being $1,800,000 of which $1,035,000 is being used to refund the existing loan. This loan is being made in participation with a bank and the disbursement of Treasury funds is deferred.

Loans outstanding on June 30, 1958, totaled $181,700,577, and $16,998,508 in commitments to participate in loans made by banks wherein disbursement of Treasury funds is deferred. By the close of 1960 it is estimated that the loans will be reduced to $165,880,000 and the deferred participation commitments to $14,840,000.

Loans and commitments outstanding are disposed of to private financial institutions and investors whenever possible.

Department of the Interior.—Operations within the Department of the Interior with regard to the expansion of defense production have been limited to the encouragement of exploration for strategic and critical minerals and metals. As of June 30, 1958, the Office of Civil and Defense Mobilization had certified to the Defense Minerals Exploration Administration borrowing authority in the amount of $37,011,000. From the beginning of the program through June 30, 1958, Defense Minerals Exploration Administration had entered into 1,159 contracts in which the Government's share of estimated costs amounted to $34,821,069, as against total estimated costs of $56,798,111.

Defense Minerals Exploration Administration had certified, as of the end of June 30, 1958, 337 discoveries on projects involving contract amounts of $21,811,621, of which the Government's share is $13,690,228. As of June 30, 1958, a total of $11,039,589 of Government funds had been spent on these certified projects. If production takes place on these projects within a 10-year period, some part, at least, of the Government funds advanced will be repaid according to a royalty arrangement.

The Administrator of the Defense Minerals Exploration Administration announced the termination of the program under the borrowing authority as of June 30, 1958, except for contracts in effect on that date. Public Law 85–701, enacted August 21, 1958, provided for a similar program on a permanent basis to be financed by appropriations. The Congress appropriated funds for the minerals exploration program, including administration of contracts entered into under the prior Defense Minerals Exploration Administration program.

10. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Advances	$176,356	$284,824	$284,824	$284,824
Supplies	5,362,046	6,143,486	6,143,486	6,143,486
Deferred charges	4,361,174	1,267,940	1,267,940	1,267,940

EXPENSES OF MANAGEMENT IMPROVEMENT

Current authorizations:

EXPENSES OF MANAGEMENT IMPROVEMENT

For expenses necessary to assist the President in improving the management of executive agencies and in obtaining greater economy and efficiency through the establishment of more efficient business methods in Government operations, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed $75 per diem, by allocation to any agency or office in the executive branch for the conduct, under the general direction of the Bureau of the Budget, of examinations and appraisals of, and the development and installation of improvements in, the organization and operations of such agency or of other agencies in the executive branch, $250,000, to remain available until expended, and to be available without regard to the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended.

Estimate 1960, **$250,000**

Program and Financing

[MUTUAL SECURITY]

The mutual security program promotes the foreign policy, security, and general welfare of the United States by assisting other free world nations to maintain and increase their economic and military strength. It is conducted under the Mutual Security Act of 1954, as amended. Responsibility for execution of the program has been delegated by the President to the Secretaries of

[MUTUAL SECURITY]—Continued

State and Defense. The Secretary of State has been delegated responsibility for general coordination.

The mutual security program takes two principal forms, military assistance and economic assistance. Military assistance includes military end items, supplies, training, construction, and research. Economic assistance includes the development loan fund which is designed to stimulate economic development by providing capital on a loan basis. Unlike the military assistance and other economic programs, the fund is not programed on a country basis; rather, projects submitted by eligible countries are reviewed and approved on their economic and financial merits within the funds made available by Congress. Other economic assistance consists of defense support, special assistance, contingency funds, technical cooperation, contributions to the United Nations and other international agencies for voluntary multilateral programs, and a few miscellaneous activities.

From 1959 appropriations, about $180 million is being programed to purchase surplus agricultural commodities for sale in the recipient countries. Local currency proceeds from these and other commodities are used for local requirements of the mutual security program in economic programs and projects and troop support.

Substantial unexpended balances are required because of the time necessary for the procurement and delivery of military equipment and for implementing complex economic development projects. There has been a decline in unexpended balances for military assistance during the past several years.

Appropriations required in 1960 to finance the mutual security program under existing and proposed legislation appear later in this chapter under Proposed for later transmission.

Current authorizations:

[For expenses necessary to enable the President to carry out the provisions of the Mutual Security Act of 1954, as amended, to remain available until June 30, 1959 unless otherwise specified herein, as follows:]

MILITARY ASSISTANCE

[Military assistance: For assistance authorized by section 103 (a) to carry out the purposes of chapter I (including administrative expenses as authorized by section 103 (b), which shall not exceed $25,000,000 for the fiscal year 1959, and purchase for replacement only of passenger motor vehicles for use abroad), $1,515,000,000;] (*Mutual Security Appropriation Act, 1959.*)

The military assistance program is designed to increase the mutual security of the free world by contributing to the development, maintenance, and training of modern military forces, which deter external aggression, lessen the chances of internal subversion, and protect valuable overseas bases. Forty-seven foreign countries are receiving grant aid under the military assistance program, and many other countries are eligible to buy modern military equipment on liberal credit terms. Many of these countries have joined with the United States in regional and bilateral defense arrangements such as the North Atlantic Treaty Organization and the Southeast Asia Treaty Organization, which are basic to this Nation's security.

Foreign forces supported by the program are numerically much greater than the United States Armed Forces, and provide striking power, depth in reserves, and flexibility which this Nation's forces alone cannot provide. Because it is imperative that these forces keep pace with rapid changes in weapon technology, missiles and other advanced weapons are being emphasized, commensurate with their supply availability, allies' technical capabilities, and the nature of the threat.

Grant aid operations—1. *Common item orders.*—Most military assistance materiel is procured through orders placed in the military services for common procurement with similar items in the service programs. Such orders consitute a reservation of funds, from which the service is entitled to reimbursement upon delivery of the items ordered. Commencing in 1959, this activity includes Navy ship construction and the cost of repairing and rehabilitating excess equipment either ordered from the military services or scheduled for redistribution from one country to another. The obligations estimated represent only reimbursements earned by the military services for deliveries made and not the funds reserved under this program. A schedule relating "reservations" to the appropriations of the military services appears at the end of the Department of Defense—military functions chapter.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *Offshore procurement.*—Through 1958, the United States placed orders abroad for approximately $2.8 billion of military assistance requirements. This program assists in building a defense production base abroad.

3. *Other materiel programs.*—This includes for 1959, only those costs incurred for ship construction, activation, or repair initiated prior to 1959. All shipbuilding costs for new activity initiated in 1959 are included under activity 1 above.

4. *Supply operations.*—Included for 1959 are packing, handling, and transportation costs. The reduction from 1958 results from the transfer of costs of repair and rehabilitation of excess equipment either ordered from the military services or scheduled for redistribution from one country to another (previously under this activity) to activity 1 above.

5. *Training.*—Only by modern, efficient, and intensive training can the materiel supplied under military assistance be effectively utilized. With the increasing utilization of complex electronics and missiles in the program, requirements for additional and specialized training increased.

6. *Administration.*—The administrative expenses of the military assistance advisory groups and the departmental costs of the program are included.

7. *Contributions to international military headquarters and agencies.*—Included are the assessments levied against the United States in accordance with cost-sharing agreements for support of NATO, SEATO, and the Baghdad Pact Liaison Group.

8. *Contributions to construction of facilities in other countries.*—Construction of military and logistical facilities under the jointly financed NATO infrastructure program and military construction in certain non-NATO countries are continuing requirements.

9. *Research and development.*—This program is intended to accelerate research and development by our allies of advanced weapons and to combine United States weapon technology with their productive capability.

10. *Other activities.*—These include support for United Nations forces in Korea, weapons production (the United States contribution to a cost-sharing program for production by our allies), and nutritional surveys.

Military sales operations—1. *Common item orders.*—The majority of military sales are handled as common item orders, similar to the grant aid operations. Under section 103 (c) of the Mutual Security Act, repayments made within 3 years, not to exceed $175 million, can be credited to the current appropriation and be available for re-use until expended. Repayments made over a longer period of time revert to miscellaneous receipts of the Treasury.

2. *Direct financing of sales.*—In exceptional cases, sales are financed directly with mutual security funds without use of the reimbursement procedure. The provisions for re-use of repayments also apply in such cases. The obligations in 1958 represent a loan to France.

Unobligated balance carried forward:			
Annual appropriation acts	2,428,000		
Other legislative authority:			
Appropriation	9,210,245		
Authorization to expend from public debt receipts	311,851		
Unobligated balance no longer available	16,053,580		
Appropriation (new obligational authority)	1,124,183,000	1,376,400,000	

1. *Defense support.*—Defense support, a function under economic assistance, is required in addition to military assistance in order to secure a specific contribution to the common defense of another country in which U. S. military aid is helping to support significant military forces. The level of defense support is intended to be sufficient to prevent economic retrogression, political instability, inflation, balance of payments crises, or other conditions which might adversely affect the military effort.

Defense support funds provide food (about one-fifth of the program is for surplus agricultural commodities), fertilizers, industrial raw materials, fuels and machinery.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

These commodities are sold in commercial markets for local currency which, in turn, is used for military budget support and essential economic projects.

(*a*) *Europe*—Spain, where the United States holds base rights of strategic importance, is the only European country now receiving defense support aid. The Mutual Security Appropriation Act of 1959 provides that not less than $50 million of defense support funds be available for Spain.

(*b*) *Near East and South Asia*—Greece, Turkey, Iran, and Pakistan, all of which are associated with the United States in regional defense pacts, are receiving defense support assistance. As a result of economic pressures and the generally tense political situation in the area, the program for 1959 has increased.

(*c*) *Far East*—The major portion of defense support is allocated to seven Far East countries, Korea, Taiwan, Vietnam, Cambodia, Laos, Thailand, and the Philippines, all of which maintain relatively large forces as a deterrent to Communist aggression.

2. *Technical cooperation.*—This activity is designed to assist less-developed countries to increase their knowledge and skills in a number of fields—agriculture, education, health, industry, mining, labor, public administration, transportation, housing, and community development. In bilateral programs the United States pursues its aims by sending technicians to less-developed countries, training students in the United States and other countries, and by providing some supplies and equipment for demonstration purposes. A segment of the program is carried out through contracts with American universities and other private organizations. Multilaterally, the United States contributes annually to the technical assistance programs of the United Nations and the Organization of American States.

3. *Special assistance.*—This assistance is intended to cover requirements which do not meet the criteria of defense support or the development loan fund. There are a great variety of such requirements, for example: Limited ability to repay loans, balance of payments crises, economic stabilization, certain equipment for civil police forces, and certain special projects. Also included in this appropriation is the malaria eradication program.

4. *Other programs.*—In addition to the activities listed above in the table, there are also included funds for contingencies. After appropriation, these funds are distributed among the programs shown on the table and, therefore, are not listed separately.

Loans.—The International Cooperation Administration and predecessor agencies have been authorized, by several laws, to make loans to friendly nations. Loans made from the development loan fund and under authority of the Agricultural Trade and Development Assistance Act are shown in schedules elsewhere in the budget.

The following table reflects the loans made from current mutual security obligational authority and related foreign currencies in millions of dollars and dollar equivalents:

	1958 actual	*1959 estimate*	*1960 estimate*
Loan obligations incurred:			
United States currency	129	56	--
Foreign currency	7	5	--
Loan disbursements made:			
United States currency	196	108	80
Foreign currency	23	76	43
Loan principal repayments (U. S. currency)	23	29	32
Interest collections:			
United States currency	41	44	44
Foreign currency	1	7	11

These loans are usually in the form of a line of credit, extended as a part of the aid program for a country. Procurement authorizations or project agreements generally constitute the obligations; payments against those obligations are considered to be loan disbursements under the agreements.

The outstanding loans at the end of the respective fiscal years are:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Loans outstanding	1,950	2,198	2,353	2,444
Interest past due	2	4	6	7
Undisbursed loan obligations	443	358	235	112
Unobligated authority	50	-----	-----	-----

Foreign currencies are available for mutual security activities resulting from the sale of surplus agricultural commodities purchased with mutual security appropriations for friendly countries for their currencies.

Local currencies accruing from these sources are deposited in a special account and are used for economic and military activities in furtherance of mutual security objectives. These activities include the local costs of projects, budget support of the lesser developed countries, and procurement of supplies and materials for third countries.

[1] Excludes estimates for administrative expenses which will be considered with estimates to be submitted under proposed legislation.

This fund finances loans, credits, or guaranties to governments of underdeveloped nations or to organizations, persons, or other entities to encourage the economic development of friendly nations (sec. 201, 72 Stat. 261). The fund is a source of financing for economic development which does not compete with either private investment capital or the activities of the Export-Import Bank of Washington and the International Bank for Reconstruction and Development.

Budget program.—Direct loan obligations amounted to $102,100,000 in 1958 and, in addition, other commitments were made in an amount of $165,536,000. All 1959 appropriated funds and 1958 unobligated balances will be used for loan approvals by January 31, 1959. The loan program for the balance of 1959 and for 1960 is set forth in a separate schedule for later transmission as proposed legislation.

A total of 6 loan agreements were signed in 1958 for development assistance with transportation, industry, agriculture and municipal water facilities in Ceylon, Honduras, India, Israel, and Pakistan. It is anticipated that about 70 loan agreements will be signed in 1959 from available funds. In addition to direct loan commitments, a program to guarantee the loans of United States investors in underdeveloped areas is being initiated.

Financing.—The program is financed from non-interest-bearing appropriations. Appropriations totaling $300 million were provided in 1958 and $400 million in 1959. Additional funds for 1959 and 1960 are shown under Proposed for later transmission. In addition, financing is provided by receipts from operations.

Repayment of loan principal and payment of interest may be made either in local currency or in dollars as specified in the loan agreement and these amounts will be available to the fund for further lending activity. Other available revenue is anticipated from fees received for issuance of loan guaranty.

Operating results.—Revenue of the fund will be in both dollars and local currencies. It is anticipated that the major portion will be in foreign currencies. Earnings will be retained to meet future requirements.

Federal Reserve Bank of St. Louis

In order to encourage and facilitate private American investment abroad, the Mutual Security Act, as amended, authorizes the issuance of $500 million of guaranties against noncommercial risks. These risks are: (1) inconvertibility of local currency receipts from investment, (2) loss of all or part of an investment resulting from expropriation or confiscation, and (3) loss from war damage. Additional guaranty authority of $500 million is proposed for 1960. The guaranties, which may have a maximum term of 20 years, are available in any country with which the United States has agreed to institute the guaranty program. Thirty-eight countries and most of their overseas dependencies now participate. War damage coverage authorized in 1956 is now available for new investments in seven countries which have signed the agreement. Extensions of existing agreements with a number of interested countries to include this coverage are being negotiated.

Budget program.—Obligations of the program after June 30, 1956, are based on a fractional reserve, which is 26.96% of total guaranties issued since that date. Guaranties issued prior to June 30, 1956, were issued with 100% backing. Guaranties to be issued during 1960 are estimated at $200 million. Under the fractional reserve basis, $54 million will be obligated in 1960 to support the guaranties issued in that year. No payment of claims has been made under this program and there are no claims pending.

Financing.—Congress has provided $199,071,521 in borrowing authority from Treasury to finance this program. Fees collected from guaranty holders are also available to meet claims arising from contracts. Funds received from sale of assets or currency acquired when contracts are invoked may also be used to meet claims.

Operating results.—The fund bears no expenses. Administrative expenses are paid from mutual security, economic, technical, and other assistance funds allocated to the International Cooperation Administration. Fees collected through June 30, 1958, are $2.7 million and are carried forward as retained earnings.

Financing applied to program			225,300,000

Under existing legislation, 1959.—It is anticipated that a supplemental appropriation of $225 million will be sought under existing authorization for the development loan fund. As the fund, under current plans, will have committed or earmarked virtually all of its present capital by January 31, availability of supplemental funds in 1959 will permit the lending program to proceed without delay.

Financing applied to program			378,100,000

Under proposed legislation, 1960.—It is anticipated that a 1960 authorization and appropriation of $700 million will be sought to provide for activities of the development loan fund in 1960, including a limitation on funds of the development loan fund which can be used in 1960 for administrative expenses.

[GENERAL PROVISIONS]

[SEC. 102. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.]

[SEC. 103. Payments made from funds appropriated herein for engineering fees and services to any individual engineering firm on any one project in excess of $25,000 shall be reported to the Com-

Digitized for FRASER

Federal Reserve Bank of St. Louis

mittees on Appropriations of the Senate and House of Representatives at least twice annually.]

[SEC. 104. Except for the appropriations entitled "President's special authority and contingency fund" and "Development loan fund", not more than 20 per centum of any appropriation item made available by this Act shall be obligated and/or reserved during the last month of availability.]

[SEC. 105. The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of the Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations, the President is requested to inform the Congress insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.]

[SEC. 106. The appropriations and authority with respect thereto in this Act shall be available from July 1, 1958, for the purposes provided in such appropriations and authority. All obligations incurred during the period between June 30, 1958, and the date of enactment of this Act in anticipation of such appropriations and authority are hereby ratified and confirmed if in accordance with the terms hereof.]

[SEC. 107. None of the funds provided by this Act nor any of the counterpart funds generated as a result of assistance under this Act or any prior Act shall be used to pay pensions, annuities, retirement pay or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.]

[SEC. 108. Not to exceed 50 per centum of the foreign currencies heretofore generated in any country under section 402 of the Mutual Security Act of 1954, as amended, may, notwithstanding prior provisions of law, hereafter be used in accordance with the provisions of that section: *Provided*, That quarterly reports of the use of foreign currencies pursuant to this section shall be submitted to the Committees on Appropriations of the Senate and House of Representatives.] (*Mutual Security Appropriation Act, 1959.*)

PRESIDENT'S SPECIAL INTERNATIONAL PROGRAM

Current authorizations:

PRESIDENT'S SPECIAL INTERNATIONAL PROGRAM

For expenses necessary to enable the President to carry out the provisions of the "International Cultural Exchange and Trade Fair Participation Act of 1956", [$6,410,500] *$7,100,000*, to remain available until expended: *Provided*, That not to exceed a total of [$25,000] *$49,800* may be expended for representation. (*70 Stat. 778; Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, **$6,410,500** Estimate 1960, [a] **$7,100,000**

[a] Excludes $600,000 for activities transferred in the estimates to "Salaries and expenses," Bureau of Foreign Commerce, Department of Commerce. The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Trade fairs and exhibitions	$3,417,049	$4,219,698	$4,603,000
2. Artistic and athletic presentations	3,087,159	2,638,000	2,925,000
3. Universal and international exhibition of Brussels	8,977,743	1,478,166	
Total obligations	15,481,951	8,335,864	7,528,000
Financing:			
Comparative transfers to other accounts	466,075	581,862	
Unobligated balance brought forward	−3,009,008	−2,370,379	−318,000
Recovery of prior year obligations	−141,236	−454,847	−110,000

Appropriation (new obligational authority)	15,168,161	6,410,500	7,100,000

The purpose of this fund is to strengthen the ties which unite us with other nations by demonstrating the cultural interests, developments, and achievements of the people of the United States, and the contributions being made by the United States economic and social system toward a peaceful and more fruitful life for its own people and other people throughout this world.

The Director of the United States Information Agency serves as coordinator of the following activities. That Agency publicizes the projects abroad and absorbs the cost of such publicity and coordination.

1. *Trade fairs and exhibitions.*—The Department of Commerce administers this program, which finances United States exhibits and labor missions at important international trade fairs and similar exhibitions overseas. Authorizations for 1958 and 1959 provided for completion of United States participation in 13 and 14 trade fairs and exhibitions, respectively. Funds requested for 1960 will provide for completion of exhibits in 14 trade fairs and exhibitions in 1960, plus necessary advance planning costs for 8 exhibits at trade fairs occurring early in 1961.

2. *Artistic and athletic presentations.*—The Department of State administers this program, which supports outstanding American cultural attractions appearing abroad. This support is necessary primarily because of high international transportation costs and itineraries to places where commercial revenues are inadequate to cover operating expenses. Approved projects, with itineraries reaching all areas of the world, numbered 31 for 1958, and are estimated at 27 during 1959, and 35 during 1960.

3. *Universal and international exhibition of Brussels.*—No estimate is included for this activity inasmuch as the fair ended in October 1958.

SPECIAL FOREIGN CURRENCY PROGRAMS

Current authorizations:

[TRANSLATION OF PUBLICATIONS AND SCIENTIFIC COOPERATION]

[For purchase of foreign currencies, pursuant to section 104 (k) of the Agricultural Trade Development and Assistance Act of 1954, as amended, for disseminating scientific and technological information and supporting scientific activities overseas, $5,100,000, to remain available until expended.] (*Supplemental Appropriation Act, 1959.*)

Appropriated 1959, **$5,100,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Translation of scientific literature		$1,200,000	
2. Agricultural research		3,900,000	
Total obligations		5,100,000	
Financing:			
Appropriation (new obligational authority)		5,100,000	

Funds are provided under this appropriation to purchase foreign currencies accruing from the sale of surplus agricultural commodities abroad for the support of scientific activities authorized by section 104 (k) of the Agricultural Trade Development and Assistance Act of 1954, as amended. The translation program will be primarily devoted to the translation of Russian scientific literature by translators located in foreign countries. The agricultural research will be performed in foreign countries by specialists and institutions considered competent to carry on research of interest to the United States but which can best be undertaken outside the borders of this country. It is anticipated that continuation of this program in 1960 will be recommended at a later date.

TRANSITIONAL GRANTS TO ALASKA

Proposed for later transmission:

TRANSITIONAL GRANTS TO ALASKA

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Grants to Alaska (total obligations)			$10,500,000
Financing:			
Proposed supplemental appropriation			10,500,000

Under proposed legislation, 1960.—Legislation will be proposed to authorize grants to the State of Alaska (1) to assist in financing, for a transitional period, functions transferred to the State from the Federal Government, and (2) to finance continued Federal operations for an interim period when the State requests a delay in the transfer of functions. Federal grants authorized for mental and general health, maintenance of highways, and operation of airports will be financed under this authorization as well as other transitional expenses. The budgets for agencies which heretofore financed these functions have been reduced accordingly. A supplemental appropriation of $10,500,000 is anticipated for 1960 to finance this authorization.

MISCELLANEOUS

INFORMATIONAL FOREIGN CURRENCY SCHEDULE

Foreign currency realized under the Agricultural Trade Development and Assistance Act, as amended (7 U. S. C. 1704)

Amounts Available for Authorization

Balance carried forward	721,105,768	632,947,473	357,683,165

Title I of the Agricultural Trade Development and Assistance Act of 1954 authorizes the sale of up to $6.25 billion of surplus agricultural commodities to friendly nations for their currencies, with reasonable precautions neither to displace United States sales for dollars nor to disrupt unduly world commodity prices. The Commodity Credit Corporation finances the costs. The foreign currencies generated by these sales may be used (*a*) to help develop new markets for United States agricultural commodities, (*b*) to purchase strategic and critical materials, (*c*) to procure military materiel and services for the common defense, (*d*) to purchase goods and services for other friendly nations, (*e*) to promote balanced economic development and trade among nations including loans to American and foreign business firms abroad, (*f*) to pay United States obligations abroad, (*g*) to make loans to promote multilateral trade and economic development abroad, (*h*) to finance international education exchange activities, (*i*) to translate and publish books and other publications abroad, (*j*) to aid American-sponsored schools, libraries, and binational centers overseas, (*k*) to finance the translation of scientific and technical publications and support scientific activities overseas, (*l*) to acquire buildings and grounds abroad, (*m*) to finance participation in trade fairs and related activities, (*n*) to acquire books from abroad, and (*o*) to aid American educational institutions abroad and support workshops and chairs in American studies.

Most of the currencies are used without charge to appropriations; some are sold to appropriations, and the proceeds of such sales go to the Commodity Credit Corporation. A lump-sum appropriation is recommended to reimburse the Commodity Credit Corporation for its losses which are not made up through such sales.

As of June 30, 1959, it is estimated agreements will have been signed calling for deposits of sales proceeds totaling $3.8 billion. This will represent the market value of commodities and ocean transportation in which the Commodity Credit Corporation investment will be approximately $5.5 billion. No estimates are included in this schedule for sales agreements that may be signed under the proposed legislation increasing title I authorizations by $1.5 billion for the calendar year 1960, nor for agreements under existing authority signed or approved for negotiation after October 15, 1958. Subsidiary schedules on currency uses are presented in the chapters of the Departments of State, Defense, and Agriculture, the General Services Administration, the Export-Import Bank, the United States Information Agency, and under Mutual security and Special foreign currency programs in this chapter.

INDEPENDENT OFFICES

The total recommended new obligational authority for the 50 independent agencies and 11 historical and memorial commissions for 1960 is $9,821 million, an increase of $3 million from the estimated 1959 total.

Expenditures of independent agencies in 1960 are estimated to be $9,443 million. This amount is a decrease of $13 million from 1959.

Development and control of atomic energy.—New obligational authority recommended for the Atomic Energy Commission for 1960 is $2,772 million, an increase of $48 million over the amount provided for 1959. Expenditures are estimated to rise from $2,630 million in 1959 to $2,745 in 1960.

New obligational authority of $2,544 million for operating expenses will result in expenditures in 1960 of $2,455 million, an increase of $75 millon over estimated 1959 expenditures for these purposes. The increase in expenditures for procurement of uranium concentrates in 1960 reflects increased deliveries under prior contracts. Production of special nuclear materials and advanced weapons will continue at the high levels attained in recent years. On the assumption that the Soviet Union will agree to the United States proposal to suspend nuclear weapons tests, no funds are provided for weapons testing in 1960, and weapons testing sites will be maintained on a standby basis. The efforts to develop reactors for civilian atomic power and for military applications will be continued or expanded, with emphasis on the most promising civilian reactor types and on the improvement of reactor fuel elements. A new cooperative program of research and development with the European Atomic Energy Community (Euratom) initiated in 1959 will be accelerated in 1960. Research in the physical and life sciences will be substantially augmented in 1960 to maintain a strong foundation of basic knowledge essential to a sound continuing atomic energy program.

New obligational authority of $228 million, together with available balances from appropriations provided in previous years, will result in construction expenditures of $290 million in 1960, $40 million more than in 1959. Out of the $228 million new obligational authority, $126 million will be for new projects requiring legislative authorization this session and are shown in this document under Proposed for later transmission. The budget provides for improvements and additions to production facilities for fissionable materials and weapons. Major modifications to existing civilian power reactor experiments, construction of experimental power and propulsion reactors for civilian and military purposes, and construction of reactor development supporting facilities will proceed in 1960. Funds are provided to construct facilities to support research in the physical and life sciences, including completion of the world's highest energy particle accelerator at Brookhaven National Laboratory.

International economic and technical developments.—The Export-Import Bank of Washington anticipates that its commitments for development and other loans in 1960 will remain high but that an increased share of them will be on a guaranteed basis rather than disbursed from Export-Import funds.

Gross budget expenditures of the Bank in 1960 for disbursements on loans, operating expenses, and interest on money borrowed from the Treasury are estimated to be $854 million. The sum of receipts from collections of interest and principal and from sale of loans is estimated to cover gross expenditures. The reduction in net expenditures from the $250 million estimated for 1959 is due primarily to larger scheduled repayments and the anticipation of increased sale of loans.

Foreign information and exchange activities.—In 1960, the United States Information Agency will expand its operations in Africa and Latin America, and strengthen its worldwide television, motion picture, and information center activities. Long-range efforts to improve the image of America abroad will be intensified by increasing the cultural content of our information programs. The Agency will also continue the major rebuilding and expansion of Voice of America radio facilities begun in 1959, in an effort to improve the reception of the Voice's programs abroad. The Government expects to continue at about current levels its guaranties against loss from exchange inconvertibility to exporters of informational media; these guaranties facilitate the export of American publications and motion pictures. Recommended new obligational authority for the Agency in 1960 is $126.7 million, $7.6 million more than the 1959 estimate.

Veterans' services and benefits (summary).—New obligational authority recommended for the Veterans Administration for 1960 totals $5,185 million, $37 million less than for 1959. Of this total 75.1% is for cash payments to veterans for compensation, pensions, and readjustment benefits; 17.7% for hospital and medical services; and 7.2% for administration, insurance, direct loans, and miscellaneous programs.

Veterans' education, training, and other readjustment benefits.—Expenditures for education and training in 1960 are estimated to be $129 million below the amount in 1959. The 1960 total includes $478 million for an average enrollment of 360,200 Korean conflict veterans, $12 million for 9,000 war orphans, and a smaller amount for World War II veterans.

Special assistance to disabled veterans in 1960 will cost $10 million, chiefly for vocational rehabilitation of 10,600 veterans. Payment of claims and acquisition of properties on which loans have been defaulted is estimated at $97 million, an increase of $4 million over 1959; these expenditures, recoverable from sale of the properties, are small compared to the $17 billion of guaranties outstanding.

Veterans' compensation and pensions.—The 1960 budget provides for compensation payments of $2 billion for service-connected disability and death in an estimated average of 2,411,000 cases. The number of these cases continues to decline slowly and total payments, which have increased in recent years because higher rates were enacted, are expected to decrease $22 million from 1959 to 1960.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Pensions for non-service-connected disability and death are being paid in a steadily larger number of cases, primarily because of the advancing age of World War I veterans. The average caseload is expected to be 1,410,000 in 1960, compared with 1,332,000 in 1959. Estimated payments of $1.2 billion in 1960 are $68 million more than in 1959.

The total amount of other benefits paid from the appropriation for compensation and pensions is expected to increase by $12 million in 1959 and $4 million in 1960. The increase results primarily from new legislation raising the maximum rate for initial burial allowances from $150 to $250.

A supplemental appropriation of $52.5 million is anticipated for 1959 to cover the presently estimated requirements for compensation, pensions, and related benefits which are in excess of the amounts already appropriated.

Veterans' hospitals and medical care.—The new obligational authority of $787 million proposed for 1960 anticipates that inpatient care in Veterans Administration hospitals will be provided for a daily average of 111,296 patients, approximately two-thirds of whom will be receiving care for conditions not related to their military service. In addition to its hospitals, the Veterans Administration operates domiciliary homes which will have an estimated 16,812 members in 1960. It will also pay for hospital care for an average of 3,138 patients per day in other hospitals and for approximately one-half the cost of care for 9,600 veterans in State soldiers' homes.

The budget also provides $84 million in new obligational authority for 1960 for the operation of outpatient clinics and for fees to doctors and dentists in cases where clinics are not available. The dental outpatient program continues to decline but a slight increase in the medical program is estimated for 1960 as more discharged mental patients are being treated on an outpatient basis.

New obligational authority of $20 million is recommended for construction, modernization, and repair of facilities in 1960. Total obligations, however, will be considerably higher because balances of appropriations enacted for from prior years are still available and will be used.

Insurance and other veterans' services and administration.—Payment of insurance claims resulting from extra hazardous conditions of military service, and of indemnities to survivors of persons who died in service or within 120 days after discharge during the period 1951 to 1956, are estimated to be $54 million in 1960. Other insurance operations for policies issued since 1951 are reflected in the transactions of revolving funds for which $6 million net receipts are estimated.

Expenditures for general operating expenses of the Veterans Administration are $3 million below 1959, reflecting some reduction in workloads and some improvement in methods.

Promotion of science, research, libraries, and museums.—For support of basic research, science education, and related programs, $160 million in new obligational authority is recommended for the National Science Foundation, an increase of $22 million over 1959. Most of this increase is for the support of basic research projects in universities. The Foundation will continue to provide a high level of support for research facilities and for education in the sciences, including fellowships for graduate training. Institutes for the supplementary training of science and mathematics teachers, the development of new curricula in the sciences and mathematics, and other activities to improve science education and to interest young people in scientific careers are being supported at the same level.

Conservation and development of land and water resources.—The St. Lawrence Seaway Development Corporation will enter the operation and maintenance phase of its program when the seaway opens for full 27-foot-draft traffic in the spring of 1959. Tolls will be initiated at that time to cover operating costs and to repay the United States investment over a 50-year period. The decline in net expenditures from $17 million in 1959 to $4 million in 1960 reflects the virtual completion of construction of the navigation facilities.

Legislation is again proposed to permit the Tennessee Valley Authority to finance construction of additional power facilities with revenue from the sale of its bonds. The budget includes a supplemental authorization of $200 million in 1959 under this proposed legislation. Increases in operating costs and in revenues are estimated in 1960, reflecting the production and sale of additional power. Expenditures for capital outlays will decrease because construction is nearing completion on the new lock at Wilson Dam and on certain power facilities.

The budget also provides increased funds for 1960 for the Federal Power Commission in recognition of the increased workloads connected with licensing non-Federal power projects and for gas regulatory activities. In keeping with the administration's policy to increase the charges for certain special services, legislation will be proposed to collect fees from the natural gas and electric power industries to reimburse the Government for the cost of administering the Natural Gas Act and for a portion of similar costs related to the Federal Power Act.

Promotion of aviation and space flight.—The newly formed Federal Aviation Agency includes all of the former Civil Aeronautics Administration, the Airways Modernization Board, and that part of the Civil Aeronautics Board concerned with the promulgation of safety regulations. Ultimately, control of all airway traffic, both civil and military, is to be the responsibility of this agency.

New obligational authority of $602 million for the Federal Aviation Agency for 1960 compares with $566 million for these same functions in 1959. The largest single part of this amount is the cost of equipping and operating the air traffic control system, which is estimated to increase from $384 million in 1959 to $436 million in 1960. Legislation to increase aviation fuel taxes is being recommended to the Congress so that the users of the Federal airways will bear a greater share of the increasing cost of installing and maintaining them.

New grant authorizations under the existing Federal Airport Act are provided only through 1959. New legislation is proposed to continue the program on a basis which would permit the Federal Government to withdraw from it over the next 4 years, since the program is essentially local in its benefits. The 1960 authorization under this proposal would be $65 million. Legislation is also proposed to incorporate Washington National Airport and to turn over certain Alaskan airports to the new State.

The new National Aeronautics and Space Administration, established during the past year, is responsible for nonmilitary space programs. It has taken over the aeronautical and space research programs formerly conducted by the National Advisory Committee for Aeronautics and certain space programs previously undertaken by the Department of Defense. New obligational au-

Federal Reserve Bank of St. Louis

thority of $485 million is recommended for 1960 and a supplemental appropriation of $45 million is anticipated for 1959 to permit a greater research and development effort on advanced space technology, including manned space flight, and applications of space vehicles in the fields of meteorology and communications. The Administration will also perform research in support of military aircraft, missile, and spacecraft programs.

Expenditures for air carrier subsidies are expected to increase from $58 million in 1959 to $63 million in 1960. The increased payments are for local service carriers. Domestic trunklines are not expected to require subsidies in 1960.

Other aids to business.—New obligational authority of $205.6 million is recommended for the Small Business Administration to carry on (1) its regular business and disaster loan program, (2) the new program of loans to investment and development companies, (3) the various procurement, technical, and managerial aids provided for small business, and the new program of grants for research on small-business problems. Legislation is being recommended to increase the present limitations in the Small Business Act on appropriations and on outstanding business loans.

The volume of new business loans is expected to increase in 1959 and 1960 over the 1958 level. New obligational authority and net expenditures of this program, however, will decline because repayments of outstanding loans are accelerating, thus making more capital available for relending. The loans to investment and development companies will increase substantially in 1960, the first full year of operation of the new program.

Regulation of commerce and finance.—The budget provides increased funds for 1960 for the Interstate Commerce Commission, Federal Communications Commission, Securities and Exchange Commission, Federal Trade Commission, and Civil Aeronautics Board. The workload of these agencies generally increases with the growth of the economy and the regulated industries. It is recommended that fees charged by the Securities and Exchange Commission be increased, in accordance with the President's general policy to charge for special services.

AIRWAYS MODERNIZATION BOARD

NOTE.—Pursuant to the Federal Aviation Act of 1958 (Public Law 85-726) the Board has been transferred to and consolidated with the Federal Aviation Agency.

[ALASKA INTERNATIONAL RAIL AND HIGHWAY COMMISSION]

[SALARIES AND EXPENSES]

[For expenses necessary for the Alaska International Rail and Highway Commission, established by the Act of August 1, 1956 (70 Stat. 888), as amended, $40,000.] (*Supplemental Appropriation Act, 1959.*)

Appropriated 1959, **$40,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Study of rail and highway routes (total obligations)	$41,395	$50,968	
Financing:			
Unobligated balance brought forward		−18,605	
Unobligated balance carried forward	18,605		
Unobligated balance no longer available		7,637	
Appropriation (new obligational authority)	60,000	40,000	

The Commission was established to study the economic and military feasibility of additional rail and highway connections between the other States and Alaska. Public Law 85-601 increased the authorization of the Commission to $300,000 and provided that its final report to the Congress should be made no later than February 1, 1960. A supplemental appropriation is anticipated for 1959 under Proposed for later transmission.

Object Classification

	1958 actual	1959 estimate	1960 estimate
Total number of permanent positions	4	4	
Average number of all employees	3	3	
Number of employees at end of year	4	2	
Average salary of ungraded positions	$9,327	$10,063	
01 Personal services: Permanent positions	$29,139	$25,256	
02 Travel	6,582	12,562	
04 Communication services	980	1,124

Proposed for later transmission:

SALARIES AND EXPENSES

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Study of rail and highway routes (total obligations)		$122,000	$52,000
Financing:			
Unobligated balance brought forward			−78,000
Unobligated balance carried forward		78,000	26,000
Proposed supplemental appropriation		200,000	

Under existing legislation, 1959.—An additional $200,000 will be required to contract for an economic study of additional transportation needs between the other States and Alaska. The Commission will also request extension of time for completing the study and submitting the final report.

AMERICAN BATTLE MONUMENTS COMMISSION

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, of the American Battle Monuments Commission, including the acquisition of land or interest in land in foreign countries; purchase and repair of uniforms for caretakers of national cemeteries and monuments outside of the United States and its Territories and possessions; not to exceed $70,000 for expenses of travel; rent of office and garage space in foreign countries; [purchase (one for replacement only) and] hire of passenger motor vehicles; and insurance of official motor vehicles in foreign countries when required by law of such countries; [$1,250,000] *$1,295,000*: *Provided*, That where station allowance has been authorized by the Department of the Army for officers of the Army serving the Army at certain foreign stations, the same allowance shall be authorized for officers of the Armed Forces assigned to the Commission while serving at the same foreign stations, and this appropriation is hereby made available for the payment of such allowance: *Provided further*, That when traveling on business of the Commission, officers of the Armed Forces serving as members or as secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission: *Provided further*, That the Commission shall reimburse other Government agencies, including the Armed Forces, for salary, pay, and allowances of personnel assigned to it. (*General Government Matters Appropriation Act, 1959.*)

Appropriated 1959, **$1,250,000** Estimate 1960, **$1,295,000**

Appropriation (new obligational authority)	1,250,000		

This is the 11th year of a construction program of United States military cemeteries in foreign countries and memorials to commemorate the services of the American Armed Forces in World War II at 15 locations in foreign countries. The program also includes memorials on the east and west coasts of the United States and in Hawaii. The Commission estimates that the present program will be completed by April 1961, with all projects except the memorials in New York City and Hawaii to be completed by June 1960.

No additional funds are requested for 1960 since the unobligated balance is sufficient to complete the program.

ATOMIC ENERGY COMMISSION

Current authorizations:

OPERATING EXPENSES

For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the employment of aliens; rental in or near the District of Columbia; services authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of equipment; purchase, maintenance, and operation of aircraft; publication and dissemination of atomic information; purchase, repair, and cleaning of uniforms; purchase of newspapers and periodicals (not to exceed $6,000); official entertainment expenses (not to exceed $30,000); not to exceed [$3,850,000] *$3,550,000* for expenses of travel[, including expenses of attendance at meetings of organizations concerned with the function or activity for which this appropriation is made]; reimbursement of the General Services Administration for security guard services; not to exceed [$46,800,000] *$52,750,000* for personal services; purchase (not to exceed [four hundred and thirty-five] *three hundred and ninety-six, of which three hundred and sixty-six are* for replacement only, including one at not to exceed [$3,500] *$4,000*) and hire of passenger motor vehicles; [$2,397,406,000] *$2,502,000,000*, together with the unexpended balances, as of June 30, [1958] *1959*, of prior year appropriations made available under this head to the Atomic Energy Commission, and, in addition, any moneys (except sums received from disposal of property under the Atomic Energy Community Act of 1955 (42 U. S. C. 2301)) received by the Commission, notwithstanding the provisions of section

Reappropriation	38,280,151	77,940,117	18,000,000

[1] Includes capital outlay for equipment: 1958, $79,391,473; 1959, $91,834,000; 1960, $94,580,000. See table below.

The Commission procures raw materials; manufactures special nuclear materials and atomic weapons; develops improved weapons; conducts research and development aimed at generation of atomic power and protection of health against possible hazards arising from atomic energy operations; conducts investigations in the physical and life sciences related to atomic energy, including investigation of controlled thermonuclear reactions; establishes and enforces regulations for civilian uses of atomic energy; promotes industrial participation in atomic energy development for peaceful purposes; encourages scientific and industrial progress through the dissemination of information under the terms of the Atomic Energy Act of 1954, as amended; and participates in programs of international cooperation in peaceful applications of atomic energy.

The program is administered in the field through 12 major offices. Most of the Commission's activities are carried on in Government-owned facilities by industrial concerns and educational institutions operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Net program costs in 1960 are estimated at $2,501.5 million, or 3.6% greater than the estimated 1959 net costs of $2,414.9 million, and 19.3% greater than actual net costs of $2,096.9 million for 1958. In 1960, the major increase is for the procurement of larger quantities of raw materials. Other increases occur in civilian and military power and propulsion reactor development, in research in the physical, biological, and medical fields, and for isotope development.

In 1960, as in 1958 and 1959, obligational requirements exceed net program costs, the difference being obligations incurred for which costs will not materialize until future years. The obligations for operating expenses in 1960 total $2,520 million compared to $2,454.2 million in 1959 and $2,174.2 million in 1958.

Included in estimated obligations for 1959 is $4 million requiring authorization prior to use for a research and development program in cooperation with the European Atomic Energy Community (Euratom) which was authorized by the Euratom Cooperation Act of 1958. Additional obligations in the amount of $23.5 million are estimated for 1960. An amendment to the Euratom Cooperation Act of 1958 to authorize appropriation of the 1959 and 1960 amounts will be proposed. A supplemental appropriation of $23.5 million for 1960 (see Proposed for later transmission) is anticipated after the additional authorization has been enacted.

1. *Raw materials.*—Uranium ores and concentrates are procured for processing in the production facilities of the Commission. An estimated 35,835 tons of concentrates will be obtained in 1960, an increase of 2,705 tons over the 33,130 tons estimated to be procured in 1959. Procurement in 1960 will be approximately evenly divided between domestic and foreign sources. Resource evaluation will continue in the development of data on uranium reserves.

2. *Special nuclear materials.*—Uranium concentrates are processed into feed materials from which (*a*) plutonium is produced in the reactors at Hanford, Wash., and Savannah River, S. C., or (*b*) the isotope uranium–235 is extracted in plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. As production of feed and special nuclear materials increases, the gains in output will be accompanied by lower unit processing costs. Work will continue on process improvement to reduce production costs, increase yields, and improve the quality of products.

3. *Weapons.*—This program encompasses the production of weapons; the development and design of new weapon types; the storage, maintenance, and custody of stockpiled weapons; the maintenance of test areas; and the development and demonstration of nonmilitary uses for nuclear explosives (project Plowshare). Additional production capacity will be in operation in 1960, and production of weapons will continue at the level established in 1959. The 1960 budget provides only for maintenance of weapons test sites on the assumption that an agreement to suspend nuclear weapons testing will be successfully concluded.

Federal Reserve Bank of St. Louis

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

4. *Reactor development.*—This program includes primarily the development of (*a*) civilian power reactors, including associated work on fuel element development, reactor safety, spent fuel reprocessing, and radioactive residues; (*b*) commercial ship reactors, and (*c*) power and propulsion reactors for a variety of military requirements. Also included is the operation of the National Reactor Testing Station at Arco, Idaho. The costs by major category are:

	1958 actual	*1959 estimate*	*1960 estimate*
Category:			
Civilian power reactors:			
Government program	$71,911,480	$88,640,000	$89,100,000
Cooperative arrangements program	7,234,447	17,473,000	16,495,000
Euratom program	----------	2,000,000	1,000,000
General supporting reactor research and development program	30,297,791	40,288,000	50,900,000

Army power reactors	5,377,388	8,000,000	11,000,000
Naval propulsion reactors	90,195,816	90,875,000	93,000,000
Aircraft propulsion reactors	62,221,581	68,540,000	68,700,000
Missile propulsion reactors	12,054,706	22,865,000	25,900,000
Satellite power sources	3,437,113	7,035,000	12,100,000
Operational services and equipment	24,685,451	22,354,000	19,030,000
Total, reactor development	308,961,635	372,570,000	393,215,000

The Commission's civilian power reactor program provides a foundation of technical knowledge through a program of research and development on promising reactor concepts; design, fabrication, and operation of power reactor experiments; the development of experimental reactors; and development of prototype powerplants usually on a cooperative basis with industry. Through the cooperative arrangements program, the Commission provides financial aid in the development of full-scale power reactors built by private industry and public power bodies. This aid provides a basis for a privately financed nuclear power industry.

Costs shown for Euratom are for research and development under a joint program with Euratom for which $3 million was appropriated in 1959. Upon authorization by the Congress of additional appropriations for this cooperative program, a supplemental appropriation of $23.5 million is anticipated (see Proposed for later transmission); of this amount, $8 million would be shown as reactor development program costs in 1960.

To provide broad support primarily for civilian power reactor projects, the Commission's programs include general research and development on materials, moderators, control techniques, fuel elements, spent fuel reprocessing, radioactive residues, and reactor safety. Some of this work is also applicable to military reactor development. Substantial increases are provided for developing improved fuel elements, reactor systems, and reactor safety to accelerate development of economic power.

The Commission's program for 1960 includes the continuation of work to develop atomic powerplants for use in commercial vessels, and particularly for the nuclear-powered merchant ship, the N. S. *Savannah,* now under construction.

In the military reactor programs, efforts will be continued to develop reactors to meet requirements of the Department of Defense. These include propulsion reactors for submarines, surface combatant ships, military aircraft and missiles and transportable powerplants for the generation of electric power and heat in satellites and at remote military installations. Development of a new improved reactor concept for naval ship propulsion will be started. Many of the advances in military reactor development contribute significantly to the civilian power program.

The Commission also operates the National Reactor Testing Station in Idaho, including two test reactors which provide irradiation services for the Commission's programs and for private industry on a reimbursable basis.

5. *Physical research.*—Basic and long-range investigations in the fields of physics, mathematics, chemistry, and metallurgy are undertaken to provide an ever-expanding fund of theoretical and practical knowledge in fields related to nuclear energy. Approximately 90 particle accelerators, ranging in energy from several thousand electron-volts to several billion electron-volts, are utilized in the program. Research and development directed toward the production of power from the controlled fusion of heavy hydrogen nuclei (project Sherwood) will continue. Approximately 72% of the cost of research is for work done in Commission laboratories and 28% is for work contracted to about 100 universities and other independent institutions.

6. *Biology and medicine.*—Research is conducted on the effect of radiation on living things. It includes investigations of the biological effects of radioactivity in the body and the development of methods for minimizing exposure to radioactive materials of all kinds and for minimizing and protecting against the injurious effects of radiation. Support is given to the development of methods of utilizing radioactive materials for human welfare, and to the diagnosis, treatment, and understanding of human diseases, such as cancer. Evaluation of the significance of human exposure to radioactivity from all sources is given special emphasis. Standards are established to insure that the Commission's activities are conducted with safety to both employees and the public.

The major portion of the research is carried on at 16 laboratories which are owned by or operated for the Commission, and the remainder, approximately 550 projects, is supported in more than 220 universities, colleges, hospitals, and independent laboratories. The program includes the operation of several facilities in the United States devoted to cancer research and two laboratories in Japan for the determination of long-term effects of atomic bombs on the population.

7. *Training, education, and information.*—This activity includes operation of special schools; conduct of specialized courses; granting of fellowships for graduate students; assistance to high schools, colleges, and universities; and dissemination of technical information, including participation in international conferences and exhibits on nuclear science and technology.

Three schools will be operated in 1960: The International Institute of Nuclear Science and Engineering at the Argonne National Laboratory, the Oak Ridge Institute of Nuclear Studies, and the new Puerto Rico Training Center. In addition, specialized courses including radiochemical and counting procedures and reactor hazards and supervisory instruction will be offered at the New York Health and Safety Laboratory and the Oak Ridge National Laboratory and the Shippingport reactor site.

Under the fellowship program in 1960, approximately 150 college graduates will receive assistance for graduate studies in nuclear energy technology. Other fellowships will be offered in the fields of radiological physics, industrial hygiene, and industrial medicine.

Assistance to schools to provide for educational programs in atomic energy will be continued. Grants will be made to universities to help them acquire reactor train-

Federal Reserve Bank of St. Louis

ing equipment, teaching aids, demonstration apparatus, and special laboratory equipment. University summer courses in general radiobiology will be made available to high school science teachers, and special faculty training in reactor technology and radiobiology for university faculty members will be provided.

To broaden the dissemination of information on matters relating to atomic energy, the Commission operates the technical information service and the American Museum of Atomic Energy at Oak Ridge, maintains libraries, performs translation services, and conducts tours with traveling atomic energy exhibits. The Commission will arrange in 1960 for nuclear exhibits at selected foreign conferences and exhibitions in order to demonstrate United States technology.

8. *Isotopes development.*—This program is to provide for additional development of practical applications for use of radioisotopes in medicine, agriculture, and industry. The Commission will participate in research and development projects with industrial and research organizations to exploit the practical application of radioisotopes and applied radiation to industrial products, processes, and manufacturing methods. Instruction in radiation technology will be supported through the provision of equipment grants required for laboratory facilities, the offering of summer institutes for industrial personnel at universities, and the presentation of a basic training course in industrial applications of radioisotopes at the Oak Ridge Institute of Nuclear Studies.

9. *Community.*—The Commission operates 3 towns—Oak Ridge, Tenn.; Richland, Wash.; and Los Alamos, N. Mex.—with an estimated total population in 1960 of 69,000, and provides limited community services at other locations. Legislation has been enacted to terminate Government ownership and operation of Oak Ridge and Richland. The city of Richland was incorporated on December 2, 1958, and establishment of a city government at Oak Ridge is anticipated during calendar year 1959. As these city governments assume their normal responsibilities, the transfer of United States Government property and service functions will be effected. Accordingly, the 1960 estimates are based on anticipated disposal of a major portion of Atomic Energy Commission-owned real estate by the end of 1959 with resultant reductions in requirements for property maintenance and in revenues. The estimates also include costs associated with the disposal program and provide for assistance payments to the community hospital at Richland, which has been transferred to a private nonprofit organization, and the Richland school district. Since real estate revenues normally exceed operating costs by a substantial amount, the loss in revenue as a result of property sales together with the costs of disposal will result in an estimated excess of costs over revenues of $4.6 million in 1960. This relation between costs and revenue, which are included under revenues applied, is indicated in the following table:

	1958 actual	*1959 estimate*	*1960 estimate*
Revenue	$15,513,868	$12,360,000	$11,056,000
Operating costs, including Atomic Energy Commission costs related to disposal	17,675,265	16,792,000	15,666,000
Excess of costs over revenue	2,161,397	4,432,000	4,610,000

10. *Program direction and administration.*—In addition to general management, this activity includes the negotiation and administration of contracts, and the establishment and enforcement of regulations for civilian uses of atomic energy, including the issuance of licenses. Administrative activities represent 2% of total program costs in 1960 compared to 2% in 1959 and 2.2% in 1958. The increase of $2.2 million provides for higher average employment and, for the first time, a full year's cost of maintenance and operation of the expanded Germantown headquarters.

11. *Security investigations.*—The Atomic Energy Act of 1954 requires background investigations of those persons proposed for access to restricted data of the atomic energy program whether employed by the Commission, its contractors, or other Government agencies. The number of full background investigations to be completed is estimated at 22,450 for 1960, compared with 23,076 for 1959 and 26,556 for 1958.

12. *Other costs.*—In furthering the objectives of the Atomic Energy Act of 1954 concerning the utilization of atomic energy for peaceful purposes, the Commission furnishes materials and services, apart from those which it provides normally for its own basic programs, to industrial organizations and other private parties. Costs for these are incurred only upon the request of others. Charges made for such products and services are included under Revenues applied as a reduction in determining the appropriations required. The items included are:

	1958 actual	*1959 estimate*	*1960 estimate*
Costs of products sold	$5,183,287	$3,755,000	$3,706,000
Costs of services performed	1,286,720	1,830,000	1,967,000
Total other funded costs (excluding depreciation)	6,470,007	5,585,000	5,673,000
Related revenues	9,996,342	7,372,000	7,544,000
Excess of revenues over funded costs	3,526,335	1,787,000	1,871,000

13. *Revenues applied.*—Revenues are obtained from services performed and the sale and lease of products, including lease and sale of nuclear materials, produced as a part of the Commission's own basic program (primarily the operation of the Atomic Energy Commission-owned communities and housing and the sale of special nuclear materials and related products) and from products and services for which costs are incurred only upon the request of others and are included under Other costs. The items included are:

	1958 actual	*1959 estimate*	*1960 estimate*
Sale of source and special nuclear materials and related products	$2,289,595	$3,098,000	$5,744,000
Income from lease of materials and consumption charges for special nuclear materials	696,827	1,346,000	2,572,000
Income from sale of steam	309,989	1,200,000	2,175,000
Income from research hospitals	355,758	350,000	350,000
Income from training, education, and information	509,923	470,000	450,000
Income from communities	15,513,868	12,360,000	11,056,000
Income from other products sold and services performed at request of others:			
Products sold	8,644,471	5,431,000	5,255,000
Services performed	1,351,871	1,941,000	2,289,000
Miscellaneous income	3,056,742	1,524,000	1,524,000
Total revenue	32,729,044	27,720,000	31,415,000

14. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Inventories (goods unconsumed by activities)	$161,331,583	$186,634,182	$193,554,000	$194,466,000
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	600,073,299	653,182,696	688,575,168	706,154,168
Advances (payments for goods and services on order not yet received)	714,108	2,678,615	----------	----------
Collateral funds and other deposits (insurance collateral, employee benefit and annuity funds, merchandise deposits with vendors and miscellaneous deposits)	24,099,000	21,006,725	20,677,000	20,677,000
Total selected resources at end of year	786,217,990	863,502,218	902,806,168	921,297,168
Selected resources at start of year (−)		−786,217,990	−863,502,218	−902,806,168
Obligations incurred for costs of other years, net		77,284,228	39,303,950	18,491,000

Federal Reserve Bank of St. Louis

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

The increase in 1959 over 1958 results from an increase in inventories attributable to higher levels in stores, special reactor materials and isotopes inventories based on program requirements and from an increase in unpaid undelivered orders as a result of the general rise in program levels, particularly in the reactor development program. The increase in 1960 over 1959 is attributable primarily to an increase in unpaid undelivered orders based on higher operating levels for the reactor development program and to funding under this category $7 million of the total 1959 authorization of $20 million for new proposals under the cooperative arrangements program.

15. *Equipment not included in construction projects.*—Equipment not included in construction projects is budgeted for and costed as part of the individual operating programs, and, therefore, such costs are included in the amounts shown for each program on the program and financing schedule.

A tabulation of capital outlays for equipment included in the operating program is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Equipment costs incurred:			
Raw materials	$132,150	$175,000	$105,000
Special nuclear materials	21,144,194	25,210,000	24,507,000

PLANT ACQUISITION AND CONSTRUCTION

For expenses of the Commission, as authorized by law, in connection with the purchase and construction of plant and other expenses incidental thereto necessary in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; and hire of passenger motor vehicles; [$249,929,000] *$102,000,000*, to remain available until expended. *(42 U. S. C. 2011; 72 Stat. 490; Supplemental Appropriation Act, 1959.)*

Appropriated 1959, **$249,929,000** Estimate 1960, **$102,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Facilities for—			
1. Raw materials	$745,381	$416,756	
2. Special nuclear materials	35,090,845	132,094,093	$75,000,000
3. Weapons	48,374,322	58,085,230	
4. Reactor development	100,866,621	210,516,286	18,800,000
5. Physical research	14,772,545	55,646,197	19,025,000
6. Biology and medicine	1,245,068	2,339,702	
7. Training, educaton, and information	2,710,965	1,789,035	
8. Isotopes development		1,600,000	
9. Communities	5,206,757	2,785,745	
10. Administration	4,073,301	650,438	
Total obligations	213,085,805	465,923,482	112,825,000
Financing:			
Unobligated balance brought forward	−308,028,598	−222,864,482	−10,825,000
Unobligated balance transferred from "Access roads, act of September 7, 1950," Bureau of Public Roads, Department of Commerce (67 Stat. 187)	−341,189		
Recovery of prior year obligations	−19,418,000	−3,955,000	
Unobligated balance carried forward	222,864,482	10,825,000	
Appropriation (new obligational authority)	108,162,500	249,929,000	102,000,000

From this appropriation the Commission constructs plant and facilities for its production, research, and supporting operations. Since the Atomic Energy Act of 1954 requires statutory authorization of appropriations for plant acquisition and construction, obligations are estimated in 1960 only for projects for which appropriations have already been authorized. New obligational authority in the amount of $102,000,000 is being requested in 1960 for such previously authorized projects. Projects authorized under activities 1, 3, 6, 7, 8, 9, and 10 have

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

been fully funded, and no additional obligational authority is requested at this time.

Excluded from the 1960 estimated obligations are amounts for projects for which legislative authorization will be sought for 1960 but which has not yet been received. A supplemental appropriation of $126 million is anticipated for these projects after appropriations are authorized (see Proposed for later transmission).

1. *Raw materials.*—This activity provides for minor construction to support the Government-owned procurement installations.

2. *Special nuclear materials.*—This activity provides for additions, modifications, and improvements to the feed materials plants, the gaseous diffusion plants, and the production reactor installations. Obligational authority requested in 1960 will provide funding for previously authorized projects.

3. *Weapons.*—This activity provides for the construction and modification of facilities for the production of weapons, for the storage of completed weapons, and for the development and engineering of new weapon types.

4. *Reactor development.*—This activity provides for the construction of laboratory buildings for fundamental engineering work on reactor concepts and materials, facilities for the housing of reactor experiments, civilian power experimental reactors generating electrical energy or producing over 10,000 kilowatts of heat, prototype power reactors as part of the cooperative arrangements program between the Commission and industry, prototype reactors for military purposes, and construction of testing and development installations. Obligational authority requested in 1960 provides for (*a*) modifications to civilian power reactor experiments and (*b*) continued construction of a land prototype reactor for a destroyer.

5. *Physical research.*—This activity provides for construction of large research machines and laboratory buildings to further research in physics, chemistry, and metallurgy. It includes construction of ultra-high energy particle accelerators in the multibillion electron-volt range which will assist in obtaining new knowledge about the atomic nucleus and the elementary particles. Obligational authority requested in 1960 provides funding for projects previously authorized including the multibillion electron-volt accelerator at the Argonne National Laboratory, the alternating gradient synchrotron at the Brookhaven National Laboratory, and accelerator improvements at the University of California Radiation Laboratory.

6. *Biology and medicine.*—This activity provides for construction of research facilities for atomic research in the fields of medicine, biology, and biophysics.

7. *Training, education and information.*—This activity provides for construction of minor facilities in connection with the Commission's training program.

8. *Isotopes development.*—This activity provides for construction of facilities for research and development activities directed toward accelerating realization of the potential of radioisotopes.

9. *Communities.*—This activity provides for construction of community facilities in the Commission-operated towns of Richland, Wash., Oak Ridge, Tenn., and Los Alamos, N. Mex.

10. *Administration.*—This activity provides for construction necessary to house the administrative activities of the Commission at headquarters and in the field.

The costs to this appropriation and the financing of these projects are analyzed in the following table:

PROGRAM BY ACTIVITIES

[In thousands]

	Costs to this appropriation					Analysis of 1960 financing			
	Total estimate	To June 30, 1957	1958 actual	1959 estimate	1960 estimate	Deduct selected resources and unobligated balances, start of year	Add selected resources, end of year	Appropriation required for 1960	Appropriation required to complete

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
"Operation and maintenance, Army."
"Procurement of equipment and missiles, Army."
"Research, development, test, and evaluation, Army."
"Military construction, Army."
"Ships and facilities, Navy."
"Shipbuilding and conversion, Navy."
"Navy management fund."
"Procurement other than aircraft and missiles, Air Force."
"Ship construction," maritime activities, Department of Commerce.
"Research and development," Office of Civil and Defense Mobilization.
"Mutual security," funds appropriated to the President.

GENERAL PROVISIONS

Any appropriation available under this or any other Act to the Atomic Energy Commission may initially be used subject to limitations in this Act during the fiscal year [1959] *1960* to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with [general] *generally* accepted accounting principles.

Not to exceed 5 per centum of any appropriation herein made to the Atomic Energy Commission may be transferred to any other such appropriation, but no such appropriation shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

No part of any appropriation herein made to the Atomic Energy Commission shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*42 U. S. C. 2011; Supplemental Appropriation Act, 1959.*)

Public enterprise funds:

DEFENSE PRODUCTION GUARANTIES

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Administrative expenses (total costs—obligations)	$606	$1,000	$1,000
Financing:			
Amounts becoming available: Revenue and receipts: Guaranty and commitment fees	95,352	65,347	25,741
Unobligated balance brought forward	341,303	436,049	500,396
Total amounts available	436,655	501,396	526,137
Unobligated balance carried forward	−436,049	−500,396	−525,137
Financing applied to program	606	1,000	1,000

Guaranties are given on loans made by private sources to provide construction funds and working capital for defense production plants. At the beginning of 1958 guaranteed credit amounting to $7.4 million was available to 3 borrowers; at year end $5.2 million was available to 3 borrowers. Guaranties of 80% to 95% were in force on these loans. It is estimated that in 1959 and 1960 guaranties will be in force on 5 loans for which the total amount of guaranteed credit available at the end of each year will be $3 million and $1 million, respectively.

Net earnings are retained to meet possible future losses (50 U. S. C. App. 2091 and 2092).

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
Administrative expenses	$606	$1,000	$1,000
Receipts from operations (funds provided):			
Guaranty and commitment fees	95,352	65,347	25,741
Budget expenditures	−94,746	−64,347	−24,741

Revenue, Expense, and Retained Earnings

Revenue	$95,352	$65,347	$25,741
Expense	606	1,000	1,000
Net income for the year	94,746	64,347	24,741
Retained earnings, beginning of year	341,303	436,049	500,396
Retained earnings, end of year	436,049	500,396	525,137

Financial Condition

Assets:			
Cash with Treasury	$436,049	$500,396	$525,137
Government investment:			
Retained earnings	436,049	500,396	525,137

Status of Certain Fund Balances

OPERATING EXPENSES

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Reactor development (total program costs)			$8,000,000
2. Relation of costs to obligations: Obligations incurred for costs of other years (unpaid undelivered orders), net			15,500,000
Total program (obligations)			23,500,000
Financing:			
Proposed supplemental appropriation			23,500,000

Under proposed legislation, 1960.—Public Law 85-846, the Euratom Cooperation Act of 1958, authorized initiation of a joint nuclear power program between the United States and the European Atomic Energy Community. In 1960, additional authorization of appropriations in the amount of $23.5 million will be proposed. Upon enactment, a supplemental appropriation in the same amount is anticipated to finance the research and development participation of and fuel fabrication guaranties by the United States as set forth in the joint program.

2. *Relation of costs to obligations.*—The year-end balance of unpaid undelivered orders for 1960 is $15,500,000.

PLANT ACQUISITION AND CONSTRUCTION

10. Administration			700,000
Total obligations			126,000,000
Financing:			
Proposed supplemental appropriation			126,000,000

Under proposed legislation, 1960.—New obligational authority in the amount of $126 million is anticipated after congressional consideration of the Commission's request for authorization of additional appropriations for construction. Of this amount, $65.6 million is expected to be proposed for improvements and additions to existing production plants to increase production and safety and decrease unit costs, and for additional weapons production and development facilities. Proposed also are $35.4 million for facilities related to reactor development including 2 army power reactors, modifications for 2 test reactors, and test facilities for missile propulsion; $18 million for research facilities in the physical, biological and medical fields, including a new large research reactor; $3.4 million for facilities for the isotope development program; and $3.6 million for other projects under supporting programs.

CENTRAL INTELLIGENCE AGENCY

Current authorizations:

CONSTRUCTION

Program and Financing

The Board regulates the economic aspects of air carrier operations, both domestic and international; investigates aircraft accidents; participates in the development of international air transportation; and participates in the development of safety rules and standards. The increase proposed for 1960 is for continuing on a full-year basis the staff increases authorized in 1959 and for additional expansion in certain critical program areas, primarily in the routes, commercial rates, international civil aviation, enforcement and safety areas.

1. *Economic regulation.*—This includes granting certificates of public convenience and necessity; prescribing or approving rates and rate practices of air carriers; fixing mail rate compensation; prevention of unfair competition; and approval of business relationships between air carriers.

2. *Safety activities.*—These consist of adjudication of complaints alleging violations of Civil Air Regulations; the investigation of civil aircraft accidents involving aircraft of over 12,500 pounds or causing fatalities, the determination of probable cause in all civil aircraft accidents; and the investigation of potential hazards and recommendation of preventive measures to avoid accidents in the future.

3. *Legal staff activities.*—Legal advice and assistance is provided on all aspects of economic, regulatory and safety activities; opinions of the Board are prepared; and litigation matters are handled.

The Board fixes rates for transportation of airmail to promote the development of air transportation required for the commerce of the United States, the postal service, and the national defense. Many of these rates include an element of subsidy. The subsidy portion is paid by the Civil Aeronautics Board, and the service portion is paid by the Post Office Department.

The increase proposed for 1960 is primarily for the local service carrier group and reflects additional increased operating costs, estimated additional route awards, and costs associated with the acquisition of new aircraft. Subsidy requirements of Alaskan operations will not be affected by statehood.

The obligations shown above, less the obligated balances recovered, reflect the amounts recorded each year as due the air carriers. These sums cover services performed during the year, computed at rates then in effect, plus or minus such adjustments as are needed to reflect the issuance, during the year, of final rate orders affecting prior years. Approximately 1 to 2 months of obligations are due but unpaid at the end of any year. A supplemental estimate of $18.1 million is anticipated under Proposed for later transmission to liquidate those unfunded obligations which are anticipated to arise during the current fiscal year and for which carriers will have presented bills.

The following table reflects the estimated amounts becoming due finally for each year, together with the adjustments between years:

ESTIMATED SUBSIDY EARNINGS AND OBLIGATIONS RELATED TO APPROPRIATIONS

	1958 actual	*1959 estimate*	*1960 estimate*
Estimated subsidy earnings under final Board action:			
Domestic trunklines	$2,852,613	$1,228,572	
Local service operations	33,339,400	36,703,699	$48,957,544

Hawaiian operations	116,160	389,279	
International operations	834,310	830,715	827,017
Total earnings	48,319,491	51,329,867	61,785,555
Earnings in prior years recorded within the year	3,345,081	10,757,498	2,328,774
Reduction of earnings recorded in prior years	−101,542	−2,090,755	−247,638
Earnings of the year recorded in later years	−7,985,616	−1,415,720	−632,108
Total obligations (less recoveries)	43,577,414	58,580,890	63,234,583

The following analysis shows the subsidy outlook for 1960 under final Board actions:

CARRIER UNITS

	Non-subsidized	*Subsidized*	
Domestic:			A small payment will be made to one domestic trunkline in 1960 for 1959 subsidy earnings. Subsidy need for local service and helicopter operations has increased as a result of certification of new feeder services and increasing costs.
Domestic trunklines	12	--	
Local service operations	--	13	
Helicopter operations	--	3	
Territorial:			Subsidy will continue to support routes between continental United States and Alaska and to remote locations.
Alaskan operations	1	7	
Hawaiian operations	2	--	
International	10	1	All international carriers have been in a nonsubsidized status since 1957, with the exception of Braniff Airways' services to South America.

CIVIL SERVICE COMMISSION

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses, including not to exceed $22,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $10,000 for medical examinations performed for veterans by private physicians on a fee basis; not to exceed [$100] *$400* for the purchase of newspapers and periodicals (excluding scientific, technical, trade or traffic periodicals, for official use); payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; not to exceed [$70,000] *$77,000* for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); reimbursement of the General Services Administration for security guard services for protection of confidential files; not to exceed [$472,000] *$560,000* for expenses of travel; and not to exceed $5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; [$18,200,000] *$20,165,000.*

No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order 9358 of July 1, 1943. Proposed supplemental due to pay increases		1,626,000	

1. *Recruiting and examining.*—Most appointments in the competitive civil service are made under the open competitive merit system through examinations held by the offices of the Commission and its boards of examiners, made up of agency personnel operating under the supervision and direction of the Commission. Appointments through such competitive examinations will accord career or career-conditional status. Although total Federal employment will decline somewhat from the 1958 level, new hires will increase in 1959 and 1960 as the turnover rate increases slightly from the unusually low experience of last year. The number of competitive placements is also expected to increase as the amount of direct agency hiring decreases from 53,846 in 1958 to 31,200 in 1960. Physically handicapped persons are given special placement attention. Veterans are aided in securing the benefits to which they are entitled. An employees' incentive awards program is conducted to stimulate and pursue the development of new and improved methods and ideas.

PRODUCTION COUNT

	1958 actual	*1959 estimate*	*1960 estimate*
Examinations announced by—			
The Commission	3,922	4,400	4,500
Boards of examiners	5,311	5,200	5,500
Total	9,233	9,600	10,000
Applications processed by—			
The Commission	706,110	592,000	592,000
Boards of examiners	1,032,860	1,205,300	1,326,000
Total	1,738,970	1,797,300	1,918,000
Placements made by—			
The Commission	83,872	71,845	73,000
Boards of examiners	122,836	177,387	189,100
Total	206,708	249,232	262,100

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system.

Federal Reserve Bank of St. Louis

PRODUCTION COUNT

	1958 actual	1959 estimate	1960 estimate
National agency check and inquiry cases	255,844	265,600	265,600
Suitability cases resulting from national agency check and inquiry	7,759	6,950	6,950
Other personal investigations	6,502	6,600	6,600

3. *Inspections and classification audits.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. It also conducts classification surveys to insure compliance with classification standards.

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act and other benefit acts involves adjudicating annuity, death, benefit, refund, and deposit claims as well as maintaining the control accounts for the fund and making payments to annuitants and other claimants. Public Law 85–465, approved June 25, 1958, providing for annuities to certain widows and widowers, will increase the number of death claims received in 1959. Funds available for 1959 will finance the workloads shown below. However, a much larger workload is anticipated and a supplemental to cover it is proposed for later transmission.

PRODUCTION COUNT

	1957 actual	1958 actual	1959 estimate	1960 estimate
Annuity and death claims	80,621	93,601	128,850	111,100
Refund claims	201,087	210,321	166,970	205,000
Claims for deposit	30,536	42,732	27,075	34,000
Inquiries answered	224,203	228,034	208,400	233,500

5. *Developing programs and standards.*—The Commission develops programs, devises tests, issues standards and regulations, and proposes legislation to improve the Federal personnel system for both competitive and noncompetitive positions.

6. *Appellate functions.*—These consist of hearing and taking action on appeals; administering the political activities statutes; and providing advice to agencies and individuals regarding rights of appeal.

8. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1957, $101,042; 1958, $287,804; 1959, $173,300; 1960, $198,300.

Investigation of United States Citizens for Employment by International Organizations

For expenses necessary to carry out the provisions of Executive Order No. 10422 of January 9, 1953, as amended, prescribing procedures for making available to the Secretary General of the United Nations, and the executive heads of other international organizations, certain information concerning United States citizens employed, or being considered for employment by such organizations, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [$350,000] *$412,000*; *Provided*, That this appropriation shall be available for advances or reimbursements to the applicable appropriations or funds of the Civil Service Commission and the Federal Bureau of Investigation for expenses incurred by such agencies under said Executive order: *Provided further*, That members of the International Organizations Employees Loyalty Board may be paid actual transportation expenses, and per diem in lieu of subsistence authorized by the Travel Expense Act of 1949, as amended, while traveling on official business away from their homes or regular places of business, including periods while en route to and from and at the place where their services are to be performed: *Provided further*, That nothing in sections 281 or 283 of title 18, United States Code, or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of appointment for part-time or intermittent service as a member of the International Organizations Employees Loyalty Board in the Civil Service Commission as established by Executive Order 10422, dated January 9, 1953, as amended. (*Independent Offices Appropriation Act, 1959.*)

Appropriated 1959, **$350,000** Estimate 1960, **$412,000**

Program and Financing

New obligational authority:			
Appropriation	$493,000	$350,000	$412,000
Proposed supplemental due to pay increases		5,000	

This appropriation is used primarily to pay the Civil Service Commission and the Federal Bureau of Investigation for conducting investigations of United States citizens considered for employment in international organizations of which the United States Government is a member. The reports of these investigations are forwarded to the International Organizations Employees Loyalty Board of the Civil Service Commission which makes advisory determinations under the loyalty standard. The advisory determinations are transmitted, through the Secretary of State, to the Secretary General of the United Nations, or the executive heads of other international organizations.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1957, $19,796; 1958, $23,214; 1959, $25,600; 1960, $25,600.

Workload receipts for 1959 are expected to exceed levels which can be covered by funds available and a supplemental appropriation is anticipated under Proposed for later transmission.

Financing applied to program	10,017,786	8,833,401	8,085,000

This fund finances on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (66 Stat. 107).

Budget program.—Because work on some investigations will be started in one year and completed in another, work-in-process is recognized as an asset of the fund. Agency estimates of investigations to be requested in 1959 and 1960 as compared to 1958 experience, are presented below. In addition, the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1958 actual	*1959 estimate*	*1960 estimate*
On hand, beginning of year	6,788	4,195	3,595
Received	30,064	26,000	24,250
Total workload	36,852	30,195	27,845
Processed	32,657	26,600	24,550
On hand, end of year	4,195	3,595	3,295
Average positions	1,338	1,109	1,022
Unit cost	$314	$335	$335

The estimated increase in costs for 1959 and 1960 results to a great extent, from the new salary schedules which are reflected in Public Law 85-462, approved June 20, 1958.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table.

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Advances	$65,629	$53,793	$45,000	$45,000
Work-in-process	126,699	498,937	449,375	411,875
Unpaid undelivered orders	64,582	28,744	25,000	25,000
Total selected resources at end of year	256,910	581,474	519,375	481,875
Selected resources at start of year (−)		−256,910	−581,474	−519,375
Costs financed from obligations of other years, net (−)			−62,099	−37,500
Obligations incurred for costs of other years, net		324,564		

Operating results and financial conditions.—The capital of the fund consists of $4 million appropriated in 1952. Excess earnings are paid into miscellaneous receipts of the Treasury.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
Acquisition of equipment	$160,440	$90,000	$5,000
Expense	9,905,020	8,755,938	8,080,000
Increase in selected working capital		330,426	
Total gross expenditures	10,065,460	9,176,364	8,085,000

1. *Investigation and study of civil rights matters.*—The Commission on Civil Rights is responsible for investigating allegations made that citizens are being deprived of their right to vote by reason of their color, race, religion, or national origin; collecting information concerning legal developments constituting a denial of equal protection of the laws under the Constitution; and appraising laws and policies of the Federal Government on equal protection of the laws. Under present law the Commission's final report to the President and Congress is due by September 9, 1959. The Commission ceases to exist 60 days thereafter. Legislation will be submitted to Congress extending the life of the Commission and a supplemental appropriation is anticipated under Proposed for later transmission.

2. *Relation of costs to obligations.*—The year-end balance of unpaid undelivered orders for 1959 is $23,500.

Investigation and study of civil rights matters (total costs—obligations)			$500,000
Financing:			
Proposed supplemental appropriation			500,000

Under proposed legislation, 1960.—Proposed legislation will be transmitted to the Congress recommending that the Commission on Civil Rights be extended. Under current provisions of law, the Commission is required to make its final report to the President and Congress by September 9, 1959, and will cease to exist 60 days thereafter. The extension will enable the Commission to make more thorough investigation and study within the terms of the act, and to submit a more complete and comprehensive report.

The Export-Import Bank of Washington facilitates the financing of United States exports and imports. To do this it participates in or guarantees credits extended by United States exporters, commercial banks, and other financial institutions to foreign purchasers of exports from the United States. It makes direct loans to finance United States exports and imports. It also insures certain exports on consignment against risks of war and expropriation. The total amount of loans, guaranties, and insurance which the Bank may have outstanding at one time is $7 billion (12 U. S. C. 635).

The Bank's policy is to extend credit only when private capital is unavailable. It encourages private participation in the credits extended. Loans generally are made only for specific purposes or projects. No loan is made unless the Directors believe it has reasonable assurance of repayment.

Budget programs—Development project loans.—A major portion of the Bank's assistance for the exportation of United States materials, equipment, and services is in the form of medium and longer term credits for development projects abroad. These loans not only finance export sales, but lay the foundation for expanded future trade as foreign economies become stronger. It is estimated that 58 loans will be authorized by the Bank during 1960 to finance exports for such projects abroad involving power, agriculture, transportation, and industrial development.

DATA ON DEVELOPMENT PROJECT LOANS

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*

Loan disbursements	-------	5.0	60.0
Loan principal repayments	1.1	.5	1.5
Loans outstanding June 30	1.0	5.5	198.4

Exporter loans.—Medium-term credits requested by exporters are authorized on a case-by-case basis to assist United States manufacturers and exporters to sell abroad on deferred payments. Under each of these credits the Bank participates with an exporter or a United States bank in jointly financing an export sale. Such loans authorized in 1958 included credits to finance a wide range of capital goods shipped to countries throughout the world.

Some exporter credits are arranged on an individual basis, whereas others are provided under exporter credit lines. The Bank has continued to establish and renew exporter credit lines for individual exporters of capital equipment. The recipient of such a line knows in advance of new foreign sales how much assistance he will be able to obtain for such sales as are made on credit, provided that criteria on the type of export and the credit standing of the importer are met.

Emergency foreign trade loans.—From time to time the Bank is called upon to provide financial assistance to meet emergency situations adversely affecting normal trade between the United States and another country. Such loans may take the form of lines of credit to a foreign central bank or other bank or financial institution to provide dollar exchange for a wide range of United States exports; credits to fund commercial arrearages resulting from dollar exchange difficulties; or credits to assist in financing purchases in the United States required for reconstruction abroad following a national disaster. The estimate of emergency credits for 1959 is $221 million, and $220 million for 1960.

Federal Reserve Bank of St. Louis

Substantial emergency credits to European countries were disbursed during the years immediately following World War II, and have been established in favor of some Latin American countries following the recent decline in earnings by raw material exporting countries.

	1958 actual	*1959 estimate*	*1960 estimate*
Export-Import Bank funds:			
Credit authorizations	$165.5	$221.0	$220.0
Loan disbursements	332.0	223.5	231.0
Loan principal repayments	120.5	177.4	185.9
Loans outstanding June 30	1,642.1	1,688.1	1,733.2

Insurance.—The Bank insures against the risks of war and expropriation the property of United States exporters which is held abroad on consignment awaiting sale. A total of 1,194 policies were issued by the Bank in 1958 covering 246,681 bales of cotton valued at $41,794,979. Early in 1959 the coverage was expanded to include tobacco. It is estimated that policies covering cotton and tobacco to a value of $50,000,000 will be issued in 1960.

Administrative expenses.—The administrative expense limitation proposed by the Bank to cover its needs for 1960 is $2,500,000, an increase of $284,553 over 1959. The estimated additional costs are for personal services and other administrative costs attributable to expanded operations.

Other operations.—The Bank serves as administering agent for mutual security loans and guaranties against currency transfer risk and expropriation authorized by the International Cooperation Administration and for defense production loans made by the Office of Civil and Defense Mobilization. It also acts as collecting agent for the Treasury on the debt settlement agreement with the Federal Republic of Germany.

Financing.—The Bank is a Government-owned corporation in which the Treasury has invested $1 billion in capital stock. It can borrow up to $6 billion from the Treasury on a revolving basis. On June 30, 1958, the amount borrowed from the Treasury was $1,508 million. Notes outstanding on June 30, 1960, are expected to be increased to $1,802.8 million.

On June 30, 1960, the total amount committed is estimated to be $5,404.5 million, leaving a margin of $1,595.5 million for additional commitments. It is estimated that the unobligated balance at June 30, 1960, of the Bank's authorization to borrow from the Treasury will be $2,551.3 million.

POSITION WITH RESPECT TO LENDING, GUARANTY, AND INSURANCE AUTHORITY

	1958 actual	*1959 estimate*	*1960 estimate*
Statutory authority	$7,000,000,000	$7,000,000,000	$7,000,000,000
Charges against authority:			
Direct loans outstanding	3,029,191,832	3,332,600,000	3,518,500,000
Guaranteed loans outstanding	11,082,923	11,100,000	145,500,000
Undisbursed loan commitments:			
Agreements executed	1,283,755,250	1,589,300,000	1,527,500,000
Agreements not executed	140,584,125	92,000,000	208,000,000
Unexpired insurance policies	3,306,468	5,000,000	5,000,000
Total charges against authority	4,467,920,598	5,030,000,000	5,404,500,000
Unused authority[1]	2,532,079,402	1,970,000,000	1,595,500,000

[1] Includes administrative reserve for insurance: 1958, $46,693,532; 1959, $45,000,000; 1960, $45,000,000.

Operating results and financial condition.—During 1960 the net income of the Bank is expected to amount to $87.6 million. The budget provides for continuation of dividend payments to Treasury of $22.5 million annually through 1960 in lieu of interest on the Treasury investment in the Bank's capital stock. The remaining earnings are retained to meet future contingencies. Net investment of the Government in the corporation is expected to be $3,436.7 million at the end of 1960, consisting of $1 billion in capital stock, $1,802.8 million of borrowings from Treasury, and $633.9 million of retained earnings, available for future contingencies.

It is anticipated that the Bank's loan disbursements and other payments will exceed loan collections and other receipts by $250 million in 1959. In 1960 it is estimated that collections and sales of loans will equal disbursements resulting in no net budget expenditure.

LIMITATION ON ADMINISTRATIVE EXPENSES, EXPORT-IMPORT BANK OF WASHINGTON

Not to exceed [$2,055,000] *$2,500,000* (to be computed on an accrual basis) of the funds of the Export-Import Bank of Washington shall be available during the current fiscal year for administrative expenses of the Bank, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed $75 per diem for individuals, and not to exceed $9,000 for entertainment allowances for members of the Board of Directors when specifically authorized by the Chairman of the Board; and, in addition, not to exceed the equivalent of $200,000 of the aggregate amount of foreign currencies made available to the Export-Import Bank for loans pursuant to the Agricultural Trade Development and Assistance Act of 1954, as amended, shall be available during the current fiscal year for expenses incurred by the Export-Import Bank [in foreign countries] incident to such loans: *Provided*, That fees or dues to international organizations of credit institutions engaged in financing foreign trade and necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Bank or in which it has an interest, including expenses of collections of pledged collateral, or the investigation or appraisal of any property in respect to which an application for a loan has been made, shall be considered as nonadministrative expenses for the purposes hereof. (*Supplemental Appropriation Act, 1959.*)

Reorganization Plan No. 2 of 1954 relating to the liquidation of the Reconstruction Finance Corporation transferring certain foreign bonds, notes, and securities to the Export-Import Bank became effective as of close of business June 30, 1954.

Liquidating proceeds of these assets are paid to the Treasury, and are not available for future borrowing. Revenue and other receipts are estimated to amount to $7,685,482 in 1959 and $6,283,533 in 1960, thereby reducing the net investment of the United States Government to $9,043,418.

The Export-Import Bank administers foreign currency loans to American firms for business development, and to domestic or foreign firms for facilities aiding in the utilization of United States agricultural products abroad. These loans are made from a share of the proceeds of the sale abroad of surplus agricultural commodities as authorized by the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U. S. C. 1691–1724).

This program was initiated in 1958. Currencies are now available under sales agreements signed over the past year for lending in substantial volume. A moderate increase is anticipated for 1960 as currencies become available under additional sales agreements.

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

Provision is made for supervision and examination of: 12 Federal land banks (wholly farmer-owned); 13 banks for cooperatives (mixed ownership); 12 Federal intermediate credit banks (mixed ownership); the Federal Farm Mortgage Corporation (wholly Government-owned); 904 national farm loan associations; and 497 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

The Corporation is in liquidation, its only remaining activity being the collection of non-interest-bearing notes sold to Federal land banks on June 30, 1955, and paying the proceeds as dividends to Treasury. Its mineral interests with the exception of two in the St. Paul district which are in litigation, were transferred to the Department of the Interior during 1958.

Operating results.—The retained earnings at the end of 1960, after making dividend payments to the Treasury of $1.7 million, are expected to be $4.1 million. Payments will continue to be made to the Treasury until final liquidation.

Financing applied to program	600,000	5,000,000	4,750,000

This fund is available to Farm Credit Administration as a revolving fund for investment in capital stock of the Federal intermediate credit banks (12 U. S. C. 1061 (a) (1), 1131i (e)).

Budget program.—Funds will be required for investment in class A stock of the banks. The estimate of requirements is based on recent projections made by the 12 intermediate credit banks which indicate that several of the banks will need additional capital in order to keep their debt-to-capital ratios within the 10 to 1 maximum permitted by law.

Financing.—Purchases of stock will continue to be made out of the current authorization of $40,000,000. Under section 105 (d) (3) of the Farm Credit Act of 1956, the revolving fund authorization eventually will be increased to $70,000,000. The increase of $30,000,000 will be made available from the retirement of class A stock outstanding as of January 1, 1957. However, of the $87,405,000 of class A stock outstanding as of January 1, 1957, $57,405,000 must first be paid into the Treasury as miscellaneous receipts; when the balance is reduced to $30,000,000 the remaining proceeds will be credited to the revolving fund.

Financing applied to program	2,210,000	6,000,000	6,000,000

This fund is available to the Governor of Farm Credit Administration for investment in class A and class C stock of production credit associations and is designed to enable the Farm Credit Administration to supply capital needs which cannot be met by an association from local sources (12 U. S. C. 1131i (a)).

Budget program.—An estimate for purchase of stock in production credit associations of $6 million is made for both 1959 and 1960. The need arises primarily because the volume of business of associations is increasing more rapidly than net worth can be accumulated from local sources.

Financing.—Of the $60,000,000 in the fund authorized for financing the capital needs of the production credit associations, it is estimated that $9,310,000 will have been invested by the end of 1959. An additional $4,000,000 net investment in the associations is expected in 1960, leaving an unobligated balance of $46,690,000 available for future purchases of stock.

Financing applied to program			

This fund is available to the Governor of the Farm Credit Administration for investments in class A capital stock of the banks for cooperatives (12 U. S. C. 1134).

Budget program.—No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with section 42 (a) (1) of the Farm Credit Act of 1933, as amended.

Operating results and financial condition.—Investments in capital stock will continue to be reduced through 1960, thereby increasing the cash of the fund. Earnings are retained to provide for the future purchase of stock.

Mixed-Ownership Corporations

BANKS FOR COOPERATIVES

The banks for cooperatives make loans to finance the operations of farmers' cooperatives. The banks' capital funds are from the Agricultural Marketing Act revolving fund and from borrowing farmers' cooperative associations (12 U. S. C. 1134). The Farm Credit Act of 1955 provides for eventual ownership of the banks by farmers' cooperatives and the retirement of the United States Government investment.

No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with the act. Repayments of $6,788,800 have been made for 1959, and it is estimated that $7,000,000 will be retired in 1960. As of June 30, 1958, the United States Government owned capital stock in the banks in the amount of $141,587,500.

STATEMENT OF FINANCIAL CONDITION AS OF JUNE 30, 1958

Assets:			
Cash			$17,472,639

FEDERAL AVIATION AGENCY

The Federal Aviation Agency was created by the Federal Aviation Act of 1958. Its functions include the promotion and regulation of civil aviation through (*a*) management of the use of navigable airspace and the regulation of both civil and military operations in such airspace; (*b*) installation and operation of aids to air navigation and traffic control for civil and military aircraft; (*c*) the conduct of research to develop facilities required to modernize the systems and devices used in assuring safety in aviation; (*d*) certification as to the competency of airmen and the airworthiness of aircraft; (*e*) development of standards and rules designed to promote safety; and (*f*) the administration of grants for airport construction.

The new agency came into existence on August 23, 1958. It has since assumed the functions of the Civil Aeronautics Administration and the Airways Modernization Board. It has also assumed the responsibilities of the Civil Aeronautics Board relating to the promulgation of air safety regulations. Further transfers, chiefly relating to the control of military air traffic, are anticipated but have not been developed to the point where they can be reflected in the budget.

Current authorizations:

[OPERATION AND REGULATION] *EXPENSES*

For necessary expenses of the [Civil Aeronautics Administration in carrying out the provisions of the Civil Aeronautics Act of 1938, as amended (49 U. S. C. 401), and other Acts incident to the enforcement of safety regulations, maintenance and operation of air navigation and air traffic control facilities, and disposal of surplus airports and administering instruments of disposal; planning, research, and] *Federal Aviation Agency, not otherwise provided for, including* administrative expenses for *research and development and for establishment of air navigation facilities, and* carrying out the provisions of the Federal Airport Act [of May 13, 1946, as amended, including furnishing advisory services to States and other public and private agencies in connection with the construction or improvement of airports and landing areas; developmental work and service testing as tends to the creation of improved air navigation facilities, including landing areas, aircraft, aircraft engines, propellers, appliances, personnel, and operation methods, and acquisition of sites for such activities by lease or grant]; purchase of [not to exceed forty] *one* passenger motor [vehicles for replacement only; purchase of not to exceed two aircraft; hire of aircraft (not exceeding $675,000); operation and maintenance of not to exceed one hundred and twelve aircraft; fees and mileage of expert and other witnesses] *vehicle at not to exceed $3,500*; and purchase and repair of skis and snowshoes; [$230,000,000] *$326,400,000*: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, [and] other public authorities, *and private sources*, for expenses incurred in the maintenance and operation of air navigation facilities [: *Provided further*, That the Administrator is authorized, subject to the procedures prescribed in the Classification Act of 1949, as amended, but without regard to the numerical limitations contained therein, to place ten General Schedule positions in the following grades: one in grade GS–18, two in grade GS–17, and seven in grade GS–16; and such positions shall be in addition to positions previously allocated to this agency under section 505 of said Act]. (*Public Law 85–726; 49 U. S. C. 1101; 49 U. S. C. 1151–1160; 50 U. S. C. 1622 a, b, c; 50 U. S. C. 1622 (g); Convention on International Civil Aviation (61 Stat. 1180); Public Law 85–507; Department of Commerce and Related Agencies Appropriation Act, 1959.*)

Proposed supplemental due to pay increases		16,623,000	

1. *Traffic management and facilities maintenance.*—This is a program of maintaining and operating, 24 hours daily, a national network of aids to air navigation and traffic control along the primary air routes and at principal airports in the continental United States, its Territories and possessions. Major increases in 1960 are for (*a*) handling workload generated by increased air traffic; (*b*) operating newly commissioned radar, navigation aids, and other airways facilities procured and installed with funds appropriated under Establishment of air navigation facilities; (*c*) training of traffic control and maintenance personnel; and (*d*) full-year costs of facilities and services operated on a part-year basis in 1958.

2. *Research direction.*—This covers direction and administration of an accelerated research and development program for improving the national system of aviation facilities.

3. *Flight operations and airworthiness.*—Inspections and certifications are made of aircraft, airmen, and operators of aircraft and air agencies, including the establishment of the civil air regulations which are designed to provide safe and competent operation of aircraft. Increases in 1960 are for handling workload incident to the increased volume of flying and the introduction of new types of aircraft.

4. *Administration of airport program.*—This activity includes costs of administering grants for airport construction; inspection of airport facilities to determine their utility and to assure compliance with law and regulations; and the provision of advisory services on airport design and engineering.

RECENT TRENDS IN VOLUME OF AIR TRAFFIC

Total obligations	120,363,628	105,000,000	142,500,000

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance brought forward	−$16,866,134	−$21,406,031	−$74,906,031
Unobligated balance transferred from "Grants-in-aid for airports, Federal Airport Act" (72 Stat. 243)	−300,000		
Unobligated balance carried forward	21,406,031	74,906,031	77,406,031
Appropriation (new obligational authority)	124,603,525	158,500,000	145,000,000

The Federal airways system is being improved by the procurement and installation of new equipment and the modernization of existing facilities. The 1960 estimate is to carry forward a program begun in 1957 which is designed to expand the capacity of the airways system to handle growing air traffic efficiently and safely.

The cost of operating and maintaining equipment installed under this appropriation is covered by the appropriation Expenses, Federal Aviation Agency.

1. *Air navigation facilities.*—(*a*) *VORTAC* covers the ground installation portion of the standard short-range navigation system which defines the location of the principal airways and gives pilots of equipped aircraft their distance and direction from ground stations; (*b*) *Low/medium frequency radio ranges and markers* include radiobeacons, ranges and associated equipment which provide pilots of equipped aircraft with direction information and define the location of certain airways; (*c*) *Instrument landing systems* cover the ground installations of this standard system which provide pilots with direction, distance, and glide slope information necessary for making approaches to runways under conditions of poor visibility; (*d*) *Approach lighting* consists of a row of lights extending outward from runways to aid pilots during landings; and (*e*) *Intermediate fields* are chiefly emergency landing areas provided on certain air routes at locations where provision of such facilities by local governing bodies cannot be obtained.

2. *En route traffic control aids.*—(*a*) *Long-range radar* aids en route air traffic control by displaying positions of aircraft at distances up to 230 miles; (*b*) *Air route traffic control centers* are facilities, including structures and equipment such as air/ground radio, which are used in controlling air traffic over extensive geographical areas; (*c*) *Air traffic communications stations* include structures, communications and other equipment used to relay traffic control information and to provide other flight assistance to pilots; and (*d*) *International air traffic communications stations* include structures and long-range communications equipment for providing flight assistance and controlling traffic on transoceanic international routes.

3. *Terminal area traffic control aids.*—(*a*) *Airport traffic control towers* include air/ground communications and other gear required to equip towers for controlling traffic on and around airports; and (*b*) *Terminal area radar* aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 70 miles.

4. *Supporting facilities.*—(*a*) *Flight inspection and logistics aircraft* are used to flight check accuracy and other characteristics of navigation and traffic control aids, and also to provide logistic support for remote facilities; and (*b*) *Housing, utilities and miscellaneous facilities* are necessary at remote locations. Included are other items not covered elsewhere.

The following table lists the major facilities already funded and those budgeted in 1960:

	1958 actual	1959 estimate	1960 estimate
Unfunded balance at beginning of year	$75,500,000	$113,500,000	$146,500,000
Contract authorization (new) (permanent)	63,000,000	63,000,000	
Unfunded balance at end of year	−113,500,000	−146,500,000	−96,500,000
Appropriation to liquidate contract authorization	25,000,000	30,000,000	50,000,000

Grants are made to local sponsors for construction at airports which are part of a national system capable of meeting the needs of civil aviation and nontactical military operations. Authorizations of $465.8 million have been provided for the years 1947 through 1959. New legislation will be proposed to provide additional authority for subsequent years with provision for an orderly withdrawal from the program by 1964. The following tabulation summarizes activity under the act.

[Dollars in millions]

		1959 estimate		*1960 estimate*	
	1947 through 1958 actual	*Appropriated funds*	*Contract authorization*	*Appropriated funds*	*Contract authorization*
Airports having projects in program	1,463	....	380	....	100
Projects physically completed	3,003	140	200	150	300
Grant funds authorized	$402.8	---	$63.0	---	-----
Prior year balance available	------	---	$57.9	--	$57.9
Grant obligations	$344.8	....	$63.0	....	$30.0
Federal expenditures	$264.7	$8.0	$41.9	$4.5	$50.0

It is estimated that an appropriation of $50 million will be required for 1960 to pay obligations incurred under the contract authorization.

The Bureau of Research and Development of the Federal Aviation Agency carries out a program for improvement and modernization of aviation facilities which is composed primarily of functions taken over from the Airways Modernization Board. It also does developmental work in service testing for improving aircraft, aircraft engines, propellers, and appliances.

The primary objective of the program is to provide for the modernization of the national system of aviation facilities to serve present and future needs of civil and military aviation. The program will provide for the development and selection of systems, procedures, facilities, and devices which will best serve aviation needs and promote maximum coordination of air traffic control and air defense systems.

The Bureau contracts with qualified firms, universities, and individuals to perform specific research and development work. The product secured from these contracts is tested and determinations are made as to how the data, procedures, or equipments procured can best be adapted for utilization in the modernized airways system. The cost of direction and administration of the research carried out under this appropriation is covered by the appropriation Expenses.

1. *Research and development to improve air safety.*—This program provides for improvement in the Nation's airways system through the adaption of existing technology to the problems of air traffic control and navigation, and long-range research and development with respect to air traffic control and navigation problems of the future. The 1960 estimate provides for an expanded program, including continued study of the present airways system and projections of future requirements, theoretical systems analysis of proposed facilities, development and testing of an automatic data processing and display system, long-range development of data processing techniques, and participation in the development of an aviation weather system program.

2. *Experimentation and evaluation.*—This activity provides for experimentation, modification, testing, and evaluation of systems, procedures, and components for use in the national system of aviation facilities. It includes funds for operation of experimental test facilities, equipments, and laboratories at the National Aviation Facilities Experimental Center, including simulation of traffic control problems and development of computation techniques to meet them, technical equipment and aircraft operation, plus normal plant operation and maintenance and construction of laboratories and other facilities.

Proposed supplemental due to pay increases		63,500	

This appropriation finances the operation and maintenance of the Washington National Airport, the air terminal facility for Washington, D. C. It serves as the primary terminal for commercial and private aeronautical activities in the metropolitan area of Washington. A supplemental appropriation is anticipated for 1959 under Proposed for later transmission.

Relation of costs to obligations.—The relationship is derived from year-end balances and selected resources as reflected in the following table:

FEDERAL AVIATION AGENCY—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, WASHINGTON NATIONAL AIRPORT—Continued

While the program is financed by direct appropriation, the airport earns revenues for services to tenants and other users, including other Government agencies. Financial statements shown below relate to both this appropriation and to the construction appropriation. They reflect total operations by including in revenues amounts representing the value of unrealized revenues for services furnished other Government agencies which will not be billed or collected, such as landing fees for Government aircraft and rental for office and hangar space. Similarly, total costs reflect unfunded depreciation on all depreciable assets and interest on the Government's investments on a basis comparable to that of other major metropolitan airports. Legislation will be introduced to establish a Federal corporation to operate this airport.

To date $62.5 million has been appropriated for development of a public airport near Chantilly, Va., to relieve air traffic congestion in the Washington area. Appropriations have not yet been provided for construction of an access highway and other planned requirements for completing the airport and upon completion of engineering studies and determination of firm costs additional funds will be requested.

[OPERATION AND MAINTENANCE OF PUBLIC AIRPORTS, TERRITORY OF ALASKA]—Continued

cluding unrealized revenue for services to Government agencies as compared with $1,141,903 in 1958.

In 1960 it is planned to transfer the Anchorage and Fairbanks airports to the State of Alaska and to grant the State funds equivalent to those which would have been appropriated for improvements.

General Provisions—Federal Aviation Agency

During the current fiscal year applicable appropriations to the Federal Aviation Agency shall be available for the activities specified in the Act of October 26, 1949, as amended (5 U. S. C. 596a), to the extent and in the manner prescribed by said Act; maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

Allocations Received From Other Accounts

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
"Mutual security," funds appropriated to the President.
"Other procurement, Air Force."
"Research, development, test, and evaluation, Air Force."
"Military construction, Navy."
"Research, development, test, and evaluation, Navy."
"Aircraft and related procurement, Navy."
"Procurement of equipment and missiles, Army."
"Research, development, test, and evaluation, Army."
"Payments to school districts," Office of Education, Department of Health, Education, and Welfare.

Expenses

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Traffic management and facilities maintenance (total obligations)		$515,000	
Financing:			
Proposed supplemental appropriation		515,000	

Under existing legislation, 1959.—During 1959 the Agency has additional pay cost requirements of $2,515,000. Of this amount $1,015,000 is attributable to engineering pay raise pursuant to Civil Service Commission department circular 793, supplement 33, dated December 9, 1957, and $1,500,000 is to cover the cost of reclassification of air traffic controllers. The Agency anticipates absorbing $2,000,000 of this cost, leaving a net requirement of $515,000.

Grants-in-Aid for Airports (Contract Authorization)

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Grants for construction of airports (total obligations)			$45,000,000
Financing:			
Unobligated balance carried forward (contract authorization)			20,000,000
Proposed new contract authorization			65,000,000

Under proposed legislation, 1960.—It is anticipated that an authorization of an additional $65 million will be provided for a grant program to local sponsors for construction of basic facilities at airports, which are a part of the national system, capable of meeting needs of civil aviation. In order to meet the most urgent airport needs for operation of jet aircraft it is anticipated that a portion of these funds will be made available immediately upon enactment of the new legislation.

Operation and Maintenance, Washington National Airport

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Terminal area		$16,800	
2. Hangar area		4,700	
3. Landing area		11,700	
4. Other areas		3,300	
Total costs (obligations)		36,500	
Financing:			
Proposed supplemental appropriation		36,500	

Under existing legislation, 1959.—A supplemental appropriation of $36,500 is anticipated to provide for mandatory salary increases to wage-scale employees.

Appropriation (new obligational authority)	70,000	70,000	70,000

Coal-mine operators, affected by orders issued by Federal coal-mine inspectors, may appeal to the Board for annulment or revision of, and temporary relief from, such orders. During 1958, a total of 89 orders were issued. When operators appeal, hearings are held, and the Board rules upon the application. It is estimated that there will be 90 to 100 orders subject to appeal to the Board in 1959 and 1960.

Proposed supplemental due to pay increases		778,000	

The Federal Communications Commission regulates interstate and foreign commerce in communications by wire and radio. The Communications Act requires the Commission to attain and maintain maximum benefits for the people of the United States in the use of the radio spectrum and to regulate the rates and services of communications common carriers. Growth in workloads coupled with the needed reduction in time lag between dates of receipt and dates when applications are reached for consideration require an increase in manpower for 1960.

1. *Applied technical research and frequency allocation.*—This activity provides the Commission with the basic information for determining the best utilization of the radio spectrum. To permit the Commission to discharge these technical functions some work will be performed by contract.

2. *Broadcast activities.*—This activity includes the licensing and regulation of standard broadcast (AM), frequency modulation (FM), television (TV), and other related services. Pertinent data are shown in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Stations regulated [a]	4,647	4,862	5,105	5,325
Applications disposed of for new stations or major change of facilities:				
AM	605	446	631	842
FM	153	255	391	391
TV	315	237	274	319

[a] As of June 30 of each year.

3. *Safety and special radio services.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. Pertinent data follows:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Stations regulated (excluding amateur)	215,955	258,537	306,841	346,255
License applications received	186,025	212,581	238,000	260,000

4. *Field engineering and monitoring activities.*—Field employees inspect radio stations, give operator examinations, collect engineering data, monitor the spectrum, and determine the location of lost ships, aircraft, and illegal sources of radio emission.

5. *Common carrier activities.*—The Commission regulates the rates and practices of communications common carriers; considers proposed mergers and acquisitions of properties, extensions and reductions in service, construction of facilities, and applications for use of radio in communication services.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

6. *Executive staff and service activities.*—Includes adjudicatory functions of the Commission. The increase requested is geared to increases in the program functions.

FEDERAL CIVIL DEFENSE ADMINISTRATION

NOTE.—Pursuant to Reorganization Plan No. 1 of 1958 this Administration has been transferred to and consolidated with the Office of Civil and Defense Mobilization in the Executive Office of the President chapter.

FEDERAL DEPOSIT INSURANCE CORPORATION

INVESTMENT IN FEDERAL DEPOSIT INSURANCE CORPORATION

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance brought forward (authorization to expend from public debt receipts)	−$3,000,000,000	−$3,000,000,000	−$3,000,000,000
Unobligated balance carried forward (authorization to expend from public debt receipts)	3,000,000,000	3,000,000,000	3,000,000,000
Appropriation (new obligational authority)			

The Corporation insures accounts of depositors in insured banks up to $10,000. As of June 23, 1958, the deposit insurance fund for the protection of depositors amounted to $1.9 billion or 1.48% of all insured deposits on that date. Total insured deposits at year end amounted to $118.9 billion in 1957 and $128.7 billion in 1958, and are estimated at $134 billion in 1959 and $139 billion in 1960. No tax funds are used in its operations. Its expenses are paid and the fund is accumulated from assessments paid by insured banks and from income on investments in obligations of the U. S. Treasury. However, the Corporation is authorized to borrow from the Treasury, not to exceed $3 billion outstanding at any one time, as required for insurance purposes. No borrowings under this authorization have been made to date and none are anticipated in 1959 or 1960.

CORPORATIONS

The following corporations and agencies, respectively, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1959] *1960* for each such corporation or agency, except as hereinafter provided: (*Independent Offices Appropriation Act, 1959.*)

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies and supervises the operations of the 11 Federal home loan banks, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. Section 2 of Public Law 895, approved July 3, 1948, provides that all expenses of the division of examinations, Federal Home Loan Bank Board, shall be considered nonadministrative. All expenses of the division of examinations are defrayed from fees charged against and collected from the institutions examined.

The administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the division of examinations, and the Federal Savings and Loan Insurance Corporation.

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation (12 U. S. C. 1421 et seq., 1461 et seq., and 1464 et seq.). Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the division of examinations, and the Federal Savings and Loan Insurance Corporation.

[Dollars in thousands]

	1958 actual	*1959 estimate*	*1960 estimate*
Number of members	4,534	4,595	4,655
Total assets of members	$50,100,000	$55,800,000	$61,700,000
Savings invested in members	$43,900,000	$49,200,000	$54,400,000
Mortgage loans of members	$41,300,000	$45,900,000	$50,600,000
Insured institutions examined and supervised	3,832	3,942	4,052
Federal home loan bank advances outstanding	$929,478	$1,150,000	$1,250,000

Budget program.—The Board's budget is based on six activities.

1. *Examination and supervision of Federal home loan banks.*—The Board supervises and examines the operations of the Federal home loan banks.

2. *Supervision of Federal and State-chartered institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

3. *Chartering savings and loan associations.*—Federal savings and loan associations are chartered and regulated.

In addition, applications of State-chartered associations for conversion into Federal savings and loan associations are examined.

4. *Examining savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of approximately 70% of all insured institutions in conjunction with supervisory examinations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

5. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services that are common to the Board and the insurance corporation.

6. *Administrative services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

The amounts shown in the schedules for the above activities include administrative expenses under annual limitation, nonadministrative expenses under a separate limitation, and certain additional expenses not under limitation. Administrative expenses are estimated to increase from $1,729,000 to $1,900,000 reflecting staff increases and related costs to meet increasing workload. Nonadministrative expenses covering the expenses of examining savings and loan associations are discussed separately below.

Relation of costs to obligations.—The relationship is derived by year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories:				
Supplies	$9,191	$12,447	$10,000	$11,000
Postage	1,833	3,110	3,400	3,740
Unpaid undelivered orders	4,379	9,748	5,000	5,500

Limitation on Administrative and Examination Expenses, Federal Home Loan Bank Board

Not to exceed a total of [$1,600,000] *$1,900,000* shall be available for administrative expenses of the Federal Home Loan Bank Board, and shall be derived from funds available to the Federal Home Loan Bank Board, including those in the Federal Home Loan Bank Board revolving fund and receipts of the Federal Home Loan Bank Administration, the Federal Home Loan Bank Board, or the Home Loan Bank Board for the current fiscal year and prior fiscal years, and the Board may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Federal Savings and Loan Insurance Corporation, and other agencies of the Government (including payment for office space): *Provided*, That all necessary expenses in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation or preparation for or conduct of proceedings under section 5 (d) of the Home Owners' Loan Act of 1933 or section 407 of the National Housing Act and all necessary expenses (including services performed on a contract or fee basis, but not including other personal services) in connection with the handling, including the purchase, sale, and exchange, of securities on behalf of Federal home-loan banks, and the sale, issuance, and retirement of, or payment of interest on, debentures or bonds, under the Federal Home Loan Bank Act, as amended, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further*, That not to exceed [$55,000] *$57,000* shall be available for expenses of travel: *Provided further*, That members and alternates of the Federal Savings and Loan Advisory Council shall be entitled to reimbursement from the Board as approved by the Board for transportation expenses incurred in attendance at meetings of or concerned with the work of such Council and may be paid not to exceed $25 per diem in lieu of subsistence: *Provided further*, That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of the Board shall be incurred, allowed, and paid in accordance with the provisions of the Federal Home Loan Bank Act of July 22, 1932, as amended (12 U. S. C. 1421–1449): *Provided further*, That the nonadministrative expenses for the examination of Federal and State chartered institutions (other than special examinations determined by the Board to be necessary) shall not exceed [$6,343,000] *$7,784,000*. (*Independent Offices Appropriation Act, 1959.*)

The Examination Division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations and other institutions of the savings and loan type which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal Home Loan Bank system that are not subject to State supervision. The Division also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts or for conversion from a State to a Federal charter. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the Division.

Financing applied to program			

The Federal home loan banks, together with the savings and loan associations and similar institutions which are members of the banks, constitute the Federal home loan bank system, are designed to stabilize and strengthen institutions promoting private thrift and individual home ownership.

The 11 Federal home loan banks obtain their funds from capital stock, issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists entirely of subscriptions of member institutions. Authority to borrow from the Treasury in the amount of $1 billion is provided in 12 U. S. C. 1431 (64 Stat. 257). No borrowings have been made to date and none is anticipated in 1960.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act (12 U. S. C. 1724 et seq.) to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and are approved for insurance. The protection thus afforded, which insures savers in member associations against financial loss up to a statutory limit of $10,000, may be provided through the prevention of default or the payment of insurance to savings account holders in the event of liquidation. The former course of action, which results in complete protection to each investor regardless of the amount in his account, is accomplished by making cash grants or by purchasing all or a part of the association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Wherever possible, preventive measures are taken to eliminate the necessity of liquidation. However, in the event liquidation is necessary, the Corporation acts as receiver for all federally chartered associations and may act as receiver or coreceiver upon request of State authority in cases involving State-chartered institutions.

The Corporation functions under direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff offices are paid from assessments made on the Corporation, the Federal home loan banks, and the division of examinations.

[Dollars in thousands]

	1958 actual	1959 estimate	1960 estimate
Number of insured institutions	3,832	3,942	4,052
Number of insured savers	20,832,000	22,900,000	24,900,000
Insured liability	$41,589,000	$46,700,000	$51,800,000
Assets of insured members	$47,629,000	$53,400,000	$59,300,000
Reserves and undivided profits of insured institutions	$3,235,000	$3,700,000	$4,200,000
Corporation's reserve for insurance losses	$264,441	$305,730	$352,029
Percent of authorization to total income	1.8	1.8	1.7

Budget program.—The budget program comprises the following activities:

1. *Administrative expenses—(a) Underwriting.*—This activity constitutes an analysis and evaluation of the insurance risk in connection with applications for insurance of accounts and other applications submitted pursuant to regulatory requirements. The assets of insured institutions have increased $10.7 billion or 29% in the last 2 years. The continuing interest in insurance of accounts on the part of uninsured institutions, plus the anticipated rate of normal growth, will increase the insured liability of the Corporation to an estimated $51.8 billion by June 30, 1960, as compared to $41.6 billion on June 30, 1958.

(*b*) *Prevention of default and payment of insurance.*—In carrying out its role of protecting savings in insured savings and loan associations, the Corporation has settled 38 cases since its creation 24 years ago. Total losses to June 30, 1958, have amounted to $5,224,869, or less than 2% of cumulative gross income. An overall summary of these activities is reflected in the following table:

	Number of cases	Funds provided	Recoveries	Estimated or final loss
Contributions to prevent default	29	$5,374,125	$496,064	$4,878,061
Purchase of assets	2	5,054,765	[1]5,018,099	36,666
Receiverships	7	6,699,801	6,390,254	[2]310,142
Net insurance losses	38	17,128,691	11,904,417	5,224,869

[1] Includes anticipated recoveries of $59,877.
[2] Includes $595 for unsettled accounts.

(*c*) *Analysis of operations.*—The Corporation maintains a current analysis of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending, including selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance.

(*d*) *Executive direction and fiscal and other administrative services.*—This covers all fiscal and other administrative services as well as management and direction.

2. *Payments to Federal Home Loan Bank Board for—(a) services and facilities.*—The Corporation currently subscribes 41% of the administrative expenses of the Federal Home Loan Bank Board in return for services and facilities provided by the Board and staff offices.

(*b*) *Conservatorship, supervisory representative in charge, and other.*—Represents the Corporation's share of expenses incurred by the Board in 1958 in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation and preparation for or conduct of proceedings under section 407 of the National Housing Act, as amended.

3. *Purchase of equipment.*—Provides for the purchase of equipment which is fully depreciated.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	1958 actual	1959 estimate	1960 estimate
Selected resources at end of year:				
Deferred charges	$1,853	$401,432	$878	$439
Unpaid undelivered orders	3,245	4,963	---	---
Total selected resources at end of year	5,098	406,395	878	439
Selected resources at start of year (−)	−5,098	−406,395	−878	−439
Costs financed from obligations of other years, net (−)	---	−405,517	−439	
Obligations incurred for costs of other years, net	401,297	---	---	

Financing.—Since July 1951 the Corporation has been retiring its capital stock held by the Secretary of the Treasury in annual payments equivalent to 50% of its net income. Of the $100,000,000 original capital stock, $75,199,000 had been retired prior to June 30, 1958, with the balance of $24,801,000 being retired in July 1958.

Through June 30, 1958, the Corporation has provided for payment of $42.9 million to the Treasury as a return on capital stock, which includes accrual for the final payment of $0.8 million disbursed in July 1958. The Corporation has authority to borrow for insurance purposes up to $750 million outstanding at any one time from the Treasury. No borrowings under this authorization have ever been made.

Operating results and financial condition.—The Corporation is entirely self-supporting and in no year have its operating expenses amounted to more than 5.3% of total income. Revenue from insurance premiums, interest on investments in obligations of the United States and revenue from other sources has been sufficient to meet all insurance losses, operating expenses, dividends on capital stock, and to establish a reserve fund of $264.4 million. Total revenue since 1934, of $325,068,600, has been applied as follows:

	Percent	Amount
Expense	3.8	$12,426,946
Net insurance losses	1.6	5,224,869
Return on capital stock to Treasury	13.3	42,975,507
Reserve for insurance losses	81.3	264,441,278
Total	100.0	325,068,600

Operating expenses for 1960 are estimated at $1,594,000, consisting primarily of administrative expenses for the Corporation of $800,000 and $779,000 for services rendered by the Federal Home Loan Bank Board. Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

Net income for 1960 is expected to be increased by $9.5 million or 25.7% above the net income for 1958 and will be retained by the Corporation and credited to its reserve for insurance losses.

The Corporation is required by law to accumulate a reserve equal to 5% of insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. It is estimated that this statutory requirement will amount to $2.6 billion by June 30, 1960. The insurance reserve as of that date is expected to reach $352 million or 0.68% of an estimated insured liability of $51.8 billion.

HOME OWNERS' LOAN CORPORATION FUND

The Corporation was created to provide credit facilities to refinance the mortgages of destitute urban home owners. Its lending authority expired on June 12, 1936, and since that time the Corporation has been dissolved. Liabilities, representing matured bonds held by the public together with accrued interest thereon, totaled $538,072 at the end of 1958 and are estimated to be reduced to $480,072 by the end of 1960.

The Service assists labor and management in mediation and prevention of disputes affecting industries engaged in interstate commerce and defense production other than rail and air transportation.

1. *Mediation and conciliation of labor disputes.*—During the last year dispute notices affecting approximately 100,000 employers were received by the Service. About 19,000 cases were assigned to mediators for initial inquiry to determine the status of contract negotiations and the possible need for Federal mediation assistance. About 16,500 cases were assigned for mediation after initial inquiry and 14,500 mediation assignments were closed during the year.

WORKLOAD

	1954	*1955*	*1956*	*1957*	*1958*
Cases, beginning of year	2,887	2,578	2,540	2,254	2,422

FEDERAL POWER COMMISSION—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

the natural gas and electric power industries to reimburse the Government for the cost of administering the Natural Gas Act and for a portion of similar costs related to the Federal Power Act.

1. *Non-Federal hydroelectric projects.*—Licenses are issued for hydroelectric projects affecting public lands and streams subject to Federal jurisdiction; construction and operation of projects are inspected; and cost of construction is determined for projects under license to private interests. Pertinent data are:

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Licensed projects	626	649	664
Applications completed during year	99	115	115
Applications pending (end of year)	127	122	117
Total claimed cost (in millions) of major projects	$4,793	$5,200	$5,600
Annual receipts from licenses	$1,466,839	$2,008,000	$2,317,000

2. *Electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities of those public utilities subject to the Commission's jurisdiction. Statistics about the electric utility industry are gathered and published. Pertinent data are:

[By calendar year]

Description	*1957 actual*	*1958 estimate*	*1959 estimate*
Number of public utilities regulated	190	190	190
Operating revenues of regulated utilities (in millions)	$7,250	$7,600	$8,200
Number of utilities reporting for statistical purposes	1,300	1,300	1,300
Operating revenues of reporting utilities (in millions)	$10,300	$10,800	$11,600

3. *Natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices. Certificates of public convenience and necessity are issued to those natural-gas companies subject to the jurisdiction of the Commission. Statistics about the natural-gas industry are gathered and published. In calendar year 1957, there were approximately 10,000 independent producers. There were also 93 regulated natural-gas pipeline companies, with operating revenues of $3.3 billion. It is estimated that the number of independent producers and pipeline companies will remain substantially unchanged in 1958 and 1959. However, the operating revenues of the pipeline companies are expected to increase to $3.5 billion and $3.8 billion, respectively. Other pertinent data are:

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Certificate applications filed:			
(*a*) Pipeline companies	334	350	350
(*b*) Independent producers	1,519	1,350	1,350
Pipeline gas rate cases handled	79	101	102
Independent producer rate cases handled	1,117	1,664	1,764
Rate cases on hand, end of year	1,129	1,335	1,375
Total rate filings received	8,593	7,800	8,500

4. *Federal river development projects.*—Of a potential 118.1 million kilowatts of hydroelectric power in the United States, 27.9 million kilowatts had been developed by Federal agencies and non-Federal interests as of December 31, 1957.

Studies are made of proposed Federal river development projects to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from Federal projects. Information on the power features of river development projects is furnished to Congress and to Federal and State agencies. In 1958, a total of 101 studies were carried on and it is estimated that there will be 100 in 1959 and 100 in 1960.

5. *International Joint Commission.*—A Commission staff member serves on the International Joint Commission, which adjudicates controversies between the Governments or nationals of the United States and Canada over boundary waters and waters that cross the boundary.

Appeals before Federal court completed	27	30	35

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions are corrected; economic criteria are brought to bear on monopoly problems; and supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade. In 1960 field investigation and trial of merger and other antimonopoly cases will be expedited.

2. *Deceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade-practice conferences and advertising guides; business and the public are protected from the evils of misbranding and nondisclosure of fiber content of manufactured wool products and household textile articles; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. In 1960 the Commission will begin enforcement of the Textile Fiber Products Identification Act.

3. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

Appropriation	$570,000	$565,000	$408,000
Proposed supplemental due to pay increases		47,800	

The Foreign Claims Settlement Commission is responsible for the settlement of claims authorized by the War Claims and the International Claims Settlement Acts.

1. *Administration and settlement of—*

(a) *International claims.*—Processing of claims of United States nationals for the nationalization or other taking of property by Czechoslovakia has been authorized. Funds totaling about $9 million derived from the vesting and sale of Czechoslovakian assets in this country are available as trust funds from which the Treasury will make payments against the awards. A 5% deduction will be made as an offset against appropriations for administrative expenses of the Commission and the Treasury Department. A total of 1,500 to 2,000 claims asking recoveries of about $50 million is anticipated.

Claims of United States nationals against Bulgaria, Hungary, Rumania, Italy, and the Soviet Union will be completed by the statutory deadline of August 9, 1959. As of June 30, 1958, a total of 7,012 claims have been decided, leaving a balance of 3,553 claims for 1959. Reconsideration of about 400 claims will be necessitated by the provisions of Public Law 85–604, amending Public Law 285 (72 Stat. 527). Residual operations in connection with post audit, reporting, and records disposal are required for final disposition of the programs during 1960.

(b) *World War II claims.*—All claims of religious organizations authorized by Public Law 84–997 were decided by the statutory deadline of February 6, 1958. Final settlements pursuant to the funding authority of Public Law 85–884 will be made during 1959. Liquidation of this and previous programs under the War Claims Act will continue during 1960 financed by reimbursement from the war claims fund.

2. *Review of claims programs.*—These operations involve research, reports, documentation, and similar functions responsive to the requirements of the Congress and of other agencies of the Government concerning claims programs and problems.

Appropriation	$37,009,546	$37,000,000	$41,869,000
Proposed supplemental due to pay increases		3,100,000	

The General Accounting Office is directly responsible to the Congress for conducting independent reviews, audits, and investigations of the management and control of the financial transactions of the Government; for the rendition of legal decisions relating to Government fiscal matters; for developing, prescribing, and evaluating accounting systems on a governmentwide basis; for the settlement of certain claims for and against the Government; and for advising and assisting the Congress and Government agencies on matters relating to public funds. During 1958, refunds and collections in the amount of $67,649,522 were made through these activities.

1–3. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General who is assisted by the Assistant Comptroller General and staff assistant.

4. *Office of legislative liaison.*—The office of legislative liaison assists the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual Members.

6. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

7. *Transportation division.*—This division audits freight and passenger transportation payments for account of the United States and settles claims involving transportation charges. The transportation audit recovered $40,162,361 during 1958.

9. *Office of the general counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government, the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, and the desirability of new legislation for particular purposes, and render all other required legal services.

10. *Accounting and auditing policy staff.*—This staff develops accounting policy and related requirements for observance by each agency and for the guidance of audit work performed by General Accounting Office auditors; develops internal auditing objectives, principles, and standards for guidance of the executive agencies; reviews and develops, in cooperation with the Treasury Department and the Bureau of the Budget, central accounting processes and financial reporting; reviews agency accounting systems in whole or in part; develops and directs a coordinated program to assure effective application of modern electronic systems and other advanced methods to accounting and related financial operations of the Government; and assists and advises Congress on accounting and auditing policy matters.

11. *Office of staff management.*—This staff performs the staff management function for the accounting, auditing, and investigative activities, which involves (*a*) formulating and executing a recruiting program to obtain a high quality professional staff of accountants, auditors; and investigators; (*b*) developing and carrying out a training and professional career development program; (*c*) exercising, in cooperation with the accounting and auditing divisions, general control over the assignment of the staff; and (*d*) securing appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

12. *Defense accounting and auditing division.*—This division performs the accounting, auditing, and investigative functions of the General Accounting Office in the Department of Defense. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the military establishment in discharging its financial obligations, including the audit and settlement of accounts; and the conduct of investigations of matters relating to the receipt, disbursement, and application of public funds.

13. *Civil accounting and auditing division.*—This division performs the accounting, auditing, and investigative functions of the General Accounting Office in all departments and agencies of the Federal Government other than those assigned to the defense accounting and auditing division. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the civil departments and agencies in discharging their financial obligations, including the audit and settlement of accounts; and the conduct of investigations of matters relating to the receipt, disbursement, and application of public funds.

14. *Field operations division.*—This division, through 19 regional offices, performs all assigned accounting, auditing, and investigative functions outside the metropolitan area of Washington, D. C.

15. *European branch.*—This branch, with headquarters in Paris, France, performs General Accounting Office functions as they relate to United States Government operations in the European area, including North Africa and the Near East. Suboffices are located in London, England; Frankfurt, Germany; Rome, Italy; and Madrid, Spain.

16. *Far East branch.*—This branch, with headquarters in Tokyo, Japan, performs General Accounting Office functions as they relate to United States Government operations in the Far East.

17. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$83,480	$85,256	$85,256	$85,256
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	88,987	66,442	66,442	66,442
Total selected resources at end of year	172,467	151,698	151,698	151,698
Selected resources at start of year (−)	−172,467	−151,698	−151,698	−151,698
Adjustment of selected resources reported at start of year		17,515		
Costs financed from obligations of other years, net (−)		−3,254

INDIAN CLAIMS COMMISSION

Salaries and Expenses

For expenses necessary to carry out the purposes of the Act of August 13, 1946 (25 U. S. C. 70), creating an Indian Claims Commission, [$177,700] *$180,000*, of which not to exceed $3,600 shall be available for expenses of travel. (*72 Stat. 155; Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, **$177,700** Estimate 1960, **$180,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Hearing and adjudication of Indian claims (total obligations)	$162,499	$177,700	$180,000
Financing:			
Unobligated balance no longer available	15,201		
Appropriation (new obligational authority)	177,700	177,700	180,000

This independent Commission of three members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians. Of the 852 claims filed, 141 have been completed. Payments of awards are dependent upon subsequent appropriations made through the "Claims, judgments, and private relief acts" appropriation to the Treasury Department. These appropriations total $14,987,367 through August 1958.

INTERSTATE COMMERCE COMMISSION

Current authorizations:

Salaries and Expenses

For necessary expenses of the Interstate Commerce Commission, including not to exceed $5,000 for the employment of special counsel; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed $50 per diem for individuals; newspapers (not to exceed $300); purchase of not to exceed [thirty-four] *fifty-one* passenger motor vehicles of which [fourteen] *nineteen* shall be for replacement only; [and] not to exceed [$1,225,000] *$1,233,800* for expenses of travel; [$17,000,000] *and uniforms or allowances therefor, as authorized by law (5 U. S. C. 2131); $20,150,000*, of which not less than [$1,405,100] *$1,533,200* shall be available for expenses necessary to carry out railroad safety activities and not less than [$966,300] *$1,057,700* shall be available for expenses necessary to carry out locomotive inspection activities: *Provided*, That Joint Board members and cooperating State commissioners may use Government transportation requests when traveling in connection with their duties as such. (*Independent Offices Appropriation Act, 1959.*)

Appropriated 1959, [a] **$17,300,000** Estimate 1960, **$20,150,000**

[a] Includes $300,000 appropriated in Supplemental Appropriation Act, 1959.

6. Defense mobilization	162,258		
7. Executive and advisory functions	1,030,458	1,093,860	1,180,033
8. General management and administration	946,969	1,004,623	1,053,026
Total obligations	17,402,198	18,824,000	20,150,000
Financing:			
Unobligated balance no longer available	10,177		
New obligational authority	17,412,375	18,824,000	20,150,000
New obligational authority:			
Appropriation	$17,412,375	$17,300,000	$20,150,000
Proposed supplemental due to pay increases		1,524,000	

The Commission regulates common carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, pipelines, and contract carriers by motor vehicle and water.

The increase of $1,326,000 is requested in order to process the continually increasing number of applications for motor carrier permanent and temporary operating authority, to handle additional duties and responsibilities placed on the Commission by the Transportation Act of 1958, to improve the development of economic and cost data necessary to regulatory activities, and to provide more adequate level of compliance with tariff and other provisions of the Interstate Commerce and related acts pertaining to the regulation of railroads and motor carriers.

1. *Regulation of carriers' rates, practices, operating authorities, and finance.*—This work consists of regulating rates, granting operating authorities, approving abandonments and extensions of railroad lines, guarantee of loans to railroads, and reviewing applications for discontinuance or change of the operation or service of trains and ferries, financial reorganizations, and rate agreements between carriers.

INTERSTATE COMMERCE COMMISSION—Con.

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

2. *Compliance.*—This activity is directed to the enforcement of statutes and regulations affecting transportation and carriers. Examinations are made to ascertain that motor carriers and freight forwarders are adequately insured and surveys are conducted of motor carrier operating practices to reduce accidents and to promote safety on the public highways.

3. *Supervision and analysis of carrier accounting and statistics.*—Uniform systems of accounts are formulated and policed for all types of carriers; depreciation rates and reserves are developed for railroad and pipeline properties; studies and analyses are made of operating costs for use in rate proceedings; inventory and cost records are maintained of railroad and pipeline properties; elements of value are developed for consideration in rate and reorganization proceedings and finding final property values; statistics are compiled from carriers' reports and studies made of operating, financial, and other problems of transportation agencies.

4. *Supervision and interpretation of tariffs.*—Common and contract carriers' tariffs are examined for compliance with Commission's tariff circular rules. Under certain conditions authority to publish rates on less-than-statutory notice is granted, and informal complaints and carriers' requests to pay reparation are handled.

5. *Railroad safety and car service.*—Field staff of the Commission work with carriers and shippers in handling problems of safety and efficient use of equipment in the transportation of passengers and property by railroad. This work includes inspection of safety appliances and signal installations, inspection of locomotives, and enforcing compliance with car-service regulations designed to increase the utilization of railroad rolling stock.

6. *Defense mobilization.*—This program was liquidated in 1958.

7. *Executive and advisory functions.*—These also include the quasi-judicial and quasi-legislative functions of the Commission.

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution.

This appropriation represents the Federal Government's pro rata share of the general expenses of the Commission. The Commission also receives financial assistance from the Public Health Service under the program of grants for water pollution control activities.

The National Aeronautics and Space Administration was established on October 1, 1958, to carry out research and development directed toward improving the technology of flight both within and outside the atmosphere and to conduct operations aimed at the exploration of space for peaceful purposes.

The Administration's activities are carried out at its seven research or operations centers, at various other locations where tracking of satellites and other space vehicles is performed, by contract with universities and private industry, and at other Government facilities, especially those of the Department of Defense. The Administration's scientific centers include 3 research laboratories operated by the Government and 1 operated by contract, a space projects center, and 2 flight stations. This work involves activities ranging from theoretical studies conducted with the aid of wind tunnels and other specialized equipment to flights of research aircraft and launching of space vehicles.

The amounts appropriated herein provide for operations carried on in the Administration's facilities; those carried on by contract are provided for in the research and development appropriation. In view of the congressional requirement for special authorization of additional appropriations during 1959 and 1960, the funds being requested for 1960 are shown at the end of this section under the heading Proposed for later transmission.

1. *Aircraft, missile, and spacecraft research.*—The research conducted under this activity is aimed at improving the design and performance of virtually all types of flight vehicles. The specific types of research programs carried out are described below.

(*a*) *Aerodynamics and flight mechanics.*—Research in this field is conducted on the aerodynamic, stability, control, and similar problems encountered in a wide range of flight regimes from the relatively slow speeds experienced by all vehicles at takeoff to the extreme conditions encountered by ballistic missiles, hypersonic aircraft, orbital vehicles, and spacecraft.

(*b*) *Propulsion.*—Increased emphasis is being placed upon high energy rocket engines and fuels, on nuclear power for propulsion, and on ion and plasma propulsion systems for spacecraft. Research is being continued on advanced turbojet, ramjet, rocket, and other modern propulsion systems, and on improved fuels for these types of engines.

(*c*) *Structures.*—This program is concerned with research on the response of structures and materials to the environments imposed by flight at various altitudes and speeds. Present research emphasizes the structural and materials problems involved in the reentry of ballistic missiles, satellites, and spacecraft into the atmosphere, and those resulting from hypersonic and supersonic flight.

(*d*) *Operating problems.*—Research in this field is concerned with certain of the problems of manned space flight, and with other problems, such as icing, turbulence, noise, and fire, widely encountered in aircraft operations.

2. *Space flight development and operations.*—This activity provides for in-house programs directly associated with the Administration's space operations, including, for example, the development of optimized satellite payloads, systems studies of spacecraft, and overall control of satellite and space probe launchings and tracking.

3. *Headquarters management and coordination.*—Central direction of the Administration's research programs, development projects, and flight operations, and admin-

"Research, development, test, and evaluation, Army"		4,078,250	
Appropriation (adjusted)		171,078,250	

This appropriation provides for the cost of contractual research, development, operations, technical services, procurement of space vehicles and components, and purchase of minor equipment and supplies. In addition, the costs of operating the Jet Propulsion Laboratory, a Government-owned, contractor-operated research center transferred to the Administration from the Department of Defense, are included.

Supplemental funds for 1959 and the amount anticipated for 1960 are shown under Proposed for later transmission.

1. *Aircraft, missile, and spacecraft research.*—This activity provides for scientific research performed by universities and industrial organizations; the specific research contracts involved supplement the investigations carried out in the Administration's centers.

2. *Scientific investigations in space.*—The contractual costs of providing and launching sounding rockets, earth satellites, lunar and interplanetary probes and instrumentation payloads for scientific observations are covered in this activity. During 1959, the remaining costs of the Vanguard program are included.

3. *Satellite applications investigations.*—This activity includes studies and tests of meteorological and communications satellites.

4. *Space operations technology.*—The 1959 program under this activity provides for the contractual portion of the man-in-space project.

5. *Space propulsion technology.*—This activity provides for contractual development of advanced propulsion techniques and systems not yet ready for use in the space projects supported under the foregoing activities. Work is underway or is to be started on a nuclear rocket engine, a million pound thrust liquid rocket engine, advanced solid fuel rockets, high energy liquid fuel rockets, and ion and plasma propulsion systems. The projects under this activity complement the exploratory work in propulsion carried on by the Administration's research centers.

6. *Tracking and data acquisition.*—Contractual operation of certain of the Administration's spacecraft tracking

Appropriation (adjusted)				48,000,000					

This appropriation provides for the modernization of existing facilities, the construction of new facilities, and the purchase of items of equipment to support the mission of the National Aeronautics and Space Administration. Typical items financed through this appropriation include wind tunnels, laboratory buildings, rocket launch sites, tracking stations, computers, and major pieces of instrumentation.

The costs shown as incurred in 1960 at all locations relate entirely to construction projects authorized in prior years. Additional facilities to be requested for 1960 and supplemental funds being requested for 1959 are shown at the end of this section under the heading Proposed for later transmission.

1. *Langley Research Center.*—Projects presently underway at this center include, for example, construction of a data reduction center, a high temperature structural research facility, hypersonic aerodynamics facilities, and improvements to existing facilities.

2. *Ames Research Center.*—Construction is proceeding on facilities such as several hypersonic wind tunnels, a hypervelocity research facility and modifications to existing facilities.

3. *Lewis Research Center.*—A high energy rocket research facility and one to permit experimentation on space propulsion systems are among the projects being constructed.

Program by activities:			
Total program (costs—obligations)			$94,430,000
Financing:			
Proposed supplemental appropriation			94,430,000

Under proposed legislation, 1960.—Funds anticipated for 1960 are to provide for the in-house activities of the Administration, including the operation of the Langley, Ames, and Lewis Research Centers and the High-Speed Flight Station where research to improve the design and performance of aircraft, missiles, and spacecraft are conducted; the operation of the Space Projects Center which develops optimized payloads for scientific investigations in space and controls the launching and tracking of the Administration's space vehicles; the operation of the Pilotless Aircraft Station where launchings of research models and of vehicles for scientific investigations in space are to take place; and headquarters functions of the Administration.

RESEARCH AND DEVELOPMENT

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Total program (costs—obligations)		$20,750,000	$333,070,000
Financing:			
Proposed supplemental appropriation		20,750,000	333,070,000

Under proposed legislation, 1959 and 1960.—The supplemental appropriation anticipated for 1959 is entirely for contracts related to the program for developing the technology of manned space flight.

The 1960 amount is for the contractual portion of additional scientific investigations in space through the use of satellites and probes; increased effort on advanced space technology, including manned space flight, booster and in-space propulsion systems, and rendezvous techniques; meteorological and communications applications of space vehicles; the operation of tracking and data acquisition stations; and the contractual operation of the Jet Propulsion Laboratory. In addition, procurement of supplies and minor equipment for the Administration's research centers previously funded under the Salaries and expenses appropriation will be funded under this appropriation.

CONSTRUCTION AND EQUIPMENT

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:

Financing:			
Proposed supplemental appropriation		24,250,000	57,800,000

Under proposed legislation, 1959 and 1960.—Supplemental funds anticipated for 1959 are to provide tracking and control equipment at various locations in support of scientific and developmental space vehicle operations; space propulsion system development facilities; and facilities for the Jet Propulsion Laboratory.

Funds for facilities and equipment anticipated for 1960 include the second increment of the Space Projects Center at Beltsville, Md.; establishment of special launching facilities at the Pacific Missile Range; additional tracking and control equipment at various locations; additional propulsion development facilities; a new facility at the Lewis Research Center for research on ion and plasma propulsion for space vehicles; equipment and facilities at the High-Speed Flight Station in support of the X–15 research aircraft program; a data reduction center for the Ames Research Center; and various improvements to increase the capabilities of existing facilities at the Langley, Ames, and Lewis Research Centers.

NATIONAL CAPITAL HOUSING AUTHORITY

Current authorizations:

OPERATION AND MAINTENANCE OF PROPERTIES

For the operation and maintenance of properties under title I of the District of Columbia Alley Dwelling Act, [$38,000] *$45,000*: *Provided*, That all receipts derived from sales, leases, or other sources shall be covered into the Treasury of the United States monthly: *Provided further*, That so long as funds are available from appropriations for the foregoing purposes, the provisions of section 507 of the Housing Act of 1950 (Public Law 475, Eighty-first Congress), shall not be effective. Federal Reserve Bank of St. Louis

The National Capital Planning Commission acquires land for the comprehensive development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired in Maryland and Virginia along the shores of the Potomac River, above and below Washington from Great Falls to Mount Vernon. One-half of the cost is borne by local jurisdictions. Funds requested herein are for the Fairfax County section from Central Intelligence Agency at Langley to the proposed Cabin John crossing of the Potomac River, 2 miles of the gorge of the Potomac in the vicinity of Great Falls, Va., and the major part of land acquisition costs from the District of Columbia line to Fort Washington in Maryland.

2. *Stream valley parks.*—Land is acquired by public bodies in Maryland and Virginia with the aid of a one-third contribution from the National Capital Planning Commission.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia, with all expenditures being repaid over a period of years by the District of Columbia. The 1960 program includes funds to acquire the remaining lands for the National Cultural Center.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1957, $1,143,000; 1958, $729,945; 1959, $729,945; 1960, $729,945.

Proposed supplemental due to pay increases		174,000	

The Board resolves representation disputes in industry and remedies and prevents unfair labor practices by employers and unions. In October 1958, the Board broadened its standards for determining the cases in which it will exercise jurisdiction. This will increase the volume of cases filed by about 15% in 1959 and an additional 5% in 1960. The current high level of case filings under the previous jurisdictional standards is expected to continue and additional funds are required to enable the Agency to handle the higher workload.

1. *Field investigation.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated by the regional office personnel. Failing settlement, dismissal, or withdrawal of these cases, they are prepared for public hearing. About 87% of the unfair labor practice cases and 73% of the election cases are closed without the need for public hearing or further formal action.

2. *Trial examiner hearing.*—Trial examiners conduct public hearings in unfair labor practice cases which are the basis of the findings and recommendations set forth in intermediate reports. In fiscal year 1958, 297 reports were issued; for 1959, the estimate is 470; for 1960, 615.

3. *Board adjudication.*—In unfair labor practice cases the trial examiner's intermediate report becomes the Board order, if no exceptions are filed. Exceptions are filed to approximately 80% of the intermediate reports, and these reports are referred to the Board for decision. In contested representation cases the Board may either order an election to determine the choice of bargaining representative or dismiss the case.

DECISIONS ISSUED BY THE BOARD

	1958 actual	*1959 estimate*	*1960 estimate*
Unfair labor practice	220	450	500
Representation	1,567	1,700	1,750

4. *Securing of compliance with Board orders.*—If the parties do not voluntarily comply with orders, the Board must request the courts to enforce its decision. Most contested decisions involve unfair labor practices. In 1958, a total of 73 Board decisions of all kinds required court litigation; for 1959, the estimate is 160; and for 1960, 243.

NATIONAL MEDIATION BOARD

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for [the National Mediation Board, $520,000] *carrying out the provisions of the Railway Labor Act, as amended (45 U. S. C. 151–188), including stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); temporary employment of referees under section 3 of the Railway Labor Act, as amended, at rates not in excess of $75 per diem; and emergency boards appointed by the President pursuant to section 10 of said Act (45 U. S. C. 160); $1,357,000: Provided, That the unexpended balances of appropriations for the fiscal years 1958 and 1959 for "Salaries and expenses", "Arbitration and emergency boards", and "Salaries and expenses, National Railroad Adjustment Board", shall be merged and accounted for in one account. (45 U. S. C. 154; Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1959.)*

Appropriated 1959, **$520,000** Estimate 1960, [a] **$1,357,000**

[a] Includes activities previously carried under "Arbitration and emergency boards" and "Salaries and expenses, National Railroad Adjustment Board." The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

Appropriation	$506,846	$520,000	$1,357,000
Proposed supplemental due to pay increases		25,000	

1. *Mediation.*—The Board mediates labor disputes and determines collective-bargaining representatives for the 700 carriers and 1.25 million employees in the railroad and airline industries.

MEDIATION CASES

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Pending, start of year	243	304	262	272
Received during year	550	407	450	475
Closed during year	489	449	440	440
Pending, end of year	304	262	272	307

2. *Voluntary arbitration and emergency disputes.*—When mediation fails, the parties are urged to submit their differences to arbitration or special adjustment boards, including neutral members paid from this account. If neither mediation nor voluntary arbitration are successful the President, when notified of disputes which threaten seriously to interrupt service, appoints an emergency board to investigate and report on the dispute as a basis for agreement.

NUMBER OF BOARDS

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Arbitration boards	12	15	12	12
Special adjustment boards	54	71	75	75
Emergency boards	3	5	3	3

3. *Adjustment of railroad grievances.*—Railroad employee grievances resulting from application of collective bargaining contracts may be brought for settlement to the 36-man Board composed of 4 divisions. Each division has an equal number of carrier and union representatives paid by the parties and handles the grievances of a particular type of employee. The appropriation provides clerical assistance to the Board and neutral referees to sit with divisions of the Board when they are deadlocked.

The Foundation supports basic research, education in the sciences, and the interchange of foreign and domestic scientific information. It is also responsible for developing and encouraging pursuit of a national policy for the promotion of basic research and education in the sciences, and for recommending to the President policies for strengthening the Nation's scientific effort. The increased appropriation will provide for support of a greater percentage of meritorious scientific research proposals; for additional facilities for fundamental scientific research; for making the results of research conducted in the United States and abroad more readily available within the scientific community; and for the continuation of programs to improve science teaching and to increase the number of highly qualified research scientists in this country.

1. *Support of science.*—The Foundation supports basic research projects, principally in institutions of higher learning.

Number of grants awarded	1,100	1,760	1,985

It also supports (1) basic research facilities at universities and other nonprofit institutions in such fields as astronomy, oceanography, nuclear physics, electronic computation, and biology; (2) collecting, translating, cataloging, and disseminating information on the results of scientific research, and developing improved methods for the exchange of scientific data; and (3) studies of the status of research in the United States and foreign countries.

2. *Support of scientific manpower.*—The Foundation awards fellowships to graduate science students and college science faculty members and summer fellowships to secondary school science and mathematics teachers and graduate teaching assistants.

FELLOWSHIPS FOR ADVANCED STUDY IN SCIENCE AND MATHEMATICS

	1958 actual	*1959 estimate*	*1960 estimate*
Number of fellowships awarded	1,348	2,793	2,893

It supports summer and academic-year institutes for the supplementary training of high school and college teachers of science and mathematics.

INSTITUTES FOR SCIENCE AND MATHEMATICS TEACHERS

	1958 actual	*1959 estimate*	*1960 estimate*
Number of participants supported at institutes	10,225	27,730	28,000

It also supports (1) projects directed toward the improvement of high school and college science and mathematics course content; (2) activities to stimulate student interest in science and to improve the teaching of science in high schools and colleges; (3) maintenance of a national register of scientific and technical personnel; and (4) the conduct of studies relating to the supply, demand, and utilization of scientific manpower.

[INTERNATIONAL GEOPHYSICAL YEAR]

[For an additional amount for "International Geophysical Year", $2,500,000, to remain available until June 30, 1960.] (*Supplemental Appropriation Act, 1959.*)

Appropriated 1959, **$2,500,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Geophysical research related to the earth's atmosphere:			
(*a*) Basic atmospheric research	$2,583,060	$1,380,282	
(*b*) Earth satellite exploration of the upper atmosphere	9,275,259	2,085,602	
2. Geophysical research related to the planet Earth	1,275,580	949,754	
3. Related scientific support activities	712,066	1,213,415	
4. Interdisciplinary research		1,575,000	
5. Scientific direction and administration	351,506	435,540	
Total obligations	14,197,471	7,639,593	
Financing:			
Unobligated balance brought forward	−17,337,064	−5,139,593	
Unobligated balance carried forward	5,139,593		
Appropriation (new obligational authority)	2,000,000	2,500,000	

This appropriation supported the United States program for the International Geophysical Year, a worldwide scientific undertaking involving concurrent scientific observations by more than 60 nations and approximately 10,000 scientists, beginning in July 1957 and ending December 31, 1958. The program of the United States was planned by the Nation's leading geophysicists and included projects in the 13 disciplines and areas of activity involved in the International Geophysical Year, such as oceanography, seismology, and rocket and satellite studies of the upper atmosphere. The results of this research ultimately will benefit our international relations, national defense, agriculture, commerce, and industry by adding appreciably to our basic knowledge of the earth and its environment.

Under existing legislation, 1959 and 1960.—The Commission is now planning its program and developing its organizational pattern. Estimates required to continue the Commission's work in 1959 and 1960 will be submitted at a later date.

PERMANENT COMMITTEE FOR THE OLIVER WENDELL HOLMES DEVISE

Permanent authorizations:

OLIVER WENDELL HOLMES DEVISE FUND

(Indefinite special fund)

Appropriated (est.) 1959, **$50,500** Estimate 1960, **$11,600**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Preparation of the history of the Supreme Court (total obligations)	$39,690	$66,550	$90,340
Financing:			
Unobligated balance brought forward	−434,397	−408,904	−392,854
Unobligated balance carried forward	408,904	392,854	314,114
Appropriation (new obligational authority)	14,197	50,500	11,600

The Oliver Wendell Holmes devise fund was established by 69 Stat. 533 to (1) prepare a history of the Supreme Court of the United States, and, if deemed advisable, (2) finance an annual lecture or series of lectures and (3) publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court. A grant of $37,500 from the Rockefeller Foundation has been made available for the period 1959–62 to pay salaries of authors preparing the history during leaves of absence from their universities for one or more academic semesters.

7. 1959 program obligated in 1958	21,008	−21,008	
Total obligations	8,433,070	9,133,992	9,460,000
Financing:			
1959 limitation available in 1958	−21,008	21,008	
Unobligated balance no longer available	938		
Limitation	8,413,000	8,450,000	9,460,000
Proposed increase in limitation due to pay increases		705,000	

The Board administers the railroad retirement system, financed by employer and employee taxes. The administrative expenses of the Board in the operation of this program are derived from the railroad retirement trust fund. This system provides annuities for age and disability and benefits for survivors.

1. *Maintenance of earnings accounts.*—Eligibility for and the amount of benefits are based on individual accounts of compensation. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing claims.*—Applications for annuities and benefits are adjudicated and certified for initial payment. The number tends to increase gradually each year, as more railroad workers, their spouses or survivors become entitled. Regular dispositions were 185,530 in 1958, an increase of approximately 11% over 1957. They are estimated at 189,520 and 192,520 in 1959 and 1960. In addition increased workloads resulting from the 1958 amendments to the Social Security Act which require adjustments in payments to railroad retirement beneficiaries will necessitate a supplemental increase in the limitation.

3. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments were 8,156,388 in 1958 and are estimated at 8,590,000 and 9,000,000 in 1959 and 1960 and will continue to increase annually. The number of persons on the rolls receiving monthly benefit payments was 708,000 in 1958 and is estimated at 738,000 and 764,000 in 1959 and 1960.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. Appeals dispositions

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

were 159 in 1958 and are estimated at 185 in 1959 and 1960.

5. *Actuarial services.*—Actuarial studies and estimates are required by the Railroad Retirement Act to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments.

6. *Administration.*—Except for administrative activities of the retirement program exclusively, the cost of administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

Proposed supplemental due to pay increases		215,000	

The Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. All contractors and subcontractors who have any business subject to the act are required to file with the Board. The Board has recovered $723,055,054 in excessive profits from the date of its establishment through June 30, 1958. Of this total, $112,724,199 was determined during 1958. The act establishing this requirement expires June 30, 1959, but this will have no effect on the budget of the agency until later years.

1. *Executive direction.*—The Board is responsible for final action in all cases. This includes screening all filings involving renegotiable business over $1 million and requests for exemption.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations.*—The three regional boards conduct renegotiation proceedings and make initial determinations. The field boards make the excessive profit determination in all cases involving $800,000 or less of renegotiable profits; however, this determination may be appealed to the statutory board. All determinations in cases involving more than $800,000 renegotiable profits are reviewed by the statutory board.

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, is responsible for the construction, operation, and maintenance of that part of the Saint Lawrence Seaway within the territorial limits of the United States (33 U. S. C. 981). Completion of the United States section of the seaway and the related navigation improvements being provided by the Saint Lawrence Seaway Authority of Canada, in conjunction with the power development works being provided by the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario, will afford a 27-foot navigation channel from Lake Erie to Montreal.

Budget program—Capital outlay.—The Corporation's construction program consists of a 10-mile canal, two locks, and navigation channels in the 46-mile International Rapids section of the Saint Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

The total construction cost of the United States share of the seaway, excluding interest during construction, is estimated at $121.9 million. Work estimated to cost $116.3 million will be completed by the end of 1959. Additional work to be accomplished during 1960 is estimated to cost $4.5 million. Principal emphasis will be placed on completion of the 27-foot depth channel in the Cornwall and Thousand Islands areas. The seaway will be 99% complete at the end of 1960 with $1.1 million, consisting largely of channel work, remaining to be accomplished after 1960.

Operating costs.—The Corporation began operating and maintaining the seaway for 14-foot draft traffic after the flooding of the power pool on July 1, 1958. The operation of the seaway for full 27-foot draft navigation is scheduled for the spring of 1959.

Operating costs during the period of interim 14-foot draft navigation will be capitalized and included in the toll base. When the seaway is opened for 27-foot draft traffic in 1959, tolls will be assessed and the project will be considered in a regular operation and maintenance status.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as follows:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Prepayments and advances		$349		
Unpaid undelivered orders	$36,871,852	8,701,302	$2,015,000	$375,000
Total selected resources at end of year	36,871,852	8,701,651	2,015,000	375,000
Selected resources at start of year (−)		−36,871,852	−8,701,651	−2,015,000
Costs financed from obligations of other years, net (−)		−28,170,201	−6,686,651	−1,640,000

Financing.—The Corporation is authorized to borrow $140 million from the Treasury to finance the costs of the Seaway, of which $113.8 million will have been used by the end of 1959. It is estimated that $4.2 million will be used during 1960.

Operating results and financial condition.—The operating expenses for 1960, including depreciation and interest, are estimated at $6.6 million, of which $415,000 represents administrative expenses. Shipping toll revenues in 1960 are estimated at $4.2 million.

Operating expenses incurred during the period of interim 14-foot draft navigation from July 1, 1958, through March 31, 1959, including interest on the revenue bonds, are being capitalized as a part of the construction cost of the Seaway.

Repayment of the Federal investment is scheduled to be accomplished within the statutory 50-year repayment period.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure provisions.*—To provide disclosure to investors of material facts concerning securities publicly offered for sale, issuers of securities are required to file with the Commission a registration statement and related prospectus containing significant information about the issuer and the offering.

SELECTED WORKLOAD DATA

	1957 actual	1958 actual	1959 estimate	1960 estimate
Registration statements examined	943	913	985	1,200
Value of securities registered (in billions)	$14.7	$16.9	$18.2	$22.0
Annual and periodic reports examined	45,931	47,074	50,922	51,830
Proxy contests for which proxy rules must be administered	20	34	40	40
Administrative proceedings and investigations closed	154	118	187	207

2. *Prevention and suppression of fraud.*—Suspected fraud, deceit, and manipulation in the sale and trading of securities is prevented or minimized by prompt investigation and through periodic inspection of the accounts of brokers and dealers.

SELECTED WORKLOAD DATA

	1957 actual	1958 actual	1959 estimate	1960 estimate
Investigations closed	347	488	525	625
Broker-dealers registered	4,771	4,752	4,900	5,100
Broker-dealer inspections	1,214	1,452	1,473	1,535

A 2.8-year cycle for the broker-dealer inspection program was achieved in 1958; it is anticipated that this level of inspection will be maintained through 1960.

3. *Supervision and regulation of securities markets.*—National securities exchanges and over-the-counter markets are regulated in the interest of maintaining just and equitable principles of trade for the protection of the public investors. Short sales, stabilizing, floor trading, activities of specialists, and odd-lot dealers are subject to Commission regulation.

SELECTED WORKLOAD DATA

	1957 actual	1958 actual	1959 estimate	1960 estimate
Amendments, notifications and circulars of exchanges examined	1,850	1,718	1,900	2,000
Securities under observation for manipulative activities	1,804	1,838	2,000	7,000
Trading reports and field investigations reviewed	69	88	100	100

During 1960, approximately 5,000 additional securities will be brought under observation for detection of possible manipulation.

4. *Regulation of investment and public utility holding companies.*—Financing and other corporate matters of interstate public utility holding companies engaged in the electric utility business or in the retail distribution of gas are regulated. Eighteen holding company systems, comprising 164 separate companies with assets of $9.3 billion, are registered under the Public Utility Holding Company Act of 1935.

SELECTED WORKLOAD DATA

	1957 actual	1958 actual	1959 estimate	1960 estimate
Regulation of financing transactions and asset acquisitions	320	310	325	340
Regulation of intercompany loans, dividends, etc.	75	79	85	89

Foreign and domestic investment companies are also registered and their activities supervised. The assets of these companies have increased from $2.5 billion in 1941 to $17.0 billion in 1958.

SELECTED WORKLOAD DATA

	1957 actual	1958 actual	1959 estimate	1960 estimate
Number of registered investment companies	432	453	505	760
Investment company inspections	6	9	24	94
Registration of new companies	49	42	75	305
Review of filings for compliance with regulations	468	760	850	1,400

In 1960, the investment company inspection program will be placed on an 8-year cycle. The estimated increase in the number of investment company registrations in 1960 is the result of enactment of the Small Business Investment Act of 1958.

5. *Corporate reorganizations.*—Independent expert assistance is provided in proceedings under the Bankruptcy Act. In 1958, a total of 68 new reorganization petitions was filed in Federal courts. It is estimated that the number of petitions filed will increase to 80 in 1959 and to 90 in 1960.

6. *Operational and business statistics.*—Statistical and other data are prepared to provide the Commission and the staff with information needed to administer the securities laws and to produce certain financial data as a part of the overall Government statistical and economic program.

The purpose of the Selective Service System is effective manpower utilization through classification under the Universal Military Training and Service Act. The System is responsible for supplying men to keep the Armed Forces at their authorized strength to the extent that their needs are not met by voluntary enlistment. It will supply an estimated 100,000 men for this purpose in 1960 as compared to approximately 140,000 in 1959 and 126,000 in 1958.

1. *National administration.*—The overall administration of the act including planning, training, and records management is accomplished by the national headquarters and six regional field offices.

2. *State administration.*—Carrying out the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting more than 20 million registrants are accomplished by the over 42,000 uncompensated citizens assisted by about 6,000 clerks at over 4,000 boards. These citizens determine who shall be deferred and for how long in the national interest in agriculture, industry, or other pursuits. They also determine the availability for military service of members of the standby reserve.

4. *Special boards—National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists.*—This Committee acts in an advisory capacity to the Selective Service System. It is separately administered, but funds are furnished by the Selective Service System from its appropriation.

National Selective Service Appeal Board.—This Board acts on the classification of registrants who have appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

The Small Business Administration counsels, assists, and protects the interest of small business. In addition, it provides aid to business firms and homeowners who have suffered losses through disasters.

1. *Procurement and technical assistance.*—The objectives of this activity are (1) to insure that a fair proportion of Government contracts for purchases of supplies and services and the sale and disposal of property be placed with small business enterprises, (2) to insure that a fair proportion of Government contracts for research and development be placed with small business concerns and assist small firms to obtain the benefits of research and development performed at Government expense, and (3) to provide technical and managerial aid to small business concerns by advising and counseling on matters in connection with Government procurement, research and development, property disposal, methods engineering, and new and improved products and processes.

2. *Management and research assistance.*—Assistance is provided to small business through (1) management counseling, (2) developing and distributing management aids and bulletins, and (3) establishing administrative management courses. This activity also includes the new program of grants to States, State development corporations, colleges, and universities, for studies, research, and counseling concerning the managing, financing, and operation of small business concerns.

3. *Investment and development company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns this agency is authorized to (1) charter, regulate, and examine small business investment companies, (2) provide capital to these companies, (3) lend funds to such companies, and (4) lend funds to State and local development companies.

4. *Financial assistance.*—Small business concerns and victims of disasters are aided through loans, which are administered so as to assure return of the Government investment. In addition, financial counseling is provided to small firms requesting assistance. Funds for administrative expenses of this activity are transferred from a revolving fund. Financial statements covering these programs may be found in the following account.

5. *Liquidation of Reconstruction Finance Corporation loans.*—As of June 30, 1958, there were 1,727 disaster loans outstanding amounting to $5,076,458. This represents a reduction of 1,502 loans valued at $8,613,772 from those taken over on July 1, 1954. In addition, pursuant to Reorganization Plan No. 1 of 1957, Reconstruction Finance Corporation business loans amounting to more than $14,000,000 were transferred to the Small Business Administration on June 30, 1957, for liquidation. As of June 30, 1958, there were 496 loans outstanding amounting to $8,752,249. Administrative expenses for this activity are also transferred from a revolving fund, made up of receipts from these loans.

This indefinite special fund account finances grants to any State government, or agency thereof, State-chartered development, credit, or finance corporations, land-grant colleges and universities, and other schools for research and counseling concerning the managing and financing of small business enterprises. The amount appropriated (72 Stat. 698) was derived from repayments by each Federal Reserve bank of the aggregate amount which the Secretary of the Treasury had heretofore paid to such banks under the provisions of the Federal Reserve Act.

Only 1 such grant may be made within a State in any 1 year, and no such grant shall exceed $40,000. It is estimated that 35 grants at $40,000 each will be made in 1959 and 52 such grants in 1960.

This fund finances business and disaster loans and investment and development company assistance activities authorized by the Small Business Act (72 Stat. 384) and the Small Business Investment Act (72 Stat. 689).

The Congress has authorized loan commitments of $875 million. A maximum of $500 million may be outstanding for business loans, $125 million for disaster loans, and $250 million for investment and development company assistance. It is estimated that the business loan limitation will be reached during 1960, thus legislation will be proposed to increase this limitation. The position with respect to lending authority is as follows:

Budget program—Financial assistance program—Business loans.—Business loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that participation with a bank is not available and no immediate partici-

pation loan may be made unless it is shown that a deferred participation loan is not available. The Administration's participation in a loan is limited to 90%, and the agency's maximum commitment of its fund to any one borrower is limited to $350,000, except for a loan to a corporation formed and capitalized by a group of small business concerns for purposes authorized in the Small Business Act. With respect to such "pool" loans, the limitation is $250,000 multiplied by the number of separate small businesses participating in the corporation. Business loans, except for the purpose of constructing facilities, are limited to a maturity of 10 years and except for "pool" loans bear interest at a maximum rate of 5½% per annum on the agency's share thereof. For "pool" loans, the rate of interest on the Small Business Administration's share shall be no less than 3% nor more than 5% per annum.

It is the policy to assist businessmen operating small firms to secure credit for constructive purposes on terms that will meet the borrower's individual requirements. Assistance includes counseling as well as the lending of funds. From the beginning of the lending program on September 29, 1953, through June 30, 1958, a total of 11,110 loans have been approved in a total amount of $519.8 million (including participating banks' share of $83.8 million). Sixty-seven percent of these loans have been on a participation basis. The average size of loans approved to date is $46,785. In 1960 it is estimated that 6,900 loans will be approved compared to an estimate of 6,260 in 1959 and 4,014 in 1958.

The following tabulation reflects certain data on business loans and includes funds disbursed or collected by banks on participation loans. Accordingly, the Small Business Administration's share of disbursements and repayments will not agree with related data in the financial statements, which reflect transactions on the basis of only the Small Business Administration cash funds involved.

DATA ON BUSINESS LOANS

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Loan commitments during the year:			
Total amount	$195.0	$291.2	$320.7
Small Business Administration share	166.0	244.3	269.1
Loans outstanding on June 30 held by banks and Small Business Administration:			
Total amount (estimate)	258.2	429.2	565.7
Small Business Administration share	215.9	359.4	473.9
Loan disbursements by banks and Small Business Administration:			
Total amount	148.4	261.5	276.9
Small Business Administration share	124.8	219.4	232.3
Loan repayments to banks and Small Business Administration:			
Total amount (estimate)	54.8	90.5	140.4
Small Business Administration share (estimate)	44.9	75.9	117.8

Disaster loans.—No restrictions exist on the amount which may be loaned to an individual or business firm suffering loss from a disaster. The maximum term for disaster loans is 20 years and the interest rate may not exceed 3% on the Small Business Administration's share of the loan. Through June 30, 1958, a total of 7,708 loans for $88.3 million has been approved. In view of the unpredictable nature of the program, it is impractical to estimate the volume of new loans which may be committed in 1959 and 1960. For program purposes, a nominal amount of $14 million in new commitments has been assumed, which would represent 1,350 loans based on the average size of loans approved through 1958; 1,559 loans were approved in 1958.

Loan repayments to banks and Small Business Administration:			
Total amount (estimate)	8.4	7.0	8.5
Small Business Administration share (estimate)	7.3	6.7	8.2

Deferred participation business loans not expected to be purchased.—This reduction in loan commitments reflects the current policy of committing funds for only 20% of the agency's share of deferred participation loans, since experience shows that only a small portion of its share of such loans will be purchased.

Administrative expenses.—Administrative expenses are financed by transfer of funds from the revolving fund to the appropriation for salaries and expenses.

Investment and development company assistance program—Purchase of debentures of small business investment companies.—A primary function of these companies is to provide a source of needed equity capital for small business concerns. To facilitate the formation of such companies with capital adequate to meet the demands from small business firms, the Small Business Investment Act of 1958 authorizes the Small Business Administration to purchase debentures of any such company in an amount equal to not more than $150,000.

Loans to small business investment companies.—To further encourage the formation and growth of such companies, the Small Business Administration is also authorized to lend funds to them in amounts which may not exceed 50% of the paid-in capital and surplus of a company.

Loans to State and local development companies.—The Small Business Administration is authorized to lend funds to State development companies for general use purposes; and to State and local development companies for plant construction, conversion, or expansion, including the acquisition of land. Latter type loans shall be so secured as reasonably to assure repayment, may be made directly or in participation with banks or other lending institutions, may be made only when the proceeds are for use solely to assist an identifiable small business concern and for a sound business purpose approved by the agency, and are limited to a maximum of $250,000 for each such identifiable small business concern.

Financing.—The capital of the revolving fund is provided by direct appropriation. Although Congress has authorized appropriations of $900 million, only $540 million has been appropriated based on actual and estimated needs through June 30, 1959. After taking into consideration repayments, revenue and cancellations of prior year loan commitments, and after making provision for a reserve for contingencies of $49.8 million to provide for possible increases in the level of program operations, appropriations of $200 million will be required as additional capital for the fund to finance the estimated program volume.

SMALL BUSINESS ADMINISTRATION—Continued

Public enterprise funds—Continued

REVOLVING FUND—Continued

Operating results.—The deficit is expected to continue to increase because revenue from low interest rate disaster loans and from a large number of relatively small business loans is not sufficient to cover administrative and other expenses, including interest payable to Treasury on net expenditures from the fund. Administrative expenses for the investment and development company assistance programs are not reflected in the schedules since they are provided by direct appropriation.

Financing applied to program	1,214,950	997,000	850,000

This fund finances the liquidation of business and disaster loans of the former Reconstruction Finance Corporation which have been transferred to the Small Business Administration for administration and liquidation. Under Reorganization Plan No. 2 of 1954, disaster loans in an amount of $14.7 million were transferred to the Small Business Administration. Also, pursuant to Reorganization Plan No. 1 of 1957 business loans and other assets of the "Reconstruction Finance Corporation liquidation fund," Treasury Department, in excess of $14 million were transferred.

Budget program.—The program reflects the costs of the administration and liquidation activities relative to the loans and other assets transferred. Since the number of individual loans are gradually being reduced through liquidation, the costs are decreasing each year.

Relation of costs to obligations.—The relationship is derived by year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Deferred charges	$1,014	$12,034	$12,034	$12,034
Undisbursed loan obligations	------	1,382,141	732,141	732,141
Total selected resources at end of year	1,014	1,394,175	744,175	744,175
Selected resources at start of year (−)		−1,014	−1,394,175	−744,175
Increase or decrease (−) in selected resources		1,393,161	−650,000	
Adjustment due to recovery of prior year obligations		651,797	600,000	
Adjustment for undisbursed loan obligations transferred from "Reconstruction Finance Corporation liquidation fund," Treasury Department		−2,086,598		
Costs financed from obligations of other years, net (−)	-----	−41,640	−50,000	

Financing.—Administrative expenses and other program costs are financed from receipts from the liquidation of loans and other assets.

Operating results and financial condition.—In 1958 net budget receipts of $7.8 million provided sufficient funds to make final payment to the Treasury on the note liability assumed in connection with the disaster loans transferred. Estimated net budget receipts of $5 million in 1959 and $3 million in 1960, together with cash funds carried over from 1958, will permit a return of an estimated $10 million to the Treasury by June 30, 1960, on the Government's investment. As of that date the Government investment is estimated to be $4.3 million, comprised of capital of $7 million and a deficit of $2.7 million.

SALARIES AND EXPENSES, NATIONAL GALLERY OF ART

For the upkeep and operation of the National Gallery of Art, the protection and care of the works of art therein, and administrative expenses incident thereto, as authorized by the Act of March 24, 1937 (50 Stat. 51), as amended by the public resolution of April 13, 1939 (Public Resolution 9, Seventy-sixth Congress), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment in advance when authorized by the treasurer of the Gallery for membership in library, museum, and art associations or societies whose publications or services are available to members only, or to members at a price lower than to the general public; purchase, repair, and cleaning of uniforms for guards and elevator operators and uniforms, or allowances therefor for other employees as authorized by law (5 U. S. C. 2131); purchase or rental of devices and services for protecting buildings and contents thereof, and maintenance and repair of buildings, approaches, and grounds; not to exceed [$2,400] *$7,000* for expenses of travel; and not to exceed $15,000 for restoration and repair of works of art for the National Gallery of Art by contracts made, without advertising, with individuals, firms, or organizations at such rates or prices and under such terms and conditions as the Gallery may deem proper; [$1,674,000] *$1,834,000*. (*20 U. S. C. 71–75; Department of the Interior and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, **$1,674,000** Estimate 1960, **$1,834,000**

Appropriation (new obligational authority)	375,000	375,000	400,000

Upon petitions being filed, the Board holds formal hearings and determines whether: (1) organizations are Communist-action organizations, Communist-front organizations, or Communist-infiltrated organizations; (2) individuals are officers or members of a Communist-action organization or officers of a Communist-front organization and required to register as such; (3) the registration of particular Communist-action organizations or Communist-front organizations or of particular individuals should be cancelled; and (4) a particular Communist-infiltrated organization has ceased to be a Communist-infiltrated organization.

To date, the Board has heard only cases involving petitions against alleged Communist organizations. The Board issues a report setting forth its findings and an appropriate order.

TARIFF COMMISSION—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Commission is charged with determining the impact of United States tariff and trade policies on domestic industries and providing information, reports and recommendations to the President, Congress or public on these matters. There will be an increase in the activities of the Commission during the coming year in connection with trade agreements negotiations and related investigations. This increase will be met largely by staff released by the completed study of tariff simplification.

Proposed supplemental due to pay increases		45,000	

The Tax Court hears and decides cases involving tax deficiencies and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1960 the Court proposes a trial program of 160 weeks to be held in approximately 50 cities. This program should result in closing approximately 5,400 cases.

The actual and estimated work volume of the Court is presented in the following tabulation.

	1957 actual	*1958 actual*	*Percent* [1]	*1959 estimate*	*Percent* [1]	*1960 estimate*	*Percent* [1]
Filed	5,259	6,220	18.3	6,850	10.1	6,850	----
Reopened	144	144	----	150	4.2	150	----
Closed	4,645	4,627	−.4	5,200	12.4	5,400	3.8
Pending at close of year	10,666	12,403	16.3	14,203	14.5	15,803	11.3

[1] Percentage increase or decrease over previous year.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$16,547	$25,021	$23,500	$22,500
Selected resources at start of year (−)		−16,547	−25,021	−23,500
Adjustment of selected resources reported at start of year		2,560		
Costs financed from obligations of other years, net (−)			−1,521	−1,000
Obligations incurred for costs of other years, net		11,034

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

The Congress created the Tennessee Valley Authority in 1933 for the unified development of a river basin comprising parts of seven States. Engineering works improve and regulate the Tennessee River for navigation, flood control, and power. Fertilizer and agricultural activities seek better utilization of land and water resources. Forestry activities stress maximum use of forest resources consistent with watershed protection. Watershed improvement activities aim for integrated solution of problems in small tributary areas. All these activities are interrelated. Their common purpose is to help develop the Valley's agricultural and industrial potential for the benefit of both the region and the Nation.

Other national interests are directly served. The Tennessee waterway, a part of the inland waterway system, is an interregional artery for commerce moving to and from ports in 20 States. National defense requirements use over half of TVA's electric power generation. In national emergencies, defense needs have first call on the Muscle Shoals chemical facilities for munitions research and production; in peacetime, they serve as the country's only public research center equipped for complete development of fertilizers from laboratory to demonstration-scale production.

TVA is a wholly owned Government corporation. Its 1960 activities will be financed by the requested appropriation of $15,286,000 and by $287,907,000 derived from revenues and receipts, mostly from power operations. Enactment of proposed legislation would provide for issuance of revenue bonds as an additional means of financing power system facilities.

Budget program—1. *Navigation, flood control, and power program.*—A major objective of the TVA Act is development and use of the Tennessee River for the threefold purpose of navigation, flood control, and power. System facilities consist of 26 major dams with hydroelectric generating stations, 10 navigation locks, 12 major fuel-electric generating stations, and a power transmission network of about 11,370 circuit miles.

NAVIGATION—SUMMARY OF ESTIMATED OPERATING COSTS

	1958 actual	*1959 estimate*	*1960 estimate*
Direct expenses	$242,274	$242,000	$287,000
Distribution of administrative and general expenses	17,144	20,000	20,000
Allocated from multipurpose reservoir operations	1,240,784	1,362,000	1,380,000
Depreciation on navigation facilities	845,356	789,000	979,000
Depreciation allocated from multipurpose reservoir operations	803,646	803,000	803,000
Total operating costs	3,149,204	3,216,000	3,469,000

Navigation operations of the multipurpose reservoir system maintain the all-year 9-foot channel from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. Traffic on the Tennessee waterway is growing rapidly reaching a record volume of 12.7 million tons and 2.1 billion ton-miles in calendar year 1957. This represents an increase of 3.6% in tons and 5.5% in ton-miles over figures for 1956, the year of next highest traffic. Transportation savings to shippers on the 1957 volume of traffic are estimated at $21.5 million, applying mostly to freight originating outside the Valley or moving from the Valley to outside destinations. Engineering work assures that physical facilities are operated, maintained, and modified to meet the needs of modern waterborne commerce. Technical studies appraise the opportunities for use of the waterway and the barriers inhibiting its use. Data supplied to shippers and carriers help solve transportation problems, looking to full utilization of the Federal investment in the navigation channel.

Capital outlay costs for navigation facilities in 1960 are estimated at $3,195,000 providing primarily for continuing construction of the lock at Wilson Dam started in 1957, scheduled for service in midsummer 1959, and for substantial completion by June 1960. Also included is an estimate of $200,000 for planning and design studies for a new lock at Wheeler Dam, Ala. This will be a single-lift lock with 110-foot by 600-foot chamber. Total estimated cost is $16,000,000.

FLOOD CONTROL—SUMMARY OF ESTIMATED OPERATING COSTS

	1958 actual	*1959 estimate*	*1960 estimate*
Direct expenses	$296,676	$284,000	$313,000
Distribution of administrative and general expenses	18,902	20,000	20,000
Allocated from multipurpose reservoir operations	1,246,699	1,372,000	1,390,000
Depreciation on flood control facilities	322,611	325,000	325,000
Depreciation allocated from multipurpose reservoir operations	922,704	922,000	922,000
Total operating costs	2,807,592	2,923,000	2,970,000

Flood control operations maintain and use storage space in upstream reservoirs for seasonal retention of excessive runoff and regulate discharges to rates of flow which can be handled safely by downstream channels and reservoirs. Dams on the Tennessee River and its tributaries provide 11,803,000 acre-feet of storage for flood control at the beginning of the flood season. Cities and agricultural lands in the Tennessee Valley are protected. Flood crests can also be reduced on the lower Ohio and Mississippi Rivers; two such reductions last year averted damage estimated at $8,000,000. In May, and again in July 1958, flood heights at Cairo, Ill., were substantially reduced at critical stage; on the second occasion discharges from Kentucky Dam were cut off for two days expressly to reduce the Ohio River flood. As a supplement to operating its reservoir system for flood control, TVA collects and analyzes flood data; studies potential flood control projects and ways to improve operations of the existing system. Technical advice and assistance to State and local agencies encourage them to assume responsibility for solving local urban and rural flood control problems. About 100 communities in the Valley need to deal with such conditions; 35 have received technical data with 8 having officially adopted land-use controls and others planning definite follow-up action. About 11 communities will receive assistance in 1960.

POWER—SUMMARY OF ESTIMATED REVENUE AND RECEIPTS AND OPERATING COSTS

	1958 actual	*1959 estimate*	*1960 estimate*
Revenue and receipts:			
Sales of electric energy (outside)	$230,246,722	$238,110,000	$256,370,000
Other income	2,219,654	2,019,000	2,031,000
Total revenue and receipts	232,466,376	240,129,000	258,401,000
Operating costs:			
Production and transmission (including allocation from multipurpose reservoir operations)	120,486,172	127,236,000	139,206,000
Payments in lieu of taxes	5,271,907	5,907,000	6,279,000
Other operating expenses	10,017,383	11,415,000	11,503,000
Provision for depreciation	43,793,384	45,000,000	49,000,000
Total costs	179,568,846	189,558,000	205,988,000
Less interdivisional sales and rents	2,084,416	2,020,000	2,270,000
Total operating costs	177,484,430	187,538,000	203,718,000
Net income	54,981,946	52,591,000	54,683,000

Power operations are confined to generation and transmission of power and sale of energy at wholesale to local distribution systems and to a small number of industries and Government agencies requiring large amounts of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

power. Power is distributed by 150 local public agencies and 2 small privately owned utility companies. Total energy to be supplied to the power system from generating facilities of TVA, the Department of the Army on the Cumberland River, and the Aluminum Company of America on the Little Tennessee River is estimated to be 68.1 billion kilowatt-hours in 1960. This is about 5.9 billion kilowatt-hours greater than the energy supplied to the system in 1958 and about 5.2 billion kilowatt-hours above that estimated to be supplied in 1959. Net income from power operations, after depreciation, for 1960 is estimated to be $54.7 million, representing a return on the average investment in the power program during the fiscal year of about 3.5%. The estimates assume average streamflow conditions. With abnormal streamflows, the net income would be significantly reduced by increases in production expense.

POWER SYSTEM FACILITIES—SUMMARY OF ESTIMATED CAPITAL OUTLAY

	1960 estimate
Power supply facilities:	
Continuing construction of generating units:	
Gallatin steam units 3–4	$3,106,000
John Sevier steam unit 4	115,000
Johnsonville steam units 7–10	2,268,000
Widows Creek steam unit 7	39,823,000
Wilson hydro addition	11,000,000
Beginning construction of generating units:	
Wheeler hydro addition	4,000,000
Colbert steam addition	12,000,000
Total power supply facilities	72,312,000
Transmission system facilities	33,270,000

The 1960 estimate includes $72,312,000 from corporate funds for continuing construction of steam generating units at existing projects and of an addition being started in 1959 to the hydro capacity at Wilson Dam; also included is beginning construction of an addition to the Colbert steam plant and an addition to the hydro capacity at Wheeler Dam. The corporate funds used for this purpose are to be derived from power revenues—the only source of funds presently available for financing these units. Proposed legislation will again be recommended to the Congress, its purpose being to permit issuance of revenue bonds as an additional means of financing power system facilities. As of June 30, 1958, the installed capacity of the system was 10,222 megawatts, including Department of the Army plants on the Cumberland River and Aluminum Company of America plants on the Little Tennessee River operated as a part of the TVA system. Completion on schedule of units started prior to 1959 (including those being installed at the Cheatham project by the Department of the Army) will bring the system nameplate capacity to 11,746 megawatts by the winter of 1960–61. After allowing for such factors as machine outages and the effects of drawdown of storage reservoirs, this system could carry a load of about 11,250 megawatts; system demands at that time are estimated to be 11,150 megawatts. Presently budgeted capacity additions will increase the system load-carrying ability to 11,400 megawatts by the end of calendar year 1961 and to about 11,950 megawatts by the end of calendar year 1962. The demand for power is continuing to increase and provision is made in the 1960 budget to start additional capacity to meet power requirements in the winter of 1962–63 upon enactment of the proposed revenue bond financing legislation. After the Congress has acted on this legislation requirements for power system additions will be reappraised.

Total investment of the Government is expected to be $2,159,571,658 at the end of 1960. The portion of the total investment in power program assets is as follows:

ANALYSIS OF INVESTMENT IN TVA POWER PROGRAM

[In thousands]

Investment	*1957 actual*	*1958 actual*	*1959 estimate*	*1960 estimate*
Land, structures, and equipment:				
Completed fixed assets	$1,711,355	$1,754,974	$1,901,965	$1,970,718
Less accumulated depreciation	243,925	284,790	329,019	377,249
Net completed fixed assets	1,467,430	1,470,184	1,572,946	1,593,469

Bonds	65,073	65,073	65,073	65,073
Subtotal	1,441,004	1,445,745	1,454,687	1,454,522
Less repayments of bonds and payments to Treasury	240,132	250,132	250,132	250,132
Net Treasury investment	1,200,872	1,195,613	1,204,555	1,204,390
Accumulated net power income	413,430	468,413	521,004	575,687
Rents and other collections in advance	251	42	31	20
Contributions in aid of construction	324	373	373	373
Total power program assets	1,614,877	1,664,441	1,725,963	1,780,470

Multipurpose dam.—Estimated capital outlay costs in 1960 include $200,000 for continuation of design for the Melton Hill Dam and Reservoir on the Clinch River, near Oak Ridge, Tenn., about 57 miles downstream from Norris Dam. This project, having an estimated total cost of $35,000,000, will extend the 9-foot navigation channel to Clinton, Tenn., and provide rated power generating capacity of 72,000 kilowatts. Preliminary design studies are being made in 1959.

Topographic mapping of the Valley serves TVA's planning, construction, and operating needs and meets the standards of the Geological Survey for nationwide map coverage. The scheduled mapping carried on cooperatively with the Survey covers 763 quadrangles (about 46,000 square miles). As of June 30, 1958, 641 quadrangles (about 39,000 square miles) were completed and printed. To continue work on the remaining 122 quadrangles (about 7,000 square miles) and complete them by the end of 1962, operating costs in 1960 are estimated to be $211,000.

2. *Fertilizer, agricultural, and munitions program.*—As directed by the TVA Act, chemical facilities at Wilson Dam, Ala., are maintained and operated as a national fertilizer development center. By statute, they must likewise be available for munitions purposes and are an important segment of the national defense program.

Research on fertilizer products and processes has three phases—basic process investigations, small-scale research, and process development in the laboratory and through pilot-plant operation. TVA works cooperatively with the Department of Agriculture and with industry to avoid duplicating efforts. Research results on technological developments and new and improved processes are made available to industry. Knowledge gained in fertilizer research is valuable also in the related field of munitions. The 1960 estimate for this work is $1,783,000, the same as the 1959 estimate. Research on high-temperature techniques for fixation of nitrogen will be started; studies and development work will continue on better utilization of superphosphoric acid and byproduct recovery. Other continuing work relates to fused potassium phosphate and ammonium polyphosphate.

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

Fertilizer production and distribution activities have these objectives: To demonstrate the technical and commercial feasibility of new or improved processes, thereby encouraging their adoption by industry; to supply materials for test-demonstration on practical farms and for widespread educational introduction among farmers; and to supply munitions materials or render other services for national defense. New or improved fertilizers are sold to farmers for educational purposes through cooperative and industry distributors who in turn furnish data to TVA concerning distribution costs and farmer acceptance. Significant aspects of 1960 production plans are reduced distribution of calcium metaphosphate and ammonium nitrate; and increased distribution of new materials—ammonium phosphate-nitrate, sulfate-nitrate, and liquid fertilizer. Tonnage of higher analysis superphosphate (54%) will be increased; production of lower analysis superphosphate (48%) was discontinued in 1959. Estimated cost of fertilizer production and distribution in 1960 is $18,961,000; income from the sale of fertilizer products and byproducts is estimated at $18,716,000. These costs for 1958 and 1959 were $15,492,475 and $19,479,000; income for the same years was $14,587,231 and $18,791,000.

Cooperative fertilizer tests and demonstrations are of three principal types: (1) Laboratory and field plot tests to determine under controlled conditions the relative efficiency of materials; (2) studies and demonstrations aimed at developing more efficient and economical ways of distributing and applying fertilizer; and (3) farm test-demonstrations of fertilizer use. Major objectives of the latter are to introduce experimental fertilizers and demonstrate their uses to farmers throughout the Nation and to improve the Valley's agriculture, forestry, and watershed-streamflow relationships. Costs of the three activities in 1960 are estimated at $1,868,000; the 1959 estimate is $1,873,000 and the 1958 cost was $1,897,947. About 3,500 farms in 31 States will participate in the program. Farmer payments for TVA fertilizer used in test-demonstrations will total $459,000, averaging about 58% of the plant cost of the material. Agricultural extension services of the land-grant colleges supervise and technically guide farm test-demonstration activities, with TVA bearing part of the cost. During 1960 cooperating institutions will pay an estimated $1,000,000 of the cost of field planning and supervision; TVA's payment is estimated at $285,300.

3. *Watershed protection and improvement program.*—TVA is responsible for the protection and improvement of the Tennessee River watershed in relation to proper use, conservation, and development of the region's natural resources. Moreover, this work helps to protect the Federal investment in dam and reservoir projects from sedimentation. Investigations identify problems of watershed protection and improvement under conditions of optimum use. Research helps develop and test corrective measures. Cooperative projects with State and local groups apply these measures to regional and special problems. Operating costs for 1960 are estimated at $1,094,000, about the same as the 1959 level, and provide for two types of activities: Tributary watershed projects and forestry projects.

Through tributary watershed development projects, TVA assists in finding and demonstrating ways whereby State and local agencies and private groups can assume leadership and responsibility for joint solutions to problems of watershed protection and resource development in small tributary areas. Work planned for 1960 consists of research on the effects of changes in land use on the quality and behavior of water in the streams; continuation of demonstrations in the Chestuee and Beech River watersheds in Tennessee; and development work in the Yellow Creek watershed in Mississippi.

Forestry projects aid the States, counties, landowners, and the timber industry in developing full production and use of the Valley's forest resource consistent with the needs of watershed protection. Forestry projects include research and demonstrations in forest management and protection, reforestation, and wood utilization. TVA will produce 17.4 million seedlings for valleywide reforestation which will be distributed through State agencies to private landowners, who pay a part of the production cost.

4. *General service activities.*—Operating costs for this program cover primarily reimbursable services furnished at the request and expense of other agencies. The 1960 estimate of $1,110,000 for mapping services consists of work performed for the Department of the Army ($1,033,000), the Geological Survey ($65,000), and others ($12,000). The principal item in the $1,325,000 estimate for other reimbursable services is $281,000 covering work for the Department of Defense in connection with the Muscle Shoals Phosphate Development Works. The balance of $1,044,000 includes loans of personnel, services for contractors and other agencies, and miscellaneous recoveries of TVA expenditures.

Estimated capital outlay of $1,691,000 for general facilities in 1960 is primarily for purchase of electronic computer equipment. The estimate also provides for the replacement of trucks and other heavy mobile equipment used in all program activities, and for construction of a garage at Knoxville.

5. *Relation of costs to obligations.*—Program obligations in 1960 are estimated to total $303,193,000. As detailed in the following tabulation, corporate financed inventories are estimated to be reduced by $1,664,000. Unpaid undelivered orders, both appropriation and corporate financed, are estimated to be increased by $6,929,000, resulting in a net increase in obligations to be liquidated in future years of $5,265,000.

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:

OPERATING EXPENSES

	1958 actual	1959 estimate	1960 estimate
Appropriation financed:			
1. Navigation, flood control, and power program:			
Navigation operations	$259,418	$262,000	$307,000
Flood control operations	315,578	304,000	333,000
Multipurpose reservoir operations	2,487,483	2,734,000	2,770,000
Topographic mapping	212,784	210,000	210,000
2. Fertilizer, agricultural, and munitions program:			
Research on fertilizer products and processes	1,505,815	1,727,000	1,727,000
Fertilizer tests and demonstrations	1,338,203	1,303,000	1,303,000
Agricultural development projects	108,282	103,000	103,000
3. Watershed protection and improvement program	1,000,214	1,050,000	1,086,000
4. General service activities: Bridge maintenance, Public Law 562, approved July 29, 1946	2,969	11,000	9,000
Total appropriation financed	7,230,746	7,704,000	7,848,000
Corporate financed:			
1. Navigation, flood control, and power program:			
Power operations	132,027,793	140,708,000	152,863,000
Multipurpose reservoir operations	1,936,327	2,112,000	2,136,000
2. Fertilizer, agricultural, and munitions program:			
Fertilizer production and distribution	14,646,260	18,570,000	17,989,000
Fertilizer tests and demonstrations	554,075	562,000	557,000
4. General service activities: Reimbursable services	3,907,506	3,071,000	2,435,000
Total corporate financed	153,071,961	165,023,000	175,980,000
Total operating expenses	160,302,707	172,727,000	183,828,000

Financing.—Amounts estimated to become available in 1960 would be derived from the requested appropriation of $15,286,000 and from revenues and receipts (mostly from power operations) of $281,886,000.

Operating results and financial condition.—For 1960, net income from power operations is expected to amount to $54,683,000 and net expense of other programs is expected to total $11,173,000, leaving $43,510,000 to be added to accumulated program income. Total accumulated program income through 1960 is estimated at $366,346,324. Only the power operations program is intended to be self-supporting; the net expense of other programs is covered largely by appropriations from the Treasury. Payments to the Treasury in 1960 are estimated at $2,097,000 from nonpower proceeds, bringing total payments from this source to $43.6 million.

In 1960 net budget expenditures are expected to be $7,878,000.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
Navigation, flood control, and power program:

UNITED STATES INFORMATION AGENCY

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan Numbered 8 of 1953, and the United States Information and Educational Exchange Act, as amended (22 U. S. C. 1431 et seq.), to carry out international information activities, including employment, without regard to the civil-service and classification laws, of (1) persons on a temporary basis (not to exceed $120,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such aliens to be investigated for such employment in accordance with procedures established by the Secretary of State and the Attorney General); travel expenses of aliens employed abroad for service in the United States and their dependents to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158); [expenses of attendance at meetings concerned with activities provided for under this appropriation (not to exceed $6,000);] entertainment within the United States not to exceed $500; hire of passenger motor vehicles; insurance on official motor vehicles in foreign countries; purchase of space in publications abroad, without regard to the provisions of law set forth in 44 U. S. C. 322; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; cost of transporting to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director may prescribe; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under the Travel Expense Act of 1949, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; [$98,500,000] *$106,800,000*, of which (*a*) not less than $9,000,000 shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States and [of which sum not less than $300,000] (*b*) *such funds as may usefully be employed* shall be available by contracts with one or more private international broadcasting licensees for the purpose of developing and broadcasting under private auspices, but under the general supervision of the United States Information Agency radio programs to Latin America, Western Europe, Africa, as well as other areas of the free world, which programs shall be designed to cultivate friendship with the peoples of the countries in those areas, and to build improved international understanding: *Provided*, That not to exceed [$90,000] *$135,000* may be used for representation abroad: *Provided further*, That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further*, That funds may be exchanged for payment of expenses in connection with the operation of information establishments abroad without regard to the provisions of section 3651 of the Revised Statutes (31 U. S. C. 543): *Provided further*, That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201 (c) of the Act of June 30, 1949 (40 U. S. C. 481 (c)), and the exchange allowances or proceeds of such sales shall be available for replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, except buses and station wagons, shall not exceed $1,500: *Provided further*, That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U. S. C. 665), the United States Information Agency is authorized in making contracts for the use of international shortwave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further*, That existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire during the current fiscal year may be extended for a period of one year in addition to the period of appointment or assignment otherwise authorized. (*Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1959.*)

The United States Information Agency submits evidence to peoples of other nations by means of communication techniques that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress, and peace. The intention is to encourage foreign peoples to take action consistent with United States national objectives.

The increase of approximately $4.9 million in operating funds will provide for: (1) Approximately $3.4 million of local expenses plus related media and other support services to meet increased cost in foreign countries and to allow some expansion in programs in foreign countries; (2) about $600,000 for expansion of worldwide television, motion pictures, and information center activities; (3) $76,000 for cooperative programs with private organizations; (4) $642,000 for operating costs in connection with newly constructed radio facilities; and (5) $166,000 for domestic support activities related to the overall programs.

1. *Overseas missions.*—The program is conducted through 203 posts in 82 countries and is known abroad as the United States Information Service (USIS). The overseas missions carry out country programs designed to present to local audiences the enduring features of America's traditions, arts and culture; and to influence local attitudes and actions in support of United States foreign

policy. These programs are being expanded and strengthened in critical areas, especially in Africa and Latin America. Overseas missions prepare materials using local facilities whenever possible, but also utilize materials provided by the media services in Washington.

2. *Media services.*—These services provide support for overseas country programs.

(*a*) *Press and publications service* maintains communications facilities for the transmission of daily news, editorial and feature materials for adaptation by overseas missions. It produces 2 monthly magazines titled "America Illustrated," 1 for distribution in the Soviet Union and 1 for distribution in Poland. The service also operates two regional printing centers.

(*b*) *Motion picture service* supplies the missions with films translated into 40 foreign languages. It adapts films for specific country or area use, and provides guidance in the foreign production, use, and distribution of films. The service also supplies the missions with mobile units and equipment for showing motion pictures.

(*c*) *Information center service* supports United States operated libraries and reading rooms and binational centers operated jointly by the United States and the host country. The service provides these centers with collections of American books and other publications, both in English and in translation, and with English teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to overseas missions for local display and provides books and periodicals for presentation to selected individuals and groups.

(*d*) *Broadcasting service* produces radio broadcasts in 36 foreign languages and in English. Programs originate from the United States and from one overseas location. It operates a total of 78 transmitters at 7 locations in the United States and at 9 overseas locations, with a combined radio frequency power output of over 8 million watts. The service will originate a total of 43 hours of programing daily in 1960. The service also supplies the overseas missions with recorded radio programs and scripts, and with radio supplies and equipment.

(*e*) *Television service* acquires and produces television programs for placement in outlets overseas. It also provides guidance to the overseas missions in the production and use of television programs.

3. *Cooperative programs with private organizations.*—The United States Information Agency encourages, guides, and coordinates the efforts of private organizations to utilize their resources and initiative in building an information exchange program between the people of the United States and the peoples of foreign countries.

4. *Program direction and appraisal.*—Agency program planning, direction, and appraisal are accomplished through the Director's office, area assistant directors, planning staff, and research and intelligence activities.

5. *Administration and staff support.*—This includes physical and personnel security functions, legal counsel, central administrative services, and emergency planning.

6. *Administrative support.*—Administrative services for the Agency's overseas operations, and certain special support services at headquarters, are obtained through reimbursable arrangements with the Department of State.

Authorization to expend foreign currency receipts pursuant to 68 Stat. 454	1,172,168	4,709,374	4,840,266

Foreign currencies generated by sale of agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454) are available to finance certain informational activities. Programs totaling $9,141,495 are planned for 1959 and 1960 on the assumption that such currencies will be deposited and available to the United States Information Agency from sales agreements completed or currently under negotiation.

The currencies are used (1) for translating American text books into foreign languages and arranging for their publication and distribution in educational systems abroad and (2) for assistance to binational organizations in carrying out programs which serve United States interests. Such latter assistance is limited to that necessary to enable these organizations to acquire adequate operational quarters. Both these activities are separate from and do not duplicate those in the Agency's regular program.

Remaining unobligated balances of funds appropriated in 1959 and prior years and the new appropriation requested for 1960, will make a total of $20,152,689 available for obligation in 1960. These funds, available until expended, will be used for:

1. *Acquisition and construction of new facilities.*—Completion of one major transmitting facility from the East Coast is planned with 1960 funds. In addition, one new transmitter project (Gamma) will be undertaken. Total funds estimated for these two projects in 1959 and 1960 are $30,960,000.

2. *Maintenance and improvement of existing facilities.*—Recurring repairs and improvements to existing facilities, and replacement of obsolete or wornout equipment will require $1,165,984 less than 1959.

3. *Research and development.*—Additional study of radio propagation techniques and problems, engineering design of equipment and antenna systems, and equipment and methods for generating very high frequency power will require an increase of $126,000 over 1959.

UNITED STATES INFORMATION AGENCY—Con.

Public enterprise funds—Continued

INFORMATIONAL MEDIA GUARANTY FUND—Continued

This program enables American exporters of books, periodicals, films and other informational media to sell their materials, through regular commercial channels, in foreign countries having a shortage of United States dollar exchange (22 U. S. C. 1442). Under the program, foreign importers make payment to American exporters in foreign currency. Following this, the exporters exchange their foreign currency for United States dollars upon application to the United States Information Agency, in accordance with the terms of each exporter's informational media guaranty contract.

Program.—An increase in the issuance of guaranties is proposed for 1960 in the East Europe area where the opportunities for the commercial distribution of American materials are gradually increasing in two countries. The program provides for payment of interest for 1 year as compared with payment in 1959 of cumulative accrued interest through 1957.

Financing.—Since its inception in 1948, the program has been financed primarily from a total Treasury borrowing authority of $28,000,000. Public Law 85–477, approved June 30, 1958, authorized appropriations to restore realized capital impairment. This legislation has the effect of restoring borrowing authority by enabling repayments on outstanding Treasury notes. An appropriation of $2,500,000 was approved for 1959 for this purpose. The 1960 request provides for an appropriation of $3,500,000. Such appropriations cover in part that impairment to the fund from currencies that cannot be sold to United States agencies. Such currencies are transferred to Treasury accounts. In addition, partial financing will continue to be provided by fees from exporters and proceeds from sales of foreign currencies to United States Government agencies.

Operating results.—In 1960 contract coverage will continue to be provided for the commercial distribution of informational materials in Eastern Europe and other countries which limit the free conversion of their currencies into dollars and which require differential rates of exchange. For these reasons, impairment to the fund will continue to result from the inability of Treasury to sell some of the currencies purchased and because of losses due to exchange on the sale of these currencies.

VETERANS ADMINISTRATION

Current authorizations:

GENERAL OPERATING EXPENSES

For necessary operating expenses of the Veterans Administration, not otherwise provided for, including expenses incidental to securing employment for war veterans; uniforms or allowances therefor, as authorized by law; not to exceed $3,500 for newspapers and periodicals; not to exceed [$45,000] *$67,000* for preparation, shipment, installation, and display of exhibits, photographic displays, moving pictures, and other visual education information and descriptive material, including purchase or rental of equipment; and not to exceed $2,700,000 for expenses of travel of employees; [$147,500,000] *$163,373,000*: *Provided*, That no part of this appropriation shall be used to pay in excess of twenty-two persons engaged in public relations work: *Provided further*, That no part of this appropriation shall be used to pay educational institutions for reports and certifications of attendance at such institutions an allowance at a rate in excess of $1 per month for each eligible veteran enrolled in and attending such institution.

[For an additional amount for "General operating expenses", $5,000,000; and the limitation under this head in the Independent Offices Appropriation Act, 1959, on the amount available for expenses of travel of employees, is increased by $200,000.] (*5 U. New obligational authority:			
Appropriation	$163,001,000	$152,500,000	$163,373,000
Proposed supplemental due to pay increases		12,578,000	

This appropriation provides for all administrative expenses of the agency with the exception of those applicable to the Department of Medicine and Surgery.

The amount for 1959 includes anticipated supplementals of $12,578,000 for pay increases generated by Public Law 85–462 and $860,000 for additional administrative costs generated by new legislation under Public Laws 85–678 (72 Stat. 630), 85–896 (72 Stat. 1716), and 85–857 (72 Stat. 1105). A significant decrease in vocational rehabilitation and education workloads accounts for $3.5 million decrease in 1960 requirements. Key workload forecasts are outlined below. In addition, certain factors in workload trends are discussed under the appropriations for readjustment benefits, compensation and pensions, and insurance programs.

1. *General administration.*—The Administrator and his top staff assistants provide the executive direction of the agency, establish basic policies, interpret laws pertaining to veterans' affairs and promulgate supplementary regulations, and direct and coordinate the activities of the operating departments. The Board of Veterans Appeals, established by statutory enactment, renders appellate

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

GENERAL OPERATING EXPENSES—Continued

decisions final in all cases other than insurance cases, in appeals to the Administrator on claims involving benefits under laws administered by the Veterans' Administration.

2. *Insurance.*—Approximately 6 million veterans are insured under the United States Government or national service life insurance programs. Obligational requirements for the administration of these programs have been reduced from approximately $41.5 million in 1953 to an estimated $26.2 million in 1960. These reductions, accompanied by only slight decreases in the number of policies maintained, have been made possible through consolidation of activities and improved operating methods and procedures.

AVERAGE NUMBER OF POLICIES IN FORCE

	1958 actual	*1959 estimate*	*1960 estimate*
U. S. Government life insurance	361,000	345,000	328,000
National service life insurance	6,169,550	6,044,000	5,928,910

3. *Veterans benefits.*—Veterans and dependents claims for compensation, pensions, or other benefits are adjudicated, and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents, as indicated by the following workloads:

	1958 actual	*1959 estimate*	*1960 estimate*
Rating actions (disability)	978,127	1,060,000	1,068,000
Authorization actions (disability)	747,982	750,000	760,000
Rating actions (death)	110,159	110,000	115,000
Authorization actions (death)	602,334	590,000	577,000
Cases involving guardianship or fiduciary relationship	369,374	380,000	390,000
Field examinations	154,484	155,000	156,000

Eligibility of trainees for vocational rehabilitation and education or educational assistance is determined, guidance is furnished to trainees, and contracts are made with training institutions for tuition and other charges. Trainees (average number) are expected as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
World War II veterans	454	200	100
Korean conflict veterans	522,322	460,000	360,200
War orphans	3,130	6,400	9,000
Vocational rehabilitation trainees	13,893	13,000	10,600

Loan guaranty operations include issuance of certificates of loan guaranty or insurance, servicing of loans reported in default, payment of claims of lenders on defaulted loans, acquisition, management, and disposal of property when necessary to protect the Government's interest, making of direct loans to veterans in certain areas, and, providing assistance to specified paraplegic veterans in acquiring specially adapted housing. Key workload forecasts are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Guaranteed or insured loans closed	173,307	250,000	300,000
Direct loans closed and fully disbursed	25,806	25,000	24,900
Defaults processed	75,359	80,869	83,666
Claims paid	7,807	8,391	8,697
Loan and property acquisitions	7,683	8,780	8,810
Housing grants	377	430	430

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:

Appropriation	$729,038,000	$720,667,000	$786,779,000
Proposed supplemental due to pay increases		43,065,000	

This appropriation provides for the cost of care and treatment of beneficiaries at Veterans Administration hospitals and domiciliaries, contract hospitals, and State homes. To be eligible for such care and treatment a beneficiary must be a veteran of any war with a service-connected disability incurred or aggravated during a period of war, or within the limits of Veterans Administration facilities, for any other disability if the veteran is unable to defray the expenses of necessary hospital or domiciliary care.

Increases in 1960 are occasioned by: (1) An increase of 233 patients in hospitals and 102 members in domiciliary homes; (2) the extra calendar and workday in 1960; (3) wage increases for wage-board employees; (4) the increase in staffing levels to sustain quality medical care; (5) the advancing state of deterioration and obsolescence in the physical plant of many Veterans Administration hospitals; (6) the need for replacement of worn and obsolete equipment; and (7) the higher rate of utilization and cost of commodities and services. The average employment listed below excludes the employment equivalents for consultants and terminal leave payments.

1. *Maintenance and operation of hospitals.*—This covers the operation of 168 Veterans Administration hospitals. The estimated costs for 1960 exceed 1959 by $23,334,000.

VETERANS ADMINISTRATION HOSPITALS

	1958 actual	*1959 estimate*	*1960 estimate*
Neuropsychiatric hospitals:			
Average number of operating beds	55,458	55,392	55,337
Average daily patient load	52,674	52,393	52,349
Average employment (net)	37,148	37,636	38,063
Tuberculosis hospitals:			
Average number of operating beds	7,855	7,353	6,994
Average daily patient load	6,959	6,568	6,278
Average employment (net)	8,517	7,989	7,863
General medical and surgical hospitals:			
Average number of operating beds	57,888	58,209	58,683
Average daily patient load	51,966	52,102	52,669
Average employment (net)	69,170	69,471	71,732
Total, Veterans Administration hospitals:			
Average number of operating beds	121,201	120,954	121,014
Average daily patient load	111,599	111,063	111,296
Average employment (net)	114,835	115,096	117,658

2. *Contract hospitalization.*—This covers the hospitalization in other Federal hospitals for service and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, certain veterans in training, and veterans in United States Territories and possessions may also receive treatment of non-service-connected disabilities. The net increase in the estimated costs over 1959 of $236,000 is caused by increased Federal per diem rates and increased costs of non-Federal hospitalization.

AVERAGE DAILY PATIENT LOAD

	1958 actual	*1959 estimate*	*1960 estimate*
Civil hospitals	1,131	1,093	1,093
Municipal and State hospitals	585	715	736
Other Federal hospitals	1,266	1,309	1,309
Total	2,982	3,117	3,138

3. *Maintenance and operation of domiciliary facilities.*—This covers the cost of domiciliary care of veterans in 17 Veterans Administration facilities and in 33 State institutions. The net increase in the estimated costs over 1959 is $477,000.

DOMICILIARIES

	1958 actual	*1959 estimate*	*1960 estimate*
Average number of operating beds	17,670	17,699	17,699
Average daily member load:			
Veterans Administration domiciliaries	16,277	16,430	16,430
Veterans Administration hospitals	396	380	382
State homes	9,318	9,500	9,600
Average employment (net)	3,876	3,935	3,935

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:

Appropriation	$80,889,000	$75,399,000	$83,866,000
Proposed supplemental due to pay increases		4,555,000	

[1] Includes capital outlay as follows: 1958, $546,510; 1959, $76,000; 1960, $243,000.

This appropriation provides for veterans with service-connected disabilities both medical and dental care by the staffs of 71 Veterans Administration outpatient clinics and by physicians and dentists participating in the hometown medical care program. Outpatient care also is provided to veterans receiving vocational rehabilitation who require treatment to avoid interruption of training, pensioners of nations allied with the United States in World War I and World War II, and veterans of the Spanish-American War, Boxer Rebellion, and Philippine Insurrection. Veterans are also provided examinations in outpatient clinics for purposes of rating for compensation or pension, insurance, and determining their need for hospitalization or domiciliary care.

The increase of $4,033,000 in estimated costs for 1960 is due to an increased medical workload, increased cost of medical fees, extra workday, increased benefits to Republic of the Philippines Commonwealth Army veterans through Public Law 85–461 (72 Stat. 200), and increased contract burial allowance by Public Law 85–674 (72 Stat. 624).

New obligational authority:			
Appropriation	$1,869,800	$2,055,000	$2,303,000
Proposed supplemental due to pay increases		116,000	

[1] Includes capital outlay as follows: 1958, $13,855; 1959, $6,420; 1960, $36,950.

This appropriation finances the cost of operating a system of three supply depots through which approximately one-fifth of the supplies and equipment used in Veterans Administration facilities are centrally procured and distributed. In addition, the depots provide certain services for other Federal agencies on a reimbursable basis. The depots are located in Hines, Ill., Somerville, N. J., and Wilmington, Calif.

The increase of $137,000 in estimated requirements for 1960 is primarily for one additional workday, approved wage rate schedule increases, and deferred maintenance and equipment items.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Appropriation (new obligational authority)	3,082,250,000	3,200,000,000	3,307,000,000

This appropriation provides for all compensation, pensions, and allowances, including officers' retirement pay and annuities, and initial burial allowances. On June 30, 1958, there were an estimated 22,727,000 living veterans of all wars and peacetime service and, as of that date, 12.5% of these veterans, or 2,850,477, were receiving benefits under this appropriation. In addition, 1,187,857 dependents of 884,428 deceased veterans were receiving benefits. The cost increase is primarily attributable to the advancing age of veterans (particularly of World War I service), the discharge of personnel from the Armed Forces, the deaths occurring among veterans in civil life, and the enactment of recent legislation liberalizing certain entitlements and rates. It is estimated that the total additional cost of the recent legislation will approximate $30,000,000 in 1960 and $25,000,000 during the current year.

Forecasts of average caseloads and average annual payments per case have been based on analyses of trends in each category, with consideration given to specific conditions likely to affect the separate classes of beneficiaries. The anticipated supplemental appropriation requirement of $52,500,000 for 1959 is shown under proposed for later transmission.

1. *Compensation.*—Compensation is payable to living veterans for disability connected with military service and compensation or dependency and indemnity compensation is payable to eligible dependents of deceased veterans for death connected with military service.

Living veterans.—The basic rates of disability compensation provided in wartime cases range from $19 for 10% disability to $225 per month for total disability. Certain cases are compensated for specific disabilities as prescribed by law, to a maximum of $600 a month per case. Also payable in both types of cases is an additional allowance for dependents of veterans rated 50% or more disabled, to a maximum of $100 a month per case. All rates of peacetime disability compensation are 80% of wartime rates.

The caseload of living veterans is estimated to continue decreasing from the peak which was reached in 1956.

LIVING VETERANS—SERVICE-CONNECTED

[Average number of veterans and costs]

	1958 actual	*1959 estimate*	*1960 estimate*
Spanish-American War	270	250	215
World War I	209,162	197,100	184,800
World War II	1,581,663	1,566,700	1,527,400
Korean conflict	197,466	202,900	206,100
Peacetime service	78,341	89,800	102,600
Total	2,066,902	2,056,750	2,021,115
Average payment per case per year	$752.32		
Average payment per case per year (based on last 9 months' experience in 1958)	$772.92	$773.20	$773.22
Total costs	$1,554,980,941	$1,590,276,000	$1,563,904,000

Dependents of deceased veterans.—The total caseload continues to increase, although the largest group in this category (World War II) appears to have reached a plateau which is maintained through 1960. The continued increase in the average annual payment per case is attributable to legislation providing increased death benefits to a majority of eligible dependents (Public Law 84–881), and increasing military pay rates (Public Law 85–422).

DEPENDENTS OF DECEASED VETERANS—SERVICE-CONNECTED

[Average number of cases and costs]

	1958 actual	*1959 estimate*	*1960 estimate*
Spanish-American War	1,060	955	845
World War I	49,071	46,300	43,800
World War II	276,749	276,200	276,000
Korean conflict	35,591	36,500	37,300
Peacetime service	24,433	28,200	32,400
Total	386,904	388,155	390,345
Average payment per case per year	$1,212.05	$1,223.62	$1,229.24
Total costs	$468,945,233	$474,956,000	$479,827,000

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability and death. The rates and conditions of entitlement outlined below apply to World War I and subsequent periods of service; rates and conditions of entitlement applicable to prior periods vary somewhat and are more liberal.

Living veterans.—In general, pensions are payable to wartime veterans who are unable to secure substantially gainful employment as a result of a permanent and totally disabling non-service-connected disability. The legally prescribed standards for determining eligibility are especially liberal for veterans who have reached 65 years of age. The basic rate is $66.15 a month, increased to $78.75, if the veteran is at least 65 years old, or if he has been rated permanently and totally disabled for a continuous period of 10 years. A rate of $135.45 monthly is payable to veterans requiring regular aid and attendance. Eligibility for pension is subject to an annual income limitation of $2,700 for a veteran with a wife or dependent child or $1,400 if he has no such dependents.

The caseload and average payment per case continue to increase primarily because of the increasing number of World War I veterans who are reaching age 65. The two Civil War veterans gained in 1959 are Confederate veterans initially entitled under recent legislation.

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

COMPENSATION AND PENSIONS—Continued

Dependents of deceased veterans.—In World War II and Korean conflict cases, pensions are payable to dependents of deceased wartime veterans, whose death was not caused by military service but who had a service-connected disability at the time of death. This last requirement does not apply to World War I cases. Rates vary, depending upon the relationship and the number of dependents, and the periods of service. Eligibility for pension is generally subject to an annual income limitation of $1,400 to a widow without a child, or $2,700 to a widow with one or more children.

The caseload continues to increase. The Civil War category includes approximately 1,000 widows of Confederate veterans who were initially entitled by Public Law 85–425, effective July 1, 1958. The 1959 increase in average payment per case also results from enactment of Public Law 85–425 which increased rates payable to widows of deceased veterans of the Spanish-American and prior wars. This average is expected to decrease in fiscal year 1960.

DECEASED VETERANS—NON-SERVICE-CONNECTED

[Average number of cases and costs]

	1958 actual	*1959 estimate*	*1960 estimate*
Mexican War	8	5	3
Indian wars	1,072	800	700
Civil War	4,859	4,300	3,500
Spanish-American War	84,889	79,100	77,700
World War I	355,866	379,300	400,900
World War II	40,132	45,800	51,400
Korean conflict	1,156	1,600	2,300
Peacetime service	85	75	65
Total	488,067	510,980	536,568
Average payment per case per year	$630.44	$661.58	$659.49
Total costs	$307,698,031	$338,053,000	$353,863,000

3. *Other—Emergency officers.*—Emergency officers of World War I who are retired for service-connected disability are entitled to special retirement benefits at rates substantially higher than the normal compensation payments. Public Law 85–422, effective June 1, 1958, increased the retirement pay by approximately 6%.

Adjusted service and dependents pay.—Adjusted-service credits earned by veterans of World War I are payable from this appropriation. Veterans' claims of $50 or less and dependents' claims of less than $50 are paid in cash. Dependents' claims of $50 or more are paid in 10 equal quarterly installments. A bonus payment of $60 is paid to the dependents of a World War I veteran who died in service before July 1, 1919, if an adjusted-service credit is certified to the Administrator.

Subsistence allowance.—Subsistence allowance payments to disabled veterans enrolled in vocational rehabilitation and education programs are made from this appropriation.

Initial burial allowance.—Under the provisions of Public Law 85–674, effective August 18, 1958, the Administrator has increased from $150 to $250 (plus transportation charges where death occurs under Veterans' Administration care) the allowance for the funeral expenses of deceased veterans whose deaths occurred after August 18, 1958. This, together with the normal increase in the number of these awards, results in a significant increase in the estimated total cost.

Special allowance, dependents.—Under certain conditions a special allowance is payable to certain dependents of a veteran who dies after December 31, 1956, but who was not fully and currently insured under the Social Security Act. The award is based upon a certification to Veterans Administration by the Social Security Administration.

Federal Reserve Bank of St. Louis

the form of tuition and supplies and equipment for those requiring vocational rehabilitation, housing grants, and automobiles and other conveyances.

1. *Education and training.*—The number of World War II veterans receiving education and training has diminished to a negligible number. It is estimated the number of Korean conflict veterans receiving benefits will decline gradually during the next few years. Indications point to a moderate increase in trainees benefiting from the War Orphans' Educational Assistance Act. The unit cost was high during 1958 for war orphan trainees because of the disproportionate number of retroactive payments which characterized the early period of the program. Forecasts of trainee loads based upon an analysis of trends in each of the major categories of training and average costs per trainee follow:

	1958 actual	*1959 estimate*	*1960 estimate*
World War II education:			
Average number of trainees	454	200	100
Average cost per trainee	$1,106.72	$1,100.00	$1,100.00
Korean conflict veterans:			
Higher learning	284,771	261,000	204,200
Below college	145,297	132,000	108,000
Correspondence	23,017	24,000	24,000
Institutional on-farm	31,210	23,000	14,000
Job training	38,027	20,000	10,000
Total	522,322	460,000	360,200
Average cost per trainee	$1,327.89	$1,327.50	$1,327.20
War orphans:			
Average number of trainees	3,130	6,400	9,000
Average cost per trainee	$1,655.98	$1,320.00	$1,320.00

2. *Loan guaranty.*—Home, farm and business loans are guaranteed or insured by the Veterans Administration. The payment of claims and the acquisition of loans and properties result from failure of veteran borrowers to keep up their mortgage payments, thus requiring the Government to assume the responsibility. Budget forecasts are based on the relatively low default ratio experienced during the program. The number and cost of loan guaranty direct benefit payments follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Interest gratuities, total cost	$6,724	----------	----------
Claims paid:			
Number of claims paid	7,807	8,391	8,697
Average cost per payment	$1,572.67	$1,650.00	$1,750.00
Total cost	$12,277,848	$13,845,000	$15,220,000
Loans acquired:			
Number of loans acquired	152	1,200	1,200
Average cost per acquisition	$6,844.69	$7,200.00	$7,500.00
Total cost	$1,040,393	$8,640,000	$9,000,000
Properties acquired:			
Number of properties acquired	7,531	7,580	7,610
Average cost per acquisition	$8,858.60	$9,200.00	$9,500.00
Total cost	$66,714,106	$69,736,000	$72,295,000

The increase in average cost for claims as well as loan and property acquisitions bears a direct relationship to the steady price index rise in the housing market.

Though these expenditures are paid from appropriated funds, they do not represent full loss to the Government, since the proceeds from liquidation of assets are deposited into the general fund receipts of the Treasury as shown below:

	1958 actual	*1959 estimate*	*1960 estimate*
Expenditures from appropriated funds	$80,032,347	$92,221,000	$96,515,000
Less returns to general fund receipts	21,279,139	24,500,000	28,000,000
Net appropriation expenditures	58,753,208	67,721,000	68,515,000

As of June 30, 1958, cumulative expenditures for claims and acquisitions totaled $327,487,425, however, total cash receipts of $105,171,277 had been returned to the Treasury. Against the resulting cash deficit of $222,316,148, Veterans Administration held assets worth $209,536,585, consisting of real property, cash, and loans and accounts receivable. Actual 1958 and estimated 1959 and 1960 operations are compared in the following statement:

CONDENSED STATEMENT OF INCOME AND EXPENSE AND FINANCIAL CONDITION

	1958 actual	*1958 estimate*	*1960 estimate*
Income:			
Sale of real estate and property rights	$62,894,618	$72,000,000	$81,000,000

Deficit (−)	−16,585,174	−17,010,174	−16,840,174
Total Government investment	205,730,974	273,026,974	341,711,974
Total liabilities and Government investment	209,536,585	278,026,974	347,711,974

3. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation are provided educational assistance for tuition, supplies, and equipment. Assistance also is available to provide grants for specially adapted housing to veterans having suffered the loss of both feet, and to paraplegic veterans. In addition, up to $1,600 is allowed certain disabled veterans toward the purchase of automobiles or other conveyances. Based on an analysis of trends, load forecasts, and average costs, total requirements are projected as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Tuition:			
Average number of trainees paid tuition (job training excluded)	10,835	10,400	8,400
Average cost per trainee	$601.73	$600.00	$600.00
Total cost	$6,519,794	$6,240,000	$5,040,000
Supplies and equipment:			
Average number of trainees	13,893	13,000	10,600
Average cost per trainee	$75.21	$75.00	$75.00
Total cost	$1,044,851	$975,000	$795,000
Housing grants:			
Number of housing grants	377	430	430
Average cost per grant	$9,915.30	$9,900.00	$9,900.00
Total cost	$3,738,067	$4,257,000	$4,257,000
Automobiles and other conveyances:			
Number of conveyances	480	300	200
Average cost per conveyance	$1,597.86	$1,600.00	$1,600.00
Total cost	$766,973	$480,000	$320,000

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Accounts receivable (benefit overpayments collectible)	$2,885,239	$1,768,557	$1,768,557	$1,768,557
Unpaid authorizations (approved authorizations for paraplegic housing and automobiles or other conveyances)	739,194	644,251	644,251	644,251
Total selected resources at end of year	3,624,433	2,412,808	2,412,808	2,412,808
Selected resources at start of year (−)		−3,624,433	−2,412,808	−2,412,808
Adjustment of selected resources reported at start of year		−81,600	----------	----------
Costs financed from obligations of other years, net (−)		−1,293,225	----------	----------

Annual definite:			
Veterans insurance and indemnities		$51,100,000	$53,000,000
Military and naval insurance	$4,275,000		
National service life insurance	7,600,000		
Servicemen's indemnities	32,127,500		
Permanent indefinite:			
Veterans insurance and indemnities		660,000	655,000
Military and naval insurance	7,225		
National service life insurance	693,449		
Total appropriations	44,703,174	51,760,000	53,655,000

1. *Military and naval insurance.*—Payments are made for claims on war-risk insurance issued to servicemen and veterans of World War I. Although no policies of this insurance remain in force, payments for death and disability claims continue.

(*a*) *Payments to United States Government life insurance fund.*—Transfers are made to reimburse the fund for claims (1) traceable to the extra hazards of military service and (2) arising on certain policies held by personnel in active military service. The cash amount of payment made during the year is an obligation of this account. The corresponding trust fund receipt is presented on an accrued basis and is therefore not identical.

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Death and disability awards	446	455	455
Average payment per award	$1,971	$1,978	$1,978

(*b*) *Direct payments to policyholders and beneficiaries.*—(1) Disability awards—Payments of $5.75 per month per $1,000 of war-risk insurance held are made to veterans becoming permanently and totally disabled for as long as the disability shall continue.

(2) Death awards—Upon the death of a veteran receiving payments for disability, the remaining value of the policy is paid to the beneficiary as a death award.

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Average number of disability awards	6,800	6,700	6,600
Average number of death awards	58	55	55
Annual average payment per disability award	$533	$530	$530
Annual average payment per death award	162	182	182

2. *National service life insurance.*—This appropriation pays certain expenses of the national service life insurance fund and receives premiums and pays claims on nonparticipating insurance policies issued to certain disabled veterans of World War II. The permanent indefinite appropriation of premium receipts is authorized. The cash amount of payment made during the year is an obligation of this account. The corresponding trust fund receipt is presented on an accrued basis and is therefore not identical.

(*a*) *Payments to national service life insurance fund.*—(1) For death claims traceable to extra hazard of service an amount is transferred from this appropriation, which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to the extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund; (2) gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for national service life insurance; (3) the fund is reimbursed when recovery of erroneous payments or overpayments is waived; and (4) the fund is reimbursed for death claims on policies under waiver of premiums while the insured is on active military duty.

Description	Average payment per case, 1958	Caseload 1958 actual	Caseload 1959 estimate	Caseload 1960 estimate
(1) Claims for extra hazards of service:				
(a) Death awards	$6,624	631	775	821
(b) Disability awards	138	23,723	22,500	22,500
(2) Gratuitous insurance	3,033	265	237	211
(3) Waiver of overpayments	2,677	15	40	40
(4) Death while under waiver of premiums	7,893	811	303	293

(*b*) *Direct payments to policyholders and beneficiaries.*—(1) Claims are paid on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities; (2) claims may be paid in certain instances in which applicants for insurance were rejected for medical reasons and subsequently died in line of duty; (3) claims are paid on death which occurred after application but before effective date of a national service life insurance policy; and (4) claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

Description	Average payment per case, 1958	Caseload 1958 actual	Caseload 1959 estimate	Caseload 1960 estimate
(1) Claims on nonparticipating national service life insurance:				
(a) Death awards	$2,218	110	104	104
(b) Disability awards	448	167	175	188
(2) Claims from applicants rejected for medical reasons who died in line of duty	574	181	171	171
(3) Claims where applicant died between date of application and effective date	514	311	329	329
(4) Claims on discontinued insurance	483	325	343	343

3. *Service-disabled veterans insurance.*—Beginning in 1960, payments will be made to the service-disabled veterans insurance fund to supplement the premium and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans whose service-connected disabilities made them ineligible for commercial insurance.

4. *Servicemen's indemnities.*—Beneficiaries of servicemen who died prior to January 1, 1957, while in active service or within a period of 120 days after separation from active service are entitled to receive an indemnity of $10,000 less any national service life insurance and/or United States Government life insurance carried by the deceased. Payments are made to beneficiaries in 120 equal instalments, plus interest at the rate of 2.25% per year. Payments on awards made prior to January 1, 1957, are expected to remain at the level of about $36 million annually through 1960. Payments will decrease annually, as instalments are completed, beginning in 1961.

Grants-in-aid are made to the Republic of the Philippines for the medical care and treatment of eligible Philippine Commonwealth Army veterans. Public Law 85–461 provides for reimbursement at agreed upon patient per diem rates up to a maximum annual amount of $2,000,000. Medical care and treatment is provided by the Philippine Veterans Memorial Hospital, in Manila, which was constructed from United States grants-in-aid totaling approximately $9,400,000.

Unpaid undelivered orders carried forward			54,435,213	80,167,045	60,811,678				
Total program (obligations)			63,967,748	74,280,586	50,113,633				
Financing:									
Unobligated balance brought forward			−128,293,780	−108,854,032	−53,868,446				
Unobligated balance carried forward			108,854,032	53,868,446	23,913,813				
Appropriation (new obligational authority)			44,528,000	19,295,000	20,159,000				

These funds provide for the construction of new hospital and domiciliary facilities and replacement of existing hospitals, including acquisition of sites, conversion of existing facilities, modernization, improvements, and major repairs of existing facilities (including regional offices and supply depots), and for fixed and initial portable equipment at such facilities.

For 1960, a construction program is recommended with new obligational authority of $20,159,000. This will provide $3,000,000 for the full cost of construction of a large number of minor projects (costing less than $300,000 each), $1,980,000 for planning the construction of $22,000,000 in larger modernization projects, $14,379,000 for construction of projects planned in 1959, and $800,000 for plans for the construction of a 400-bed building at the Veterans' Administration hospital at Oteen, N. C.

1. *Construction of new hospitals.*—This activity includes post World War II new beds and conversion programs which consist of 77 projects that provide approximately 38,040 new beds and 12 projects for conversion of beds at existing hospitals. Of the new beds, 10,835 are in neuropsychiatric hospitals, 2,380 in tuberculosis hospitals, 24,525 in general medical and surgical hospitals and 300 in domiciliaries.

STATUS OF NEW BEDS PROVIDED

	1958 actual	*1959 estimate*	*1960 estimate*
Under construction at beginning of year	1,000	1,000	2,000
Put under construction during year	1,000	1,000	
Completed during year	1,000		1,000
Total completed at end of year	34,740	34,740	35,740
Under construction at end of year	1,000	2,000	1,000
Not under construction at end of year	2,300	1,300	1,300

2. *Replacement of existing hospitals.*—This activity includes ten projects that provide for replacement of approximately 7,896 beds (815 neuropsychiatric and 7,081 general medical and surgical) housed in temporary, obsolete, or hazardous structures.

STATUS OF REPLACEMENT, BEDS PROVIDED

	1958 actual	*1959 estimate*	*1960 estimate*
Under construction at beginning of year	561	815	1,315
Put under construction during year	815	500	500
Completed during year	561		
Total completed at end of year	561	561	561
Under construction at end of year	815	1,315	1,815
Not under construction at end of year	6,520	6,020	5,520

3. *Modernization, improvements, and repairs.*—This activity provides for modernization, improvements, and major repairs of structures and other construction at Veterans Administration facilities and is principally required to bring selected old hospitals, insofar as possible up to the standards of the new hospitals. This program was undertaken in 1953 and has 663 projects including the proposed 1960 modernization, improvements, and repairs program. The status of the program is as follows:

STATUS OF MODERNIZATION, IMPROVEMENTS, AND REPAIRS PROGRAM

	Number of projects	*Amount*
Physically and financially completed, June 30, 1958	294	$29,434,100
Physically completed, June 30, 1958	31	8,026,700
Under construction, June 30, 1958	103	52,913,900
Scheduled to be placed under construction, 1959	126	31,675,100
Scheduled to be placed under construction, 1960	92	28,390,600
To be placed under construction, future years	17	31,678,600

4. *Initial portable equipment.*—This activity provides initial portable equipment for all projects approved under the Construction of hospital and domiciliary facilities appropriation prior to 1957, except for the new general hospitals proposed for Washington, D. C., Cleveland, Ohio, and the first phase replacement project for Downey, Ill.

6. *Relation of costs to accrued expenditures.*—For the first time this year. this account includes a limitation on accrued expenditures in accordance with Public Law 85–759, approved August 25, 1958. Year-end balances of advances are as follows: June 30, 1957, $2,005,407; 1958, $2,003,399; 1959, $2,000,000; 1960, $2,000,000.

Allocations Received From Other Accounts

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
"Emergency supplies and equipment," Office of Civil and Defense Mobilization.
"National Cancer Institute," Public Health Service.
"Payments to school districts, "Office of Education, Department of Health, Education, and Welfare.
"Research, development, test, and evaluation, Army."

Administrative Provisions

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented, and not to exceed $500,000 of the appropriation "Veterans insurance and indemnities" for the current year may be transferred to "Service-disabled veterans insurance fund".

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Appropriations available to the Veterans Administration for the current fiscal year for "Inpatient care" and "Outpatient care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by [title VIII, Veterans' Benefits Act of 1957 (71 Stat. 117) (38 U. S. C., ch. 12A)] *section 902 of title 38, United States Code,*) for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Construction of hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices Appropriation Act, 1959.*)

[1] Excludes equipment transferred in without charge of $1,400 in 1958.

The Veterans Canteen Service was established by Congress in 1946 to furnish at reasonable prices merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U. S. C. 4201–08).

Budget program.—The volume of sales and service is expected to continue at about the same level through 1960. The slight increase in total operating costs is attributable primarily to the payment of higher salaries.

VETERANS ADMINISTRATION—Continued

Public enterprise funds—Continued

CANTEEN SERVICE REVOLVING FUND—Continued

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Commodities for sale	$3,488,969	$3,984,216	$3,759,906	$3,759,906
Unpaid undelivered orders	908,153	696,037	910,000	910,000
Materials and supplies	38,495	35,241	9,551	9,551
Total selected resources at end of year	4,435,617	4,715,494	4,679,457	4,679,457
Selected resources at start of year (−)		−4,435,617	−4,715,494	−4,679,457
Costs financed from obligations of other years, net (−)			−36,037	
Obligations incurred for costs of other years, net		279,877		

Financing.—Operations are financed from current revenues. An appropriation of $4,965,000 originally made to operate this Service has been repaid to the Treasury.

Operating results and financial condition.—Operating revenue is expected to continue to be sufficient to cover operating expenses. The decline in operating margin is due to higher costs without correspondingly increasing the price of merchandise sold. Funds in excess of service needs will continue to be paid into miscellaneous receipts of the Treasury.

Unobligated balance carried forward	−97,443,207	−101,339,431	−117,757,431
Financing applied to program	218,298,683	230,227,776	239,558,000

Loans are made to veterans for the purchase, construction, or improvement of homes, including farm residences, in specified areas where guaranteed private mortgages cannot be secured (38 U. S. C., sec. 1811). The Emergency Housing Act of 1958, approved April 1, 1958, extended the program to July 25, 1960.

Budget program—1. *Direct loans to veterans.*—Commitments are estimated to continue increasing through 1960. Disbursements in 1959 and 1960 will bring the cumulative total of loans made to more than $1 billion by June 30, 1960. A summary of loan activity follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Number of loan commitments	24,742	24,060	24,551
Number of loans closed and fully disbursed	25,806	25,000	24,900
Amount of loan commitments	$200,509,542	$207,761,776	$212,000,000
Total amount of loans closed and fully disbursed	$209,138,260	$215,865,000	$215,000,000
Average amount of loan closed and fully disbursed	$8,104	$8,635	$8,635
Repayment of loans	$35,432,705	$44,948,000	$58,465,000
Sale of loans	$1,517,774	$5,000,000	$5,000,000
Losses on loans	$35,251	$50,000	$64,000
Net loan disbursements	$172,152,530	$165,867,000	$151,471,000
Loans outstanding end of year:			
Number	104,097	128,000	151,000
Amount	$692,245,679	$858,112,679	$1,009,583,679

Enactment of legislation anticipated in this budget (1) to permit an increase in the rate of interest on Veterans Administration guaranteed and direct loans, and (2) to extend the voluntary home mortgage credit program, would reduce the amount of loan disbursements by approximately $33 million in 1960. This would reduce the 1960 budget expenditures to an estimated $100 million.

2. *Vendee loans made.*—Resale of real property acquired through foreclosure normally involves a cash downpayment by the purchaser and the creation of a new mortgage to be held by the Veterans Administration. The noncash portions of these transactions are excluded from the program and financing schedule above and from the statement of sources and application of funds; but they are included in the following activity summary:

	1958 actual	*1959 estimate*	*1960 estimate*
Amount of properties sold	$888,401	$1,530,000	$1,950,000
Amount of vendee loans acquired	780,093	1,345,000	1,701,000
Amount of vendee loans repaid	115,894	140,000	190,000

3. *Real property acquired.*—Properties are acquired through foreclosure of defaulted loans. This involves primarily an exchange of noncash assets, with relatively small cash outlay. The noncash portions of these transactions are excluded from the program and financing schedule above and the statement of sources and application of funds; but they are included in the following activity summary:

	1958 actual	*1959 estimate*	*1960 estimate*
Amount of properties acquired	$1,225,354	$1,592,000	$1,982,000

4. *Interest on borrowings.*—These payments to the Treasury grow as the total notes held by the Treasury increases with new borrowing authorized by law.

5. *Operating expenses, general.*—These include a variety of miscellaneous expenses incident to the closing and servicing of loans. The total costs are expected to decline substantially in 1959, due to provisions of Public Law 85–364, approved April 1, 1958, which require the veteran borrower to pay loan closer's fees which were previously paid by the Veterans Administration.

6. *Property management and selling expenses.*—These costs of maintaining and selling properties acquired through foreclosure will continue to increase as the number of loans outstanding grows.

Financing.—Loans are made primarily with funds borrowed from the Treasury. Borrowing authority in the amount of $783 million has been authorized through June 30, 1958. An additional $150 million has been authorized for each of fiscal years 1959 and 1960, at a quarterly rate of $50 million less proceeds of loan sales in the preceding quarter. In addition, the proceeds of loan repayments and loan sales are available for making loans. Expenses incident to closing loans are paid by the veteran, foreclosure expenses are met from interest income, and administrative expenses are borne by the appropriation for general operating expenses, Veterans Administration.

Operating results and financial condition.—Interest revenue from loans outstanding exceeds interest expenses on borrowings from the Treasury, providing a growing annual net income, and increasing the retained earnings of the fund by $13 million in 1959 and $16 million in 1960.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
Acquisition of assets:			
Direct loans to veterans	$209,138,260	$215,865,000	$215,000,000
Vendee loans	529	1,000	1,000
Real property	63,934	97,000	127,000
Expense	17,724,678	22,368,000	27,430,000
Total gross expenditures	226,927,401	238,331,000	242,558,000
Receipts from operations (funds provided):			
Repayment of direct loans to veterans	34,295,925	43,498,000	56,676,000
Repayment of vendee loans	91,253	140,000	190,000
Sale of loans	1,517,774	5,000,000	5,000,000
Sale of real property	108,837	186,000	250,000
Revenue	26,678,644	35,300,000	43,860,000

1. Maintenance and repair of quarters.—Rentals received for 133 housekeeping units leased to Federal employees at Perry Point, Md., and 8 housekeeping units at Cleveland, Ohio, temporarily leased to other than Federal employees are used to defray operating expense including repair and maintenance. (38 U. S. C. 5012.)

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of unpaid undelivered orders as follows: 1957, $2,333; and 1958, $1,178.

Total amounts available	4,695,785	4,642,087	4,590,841
Unobligated balance carried forward	−1,728,931	−716,298	429,281
Financing applied to program	2,966,854	3,925,789	5,020,122

This fund finances the payment of claims on nonparticipating insurance policies issued to veterans with a service-connected disability which makes them ineligible for commercial insurance (38 U. S. C. sec. 722). Administrative expenses are paid from the appropriation, General operating expenses.

Budget program—1. *Death claims paid.*—Payments to surviving beneficiaries continue to increase as new deaths occur among the increasing number of policyholders.

2. *Premiums waived and lien writeoff.*—Premium payments are waived for policyholders who are totally disabled for 6 months or more. This is a cost to the fund which increases with the number of policies in force.

3. *Cash surrenders paid.*—A policyholder may terminate his insurance by cashing in his policy for its cash value. This activity continues to increase as the number of policies increases.

5. *Policy loans and liens made.*—A policyholder may borrow up to 94% of the cash value of his policy. This activity increases with the number of policyholders.

The general increase in the activity of this fund is indicated in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Number of policies	26,781	33,791	37,000	44,000
Insurance in force	$234,406,000	$296,977,000	$325,080,000	$386,496,000

Financing.—Operations are financed from premiums and other receipts. Beginning in 1960, necessary additional funds will be derived from payments from the appropriation Veterans insurance and indemnities, instead of direct appropriations to this fund. It is estimated that the payment will be $300,000 in 1960.

Operating results and financial condition.—Because premium and other receipts continue to be insufficient to cover operations, the deficit is expected to continue increasing through 1960, with capital impairment reaching an estimated $13,420,688 by June 30, 1960.

Unobligated balance brought forward	446,526	432,077	522,327
Total amounts available	454,389	1,741,077	530,327
Unobligated balance carried forward	−432,077	−522,327	−81,577
Financing applied to program	22,312	1,218,750	448,750

The fund finances claims arising from the guaranty of premiums due on commercial life insurance policies held by servicemen while they are in service and for 2 years after discharge (72 Stat. 487). The Government guarantees the repayment of any indebtedness not liquidated by the insured himself. Any payment by the Government on cases approved subsequent to October 6, 1942, creates a debt owed the Government by the insured. The Supreme Court has ruled that, in cases approved prior to October 6, 1942, the insured individuals may make claims for refunds of any payments made to the Government because of alleged indebtedness.

Budget program—Insurance program.—(*a*) Claims paid on guaranteed premiums are made to commercial insurance companies in cases where the servicemen failed to make premium payments which were guaranteed by the Government; (*b*) refund claims paid to former servicemen for payments made to the Government are one-time payments to a limited group of claimants which are expected to be completed in 1960.

The activity of the fund is indicated in the following table:

	1958 actual	*1959 estimate*	*1960 estimate*
Number of settlements	74	75	75
Number of refunds	-------	6,150	2,200
Average cost per settlement	$301.15	$250.00	$250.00
Average cost per refund	-------	$195.00	$195.00

Financing.—Payment of claims against this fund are financed from collection of claims receivable, revenue, and appropriations as needed.

Operating results and financial condition.—The payment of refund claims in 1959 and 1960 will create expenses substantially in excess of the small and relatively stable revenue of the fund, thereby increasing the deficit by $1.2 million in 1959 and $0.4 million in 1960.

Financing applied to program	5,788,735	6,010,000	6,130,000

The fund finances the payment of claims on nonparticipating insurance policies issued before January 1, 1957, to veterans who served in the Armed Forces subsequent to April 1951 (38 U. S. C., section 723). Under Public Law 85–896, policyholders have the right to convert to a permanent plan of insurance or to a new form of term insurance which may not be renewed beyond age 50 but which costs less than the present term insurance. Those who convert to a permanent plan will also acquire the right to purchase total disability income coverage with an additional premium.

Budget program—1. *Death claims paid.*—Payments to surviving beneficiaries continue to increase as new deaths occur among policyholders.

2. *Disability claims paid.*—Payments to individuals who have purchased total disability coverage and who subsequently become totally disabled are expected to begin in 1960.

3. *Premiums waived and lien writeoff.*—Premium payments are waived for policyholders who are totally disabled for 6 months or more. This is a cost to the fund which increases with the number of policies under premium waiver.

6. *Policy loans and liens made.*—The policyholders who convert their insurance from term to permanent plan will subsequently be entitled to borrow up to 94% of the cash value of the new policy. Disbursement of such loans from this fund is expected to begin in 1960.

The general decrease in the activity of this fund is indicated in the following table:

[Dollars in millions]

	June 30, 1957	*June 30, 1958*	*June 30, 1959*	*June 30, 1960*
Number of policies	727,166	686,628	670,000	643,000
Insurance in force	$6,646	$6,267	$6,114	$5,868

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments, which are decreasing as the number of policyholders declines.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claims payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund. However, the declining premium receipts are expected to equal the increasing claims and other payments in 1960, and no change is anticipated in the retained earnings during that year.

Intragovernmental funds:

Supply Fund

This supply fund finances the procurement and distribution of supplies and equipment throughout the Veterans Administration (38 U. S. C. 5011).

Budget program—Procurement and services program.—The procurement and services program includes the procurement and warehousing of supplies and equipment, the operation of service and reclamation shops at each of the three supply depots which are located at Somerville, N. J., Hines, Ill., and Wilmington, Calif., a centralized book and periodical procurement activity at Somerville, N. J., and a motion picture inspection and shipping activity which distributes films to Veterans' Administration hospitals and homes. Expenditures in 1960 for the procurement and services program are estimated to be $131,607,850, but will be offset by estimated revenue of $132,575,000.

Publication and reproduction program.—This program provides printing service to Veterans Administration installations on a centralized basis. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing and Binding from the Government Printing Office, the General Services Administration, two Veterans Administration-operated plants in Washington, D. C., and St. Louis, Mo., and from commercial sources. Expenditures and revenue in 1960 are estimated to be $3,093,582 and $3,109,854, respectively.

Financing.—Consuming appropriations reimburse the fund for the cost of goods and services provided, including related expense such as transportation, inspection, and testing but excluding personal services and other costs incidental to the operation and administration of supply activities, which are charged directly to applicable appropriations and are not operating expense of the supply fund.

Operating results.—The fund operated at a net profit of $36,151 in 1958 on a total sales volume of $136 million and is expected to break even in 1959 and 1960 on a slightly higher sales volume. After making allowance for the net deficit of $2,909 at the beginning of 1958, the remaining earnings of $33,342 will be returned to the Treasury in 1959.

The variation in net budget expenditures and working capital between 1958 and 1959 and between 1959 and 1960 is due to an advance of $14,500,000 from various Veterans Administration appropriations to the supply fund in 1958 to carry out the accelerated procurement program authorized by Public Law 85-386.

GENERAL OPERATING EXPENSES

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Insurance operations		$860,000	
2. Loan guaranty operations			$5,000,000
Total program (costs—obligations)		860,000	5,000,000
Financing:			
Proposed supplemental appropriation		860,000	5,000,000

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to cover the cost of added insurance operations resulting from legislation enacted subsequent to the submission of the previous estimates (Public Laws 85–678, 85–857, and 85–896).

Federal Reserve Bank of St. Louis

VETERANS ADMINISTRATION—Continued

Proposed for later transmission—Continued

GENERAL OPERATING EXPENSES—Continued

Under proposed legislation, 1960.—A supplemental appropriation for 1960 is anticipated to cover the cost of increased loan guaranty operations, resulting from legislation proposed in this budget to provide for a competitive interest rate on guaranteed loans.

INPATIENT CARE

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Maintenance and operation of hospitals:			
(*a*) Neuropsychiatric hospitals		$786,000	
(*b*) Tuberculosis hospitals		403,000	
(*c*) General medical hospitals		3,122,000	
2. Maintenance and operation of Veterans Administration domiciliary homes		79,000	
Total program (costs—obligations)		4,390,000	
Financing:			
Proposed supplemental appropriation		4,390,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to cover the cost of salary increases approved for wage board employees and increased cost of contract burials.

OUTPATIENT CARE

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Care of patients:			
(*a*) Medical		$1,936,800	
(*b*) Dental		6,000	
(*c*) Beneficiary travel		411,000	
2. Other		25,200	
Total program (costs—obligations)		2,379,000	
Financing:			
Proposed supplemental appropriation		2,379,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to cover an increased medical workload so that essential medical services to service-connected veteran patients can be maintained; service to Philippine beneficiaries under Public Law 85–461; and increased contract burial allowance under Public Law 85–674.

MAINTENANCE AND OPERATION OF SUPPLY DEPOTS

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Storage operations		$36,000	
2. Utility operations		11,000	
Total program (costs—obligations)		47,000	
Financing:			
Proposed supplemental appropriation		47,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to cover the cost of salary increases approved for wage-board employees subsequent to the submission of previous estimates.

COMPENSATION AND PENSIONS

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Compensation, living veterans, World War II (total costs—obligations)		$52,500,000	
Financing:			
Proposed supplemental appropriation		52,500,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to cover uncontrollable statutory benefit costs of the compensation and pensions program, including approximately $25 million attributable to recent legislation increasing rates and extending entitlement in certain categories.

DIRECT LOANS TO VETERANS AND RESERVES

Under proposed legislation, 1960.—Legislation will be proposed to increase the rate of interest on loans and to extend the voluntary home mortgage credit program, thereby reducing loan disbursements in 1960 by an estimated $33 million.

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System.

SEC. 103. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided, nor to the purchase of newspapers and periodicals necessary for the care and welfare of patients and members in Veterans Administration hospitals and domiciliary facilities.

SEC. 104. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

[SEC. 105. Appropriations contained in this title, available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made.]

SEC. [106] *105.* No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. [107] *106.* No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; wage administration; and processing, recording, and reporting.

SEC. [108] *107.* None of the sections under the head "Independent Offices—General Provisions" in this title shall apply to the Housing and Home Finance Agency. (*Independent Offices Appropriations Act, 1959.*)

CORPORATIONS—GENERAL PROVISION

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting. (*Independent Offices Appropriations Act, 1959.*)

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress. (*Independent Offices Appropriations Act, 1959.*)

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1960

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
ATOMIC ENERGY COMMISSION								
Operating expenses							$180,149	Transportation of official personnel, air patrol of prohibited areas, geological evaluations.
Aircraft	1	$7,000	1	$1,000	$6,000	2		Do.
CIVIL AERONAUTICS BOARD								
Salaries and expenses						1	14,590	Staff officials: For investigating aircraft accidents in the field.
FEDERAL AVIATION AGENCY								
Expenses						108	14,111,900	Used by specialized flight inspection, technical and engineering personnel for certifying the accuracy and reliability of aids to air space navigation and traffic control; for experimental flight projects, and flight test operations in connection with developmental projects and evaluation of air traffic control systems and devices; for developing flight safety standards and procedures; for establishing minimum en route altitudes; for operational training and flight performance proficiency. In addition to logistic support of Federal Aviation Agency stations located in Alaska and the Pacific areas, aircraft are used by safety agents in making inspections, investigating accidents and provide transportation to key staff officials when in the best interests of the public business.
Establishment of air navigation facilities.	3	5,129,000			5,129,000			Do.
Research and development	3	92,700			92,700	3	1,231,400	Do.
Total, Federal Aviation Agency.	6	5,221,700			5,221,700	111	15,343,300	
TENNESSEE VALLEY AUTHORITY								
Tennessee Valley Authority fund						8	115,000	5 helicopters will be used for transmission line patrol, malaria control spraying, reconnaissance, aerial inventories, and air sampling in the vicinity of Tennessee Valley Authority steam plants for air pollution tests; 1 fixed-wing plane will be used for emergency malaria control spraying, transmission line trouble shooting, and reservoir aerial inspection; 1 airplane will be used for passenger service with some use for aerial mapping and reconnaissance; and 1 airplane will be used principally for the transportation of engineers to widely scattered projects and for transportation of administrative officers on official business.
Total, independent offices	7	5,228,700	1	1,000	5,227,700	122	15,653,039

GENERAL SERVICES ADMINISTRATION

The new obligational authority of $258 million recommended for the General Services Administration for 1960 is about half the 1959 amount. This is primarily because no new funds are requested for construction and because less is being requested for repair of Federal buildings. Expenditures, however, will decline only slightly in 1960 to an estimated $411 million, which is $16 million below 1959 and $13 million below 1958. Sharp decreases in acquisitions of materials for the strategic stockpile will be offset by higher expenditures for construction of Government buildings from funds appropriated for 1959.

General property and records management.—Management of the Government's real property accounts for 84% of the 1960 recommendations for new obligational authority. New obligational authority for real property activities is expected to decline from $435 million in 1959 to $218 million in 1960. No funds are requested for the construction of additional office buildings; and recommended new obligational authority for repairs and improvements to buildings is reduced from $75 million in 1959 to $60 million in 1960, mainly by continuing air conditioning of office space at a slower rate. The most important increases proposed are for additional leased and Government-owned office space for tenant agencies, rental costs transferred from tenant agencies (with corresponding reductions for those agencies), temporary space, furniture and equipment incident to construction of new office buildings, and maintenance of a larger number of surplus properties pending arrangements for their disposal.

The central supply system operated by the General Services Administration continues to grow as agencies increasingly use its services. A 1959 supplemental request of $15 million for additional capital for the general supply fund is anticipated based on an estimated increase in business in 1959 of nearly one-third over 1958. General supply fund capital requirements are expected to remain at about the 1959 level during 1960, and no additional capital is therefore requested for 1960. Expenses of operating the supply depot system will increase somewhat in 1960 in line with additional depot sales. Other personal property activities are budgeted at about the 1959 level.

A minor increase is recommended in 1960 because of the added workload of the records centers. Transportation and public utility services will be at the 1959 level.

Stockpiling.—The recent review of stockpile needs has resulted in a sharp curtailment of procurement of strategic and critical materials. Stockpile inventories, together with strategic materials held in other Government inventories are sufficient to meet all but a few stockpile objectives. However, no transfers of materials from inventories accumulated under defense production expansion and Commodity Credit Corporation barter programs to the stockpile are scheduled for 1959 and 1960. Balances available from prior appropriations will be sufficient to finance stockpile operations through 1960.

Other functions.—The abaca fiber production program (carried out on several plantations in Central America) is being liquidated due to greatly reduced mobilization requirements. Accelerated sales of fiber will result in net receipts in 1960 of $1.3 million. Receipts under defense production guaranties and from the liquidation of the Federal Facilities Corporation and of certain assets of the former Reconstruction Finance Corporation are estimated at $2 million in 1960.

REAL PROPERTY ACTIVITIES

Current authorizations:

OPERATING EXPENSES, PUBLIC BUILDINGS SERVICE

For necessary expenses of real property management and related activities as provided by law; [furnishings and equipment;] rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation, and transfer of building space; acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; *and* payments in lieu of taxes pursuant to the Act of August 12, 1955 (40 U. S. C. 521); [and not to exceed $247,000 for expenses of travel; $136,539,000] *$155,100,000*: *Provided*, That this appropriation shall be available, without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a), with respect to buildings or parts thereof, heretofore leased under the appropriation for "Emergency operating expenses".

[For an additional amount for "Operating expenses, Public Buildings Service", $5,200,000; and the limitation under this head in the Independent Offices Appropriation Act, 1959, on the amount available for travel expenses of employees, is increased by $6,000.] (*Independent Offices Appropriation Act, 1959; Supplemental Appropriation Act, 1959.*)

Appropriated 1959, **$141,739,000** Estimate 1960, [a] **$155,100,000**

[a] Excludes $4,555,000 for activities transferred in the estimates to "Strategic and critical materials." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Buildings management	$125,282,525	$133,063,700	$146,651,000
2. Acquisition and disposal	2,686,542	2,779,400	2,830,000
3. Design and construction	231,003	231,600	231,600
4. Program planning	663,822	791,700	791,700

Unobligated balance no longer available	38,598		
New obligational authority	133,488,800	143,962,600	155,100,000
New obligational authority:			
Appropriation	$132,689,000	$141,739,000	$155,100,000
Transferred (71 Stat. 232) to—			
"Operating expenses, Federal Supply Service"	−67,000		
"Operating expenses, Transportation and Public Utilities Service"	−30,000		
Transferred from—			
"Payments, public buildings purchase contracts" (72 Stat. 243)	880,000		
"Expenses, supply distribution" (63 Stat. 381)	16,800		
Appropriation (adjusted)	133,488,800	141,739,000	155,100,000
Proposed supplemental due to pay increases		2,223,600	

This appropriation provides for basic real property operations of the General Services Administration including the direction of all real property programs; acquisition, operation, and utilization of general-purpose space; operation of communications facilities; management of excess real property and disposal of surpluses; and central direction of all buildings design, construction, and repairs.

The appropriation request for 1960 is a net increase of $12,157,400 above a comparable amount for 1959 which includes a proposed supplemental of $4,114,600. The net increase is composed of $11,696,300 for management and operation of buildings, and $461,100 for other program activities and administrative operations to support the expanded program.

1. *Buildings management.*—This activity provides for (*a*) rental, operation, protection, and utilization of Government-owned, leased, and purchase contract space, as indicated in the following table:

AVERAGE NET SQUARE FEET

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Government-owned space	54,921,000	54,876,000	54,985,000	56,203,000
Leased space	20,434,000	21,428,000	22,544,000	24,236,000
Purchase contract space		40,000	62,000	577,000

(*b*) maintenance and operation of joint-use communication facilities; (*c*) protection and maintenance of excess, surplus, and national industrial reserve properties; and (*d*) payments in lieu of taxes on certain properties transferred from the Reconstruction Finance Corporation.

The net increase for 1960 of $11,696,300 over the comparable amount for 1959 is composed of the following items:

Operation and protection of Government-owned space	$2,337,400
Rental, operation, and protection of leased space	2,481,900
Cost of space supplied to other agencies, reimbursable in 1959	2,960,000
Operation and protection of purchase contract space	658,000
Moving, temporary quarters, etc., for new building projects	2,505,000
Maintenance of industrial reserve and surplus properties	2,000,000
Furniture to be provided by tenant agencies	−450,000
Operation of emergency communication facilities	−760,000
Payments in lieu of taxes	−36,000
Total	11,696,300

2. *Acquisition and disposal.*—This activity provides for (*a*) acquisition of real property by lease, purchase, exchange or donation, and management of available building sites pending construction; (*b*) disposal and utilization of excess, surplus, and industrial reserve property; and (*c*) appraisal services. Sales of surplus properties are estimated at $26,500,000 in 1959 and $28,000,000 in 1960, compared to $40,093,000 in 1958, and $11,560,000 in 1957.

3. *Design and construction.*—This activity provides for a small staff responsible for central direction of all programs involving design, construction, and remodeling of Federal buildings.

4. *Program planning.*—This activity provides centralized planning of real property programs covering immediate and long-range building needs; consultation with other agencies to resolve their general problems on space, building service, or other property management matters, and to determine immediate and long-range space and services needs; development and application of occupancy standards; development and maintenance of space cost statistics and program performance reporting for managerial use.

Unobligated balance carried forward	352,284		
Appropriation (new obligational authority)	65,000,000	75,000,000	60,000,000

This appropriation provides for repairs, renovations, and improvements for over 4,600 Federal buildings under the jurisdiction of General Services Administration for that purpose which contain more than 116.6 million net square feet of floor space and were constructed or purchased at a cost exceeding $1.5 billion. The budget for 1960 provides for continuing maintenance repairs at the 1958–59 level but scheduling renovation and air conditioning work at a slower rate. It also provides for stimulating non-Federal civil defense preparedness by Federal example in providing fallout shelters in existing Government buildings.

This year for the first time this account includes a limitation on accrued expenditures in accordance with Public Law 85–759.

1. *Maintenance repairs.*—Normal recurring needs for repairs to buildings and equipment develop at the average rate of approximately $0.15 per net square foot each year. About 7% of this activity provides for numerous minor capitalized items too small to be considered as renovation projects.

2. *Renovation projects.*—Elimination of major obsolescence and deterioration of buildings is provided by bringing the properties up to modern standards of usefulness to improve working conditions and efficiency of occupying agencies. It is estimated that about 57% of this work will be for capital improvements.

3. *Air conditioning.*—Improvements in working conditions are provided for occupants of buildings located in areas of high temperature and humidity. Approximately 25% of the amount required to air condition existing buildings in zones where the combination of effective temperature and humidity exceeds 80°, based on a study completed in 1956, will have been provided by the end of 1960. Costs under this activity are considered to be capital improvements.

4. *Fallout shelters.*—As a civil defense measure funds are included for construction and testing fallout shelters in existing federally owned buildings.

By legislative action authority to acquire buildings through lease-purchase arrangements under the Public Buildings Purchase Contract Act of 1954 is limited to 29 specific projects costing $55.7 million. Of these, 28 projects costing $45.7 million are under contract or completed. Provision is made to continue authority to contract for the remaining project costing $10 million during 1960. The estimate for 1960 provides for payments to contractors maturing on 25 projects and taxes becoming payable on 17 projects.

Appropriation (new obligational authority)	20,000,000	39,915,000	

This appropriation provides for site acquisition, design, and supervision of construction of authorized new public buildings; construction of a few small buildings; and program planning and development of projects to be proposed for future authorization.

By the end of 1959 all sites will have been acquired for 101 presently authorized new public buildings with estimated improvement costs of $766 million and design for substantially all of these projects will have been put under contract.

The program for 1960, financed from balances of prior appropriations, contemplates contract supervision of construction scheduled to be underway on 79 projects and review of newly completed designs. Approximately $14 million will be required later to completely finance the remaining authorized projects.

Improvements of private hospital facilities in the District of Columbia are made under legislation authorizing appropriations of $40,730,000.

1. *Construction.*—Under authorized appropriations of $23,410,000 a new hospital center was physically completed and occupied during 1958. Cleanup will be completed and remaining equipment installed during 1959.

2. *Grants.*—Under authorized appropriations of $14,320,000 grants totaling $12,974,578 have been approved for private agencies in the District of Columbia for improving existing hospital facilities on which building costs are estimated at $34.8 million.

Approximately $7.1 million, representing 50% of the grants, is to be reimbursed by the District of Columbia over a period of years.

Operating expense.—Prior to 1959 rentals received from occupants of sites or improvements thereon acquired for future construction of Federal buildings were used for necessary maintenance, repairs, and alterations. In 1959 expense will be borne by and rentals deposited into the buildings management fund (72 Stat. 1709). In discontinuing this fund all profits will be returned to the Treasury. In 1958, $543,394 was returned and the remaining amount, estimated at $548,926, will be returned in 1959.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$288	$1,238

This fund finances, on a reimbursable basis, buildings management activities consisting of: Management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; recurring repair of Government-owned space managed by General Services Administration; operation of joint-use communication facilities; protection and maintenance of excess, surplus, and national industrial reserve properties; maintenance and repair of sites or improvements thereon reserved for future construction of Federal buildings and of space occupied by commercial tenants; and other related building services (66 Stat. 594). Retained earnings resulting from operations, after making provision for prior year losses, if any, are paid into the Treasury as miscellaneous receipts.

Program costs for 1960 are estimated at $224.3 million, a net increase of $10.4 million over 1959.

1. *Operation and protection of Government-owned space.*—Provides for operation and protection of 75,500,000 average square feet of space in 1960 compared to 74,300,000 square feet in 1959 and 74,191,973 in 1958. The change from 1959 reflects additional space to be serviced due to construction of new buildings and certain space presently housing postal activities which is being vacated by the Post Office Department.

2. *Rental, operation, and protection of leased space.*—Provides for 37,100,000 average square feet in 1960 compared to 36,600,000 in 1959 and 35,780,194 in 1958, based on currently projected programs of Federal agencies.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Operation and protection of purchase contract space.*—Provides for 577,000 average square feet in 1960 for operation of the post office and courthouse building at Rock Island, Ill., and 26 other purchase contract buildings scheduled for completion during 1960.

4. *Moving and alterations.*—Provides for minimum of moving and alterations based on experience factors derived from buildings management operations.

5. *Operation of communication facilities.*—Provides for management and operation of telecommunication services and facilities for use of Federal agencies.

6. *Maintenance of industrial reserve and surplus properties.*—A reserve of Government-owned industrial plants is maintained and minimum maintenance is provided certain excess and surplus real properties, pending disposal action. Reserve properties totaled 6 in 1958 and are programed at 8 and 6, respectively, in 1959 and 1960. Surplus properties totaled 25 in 1958 and are estimated at 24 and 32, respectively, in 1959 and 1960.

7. *Security guarding.*—Provides extra guarding service for other agencies where specifically authorized by law.

8. *Maintenance repairs.*—Provides for recurring repairs to General Services Administration operated buildings, Public Health Service hospitals and other Government buildings not operated by General Services Administration.

9. *Job order work.*—Special services and improvements to buildings performed for other agencies are provided under this heading. Under current policy this item also includes personal services and other incidental expenses of employees performing architectural and engineering services in connection with air conditioning and major improvement work although the basic contract is financed directly from the "Repair and improvement, federally owned buildings" appropriation.

10. *Temporary space incident to new buildings.*—Provides rents, alterations, etc., incident to setting up temporary quarters for agencies that must be moved to make way for demolition due to new building construction and moving agencies into temporary space or completed buildings.

11. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Advances	$25,649	$1,735	$1,500	$1,500

CONSTRUCTION SERVICES, PUBLIC BUILDINGS

Work performed in acquisition of Federal buildings sites, preparation of drawings and specifications for the construction, remodeling, renovation, repair, and improvement of buildings, and supervision of construction activities are financed through reimbursement from funds appropriated, transferred, or advanced to the General Services Administration (40 U. S. C. 296).

Operating expense.—Increase in the service activity of the fund for 1959 and 1960 is to provide for expansion in connection with General Services Administration's public building construction program, including projects previously authorized under the lease-purchase program, the expanded repair and improvement programs and numerous large construction projects assigned to General Services Administration by other Federal agencies.

Operating results.—Retained earnings will be gradually eliminated by reducing charges to individual projects and programs during 1959, 1960, and subsequent years.

"Expenses, supply distribution" (72 Stat. 243)	61,000		
Appropriation (adjusted)	5,088,000	5,325,000	6,200,000
Proposed supplemental due to pay increases		441,200	

This appropriation provides for establishment of efficient personal property management practices throughout the Federal Government.

1. *Utilization and sales.*—Excess usable personal property is reported to General Services Administration for screening against needs of Federal agencies to accomplish maximum Government utilization and obviate new purchases by transfers of property. The residue, together with surpluses not screened by General Services Administration, is either donated for educational, public health, or civil defense purposes or released for public sale. Utilization transfers amounted to $83.2 million in 1957, $138 million in 1958, and are expected to be $130 million in 1959 and $155 million in 1960. Assistance furnished to the Air Force, Army, Navy, and some civil agencies to increase sales returns involved property amounting to $424.9 million in 1958 and is expected to increase to $495 million in 1959 and $500 million in 1960. Total excesses generated are now exceeding World War II peaks: $3.9 billion in 1957, $7.1 billion in 1958 and are estimated at $8 billion in 1959 and $10 billion in 1960. Expense of these operations is provided from proceeds of sales of surplus personal property.

2. *Supply standards.*—Standards of quality and other characteristics of common-use commodities are established by specifications and qualified products lists for mandatory use by Government agencies. The increase requested for 1960 will provide for the production of 370 new specifications and 500 major revisions, amendments, and purchase descriptions as compared to 355 and 385, respectively, in 1959, and will increase Federal standards production from 32 in 1959 to 34 in 1960.

3. *Federal catalog participation.*—Uniform catalog identification for each item in the civilian agencies' supply operations is provided and coordination maintained with Department of Defense in development of a single Federal catalog system. The military departments have now converted to the exclusive use of this system. General Services Administration has now completed 192,000 items used by General Services Administration and other civil agencies, and this request provides for completing 56,000 additional items in 1960, leaving approximately 650,000 items to be identified.

4. *Motor vehicle management.*—Governmentwide policies and procedures are developed for improving the economy and efficiency of operating motor equipment. Interagency motor pools are established at locations where studies indicate savings and improved efficiency will result. Progress of the pool program is as follows:

	Surveys started	*Surveys completed*	*Pools established*
1956 (cumulative)	22	14	12
1957	15	15	10
1958	11	13	11
1959	16	17	19
1960	15	15	14
Total	79	74	66

Federal Reserve Bank of St. Louis

PERSONAL PROPERTY ACTIVITIES—Continued

OPERATING EXPENSES, FEDERAL SUPPLY SERVICE—Continued

5. *Supply contracting.*—Term contracts for common-use commodities and services are established for large aggregate volume requirements against which agencies place individual orders at uniform price advantages.

6. *Supply management.*—Policies and procedures for improving supply operations in Government agencies are developed and their installation coordinated through the conduct of training programs and supply conferences, continuous on-site assistance, and by special surveys as required.

Appropriation	$17,765,000	$18,925,000	$22,000,000
Transferred to—			
"Operating expenses, Federal Supply Service" (72 Stat. 243)	−61,000		
"Operating expenses, Public Buildings Service" (63 Stat. 381)	−16,800		
Appropriation (adjusted)	17,687,200	18,925,000	22,000,000
Proposed supplemental due to pay increases		975,200	

This appropriation provides for expenses of operating the nationwide supply system whereby common-use commodities are sold to Government agencies from stocks in supply depots at 12 locations or by direct delivery from suppliers, whichever is more economical. Most of the costs of commodities sold are initially financed from the general supply fund, subject to reimbursement by ordering agencies. Wherever economical and feasible, costs of commodities furnished directly from the supplier are financed by payment directly from the requisitioning agency appropriation without involving the general supply fund. Total sales for 1960 are programed at $310 million as compared with $319 million programed for 1959, and actual of $225 million for 1958.

The increased orders resulting from advance procurement during 1958 of supplies and materials budgeted for 1959 authorized by Public Law 85–386 caused a distortion in workload and unit costs for both years. A substantial increase in orders toward the close of 1958 greatly taxed the buying staff and cost but did not materialize as sales until early 1959. However, the increase in buying, sales, and other activities is further augmented by a high volume of hand tools for the Air Force ($7.3 million) and household furniture for Capehart and Wherry housing ($35 million) which indicates necessity for a supplemental appropriation currently estimated at $700,000, included as an item under Proposed for later transmission.

1. *Stores activities—Stores operations.*—Stocks of common-use commodities are received, warehoused, and sold at cost to Federal agencies through a nationwide system of supply depots. Continuous increase in stores sales is shown in the following figures: 1954, $52.8 million; 1955, $75.9 million; 1956, $96.4 million; 1957, $116.4 million; 1958, $120.7 million; 1959 and 1960 estimated at $143.6 million and $150 million, respectively.

2. *Buying operations.*—Commodities are procured (*a*) to maintain inventories at stores depots to insure availability in advance of sales orders, and (*b*) for direct delivery to agencies. Total procurement for both purposes in 1960 is estimated at $316.8 million compared to $306.1 million in 1959 and actual purchases of $268.7 million in 1958.

3. *Inspection operations.*—Delivery of commodities of specified standards is assured by inspection at contractors' plants or supply depots and by laboratory tests and analyses of samples prior to acceptance.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1957, $96,770; 1958, $455,533; 1959, $150,000; 1960, $200,000.

Financing applied to program	278,573,003	284,289,345	308,469,000

[1] Excludes property transfers in without charge as follows: 1958, $1,837,335; 1959, $1,800,000; and 1960, $1,800,000.

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Expenses for operating the fund for these purposes are provided for under the appropriation Expenses, supply distribution (5 U. S. C. 630g).

Also financed by the fund and reimbursed by the using agencies are operations of interagency motor equipment pools established in areas of high vehicle density.

Operations.—The estimate for 1960 provides for continued expansion in sales of both stores items and nonstores items to the military establishments under the Administration's program for progressively expanding use of these supply facilities by Department of Defense, and a slight increase in civilian agency sales. Activation of additional interagency motor equipment pools programed for 1960 is expected to produce substantial increase in sales of services, eliminate some 400 vehicles from agencies' fleets, and increase average miles per vehicle year.

1. *Supply distribution—(a) Stores items.*—Common-use commodities are purchased in volume and stored in supply depots for issue to Government agencies. An increasing amount of large volume orders of stores items are being shipped direct from suppliers to customer agencies to reduce handling costs. Sales reached an all-time high in 1958 and are estimated to increase in 1959 and 1960, as follows:

[In millions]

	Depot stock	*Fuel yard*	*Direct delivery*	*Total*
1958	$115.5	$5.2	$14.4	$135.1
1959	138.1	5.5	23.4	167.0
1960	144.5	5.5	30.0	180.0

(*b*) *Nonstores items.*—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to customer agencies. Sales through the fund are expected to increase from $60.4 million in 1958 to $124 million in 1959 and $102 million in 1960, as additional commodities are supplied through this method. The distortion in sales in 1959 as compared to 1958 and 1960 represents deliveries resulting from advance procurement orders placed late in 1958.

2. *Motor pools.*—Motor vehicle services are supplied to Government agencies through a system of interagency motor pools, still under development, to serve areas of high vehicle density. Sales are expected to increase from $7.4

PERSONAL PROPERTY ACTIVITIES—Continued

Intragovernmental funds—Continued

[GENERAL SUPPLY FUND]—Continued

million in 1958 to $10.2 million in 1959 and $12 million in 1960. The increase in sales is due to activation of additional motor pools from 33 in 1958 to 52 in 1959 and 66 in 1960.

3. *Rehabilitation and repair of furniture and equipment.*—Furniture and equipment repair services, provided through commercial sources wherever feasible and economical, are expected to increase only slightly from $0.7 million in 1958 to $1 million in 1959 and $1 million in 1960.

4. *Equipment rental.*—Operating equipment, necessary to carry out the supply distribution activity, is acquired and charged on an accrual basis to using activities. Collections from using activities are expected to remain relatively stable at $0.26 million in 1960.

5. *Undistributed.*—Gain or losses on equipment disposals, adjustments between fiscal years, inventory write-offs, and discounts are reflected. In 1958, the net gain applied to operating income was $1 million.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Advances	$61,442	$4,685		
Inventories for sale	37,259,578	41,364,967	$51,000,000	$57,000,000
Deferred charges	2,603	149,790	300,000	450,000
Unpaid undelivered orders	39,947,630	107,442,213	73,700,000	74,900,000
Total selected resources at end of year	77,271,253	148,961,655	125,000,000	132,350,000
Selected resources at start of year (−)	−77,271,253	−148,961,655	−125,000,000	
Costs financed from obligations of other years, net (−)			−23,961,655	
Obligations incurred for costs of other years, net		71,690,402		7,350,000

Operating results and financial condition.—The investment of the Government in the fund at June 30, 1958, was $81.8 million, of which $74.5 million represents direct appropriations, $5.1 million donated assets, and retained earnings of $2.2 million. Expansion in sales during 1959 of $98.4 million will necessitate additional capital of $15 million for financing, which is included in the budget as a supplemental proposed for later transmission.

Additional donated assets arising from transfers of motor vehicles from other agencies upon establishment of interagency motor equipment pools will be capitalized in the fund.

Any operating surplus, as determined by General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Payments made in 1959 amount to $2,171,852.

Administrative Expenses, Foreign Aid Procurements

This fund was established to account for expenses incurred rendering foreign aid procurement to the International Cooperation Administration (22 U. S. C. 1782). Earnings credited to this fund are derived from mutually agreed upon advances based on program workload received.

Operations.—Program workload arises from purchase authorizations received from the International Cooperation Administration. Services under this account are programed in 1960 at the 1959 level.

Operating results.—Net earnings are retained to insure financing of operating costs notwithstanding fluctuations in operating revenue.

EXPENSES, SUPPLY DISTRIBUTION

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Stores operations		$189,600	
2. Buying operations		162,100	
3. Inspection operations		132,300	
4. Administrative operations		300,000	
Total program (costs—obligations)		784,000	
Financing:			
Proposed supplemental appropriation		784,000	

Under existing legislation, 1959.—It is anticipated that an additional $784,000 will be required to handle an increase of $19 million in sales in 1959 over the $300 million sales that can be provided within financing now available, including supplemental for pay increase costs, and to annualize in 1959 the increases in wage board rates effected between May 5 and June 30, 1958, and for such increases to be effected during 1959.

GENERAL SUPPLY FUND

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Supply distribution (total costs—obligations)		$15,000,000	
Financing:			
Proposed supplemental appropriation		15,000,000	

Under existing legislation, 1959.—It is anticipated that a supplemental appropriation of $15 million will be required to increase the capital of the general supply fund to provide adequate financing for the increased volume of sales of stores and nonstores items anticipated during 1959.

RECORDS ACTIVITIES

OPERATING EXPENSES, NATIONAL ARCHIVES AND RECORDS SERVICE

For necessary expenses in connection with Federal records management and related activities as provided by law[; and not to exceed $54,500 for expenses of travel; $7,443,000], *including contractual services incident to movement or disposal of records, $9,300,000. (Independent Offices Appropriation Act, 1959; Supplemental Appropriation Act, 1959.)*

Appropriated 1959, [a] **$7,475,500** Estimate 1960, **$9,300,000**
Appropriated (adjusted) 1959, [a] **$8,523,500**

[a] Includes $32,500 appropriated in Supplemental Appropriation Act, 1959.

Appropriation (adjusted)	7,831,000	8,523,500	9,300,000
Proposed supplemental due to pay increases		612,300	

This appropriation provides for basic operations of the General Services Administration which deal with management of the Government's archives and records, including custody and administration of permanent records in the National Archives and other noncurrent records in Federal records centers, assistance to records management programs of Government agencies, operation of presidential libraries, and filing and publication of Federal laws and regulations.

1. *Records management and centers.*—Records of Federal agencies which must be retained for a period of time, but are not needed for frequent reference, are brought into

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and administered in Federal records centers serving specified geographical areas. A national center at St. Louis administers records of former civilian employees of the Government and a locator file for individuals currently employed. In addition to civilian agencies, the centers now furnish records center facilities to the entire naval establishment, the Departments of the Army and Air Force at the seat of government, and for selected Army and Air Force records throughout the world.

The increase in 1960 is to provide for additional workload in regional records centers, as shown in the following table:

	1958 actual	*1959 estimate*	*1960 estimate*
Records administered (millions of cubic feet)	4.1	5.5	5.9
Unit cost per cubic foot of records administered	$0.67	$0.62	$0.59
Reference services, number (millions)	1.9	2.4	2.7

2. *Archives and related services.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States. Related services consist of (*a*) publication of the Federal Register and related compilations and the United States Statutes at Large, (*b*) preservation and servicing of historical materials in presidential libraries, and (*c*) servicing the National Historical Publications Commission.

TRANSPORTATION AND UTILITIES ACTIVITIES—Continued

OPERATING EXPENSES, TRANSPORTATION AND PUBLIC UTILITIES SERVICE—Continued

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
New obligational authority:			
Appropriation	$1,590,000	$1,850,000	$2,029,000
Transferred from—			
"Operating expenses, Public Buildings Service" (71 Stat. 232)	30,000		
"Payments, public buildings purchase contracts" (72 Stat. 243)	44,000		
"Construction and rehabilitation," Bureau of Reclamation, Department of the Interior (5 U. S. C. 630e)	20,000		
Appropriation (adjusted)	1,684,000	1,850,000	2,029,000
Proposed supplemental due to pay increases		162,000	

This appropriation provides for improving management of transportation and public utilities in civilian agencies, protecting the Government's interests in cases before regulatory bodies, and furnishing services to civilian agencies in these specialized fields. The request for 1960 will finance this program at the 1959 level.

1. *Transportation services.*—Plans and procedures for improving transportation practices of civilian agencies are developed; reasonable rates are negotiated with carriers; interests of the Government in cases before regulatory bodies are protected; and rates, routing, and related services are supplied to civilian agencies.

2. *Public utilities management.*—As a central management function for all agencies, rate and economic studies are made, contracts negotiated, and the Government's interests as a user or consumer of utility services protected by participation in rate negotiations and litigations.

3. *SAGE program participation.*—Representation is provided in rate proceedings involving communications common carriers relating to the semiautomatic ground environment system (SAGE) for early defense warning (50 U. S. C. A. 491).

Appropriation (new obligational authority)		3,000,000	

NOTE.—Reimbursements from non-Federal sources are from sale of perishable materials under the rotation program (50 U. S. C. 98), $36,221,232; and refund of employee terminal leave payments (5 U. S. C. 61 (b)), $132.

The Defense Materials Service acquires and administers national stockpile inventories pursuant to the Strategic and Critical Materials Stock Piling Act, and has custody of the supplemental stockpile established by the Agricultural Trade Development and Assistance Act of 1954. Programs are administered in accordance with guidelines established by the Office of Civil and Defense Mobilization. This Service also administers the inventory of machine tools and industrial manufacturing equipment established under the National Industrial Reserve Act of 1948. The Department of Defense makes selections for the reserve and provides program guidance.

National stockpile objectives have been substantially reduced in line with the changed concept as to the probable duration of a national emergency from a 5-year to a 3-year basis. Open market purchases are reduced accordingly and no reimbursable transfers are provided for from other strategic materials programs such as Commodity Credit Corporation barter or defense production expansion.

Funds available from prior years appropriations estimated at $96.5 million, will finance the acquisition of $6.5 million of additional materials in the open market against basic objectives of the national stockpile, $2.7 million for the upgrading of existing material, $25.2 million for custody and rotation of existing inventories, $4.5 for national industrial equipment reserve administration, and $3.3 for operating expenses.

The data below reflects in composite the extent to which national stockpile objectives as of December 1, 1958, are provided for: (1) from financing under the Strategic and Critical Materials Stock Piling Act, and (2) under all U. S. Government programs involving strategic materials.

The basic objectives are valued at $2,823.5 million and the maximum objectives are valued at $4,317.6 million. June 30, 1958, prices have been used.

Maximum objectives	3,555.9	3,661.0	3,593.6	3,782.9	3,609.6	3,819.5
On order:						
Basic objectives	8.7	19.2	0.2	2.8	----	1.8
Maximum objectives	49.2	161.8	23.2	48.9	13.7	18.8
Total:						
Basic objectives	2,713.0	2,754.5	2,722.1	2,763.5	2,728.6	2,770.1
Maximum objectives	3,605.1	3,822.8	3,616.8	3,831.8	3,623.3	3,838.3
Balance to be acquired:						
Basic objectives	110.5	69.0	101.4	59.9	94.9	53.4
Maximum objectives	712.5	494.8	700.8	485.7	694.3	479.2

1. *Acquisition of materials.* (a) *New materials.*—Strategic materials to complete national stockpile objectives are being acquired from the following sources:

OBLIGATIONS

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Open market purchases	$54.4	$9.2	$6.5
Transfer of materials from Commodity Credit Corporation barter operations	19.3	----	----
Transfer of materials from Defense Production Act	7.1	2.7	----
Total	80.8	11.9	6.5

Of material expected to be acquired by free transfer from programs of the International Cooperation Administration in 1959 and 1960, $8.3 million will apply to unfilled stockpile objectives.

Based on national stockpile objectives, and the proposed budget, status of acquisition of the 75 materials now on the national stockpile list is as follows:

NUMBER OF MATERIALS, 1958 ACTUAL

	National stockpile		*All Government programs*	
	Basic objectives	*Maximum objectives*	*Basic objectives*	*Maximum objectives*
Percent completed:				
100	62	48	67	57
90 to 99	3	8	1	3
75 to 89	--	3	1	6
50 to 74	3	7	2	3
25 to 49	5	7	2	4
Under 25	2	2	2	2
Total	75	75	75	75

NUMBER OF MATERIALS, 1960 ESTIMATE

Percent completed:				
100	62	48	67	57
90 to 99	3	8	1	3
75 to 89	--	3	1	6
50 to 74	5	7	4	4
25 to 49	4	8	1	4
Under 25	1	1	1	1
Total	75	75	75	75

(b) *Upgrading materials.*—Stockpiled material is being upgraded to a more usable form where current inventories in such form are not adequate to meet the initial surge of demand under abnormal conditions of intensive mobilization.

2. *Inventory management.*—This covers cost of maintaining the stockpile of strategic materials in prime condition for use in case of emergency, including storage, special preservation, inventorying, rotation, and surplus disposal.

Federal Reserve Bank of St. Louis

DEFENSE MATERIALS ACTIVITIES—Continued

STRATEGIC AND CRITICAL MATERIALS—Continued

Inventories of specification grade material at June 30, 1958, prices are valued as follows:

[In millions]

	1958 actual	*1960 estimate*
National stockpile:		
Within basic objectives	$2,704.3	$2,728.6
Within maximum objectives	3,555.9	3,609.6
Excess to objectives	1,858.2	1,901.4
Total national stockpile	5,414.1	5,511.0
U. S. supplemental stockpile	242.7	631.9
Total national and supplemental	5,656.8	6,142.9

(*a*) *Rotation of materials.*—Inventories of perishable materials such as rubber, fibers, and oils are rotated periodically to keep the national stockpile inventory in prime condition. Substantial progress has been made in improving the condition of the materials in recent years so that the volume of rotation is expected to decrease in 1960 from 1959 as shown in the following table:

Description:	*1958 actual*	*1959 estimate*	*1960 estimate*
Gross replacement cost of materials rotated	$40,161,541	$63,751,000	$49,431,000
Receipts from sales of materials rotated	36,221,232	55,292,000	43,295,000
Net cost to appropriation	3,940,309	8,459,000	6,136,000

(*b*) *Storage of materials.*—As of June 30, 1958, strategic materials were stored at 216 locations, including approximately 24 million square feet of closed storage, more than 60 million square feet of open storage, and 2 million barrels of tank storage. Total weight of the national and supplemental stockpiles on June 30, 1958, approximated 27 million tons. Distribution of storage costs is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Recurring storage costs	$9,453,223	$9,957,000	$9,800,000
Nonrecurring storage costs	2,993,757	3,995,500	3,621,000
Relocation transportation and handling	223,248	726,396	647,000
Disposal handling	5,073	15,000	50,000
Net cost to appropriation	12,675,301	14,693,896	14,118,000
Reimbursable operations	554,699	400,000	435,000
Total cost or estimate	13,230,000	15,093,896	14,553,000

(*c*) *Physical inventorying.*—This program was initiated in 1957, and the first cycle is scheduled for completion in its entirety by June 30, 1960. Since many cost elements involved in taking the initial inventory are nonrecurring and more substantial use of sampling techniques will be appropriate in taking subsequent periodic inventory, future costs will be sharply reduced.

3. *National industrial equipment reserve.*—The reserve of Government-owned machine tools and industrial manufacturing equipment authorized by the National Industrial Reserve Act of 1948, consists entirely of items selected by the Secretary of Defense from lists of such property declared excess to the needs of the three military departments and other executive agencies. Excess declarations on production equipment may run as high as 20,000 items per year for the next 2 years and selections therefrom for the National Industrial Equipment Reserve are now estimated at 6,500 items per year.

(*a*) *Transportation, processing, and storage.*—Covers generally nonrecurring cost of transportation, handling, and processing of tools and equipment for long-term storage, and recurring cost of storage. While item receipt is expected to increase by only 30% from 5,000 to 6,500 in 1960 over 1959, the most expensive action, processing, is expected to increase by more than 250% from 1,182 to 3,000 items in 1960 over 1959.

(*b*) *Expansion of facilities.*—Predicted receipts of reserve equipment in 1959 can be stored with a carryover into 1960 of 150,000 square feet of unused space. Receipts in 1960 and 1961 will require 520,000 square feet each year. The 1960 estimate provides for initial cost of 630,000 square feet of additional dehumidified storage space at two locations covering the remaining requirements in 1960, as well as 260,000 square feet or one-half of the space required for 1961 receipts.

4. *Operating expenses.*—Covers all expenses at the central and regional office levels for administering programs financed under this appropriation head including the Defense Materials Service and the integrated staff offices of General Services Administration. Decrease in workload in 1960 from 1959 will be limited. However, better supervision and increased economies due to mechanization and improved operation methods will permit an overall reduction of $293,000 in 1960 from 1959.

Object Classification

		1958 actual	1959 estimate	1960 estimate

Unobligated balance carried forward	−4,708,816	−2,904,792	
Financing applied to program	2,822,152	2,307,524	501,499

Production and sale of abaca fiber is authorized by the Abaca Production Act of 1950 (50 U. S. C. 541).

The revised planning policy based on an emergency period of 3 years instead of 5 years has greatly reduced mobilization requirements for this item. As a consequence, the Director of Office of Civil and Defense Mobilization, under date of July 21, 1958, requested General Services Administration to terminate the Central America abaca production program but to make every effort to interest private companies or others to continue abaca production for normal industrial consumption.

All efforts to sell the plantations on a going-concern basis have been unsuccessful. Therefore, the cultivations are being liquidated on a butcher-harvest basis, under which the plantings will be completely cut down, and harvested for the final time. This will result in greatly increased per-acre production over prior years, since normally only selected and mature stalks are harvested, the emphasis being on continuity of the plantations. Also, butcher-harvest costs are considerably lower than usual, there being little or no maintenance of the cultivations or other facilities.

The liquidation plan contemplates commencement of butcher-harvest by October 1, 1958, on a two-shift basis (considered maximum efficient load for the factories). This will result in butcher of approximately 400 acres per month at each location. On this basis, the Guatemala plantings, consisting of 3,500 acres, will be completed by June 30, 1959; butchering of the Costa Rica cultivations, consisting of 5,000 acres, will be concluded by March 31, 1960. Sale of the factories and related facilities, having an original cost of approximately $15,000,000 and a present book value of about $3,500,000, is expected to be completed by the end of 1960 or within the first few months of 1961.

Operations.—Fiber production is estimated at 19,134,000 pounds over the 18-month period of butcher-harvest; 13,208,000 pounds in 1959 and 5,926,000 pounds in 1960. Total costs, excluding property losses, are estimated at $2,703,500 and $1,160,300, averaging 20.5 cents and 19.6 cents per pound in 1959 and 1960, respectively. This also represents sales proceeds, the price of fiber sales to the stockpile being predicated upon current program costs.

Because of curtailment of the program and reduction in cash needs for operations, the sum of $2,500,000 was returned from this program to the general fund of the Treasury in September 1958. It is contemplated that at liquidation of the program in 1960, $4,188,593 will be returned to Treasury.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Advances	$495	$100		
Inventories, deferred charges, etc.	992,337	761,272	$665,359	
Unpaid undelivered orders	35,876	95,876		
Total selected resources at end of year	1,028,708	857,248	665,359	
Selected resources at start of year (−)		−1,028,708	−857,248	−$665,359
Costs financed from obligations of other years, net (−)		−171,460	−191,889	−665,359

Financing applied to program	4,317	15,300	12,900

Guaranties are given on loans made by public or private financing institutions, including Federal Reserve banks, to facilitate performance of defense production contracts, Upon demand of lending institutions the Government is required to purchase the guaranteed percentage of the loan or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use, although such action has not been necessary to date. Net earnings are retained to meet possible future losses (50 U. S. C., App. 2091).

Guaranties totaling $31.7 million on 3 loans, representing the Government's maximum contingent liability as guarantor, are estimated to be in effect at the end of 1960, compared to $46.5 million and 5 loans on June 30, 1958. Retained earnings are anticipated to be $5.9 million at the end of 1960.

Sources and Application of Funds (Operations)

Program by activities:			
1. Rebate payments	$337,266	$700,000	
2. Refund payments	1,563,367	185,700	
Total program (costs—obligations)	1,900,633	885,700	
Financing:			
Unobligated balance brought forward	−2,768,366	−885,700	
Advances and reimbursements from other accounts	−17,967		
Unobligated balance carried forward	885,700		
Appropriation (new obligational authority)			

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Revenue Act of 1951. Of the 4,129 claims with payments estimated at some $51,000,000, all but 146 had been settled through June 30, 1958. It is hoped that most of the remaining claims will be settled by the end of 1960 which would require a supplemental appropriation in 1959 of $1,400,000 shown under Proposed for later transmission.

Federal Facilities Corporation was created on June 30, 1954, under the provisions of the Rubber Act of 1948 and Executive Order 10539, primarily to administer the operations of the Government-owned synthetic rubber facilities until disposal of the properties to private interests was completed. In addition, the Corporation was designated to conduct the operations of the Government-owned tin smelter at Texas City, Tex.

Administration and jurisdiction of the Federal Facilities Corporation was transferred to the Administrator of General Services, from the Secretary of the Treasury, pursuant to Executive Order 10720, dated July 11, 1957. Assets transferred to General Services Administration represented a net investment of the Government of $29,443,475.

Operations—Synthetic rubber program.—Except for one alcohol butadiene plant at Louisville, Ky., and catalyst manufacturing equipment in Baltimore, Md., on which disposal efforts will continue in 1960, the program to transfer the synthetic rubber-producing facilities to private ownership has been completed. In Executive Order 10678, dated September 20, 1956, the President named the Corporation as successor to the Rubber Producing Facilities Disposal Commission for the purpose of administering the contracts entered into in disposing of the synthetic rubber plants.

Digitized for FRASER

Federal Reserve Bank of St. Louis

Tin program.—Public Law 608, approved June 22, 1956, provided for operation of the tin smelter until January 31, 1957. It also authorized and directed the Corporation to take steps immediately to sell or lease the tin-producing facilities. Sale of the facilities was completed February 15, 1957, and the Corporation's sole remaining function with respect to tin is to administer the sale contract.

Administrative expenses.—Administrative expenses consist of salary and related costs of one engineer engaged in the supervision of the Corporation's functions, together with rental costs of office space and payments to the administrative operations fund for administrative support.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories for sale	$468,257	$468,257	$468,257	$468,257
Supplies and deferred charges	915,471	804,301	804,301	804,301
Unpaid undelivered orders		2,135		
Total selected resources at end of year	1,383,728	1,274,693	1,272,558	1,272,558
Selected resources at start of year (−)		−1,383,728	−1,274,693	−1,272,558
Costs financed from obligations of other years, net (−)		−109,035	−2,135	

Operating results.—During 1958, the Corporation paid into the Treasury $6 million from liquidation proceeds. This and other actions reduced the equity of the Treasury to $22.7 million.

Total amounts available	13,876,331	14,082,005	14,452,155
Unobligated balance carried forward	−13,266,384	−13,976,555	−14,342,705
Financing applied to program	609,947	105,450	109,450

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity and the remaining functions of the Smaller War Plants Corporation and the World War II assets program were transferred to the General Services Administration for final liquidation.

Operations.—It is anticipated that there will continue during 1960 the servicing of leases and conditional sales agreements covering 14 facilities, plus servicing of 46 other miscellaneous assets and 4 loans of the Smaller War Plants Corporation. Financial and legal servicing will also be required on 22 liabilities, plus approximately 90 cases in the hands of the Department of Justice under the complex food subsidy program.

Administrative expense requirements are estimated to decrease $10,500 below the 1959 level.

Operating results.—Proceeds from liquidation will be paid into miscellaneous receipts of the Treasury.

Limitation on Administrative Expenses, Reconstruction Finance Corporation Liquidation Fund

Not to exceed [$50,000] *$44,000* (to be computed on an accrual basis) of the funds derived from liquidation of functions of Reconstruction Finance Corporation transferred to General Services Administration under Reorganization Plan No. 1 of 1957 (22 F. R. 4633), shall be available during the current fiscal year for administrative expenses incident to the liquidation of said functions: *Provided,* That as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchase of equipment and supplies, of administrative offices, but this amount shall be exclusive of costs of services performed on a contract or fee basis in connection with the termination of contracts or in the performance of legal services: *Provided further,* That the distribution of administrative expenses to the accounts shall be made in accordance with generally recognized accounting principles and practices. (*Independent Offices Appropriation Act, 1959.*)

Total financing	13,798,353	15,259,300	15,788,000

Financial, administrative, legal, legislative, and informational services and management supervision required to support all General Services Administration programs are provided by the integrated staff organization of General Services Administration. They are initially financed from an administrative operations fund into which the various benefiting appropriations and funds make deposits for their share of the obligations incurred. Of the amount deposited in the fund during a fiscal year, the total amount from appropriations made available to General Services Administration in the annual act for the year is subject to a specific monetary limitation and amounts from each appropriation are limited to those included in the respective program appropriations for that purpose. Deposits from other sources are not covered in the limitation as the scope of programs and supporting workload is seldom precisely known in advance.

Estimated amounts available for 1960 from the various sources and comparable data for 1958 and 1959 are:

	1958 comparable	*1959 comparable*	*1960 estimate*
Included in limitation:			
Operating expenses, Public Buildings Service	$3,530,900	$3,589,500	$4,000,000

Working Capital Fund

A central blueprinting, photostating, duplicating, and distribution service is financed by a working capital fund pending reimbursements (40 U. S. C. 293).

Operating results.—Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1958, a total of $42,713 has been deposited, and it is estimated that $9,554 and $5,000 will be deposited in 1959 and 1960, respectively.

Under existing legislation, 1959.—At the rate of payments during 1958 it is expected that balances available in 1959 will be exhausted before the end of the year. It is anticipated that a supplemental appropriation in the amount of $1,400,000 will be required to finance payment of all claims foreseeable at this time.

GENERAL SERVICES ADMINISTRATION—GENERAL PROVISIONS

The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in

the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

Not to exceed 2 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be thereby increased more than 2 per centum: *Provided*, That such transfers shall apply only to operating expenses, and shall not exceed in the aggregate the amount of $2,000,000. (*Independent Offices Appropriation Act, 1959.*)

HOUSING AND HOME FINANCE AGENCY

Net expenditures of the Housing and Home Finance Agency are estimated to fall from $1,064 million in 1959 to $318 million in 1960 primarily because of the sharp decline in mortgage purchases under the special anti-recession program and the proposed liquidation of other mortgages by exchange for Government bonds. New obligational authority of $408 million recommended for 1960 is less than the $549 million for 1959, chiefly because no new authority is requested for 1960 for the college housing loan program for which $200 million is recommended for 1959.

The programs administered by the Housing and Home Finance Agency consist predominantly of loans and loan insurance, mortgage purchases, and grants. A considerable share of the financial requirements each year is met by repayments of loans or other receipts from assets acquired in earlier years. Several of the most important programs have long lead-times between initial obligation or other reservation of funds and the eventual disbursements.

Under the 1960 budget substantial reductions will be made below the 1959 level of commitments for college housing loans and for special assistance mortgage purchases, and no new contracts will be made for annual Federal contributions for low-rent public housing units. Urban renewal and most other housing programs will continue at about the 1959 commitment level.

Community development and facilities.—The last Congress did not enact legislation, proposed in the 1959 budget, providing $200 million in contract authority for capital grants by the Urban Renewal Administration for slum clearance and urban renewal projects. The President has made available for use in this program $100 million in new authority previously authorized for use at his discretion. Early enactment is now proposed of the additional $100 million authorization needed to carry out the program originally projected and, in addition, restoration to the President of the $100 million in discretionary authority.

Legislation is also recommended authorizing capital grants of $250 million annually for the years 1960, 1961, and 1962, and $200 million annually in the years 1963, 1964, and 1965, and reducing the Federal share of urban renewal project costs over this period from two-thirds to one-half. A continuing shift in emphasis from individual projects to communitywide renewal plans is underway. The proposed 6-year capital grant authorization together with a recently introduced formula for allocating grant authority among cities will permit communities to plan with reasonable assurance of the availability of Federal grant funds in known amounts. Other legislative proposals would revise Federal aid for project planning from advances to participating grants, would clarify and expand the authority to guarantee borrowings by local urban renewal agencies from private lenders, and would authorize loan guaranties for nonresidential projects not eligible for capital grants.

Under the 1960 budget the rapid progress of recent years in moving urban renewal projects from planning into actual execution will continue. The number of projects for which planning was completed and work begun will increase from 276 at the end of 1958 to an estimated 441 at the end of 1960. In addition, an estimated 25 projects will be completed in 1959 and 40 projects in 1960, compared to 7 in 1958. Disbursements of capital grants will require appropriations to liquidate contract authority of $100 million in 1960 compared to $50 million in 1959.

An appropriation of $3 million is recommended to continue the urban planning grant program at the 1959 level, together with an increase in the present $10 million authorization for appropriations to $20 million.

Loan commitments by the Community Facilities Administration to finance the construction of local public works are estimated to increase from $25 million in 1959 to $34 million in 1960. The present lending authority will be sufficient to carry out this program. New appropriations of $7 million are recommended for advances for the planning of non-Federal public works. This will permit the program to continue at a commitment level of $11 million, compared to $10 million in 1959.

Public housing programs.—The authority of the Public Housing Administration to enter into annual contributions contracts with local housing authorities for the construction of low-rent public housing projects will be allowed to expire on June 30, 1959. At that time 456,000 units will be available for occupancy under the program and an additional 129,000 units will be under contract but not yet constructed. Annual contributions to local housing authorities are estimated to increase from $113 million in 1959 to $124 million in 1960, as more projects are completed and become eligible for contributions. A supplemental appropriation of $5.5 million is estimated for 1959.

The disposal of housing built under emergency programs during World War II and the Korean conflict was virtually completed in the last year leaving for liquidation an estimated $184 million in mortgages received as part of the sales price. By the end of 1960, the sale of $82 million in Government-owned housing and other properties in the atomic energy communities of Oak Ridge, Tenn. and Richland, Wash., will, with minor exceptions, be complete. Substantial progress in the sale of mortgages accepted in part payment for these properties will reduce the portfolio to an estimated $8 million at the end of 1960.

Other aids to housing.—New obligational authority of $200 million is recommended for 1959 under proposed legislation for the college housing loan program of the Community Facilities Administration. This amount was originally requested in the 1959 budget, but was not enacted by the last Congress.

Legislation is being proposed for 1960 (1) to exclude from the college housing program public institutions which

Digitized for FRASER

Federal Reserve Bank of St. Louis

issue tax-exempt obligations, (2) to authorize Federal guaranties for the taxable loans of private institutions placed with private lenders, and (3) to amend the present interest rate formula to provide for interest rates ¼% above current yields on outstanding Treasury bonds of comparable maturities. No new obligational authority is proposed for 1960. The needs of private institutions will, however, be met by an estimated $54 million in loan commitments to be made from the sale of bonds in the portfolio and repayments; and by loan guaranties. Public institutions, which have in recent years accounted for about 60% of the loan volume, can market their tax-exempt obligations privately at reasonable interest rates. Net expenditures estimated at $186 million reflect disbursements on prior year loan commitments and receipts of $50 million estimated to be obtained through the exchange of college housing loans in the Agency portfolio for privately held Treasury bonds.

The Federal Housing Administration expects to receive applications for mortgage insurance covering 962,500 dwelling units in 1959 and 950,000 units in 1960, more than in any prior year of its 25-year history. This record volume of activity has made it necessary to request emergency legislation early in the Congress authorizing additional mortgage insurance authority. Legislation is also recommended for enactment in 1960 to remove entirely the dollar limits on the mortgage insurance authorization in order to avoid in the future the disruption of normal insurance activity experienced during the past year from unanticipated demands for mortgage insurance. As a result of the increased income from premiums and fees, receipts will exceed expenditures by $113 million in 1960.

Receipts of the management and liquidating functions of the Federal National Mortgage Association will exceed expenditures in 1960 by an estimated $500 million, compared to an estimated $190 million in 1959. The increase arises from the proposed liquidation in 1960 of $335 million in mortgages through exchange for privately held Government bonds.

New commitments under the Association's special assistance functions are estimated to decline from $926 million in 1959 to $437 million in 1960. The major reasons are (1) the exhaustion in 1959 of the $1 billion special authorization for the purchase of low-cost housing mortgages enacted in April 1958 as an antirecession measure, and (2) successful efforts to substitute private financing for Association support of mortgages originated under the armed services family housing program. Commitments to purchase mortgages on housing for urban renewal areas, for the relocation of displaced families, and for the elderly will continue to increase in 1960. However, the expiration last August of the unrealistic requirement for the purchase of mortgages at par, and other measures taken to attract private investment for these mortgages should gradually reduce the direct Government financing required.

Budget expenditures for the special assistance functions are estimated at $500 million in 1960 compared to $129 million in 1958 and $868 million in 1959. This reflects (1) the heavy mortgage purchases in 1959 under the special low-cost housing authorization, (2) the continued growth in mortgage purchases from prior commitments under other authorizations and (3) an increase in mortgage sales from negligible 1959 levels to an estimated $100 million in 1960. No new obligational authority will be needed for these functions in 1960.

The secondary market operations (trust fund) of the Federal National Mortgage Association will be financed by the sale of debentures to the public. Hence no net Treasury borrowings or net budget expenditures are estimated for these operations in 1960.

Advances and reimbursements from other accounts	−5,023,520	−6,475,100	−6,815,000
Unobligated balance no longer available	20,947		
New obligational authority	7,641,200	8,720,000	10,025,000
New obligational authority:			
Appropriation	$7,641,200	$8,000,000	$10,025,000
Proposed supplemental due to pay increases		720,000	

In addition to general supervision, the Administrator of the Agency is responsible for several activities administered by constituents of the Agency under delegation of authority. These include: Slum clearance and urban renewal and urban planning assistance which have been delegated to the Urban Renewal Commissioner; the programs of public works planning, college housing loans, public facility loans, and certain liquidating activities which have been delegated to the Community Facilities Commissioner; and the servicing of a portfolio of mortgages taken in connection with the disposition of publicly financed war and veteran housing construction under the Lanham and related acts which has been delegated to the Public Housing Commissioner. The Administrator serves as chairman of the board of directors of the Federal National Mortgage Association.

The appropriation requested for 1960, $10,025,000, is an increase of $2,383,800 over 1958. The need for the larger appropriation primarily reflects Pay Act increases and maturation of the urban renewal program as shown by the 50% increase in projects in execution between June 30, 1958, and June 30, 1960 (set forth in tables under Urban renewal fund).

2. *Consolidated compliance activities.*—A consolidated investigation and compliance staff serves the entire Agency.

3. *Voluntary home mortgage credit.*—The program to facilitate the flow of funds for Federal Housing Administration insured and Veterans Administration guaranteed home mortgage loans into areas of shortage and for minority housing financing will expire July 31, 1959. Legislation to renew this program will be requested and estimates for staff expenses for 1960 are provided under Proposed for later transmission.

4. *Community disposition activities.*—For detail of this activity, see Community disposal operations fund under Public enterprise funds.

5. *Community facilities programs.*—(*a*), (*b*), (*c*), (*d*). For detail of these activities, see Public enterprise funds.

(*e*) *School construction.*—The Housing and Home Finance Administrator, under a working agreement with the Commissioner of Education, performs certain technical services in connection with the program of school construction. Funds appropriated to the Office of Education are transferred to the Administrator for this purpose.

(*f*) *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of college housing and public facility projects. The costs of these activities are recovered by the Government through fees.

6. (*a*) *Urban renewal activities.*—For detail of activities for this program see Urban renewal fund under Public enterprise funds.

(*b*) *Project inspection and audit.*—The cost of site supervision and inspection and financial audit of slum clearance and urban renewal projects being planned or undertaken by local public agencies is recovered by the Government through fees.

LIMITATION ON USE OF NONADMINISTRATIVE FUNDS FROM COLLEGE HOUSING, PUBLIC FACILITY LOANS, AND URBAN RENEWAL

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Payment to "Salaries and expenses" (total obligations)	$1,405,849	$2,500,000	$3,000,000
Financing:			
Unobligated balance no longer available	344,151		
Limitation	1,750,000	2,500,000	3,000,000

These funds are used for activities described under Salaries and expenses, in paragraphs 5 (f) and 6 (b).

Object Classification

	1958 actual	1959 estimate	1960 estimate
07 Other contractual services	$1,405,849	$2,500,000	$3,000,000

URBAN PLANNING GRANTS

For grants in accordance with the provisions of section 701 of the Housing Act of 1954, as amended, [$3,250,000] *$975,000. (Independent Offices Appropriation Act, 1959.)*

Appropriated 1959, **$3,250,000** Estimate 1960, **$975,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Grants to planning agencies (total obligations)	$2,752,793	$3,963,081	$975,000
Financing:			
Unobligated balance brought forward	−2,190,874	−713,081	
Unobligated balance carried forward	713,081		
Appropriation (new obligational authority)	1,275,000	3,250,000	975,000

Section 701 of the Housing Act of 1954, as amended, authorized $10,000,000 in matching grants to State, metropolitan, or regional planning agencies to help finance surveys, land-use studies, and urban renewal plans in small cities and metropolitan or regional areas. An aggregate of $9,025,000 has been appropriated to date. The budget program calls for appropriation of the available balance of $975,000. Legislation is proposed to add $10,000,000 to the basic authorization. A supplemental appropriation for 1960 is anticipated under Proposed for later transmission.

Object Classification

	1958 actual	1959 estimate	1960 estimate
11 Grants, subsidies, and contributions	$2,752,793	$3,963,081	$975,000

FARM HOUSING RESEARCH

Program and Financing

Financing applied to program	252,955,348	254,803,000	56,722,248

The college housing program provides long-term loans at low interest rates to finance housing and related facilities under the Housing Act of 1950, as amended (12 U. S. C. 1749). The program is funded by a Treasury borrowing authorization initially limited to $300 million by the original legislation but increased by subsequent amendments to $925 million. Not to exceed $100 million of the total authorization is available for related facilities such as dining facilities and student unions. The Housing Act of 1957 extended eligibility to hospital-connected housing for interns, and for nursing schools at above the high school level, to the amount of $25 million. Under the interest formula fixed by the Housing Amendments of 1955—the higher of 2.75% or 0.25% above the average rate on the outstanding public debt—the loan rate for the current year is 2⅞%.

Budget program.—The budget program for the college housing program contemplates the enactment of proposed legislation providing a $200 million increase in the Treasury borrowing authorization for use during the current year. The proposed increase in authorization is shown under Proposed for later transmission.

For 1960, major changes in the college housing program are recommended.

Public institutions would be made ineligible for Federal loans. These institutions, which have accounted for an estimated 60% of the loan commitments under the program in recent years, can sell their tax-exempt bonds privately at interest rates approaching those which must be paid by the Treasury on borrowings of comparable maturity.

A $100 million authorization would be provided to guarantee the taxable obligations of private institutions.

The present interest rate formula would be revised to provide for interest rates ¼ of 1% above the average yields on outstanding Treasury obligations of comparable maturities. Present rates are ¼ of 1% above the average interest rate on the outstanding public debt.

No new obligational authority would be provided for 1960. Direct loan commitments of approximately $54 million will be made from the proceeds from repayments and the sale of bonds from the portfolio.

Preliminary applications are filed to determine eligibility and feasibility before the process of detailed physical and financial planning is undertaken. If approved, a fund reservation is issued effectively committing funds to assure availability on satisfactory completion of a full application. The net amounts of program reservations issued are used to control the volume of applications processed within limitations. Applications have been averaging about $1 million and, in terms of workload, the reservation level shown will involve the following activity:

	1958 actual	*1959 estimate*	*1960 estimate*
Preliminary applications received	295	260	120
Withdrawn or rejected	54	20	34
Direct loan reservations issued	260	240	75
Loan guaranty commitments	---	---	40
Applications on hand, close of year	39	39	10

Reservations are converted into loan contracts after detailed planning, filing of a full loan application, and agency review. Program policies are designed to assure the soundness of loans without interfering with the applicant's operations as an educational institution. Loan contracts are estimated at $236 million in the budget year. In terms of caseload, the following activity is involved:

	1958 actual	*1959 estimate*	*1960 estimate*
Withdrawn or rejected	18	5	5
Loans approved	237	210	213
Reservations outstanding and full applications on hand, close of year	178	193	65

Loans approved include an estimated 15 hospital-connected cases in 1959 and 15 in 1960.

After execution of the loan contracts, the institutions proceed with final plans and specifications, award of construction contracts, and preparation of bond indentures.

Financing.—Borrowers generally are able to finance much of the construction period with bank loans or other available funds, and the purchase of bonds is typically delayed until construction is well advanced. The projected purchases of $240 million are based on the following activity in terms of projects:

	1958 actual	*1959 estimate*	*1960 estimate*
Construction starts	223	230	250
Substantial completions	136	170	240

An estimated $50 million sale from the portfolio is predicated on a plan under which seasoned bonds will be exchanged for a similar par value of privately held Treasury bonds.

The $240 million in bond purchases less the $50 million in sales largely account for the $186 million of budget expenditures.

Operating results and financial condition.—Administrative and other expenses continue to outrun revenue from interest earnings during the period, but by a steadily decreasing margin. In 1960, the interest earnings of $2 million are in excess of cash outlays, but the balance covers only half the $465,000 increase in reserves for losses. The projected cumulative deficit of $3.5 million, including the effect of $2 million in allowance for losses on loans, is not considered great enough to warrant concern in view of the substantial portfolio earnings base which has now been established.

Financing applied to program	23,565,061	26,344,000	36,020,000

Loans to local governmental units for essential public works or facilities are made under the $100 million authorization provided by the Housing Amendments of 1955 (65 Stat. 635, 642). Loans are restricted to a maximum 40-year term and to applicants unable to obtain funds from other sources at reasonable rates. The statute extends priority to (1) communities of less than 10,000 population and (2) water, sewage, and gas-distribution systems.

Budget program.—Over 90% of the applications approved to date have been to finance water and sewer facilities. Excluding a few utility districts and newly created public bodies for which census data are not available, over 85% of the applications have been governmental units of less than 5,000 population. In general, these communities have little or no technical staff or experience in planning, construction and operating public facilities, and many have never before sold a bond issue or acquired a performance rating on such undertakings. Loans made

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

under the program average $300,000. Subsequent to applying for a Federal loan, some applicants obtain private financing, thereby reducing the total loan commitment.

The number of cases involved in the loan commitments anticipated under the program is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Applications received	152	155	155
Processing:			
Attrition before approval	63	54	50
Approvals (gross)	84	93	124
Attrition after approval	11	10	12
Approvals (net)	73	83	112

Interest rates on loans have been adjusted from time to time to meet the changes in the general trend of market interest rates. Initially established at 3.75% for general obligation bonds and 4.25% for revenue issues, the rates have been periodically adjusted; the most recent level for 30-year maturities is 4.50% for general obligations and 4.875% for revenue securities.

Financing.—The program is financed by Treasury borrowing authority of $100 million. Since the net interest margin on the comparatively small loan portfolio is inadequate to cover total costs at this stage in the program, obligations against the borrowing authorization slightly exceed total loan commitments in each of these years.

Operating results.—Expenses include a $149,000 increase in the allowance for losses at the rate of 0.5% on loans disbursed, administrative expenses of $550,000, and loan servicing costs amounting to $10,000. Net interest earnings of $525,000 accrue from the approximate 1% margin between the average loan rates and the rates paid on Treasury borrowings. The cumulative deficit of $1.3 million at the close of 1960 is not considered to be disturbing at this early stage in the program. Budget expenditures, principally determined by loan disbursements, amount to an estimated $29.7 million for the budget year.

Financing applied to program	7,255,809	10,000,000	11,150,000

A program of interest-free advances to State and local public agencies for the planning of local public works was authorized by the Housing Act of 1954 (12 U. S. C. 1703, 40 U. S. C. 462), and revisions were made by the Housing Amendments of 1955 (12 U. S. C. 1426 note, 12 U. S. C. 1464).

Budget program.—The program is intended to further a constant high level of essential public works construction by financing a reserve of well-planned projects. A construction potential of $1.1 billion has been created by the $16.5 million in advances approved up to the beginning of the current year, and the advances contemplated in 1959 and 1960 would raise the cumulative total of planned projects to nearly $2.5 billion. Applications have been received in a rising trend from 194 in 1956, to 416 in 1957, and 611 in 1958. Further increases in demand and program progress are expected as shown in the following caseload tabulation:

	1958 actual	*1959 estimate*	*1960 estimate*
Applications received	611	700	750
Approvals (net)	349	350	392
Applications on hand, end of year	222	342	392
Plans completed and approved	195	300	370
Projects started and advances repaid	55	80	130

Advances are made only to State and local governing units having the authority to conduct planning and to finance and construct the specific facility to be planned. In accordance with the statutory requirement that the proposed projects must be ones to be built within a reasonable period of time, assurance is required that the applicant expects to start construction within a maximum of 5 years. Over 70% of the applications to date have come from local governmental units of less than 50,000 population, and over 75% of the approvals are for water, sewer, and educational facilities.

Financing.—The program is financed by a revolving fund to which appropriations are authorized by steps totaling $48 million by the beginning of 1959, the fund to be subsequently maintained at this level in undisbursed balances and outstanding active advances. A total of $24 million has been appropriated through the beginning of the current year. Repayment of advances is required when construction begins.

Repayments totaling $1.2 million in 1958 began to provide a substantial source of financing for new approvals, and are expected to supply $2 million in the current year and $3.5 million in 1960. An appropriation of $7 million accordingly will permit some $11 million in approvals during the budget year.

Operating results.—Since the planning advances are interest-free (except as to repayments which become delinquent), the program has no revenue. To provide for the small percentage of projects which may not be undertaken due to changed local conditions, a reserve for losses has been established, equaling 5% of advances disbursed, and accretions to the reserve constitute the net operating loss shown on the statement of revenue, expense, and retained earnings. Adjustments in the reserve rate will be made after more experience with the program.

Budget expenditures approximately equal the difference between disbursements and repayments, and are estimated at $7.7 million in the budget year.

Unobligated balance carried forward	−11,563,088	−6,599,866	−6,233,986
Financing applied to program	5,423,995	1,226,806	843,000

The revolving fund for liquidating programs was established by provisions of the Independent Offices Appropriation Act, 1955, to provide for the orderly liquidation of a number of Housing and Home Finance Agency programs. The remnants of the Reconstruction Finance Corporation public agency loan program were transferred to the liquidating programs in accordance with Reorganization Plan No. 1 of 1957.

Budget program.—Real estate disposal was largely completed during 1958; and by the close of 1960, the small amount of remaining realty will be under disposal contracts. The budget program centers on the accounting, servicing, collection and related activities for the portfolio of mortgages acquired in partial payment for properties sold; and the loans and advances to local governments.

Financing.—The principal program assets for 1959 and 1960 are represented by the portfolio of mortgages and loans totaling $189 million and $177.2 million, respectively. Estimated receipts from principal repayments and interest earned from these assets total $22.3 million and $22 million.

Operating results and financial condition.—Book losses attributable to the disposal of real property decline after 1958 and for the years ending June 30, 1959 and 1960, estimated operating results show net income of $1.4 million and $4.3 million.

The Government's original investment in the consolidated liquidating program totaled almost $2.5 billion. By the close of 1960 there will remain on hand about $204 million in assets to be disposed of. Repayments to Treasury of $28 million and $23 million estimated for 1959 and 1960 will bring the cumulative total repaid to $733 million.

The following schedule shows the Government's total net investment at the close of each year:

[In thousands]

URBAN RENEWAL

The Housing Act of 1949, as amended by the Housing Act of 1954, authorizes Federal assistance to local governments for acquisition, clearance, and redevelopment of slums and blighted areas, and for conservation and rehabilitation of larger areas not requiring clearance action. Temporary project financing through direct or guaranteed loans is provided under Treasury borrowing authorization of $1 billion. Permanent project financing is assisted by Federal capital grants defraying approximately two-thirds of net project costs, and contract authority totaling $1.25 billion has been authorized plus an additional $100 million available at the discretion of the President.

The 1959 estimates reflect the release, announced earlier this fall by the President, of this $100 million of Presidential reserve. Supplemental legislation for 1959 is assumed to enact $100 million in new capital grant authority plus an additional $100 million to restore the Presidential discretionary reserve.

The budget program assumes enactment of legislation providing an additional $250 million of contract authority annually in the years 1960, 1961, and 1962, and $200 million annually in the years 1963, 1964, and 1965. The recommended legislation would also provide for a gradual reduction in the Federal share of project costs from two-thirds in 1960 to one-half in 1963.

As a condition precedent to Federal assistance, a community is required, by statute, to develop a workable program to eliminate blight and achieve a stable well-planned community with well-organized neighborhoods. The Administrator's certification of the workable program is made for 1 year, and annual recertification based on demonstrated satisfactory progress is required for con-

tinued eligibility for Federal assistance. The budget program projects the following activity:

	1958 actual	*1959 estimate*	*1960 estimate*
Workable program certifications	279	220	150
Recertifications	154	300	400

Since capital grants are nearly a complete measure of Government program costs, the program and financing schedule for grants and an outline of associated activities is presented first. This is followed by a similar schedule and discussion of the loan assistance portion of the program, and the combined financial statements for the entire program. Supplemental authorizations for 1959 and 1960 are anticipated under Proposed for later transmission.

CAPITAL GRANTS FOR SLUM CLEARANCE AND URBAN RENEWAL

For an additional amount for payment of capital grants as authorized by title I of the Housing Act of 1949, as amended (42 U. S. C. 1453, 1456), [$50,000,000] *$100,000,000.* (*Independent Offices Appropriation Act, 1959.*)

Appropriated 1959, **$50,000,000** Estimate 1960, **$100,000,000**

Financing applied to program	161,942,214	275,000,000	175,000,000

Status of Unfunded Contract Authorization

Unfunded balance at beginning of year	$743,000,000	$1,093,000,000	$1,143,000,000
Contract authorization (new)	350,000,000	100,000,000	
Unfunded balance at end of year	−1,093,000,000	−1,143,000,000	−1,043,000,000
Appropriation to liquidate contract authorization		50,000,000	100,000,000

Budget program.—A reservation of capital grant authority is made to a local public agency at the time approval is given for planning of a project or preparation of a general neighborhood renewal plan. This is done to assure availability of grant assistance after a considerable period of time and substantial community investment required for the urban renewal undertaking. Planning is, in the typical case, limited to 18 months. The following table reflects the number of projects in the planning stages:

	1958 actual	*1959 estimate*	*1960 estimate*
Planning approved	137	150	160
Planning terminated	18	10	10
Planning completed	106	115	125
Planning in process at year end	268	293	318

The execution phase occurs usually over a period of several years, during which Federal progress payments are made as substantial action is completed both with respect to the project itself and the provision of the local share of project cost. These progress payments permit the retirement of temporary project financing, thus achieving savings in project costs. It is estimated that during the budget year payment of Federal grants will total $100 million bringing the cumulative disbursements to $307 million. The numbers of projects entering, completing, and remaining in the execution stage are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Projects entering execution	106	110	120
Projects completed	7	25	40
Projects in execution at year end	276	361	441

In addition to capital grants for net project costs, relocation payments and demonstration grant payments are made. Federal funds pay the full cost of relocating displaced families from urban renewal areas up to a maximum of $100 per family, and of relocating small businesses up to $2,500 per establishment. Grants are also made up to two-thirds of the cost of certain demonstration projects designed to develop, test and report new techniques for preventing or eliminating blight. Of the $100 million in Federal grants to be paid in the budget year, $11 million represents relocation grants and $1.6 million demonstration grants.

Budget program.—The Treasury borrowing authority provides loan assistance in financing the planning and execution of urban renewal projects by the following types of commitments:

1. *Planning advances.*—The financing of planning costs directly associated with the project and repayable with interest from project funds.

2. *Temporary loans.*—Initial financing needs under the contract are generally met through direct short-term

URBAN RENEWAL—Continued

URBAN RENEWAL FUND (LOANS AND PLANNING ADVANCES)—con.

Federal loans. Thereafter the redevelopment agency generally relies upon private borrowings secured by pledge of the Federal loan commitment. Temporary loans are repaid from the proceeds of land sales and from local and Federal cash grants.

3. *Definitive loans.*—Commitments issued to secure private financing for the net value of redeveloped land which is leased rather than sold.

Experience has shown that only a minor portion of Federal loan commitments is outstanding at any one time as direct Federal loans. The loan commitment covers total project expenditures, but these expenditures are incurred over several years typically required for project execution, and early borrowings are retired progressively from the sale of land in portions of the project prepared for reuse, and from local and Federal grants. In addition, private financing secured by the Federal loan commitment is relied upon as the source for approximately 75% of temporary loans and all definitive loans. In the period covered by this budget program, the situation is projected as follows:

[In thousands]

	1958 actual	*1959 estimate*	*1960 estimate*
Total Federal loan commitments at close	$457,721	$801,665	$1,093,565
Unutilized	257,574	510,535	696,535
Non-Federal guaranteed loans	131,292	221,292	326,192
Federal loans and advances	68,855	69,838	70,838

Financing.—The financing section of the schedule shows the retirement of commitments underlying non-Federal guaranteed loans as well as direct Federal loans. Unlike the sources and application of funds statement following this narrative, this schedule excludes Federal loans refunded by private loans—amounting to $8.5, $35 and $40 million during the respective years—and consequently not affecting Federal loan commitments.

The column for 1960 also shows the effect of proposed technical amendments to the basic legislation redefining obligations against the Treasury borrowing authority as the estimated maximum direct Federal loans. The program will have progressed in the budget year to a point where the gross contracts outstanding will exceed the $1 billion borrowing authority, but an augmented borrowing authorization would serve no useful purpose since it is not expected that the Treasury would ever be called upon to provide these additional funds. Obligations against the authority are estimated at the face amount of planning advance commitments, and 25% of temporary loan commitments. The adjusting entries to the 1960 column are calculated as follows:

FISCAL YEAR 1960

[In thousands]

	Total	*Planning advances*	*Temporary loans*	*Definitive loans*
Adjustment of new loan commitments:				
New loan commitments	$373,000	$13,000	$355,000	$5,000
Estimated private financing	−271,250		−266,250	−5,000
Estimated Federal loan exposure (obligations)	101,750	13,000	88,750	
Recovery of prior year obligations:				
Outstanding loans and commitments, end of 1959	801,664	30,495	766,169	5,000
Prior year commitments retired in 1960	−81,100	−11,000	−70,000	−100
Net commitments	720,564	19,495	696,169	4,900
Estimated Federal loan exposure	−193,537	−19,495	−174,042	
Adjustment of prior year obligations	527,027		522,127	4,900

Operating results and financial condition.—The margin of interest earnings continues to be inadequate to balance actual losses plus allowances for losses on the unsecured planning advances, hence the deficit at the close of the budget year is estimated to rise to $1.7 million. The deficit excludes cumulative expenditures of $307 million for capital grants and $35.6 million for administrative costs paid from appropriated funds.

Sources and Application of Funds (Operations)

Financing applied to program	20,357,735	15,582,765	5,640,195

The Atomic Energy Community Act of 1955 (69 Stat. 471) provides for the disposition of the Government-owned properties at Oak Ridge, Tenn., and Richland, Wash. The sales and financing functions under the act were transferred to the Housing and Home Finance Administrator by Executive Order 10657.

Budget program.—Sales are scheduled by types of properties, which include not only single-family and duplex residences, but apartments, vacant residential lots, business structures and land zoned for commercial and industrial use. Virtually all the small home properties at Oak Ridge had been sold prior to 1959; some 2,000 properties of this type remain at Richland, most of which will be sold in the current year. Sales of business structures, involving more complex negotiations, are proceeding at both locations. The bulk of the apartment and vacant land parcels, requiring the preparation of extensive factual material to assure adequate bidding, are scheduled for open offerings in 1959 and 1960. All but a small group of 66 nonresidential properties at Richland, appraised at $1.9 million, are scheduled for disposal prior to the end of 1960.

The following schedule shows disposition by general property type and community:

[Dollars in millions]

	Total		*Actual through June 30, 1958*		*1959 estimate*		*1960 estimate*	
	Number	*Amount*	*Number*	*Amount*	*Number*	*Amount*	*Number*	*Amount*
Oak Ridge, Tenn.:								
Residential	6,110	$28.8	4,693	$22.3	901	$2.8	516	$3.7
Nonresidential	277	2.9	114	1.9	63	.7	100	.3
Subtotal	6,387	31.7	4,807	24.2	964	3.5	616	4.0
Richland, Wash.:								
Residential	5,122	40.4	2,600	22.1	2,259	15.9	263	2.4
Nonresidential	216	6.2	-----	-----	120	3.1	96	3.1
Subtotal	5,338	46.6	2,600	22.1	2,379	19.0	359	5.5
Total	11,725	78.3	7,407	46.3	3,343	22.5	975	9.5

The budget assumes that at Oak Ridge 25% of the remaining residential properties will be sold for cash and 75% with purchase money mortgages; all of the nonresidential properties will be sold for cash. At Richland 30% of all the properties sold will be for cash and 70% with purchase money mortgages.

Sales proceeds in 1960 are estimated at $4.1 million in cash and $4.6 million in purchase money mortgages.

Statutory credits granted to occupants of single-family and duplex houses who received priority rights to purchase amounted to $510,230.

The total amount of statutory credits allowed on sales is shown below:

[In thousands]

	Total	*Actual through June 30, 1958*	*1959 estimate*	*1960 estimate*
15%—occupant priority purchasers	$9,231	$6,618	$2,343	$270
10%—indemnity waiver	6,153	4,411	1,562	180
Credit for tenant improvements	2,129	1,443	626	60
Total	17,513	12,472	4,531	510

Financing.—Accountability is assumed for properties at their appraised value at the time a sale is concluded.

The collections of amortization payments on mortgages in 1960 is estimated at $1 million and interest and other revenue will amount to $715,000.

Operating results.—Losses on realty sales, estimated at $95,000 in 1959 and $104,025 in 1960, reflect probable realization on certain vacant residential lots to be sold at competitive bid, no offers at appraised value having been received from priority classifications of purchasers. On hand at the end of 1960 are an estimated portfolio of 1,154 purchase money mortgages with a principal balance of $7.9 million and cash and receivables totaling $1.3 million. Not yet transferred from Atomic Energy Commission, pending the arrangement of final sale contracts, will be the $1.9 million on nonresidential parcels at Richland.

Cumulative payments to the Treasury will amount to $53 million with a repayment of Government investment of $13 million in 1960. The following table shows the cumulative results of the disposal program at the close of the 3 years covered by the budget. The statutory allowances, included as part of the deficit in the 1959 budget, have been segregated in current financial statements in order to provide a more informative analysis of program results.

Financing applied to program			

The Administrator is authorized to borrow up to $500 million, plus such additional amounts as the President shall approve, from the Secretary of the Treasury in the furtherance of the programs enacted in the Federal Flood Insurance Act of 1956. No borrowings have been made or are proposed.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Association, operating under the Federal National Mortgage Association Charter Act (12 U. S. C. 1716, et seq.) purchases, manages, and sells residential mortgages that are insured by the Federal Housing Administration or guaranteed by the Veterans Administration. Under amendments made to the original enactment by the Housing Act of 1954, the Association's functions are carried out through three programs for which separate accountability is required by statute. These programs—secondary market operations, special assistance functions, and management and liquidating functions—are described in the following sections.

NOTE.—Expenditures from the following funds for 1959 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1959. For 1960 this paragraph is shown in the independent offices chapter, p. 161, preceding Federal Home Loan Bank Board.

Financing applied to program	703,444,013	415,000,000	485,000,000

The secondary market operations of the Federal National Mortgage Association were authorized by the Housing Act of 1954 to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home mortgage financing. This assistance to the secondary market for home mortgages is provided by the purchase and sale of mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration on or after August 2, 1954, of such quality, type, and class as meet generally the purchase standards imposed by private institutional mortgage investors. Purchases and sales may be made only at such prices and on such terms as will reasonably prevent excessive use of the Association's facilities and permit the Association to operate on a fully self-supporting basis.

The authorizing statute contemplates that the secondary market operations will ultimately be completely owned and financed by private participants. Accordingly, these operations are treated in the budget as a trust enterprise and the financial statements relating thereto appear in part III of this document.

The secondary market operations were initially capitalized by the issuance of $92.8 million of Federal National Mortgage Association preferred stock to the Secretary of the Treasury. Subsequently, increased preferred stock subscriptions by the Secretary of the Treasury, amounting to $50 million (Public Law 85–10 approved March 27, 1957) and $65 million (Public Law 85–104 approved July 12, 1957) were authorized, of which $50 million was subscribed in 1957. This preferred stock will be retired as rapidly as feasible and, in the meantime, the Association will pay dividends on it to the Treasury at rates determined by the Secretary of the Treasury. Private capitalization for these operations is accumulated through a statutory requirement that private subscriptions to common stock must be made which equal 2% of the unpaid principal amount of mortgages sold to the Federal National Mortgage Association; but this percentage may be fixed at a lesser percentage than 2%, but not less than 1%, as determined by the Association from time to time, taking into consideration conditions in the mortgage market and the general economy.

Federal Reserve Bank of St. Louis

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Continued

Public enterprise funds—Continued

LOANS FOR SECONDARY MARKET OPERATIONS—Continued

Recommendations for legislation to transfer ownership of the Association to private owners of capital stock must be submitted to the Congress as promptly as practical after all the Treasury's preferred stock has been retired.

The Association is authorized to finance its secondary market operations through borrowing from the public on the security of nonguaranteed debentures. Such obligations may not exceed the lesser of: (*a*) Ten times the sum of the fund's capital and surplus, or (*b*) the sum of assets free of liens or encumbrances, representing cash, mortgages, United States Government securities, and securities guaranteed by the United States. The Secretary of the Treasury, so long as the preferred stock is outstanding, is authorized to purchase such debentures in an amount not exceeding $2.25 billion outstanding at any one time.

Budget program.—Mortgage purchases by the secondary market operations, are estimated to increase in the budget year while mortgage sales are expected to continue at the 1959 level but well below the peak volume reached in 1958. This is shown by the following table setting forth the principal activities of the secondary market operations.

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Mortgage purchases (net of discount)	$550.2	$526.8	$662.6
Mortgage sales (net of discount)	374.6	95.3	95.3
Repayments and other credits	39.0	47.8	57.6
Balance in portfolio at end of year	1,334.2	1,717.9	2,227.6

The prices at which mortgages are purchased are established by the Federal National Mortgage Association within the range of market prices for the particular class of mortgages involved. In establishing prices, the Association follows the policies of private institutions and varies the price depending upon geographic location, interest rate of the loan, and the ratio of equity to value of the subject property. The budget assumes that mortgages will be purchased during 1959 and 1960 at average discounts of 4.2 and 5.5 points, respectively, below their face value and that sales will be made at an average price 0.8 points above the purchase price.

Financing.—Substantial interim Treasury borrowings will be necessary in 1959 and 1960, but borrowings from the public through the sale of debentures are estimated to provide the funds necessary to repay Treasury borrowings in the year in which made. Additional financing will be obtained from the sale of mortgages to the investing public, from subscriptions of common stock by program participants, and from repayments of mortgage principal. No retirements of preferred stock are estimated for the period covered in this budget. The amounts of the principal financing balances outstanding at year end are summarized on the following table:

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Private financing:			
Nonguaranteed debentures	$1,165.2	$1,515.0	$2,000.0
Common stock subscribed	36.5	47.7	61.7
Treasury financing: Preferred stock	142.8	142.8	142.8

Operating results.—Operations are reflected in budget expenditures only to the extent of Treasury financing.

Financing applied to program	952,124,420	950,990,000	488,950,000

Federal National Mortgage Association is authorized to provide special assistance to the extent that the President has determined that it is in the public interest for the financing of: (1) selected types of home mortgages (pending establishment of their marketability) originated under special housing programs designed to provide housing of acceptable standards at full economic cost for segments of the national population which are unable to obtain adequate housing under established home-financing programs, and (2) home mortgages generally as a means of retarding or stopping a decline in mortgage lending and home building which threatens materially the stability of high level national economy. The Association is authorized, for these purposes, to make commitments and to purchase mortgages up to $950 million outstanding at any one time.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

No additional legislative authorization is needed for the programs contemplated during the period covered by these estimates.

In addition to the special programs the Association may undertake pursuant to specific direction of the President, the Association is also authorized to enter into commitments to purchase and to purchase mortgages on cooperative housing insured under section 213 of the National Housing Act, as amended, up to a limit of $200 million outstanding at any one time; to make commitments to purchase and to purchase mortgages on armed services family housing insured under title VIII of that act, up to a limit of $500 million outstanding at any one time; and, within a limitation of $1 billion outstanding at any one time, to make commitments to purchase and to purchase Federal Housing Administration insured and Veterans' Administration guaranteed mortgages of $13,500 or less covering low and moderate priced housing on which construction had not commenced at the time application was made for Federal National Mortgage Association's commitment.

The Association is required by Public Law 1020 (70 Stat. 1091), and Public Law 85–104, to pay not less than 99% of the unpaid principal balance for special assistance mortgages purchased under contracts entered into during the period between August 7, 1956, and July 12, 1957, and not less than par (100%) for mortgages purchased under contracts executed between July 12, 1957, and August 7, 1958. The latter legislative requirement was not reenacted and commitments to purchase most mortgages are currently issued at less than par.

Federal National Mortgage Association special assistance functions are financed principally by Treasury borrowings, and all benefits and burdens of the program inure solely to the Secretary of the Treasury.

Budget program.—During 1959 and 1960, Federal National Mortgage Association will provide special assistance, under Presidential determination, for (1) housing in or supporting urban renewal areas of the types to be insured under sections 220 and 221 of the National Housing Act; (2) housing for the elderly; (3) housing in Alaska and Guam; and (4) disaster housing. In addition, cooperative, low-cost ($13,500 or less), and armed services housing will be assisted under the special authority cited above.

Mortgage purchase commitments by the special assistance functions are estimated to decline from $949 million in 1958 to $926 million in 1959 to $437 million in 1960. The principal factors in these changes are as follows:

The $1 billion special authorization for the purchase of low-cost housing mortgages enacted in April 1958 as an antirecession measure will be exhausted by commitments of $412 million in 1958 and $588 million in 1959. No additional commitment authority is requested for 1960.

New commitments for armed services housing will decline from $298 million in 1958 to $15 million in each of the years 1959 and 1960. This decline is due to the success of administrative efforts to obtain private financing for these mortgages.

Commitments for cooperative housing mortgages will decline from $66 million in 1958 to an estimated $20 million in each of the years 1959 and 1960 as a result of the exhaustion in 1958 of authority to make commitments for mortgages on builder cooperatives.

At the same time, commitments for mortgages on housing in urban renewal areas and for the relocation of displaced families are estimated to increase from $143 million in 1958 to $263 million in 1959 and $350 million in 1960. This is due chiefly to (*a*) the rapid growth in the amount of land becoming available for redevelopment under the urban renewal program and (*b*) the increasing displacement of families by urban renewal, highway, and other public improvement projects.

Commitments for mortgages originated under the relatively new program for housing for the elderly will increase from $17 million in 1958 to an estimated $30 million in 1959 and $40 million in 1960.

The purchase of mortgages, which lags well behind commitments, is shown in the following table:

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Mortgage purchases:			
1. Armed services housing	$48.3	$125.5	$174.2
2. Cooperative housing	59.1	47.0	15.0
3. Low-cost housing ($13,500 or less)		628.0	270.4
4. Urban renewal and relocation housing	19.8	122.5	181.4
5. Housing for the elderly	3.5	20.0	30.0
6. Other	14.8	7.0	9.0
Total purchases (gross)	145.5	950.0	680.0
Less purchase discount	.7	2.6	10.8
Total purchases (net)	144.8	947.4	669.2

Mortgage sales which amounted to $4.4 million in 1958 are now estimated at $25 million and at $100 million for 1959 and 1960, respectively.

Financing.—Net borrowings from the Treasury were $131.9 million in 1958 and are estimated at $868 million in 1959 and $500 million in 1960, thereby increasing the interest-bearing investment of the Government to $1,521.8 million at the end of 1960.

Operating results.—Previously, earnings were retained and paid into miscellaneous receipts of the Treasury following the year earned. A payment of $188,822 was made in 1957; another payment of $2,444,739 was made in 1958. In order to protect the Association against losses inherent in a portfolio of this size earnings will be retained.

The Association, in its management and liquidating functions, is required by law to manage and liquidate its portfolio of mortgages acquired under commitments made before November 1, 1954, in an orderly manner, with a minimum adverse effect upon the home mortgage market and minimum loss to the Federal Government. Liquidation of the portfolio is accomplished through regular repayments according to their amortization schedules, sales of mortgages as rapidly as they can be absorbed by private investors without serious disruption of normal market conditions, and as the result of other principal credits arising from prepayments and foreclosures. The mortgage purchasing phase of this activity has been completed, leaving only the management and ultimate liquidation of the portfolio to be completed.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Budget program.—There will be no mortgages purchased for this portfolio during the period covered by these estimates, the purchasing program having been completed during 1958. The advance contracts and commitments entered into by the Association prior to enactment of the Federal National Mortgage Association Charter Act of 1954 were completely liquidated during 1958.

Sales of mortgages from the management and liquidating portfolio are estimated at $10 million during 1959 and $335 million for 1960. The estimated increased sales volume in 1960 as compared with 1959 is predicated on a plan under which Federal National Mortgage Association will effect the exchange of mortgages from this portfolio for a like dollar volume of privately held Treasury bonds.

Liquidation of mortgage principal resulting from repayments, prepayments, foreclosures, and transfers in lieu of foreclosures are estimated to amount to $150 million in 1960 and will reduce the portfolio by that amount.

Financing.—As of June 30, 1958, outstanding notes held by private investors amounted to $803.8 million, $6.4 million of which had matured but which had not then been presented for redemption. The remaining $797.4 million will not mature during the period covered by these estimates. These nonguaranteed notes were issued to the public in January 1958 and will mature in August 1960. The proceeds were used to refinance the $570.4 million issue of notes marketed in 1955 and to reduce Federal National Mortgage Association's indebtedness to the Treasury by $227 million.

Operating results.—As a consequence of a reduction in the outstanding portfolio, estimated net income in 1960 will decline from the amount estimated for 1959. However, the estimated income for both 1959 and 1960 is somewhat higher than in 1958, during which a nonguaranteed note issue of $802.1 million at a relatively high interest cost was used to finance part of the mortgage portfolio.

All benefits and burdens of functions inure solely to the Secretary of the Treasury.

POSITION WITH RESPECT TO MORTGAGE PURCHASE AUTHORITY

	1958 actual	*1959 estimate*	*1960 estimate*
Mortgage purchase authority [1]	$2,195,633,057	$2,036,608,057	$1,552,583,057
Charges against authority: Mortgages outstanding at end of year	2,195,633,057	2,036,608,057	1,552,583,057
Unused authority			

[1] On and after Nov. 1, 1954, pursuant to Public Law 560, the Federal National Mortgage Association's mortgage purchase authority is the total of its mortgage portfolio and its outstanding commitment contracts in the management and liquidating functions.

The Federal Housing Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home financing practices, housing standards, and conditions through the insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. As of June 30, 1958, a total of $50 billion of insurance had been written, of which $23 billion was outstanding.

The Administration conducts a wide variety of programs through 11 separate insurance funds, the most important of which is the mutual mortgage insurance fund for the insurance of mortgages on 1- to 4-family dwellings under section 203 of the National Housing Act. Other funds cover the insurance of home repair and improvement loans, insurance of mortgages on multifamily housing including cooperative housing, insurance of mortgages on housing for urban renewal, armed services, and other special purposes, and insurance of equity investments in rental housing.

The mutual mortgage insurance fund differs from other insurance funds in that mortgagors receive participation payments from any excess of fees and premiums paid over losses and expenses allocable to the fund. Through June 30, 1958, these participation payments to home owners have amounted to $82.7 million.

All of the Administration's insurance programs are revenue producing. Revenue is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

Budget program.—The Federal Housing Administration budget for 1960 is designed to carry out the Administration's part of the President's housing program, with emphasis on the correction and prevention of slums and urban blight, the encouragement of more suitable housing for the elderly, the stimulation of cost reduction in housing built for low- and middle-income groups, and the improvement of existing homes.

Summary of individual insurance programs.—A summary statement, with estimated workload, is provided below for each of the major mortgage insurance programs.

1. *Home modernization and repair insurance program (title I, sec. 2).*—Financial institutions insured against losses are required to provide 10% coinsurance on loans for the alteration, repair, and improvement of residential properties. Loans insured are characteristically short-term, unsecured notes currently averaging around $800. Estimates are set forth below:

	1958 actual	*1959 estimate*	*1960 estimate*
Initiation: Loans insured	1,067,446	1,200,000	1,250,000
Servicing: Insurance in force (number of notes) end of year	2,483,826	2,958,205	3,315,577
Liquidation—acquired security or collateral on hand:			
Defaulted loans	115,693	101,700	91,700
Amount (in millions)	$47.5	$42.2	$39.1

2. *Basic 1–4 family mortgage insurance programs (secs. 8 and 203).*—Mortgages may be insured on 1- to 4-family structures up to statutory limits of 97% of the first $13,500 of appraised value, 85% of the next $2,500 of value, and 70% of value in excess of $16,000. Under these provisions, insured loans bear a higher ratio to the value of the mortgaged property in the lower price range to aid in construction of homes for families of low and moderate income. Mortgages on disaster housing can be insured by Federal Housing Administration up to a maximum of $12,000 on the basis of 100% of loan to value. Insured mortgages may cover new and existing properties both for rent and for sale.

A new program, launched in 1958, to bring the advantages of Federal Housing Administration mortgage insur-

FEDERAL HOUSING ADMINISTRATION—Continued

Public enterprise funds—Continued

FEDERAL HOUSING ADMINISTRATION FUND—Continued

ance to communities remote from Federal Housing Administration insuring offices is still being operated on an experimental basis, with some expansion anticipated in the budget year. Local lenders approved by the Federal Housing Commissioner are authorized to process applications for section 203 mortgage insurance, securing necessary appraisals and inspections through Federal Housing Administration-approved fee appraisers and inspectors.

Servicemen's housing mortgage insurance (sec. 222) authorizes the insurance of mortgages to finance the purchase of homes by servicemen who have been in the Armed Forces for a minimum of 2 years. Under this section, mortgages may be insured on single-family structures up to a maximum mortgage limitation of $17,100.

Estimates in the basic 1- to 4-family mortgage insurance programs are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Initiation:			
Unit applications examined:			
Section 203	580,890	788,400	769,800
Section 222	14,430	14,800	14,800
Units insured:			
Section 203	250,410	516,100	450,900
Section 222	12,582	12,100	13,700

Properties on hand, end of year (units):			
Section 203	1,751	1,251	1,051
Section 222	7	20	20
Section 8	133	148	98

3. *Basic multifamily mortgage insurance program (secs. 207 and 213).*—Mortgages may be insured on new or existing multifamily housing projects up to statutory limits of 90% or 95% of appraised value (or in the case of cooperative housing, estimated replacement cost). Special provision is made for mortgage insurance on projects undertaken by nonprofit corporations for occupancy by elderly persons. Legislative proposals will be made to increase the maximum interest rate for insured rental and cooperative housing mortgages. Estimates are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Initiation:			
Unit applications examined:			
Section 207	13,014	37,500	41,200
Section 213	17,953	14,500	14,200
Units insured:			
Section 207	6,713	20,200	26,000
Section 213	15,870	11,300	10,600
Average multifamily units under inspection:

Section 207	1,373	1,022	1,032
Section 213	194	183	91

4. *Urban renewal, rehabilitation and relocation mortgage insurance program* (secs. 220 and 221).—Section 220 provides insurance of mortgage financing for the construction or rehabilitation of housing in designated urban renewal areas. Section 221 provides mortgage insurance for housing built or rehabilitated for persons displaced by governmental action in communities having approved urban renewal plans.

Actual and estimated operating volume is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Initiation:			
Unit applications examined:			
Section 220	4,156	19,600	26,000
Section 221	10,206	14,800	19,600

Section 221	1	------	------
Properties and mortgages sold: Section 221	1	------	------

5. *Armed services mortgage insurance program (title VIII).*—Rental housing is provided under title VIII, through the use of private capital under insured mortgages, for civilian and military personnel of the armed services and for personnel at atomic energy and research and development installations. Mortgages may be insured for not to exceed an average of $16,500 per dwelling unit in any one project. It is assumed that the program will be extended for 1 year. Estimates are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Initiation:			
Unit applications examined:			
Section 803	33,234	29,100	22,500
Section 809	1,741	2,800	1,900

Properties sold (units)	125	346	771
Properties on hand, end of year (units)	3,422	3,326	2,755

6. *Emergency and other special incentive programs.*—The special war housing mortgage insurance provisions of title VI (secs. 603, 608, 609, 610, and 611), were continued until April 1948 for home mortgages and until March of 1950 for rental project mortgages to provide veterans' emergency housing. Other special incentive programs were added later. These included insurance of (*a*) loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing; (*b*) mortgages executed in connection with the sale by the Government of certain federally owned housing; and (*c*) short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single family dwellings, as well as for insured long-term financing of properties so constructed. Insurance authority under title VI has terminated. The Housing Act of 1954 transferred to title II the authority to insure mortgages to finance the sale of Government-owned housing.

Title VII provides for yield insurance for rental housing equity investments. There is insured an annual return

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of 2¾% and a minimum annual amortization of 2% on equity investments in rental housing for families of moderate income.

Title IX provided mortgage insurance for programed defense housing, covering both 1- to 4-family and multifamily housing within the limits of programed housing needs in defense areas designated by the President. The authorization to insure under this title has terminated except for commitments outstanding.

Estimates are as follows:

Summary of operating expense estimates.—Federal Housing Administration operating expenses (administrative and nonadministrative) are paid out of operating revenue, subject to limitation.

It is expected that a total operating expense authorization of $56,950,000 will be necessary for 1960, of which $8,200,000 will be administrative and $48,750,000 nonadministrative. The 1959 estimate is $53,805,000, $7,970,000 administrative and $45,835,000 nonadministrative. It should be noted that this estimate for 1959 is $3,405,000 over the present limitation, to reflect the cost of Public Law 85-462.

Relation of costs to obligations.—The relationship is derived by year-end balances of unpaid, undelivered orders as follows: 1957, $366,838; 1958, $617,580; 1959, $617,580; and 1960, $617,580.

Financing.—All Federal Housing Administration operations are financed out of revenue. Mortgage insurance claims are met by the issuance of debentures which are subsequently redeemed out of insurance revenue and the proceeds of the sale of acquired properties and mortgages. In 1958, $52,936,500 of debentures were issued. Debentures to be issued are estimated at $62,022,300 in 1959 and $42,588,500 in 1960. Debentures were retired in 1958 in the amount of $58,832,400. Retirement of debentures in 1959 and 1960, respectively, are estimated at $58,397,250 and $51,650,800.

Operating results and retained earnings.—Operations in 1958 resulted in a net income of $99,662,468. This income was distributed as follows: $31,649,174 to the general surplus account and $38,000,000 to the participating-reserve account of the mutual mortgage insurance fund, which were established pursuant to Public Law 560 (68 Stat. 590); and $30,013,294 to the general insurance reserves under the nonmutual insurance programs.

Net income is expected to be $125,162,549 in 1959 and $155,461,400 in 1960. In the 2-year period it is estimated that income totaling $107,195,195 will be added to the general surplus account and $93,000,000 to the participating-reserve account of the mutual mortgage insurance fund, while an estimated $80,428,754 of income will be placed in the insurance reserves under nonmutual funds.

Insurance reserves totaling $551,487,737 on June 30, 1957, increased to $643,335,694 during 1958 and are expected to reach $760,482,449 by June 30, 1959, and $907,843,849 by June 30, 1960. These reserves are required to meet future insurance losses and expenses.

Insurance authority.—The Housing Act of 1956, as amended, provides that the aggregate amount of principal obligations of all mortgages that may be insured and outstanding at any one time under insurance contracts or commitments to insure pursuant to any section or title (except sec. 2 and sec. 803) shall not exceed the sum of (*a*) the outstanding principal balances, as of July 1, 1956, of all insured mortgages (without taking account prepayments or delinquencies), (*b*) the principal amount of all outstanding commitments to insure as of July 1, 1956, and (*c*) $7 billion. This general insurance authorization applies to all mortgage insurance programs except new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955. Proposed legislation will be submitted for an additional authorization of $6 billion in 1959, and for an open-ended authorization in 1960.

Section 803 (*a*) of the National Housing Act, as amended, created a separate mortgage insurance authorization with regard to all new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, including both the new armed services housing program and the extended military housing program. This insurance authorization provides that the aggregate amount of principal obligations of all mortgages insured under this program shall not exceed $2,300,000,000 and that the limitation in section 217 shall not apply to this program. This amount will be adequate to carry the program through both 1959 and 1960 as shown in the tabulation below.

The title I (sec. 2) authorization of $1,750,000,000 for repair and improvement insurance will be sufficient to carry this program through both 1959 and 1960.

POSITION WITH RESPECT TO INSURANCE AUTHORITY

	1958 actual	*1959 estimate*	*1960 estimate*
Repair and improvement loan insurance:			
Insurance authority	$1,750,000,000	$1,750,000,000	$1,750,000,000
Charges against insurance authority:

PUBLIC HOUSING ADMINISTRATION

The Public Housing Administration is responsible for administering the low rent public housing program under the United States Housing Act of 1937 (42 U. S. C. 1401 et seq.), as amended. This act provided for a program of locally owned and operated low rent public housing by authorizing loans and annual contributions to local housing authorities to assist in financing the construction of housing projects for low-income families and to maintain their low rent character after completion and occupancy. In addition, the Public Housing Commissioner has directed, on behalf of the Housing and Home Finance Administrator, the liquidation of the public war, the defense, and the veterans reuse housing programs which are included in the revolving fund for liquidating programs (see Office of the Administrator). All but a few housing units had been disposed of by June 30, 1958. The Administration continues to have the responsibility for managing a portfolio of mortgages received in partial payment from the sale of these properties.

Public enterprise funds:

ANNUAL CONTRIBUTIONS

For the payment of annual contributions to public housing agencies in accordance with section 10 of the United States Housing Act of 1937, as amended (42 U. S. C. 1410), [$107,500,000] *$124,000,000.* (*Independent Offices Appropriation Act, 1959.*)

Appropriated 1959, **$107,500,000** Estimate 1960, **$124,000,000**

ADMINISTRATIVE EXPENSES

For administrative expenses of the Public Housing Administration, [$11,800,000] *$13,000,000,* to be expended under the authorization for such expenses contained in title II of this Act. (*Independent Offices Appropriation Act, 1959.*)

Appropriated 1959, **$11,800,000** Estimate 1960, **$13,000,000**

NOTE.—Expenditures from the following fund for 1959 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1959. For 1960 this paragraph is shown in the independent offices chapter, p. 161, preceding Federal Home Loan Bank Board.

The United States Housing Act of 1937 has subsequently been modified by amendments or by other related legislation. Public Law 671, approved June 28, 1940 (42 U. S. C. 1501), authorized the construction of permanent housing for war workers, subject to conversion to low rent use after the emergency. The Housing Act of 1949, Public Law 171, approved July 15, 1949 (42 U. S. C. 1401 et seq.), increased the borrowing power of the Public Housing Administration to $1.5 billion and increased the annual contributions authorization to $336 million. The Housing Act of 1957, Public Law 85–104, approved July 12, 1957, modified the income limits, by increasing the exemptions for certain members of families, for admission to and continued occupancy in low rent housing projects administered under the Housing Act of 1937, as amended. Local authorities may apply the optional increased exemptions where permitted by State laws and the financial solvency of contracts. The Housing Act of 1957 also increased the maximum cost per room of regular low rent dwelling units from $1,750 to $2,000 and for dwellings designed for elderly families from $2,250 to $2,500.

Budget program.—The local housing authority usually initiates a low rent housing project by negotiating a preliminary loan contract with the Public Housing Administration for the advancement of planning funds. However, the Administration does not incur a legal obligation to provide financial assistance required to construct and maintain the low rent character of the project until an annual contributions contract is executed. The annual contributions contract is consequently treated as the point of program initiation and control. The contract provides for (1) the payment of annual contributions to the local housing authority over a fixed period of years, not to exceed 40, in an amount not to exceed the interest and amortization on the bonds required to finance the construction of the projects, and (2) temporary financing of development costs pending substantial construction completion and permanent financing of the project.

The Housing Act of 1956 authorized the execution of new contracts for loans and annual contributions after July 31, 1956, for a total of 70,000 additional dwelling units. The authorization is for 2 consecutive annual programs of 35,000 units and each program may be executed during a period of 2 years after it becomes available. This act continued the uncompleted authorization to execute contracts for loans and annual contributions contained in the housing amendments of 1955. The first program of 35,000 units was authorized to begin August 1, 1956, and it terminated on July 31, 1958. Under the first program, 24,860 units of the authorized 35,000 units were executed by the termination date. The second program of 35,000 units became available July 1, 1957, and will terminate on June 30, 1959. The budget program plans for the execution of annual contributions contracts for the 35,000 units authorized under the second program by June 30, 1959. The budget estimates for 1960 are based upon the number of housing units, under the current congressional authorization in the various development stages, and an increased number of units reaching the management stage.

Development progress.—The development of the low-rent public housing program can be measured at any one time through a pattern of construction progress. The pattern can be divided into separate groups, each of which represents a stage in the development process. The status-by-stage analysis at respective fiscal year ends is presented in the following tabulation:

NUMBER OF DWELLING UNITS

	1958 actual	*1959 estimate*	*1960 estimate*
Development stage:			
1. Preliminary loan contract executed, site not selected	45,098	19,523	19,523
2. Site selected, annual contributions contract not executed	9,795	------	------
3. Annual contributions contract executed, construction not started	79,650	90,452	55,452
4. Construction started, not available for occupancy	30,565	38,975	54,422

This analysis indicates that the development activity over the 3-year period will decrease in the first two stages prior to the commencement of construction. The units under annual contributions contract will increase in 1959 but decrease in 1960 as projects move to the construction stage. The Administration's efforts to accelerate construction are reflected in the increasing number of units under construction but not available for occupancy at the end of each of the 3 fiscal years.

A further analysis is provided by the passing of dwelling units through the various development stages. The number of units passing each of the five stages in the development process during a fiscal year is an indication of program accomplishments. A 3-year comparison is presented in the following tabulation:

NUMBER OF DWELLING UNITS

	1958 actual	*1959 estimate*	*1960 estimate*
Development action:			
1. Preliminary loan contract executed	15,507	5,432	------
2. Site selected	27,995	31,007	------
3. Annual contributions contract executed	15,581	40,802	------
4. Construction started	25,522	30,000	35,000
5. Completed for occupancy	10,511	21,590	19,553

The activity shown for 1958 and 1959 reflects an increase in sites selected and a substantial increase in the number of annual contributions contracts executed. The time lag in completing the first stages of the development process leaves a substantial number of units under annual contributions contracts and awaiting start of construction. It is anticipated that new construction starts will reach 35,000 units in 1960. As the housing units leave the construction stage the workload in the management stage will increase correspondingly.

Loans.—The Housing Act of 1949 authorizes the Public Housing Administration to have at any one time outstanding borrowings of $1.5 billion from the Treasury. These borrowings and certain working capital funds available to the corporation are used to make loans to local housing authorities. Pursuant to the annual contributions contract, the Administration makes a loan commitment to finance initial development costs of the project. The commitment is gradually increased during the development period as progress warrants. The maximum loan commitment by the Public Housing Administration cannot exceed 90% of the development costs. During 1959 and 1960, new loan commitments will reflect new annual contributions contracts and an increase in the number of

PUBLIC HOUSING ADMINISTRATION—Continued

Public enterprise funds—Continued

LOW RENT PUBLIC HOUSING PROGRAM FUND—Continued

dwelling units under construction. Because of these factors, the dollar volume of new loan commitments is estimated to increase from $307 million in 1958 to $353 million in 1959 and $338 million in 1960.

The Public Housing Administration makes direct short-term development loans in assisting local housing authorities to finance the initial planning work in the first 3 months of construction of a low rent housing project. When loans to local housing authorities are of sufficient size to make private financing practicable, the local housing authority sells short-term temporary notes and utilizes the proceeds to repay the advance and interim notes held by the Administration and for immediate construction requirements. These notes are guaranteed by Public Housing Administration through the pledge by the local housing authority of the Public Housing Administration loan commitment. This guaranty has established an excellent security rating for these notes which have sold at an average interest rate of 1.748% in 1958. Direct loans were refunded through loans by private investors, guaranteed by the Public Housing Administration during 1958 in the amount of $155 million. Refunding of the Public Housing Administration loans with private loans is estimated at $266 million in 1959 and $206 million in 1960. These temporary notes, financed by private investors, are issued for short periods, usually 5 months, and may be reissued several times, and in increasing amounts, before the project is completed and ready for occupancy. As a result, a considerable turnover of short-term notes takes place during each fiscal period. The volume of loan activity managed by the Administration during a given fiscal year greatly exceeds the amount of loans outstanding at the fiscal year end.

The following table reviews the actual financing and refinancing of development loans by the Administration and private investors during 1958 and estimated transactions during 1959 and 1960:

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Loans and investments made by Public Housing Administration to local housing authorities:			
Balance at beginning of year	$94	$91	$102
Acquisitions during the year	204	382	308
Repayments during the year	207	371	308
Balance at end of year	91	102	102
Loans by private investors to local housing authorities—guaranteed by Public Housing Administration:			
Balance at beginning of year	667	792	865
Acquisitions during the year	1,540	1,769	1,860
Repayments during the year	1,415	1,696	1,751
Balance at end of year	792	865	974

All short-term financing, both direct and guaranteed, is retired when the local housing authority permanently finances the project. Refunding operations affect only the distribution between direct and guaranteed loans and not the total outstanding.

The local housing authority obtains permanent financing through the sale of long-term bonds to the public. These are usually 40-year serial bonds and are secured by the Government's pledge to pay annual contributions. They were sold in 1958 at interest rates of 2.8865 and 2.8876%. It is estimated that $250 million in new local housing authority bonds will be issued in 1959 and $260 million in 1960, compared to $137 million in 1958.

Management.—The maximum annual contribution, which is equal to the interest and amortization on the bonds issued to permanently finance the housing project, is reduced to the extent that project operations provide net receipts which can be used for this purpose. A limited review of project management by the Administration is deemed necessary to assure that the objectives of housing legislation are being achieved and that the provisions of the annual contributions contract are being fulfilled. The review of project management operations also affects the cost of the program to the Federal Government. The management workload at each fiscal year end, classified according to major category and program, is shown in the table that follows:

NUMBER OF DWELLING UNITS

	1958 actual	*1959 estimate*	*1960 estimate*
Locally owned projects eligible for annual contributions	394,599	416,189	435,742
Locally owned projects paying residual receipts to the Federal Government	37,358	37,358	37,358
Federally owned directly operated projects	1,187	1,182	1,182
Federally owned projects leased to local housing authorities	2,186	1,319	1,319
Total all projects	435,330	456,048	475,601

Projects not eligible for annual contributions.—Federal funds are not required for the support of projects not eligible to receive annual contributions payments. One category is the group of locally owned projects paying residual receipts to the Federal Government. All of these projects, except for a single Public Law 412 project, originated in programs where construction costs were financed out of appropriated funds. Therefore, in the absence of interest and amortization charges, no need exists for the payment of annual contributions which otherwise would be required to pay such charges. Residual receipts from these projects are paid for a period of 40 years to the Federal Government. Deficits, however, are not paid by the Federal Government. During the past few years it has been the policy of the Administration to convey these projects for low rent use when requested by the local housing authorities.

Another category consists of federally owned projects leased to local housing authorities. Leasing arrangements are merely temporary expedients until such time as projects are either sold to local housing authorities and financed by sale of local housing authority bonds under annual contributions contracts or transferred to local housing authorities under conditional conveyance contracts providing for payment of residual receipts to the Federal Government. These leased projects are scheduled for disposition by conveyance or sale as rapidly as possible.

Nonadministrative expenses.—The Public Housing Administration utilizes program receipts to meet certain expenses of the low rent public housing program, and the use of these funds correspondingly reduces the need for appropriated funds. The Congress, in order to maintain control over use of these program receipts, established a nonadministrative expense limitation. The limitation consists of two separate parts: (1) Expenses incurred in the operation and maintenance of federally owned, directly operated projects; and (2) expenses incurred in the inspection of projects under construction.

As of June 30, 1958, only three federally owned, directly operated projects remained under the low rent public housing program. Federally owned and operated projects represent projects that have not been sold, conveyed, or leased to local housing authorities for various reasons, such as absence of State-enabling legislation, local conditions, and the lack of congressional authority to dispose of the projects for other than low rent use. Estimated program receipts and expenses for 1959 and 1960 are

Digitized for FRASER

Federal Reserve Bank of St. Louis

based upon the continued operation by the Public Housing Administration of 3 projects containing 1,182 dwelling units.

The inspection of low rent housing projects under construction by the Administration provides the means of insuring that projects will be built in accordance with specified and acceptable standards. The Administration has departed from the established policy of assigning full-time representatives to projects while under construction and instead will use a pool of traveling construction representatives within each of its regional offices to give this inspection service. Under this new policy the service can be performed with fewer engineers. The estimated cost for 1960 is based upon the revised inspection service for an increased number of units in the construction stage. The local housing authority pays a fixed fee for this service, based upon a percentage of the total development cost, and the receipts are used to pay the cost of the service.

Annual contributions.—The following table summarizes the annual contributions required to assure the low rent character of all locally owned projects eligible for annual contributions:

	1958 actual	*1959 estimate*	*1960 estimate*
Fixed annual contributions	$121,220,082	$132,400,000	$145,700,000
Deduct fixed annual contributions in excess of debt service requirements for Public Law 671 projects in temporary financing	216,362	196,827	188,719
Net fixed annual contributions	121,003,720	132,203,173	145,511,281
Deduct amounts available to reduce annual contributions:			
Accrued interest	448,153	1,844,376	3,528,579
Capitalized interest	1,130,262	923,003	2,197,686
Residual receipts, end of initial operating period	473,808	176,153	297,795
Residual receipts, current period	20,160,831	16,259,641	15,487,221
Total amount available to reduce annual contributions	22,213,054	19,203,173	21,511,281
Annual contributions requirements	[1] 98,790,666	[2] 113,000,000	124,000,000
Number of units on which annual contributions are accrued	374,172	399,502	421,826

[1] $98.9 million was appropriated.
[2] Includes a proposed supplemental appropriation of $5.5 million to be submitted for consideration at a later date.

Increased annual contributions requirements in 1959 and 1960 are largely the result of an increased number of units eligible for annual contributions resulting from the completion and permanent financing of new and reactivated projects. Another factor responsible for the increase is the increased operating costs, particularly for repairs, maintenance, replacements, and operating improvements.

Under the present statutory authorization, the Public Housing Administration may pay annual contributions up to $336 million per annum. The maximum amount of annual contributions which the Administration is committed to pay, on the basis of annual contributions contracts executed through June 30, 1958, is estimated at $216 million, leaving $120 million of uncommitted authority to pay annual contributions.

Administrative expenses.—Administrative expenses for the low-rent public housing program amounted to $11,592,419 in 1958 and are estimated at $12,660,000 for 1959 and $13,000,000 for 1960.

The increasing number of units in the construction and management stages during 1959 and 1960 is the chief reason for the rise in administrative expenses. The number of units in the construction stage will increase from 30,565 on June 30, 1958, to 38,975 and 54,422 at the end of 1959 and 1960, respectively. Dwelling units completed and reaching the management stage at year end will increase from 435,330 units in 1958 to 456,048 units in 1959 and 475,601 units in 1960 and will expand the management workload. This will require additions to certain management staff organizations, principally the audit staffs in the central and regional offices.

1958 represents the last year in which administrative expense funds for both the low rent public housing and the liquidating emergency housing programs were merged into a single fund. Commencing with 1959, the budget estimates and expenditures for these two funds are separated for administrative purposes.

Operating results and financial condition.—Operating income is not intended to be sufficient to cover all program costs. Net losses, in the budget year, are approximately equal to the appropriations for administrative expenses and annual contributions payments.

Net obligations outstanding, as shown in the schedule of certain fund balances, will continue to increase during 1959 and 1960. The Administration's accelerated construction program has created new loan commitments which exceed retirements through permanent financing. These commitments include the Public Housing Administration's agreement to advance planning and preliminary construction funds and the guaranty of outstanding advance and permanent loan notes held by private investors. These commitments can be met from the authority to borrow up to $1.5 billion from the Treasury.

LIMITATION ON ADMINISTRATIVE AND NONADMINISTRATIVE EXPENSES, PUBLIC HOUSING ADMINISTRATION

Not to exceed the amount appropriated for such expenses by title I of this Act shall be available for the administrative expenses of the Public Housing Administration in carrying out the provisions of the United States Housing Act of 1937, as amended (42 U. S. C. 1401–1433), including not to exceed $900,000 for expenses of travel; purchase of uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131); *and* purchase of not to exceed one passenger motor vehicle for replacement only[; and expenses of attendance at meetings of organizations concerned with the work of the Administration]: *Provided*, That necessary expenses of providing representatives of the Administration at the sites of non-Federal projects in connection with the construction of such non-Federal projects by public housing agencies with the aid of the Administration, shall be compensated by such agencies by the payment of fixed fees which in the aggregate in relation to the development costs of such projects will cover the costs of rendering such services, and expenditures by the Administration for such purpose shall be considered nonadministrative expenses, and funds received from such payments may be used only for the payment of necessary expenses of providing representatives of the Administration at the sites of non-Federal projects: *Provided further*, That all

Budget program.—The Public Housing Administration is responsible for administering the low-rent public housing program. Administrative expenses are incurred in the performance of development and management functions of the program.

1. *Development.*—Development expenses in 1960 will be incurred in the course of assisting local housing authorities in project planning, solving architectural, engineering, and construction problems, reviewing proposed sites, assisting in land acquisition, preparing cost estimates, and rendering general advisory services.

2. *Management.*—The Administration will incur expenses in the performance of management functions in the form of reviews and advice to local housing authorities. These functions will include management reviews of projects, reviewing budget estimates, fiscal and management audits, consulting engineering service, and inspections of a general nature to ensure proper maintenance of properties.

The management workload for the low-rent public housing program is reflected in the number of dwelling units in management at year end as follows: 1958, 435,330; 1959, 456,048; 1960, 475,601.

DEPARTMENT OF AGRICULTURE

Total expenditures by the Department of Agriculture in the fiscal year 1960 are estimated at $6.4 billion, a decrease of $891 million from the estimate for 1959 but an increase of $1.6 billion over the amount actually spent in 1958. Of the $6.4 billion estimated to be spent in 1960, about 93% is classified under agriculture and agricultural resources, including 70% for stabilization of farm prices and farm income, 8% for loan programs, 10% for conservation and development of agricultural land and water resources, and 4% for research and other agricultural services.

The remaining 7% of the Department's expenditures is for donations of agricultural commodities to peoples in other countries, classified under international affairs and finance; cash contributions to the national school lunch and the special milk programs, classified under labor and welfare; Forest Service programs, classified under natural resources; and farm housing loans, classified under commerce and housing.

Stabilization of farm prices and income.—Net expenditures of the Commodity Credit Corporation for all of its operations in 1960 are estimated at $4.4 billion. These expenditures reflect principally the excess of the Corporation's outlays for loans, commodity purchases, payments to producers, storage and transportation charges, and other operating expenses over its receipts from all sources, mainly from commodity sales and collections on loans. Of the total Corporation expenditures of $4.4 billion in 1960, $4.2 billion is classified under stabilization of farm prices and income; these expenditures account for almost 95% of the expenditures of the Department that are in that classification.

Commodities are acquired by the Corporation by direct purchase and by taking over commodities pledged as security for price support loans. During the fiscal year 1960 it is estimated that the Corporation will acquire commodities costing $5.4 billion and will dispose of commodities representing an investment of $3.1 billion, mainly through donations and sales. In the 5 fiscal years, 1954–58, total commodity acquisitions exceeded total dispositions by more than $3 billion, with a resulting increase in commodity inventory from $2.4 billion on June 30, 1953, to $5.5 billion on June 30, 1958 (see table 1). The Corporation's investment in commodity inventories is expected to increase to $6.8 billion by June 30, 1959, and to $9.1 billion by June 30, 1960. Commodity loans outstanding are estimated to be $1.4 billion on June 30, 1960, bringing the estimated total investment of the Corporation in commodities and loans to almost $10.5 billion by that date.

The expenditure estimates for the Corporation assume that termination of the acreage reserve of the soil bank programs will result in a shift of a part of the acreage to the conservation reserve and a part to the growing of price-supported crops. However, the estimates also assume that crop yields in the 1959 crop year will be substantially lower than yields in the 1958 crop year, which were 11% above the previous record level. As a result, expenditures by the Corporation for price support, supply and purchase programs in the fiscal year 1960 are not expected to increase over the fiscal year 1959 (see table 2).

TABLE 1. COMMODITY CREDIT CORPORATION: COMMODITY INVENTORY OPERATIONS AND INVESTMENT IN COMMODITIES AND LOANS, 1954–60

Total	1,689	3,486	3,901	3,430	3,151	5,386	4,490

[1] Continuation of the International Wheat Agreement is currently under consideration.

Of the total of $4.4 billion of estimated net expenditures of the Commodity Credit Corporation in 1960, it is estimated that over $1 billion will represent financing of the sale of farm commodities for foreign currencies under the Agriculture Trade Development and Assistance Act of 1954 (Public Law 480). The Corporation finances such sales in part by furnishing commodities from its own inventory and in part by financing purchases of commodities in the market for use in this export program. The Corporation also finances sales of wheat abroad under the International Wheat Agreement and sales of wheat and other farm commodities under certain special export programs.

Foreign currencies received from sales under title I of Public Law 480 are available to Federal agencies for uses specified in that law. The Department of Agriculture uses such funds to finance foreign market development activities of the Foreign Agricultural Service, and for research abroad to discover ways to increase industrial

Federal Reserve Bank of St. Louis

uses of agricultural commodities. Uses made by the several agencies (i. e., obligations and expenditures) are reported with other budget schedules of the using agencies and allocations are summarized at the end of the chapter on Funds Appropriated to the President.

Expenditures of foreign currencies obtained under title I of the Agricultural Trade Development and Assistance Act of 1954 during the fiscal year 1958 and estimated expenditures for 1959 and 1960 are summarized in table 3. The table excludes expenditures for new uses authorized by the amendments to this law enacted in 1958. It is expected that a supplemental request will be sent later to the Congress regarding the uses of foreign currencies in 1960 under the authority provided by these amendments.

The budget provides for the President's recommendation of a 1-year extension of title I of the Agricultural Trade Development and Assistance Act of 1954, under which agricultural commodities are sold for foreign currencies, and of title II, under which commodities are donated for relief purposes. It is proposed that the total authority for reimbursement of the Corporation for costs and losses under title I be increased from the present limit of $6,250 million to $7,750 million.

TABLE 3. EXPENDITURES OF FOREIGN CURRENCIES OBTAINED UNDER TITLE I OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

[Stated in equivalents of millions of dollars]

Type of use, chapter of document, and agency	Program	1958 actual	1959 estimate	1960 estimate

Use by U. S. agencies with reimbursement to Treasury.	Various (not separately identified).	69.6	63.8	85.0
Total		321.9	429.3	648.3

The costs and losses incurred by the Corporation in its operations necessitate appropriations at a later date to reimburse the Corporation and to restore its capital. Appropriations for these purposes recommended for fiscal 1960 include $2 billion to restore the capital impairment of the Corporation for price support losses and $1.2 billion to reimburse the Corporation for estimated costs and losses under other price and income stabilization programs financed by that agency in 1959 and prior years.

Expenditures of $271 million for 1960 are estimated for other programs for the stabilization of farm prices and income that are not financed by the Corporation. These programs include, principally, removal from the market of commodities in temporary surplus, mainly by purchase and donation to schools and welfare agencies; payments to sugar growers under the Sugar Act; and administrative expenses of the Commodity Stabilization Service in the establishment of acreage allotments and marketing quotas.

Financing rural electrification and telephones.—The budget recommends new authority to incur obligations of $225 million for the Rural Electrification Administration in the fiscal year 1960 as compared with $419 million enacted for the fiscal year 1959. This additional obligational authority, together with carry-over authority from 1959, will provide a loan program level of $325 million in 1960. Legislation will be proposed to broaden the sources of loan funds for this program and to authorize the use of loan repayments to make new loans. Expenditures under the Rural Electrification Administration program in 1960 are estimated at $335 million as compared with $325 million in 1959.

Financing farm ownership and operation.—New obligational authority of $204 million is recommended for the Farmers' Home Administration in 1960 for operating, farm ownership, and soil and water loans and necessary administrative expenses. No additional obligational authority is required for the farm housing loan program, which is classified under commerce and housing. The $204 million of new obligational authority will permit a loan program level of $185 million in 1960, including $13 million of farm housing loans. Legislation will be proposed to authorize the Farmers' Home Administration to use its loan repayments for new loans.

Conservation of agricultural land and water resources.—Expenditures for agricultural land and water conservation are estimated at $675 million in the fiscal year 1960, an increase of $160 million over 1959. Most of the increase is in the conservation reserve program of the soil bank which is expected to absorb a part of the land that has been in the terminating acreage reserve of the soil bank. Rental payments as well as cost-sharing conservation practice payments are included in the total expenditures for conservation of agricultural land and water resources. In previous budget documents the rental payments were classified as expenditures for stabilization of farm prices and income.

Expenditures under the agricultural conservation program are expected to be $197 million in the fiscal year 1960. These payments were authorized in the 1959 appropriation act. The budget proposes a reduction of the advance authorization for payments for conservation practices performed in the 1960 crop year to $100 million.

Federal Reserve Bank of St. Louis

Expenditures for technical guidance by the Soil Conservation Service will be at about the same level as in 1959.

No additional funds are provided in the budget for the initiation of works of improvement under the Watershed Protection and Flood Prevention Act. However, initiation of construction on the 100 works of improvement previously scheduled for 1959 will be spread over 1959 and 1960. Expenditures under this program are expected to be $24 million in 1960 compared with $23 million in 1959.

Research and other agricultural services.—Expenditures for these services include, in addition to those for research, outlays for educational activities, control of harmful insects, eradication of diseases of plants and animals, promotion of markets for farm commodities, and related general services to agriculture. Funds provided in the budget for research to promote industrial uses of agricultural commodities are supplemented with foreign currencies obtained from the sale of commodities under Public Law 480 which are used to finance such research abroad. It is expected that up to $10 million of such currencies will be used to contract for such research in 1960.

Other functions.—Expenditures in 1960 for emergency grants of farm commodities to other countries are estimated at $94 million. They will be reimbursed to the Commodity Credit Corporation in subsequent years from appropriated funds. The budget provides for a reduction of the cash contribution to school lunches from $110 million in 1959 to $100 million in 1960 and elimination of the transfer of $35 million from the permanent appropriation for removal of surplus commodities provided in the 1959 appropriation act. However, surplus commodities acquired will continue to be made available to the school lunch program. The special milk program will be continued at about the same level as in 1959. Loans for farm housing are expected to be about $13 million, a substantial reduction from the 1959 level when this program was expanded as an antirecession measure. Most of the research, management, and development programs of the Forest Service will continue at about existing levels in 1960, with some increase for timber sales, offset by other program decreases.

Economy and user-charge proposals.—Legislation will be proposed to amend the present basic authority of the Department of Agriculture providing for assistance to farmers, ranchers and stockmen in major disaster areas, so as to require State and local contributions to such programs equal to at least 25% of the cost of feed and seed assistance.

In line with the administration's policy of reducing the burden on general taxpayers for services of special benefit to limited groups, legislation will be proposed to remove certain statutory restrictions on the setting of fees and granting of licenses for various inspection and registration services of the department. Legislation will also be proposed to permit the Federal Crop Insurance Corporation to include administrative expenses in the determination of appropriate premium rates for crop insurance.

AGRICULTURAL RESEARCH SERVICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production [and utilization], *utilization, and home economics,* to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: *Provided,* That not to exceed $75,000 of the appropriations hereunder shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further,* That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two[, of which one shall be] for replacement only: *Provided further,* That appropriations hereunder shall be available pursuant to title 5, United States Code, section 565a, for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed $10,000, except for five buildings to be constructed or improved at a cost not to exceed $20,000 each, and the cost of altering any one building during the fiscal year shall not exceed $3,750 or 4 per centum of the cost of the building, whichever is greater:

Research: For research and demonstrations on the production and utilization of agricultural products, *home economics,* and related research and services, including administration of payments to State agricultural experiment stations; [$59,044,890] *$64,240,000: Provided, That not to exceed $71,000 may be used for reimbursement to Department of the Army for land and improvements at Orlando, Florida, to be transferred pursuant to the Federal Property and Administrative Services Act of 1949, as amended*: *Provided further,* That the limitations contained herein shall not apply to (*a*) replacement of buildings needed to carry out the Act of April 24, 1948 (21 U. S. C. 113a), *or* (*b*) *not to exceed $639,000 for the construction and alteration of buildings: Provided further, That the Secretary is authorized to acquire by donation lands necessary for the construction thereof*;

Plant and animal disease and pest control: For operations and measures, *not otherwise provided for,* to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine and regulatory activities, as authorized by law, *including expenses pursuant to the Act of February 28, 1947 (21 U. S. C. 114b–d)*; [$47,132,000] *$49,110,000,* of which [$1,000,000] *$1,500,000* shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases to the extent necessary to meet emergency conditions;

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat, and meat-food products, and the applicable provisions of the laws relating to process or renovated butter; [$17,326,000] *$21,475,000.*

[For an additional amount for "Salaries and expenses", as follows:]

[Plant and animal disease and pest control, $3,500,000, of which $500,000 shall be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and diseases to the extent necessary to meet emergency conditions;]

[Meat inspection, $1,750,000.]

[Not to exceed $346,000 of the amount made available under this head in the Department of Agriculture and Farm Credit Administration Appropriation Act, 1958, may be used until June 30, 1959, for construction, alteration and repair of buildings and the limitation on building construction or alteration contained therein shall not apply to said amount.] *(5 U. S. C. 511–512, 524, 541c–541e, 563–564, 565a, 576, 2131; 7 U. S. Proposed supplemental due to pay increases		8,396,110	
Reappropriation		346,000	

The Agricultural Research Service conducts fundamental and applied research relating to the production and utilization of agricultural products, and to home economics, and carries out those control and regulatory programs of the Department which involve enforcement of plant and animal quarantines, meat inspection, the control of diseases and insect pests of animals and plants, and related work.

1. *Research*—(*a*) *Farm research.*—Improved breeding, feeding, and management practices are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases and parasites affecting them. Research on foot-and-mouth disease of livestock is conducted at Plum Island, N. Y.

Investigations are conducted to improve varieties of food, feed, fiber, and other plants and to develop new crops; to improve crop-production practices, including methods to control plant diseases; to improve methods for control of harmful and utilization of beneficial insects affecting farm production; and to develop and test new chemical formulations for the control of crop pests.

Research is conducted to improve fertilizers, soil management, irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to deter-

AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

mine the relation of soils to plant, animal, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production. Farm economics research is conducted on profitable adjustments in farming by type and size of farm; on efficiency in use of labor, equipment, land, and water; and on related economic problems.

Continuous review of the research work is made in order to emphasize work which will meet the problems of agricultural surpluses. To find increased outlets for agricultural products, research has been expanded on the breeding and development of long staple cotton for better quality fabrics, corn with waxy starch for glues and adhesives, corn with high amylose content for industrial use, milk with high solids and lowered fat content for changing dietary requirements, the meat-type hog to reduce fats in surplus, etc. More than $1 million of farm research funds are now used for the introduction and development of new crops. Most of the production research is now oriented to meet market demands. For example, it includes current research on the development of peaches with good shipping quality, vegetables suitable for freezing, cottons with greater strength, and beef that is tender with less back and belly fat. In addition to these adjustments, the proportion of farm research funds going into basic research has been steadily increased—to about 27% today. This basic research undergirds the other research efforts.

The estimates for 1960 propose increases for research on humane slaughter methods, for additional facilities at the National Arboretum, for a laboratory at Logan, Utah (for research on sugar beets and other crops), and for the transfer from the Department of the Army of real property at Orlando, Fla., used for insect investigations.

(*b*) *Utilization research and development.*—Chemical, physical, and biological studies are conducted to develop new and improved foods, feeds, drugs, fabrics, industrial chemicals, and other products from agricultural commodities, to improve commodity processing methods, and to increase the use of byproducts. In addition, foreign currencies are available for market development research and are described separately below.

(*c*) *Home economics research.*—Studies are made of human nutrition, household economics, and clothing and housing.

(*d*) *Administration of payments to States, and research in Alaska, Puerto Rico, and Virgin Islands.*—Research under Federal grant funds at each State agricultural experiment station is coordinated with research conducted by other States and by agencies of the Department. The Secretary's responsibilities for the proper administration of these funds are financed by a direct appropriation ($351,000 estimated for 1959) and 3% of the grant funds. Research stations are operated in Alaska, Puerto Rico, and the Virgin Islands.

2. *Plant and animal disease and pest control*—(*a*) *Plant disease and pest control.*—Provision is made (1) through port-of-entry inspection to exclude from this country destructive insects, plant diseases, and nematodes that cause great damage to agricultural crops in other parts of the world; (2) to cooperate with States in eradicating or preventing spread of crop pests that become established in this country; and (3) to assist States in suppressing incipient and emergency outbreaks of crop pests when and where they occur. The Federal Insecticide, Fungicide, and Rodenticide Act and related provisions of the Federal Food, Drug, and Cosmetic Act are administered. An increase is proposed for 1960 for increased cooperative surveys and regulatory activities to control the soybean cyst nematode. The volume of workload is indicated in the following table:

[In thousands]

	1956 actual	*1957 actual*	*1958 actual*
Inspections at ports of entry:			
Airplanes	97	111	121
Vessels	55	58	59
Interceptions of unauthorized plant material	245	291	311
Export certificates issued	45	49	50
Plant containers certified for export	23,460	25,411	24,682

(*b*) *Animal disease and pest control.*—Programs are devised to exclude communicable diseases of foreign origin from this country; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine. The estimates for 1960 propose a decrease of $5 million due to progress and accomplishments in the brucellosis eradication program. This decrease is partially offset by an increase of $600,000 for the control of vesicular exanthema of swine, financed since 1956 through advances from the Commodity Credit Corporation.

The volume of protective activities is indicated by selected examples in the following table:

[In thousands]

	1956 actual	*1957 actual*	*1958 actual*
Animal import inspection:			
All animals	195	346	1,127

Cattle tested for brucellosis:			
Blood tests	16,754	15,913	16,251
Ring tests	28,362	31,481	30,927
Brucellosis reactors found	367	280	260
Animals inspected at public stockyards	70,540	68,039	62,918
Diseased animals received or found	221	347	352
Supervision of production of veterinary biologics:			
Hog-cholera virus and anti-hog-cholera serum doses	50,441	46,164	40,669
Hog-cholera vaccine—do	32,325	34,563	36,800
Other vaccines—do	2,274,657	2,644,260	2,369,890
Total bacterins—do	87,373	91,223	108,803
Diagnostic agents—do	57,056	66,694	66,791
Other serums—do	13,363	9,281	10,773

[1] Comparable data not available.

3. *Meat inspection.*—Federal meat inspection is required for all meat in interstate commerce and is conducted to assure a clean and wholesome meat supply for human consumption, free from adulteration and truthfully labeled. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure informative labeling and meats imported or exported are inspected. The proposed increase would provide for needed inspection and for necessary preparation for carrying out the regulatory requirements under the new law relating to humane slaughter methods (72 Stat. 862), approved August 27, 1958.

The volume of inspections and examinations is indicated by examples given in the following table:

Informational Foreign Currency Schedule

Foreign currency, Agricultural Trade Development and Assistance Act of 1954, as amended

[All amounts stated in U. S. dollar equivalents]

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Market development research (total obligations)	$371,484	$6,628,516	$10,000,000
Financing:			
Unobligated balance brought forward		−28,516	
Unobligated balance carried forward	28,516		
Authorization to expend foreign currency receipts (7 U. S. C. 1704)	400,000	6,600,000	10,000,000

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are allocated to the Department to develop new foreign markets and expand existing markets for United States agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. Utilization research in both applied and basic fields is carried on by research institutions and organizations in foreign countries by contracts or grants. This research will serve to expand the markets for agricultural commodities. It is estimated that $10 million will be available in fiscal year 1960 for such research.

Object Classification

	1958 actual	1959 estimate	1960 estimate
Full-time equivalent of all other positions		3	8
Average number of all employees		3	8
Number of employees at end of year		6	9
Average salary of ungraded positions		$2,500	$2,500
01 Personal services:			
Positions other than permanent		$7,500	$20,000
Other personal services		10,500	30,000
Total personal services		18,000	50,000
