AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

State Experiment Stations

Payments to States, Hawaii, [Alaska,] and Puerto Rico: For payments to agricultural experiment stations to carry into effect the provisions of the Hatch Act, approved March 2, 1887, as amended by the Act approved August 11, 1955 (7 U. S. C. 361a–361i), including administration by the United States Department of Agriculture, $31,053,708; and payments authorized under section 204 (b) of the Agricultural Marketing Act, the Act approved August 14, 1946 (7 U. S. C. 1623), $500,000; in all, $31,553,708.

Penalty mail: For penalty mail costs of agricultural experiment stations, under section 6 of the Hatch Act of 1887, as amended, $250,000. (*39 U. S. C. 321q; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

Appropriated 1959, **$31,803,708** Estimate 1960, **$31,803,708**

Diseases of Animals and Poultry

Eradication activities: For expenses necessary in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947, and the Act of May 29, 1884, as amended (7 U. S. C. 391; 21 U. S. C. 111–122), including expenses in accordance with section 2 of said Act of February 28, 1947, the Secretary may transfer from other appropriations or funds available to the bureaus, corporations, or agencies of the Department such sums as he may deem necessary, [but not to exceed $1,000,000 for eradication of vesicular exanthema of swine,] to be available only in an emergency which threatens the livestock or poultry industry of the country, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts: *Provided*, That this appropriation shall be subject to applicable provisions contained in the item "Salaries and expenses, Agricultural Research Service". (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Eradication activities (advanced from Commodity Credit Corporation) (total obligations)	$1,258,044	$1,077,000	
Financing:			
Advances (repayable to Commodity Credit Corporation)	−1,243,408	−1,047,375	
Unobligated balance no longer available	29,625		
Reappropriation (new obligational authority)	44,261	29,625	

Eradication activities.—Funds for carrying out the program for the eradication of vesicular exanthema of swine have in the past been transferred from the Commodity Credit Corporation. Corporate funds so used are subsequently repaid from specific appropriations for that purpose. In 1960, it is proposed to include funds for this activity in the appropriation Salaries and expenses, Agricultural Research Service, plant and animal disease and pest control.

"Army industrial fund."
"United States dollars advanced from foreign governments, United States educational exchange program," Department of State.
"Foreign currency, Agricultural Trade Development and Assistance Act of 1954."
"Mutual security," funds appropriated to the President.
"Translation of publications and scientific cooperation," funds appropriated to the President.

Permanent authorizations:

Alterations and Improvements, Animal Quarantine Station, Clifton, New Jersey

(Special fund)

Appropriated (est.) 1959, **$30,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Alterations and improvements (total obligations)		$30,000	
Financing:			
Appropriation (new obligational authority)		30,000	

The act of August 20, 1958 (72 Stat. 680) authorized the Department to convey to the city of Clifton, N. J., about 7 acres of the land of the United States animal quarantine station located there. Conveyance is conditional upon payment of 75% of the appraised fair market value and $30,000 to be deposited in a special account for making alterations of buildings, facilities, and improvements on the remaining land at the station.

EXTENSION SERVICE

Current authorizations:

Cooperative Extension Work, Payments and Expenses

Payments to States, Hawaii, [Alaska,] and Puerto Rico: For payments for cooperative agricultural extension work under the Smith-Lever Act, as amended by the Act of June 26, 1953 (7 U. S. C. 341–348), and the Act of August 11, 1955 (7 U. S. C. 347a), $52,220,000; and payments and contracts for such work under section 204 (b)–205 of the Agricultural Marketing Act of 1946 (7 U. S. C. 1623–1624), $1,495,000; in all, $53,715,000: *Provided*, That funds hereby appropriated pursuant to section 3 (c) of the Act of June 26, 1953, shall not be paid to any State, Hawaii, [Alaska,] or Puerto Rico prior to availability of an equal sum from non-Federal sources for expenditure during the current fiscal year.

Retirement costs for extension agents: For cost of employer's share of Federal retirement for cooperative extension employees, [$5,479,375] *$5,674,375*.

Penalty mail: For costs of penalty mail for cooperative extension agents and State extension directors, [$1,868,480] *$2,491,307*.

Federal Extension Service: For administration of the Smith-Lever Act, as amended by the Act of June 26, 1953 (7 U. S. C. 341–348), and the Act of August 11, 1955 (7 U. S. C. 347a), and extension aspects of the Agricultural Marketing Act of 1946 (7 U. S. C. 1621–1627), and to coordinate and provide program leadership for the extension work of the Department and the several States, Territories, and insular possessions, [$2,096,540] *$2,258,795*. (*39 U. S. C. 321i, 321n, 321p–q; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

3. Penalty mail	2,164,000	1,868,480	2,491,307
4. Federal Extension Service	2,157,323	2,258,795	2,258,795
Total obligations	59,545,886	63,321,650	64,139,477
Financing:			
Unobligated balance no longer available	689,654		
New obligational authority	60,235,540	63,321,650	64,139,477
New obligational authority:			
Appropriation	$60,235,540	$63,159,395	$64,139,477
Proposed supplemental due to pay increases		162,255	

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics and related subjects. This educational activity takes research results, technological advancements, and situation and program facts of the Department of Agriculture, the State agricultural colleges, and experiment stations, and incorporates them into a national educational program. Its objective is to help people develop their abilities to attain greater efficiency in farming, marketing, and homemaking.

1. *Payments to States, Hawaii, and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payment to States, Hawaii, and Puerto Rico are distributed primarily on the basis of farm and rural population and to a limited degree on the basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act for educational work in marketing are distributed to the States, Hawaii, and Puerto Rico on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of county extension workers who work with rural families, marketing concerns, and others by providing counsel and assistance in the application of improved methods of production, marketing, and family living. They assist local leadership to determine extension programs of work. Work with youth is largely through 4–H Clubs.

The scope of extension activities is reflected in the following selected statistics:

[In thousands]	*1955*	*1956*	*1957*
Number of families assisted in adopting improved agricultural practices	6,111	6,406	6,819
Number of families assisted in adopting improved homemaking practices	6,134	6,539	6,873
Number of 4–H Club members	2,156	2,164	2,201
Number of voluntary local leaders	1,235	1,267	1,262
Number of bulletins distributed	27,887	29,200	30,894

2. *Retirement costs for extension agents.*—Cooperative extension agents are joint employees of the United States Department of Agriculture and the cooperating land-grant institutions. The employer's contribution to the Federal retirement fund, to match contributions of these agents, is provided by this appropriation.

3. *Penalty mail.*—This appropriation covers the cost of penalty mailings for State extension directors and cooperative extension agents in the States. The amount proposed is required to meet the adjusted rates authorized by the Postal Rate Increase Act, 1958 (72 Stat. 138), and will also require the submission of a supplemental appropriation for 1959 under Proposed for later transmission.

4. *Federal Extension Service.*—The Federal Extension Service provides leadership, counsel, and assistance to the States, Hawaii, and Puerto Rico in developing extension programs, improved teaching methods, efficient use of available resources, evaluation of programs, in-service training for extension personnel and providing administrative services.

SOIL CONSERVATION SERVICE

The Service is responsible for various soil and water conservation activities to aid farmers and ranchers in making physical adjustments in land use to conserve soil, water, and plant resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation. These activities are carried out in cooperation with Federal and State agencies and local organizations. The Service also has responsibility for administering the Great Plains conservation program and provides technical services in connection with the agricultural conservation program, the conservation reserve program, and soil and water conservation loans made by the Farmers' Home Administration.

Current authorizations:

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U. S. C. 590a–590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); operation of conservation nurseries; classification and mapping of soils; dissemination of information; purchase and erection or alteration of permanent buildings; and operation and maintenance of aircraft; [$74,780,000] *$81,072,000*: *Provided*, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed $2,500, except for eight buildings to be constructed or improved at a cost not to exceed $15,000 per building and except that alterations or improvements to other existing permanent buildings costing $2,500 or more may be made in any fiscal year in an amount not to exceed $500 per building: *Provided further*, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: *Provided further*, That in the State of Missouri, where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district: *Provided further*, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U. S. C. 590a–590f), in demonstration projects: *Provided further*, That not to exceed $5,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further*, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service. *(5 U. S. C. 133t, 511–512, 565a; 7 U. S. C. 1387, 1807; 16 U. S. C. 590q–1; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.)*

New obligational authority	75,045,000	81,108,000	81,072,000
New obligational authority:			
Appropriation	$72,545,000	$74,780,000	$81,072,000
Transferred from "Conservation reserve," soil bank programs (72 Stat. 243)	2,500,000		
Appropriation (adjusted)	75,045,000	74,780,000	81,072,000
Proposed supplemental due to pay increases		6,328,000	

Assistance furnished soil conservation districts and other cooperators consists primarily of: (*a*) surveys to provide physical land facts needed for farm and ranch conservation planning and by other Federal, State, and local agencies and the public;

MAIN WORKLOAD FACTORS

[In millions of acres]

Type of survey:	*Total as of June 30, 1958*	*1958 actual*	*1959 estimate*	*1960 estimate*
Soil surveys	575.1	41.1	42.3	43.3
Range surveys	78.9	12.9	13.0	13.2

(*b*) technical assistance in developing and applying farm and ranch conservation plans to get the best possible use and treatment of the land consistent with the landowner's plans for his soil, labor, equipment, and financial resources;

MAIN WORKLOAD FACTORS

	1958 actual	*1959 estimate*	*1960 estimate*
Number of soil conservation districts	2,806	2,836	2,861
Number of soil conservation district cooperators	1,794,411	1,852,000	1,906,000
Soil conservation district cooperators having farm and ranch conservation plans	1,218,433	1,272,000	1,324,000
Number of cooperators applying conservation practices	787,340	800,000	850,000

(*c*) technical assistance in planning and installing group enterprises for erosion control and water management; (*d*) snow surveys to make streamflow forecasts as a basis for efficient crop management and seasonal use of water in the Western States; (*e*) observational field testing of promising conservation plant materials; (*f*) technical assistance to agricultural conservation program participants in establishing specified conservation practices; and (*g*) technical assistance in installing the practices for which soil and water conservation loans are made by the Farmers' Home Administration.

1. Investigations and planning	$4,545,854	$4,700,000	$4,300,000
2. Installation of works of improvement	10,534,329	25,595,833	23,700,000
3. Loans and related expense	11,405	1,000,000	1,000,000
4. Surveys and investigations of water resources programs	762,361	1,000,000	1,000,000
Total obligations	15,853,949	32,295,833	30,000,000
Financing:			
Unobligated balance brought forward	−7,149,782	−16,795,833	−10,000,000
Unobligated balance carried forward	16,795,833	10,000,000	
Appropriation (new obligational authority)	25,500,000	25,500,000	20,000,000

The Department cooperates with the States and other agencies in planning and installing works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water. It provides loans to local organizations to help them finance their share of the cost of certain works of improvement. The Department also cooperates with other agencies in making surveys and investigations of watersheds of rivers and other waterways as the basis for the development of coordinated programs.

1. *Investigations and planning.*—Surveys are made by the Department of proposed small watershed projects and work plans are prepared in cooperation with the local sponsors. These plans outline the proposed works of improvement and include the estimated costs, a cost-benefit analysis, cost-sharing and maintenance arrangements, a proposed schedule of operations, and other facts necessary to determine whether Federal participation in project development should be approved.

MAIN WORKLOAD FACTORS

Watershed work plans prepared and pending final approval	19	49	46	46	56
Watershed work plans:					
(a) Approved for advance engineering and technical assistance	13	23	53	93	113
(b) Approved for construction of structural measures	---	19	45	100	132
(c) Planned treatment installed	---	---	2	7	15
Planning suspended	10	39	71	81	87
Planning in process	130	138	147	127	117
Balance:					
To be planned	175	164	223	343	487
Not now suitable for development of plans	200	280	300	315	330

2. *Installation of works of improvement.*—Assistance is provided to local organizations to install improvement measures for flood prevention and water management in accordance with approved watershed work plans.

Public Law 566 watersheds.—After local sponsoring organizations have developed watershed work plans with the Department's assistance and the projects have been approved as suitable for Federal participation (projects involving an estimated Federal contribution in excess of $250,000, or any single structure having a capacity in excess of 2,500 acre-feet require congressional approval), technical services and cost-sharing assistance are provided for specified works of improvement. Detailed construction plans and specifications are prepared. On other than Federal lands the local sponsoring organizations contract for the construction work; provide land easements and rights-of-way; operate and maintain the projects; and in the case of multiple-purpose structures bear a share of the construction costs. The initiation of installation of works of improvement in new projects requires administrative approval in two stages: (1) approval for advance engineering and other technical assistance only and (2) approval for construction of structural measures.

The advance engineering and technical assistance stage includes surveys, investigations, and preparation of detailed designs, specifications, and engineering cost estimates for construction of structural works. It also includes precise delineation of required easement areas. Technical and other assistance for planning and applying land treatment measures for watershed protection and flood prevention is provided in some cases.

The project-construction stage begins with the execution of the first project agreement for construction of works of improvement, after required easements are obtained or are assured and the local organization has met all other requirements. Under a project agreement the local sponsoring organization agrees to construct a segment of the project which may consist of an individual or an interrelated group of structures. The agreement obligates the Government to furnish its share of the construction cost. Funds are advanced to the local organization as segments of work are completed. Engineering and other services are provided for the preparation of contracts and specifications, awarding of contracts, and supervision and inspection of construction. Technical assistance with land treatment measures is continued.

Total, projects under construction at end of year	45	13,419	100	46,544	132	61,794
Grand total: Projects in progress at end of year	98	40,514	193	114,181	245	129,781

The 1959 budget (as amended by H. Doc. 351, 85th Cong.) contemplated approval of about 100 new projects during 1959. Current estimates are that only 60 projects will be ready for construction in 1959. Unobligated balances will be available to begin construction in 1960 of the 40 projects delayed from 1959. No funds are recommended for starting additional projects in 1960.

Pilot demonstration watersheds.—The following table shows the status of the pilot watershed projects which were initiated in 1954 to demonstrate and evaluate the effects of works of improvement installed in small watersheds for watershed protection and flood prevention. The budget estimate reflects reductions due to completion of some pilot projects.

[Dollars in thousands]

Explanation	1958 actual Number	1958 actual Amount	1959 estimate Number	1959 estimate Amount	1960 estimate Number	1960 estimate Amount
Active projects at beginning of year and estimated completion cost	54	$19,560	32	$15,152	21	$8,756

Total, projects in progress at end of year and estimated completion cost	32	15,152	21	8,756	12	4,256

3. *Loans and related expenses.*—Loans are made to local organizations to finance the local share of the cost of works of improvement installed in the small watersheds. Repayment with interest is required within 50 years after the principal benefits of improvements first become available.

4. *Surveys and investigations of water resources programs.*—Current work includes participation with the Corps of Engineers in the Potomac River Basin, the Mississippi River area, the Delaware River area, and the Cape Fear watershed in North Carolina, and with the Department of the Interior in reappraising agricultural benefits anticipated from the upper Colorado River storage project. A survey is also being made of part of the Kansas River area in cooperation with the Kansas State water board and of the Yazoo-Mississippi flood plain area with the Mississippi State board of water commissioners.

Flood Prevention

For expenses necessary, in accordance with the Flood Control Act, approved June 22, 1936 (33 U. S. C. 701–709), as amended and supplemented, and in accordance with the provisions of laws relating to the activities of the Department, to perform works of improvement, including not to exceed $100,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), to remain available until expended, [$18,000,000,] *$15,000,000*, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood prevention purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated. *(5 U. S. C. 511–512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.)*

Appropriated 1959, **$18,000,000** Estimate 1960, **$15,000,000**

Program and Financing

The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement in the various subwatersheds of the 11 watersheds authorized by the Flood Control Act of 1944. Measures primarily for flood prevention such as floodwater retarding and sediment control structures, debris barriers and basins, deflectors, diversion ditches and dikes, stream bank protection, and other improvements are being installed on a cost-sharing basis. On non-Federal lands, local organizations provide lands, easements, and rights-of-way; operate and maintain the projects; and, in some cases, bear a share of construction costs. Work is generally done by local contractors. Land-treatment measures which contribute to flood prevention are installed by landowners with technical and other assistance furnished by the Department.

The Service is developing efficient irrigation farming units for sale on the Eden Valley project in Wyoming where the Bureau of Reclamation has constructed the water-storage facility and is constructing principal canals. Land classification and topographic surveys are made, and project lands are subdivided into farm units of economic size. The land is cleared and leveled, and farm ditches, drains, and other water-control structures are built. Pending sale to qualified farm families, the developed farm units are planted to cover crops to prevent wind erosion. Technical guidance on irrigation and conservation is being furnished to farm operators.

The Eden Valley project is the only remaining active project. The first sale of newly developed irrigated farms on this project was made in December 1956. Completion of the project and sale of the remaining farm units is scheduled by 1962.

Cost-sharing contracts and technical assistance are offered by the Department to aid farmers and ranchers to develop and carry out long-range conservation plans designed to minimize climatic hazards and protect their lands from erosion and deterioration by natural causes. This is a voluntary program which supplements other conservation programs and activities in designated wind erosion counties of the 10 Great Plains States. Cost-sharing contracts extend from 3 to 10 years and include a plan of operations for the farm or ranch and a time schedule for installing eligible conservation practices. All contracts must terminate by December 31, 1971. The maximum cost-share rate offered in any contract does not exceed 80% of the average cost of installing each eligible practice. A limitation of $2,500 for cost-shares for improving dams or ponds or for other irrigation practices is the only limitation on the cost-share amount an individual may earn. The law provides that total cost shares paid shall not exceed $25 million for any one program year or $150 million for the total program.

The producer who signs a Great Plains program contract is responsible for accomplishing his plan of operations as scheduled, and is encouraged to use all available sources of assistance under other local, State, or Federal programs that contribute to achieving conservation land treatment and economic stability of the farm or ranch unit.

The 1960 estimate includes $10,400,000 for cost-sharing assistance to producers and $2,100,000 for technical assistance and administrative costs of the program.

AGRICULTURAL CONSERVATION PROGRAM SERVICE

Current authorizations:

AGRICULTURAL CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 7 to 15, 16 (a), and 17 of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g–590 (o), 590p (a), and 590q), including not to exceed $6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; [$235,000,000] *$241,500,000*, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building and soil- and water-conserving practices authorized under this head in the Department of Agriculture and Farm Credit Administration Appropriation Act, [1958] *1959*, carried out during the period July 1, [1957] *1958*, to December 31, [1958] *1959*, inclusive: *Provided*, That not to exceed [$24,698,000] *$26,832,950* of the total sum provided under this head shall be available during the current fiscal year for administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged to such limitation; but not more than [$5,025,800] *$5,424,200* shall be transferred to the appropriation account "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That none of the funds herein appropriated shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That such amounts shall be available for administrative expenses in connection with the formulation and administration of the [1959] *1960* program of soil-building and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to [$250,000,000] *$100,000,000*, including administration, and no participant shall receive more than $2,500, except where the participants from two or more farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community): [*Provided further*, That no change shall be made in such 1959 program which will have the effect, in any county, of restricting eligibility requirements or cost-sharing on practices included in either the 1957 or the 1958 programs, unless such change shall have been recommended by the county committee and approved by the State committee:] *Provided further*, That not to exceed 5 per centum of the allocation for the [1959] *1960* agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, and in addition, on the recommendation of such county committee and approval of the State committee, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions: *Provided further*, That for the [1959] *1960* program $2,500,000 shall be available for technical assistance in formulating and carrying out agricultural conservation practices and $1,000,000 shall be available for conservation practices related directly to flood prevention work in approved watersheds: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming material, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (*72 Stat. 414; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

NOTE.—Reimbursements from non-Federal sources above are from proceeds of sale of aerial photographs (7 U. S. C. 1387).

The program is designed to encourage conservation by sharing with farmers and ranchers the cost of carrying out approved soil-building and soil- and water-conserving practices which farmers generally would not perform to the needed extent with their own resources. The rate of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

cost-sharing, which may be given in the form of conservation materials and services or a payment after completion of the practice, averages approximately 50% of the cost.

Conservation measures for which cost-sharing is offered include those which are primarily for (1) establishment of permanent protective cover, (2) improvement and protection of established vegetative cover, (3) conservation and disposal of water, (4) establishment of temporary vegetative cover, and (5) temporary protection of soil from wind and water erosion.

Under the 1957 program, new or additional practices were established on 1,161,000 farms and ranches, consisting of 36% of the cropland and 34% of all farmland in the United States. The following practices were installed under the 1957 program:

Dams and reservoirs	number	70,000
Drainage	acre	1,071,000
Leveling land to conserve irrigation water and control erosion	acre	324,000
Standard terraces	acre	857,000
Diversion and spreader terraces	mile	5,378
Stripcropping	acre	732,000
Control of competitive shrubs on range or pasture	acre	1,239,000
Tree planting	acre	283,000
Liming materials applied	ton	15,920,000
Permanent sod waterways	acre	44,788
Timber stand improvement	acre	228,000
All vegetative cover	acre	13,955,000

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the agricultural stabilization and conservation State committees to counties, and the agricultural stabilization and conservation county committees make commitments of conservation practice cost-sharing to eligible farmers and ranchers.

Loans from Commodity Credit Corporation are used to make advance payments to vendors for conservation materials and services furnished to farmers and ranchers prior to the time funds are appropriated each year. Repayment is made from balances of prior appropriations or from new funds appropriated.

The status of the loan account is:

AMOUNTS REPAID OR ESTIMATED TO BE REPAID ON COMMODITY CREDIT CORPORATION LOANS

	1958 actual	*1959 estimate*	*1960 estimate*	*Total*
Balance of 1957 loan	$1,000,000			$1,000,000
1958 loan	15,200,000	$22,500,000		37,700,000
1959 loan			$37,500,000	37,500,000
Total	16,200,000	22,500,000	37,500,000	76,200,000
Interest	3,316	63,091	109,886	176,293

A program level of $100 million for the 1960 crop year is proposed, a reduction of $150 million below the 1959 program. Payments for the 1960 program will be made from the 1961 appropriations.

natural disasters. Assistance is available only when, as a result of wind erosion, floods, hurricanes, or other natural disasters, new conservation problems have been created which (1) if not treated, will impair or endanger the land; (2) materially affect the productive capacity of the land; (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area; and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

Funds for emergency cost-sharing assistance are distributed among States on the basis of needs for restoration of damaged lands.

AGRICULTURAL MARKETING SERVICE

Current authorizations:

MARKETING RESEARCH AND SERVICE

For expenses necessary to carry on research and service to improve and develop marketing and distribution relating to agriculture as authorized by the Agricultural Marketing Act of 1946 (7 U. S. C. 1621–1627) and other laws, including the administration of marketing regulatory acts connected therewith: *Provided*, That appropriations hereunder shall be available pursuant to 5 U. S. C. 565a for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of erecting any one building shall not exceed $10,000, except for two buildings to be constructed or improved at a cost not to exceed $20,000 each, and the cost of altering any one building during the fiscal year shall not exceed $3,750 or 3 per centum of the cost of the building, whichever is greater:

Marketing research and agricultural estimates: For research and development relating to agricultural marketing and distribution, for analyses relating to farm prices, income and population, and demand for farm products, and for crop and livestock estimates, [$14,195,000] *$15,437,000*: *Provided*, That not less than $350,000 of the funds contained in this appropriation shall be available to continue to gather statistics and conduct a special study on the price spread between the farmer and the consumer: *Provided further*, That no part of the funds herein appropriated shall be available for any expense incident to [ascertaining, collating, or] publishing [a report stating the intention of farmers as to the acreage to be planted in cotton, or for] estimates of apple production for other than the commercial crop;

Marketing services: For services relating to agricultural marketing and distribution, for carrying out regulatory acts connected therewith, and for administration and coordination of payments to States, [$20,659,000] *$26,623,000*, including not to exceed $25,000 for employment at rates not to exceed $50 per diem, except for employment in rate cases at not to exceed $100 per diem pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in carrying out section 201 (a) to 201 (d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7. U. S. C. 1291) and section 203 (j) of the Agricultural Marketing Act of 1946. (*5 U. S. C. 511–512, 541a, 556b, 563–564, 575; 7 U. S. C. 51–65, 71–87, 91–99, 181–229, 241–273, 411, 411a, 411b, 414a, 415b–415e, 423, 440, 471–476, 491–497, 499a–499s, 501–508, 511–511q, 516, 581–589, 951–957, 1551–1610; 15 U. S. C. 251–257i; 21 U. S. Transferred to "Management and investigation of resources," Bureau of Commercial Fisheries, Department of the Interior (70 Stat. 1119)	−5,000		
Appropriation (adjusted)	30,504,600	34,854,000	42,060,000
Proposed supplemental due to pay increases		2,846,278	

The domestic agricultural marketing and distribution functions of the Department are concentrated primarily in the Agricultural Marketing Service. The marketing job has become more complex with growth and shift in population, technological developments in production and marketing, and as more and more functions have been transferred from the farm and home to various segments of the marketing system. The work under this appropriation is aimed at aiding in the orderly and efficient marketing and effective distribution of agricultural products from the Nation's farms to the consumers. A supplemental estimate for 1959 is anticipated under Proposed for later transmission.

1. *Marketing research and agricultural estimates*—(a) *Marketing research.*—This work is aimed at developing practical answers to problems encountered in moving products from the farm to the consumer. In cooperation with public and private agencies and trade groups, efforts are made to expand markets, reduce losses from waste and spoilage, and reduce marketing costs through improved marketing efficiency and organization. The work includes research at each stage of marketing, such as at

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

assembly points, terminal or central markets, and retail markets.

In 1958, research was conducted on more than 500 projects each aimed at a specific marketing research problem. Work was completed or discontinued on 92 projects and started on 68 new projects in 1958. The findings of this research were made public primarily through about 500 marketing research reports and other printed documents. Additional dissemination of these results was obtained through press releases and over 100 articles reviewing research findings in various general and trade journals. Twenty-six new contracts were negotiated during the year, bringing to 52 the total of active contracts providing for marketing research work by private firms and other non-Federal agencies.

(*b*) *Economic and statistical analysis.*—This work involves the collection, analysis and interpretation of data affecting agricultural prices, farm income, supply and consumption of farm products, trends in farm population, and changes in the level of living of farm people. The results of these studies are made available through situation, outlook and research reports which serve as the basis for much of the economic work done by the Extension Service, farm organizations, businessmen, and organizations handling farm products. Farmers and others rely on information from these reports in planning the most profitable adjustments in their operations and marketing programs. Approximately 80 of the 90 outlook and situation reports published by the Department were issued under this activity. Further technical reporting of economic and statistical analysis activities was contained in about 34 reports published during 1958.

(*c*) *Crop and livestock estimates.*—This service provides the official estimates on agriculture, including acreage, yield, and production of crops, stocks and value of farm commodities, numbers and inventory value of livestock items, and prices paid and received by farmers. These data also are basic to computation of parity prices. Data on approximately 150 crop and livestock products are covered in more than 500 reports issued each year. The activity is conducted through 41 State and 1 Territorial offices, most of which are operated as joint State and Federal services. Cooperative arrangements permit the States to obtain a great deal of data which could not be collected or made available from Federal funds. During 1958, States expended an estimated $1.25 million of their State funds on these cooperative programs. A comparison of activity data for 1957 and 1958, including work performed under cooperative arrangements, is as follows:

	1957 actual	*1958 estimate*
Separate inquiry forms mailed, total all offices	11,800	12,200
Questionnaires distributed	8,750,000	9,300,000
Questionnaires tabulated	2,670,000	2,850,000
Number of official reports released	8,290	8,600
Copies of reports distributed	13,000,000	13,100,000
Publications distributed:		
Federal (mainly Agricultural Situation)	3,100,000	3,100,000
State: Statistical and other	350,000	360,000
Special requests for information answered	73,000	73,000

2. *Marketing services*—(*a*) *Market news service.*—This service provided current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 100 cities and towns, often with financial support and cooperation of the States. Every available means of dissemination is used—mail, press, radio, television, telephone, telegraph, bulletin boards, and trade and farm publications.

The proposed increase for 1960 is to cover higher rates on leased teletype service.

MARKET NEWS SERVICE

	1956 actual	*1957 actual*	*1958 actual*
States covered by cooperative agreement	37	38	39
Field offices:			
Year-round	161	166	176
Seasonal	36	39	51
Buyers and sellers interviewed	25,985	19,608	21,734
Daily newspapers carrying reports (approximate)	1,200	1,200	1,200
Stations broadcasting reports:			
Radio	1,461	1,461	1,460
Television	152	149	150
Mimeographed releases to growers, shippers, and others	32,389,827	32,244,428	28,844,077
Names on mailing list	297,702	303,651	302,646

(*b*) *Inspection, grading, classing, and standardization.*—Uniform standards of quality for agricultural products are established and applied to specific lots of produce to promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied directly by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. Approximately 79% of the total cost of the work under the project was offset by fees and other revenue in 1958, which are shown principally under "Agricultural Marketing Service trust funds" in part III of the budget.

The proposed increase for 1960 would be used to finance, on a full-year basis, the inspection service at seasonal and year-round evisceration and slaughter plants operating under the Poultry Products Inspection Act.

STANDARDIZATION ACTIVITIES

	1956 actual	*1957 actual*	*1958 actual*
Grade standards in effect	3,098	3,151	[1] 1,379
Number of commodities covered	261	268	276

[1] Reduction due to revised method of tabulating tobacco grades and types.

INSPECTION, GRADING, AND CLASSING ACTIVITIES UNDER APPROPRIATED FUNDS

	1958 actual	*1959 estimate*	*1960 estimate*
Cotton classings by Federal employees—number	19,724,155	17,500,000	17,500,000
Poultry products inspection:			
Volume inspected—1,000 lbs	115,000	2,835,000	4,000,000
Grain inspections by licensees—number	3,042,362	3,100,000	3,200,000
Volume inspected—1,000 bu	5,716,975	5,800,000	5,800,000
Tobacco auction markets—number	177	177	177
Volume inspected at markets—million lbs	1,716	1,850	1,900
Sets of buyers—number	241	241	241

(*c*) *Freight rate services.*—Assistance is provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The Department in 1958 participated in 56 formal litigation actions before the Interstate Commerce Commission and other regulatory bodies and carried on 58 informal negotiations with carriers and groups of carriers.

(*d*) *Regulatory activities.*—These include the administration of regulatory laws such as packers and stockyards, standard container, United States warehouse, and Federal seed, to assure fair play in the market place and protect producers and handlers of agricultural commodities from financial loss due to deceptive, careless, or fraudulent marketing practices. The continued growth of facilities and means for storing, buying, and selling results in more demand and need for protection and benefits of regulatory laws. The increase for 1960 would be used to strengthen the overall administration of the Packers and Stockyards Act, as amended, including extension to all interstate livestock transactions, regardless of the size of the market.

PAYMENTS TO STATES, TERRITORIES, AND POSSESSIONS

For payments to departments of agriculture, bureaus and departments of markets, and similar agencies for marketing activities under section 204 (b) of the Agricultural Marketing Act of 1946 (7 U. S. C. 1623 (b)), $1,160,000. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

Appropriated 1959, **$1,160,000** Estimate 1960, **$1,160,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Payments for marketing service work (sec. 204 (b) of the Agricultural Marketing Act of 1946) (total obligations)	$1,160,000	$1,160,000	$1,160,000
Financing:			
Appropriation (new obligational authority)	1,160,000	1,160,000	1,160,000

Payments are made on a matching fund basis to State and Territorial marketing agencies for carrying out specifically approved programs designed to bring about improved marketing. Under this activity, marketing specialists work with farmers, marketing firms, and agencies in solving marketing problems and in putting to use marketing research results.

This program covers such projects as methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products, and the collection and dissemination of special State and local market information and statistics. Through this cooperative approach, the Federal Government's leadership and funds are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

In 1959, with 43 States and Territories conducting about 132 projects, the program is being carried on at the same level as in 1958. For 1960, the program level will be the same.

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
New obligational authority—Continued			
Transferred to "Marketing research and service" (72 Stat. 243)	−$35,367		
Appropriation (adjusted)	99,964,633	$145,000,000	$100,000,000

1. *Food assistance,* in the form of both funds and food, is provided to States and Territories in serving lunches to school children. Each State's portion of the funds available is determined by a statutory formula which takes into account the number of school-age children in the State and the relationship between the per capita income of the State and the average United States per capita income.

The program is operated under an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and if accepted are reimbursed for a part of the food cost of each meal served.

In 1958 the States contributed to this program $613 million, most of which came from payments by children. This was far in excess of the $211 million necessary to meet the statutory matching requirement of $3 for each Federal dollar of cash payment.

In addition to providing cash assistance, this appropriation is used to purchase food for distribution to the schools according to their need under section 6 of the School Lunch Act. This program also provides one of the major outlets for surplus commodities purchased under section 32 of the Agricultural Adjustment Act of 1935, as amended. Further, commodities acquired under price support programs and assistance through the special milk program are available to the schools. The volume of surplus commodities distributed to schools, however, is dependent upon market conditions and the need for the Federal Government to remove surpluses.

The program in 1958 during the peak month provided lunches to nearly 30% of the approximately 39.1 million school children in the country. The number of types A and B lunches served, which must meet established nutritional requirements, increased approximately 6% over 1957. Participation in the program in December 1957 reached 11.5 million children in 59,882 schools and an appreciable increase in number of participating children is expected in 1959 and 1960.

During 1958 about $558 million worth of agricultural commodities were used in the program. About 14% of this amount represented commodities contributed under Federal surplus removal and price support programs.

Participation in the program from 1957 through 1960 is as follows:

	1957 actual	*1958 preliminary*	*1959 estimate*	*1960 estimate*
Average number of schools	52,322	54,634	56,000	58,000
Average number of school children, millions	9.547	10.118	10.930	11.800
Number of meals served, billions	1.777	1.889	2.100	2.250

Financing of the program in the last 3 years was as follows:

[In millions]

	1956	*1957*	*1958*
State and local contributions (total, including payments by children)	$515.0	$573.5	$613.0
Federal appropriation:			
(a) Cash payments	66.8	83.8	83.8
(b) Commodity procurement	14.8	14.7	14.8
Surplus commodity distribution	100.0	132.0	76.0
Special milk program	45.8	60.0	65.6
Federal contributions	227.4	290.5	240.2
Total, all contributions	742.4	864.0	853.2

2. *Operating expenses* consist of furnishing administrative and technical assistance to State agencies and participating schools; apportioning cash to States and Territories; administering directly the program for over 2,000 private schools where the State educational agency is prohibited by law from disbursing funds to such schools; procuring and distributing section 6 commodities; and formulating and administering overall policies and procedures, including audits and administrative reviews.

PERISHABLE AGRICULTURAL COMMODITIES ACT FUND

(Indefinite special fund)

Appropriated (estimate) 1959, **$675,000** Estimate 1960, **$685,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Licensing dealers and handling complaints:			
Direct obligations	$592,089	$708,300	$749,300
Reimbursable obligations	25,400	25,400	25,400
Total obligations	617,489	733,700	774,700
Financing:			
Unobligated balance brought forward	−311,738	−394,627	−361,327
Advanced from "Marketing research and service" (7 U. S. C. 499s)	−25,400	−25,400	−25,400
Unobligated balance carried forward	394,627	361,327	297,027
Appropriation (new obligational authority)	674,978	675,000	685,000

License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U. S. C. 491–497, 499a–499s, 581–589).

These acts are aimed at assuring equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (1) informal settlements agreeable to both parties, (2) formal decisions involving payments of reparation awards between parties, and (3) suspension or revocation of license and/or publication of the facts. Approximately 25,050 licenses were in effect on June 30, 1958, and this is expected to increase by about 1,600 by the close of 1960. Formal complaints are expected to continue to average around 2,000 a year. Steps being taken to assist growers and shippers to correct or prevent misbranding of produce will tend to hold down the number of potential complaints. The increase in level of work in 1960 is primarily to place on a full-year basis the expansion made in 1959.

Transferred to—			
"Promote and develop fishery products and research pertaining to American fisheries," Bureau of Commercial Fisheries, Department of the Interior (15 U. S. C. 713c-3, as amended by act of Aug. 8, 1956)	−4,651,151	−4,786,415	−4,800,000
"School lunch program" (72 Stat. 194)		−35,000,000	
"Salaries and expenses," Foreign Agricultural Service			−2,593,000
Appropriation (adjusted)	216,227,007	196,150,248	238,607,000

Under section 32 of the act of August 24, 1935 (7 U. S. C. 612c), an amount equal to 30% of customs receipts during each calendar year (except for an amount equal to 30% of such receipts collected on fishery products transferred to the Department of Interior to encourage the distribution of fishery products) and unused balances up to $300 million are available for expanding domestic and foreign market outlets for farm commodities. These funds are also authorized for the administration of marketing agreements and orders, and the section 22 import-control programs. The basic legislation provides that funds devoted to any one commodity or product thereof must not exceed 25% of funds available. It also provides that the funds must be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949. It has been determined that this provision can be legally satisfied by setting aside or reserving the principal portion of section 32 funds for the use of perishable nonbasic agricultural commodities when the occasion arises warranting their use for such purpose.

1. *Commodity program payments.*—Direct purchases which are donated to the school lunch program, charitable institutions serving needy persons, and persons certified by welfare agencies as eligible for relief; diversion payments which enable processors to purchase surplus commodities on the domestic market, divert them to byproducts and new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities; and export payments which enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices (no export programs were in effect in 1958). During the past 2 years assistance under these programs was given to the following commodity groups:

[In millions]

	1957	1958
Dairy products	$54.9	$122.6
Eggs and poultry	26.3	.1
Fruits	1.5	1.2
Grain	12.4	------
Livestock products	33.3	------
Peanut butter	------	.9
Vegetables	7.3	2.4
Total	135.7	127.2

The use of section 32 program funds is contingent upon economic conditions. The estimates for both 1959 and 1960 reflect in total the requirements based on the situation as now foreseen. Distribution of this total in advance would be highly tentative since the type of program to be used is dependent upon a determination at the time of the kind of action which will best meet the particular need which had developed. If troublesome surpluses not now foreseen should develop, steps would be taken to use additional available funds for their removal or diversion as conditions might warrant.

2. *Surplus removal operating expenses.*—These expenses are mainly in connection with purchasing, exporting, and diverting surplus commodities and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Distribution in 1958 including those under section 6 of the National School Lunch Act is summarized below:

Distribution	Number of recipients (peak month) (millions)	Value of commodities distributed (millions)	Pounds of commodities distributed (millions)
By recipients:			
School children	13.6	$90.8	341.1
Needy persons	4.7	75.9	471.5
Persons in charitable institutions	1.4	33.6	148.3
Foreign countries: 85	----	272.5	1,973.0
Total		472.8	2,933.9
By program:			
Sec. 32		128.5	322.5
Donation by Commodity Credit Corporation under sec. 416		329.5	2,522.0
Sec. 6, National School Lunch Act		14.8	89.4
Total		472.8	2,933.9

Supervisory assistance is furnished local and State groups to encourage the preservation of surpluses for year-round use. In cooperation with the food trade, press and radio, greater consumption of abundant foods is encouraged. In 1958, the monthly plentiful foods list contained an average of 9 foods, and 11 national and 6 area, State, and local drives were conducted.

3. *Marketing agreements and orders.*—These are put into effect upon request of producers or handlers after hearings, investigations, and approval by producers (and handlers in case of marketing agreements). They help to stabilize prices and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessments upon handlers. On June 30, 1958, there were 68 orders in effect for milk and 36 covering tree fruits, tree nuts, and vegetables.

Financing:			
Proposed supplemental appropriation		1,107,000	

Under existing legislation, 1959.—An anticipated supplemental appropriation of $1,107,000 for 1959 is anticipated for (1) increased postage costs under Public Law 85-426, approved May 27, 1958, which established new postal rates effective August 1, 1958 ($481,000); (2) increased costs of the leased wire contract due to an increase in rates for leased teletype facilities ($26,000); and (3) inspection service under the Poultry Products Inspection Act ($600,000).

FOREIGN AGRICULTURAL SERVICE

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses for the Foreign Agricultural Service, including carrying out title VI of the Agricultural Act of 1954 (7 U. S. C. 1761-1768), and for enabling the Secretary to coordinate and integrate activities of the Department in connection with foreign agricultural work, including not to exceed $25,000 for representation allowances and for expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U. S. C. 1766), [$4,002,300] *$4,268,300: Provided,* That not less than $400,000 of the funds contained in this appropriation shall be available to obtain statistics and related facts on foreign production and full and complete information on methods used by other countries to move farm commodities in world trade on a competitive basis: *Provided further, That, in addition, not to exceed $2,593,000 of the funds appropriated by section 32 of the Act of August 24, 1935, as amended (7 U. S. C. 612c), shall be merged with this appropriation and shall be available for all expenses of the Foreign Agricultural Service in carrying out the purposes of said section 32: Provided further, That, in addition, not to exceed the equivalent of $560,000 in foreign currencies derived from sales under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, and made available to the Department of Agriculture, shall be available for expenses of the agricultural attaché service and for general operating expenses of the Foreign Agricultural Service in carrying out the purposes of section 104 (a) of that Act. (5 U. S. C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.)*

commodities and helps smooth the channels through which exports move.

Direct appropriation—1. *Analysis of foreign agriculture and trade.*—Analyses are made of world trends in foreign agricultural production, trade, price, finance, marketing, consumption, competition, commercial, and trade policies, and economic policies of foreign governments, as such trends affect United States foreign agricultural trade and the domestic economy. The Service directs and coordinates Department participation in the formulation of trade programs and agreements to stabilize and expand world trade in American agricultural products, and to reduce restrictive tariff and trade practices against import of American agricultural commodities. Recommendations for the departmental positions on trade agreements and international commodity agreements are formulated. Continuous review is made of the trade regulations and financial conditions of signatories to the General Agreement on Tariffs and Trade in American farm products. Policies, programs, positions, and standards of participation in public and private international organizations are developed.

2. *Agricultural attachés.*—A worldwide agricultural attaché program is conducted by the Department. Assistance is provided in development of markets abroad for United States agricultural commodities. A comprehensive schedule of foreign agricultural market and trade reporting to meet the needs of the American agricultural industry is maintained.

Transfer from Removal of surplus agricultural commodities—3. *Foreign market promotion.*—Maintenance and expansion of foreign markets for surplus agricultural products are promoted by (*a*) obtaining and analyzing information on foreign-market requirements and making such information available to farm and trade groups; (*b*) developing market programs for use by producers, exporters, and Government officials to maintain and expand the market abroad of United States farm products; (*c*) assisting domestic trade representatives in negotiations with foreign government officials, importers, and consumers, and bringing together American exporters and foreign importers under conditions favorable to trade; (*d*) developing agreements with foreign countries for sales of United States agricultural commodities under title I of Public Law 480, and followup on the shipments of those commodities; and (*e*) directing the operation of market development projects to further expand foreign markets for agricultural products with foreign currencies generated under title I of Public Law 480.

4. *Import controls.*—Importation of articles which interfere with programs carried out by the Department of Agriculture is investigated and the information is developed in accordance with section 22 of the Agricultural Adjustment Act, as amended. During 1958, investigations were conducted on 18 commodities and 5 recommendations were submitted to the President or the Tariff Commission. Under import controls for dairy products, a total of 1,854 licenses for imports of cheese were issued and 177 for manufactured dairy products other than cheese.

The expenses from foreign currencies, reflected above, represent (1) the estimated amounts of foreign currencies which will be used for the attaché program and (2) the estimates of general operating expenses related to the foreign market development work being conducted by the Foreign Agricultural Service pursuant to section 104 (a) of Public Law 480. The total anticipated use of foreign currencies by the Foreign Agricultural Service is shown below in a separate informational schedule.

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are allocated to the Department to enable the Foreign Agricultural Service to develop new foreign markets and expand existing markets for United States agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. The type of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. A total of $46.5 million is estimated as the amount available as of June 30, 1958 for market development projects. At June 30, 1958, there were 370 market development projects operating in 33 countries. Beginning with 1959, approximately $200,000 in foreign currencies are being used to pay certain costs of the agricultural attachés.

[1] Includes capital outlay as follows: 1958, $4,643; 1959, $2,000; 1960, $2,000.

Enforcement of the Commodity Exchange Act requires supervision over futures trading in 22 commodities on 16 exchanges to prevent price manipulation and corners and insure honesty and fair dealing. Transactions on contract markets were estimated at 8,424,000 in 1958, and the value of trading approximately $34 billion.

Digitized for FRASER

Federal Reserve Bank of St. Louis

1. *Licensing.*—Commission merchants and floor brokers are registered annually. In 1958 there were 537 commission merchants and 813 floor brokers so registered. The estimates for 1960 are 560 and 840 respectively. Exchange rules and regulations are reviewed to insure that legal requirements are met.

2. *Supervision of futures trading.*—This embraces (*a*) examination and analysis of reports and other market data, the making of market position surveys, and publication of summary data; (*b*) establishment, review and enforcement of speculative limits; and (*c*) cooperative activities with control committees of contract markets. In 1958, position surveys covered 4,182 traders.

REPORTS TABULATED AND ANALYZED

	1958 actual	*1959 estimate*	*1960 estimate*
Daily trading volume and open contracts	239,353	250,000	250,000
Daily and weekly reports on large traders	275,187	300,000	325,000
Delivery notices	43,589	40,000	40,000

3. *Audits.*—Misuse of customers' funds is prevented by (*a*) audit and examination of books of futures commission merchants; and (*b*) analysis of brokers' and traders' books and financial statements. The 1958 audits revealed that customers had to their credit $81,672,368 required to be segregated from the funds of the carrying brokers.

AUDITS

	1958 actual	*1959 estimate*	*1960 estimate*
Audits of customers' segregated funds	506	650	618
Accounts examined	26,326	33,000	31,350
Financial statements examined	538	550	560

4. *Investigations.*—Apparent or alleged violations of the law and regulations are investigated, and trade practice surveys are made to discover violations and compile legal evidence. The Authority also prepares and presents evidence of violations in administrative hearings and judicial proceedings. In 1958 there were 37 compliance investigations completed and 59,000 transactions examined.

5. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1957, $2,588; 1958, $3,746; 1959, $3,746; 1960, $3,746.

SOIL BANK PROGRAMS

The Soil Bank Act (7 U. S. C. 1801–1837) authorized an acreage reserve program and a conservation reserve program to assist farmers to divert cropland from production of excessive supplies of agricultural commodities, and to carry out a program of soil, water, forest, and wildlife conservation. The activities are supplementary to the acreage allotments and marketing quota programs authorized and appropriated for under the Agricultural Adjustment Act of 1938, as amended, and together with such programs constitute an overall program to prevent excessive supplies of agricultural commodities from burdening and obstructing interstate and foreign commerce.

From the appropriations provided for the conservation reserve and acreage reserve programs, funds are advanced to the Commodity Credit Corporation to cover payments to producers under the programs.

In accordance with the 1959 appropriation act for the Department of Agriculture the acreage reserve program was terminated at the end of the 1958 crop year.

Current authorizations:

CONSERVATION RESERVE [PROGRAM]

For necessary expenses to carry out a conservation reserve program as authorized by subtitles B and C of the Soil Bank Act (7 U. S. C. 1831–1837 and 1802–1814), [$200,000,000] *$360,370,000*: *Provided*, That not to exceed [$16,000,000] *$19,318,000* shall be available for administrative expenses of which not less than [$12,750,000] *$15,171,900* may be transferred to the appropriation account "Local administration, section 388, Agricultural Adjustment Act of 1938": *Provided further*, That no part of this appropriation shall be used to enter into contracts with producers which together with contracts already entered into would require payments to producers (including the cost of materials and services) in excess of $375,000,000 in any calendar year, and for purposes of applying this limitation, practice payments shall be chargeable to the first year of the contract period: *Provided further*, That no part of these funds shall be paid on any contract which is illegal under the law due to the division of lands for the purpose of evading limits on annual payments to participants: *Provided further*, That hereafter no conservation reserve contract shall be entered into which provides for [(1)] payments for conservation practices in excess of the average rate for comparable practices under the Agricultural Conservation Program [, or (2) annual rental payments in excess of 20 percent of the value of the land placed under contract, such value to be determined without regard to physical improvements thereon or geographic location thereof. In determining the value of the land for this purpose, the county committee shall take into consideration the estimate of the landowner or operator as to the value of such land as well as his certificate as to the production history and productivity of such land]. (*72 Stat. 81; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

Appropriation (adjusted)	153,187,522	$200,000,000	$360,370,000

The objective of this program is to help adjust total crop acreage more nearly in line with demand by withdrawing from 30 to 35 million acres of cropland from production and to establish and maintain sound conservation practices on the land withdrawn. Producers may enter into contracts through calendar year 1960, for periods of 3 to 15 years. In return for removing designated cropland from production and establishing long-range conservation practices, the producer receives cost-sharing assistance for establishment of a practice and annual payments for the duration of the contract. The Secretary may not enter into contracts with producers which would require payments to producers in excess of $375 million for the 1959 calendar year. Total annual payments to a producer for any year are generally limited to $5,000.

Participation in the program is summarized below:

Number of agreements as of April 15, 1958	127,000
Number of acres	9,899,000
Payments made in calendar year 1957	$89,972,690
Estimated payments to be made in calendar year 1958	$130,500,000

For the 1959 program, greater encouragement is being directed toward the inclusion of total farms in the program, and greater emphasis is being placed on forestry and wildlife practices. It is estimated that more than 13 million acres will be placed in the conservation reserve under the 1959 program bringing the total to about 23 million acres. This additional participation is anticipated because of (*a*) an increase in the annual payment rate from about $10 to $13.50 per acre, (*b*) special incentives for placing whole farms in the program, and (*c*) consideration given to productivity of land in establishing maximum payment rates for individual farms.

Acreage allotment and marketing quota programs are designed to keep the production and marketing of basic commodities in line with demand in order to give each farmer a fair share of the available market and the total production required.

Acreage allotments, when necessary, are established at national, State, and county levels (only at State level in the case of tobacco). In general, the acreage allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed whenever the total supply for the basic commodities, except corn, reaches a level specified in the Agricultural Adjustment Act of 1938, as amended. However, quotas do not become effective unless approved by two-thirds of those voting in a farmer referendum.

Acreage allotments and marketing quotas have been announced for the 1959 crops of flue-cured tobacco, peanuts, wheat, cotton, and rice. Acreage allotments and marketing quotas will be proclaimed for the 1959 crops of other kinds of quota tobaccos not later than February 1, 1959. The Agricultural Act of 1958, approved August 28, 1958, provides that (*a*) with respect to cotton the Secretary shall give producers of Upland cotton a choice of (1) plan A—planting within his acreage allotment and receiving price support determined under section 101 of the Agricultural Act of 1949, as amended, or (2) plan B—increasing his acreage by not to exceed 40% as determined by the Secretary and receiving price support at 15 parity points below the level under plan A; (*b*) a referendum shall be held of producers of corn in the 1958 commercial corn-producing area, to determine whether they favor price support as provided in the Agricultural Act of 1958 in lieu of the present acreage allotment and price support program; and (*c*) that the allotment for rice shall be maintained at the 1956 level.

In the referendum held November 25, 1958, 71.1% of the producers voting favored elimination of corn acreage allotments beginning with the 1959 crop. Therefore, no

Financing:			
Appropriation (new obligational authority)	67,662,500	76,000,000	71,500,000

The Service determines total United States requirements and quotas to provide consumers with adequate supplies of sugar at reasonable prices, to protect the domestic sugar industry and to promote export trade for the five domestic sugar producing areas, the Philippines, Cuba, and other foreign countries. The quota for each domestic area is allotted to individual sellers when necessary to achieve orderly marketing, and restrictive farm acreage allotments are established for producers when necessary to avoid surpluses.

1. *Payments to sugar producers.*—Payments are made (*a*) to domestic producers of cane and beets who meet specified conditions of employment, production, and price; and (*b*) for abandonment of planted acreage and crop deficiencies on harvested acreage due to natural calamities.

Estimated production by areas is shown in the following table:

SHORT TONS, RAW VALUE

Area	*1957 crop year*	*1958 crop year*	*1959 crop year*
Continental beet area	2,213,000	2,175,000	2,250,000
Continental cane area	535,000	620,000	675,000
Hawaii	1,085,000	785,000	1,050,000
Puerto Rico	934,000	1,225,000	1,350,000
Virgin Islands	15,100	6,000	15,000
Total	4,782,100	4,811,000	5,340,000

2. *Operating expenses.*—These consist of the expenses of (*a*) the agricultural stabilization and conservation State and county offices in establishing farm production controls, determining compliance, and making payments to producers; and (*b*) the Service's departmental work in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price determinations, establishing area production controls, and formulating overall policies and procedures.

SPECIAL ACTIVITIES

NOTE.—Funds estimated to be appropriated under this head are reflected in the schedules of the Commodity Credit Corporation fund.

Current authorizations:

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF SPECIAL ACTIVITIES

To reimburse the Commodity Credit Corporation for authorized unrecovered costs through June 30, 1959 (including interest through date of recovery), as follows: (1) $63,875,000 under the International Wheat Agreement Act of 1949, as amended (7 U. S. C. 1641–1642); (2) $104,508,000 for commodities disposed of for emergency famine relief to friendly peoples pursuant to title II of the Act of July 10, 1954, as amended (7 U. S. C. 1703, 1721–1724); (3) $968,016,000 for the sale of surplus agricultural commodities for foreign currencies pursuant to title I of the Act of July 10, 1954, as amended (7 U. S. C. 1701–1709); (4) $35,000 for grain made available to the Secretary of the Interior to prevent crop damage by migratory waterfowl pursuant to the Act of July 3, 1956 (7 U. S. C. 442–446); (5) $129,000,000 for strategic and other materials acquired by the Commodity Credit Corporation as a result of barter or exchange of agricultural commodities or products and transferred to the supplemental stockpile pursuant to Public Law 540, Eighty-fourth Congress (7 U. S. C. 1856); (6) $1,056,500 for transfers to the appropriation "Diseases of animals and poultry" pursuant to authority contained under such head in the Department of Agriculture and Farm Credit Administration Appropriation Act, 1959; and (7) $1,607,000 for transfers to the appropriation "Marketing research and service" pursuant to the Act of August 31, 1951 (7 U. S. C. 414a), for grading tobacco and classing cotton without charge to producers, as authorized by law (7 U. S. C. 473a, 511d). (72 Stat. 1790–1792.)

The funds and facilities of the Commodity Credit Corporation are utilized to carry out surplus-disposal programs and other special activities outside of the regular functions of the Corporation. Reimbursement to the Corporation is authorized for its cost incurred in carrying out these activities.

Through 1958, appropriations to reimburse the Corporation for 1956 and prior years' costs under these special programs were included in the regular appropriations to the department for the second year following the year in which the costs were incurred. The 1957 costs were recovered through a supplemental appropriation in 1958. A proposed supplemental appropriation for 1959 in the amount of $1,336,754,811 for 1958 costs and the 1960 estimate of $1,268,097,500 for 1959 costs provide for an acceleration of the rate of recovery by the Commodity Credit Corporation to assure the availability of sufficient borrowing authority to conduct its mandatory price support operations. Reimbursement for 1960 costs of these special activities will be requested in a later budget.

Details for each activity are reflected in the schedules supporting the estimates for the Commodity Credit Corporation.

Proposed for later transmission:

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF SPECIAL ACTIVITIES

Under existing legislation, 1959.—The funds and facilities of the Commodity Credit Corporation are utilized to carry out surplus disposal programs outside of the regular functions of the Corporation. Reimbursement to the Corporation is authorized for its costs incurred in carrying out the programs. A supplemental appropriation for 1959 in the amount of $1,336,754,811 is anticipated to reimburse the Commodity Credit Corporation for authorized 1958 costs and reflected in the Commodity Credit Corporation fund schedules for the following programs:

International Wheat Agreement (7 U. S. C. 1641–1642).
Emergency famine relief to friendly peoples (7 U. S. C. 1703, 1721–1724).
Sales of surplus agricultural commodities for foreign currencies (7 U. S. C. 1701–1709).
Grain for migratory waterfowl feed (7 U. S. C. 442–446).
Transfer of bartered materials to supplemental stockpile (7 U. S. C. 1856).
Animal disease eradication activities (7 U. S. C. 397, 21 U. S. C. 114c).
Grading and classing activities (7 U. S. C. 414a, 473a, 511d).

COMMODITY CREDIT CORPORATION

Current authorizations:

RESTORATION OF CAPITAL IMPAIRMENT

To restore the capital impairment of the Commodity Credit Corporation determined by the appraisal of June 30, [1957] *1958*, pursuant to section 1 of the Act of March 8, 1938, as amended (15 U. S. C. 713a–1), [$1,760,399,886] *$1,535,424,413*. *(Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.)*

COMMODITY CREDIT CORPORATION—Continued

Public enterprise funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, food, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation has an authorized capital stock of $100 million held by the United States, and authority to borrow up to $14.5 billion.

Programs.—The budget is based on the following types of programs; (1) price support, (2) commodity export, (3) storage facilities, (4) supply and foreign purchase, (5) special milk program and (6) special activities.

Obligations and expenditures for these programs include primarily loans, purchases, purchase agreements, carrying charges, incentive and other payments, operating and interest expenses, and advances and current obligations incident to special activities as authorized by specific legislation.

Budget assumptions.—The Corporation's budget estimates for 1959 and 1960 are based on the general assumptions (*a*) that employment, production, and national income will rise moderately both in 1959 and 1960 from the present level; (*b*) that prices will change little, on the average, from the present level; (*c*) that developments in international relations will not be such as to affect Government civilian programs generally; (*d*) that exports of agricultural products generally will be at about the same level as during 1958; (*e*) that acreage allotments and marketing quotas will be in effect for the 1959 crops of peanuts, rice, wheat, and certain kinds of tobacco; (*f*) that since corn producers have voted to discontinue corn acreage allotments the support rate will be based on the average price received by farmers; (*g*) that half of the cotton producers will elect to retain their regular acreage allotments and obtain higher price support and the other half will elect to increase their acreage allotments and accept lower price support; (*h*) that yields for the 1959 field crops will equal the average yield of the past 3 years; and (*i*) that the percentage of estimated production of the 1959 field crops placed under price support will at least equal the average percentage of the production of the 1955 through 1957 crops actually placed under price support. Wheat, corn, feed grains, rice, and cotton are exceptions to the latter assumption. The Corporation's export program providing for the sale of grains and cotton for export from free markets rather than from Commodity Credit Corporation stocks is expected to result in less of these commodities being placed under support than would otherwise be the case. The estimates for those commodities, as well as soybeans, beans, flaxseed, and extra long staple cotton, represent the current outlook with respect to the proportion of production to be placed under support.

In considering these estimates, it should be recognized that it is difficult to estimate requirements for the year ending June 30, 1960. They are dependent upon weather conditions and all other factors affecting volume of production of crops not yet planted in this country and abroad, economic conditions generally, food needs in occupied areas and other foreign countries, availability of dollar exchange, and other complex and unpredictable factors.

PRICE SUPPORT, SUPPLY, AND RELATED PROGRAMS AND SPECIAL MILK

1. *Price support program.*—Price-support operations are carried out under the Corporation's charter powers (15 U. S. C. 714), in conformity with the Agricultural Act of 1949 (7 U. S. C. 1421), the Agricultural Act of 1954 (7 U. S. C. 1741), which includes the National Wool Act of 1954, the Agricultural Act of 1956 (7 U. S. C. 1442), the Agricultural Act of 1958 and with respect to certain types of tobacco, in conformity with the act of July 28, 1945 as amended (7 U. S. C. 1312). Under the Agricultural Act of 1949, price support is mandatory for six basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities, namely, tung nuts, honey, milk, butterfat, and the products of milk and butterfat. Under the Agricultural Act of 1958, as producers of corn voted in favor of the new price-support program for corn authorized by that act, price support is mandatory for barley, oats, rye, and grain sorghums. Price support for wool and mohair is mandatory under the National Wool Act of 1954, through the marketing year ending March 31, 1962. Price support for other nonbasic agricultural commodities is discretionary except that whenever the price of either cottonseed or soybeans is supported, the price of the other must be supported at such level as the Secretary determines will cause them to compete on equal terms on the market. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissible price-support levels.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. The producer's commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are nonrecourse and the Corporation looks only to the pledged or mortgaged collateral for satisfaction of the loan. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity which he may elect within the maximum specified in the agreement.

In all its price-support operations the Corporation utilizes normal trade facilities to the maximum extent practicable. In its lending activities the Corporation uses local banks, cooperatives, and other financial institutions. Commercial storage facilities are used to a great extent in the storage of loan collateral and in the storage of stocks acquired by the Corporation.

Disposition of commodities acquired by the Corporation in its price-support operations is made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954 (7 U. S. C. 1691), title I of the Agricultural Act of 1954, title II of the Agricultural Act of 1956, the Agricultural Act of 1958, and the act of August 19, 1958, in the case of cornmeal and wheat flour. Reimbursement for strategic and critical materials acquired in the Corporation's barter activities which are transferred under

Federal Reserve Bank of St. Louis

title II of the 1956 act to the supplemental stockpile is obtained by appropriations authorized by such act. This is described under the heading Special activities. To the extent that price-support commodities are disposed of through the commodity export program and special activities, such as sales for foreign currencies, the furnishing of such commodities for various purposes, and similar operations, such disposals are for accounting purposes treated as price-support program disposals.

Net expenditures	616	2,928	2,470
Realized losses	1,007	799	1,001

2. *Commodity export program.*—The Corporation promotes the export of agricultural commodities and products through sales, barters, payments, and other operations. Such commodities and products may be those held in private trade channels as well as those in Commodity Credit Corporation's inventory. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (d) and 5 (f), and in accordance with specific statutes where applicable, such as sections 407 and 416 of the Agricultural Act of 1949, the International Wheat Agreement Act of 1949 (7 U. S. C. 1641), the Agricultural Trade Development and Assistance Act of 1954, title I of the Agricultural Act of 1954 and title II of the Agricultural Act of 1956. In general, transactions involving foreign currencies are conducted pursuant to the Agricultural Trade Development and Assistance Act of 1954. However, other such transactions may be conducted under the charter authority.

Current obligations under the International Wheat Agreement and title I of the Agricultural Trade Development and Assistance Act of 1954 are paid by the Corporation subject to reimbursement from appropriations authorized for such purpose.

Currently, in addition to the exports under the International Wheat Agreement, Commodity Credit Corporation wheat is available for export trade under barter programs of Commodity Credit Corporation at competitive world prices and is also made available to exporters in payment of the price differential between the prevailing world export sales price and the domestic market price which is earned on exports of free-market wheat outside the International Wheat Agreement and under this agreement. Cash payments are made on all exports of wheat flour either under the International Wheat Agreement or outside the agreement.

In order to encourage movement of cotton, corn, barley, grain sorghums, oats, rye, and rice from free market supplies into export channels, export payments are made in the form of these commodities from the Corporation's stocks.

Cotton held in the Corporation's inventory is also sold for export on a competitive world price basis. The Corporation also conducts a cotton products export program designed to protect the competitive position of the domestic cotton industry in relation to sales of cotton products manufactured abroad from American cotton purchased at export prices. Equalization payments, based on the raw cotton content in the products exported, are made to exporters on cotton products of upland cotton grown and wholly processed in the United States.

The Corporation also furnishes agricultural commodities and products for distribution or exhibition at international trade fairs to aid in the development of foreign markets for such commodities.

3. *Storage facilities program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 4 (h), 4 (m), and 5 (a) and (b). The Corporation (*a*) purchases and maintains (in storage deficient areas) granaries and equipment for care and storage of grain owned or controlled by the Corporation; (*b*) makes loans for the construction or expansion of farm-storage facilities; (*c*) provides storage-use guaranties to encourage the construction of commercial storage facilities; and (*d*) undertakes other operations necessary to provide storage adequate to carry out the Corporation's programs.

4. *Supply and foreign purchase program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and (c) thereof. The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies, and to meet domestic requirements. Foods, agricultural commodities, and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also, through purchases, loans, sales or other means, make available materials and facilities required in connection with the production and marketing of agricultural commodities.

Operations involving procurement for other Government agencies are conducted in accordance with section 4 of the act of July 16, 1943 (15 U. S. C. 713a–9), which requires that the Corporation be fully reimbursed for services performed, losses sustained, operating costs incurred, or commodities purchased or delivered to or on behalf of any other Government agency from the appropriate funds of such agency. Operations not subject to section 4 of such act may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

The main activities now carried on are procurement of commodities for the International Cooperation Administration, and initial financing of certain programs authorized under the Defense Production Act to assure adequate supplies of strategic and critical materials. Most of the latter programs are currently in liquidation.

Loan operations.—The following table reflects the loan operations of the Corporation applicable to the preceding programs.

	1958 actual	*1959 estimate*	*1960 estimate*
Loans outstanding beginning of year:

5. *Special milk program.*—Public Law 85–478, approved July 1, 1958 (72 Stat. 276), authorized the use of not to exceed $75 million annually through June 30, 1961, of Commodity Credit Corporation funds to increase the consumption of fluid milk by children in nonprofit schools of high-school grade and under and in nonprofit nursery schools, child-care centers, settlement houses, summer camps, and similar nonprofit institutions devoted to the care and training of children. The act further provides that amounts spent shall not be considered expended for the purpose of carrying out the price support program.

6. *Undistributed expenses.*—There are a number of expenses which are not allocated to a specific program. These include interest on the capital stock of the Corporation and on borrowings from Treasury, administrative expenses, and other miscellaneous costs, including expenses of the agricultural stabilization and conservation county committees, and Federal Reserve banks in connection with the Corporation's programs.

Administrative expenses are for the operating staff, including the services of employees of the Commodity Stabilization Service engaged in Commodity Credit Corporation activities, services performed by other agencies of the department, costs of audit, and payments to the General Services Administration for space in the District of Columbia and rent of field office space. Estimates for 1960 include a limitation of $45,300,000 for costs of administration including a reserve of not less than 7% for contingencies. The requested authorization excludes administrative expenses in connection with the supply and foreign purchase program, the wool and mohair program under the National Wool Act of 1954, the International Wheat Agreement, and the sale of long staple cotton transferred from the national stockpile, since it is contemplated that full reimbursement will be received for these expenses. Such reimbursement will be obtained and used in 1960 in the same manner as in previous years.

Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition (including inspection, classing, and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors and work performed on a contract basis by agricultural stabilization and conservation county committees) of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses. Similarly, expenses of other Federal agencies whose services are utilized in the handling of Commodity Credit Corporation property are treated as program expenses. Such expenses would include the fleet storage operation of the Maritime Administration conducted intermittently since 1949 and the services rendered by the General Services Administration in connection with the strategic, critical, and other materials acquired by the Corporation.

SPECIAL ACTIVITIES FINANCED BY COMMODITY CREDIT CORPORATION

7. *Special activities.*—These activities are carried out under authority of section 5 (g) of the Corporation's charter and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted.

Except with respect to the activities set forth in items (11) and (12) where losses, if any, would be recovered through the general restoration of capital impairment, the Corporation receives reimbursement for costs of these activities through regular appropriations. Appropriations to reimburse the Corporation for 1956 and prior years' costs of such activities have been included in the regular appropriations to the Department for the second year

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

following the year in which the costs were incurred. The 1957 costs were recovered through supplemental appropriation in 1958. The proposed supplemental appropriation for later transmission in 1959 for 1958 costs and the 1960 estimate for 1959 costs provide for an acceleration of the time of recovery by the Commodity Credit Corporation to minimize the possibility that the Corporation will not have sufficient borrowing authority to conduct its mandatory price support operations. Reimbursement for 1960 costs will be requested in a later budget.

Activities currently being carried out are as follows:

(1) *International Wheat Agreement—(7 U. S. C. 1641–1642).*—This agreement, which was renewed for a period of 3 years effective August 1, 1956, operates to provide an assured market for wheat to exporting countries and assured supplies of wheat to importing countries, at stable and equitable prices. The maximum and minimum prices in the 1956 agreement are $2 and $1.50, respectively, for the basic grade of wheat, No. 1 Manitoba Northern, at the same basing point as in the prior agreement, Fort William/Port Arthur, Canada. The agreement total quantity represents about 31% of world trade in wheat, yet the 6 exporting member countries export inside and outside the agreement about 90% of all wheat moving in world trade.

Funds of Commodity Credit Corporation and its stocks of wheat are used to pay (*a*) the difference between the selling prices prevailing under the agreement and the domestic market price of wheat, and (*b*) administrative and interest costs. The payment of the differential between the prevailing sales price of wheat under the agreement and the market price is paid to the exporter in Commodity Credit Corporation stocks of wheat rather than in cash. A cash payment for this differential is made for flour. The estimate for 1960 of $63,875,000 provides for reimbursing the Corporation for costs incurred in 1959 when an estimated 105 million bushels of wheat and wheat flour will be exported under the agreement. The following reflects the computation of the appropriations:

	Program year	
	1958	*1959*
Due at end of program year	$79,901,610	$63,875,000
Add interest to recovery	898,390	----------
Appropriation: 1959 supplemental and 1960	80,800,000	63,875,000

(2) *Emergency famine relief to friendly peoples.*—The Commodity Credit Corporation, through December 31, 1959, is directed, under title II of Public Law 480 (7 U. S. C. 1703, 1721–1724), to make its stocks of agricultural commodities available for emergency assistance to friendly peoples in meeting famine or other urgent relief requirements and to pay ocean freight charges for the shipment of donated commodities. Through June 30, 1958, commitments undertaken under this authority totaled $461.5 million. Of this amount the value of commodities authorized for shipment totaled $397 million, of which nearly three-quarters or $291 million was for grain including rice. Actual commodity and freight costs incurred through June 30, 1958, were $414 million. During 1959 and 1960, additional commodity and freight costs of $104 million and $93 million, respectively, are expected to be incurred under the program. Estimated costs in 1960 are pursuant to authorizations issued prior to December 31, 1959.

Appropriations are authorized for a maximum of $800 million to reimburse the Corporation for its costs in carrying out the program. The estimate for 1960 of $104,508,000 provides such reimbursement for operations during 1959.

It is estimated that total costs under this program will approximate $627 million by June 30, 1960, and the following reflects the costs incurred in carrying out this program and the computation of the appropriations:

Fiscal year	*Program expenditures*	*Interest*	*Total*
1955	$86,623,135	$273,329	$86,896,464
1956	91,277,033	2,307,966	93,584,999
1957	120,429,754	4,460,886	124,890,640
1958	116,001,011	5,444,617	121,445,628
1959 (estimate)	103,730,000	2,104,102	105,834,102
1960 (estimate)	93,000,000	1,395,000	94,395,000
Cumulative totals	611,060,933	15,985,900	627,046,833

	Program year		
	1958	*1959*	*1960*
Due at end of program year	$117,943,898	$104,508,000	$94,395,000
Add interest to recovery	1,326,102	----------	----------
Appropriation: 1959 supplemental, 1960 and 1961	119,270,000	104,508,000	94,395,000

(3) *Sales of surplus agricultural commodities for foreign currencies.*—Under the Agricultural Trade Development and Assistance Act (7 U. S. C. 1701–1709), surplus agricultural commodities are sold for foreign currencies. These currencies may then be used by the United States Government for agricultural market development, purchase of strategic materials, military equipment facilities and services for the common defense, payment of United States obligations, military family housing, international education exchange, acquisition of quarters abroad, participation in fairs and related activities, scientific activities, American-sponsored schools abroad, acquisition of buildings and grounds abroad for United States Government use, and loans for multilateral trade and economic development. If appropriations are available for a purpose for which foreign currencies are used, the agency must buy the currency for dollars which are used to reimburse the Commodity Credit Corporation. Through June 30, 1958, agreements had been signed with 37 countries for commodities representing an export market value of $2,540.5 million. The major commodities included were wheat, cotton, and fats and oils which together amounted to 76% of the total value of the agreements. Through that date commodities with an export market value of about $2,065 million had been shipped. The total dollar equivalent of foreign currencies deposited in the Treasury through June 30, 1958, amounted to $2,097,659,452.

The act authorizes appropriations of not to exceed $6.25 billion to reimburse the Corporation for its net costs in carrying out this program. The estimate in 1960 of $968,016,000 covers estimated unreimbursed costs of operations through 1959 amounting to $1,175,079,954 less $207,063,954 representing the dollar equivalent of various foreign currencies received for agricultural commodities exported as of June 30, 1958, for which the Corporation may eventually be reimbursed in dollars or may be used for military housing with subsequent reimbursement from net rental receipts.

The following table reflects the net costs incurred by Commodity Credit Corporation by years:

Fiscal year	*Program expenditures*	*Interest*	*Total*
1955	$129,164,632	$355,528	$129,520,160
1956	616,963,458	7,263,254	624,226,712

Recoverable from future sales of currencies and net receipts from military family housing	138.0	207.1	254.0

(4) *Transfer of Commodity Credit Corporation grain to Interior for migratory waterfowl feed.*—The Commodity Credit Corporation is directed to make available to the Secretary of the Interior through July 3, 1959 (7 U. S. C. 442–446), such grain acquired through price support operations and certified by the Commodity Credit Corporation to be available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition.

During 1958, 260 tons of Commodity Credit Corporation grain, with an investment value of $18,506 were transferred under this program. It is estimated that 400 tons of grain will be transferred in 1959 at a cost to Commodity Credit Corporation of $35,000. The estimate for 1960 provides for reimbursement for operations during 1959.

(5) *Transfer of bartered materials to supplemental stockpile.*—The Commodity Credit Corporation is directed under title II of the Agricultural Act of 1956 (7 U. S. C. 1856) to transfer strategic and other materials acquired as a result of barter and exchange of agricultural commodities, other than those acquired for the national stockpile or for other purposes, to the supplemental stockpile. The act authorizes appropriations to reimburse the Corporation for amounts equal to the market value of materials transferred.

During 1958 materials valued at $82,250,335 were transferred under this program. An estimated $129,000,000 worth of materials will be transferred in 1959 and $225,000,000 in 1960. The estimate for 1960 provides for reimbursement for the 1959 transfers.

(6) *Animal disease eradication activities.*—The Commodity Credit Corporation advanced funds for eradication of foot-and-mouth and other contagious diseases of animals through June 30, 1959, pursuant to authority contained in annual appropriation acts and for eradication of brucellosis through June 30, 1958, under section 204 (e) of the act of August 28, 1954, as amended (7 U. S. C. 397). In 1959 a supplemental appropriation is anticipated to repay the Commodity Credit Corporation for advances for the eradication of vesicular exanthema of swine and brucellosis in 1958. An appropriation is being requested in 1960 to repay the Commodity Credit Corporation for advances for the eradication of vesicular exanthema of swine in 1959.

	Program year	
	1958	*1959*
Due at end of program year	$19,387,681	$1,056,500
Less refunds	214,627	----------
Add interest to recovery date	217,046	----------
Appropriation: 1959 supplemental and 1960	19,390,100	1,056,500

(7) *Grading and classing activities.*—The Commodity Credit Corporation makes advances to the Agricultural Marketing Service for classing and grading of agricultural commodities without charge to producers (7 U. S. C. 414a). Such advances used for classing cotton and grading tobacco not placed under price-support loan must be repaid from subsequent appropriations. A supplemental appropriation in 1959 is proposed for repaying advances received in 1958 and an appropriation for 1960 is proposed for repaying advances received in 1959.

	Program year		
	1958	*1959*	*1960*
Due at end of program year	$1,594,928	$1,607,000	$1,456,000
Less refunds	100,000	----------	----------
Add interest to recovery date	15,942	----------	----------
Appropriation: 1959 supplemental, 1960, and 1961	1,510,870	1,607,000	1,456,000

(8) *Soil bank program.*—Pursuant to section 120 of the Agricultural Act of 1956 (7 U. S. C. 1808) the Secretary of Agriculture utilizes the services and facilities of the Corporation for carrying out the soil-bank program. Through June 30, 1957, funds of the Corporation were advanced for this program. A supplemental appropriation of $567,500,000 was received in 1958 to reimburse the Corporation for such advances.

Beginning July 1, 1957, funds were advanced to the Corporation from the soil bank appropriation to finance the program.

(9) *National Wool Act.*—Under the provisions of the National Wool Act of 1954, as amended, incentive payments are being used to encourage the annual domestic production of approximately 300 million pounds of shorn wool. Support of prices of wool and mohair is mandatory. Incentive payments are made to eligible producers on a percentage basis, reflecting the amount required to bring the national average received by all producers up

Digitized for FRASER

Federal Reserve Bank of St. Louis

to the announced incentive level. The incentive level shall not exceed 110% of parity.

COSTS OF THE NATIONAL WOOL ACT

	Fiscal year 1958 1956 marketing year	*Fiscal year 1959 1957 marketing year*	*Fiscal year 1960 1958 marketing year*
Volume of marketings:			
Shorn wool---pounds	248,823,100	156,000,000	286,363,600
Unshorn lambs---cwt	11,089,400	12,424,200	11,363,600
Incentive payments:			
Per pound, shorn wool---cents	17.7	8.3	22.0
Per hundredweight, unshorn lambs---cents	71.0	33.0	88.0
Incentive payments:			
Shorn wool	$44,041,689	$13,000,000	$63,000,000
Unshorn lambs	7,873,459	4,100,000	10,000,000
Mohair			2,000,000
Total payments	51,915,148	17,100,000	75,000,000
Administrative expenses	2,327,852	2,885,000	2,885,000
Interest expense	2,939,448	1,111,000	3,053,000
Total	57,182,448	21,096,000	80,938,000

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool products. Actual and estimated payments compared with this limitation are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
70% of customs receipts on wool and wool products—cumulative from Jan. 1, 1953 (calendar years) (estimated)	$230,984,119	$278,614,000	$328,114,000
Cumulative incentive payments (fiscal years)	109,524,533	126,624,533	201,624,533
Balance of limitation available	121,459,586	151,989,467	126,489,467

Funds of the Commodity Credit Corporation are used to carry on the wool incentive program. A permanent appropriation is provided to reimburse the Corporation, but the yearly amount is limited to 70% of all duties collected on wool and wool products during the preceding calendar year. Estimated costs and reimbursements to Commodity Credit Corporation during 1958, 1959 and 1960 are indicated in the following table:

	1958 actual	*1959 estimate*	*1960 estimate*
Due at beginning of year	$61,292,352	$88,803,121	$85,446,022
Costs for year:			
Program	54,243,000	19,985,000	77,885,000
Interest	2,939,448	1,111,000	3,053,000
Total	57,182,448	21,096,000	80,938,000
Total due	118,474,800	109,899,121	166,384,022
Reimbursement to Commodity Credit Corporation	29,671,679	24,453,099	47,630,000
Due Commodity Credit Corporation at end of year	88,803,121	85,446,022	118,754,022
Less—			
Amount recovered from permanent appropriation (70% of customs receipts)	29,671,679	24,453,099	47,630,000
Balance due Commodity Credit Corporation recoverable from subsequent year's customs receipts	34,678,343	13,362,923	21,624,022
Appropriation: 1959, 1960, and 1961	24,453,099	47,630,000	49,500,000

(10) *Loans to Secretary of Agriculture for conservation program.*—Under section 391 (c) of the Agricultural Act of 1938, as amended (7 U. S. C. 1391), the Corporation advances funds to the Secretary in amounts not to exceed $50 million annually to purchase conservation materials and services. Repayments of the loans plus interest are made as soon as practicable in the succeeding fiscal year from appropriated funds.

(11) *Military housing (Public Law 161, 84th Cong. (5 U. S. C. 171z–1)).*—During 1957 a contract was completed for the disposition of Commodity Credit Corporation-owned commodities valued at $50 million for the construction of military housing in France with foreign currencies obtained from this transaction. Proceeds from rental and quarters allowances will be paid by the Defense Department over a long period of years to reimburse the Corporation pursuant to Public Law 161.

(12) *Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation.*—Public Law 85–96, approved July 10, 1957 (71 Stat. 290), authorizes the transfer of 50,000 bales of domestically grown extra long-staple cotton from the national stockpile to the Corporation for sale. Proceeds less costs incurred, including administrative expenses, are covered into the Treasury as miscellaneous receipts.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of soil bank program and transfer of long-staple cotton from national stockpile (see schedule).

FINANCING THE PROGRAMS

Financing.—The programs of the Commodity Credit Corporation are financed by capital stock, borrowings, guaranties to purchase notes or other obligations evidencing loans made by lending agencies, restoration of capital impairment, appropriations to reimburse the Corporation for costs of special activities, and receipts from operations.

Borrowing authority.—The Corporation has an authorized capital stock of $100,000,000 held by the United States, and authority to borrow up to $14,500,000,000.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies. All bonds, notes, debentures and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U. S. C. 713a–4). Interest on borrowings from the Treasury (and on capital stock) is paid in accordance with a policy of the Treasury that the rate shall be based upon the average interest rate on all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. In connection with loan guaranties, the Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made by lending agencies. A supplemental appropriation in 1959 to reimburse the Corporation for funds used for 1958 costs of special programs and certain advances to other agencies is proposed for later transmission.

On the basis of the budgetary assumptions heretofore described, the consequent estimated program requirements currently indicate a need for additional borrowing authority late in 1960. However, there are so many uncontrollable factors affecting the programs of the Corporation involving crops which have not even been planted, that estimates of the use of borrowing authority are highly tentative.

POSITION WITH RESPECT TO BORROWING AUTHORITY AS OF JUNE 30

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Statutory borrowing authority	$14,500	$14,500	$14,500
Deduct—			
Borrowings from Treasury:			
Enacted or recommended in this document	11,528	13,119	14,581
Proposed for later transmission under existing legislation	-------	-------	−575
Net borrowings from Treasury	11,528	13,119	14,006
Obligations to purchase loans held by lending agencies (guaranteed by Commodity Credit Corporation)	428	363	193
Total statutory borrowing authority outstanding	11,956	13,482	14,199
Net statutory borrowing authority available	2,544	1,018	301

NOTE.—This table does not reflect the following charges: Accounts payable, accrued liabilities, and obligations outstanding other than obligations to purchase loans held by banks. These do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or loans held by banks.

COMMODITY CREDIT CORPORATION—Continued

Public enterprise funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

Restoration of capital impairment.—Pursuant to the act of March 8, 1938, as amended (15 U. S. C. 713a–1), an appraisal of the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury to determine the net worth. If the net worth is less than $100 million, the Secretary of the Treasury restores the amount of capital impairment; if net worth is more than $100 million the Corporation pays the surplus to the Treasury (15 U. S. C. 713a–2). The appraisal of assets is on the basis of cost to the Corporation. The capital impairment, therefore, represents realized losses. The realized losses reflected on the books of the Corporation for 1958 were $1,535,424,413 provision for restoration of which is included in the 1960 estimates. A supplemental appropriation is anticipated in 1960 to partially restore the Corporation's estimated capital impairment as of June 30, 1959, and is shown under Proposed for later transmission.

Receipts from operations.—These include proceeds from sales of commodities, loan repayments, interest income, advances, reimbursements for special activities financed by the Corporation other than from special appropriations, and miscellaneous income, refunds, and collections.

[1] Balances do not include amounts of obligations other than liabilities as follows:

	Balance as of June 30			
	1957 actual	1958 actual	1959 estimate	1960 estimate
International Wheat Agreement: Approved declarations of sales for export	$5,231,282	$1,873,575		
Sales of surplus agricultural commodities for foreign currencies: Letters of commitment	195,060,792	189,998,243	$191,400,000	$182,700,000
National Wool Act: Wool payment agreements	52,000,000	17,000,000	75,000,000	53,000,000
Total	252,292,074	208,871,818	266,400,000	235,700,000

[2] Amounts shown for fiscal year 1959 are proposed supplemental appropriations except National Wool Act which is a permanent appropriation.

[3] The extension and increase of the Agricultural Trade Development and Assistance Act of 1954, proposed for later transmission, is estimated to require other program costs of $50,000,000 which will result in a like increase in the balance recoverable as of June 30, 1960, from special appropriations to reimburse Commodity Credit Corporation.

NOTE.—Amount bracketed is not included in vertical totals.

LIMITATION ON ADMINISTRATIVE EXPENSES

Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed [$35,398,000] *$45,300,000* shall be available for administrative expenses of the Corporation: *Provided further*, That $1,000,000 of this authorization shall be available only to expand and strengthen the sales program of the Corporation pursuant to authority contained in the Corporation's charter: *Provided further*, That not less than 7 per centum of this authorization shall be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such time as may become necessary to carry out program operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof. Proposed for later transmission:

Under existing legislation, 1960.—On the basis of the budgetary assumptions heretofore described, the consequent estimated program requirements currently indicate a need for additional borrowing authority late in 1960. In the event the program and financing develops as estimated, a supplemental appropriation is anticipated in the amount of $575 million, to partially restore the Corporation's capital impairment as of June 30, 1959. This amount is reflected in the Commodity Credit Corporation fund schedules.

Under proposed legislation, 1960.—As indicated in the budget message, legislation will be proposed to extend the terminal date of title I of Public Law 480 to December 31, 1960, and increase the authorization from $6.25 billion to $7.75 billion. It is estimated that this increase of $1.5 billion in the authorization will result in increased expenditures for the Commodity Credit Corporation of $50 million in 1960. It is further proposed to extend to December 31, 1960, title II of Public Law 480, which authorizes famine relief and other assistance to friendly peoples.

CORPORATIONS

The following corporations and agencies are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1959] *1960* for such corporation or agency, except as hereinafter provided: (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

FEDERAL CROP INSURANCE CORPORATION

Purpose and financial organization.—The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U. S. C. 1501–1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance and providing the means for the research and experience helpful in devising and establishing such insurance. The Corporation provides all-risk insurance protection for the farmers' cost of producing crops against loss from unavoidable causes. Insurance programs since 1948 have been conducted on a limited basis in selected counties and on selected crops to obtain adequate actuarial data for the expansion of the program to a national basis.

Capital stock of $100 million is authorized to be subscribed by the United States. As of June 30, 1958, the Secretary of the Treasury held receipts for $40 million of the authorized stock, leaving $60 million unissued.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which are for deposit to this fund come mainly from premiums for insurance protection afforded farmers on their investment in the production of insured crops. The principal payments from this fund are for indemnities to farmers that suffer crop losses arising from causes against which crop insurance provides protection, the direct cost of adjusting losses, and part of the administrative and operating expenses. The annual appropriation for the major portion of the administrative and operating expenses of the Corporation is presented earlier in the budget.

Budget program.—The Corporation plans to continue the expansion of the program toward the final objective of a national program for all crops. For the 1959 crop year (fiscal year 1960), 192 new county programs have been allocated, principally in the midwestern area. Of the new county programs, 39 are being offered in new counties and 153 in counties where insurance was available the previous year. By commodities, the new programs for the 1959 crop year are as follows:

Soybeans	58	Cotton	17
Barley	38	Tobacco	7
Corn	35	Flax	4
Wheat	30	Grain sorghum	3

The following table indicates the scope of the insurance program for 1958, 1959, and 1960. Amounts in the 1958 column are actual and pertain to the 1957 crop year. The 1959 column pertains to the 1958 crop year, and reflects the favorable growing conditions which prevailed in 1958. The 1960 column, covering the 1959 crop year, is estimated on a basis similar to that used in establishing premium rates.

	1958 fiscal year (1957 crop year) actual	*1959 fiscal year (1958 crop year) estimate*	*1960 fiscal year (1959 crop year) estimate*
Number of commodities insured	21	21	22
Number of counties	818	830	830
Estimated insurance outstanding ($1,000), beginning of fiscal year	$242,100	$244,000	$310,000
Number of crops insured	[1] 307,604	324,435	380,000
Premiums ($1,000)	$17,414	$17,677	$24,600
Indemnities ($1,000)	$12,002	$4,243	$21,005
Loss ratio	.69	.24	.85

[1] Contracts in force.

Financing.—It is anticipated that the current net operating deficit will gradually be offset by annual surpluses from operations. Due to net income realized in 1958 and anticipated for 1959, no additional funds are requested for 1960. However, an increase from $2,000,000 to $2,330,000 in the amount of administrative and operating expenses which may be paid from capital funds is proposed for 1959 and 1960 for pay act costs of the Corporation.

Operating results and financial condition.—Preliminary estimates for the 1958 crop year (1959 fiscal year) show premiums of $17.7 million exceeding indemnities of $4.2 million by $13.4 million. This estimate is based on the assumption that normal growing conditions will prevail in insured areas during the remainder of the growing season. The following table summarizes the insurance operations for 1958, 1959, and 1960:

NET INCOME OR LOSS (−) ON INSURANCE OPERATIONS, BY COMMODITIES

[Fiscal years ending June 30, 1958, 1959, and 1960]

RURAL ELECTRIFICATION ADMINISTRATION

Current authorizations:

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U. S. C. 901–924), as follows:

LOAN AUTHORIZATIONS

For loans in accordance with said Act, and for carrying out the provisions of section 7 thereof, to be borrowed from the Secretary of the Treasury in accordance with the provisions of section 3 (a) of said Act as follows: Rural electrification program, [$317,000,000] *$136,000,000*; and rural telephone program, [$67,500,000] *$79,000,000*; and additional amounts, not to exceed $25,000,000 for each program, may be borrowed under the same terms and conditions to the extent that such amount is required during the fiscal year [1959] *1960* under the then existing conditions for the expeditious and orderly development of the rural electrification program and rural telephone program. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Rural electrification	$241,636,869	$275,000,000	$245,000,000
2. Rural telephone	89,238,000	98,000,000	80,000,000

Authorization to expend from public debt receipts (new obligational authority)	239,000,000	409,500,000	215,000,000

The Administration conducts two major programs: (*a*) the rural electrification program to provide electric service to farms and other rural establishments and (*b*) the rural telephone program to furnish and improve tele-

Digitized for FRASER

Federal Reserve Bank of St. Louis

phone service in rural areas. Funds for making loans are borrowed from the Secretary of the Treasury.

1. *Rural electrification.*—This program is financed through loans which bear 2% interest and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2% interest to electrification borrowers to be reloaned to their consumers for wiring and for the installation of electrical and plumbing appliances and equipment.

When the rural electrification program was initiated in 1935, less than 11% of all farms had electric service. On June 30, 1958, about 95.4% of the farms were electrified. The major need for loan funds continues to be for system improvements and the generation of power to satisfy the steadily increasing requirements of consumers.

STATUS OF THE ELECTRIFICATION PROGRAM

Program Financing

	1958 actual	*1959 estimate*	*1960 estimate*
Loan funds available:			
New loan authorization (including reserves)	$179,000,000	$342,000,000	$161,000,000
Carryover from prior year	139,972,861	63,350,637	107,350,637
Rescissions of prior loans	6,014,645	2,000,000	2,000,000

Reserves not used	20,000,000	25,000,000	25,000,000
Balance to next year	63,350,637	107,350,637	350,637

Program Statistics

Cumulative net loans	$3,772,577,652	$4,045,577,652	$4,288,577,652
Cumulative funds advanced	$3,146,545,731	$3,366,545,731	$3,591,545,731
Unadvanced funds, end of year	$626,031,921	$679,031,921	$697,031,921
Cumulative principal repaid	$674,621,932	$770,266,932	$869,206,932
Cumulative interest paid	$327,959,177	$372,794,177	$425,674,177
Cumulative miles energized	1,414,034	1,434,000	1,454,000
Cumulative consumers served	4,521,997	4,632,000	4,742,000
Number of borrowers	1,080	1,082	1,082

2. *Rural telephone.*—Loans are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

In 1950, when the telephone program started, the Census of Agriculture showed 38.2% of all farms with telephone service, fewer in both number and percentage than in 1920. Approximately 60% of the farms now have telephone service. Cumulative Rural Electrification Administration loans through June 30, 1958, will eventually provide initial or improved service to an estimated 1,020,454 rural subscribers.

The Administration makes loans for the extension and improvement of electric and telephone services in rural areas. Business management and technical help is furnished borrowers where needed to protect the Government's loan security and to assure that construction and operation of their systems conform to approved standards and are adequate to provide continuous and reliable service.

FARMERS' HOME ADMINISTRATION

Current authorizations:

To carry into effect the provisions of titles I, II, and the related provisions of title IV of the Bankhead-Jones Farm Tenant Act, as amended (7 U. S. C. 1000–1031); the Farmers' Home Administration Act of 1946 (7 U. S. C. 1001, note; 31 U. S. C. 82h; 12 U. S. C. 371; 35 D. C. Code 535; 60 Stat. 1062–1080); the Act of July 30, 1946 (40 U. S. C. 436–439); the Act of August 28, 1937, as amended (16 U. S. C. 590r–590x—3), for the development of facilities for water storage and utilization in the arid and semiarid areas of the United States; the provisions of title V of the Housing Act of 1949, as amended (42 U. S. C. 1471–1483), relating to financial assistance for farm housing; the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (40 U. S. C. 440–444); the items "Loans to farmers, 1948 flood damage" in the Act of June 25, 1948 (62 Stat. 1038), and "Loans to farmers, property damage" in the Act of May 24, 1949 (63 Stat. 82); the collecting and servicing of credit sales and development accounts in water conservation and utilization projects (53 Stat. 685, 719), as amended and supplemented (16 U. S. C. 590y, z—1 and z—10); and the Act to direct the Secretary of Agriculture to convey certain mineral interests, approved September 6, 1950 (7 U. S. C. 1033–1039), as follows:

LOAN AUTHORIZATIONS

For loans (including payments in lieu of taxes and taxes under section 50 of the Bankhead-Jones Farm Tenant Act, as amended, and advances incident to the acquisition and preservation of security of obligations under the foregoing several authorities, except that such advances under title V of the Housing Act of 1949, as amended, shall be made from funds obtained under section 511 of that Act, as amended): Title I and section 43 of title IV of the Bankhead-Jones Farm Tenant Act, as amended, [$24,000,000] *$12,000,000*, of which not to exceed $2,500,000 may be distributed to States and Territories without regard to farm population and prevalence of tenancy, in addition to the amount otherwise distributed thereto, for loans in reclamation projects and to entrymen on unpatented public land; title II of the Bankhead-Jones Farm Tenant Act, as amended, [$180,000,000] *$160,000,000*; the Act of August 28, 1937, as amended, [$5,500,000] *$1,000,000*: *Provided*, That not to exceed the foregoing several amounts shall be borrowed in one account from the Secretary of the Treasury in accordance with the provisions set forth under this head in the Department of Agriculture Appropriation Act, 1952[: *Provided further*, That an additional amount, not to exceed $20,000,000, may be borrowed under the same terms and conditions to the extent that such amount is required during fiscal year 1959 under the then existing conditions for the expeditious and orderly conduct of the loan programs under the Bankhead-Jones Farm Tenant Act, as amended, not to exceed $5,000,000 of which shall be available for loans under title I and section 43 of title IV of such Act, as amended]. (*72 Stat. 840–843; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Farm ownership loans	$23,998,086	$24,000,000	$12,000,000
2. Farm operating loans	175,789,583	180,000,000	160,000,000
3. Soil and water conservation loans	4,563,096	5,500,000	1,000,000
4. Farm housing loans	33,065,871	60,000,000	12,000,000
Total obligations	237,416,636	269,500,000	185,000,000
Financing:			
Unobligated balance brought forward (authorization to expend from public debt receipts)	−430,139,387	−397,459,316	−337,459,316
Recovery of prior year obligations	−385,800		
Unobligated balance carried forward (authorization to expend from public debt receipts)	397,459,316	337,459,316	325,459,316
Unobligated balance no longer available	5,149,235		
Authorization to expend from public debt receipts (new obligational authority)	209,500,000	209,500,000	173,000,000

The Administration makes and insures loans to farmers unable to secure credit from other sources at reasonable rates.

The total borrowing authorization requested for loans amounts to $173,000,000 a reduction of $36,500,000 below the regular authorization for 1959. The amount of $20,000,000 available in 1959 as a contingency authorization for farm ownership and farm operating loans, will not be required in 1960. It is proposed to borrow $12,000,000 in 1960 under existing authority for farm housing loans.

In addition to the direct loans, farm ownership and soil and water conservation loans advanced by private lenders will be insured within the annual statutory insurance authority of $125 million for farm ownership and $25 million for soil and water conservation loans. Contingent liabilities for these insured loans are reflected in the farm tenant mortgage insurance fund schedules.

1. *Farm ownership loans.*—Direct farm ownership loans are made to tenants, sharecroppers, farm laborers, owners of inadequate farms, and eligible veterans for the purchase or improvement of family-type or less-than-family-type farms. Loans may be made to farm owners for the refinancing of secured or unsecured indebtedness. These loans may be made up to the fair value of the farm (normal market value on less than family-type farms to owner-operators with off-farm income) at not to exceed 5% interest up to 40 years. Farm ownership and farm housing loans made with funds advanced by private lenders are insured by the Government up to 90% of the value of the farm for 40 years at not more than 4% interest, plus 0.5% as an insurance premium, and 0.5% as an administrative expense charge. The Administration services these insured loans, makes collections, and pays the lender.

FARM OWNERSHIP LOANS

	1958 actual		*1959 estimate*		*1960 estimate*	
	Number	*Amount*	*Number*	*Amount*	*Number*	*Amount*
Number of applications	23,071		23,675		18,700	
Direct loans	1,865	$23,998,086	1,860	$24,000,000	1,051	$12,000,000
Insured loans	2,025	26,270,172	3,210	42,000,000	3,125	42,000,000

2. *Farm operating loans.*—Direct loans are made for periods up to 7 years at 5% interest in amounts up to $10,000, with a limitation of $20,000 on the total principal indebtedness, to provide reasonable farm and home credit for the purchase of livestock, feed, seed, farm equipment and other farm necessities, including the refinancing of indebtedness to operators of not larger than family-type farms. In justifiable cases, loans may be made beyond 7 years but not beyond 10 years.

FARM OPERATING LOANS

Amount	$175,789,583	$180,000,000	$160,000,000

3. *Soil and water conservation loans.*—Direct and insured loans are made to farmers and associations for the effective development and utilization of water supplies and for the improvement of farm land by soil and water conserving facilities and practices. Interest rates on these loans are set administratively at the same rates as farm ownership loans. In addition, at least 0.5% as an insurance premium and 0.5% as an administrative expense charge is collected on each loan. Loans are made for periods up to 20 years for individuals and 40 years for associations.

SOIL AND WATER CONSERVATION LOANS

Financing applied to program	68,633,376	63,258,204	53,727,000

Purpose and financial organization.—This fund finances loans to farmers and stockmen in the event of disasters and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

other emergencies, in areas where agricultural credit is not readily available. The fund is also available within statutory limits for emergency assistance in furnishing feed and seed in areas suffering major disasters. The fund was created by the transfer of the assets of the Regional Agricultural Credit Corporation of Washington which was abolished.

Budget program—1. *Loan commitments*—(*a*) *Production emergency loans.*—Loans are made to farmers and stockmen suffering production disasters at 3% interest.

(*b*) *Economic emergency loans.*—Loans are made at 3% interest in any economic disaster area declared by the President.

(*c*) *Special livestock loans.*—For 4 years after July 14, 1953, loans were authorized to be made at 5% interest to established livestock producers who had a reasonable chance of working out their difficulties with supplementary financing. Supplemental loans may be made for an additional 4 years after July 14, 1957, to individuals already indebted.

(*d*) *Special emergency loans.*—The authority to make special emergency loans up to a total of $65 million will expire on June 30, 1959.

(*e*) *Other loans.*—Until June 30, 1958, loans at 5% interest were made to bona fide fur farmers where necessary to protect the Government's interest in existing loans which had been made by the Regional Agricultural Credit Corporation or other authorities.

3. *Emergency hay and roughage assistance.*—Assistance in purchasing hay and roughage was given to established farmers, ranchers, and stockmen in areas which were determined by the President to warrant assistance because of a major disaster. Programs were conducted in 1956 and 1957, but a similar program was not conducted in 1958 and none is anticipated in 1959 or 1960.

4. *Administrative expenses.*—The principal administrative expenses in each of the 3 years are related to the loan programs of the Farmers' Home Administration. These expenses are estimated at $4,024,200 in both 1959 and 1960. Administrative expenses of the Commodity Stabilization Service are estimated at $390,000 in 1959 and $275,000 in 1960, all in connection with final audit of the emergency feed program conducted in previous years.

Financing the budget program.—No new budgetary authorization is required for 1960. Although a net loss of $4 million is estimated on an accrual basis, net receipts of $8.0 million are anticipated on a cash basis due to repayment of loans exceeding acquisitions.

During 1960, the program is wholly financed by receipts from operations.

Operating results and financial condition.—Revenue for 1960, consisting principally of interest on loans, is estimated at $3.3 million, compared to expenses of $7.3 million, resulting in an estimated loss of $4 million. Net loss of $3.6 million is estimated for 1959, and a net loss of $2.9 million resulted in 1958 due primarily to losses on the loan programs.

Loans receivable, after allowance for losses, are expected to amount to $68.2 million on June 30, 1960, as compared with $80.6 million at June 30, 1959, and $85.2 million on June 30, 1958.

The Government investment at June 30, 1960, is expected to be $117.1 million, consisting of $205.9 million appropriated and donated, less a deficit of $88.8 million.

Purpose and financial organization.—This fund, authorized in the Bankhead-Jones Farm Tenant Act (7 U. S. C. 1005 (a)), relates to insured farm ownership loans and soil and water conservation loans. The insurance endorsement on each loan includes an agreement by the Government to purchase the loan after a specified period at the holder's option. The initial fund of $1 million is supplemented by charges collected from insured farm ownership and soil and water conservation loan borrowers, inspection and appraisal fees, and other charges. Receipts are available for administrative expenses and to cover losses. Public Law 85–748, approved August 25, 1958 (72 Stat. 840), authorized for the first time the making of loans from the fund to be sold individually or in blocks and insured. Not in excess of $5 million may be borrowed from the Secretary of the Treasury for this purpose. Public Law 85–748 also changed the method of determining the interest paid the Secretary of the Treasury on borrowings to relate the charges to the current average market yields of outstanding marketable obligations of the United States.

Budget program.—Advances and purchases of loans are estimated at $13 million in 1960, a decrease of $1.7 million below 1959 and $4.4 million below 1958. Included is $4 million in 1959 and $7 million in 1960 for making loans under the new statutory authority which will later be sold on an insured basis.

Financing.—In order to finance the purchase of loans becoming eligible for redemption under the repurchase agreements, and to make loans later to be sold on an insured basis, it is estimated that it will be necessary to utilize the statutory authorization (7 U. S. C. 1005c) to borrow from the Treasury in the net amount of $3,400,000 in 1959. Net repayments to the Treasury of $750,000 are anticipated in 1960.

Operating results and retained earnings.—Total income, consisting principally of insurance premiums, is estimated at $2.7 million in 1960, an increase of about $0.2 million from 1959.

The necessity to purchase loans is expected to result in outstanding loans receivable of $11.2 million at June 30,

Federal Reserve Bank of St. Louis

1960. Retained earnings, which are for absorption of any future losses, are estimated to be $9.1 million at the end of 1960. These earnings, when added to the $1 million appropriation and estimated borrowings of $5.1 million from the Treasury, represents a $15.2 million Government investment.

New obligational authority:			
Appropriation	$2,943,000	$2,968,000	$3,310,500
Transferred from "Conservation reserve," soil bank programs (72 Stat. 243)	85,000		
Appropriation (adjusted)	3,028,000	2,968,000	3,310,500
Proposed supplemental due to pay increases		267,500	

[1] Includes capital outlay as follows: 1958, $17,784; 1959, $13,000; 1960, $13,375.

The Office serves as legal counsel for the Secretary of Agriculture and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department's activities.

Increases in 1960 are to meet anticipated expansion in workload connected with mandatory inspection of poultry and poultry products, and increased activities resulting from amendment of the Packers and Stockyards Act by Public Law 85–909 (72 Stat. 1749).

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$30,861	$29,074	$29,074	$29,074
Selected resources at start of year (−)		−30,861	−29,074	−29,074
Adjustment of selected resources reported at start of year		5,358		
Obligations incurred for costs of other years, net		3,571

[1] Includes capital outlay as follows: 1958, $24,766; 1959, $7,050; 1960, $7,050.

The Office provides overall planning, coordination, and administration of the Department's programs, and supplies certain services on a departmentwide basis.

2. *Personnel administration and service.*—Departmental policies and procedures are promulgated for the personnel management program. The operational phases of this program have been substantially delegated to the agencies. A systematic review is conducted to insure unification thereof and to measure its effectiveness in serving the agencies' personnel management requirements.

3. *Budgetary and financial administration and service.*—This covers the fields of departmental budgetary and financial management, internal audit and related activities; policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial, and related implications.

4. *General operations.*—These embrace departmental policies and procedures for real and personal property, and supply management. Administrative services are provided for the Office of the Secretary, and departmental service operations are furnished, including the Department's post office, telephone switchboard, telegraph office, and reproduction and supply services.

5. *Administrative management.*—This covers the areas of organization, paperwork activities (forms, reports, correspondence, and records maintenance and disposition), administrative issuances, and management improvement. Departmental policies and procedures are promulgated, improvement studies are undertaken, and agency administrative management programs are evaluated to insure economical and effective administration.

6. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. Agriculture Decisions is published monthly.

7. *National Agricultural Advisory Commission.*—Provision is made for the payment of necessary expenses incident to periodic meetings of the National Agricultural Advisory Commission.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Allocations Received From Other Accounts

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriation "Mutual security," funds appropriated to the President.

Intragovernmental funds:

Working Capital Fund, Department of Agriculture

This fund finances on a reimbursable basis certain central services in the Department of Agriculture, including duplicating, photographic, art and graphics, motion picture, tabulating, supply, and library photocopying services. The capital consists of $400,000 appropriated (5 U. S. C. 542–1) and $519,848 donated assets, as of June 30, 1958. Earnings are retained to furnish adequate working capital.

In 1957, the motor pool activity was transferred to the General Services Administration. The activity had a residue of retained earnings of $2,821 which was capitalized during 1958.

OFFICE OF INFORMATION

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Office of Information for the dissemination of agricultural information and the coordination of informational work and programs authorized by Congress in the Department, [$1,359,265] *$1,431,665*, of which total appropriation not to exceed $537,000 may be used for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by the Senators, Representatives, and Delegates in Congress, as they shall direct (7 U. S. C. 417) and not less than two hundred [thirty thousand eight] *and thirty-one thousand nine* hundred and fifty copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture) as authorized by section 73 of the Act of January 12, 1895 (44 U. S. C. 241): *Provided*, That in the preparation of motion pictures or exhibits by the Department, not exceeding a total of $10,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a). *(5 U. S. C. 511–512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.)*

Appropriated 1959, **$1,359,265** Estimate 1960, [a] **$1,431,665**

[a] Excludes $4,600 for activities transferred in the estimates to "Salaries and expenses," Office of the Secretary. The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Publications review and distribution	$681,060	$674,045	$685,345
2. Review and distribution of current agricultural information	505,059	513,725	520,185
3. Review, preparation, and distribution of visual agricultural information	228,024	225,895	226,135
Total program costs [1]	1,414,143	1,413,665	1,431,665
4. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−26,416		
Total program (obligations)	1,387,727	1,413,665	1,431,665
Financing:			
Comparative transfers to other accounts	13,000	4,600	
Unobligated balance no longer available	1,073		
New obligational authority	1,401,800	1,418,265	1,431,665
New obligational authority:			
Appropriation	$1,367,500	$1,359,265	$1,431,665
Transferred from "Conservation reserve," soil bank programs (72 Stat. 243)	34,300		
Appropriation (adjusted)	1,401,800	1,359,265	1,431,665
Proposed supplemental due to pay increases		59,000	

[1] Includes capital outlay as follows: 1958, $7,653.

The Office has responsibility for the information work of the entire Department. Its major objective is to report to farmers, specially affected groups, and to the public the Department's research, action, regulatory, and other programs, using any or all information media. This work is carried on in close cooperation with the land-grant colleges and with private industries which serve agriculture. Workload depends upon Department program demands, direct requests, and legislative requirements.

A supplemental appropriation is proposed for later transmission to meet the costs of increased postal rates authorized in Public Law 85–426, approved May 27, 1958.

1. *Publications review and distribution.*—The Department publications, both printed and processed, are reviewed for policy clearance and control. Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's activities require the issuance of about 3,600 periodic crop, price, and market reports and press releases annually. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Part 2 of the Secretary's annual report, known as the Yearbook of Agriculture, is published by the Office and distributed by Members of Congress. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks. Television package programs are prepared for use of land-grant colleges and television farm broadcasters. Essential information on Department policies and programs is provided to Washington and field employees by the biweekly issuance of USDA, an employee news bulletin.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and private industries which serve agriculture are produced on a reimbursable basis and distributed through nearly 75 cooperating State film libraries. Still photographs, illustrations, and graphics are similarly produced. News and general-type photographs of Department programs and activities are available from a centralized library. Exhibits are produced and supplied to State extension workers for their use in State exhibit showings.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Inventories and items on order:				
Publications consigned to Government Printing Office	$166,640	$157,000	$185,000	$185,000
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	304,645	275,652	247,652	247,652
Total selected resources at end of year	471,285	432,652	432,652	432,652
Selected resources at start of year (−)		−471,285	−432,652	−432,652
Adjustment of selected resources reported at start of year		12,217		
Costs financed from obligations of other years, net (−)		−26,416

[1] Includes capital outlay as follows: 1958, $1,343; 1959, $1,300; 1960, $1,300.

1. The Library, a basic unit serving the research, extension and regulatory work of the Department and the State agricultural agencies, makes available books, periodicals, and other publications containing information on agricultural and allied fields. It contains approximately 1,150,000 volumes, probably one of the most extensive agricultural collections existing in any country. Its services are used by agricultural colleges and universities, other research and educational institutions throughout the world, Government departments, agricultural associations, industry, individual farmers, and the general public. It serves as the national agricultural library, one of the three national libraries.

During 1958, a total of 19,767 volumes and 252,547 separate issues of periodicals were added to the collection by purchase, gift and exchange. During 1958, a total of 1,119,696 loans of books and periodicals were made and 138,650 reference questions were answered. The Bib-

FOREST SERVICE

The Service carries on three primary functions: (1) Protection, development, and use of about 181 million acres of land in national forests in the United States and Puerto Rico; and management of land utilization projects covering about 4.7 million acres; (2) cooperation with States and private forest landowners to obtain better fire protection on approximately 435 million acres of forest lands and better forest practices on about 345 million acres of privately owned commercial timberlands, to encourage reforestation and stimulate development and management of State, county, and community forests; and (3) research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water, and other products; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey. These primary functions include construction and maintenance of roads and trails, control of forest pests, protection against floods, land exchange, and a number of cooperative projects.

Current authorizations:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; [$75,107,000] *$77,815,800,* of which $5,000,000 for fighting and preventing forest fires and [$1,760,000] *$1,910,000* for insect and disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided,* That not more than $100,000 may be used for acquisition of land under the Act of March 1, 1911, as amended (16 U. S. C. 513–519): *Provided further,* That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U. S. C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; [$15,678,000] *$14,026,400.*

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; [$12,720,000] *$12,307,800.*

1. *Forest land management*—(a) *National forest protection and management.*—The 149 national forests are protected from fire and their resources are managed in such ways as to bring about full utilization and maximum sustained production. This item also provides for management of land utilization projects, including revegetation and other development work. Funds appropriated under Cooperative range improvements are merged with this appropriation for obligational purposes.

MAIN WORKLOAD FACTORS

Description	*1958 actual*	*1959 estimate*	*1960 estimate*

Tree planting and seeding (annual) (acres)	29,455	40,000	40,000
Range reseeding and removal of competing vegetation (annual) (acres)	120,902	140,000	140,000
Receipts:			
Timber sales	$86,274,611	$112,000,000	$122,000,000
Grazing	3,013,930	3,000,000	3,000,000
Land use and power	2,257,279	2,400,000	2,400,000
Land utilization projects	2,290,775	1,600,000	1,600,000
Total receipts	93,836,595	119,000,000	129,000,000

(b) *Fighting forest fires.*—This provides for employment of additional manpower and other facilities for forest fire emergencies which cannot be met by the fire control organization provided under national forest protection and management. A supplemental for this purpose is proposed for 1959.

(c) *Insect and disease control.*—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and appraise infestations of forest insects and infections of tree diseases and determination of protective measures to be taken, and (2) control operations to suppress or eradicate forest insects and diseases, including the white pine blister rust.

(d) *Acquisition of lands.*—Lands are acquired to protect the watersheds of navigable streams and to increase the production of timber with the approval of the National Forest Reservation Commission. The present acquisition program is only for purchase of small tracts within the 55 approved purchase areas.

2. *Forest research.*—Research is conducted at nine regional forest experiment stations, the Forest Products Laboratory, and elsewhere.

(a) *Forest and range management.*—This research provides private and public land managers and owners with a sound basis for protection and management of timber, range, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage on rangelands for maximum production of livestock without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce flood and sedimentation.

(b) *Forest protection.*—Research is conducted to develop sound measures for the protection of forests from damage by fire, insects, and diseases. These investigations provide the technical basis for control and preventive measures, including predictions of fire danger.

(c) *Forest products utilization.*—Studies are conducted to develop new and improved forest products, reduction and utilization of waste, and use of low-quality wood and unpopular species. They include studies to reduce costs of logging and wood utilization, and to develop basic knowledge of wood and disseminate this to forest owners, manufacturers, fabricators, and consumers.

(d) *Forest resources.*—These investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, potential need for timber products, and information on production and marketing of forest products.

MAIN WORKLOAD FACTORS

[Acres in millions]

	1958 actual	1959 estimate	1960 estimate
Initial surveys (annual)	14	25	30
Initial surveys (cumulative)	528	553	583
To be surveyed (total) [1]	254	229	199
Resurveys (annual)	36	30	30
Resurveys (cumulative)	318	348	378

[1] Includes all of Alaska and Hawaii.

3. *State and private forestry cooperation.*—This program, carried on in cooperation with the States, encourages private timber management. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce about 85% of all timber cut. The fire control program applies to all State and private forest lands within the boundaries of organized protection units. The remainder of the program is concentrated on small forest properties in private ownership because they are in greater need of management.

(*a*) *Forest fire control.*—Assistance is furnished 45 States and Hawaii in preventing and suppressing forest fires on private and State owned lands by financial aid, training, procurement of equipment, and a nationwide fire prevention campaign. About 91% of the 435 million acres of non-Federal ownership are now partially covered. During 1957 the acreage burned on protected areas was 0.28% as against an estimated 5.46% on unprotected lands. Of the total expenditures under this program, 75% is contributed by States and counties, 4% by private owners, and 21% by the Federal Government.

(*b*) *Forest tree planting.*—To encourage woodland owners to reforest unproductive portions of their holdings, and farmers to plant wind barriers around their fields and farmsteads—a total of more than 53 million acres altogether—the States provide planting stock at less than cost. The Federal Government shares the cost of producing the stock with the State and private landowners.

(*c*) *Forest management and processing.*—In cooperation with State foresters, 314 projects in 1,481 counties are operated to aid small woodland owners in applying good management to their timber holdings. In 1957 these projects covered some 44,500 owners and over three million acres.

(*d*) *General forestry assistance.*—Technical forest management assistance is provided to State, community, private, and other Federal agencies, forest industries, colleges, and landowners.

FOREST SERVICE—Continued

Current authorizations—Continued

FOREST ROADS AND TRAILS—Continued

Roads and trails are essential to protection and management of national forests and utilization of their resources. The system consists of approximately 149,750 miles of earth or gravel surfaced roads and 115,375 miles of supplemental trails.

The 1960 program will permit the construction of about 280 miles of general purpose roads and about 440 miles of timber access roads to harvest national forest timber, a total of 720 miles. This compares with 839 miles constructed in 1958 and 900 being constructed in 1959.

Beginning in 1958, this program is being financed on the basis of contract authorizations provided in the Federal-Aid Highway Acts of 1956 and 1958.

Ten percent of the amounts received annually from national forest activities is available under the permanent appropriation Roads and trails for States for construction and maintenance within the State from which such proceeds are derived (16 U. S. C. 501). Such amounts are merged with this appropriation for obligational purposes.

GENERAL PROVISIONS—FOREST SERVICE—Continued

exceed [one hundred and twenty] *seventy-five* passenger motor vehicles for replacement only, and hire of such vehicles; operation and maintenance of aircraft and the purchase of not to exceed [six of which four shall be] *three* for replacement only; (b) employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in an amount not to exceed $25,000; (c) [maintenance, improvement, and construction of aircraft landing fields in, or adjacent to, the national forests, in an amount not to exceed $250,000; (d)] uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131); [(e)] *(d)* purchase, erection, and alteration of buildings and other public improvements[: *Provided*, That any building, the cost of which as improved was $25,000 or more, shall not be improved within any fiscal year by an amount in excess of 5 per centum of such cost] (5 U. S. C. 565a) [except that an additional $400,000 may be used for improvements at the Forest Products Laboratory]; and [(f)] *(e)* expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U. S. C. 514).

SEC. 202. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 203. No part of any appropriation to the Forest Service in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.

SEC. 204. The Secretary may sell at market value any property located in Yalobusha, Chickasaw, and Pontotoc Counties, Mississippi, administered under title III of the Act of July 22, 1937, and suitable for return to private ownership under such terms and conditions as would not conflict with the purposes of said Act.

SEC. 205. Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U. S. C. 513–519, 521), where such land is not within the boundaries of a national forest nor shall these lands or lands authorized for purchase in Sanders County, Montana, be acquired without the approval of the local government concerned. (*Department of the Interior and Related Agencies Appropriation Act, 1959.*)

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations or allotments from other accounts are included in the schedules of the parent appropriations as follows:
"Watershed protection," Soil Conservation Service.
"Flood prevention," Soil Conservation Service.
"Agricultural conservation program," Agricultural Conservation Program Service.
"Conservation reserve," soil bank programs.
"Great Plains conservation program," Soil Conservation Service.
"Construction, general," rivers and harbors and flood control, Army.
"Mutual security," funds appropriated to the President.
"Translation of publications and scientific cooperation," funds appropriated to the President.

Permanent authorizations:

EXPENSES, BRUSH DISPOSAL

1. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (18 U. S. C. 711).

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *Restoration of forest lands and improvements.*—Funds received from settlement of claims involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement or forfeiture (72 Stat. 217).

3. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid 0.75% of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and Saint Louis for distribution to these counties (16 U. S. C. 577g).

4. *Payments due counties, submarginal land program.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated for school and road purposes (7 U. S. C. 1012).

5. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national-forest receipts for school purposes (36 Stat. 562, 573).

6. *Payments to States and Territories.*—With minor exceptions, 25% of the money received from the national forests is paid to the States and Territories for public schools and roads of the county in which such forests are situated (16 U. S. C. 500).

7. *Construction of improvements, Salt Lake City, Utah.*—Funds from sale of Forest Service property to Salt Lake City will be used for construction of a fire warehouse and related facilities (72 Stat. 589).

Intragovernmental funds:

WORKING CAPITAL FUND, FOREST SERVICE

This fund finances on a reimbursable basis various services such as repairing and replacing equipment, stocking and issuing supplies, and operation of photographic and reproduction facilities in support of programs of the Forest Service (16 U. S. C. 579b). These service operations serve programs of fire protection, timber utilization, construction and maintenance of roads and other improvements, reforestation, grazing, watershed, forest and forest products research, and kindred conservation activities of the Forest Service, including cooperative assistance with other Federal agencies, States, counties, and individuals engaged in the same objectives. Government investment in the fund as of June 30, 1958, including donated assets at its inception and retained earnings for fiscal year 1958, is $15,379,340. By the end of 1960 the investment is anticipated to be $18,524,340, an increase of $3,145,000, which represents estimated earnings and donations during 1959 and 1960.

FOREST PROTECTION AND UTILIZATION

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Forest land management: (b) Fighting forest fires (total obligations)		$7,500,000	
Financing:			
Proposed supplemental appropriation		7,500,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 in the amount of $7,500,000 is anticipated for fighting forest fires.

GENERAL PROVISIONS

SEC. 401. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [466] *four hundred and twenty-five* passenger motor vehicles of which [462] *four hundred and twenty-three* shall be for replacement only, and for the hire of such vehicles.

SEC. 402. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 403. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

SEC. 404. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 405. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 406. Not less than $1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1946, [and] July 28, 1954, *and September 6, 1958* (7 U. S. C. 427, 1621–1629; *72 Stat. 1793*), shall be available for contracting *or grants* in accordance with said Acts.

SEC. 407. No part of any appropriation contained in this Act or of the funds available for expenditure by any corporation or agency included in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1959.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1960

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
AGRICULTURAL RESEARCH SERVICE								
Salaries and expenses:								
Research	52	$78,000	52	$14,300	$63,700	323	$24,500	Scientific and technical personnel: For necessary field travel in carrying out research programs on agricultural problems relating to production and utilization of agricultural products, including use of one automobile at National Arboretum in Washington, D. C.
Station wagon	12	23,400	11	2,750	20,650	23	500	Do.
Ambulance						1		Officials and employees at Plum Island, N. Y., Foot-and-Mouth Research Laboratory: For use of employees who may require ambulance service. No privates vehicle allowed on Island.
Bus	1	5,000			5,000	5		Officials and employees at Plum Island, N. Y., Foot-and-Mouth Research Laboratory: For use in transporting employees from ferry to laboratory and return. No private vehicles allowed on Island.
Plant and animal disease and pest control.	181	271,500	181	49,775	221,725	575	150,000	Inspection personnel and control supervisors: Transportation to farms, ranches, and other premises in field and urban locations in carrying out plant and animal disease and pest control, including inspection and quarantine work.
Station wagon						4		Do.
Meat inspection						16	17,000	Inspection personnel: Transportation to slaughter houses and meat packing plants in urban centers, including field station in District of Columbia, in carrying out provisions of laws relating to Federal inspection of meat and meat food products.
Working capital fund						5		Superintendent, engineers, and other officials: Transportation in supervising and inspecting maintenance and operation of agricultural research center and for transporting officials and visiting agricultural leaders to and from various sections of the center.
Total, Agricultural Research Service.	246	377,900	244	66,825	311,075	952	192,000	
SOIL CONSERVATION SERVICE								
Conservation operations	131	186,400	133	30,200	156,200	689	77,000	State and area conservationists, technical specialists, and survey supervisors: Transportation in connection with supervision and inspection of service activities in conservation districts.
Station wagon						3		Do.
Watershed protection	1	1,400	1	200	1,200	22	1,000	Project personnel: Transportation for investigation and planning of proposed small watershed projects; surveying and supervising installation of work of improvement in authorized projects, and for negotiating with local sponsors of projects; for investigating the agricultural phases of proposed river basin projects.
Station wagon	2	3,600			3,600	34	5,500	Do.
Flood prevention	8	11,200	8	1,600	9,600	50	1,000	Project personnel: Transportation in connection with surveying and supervising the installation of works of improvement in authorized flood prevention projects.
Station wagon						5	500	Do.
Water conservation and utilization projects.						3		Project personnel: Transportation in connection with the development, operation and management of the Eden Valley project.
Great Plains conservation program						9	1,000	Assistant State conservationists: Transportation in connection with supervision and inspection of Service activities in Great Plains conservation program in field offices of 10 Great Plains States.
Total, Soil Conservation Service.	142	202,600	142	32,000	170,600	815	86,000	
AGRICULTURAL MARKETING SERVICE								
Marketing research and service:								
Marketing research and agricultural estimates.	13	19,500	13	2,925	16,575	46	15,000	Research and technical specialists: For use in supervising, directing and carrying out research programs on agricultural problems. Field statisticians: Transportation to and from important agricultural areas in preparation of crop and livestock estimates.
Marketing services	17	25,500	17	3,825	21,675	76	52,000	Market news reporters: For use in gathering and disseminating news of market conditions for various farm crops and livestock. Inspectors and graders: For inspection, classing and grading of farm products, including work required under the Cotton, Tobacco, Naval Stores, and Grain Standards Acts. Marketing specialists, inspectors and graders: Transportation to and from warehouses, stockyards, markets, railroad yards, piers, and other places for licensing or registration, supervision of operations of licensees to assure compliance, collection of samples for testing, handling of violations with respect to administration of United States Warehouse, Federal Seed, Packers and Stockyards, and Naval Stores Acts.
Station wagon						6		Market news reporters and clerks: For transportation of personnel and material in conducting tobacco market news program. Cotton field representatives: For transportation of personnel and material in carrying out classing and market information programs.
Expenses and refunds, inspection and grading of farm products, Agriculture.	10	15,000	10	2,250	12,750	67	54,000	Inspectors and graders: For use in inspecting and grading farm and food products—paid from fees received from producers for which services are performed.
Perishable Agricultural Commodities Act fund, Agriculture.							3,000	Marketing specialists: Transportation to and from offices of produce dealers and truckers in investigating complaints and violations and checking establishments for compliance with license provisions under Perishable Agricultural Commodities and Produce Agency Act—paid from license fees collected.
Total, Agricultural Marketing Service.	40	60,000	40	9,000	51,000	195	124,000

DEPARTMENT OF COMMERCE

New obligational authority recommended for 1960 for the Department of Commerce totals $559 million, an increase of $85 million over 1959. The major increases are for the eighteenth decennial census and for a proposed program of aid to areas of persistent unemployment. Expenditures are estimated to rise from $418 million to $476 million.

The totals for the Department now exclude for the 3 years shown the activities of the Civil Aeronautics Administration, which became part of the new Federal Aviation Agency on January 1, 1959, and of the Civil Aeronautics Board, which appear in the chapter on independent offices. Moreover, since highway activities are financed predominantly through the highway trust fund, their impact on the budget totals shown for the Department is relatively minor. As a result of these exclusions, maritime activities now represent approximately 50% of the total new obligational authority requested for the fiscal year 1960 for the Department. Promotion of science and research by the Bureau of the Census and the National Bureau of Standards accounts for another 21%, and various aids to business, including the proposed legislation for assistance to chronic labor surplus areas, for 29%.

Economic and technical development.—The new obligational authority provided in 1959 will make it possible to complete the Inter-American Highway without additional authorizations.

Promotion of science and research.—New obligational authority and expenditures for the Bureau of the Census will increase by $76 million and $60 million, respectively, in 1960. The decennial census of population, housing, and agriculture will be taken and processing of the 1958 censuses of business, manufactures, and mineral industries will be largely completed. The 1960 budget reflects consolidation of construction statistics in the Bureau of the Census and transfer of responsibility for monthly labor statistics to the Bureau of Labor Statistics.

The appropriation requested for the National Bureau of Standards for research and technical services will increase by $5 million to permit intensified research on high temperature, high pressure, and high purity phenomena. Funds are also provided to enlarge facilities at the Boulder, Colo., laboratory.

Promotion of water transportation.—New obligational authority of $279 million, down from $290 million in 1959, is recommended for maritime activities in 1960. Of this amount, $129 million is for another installment of the program to replace the large block of merchant ships built during World War II and $130 million is for ship operating subsidies in 1960. For 1959 a supplemental request of $10 million for operating subsidies is anticipated. In order to control future increases for these subsidies, the number of voyages that can be covered by subsidy contracts would be limited to 2,040. The remaining $20 million of new obligational authority for maritime programs is to cover the administrative costs of the Maritime Administration and various maritime training activities.

Provision of highways.—The Federal-aid highway program is financed from the highway trust fund, and new obligational authority and expenditures, therefore, are not included in budget totals. Legislation is being proposed to transfer the financing of the Department's forest and public lands highways programs for 1960 to the highway trust fund, since most of these highways are on the Federal-aid highway system. Accordingly, beginning with 1960, the expenditures for forest and public lands highways amounting to $41 million in 1960, are not included in budget totals.

An increase of one and one-half cents in the Federal gasoline tax, to remain in force through the fiscal year 1964, is being recommended to prevent a prospective deficit in 1960 and to maintain the highway trust fund on a self-supporting basis.

In 1960, budget expenditures of the Department for highways will be confined to the Woodrow Wilson Memorial Bridge over the Potomac and other miscellaneous programs, none of which requires new obligational authority.

Other aids to business.—The 1960 budget will permit continuance of the 1959 level for most of the programs of the Department which promote foreign trade, provide information and statistical services to business, grant patents, prepare aeronautical and nautical charts, establish geodetic controls, prepare analyses of business trends, and provide various other business aids.

New obligational authority estimated for 1960 includes $55 million to initiate a proposed program for loan and technical assistance to areas of substantial and persistent unemployment. Legislation to increase patent fees will again be submitted to the Congress in order to require those who receive the special benefits from Federal patents to bear a larger share of the costs of administering the patent system.

Regulation of commerce and finance.—The export control program will continue in 1960 at a rate slightly below 1959.

Civilian weather services.—New obligational authority for the Weather Bureau will be increased $6 million to improve weather services to aviation, permit continuation of hurricane research during 1960, maintain and operate new equipment, and continue the procurement of additional meteorological apparatus. Expenditures are estimated to rise somewhat less.

SUMMARY OF BUDGET AUTHORIZATIONS, EXPENDITURES, AND BALANCES

[In thousands]

	1958 actual	1959 estimate	1960 estimate
Balances brought forward at start of year from authorizations:			
Enacted or recommended in this document:			
Appropriations	$346,071	$234,958	$317,494
Contract authorizations	56,975	59,942	63,250
Revolving and management funds	17,856	27,591	30,507
Proposed for later transmission:			
Pay increase supplemental appropriations			510
Other: Appropriations			106
Total balances brought forward	420,902	372,490	411,867
New obligational authority:			
Enacted or recommended in this document:			
Current authorizations:			
Appropriations	180,875	417,310	501,566
Appropriations to liquidate contract authorizations	(28,033)	(32,692)	(960)
Reappropriations	65,000	10	
Total new obligational authority under current authorizations	245,875	417,320	501,566
Permanent authorizations: Contract authorizations	38,000	36,000	2,696
Total new obligational authority enacted or recommended	283,875	453,320	504,262
Proposed for later transmission:			
Pay increase supplemental appropriations		9,744	
Other: Appropriations		10,638	55,000
Total new obligational authority proposed for later transmission		20,382	55,000
Total new obligational authority	283,875	473,702	559,262
Other amounts available:			
Net transfers of balances to (—) other agencies	—341		
Appropriations available in prior year		—2,411	
Appropriations available from subsequent year	2,411		
Total other amounts available	2,070	—2,411	
Total budget authorizations available	706,847	843,781	971,129
Expenditures:			
From obligational authority enacted or recommended:			
Out of new obligational authority	326,753	398,546	341,561
Out of balances of prior obligational authority			123,774
Total expenditures from obligational authority enacted or recommended	326,753	398,546	465,335
From obligational authority proposed for later transmission:			
Pay increase supplemental appropriations		9,235	510
Other:			
Out of new obligational authority		10,532	10,000
Out of balances of prior obligational authority			106
Total expenditures from obligational authority proposed for later transmission		19,767	10,616
Total budget expenditures	326,753	418,313	475,951
Amounts no longer available:			
Unobligated balances rescinded		6,412	70,350
Unobligated balances expiring and lapsing	7,339		
Capital transfers from revolving funds to receipt accounts	124	56	6
Adjustment of balances downward in expired accounts, net	141	7,133	
Total amounts no longer available	7,604	13,601	70,356
Balances carried forward at close of year from authorizations:

New obligational authority:			
Appropriation	$2,777,700	$2,730,000	$2,940,000
Transferred (64 Stat. 1263) to—			
"Salaries and expenses," Bureau of Foreign Commerce		−18,590	
"Salaries and expenses," Business and Defense Services Administration		−37,000	
Appropriation (adjusted)	2,777,700	2,674,410	2,940,000
Proposed supplemental due to pay increases		238,000	

Provides for the formulation of Government policy on matters affecting programs and functions assigned to the Department.

2. *Departmental staff services.*—Staff assistance and supervision in the general management and administration of the Department are provided in personnel, budget and management, information, publications, security, legal, and internal inspection.

3. *Administrative services.*—Departmentwide direction is provided in property and space, records, general administrative services, safety and motor vehicles, and library activities. Centralized general administrative services, including accounting, are furnished to the smaller bureaus of the Department.

4. *Air transport mobilization planning.*—The function of planning the mobilization of civilian air transportation facilities for use in time of war will be financed in 1960 by the Office of Civil and Defense Mobilization.

Public enterprise funds:

AVIATION WAR RISK INSURANCE REVOLVING FUND

The Secretary of Commerce is hereby authorized to make such expenditures, within the limits of funds available pursuant to section 1306 of the Act of [June 14, 1951, as amended (49 U. S. C. 716)] *August 23, 1958 (72 Stat. 803)*, and in accordance with section 104 of the Government Corporation Control Act, as amended (31 U. S. C. 849), as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1959] *1960* for aviation war risk insurance activities under said Act [(49 U. S. C. 711–722)] *(72 Stat. 800). (72 Stat. 800–806; Department of Commerce and Related Agencies Appropriation Act, 1959.)*

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Administrative expense (total costs—obligations)		$4,300	$6,400
Financing:			
Amounts becoming available: Revenue and receipts: Fees for issuance of binders		37,950	3,850
Unobligated balance brought forward			33,650
Total amounts available		37,950	37,500
Unobligated balance carried forward		−33,650	−31,100
Financing applied to program		4,300	6,400

This fund provides aviation war risk insurance in the event of an outbreak of war. Binders are issued to cover aircraft and cargo, and will become war risk insurance automatically on the outbreak of war. Administrative costs are paid out of fee receipts (72 Stat. 731).

Capital transfer (payment of profits to Treasury) (−)			−5,883
Unobligated balance carried forward	−5,883	−5,883	
Financing applied to program			

Guaranties are given on approved loans made by private sources or Federal Reserve banks to facilitate performance of defense production contracts. Guaranty fees are used to pay Federal Reserve banks which serve as fiscal agents. Net earnings are retained to meet possible future losses (Defense Production Act of 1950, sec. 301, as amended).

Owing to continued absence of activity, no estimate is submitted for 1960; however, pending possible need, the fund is being held intact until current legislative authority expires.

Intragovernmental funds:

WORKING CAPITAL FUND

This fund finances duplicating, central stocks of office supplies, health services, relocation expenses, and other common departmental services which can be operated better on a centralized basis (5 U. S. C. 607). Duplicating facilities are being expanded gradually to care for increased workload in connection with technical publications and the impending 1960 decennial census. Sales are priced essentially at cost. Earnings are paid to the Treasury. Capital includes an appropriation of $100,000.

The Bureau is the principal fact-finding and statistical agency of the Federal Government.

1. *Retail, wholesale, and service trade statistics.*—Estimates of sales and inventory trends are computed monthly for the retail and wholesale trades, and of consumer credit outstanding in the retail trade. An advance report of retail sales is issued within 10 days after the close of the month. Once a year, the retail sales data are reported in more detail, including estimates of total sales for the year by regions.

2. *Manufacturing and industrial statistics.*—Periodic surveys are made of production, shipments, orders, and materials consumed for important commodities. An annual survey of manufactures produces data on the number, size, industrial classification, and location of manufacturing establishments and key measures of factory operations such as employment, shipment, inventories, etc.

3. *Agriculture statistics.*—Information is compiled on cotton ginned at 11 dates during the ginning season.

4. *Foreign trade and shipping statistics.*—Monthly, quarterly, and annual reports are published on the kind, quantity, shipping weight and dollar value of imports and exports. In 1960, steps to improve the accuracy of the statistics are proposed.

5. *Population statistics.*—This activity includes current estimates of the number of households, the farm population, school enrollment, personal income, population mobility and other characteristics of the population, as well as annual estimates of the population of the United States and of each of the States, and projections of future

SALARIES AND EXPENSES—Continued

population. Most of these current estimates are based on a continuing monthly survey of 35,000 interviewed households, which is also used in obtaining monthly estimates of national employment and unemployment. This survey has heretofore been wholly financed by this account, but since the monthly estimates of employment and unemployment are to be issued by the Department of Labor, beginning in 1960, that Department will share the financing of the survey.

6. *Construction and housing statistics.*—The estimate for 1960 provides an improved, integrated program of private and public construction statistics, including housing starts, previously compiled by the Bureau of Labor Statistics, and private nonresidential construction previously compiled by Business and Defense Services Administration. Data are also provided quarterly on housing vacancies.

7. *State and local government statistics.*—Reports are published providing national estimates of total governmental finances, employment, and payrolls, and comparative statistics for State governments and larger cities.

8. *Statistical abstract and special reports.*—The Statistical Abstract issued annually summarizes Government and private statistics on the industrial, social, political, and economic activities of the United States. Historical and other general reports are also published periodically. A report showing for each county in the United States the number and kind of all business establishments, and their employment and payrolls is published on a biennial basis.

The 1958 censuses of business, manufactures, and mineral industries will provide data on the volume of production and trade, the number, size, geographical distribution, and other characteristics of the Nation's 3.3 million business and industrial enterprises. Editing and tabulation of reports will be substantially completed and preliminary releases published in 1960. Funds to complete the tabulations and printing of final results will be requested in 1961.

Enumeration of the Nation's farms will begin in the fall of 1959 and of population and housing in April 1960. Some preliminary figures will be available before the end of 1960, with final reports scheduled for 1961 and 1962. A part of the information will be obtained by sampling 1 of every 4 households. Present estimate of total cost is $118,000,000.

Proceeds from sale of personal property applied (40 U. S. C. 481 (c))	−69,303	−10,000	−10,000
Unobligated balance no longer available	35,990		
New obligational authority	11,828,037	12,725,500	14,100,000
New obligational authority:			
Appropriation	$11,828,037	$12,028,500	$14,100,000
Proposed supplemental due to pay increases		697,000	

NOTE.—Capital outlay (included above) is as follows: 1958, $491,124; 1959, $395,393; 1960, $395,393. Reimbursements from non-Federal sources were derived from the sale of special maps and charts and for providing special surveys and related data (33 U. S. C. 883 (e)).

The survey publishes aeronautical and nautical navigation charts of the United States, its territories, and surrounding waters, using data obtained through field surveys. In addition, seismological and geodetic control data are obtained and disseminated, and worldwide tide and current information is compiled and published.

Direct program by activities—1. *Surveys and charts for marine and air navigation.*—Hydrographic, topographic, tide and current, magnetic and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables required for safe sea and air navigation. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

Miscellaneous receipts returned to the Treasury from the sale of charts and related publications were $681,827 in 1958 and are estimated to be $695,000 during 1959, and $735,000 in 1960.

CHARTS AND TABLES PRINTED AND DISTRIBUTED

	1958 actual	*1959 estimate*	*1960 estimate*
Nautical charts:			
Military	320,805	400,000	410,000
Other	620,188	690,000	765,000
Total	940,993	1,090,000	1,175,000
Standard aeronautical charts:			
Military	6,279,764	3,340,000	4,164,000
Other	1,710,306	1,706,000	1,740,000
Total	7,990,070	5,046,000	5,904,000
Airport, radio facility, etc.:			
Military	20,784,450	29,000,000	36,550,000
Other	6,128,452	10,726,000	16,020,000
Total	26,912,902	39,726,000	52,570,000
Coast pilots, tide and current tables	77,178	81,000	80,000

2. *Geodetic control.*—Surveys are made in the United States and its Territories to determine the horizontal position (latitude and longitude) and the vertical positions (elevation above mean sea level) of a network of control points which are permanently marked on the ground. These points are spaced so that adequate survey control is available for topographic, geologic, and other types of mapping; nautical charting; and for planning large-scale engineering projects. The positions and descriptions of these points are published and distributed to Federal, State, and local agencies and the general public.

AREA SURVEYED AND MARKED POINTS ESTABLISHED

	1958 actual	*1959 estimate*	*1960 estimate*
Triangulation:			
Area (square miles)	50,595	40,000	40,000
Marks established	995	1,100	1,100
Leveling:			
Linear miles	7,958	7,000	7,000
Marks established	5,800	5,000	5,000

3. *Earthquake investigation.*—Earthquakes are located and investigated to determine severity and to obtain engineering data for the design of earthquake-resistant structures and information concerning ground movements. The Bureau operates 9 seismograph and 71 strong motion stations, investigates about 15 severe earthquakes annually, and collaborates with 12 universities and 250 domestic and foreign seismograph stations. The seismic sea wave warning program furnished data for 4 alerts for earthquakes in Ecuador, Mexico, New Hebrides and Santa Cruz Islands.

4. *Instrument services.*—These include the design and construction, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations.

7. *Relation of costs to obligations.*—The relationship between direct costs and direct obligations is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year (inventories and items on order):				
Stores (goods unconsumed by projects)	$262,391	$503,474	$505,800	$480,400
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	799,917	682,896	338,534	308,241
Inventory of charts and publications for sale	355,630	399,679	400,000	400,000
Work in process	66,348	26,206	26,000	26,000
Total selected resources at end of year	1,484,286	1,612,255	1,270,334	1,214,641
Selected resources at start of year (−)		−1,484,286	−1,612,255	−1,270,334
Adjustment of selected resources reported at start of year		7,709		
Costs financed from obligations of other years, net (−)			−341,921	−55,693
Obligations incurred for costs of other years, net		135,678		

Reimbursable program.—Reimbursable work for other Federal agencies is primarily for aeronautical and nautical charts of the United States and its Territories, hydrographic, oceanographic, and geodetic control surveys.

Reimbursements from non-Federal sources are primarily from States to carry out geodetic surveys required as part of the interstate highway program.

7. *Pelation of costs to obligations.*—Year-end balances of unpaid undelivered orders applicable to the reimbursable program are as follows:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year (inventories and items on order): Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$131,018	$151,199	$151,199	$151,199
Selected resources at start of year (−)		−131,018	−151,199	−151,199
Adjustment of selected resources reported at start of year		22,560		
Obligations incurred for costs of other years, net		42,741

The Administration provides statistical and informational services to the business community and carries out industrial mobilization readiness programs.

1. *Industries and commodities.*—A focal point for the cooperation of Government and industry is provided in promoting economic stability and growth of industry; industrial and commercial information is analyzed, and basic, special and periodic studies and reports for use by both industry and Government are published; industrial capabilities to meet the requirements for industrial production in a national emergency are measured; and assistance is provided to industry in the current military procurement programs. The totals for the budget year reflect a transfer in the estimates of $1,700,000 to the Office of Civil and Defense Mobilization, representing the proportionate cost of mobilization planning activities heretofore financed under this appropriation.

2. *Marketing and distribution.*—The Office of Distribution promotes the more effective distribution of goods and services by disseminating market facts and distribution information to Government, industry, and business.

3. *Technical information.*—Domestic and foreign scientific and technical data are compiled primarily from Government research or translation and made available upon request to business, industry, the general public, and Government agencies. In addition, direct assistance is furnished to industry in development of voluntary programs for standardization of commodities.

4. *Area development.*—State, area, and community development groups are assisted in their efforts to diversify and strengthen their economies. Advice is given on (*a*) methods for determining industrial potentials of local resources, (*b*) growth industries suitable to local resources and (*c*) methods of community organization and programs of action.

5. *Field offices.*—Thirty-four field offices, with assistance from local cooperating organizations, make available to

In the absence of improvement in relations with Soviet bloc countries, export controls over strategic commodities are necessary to safeguard the national security. In addition, the domestic economy is protected from excessive drain of scarce commodities; and United States foreign policy is implemented by regulating exports. The Bureau of Customs is responsible for the policing of shipments at points of export.

Basic indicators of the condition of the national economy and current analyses of business trends are prepared and distributed to the public.

1. *Preparation of national income and product data.*—Calculations are made of the national income and gross national product, consumption expenditures and other subsidiary measures of the Nation's economic well-being.

2. *Analysis of business trends.*—Business developments are assessed monthly, and the results of continuing analysis of the major underlying factors and long-range business trends are published regularly for business use.

3. *Computation of the balance of international payments.*—The United States balance of international payments is determined and the official statistics of foreign expenditures by the U. S. Government are maintained.

Appropriation (new obligational authority)	3,000,000	141,475,000	129,000,000

The 1960 estimate provides for:

1. *Construction-differential subsidy* and/or national defense allowances for construction of 14 vessels under the ship replacement program.

4. *Acquisition of replaced ships.*—Acquisition costs for an estimated 14 vessels being replaced.

5. *Research and development.*—A program of advanced research and development with particular emphasis on nuclear power for ships.

Since 1955, funds for new construction have been appropriated under this appropriation. In order to differentiate between current programs available for obligation and those for expenditure only, all programs prior to 1955 are reflected under Ship construction (liquidation of contract authorization), maritime activities.

The following table reflects the annual obligation requirements for the projects financed from current funds, together with those requested for 1960.

Program by activities:			
Ship construction (total obligations)	$10,260	$985,224	
Financing:			
Unobligated balance brought forward	−7,357,025	−7,346,765	
Unobligated balance carried forward	7,346,765		
Unobligated balance no longer available		6,361,541	
Contract authorization (new)			

During 1958, obligations were increased by $10,260, as a result of contract adjustments. A total of $512,433,950 was appropriated for this program which covers all post-war construction activity up to 1955. As of June 30, 1958, the unobligated balance amounted to $7,346,765. It is estimated that claims presented by the shipbuilders will amount to $985,224. The balance of $6,361,541 will be administratively rescinded.

Operating-Differential Subsidies

For the payment of obligations incurred for operating-differential subsidies granted on or after January 1, 1947, as authorized by the Merchant Marine Act, 1936, as amended, and in appropriations heretofore made to the United States Maritime Commission, [$120,000,000] *$130,000,000,* to remain available until expended: *Provided,* That no contracts shall be executed during the current fiscal year by the Federal Maritime Board which will obligate the Government to pay operating-differential subsidy on more than two thousand [two hundred] and [twenty-five] *forty* voyages in any one calendar year, including voyages covered by contracts in effect at the beginning of the current fiscal year[, of which one hundred and fifty shall be for companies which have not held contracts prior to July 1, 1958, and seventy-five shall be for companies operating into or out of the Great Lakes]. (*Department of Commerce and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, **$120,000,000** Estimate 1960, **$130,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Payment of subsidies (total obligations)	$120,031,522	$120,360,887	$130,000,000
Financing:			
Unobligated balance brought forward	−20,392,409	−360,887	
Unobligated balance carried forward	360,887		
New obligational authority	100,000,000	120,000,000	130,000,000
New obligational authority:			
Appropriation	$35,000,000	$120,000,000	$130,000,000
Reappropriation	65,000,000		

At present 15 privately owned United States-flag companies are under contract to operate 313 ships under subsidy agreements on 30 of the 36 designated essential foreign trade routes. The contracts cover the differential between their operating costs and those of foreign competitors (subsidy accrual). The Government withholds (subsidy recapture) one-half of net profits in excess of 10% of capital necessarily employed up to the subsidy accrual. The subsidy recapture is finally determined on a cumulative basis only at the end of a 10-year contract period. In estimating the subsidy payable, subsidy recapture is subtracted from subsidy accrual, but pending the close of the 10-year contract period the full amount of the accrual is a contingent liability of the United States.

SUMMARY OF PROGRAM—JANUARY 1, 1947, THROUGH JUNE 30, 1960

[Dollars in thousands]

	Voyages	*Estimated subsidy accrual*
Calendar year:		
1947–57	14,579	$905,829
1958	1,799	147,563
1959	1,841	152,234
1960 (first 6 months)	919	76,291
Total	19,138	1,281,917
		Cumulative total
Subsidy accrual		$1,281,917
Subsidy recapture		244,157
Subsidy payable		1,037,760
Subsidy paid through June 30, 1958		688,175
Estimated subsidy payable		349,585
Subsidy to be paid in 1959		120,361
Subsidy to be paid in 1960		130,000
Subsidy to be paid in subsequent years		99,224

The computation and approval of final subsidy rates and the audit of annual accountings of the subsidized operators will make it possible to make payments of 100% of estimated subsidy payable due each operator through calendar year 1955 prior to June 30, 1960, thus eliminating a large backlog of subsidy payments dating back to 1947. The $99,224,575 estimated unpaid subsidy as of June 30, 1960, begins to approach a normal backlog, consisting largely of amounts withheld pending final rates and audit determinations for calendar years 1956–60 plus subsidy bills for operators in the last quarter of 1960 which would not be presented and paid until 1961. This estimated unpaid balance is, however, subject to adjustment for changes in the cumulative recapture position of each of the operators. This estimated balance does not reflect the effect of an anticipated 1959 supplemental appropriation which is shown under Proposed for later transmission.

Appropriation	$15,775,464	$14,525,000	$14,070,000
Proposed supplemental due to pay increases		805,500	

1. *Administrative expenses.*—Shown herein are the expenses of administering most of the functions of the Federal Maritime Board and Maritime Administration, including operating-differential subsidy contracts, continuing ship-construction activities, ship operations and chartering, auditing, and property management. Administrative expenses in connection with maritime training, general agency ship operations, new ship construction, and chartering activities are provided in other funds.

2. *Maintenance of shipyard facilities.*—Four Government-owned reserve shipyards are maintained in a partial state of readiness for defense purposes. Studies are being made of the action necessary to dispose of these yards, and maintenance costs for 1960 have been reduced accordingly.

3. *Operation of warehouses.*—Five warehouses store materials and equipment for vessel operations, repair and outfitting of reserve fleet ships, and reserve shipyards.

4. *Maintenance of reserve training station.*—One reserve training station previously maintained in a custodial status for possible future reactivation has been declared surplus and will be transferred to the General Services Administration in 1959.

5. *Reserve fleet expenses.*—Provision is made for the preservation and security of merchant vessels, maintained for national defense purposes. An accelerated scrapping program will be continued and preservation work will be sharply reduced on about 1,000 ships which are considered obsolete for mobilization purposes.

This program provides for the training of officers for service in the maritime industry.

1. *Merchant marine cadet training.*—A 4-year course of training is provided, including 1 year of sea duty, designed to qualify graduates for licenses as merchant marine officers. The Academy provides subsistence, quarters, tuition, uniform, and textbook allowances and medical care for cadets.

2. *Cadet training office.*—This office provides staff assistance to the Maritime Administrator on training matters, assists in the selection and appointment of cadets, and maintains liaison with State marine schools.

Appropriation to liquidate contract authorization			960,000

The States of Maine, Massachusetts, New York, and California maintain schools for the training of merchant marine officers, with Federal assistance given in the form of (*a*) direct grants of $75,000, if matched by State appropriations and if out of State students are enrolled; (*b*) allowance to cadets for uniforms, textbooks, and subsistence; and (*c*) repairs to Federal training vessels loaned to the schools.

New legislation enacted by the last Congress provides contract authority for the Secretary to enter into agreements with States to provide these grants and allowances over a 4-year period (72 Stat. 622). However, maintenance and repair of training vessels will continue to be accomplished through annual appropriations.

The Maritime Administration is authorized to insure construction loans and mortgages on certain types of cargo and passenger-carrying vessels and other watercraft (title XI, Merchant Marine Act, 1936, as amended).

Budget program.—In 1958, a payment of $3.9 million was made for a defaulted ship mortgage, custody of the ship was taken, and a loss of $0.5 million and other expenses of $0.2 million was incurred incident thereto.

Financing.—The redemption of defaulted loans or mortgages is financed from insurance premiums and fees, together with such amounts as may be made available by appropriations. During 1958, $3.5 million was made available to the revolving fund to allow the purchase of the above defaulted mortgage through a transfer of an unobligated balance from the vessel operations revolving fund (65 Stat. 59). Under authority of Public Law 85–520 (72 Stat. 358), the Secretary of Commerce may borrow from the Secretary of the Treasury such sums as may be necessary to redeem any future defaulted mortgage, in event the moneys in this fund, at the time of default, are not sufficient for this purpose.

Operating results and financial condition.—As of September 1958, balances outstanding plus commitments for additional ship mortgages totaled $235.1 million, and the outstanding balance for loans and mortgages at the end of 1959 should reach $255 million. Based on current trends, insured ship loans under this title will be $450 million by the end of 1960.

No expenses on defaulted mortgages are estimated for 1959 and 1960. Earnings, resulting from premium receipts, are retained to meet future requirements.

Financing applied to program	13,355,770	8,031,120	6,029,740

This fund, created in 1951, finances direct operation and charter of cargo vessels for transport of military cargo. It is also used for the operation of Government-owned vessels under general agency agreements or charter for experimental or testing purposes (70 Stat. 531). The initial appropriation to the fund of $20 million has been repaid to the Treasury.

Budget program—1. *Vessel operations.*—Cargo vessels are operated by private operators acting as agents of the Maritime Administration to carry shipments for the Military Sea Transportation Service. Ships operated under the fund have declined from a peak of 538 to 7 on June 30, 1958, and will further decrease to 4 during 1959 and 1960. The world's first nuclear-powered cargo-passenger ship, the N. S. *Savannah*, will go into service in 1960, and will be assigned, under General Agency Agreement, to the ship operator in mid-1960.

2. *Charter operations.*—As of June 30, 1958, there were 11 Government-owned vessels under charter to private operators. It is expected that 4 vessels will return from charter during 1959 leaving 7 vessels under charter operations during 1960.

3. *Vessel custody and contingencies.*—This activity provides primarily for expenses of custody and layup of vessels (*a*) involved in mortgage foreclosure proceedings, or (*b*) forfeited by owners for violation of shipping laws.

MARITIME ACTIVITIES—Continued

Public enterprise funds—Continued

VESSEL OPERATIONS REVOLVING FUND—Continued

Financing.—Operations are financed from revenue and appropriations made in prior years.

Operating results and financial condition—1. *Vessel operations.*—Rates charged the Military Sea Transportation Service for general agency operations cover full costs. The net loss of $1,317,000 in 1960 is the result of the fund bearing certain operating costs in connection with the experimental operation of the N. S. *Savannah.* Costs will be incurred by the operator in providing crews, carrying out engineering studies, negotiating with various regulatory bodies, and normal ship operation. 2. *Charter operations.*—The net loss of $211,347 in 1959 is a direct result of reimbursement authorized under Public Law 85–721, to certain charters for breakout costs. Earnings are retained to provide (*a*) working capital for current ship operations and chartering and custody contingencies, (*b*) rapid expansion of shipping services in the event of an emergency and (*c*) the possible transfer of $10,000,000 to the war risk insurance fund (65 Stat. 747). The program contemplates the eventual full recovery of $3,500,000 advanced to the Federal ship mortgage insurance fund in 1958.

This fund was established to provide war-risk insurance in the event that commercial insurance is not available at reasonable terms and conditions during time of war (46

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

U. S. C. 1281, 1283). Commercial war-risk insurance policies are at present subject to an automatic termination clause upon the outbreak of war between any of the four powers: United States, France, Great Britain, and Russia. As of June 30, 1958, interim binders for war-risk hull protection and indemnity, and second seamens' insurance, which become effective upon the outbreak of war, had been issued covering approximately $5,467,800,000 of insurance.

Financing.—The transfer of $10 million is authorized from the vessel operations revolving fund if necessary as an emergency measure (65 Stat. 747). To date no transfers have been made and none are anticipated in 1959 or 1960. In addition financing is provided by insurance premiums and fees paid for issuance of interim binders.

Budget program.—At the request of the Secretary of the Navy, second seamen's war risk insurance was provided without premium, as authorized under sections 1205 and 1206 of title XII of the Merchant Marine Act, 1936, as amended, on tankers operated for account of Military Sea Transportation Service. This arrangement has been in effect continuously from its inception on January 1, 1954. Under section 1205 the Secretary of the Navy has agreed to indemnify Maritime against all losses covered by such insurance. As of June 30, 1958, there were 34 tankers covered under this program. The U. S. N. S. *Mission San Francisco* was involved in a collision with a foreign-flag vessel on March 7, 1957. As of June 30, 1958, a total of 40 personal effects claims had been paid. The 1959 estimate provides for the payment of 9 death and 5 personal effects claims. The U. S. N. S. *Mission San Miguel* ran aground October 9, 1957, on Maro Reef en route from Guam to Seattle and became a total loss. The 1959 estimate provides for the payment of pending claims. Reimbursement from the Military Sea Transportation Service will cover full costs. Expenses of the fund consist of fees paid to underwriting agents, travel expenses for marine insurance experts, and for contract appraisal costs.

Operating results.—The Government's investment consists entirely of retained earnings totaling $710,850 on June 30, 1958. Retention of these earnings is necessary for this program to get underway immediately upon the outbreak of a national emergency.

GENERAL PROVISIONS—MARITIME ACTIVITIES

No additional vessel shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers and slop-chest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

[No money made available to the Department of Commerce for maritime activities by this or any other Act shall be used in payment for a vessel the title to which is acquired by the Government either by requisition or purchase, or the use of which is taken either by requisition or agreement, or which is insured by the Government and lost while so insured, unless the price or hire to be paid therefor (except in cases where section 802 of the Merchant Marine Act, 1936, as amended, is applicable) is computed in accordance with subsection 902 (a) of said Act, as that subsection is interpreted by the General Accounting Office.]

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. (*Department of Commerce and Related Agencies Appropriation Act, 1959.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
"Commodity Credit Corporation fund," Department of Agriculture.
"Construction of ships, Military Sea Transportation Service, Department of Defense."
"Shipbuilding and conversion, Navy."
"Construction of surveying ships," Coast and Geodetic Survey.
"Plant acquisition and construction," Atomic Energy Commission.

Financing applied to program	2,811	7,500	7,500

The affairs of the Inland Waterways Corporation, in liquidation since 1953, are reduced to the collection of debt and the policing of the conduct of operations of the purchaser and successor carrier, Federal Barge Lines, Inc.

The original agreement between the purchaser and the United States, entered into in 1953, called for the purchase price of $9,000,000 to be repaid at the rate of $444,000 at

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the end of 1954, at $400,000 annually through 1963, the balance of $4,956,000 being due on June 30, 1964, with interest at 3.75% on the unpaid balance. In order to permit the purchaser to maintain his program of rehabilitating the equipment of the line, and to render service to the public comparable to that in existence under Federal operation, without seriously endangering his financial position, the original agreement has been amended. Under the amended agreement the annual payments on the principal are stepped up, but the date for final payment is extended until 1969. On June 30, 1958, the balance due was $6,956,000, of which $706,000 is to be repaid on June 30, 1959, and the remainder repaid in 10 equal installments of $625,000. The interest rate on the unpaid balance in 1959 to 1964, inclusive, is specified at 4%, and thereafter at 5%, which will result in the earning of $406,890 in interest in excess of that contemplated in the original plan.

Budget program.—Administration costs cover policing of operation of the Federal Barge Lines, Inc., and the incidental expenses. Reserves to pay claims and suits against the Corporation have been reduced to the estimated liability remaining after claims which were not brought into litigation have been outlawed.

Operating results.—Net income of $271,304 is expected for 1959, as the net of interest over administrative and other expenses.

PATENT OFFICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Office administers laws governing the granting of patents for invention and the registration of trade-marks.

The 1960 estimate provides for continuation of the effort to reduce the backlog of pending patent applications. It also provides for continuance of a program to modernize the patent classification system, and for a modestly augmented program of continued research and development of electronic devices applicable to the patent search process. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

Receipts from fees were $6,938,521 in 1958, and are estimated under existing legislation to be $7,200,000 in 1959 and 1960. Proposed legislation would increase fees to more nearly cover the cost of Patent Office operations.

PATENT AND TRADE-MARK ISSUANCES

Applications pending, end of year	25,587	27,323	26,000	25,000

1. *Administration of patent and trade-mark system.*—Applications are examined to determine the patentability of claimed inventions and the registrability of trade-marks; quasi-judicial functions are performed in appeal or interference proceedings within the Office; patents and trade-marks are issued; and copies of records are furnished.

2. *Printing and publication of patent and trade-mark material.*—This activity provides for printing of specifications and drawings of patents and trade-mark registrations; publication of their issuance and of official notices, rules of practice, and laws; and binding of patents, trade-marks, and other reference material for official and public search. The need for funds is governed largely by the volume of issuances, and related public demand for printed copies.

Administration and research.—Administrative, engineering, and research expenses are met by deductions from Federal-aid authorizations as prescribed by specific limitations and by reimbursement from other appropriations for highway construction. The 1959 and 1960 estimates include costs in connection with the AASHO (Jllinois) road test and several special studies expressly directed in the 1956 and 1958 acts. Highway research is carried out independently as well as in cooperation with the State highway departments.

Unobligated balance no longer available (contract authorization)	21,890,968	20,386,683	20,440,000
Contract authorization (new)	3,620,000,000	3,430,000,000	3,397,500,000

Status of Unfunded Contract Authorization

	1958 actual	1959 estimate	1960 estimate
Unfunded balance at beginning of year	$4,603,770,618	$6,511,879,650	$7,571,492,967
Contract authorization (new)	3,620,000,000	3,430,000,000	3,397,500,000
Administrative cancellation of unfunded balance	−21,890,968	−20,386,683	−20,440,000
Unfunded balance at end of year	−6,511,879,650	−7,571,492,967	−8,108,552,967
Transfer from "Highway trust fund" to liquidate contract authorization	1,690,000,000	2,350,000,000	2,840,000,000

1. *Grants for construction.*—Grants are made to States for construction and improvement of the 41,000-mile national system of interstate and defense highways, the primary and secondary systems, and urban extensions of the primary and secondary systems. The Federal-aid highway program was greatly expanded with the enactment of the Federal-Aid Highway Act of 1956 and further expanded with the passage of the Federal-Aid Highway Act of 1958. In addition to providing increased authorizations for the interstate program and the primary, secondary, and urban authorizations for 1960 and 1961, the 1958 act authorized an additional $400 million for 1959 for the primary, secondary, and urban program. These funds were obligated prior to December 1, 1958, and the projects are to be completed prior to December 1, 1959, as required by the law.

A further provision of the 1958 act authorized the advance of $115 million to the States to provide matching funds to finance the additional authorizations. This advance is to be repaid in two equal installments out of authorizations for 1961 and 1962.

BUREAU OF PUBLIC ROADS—Continued

Current authorizations—Continued

FEDERAL-AID HIGHWAYS (TRUST FUND)—Continued

The Highway Revenue Act of 1956 created the highway trust fund into which are deposited certain percentages of tax receipts on motor fuel, tires and tubes, tread rubber, trucks, buses, trailers and truck use, and from which transfers are now made to finance the Federal-aid highway program. Revenues accruing to the highway trust fund were sufficient to meet program expenditure requirements in 1958 and it is estimated they will continue to satisfy expenditure requirements in 1959. Current estimates indicate that there will be a deficit in the fund in 1960. It is proposed to cover this deficit by increasing motor fuel taxes by 1½ cents per gallon, effective July 1, 1959, to extend through June 30, 1964. This tax will provide sufficient revenues to permit apportionment of all available Federal-aid authorizations for 1961 and 1962. This is shown under proposed legislation for the account Highway trust fund.

It is also proposed that in 1960 the special provisions of highway law applicable to Alaska be amended to permit participation in the Federal-aid highway program on the same basis as other States. This program will not be carried on as a direct operation by the Bureau of Public Roads in 1960.

Actual and estimated progress of the program is summarized in the following tables:

[Dollars in thousands]

Fiscal year	Contract authorization [1]	Unobligated contract authorization, end of year	Federal payments	Projects approved		
				Number	Total cost	Federal share
1955	$875,000	$837,322	$594,925	5,898	$1,382,992	$710,000
1956	2,000,000	1,939,236	740,343	6,650	1,695,808	885,000
1957	2,550,000	2,268,148	965,507	7,966	3,361,000	2,212,000
1958	3,590,000	2,918,432	1,511,396	9,490	4,128,000	2,876,000
1959	3,400,000	2,920,252	2,451,000	11,700	4,690,000	3,298,000
1960	3,367,500	2,891,312	3,002,000	9,800	4,688,000	3,370,000

[1] Annual authorizations become available for obligation not later than Jan. 1 in the preceding year and are shown in the year in which they become available. Amounts exclude contract authorizations for disaster assistance.

Federal Reserve Bank of St. Louis

Reimbursable obligations.—Reimbursable construction and maintenance services in Alaska are included for 1958 and 1959 but not for 1960 since this program is no longer a direct Federal responsibility. Administrative services for other programs of the Bureau of Public Roads and other agencies are initially financed from this fund and reimbursements of their pro rata share are collected periodically from the other programs. These amounts are included in the limitation established for administration and research.

Unfunded balance transferred from "Forest highways"			$66,350,000
Contract authorization (new)			33,000,000
Unfunded balance at end of year			−62,250,000
Transfer from "Highway trust fund" to liquidate contract authorization (see below)			37,100,000

NOTE.—Reimbursements from non-Federal sources above are derived from the proceeds of sale of personal property (23 U. S. C. 308 (a) and (b)).

1. *Construction.*—Main highways within or adjacent to the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau of Public Roads on the basis of their contribution to meeting traffic and national defense requirements within the national forests. Authorizations are apportioned by States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authorizations of $35 million and $33 million are available for 1959 and 1960, respectively.

It is proposed that, beginning in 1960, the financing of this program be transferred to the highway trust fund. Since forest highways are similar in character and use to Federal-aid highways and in most cases are on the Federal-aid highway systems, they should logically be financed from the highway trust fund in the same manner as the regular Federal-aid programs.

Actual and estimated progress of the program are summarized in the following table:

Fiscal year	*Annual authorization* [1]	*Miles completed*	*Unobligated balance—end of year*	*Obligations for projects*	*Expenditures*
1955	$22,500,000	400	$20,139,465	$23,168,840	$21,367,836
1956	22,500,000	701	22,079,498	19,762,068	23,647,714
1957	30,000,000	497	27,996,634	23,424,112	21,502,050
1958	35,000,000	352	38,631,844	23,620,849	22,675,846
1959	33,000,000	400	33,746,844	36,872,000	28,003,557
1960	33,000,000	500	28,546,844	37,000,000	37,100,000

[1] Each fiscal year authorization becomes available for obligation not later than Jan. 1 in the preceding fiscal year and are shown in the year in which they become available.

PUBLIC LANDS HIGHWAYS (*TRUST FUND*) (*LIQUIDATION OF CONTRACT AUTHORIZATION*)

For payment of obligations incurred *in carrying out the provisions of title 23, United States Code, section 209,* pursuant to the contract authorization granted by [section 106 of the Federal-Aid Highway Act of 1956 (23 U. S. C. 155)] *title 23, United States Code, section 203,* to remain available until expended, [$2,692,000] *$4,000,000, to be derived from the "Highway trust fund"*, which sum is composed of [$692,000] *$1,000,000,* the balance of the amount authorized to be appropriated for the fiscal year [1958, and $2,000,000, a part of] *1959, and $3,000,000,* the amount authorized for the fiscal year [1959] *1960: Provided, That the unexpended balances as of June 30, 1959, of appropriations heretofore granted under the head "Public lands highways" or "Public lands highways (liquidation of contract authorization)" are rescinded and shall be credited to miscellaneous receipts of the Treasury. (Department of Commerce and Related Agencies Appropriation Act, 1959.)*

NOTE.—Estimate for activities previously carried under "Public lands highways." The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Construction	$2,117,878	$5,325,653	$2,957,000
2. Administration	22,792	44,000	43,000
Total obligations	2,140,670	5,369,653	3,000,000
Financing:			
Comparative transfers from (−) other accounts	−2,140,670	−5,369,653	
Unobligated balance of prior contract authorization transferred from "Public lands highways"			−60,000
Unobligated balance carried forward (contract authorization)			60,000
Contract authorization (new obligational authority)			3,000,000

Status of Unfunded Contract Authorization

Unfunded balance transferred from "Public lands highways"			$4,000,000
Contract authorization (new)			3,000,000
Unfunded balance at end of year			−3,000,000
Transfer from "Highway trust fund" to liquidate contract authorization (see below)			4,000,000

1. *Construction.*—Highways are constructed and improved through public lands in those States with large areas of such lands. The 1960 estimate finances the additional authorization ($1 million) for 1959 and the full amount ($3 million) of the authorization for 1960. These authorizations were provided by section 5 of the Federal-Aid Highway Act of 1958 (72 Stat. 89).

It is proposed that, beginning in 1960, the financing of this program be transferred to the highway trust fund. These highways are similar in character and use to Federal-aid highways and are all on either the Federal-aid primary or secondary systems. Therefore, they should logically be financed from the trust fund in the same manner as the regular Federal-aid programs.

2. *Administration.*—This activity represents the estimated cost of administration and engineering supervision of the program.

Forest Highways

Appropriated 1959, [a] **$30,000,000**

[a] Appropriated in Department of Commerce and Related Agencies Appropriation Act, 1959.

NOTE.—Estimate of $37,100,000 previously carried under this title has been transferred in the estimates to "Forest highways (trust fund) (liquidation of contract authorization)." The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Financing:			
Comparative transfers to other accounts	$26,020,871	$39,460,000	
Unobligated balance brought forward (contract authorization)	−27,996,634	−38,631,844	−$33,746,844
Unobligated balance of prior contract authorization transferred to "Forest highways (trust fund) (liquidation of contract authorization)"			[1] 33,746,844
Advances and reimbursements from—			
Other accounts	−1,478,880	−1,400,000	
Non-Federal sources	−177,201	−175,000	
Unobligated balance carried forward (contract authorization)	38,631,844	33,746,844	
Contract authorization (new obligational authority)	35,000,000	33,000,000	

[1] An obligated balance of $32,603,156 is also being transferred and for summarization this amount is tabulated as a recovery of prior year obligations. The total, $66,350,000 is written off as an unobligated balance no longer available in the general fund.

NOTE.—Reimbursements from non-Federal sources above are derived from the proceeds of sale of personal property (23 U. S. C. 308 (a) and (b)).

Status of Unfunded Contract Authorization

	1958 actual	1959 estimate	1960 estimate
Unfunded balance at beginning of year	$46,250,000	$56,250,000	$59,250,000
Contract authorization (new)	35,000,000	33,000,000	
Restoration of contract authorization (appropriation balance written off)			7,100,000
Unfunded balance transferred to "Forest highways (trust fund) (liquidation of contract authorization)"			−66,350,000
Unfunded balance at end of year	−56,250,000	−59,250,000	
Appropriation to liquidate contract authorization	25,000,000	30,000,000	

Public Lands Highways

Appropriated 1959, [a] **$2,692,000**

[a] Appropriated in Department of Commerce and Related Agencies Appropriation Act, 1959.

NOTE.—Estimate of $4,000,000 previously carried under this title has been transferred in the estimates to "Public lands highways (trust fund) (liquidation of contract authorization)." The amounts obligated in 1958 and 1959 are shown in the schedules as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Financing:			
Comparative transfers to other accounts	$2,140,670	$5,369,653	
Unobligated balance brought forward (contract authorization)	−1,570,323	−2,429,653	−$60,000
Unobligated balance of prior contract authorization transferred to "Public lands highways (trust fund) (liquidation of contract authorization)"			[1] 60,000
Unobligated balance carried forward (contract authorization)	2,429,653	60,000	
Contract authorization (new obligational authority)	3,000,000	3,000,000	

Status of Unfunded Contract Authorization

	1958 actual	1959 estimate	1960 estimate
Unfunded balance at beginning of year	$3,725,000	$3,692,000	$4,000,000
Contract authorization (new)	3,000,000	3,000,000	
Unfunded balance transferred to "Public lands highways (trust fund) (liquidation of contract authorization)"			−4,000,000
Unfunded balance at end of year	−3,692,000	−4,000,000	
Appropriation to liquidate contract authorization	3,033,000	2,692,000	

[1] An obligated balance of $3,940,000 is also being transferred and for summarization this amount is tabulated as a recovery of prior year obligations. The total, $4,000,000, is written off as an unobligated balance no longer available in the general fund.

[Inter-American Highway]

[For necessary expenses of completing the survey and construction of the Inter-American Highway, in accordance with the provisions of the Act of December 26, 1941 (55 Stat. 860), as amended, to remain available until expended, $10,000,000.] (*Supplemental Appropriation Act, 1959.*)

Appropriated 1959, **$10,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Direct obligations:			
1. Construction	$9,126,426	$17,905,190	
2. Administration and engineering	356,031	400,000	$400,000
Total direct obligations	9,482,457	18,305,190	400,000
Reimbursable obligations:

Advances and reimbursements from—			
Other accounts	−7,248		
Non-Federal sources	−1,180		
Unobligated balance carried forward	9,100,190	795,000	395,000
Appropriation (new obligational authority)	12,000,000	10,000,000	

NOTE.—Reimbursements from non-Federal sources above are derived from the proceeds of sale of personal property (23 U. S. C. 308 (a) and (b)).

1. *Construction.*—The Central American section of the Inter-American Highway is being constructed in cooperation with the Republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama. These republics pay one-third of the cost of the highway through their countries. The section will be approximately 1,573 miles of all-weather road and will connect with the completed Mexican section to permit uninterrupted motor travel from the United States to Panama.

It is estimated that all grading will be completed during calendar year 1959 leaving only bridges in southern Costa Rica to be constructed before the highway will be passable.

2. *Administration and engineering.*—A small administrative and engineering staff is maintained in Washington and in the Central American countries.

Unobligated balance carried forward	15,404,157	931,162	393,162
Appropriation (new obligational authority)			

1. *Woodrow Wilson Memorial Bridge.*—Funds provide for the construction of a bridge over the Potomac River near Jones Point, Va. During 1958 the design was completed. Construction will be initiated during 1959 and completion is expected by August 1961.

2. *Access roads (act of Sept. 7, 1950).*—Access roads to defense establishments and sources of raw materials are constructed and maintained on certification of defense essentiality by designated Federal agencies. These funds are also used for maintenance of the Pentagon network and Shirley Highway in Arlington County, Va.

3. *Construction, operation, and maintenance of roads, Alaska.*—Construction, operation, and maintenance of highways in Alaska are now financed from Federal-aid highway funds. These funds are being used to complete the programs of the former Alaska Road Commission.

4. *Reimbursement to the highway fund, District of Columbia.*—This fund reimbursed the District of Columbia for part of construction costs of a highway railroad grade separation in the vicinity of East Capitol Street.

GENERAL PROVISIONS—BUREAU OF PUBLIC ROADS

[None of the money appropriated for the work of the Bureau of Public Roads during the current fiscal year shall be paid to any State on account of any project on which convict labor shall be employed, but this provision shall not apply to labor performed by convicts on parole or probation.]

[During the current fiscal year authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads may be performed for other Government agencies, cooperating foreign countries, and State cooperating agencies, and reimbursement for such services (which may include depreciation on engineering and road-building equipment used) shall be credited to the appropriation concerned.]

[During the current fiscal year appropriations for the work of the Bureau of Public Roads shall be available for expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment for distribution to projects under the supervision of the Bureau of Public Roads, or for sale or distribution to other Government activities, cooperating foreign countries, and State cooperating agencies, and the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) may be reimbursed to current applicable appropriations.]

[Appropriations to the Bureau of Public Roads may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Bureau, and for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of $100 per diem: *Provided,* That not] *Not* to exceed $10,000 may be expended *during the current fiscal year* for services of individuals employed *pursuant to section 15 of the act of August 2, 1946 (5 U. S. C. 55a),* at rates in excess of $50 per diem. (*Department of Commerce and Related Agencies Appropriation Act, 1959.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations, as follows:
"Mutual security," funds appropriated to the President.
"Construction," Central Intelligence Agency.
"Plant acquisition and construction," Atomic Energy Commission.
"Roads and trails for States, national forests fund," Forest Service, Department of Agriculture.
"Forest roads and trails," Forest Service, Department of Agriculture.
"Salaries and expenses," Agricultural Research Service, Department of Agriculture.
"Access roads, Department of Defense."
"Military construction, Air Force."
"Military construction, Army."
"Operation and maintenance, Army."
"Military construction, Navy."
"Construction (liquidation of contract authorization)," National Park Service, Department of the Interior.
"Road construction and maintenance," Bureau of Indian Affairs, Department of the Interior.
"Construction," Bureau of Land Management, Department of the Interior.
"Management of lands and resources," Bureau of Land Management, Department of the Interior.
"Construction and rehabilitation," Bureau of Reclamation, Department of the Interior.
"Rama road, Nicaragua," Department of State.
"Buildings management fund," General Services Administration.
"Salaries and expenses," National Science Foundation.

Financing—Continued			
Balance carried forward:			
Cash	$226,307,925	$71,000,000	
U. S. securities (par)	822,226,000	568,000,000	$414,900,000
Total transfers and balances	2,650,049,810	3,191,533,925	3,551,000,000

The Highway Revenue Act of 1956 (70 Stat. 374) provides for the transfer from the general fund of sums equal to certain percentages of taxes received on gasoline, diesel fuel, trucks, buses, tires, etc. The Secretary of the Treasury estimates the amounts to be so transferred.

In turn, annual appropriations are authorized from this trust fund to Federal-aid highways (trust fund). Amounts in the fund not currently required are invested in United States securities, and interest thereon is added to the fund.

As indicated in the above schedules, it is estimated that revenue under existing legislation now going into the trust fund will be insufficient to cover expenditures in 1960 by $241 million. Legislation will be proposed to increase motor fuel taxes by 1½ cents per gallon in order that adequate revenue is available in the fund to liquidate past obligations under the Federal-aid highway program and to assure that future authorizations can be apportioned as they become available. This tax increase would become effective July 1, 1959, and remain in force until June 30, 1964.

The budget also proposes to transfer the financing of the Department of Commerce forest and public lands highways programs from the general fund to the Highway trust fund and, accordingly, the above schedules in 1960 have been adjusted to reflect this proposal.

It is proposed also that the revenues from aviation gasoline tax that presently go into the Highway trust fund be retained in the general fund as part of the user charge program for aviation. This proposal is shown under Proposed for later transmission.

The status of the fund is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Investment in U. S. securities at beginning of year (par)	$404,444,000	$822,226,000	$568,000,000

Proposed for later transmission:

Highway Trust Fund

Under proposed legislation, 1960.—Current revenue from excise taxes that goes into the Highway trust fund is no longer adequate for financing the Federal-aid highway programs authorized by the 1956 and 1958 highway acts. It is estimated that there will be a deficit of $241 million in 1960 which will increase in later years. Legislation is proposed to cover this deficit by increasing the present 3-cent tax on gasoline, diesel, and special motor fuels by 1.5 cents per gallon to become effective July 1, 1959, and extend through June 30, 1964. The added revenue would provide sufficient funds to meet past obligations incurred under the highway program and permit full apportionment of the 1961 and 1962 authorizations without waiving section 209 (g) of the 1956 Highway Revenue Act. This proposal is made to maintain the self-financing features of the Highway trust fund and continue on schedule the construction of the interstate system.

	1958 actual	*1959 estimate*	*1960 estimate*
Increase in trust fund receipts:			
Excise taxes (increase of 1.5 cents per gallon on motor fuel)			$723,000,000
Interest on investments			1,000,000
Increase in balances of the fund			724,000,000

Under proposed legislation, 1960.—Revenue from the 3-cent excise tax on aviation gasoline now goes into the Highway trust fund; and subsequently, 1 cent of the 3-cent tax is refunded to the taxpayer. Legislation is proposed elsewhere in the budget to initiate an airways user charge program. Under this proposal, the revenue from the aviation gasoline tax would be retained in the general fund. If this proposal is enacted, $34 million of aviation gas tax revenue would not be transferred to the trust fund in 1960.

	1958 actual	*1959 estimate*	*1960 estimate*
Reduction in trust fund receipts: Excise taxes (transfer from general fund receipts)			$34,000,000
Reduction in balances carried forward			34,000,000

Federal Reserve Bank of St. Louis

NATIONAL BUREAU OF STANDARDS

The National Bureau of Standards is the agency of the Federal Government responsible for the national standards of physical measurement. Against these standards, all the working standards of the Nation—those used by scientists and engineers in research and development, those used by industry in the measurement and production of interchangeable parts, and those used by other Government and State agencies to ascertain conformity—are calibrated. Closely associated with the standards activity, the Bureau serves science, industry, and Government as a national laboratory conducting research and development on methods of measurement and instrumentation; determining fundamental physical constants and basic properties of materials; developing improved methods for testing materials and equipment; developing codes and specifications; and assisting other Government agencies through advisory services on technical problems and by invention and development of devices to meet special needs.

Supplemental estimates for 1959 are anticipated under Proposed for later transmission for both the Expenses and Plant and equipment appropriations to meet increased pay costs for scientists and engineers, authorized by the Civil Service Commission and effective December 29, 1957. Scientific and engineering pay costs are excluded from the program and financing statement for the current year, whereas the general pay increase is included in the schedules.

Current authorizations:

[EXPENSES] *RESEARCH AND TECHNICAL SERVICES*

For expenses necessary in performing the functions authorized by the Act of March 3, 1901, as amended (15 U. S. C. 271–278[c]*b*), including general administration; operation, maintenance, alteration, and protection of grounds and facilities; and improvement and construction of [temporary or special] facilities as authorized by [section 2 of the Act of July 21, 1950 (15 U. S. C. 286); $11,500,000] *the Act of September 2, 1958 (72 Stat. 1711); $17,500,000, of which not to exceed $1,275,000 shall be available for payments to the "Working capital fund", National Bureau of Standards, for additional capital: Provided,* That during the current fiscal year the maximum base rate of compensation for employees appointed pursuant to the Act of [July 21, 1950 (15 U. S. C. 285)] *September 2, 1958 (72 Stat. 1711),* shall be equivalent to the entrance rate of GS–12. *(15 U. S. C. 271–278b; 40 U. S. C. 14a; 5 U. S. C. 596a; 72 Stat. 1711, 1712; Department of Commerce and Related Agencies Appropriation Act, 1959.)*

Proposed supplemental due to pay increases		828,000	

Research and technical services.—The increase of $5,172,000 proposed for the research and technical services of the National Bureau of Standards will permit significant expansion in selected urgent areas of research, allow reorientation of certain programs now conducted with other agency funds toward the Bureau's primary mission, and provide for augmentation of the Bureau's research equipment. The Bureau's programs of basic and applied research, instrument and materials development, testing, calibration, and general technical services are classified under six major activities:

1. *Physics and electronics.*—This activity includes the work of the optics and metrology, heat, atomic and radiation physics, electricity, radio standards, and data processing systems divisions. These divisions will lead the expanded Bureau program in high-temperature and high-pressure research. Other areas of expanded activity include research on atomic standards of length, development and improvement of electrical standards at radio frequencies, and studies of data-processing systems applications.

2. *Chemistry and metallurgy.*—This activity includes the work of the chemistry, organic and fibrous materials, metallurgy, and mineral products divisions. In addition to an expanded program to determine the properties of materials under extreme situations, a new program will be initiated to make crystals of very high purity available to National Bureau of Standards laboratories and to other interested research institutions.

3. *Mechanics and engineering.*—This activity includes the work of the mechanics, building technology, and cryogenics engineering divisions. These divisions will contribute to the Bureau's expanded high-temperature and pressure programs and also conduct an increased program of study of the properties of materials at very low temperatures.

4. *Radio propagation.*—This activity includes the work conducted by the Bureau's radio propagation laboratories at Boulder, Colo., and other supplementary field sites. The program planned for 1960 includes expanded basic research on upper atmosphere physics as well as research on radio propagation systems.

5. *General services.*—This activity includes those technical programs of the Bureau which are primarily directed to supporting other activities of the Bureau and the cost of providing free calibration services to States. Included are the applied mathematics division, the office of weights and measures, and office of basic instrumentation.

6. *Proposed payment to working capital fund, National Bureau of Standards.*—Additional equipment required in support of expanded Bureau research programs will be procured by the Working capital fund and added to the depreciable equipment inventory of that fund. Payments from the Research and technical services appropriation in amounts not to exceed $1,275,000 will be made to the Working capital fund to finance these capital outlays.

3. Construction	69,467	21,000	1,215,000
4. Acquisition of field sites			350,000
Total obligations	470,220	1,064,156	1,715,000
Financing:			
Unobligated balance brought forward	−268,159	−255,156	
Unobligated balance carried forward	255,156		
New obligational authority	457,217	809,000	1,715,000
New obligational authority:			
Appropriation	$450,000	$786,000	$1,715,000
Transferred from "Grants in aid for airports, Federal Airport Act," Federal Aviation Agency (72 Stat. 243)	7,217		
Appropriation (adjusted)	457,217	786,000	1,715,000
Proposed supplemental due to pay increases		23,000	

This appropriation provides for major construction and improvements to the plant facilities of the National Bureau of Standards and procurement of major special facilities.

The National Bureau of Standards laboratories and administrative offices occupy 86 buildings located on a 69-acre tract at Connecticut Avenue and Van Ness Street, Washington, D. C. The Bureau has a large laboratory on a 217-acre site at Boulder, Colo., and several small field sites, some of which are outside the continental limits.

1. *Facilities.*—This activity includes construction and other work required to effect necessary improvements in the Bureau's facilities. The budget includes $100,000 for initial improvements at field sites to be purchased for the Central Radio Propagation Laboratory and $50,000 for minor construction and improvements projects needed to make existing facilities more useful for current programs.

2. *Special equipment.*—This activity includes the procurement of large and unusual items of equipment. None are proposed for 1960.

3. *Construction.*—The budget includes $1,215,000 for construction of additions to the radio laboratory building at Boulder, Colo. In accordance with the President's policy of including facilities for protection against radiological fallout in new construction, when appropriate, funds are included for construction of a fallout shelter in the laboratory addition.

4. *Field site acquisition.*—The budget would provide $350,000 for the purchase of land for field stations for the Central Radio Propagation Laboratory.

Financing applied to program	29,951,795	34,735,371	35,924,000

This fund finances from advances and reimbursements all operations of the National Bureau of Standards except major construction projects. The principal of the fund, as of June 30, 1958, consisted of $5 million in appropriations and $36 million in net donated assets. The Government investment is estimated to grow through donation of cash and other assets financed by National Bureau of Standards' appropriations to $44.1 million by June 30, 1960.

Operating costs—Technical program.—Research and technical services are conducted by the National Bureau of Standards on the request of other Government agencies and the public, as well as in support of the Bureau's own research program. It is estimated that in 1960 a larger portion of the Bureau's total operating costs will be financed through its own appropriations than has heretofore been the case. Although the other agency program, excluding certain large costs incurred in connection with the International Geophysical Year and other special activities, is estimated to remain at approximately the same level in 1960 as in 1958, the percentage of the Bureau's total program financed through other agencies' funds will decline from 64% to 50% in the budget year.

Plant improvement and special equipment.—This activity includes the costs of the working capital fund which are reimbursed from the Bureau's capital outlay appropriations. The plant improvements and special equipment procured are donated to the fund upon completion and carried as assets of the fund at cost.

Other operating costs.—Cost is incurred when equipment and material are donated by the fund to other agencies and when excess materials are sold, based upon the book value of the equipment and materials.

Capital outlay.—Working capital of the fund is invested in facilities and equipment which are subject to depreciation charges. In 1960 the equipment requirements of the expanded Bureau research program will require an augmentation of working capital, which will be accomplished through payments to the fund for additional capital from the National Bureau of Standards' appropriation for Research and technical services.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

WEATHER BUREAU

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the Weather Bureau, including maintenance and operation of aircraft; not to exceed $25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and not to exceed $10,000 for maintenance of a printing office in the city of Washington, as authorized by law; [$39,318,000] *$48,855,000*: *Provided*, That during the current fiscal year, the maximum amount authorized under section 3 (a) of the Act of June 2, 1948 (15 U. S. C. 327), for extra compensation to employees of other Government agencies for taking and transmitting meteorological observations, shall be $5 per day; and the maximum base rate of pay authorized under section 3 (b) of said Act, for employees conducting meteorological investigations in the Arctic region, shall be $6,500 per annum, except that not more than five of such employees at any one time may receive a base rate of $9,000 per annum, and such employees may be appointed without regard to the Classification Act of 1949, as amended. (*15 U. S. C. 311–313, 325–328; P. L. 85–726 (72 Stat. 783, sec. 803), 85th Congress; Department of Commerce and Related Agencies Appropriation Act, 1959.*)

Appropriated 1959, [a] **$41,158,000** Estimate 1960, **$48,855,000**

[a] Includes $1,840,000 appropriated in Supplemental Appropriation Act, 1959.

Proposed supplemental due to pay increases		2,850,000	

The Weather Bureau observes, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of United States commerce, industry, agriculture, and the general public. An increase of $4.8 million is proposed (*a*) to provide additional services to aviation, (*b*) to transfer civilian weather functions from the Department of Defense and (*c*) to operate and maintain new meteorological equipment.

1. *General weather services.*—Regularly scheduled forecasts are issued for United States territory and waters with special emphasis on floods and severe storms. Special forecasts and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper-air observations are taken at several hundred locations to serve forecasting requirements. Current weather information is disseminated widely for the benefit of aviation and other interests. Several thousand voluntary and part-time observers record river stage, temperature, and precipitation readings for use in flood-control and water-use activities. All observational records are combined to form the climatic history of the United States and possessions.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *Research.*—Research is directed primarily toward the development of new operational and forecasting techniques directly applicable to major weather service programs, but also includes some supplemental studies of basic meteorology and meteorological physics. Intensive investigations of hurricanes will be continued using leased aircraft operated with Weather Bureau funds in place of planes heretofore furnished by the Air Force.

The accuracy of weather observations, forecasts, and warnings is being improved with new instruments and by modernizing existing facilities. The estimate covers the procurement and installation of upper-air sounding equipment, radar microwave links, and cloud ceiling and visibility measuring equipment required for the Federal Airway System, and living quarters for the staff of the upper-air sounding station at Shemya, Alaska. Flood warnings will be improved through purchase of new precipitation measuring and river gaging equipment.

WEATHER BUREAU—Continued

Intragovernmental funds—Continued

ADVANCES AND REIMBURSEMENTS—Continued

The Weather Bureau gathers river and rainfall observations, conducts climatological studies and studies of distribution of radiological fallout and atmospheric pollution, and procures technical equipment for other agencies. Contributions are also made by the military services toward the cost of the joint numerical weather prediction program and for other computer services.

Program by activities:			
Area assistance (obligations)			$16,000,000

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance carried forward			$39,000,000
Proposed supplemental appropriation			55,000,000

Under proposed legislation, 1960.—Legislation will be proposed to authorize broader assistance to areas of substantial and persistent unemployment, including loans and grants, for the purpose of promoting economic redevelopment in such areas. An appropriation of $55 million is anticipated for the program of which $50 million is to provide capital for a revolving fund.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 102. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (5 U. S. C. 596a), to the extent and in the manner prescribed by said Act.

SEC. 103. Appropriations in this title available for salaries and expenses shall be available for [expenses of attendance at meetings of organizations concerned with the activities for which the appropriations are made;] hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but, unless otherwise specified, at rates for individuals not to exceed $50 per diem; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131). (*Department of Commerce and Related Agencies Appropriation Act, 1959.*)

GENERAL PROVISIONS

SEC. 401. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not heretofore authorized by the Congress.

SEC. 402. No part of any appropriation contained in this Act shall be used to pay any expenses incident to or in connection with participation in the International Materials Conference. (*Department of Commerce and Related Agencies Appropriation Act, 1959.*)

DEPARTMENT OF DEFENSE—MILITARY FUNCTIONS

The 1960 budget for the military functions of the Department of Defense is presented in a new form which will permit consideration of the budget on a more uniform basis. The Defense budget is now organized under six main titles. The first five cover the major areas of the defense program:

Military personnel, which includes pay and allowances and other costs of both active duty and reserve forces personnel, and retired pay;

Operation and maintenance, which includes both the active and reserve forces, and establishment-wide activities;

Procurement for both the active and reserve forces;

Research, development, test, and evaluation costs;

Military construction for both the active and reserve forces.

The sixth title covers the revolving and management funds of the Department of Defense.

Total defense expenditures in 1960 are estimated at $40,945 million, an increase of $145 million over the amount estimated for 1959 and almost $2 billion greater than the amount spent in 1958. New obligational authority for 1960 is $40,850 million—$288 million less than 1959 but $4.1 billion more than 1958.

RECAPITULATION OF BUDGET AUTHORIZATIONS AND EXPENDITURES

[In millions]

Reserve forces	82	27	61	98	88	64
Revolving and management funds	130	----	30	−1,061	−724	−405
Total, Department of Defense	36,747	41,138	40,850	39,062	40,800	40,945

[1] Additional obligational authority available by transfer: 1958, $582 million; 1959, $535 million; 1960, $340 million.

[2] Figures shown for 1958 and 1959 under the new titles "Procurement" and "Research, development, test, and evaluation" are estimates and are not completely comparable to the estimates shown for 1960. The "Research, development, test, and evaluation" appropriations for 1960 contain certain items and programs that were funded in other appropriations in prior years. In adjusting 1958 and 1959 data to a basis comparable with the proposed 1960 appropriation structure, the adjustments were limited to the items and projects that were shifted in 1960. It was not feasible to effect complete comparability by adjustment for items and projects that would have been shifted to "Research, development, test, and evaluation" appropriations if the concept proposed for 1960 had been introduced in 1958 and 1959.

[3] Additional obligated authority available by transfer: 1958, $8 million.

Military personnel.—Total military personnel expenditures in 1960 are estimated at $11,934 million, $26 million higher than in 1959 and $316 million more than 1958.

Active duty personnel: Expenditures for active forces military personnel in 1960 are estimated at $10,617 million, slightly less than 1959 but about $169 million more than in 1958. The 1960 programs provide for a total strength of 2,520,000 on June 30, 1960—5,000 below the June 30, 1959 level.

ACTIVE FORCES MILITARY PERSONNEL

[In thousands]

	June 30, 1958	*June 30, 1959*	*June 30, 1960*
Total, Department of Defense	2,600	2,525	2,520
Army	898	870	870
Navy	641	630	630
Marine Corps	189	175	175
Air Force	871	850	845

Average man-years in 1960 are estimated at 2,523,000 compared with an average of 2,571,000 in 1959 and 2,673,000 in 1958. The rise in expenditures over this period despite the decline in man-years reflects an increase in the estimated average cost per military man from $3,885 in 1958 to $4,150 in 1959 and $4,220 in 1960. The increase of $265 per man in 1959 reflects, for the most part, the effect of the military pay raise which became effective in June 1958. The increase of about $70 per man in 1960 is caused chiefly by (1) required increases in the Government's social security contributions as employer, (2) additional longevity pay reflecting the continued maturing of the forces, and (3) the proficiency pay provisions of the new military pay law. Proficiency pay in 1959 and 1960 will continue to be concentrated in the critical technician and combat leadership groups.

Reserve forces: Reserve personnel expenditures in 1960 are estimated at $602 million, $25 million lower than in 1959 and $6 million less than in 1958. The 1960 budget will provide for about 1,030,000 reservists on paid status at year end compared with 1,082,000 at the end of 1959 and 1,025,000 at the end of 1958.

RESERVE FORCES MILITARY PERSONNEL IN PAID STATUS

[1] Less than 500.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The reduction from June 30, 1959, to June 30, 1960, is chiefly in the Army Reserve and Army National Guard. The reduction of about 23,000 in the Army Reserve and 40,000 in the Army National Guard is offset in part by an increase of 8,000 in the Air Force Reserve and 2,000 in the Air National Guard.

Major emphasis in 1960 will continue to be given to improving the training and combat readiness of the reserve components. The 6-month Ready Reserve training plan has raised the proportion of basically trained reservists in the Army Reserve and Army National Guard units from 70% in June 1956 to almost 100% at present, enabling most of the reserve units to advance to unit training schedules. This concentration on unit, rather than individual, training has been designed to enhance the future mobilization readiness of these components. In addition, the Army Reserve and Army National Guard are being reorganized along pentomic lines similar to the reorganization completed in the active Army last year.

The Army National Guard in 1960 will man an increased number of on-site NIKE battalions for the air defense of the United States. An effective program of shipboard training for the Naval Reserve under the Selected Reserve Training System will place crews on more than 28 destroyers or destroyer escorts by the end of 1959. A total of 48 ships are planned for this program by the end of 1960. The aircraft inventory of the Air National Guard, already 90% jet, will be further modernized during 1960 through the introduction of more modern jet aircraft. The equipping and readiness of the other reserve components will also be improved in 1960.

Retired pay: Expenditures for retired pay in 1960 are estimated at $715 million, $70 million more than 1959 and $153 million more than in 1958. A total of about 257,000 persons will be receiving retired pay at the end of 1960 compared with 233,000 at the end of 1959 and 215,000 at the end of 1958. The upward trend in both numbers of retired persons and their cost is expected to continue and even accelerate in future years.

Operation and maintenance.—Operation and maintenance funds support the day-to-day operations of the Department of Defense, including those of the Office of the Secretary, the unified and specified combatant commands, and the three military departments. Expenditures for operation and maintenance of the active and reserve forces in 1960 are estimated at $10,385 million, approximately the same as 1959 but about $495 million more than 1958. The average man-years of military and civilian personnel, the numbers of active aircraft and active ships, and flying hours are estimated to decline from 1958 to 1959 and into 1960. Fleet steaming hours will also be less in 1960 than in 1958, although slightly more than in 1959.

Running counter to these trends in the levels of activity are the higher unit costs involved in operating and maintaining the increasingly complex weapons and equipment entering the military inventories. The cost per flying hour, the cost per overhaul for both aircraft and ships and the average cost per civilian employee in operation and maintenance work all continue to increase steadily from 1958 through 1960, thereby offsetting the savings achieved by tighter operating schedules, better managed maintenance support, and smaller inventories.

The number of hospitals operated, and the patient loads in hospitals are down very slightly from 1958 to 1960, but higher unit costs plus the increasing cost of the dependent medical care program result in higher total costs for the medical program as a whole.

While the training load carried by the four services is expected to drop from 1959 to 1960, it is greater than in 1958 because of the continued increase in the proportion of higher technical skills required.

The generally higher tempo of operations required of the fleet in recent years has greatly increased the wear and tear on ships and their equipment. Accordingly, special provision has been made in this budget for a higher level of overhaul and alteration of naval ships in order to improve the condition and readiness of the fleet.

Other elements of the operation and maintenance program which show a continued increase in activity and expenditures are the operation of additional sectors of the semi-automatic ground environment system (SAGE), a vital element in the continental air defense network, and the maintenance of family housing.

For the past 5 years, the Department of Defense has pursued a vigorous and successful program to provide adequate housing and related facilities for our military personnel and their families, both within the continental United States and overseas. By the end of 1960 approximately 370,000 Government owned or controlled housing units will be available for occupancy and another 50,000 units are expected to be under construction. Of the 370,000 available units, an average of 317,000 will be operated and maintained by the Department of Defense, compared with 239,000 units during 1958—an increase of over 30% in 2 years.

Procurement.—Because of certain technical problems involved in rearranging the Defense budget under the new titles, the figures shown in the first table on the previous page for Procurement and for Research, development, test, and evaluation for the 3 years 1958–60 are not comparable. A more accurate picture of the trend over these 3 years may be obtained by considering Procurement and Research, development, test, and evaluation on a combined basis. Expenditures for both titles combined are estimated at about $17.3 billion in 1960—$119 million more than in 1959 and $463 million more than in 1958.

The 1960 budget provides funds for the procurement of 1,610 aircraft—703 for the Air Force, 668 for the Navy, and 239 for the Army. This total is about 150 less than in 1959 with almost all the difference in the procurement of support-type aircraft. Procurement of B–52 and B–58 strategic jet bombers and KC–135 jet tankers will actually be considerably higher in 1960 than in 1959, but no interceptors and fewer fighter-bombers will be purchased for the Air Force, reflecting the increased reliance on missiles. The Navy will buy a considerably greater number of fighters in 1960 but a somewhat smaller number of attack aircraft. The Army will buy more high performance turbo-prop observation aircraft in 1960 and fewer helicopters than in 1959.

The 1960 budget also provides increased funds for the development of the B–70—a new high altitude, supersonic intercontinental jet bomber and for a new high-speed, long-range interceptor system utilizing the F108. Both of these aircraft are expected to fly at speeds up to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

three times the speed of sound and to possess greatly increased capabilities.

As part of the growing emphasis on missiles, the 1960 budget continues support of the accelerated programs on ATLAS and POLARIS. On an overall basis it also provides for a 50% increase in funds on the TITAN ICBM and a 40% increase in funds on the MINUTEMAN ICBM. Additional funds are also provided for the THOR and JUPITER IRBM's to complete the presently planned programs for these two systems and for missile systems which will protect the United States and its allies against enemy attack by manned aircraft—BOMARC, NIKE-HERCULES, HAWK.

Missile development has reached the stage where the number of competing missile systems can be reduced. Production of the liquid propellent ballistic missile REDSTONE is to be phased out and an expanded program for the solid propellent PERSHING will be substituted. Similarly, production of the ship-based aerodynamic REGULUS II missile is being terminated as emphasis shifts to the development of the submarine-based ballistic missile POLARIS.

The 1960 shipbuilding program provides for 18 new ships and 13 conversions. The new construction program includes one attack carrier of the *Forrestal* class (conventionally powered), 6 guided missile destroyers and frigates, 3 nuclear-powered attack submarines, and 8 other vessels. The conversions include another guided missile cruiser, 8 destroyers, and 4 other vessels.

Funds for the 8 destroyer conversions represent the beginning of a new modernization program designed to improve the antisubmarine warfare (ASW) capability and extend the useful life of World War II destroyers by about 8 years.

In addition, 3 more POLARIS submarines (numbers 7–9), for which funds were appropriated in 1959, will be started in 1960. The first 3 submarines (numbers 1–3) in this program were started in 1958 and the next 3 (numbers 4–6) are being started during 1959. The 1960 budget also provides funds for the procurement of long lead-time items for the construction of additional ballistic missile submarines to be started in 1961. This orderly program of submarine construction will proceed concurrently with missile flight testing.

The intermediate-range solid propellent missile POLARIS, coupled with the nuclear-powered submarine, affords a deterrent capability comparable to that of intercontinental ballistic missiles. The navigation and communications equipment for these submarines is being specially designed for operational flexibility and for maximum use of their dispersal advantages.

The 1960 budget provides for a substantial increase in electronics and communications equipment programs. Much of the increase will go into the air defense system for equipment to detect enemy aircraft and missiles and to guide air defense weapons to their targets. The accelerated rate of procurement for the ballistic missile early warning system (BMEWS) will continue in 1960. The air defense systems SAGE and BMEWS, alone, will take one-third of the 1960 electronics and communications procurement funds.

Funds are provided for the procurement of weapons, ammunition, engineer equipment and training equipment for the Army and Marine Corps ground forces. Procurement of tanks and trucks will be increased as part of the Army's modernization program. Also scheduled for procurement in 1960 are new-type rifles and machineguns and other new weapons which will enhance the combat power of the individual soldier.

Research, development, test, and evaluation.—Expenditures for basic and applied research and for the development, test, and evaluation of new weapons and equipment are estimated at $3,384 million in 1960 and will sustain the high level of effort achieved in 1959. Funds are included under this title for the support of weapons system developments related to specific items for which production and development support funds are also included under the Procurement title of the Defense budget; for example, the POLARIS, MINUTEMAN, TITAN, and B–70. For certain other major systems, such as NIKE-ZEUS, PERSHING, and DYNASOAR, the full amounts for development, test, and evaluation are included in this title.

As in 1959 the largest amount will go for research, development, and test of missiles and related equipment. The accelerated efforts to develop an effective antiballistic missile system—the NIKE-ZEUS—will be continued in 1960. Continued attention will be given to ordnance, combat vehicles, and related equipment needed to improve the so-called conventional capabilities of the Armed Forces—their mobility, firepower, and communications. Together with the effort being supported by the new National Aeronautics and Space Administration the overall program planned for astronautics in 1960 will be significantly larger than in 1959.

Antisubmarine warfare will continue to receive special emphasis during 1960. Funds are provided for the development of improved equipment and techniques for the long range detection and tracking of submarines and for perfecting antisubmarine guided missiles and other weapons, such as a drone helicopter. Work will also continue on the development of nuclear propulsion for military aircraft. This project is financed jointly by the Department of Defense and the Atomic Energy Commission.

In the area assigned to the Advanced Research Projects Agency, funds are included for research on missile very early warning systems, ballistic missile defense and solid fuel chemistry, as well as for projects in military astronautics related to the use of military satellites for reconnaissance, navigation, and communication purposes.

Included also is $150 million for the Department of Defense Emergency Fund—the same amount as in 1959—to provide for the exploitation of breakthroughs or unanticipated developments which may occur during the coming year.

Military construction.—Expenditures for military construction in 1960 are estimated at $1.7 billion—approximately $300 million less than in 1959, and $50 million less than 1958.

Active forces: Expenditures for facilities for the active forces are estimated at $1,644 million. The 1960 program includes funds to complete the construction of presently programed NIKE-HERCULES sites for the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

protection of SAC bases, and for the completion of the operational facilities for the Missile Master control centers. Funds are also included for the construction of additional BOMARC sites and for overseas facilities for the employment of the HAWK low altitude ground-to-air missile. Additional funds are provided to continue the construction of the ballistic missile early warning system and for the improvement of the existing radar warning systems.

The 1960 budget includes funds for the construction of additional ATLAS and TITAN operational sites and for logistics facilities in support of the POLARIS program. Another increment is provided to accelerate construction of the Pacific Missile Range and for the further extension of the LORAN program. Provision is also made for the modernization and repair of the existing physical plant of the defense establishment.

Reserve components: Expenditures for facilities for the reserve forces are estimated at $64 million in 1960 compared with $88 million in 1959 and $98 million in 1958. The decline in expenditures for this purpose reflects the substantial completion of this facility construction program.

Revolving and management funds.—The $30 million of reappropriation shown under this title for 1960 is the amount to be added to the revolving fund for Wherry housing. Because of the large number of Wherry housing units being taken over by the Department of Defense for rehabilitation to acceptable standards, expenditures from this fund are exceeding receipts. The $30 million of additional authority will permit this program to go forward in 1960.

As in recent years an excess of receipts over expenditures is estimated in 1960 in the revolving and management funds of the Department of Defense. This excess of receipts serves to reduce the total of expenditures for the Department below the sum of the expenditures estimated under other budget titles. The estimate for 1960 is $405 million, reducing total net expenditures for the year to $40,945 million.

Composition of Armed Forces.—The 1960 budget for the military functions of the Department of Defense provides for military forces of about the same composition and level planned for the end of the current fiscal year.

DEPARTMENT OF DEFENSE—SUMMARY OF MAJOR FORCES

[Fiscal years 1958–60]

	Actual	*Planned*	
	June 30, 1958	*June 30, 1959*	*June 30, 1960*
Department of the Army:			
Divisions	15	14	14
Armored cavalry regiments	5	5	5
Armored combat commands	1	1	1
Brigades (infantry)	2	2	2
Battle groups (infantry)	6	8	8
Field artillery missile groups (heavy)	2	3	3
Army missile commands	4	4	4

Jet aircraft as percent of active aircraft inventory	42	44	47
Department of the Air Force:			
USAF combat wings (including missile wings)	(117)	(105)	(102)
Strategic	44	43	43
Air defense	28	27	25
Tactical (including airlift)	45	35	34
USAF combat support forces:			
Air refueling squadrons	48	59	63
MATS squadrons	27	27	24
Other specialized squadrons	62	59	59
Active aircraft inventory	22,578	20,358	19,982
Jet aircraft as percent of active aircraft inventory	62	65	65

Army.—The Army will continue to support 14 divisions and 23 other major units including 4 missile commands, 8 battle groups, and 3 field artillery missile groups (heavy) at the end of 1960—the same force planned for the end of the current fiscal year. Compared with June 30, 1958, this represents a reduction of 1 division, but an increase of 2 in the number of battle groups and an increase of 1 in the number of heavy field artillery missile groups. There has also been a small increase in the number of separately organized combat battalions. The net increase in this case results from the activation of additional tactical surface-to-surface missile units.

Although the total number of air defense battalions decreases slightly from 1959 to 1960, the number of guided missile battalions will continue to increase as gun battalions phase out of the forces and are replaced by the much more effective surface-to-air missile units. This increased effectiveness will be considerably enhanced by the continued conversion from NIKE-AJAX to NIKE-HERCULES missiles which are not only greatly superior in range and altitude, but are also capable of being armed with a nuclear warhead. In addition, there will be an increase in the number of battalions armed with the HAWK guided missile for defense against low-flying aircraft.

The Army's active aircraft inventory will continue to grow and will be nearly 7% higher than June 30, 1958.

Navy and Marine Corps.—The Navy will continue to operate 864 active ships during 1960, the same number planned for the end of the current fiscal year.

Of the 864 active ships, 389 will be warships, an increase of 2 over June 30, 1959. There will be a very marked increase in the combat effectiveness of the fleet as modern vessels from new construction and conversion replace older ones. By June 30, 1960, 5 *Forrestal* class attack carriers will have replaced *Essex* class carriers and 3 more will be under construction, including the first nuclear-powered carrier. Similarly, 8 cruisers will have been converted to guided missiles armament. Five more will be under construction or conversion including the first nuclear-powered cruiser. Five guided missile destroyers and frigates will be in commission with a large number still under construction, including the first nuclear-powered frigate. There will also be significant additions to the nuclear-powered attack submarine force and the first POLARIS-firing fleet ballistic missile submarines are planned to be in commission during calendar year 1960.

Digitized for FRASER

Federal Reserve Bank of St. Louis

The Navy's antisubmarine warfare capabilities are receiving particular attention and the budget provides for appreciable improvements. The fleet rehabilitation and modernization program described earlier is aimed almost entirely at improving the condition and strengthening the capabilities of antisubmarine warfare vessels. These modernized ships, which will begin to rejoin the fleet by the end of 1960, will have significantly better sonars, and will carry ASW helicopters and new ASW weapons. In conjunction with this program, production quantities of much improved antisubmarine torpedoes will be available to the fleet by June 30, 1960.

As another part of the multi-pronged attack on the ASW problem, over 600 antisubmarine warfare aircraft will have been modified to enhance greatly their detection capability. Finally, during 1960, two additional special ASW task forces will be operational in performing functions similar to that of the highly successful Task Force ALPHA.

The number of carrier air groups and carrier antisubmarine squadrons will remain the same, but the number of patrol and warning squadrons will rise by three. There will be a very slight decline in the Navy's active aircraft inventory due to reductions in training, support, and Naval Reserve aircraft. The Navy's inventory will continue to show a rising percentage of jet-powered aircraft.

The Marine Corps will continue to support 3 divisions and 3 air wings in their traditional state of high combat readiness. Parallel with the Army, the Marine Corps will also activate additional battalions equipped with the HAWK guided missile for the protection of its forces in the field against low-level air attack.

Air Force.—There will be a modest reduction in the number of wings in the Air Force, from 105 at the end of the current fiscal year to 102 at the end of 1960. The reduction of 2 wings in the air defense force will be offset by the further modernization of the inventory with all-weather "Century" series aircraft, an increase in both the number and effectiveness of air-to-air missiles, and the acquisition of a considerable operational capability with the BOMARC ground-to-air missile. This weapon is capable of attacking enemy bombers at supersonic speeds, at considerable distances from the launching site. Controlled in the air battle situation by the semi-automatic ground environment system (SAGE), BOMARC adds a new dimension to the continental air defense system.

The number of wings in the tactical forces will be reduced by 1, but the strategic forces will remain at 43 wings, unchanged from the end of the current fiscal year. The SAC bomber force will continue to be strengthened during the year by further deliveries of B–52 intercontinental bombers and KC–135 jet tankers. By the end of the current fiscal year all of the 11 heavy bomber wings will have been converted from 30 B–36's to 45 B–52's per wing. In addition, by the end of 1960 a portion of a twelfth wing will be operational. The bomber force will also be strengthened by the first B–58 supersonic bombers in operational service. The introduction of the HOUND DOG air-to-surface missile to the B–52 force will improve its ability to penetrate enemy defenses.

Of great significance to our deterrent capability is the ATLAS ICBM, which will become operational during the current fiscal year. In addition, a considerable number of THOR and JUPITER IRBM units will have been deployed overseas for use by our allies.

The number of MATS squadrons will decline somewhat in 1960. However, the overall ton-mile airlift capacity of the Air Force will continue to increase as the new high load, high performance transports are delivered.

Overall, there will be a small reduction in the active aircraft inventory of the Air Force. The percent of jet aircraft in the inventory is not expected to increase since the bomber and air defense force will be entirely jet equipped by the end of the current fiscal year.

In summary, the 1960 budget provides for the Department of Defense as follows:

New obligational authority.—$40,850 million, and in addition $340 million to be derived by transfers from the revolving funds of the Department of Defense. For the Department of the Army there is provided $9,357 million and $200 million to be transferred from the Army stock fund. For the Department of the Navy there is provided $11,370 million and $90 million to be transferred from the Navy and Marine Corps stock funds. For the Air Force there is provided $18,682 million and $50 million to be transferred from the Air Force stock fund. $1,441 million of new obligational authority is provided for the Office of the Secretary of Defense, including the Advanced Research Projects Agency.

Direct obligations.—The gross direct obligational program for 1960 contemplates utilization of $697 million of the funds provided by the Congress in fiscal year 1959 in excess of the budget request and $275 million in projected recoveries of prior obligations in addition to the new obligational authority being requested for 1960.

[In millions]

	1958	*1959*	*1960*
Department of the Army	$9,725	$9,719	$9,907
Department of the Navy	11,511	12,510	12,081

NOTE.—The balances at the start of 1960 have been adjusted between accounts to reflect 1960 changes in appropriation structure.

[1] Includes deficiencies in the Military personnel, Army, 1957 account, in the amount of $390 thousand and in the 1956 account in the amount of $7,246 thousand.

[2] Includes deficiencies in the Military personnel, Army, 1957 account, in the amount of $9,837 thousand and in the 1956 account in the amount of $7,084 thousand.

[3] Reflects transfers between accounts.

[4] Reflects amounts of new orders, deliveries, and adjustment to orders as shown in the table at the end of this chapter, pp 538-539.

[5] Includes unfilled orders of $6,706 thousand from other accounts which will become reimbursements in a subsequent year.

[6] Includes deficiency in the Medical care, Navy, 1958 account, in the amount of $6,882 thousand.

[7] Reflects adjustment of balances downward in expired accounts (net) as follows: Military personnel, Marine Corps—$355 thousand; Aircraft and facilities, Navy—$124 thousand; Ships and facilities, Navy—$3,000 thousand.

[8] Excludes capital transfer in 1960 of $500 thousand.

[9] Excludes capital transfer in 1960 of $75 thousand.

[10] Excludes capital transfers in 1960 of $575 thousand.

[11] Excludes adjustment of balances downward in expired accounts in 1960 of $3,479 thousand.

MILITARY PERSONNEL

The following narrative statement covers the active duty appropriations for the Army, Navy, Marine Corps, and Air Force.

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel on active duty including cadets and midshipmen at the three service academies, aviation cadets, and other officer candidates.

The number of active duty military personnel provided for is shown in the following table. The personnel in the civilian components of the Defense forces are described under the pertinent appropriations below.

	Year-end number			*Average number*		
		Estimate			*Estimate*	
	Actual 1958	*1959*	*1960*	*Actual 1958*	*1959*	*1960*
Defense total	2,599,848	2,525,000	2,520,000	2,673,405	2,570,591	2,523,075
Officers	325,460	318,515	316,045	331,112	322,352	316,248
Enlisted	2,264,290	2,194,091	2,190,911	2,331,735	2,236,965	2,193,749

Additional amounts required for 1959 to support the average numbers in the above table for Navy and Air Force are shown under Proposed for later transmission.

Provision is made for amounts otherwise available as quarters allowances to be paid (1) to the revolving fund for Acquisition, rehabilitation, and rental of Wherry Act housing, in cases where such housing is assigned as public quarters, (2) as mortgage payments on Capehart housing, (3) to the Commodity Credit Corporation in payment for foreign currencies used to construct family housing, and (4) to the operation and maintenance appropriations to maintain and operate surplus commodity housing.

In addition, provision is made for payment for proficiency advancements to selected enlisted personnel in critical-skill areas. Funds are provided for advancement of 80,000 men by June 30, 1959, and 163,000 men by June 30, 1960. It also provides for the Government's contribution to the Federal old-age and survivors insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act, purchase of individual clothing for initial issue to enlisted personnel, replacement of clothing issues in Korea, and for payment of clothing maintenance allowances.

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel including emergency and operational rations.

3. *Movements, permanent change of station.*—This provides for permanent change of station travel for individuals and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household goods in commercial facilities, and transportation of personal property. Payment for services furnished by the Military Sea Transportation Service and Military Air Transport Service for transportation to and from overseas of military personnel, their dependents, household goods and automobiles is also included.

4. *Other costs.*—This provides for expenses of apprehension of deserters and escaped military prisoners, payment of interest on money deposited by enlisted personnel, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

Current authorizations:

MILITARY PERSONNEL, *ARMY*

For pay, allowances, individual clothing, *subsistence,* interest on deposits, *gratuities,* [and] permanent change of station travel (*including all expenses thereof for organizational movements*), *expenses of temporary duty travel between permanent duty stations,* for members of the Army on active duty (except those undergoing reserve training), [; expenses incident to movement of troop detachments, including rental of campsites and procurement of utility and other services:] expenses of apprehension and delivery of deserters, prisoners, and [soldiers] *members* absent without leave, including payment of rewards [(] *of* not to exceed $25 in any one case[), and costs of confinement of military prisoners in nonmilitary facilities; donations of not to exceed $25 to each prisoner upon each release from confinement in an Army or contract prison (other than a disciplinary barracks) and to each person discharged for fraudulent enlistment; authorized issues of articles to prisoners, other than those in disciplinary barracks, subsistence of enlisted personnel, selective service registrants called for induction and applicants for enlistment while held under observation, and prisoners (except those at disciplinary barracks), or reimbursement therefor while such personnel are sick in hospitals; and subsistence of supernumeraries necessitated by emergent military circumstances; $3,175,961,000], *$3,314,063,000,* and, in addition, [$375,000,000] *$200,000,000,* to be derived by transfer from the Army Stock Fund[: *Provided,* That section 212 of the Act of June 30, 1932 (5 U. Provision is made for military personnel costs of training the Army Reserve and the Reserve Officers' Training Corps.

1. *Reserve personnel.*—Included are funds for military personnel costs of pay, travel, subsistence, and clothing. Provision is made for paid drills for members of organized units and staff and faculty of USAR schools. One mandatory tour of paid active duty for training is provided each year for members receiving drill pay and for mobilization designees and USAR school students who do not receive drill pay. School training is provided for selected members of the Ready Reserve. It is estimated that 17,000 enlisted reservists will begin a 6-month period of active duty training in 1959 and the same number in 1960. The paid personnel strength is indicated in the following table:

ARMY RESERVE PERSONNEL STRENGTH

This appropriation provides for pay and allowances, subsistence, clothing, and travel costs of naval reservists and Reserve officer candidates. The Reserve personnel program is summarized in the following table:

NAVAL RESERVE PERSONNEL STRENGTH

[In paid status]

	1957 actual	*1958 actual*	*1959 planned*	*1960 proposed*
End of year:				
Officers	38,576	34,045	33,878	34,118
Enlisted	115,736	104,499	111,055	111,050
Total	154,312	138,544	144,933	145,168
Average:				
Officers	37,988	34,298	33,996	33,322
Enlisted	118,744	106,842	107,463	107,390
Total	156,732	141,140	141,459	140,712

The program provides 48 paid drills and 15 days of active duty training for personnel assigned to aviation squadrons, enlisted training units, staff and faculty of officer schools, and selected mobilization billets. Forty-eight destroyers or escort ships and 26 aviation antisubmarine warfare squadrons manned by inactive ready reservists will be included in the program by the end of 1960 and will be immediately ready to augment fleet requirements upon mobilization. Twenty-four paid drills are provided for other mobilization assignees, and for reservists assigned to the administration of volunteer units. Reservists whose mobilization duties do not require frequent inactive duty training are given active duty training only. Estimated strengths by training categories for 1960 are as follows:

Paid drills	*Paid days of active duty for training*		*Beginning strength*	*Average strength*	*Ending strength*
48	15	Officers	23,006	22,234	22,968
		Enlisted	109,817	106,126	109,832

This provides for pay and allowances, travel, subsistence and clothing requirements incident to training and instruction of Air Force Reserve personnel and Reserve Officers' Training Corps students. The Reserve program

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

is designed to provide trained units to supplement regular Air Force units and trained individuals to augment Regular Air Force organizations and activities. The Reserve Officers' Training Corps program is designed to provide qualified junior officers for the Regular Air Force and the Reserve. During 1960, there will be 15 combat training wings plus supporting units, a continuation of the 1959 force.

AIR FORCE RESERVE PERSONNEL STRENGTHS

[In paid status]

	1957 actual	*1958 actual*	*1959 planned*	*1960 proposed*
Ending:				
Officers	26,292	21,481	28,181	30,218
Airmen	29,286	30,798	36,177	41,684
Total	55,578	52,279	64,358	71,902
Average:				
Officers	32,592	28,248	26,679	29,295
Airmen	27,162	32,407	33,181	39,177
Total	59,754	60,655	59,860	68,472

The program is based on 48 paid drills for personnel assigned to Reserve flying training wings, combat support training units, and mobilization assignees who occupy positions that require they be proficient in an aeronautical skill. Specialist training personnel and nonrated mobilization assignees have been provided 24 paid drills. Those individuals receiving 15 days active duty only are mobilization assignees assigned to major commands whose civilian occupations are so closely allied to their military specialties that they do not require frequent inactive duty training. In addition to the normal on-the-job training, selected courses at Air Force schools and special tours of active duty have been provided to increase individual proficiency. Estimated strengths by training categories for 1960 are as follows:

Paid drills	*Paid days of active duty for training*		*Beginning strength*	*Average strength*	*Ending strength*
48	15	Officers	8,180	8,577	8,950
		Airmen	19,830	21,692	23,540

MILITARY PERSONNEL—Continued

Current authorizations—Continued

[ARMY] NATIONAL GUARD *PERSONNEL, ARMY*—Continued

National Guard personnel are trained in their respective units in 48 armory drills and 15 days field training. Recruits without prior service must take 6 months active duty for basic training in a Federal status under provisions of 10 U. S. C. 672. It is estimated that 44,000 enlisted recruits will begin a 6-month period of active duty training in 1959 and 28,000 in 1960. Selected personnel receive specialized training at Army schools and command post exercises. Funds are provided for military personnel costs of pay, travel, subsistence, and clothing.

The Army National Guard reorganization to the pentomic structure, started in 1959, will continue in 1960. As a result it is expected that the number of federally recognized local units will decrease from 5,327 at the end of 1958 to 4,042 on June 30, 1960. The structure of the major units will be maintained in 1960 at 27 divisions, together with combat support units. The military personnel strength is summarized in the following table:

ARMY NATIONAL GUARD PERSONNEL STRENGTH

New obligational authority:			
Appropriation	$564,000,000	$640,000,000	$715,000,000
Transferred from "Contingencies, Department of Defense" (72 Stat. 243)	3,000,000		
Appropriation (adjusted)	567,000,000	640,000,000	715,000,000

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense. The estimate represents the consolidated requirements of the military departments for (1) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force, (2) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve, and (3) survivors' benefits. The amount requested is exclusive of any administrative expense. The substantial gains to the retired rolls can be directly attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. The following tabulation shows the average number of personnel on the rolls in 1958 compared with the estimated numbers for 1959 and 1960:

AVERAGE NUMBER

Type of retirement:	*1958 actual*	*1959 estimate*	*1960 estimate*
1. Nondisability	103,582	115,142	131,459
2. Temporary disability	12,501	12,921	12,950
3. Permanent disability	67,456	68,953	71,080
4. Fleet reserve	23,739	25,474	28,269
5. Survivors' benefits	1,292	1,652	2,061
Total	208,570	224,142	245,819

Object Classification

	1958 actual	1959 estimate	1960 estimate
12 Pensions, annuities, and insurance claims	$560,961,693	$640,000,000	$715,000,000

Proposed for later transmission:

Military Personnel, Navy

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Pay and allowances		$17,959,000	
2. Subsistence in kind		5,225,000	
3. Movements, permanent change of station		13,129,000	
4. Other costs		422,000	
Total obligations		36,735,000	
Financing:			
Proposed supplemental appropriation		36,735,000	

Under existing legislation, 1959.—Additional funds are anticipated for (1) the higher active duty strength authorized the Navy in support of the Middle East and Far East situations, (2) additional social security costs generated by legislation enacted subsequent to passage of the 1959 appropriation act, (3) travel in excess of that estimated in the 1959 budget, and (4) raw food costs higher than anticipated in the 1959 budget.

Military Personnel, Air Force

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Pay and allowances		$27,540,000	
4. Other costs		288,000	
Total obligations		27,828,000	
Financing:			
Proposed supplemental appropriation		27,828,000	

Under existing legislation, 1959.—Additional funds are anticipated for (1) the higher active duty strength authorized the Air Force in support of the Middle East and Far East situations, (2) additional social security costs generated by legislation enacted subsequent to passage of the 1959 Appropriation Act, and (3) increased costs resulting from higher dependency factors and increased years of service by grade.

RETIRED PAY, DEPARTMENT OF DEFENSE

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Nondisability		$3,425,000	
2. Temporary disability		75,000	
3. Permanent disability		725,000	
4. Fleet reserve		775,000	
Total obligations		5,000,000	
Financing:			
Proposed supplemental appropriation		5,000,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to cover uncontrollable statutory payments to retired military personnel of the military departments.

OPERATION AND MAINTENANCE

Current authorizations:

OPERATION AND MAINTENANCE, *ARMY*

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, including administration; medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel on duty or leave, except elective private treatment), and other measures necessary to protect the health of the Army; care of the dead; chaplains' activities; *trophies*, awards, and medals; welfare and recreation; information and educational services for the Armed Forces; recruiting expenses; *meals furnished under contract for selective service registrants called for induction and applicants for enlistment while held under observation;* subsistence of prisoners at disciplinary barracks, and of civilian employees as authorized by law; expenses of apprehension and delivery of prisoners escaped from disciplinary barracks, including payment of rewards not exceeding $25 in any one case, and expenses of confinement of such prisoners in nonmilitary facilities; donations of not to exceed $25 to each prisoner upon each release from confinement in a disciplinary barracks; military courts, boards, and commissions; authorized issues of articles for use of applicants for enlistment and persons in military custody; civilian clothing, not to exceed [$30] *$40* in cost, to be issued each person upon each release from confinement in an Army or contract prison and to each soldier discharged for unsuitability, inaptitude, or otherwise than honorably, or sentenced by a civil court to confinement in a civil prison, or interned or discharged as an alien enemy; transportation services; communications services, including construction of communication systems; maps and similar data for military purposes; military surveys and engineering planning; contracts for maintenance of reserve tools and facilities for twelve months beginning at any time during the current fiscal year; repair of facilities; utility services for buildings erected at private cost, as authorized by law (10 U. S. C. 4778), and buildings on military reservations authorized by Army regulations to be used for a similar purpose; purchase of ambulances; hire of passenger motor vehicles; tuition and fees incident to training of military personnel at civilian institutions; field exercises and maneuvers, including payments in advance for rentals or options to rent land; expenses for the Reserve Officers' Training Corps and other units at educational institutions, as authorized by law; exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; expenses of inter-American cooperation, as authorized for the Navy by law (10 U. S. C. 7208) for Latin-American cooperation; not to exceed [$5,445,000] *$5,855,000* for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes, and his determination shall be final and conclusive upon the accounting officers of the Government; [$3,078,208,000: *Provided*, That during the fiscal year 1959 the maintenance, operation, and availability of the Army-Navy Hospital at Hot Springs National Park, Arkansas, to meet requirements of the military and naval forces shall be continued] *$3,053,785,000.* (*5 U. S. C. 43, 78, 946; 10 U. S. C. 2632, 3012, 3013, 3062, 4302, 4331–4355, 4382, 4385, 4386, 4505, 4536, 4741; 50 U. S. C. 78; 50 U. S. C. App. 761, 766; Department of Defense Appropriation Act, 1959.*)

Appropriated 1959, **$3,078,208,000** Estimate 1960, [a] **$3,053,785,000**
Appropriated (adjusted) 1959, **$3,073,894,815**

[a] Excludes $14,215,000 for activities transferred in the estimates to "Research, Development, Test, and Evaluation, Army." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

"Contingencies, Department of Defense"	6,228,000		
Appropriation (adjusted)	3,182,020,000	3,073,894,815	3,053,785,000
Proposed supplemental due to pay increases		17,400,000	

NOTE.—Reimbursements from non-Federal sources are principally from sale of goods and services to authorized individuals and include such items as laundry services subsistence of hospital patients, surcharges on commissary sales, and unofficial telephone service.

1. *Tactical forces.*—This provides for fulfilling the Army's responsibility for support of unified combatant commands through its forces deployed overseas and the Army Air Defense Command which assists in the air defense of the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

United States. It also provides for other active Army tactical forces, such as the Strategic Army Forces in the United States. Costs cover the support of these units and the installations at which they are stationed, the basic training of inductees and enlistees, including the Reserve Forces Act of 1955 trainees, and the conduct of field exercises. Major combat units supported are as follows:

	1958	1959	1960
Air defense forces:			
Air defense guided missile battalions	65	71	73¼
Other air defense battalions	22	11	7
Tactical ground forces:			
Divisions	15	14	14
Armored cavalry regiments	5	5	5
Armored combat commands	1	1	1
Brigades (infantry)	2	2	2
Battle groups (infantry)	6	8	8
Missile commands	4	4	4
Field artillery missile groups (heavy)	2	3	3

2. *Training activities.*—Provision is made for specialized training of military personnel in the Army school system, including combat arms, aviation and missile training, technical, administrative, and specialist schools and colleges; the operation of the United States Military Academy; tuition costs at civilian institutions; and costs of training aids and publications. The average student load is as follows:

	1958 actual	1959 estimate	1960 estimate
Army schools	37,987	36,773	34,129
Army colleges	941	927	871
United States Military Academy	2,335	2,300	2,300

3. *Central supply activities.*—This covers the Army's supply distribution system, the administrative costs of procurement activities, the operation of supply management offices, the maintenance of standby industrial facilities to be activated in the event of mobilization, and the operation of port facilities in the United States and overseas. Provision is also made for the Army's share of the governmentwide cataloging and standardization programs. Costs include those attributable to the Army's responsibility as single manager for all phases of supply management with respect to subsistence, clothing and textiles, and traffic management for all military departments.

The supply distribution system comprises 44 supply depots in the United States and 37 overseas which receive, store, and issue Army supplies and equipment, including Army aviation materiel.

MAJOR WORKLOAD FACTORS

	1958 actual	1959 estimate	1960 estimate
Tons of materiel received for storage	4,048,399	3,957,995	4,036,439
Average tons of materiel in storage	48,544,700	51,932,980	52,310,846
Tons of materiel shipped	3,851,964	3,610,369	3,655,044

4. *Major overhaul and maintenance of materiel.*—Major items of equipment, including combat and support vehicles, Army aircraft, guided missiles, and ammunition, are overhauled and rebuilt at Army depots. Other equipment maintenance costs, including contracts with industry for technical assistance, are also provided. Provision is made for central procurement of guided missiles, aircraft, and special weapons repair parts for worldwide issue. The program for 1960 reflects the continued emphasis on guided missiles and the expansion of Army aviation activities, and decreases in other types of materiel.

5. *Medical activities.*—This covers medical (including dental and veterinary) support of the Army, Army National Guard, Army Reserve, and Reserve Officers' Training Corps; operation and maintenance of medical facilities in the United States and overseas; medical care and hospitalization of Army personnel in localities where Army medical facilities are not available; medical care and hospitalization of civilian employees and their dependents in the Canal Zone; medical care of dependents of military personnel; and training of military personnel in medical specialties. It cost the Army $24,225,000 in 1958 for care of dependents of its military personnel in civilian hospitals and these costs are estimated at $24,007,000 in 1959 and $19,914,000 in 1960.

Provision is made for operation in the continental United States of 54 hospitals and 86 dispensaries. The average number of patients is indicated in the following table:

MEDICAL FACILITIES AND PATIENTS

	1958 actual	1959 estimate	1960 estimate
Hospitals:			
Continental United States	57	56	54
Overseas	35	35	35
Patients in Army facilities:			
Active duty:			
Army	8,592	7,834	7,652
Other uniformed services	1,325	1,422	1,342
Dependents of uniformed services:			
Army	2,578	2,693	2,926
Other uniformed services	809	844	936
Retired:			
Army	339	338	338
Other uniformed services	89	100	100
Other categories of patients	1,312	1,240	1,263
Total average daily occupied beds	15,044	14,471	14,557
Total medical and dental outpatient treatments and examinations	28,141,000	25,164,000	26,174,000

PATIENTS IN NON-ARMY FACILITIES

Active duty	1,063	1,042	1,048
Retired	155	172	173
Dependents of military personnel:			
In Federal hospitals	400	426	436
In civilian hospitals	1,599	1,390	1,085

MEDICAL PERSONNEL IN TRAINING

In medical department schools	3,848	3,723	3,919
In Army hospitals and other medical facilities	151	147	147
In civilian institutions	392	385	405
Total	4,391	4,255	4,471

6. *Armywide activities.*—This includes the following administrative-type activities:

	1958 actual	1959 estimate	1960 estimate
Major command headquarters:			
Departmental headquarters	$44,816,137	$45,896,000	$48,969,000
Headquarters technical services	43,324,616	42,273,000	41,873,000
Major field commands	97,760,993	88,855,000	88,238,000
Specialized services:			
Armywide communications services	70,612,041	53,191,000	77,740,000
Armywide finance services	22,553,519	24,079,000	24,347,000
Armywide audit services	16,678 521	16,555,000	16,555,000
Evaluation activities	82,216,400	85,243,000	104,428,000
Military surveys and maps	46,244,407	43,206,000	42,438,000
Other specialized services	82,772,721	87,022,000	87,897,000

7. *Army Reserve and Reserve Officers' Training Corps.*—Provision is made for the maintenance and operation of the United States Army Reserve and Reserve Officers' Training Corps; operation of Army Corps (Reserve) headquarters; operation of training facilities for Army Reserve and Reserve Officers' Training Corps units at summer training camps, institutions, and home stations; and expenses for Army Reserve recruiting. This activity is related to the average strength in paid status of the United States Army Reserve.

8. *Joint projects.*—These are activities of a defense-wide nature, for which the Department is assigned administrative responsibility. Includes the National War College, the Industrial College of the Armed Forces, the Alternate Joint Communications Center, certain joint headquarters in overseas areas, international activities, Armed Forces information and education program, and certain classified activities.

The data shown above include workload in 1959 for which a supplemental appropriation is shown under Proposed for later transmission.

OPERATION AND MAINTENANCE, NAVY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Navy and the Marine Corps, including aircraft and vessels; modification of aircraft; design and alteration of vessels; training and education of members of the Navy and the Marine Corps; administration; procurement of military personnel; purchase (not to exceed one thousand one hundred and seventeen for replacement only, including ten at not to exceed $2,900 each) and hire of passenger motor vehicles; not to exceed $40 per person for civilian clothing, including an overcoat when necessary, for enlisted personnel discharged for inaptitude, unsuitability, or otherwise than honorably; welfare and recreation; medals, awards, emblems and other insignia; transportation of things (including transportation of household effects of civilian employees); industrial mobilization; medical and dental care; care of the dead; lease of facilities; Latin-American cooperation; charter and hire of vessels; relief of vessels in distress; maritime salvage services; military communications facilities on merchant vessels; dissemination of scientific information; administration of patents, trademarks, copyrights; losses in exchange and in accounts of disbursing officers, as authorized by law; annuity premiums and retirement benefits for civilian members of teaching services; tuition, allowances, and fees incident to training of military personnel at civilian institutions; repair of facilities; departmental salaries; utility services for buildings erected at private cost as authorized by law (10 U. S. C. 4778), and buildings on military reservations authorized by Navy regulations to be used for welfare and recreational purposes; conduct of schoolrooms, service clubs, chapels, and other instructional, entertainment and welfare expenses for the enlisted men; cryptographic equipment; procurement and production of services, special clothing, supplies, and equipment for such purposes; procurement of plant equipment, appliances, and machine tools, and installation thereof in public or private plants; exploration, prospecting, conservation, development, use, and operation of the naval petroleum reserves, as authorized by law; not to exceed $12,325,000 for emergency and extraordinary expenses, as authorized by section 7202 of title 10, United States Code, to be expended on the approval and authority of the Secretary and his determination shall be final and conclusive upon the accounting officers of the Government; and support of the town of Olongapo, as authorized by law; $2,803,192,000, of which $975,000 shall be transferred to the appropriation "Salaries and expenses," Weather Bureau, Department of Commerce, fiscal year 1960, and $16,885,000 shall be transferred to the appropriation "Operating expenses", Coast Guard, fiscal year 1960, for the operation of ocean stations. (5 U. S. C. 55a, 78; 10 U. S. C. 5011–13, 5031, 5131 (6), 6201, 7202, 7203, 7205, 7212, 7288, 7293, 7303, 7391–6, 7421–38; 24 U. S. C. 14a, 15, 34, 35; 31 U. S. C. 638; 42 U. S. C. 1501–5.)

Estimate 1960, [a] **$2,803,192,000**

[a] Estimate is for activities previously carried under appropriations as follows:

"Navy personnel, general expenses"	$94,000,000
"Marine Corps troops and facilities"	172,000,000
"Aircraft and facilities," Navy	863,074,000
"Ships and facilities," Navy	849,637,000
"Ordnance and facilities," Navy	141,889,000
"Medical care," Navy	99,250,000
"Civil engineering," Navy	130,217,000
"Servicewide supply and finance," Navy	317,000,000
"Servicewide operations," Navy	134,000,000
"Naval petroleum reserves"	2,125,000

The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Financing—Continued			
Unobligated balance carried forward (69 Stat. 438)			$7,812,129
Appropriation (new obligational authority)			2,803,192,000

General.—The general scope of this appropriation is to provide for necessary costs incident to organizing, training, and preparing Navy and Marine Corps forces for the conduct of prompt and sustained combat operations by carrier striking forces, submarine forces, amphibious forces, antisubmarine forces, and mobile logistic support forces and to fulfill the Navy's responsibility to support the unified combatant commands. Included are the operations of ship-based aircraft, patrol seaplanes, and their land-based components, support of Navy and Marine Corps shore activities, and expenses of the Navy Department and headquarters, United States Marine Corps, at the seat of government.

In the accomplishment of the foregoing mission, this appropriation provides for operation and maintenance support of the Navy and Marine Corps in 1960 for the same number of ships and steaming hours as in 1959 and, as a reflection on the increasing emphasis of missiles entering the fleet, for an inventory of operating aircraft reduced by approximately 800 aircraft of all types. While the appropriation provides for a smaller shore establishment to support the fleet than in 1958, expanding programs such as the POLARIS weapon system, nuclear training, and the need for continued support for the DEW line and DEEPFREEZE operations combine to require certain increases in this appropriation.

1. *General expenses, Navy personnel.*—Provision is made for the recruiting and procurement of all naval personnel through approximately 1,000 recruiting facilities, and their individual and group training (except medical and air) in 140 naval schools, in over 50 civilian colleges and in 319 Reserve training centers. The training at naval schools includes recruit training for approximately 100,000 recruits annually and basic technical training, advanced technical training, scientific training and professional education for approximately 50,000 officers and 350,000 enlisted men annually. The civilian colleges are training approximately 1,000 naval officers and enlisted men primarily in various scientific and engineering fields not covered by Naval schools and over 10,000 Naval Reserve Officer Training Corps midshipmen for the Regular and Reserve Navy and Marine Corps. The Reserve training centers maintain the training of over 100,000 reservists annually. The Naval Academy annually prepares approximately 3,500 midshipmen for careers as Naval or Marine Corps officers. Provision is also made for the distribution of all naval personnel to fleet and shore activities and for technical administration of their welfare.

	1958 actual	*1959 estimate*	*1960 estimate*
Average naval strength	649,674	639,070	629,268
Average paid reserve strength	141,140	141,459	140,712
Average training load	177,426	178,893	179,398
Number of schools	149	138	140
Reserve training centers	319	319	319

2. *Troops and facilities, Marine Corps.*—The primary purpose of this activity is to support the Atlantic and Pacific Fleet Marine Forces composed of three Marine divisions, three aircraft wings and supporting units and organizations. The training objectives of the Fleet Marine Forces will stress the vertical envelopment doctrine in amphibious operations by two major division-wing team exercises, six exercises at the regimental combat team-air group level, seventeen exercises at battalion landing team level, including one cold weather exercise, and one combat support landing exercise.

Support of the above includes recruit, technical, and advanced training and operation of three division support bases, two Marine Corps recruit depots, and one Marine Corps schools command. Major equipment overhaul and operation of the Marine Corps supply system are provided through 4 major supply installations, all in primary support of the combat forces. Provision is also made for security and service operations for the Naval Establishment, Marine Corps Reserve training, recreation and welfare, recruiting expenses, maintenance of facilities, and departmental expenses.

A summary of the workload data specifically related to Marine Corps programs follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Average military strength	193,828	185,434	175,000
Major facilities	11	10	10
Recruit training load	10,493	11,665	12,391

3. *Aircraft and facilities.*—This activity provides for the operating costs of naval aviation, including air combat forces of the Regular Navy and Marine Corps, supporting service and training forces, Naval and Marine Air Reserves, naval air stations and such related activities as procurement of weather instruments, technical publications, ground equipment, aerial photographic equipment, maintenance of shipboard catapults and arresting gear, and procurement of special fuels for evaluating newly developed power plants. Funds requested will support aircraft operating with the highly mobile attack carrier striking forces, antisubmarine carrier forces, antisubmarine land and sea patrol squadrons, barrier forces, three Marine air wings, and miscellaneous combat and support squadrons. About 3 million hours will be flown during the conduct of operational and training missions in all the ocean areas of the world and during the training of aviation personnel for possible future fleet assignments. Providing logistic support for this force is a shore establishment consisting of 76 continental and overseas stations. In order to provide the fleet with the most modern weapons and to maintain the fleet in a high degree of readiness, economies have been effected by inactivating shore facilities and reducing the operating aircraft inventory. Because of increasing complexity of weapons a greater amount of funds is requested than was available in 1959. Funds are also requested for a Reserve program of about 400,000 flying hours. Active year-end aircraft inventory: 1958, 10,533; 1959, 9,300; 1960, 9,200.

4. *Ships and facilities.*—Funds are included to support 864 ships of the active fleet, 100 ships in the Naval Reserve training program, and minimum preservation of ships in the Reserve fleet without overhaul or modernization. Emphasis is placed on overhaul and maintenance of active fleet ships; improvements and modernization of selected active ships especially to augment antisubmarine warfare and fleet air defense capability; and repair and overhaul of equipment. Special provision has been made in this budget for a higher level of overhaul and alteration of naval ships in order to improve the condition and readiness of the fleet. The generally higher tempo of operations required of the fleet in connection with Suez, Lebanon, and Taiwan, has greatly increased the wear and tear on ships and their equipment. The increasing complexity of ship maintenance associated with electronics equipment and nuclear propulsion also tends to require increases in this

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, NAVY—Continued

appropriation. These increases are offset partially by a de-emphasis on Reserve fleet support, non-nuclear material procurement, and shore establishment support.

	1958 actual	*1959 estimate*	*1960 estimate*
Number of ships	890	864	864
Number of major facilities	27	27	27
Number of ship overhauls	379	357	372
Number of Naval Reserve training vessels	86	97	100

5. *Ordnance and facilities.*—These funds are required for preparation of ordnance and ammunition for operational readiness such as offensive and defensive missiles and missile-supporting equipment. These complex equipments must be overhauled, modernized and maintained to render the units operational at all times. Supporting ordnance facilities and equipment are vital, along with detailed training information and techniques for personnel involved, in order to ensure reliable performance of Navy equipment, ammunition, and missiles such as TERRIER, TARTAR, TALOS, SIDEWINDER, BULLPUP, and SPARROW, as well as nuclear ordnance available to the Navy's striking forces. At the same time there continues to be an urgent demand for maintaining and overhauling conventional components for issue to our deployed fleet. The ordnance facilities funded must perform laboratory investigations, calibration procedures, technical evaluations and reporting procedures for periodic and post repair checkout of components to insure safety and reliability. Thirty-six major facilities are operated for these purposes.

6. *Medical care.*—This activity provides for medical care and hospitalization of Navy and Marine Corps personnel and their dependents and care of the dead. It includes operation and maintenance of hospitals, dispensaries, dental clinics, and other medical facilities in the United States and overseas; procurement of ambulances, medical and dental supplies, equipment, and services; instruction of medical personnel in naval hospitals, naval schools, and civilian schools; and medical care of military personnel and their dependents in localities where Navy facilities are not available. Obligations for care of dependents in civilian hospitals in 1958 were $28,532,000 and obligations are estimated at $27,880,000 in 1959 and $28,968,000 in 1960. These activities are shown in the following table:

MEDICAL FACILITIES AND PATIENTS

	1958 actual	*1959 estimate*	*1960 estimate*
Hospitals:			
Continental U. S.	44	42	42
Extracontinental	16	16	16
Naval hospitals	(28)	(26)	(26)
Patients in naval facilities:			
Active duty:			
Navy and Marine Corps	10,330	9,685	9,440
Other uniformed services	1,118	1,101	1,093
Dependents of uniformed personnel:			
Navy and Marine Corps	1,339	1,438	1,483
Other uniformed services	258	283	296
Retired:			
Navy and Marine Corps	588	573	589
Other uniformed services	82	94	100
Other categories of patients	613	652	672
Patient loads in naval hospitals	(12,052)	(11,759)	(11,662)
Total average daily occupied beds	14,328	13,826	13,673
Total medical and dental outpatient treatments and examinations	19,662,000	19,228,000	19,154,000

PATIENTS IN NON-NAVAL FACILITIES

Active duty	781	838	835
Retired	81	89	94
Dependents of military personnel:			
In other Federal hospitals	379	410	368
In civilian hospitals	1,608	1,426	1,421

MEDICAL PERSONNEL IN TRAINING (MAN YEARS)

In medical department schools	1,920	2,210	1,815
In naval hospitals and other medical facilities	1,355	1,887	1,835
In civilian institutions	177	186	216
Total	3,452	4,283	3,866

7. *Civil engineering.*—Funds are provided in this activity for engineering services and technical assistance to the entire Naval Shore Establishment. Six public works centers are operated to render logistic support in areas where several naval facilities are located. Three construction battalion centers provide schooling, training, organization and equipping of the Seabee forces as well as the maintenance of mobilization reserve equipment. The Seabee forces comprise 15 construction battalion units for support of the operating forces and operate four bases from which Antaractic operations are conducted.

	1958 actual	*1959 estimate*	*1960 estimate*
Number of housing units maintained	17,822	20,699	21,606
Value of nonpassenger vehicles and construction equipment	$53,887,000	$49,046,000	$31,947,000

8. *Servicewide supply.*—The workload of this activity is a reflection of and is responsive to fleet, air, and shore station operations, including major procurement actions. This activity encompasses the major active force logistical support, both continental and overseas, at shipyards, and at 15 major supply depots and centers. In all, there are 37 supply outlets supported by this program. Planning and programing for this support, including procurement and requirements determinations, for 13 categories of material is accomplished by 12 supply-demand control points of which the aviation supply office at Philadelphia is the largest. These supply-demand control points are directly responsible for the inventory management and the direction of the movement of materials under their cognizance in the Navy supply system. Transportation costs of intra-Navy movement of material directed by these supply-demand control points, including that moving by Military Sea Transportation Service, are also funded by this activity. In addition to the above control points, and under single manager assignment to the Navy, this activity funds the maintenance and operating costs for the military medical supply agency and the military petroleum supply agency.

A summary of workload data specifically related to these programs follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Number of supply actions	18,398,800	17,642,200	16,814,200
Number of items under inventory control	1,193,700	1,193,700	1,193,700
Supply distribution outlets	50	50	37
Inventory management offices	15	15	14

9. *Servicewide operations.*—This activity provides for operational planning, coordination of research and business management, including financial and personnel administration of the Naval Establishment. Central logistic support is provided to a large segment of the Navy by 14 naval stations located where large units of the fleet and other activities are concentrated.

Funds are provided for the worldwide communication network which contributes to operation and security of the naval forces and for coordination of the Naval Establishment. Scientific exploration and studies of the Hydrographic Office and Naval Observatory are also funded in this activity.

10. *Naval petroleum reserves.*—This activity provides support for the operation and maintenance of naval petroleum and oil shale reserves including the hire of consultants; administration provided by the office of the

Transferred from "Operation and maintenance, Army" (63 Stat. 589)		3,177,185	
Appropriation (adjusted)	4,013,497,900	4,056,597,185	4,256,800,000
Proposed supplemental due to pay increases		69,000,000	

The general scope of this appropriation is to support the Air Force with an average active duty personnel strength of 848,607 and a force structure of 102 wings on June 30, 1960, 3 fewer than on June 30, 1959. The funds provided will fulfill Air Force responsibilities in support of unified and specified combatant commands. Part of the reduction in force structure occurs in areas where guided missiles are modifying the role of manned aircraft. Most of the remaining reduction is being made in those elements which are of decreasing importance in the light of evolving force requirements. The Strategic Air Command bomber and missile force will have been strengthened both in numbers and quality of aircraft and missiles. The conversion of heavy bomber wings to the B–52 will be completed and a squadron of B–58 will be phased into the program. In consonance with changing requirements, there will be a further reduction of 1 tactical and 2 air defense wings during 1960.

Missile capability in the strategic forces will be strengthened by activation of the first wing of strategic missiles. Additional ballistic missile squadrons will be introduced in the operational forces during 1960. The Bomarc ground-to-air missile will provide the Air Force with an enhanced guided missile capability in its air defense forces. Interceptor squadrons will be equipped with the Falcon or Sidewinder air-to-air guided missiles, and a considerable number of squadrons will be equipped with the nuclear-armed air-to-air rocket Genie. The tactical missile capability of the Air Force will be further improved as the Mace surface-to-surface tactical missile is added to the inventory.

Reflecting the reduction in wings and increasing emphasis on missiles, the operating aircraft inventory of the Air Force at the end of 1960 will be about 754 less than at the end of 1958.

In the accomplishment of the foregoing mission this appropriation provides for operation and maintenance support of the following Air Force programs:

1. *Operation of aircraft.*—Funds are included to support over 6½ million aircraft flying hours. These flying hours are a measure of the combat readiness of the strategic, tactical, and defense forces. Aircraft operations financed from this appropriation are also used in training of individuals for possible later assignment to tactical units. The increase in 1960 funds is related primarily to additional flying hours programed for the Strategic Air Command.

2. *Logistical support.*—There are 17 major installations programed in 1960 to accomplish procurement, supply, and maintenance of aircraft, engines and accessories, missiles, electronics and communication equipment, ground powered and marine equipment, and other miscellaneous equipment. This represents a decrease of 1 installation from 1959 and 3 installations from 1958. This decrease is the result of reducing oversea depot activities and increasing direct support of the oversea units from the continental United States. This was accomplished by utilizing more rapid means of transportation and by more timely stock control through electronic data processing equipment. Over 166,000 civilians are programed in the logistical functions for 1960. The increase in 1960 is primarily related to increased missile and electronic support for the strategic and air defense forces.

3. *Training support.*—Air Force formal training will require 50 installations. Areas to be covered include basic military and technical training, advanced technical training, professional education, pilot, navigator, and combat crew training. In addition, Air Force reservists are to be trained at 119 reserve flying training locations and Air Reserve Centers. Approximately 35,000 civilians will be engaged in the training mission. Training will be provided for the Regular Air Force, Air Force Reserve, Air National Guard, Air Force Reserve Officers' Training Corps, foreign students in the military assistance program, and students from other services and governmental agencies.

PRINCIPAL TRAINING WORKLOADS

Category	*1958 actual*	*1959 estimate*	*1960 estimate*
Basic military technical training (input)	100,926	111,617	99,726
Advanced technical training (input)	41,227	38,649	39,123
Factory training (input)	8,859	9,842	8,955
Flying training (production)	4,158	3,046	3,000
Professional education (input)	6,935	9,300	9,629

The increase in 1960 is primarily in the basic military and technical training to retrain military personnel in skills where there is a current or projected shortage and to update personnel in new techniques and procedures. There will be some offsetting decreases in factory and navigator training. The Air Force Academy, now located at the permanent site near Colorado Springs, Colo., will operate with a student enrollment of 1,592 cadets at the beginning of the 1960 academic year.

4. *Operational support.*—There will be 193 major Air Force operational installations in 1960, an increase of 3 installations over 1959 and 13 installations over 1958. The increase reflects the dispersal of the strategic forces and the addition of operational missile units. Support is also provided for the main DEWLine, the Aleutian extension, SAGE (Semi-Automatic Ground Environment) combat and direction centers, radar control centers and stations, gap fillers and other air defense activities. Approximately 110,000 civilians will be employed in these facilities. The increase in 1960 is primarily related to the increase in installations, ballistic missile support, and air defense activities.

5. *Medical support.*—This program covers (*a*) operation of medical treatment facilities in the United States and overseas; (*b*) medical care and hospitalization of Air Force personnel and dependents where Air Force medical facilities are not available; (*c*) medical care and hospitalization for civilian employees and dependents by the Canal Zone Government; and (*d*) training military personnel in medical specialties. It cost the Air Force $35,614,810 in 1958

Digitized for FRASER

Federal Reserve Bank of St. Louis

for care of dependents of its military personnel in civilian hospitals and these costs are estimated at $39,968,000 in 1959 and $38,261,000 in 1960. These activities are shown in the following table:

MEDICAL FACILITIES AND PATIENTS

	1958 actual	*1959 estimate*	*1960 estimate*
Hospitals:			
Continental United States	94	91	93
Extracontinental	41	41	41
Patients in Air Force facilities:

Air Force	6,039	5,502	5,448
Other uniformed services	424	416	430
Dependents of uniformed personnel:			
Air Force	2,306	2,580	2,865
Other uniformed services	312	340	319
Retired:			
Air Force	84	100	100
Other uniformed services	83	89	83
Other categories of patients	202	188	188
Total average daily occupied beds	9,450	9,215	9,433
Total medical and dental outpatient treatments and examinations	20,828,000	19,160,000	19,169,000
PATIENTS IN NON-AIR FORCE FACILITIES			
Active duty	1,422	1,393	1,352
Retired	58	73	73
Dependents of military personnel:			
In other Federal hospitals	711	715	814
In civilian hospitals	2,174	2,190	1,995
MEDICAL PERSONNEL IN TRAINING			
In medical department schools	6,083	6,245	6,753
In Air Force hospitals and other medical facilities	615	819	1,093
In civilian institutions	871	997	837
Total	7,569	8,061	8,683

6. *Servicewide support.*—Provision is made for (*a*) administration and management at departmental and major command headquarters and joint headquarters; (*b*) the leasing of command and operational communications systems; and (*c*) air attaché and mission offices, and participation in inter-American cooperation. The increase in 1960 is primarily related to an increase in support of leased commercial communication systems as a direct result of implementation of the SAGE system for air defense and the expansion of the strategic communication systems.

7. *Contingencies.*—This program provides for extraordinary expenses as approved by the Secretary of the Air Force and accounted for solely on his certificate.

Operation and Maintenance, Army National Guard

For expenses of training, organizing and administering the Army National Guard, including maintenance, operation, and repairs to structures and facilities; hire of passenger motor vehicles; personal services in the National Guard Bureau and services of personnel of the National Guard employed as civilians without regard to their military rank, and the number of caretakers authorized to be employed under provisions of law (32 U. S. C. 709) may be such as is deemed necessary by the Secretary of the Army; travel expenses (other than mileage), as authorized by law for Army personnel on active duty, for Army National Guard division, regimental, and battalion commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; supplying and equipping the Army National Guard of the several States, Territories, and the District of Columbia, as authorized by law; and expenses of repair, modification, maintenance, and issue of supplies and equipment (including aircraft); $146,000,000: Provided, That obligations may be incurred under this appropriation for the foregoing expenses for training of units designated for early deployment under mobilization plans and for installation, maintenance, and operation of facilities for antiaircraft defense without regard to section 107 of title 32, United States Code: Provided further, That obligations not exceeding $10,000 for each project may be incurred for extension, modification, and alteration of armory facilities, as authorized by chapter 133, title 10, United States Code, as amended, when such changes to facilities are made necessary by military requirements of the Federal Government: Provided further, That of the amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955 (31 U. S. C. 200) as having been obligated under the appropriations for "Army National Guard", 1958, and "Army National Guard", 1959, such portions thereof as may be determined by the Secretary of Defense to have been obligated for operation and maintenance activities, may hereafter be accounted for under the headings "Operation and Maintenance, Army National Guard", 1958, and "Operation and Maintenance, Army National Guard", 1959, respectively. (32 U. S. C. 501–507, 706–710, 713; Department of Defense Appropriation Act, 1959.)

Estimate 1960, [a] **$146,000,000**

[a] Estimate is for activities previously carried under "National Guard personnel, Army." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

1. *Command and management.*—This provides for the administrative expenses of the National Guard Bureau (except the air division), civilian salaries, military and civilian travel, printing and reproduction costs at the seat of the Government, and assistance to the States in recruiting.

2. *Training.*—This provides for expenses of drill assemblies and field training, including travel of Regular Army personnel, transportation of supplies and equipment, and miscellaneous supplies and services.

3. *Materiel.*—Organizational and individual equipment, and other necessary materiel are procured for unit training.

4. *Supplies and repair parts.*—This provides for the procurement of equipment, supplies and repair parts, publications, and organizational and office supplies.

5. *Services, including equipment maintenance.*—Provision is made for transportation, travel, communication and miscellaneous services for the support of units, an average strength of 17,105 State civilian employees for the administration of units, and the maintenance and repair of equipment; for maintenance, repair and utility costs of National Guard facilities; and for the operation of State and Federal field training camps.

6. *Antiaircraft defense.*—This provides for training and operating expenses (other than military personnel costs) of Army National Guard missile battalions as part of the air defense of the United States. It provides for an average of 3,119 State civilian employees to maintain and secure NIKE on-site positions and equipment in a continuing state of operational readiness. In 1960 all units will be equipped with missiles or be in training for conversion to missile units.

Appropriation (new obligational authority)			169,000,000

This appropriation provides for all operation and maintenance costs of the Air National Guard as a reserve component of the Air Force. This includes funds for the operation of 135 Air National Guard installations, including unit equipment and the pay of State civilian employees. Funds are provided for the support of the flying hour program for both tactical and support pilots. During 1960 the Guard will have 2,466 aircraft of which 2,240 will be jets, and will be organized in 24 wings, 83 tactical squadrons, and 512 support units. Funds are also included for supplies and equipment, hospitalization, disposition of deceased personnel, and communication services.

Appropriation (new obligational authority)	254,000	300,000	300,000

The National Board for the Promotion of Rifle Practice assists in providing citizens training in the use of military-type small arms. Assistance is provided to approximately 4,250 clubs and schools enrolled with the director of civilian marksmanship with a total membership of approximately 226,325, by the loan of rifles and equipment, the issuance of targets and supplies for use in marksmanship practice, and the issuance of trophies, medals, and badges, for marksmanship. Ammunition is provided from other appropriations for issue to members of rifle clubs and to competitors at national, regional, State, and local competitions. Funds are provided for travel of civilian shooting teams to the national matches and in 1960 to the Pan American games.

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, ALASKA COMMUNICATION SYSTEM, *ARMY*—Continued

[OPERATION AND MAINTENANCE]—continued

The Alaska Communication System provides internal and external telegraph and long distance telephone service for Alaska. Although proposed legislation authorizing the sale of this system is to be recommended to the Congress, its disposition is not anticipated until after 1960.

The amount appropriated provides for all expenses incident to the normal maintenance, operation, and equipment modernization of the system exclusive of costs of pay, allowances, subsistence, and medical care of military personnel utilized. The 1960 estimate does not provide for the operation and maintenance costs of certain radio communications facilities at Seattle and Anchorage which are being transferred to the Army military network.

In 1958 the value of governmental and commercial use was $7.9 million. The estimated value in 1959 is $8.4 million and in 1960 is $8.7 million. Revenue from commercial customers was $3.8 million in 1958 and is estimated at $4.2 million for 1959 and $4.5 million for 1960. These revenues are deposited to miscellaneous receipts in the Treasury.

The Secretary of Defense serves as the principal assistant to the President on all matters relating to the Department of Defense, which operates under his direction, authority and control. He is assisted in his immediate office by the deputy Secretary of Defense, the director of defense research and engineering, seven assistant secretaries of defense, the general counsel, and such special assistants as are required to advise him in specialized fields. Military advice and assistance is provided by the Joint Chiefs of Staff.

The program contemplates the realinement of the civilian and military staffs of the Secretary of Defense to improve military planning and operations, to concentrate scientific and technological resources on highest priority military needs and to expedite decision-making.

The increase in the appropriation request for the Secretary of Defense is primarily caused by the additional planning and operational functions of the Joint Chiefs of Staff and other measures to strengthen the Secretary's management of the Department of Defense in consonance with the Defense Reorganization Act of 1958. The consolidation and strengthening of staff activities serving the Secretary of Defense represents, to a considerable extent, a transfer of these functions from the three military departments.

Appropriation	$375,000	$380,000	$425,000
Transferred from "Contingencies, Department of Defense" (72 Stat. 243)	12,000		
Appropriation (adjusted)	387,000	380,000	425,000
Proposed supplemental due to pay increases		28,000	

The United States Court of Military Appeals serves as the court of last resort for all of the more serious court-martial convictions of military personnel. The number of cases docketed in 1957 and 1958 totaled 1,535 and 1,630, respectively. Based on the first 3 months of operation, approximately 1,600 cases are anticipated for this fiscal year. The number of opinions released by the court totaled 324 in 1958 and it is estimated that a similar number will be published during 1959. The court is maintaining a current docket with the review completed, as of September 1958, in 12,146 cases out of 12,402 cases filed since the court's establishment in 1951 leaving a balance of 256 under review.

Object Classification

Authorization to expend foreign currency receipts pursuant to 7 U. S. C. 1704	2,232,315	44,000	

The Department of Defense is authorized to procure military equipment, materials, facilities and services for the common defense with foreign currencies derived from the sale of surplus agricultural commodities pursuant to the provisions of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454). Under this authority, the Department of the Army supplements funds appropriated to support the cooperative United States-Latin American mapping program, the inter-American geodetic survey. The objective of the program is the expeditious accomplishment of the cartographic aerial photography and ground control by the military services, United States commercial and South American agencies, progressing to a balanced cartographic operation with limited participation in compilation and reproduction phases by the United States.

Total obligations		2,163,000	
Financing:			
Proposed supplemental appropriation		2,163,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to provide funds to support increased supply workload resulting from the Lebanon and Taiwan crises.

SHIPS AND FACILITIES, NAVY

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Maintenance and operation of the active fleet		$8,958,000	
2. Active fleet alterations and improvements		235,000	
3. Procurement of maintenance material		2,465,000	
4. Fleet support facilities		939,000	
Total obligations		12,597,000	
Financing:			
Proposed supplemental appropriation		12,597,000	

Under existing legislation, 1959.—A supplemental appropriation for 1959 is anticipated to provide funds for additional costs incurred during the crises in Lebanon and Taiwan, and unbudgeted costs for support of Operation Deepfreeze.

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of capital equipment, such as ships, aircraft, missiles, combat vehicles, and communications; major items of support for the capital equipment when it is in service; the industrial facilities necessary to produce that equipment; and modification of older equipment where feasible to provide a means of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

modernization in lieu of buying new equipment. The capital equipment financed by these appropriations is either procured from private contractors or produced in Government arsenals, shipyards, and plants.

The estimates for the procurement appropriations in 1960 reflect changes in appropriation coverage whereby a substantial portion of the amounts formerly included for development, test, and evaluation has been shifted to the new appropriations for research, development, test, and evaluation. The estimated amounts for items identified as development, test, and evaluation support remaining in the procurement appropriations in the 1960 budget are shown separately from the amounts for procurement of items for service use or inventory.

In addition to the Department of Defense-wide changes, the Air Force appropriations Aircraft, missiles, and related procurement, and Procurement other than aircraft and missiles, have been realined in three procurement appropriations: Aircraft procurement; Missile procurement; and Other procurement. The realinement provides financing not only for prime equipment items mentioned in the titles, but also for specialized ground equipment needed to support them in the same appropriation.

The 1960 procurement program of the Department of Defense continues the large scale procurement and production of new weapons in support of the basic military missions of the armed services. Direct obligations for procurement and production are estimated as follows:

PROCUREMENT OF EQUIPMENT AND MISSILES, *ARMY*

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, equipment, vehicles, vessels, and aircraft for the Army and the Reserve Officers' Training Corps; purchase of not to exceed [forty] *one thousand three hundred and fifty-nine* passenger motor vehicles for replacement only (*including twenty at not to exceed $2,900 each*); expenses which in the discretion of the Secretary of the Army are necessary in providing facilities for production of equipment and supplies for national defense purposes, including construction, and the furnishing of Government-owned facilities and equipment at privately owned plants; and ammunition for military salutes at institutions to which issue of weapons for salutes is authorized; [$1,669,338,000] *$1,024,700,000*, to remain available until expended. (*5 U.S.C. 78; 10 U.S.C. 3012, 4386, 4531, 4532; sec. 40, 70 Stat. 1127; Department of Defense Appropriation Act, 1959.*)

Appropriated 1959, **$1,669,338,000** Estimate 1960, [a] **$1,024,700,000**
Appropriated (adjusted) 1959, **$1,711,548,000**

[a] Excludes $459,300,000 for activities transferred in the estimates to "Research, development, test, and evaluation, Army." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Provision is made for the procurement of major supplies and equipment, including missiles, necessary to equip, maintain, and train the active Army and Reserve forces; and for the provision of facilities essential to industrial mobilization objectives.

Sales of equipment and supplies from stock which do not require replacement in kind provide a source of funds for procurement of items for the Army.

1. *Major equipment.*—Provision is made for procurement of weapons and vehicles actually used for combat, such as recoilless rifles, fire-control equipment, mortars, rifles, machine guns, tanks and tank accessories, self-propelled artillery, etc.; vehicles used for general purposes; Army aircraft, including liaison aircraft, helicopters, and target equipment used in antiaircraft training; electronics and communications equipment; and other major items of equipment used by the Army, such as railroad equipment, bridges, materials-handling equipment, construction equipment, generators, road-building equipment, etc.

2. *Ammunition and missiles.*—Provision is made for procurement of missiles, ammunition used with conventional weapons, and ground explosives.

3. *Industrial mobilization.*—Provision is made for the rehabilitation and expansion of manufacturing facilities needed for current operations; for development of mass-production methods for new items, for pilot-line produc-

tion, for production engineering tests leading to reduction in the use of critical materials and manpower; and for the layaway of Government-owned production facilities and equipment as they are released.

Reimbursements.—In accordance with coordinated procurement assignments, supplies are provided to other military services, foreign governments cooperating in mutual defense programs and others, on a reimbursable basis, either by issue from stock or by procurement.

AIRCRAFT AND RELATED PROCUREMENT, *NAVY*

For construction, procurement, and modernization of aircraft, missiles, and equipment, including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, without regard to section 3734, Revised Statutes, as amended, and such lands, and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; procurement and installation of equipment in public or private plants; and departmental salaries necessary for the purposes of this appropriation; [$2,033,795,000] *$1,950,294,000*, to remain available until expended. (*10 U. S. C. 7341; Department of Defense Appropriation Act, 1959.*)

Appropriated 1959, **$2,033,795,000** Estimate 1960, [a] **$1,950,294,000**

[a] Excludes $39,706,000 for activities transferred in the estimates to "Research, development, test, and evaluation, Navy." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Unobligated balance (anticipated reimbursements to be earned from military assistance fund reservations) transferred to other accounts	27,885,238	1,235,209	
Advances and reimbursements from—			
Deliveries of materiel common to U. S. requirements ordered by military assistance in current year		−3,700,000	
Other accounts	−12,827,534	−5,000,000	−5,000,000
Non-Federal sources (22 U. S. C. 1816)	−2,097,696		
Anticipated reimbursements for future year deliveries of materiel common to U. S. requirements ordered by military assistance in current year	−92,722,578	−33,529,000	−20,000,000
Recovery of prior year obligations	−185,502,356	−175,000,000	−100,000,000
Unobligated balance carried forward	1,464,696,801	1,288,432,592	1,223,557,417
Appropriation (new obligational authority)	1,837,000,000	2,033,795,000	1,950,294,000

This appropriation finances the procurement of aircraft, guided missiles, and supporting equipment for the Navy and Marine Corps. It also provides for necessary safety-of-flight and operational modifications to service aircraft as well as the procurement and modernization of ground electronics equipment required for aircraft and missile operations. The funds requested permit carrying out a 1960 program costing $2,062.3 million compared to $1,819.2 million for 1959 and $2,015.3 million for 1958.

1. *Aircraft and related equipment.*—This activity finances procurement of 668 new aircraft to support 16 attack carrier air groups; 22 antisubmarine warfare squadrons; 42 patrol, reconnaissance, and warning squadrons; and 3 Marine air wings together with supporting components and spare parts. Procurement requirements for new aircraft are based upon projected aircraft operating programs and replacement of losses caused by attrition and obsolescence. Modernization of the attack force continues with procurement of quantities of light attack planes, initial production of a new high performance low-level attack plane and a new and powerful supersonic heavy attack plane. In addition to continued production of the current models of supersonic fighters, increased quantities of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

greatly improved all-weather supersonic fighters are being procured. Further, greatly improved versions of patrol and search aircraft are provided for increased effectiveness in antisubmarine warfare.

2. *Missiles, drones, and related equipment.*—This activity provides for the procurement of guided missiles for fleet outfitting, training, and related projects such as target drone procurement and missile industrial facilities. The 1960 estimate provides operational SPARROW III and BULLPUP missiles for use against other aircraft and surface targets.

3. *Training equipment.*—Operational flight trainers, specialized maintenance trainers, and other training aids are financed by this activity in phase with the procurement of aircraft and missiles under activities 1 and 2.

4. *Aircraft modernization.*—Incorporation in fleet aircraft of the most modern and effective antisubmarine search and detection equipment available has received primary emphasis in the 1960 program. Other provisions include the funding of mandatory safety-of-flight improvements and the installation of advanced electronic countermeasures equipment in operational aircraft.

5. *Ground electronics and detection equipment.*—Provision is made for procurement and installation of ground-installed communications and terminal navigational aid devices for Naval and Marine Corps air stations. Procurement is phased in relation to Navy and Marine Corps aircraft operational requirements.

This activity also provides for procurement of air-droppable submarine detection buoys used in airborne antisubmarine operations. The 1960 estimate provides for replacement of buoys consumed in operational efficiency training of pilots and crews and initiates augmentation of mobilization reserve quantities.

6. *Development, test, and evaluation support.*—This activity provides for procurement of equipment under test and development prior to quantity procurement for service use. It includes guided missiles to be expended in the missile development program, such as EAGLE and CORVUS, and other equipment procurement such as small quantities of newly developed jet engines used for qualification testing and antisubmarine equipment with improved detection capability.

Anticipated reimbursements for future year deliveries of materiel common to U. S. requirements ordered by military assistance in current year		−58,177,000	
Recovery of prior year obligations	−3,947,135	−5,000,000	
Unobligated balance carried forward	994,257,720	1,016,552,374	623,098,374
Appropriation (new obligational authority)	1,880,000,000	2,069,400,000	1,498,200,000

This appropriation covers shipbuilding programs authorized subsequent to 1951. Funds are provided for construction and procurement of hulls, machinery, and equipment, including armor and armament for new naval vessels; conversion of existing naval vessels; and other related costs, including tools and equipment, facilities in private plants, and departmental salaries. Funds are requested for the 1961 program for the procurement of long lead time components for ships to be constructed or converted in the future.

Major emphasis in the 1960 new construction program of 18 major ships at a cost of $886.1 million is on the improvement of the antisubmarine and fleet air defense capability of the Navy. Approximately 56% of the funds requested for new construction will provide 14 ships adding to such capabilities, including 1 escort research ship which will lead to significant advances in the performance of future escort types. One additional attack carrier (nonnuclear) requires approximately 29% of the funds requested for new construction. No carrier was included in the 1959 program. The remaining 3 ships proposed for construction will increase the support of the POLARIS program by providing a second submarine tender, and increase the amphibious capability of the fleet by addition of 1 transport and 1 assault ship of the types for use in the new vertical envelopment technique.

The 1960 conversion program comprises 13 ships at a cost of $193.1 million. The principal element accounting for 56% of the total conversion cost is a fourth guided missile cruiser of the type included in the 1958 and 1959 programs. Approximately 32% of the conversion cost is for the modernization of 8 destroyers as the first increment of a long-term program to improve the combat effectiveness of antisubmarine ships now in service and, by extending the service life of these ships, to reduce the impact of block obsolescence on the active fleet.

This appropriation also provides for the procurement of electronic equipment for the fleet, the continental and ocean defense program, and fleet support activities. The planned increase in 1959 and 1960 accelerates the modernization of fleet electronic equipment over replacement levels normal to 1958 and prior years. It also initiates capitalization on the significant equipment developments emerging from the research and development effort, and concentrates on antisubmarine warfare, fleet air defense, electronics warfare, and communication programs. Of special interest is the increased effectiveness of particular capabilities in the fleet afforded by the initial procurement in 1960 of: Certain air search radars which extend present range, height, and detection capabilities; newly developed communication equipment, allowing major advances in submarine warfare; variable depth underwater sound equipment, providing a new capability for surface ships in the detection and location of submarines; and new electronic countermeasure equipment, with unique capabilities.

Appropriation (new obligational authority)	207,800,000	602,535,000	564,069,000

This appropriation provides for ammunition, ordnance equipment, and guided missiles necessary to support the operational requirements of approved naval forces, to improve the Navy materiel readiness position, to maintain a production base on which to mobilize, and to provide for the systematic introduction of newly developed procurement items into the fleet. Generally this appropriation funds a selected number of weapons to meet the peacetime-force materiel requirements. The 1960 funding remains close to the 1959 level. Consumption of training and exercise materiel will continue to be replaced and major items of hardware will be produced to support the development of new weapons.

1. *Ammunition.*—Provides for the procurement of adaptations for nuclear warheads and of conventional aircraft, gun, and antisubmarine ammunition; mines, torpedoes, and other munitions to support naval forces including facilities and related costs. Among other necessary readiness items, this activity will buy new high-speed submarine-, surface-, and air-launched torpedoes, together with the radically new ASROC antisubmarine weapon.

2. *Ordnance equipment.*—Provides for the procurement of aviation, shipboard, underwater, and shore-based ordnance equipment, not otherwise provided, to support naval forces including facilities and related costs.

3. *Ordnance guided missiles.*—Provides for procurement, including facilities and related costs, of guided and ballistic missiles assigned to the Bureau of Ordnance for the naval forces, and of auxiliary equipment for control, handling, checkout, servicing, and testing. This procurement will continue the integration of selected guided missiles into the active fleet in consonance with the construction and conversion of ships with guided-missile capabilities. Missiles procured under this activity include the air-to-air SIDEWINDER; the ship-to-air TALOS, TARTAR, and TERRIER; and the fleet ballistic missile POLARIS.

4. *Development, test, and evaluation support.*—Provides production hardware necessary to support the final phases of Bureau evaluation before a new item enters the supply system.

"Aircraft, missiles, and related procurement," Air Force			−315,700,000
"Procurement other than aircraft and missiles," Air Force			−16,100,000
Advances and reimbursements from—			
Anticipated reimbursements for future years' deliveries of materiel common to U. S. requirements ordered by military assistance in current year			−18,000,000
Other accounts			−55,000,000
Unobligated balance carried forward			1,190,400,000
Appropriation (new obligational authority)			4,409,100,000

This appropriation provides for development and procurement of aircraft, components, ground equipment in direct support of aircraft, industrial facilities, and modification of in-service aircraft, components, and direct support ground equipment. It brings together in a single appropriation funds for the prime aircraft weapon system and the specialized ground handling and test equipment, which is expected to facilitate management of the program. The funds requested provide for an aircraft procurement and development program of $4,813.9 million for 1960.

1. *Aircraft procurement and production.*—This activity provides for the procurement of 703 new aircraft to continue modernization of the forces comprised of 102 aircraft and missile wings by the end of 1960. In the strategic forces the Air Force is continuing the procurement of heavy bombers which are currently being introduced into this force; also, provision is made for the production of a newer supersonic strategic bomber. These advanced bombers, with greatly increased capability, will replace substantial quantities of obsolescent B–47 medium bombers. Additional jet tankers are provided to obtain the required balanced tanker support of the new heavy and supersonic bombers and the ultimate objective of an all-jet tanker force. All-weather fighter bomber aircraft having supersonic capability are being procured to support the tactical mission. These will be capable of rapid

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

deployment anyplace in the world where needed to support United States foreign policy in localized trouble areas and at the same time provide a significant increase of retaliatory force if necessary. No production interceptor aircraft are included because of the high priority assigned to procurement of missiles toward meeting this need in the short and intermediate range field. Provision is made for jet training and transport aircraft to support the modernized operational forces; for modification of in-service aircraft and components thereof; and for production facilities which cannot be provided by private capital to maintain a reasonable production capability.

2. *Ground support equipment.*—Under this activity will be procured the ground support equipment pertaining to specific aircraft weapon systems. The items procured will be of a type and in quantity to match the procurement of the planes they are to service. Included are such items as test and checkout equipment for the component systems of the supersonic strategic bomber and flight simulators for jet tankers.

3. *Development, test, and evaluation support.*—This activity provides for development, testing, and evaluation of aircraft, components, and direct support ground equipment. Amounts are included for improved versions of items currently in production, such as the supersonic strategic bomber, and for development, testing, and evaluation of new items to be placed in production in a subsequent program year, such as a chemical fuel intercontinental strategic bomber, an improved early warning and control aircraft, and a long-range fighter interceptor.

Missile Procurement, Air Force

For construction, procurement, and modification of missiles, rockets, and related equipment, including spare parts and accessories therefor, ground handling equipment, and training devices; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such land, and interests therein may be acquired and construction prosecuted thereon prior to the approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; reserve plant and equipment layaway; and other expenses necessary for the foregoing purposes, including rents and transportation of things; $2,601,200,000, to remain available until expended: Provided, That, during the current fiscal year, there may be merged with this appropriation, such amounts of unobligated balances of appropriations previously granted for "Aircraft, missiles, and related procurement, Air Force," and "Procurement other than aircraft and missiles, Air Force," as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (5 U. S. C. 55a; 10 U. S. C. 2271–79, 2353, 2386, 2663, 2672, 8012, 8062, 9501–02, 9505, 9531–32, 9741–42; 31 U. S. C. 649 (c), 718; 40 U. S. C. 523; 50 U. S. C. 451–62; Department of Defense Appropriation Act, 1959.)

Estimate 1960, [a] **$2,601,200,000**

[a] Estimate is for activities previously carried, as follows:

"Aircraft, missiles, and related procurement," Air Force	$1,900,000,000
"Procurement other than aircraft and missiles," Air Force	701,200,000

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Direct obligations:			
1. Missile procurement and production			$1,091,900,000
2. Ground support equipment			535,100,000
3. Development, test, and evaluation support			777,500,000
Total obligations			2,404,500,000
Financing:			
Unobligated balances transferred (1960 appropriation act) from—			
"Aircraft, missiles, and related procurement," Air Force			−104,300,000
"Procurement other than aircraft and missiles," Air Force			−50,600,000
Anticipated reimbursements for future year deliveries of materiel common to U. S. requirements ordered by military assistance in current year			−7,000,000
Unobligated balance carried forward			358,600,000
Appropriation (new obligational authority)			2,601,200,000

This appropriation provides for the procurement and development of guided missiles and their components, ground equipment in direct support of guided missile systems, and related expenses such as industrial facilities and modification of in-service missiles and support equipment.

1. *Missile procurement and production.*—The 1960 estimates continue the accelerated production of the ATLAS and TITAN intercontinental ballistic missiles to equip the planned operational squadrons as they are activated. The presently planned procurement of THOR and JUPITER intermediate range ballistic missiles will be substantially completed with the funds provided in 1960, but procurement of the MACE missile for tactical purposes will be continued. Procurement of the HOUND DOG air-to-surface missile to increase the effectiveness of the B–52 heavy bombers will continue at a high level in 1960. The BOMARC interceptor missile for air defense continues to receive major emphasis, and 1960 funds will provide for the procurement for inventory of an improved version. Provision is also made for procurement of air-to-air missiles to equip the planned forces of fighter and interceptor aircraft. The 1960 estimates also recognize increased requirements for target and drone missiles in the testing of missile and aircraft weapons systems and in the training of operational units to use them.

2. *Ground support equipment.*—The principal amounts required in 1960 are for launching and ground equipment for the ATLAS, TITAN, THOR, and JUPITER ballistic missiles and for the BOMARC interceptor missile. Lesser amounts are also included for launching and ground equipment for the other missiles in the program and for test and training equipment requirements for all Air Force missiles.

3. *Development, test, and evaluation support.*—In addition to amounts for continuing development, test, and evaluation of missiles already under procurement for service use and inventory, this activity provides funds in 1960 for development of the MINUTEMAN solid-propellent intercontinental ballistic missile and an advanced air-to-air missile for air defense.

PROCUREMENT—Continued

Current authorizations—Continued

OTHER PROCUREMENT AIR FORCE

For procurement and modification of equipment (including ground guidance and electronic control equipment, and ground electronic and communication equipment), and supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of not to exceed two thousand five hundred and seventy-seven passenger motor vehicles, of which two thousand three hundred and thirty-three (including one at not to exceed $2,900) shall be for replacement only; and expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land, without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such land, and interests therein may be acquired and construction prosecuted thereon prior to the approval of title by the Attorney General as required by section 355, Revised Statutes as amended: $1,165,200,000, to remain available until expended: Provided, That, during the current fiscal year, there may be merged with this appropriation, such amounts of unobligated balances of appropriations previously granted for "Procurement other than aircraft and missiles", as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made: Provided further, That such amounts of unexpended balances of the amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955 (31 U. S. C. 200) of the appropriations "Air National Guard", 1958, and "Air National Guard", 1959, as may be determined by the Secretary of Defense to have been made available for procurement activities shall be merged with this appropriation. (5 U. S. C. 55a, 78, 78a–1; 10 U. S. C. 2353, 2386, 8012, 9505, 9531–32; 31 U. S. C. 649 (c), 718; 50 U. S. C. 491; 71 Stat. 53; Department of Defense Appropriation Act, 1959.)

Estimate 1960, [a] **$1,165,200,000**

[a] Estimate is for activities previously carried under appropriation titles as follows:

"Aircraft, missiles, and related procurement, Air Force"	$15,300,000
"Procurement other than aircraft and missiles, Air Force"	1,131,030,000
"Air National Guard, Air Force"	18,870,000

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Direct obligations:			
1. Weapons, ammunition, and propellants			$57,100,000
2. Vehicular equipment			35,000,000
3. Ground communication-electronic equipment			742,200,000
4. Other base maintenance and support equipment			137,000,000
5. Development, test, and evaluation support			26,100,000
Total direct obligations			998,300,000
Reimbursable obligations:			
1. Weapons, ammunition, and propellants			3,300,000
2. Vehicular equipment			12,000,000
3. Ground communication-electronic equipment			13,000,000
4. Other base maintenance and support equipment			4,700,000
Total reimbursable obligations			33,000,000
Total obligations			1,031,300,000
Financing:			
Unobligated balance transferred from "Procurement other than aircraft and missiles, Air Force" (1960 appropriation act)			−65,300,000
Advances and reimbursements from other accounts			−33,000,000
Anticipated reimbursements for future year deliveries of materiel common to U. S. requirements ordered by military assistance in current year			−20,000,000
Unobligated balance carried forward			252,200,000
Appropriation (new obligational authority)			1,165,200,000

This appropriation provides for command, control, and warning systems and networks, and other centrally procured ground equipment in support of the Air Force, the Air Force Reserve, the Air National Guard, and the Air Reserve Officers Training Corps.

1. *Weapons, ammunition, and propellants.*—The 1960 estimates provide for procuring aircraft ammunition and rockets, atomic training weapons, and other related equipment required for maintaining an immediate combat capability, for augmentation of mobilization reserve stocks of certain combat material, and for replacement of material consumed in the continuous operational efficiency training of pilots and crewmen.

2. *Vehicular equipment.*—The procurement of materials handling equipment, trucks, trailers, and passenger vehicles included in the 1960 estimates will provide for increased rapid handling of equipment and supplies supporting aircraft and missile operations, accelerated replacement of over-age wornout vehicles, and the phased replacement of tactical-type vehicles with commercially available models where possible.

3. *Ground communication-electronic equipment.*—In 1960 funds are provided for the continued accelerated implementation of the ballistic missile early warning system, the warning-surveillance-control environments for air defense, and the communication networks supporting operational missile launching complexes. Provision is also made for extension and improvement of communication networks, ground installed aids to air navigation at air base facilities, and the observation, data processing, and display equipment required for the weather system. Funds for continuing improvement to missile range instrumentation, communications-electronics intelligence, communications security, and electronic countermeasure capabilities are also included. In total, the 1960 estimates represent a substantial increase, which primarily reflects the costs and complexity of equipment required for air defense and for systems responsive to quick reaction and reliability requirements associated with the advent of operational missiles and high performance aircraft.

4. *Other base maintenance and support equipment.*—This program provides for the procurement of such items as fire-fighting equipment, utility equipment, shop machinery and tools, personal equipment, test equipment, photographic equipment, and related supplies and repair parts to support normal base operations, the logistical organization, and other activities of the Air Force.

5. *Development, test, and evaluation support.*—This activity provides for development, testing, and evaluation of end items and components. Amounts are included for improved versions of items currently in use or scheduled for production, such as long-range radars, computers, automatic switching equipment, and communication security equipment which will become a part of future year procurement programs.

[AIRCRAFT, MISSILES, AND RELATED PROCUREMENT] (AIR FORCE)

[For construction, procurement, and modification of aircraft, missiles, and equipment, including armor and armament, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing and other purposes, and such land, and interests therein may be acquired and construction prosecuted thereon prior to the approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; reserve plant and equipment layaway; and other expenses necessary for the foregoing purposes, including rents and transportation of things; $6,643,475,000, to remain available until expended.] (*Department of Defense Appropriation Act, 1959.*)

Appropriated 1959, **$6,643,475,000**
Appropriated (adjusted) 1959, **$6,589,875,000**

NOTE.—Estimate of $6,361,700,000 for activities previously carried under this title has been transferred in the estimates as follows:

"Aircraft procurement, Air Force"	$4,190,300,000
"Missile procurement, Air Force"	1,900,000,000
"Other procurement, Air Force"	15,300,000
"Research, development, test, and evaluation, Air Force"	256,100,000

The amounts obligated for "Research, development, test, and evaluation, Air Force," for 1958 and 1959 are shown in the schedule as comparative transfers.

"Research and development, National Aeronautics and Space Administration" (72 Stat. 433)		−45,100,000	
Appropriation (adjusted)	5,853,000,000	6,589,875,000	

This appropriation provided funds in 1959 and prior years for the procurement and development of aircraft, missiles, and related equipment, which in 1960 will be financed in the three new appropriations shown separately below. The amounts shown for 1960 represent continuation of previously approved programs. A procurement program of $7,260.5 million is currently planned for 1959, as compared to $6,295.7 million in 1958.

1. *Aircraft.*—The 1959 aircraft procurement program will provide 784 aircraft for continued modernization of the Air Force. These aircraft include sufficient heavy bombers to complete the replacement of the older, propeller-driven B–36 and, at the same time, increase the strength of each heavy bomb wing. Sufficient jet tanker airplanes to support these heavy bombers are included in the program. Procurement in production quantities of several new types of aircraft was initiated as part of the 1959 program, including a supersonic strategic bomber to replace the existing B–47's, an all-weather tactical fighter-bomber, a supersonic jet training plane, and a turbine-powered rescue helicopter. Two types of small-jet-engine airplanes expected to be available on the civilian market are included in the program for training and utility transport purposes. The 1959 procurement program also included the final production quantities of two models of short range air defense interceptor airplanes. In addition, the 1959 program provides for further modernization through the modification of in-service aircraft and their components.

2. *Missiles.*—The 1959 program provides for development and production of ballistic missiles for the strategic mission such as ATLAS, TITAN, THOR, and JUPITER; for the air defense mission, the BOMARC interceptor missile and the air-to-air FALCON missile; and for the tactical mission, the MACE. The QUAIL and HOUND DOG missiles are being procured to help manned bombers accomplish their missions. The missile program also provides drones for the testing of interceptor airplanes and their air-to-air missiles and ground-launched interceptor missiles. In-service missiles and their components are modernized through modifications financed by this activity.

Activities 3 through 5 are no longer financed in this appropriation. The obligations shown in 1958 represent final obligations against prior year programs.

PROCUREMENT—Continued

Current authorizations—Continued

[PROCUREMENT OTHER THAN AIRCRAFT AND MISSILES] (AIR FORCE)

[For procurement and modification of equipment (including ground handling equipment for aircraft and missiles, ground guidance and electronic control equipment, and ground electronic and communication equipment), and supplies, materials, and spare parts therefor, not otherwise provided for; and the purchase of not to exceed twenty-seven hundred and fifty passenger motor vehicles for replacement only; $2,220,020,000, to remain available until expended, of which amount $16,500,000 shall be transferred to "Establishment of Air Navigation Facilities", Civil Aeronautics Administration for the Department of Defense share of the cost of the 1959 program for the air navigation system known as Vortac.] (*Department of Defense Appropriation Act, 1959.*)

Appropriated 1959, **$2,220,020,000**

NOTE.—Estimate of $2,174,630,000 for activities previously carried under this title has been transferred in the estimates as follows:

"Aircraft procurement, Air Force"	$218,800,000
"Missile procurement, Air Force"	701,200,000
"Other procurement, Air Force"	1,131,030,000
"Research, development, test, and evaluation, Air Force"	123,600,000

The amounts obligated for "Research, development, test, and evaluation, Air Force," for 1958 and 1959 are shown in the schedule as comparative transfers.

Transferred to "Expenses," Airways Modernization Board (31 U. S. C. 581C)	−5,693,000		
Appropriation (adjusted)	1,525,807,000	2,220,020,000	

This appropriation provided funds in 1959 and previous years for procurement and development of ground equipment integral to aircraft and missile systems of the Air Force, for warning and control systems for air defense, and for other centrally procured ground equipment in support of the Air Force, the Air Force Reserve, the Air National Guard, and the Air Reserve Officers Training Corps. The amounts shown for 1960 obligations represent continuation of previously approved programs. Beginning with the 1960 program, procurement of these items is included under the new appropriations for Aircraft procurement, Missile procurement, Other procurement, and Research, development, test, and evaluation.

1. *Weapons, ammunition, and propellants.*—The 1959 program provides for atomic training weapons and aircraft rockets, ammunition, and similar items required for consumption in peacetime training and for an adequate reserve of combat material.

2. *Vehicular equipment.*—Provision is made for recurring requirements for passenger motor vehicles, trucks, tractors, trailers, and materials handling equipment of all elements of the Air Force.

3. *Ground communication-electronic equipment.*—The 1959 program includes substantial amounts for extension and augmentation of distant early warning lines, and for radar surveillance systems, communications networks, and ground installed aids to aircraft navigation. Funds are also included for development and procurement of missile range instrumentation and other electronic equipments.

4. *Ground handling equipment.*—The principal amounts in 1959 are for launching, guidance, and ground test equipment for ballistic missiles and for BOMARC interceptor missiles for air defense. Funds are also included for specialized ground equipment for other missile systems and for manned aircraft.

5. *Training equipment.*—The 1959 program includes funds for aircraft flight simulators, missile simulation equipment, mobile maintenance trainers, and other training aids and devices designed to facilitate the training of Air Force personnel in the use of the increasingly complex types of equipment coming into the operational inventory.

6. *Support equipment and supplies.*—This activity provides for recurring Air Force requirements for items such as shop machinery, tools and materials, personal equipment, photographic equipment and supplies, office machines and equipment, furniture and furnishings, and food service equipment. Funds are also included for test equipment and specialized tools to support in-production aircraft weapon systems and certain intelligence programs.

7. *Base maintenance equipment.*—This activity covers requirements for engineering machinery and equipment, fire-fighting equipment, utility equipment, and other general types of equipment required in the operation of Air Force bases.

CONSTRUCTION OF SHIPS, MILITARY SEA TRANSPORTATION SERVICE, DEPARTMENT OF DEFENSE

[Appropriations] *The appropriation* to the Department of Defense for ["Access roads", and "Family housing"] *"Construction of ships, Military Sea Transportation Service,"* shall not be available for obligation after June 30, [1958] *1959. (Department of Defense Appropriation Act, 1959.)*

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Construction of ships (total obligations)	$4,645,059	$2,800,000	
Financing:			
Unobligated balance brought forward	−10,255,495	−5,610,436	
Unobligated balance carried forward	5,610,436		
Unobligated balance no longer available		2,810,436	
Appropriation (new obligational authority)			

This program provided for the construction of commercial-type ships and high-speed tankers to meet requirements of the Military Sea Transportation Service which could not be satisfied from existing sources. No further program of this type is contemplated.

Object Classification

	1958 actual	1959 estimate	1960 estimate
07 Other contractual services	$1,457,344	$1,512,000	
09 Equipment	3,187,715	1,288,000	
Total obligations	4,645,059	2,800,000	

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The appropriations in this title cover the amounts formerly included in appropriations for "Research and development" and a substantial portion of the related amounts for development, test, and evaluation which have been included in procurement and certain other appropriations in previous years. The estimated amounts for items identified as development, test, and evaluation support remaining in the procurement appropriations in the 1960 budget bring the estimated combined totals for research, development, test, and evaluation to the amounts indicated below:

[In millions]

	Total direct obligations		
	1958 actual	*1959 estimate*	*1960 estimate*
Research, development, test, and evaluation appropriations	$2,502.7	$3,521.9	$3,722.4
Development, test, and evaluation support included in procurement appropriations	1,656.0	1,821.7	1,843.4
Total, research, development, test, and evaluation including procurement support [1]	4,158.7	5,343.6	5,565.8

[1] Exclusive of military pay and military construction; see special analysis H in part IV

The amounts provided in the 1960 estimates for the research, development, test, and evaluation appropriations will continue the present high level of effort and emphasis on basic research to add to the store of knowledge on which significant future military developments will be based; on applied research and technical developments to exploit military potentialities of new scientific information; and on the development, test, and evaluation of new and improved weapons and equipment to increase the effectiveness of the military forces. The amounts included for obligation in the individual appropriations in this title for the three military departments, the Advanced Research Projects Agency, the emergency fund, and expired accounts are summarized below:

[In millions]

	1958 actual	*1959 estimate*	*1960 estimate*
Summary of program by activities:			
1. Military sciences	$334.4	$360.3	$371.9
2. Aircraft and related equipment	442.5	472.6	437.3
3. Missiles and related equipment	904.3	1,341.8	1,437.6
4. Military astronautics and related equipment	17.4	345.9	309.1
5. Ships and small craft and related equipment	132.1	158.7	167.7
6. Ordnance, combat vehicles, and related equipment	179.1	188.8	235.0
7. Other equipment	323.6	379.9	430.8
8. Programwide management and support	135.1	137.8	133.0
9. Emergency fund and expired accounts	34.2	136.1	150.0
Total direct obligations	2,502.7	3,521.9	3,722.4

1. *Military sciences.*—This activity includes basic research in the physical and life sciences, applied scientific research of importance for military purposes, operations research, and the development of new materials, components, and techniques. Among the many and widely varied problems to be investigated under this activity in 1960 are radio astronomy, properties of free radicals, thermoelectric materials, masers, neurosensory phenomena, blood substitutes, boundary layer control, hydrofoils, cargo packaging, and personnel selection, classification, and utilization. Supporting research projects which are associated with specific end-item developments are funded under the other activities below. The principal support of such organizations as the Naval Research Laboratory, the Air Force's Cambridge Research Center and Rand Corporation, and the Army's Operations Research Office and Human Resources Research Office is provided under this activity in addition to work performed by universities, nonprofit organizations, and industry.

2. *Aircraft and related equipment.*—This activity funds research, development, test, and evaluation related to airframes; their engines and armament; and communications, navigation, bombing, fire control, and other installed equipment. With the exception of certain research aircraft, procurement of these items in quantity for test and evaluation is funded under the procurement accounts. Among the specific aircraft funded under this activity is the X–15 hypersonic research aircraft, a joint program of the Air Force, Navy, and National Aeronautics and

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION—Continued

Space Administration, which is scheduled to undergo its initial flight tests during the current fiscal year. Other aircraft under development are an Air Force advanced strategic bomber, the B–70; the boost-glide DYNASOAR program; new antisubmarine warfare and fleet air defense aircraft under design by the Navy; and vertical and short takeoff aircraft, including an aerial jeep, of the Army. A major component development effort is the aircraft nuclear propulsion program conducted by the Air Force; additional funds for this program are provided by the Atomic Energy Commission. Research and test centers primarily funded under this activity include the Air Force's Arnold Engineering Development Center and Flight Test Center and the Naval Air Test Center.

3. *Missiles and related equipment.*—This activity includes research, development, test, and evaluation of strategic, tactical, air defense, and special purpose missiles, test vehicles, and related equipment. Practices respecting procurement of missiles in quantity for test and evaluation vary among the military services, and additional funds for test and evaluation missiles are provided by the Air Force and Navy under the procurement accounts. Advanced liquid propellent missiles under development include the ATLAS and TITAN. The increasing emphasis on solid propellent missiles of high operational readiness and simplified logistics is exemplified in the strategic field by the Navy's POLARIS and the Air Force's MINUTEMAN and in the tactical field by the Army's SERGEANT and PERSHING missiles and by a new battle group missile. A major effort is being continued in the field of defense against ballistic missiles; this effort involves both the Army's NIKE ZEUS antimissile system and an extensive research and development effort on new techniques sponsored by the Advanced Research Projects Agency. Marine Corps applications of missile developments are also included in this activity. In addition to funding industrial participation in the missile research and development program, this activity is the principal source of funds for the operation of such development and test centers as the Air Force's Atlantic Missile Range, Air Proving Ground Center, and Missile Development Center; the Navy's Pacific Missile Range, Naval Ordnance Test Station, and Applied Physics Laboratory; and the Army's White Sands Missile Range, Ballistic Missile Agency, Rocket and Guided Missile Agency, and Diamond Ordnance Fuze Laboratory.

4. *Military astronautics and related equipment.*—This activity provides for the conduct of programs directed at the improvement of space technology for military purposes and the investigation of specific military applications of space vehicles. The Advanced Research Projects Agency is the primary sponsor of these programs and is conducting research and development related to such specific applications of military interest as reconnaissance, communications, navigation, and early warning of ballistic missile attack. The Air Force's effort in this field in 1960 includes work on advanced propulsion, secondary power, guidance, and navigation components and equipment.

5. *Ships and small craft and related equipment.*—This activity provides for research, development, test, and evaluation related to ships and small craft. Although the Navy provides funds under the shipbuilding appropriation for the procurement of ships of advanced design and ships employed in the development, test, and evaluation of new components and techniques, this activity funds much of the effort related to advanced engines and propulsion machinery; communications, data systems, detection, countermeasures, and other shipboard electronic equipment; catapults and arresting gear; and other installed equipment. The Army's program under this activity is concerned with small craft for transport, reconnaissance, and assault use. A significant part of the research and development effort of the Naval Electronics Laboratory and David Taylor Model Basin is funded under this activity.

6. *Ordnance, combat vehicles, and related equipment.*—The Army's program in this area includes a variety of vehicles ranging from personnel and cargo carriers to self-propelled guns and tanks; improved rocket launchers, field guns, howitzers, mortars, small arms, and other weapons; and more effective artillery and small arms ammunition, mines, and grenades. Among the developments underway which will be continued in 1960 are new division and direct support artillery weapons to provide an advanced non-atomic capability and a new antitank system. The Navy's 1960 program emphasizes antisubmarine weapons and includes mines, depth charges, torpedoes, bombs and clusters, rockets, shells, and other types of ammunition and related components. Specialized weapons and support vehicles for the Marine Corps are also provided. Research, development, test, and evaluation conducted by the Air Force in this area is concerned with ammunition, rockets, bomb components such as fuses, and related components and equipment. This activity provides the principal support of the Naval Ordnance Laboratory and of research, development, test, and evaluation activities at several of the Army arsenals.

7. *Other equipment.*—This activity provides for research, development, test, and evaluation of equipment not separately provided under other activities. Examples of the types of equipment involved are communications, construction, reconnaissance, and mapping equipment in the Army; certain navigation, detection and warning equipment, harbor defense equipment, shore-based antisubmarine and mine countermeasures systems, radiological and aerological equipment in the Navy; and photographic equipment, aircraft control and warning system equipment (including developments related to the Ballistic Missile Early Warning System) and communications systems in the Air Force. Much of the support of the research and development effort of the Lincoln Laboratories and the Signal Research and Development Laboratory is provided under this activity by the Air Force and Army, respectively.

8. *Programwide management and support.*—This activity provides for the operation, management, and maintenance of research, development, and test facilities of the Army, Air Force, and Advanced Research Projects Agency which are not distributed directly to other budget activities. Costs of research, development, and test centers of the Navy are fully distributed among the other activities.

9. *Emergency fund.*—The emergency fund appropriation enables the Secretary of Defense to supplement appropriations of the departments available for research, development, test, and evaluation in order to defray the cost of preliminary exploitation of new developments and other such contingencies.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION—Continued

Current authorizations—Continued

RESEARCH, [AND] DEVELOPMENT, *TEST, AND EVALUATION, NAVY*

For expenses necessary for basic and applied scientific research, [and] development, *test, and evaluation*, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, [$821,285,000] *$970,920,000*, to remain available until expended: *Provided, That, during the current fiscal year, there may be merged with this appropriation such amounts of the unexpended balances of appropriations heretofore made available for research, development, test, and evaluation, as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (10 U. S. C. 174, 1584, 2352–57, 5150–53, 7522; Department of Defense Appropriation Act, 1959.)*

Appropriated 1959, **$821,285,000** Estimate 1960, [a] **$970,920,000**

[a] Includes $187,920,000 for activities previously carried under appropriations as follows:

"Aircraft and related procurement, Navy"	$39,706,000
"Shipbuilding and conversion, Navy"	21,800,000
"Procurement of ordnance and ammunition, Navy"	85,931,000
"Procurement, Marine Corps"	6,800,000
"Aircraft and facilities," Navy	9,926,000
"Ships and facilities," Navy	21,363,000
"Ordnance and facilities," Navy	1,111,000
"Civil engineering," Navy	483,000
"Marine Corps troops and facilities"	800,000

The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate

RESEARCH, [AND] DEVELOPMENT, *TEST, AND EVALUATION, AIR FORCE*

For expenses necessary for basic and applied scientific research, [and] development, *test, and evaluation,* including maintenance, rehabilitation, lease and operation of facilities and equipment, as authorized by law, [$743,000,000] *$1,149,900,000,* to remain available until expended: *Provided,* That [no part of this appropriation shall be used for construction, maintenance, or rental of missile testing facilities until the fullest practical use is made of testing facilities and equipment at existing installations or those now under construction], *during the current fiscal year, there may be merged with this appropriation such amounts of the unexpended balances of appropriations heretofore made available for research, development, test, and evaluation, as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (5 U. S. C. 55a, 10 U. S. C. 174, 1581, 1584, 2271–2279, 2352–2354, 2386, 2663, 2672, 8012, 9503–9504, 9532; 31 U. S. C. 649 (c), 718; 40 U. S. C. 523; 50 U. S. C. App. 2093; 72 Stat. 241, 1793; Department of Defense Appropriation Act, 1959.)*

Appropriated 1959, **$743,000,000** Estimate 1960, [a] **$1,149,900,000**
Appropriated (adjusted) 1959, **$730,130,000**

[a] Includes $399,900,000 for activities previously carried under appropriations, as follows:
"Aircraft, missiles, and related procurement," Air Force $256,100,000
"Procurement other than aircraft and missiles," Air Force 123,600,000
"Operation and maintenance, Air Force" 20,200,000
The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

MILITARY CONSTRUCTION

The military construction programs for the Armed Forces, both Regular and Reserve, in terms of dollar obligations shown in the individual schedules of this title are summarized in the following table:

MILITARY CONSTRUCTION OBLIGATIONS

	1958 actual	*1959 estimate*	*1960 estimate*
Current authorizations:			
Regular	$1,549,590,327	$1,931,090,800	$579,518,432
Reserve	94,193,753	74,784,000	18,231,647
Proposed for later transmission under proposed legislation, 1960:			
Regular			954,681,568
Reserve			51,768,353
Total:			
Regular	1,549,590,327	1,931,090,800	1,534,200,000
Reserve	94,193,753	74,784,000	70,000,000
Total construction	1,643,784,080	2,005,874,800	1,604,200,000

The following narrative statement covers the three regular military construction appropriations for the Army, Navy, and Air Force as set forth in the supporting schedules. The amounts shown for 1960 represent continuation of previously authorized programs. Additional amounts anticipated for 1960 are proposed for later transmission.

1. *Public works construction.*—This program provides for acquisition of land for, and construction of, military public works projects in the United States and overseas as authorized by Public Law 85–685 and prior military public works authorization acts. These projects support the current and long-range programs to strengthen and modernize the Regular Armed Forces and include operational and training, maintenance, research and development, supply, medical, and administrative facilities, family housing, troop housing, community facilities, and utilities.

2. *Minor construction.*—Provision is made for construction of permanent and temporary public works that are not otherwise authorized by law but which are determined to be urgently required and do not exceed $200,000 per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and the architect-engineer services, land and utilities, in support of the privately financed Capehart housing program, and rehabilitation of inadequate public quarters.

Current authorizations:

[MILITARY CONSTRUCTION, ARMY]

[For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as authorized by section 102 of the Act of September 28, 1951 (Public Law 155), by section 102 of the Act of July 14, 1952 (Public Law 534), the Act of September 1, 1954 (Public Law 765), the Act of July 15, 1955 (Public Law 161), the Act of August 3, 1956 (Public Law 968), the Act of August 30, 1957 (Public Law 85–241), and such additional projects as may be authorized by law during the second session of the Eighty-fifth Congress, without regard to section 4774 (d) of title 10, United States Code, and section 3734, Revised Statutes, as amended, to remain available until expended, $230,000,000.] (*Military Construction Appropriation Act, 1959.*)

Appropriated 1959, **$230,000,000**

Appropriation (new obligational authority)	5,500,000	20,000,000	

These funds are advanced to the Coast Guard for construction of loran stations in areas essential to the defense of the United States. Loran transmitting stations permit safe and effective operation of ships, submarines, and aircraft of the military services in all kinds of weather, day or night, by an electronic system of navigation which provides continuous navigational positions by means of intersecting lines of position.

The amount anticipated to be needed in 1960 for loran stations is shown under Proposed for later transmission.

Unobligated balance carried forward	672,209	599,409	599,409
Appropriation (new obligational authority)			

The Alaska Communication System furnishes internal and external telegraph and long distance telephone service for Alaska. This account provides for the construction of operations buildings and utilities to house technical equipment, barracks to house enlisted men, and family quarters for the housing of operating personnel. Obligations in 1959 will permit completion of projects at Lena Point, Nome, Bethel, and Kotzebue which were initiated in 1957, and a combination troop housing and operations building at Adak, initiated in 1958.

Capehart Housing

The Department of Defense is authorized under title VIII of the National Housing Act, as amended (69 Stat. 646), to contract for the construction of family housing on military installations in the United States, its Territories, and possessions and assume mortgage indebtedness, not to exceed $2.3 billion in principal obligations outstanding at any time, required to fund such construction. Mortgage funds are provided through private investment and through the Federal National Mortgage Association under a special assistance fund authorization. The mortgages are insured by the Federal Housing Administration

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

through the armed services housing mortgage insurance fund authorized for this purpose, for which insurance premiums are charged at the rate of ¼ of 1% per annum on the outstanding principal obligations of the mortgages. The mortgages have a maturity date not to exceed 25 years and are amortized by periodic payments which provide for reduction of the principal obligation, and interest at a rate not to exceed 4½% per annum. No mortgage may involve a principal obligation which exceeds the lower of: (*a*) the Federal Housing Administration estimate for replacement cost of the completed housing project; (*b*) an average of $16,500 per family dwelling unit; or (*c*) the lowest acceptable bid received among the bids submitted by eligible bidders seeking award of the construction contract.

Mortgage payments, providing for the reduction of the principal obligations of the mortgages, for interest and for mortgage insurance premiums, are made from the appropriations for military pay and allowances. Such payments may not exceed an average of $90 per month per housing unit and total payments for all such housing may not exceed $21 million per month.

Funds are authorized (65 Stat. 365) to be appropriated to acquire land, prepare sites and install off-site utilities for housing projects constructed under title VIII of the National Housing Act, as amended. Expenditures incurred for this purpose may not exceed an average of $1,500 per housing unit in respect of any housing project nor more than an average of $1,000 per housing unit in respect of all housing projects for which appropriations are made under this authorization.

Operating results.—The following schedule indicates the mortgage indebtedness and costs realized and anticipated through 1960 for Capehart housing completed and occupied by defense personnel. The contingent liability of the department for contracts awarded as of the end of each year is indicated for housing projects under construction. The schedule does not reflect operation and maintenance costs for this housing, which are financed from the military operation and maintenance appropriations, nor depreciation.

Overseas Rental Guaranty Military Family Housing

The Department of Defense is authorized (66 Stat. 622) to guarantee rental payments to private sponsors of family housing projects built in foreign countries for use by Defense personnel. The guaranty may not exceed 95% of the scheduled rentals the sponsors would receive from full occupancy of the housing by Defense personnel over periods ranging from 5 to 10 years depending upon the length of time Defense expects to occupy the housing and the prospect for its eventual use by native populations. The amount of such guaranties outstanding at any time may not exceed $100 million. The housing is wholly owned by the private sponsors who build, operate, and maintain it in accordance with the terms of the rental guaranty agreements. Commanders of the military installations served by the housing projects are responsible for maintaining occupancy by installation personnel at the guaranteed 95% level. Under this program 4,838 housing units have been built at 31 locations in France, and 700 housing units at 3 locations in Morocco. The development of the surplus commodity overseas military family housing program has largely supplanted the use of the rental guaranty authority.

Operating results.—The following schedule indicates the extent to which the rental guaranty authority has been used and the estimated reduction of the Government's contingent liability under these guaranties through 1960:

SCHEDULE OF RENTALS AND STATEMENT OF CONTINGENT LIABILITY

	1958 actual	*1959 estimate*	*1960 estimate*
Schedule of rentals:			
Number of units	5,538	5,406	5,406
Scheduled rentals, start of year	$47,395,080	$47,395,080	$47,253,080
Agreements cancelled	----------	−142,000	----------
Scheduled rentals, end of year	47,395,080	47,253,080	47,253,080
Contingent liability:

[1] Excludes following amounts derived from barter transactions for facilities in France: 1958, $11,054,668; and 1959, $38,488,582.

The Department of Defense is authorized (68 Stat. 1125, as amended by 70 Stat. 1017) to construct or otherwise acquire family housing for occupancy as public quarters and community facilities in foreign countries utilizing foreign currencies to a value not to exceed $250 million. The foreign currencies are acquired pursuant to the provisions of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454) or through other commodity transactions of the Commodity Credit Corporation. In addition, the Department is authorized appropriated funds not to exceed 25% of the total cost of each family housing and community facilities project as may be necessary to supplement the foreign currencies to obtain the required facilities.

The Department is required to reimburse the Commodity Credit Corporation in a dollar amount equivalent to the value of the foreign currencies utilized. For this purpose, the Department is authorized to utilize appropriations otherwise available for the payment of quarters allowances to personnel who occupy such housing. Amounts chargeable for the maintenance and operation of such housing are authorized (69 Stat. 350) to be deducted from the quarters allowances withheld for reimbursing the Commodity Credit Corporation.

Operating results.—The following 3 schedules indicate the indebtedness of the Department to the Commodity Credit Corporation and costs realized and anticipated through 1960 for the construction of housing and community facilities projects in foreign countries for use by Defense personnel.

Financing applied to program	60,152,785	116,000,000	85,450,000

This fund finances the acquisition costs, mortgage payments, and initial alteration, improvement, rehabilitation, and repair of certain family units of Wherry Act housing (70 Stat. 1111–1112).

Budget program.—The budget program contemplates acquisition of about 65,800 units of Wherry Act family housing by the end of 1960, at a total cost of $562.6 million, which includes 16,000 units at a cost of $138.1 million in 1959 and 5,000 units costing $42.6 million in 1960. Acquisition of Wherry Act housing is mandatory at installations where the construction of housing under the armed services housing mortgage insurance program (Capehart housing) has been approved by the Secretary of Defense and is permissive in all other cases.

During 1959 and 1960 it is planned to rehabilitate approximately 45,000 units of which $50 million will be funded in 1959 and $66.5 million in 1960.

Financing the budget program.—This program is funded from reappropriations, rentals, and, where the housing is assigned as public quarters, from payments from appropriations for pay and allowances of military personnel in amounts equal to the quarters allowances to which the occupants would otherwise be entitled. The cost of maintaining and operating the housing is financed from the military operation and maintenance appropriations. Mortgage indebtedness assumed in acquiring the housing is reflected in the schedules.

A reappropriation of $30 million is estimated in 1960 pursuant to the authority in section 512 of the Housing Act of 1956. Revenue from quarters allowances and rentals is expected to increase from an estimated $50 million in 1959 to approximately $57.5 million in 1960.

Operating results and financial condition.—Net budget expenditures of $42 million are expected both in 1959 and in 1960 since outlays for acquisition of sponsors' equities, mortgage payments, rehabilitation, and other costs will substantially exceed the amounts available from quarters allowances and rentals. Operating income is expected to exceed operating expenses paid from the fund by an estimated $32.8 million in 1959 and $37.1 million in 1960. This revenue is available for financing the acquisition and rehabilitation of additional units as well as for payments of operating expenses. The schedules do not reflect depreciation as a matter of established accounting policy nor operation and maintenance costs excluded by legislation which established this fund. Government investment is estimated at $241.7 million at June 30, 1960, consisting of $160 million in reappropriations and $81.7 million in retained earnings.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of unpaid undelivered orders as follows: 1957, $33,100; 1958, $2,924,947; 1959, $26,674,947; 1960, $10,206,547.

This fund finances the maintenance, operation, improvement, and liquidation of temporary family housing units transferred to the Department of the Army (70 Stat. 1106). Funds are provided by rental receipts. During 1958, there were 2,281 inhabitable family units maintained with an average occupancy of 2,250 units. During 1959, a total of 325 units at Fort Rucker will be replaced by Capehart housing. This will effect an anticipated reduction in rental income of $187,000 and in operational expense of $40,000 per annum. During 1959, the sum of $750,000 which is surplus to operational requirements of the fund will be returned to the Treasury. In 1960, a total of 1,956 family units will be maintained and an additional $500,000 in profits is anticipated to be available for transfer to the Treasury.

REVOLVING AND MANAGEMENT FUNDS—Con.

Public enterprise funds—Continued

DEFENSE HOUSING, NAVY—Continued

This fund finances the maintenance, operation, improvement, and liquidation of temporary family housing units transferred to the Department of the Navy (70 Stat. 1106). During 1958, there were 4,180 family units maintained. This number will decline to 4,005 in 1959 and 1960.

Funds were initially provided this program by a transfer of $375,000 in 1957 from the Housing and Home Finance Agency. This investment, plus $75,000 which is surplus to operational requirements of the fund, or a total of $450,000 will be returned to the Treasury in 1959. In 1960, the program will be entirely self-supported through use of rental receipts and another $75,000 in profits will be returned to the Treasury.

Relation of costs to obligations.—The relationship is derived by year-end balances of unpaid undelivered orders as follows: 1957, $269,311; 1958, $220,982; 1959, $54,982; 1960, $54,982.

This fund finances the procurement and maintenance of inventories of common-use items for resale and for mobilization reserve (5 U. S. C. 172d). Some 668,000 line items are included, about 90% of the line items in the Army's total inventory.

The fund is centrally directed and controlled by the Department of the Army and managed through the defense supply service and the Army's seven technical services. Among the 13 material categories included in the fund are 2 single manager assignments covering continental United States depot inventories of clothing and subsistence for all the military services. Sales of inventories held by the two single managers are generally made to the retail stock funds of all military services at continental United States stations and oversea areas for resale to the consuming appropriations. Inventories of other categories are sold directly to the consuming appropriations.

The fund includes inventories in all depots in the continental United States and the six major overseas commands, and inventories at certain stations in the United States. No significant changes were made in 1958 in the types of material or geographic areas covered by the stock fund. The fund hereafter will be extended to include so far as

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

ARMY STOCK FUND—Continued

practicable the stocks at major posts, camps, and stations, and to include additional categories of aircraft and missile supplies and spare parts. The effective dates of these extensions, which are not reflected in the statements and schedules presented here, are yet to be determined. Changes in inventory capitalized under each category represent, primarily, returns of unneeded material from organizations outside the stock fund system and transfers in 1958 to the single managers from other military services. Amounts are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Army clothing and equipage	−$29,376,169	$6,094,679	$9,800,000

Budget program.—Obligations are estimated to increase by $114 million from 1958 to 1960. Although obligations for peacetime stocks are lower, $75 million is included in the 1959 program and $175 million in 1960 to improve the status of mobilization reserve stocks. Obligations for peacetime stocks were 87% of sales in 1958, and are forecast at 85% in 1959 and 1960. The reduction in this ratio, in the face of a steady decline in long-supply stocks which can be sold without replacement, is possible only because the estimated requirement for material to be on order at the end of 1960 is less than the actual orders outstanding at the end of 1958. The budget program provides for year-end inventories as follows:

	1958 actual	*1959 estimate*	*1960 estimate*

Summary:			
Operating stocks	4,221,667,133	2,887,197,793	2,139,987,757
Mobilization reserve stocks	1,715,110,469	1,766,572,000	1,898,989,000
Excess or surplus stocks awaiting disposal	607,519,959	675,166,470	475,133,470
Total inventories	6,544,297,561	5,328,936,263	4,514,110,227

The forecast inventory decrease of $2,030.2 million from 1958 through 1960 includes an estimated $591 million to be accomplished through sales of peacetime stocks without replacement. It is estimated that $1,450 million will be lost in disposal of surplus stocks in 1959 and 1960. Issues without reimbursement and authorized donations of stock are estimated at $274 million in 1959 and 1960, and inventory losses and price adjustments at $90 million. Offsetting these reductions in part are capitalizations of $235 million and $140 million of mobilization reserve stocks to be received from procurement. The large disposals of surplus stocks shown in the estimates reflect a positive program initiated in 1958 to review more critically the stocks authorized for retention and to identify inactive and long-supply stocks for elimination from the system.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. A sales decline of $16 million, less than 1%, is forecast from 1958 to 1960, reflecting slight reductions in customer requirements.

Collections exceeded expenditures by $566.1 million in 1958, and are expected to exceed expenditures by $281 million in 1959 and $262 million in 1960. A major reason for the forecast decline in negative expenditures is the fact that long-supply stocks are decreasing, and the ability of the fund to effect sales without replacement is progressively diminishing. In 1958, the excess of receipts over expenditures was heightened by a $52 million reduction in working capital balances, primarily resulting from accelerated billings and collections for sales. Reductions in working capital are estimated to contribute only $18 million to negative expenditures in 1959 and $10 million in 1960. In addition, the 1959 and 1960 expenditure estimates include $34 million and $106 million, respectively, in expenditures for mobilization reserve stocks.

Transfers of $350 million in 1958 and $375 million in 1959 were effected to Military personnel, Army, and a transfer of $200 million is proposed in 1960. This would bring total rescissions and transfers from the fund to $2,769.5 million.

Operating results and financial condition.—The net loss was $773.5 million in 1958, and net losses are forecast at $1,087.1 million in 1959 and $662.2 million in 1960. These losses occur mainly from disposal of surplus stocks, and are especially high in the period here presented because of the acceleration of programs for purging inactive and long-supply stocks. Incident to the reduction in Army activities in Japan and the transfer of certain logistical responsibilities to Korea, stocks were authorized to be transferred to Army forces in Korea in the amount of $32.3 million in 1958, and $20.1 million of such issues is estimated in 1959. The $23.5 million adjustment to prior year revenue and expense is the net of a decrease of $26.6 million in prior year receivables, to adjust an

Federal Reserve Bank of St. Louis

overstatement of sales in prior years, and a decrease of $3.1 million in prior year payables.

Stock fund prices have not been high enough in the past to provide for recovery of losses incident to disposal of property as surplus, because stocks disposed of up to this time have consisted mainly of items which were surplus when capitalized. Some generation of excess stock is inevitable in supply operations, however. The resulting disposal losses must be recovered in the prices charged to customers, if this revolving fund is to avoid unreasonable losses of capital. Increasing attention is being given to the establishment of prices which recognize this cost factor, as well as to improved supply management which will minimize the amount of inventory which becomes surplus.

Government investment at June 30, 1960, is estimated at $5,271.5 million, including $10,991.7 million in capitalized assets less a deficit of $3,375.2 million and less $2,344.9 million of net transfers and rescissions from the fund.

This fund, initially established in 1893, finances the procurement and maintenance of inventories of common-use material and supplies for resale and mobilization reserve (5 U. S. C. 172d). It includes items in all levels of shore based inventories and in inventories of fleet issue ships afloat.

In 1958 inventories capitalized under the fund increased $100 million, the net result of bringing in new stocks of general stores, ships parts, electronics and base equipment repair parts, and transferring to the Army stock fund depot-level stocks of clothing and textiles. Certain ordnance repair parts will be brought under the fund in 1960. Estimates contemplate changes in the inventory capitalized under each category of the fund as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Special clothing and textiles	−$16,833,281	−$6,560,000	
Photographic material	1,044,352

Ordnance repair parts			260,140,000
Other	3,332,613		
Single manager medical and dental material	9,647,046		
Total inventories capitalized during year (net of decapitalization)	100,098,969	3,500,000	260,400,000
Charges (−) against capital for loss on disposal of inventory surplus at time of capitalization			−22,580,000
Net change in capitalized inventories	100,098,969	3,500,000	237,820,000

Budget program.—The net increase in obligations of $55.8 million reflected from 1958 to 1960 is expected to result from the capitalization of ordnance repair parts, procurement of specific mobilization reserve stocks, and a decline in long supply stocks in general, which will make it necessary to procure to replace sales to a greater extent. The budget program would provide for year-end inventories as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Special clothing and textiles:			
Operating stocks	$20,583,600	$14,600,000	$10,560,000

Summary:			
Operating stocks	1,093,505,740	906,517,000	934,757,000
Mobilization reserve stocks	729,343,000	765,883,000	806,943,000
Excess or surplus stocks awaiting disposal	233,335,245	162,840,000	62,820,000
Total finished material in store	2,056,183,985	1,835,240,000	1,804,520,000
Material in transit from procurement	57,989,037	57,989,037	57,989,037
Material in transit between supply officers	51,371,326	51,371,326	51,371,326
Manufacturing work in process	199,477	199,477	199,477
Total inventories	2,165,743,825	1,944,799,840	1,914,079,840

The forecast inventory decrease of $252 million from 1958 to 1960 is the net of $264 million in material capitalized, $21 million in specific mobilization reserve stocks to be received from procurement, and $537 million in reductions. These reductions reflect an estimated $380 million in losses on disposal of surplus inventory, $110 million in sales of peacetime stocks without replacement, $30 million in authorized donations and $16 million in losses and adjustments.

Financing the budget program.—Funds for financing the budget program are derived from sales of material to authorized customers. Sales in 1960 are estimated at $5.6 million above the 1958 level, the net of a $22.4 million increase resulting from capitalization of ordnance repair parts and $16.8 million in decreases reflecting a slight decrease in customer requirements. In 1959 and 1960 cash receipts are expected to exceed disbursements by $10 million and $75 million, respectively. In 1958 and 1959, transfers from the fund of $100 million and $120 million, respectively, were effected to Military personnel, Navy. An additional $75 million is recommended for transfer to that appropriation in 1960.

Operating results and financial condition.—The statements show substantial net losses of $213.7 million in 1959 and $193.6 million in 1960 compared with a loss of $143.1 million in 1958. These losses are expected to result largely from disposal of excess and surplus inventories at about 5% of standard price.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Net inventory losses of $6.8 million are forecast for 1959 and 1960, about the same as the loss experienced in 1958. This loss represents the net from discrepancies in shipments, pilferage, losses in storage, differences disclosed by physical inventories, and accounting adjustments.

The Government investment at June 30, 1960, is estimated at $2,093.3 million, consisting of $411.6 million of appropriations and reappropriations, $2,206.8 million of net capitalized inventory, and $525.1 million deficit.

"Military personnel, Marine Corps" (72 Stat. 717; 1960 appropriation act)		−$25,000,000	−$15,000,000
Deliveries of materiel common to U. S. requirements ordered by military assistance	−451,879	−550,000	−370,000
Unobligated balance carried forward	−38,076,706	−19,026,706	−11,856,706
Financing applied to program	88,980,913	115,000,000	117,000,000

This fund commenced operation on July 1, 1953, and finances the procurement and maintenance of inventory levels for resale and mobilization reserve (5 U. S. C. 172d). All inventories except individual clothing and commissary stores are confined to storage locations in the United States.

In 1958 inventories of commissary stores were brought under the fund along with additional items of electronics, ordnance, and general supply. By the end of 1958 practically all secondary items and repair parts were financed under the stock fund, except for ammunition. Items capitalized in 1959 and 1960 result principally from returns from users.

Changes in inventory capitalized under each category of the fund are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Ordnance-tank-automotive	$44,193,906	$3,200,000	$1,517,000
Construction supplies and related equipment	1,287,620	1,019,000	878,000
Communications—electronic and electric	45,911,864	1,956,000	1,086,000
General supply	13,450,833	4,456,000	1,430,000
Clothing and textiles	−8,366,287	−5,940,000	200,000
Fuel supply	606,891		
Subsistence	20,684	−1,000,000	−1,100,000
Commissary stores supplies	1,270,622	1,000,000	1,100,000
Total inventories capitalized during year (net of decapitalizations)	98,376,133	4,691,000	5,111,000
Increase or decrease (−) in undelivered purchases to be paid from other accounts	−7,566,606	1,340,000	
Net change in capitalized inventories	90,809,527	6,031,000	5,111,000

Budget program.—The $28 million increase in the budget program from 1958 to 1960 is directly related to the increases in capitalization of the fund. Ordnance-tank-automotive will attain a $15 million level in 1959 and 1960, resulting from capitalizations in 1958. The increase in electronics from 1958 to 1960 also reflects capitalizations in 1958. The other principal increases, commissary stores, to $24.7 million in 1960 reflects the increasing use of commissary sales stores by retired personnel.

In 1960 approximately $12.1 million worth of inventory will be sold from long-supply stocks which do not require replacement. This compares to $15.6 million in 1959 and $7.4 million in 1958. The budget program is based on year-end inventories as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Ordnance-tank-automotive:			
Operating stocks	$153,885,877	$137,131,357	$120,738,357

Excess or surplus stocks awaiting disposal			
Commissary stores supplies: Operating stocks	2,131,621	2,156,621	1,896,621
Summary:			
Operating stocks	311,380,647	273,080,383	236,851,383
Mobilization reserve stocks	70,823,420	72,453,420	72,453,420
Excess or surplus stocks awaiting disposal	22,972,736	26,610,000	29,680,000
Total inventories	405,176,803	372,143,803	338,984,803

Financing.—Funds for financing the budget program are derived from sales of inventory to authorized customers. Sales are expected to increase in 1960 about 17% over 1958. Practically all of this increase results from the sale of items brought into the fund in 1958 and 1959. Budget receipts are expected to exceed budget expenditures in 1960. It is recommended that $15 million in excess cash be transferred to Military personnel, Marine Corps in 1960.

Operating results.—A net loss of $25 million is forecast from 1960 operations. This results largely from the disposal or donation of material in long supply at the time of capitalization under the fund. Since the excess material awaiting disposal is still a substantial quantity at the end of 1960, losses of this magnitude can be expected in the future.

Net inventory losses of $1.1 million and $1.2 million are expected in 1959 and 1960, respectively, compared with $4.4 million in 1958. This type of loss represents the net from discrepancies in shipment, losses in storage, pilferage, differences disclosed by physical inventories, and accounting adjustments.

Financial condition.—The investment of the Government in the fund at June 30, 1960, will be $374.6 million, made up of $550 million of capitalized assets, less net rescissions and transfers of $108 million and a deficit of $67.4 million.

Financing applied to program	1,192,336,122	1,425,000,000	1,383,000,000

This fund, established on July 1, 1950, finances the procurement of approximately 86,000 items for resale and mobilization reserve.

During 1958, selected organizational clothing items and locally purchased medical materiel were included in the fund. In addition, base stocks of general supplies depot items and all authorized local purchase items were included on a test operation basis at Eglin Air Force Base to evaluate the advisability of extending and expanding to other Air Force installations. This evaluation is still continuing and the estimate reflects no change in scope in this area from 1958. Approximately 24,000 general supply items directly related to the operational capability of weapons systems were decapitalized in 1958. Also reflected in 1958 and 1959 are transfers of depot stocks of clothing and medical-dental items to the Army and Navy as a result of Department of Defense single manager assignments for depot level operations for those materiel categories. No other significant changes from the present scope of operations are projected. Changes in capitalized inventory by category are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Clothing	$9,676,460	−$4,600,830	$720,000
Medical-dental supplies	−2,626,790	−1,872,170

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

AIR FORCE STOCK FUND—Continued

Budget program.—The program shows a net increase in obligations of $190.7 million from 1958 to 1960. Obligations are increased in 1959 primarily because of increased sales in aviation fuels; the cost of the first phase of 5-year service contracts necessary for better protection and wider dispersal of fuel storage facilities; and increased sales in the commissary sales stores. In 1960, obligations are decreased primarily as a result of a reduction of aviation fuels inventories, partially offset by obligations related to increased sales of aviation fuels, and clothing and commissary sales store items.

Inventory totals continue to decrease. A net decrease of $30 million from 1958 to 1960 reflects reductions in operating stocks of $26.5 million, and $15.5 million in excess, offset by increases in reserves, principally in fuels and medical-dental material.

The decrease in inventory from end 1958 to end 1959 is primarily attributable to reductions in current aviation fuels and general supplies operating stocks partially offset by an increase in aviation fuels mobilization reserve materiel. Inventories will further decrease by end 1960 due primarily to decreases in aviation fuels mobilization reserve materiel requirements, and further decreases in general supplies operating and excess stocks, offset by increases in aviation fuels and commissary operating stocks and in medical-dental reserve material.

The budget program is based on year-end inventories as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Clothing:			
Operating stocks	$39,087,706	$32,468,170	$32,641,000
Mobilization reserve stocks	11,583,055	12,641,000	12,641,000

Excess or surplus stocks awaiting disposal	20,855,297	7,782,000	5,335,000
Total inventories	504,967,404	494,094,683	474,990,689

Financing.—Funds for financing the budget program are derived from sales to authorized customers. Sales in 1960 increase over 1958 due primarily to increased aviation fuel consumption, increased sales demands in commissary sales stores, and larger sales of organizational clothing items. The number of commissary sales stores increases from 421 in 1958 to 432 in 1959 and 434 in 1960. Budget receipts are expected to exceed budget expenditures by $25 million in 1959 and by the same amount in 1960. It is recommended that $50 million in cash be transferred to the appropriation, Military personnel, Air Force, in 1960, which will leave an investment sufficient to finance the level and scope of programs reflected in the estimates.

Operating results.—The estimates reflect a net loss in 1960 of $2.7 million, resulting mainly from the disposal or donation of materiel which was excess at the time capitalized. The net loss in 1959 of $11.5 million also results mainly from the disposal and donation of excess property.

Financial condition.—Investment of the Government at June 30, 1960, will be $719.7 million, made up of $171.3 million in appropriations and reappropriations, $716.2 million of capitalized assets and accumulated deficit of $167.8 million. This is a decrease of $77.4 million from the total investment at the end of 1958.

[1] Excludes adjustments of prior year expense.

This fund finances industrial and commercial-type activities on a reimbursable basis (5 U. S. C. 172d).

Budget program—Printing and pictorial activities.—This includes a pictorial center and, through September 30, 1958, a printing plant. The pictorial center produces, processes, and distributes motion pictures, film strips, recordings, transparencies, and television programs on military training, orientation, and education. Volume of business at the center increases in 1959 and decreases in 1960 because of a backlog of work carried over from 1958 to be accomplished in 1959.

Depot manufacturing and maintenance divisions.—For 1959 and 1960, this includes 9 activities located at 6 Army depots. The increase in 1959 results from addition of 5 activities, partially offset by discontinuance of 1 activity during 1958. These activities restore equipment to combat readiness, including 3 Quartermaster maintenance divisions, an Ordnance maintenance shop, 2 Engineer maintenance shops, a Signal maintenance shop, and a railroad repair shop. In addition, one activity manufactures clothing and textiles.

Ordnance arsenals.—These seven arsenals are engaged in research, development, industrial engineering and pilot manufacturing activities. Commodities involved include guided missiles, fire control, ammunition, small arms, artillery, and special weapons. About 90% of this work is performed for the Army and about 10% for other agencies. The increase in 1959 results largely from higher pay rates.

Ordnance proving grounds and research activities.—This includes a laboratory specializing in work on fuzes and a proving ground engaged primarily in research, development, and testing of ordnance materiel. Laboratory volume increases in 1959 in activities related to guided missiles and other developments in electronics. Proving ground operations increase in 1959 because they were financed through the fund for only 10 months in 1958. Little change is expected in 1960 at either activity.

Chemical arsenals.—These two arsenals are equipped for volume production and loading of hazardous chemical materials not suitable for commercial manufacture. Current production is limited to orders in support of research and development and maintenance of standby plant and equipment.

Chemical proving grounds and research activities.—These three activities are engaged primarily in work on chemical and biological warfare agents, delivery systems, and protective items. Research and development operations are expected to continue at the 1958 level.

Transportation terminal commands.—These three commands plan, regulate, control, and accomplish the export and import movement of personnel and cargo through Army terminals on the Atlantic, Pacific, and Gulf coasts. The commands also control transshipment of cargo through commercial outports on the Great Lakes and in South and Central America. Beginning January 1, 1958, commercial line-haul transportation, procurement of capital equipment, and certain maintenance and storage costs were excluded from the fund, accounting in part for the decrease in volume for 1959. Cargo and passenger workload is expected to decrease, as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Cargo (measurement tons)	8,157,231	8,088,000	7,980,000
Passengers	693,466	634,000	638,000

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments, as reflected in the following table:

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

ARMY INDUSTRIAL FUND—Continued

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventory and items on order:				
Materials and supplies	$24,461,133	$25,271,870	$25,476,470	$25,080,031
Advances	2,200,081	1,832,772	1,603,008	1,604,365
Provision for subsequent maintenance, claims, etc. (−)	−2,819,335	−1,701,829	−545,364	−476,364
Unpaid undelivered orders	75,814,420	73,153,717	70,639,711	67,965,793
Total selected resources at end of year	99,656,299	98,556,530	97,173,825	94,173,825
Selected resources at start of year (−)		−99,656,299	−98,556,530	−97,173,825
Decrease (−) in selected resources		−1,099,769	−1,382,705	−3,000,000
Materials and supplies capitalized (−) or decapitalized		−3,187,823	73,135	
Liabilities assumed: Accrued leave		5,421,360	317,931	
Adjustment of prior year expense		−318,321	−8,361	
Costs financed from obligations of other years, net (−)			−1,000,000	−3,000,000
Obligations incurred for costs of other years, net		815,447		

Costs and obligations are at about the same level with differences resulting from slight fluctuations in resource balances.

Additional activities considered for industrial-fund financing.—Additional installations under consideration for industrial-fund financing, not reflected in the estimates, include: 11 ordnance equipment rebuild activities, 3 signal equipment rebuild facilities, 1 engineer rebuild facility, and a railroad repair shop. Industrial-fund financing will be extended to these activities when studies, presently being conducted at similar installations, indicate that definite economies can be expected to result.

Financing the budget program.—This program is financed from customer orders. These orders constitute valid obligations of the ordering appropriation and authorize activities financed through the fund to initiate procurement and commence production. Costs are charged initially to the working capital of the fund and are billed to customers as the jobs are completed or periodically, as work progresses. Orders received by depot maintenance divisions are expected to increase by $17 million in 1959 due to the 4 additional activities reflected in the estimates. Orders received in 1959 are expected to decrease $47 million at Ordnance installations, $11 million at Chemical installations, and $2 million at all other installations. While orders received in 1959 decrease by $43 million, production costs increase by $41 million, resulting in a net decrease of $41 million in production backlog represented by unbilled orders. In 1960, orders received are expected to continue to be less than costs incurred, and a further reduction of $16 million in the backlog of unbilled orders is expected. By these reductions in the backlog of unfilled orders actual production operations are related more closely to developments in customer budget programs.

Operating results and financial condition.—The following table indicates 1958 net revenue and expense by activity:

	Revenue	*Expense*	*Gain or loss (−)*
Printing and pictorial activities	$7,372,506	$7,348,626	$23,880
Depot manufacturing and maintenance divisions	13,389,979	13,454,767	−64,788
Ordnance arsenals	278,672,342	277,933,882	738,460
Ordnance proving grounds and research activities	49,681,348	49,360,398	320,950
Chemical arsenals	16,000,311	16,035,913	−35,602
Chemical proving grounds and research activities	53,227,900	53,203,995	23,905
Transportation terminal commands	100,449,592	100,803,709	−354,117
Total	518,793,978	518,141,290	652,688

The net gain in 1958, resulting from the use of standard costs and fixed prices and overhead rates, amounted to about 0.1% of total sales. No gain or loss is projected in 1959 or 1960. While it is not possible to achieve an absolute break-even position each year in actual practice, installations develop budgets on this basis in order to avoid, so far as possible, any augmentation or overcharging of current customer appropriations.

Expenditures exceeded collections by $23.4 million in 1958. This offsets an abnormal working capital condition at the beginning of 1958. Changes in working-capital balances are expected to produce an excess of expenditures over collections of $6 million in 1959, and an excess of collections over expenditures of $4 million in 1960.

In 1958, $50 million was transferred to "Military personnel, Army." Of the estimated Government investment of $224.2 million at the close of 1960, $128.6 million is necessary to provide working capital for the activities currently financed through the fund, estimates for which appear in the statements and schedules. The balance of $95.6 million will provide for contingent requirements, including expanded coverage at installations currently financed through the fund and provision of working capital for additional installations being considered for industrial-fund financing in 1959 and 1960.

[1] Excludes adjustments of prior year expense.

This fund finances 53 industrial and commercial-type activities on a reimbursable basis (5 U. S. C. 172d).

Budget program.—The program decreases by $21.8 million in 1959, the net of $17 million resulting from the pay increase for classified employees and $38.8 million in

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

NAVY INDUSTRIAL FUND—Continued

reductions. Other factors contributing to cost changes in 1959 and 1960 are discussed below.

Navy printing plants.—These estimates cover 27 plants, including 5 overseas. During 1958, 2 plants were established and 2 discontinued. No additional plants are contemplated in 1959 and 1960. Workload is expected to be substantially constant. Increased wages and prices necessitated overall increases in prices charged to customers of about 12% in 1958; for 26 of the plants this was the first price increase in 3½ years. A stable price level is reflected in 1959 and 1960.

Naval ordnance plants.—This program includes seven plants performing work relating to guns and mounts, torpedoes, explosives, fuses, avionics equipment, missile launchers, and other items of ordnance and ammunition. Workload and operating levels will decline slightly in 1959 and 1960, offset in 1959 by increased personal service costs.

Naval shipyards.—These include 11 shipyards and a ship repair facility. Increases in 1959 result from the classified salary increase and from increased shipbuilding workload largely related to the fleet ballistic missiles program, partially offset by decreases in overhaul, alteration, and conversion work performed in these yards. Increases in construction and in other shipwork in 1960 are related to the fleet rehabilitation and modernization program.

Military Sea Transportation Service.—This organization provides ocean transportation of passengers, petroleum, and dry cargo for the Department of Defense. The agency arranges and pays for commercial ships and operates and pays costs on Government-owned ships employed. Over 90% of income is billed on the basis of published tariff schedules for point-to-point lift. The remainder is billed on a per diem basis for use of ships, or on the basis of costs applied. Workload and cost trends are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Cargo ships:			
Measurement tons (cargo)	12,521,649	11,350,000	11,300,000
Per diem ship-days	12,744	7,300	7,550
Cost	$243,839,510	$226,900,000	$225,000,000
Passenger ships:			
Cabin passengers	216,777	190,700	190,000
Troop passengers	355,001	340,300	302,000
Total passengers	571,778	531,000	492,000
Per diem ship-days	153	61	61
Cost	$91,124,573	$73,250,000	$73,200,000
Petroleum ships:			
Long-tons (petroleum)	13,332,109	13,300,000	13,200,000
Per diem ship-days	2,144	541	541
Cost	$92,524,984	$73,200,000	$72,400,000
Arctic operations (cost reimbursable)	$6,515,743	$2,600,000	$2,400,000
Total costs	$434,004,810	$375,950,000	$373,000,000
Average tariff rates (July 1, 1956, rates equal 100):			
Cargo	110.5	113.3	113.3
Passengers:			
Cabin	139.6	128.3	128.3
Troop	118.4	103.1	103.1
Petroleum	114.9	95.5	95.5

The trends pictured above result from operating economies, reductions in the number of ships operated, and a favorable commercial market. These tariff trends closely parallel trends in unit cost of lift performed, and, together with the workload trends indicated above, account for the changes in costs reflected in the estimates. No reserve ships maintained for mobilization purposes will be financed through the fund in 1959 and 1960.

Marine clothing and equipment factory.—This factory serves as a pilot production plant to test design specifications and production methods and also manufactures clothing and textile items needed on short notice, in small lots, or under other conditions making commercial procurement impracticable. Workload is expected to be stable through 1959 and 1960.

Naval research activities.—These include the Naval Research Laboratory, the David Taylor Model Basin and the Naval Ordnance Laboratory, Corona, Calif. Increases of $15.3 million in 1959 consist primarily of $6 million for contracts monitored by the research laboratory related to the earth satellite program, an increase of $2 million at the model basin because of new facilities placed in operation in 1959, and an increase of $3 million at the ordnance laboratory for fuze development. Contractual costs for the earth satellite program related to the International Geophysical Year decline by about $18 million in 1960, producing the decrease in that year. Work performed in these activities, as distinct from work performed by contract, is expected to remain relatively stable through 1959 and 1960.

Naval base service activities.—These two activities operate motor pools and perform vehicle repair for adjacent commands. In addition, one of the activities operates and maintains utility services and furnishes other maintenance and custodial services. Workload and operating levels are expected to be stable through 1959 and 1960.

Additional activities being considered for industrial-fund financing.—Twenty-eight activities, not reflected in the estimates, are being considered for industrial-fund financing. These include 9 aircraft and engine overhaul facilities, 4 base service activities, 4 specialized ordnance depots, 5 ammunition depots, 3 ship repair activities, 2 equipment overhaul activities, and an installation engaged in development, test, and manufacture of aeronautical equipment. Industrial-fund financing will be extended to these activities if it is clear that definite economies can be derived thereby, and after a program is developed which will assure the application of management and cost controls to achieve these economies.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments, as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Inventory and items on order:				
Materials and supplies	$88,507,104	$100,233,743	$95,933,743	$95,933,743
Advances and deferred charges	11,922,123	10,021,946	3,121,946	1,421,946
Provision for subsequent maintenance, claims, etc. (—)	−26,857,673	−21,646,465	−18,746,465	−18,746,465
Unpaid undelivered orders	107,349,987	162,236,737	213,236,737	240,336,737
Total selected resources at end of year	180,921,541	250,845,961	293,545,961	318,945,961
Selected resources at start of year (—)	−180,921,541	−250,845,961	−293,545,961	
Increase in selected resources		69,924,420	42,700,000	25,400,000
Materials and supplies decapitalized		1,484,453	2,000,000	
Inventory adjustment credited (—) to prior year income		−136,772		
Liabilities assumed: Accrued leave		1,533,183		
Adjustment of prior year expense		4,273,057		
Obligations incurred for costs of other years, net		77,078,341	44,700,000	25,400,000

Obligations exceeded costs by $77 million in 1958, largely attributable to an increase of $12 million in materials and supplies, resulting from generally increased activity in the fund in 1958, and an increase of $55 million in unpaid undelivered orders. The latter factor largely accounts for obligations exceeding costs by $45 million in 1959 and $25 million in 1960. These increases in unpaid undelivered orders relate largely to the Military Sea Transportation Service. Commercial contracts outstanding at the start

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of 1958 were at an abnormally low point because of unavailability of certain types of commercial shipping in 1957. Greater availability of commercial shipping produced an increase in contracts outstanding at the end of 1958. This is expected to continue and, in addition, contracts for longer terms are expected to produce increases in commercial contracts outstanding in 1959 and 1960.

Financing the budget program.—This program is financed by orders received from customer appropriations, which authorize industrial-fund installations to incur costs in performing the work or services required. Orders received decrease by $256 million in 1959. Of this decrease, $169 million occurs at naval shipyards, which received in 1958 a large volume of orders related to the fleet ballistic missile program and other shipbuilding work. Most of these orders will finance work undertaken in 1959 and later. Orders received decline by $45 million in the Military Sea Transportation Service because of the workload and cost considerations discussed above, and by about $30 million in research activities where the 1958 column reflects $34 million for the earth satellite program not recurring in 1959. For 1960, orders received are expected to be substantially in line with costs incurred.

Operating results and financial condition.—The following table indicates 1958 revenue and expense by activity:

	Revenue	*Expense*	*Gain or loss (−)*
Navy printing plants	$10,267,727	$10,425,390	−$157,663
Naval ordnance plants	123,690,625	123,594,577	96,048
Naval shipyards	808,316,784	802,425,169	5,891,615
Military Sea Transportation Service	440,476,816	434,004,810	6,472,006
Marine clothing and equipment factory	4,613,544	4,786,640	−173,096
Naval research activities	73,782,390	74,076,469	−294,079
Naval base service activities	14,185,766	14,052,824	132,942
Total	1,475,333,652	1,463,365,879	11,967,773

Retained earnings decreased by $5.9 million in 1958, the result of annual net income of $12 million, about 0.8% of total sales, and $18 million in negative adjustments applicable to prior years. In order to avoid, so far as possible, any augmentation or overcharging of customer appropriations, installations financed through this fund develop budgets and establish bases for charging each year upon the basis of no profit or loss. Transfers to "Military personnel, Navy" of $70 million in 1958 and $15 million in 1959 were effected. Of the estimated $288.6 million in Government investment at June 30, 1960, $251.5 million is necessary for working capital for activities now financed through the fund, estimates for which are reflected in the statements and schedules. The remaining $37.1 million is necessary to provide working capital for additional activities to be financed through this fund in the future.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures:

[1] Excludes adjustments of prior year expense.

This fund finances industrial and commercial type activities on a reimbursable basis (5 U. S. C. 172d).

Budget program—Printing and duplicating service.—On July 1, 1957, the Air Force Printing Service was expanded to include duplicating facilities operating as adjuncts to the industrialized printing plants. An additional plant was included on October 1, 1958. No additional plants are reflected for 1959 and 1960. Production in 1958 was approximately 1.8 billion printing units and is estimated to increase to 1.9 billion printing units during 1959 and 1960, the increase resulting primarily from the inclusion of the additional plant.

Laundry and dry cleaning service.—At June 30, 1958, this included 47 plants. A gain of 2 plants in 1959 is offset by discontinuance of 1 plant in 1959 and 1 plant in 1960. A new pricing policy requiring each activity to establish prices locally was placed in effect at all overseas activities during 1958 as an incentive for better management, in line with the policy which has been in effect in the continental United States. Estimated total production for 1960 will be approximately 110.5 million pieces of laundry and dry cleaning as compared with 110.3 million pieces for 1959 and 107 million pieces produced in 1958.

Airlift service.—The operation of the airlift service portion of the Military Air Transport Service was included under the industrial fund on July 1, 1958. The purpose of the airlift service is to insure that the approved D–Day and wartime requirements of the Department of Defense are met. This requires that military air transport forces be available for initial emergency combat deployments and other military requirements which cannot be satisfied by surface movement or by nonmilitary airlift efforts. Commercial airlift is relied on to supplement a minimum military force.

As an integral part of the combat forces, military transport aircraft and support services must train and exercise in peacetime at a rate from which they can expand effectively in an emergency, thus producing an airlift capability. Economy dictates use of this military capability in meeting peacetime airlift requirements.

Aircraft will be utilized for air evacuation of patients, special air missions, training of airborne troops, and, as augmented by commercial aircraft, common-user airlift for passengers, cargo and mail. Airlift service workload and operating data are as follows:

	1959 estimate	*1960 estimate*
Operating aircraft, end of year:		
Common-user	455	442
Other	91	91
Total	546	533
Millions of ton-miles (common-user):		
Cargo and mail	1,140.0	1,016.1
Passenger	403.1	403.1
Civilian employment, end of year	3,314	2,907

Additional activities being considered for industrial-fund financing.—The Department of Defense is continuing its evaluation of the extension of this fund to aircraft overhaul and repair facilities. Since this evaluation has not been completed, the estimates do not reflect working capital for this purpose.

Relation of costs to obligations.—The relationship of costs to obligations is derived from year-end balances of

Increase or decrease (−) in selected resources		108,214	8,542,000	−8,500,000
Materials and supplies capitalized (−) or decapitalized		−74,157	−29,800	
Inventory adjustment charged to prior year revenue		4,994		
Liabilities assumed: Accrued leave		94,596	929,200	
Adjustment of prior year payables		−5,744		
Costs financed from obligations of other years, net (−)				−8,500,000
Obligations incurred for costs of other years, net		127,903	9,441,400	

Fixed annual contracts for commercial airlift were effective on October 1, 1958, so that one-fourth of the amounts of these contracts will be outstanding on June 30, 1959. This causes unpaid undelivered orders to increase in 1959, the principal reason for obligations in excess of costs for that year. In 1960, it is expected that such contracts will terminate on June 30, coincident with the fiscal year. The resulting decline in unpaid undelivered orders is the principal reason for costs in excess of obligations in 1960, since about $8.5 million in 1960 costs will be financed from contracts obligated in 1959.

Financing the budget program.—This program is financed by customer orders for services. In 1958, $75 million was transferred to this fund from other Air Force appropriations to provide working capital required for the airlift service.

Operating results and financial condition.—It is estimated that expenditures will exceed collections by $29 million in 1959, reflecting the initial impact of the operation of the airlift service under the fund. This results from a greater time period required to effect collections than to liquidate liabilities. Government investment is estimated to be $81 million at the end of 1959 and 1960, consisting of $81 million in reappropriations and transfers and $0.7 million in retained earnings, less $0.7 million in net capitalized assets and liabilities assumed.

Sources and Application of Funds (Operations)

Total financing	7,972,525	310,661,000	308,200,000

This fund was created to simplify operations which are financed by two or more appropriations (5 U. S. C. 172e). The corpus of the fund consists of $1 million. Activities presently financed through the fund are as follows:

1. *Defense telephone service, Washington, D. C.*, finances the operations of the telephone service of the Department of Defense in Washington.

2. *Transportation services* provide for the payment centrally of transportation charges for Government bills of lading, transportation requests, meal tickets, and other charges incident to transportation costs by all agencies in the Department of the Army. Beginning July 1, 1958, advances were made from pertinent appropriations in order to simplify, at Army installations, the dealings with carriers and other administrative and accounting detail incident to travel and transportation.

3. *Construction activity, Europe*, finances certain administrative and overhead expenses of the Department of Defense construction programs in Western Europe.

This fund was created to facilitate the financing of operations supported by two or more appropriations (5 U. S. C. 172e). The corpus of the fund consists of $1 million. Principal operations financed are construction of the Army, Navy, and Air Force bases and stations in Spain; the material inspection service; incentive award payments; departmental telephone and maintenance services; transportation of the supplies, goods and materials of the Navy; the Electronics Production Resources Agency which coordinates the production and allocation of electronics equipment for the Department of Defense; certain interdepartmental activities discharging obligations placed on the Department of Defense by executive direction and such other obligations jointly affecting more than one component of the Department; the Navy industrial exhibits program, and the special project which provides for costs of the fleet ballistic missile program. Amounts are advanced to this fund from various Navy appropriations for this latter program, and costs are then

This fund was created to facilitate the financing of activities supported by two or more appropriations (5 U. S. C. 172e). The corpus of the fund consists of $1 million. Amounts required for activities financed are provided through advances or reimbursements. Construction, equipment, and prestocking of operating supplies and material of the main segment of the distant early warning line which was begun in 1954 and completed in 1958, were financed through this fund. Activities for this project in 1959 will include return of advances or adjustments of previous contracts. On July 1, 1958, the operations of the central Federal catalog office were included as a function of the Armed Forces supply support center, which administers the Defense standardization program, Federal catalog system, and the Defense program for material utilization and screening of excess material. This project is financed jointly by the three military departments with certain cataloging services performed for the General Services Administration on a reimbursable basis.

This fund was established to account for advances received by the Navy for the cost of work or services to be furnished other Government agencies, foreign governments, and private parties (31 U. S. C. 643). Obligations against special deposits relate primarily to: (*a*) Utilities, repairs, and maintenance furnished to morale, welfare, and recreation activities; (*b*) utilities furnished to tenants of Navy housing projects; and (*c*) utilities, sale of material, equipment rental, and other services for contractors and other private parties, primarily in overseas locations. The private individuals and organizations involved advance amounts to cover the estimated costs to this fund, which amounts are used to pay the costs involved. Work performed for foreign governments consists primarily of ship repairs. From the advances made, this fund finances the Navy activity performing the work.

GENERAL PROVISIONS

SEC. 601. During the current fiscal year, the Secretary of Defense and the Secretaries of the Air Force, Army, and Navy, respectively, if they should deem it advantageous to the national defense, and if in their opinions, the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [but at rates for individuals not in excess of $50 per day] under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 602. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 603. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with [(1) instruction and training, including tuition, specifically approved by the Secretary of the department concerned and not otherwise provided for, of civilian employees, and (2)] communication and other services and supplies as may be necessary to carry out the purposes of this Act: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive compensation at a rate below the minimum rate of pay for positions allocated to grade GS–5 under the Classification Act of 1949, as amended.

SEC. 604. Any appropriation available to the Air Force, Army, or the Navy may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Air Force, Army, or Navy custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 605. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land as authorized by section 406 of the Act of August 3, 1956 (70 Stat. 1015), *as amended*.

SEC. 606. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U. S. C. 236–244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding an average of [$245] *$265* per student, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209 (a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for payment of rentals at the seat of government or elsewhere, and, in administering the provisions of 43 U. S. C. 315q, rentals may be paid in advance.

SEC. 607. [No part of any appropriation contained in this Act shall be used directly or indirectly except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or the Republic of Panama: *Provided, however*, (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409), limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further*, That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest] *Appropriations for the Department of Defense for the current fiscal year*

Federal Reserve Bank of St. Louis

shall be available for: (a) Donations of not to exceed $25 to each prisoner upon each release from confinement in military or contract prison (except disciplinary barracks) and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners (except those in disciplinary barracks); (c) subsistence of selective service registrants called for induction, applicants for enlistment while held under observation, prisoners (except those in disciplinary barracks), and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; and (e) expenses of prisoners confined in nonmilitary facilities: Provided, That section 212 of the Act of June 30, 1932 (5 U. S. C. 59a), shall not apply to retired military personnel on duty at the United States Soldiers' Home: Provided further, That the duties of the librarian at the United States Military Academy may be performed by a retired officer detailed on active duty.

SEC. 608. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 609. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than $2.25 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deductions from the pay of civilian employees.

SEC. 610. No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.

SEC. 611. [Not more than $49,000,000 of the amounts received during the current fiscal year by the Department of Defense as proceeds from the sale of scrap, salvage or surplus materials, shall be available during the current fiscal year for reimbursement to appropriations] *Appropriations of the Department of Defense* available for operation and maintenance, *may be reimbursed during the current fiscal year* for *all* expenses [of] *involved in the preparation for* disposal *and disposal* of military supplies, equipment, and materiel, *from amounts received as proceeds from the sale of any such property*: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to the Committees on Appropriations of the Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. 612. During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

SEC. 613. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States, *except Alaska*, to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. 614. No funds appropriated in [titles I, III, IV, and V of] this Act shall be used for the payment in excess of 470,000 full-time graded civilian employees *of the Department of Defense* (including (a) the full-time equivalent of part-time employment, (b) persons who are described as "consultants" or who are compensated on a "when actually employed" basis if such persons are employed on a contract basis or are paid on a per diem basis, and (c) persons employed without compensation if they are reimbursed for expenses) at any one time during the current fiscal year: *Provided*, That whenever, in the opinion of the Secretary of the Military Department concerned, the direct substitution of civilian personnel for an equivalent or greater number of military personnel will result in economy without adverse effect upon national defense, such substitution may be accomplished without regard to the foregoing limitation, and such funds as may be required to accomplish the substitution may be transferred from the appropriate military personnel appropriation to, and merged with, the appropriation charged with compensation of such civilian personnel.

SEC. 615. Notwithstanding any other provision of law, executive order, or regulation, no part of the appropriations in this Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided*, That without regard to any provision of law or executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 204 (b) of the Career Compensation Act of 1949 (63 Stat. 802) *as amended*, to certain members of the Armed Forces otherwise entitled to receive flight pay during the fiscal year [1959] *1960* (1) who have held aeronautical ratings or designations for not less than twenty years, or (2) whose particular assignment outside the United States *or in Alaska* makes it impractical to participate in regular aerial flights.

SEC. 616. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of eleven thousand pounds net in any one shipment: *Provided*, That the limitations imposed herein shall not be applicable in the case of members transferred to or serving in stations outside the continental United States or in Alaska under orders relieving them from a duty station within the United States prior to July 10, 1952, and who are returned to the United States under orders relieving them from a duty station beyond the United States or in Alaska on or after July 1, 1953.

SEC. 617. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. 618. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That this limitation shall not apply to the off-duty training of military personnel as prescribed by section 623 of this Act.

[SEC. 619. Funds provided in this Act for public information and public relations shall not exceed $2,755,000.]

SEC. [620] *619*. Not more than 20 per centum of the apprcpriations in this Act which are limited for obligation during fiscal year [1959].*1960* shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps.

SEC. [621] *620*. During the fiscal year [1959] *1960* the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may

Digitized for FRASER

GENERAL PROVISIONS—Continued

accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor: *Provided*, That within thirty days after the end of each quarter the Secretary of Defense shall render to the Committees on Appropriations of the Senate and the House of Representatives and to the Bureau of the Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. [622] *621.* During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

SEC. [623] *622.* No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

SEC. [624] *623.* No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. [625] *624.* No [part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no] funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.

SEC. [626] *625.* None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. [627] *626.* During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. [628] *627.* Appropriations of the Department of Defense available for the payment of rental allowances shall be available for the leasing of quarters in foreign countries constructed under the authority of section 302 of Public Law 534, approved July 14, 1952, for assignment as public quarters to military personnel of the Department of Defense.

SEC. [629] *628.* Appropriations contained in this Act shall be available for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. [630] *629.* During the current fiscal year appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

SEC. [631] *630.* During the current fiscal year, the Secretary of Defense shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition from stock or which has been procured for the purpose in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national or international rifle matches.

[SEC. 632. Funds provided in this Act for legislative liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed $2,110,000.]

[SEC. 633. Hereafter, any appropriation available to the agencies concerned for the pay and allowances of members of the uniformed services may be utilized for the payment of claims as authorized by Public Law 85–255, approved September 2, 1957.]

[SEC. 634. Of the funds made available by this Act for the services of the Military Air Transport Service, $80,000,000 shall be available only for procurement of commercial air transportation service; and the Secretary of Defense shall utilize the services of civil air carriers which qualify as small businesses to the fullest extent found practicable.]

[GENERAL PROVISIONS]

[SEC. 601. Funds appropriated to the military departments for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the second session of the Eighty-fifth Congress.]

[SEC. 602. None of the funds appropriated in this chapter shall be expended for payments under a cost-plus-a-fixed-fee contract for work where cost estimates exceed $25,000 to be performed within the continental United States without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.]

[SEC. 603. None of the funds appropriated in this chapter shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction and the application of economical construction practices.]

[SEC. 604. None of the funds appropriated in this chapter shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.]

[SEC. 605. Funds appropriated to the military departments for construction are hereby made available for: (1) advance planning, construction design and architectural services, as authorized by section 504 of the Act of September 28, 1951, as amended (69 Stat. 352), (2) acquisition of land, installation of outside utilities, and site preparation for housing projects to be constructed under title VIII of the National Housing Act, as amended, as authorized by section 505 of the Act of September 28, 1951 (65 Stat. 365), and (3) hire of passenger motor vehicles.]

[SEC. 606. Appropriations to the military departments for construction may be charged for the cost of administration, supervision and inspection of family housing authorized pursuant to title IV of the Act of August 11, 1955 (Public Law 345), in an amount not to exceed three and one-half per centum of the cost of each such project: *Provided*, That such appropriations shall be reimbursed from the proceeds of any mortgage executed on each such project.]

[SEC. 607. Funds appropriated to the military departments for construction may be used for advances to the Bureau of Public Roads, Department of Commerce, for the purposes of section 6 of the Defense Highway Act of 1941 (55 Stat. 765), as amended, and section 12 of the Federal-Aid Highway Act of 1950 (64 Stat. 785), as amended, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.]

[SEC. 608. The family unit costs for family housing including land authorized to be purchased by section 103 of the Act of August

Digitized for FRASER

Federal Reserve Bank of St. Louis

30, 1957 (Public Law 85-241), may exceed by not more than 15 per centum the respective limitations on such costs contained in this Act.]

[SEC. 609. None of the funds appropriated in this chapter may be used to begin construction on new bases for which specific appropriations have not been made.]

[SEC. 610. During the current fiscal year, appropriations available for construction of family quarters for personnel shall not be obligated for such construction at a cost per family unit in excess of $22,000 on housing units for generals or equivalent; $19,800 on housing units for colonels or equivalent; $17,600 on housing units for majors and lieutenant colonels, or equivalent; $15,400 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or $13,200 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed $32,000 and in no event shall the individual cost exceed $40,000.]

[SEC. 611. No part of the funds contained in this Act shall be used to incur obligations for the planning, design, or construction of facilities for an Air Force Academy the total cost of which will be in excess of $139,797,000.]

[SEC. 612. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 110 per centum of the value as determined by the Corps of Engineers or the Bureau of Yards and Docks, except: (a) where there is a determination of value by a Federal court, (b) purchases negotiated by the Attorney General or his designee, and (c) where the estimated value is less than $25,000.]

[SEC. 613. No part of the funds contained in this Act shall be used for the construction of a hospital at the Air Force Academy at a cost in excess of $3,600,000.]

[SEC. 614. Such appropriations of the Department of Defense, available for obligation during the current fiscal year, as may be designated by the Secretary of Defense shall be available for the purposes of section 1 of the Act approved April 3, 1958 (72 Stat. 78): *Provided*, That any such appropriations so utilized shall be accounted for under the limitation established by section 4 of said Act.] (*Military Construction Appropriation Act, 1959.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1960

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)[1]				
OPERATION AND MAINTENANCE								
Operation and maintenance, Army							$451,000	Civilian and military personnel of the Department of the Army, and other authorized persons: Transportation associated with meetings and conferences and for other official business. DEPARTMENT OF DEFENSE—CIVIL FUNCTIONS

The new obligational authority of $902 million recommended for the Civil Functions of the Department of Defense for 1960 is $31 million more than the estimated total for 1959. Approximately 96% of the total is for programs of the Corps of Engineers, Army, for which an increase of $55 million is recommended, primarily for construction underway. The major part of the decrease of $24 million for other programs results from the fact that further financing for the Panama Canal Bridge will not be necessary after 1959. Estimated expenditures of $853 million will be $84 million more than in 1959 as construction progresses on projects of the Corps of Engineers, Army, financed in part from appropriations made in prior years.

Economic and technical development.—New obligational authority of $4 million is requested for 1960 for a grant to the government of the Ryukyu Islands, an increase of $3 million over 1959. A 1959 supplemental of $10 million proposed for later transmission will provide additional electrical generating capacity needed by the United States Civil Administration. Expenditures will increase in 1960 as construction progresses on the powerplant and other facilities.

Other veterans' services and administration.—An increase in new obligational authority for 1960 is included in the budget for the national cemetery system administered by the Army Quartermaster Corps. This increase will provide for a continued rise in numbers of interments, gravesites maintained, and headstones procured as well as for additional projects for development and construction.

Conservation and development of land and water resources.—The appropriation request for the Corps of Engineers, Army, will finance continued progress in 1960 on 65 navigation projects, 99 flood control projects, and 21 multiple-purpose projects with hydroelectric power facilities. It is anticipated that 42 projects will be completed in 1960. Schedules for completion will be extended on a few going projects.

No funds are recommended for starting new projects in 1960. Surveys, investigations, and preconstruction planning will be continued at a level somewhat below 1959, and essential operation and maintenance requirements will be met.

New obligational authority of $865 million requested for 1960 is $55 million more than the estimate for 1959. This increase results mainly from the volume of new construction initiated during the past several years. Expenditures in 1960 are estimated at $815 million, as compared with $725 million estimated for 1959.

Promotion of water transportation.—Operating costs of the Panama Canal Company are estimated to decrease in 1960 because of the extraordinary payment in 1959 to the civil service retirement fund to cover retroactive contributions due to treaty legislation. It is anticipated that tolls will increase because of passage of a larger number of vessels through the canal. Funds will be provided in 1960 for starting a replacement program for living quarters of employees and for continuation of construction on projects under way in 1959. Expenditures for the Panama Canal Bridge, which was started in 1959, will increase by $2 million.

Territories and possessions.—The 1960 budget for the Canal Zone Government provides new obligational authority to begin construction of three schools as well as some streets and sewers needed in connection with the quarters replacement program of the Panama Canal Company. Preparation of plans will begin on a modern medical center partially to replace Gorgas Hospital. Operating expenses of the Canal Zone Government are expected to increase over 1959, largely as a result of enactment of the Canal Zone Wage and Employment Act, due to the 1955 treaty.

CEMETERIAL EXPENSES, *ARMY*

Current authorizations:

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of two passenger motor vehicles (*one of which shall be for replacement only*); maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries; [$6,915,000] *$9,000,000*: *Provided*, That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further*, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of $17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services exclusively for the purposes of this appropriation. (*24 U. S. C. 271, 273, 274–276, 278, 279, 279a, 279b, 282, 288, 290; Public Works Appropriation Act, 1959.*)

Appropriated 1959, **$6,915,000** Estimate 1960, **$9,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Procurement of headstones	$2,435,071	$2,540,000	$2,960,000
2. Construction and acquisition of land	430,757	237,000	926,000
3. Maintenance and operation	3,398,075	3,646,000	4,466,000
4. Administration	582,390	627,000	648,000
Total obligations	6,846,293	7,050,000	9,000,000
Financing:			
Unobligated balance no longer available	31,707		
New obligational authority	6,878,000	7,050,000	9,000,000
New obligational authority:			
Appropriation	$6,878,000	$6,915,000	$9,000,000
Proposed supplemental due to pay increases		135,000	

1. *Procurement of headstones.*—The procurement of headstones for the past, current, and budget years is shown in the table below. The 1960 program estimates an increase in the number of purchases based on the continuation of a normal increase in applications and the passage of Public Law 85–644, approved August 14, 1958, which authorizes the furnishing of headstones for members of the Armed Forces whose remains were buried at sea or not otherwise recoverable.

HEADSTONE PROCUREMENT REQUIREMENTS

	1958 actual	*1959 estimate*	*1960 estimate*
Applications from previous year	7,520	10,555	12,094
New applications:			
For graves	107,767	113,000	121,600
For memorial markers	-------	5,000	5,000
Total applications	115,287	128,555	138,694
Less applications carried forward	10,555	12,094	12,500
Total procurement	104,732	116,461	126,194

The 1959 estimate includes 8,000 headstones to be provided for in a supplemental request under Proposed for later transmission.

2. *Construction and acquisition of land.*—This item provides for the development of additional gravesites at 4 national cemeteries—Long Island, Arlington, Golden Gate, and Willamette—and the replacement of maintenance service facilities at 4 others, including engineering investigations and preparation of plans for future construction.

3. *Maintenance and operation.*—The national cemetery system consists of 118 installations including 85 national cemeteries, 21 soldiers lots, 5 Confederate cemeteries, 2 Confederate plots, 2 Confederate monument sites, 1 national monument site, 1 memorial park and Government-owned burial lots in the Washington Parish Burial Ground. There will be 1,990 developed acres in the national cemetery system to be maintained in 1960. It is estimated that 32,500 burials will be made in 1959 and 36,400 in 1960 compared to 29,022 burials in 1958.

CEMETERIAL EXPENSES, *ARMY*—Continued

Proposed for later transmission—Continued

SALARIES AND EXPENSES—Continued

Under existing legislation, 1959.—A supplemental estimate is anticipated for 1959 to provide for additional headstone procurement resulting mainly from new legislation and for wage-board rate increases granted subsequent to the 1959 budget.

RIVERS AND HARBORS AND FLOOD CONTROL, *ARMY*

The Corps of Engineers, Army, improves and maintains rivers and harbors throughout the continental United States, Puerto Rico, the Virgin Islands, and the Hawaiian Islands in the interest of navigation, control of floods, related hydroelectric power development, and allied water uses.

The total appropriation requested amounts to $864.8 million, representing an increase of $55.9 million compared with the amount appropriated for 1959 and an increase of $226.2 million compared with the appropriation for 1958. The increased funds are made necessary by the large number of new projects initiated during the past several years. No funds are requested to start work on new projects in 1960. Approximately 82% of the requested appropriations will be applied to construction and 15% to operation and maintenance activities.

Current authorizations:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, preliminary examinations, surveys and studies (including cooperative beach erosion studies as authorized in Public Law Numbered 520, Seventy-first Congress, approved July 3, 1930, as amended and supplemented), of projects prior to authorization for construction, to remain available until expended, [$10,188,500: *Provided*, That, no part of the funds herein appropriated shall be used for the survey of Carter Lake, Iowa, until it is authorized] *$9,000,000. (33 U. S. C. 426–426c, 540, 541, 701; Public Works Appropriation Act, 1959.)*

Appropriated 1959, **$10,188,500** Estimate 1960, **$9,000,000**

(*c*) Civil works investigations	1,271,680	1,275,000	1,195,000
(*d*) Mississippi basin model:			
(1) Construction	745,306	600,000	700,000
(2) Mississippi River comprehensive study		60,000	100,000
4. Tennessee-Tombigbee waterway restudy	122,830	8,523	
5. Alaska pierhead line survey		120,000	20,000
Total program costs	9,790,333	10,929,817	10,368,888
6. Relation of costs to obligations:			
Costs financed from obligations of other years, net (−)			−32,672
Obligations incurred for costs of other years, net	82,503	29,198	
Total program (obligations)	9,872,836	10,959,015	10,336,216
Financing:			
Unobligated balance brought forward	−1,199,967	−2,106,731	−1,336,216
Unobligated balance carried forward	2,106,731	1,336,216	
Appropriation (new obligational authority)	10,779,600	10,188,500	9,000,000

1. *Examinations and surveys.*—Preliminary examinations and surveys for navigation and flood control improvements are made to determine the need and economic justification of the proposed improvements. These studies are made in cooperation with appropriate Federal and State agencies and will be restricted to a limited number of high-priority investigations.

In addition, cooperative beach erosion investigations are conducted at specific localities. These cooperative investigations are paid for equally by the Federal Government and by State and other local agencies.

Special studies are made in cooperation with State and other Federal agencies in the interest of navigation, flood control, power and related purposes.

NUMBER OF REPORTS

Status	*1958 actual*	*1959 estimate*	*1960 estimate*
River and harbor and flood control investigations:			
Completed	78	89	57
Continued	127	94	61
Initiated	35	50	0
Cooperative beach erosion control investigations:			
Completed	7	4	1
Continued	0	0	1
Initiated	2	6	5
Special studies:			
Completed	0	2	2
Continued	9	8	7
Initiated	1	2	0

Completed reports are those acted upon by the Board of Engineers for Rivers and Harbors or the Beach Erosion Board.

2. *Collection and study of basic data.*—Funds in the amount of $330,000 will be made available to the Weather Bureau for hydrometeorological studies and precipitation stations and $225,000 to the Geological Survey for installation, operation, and maintenance of stream gaging stations. Also, members of the Corps of Engineers will participate in a number of engineering and control boards to study and control international streams and watersheds which mutually affect the United States and bordering nations.

No funds are requested for the Corps of Engineers for 1960 to finance fish and wildlife studies in connection with Corps of Engineers projects. It is anticipated that the Fish and Wildlife Service will finance these studies in 1960.

Federal Reserve Bank of St. Louis

3. *Research and development.*—General beach erosion development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures related to shore protection and improvement. The results of these studies are disseminated to other Federal, State, and local agencies and individuals using this information.

Hydrologic studies include investigations of such phenomena as storms, rainfall, streamflow, and sedimentation to provide basic data used in the design, construction, and operation of water control structures.

Civil works investigations assist in the solution of engineering problems. The solutions are widely applicable to the design, construction, and operation and maintenance of civil works projects. This item also provides for the operation of the research center at the Waterways Experiment Station, Vicksburg, Miss.

Construction of the Mississippi Basin model at the Waterways Experiment Station at Vicksburg, Miss., will be continued. In addition, funds are requested to continue the initial phase of a Mississippi River comprehensive study on the completed portion of the Mississippi Basin model. The primary objectives of this initial basin-wide testing program are to improve the operation of the reservoir system in the Mississippi River Basin, to assure optimum operation of the reservoir system, and to study potential flood levels on the lower Mississippi River.

4. *Tennessee-Tombigbee waterway restudy.*—A restudy of the economic feasibility of the Tennessee-Tombigbee waterway will be completed with prior year funds.

5. *Alaska pierhead line survey.*—Funds in the amount of $140,000 are available for this activity in 1959.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Inventories and items on order:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$468,962	$558,238	$587,436	$554,764
Advances (payments for goods and services not yet received)	6,773	.....	.....	.....
Total selected resources at end of year	475,735	558,238	587,436	554,764
Selected resources at start of year (−)	.....	−475,735	−558,238	−587,436
Costs financed from obligations of other years, net (−)	.....	.....	.....	−32,672
Obligations incurred for costs of other years, net	.....	82,503	29,198	.....

10. Northeast flood emergency	166,389		
11. Flood emergency (disaster relief)	3,916,088		
12. Undistributed reduction based on anticipated delays and savings			−30,000,000
Total obligations	479,909,389	623,783,848	705,313,006
Financing:			
Unobligated balance brought forward	−92,020,155	−61,934,266	−45,313,006
Recovery of prior year obligations		−3,916,088	
Unobligated balance carried forward	61,934,266	45,313,006	
Appropriation (new obligational authority)	449,823,500	603,246,500	660,000,000

The appropriation requested for this program amounts to $660 million and represents an increase of $56.8 million compared with the amount appropriated for 1959 and an increase of $210.2 million compared with the appropriation for 1958. An analysis of the costs to this appropriation and the resources available to complete the projects in the various activities are set forth in the tabulations under the appropriate activity heading. Of the appropriations requested, about 69% will be applied to 38 major projects in amounts of $5 million or more.

The monetary authorization available for appropriation after 1960 for projects in this program amounts to $4,751.7 million. The status of the overall construction program, excluding projects classified as inactive or deferred for restudy but including projects completed in prior years, is summarized on the following table:

NUMBER AND ESTIMATED COST OF AUTHORIZED PROJECTS [1]

	Number of authorized projects				*Estimated cost in millions*				
Activity:	*Total*	*Completed* [2]	*Underway* [3]	*Balance authorized* [4]	*Total*	*To June 30, 1958*	*1959*	*1960*	*Balance to complete*
Navigation and beach erosion control [5]	2,450	2,064	209	177	$5,335.9	$2,177.2	$183.5	$197.4	$2,777.8
Flood control [6]	814	365	172	277	5,856.5	1,974.4	223.1	240.7	3,418.3
Multiple-purpose projects, including power	60	20	27	13	5,661.9	2,754.2	189.8	239.9	2,478.0
Total	3,324	2,449	408	467	16,854.3	6,905.8	596.4	[7] 678.0	8,674.1

[1] Excludes projects classified as inactive or deferred for restudy.
[2] Also includes projects essentially complete.
[3] Uncompleted projects in the active program for which construction funds have been appropriated. Includes 19 projects or project modifications that do not have funds presently available for expenditure.
[4] Includes projects not yet funded and parts of approved comprehensive basin plans for which funds are not yet available.
[5] Includes authorized modifications of original projects.
[6] Excludes snagging and clearing and emergency flood control projects.
[7] Program total: Actual appropriation request is $648 million.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high priority projects to the stage where they will be ready for construction, and will permit continuation of planning on other needed projects. The program of restudy of projects classified as deferred for restudy will be continued.

Federal Reserve Bank of St. Louis

2. *Navigation projects.*—This activity includes improvement of channels and harbors for navigation by dredging and by construction of breakwaters, jetties, and dikes; and construction of locks, dams, and canals.

With the funds requested, work will be continued on 45 channel and harbor projects, of which 12 will be completed, and on 14 lock, dam, and canal projects, of which 2 will be completed in 1960.

[In thousands]

RIVERS AND HARBORS AND FLOOD CONTROL, *ARMY*—Continued

Current authorizations—Continued

CONSTRUCTION, GENERAL—Continued

3. *Alteration of bridges.*—Obstructive bridges over navigable waterways are altered in accordance with an apportionment of the costs of alteration between the United States and the bridge owners.

The funds requested will finance the Federal share of the cost of altering bridges, four of which will be completed in 1960.

[In thousands]

ALTERATION OF BRIDGES OVER NAVIGABLE WATERS	Costs to this appropriation					Analysis of 1960 financing				
	Total estimate	*To June 30, 1957*	*1958 actual*	*1959 estimate*	*1960 estimate*	*Deduct selected resources and unobligated balance, start of year*	*Add selected resources, end of year*	*Appropriation required for 1960*	*Appropriation required to complete*	*Percent cost complete through 1960*
(2) Chicago, Burlington and Quincy RR. Bridge, Ill.	$4,089	$35	--------	$470	$2,064	--------	--------	$2,064	$1,520	62.8
(3) Wabash Railroad Bridges at Meredosia and Valley City, Ill.	2,820	99	$753	1,440	528	--------	--------	528	--------	100.0
(4) Houghton-Hancock Bridge, Mich.	4,401	5	316	1,440	2,640	--------	--------	2,640	--------	100.0
(5) Staten Island Rapid Transit Bridge, N. Y., and N. J.	8,165	1,272	258	4,535	2,000	$100	$100	2,000	--------	98.8

Projects not budgeted in 1960	2,460	321	1,645	494	--------	--------	--------	--------	--------	100.0
Total, alteration of bridges	27,933	2,124	4,376	10,210	8,848	400	400	8,848	1,975	91.5

4. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and currents of the shores of the United States, its Territories, and possessions. Federal contributions may not exceed one-third of the construction costs of such projects.

[In thousands]

BEACH EROSION CONTROL PROJECTS	Costs to this appropriation					Analysis of 1960 financing				
	Total estimate	*To June 30, 1957*	*1958 actual*	*1959 estimate*	*1960 estimate*	*Deduct selected resources and unobligated balance, start of year*	*Add selected resources, end of year*	*Appropriation required for 1960*	*Appropriation required to complete*	*Percent cost complete through 1960*
(5) Fire Island Inlet, Long Island, N. Y.	$2,890	[1] $14	--------	$227	$1,050	$600	--------	$450	$1,599	44.7
Projects not budgeted in 1960	2,938	942	$167	210	--------	--------	--------	--------	1,619	44.9
Total beach erosion control projects	5,828	956	167	437	1,050	600	--------	450	3,218	44.8

[1] Advance engineering and design only.

5. *Flood control projects.*—This activity includes local protection projects and flood control reservoirs without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for emergency bank protection; for snagging and clearing work on navigable streams and tributaries when such work is necessary in the interest of flood control; and for the construction of small flood control projects not specifically authorized by Congress.

With the funds requested, work will be continued on 58 local protection projects, 13 of which will be completed, and on 40 reservoir projects, 9 of which will be completed in 1960.

It is anticipated that funds presently available will be sufficient to finance the Allegheny River Reservoir, Pa. and N. Y., in 1960, pending settlement of court actions concerning the acquisition of lands required for the project.

RIVERS AND HARBORS AND FLOOD CONTROL, *ARMY*—Continued

Current authorizations—Continued

CONSTRUCTION, GENERAL—Continued

6. *Multiple-purpose projects, including power.*—With the funds requested, work will be continued on 21 multiple-purpose projects with power installations. Two revenue producing multiple-purpose projects with power will be substantially completed in 1960.

No funds are requested for the Beaver Reservoir project, Arkansas. The Department of the Interior has not yet completed additional studies to determine whether power revenues can repay the costs allocated to power.

7. *Recreation on completed projects.*—Public use facilities will be provided at about 70 completed projects to accommodate a rapidly increasing number of visitors.

8. *Small authorized projects.*—The Federal Government assists in the construction of authorized channel and harbor, shore protection, and flood control projects, each of which has a total estimated Federal cost of $400,000 or less.

9. *Lower Columbia River fish sanctuary program.*—A program to counteract damages to fisheries resulting from the construction of major dams and other obstructions in the Lower Columbia River has been developed by the Fish and Wildlife Service together with the fisheries departments of the States of Oregon and Washington. A reappraisal of the scope and objectives of this program is scheduled for completion by the Department of the Interior prior to the formulation of the 1961 budget.

The various activities in the construction program are summarized in the following cost tabulation.

[In thousands]

PROGRAM BY ACTIVITIES	Costs to this appropriation: Total estimate	To June 30, 1957	1958 actual	1959 estimate	1960 estimate	Analysis of 1960 financing: Deduct selected resources and unobligated balance, start of year	Add selected resources, end of year	Appropriation required for 1960	Appropriation required to complete	Percent cost complete through 1960
1. Advance engineering and design	$78,740	$25,364	$7,589	$10,523	$9,500	$2,000	------	$7,500	$25,764	----

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects)	$511,257	$160,147	$73,743	$23,743
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet delivered)	81,008,702	61,281,347	52,963,927	42,167,065

Operation and Maintenance, General

For expenses necessary for the preservation, operation, maintenance, and care of existing river and harbor, flood control, and related works, including such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality, or other public agency, outside of harbor lines, and serving essential needs of general commerce and navigation; financing the United States share of the cost of operation and maintenance of remedial works in the Niagara River; surveys and charting of northern and northwestern lakes and connecting waters; clearing and straightening channels; removal of obstructions to navigation; rescue work, and repair, *or* restoration[, or maintenance] of flood control projects threatened or destroyed by flood; and not to exceed [$1,415,000] *$1,750,000* for transfer to the Secretary of the Interior for conservation of fish and wildlife as authorized by law; to remain available until expended, [$113,370,000] *$113,500,000.* (*16 U. S. C. 661–666, 756; 33 U. S. C. 1, 414, 415, 540, 603a, 701, 701n, 705; 72 Stat. 301 and 302; Public Works Appropriation Act, 1959.*)

Appropriated 1959, [a] **$113,440,000** Estimate 1960, **$113,500,000**

[a] Includes $70,000 appropriated in Supplemental Appropriation Act, 1959.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Navigation:			
(a) Channels and harbors	$53,794,808	$55,325,000	$55,600,000
(b) Locks, dams, and canals	22,398,286	23,250,000	23,650,000
(c) Survey of northern and northwestern lakes	607,903	600,000	550,000
(d) Prevention of obstructions and injurious deposits	338,459	350,000	600,000
2. Flood control:			
(a) Reservoirs	4,167,828	4,750,000	5,170,000
(b) Channel improvements, inspections, and miscellaneous maintenance	618,139	1,100,000	830,000
3. Multiple-purpose projects including power	15,475,983	16,550,000	18,780,000
4. Lower Columbia River fish sanctuary program	1,325,263	1,400,000	1,750,000
5. Niagara remedial works	45,817	41,600	70,000
6. Emergency operations:			
(a) Removing sunken vessels and other navigation obstructions	367,256	530,000	450,000
(b) Clearing and straightening channels of navigable waters	9,246	75,000	50,000
(c) Flood control emergencies (repairs, and floodfighting and rescue work)	4,385,031	12,225,000	7,000,000
Total program costs	103,534,019	116,196,600	114,500,000
7. Relation of costs to obligations: Obligations incurred for costs of other years, net	110,677	92,197	
Total program (obligations)	103,644,696	116,288,797	114,500,000
Financing:			
Comparative transfers from (−) other accounts	−338,459	−350,000	
Unobligated balance brought forward	−2,955,034	−3,498,797	−1,000,000
Unobligated balance carried forward	3,498,797	1,000,000	
Appropriation (new obligational authority)	103,850,000	113,440,000	113,500,000

The appropriation requested represents a minor increase compared with 1959 and $9.7 million compared with 1958. With the amount recommended, essential maintenance work will be accomplished on an orderly and current schedule designed to hold costly repair and rehabilitation work in the future to a minimum.

1. *Navigation.*—This provides for essential maintenance requirements on 194 channel and harbor projects, 28

Federal Reserve Bank of St. Louis

RIVERS AND HARBORS AND FLOOD CONTROL, *ARMY*—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, GENERAL—Continued

canals and canalized waterways, and for disposal of 2 obsolescent waterways. Provision is also made for surveys of the northern and northwestern lakes to obtain data for charts and bulletins for safe navigation and for the prevention of obstructions and injurious deposits in the harbors of New York, Baltimore, and Hampton Roads.

2. *Flood control.*—In 1960, 119 flood control reservoirs will be operated and maintained. Provision is also made for the minimum regular maintenance of 16 local flood protection projects, urgent rehabilitation work, and inspection of completed flood control projects to determine adequacy of compliance by local interests with prescribed maintenance requirements.

3. *Multiple-purpose projects including power.*—At the end of 1960, 34 multiple-purpose projects with an installed capacity of 6,508,400 kilowatts will be operated and maintained.

4. *Lower Columbia River fish sanctuary program.*—Funds are allocated to the Fish and Wildlife Service for operation and maintenance of hatcheries and related facilities.

5. *Niagara remedial works.*—The costs of operation and maintenance of works to preserve and enhance the scenic beauty of Niagara Falls are divided equally between the United States and Canada.

6. *Emergency operations.*—Wrecks and other obstructions to safe navigation are marked and removed. Provision is also made for emergency work on channels of navigable waters and their tributaries.

The requested amount includes $7 million to replenish the authorized emergency flood control fund.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*

Appropriation	$11,714,600	$11,720,000	$12,640,000
Transferred from "United States section, Saint Lawrence River Joint Board of Engineers, civil" (72 Stat. 243)	37,000		
Appropriation (adjusted)	11,751,600	11,720,000	12,640,000
Proposed supplemental due to pay increases		1,096,000	

1. *Executive direction and management.*—The administration of the program includes a data processing center, and 9 division offices which supervise work decentralized in 38 district offices financed under other appropriations.

2. *Review boards.*—The River and Harbor Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers. The Beach Erosion Board, in cooperation with the States, studies the prevention of shore erosion, develops standards, and reviews reports.

3. *Regulation.*—The Corps administers laws for the protection and preservation of the navigable waters of the United States. It inspects bridges, approves bridge plans, establishes fish stake limits, issues permits, investigates wrecks and oil pollution, controls dumping, regulates hydraulic mining, and establishes harbor lines.

4. *Commercial statistics.*—Data on waterborne commerce are collected, compiled, and published.

5. *Special investigations.*—Investigations are made and reports prepared pursuant to congressional and other special requests for current information pertaining to the civil works program.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Flood Control, Mississippi River and Tributaries

For expenses necessary for prosecuting work of flood control, and rescue work, repair, restoration, or maintenance of flood control projects threatened or destroyed by flood, as authorized by law (33 U. S. C. 702a, 702g–1), to remain available until expended, [$68,347,500] *$68,000,000.* (*Public Works Appropriation Act, 1959.*)

Appropriated 1959, **$68,347,500** Estimate 1960, **$68,000,000**

Appropriation (new obligational authority)	60,715,000	68,347,500	68,000,000

The Corps of Engineers, Army, is responsible for the flood control program for the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, Lower Arkansas, Yazoo, Tensas, and Atchafalaya Rivers, and Bayou La Fourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for channel improvement and bank stabilization on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for 5 flood-detention reservoirs on minor tributaries.

The following tabulation sets forth the program, in terms of costs, reconciled to fund requirements, for each activity. Percentages of completion at the end of 1960 are shown for construction features.

1. *General investigations.*—The comprehensive review of the Mississippi River and tributaries project will be completed with prior year funds. Provision is also made for two studies and the collection of basic data which is subsequently used in planning and designing projects.

3. *Construction.*—The total estimated cost of flood control and related improvements in the lower Mississippi River and its alluvial valley is estimated at $1,482 million, of which $1,059 million has been appropriated through 1959. Improvements estimated to cost $133 million have been completed and improvements estimated at $77 million have not been started. The funds requested will be applied to continuation of 11 features of the project which by the end of 1960 will have been brought to a percent of completion as shown in the tabulation above.

4. *Maintenance.*—Provision is made for operation and ordinary maintenance of the major features of the project.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for [expenses of attendance at meetings of organizations concerned with the work for which the appropriation is made, for] uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131), and for printing, either during a recess or session of Congress, of survey reports authorized by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed [two hundred and thirty-six] *one hundred and seventy-six* for replacement only) and hire of passenger motor vehicles. (*Public Works Appropriation Act, 1959.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation as follows:
"Construction of hospital and domiciliary facilities," Veterans Administration.
"Limitation on operation and maintenance and capital outlay," United States Soldiers' Home.
"Disaster relief," funds appropriated to the President.
"Salaries and expenses," National Science Foundation.
"Salaries and expenses," maritime activities, Department of Commerce.
"Commodity Credit Corporation fund," Department of Agriculture.
"Construction," Bureau of Sport Fisheries and Wildlife, Department of the Interior.
"Passamaquoddy tidal power survey," Department of State.
"United States dollars advanced from foreign governments, United States educational exchange program," Department of State.
"Mutual security," funds appropriated to the President.

1. *Hydraulic mining in California, debris fund.*—Fees paid by mine operators in the Sacramento and San Joaquin Basins for depositing mine debris in restraining works are used for maintenance of restraining reservoirs (33 U. S. C. 683).

2. *Maintenance and operation of dams and other improvements of navigable waters.*—Half of the proceeds from certain licenses issued by the Federal Power Commission for constructing, operating, and maintaining dams, conduits, reservoirs, etc., are used for maintenance and operation of Federal dams and other navigation structures and for improvement of navigable waters (16 U. S. C. 810; 31 U. S. C. 725c).

3. *Relation of costs to obligations.*—Year-end balance of unpaid undelivered orders for 1957 was $45.

[1] Excludes inventory transferred in without charge, net, as follows: 1958, $16,895; 1959, $11,965; and 1960, $50,000.
[2] Excludes property transferred in without charge, net, as follows: 1959, $50,000; and 1960, $50,000.

The fund provides for expenses necessary for the acquisition, operation and maintenance of plant and equipment of the Corps of Engineers used in civil functions, and for furnishing of facilities and services for the military functions of the Department of the Army and other governmental agencies and private persons (67 Stat. 199).

Budget program.—Plant and equipment services include operating costs of such items of plant as dredges, other floating plant, and land-based plant. Warehousing covers cost of receipt, storage, and issue of inventories. Shop and facility services include operating costs of repair and maintenance shops, boatyards, and printing and reproduction plants. General administrative services include engineering and support functions of Corps of Engineers district offices. Operating costs of these activities are expected to increase in 1959 and 1960 principally due to increased cost of labor. The increase in outlay for plant, properties, and equipment in 1959 is expected to result principally from accrual of $7.7 million for acquisition costs of a replacement hopper dredge for use on the Great Lakes. Remaining acquisition costs for this dredge of $2.3 million are expected to accrue in 1960.

Financing.—Operations are financed from reimbursements or advances from the appropriations or individuals who utilize the services or facilities, at rates to cover all operating costs.

Operating results and financial condition.—The slight decrease in revenue compared with operating expenses is attributable to adjustments in rates charged for cost of facilities and services furnished, thereby resulting in a decrease in retained earnings from $1.1 million in 1958 to $0.4 million in 1960. Earnings, if any, are retained and are reduced by adjustments to rates charged for services in subsequent years.

The initial capital of the fund was provided by assumption of the assets, liabilities, and obligations of the plant accounts, as carried on the records of the Corps of Engineers as of June 30, 1953, and by an appropriation of $100. Capital of the fund is limited to $140 million. In 1958 capital of the fund was reduced $9.3 million and liabilities were increased to reflect the full value of accrued annual leave of employees. Capital was also decreased by $0.3 million because of a net transfer of assets of the fund to other agencies without reimbursement.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Inventories	$8,962,708	$8,590,124	$8,500,000	$8,300,000
Unpaid undelivered orders	5,183,038	14,770,103	7,400,000	4,700,000

UNITED STATES SOLDIERS' HOME

LIMITATION ON OPERATION AND MAINTENANCE AND CAPITAL OUTLAY

(Trust fund)

For maintenance and operation of the United States Soldiers' Home, to be paid from the Soldiers' Home permanent fund, [$5,299,500] *$10,948,000*, of which [$434,630] *$5,587,000* shall remain available until [June 30, 1960] *expended*, for construction of buildings and facilities, including plans and specifications: *Provided*, That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army, upon the recommendation of the Board of Commissioners of the Home and the Surgeon General of the Army.

[The amount authorized by the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1959, to be paid from the Soldiers' Home permanent fund, for maintenance and operation of the Home, is increased by $232,000, of which $125,000 shall remain available until June 30, 1960, for construction planning.] (*5 U. S. C. 59b; 24 U. S. C. 41–60; 31 U. S. C. 711 (12), 725s (a); Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1959; Supplemental Appropriation Act, 1959.*)

The United States Soldiers' Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army and airmen of the Air Force. Funds for maintenance and operation of the home are appropriated from the Soldiers' Home permanent fund (trust fund) and not from the general funds of the Treasury.

1. *Medical care.*—As part of the home, there is a hospital which cares for the daily average patient load as shown below. In addition, certain members receive specialized care at other hospitals.

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Patients in home hospital	348	375	393	400
Patients in other hospitals	76	73	74	75

2. *Domiciliary activities.*—The daily average number of members receiving domiciliary care is—1957, 1,245; 1958, 1,364; 1959, 1,425; 1960, 1,470.

3. *Administration and central services.*—Included in this activity are service functions such as administration, supply, utility services, maintenance, transportation, and laundry.

4. *Permanent improvements.*—Funds are included for final design and construction of a 512-bed domiciliary building and for final design and expansion of the hospital ward wing to accommodate 70 additional patients.

[ADMINISTRATION,] RYUKYU ISLANDS, *ARMY*

Current authorizations:

ADMINISTRATION

For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government of the Ryukyu Islands, including, subject to such authorizations and limitations as may be prescribed by the Secretary of the Army, tuition, travel expenses, and fees incident to instruction in the United States or elsewhere of such persons as may be required to carry out the provisions of this appropriation; travel expenses and transportation; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [at rates not in excess of $50 per diem for] *of* individuals not to exceed ten in number; not to exceed [$1,500] *$4,000* for contingencies for the High Commissioner, to be expended in his discretion; translation rights, photographic work, educational exhibits, and dissemination of information, including preview and review expenses incident thereto; hire of passenger motor vehicles and aircraft; purchase of [four] *three* passenger motor vehicles for replacement only; [repair] *construction, repair,* and maintenance of buildings, utilities, facilities, and appurtenances; and such supplies, commodities, and equipment as may be essential to carry out the purposes of this appropriation; [$2,830,000] *$6,282,000,* of which not to exceed [$1,530,000] *$1,633,000* shall be available for administrative and information expenses: *Provided,* That the general provisions of the Appropriation Act for the current fiscal year for the military functions of the Department of the Army shall apply to expenditures made from this appropriation: *Provided further,* That expenditures from this appropriation may be made outside continental United States when necessary to carry out its purposes, without regard to sections 355, 3648, and 3734, Revised Statutes, as amended, section 4774 (d) of title 10, United States Code, civil service or classification laws, or provisions of law prohibiting payment of any person not a citizen of the United States: *Provided further,* That expenditures may be made hereunder for the purposes of economic rehabilitation in the Ryukyu Islands in such manner as to be consistent with the general objectives of titles II and III of the Mutual Security Act of 1954, and in the manner authorized by sections 505 (a) and 522 (e) thereof: *Provided further,* That funds appropriated hereunder may be used, insofar as practicable, and under such rules and regulations as may be prescribed by the Secretary of the Army to pay ocean transportation charges from United States ports, including Territorial ports, to ports in the Ryukyus for the movement of supplies donated to, or purchased by, United States voluntary nonprofit relief agencies registered with and recommended by the Advisory Committee on Voluntary Foreign Aid or of relief packages consigned to individuals residing in such areas: *Provided further,* That under the rules and regulations to be prescribed, the Secretary of the Army shall fix and pay a uniform rate per pound for the ocean transportation of all relief packages of food or other general classification of commodities shipped to the Ryukyus regardless of methods of shipment and higher rates charged by particular agencies of transportation, but this proviso shall not apply to shipments made

Appropriation	$2,523,000	$2,830,000	$6,282,000
Proposed supplemental due to pay increases		32,000	

This appropriation provides for administering the Ryukyu Islands through a civil administration headed by a High Commissioner. The United States is empowered by the treaty of peace with Japan to exercise jurisdiction over the territory and its 830,000 inhabitants. Pursuant to Executive Order 10713 of June 5, 1957, the Army is charged with developing an effective and responsible Ryukyuan government, based on democratic principles and supported by a sound financial structure and with improving the welfare and well-being of the inhabitants of the Ryukyu Islands. Since a system of military bases and other installations pertinent to the defense of the Pacific area has been developed in these islands which are of critical strategic importance to the security of the free world, it is expected that the United States will be responsible for their administration for an indefinite period.

2. *Construction of facilities.*—A civil administration court building is to be built and furnished, a motor park is to be constructed, and replacement of three cultural centers is to be initiated in 1960.

3. *Exchange of persons.*—Provision is made for visits of Ryukyuan leaders, and for a program of advanced study by Ryukyuan students in the United States and Hawaii.

4. *Aid to Ryukyuan economy.*—Technical assistance is furnished for the education program in the Ryukyus. Grants are made to supplement revenues of the local government in meeting costs of essential public safety and public health services, and in constructing public facilities. Grants were $770,000 in 1958, $1,000,000 in 1959, and $4,000,000 is proposed in 1960. Additional economic aid is furnished by the United States through the general fund of the civil administration and through other programs. In 1958, the latter included $865,256 from the military construction project for resettlement of persons displaced from land taken for military use and $1,984,106 derived from surplus rice and foreign currency allocated by the International Cooperation Administration, without reimbursement, to assist in typhoon relief and reconstruction. In 1959, approximately $950,000 of resettlement project funds and $2,800,000 derived from allocations of surplus rice and foreign currency are available for expenditure. No further economic aid from these sources is programed.

The general fund of the civil administration is available, in addition to this appropriation, for economic assistance and development in the Ryukyus and receives income from business-type instrumentalities and from investments in financial and public-utility organizations. Summary statements of assets and cash receipts and expenditures of the general fund of the United States civil administration follow:

FINANCIAL CONDITION

	1958 actual	*1959 estimate*	*1960 estimate*
Assets:			
Current assets: Cash	$1,379,382	$1,963,049	$684,049
Investments:			
Petroleum distribution fund	479,086	314,086	314,086
Rice distribution fund	4,706,331	3,048,331	2,993,331
Ryukyu Electric Power Corp	7,580,679	9,813,679	13,003,679
Ryukyu Domestic Water Corp		1,284,000	2,342,000
Ryukyu reconstruction finance fund	20,863,604	22,572,604	24,409,604
Okinawa Housing Corp	2,269,948	2,014,280	1,758,949
Ryukyu Warehouse Co	433,749	378,749	323,749
Bank of Ryukyus	127,500	127,500	127,500
Ryukyu Life Insurance Co	5,555	5,555	5,555
Fixed assets:			
Petroleum facilities	1,702,962	1,761,962	1,781,962
Refrigeration plant	991,000	991,000	991,000
Net worth, United States civil administration	40,539,796	44,274,795	48,735,464

The investments in business enterprises represent the total capital of these organizations, except the bank and the life insurance company in each of which the United States civil administration holds 51% of the outstanding stock. In these two organizations, the investment is stated at cost but has a substantially higher actual value because of accumulated earnings and established earning capacity. In the wholly owned enterprises, the stated investment has been adjusted each year to reflect the net book value. The housing corporation and the warehouse company operate at a loss. When disposal of these two enterprises is feasible on reasonable terms, their liquidation is planned. Similarly, the investment in a refrigeration plant, presently leased for a nominal rental return, is also planned to be liquidated.

CASH RECEIPTS AND EXPENDITURES

	1958 actual	*1959 estimate*	*1960 estimate*
Receipts:			
Income from operations	$2,686,489	$2,959,000	$2,721,000

Income from operations is derived primarily from the net earnings of the electric power corporation and the reconstruction finance fund, from the purchase and resale of petroleum products, and from interest receipts.

Receipts from liquidation of investments represent reductions in the working capital used in financing the supply of rice and petroleum products. The water corporation began operations in 1959. Its earnings and those of the electric power corporation and the reconstruction finance fund are being reinvested within the respective corporations each year. In addition, the stated investments in the electric power corporation and the water corporation are being increased by the amounts expended from the appropriations in 1958 and 1959 for construction of power systems and water systems. Additional capital is being invested in the water corporation in 1959 and 1960 for the expansion of the water system for central Okinawa. Capital is being invested each year in the reconstruction finance fund, a major source of long-term credit to assist in continued economic development by local enterprise and in financing the construction of typhoon-resistant private housing. Grants are made to the local central government and to municipalities for essential public facilities and programs. The cash balance retained in the fund is available to meet contingent requirements, including relief and reconstruction measures in the event of a serious emergency, such as a typhoon.

The government of the Ryukyu Islands was created by the United States civil administration on April 1, 1952. In addition to local revenues derived primarily from income and excise taxes, this government receives grants to cover expenses related to the requirements of the United States forces and for assistance in the development of public facilities and services. This government has not been authorized by the United States to incur deficits in its fiscal operations or to borrow for any purpose and it must, therefore, maintain a minimum working balance in its treasury. A financial statement follows:

(b) Other general government expense	1,965,975	1,438,300	1,655,900
Total program costs	17,483,935	19,030,800	19,957,800
Unfunded adjustments to total operating costs:			
Depreciation included above on facilities and equipment capitalized under capital outlay appropriation (−)	−995,945	−982,800	−1,023,800
Other costs included above (−)	−6,037		
Total program costs, funded	16,481,953	18,048,000	18,934,000
4. Relation of costs to accrued expenditures: Costs financed from accrued expenditures of other years, net (−)	−125,849		
Total accrued expenditures	16,356,104	18,048,000	18,934,000
Unpaid undelivered orders brought forward	−52,253	−108,549	−93,549
Adjustment of unpaid undelivered orders brought forward	40,727		
Unpaid undelivered orders carried forward	108,549	93,549	93,549
Total program (obligations)	16,453,127	18,033,000	18,934,000
Financing:			
Unobligated balance no longer available	15,373		
New obligational authority	16,468,500	18,033,000	18,934,000
New obligational authority:			
Appropriation	$16,468,500	$17,000,000	$18,934,000
Proposed supplemental due to pay increases		1,033,000	

This appropriation provides for those functions in the Canal Zone which, in the United States, would be performed by State and local governments and civilian departments of the Federal Government, and for the operation of hospitals and clinics. All operating expenses, including depreciation, are recovered and paid into the Treasury as miscellaneous receipts. Such recoveries are derived from revenues from individuals and agencies served and the balance from the Panama Canal Company, as follows (exclusive of further supplementary requirement for 1959 amounting to $149,000 which is shown under Proposed for later transmission):

	1958 actual	*1959 estimate*	*1960 estimate*
Appropriations:			
Current or requested	$16,468,500	$17,000,000	$18,934,000
Supplemental requirements included in 1959 estimates		1,033,000	
Total appropriations	16,468,500	18,033,000	18,934,000
Repayments to Treasury (including depreciation):			
Revenue:			
Hospitals and clinics	3,044,326	3,223,500	3,194,000
Education	1,732,245	2,111,200	2,129,200
Postal service	837,751	950,000	955,000
Fire protection	655,959	579,000	598,300
All others	476,460	468,400	473,100
Total revenue	6,746,741	7,332,100	7,349,600
Net costs reimbursable by Panama Canal Company	10,737,194	11,698,700	12,608,200
Total repayable to Treasury	17,483,935	19,030,800	19,957,800

Federal Reserve Bank of St. Louis

1. *Civil functions*—(*a*) *Customs and immigration.*—This provides for the activities usually incident to such functions (except that no collection of customs duties is involved) and in addition includes special activities relating to transiting vessels and the execution of certain treaty obligations to the Republic of Panama.

(*b*) *Postal service.*—The postal system serves the entire Canal Zone and operates under policies and regulations generally similar to those of the United States Post Office Department, including money order and postal savings services.

WORKLOAD

	1958 actual	*1959 estimate*	*1960 estimate*
Airmail dispatched (pounds)	199,467	210,000	217,000
Airmail received (pounds)	280,381	282,000	286,000
Surface mail dispatched (pounds)	402,524	445,000	450,000
Surface mail received (sacks)	66,807	65,000	65,000

(*c*) *Police protection.*—This includes the usual police functions of preservation of the peace and enforcement of the law in the Canal Zone (not including military reservations), operation of prisons, and police guards for certain facilities.

(*d*) *Fire protection.*—All fire fighting facilities in the Canal Zone except those required for aircraft crash fires and fires aboard naval vessels and in ammunition depots are consolidated under the Canal Zone Government.

(*e*) *Judicial system.*—This includes the operation of two magistrate courts and the expenses of the district court (exclusive of salaries) which serves as both a State and Federal court.

(*f*) *Education.*—This provides for the operation of schools, kindergarten through junior college, for the dependents of Canal Zone residents and, on a space available basis, certain residents of Panama. There are two school systems: one for United States citizens, the other, which is conducted in the Spanish language, for Panamanians and other noncitizens. Specialized facilities for handicapped children were started in 1958.

ENROLLMENT DATA

	1958 actual	*1959 estimate*	*1960 estimate*
Citizen schools	7,143	7,091	7,131
Noncitizen schools	3,942	3,947	3,769
Total	11,085	11,038	10,900

(*g*) *Public areas and facilities.*—This includes the cleaning, lighting, and maintenance of streets and highways; maintenance of sewers, and care of public areas within the Canal Zone, not including military reservations.

(*h*) *Library.*—This provides for the operation of public library facilities for residents of the Canal Zone and technical reference services for Government agencies.

(*i*) *Internal security.*—This provides for loyalty investigations and related intelligence services for the Government and the Company.

(*j*) *Other civil affairs.*—This includes licensing, civil defense activities, and supervision of the civil functions program.

2. *Health and sanitation*—(*a*) *Hospitals and clinics.*—Two complete general medical and surgical hospitals with outpatient clinics, a neuropsychiatric and domiciliary hospital, and a leprosarium are operated and maintained. Medical care of all eligible civilians and military personnel in the Canal Zone is provided in the two general hospitals operated by the Government.

AVERAGE NUMBER OF INPATIENTS PER DAY (EXCLUDING NEWBORNS)

	1958 actual	*1959 estimate*	*1960 estimate*
Gorgas hospital	271.8	270.0	260.0
Coco Solo hospital	96.6	90.0	80.0
Corozal hospital	248.0	248.0	230.0
Palo Seco leprosarium	118.8	120.0	120.0
	735.2	728.0	690.0

(*b*) *Other public health services.*—This provides for sanitation and quarantine work in the Canal Zone and for ships calling at its ports and transiting the Canal; inspection of food processing establishments; and facilities for animal care and quarantine.

3. *General government expense*—(*a*) *Office of the Governor.*—This provides for the executive direction of all Canal Zone Government activities and includes the expenses of the office of the Governor and his residence, the office of the Executive Secretary, and, in 1960, provision for certain contingencies.

(*b*) *Other general government expense.*—This includes the Canal Zone Government's share of the cost of general and administrative expenses provided by the Panama Canal Company which the Canal Zone Government is without staff or facilities to perform or furnish; expenses of recruitment and repatriation, employees' home leave travel costs, and other general charges.

During 1958 net writeoffs of prior capitalizations and abandoned construction work amounted to $6,037. Such items consist principally of the costs of engineering studies, designs and specifications in connection with abandoned construction projects.

4. *Relation of costs to accrued expenditures.*—This year, for the first time, this account includes a limitation on annual accrued expenditures in accordance with Public Law 85–759, approved August 25, 1958. The relationship is derived from year-end balances of accrued resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Accrued resources at end of year:				
Stores (goods unconsumed by projects)	$125,511	$137,382	$137,382	$137,382
Accrued annual leave (leave earned and not yet taken by employees) charged to activity costs (−)	−1,626,179	−1,763,899	−1,763,899	−1,763,899
Total accrued resources at end of year	−1,500,668	−1,626,517	−1,626,517	−1,626,517
Accrued resources at start of year		1,500,668	1,626,517	1,626,517
Costs financed from accrued expenditures of other years, net (−)		−125,849	.....	.....

Appropriation (new obligational authority)			1,000,000	3,100,000	3,096,000				

This provides for the acquisition by purchase, construction, or otherwise, of capital assets required by the Canal Zone Government. The principal projects to be undertaken in 1960 are: (*a*) conversion of Diablo Heights elementary school plant to a junior high school and construction of a new elementary school at Diablo Heights and another at Los Rios; (*b*) continuation of the Pacific-side sewage disposal program; (*c*) designs, plans and other work preliminary to construction of a new and modern medical center to partially replace the present Gorgas Hospital; (*d*) beginning of a Pacific-side quarters replacement program; and (*e*) continuing projects among which are additions and replacements to municipal systems, road and street replacements, and additions and renewals of equipment.

This year, for the first time, this account includes a limitation on annual accrued expenditures in accordance with Public Law 85-759, approved August 25, 1958.

Appropriation (new obligational authority)	750,000	19,250,000	

A $750,000 supplemental appropriation was enacted in 1958 and an appropriation of $19,250,000 was enacted in 1959 to provide for the $20,000,000 cost of constructing a high-level bridge across the Panama Canal at Balboa, Canal Zone, as authorized and directed by the act of July 23, 1956 (ch. 665, 70 Stat. 596). Construction of the bridge will fulfill the United States commitment to the Republic of Panama under the terms of point 4 of the General Relations Agreement between the United States and Panama of May 18, 1942 (Executive Agreement Series 452), and of item 5 of the Memorandum of Understandings Reached, signed January 25, 1955.

1. In 1959, design work will be completed.

2. Construction work, which will start in 1959, will be completed in 1963.

3. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $457,437; 1959, $4,685,000; 1960, $12,665,000.

The Panama Canal Company is a wholly owned Government corporation chartered by the act of June 29, 1948 (62 Stat. 1076), as amended by the act of September 26, 1950 (64 Stat. 1041), for the primary purpose of maintaining and operating the interoceanic canal at the Isthmus of Panama. In furtherance of that mission, and in consideration of the international agreements under which the canal enterprise is operated, the Company conducts necessary supporting operations.

Budget program—1. *Transit operations.*—This is the primary program of the Company and comprises the transiting operations and the maintenance of the canal. The number and size of ships using the canal continue to increase more rapidly than anticipated with a corresponding increase in receipts from operations. Estimates for 1960 reflect reductions resulting from discontinuance of suction dredging in channel and harbor maintenance and nonrecurrence of 1959 expense incident to an experimental removal and overhaul of lock miter gates. Costs for these operations are shown in the following table:

	1958 actual	*1959 estimate*	*1960 estimate*
Maintenance of channels and harbors	$2,901,988	$2,974,200	$2,125,200
Navigation service and control	6,545,677	6,672,800	6,821,800
Locks operations	7,981,197	8,236,700	7,992,700
General canal expense	2,299,096	1,760,000	1,639,100
Total operating costs	19,727,958	19,643,700	18,578,800

The volume of traffic is shown by the following data:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected data on canal operations:				
Commercial vessel transits:				
Number of ships (over 300 net Panama Canal tons)	8,579	9,187	9,300	9,530
Tonnage (Panama Canal net)	43,714,264	47,821,171	49,150,000	50,582,000
Ships berthed	5,331	4,992	5,028	5,028
Tolls and toll credits at current rates	$39,653,520	$42,834,006	$43,948,000	$45,387,000
Other transit revenues	$3,897,309	$3,694,093	$3,631,000	$3,648,000

Capital outlay costs amount to $10,174,100 in 1960 and are mainly for (1) continuing canal improvements that are expected to accommodate projected traffic requirements for 1 or 2 decades, $5.3 million; (2) locks towing locomotives and cranes, $3.3 million; and (3) replacement of a tug, $1.1 million.

2. *Maritime services.*—These consist of vessel repair facilities, and harbor terminal and marine bunkering operations. Costs depend upon customer demand for service as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Vessel repair	$2,778,330	$2,494,600	$2,628,400
Harbor terminals	4,649,227	4,660,000	4,780,000
Hotel Washington	45,593	----------	----------
Total operating costs	7,473,150	7,154,600	7,408,400
Less intra-agency recoveries	1,911,033	1,673,300	1,828,000
Net operating costs	5,562,117	5,481,300	5,580,400

Capital outlay costs include $136,600 for routine replacement of equipment, $340,000 for replacement of a dock, and $257,000 for rehabilitation of a marine railway.

3. *Employee services.*—As shown below, these costs include housing, retail stores and related operations and service centers for eligible employees against whom charges are made to reimburse the Company. Estimated 1960 costs are slightly less than costs estimated in 1959 and those experienced in 1958.

	1958 actual	*1959 estimate*	*1960 estimate*
United States citizen housing	$1,567,388	$1,741,800	$1,761,000
Non-United States citizen housing	657,632	679,600	692,000
Retail stores and related operations	15,854,885	15,456,500	15,384,800
Service centers	3,285,927	3,223,100	3,240,700
Total	21,365,832	21,101,000	21,078,500
Less intra-agency recoveries	2,785,105	2,757,400	2,769,100
Net operating costs	18,580,727	18,343,600	18,309,400

Capital outlay costs include (1) $500,000 for starting a quarters replacement program, Pacific side; (2) $170,000 for construction of a theater; (3) $187,800 for replacement and addition of equipment; and (4) $358,000 for rehabilitation and modernization of other employee services facilities.

4. *Transportation and utilities services.*—Estimated 1960 gross costs of $13.8 million provide for rising wages, increasing costs of operating materials and supplies, and increased depreciation expense.

	1958 actual	*1959 estimate*	*1960 estimate*
Railroad	$1,473,237	$1,470,000	$1,520,000
Motor transportation	1,683,661	1,670,000	1,749,000
Steamship line	6,140,533	6,314,200	6,528,000
Power system	2,332,483	2,182,500	2,192,000
Communications system	512,716	538,500	565,200
Water system	1,184,257	1,210,300	1,209,100
Total	13,326,887	13,385,500	13,763,300
Less intra-agency recoveries	5,172,287	4,862,400	4,937,400
Net operating costs	8,154,600	8,523,100	8,825,900

Capital outlay costs total $1.7 million in 1960 and are mainly for (1) continuing the conversion of the power system to 60 cycles, $570,800; (2) replacing a portion of the trans-Isthmian telephone cable, $260,000; (3) replacing railroad rolling stock, $150,000; and (4) replacement of motor vehicles, $265,500.

5. *Other supporting services.*—Costs of this group follow:

	1958 actual	*1959 estimate*	*1960 estimate*
Tivoli guest house	$415,666	$425,400	$429,900
Printing plant	351,806	341,100	348,700
Grounds maintenance	1,021,602	1,029,900	1,062,800
Engineering and maintenance services	5,289,605	5,605,600	5,415,000
Supply operations	5,277,291	5,096,500	5,155,900
Total	12,355,970	12,498,500	12,412,300
Less intra-agency recoveries	10,159,267	10,227,400	10,188,500
Net operating costs	2,196,703	2,271,100	2,223,800

Capital outlay costs total $504,800 for 1960 and are for (1) rehabilitation of Tivoli guest house, $100,000, and (2) replacements and additions of equipment, $404,800.

6. *General corporate expense.*—This includes payments to the Treasury for the net cost of Canal Zone Government and interest, general and administrative expenses under statutory limitation, and other general charges. The scope of general and administrative expenses under statutory limitation includes virtually all general charges other than interest on the investment of the United States and the net cost of the Canal Zone Government. Increases estimated for 1959 and 1960 over 1958 are attributable principally to legislated pay increases, rising interest rates, and additional costs resulting from the Canal Zone Wage and Employment Practices Act.

	1958 actual	*1959 estimate*	*1960 estimate*
Net cost of Canal Zone Government	$10,737,194	$11,698,700	$12,608,200
Interest expense	8,778,560	9,000,000	9,100,000
Other general corporate expense	7,754,205	8,607,500	8,516,000
Total general corporate expense	27,269,959	29,306,200	30,224,200

THE PANAMA CANAL—Continued

Public enterprise funds—Continued

PANAMA CANAL COMPANY—Continued

PANAMA CANAL COMPANY FUND—continued

Capital outlay costs amount to $500,000 in 1960 of which $180,000 is for the installation of air conditioning equipment in two Company office buildings and $320,000 is for advance planning of future projects, retirement and removal costs and minor additions and improvements.

7. *Relation of costs to obligations.*—The relationships for operating costs and for capital outlay are derived by year-end balances of selected resources and applicable adjustments as reflected in the following tables:

RELATION OF OPERATING COSTS TO OBLIGATIONS

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Inventories	$7,928,134	$7,904,791	$7,730,000	$7,730,000
Other current assets	193,325	201,339	200,000	200,000
Unpaid undelivered orders (operations)	3,034,203	2,452,763	2,300,000	2,300,000
Total selected resources at end of year	11,155,662	10,558,893	10,230,000	10,230,000
Selected resources at start of year (−)		−11,155,662	−10,558,893	−10,230,000
Costs financed from obligations of other years, net (−)		−596,769	−328,893	

RELATION OF CAPITAL OUTLAY COSTS TO OBLIGATIONS

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Unpaid undelivered orders (capital outlay)	$2,774,277	$6,009,244	$7,963,837	$10,300,000
Selected resources at start of year		−2,774,277	−6,009,244	−7,963,837
Obligations incurred for costs of other years, net		3,234,967	1,954,593	2,336,163

Financing.—The Company is authorized to obtain appropriations for its capital needs and to cover losses sustained in the conduct of its activities. It is expected that the foregoing budget programs will continue to be financed entirely from revenue. It may borrow without interest up to $10 million from an emergency fund established with the Treasury by deposits made by the Company. To date it has not been necessary to use this fund. An increase in the limitation on general and administrative expenses is anticipated under Proposed for later transmission.

Operating results and financial condition.—There will be a modest increase in retained earnings in 1959 and an increase estimated at $13,570,000 in 1960. This increase results primarily from the credits gained through the transfer of Panama Canal Company and Canal Zone Government properties to the Republic of Panama under terms of the 1955 treaty.

Sources and Application of Funds (Operations)

	1958 actual	1959 estimate	1960 estimate
Gross expenditures (funds applied):			
Acquisition of assets: Purchase, construction, or improvement of fixed assets	$7,738,274	$13,942,319	$13,157,837

GENERAL PROVISIONS—THE PANAMA CANAL

[SEC. 202. No part of any appropriation contained in this Act shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: *Provided, however,* (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409) limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United

THE PANAMA CANAL—Continued

GENERAL PROVISIONS—THE PANAMA CANAL—Continued

States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further*, That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest.]

Sec. [203] *202*. The Governor of the Canal Zone is authorized to employ services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in an amount not exceeding $15,000: *Provided*, That the rates for individuals shall not exceed $100 per diem. (*Department of Commerce and Related Agencies Appropriation Act, 1959.*)

Guaranties are given on loans made by public and private financing institutions to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are paid out of guaranty fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings, retained to purchase loans when required under guaranty commitments and to cover possible future losses, are expected to be $4.6 million at the end of 1960. Of 683 loans authorized under this program since 1950, 33 were outstanding on June 30, 1958, in the amount of $18.5 million. Additional credit available thereunder was $11.4 million up to an authorized limit of slightly less than $30 million. It is anticipated that as of the end of 1959 and 1960 the number of loans outstanding will be 24 and 20 with outstanding balances thereunder of about $15 million and $12 million (50 U. S. C. app. 2091).

Guaranties are given on loans made by public and private financing institutions to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are paid out of guaranty fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings, retained to purchase loans when required under guaranty commitments and to cover possible future losses, are expected to be $13.5 million at the end of 1960. Of 460 loans authorized under this program since 1950, 69 were outstanding on June 30, 1958, in the amount of $144.4 million. Additional credit available thereunder was $84.7 million up to an authorized limit of slightly under $230 million. It is anticipated that as of the end of 1959 and 1960 the number of loans outstanding will be 69 with outstanding balances thereunder of about $145 million (50 U. S. C. app. 2091).

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

New obligational authority of $3,176 million is recommended for 1960 for the Department of Health, Education, and Welfare. This represents a net decrease of $52 million from 1959 but is an increase of $427 million over 1958.

Major decreases totaling $152 million result principally from the fact that (1) substantial amounts of 1959 appropriations will be available for obligation in 1960 in the program for hospital construction grants and (2) the financing of certain other projects will be completed in 1959 and new construction programs and grants for construction purposes are being restricted in line with the general policy on construction in this budget although expenditures will increase due to commitments made in prior years. The Congress, for antirecession purposes, increased 1959 appropriations available for hospital construction above the levels of the past several years. In light of the prospect of high economic activity, $85 million less in new obligational authority is being requested for 1960. Exclusive of Indian health facilities, nonrecurring direct construction accounts for $29 million of the decrease; waste treatment facilities construction grants for $25 million; and grants for the construction of research facilities for $10 million.

Significant increases totaling $110 million are provided in numerous programs, including (1) $61 million for public assistance and (2) $35 million for the defense education programs enacted by the last Congress as recommended by the Administration. The former increase primarily reflects the fact that this will be the first full year effect of legislation enacted in August 1958.

Not included in the figures discussed in this section of the budget is $192 million for salaries and expenses for the Bureau of Old-Age and Survivors Insurance, which is financed from trust funds. This Bureau is expected to employ about 40% of the approximately 60,400 personnel estimated in the 1960 budget for the Department of Health, Education, and Welfare.

The revised estimate of $3,228 million in new obligational authority for 1959 includes $258 million of supplemental appropriations for later transmission. These include $168 million for public assistance and $75 million for the new defense education program.

Expenditures by the Department in 1960 are estimated to be $3,140 million, an increase of $89 million from the 1959 estimate and $495 million more than was spent in 1958. Even though new appropriations for construction and construction grant programs in 1960 will be lower, expenditures will continue to increase because large balances from prior years will be used, as mentioned above.

About four-fifths of the appropriations for the Department in 1960 are for grants-in-aid to State and local governments. The President has endorsed the recommendations of the Joint Federal-State Action Committee that the programs for construction of waste treatment facilities and for vocational education be transferred to the States, coupled with appropriate adjustments in the Federal telephone tax to enable the States to carry on these activities in full. Legislation to accomplish this is recommended in this budget. The transfer would be effective with the beginning of 1961 and, accordingly, the resulting reductions in receipts and expenditures are not reflected in the 1960 estimates. Legislation will be proposed to reduce the Federal share for public assistance and to provide a more appropriate division of responsibility between the Federal Government and local school districts for the construction and operation of schools in federally affected areas.

The activities and expenditures of the Department in 1960 may be grouped in four major categories: Public assistance which represents 64% of the total; promotion of public health, 21%; promotion of education, 12%; and other activities, 3%.

Public assistance.—The Federal Government's role with respect to income maintenance is carried on primarily through the social security trust funds, particularly the Federal old-age, survivors, and disability insurance program. This program now provides protection against loss of income due to old-age retirement, disability, or death, and is financed from employment taxes which are transferred to the old-age, survivors, and disability insurance trust funds. These trust funds are discussed in part III of the budget, which also covers the income protection provided by the unemployment insurance trust fund.

The Federal Government also makes grants to the States, out of general revenues, for public assistance payments to the aged, the blind, the disabled, and for aid to dependent children. These payments are generally made to individuals who are not covered by the social security insurance program, although in some cases the public assistance payments supplement the benefits received from the insurance program. Federal expenditures for public assistance grants are estimated at $2 billion for 1960. This is 57% of the estimated total Federal-State-local outlay of $3.5 billion in 1960 for these programs.

The average Federal payment per person is estimated to be $1.60 higher in 1960 than in 1959 in the old-age assistance cases; and $0.45, $1.60, and $2.05, respectively, in the programs for aid to dependent children, aid to the blind, and aid to the permanently and totally disabled. It is expected that old-age assistance caseloads will continue to decline modestly from 2,442,000 in 1959 to 2,390,000 in 1960. The combined caseloads for dependent children, the blind, and the disabled are estimated to increase from 3,305,000 to 3,350,000.

The above figures for 1959 include a supplemental appropriation of $168 million to finance the increase in Federal cost primarily due to the 1958 legislation.

Expenditures in public assistance category other than grants are estimated to increase from $2 million in 1959 to nearly $4 million in 1960, primarily for grants to assist in the training of State social welfare staff and to conduct studies on problems such as the causes and prevention of dependency.

Promotion of public health.—New obligational authority recommended for the health activities of the Department for 1960 is $665 million, a decrease of $158 million from 1959, but an increase of $35 million over 1958. As noted earlier the decrease results mainly from a reduction in the construction grants and nonrecurring direct construction programs. Expenditures for 1960 are estimated

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

at $675 million, an increase of $10 million over the 1959 estimate. The 1960 total is more than double the amount spent 5 years earlier.

New obligational authority of $294 million is recommended for the research activities of the National Institutes of Health. Of this amount 48% is for extramural research grants, 17% for training grants, and 28%, or $83 million, for direct research and operations. Expenditures for the Institutes are expected to increase slightly.

In view of the extremely rapid expansion of federally sponsored health research in recent years, the Department is completing an extensive review of its programs, the results of which will be made known shortly.

New obligational authority of $141 million is recommended for 1960 for the three major construction grant programs of the Public Health Service; $101 million for hospital construction grants, $20 million for waste treatment facilities, and $20 million for medical and dental research facilities. Appropriations of $20 million were provided in 1959 for construction of the National Library of Medicine, the Dental Research Building and the General Office Building at the National Institutes of Health, Bethesda, Md. Construction is expected to begin late in 1959 on these buildings, and it is estimated that $10 million will be spent in 1960 for these structures as well as for new surgical facilities and the biologics standards building for which funds were appropriated earlier.

Expenditures for construction grants and direct construction are estimated at $201 million in 1960, an increase of $16 million from 1959. This results despite the decrease in new obligational authority because progress payments will be made from sizeable balances from prior years' appropriations.

Appropriations of $96 million for 1960 are proposed for the operation of hospitals and provision of medical care through the Public Health Service hospitals, the Indian hospitals, St. Elizabeths, and Freedmen's hospital. Average daily patient load in these four programs in 1960 is expected to be 16,454, almost the same as in 1959; outpatient care workload is expected to increase by 2%.

The 1960 estimate for the Public Health Service eliminates the specific appropriation for special health grants for Alaska (less than $2 million in 1959) because this will be covered in the transitional grant proposed in this budget. Increases are provided for air pollution control, radiological health, and communicable disease activities. In addition, $1 million is requested in 1960 for special grants to schools of public health as authorized by the last Congress.

A substantial advance in food and drug legislation was made in 1958 with the enactment of a measure providing for regulations of chemical additives in foods. Increases are recommended to implement this new legislation as well as to strengthen the Food and Drug Administration generally. Appropriations of $13 million are provided, an increase of $1 million, to enable this Bureau to augment its staff of scientists and inspectors.

Grants made to States by the Children's Bureau to promote the health and welfare of children and mothers will amount to $44 million in 1960, the same as in 1959, but $2 million more than in 1958. For 1959, however, a proposed supplemental appropriation of $1.5 million is included to provide special emergency funds for newly developed techniques in heart surgery.

An appropriation of $200,000 is also included for the White House Conference on Children and Youth to be held in March 1960.

Promotion of education.—The budget provides for new obligational authority of $150 million for the second year of operation in the 4-year program under the National Defense Education Act of 1958. This is an increase of $35 million over the 1959 total, which includes a proposed supplemental of $75 million. Of the $150 million for 1960, $31 million is for the student loan program; $57 million for grants to States for improvement of science and mathematics and for foreign language instruction; $24 million for guidance, counseling, and testing programs, for technical vocational education programs, and for improving State statistical services. The remainder is for national defense fellowships, institutes for counseling personnel, activities in foreign language training field, educational media research, and loans to nonprofit, private elementary and secondary schools for science, mathematics, and foreign language instructional equipment.

The new obligational authority of $181 million requested in 1960 for construction and operation of schools in federally affected areas is the same as that provided by the Congress in 1959. As in 1959, payments for operating expenses will be prorated at about 85% of the entitlements of eligible school districts and construction projects will be financed according to a priority system. Legislative revisions in these programs will be proposed to provide for a more equitable sharing in the cost of these programs by local school districts.

New obligational authority of $63 million for all other education activities by the Department for 1960 is recommended, a net increase of $3 million. This increase is primarily for salaries and expenses of the Office of Education so that it can carry on its responsibilities under the new National Defense Education Act programs. An increase is also included for cooperative research agreements. $1 million is requested for initiation of a new program of grants in the field of education of mentally retarded children. Finally, increased support is provided for Howard University to maintain the quality of its educational services.

Other welfare services and administration.—The major program under this category is the Federal-State rehabilitation grant program. To foster continued expansion of this program appropriations of $66 million are recommended, an increase of $8 million over 1959. In 1960 it is expected that services will be provided to 314,000 disabled individuals and that 90,000 individuals will be rehabilitated. This represents an increase of 10.6% and 9.8%, respectively, compared with 1959.

The budget also includes funds for the White House Conference on Aging which is scheduled for January 1961. Federal contributions are also included for Gallaudet College (for the deaf) and for the American Printing House for the Blind.

AMERICAN PRINTING HOUSE FOR THE BLIND

Current authorizations:

EDUCATION OF THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U. S. C. 101–105), $400,000. (*Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Appropriated 1959, **$400,000** Estimate 1960, **$400,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Grants for educational materials (total obligations)	$328,000	$400,000	$400,000
Financing:			
Appropriation (new obligational authority)	328,000	400,000	400,000

Grants are made to this nonprofit institution in Louisville, Ky., to manufacture books and teaching materials for the blind and to distribute them on a per capita basis to all public educational institutions for the blind and to State departments of education throughout the United States, its Territories and possessions.

Numbers of blind students served by this program are as follows: 1958 actual, 11,183; 1959 estimate, 12,024; 1960 estimate, 12,500.

The Printing House also receives $10,000 annually from the Treasury Department under "To promote the education of the blind, principal account," Bureau of Accounts.

Object Classification

	1958 actual	1959 estimate	1960 estimate
11 Grants, subsidies, and contributions	$328,000	$400,000	$400,000

FOOD AND DRUG ADMINISTRATION

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses not otherwise provided for, of the Food and Drug Administration, including purchase of not to exceed twenty-five passenger motor vehicles for replacement only; reporting and illustrating the results of investigations; purchase of chemicals, apparatus, and scientific equipment; payment in advance for special tests and analyses by contract; and payment of fees, travel, and per diem in connection with studies of new developments pertinent to food and drug enforcement operations; [$9,800,000] *$11,800,000.* (*Federal Food, Drug, and Cosmetic Act, as amended (21 U. S. C. 301–392); Tea Importation Act, as amended (21 U. S. C. 41–50); Import Milk Act (21 U. S. C. 141–149); Federal Caustic Poison Act (15 U. S. C. 401–411); Filled Milk Act, as amended (21 U. S. C. 61–64); Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Appropriated 1959, **$9,800,000** Estimate 1960, **$11,800,000**

Unobligated balance no longer available	44,330		
New obligational authority	9,635,100	10,597,000	$11,800,000
New obligational authority:			
Appropriation	$9,300,000	$9,800,000	$11,800,000
Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	335,100		
Appropriation (adjusted)	9,635,100	9,800,000	11,800,000
Proposed supplemental due to pay increases		797,000	

The laws enforced hereunder are designed to protect consumers against adulterated and misbranded foods, drugs, cosmetics, therapeutic devices, and caustic poisons.

Public Law 85–929, approved September 6, 1958, prohibits the use in foods of additives which have not been adequately tested to establish their safety. A supplemental to undertake this work in 1959 is proposed for later transmission.

1. *Field inspections, investigations, and laboratory analyses.*—Inspections of domestic plants, examinations of interstate and import shipments and special investigations are planned according to the relative incidence and seriousness of probable violations. About 84,000 establishments (manufacturing plants, warehouses, shippers) dealing in foods, drugs, devices, or cosmetics are subject to inspection. Retail establishments dealing in products received in interstate commerce are also subject to the prohibition against adulteration or misbranding of articles from interstate sources. Samples are collected during inspections and investigations and laboratory analyses are conducted to detect and identify adulteration.

The 1960 budget estimate provides for initial staffing and auxiliary expenses for the opening of a new district office in the Dallas, Tex., area authorized in 1959.

2. *Research and methodology.*—Research is conducted to evaluate the components of foods, drugs, devices and cosmetics and to appraise their efficacy, toxicity, and acute and long-range effects. Research is also performed to develop analytical methods for use in field analysis of inspectional samples and to develop food standards and pesticide and food additives tolerances.

3. *Compliance, consultation, and education.*—Voluntary compliance with the law is promoted wherever possible, but legal action is taken when necessary. Legal proceedings include seizures of illegal products, injunctions and criminal prosecution through the courts. Standards for foods, and tolerances for poisonous substances in foods and other regulations are promulgated. A program of consumer education is conducted. Liaison is maintained with, and assistance is given to State and local food and drug agencies.

4. *Medical evaluation.*—Applications for new drugs to be marketed are evaluated and approved. The medical aspects of research and enforcement activities are coordinated.

Workload is reflected in the following summary data:

	1958 actual	*1959 estimate*	*1960 estimate*
Number of establishments inspected	17,119	19,000	21,500
Establishment inspections	20,647	23,000	26,000
Wharf examinations	5,184	6,000	6,400
Samples collected for examination	34,469	38,700	43,000
Laboratory analyses and other examinations	25,478	28,500	31,500

Proposed supplemental appropriation		378,000	

Under existing legislation, 1959.—A supplemental appropriation of $378,000 is anticipated for 1959 as a result of the enactment of Public Law 85–929, approved September 6, 1958, which amends the Federal Food, Drug, and Cosmetic Act to prohibit the use in foods of additives which have not been adequately tested to establish their safety.

FREEDMEN'S HOSPITAL

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for operation and maintenance, including repairs; furnishing, repairing, and cleaning of wearing apparel used by employees in the performance of their official duties; transfer of funds to the appropriation "Salaries and expenses, Howard University" for salaries of technical and professional personnel detailed to the hospital; payments to the appropriation of Howard University for actual cost of heat, light, and power furnished by such university; [$2,975,000] *$3,190,000*: *Provided*, That no intern or resident physician receiving compensation from this appropriation on a full-time basis shall receive compensation in the form of wages or salary from any other appropriation in this title: *Provided further*, That the District of Columbia shall pay by check to Freedmen's Hospital, upon the Surgeon General's request, in advance at the beginning of each quarter, such amount as the Surgeon General calculates will be earned on the basis of rates approved by the Bureau of the Budget for the care of patients certified by the District of Columbia. Bills rendered by the Surgeon General on the basis of such calculations shall not be subject to audit or certification in advance of payment; but proper adjustment of amounts which have been paid in advance on the basis of such calculations shall be made at the end of each quarter: *Provided further*, That the Surgeon General may delegate the responsibilities imposed upon him by the foregoing proviso. (*32 D. C. Code 317–320; Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Appropriated 1959, **$2,975,000** Estimate 1960, **$3,190,000**

Gallaudet College provides advanced education to the deaf, a graduate department to train teachers of the deaf, and a research program to provide information about the deaf. It also operates the Kendall School which provides elementary and secondary education for deaf children and serves as a laboratory school for the education department.

The first stage of the building program, started in 1956, provided for a women's residence hall and a physical activities-heating plant building which have been opened for use and are completed except for final furnishing items. Appropriations in 1957 provided for a classroom-science building and a speech and hearing center which are under construction and are scheduled to be opened during

1959. Provision was made by appropriations in 1958 for a cafeteria and service building (student union) and a men's dormitory. Contracts for these buildings have been let, together with a consolidated contract for roads, walks, grading, boiler and laundry equipment, and outside services. These projects are scheduled for completion during 1960.

Planning costs of $123,000 for the fourth stage of the construction program were appropriated in 1959.

The following table shows the construction program and estimated costs:

Project	Stage I, 1956	Stage II, 1957	Stage III, 1958	Stage IV
Women's residence hall	$691,500			
Physical activities-heating plant building	1,533,500			
Classroom-science building		$1,543,000		
Speech and hearing center		444,000		
Additional boiler and laundry equipment		510,000		
Cafeteria and service building			$990,000	
Men's residence hall			600,000	
Auditorium				$592,000
Classrooms and dormitories, Kendall School				863,000
Greenhouses				50,000
Athletic fields and stands				285,000
Maintenance group building				60,000
Maintenance group personnel apartments				30,000
Outside services, roads, walks, and grading		50,000	100,000	260,000
Estimated cost	2,225,000	2,547,000	1,690,000	2,140,000
Appropriations	2,225,000	2,547,000	1,690,000	123,000

An amount of $150,000 is requested for initiation of a program of renovation and repair of the existing buildings on the Gallaudet campus.

NOTE.—Reimbursements from non-Federal sources above are from tuition, other student fees, gifts and grants, endowment income, and sales by auxiliary enterprises.

The University consists of an undergraduate college, a graduate school offering the master's degree and the degree of doctor of philosophy (in chemistry), and eight professional schools. Federal funds will provide an estimated 54.8% of the operating costs in 1960.

1. *General administration.*—The University is administered by a private board of trustees and staff of officers.

2. *Resident instruction and departmental research.*—This activity includes all direct expenditures for the operation of the educational program in the 10 schools and colleges.

3. *General library.*—The general library serves the needs of 10 schools and colleges, and supervises, in part, the professional collections.

4. *Operation and maintenance of the physical plant.*—The operation and maintenance staff services 40 buildings located on the University's 60-acre campus.

5. *Auxiliary enterprises and noneducational expense.*—The dormitories, food service, bookstores, and athletic program included under this activity are intended to be self-supporting and render service at lowest possible cost. The noneducational expense covers cost of student aid program.

CONSTRUCTION PROGRAM

Since 1945 the Federal Government has undertaken to finance a major construction program at Howard University which includes the erection of a number of new buildings and alterations and repairs to the existing physical plant. Both direct appropriations and contract authorizations have been available. The following table sets forth the authorized construction program and the estimated obligational authority available through 1959. Appropriations of $11,323,004 have been made to liquidate $12,718,004 in contract authorizations, leaving an estimated balance of $1,395,000 for the auditorium-fine arts building to be financed to the extent needed. An appropriation of $860,000 is requested for 1960 to liquidate a portion of the unfinanced contract authorization.

OBLIGATIONAL AUTHORITY THROUGH 1959

Project	*Direct appropriation*	*Contract authorization including escalation and cancellations*	*Total obligational authority*	*Status of project*
Auditorium-fine arts building	$1,122,080	$3,005,905	$4,127,985	To be completed in 1960.
Power substation	272,000		272,000	To be completed in 1959.

PAYMENTS TO SCHOOL DISTRICTS

For payments to local educational agencies for the maintenance and operation of schools as authorized by the Act of September 30, 1950, as amended (20 U. S. C., ch. 13), [$130,000,000] *$142,300,000*: *Provided*, That this appropriation shall also be available for carrying out the provisions of section 6 of such Act. (*Supplemental Appropriation Act, 1959.*)

Appropriated 1959, **$130,000,000** Estimate 1960, **$142,300,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Payments to local educational agencies	$120,683,226	$122,500,000	$134,200,000
2. Payments to other Federal agencies	5,976,244	7,500,000	8,100,000
Total obligations	126,659,470	130,000,000	142,300,000
Financing:			
Unobligated balance no longer available	340,530		
Appropriation (new obligational authority)	127,000,000	130,000,000	142,300,000

Payments are made to assist in the maintenance and operation of schools in districts overburdened by Federal activities. These payments are made primarily to local school districts. However, where such districts cannot assume responsibility for educating federally connected children, payments are made to other agencies for the direct operation of schools under Federal auspices.

This program was amended by Public Law 85–620 (72 Stat. 548), making permanent provisions pertaining to children residing on Federal property with a parent working on Federal property, and extending all other provisions of the program until 1961.

In 1960, under current law, payments will be made to about 4,000 school districts enrolling approximately 1,468,000 federally connected pupils in all States, Guam, Hawaii, and Puerto Rico. This compares to some 3,800 districts and about 1,385,000 pupils in 1959. The 1960 estimate will provide approximately 85% of entitlements to eligible school districts, or about the same percentage which the Congress appropriated in 1959.

Legislation, similar to that submitted to the Congress last year, will be proposed to revise the program in order to define more clearly the proper roles of the Federal Government and the local school districts.

Unobligated balance carried forward	46,698,045		
Appropriation (new obligational authority)	98,650,000	50,800,000	38,500,000

From 1951 through 1959, $876.9 million has been appropriated for this program, aiding in the construction of an estimated 39,325 classrooms housing about 1.2 million pupils in the States, Hawaii, Puerto Rico, and Guam.

The law was amended by Public Law 85–620 (72 Stat. 548), making permanent provisions for assistance on account of children living on Federal property with a parent employed on that property, and extending assistance for all other categories of Federal impact until 1961.

Funds requested for 1960 will provide approximately 1,250 classrooms for about 37,500 children.

1. *Assistance to local educational agencies.*—Grants are made for school construction in local districts overburdened by Federal activities.

2. *Assistance for school construction on Federal properties.*—Where the local education agency is not able to provide school facilities for children living on Federal properties, the Commissioner of Education provides for the construction of schools.

3. *Payments for technical services.*—Technical services rendered by other agencies are necessary in connection with construction for school housing now in process and proposed for 1960.

Legislation, similar to that submitted to the Congress last year, will be proposed to revise the program in order to define more clearly the proper roles of the Federal Government and the local school districts.

Grants and payments are made to States and Territories, educational institutions, and individuals for the following purposes:

1. *Student loans.*—Funds are allotted to States, on the basis of enrollments in institutions of higher education, for payments to such institutions to provide capital contributions to student loan funds, and loans are made to institutions, as necessary, for non-Federal capital contributions to the funds.

2. *Science, mathematics, and foreign language instruction.*—Grants are made to States on a matching basis, and loans are made to nonprofit private schools for the acquisition of equipment and minor remodeling of laboratory or other space. Funds are allotted among the States on the basis of school-age population and income per child of school age. Grants are also made to States for supervision and administration of the program, which are allotted on the basis of school-age population; State matching begins in 1960.

3. *National defense fellowships.*—Fellowships will be awarded to 1,500 individuals, an increase of 500 over 1959, and grants are made to institutions where such individuals are enrolled.

4. *Guidance, counseling, and testing.*—Grants are made to States to assist in establishing and maintaining programs of testing, guidance, and counseling Funds are allotted on the basis of school-age population. State matching begins in 1960. Contracts are made with institutions of higher education for operation of institutes for training of counseling personnel, including provision for stipends to those in attendance.

5. *Advanced training in foreign areas and languages.*—Contracts are made with institutions of higher education for one-half the cost of operation of language and area study centers and for full cost of institutes for advanced training of teaching personnel in modern foreign languages. Stipends are paid to persons in attendance. Contracts are made for research and studies in the area of foreign language instruction.

6. *Educational media research.*—Through grants and contracts, research and demonstrations are conducted in the area of utilization of new media for educational purposes.

7. *Grants to States for area vocational programs.*—Grants are made on a matching basis to States for establishing technical and sub-professional training programs.

8. *Grants to States for statistical services.*—Grants are made on a matching basis to assist the States in improving educational statistics. Total payments to any State may not exceed $50,000 annually.

A supplemental appropriation is anticipated for these purposes in 1959 under Proposed for later transmission.

1. *Statistics and research—(a) Services.*—Assistance is provided on planning research studies and major responsibility assumed for collection and analysis of basic educational statistics. Basic data and statistics on library resources are made available, and consultative services are rendered. The Office administers grants to States for rural library services and makes studies and reports on this program. Educational media research grants, authorized by the National Defense Education Act, are administered, and advisory services in the area of educational media are provided.

(b) *Cooperative agreements.*—Research and demonstration projects are carried on in cooperation with colleges, universities, and State educational agencies. Projects are supported in such problem areas as education of the mentally retarded, development of students with special abilities, staffing the Nation's schools, and the educational implications of changes in the country's economy. In 1958, approximately $1.2 million was obligated for 53 projects in education of the mentally retarded and about $1.1 million for 80 projects in other problem areas.

2. *Administration of school assistance in federally affected areas.*—Applications for school construction and school operation expenses in areas where facilities are burdened by Federal activities are examined and acted upon.

3. *Vocational education.*—Information is developed and publications are issued. Advisory services are provided to Federal, State, and local agencies and to professional groups, and the States are given assistance in the appraisal and development of vocational educational programs. Grants to States for vocational education under the George-Barden and Smith-Hughes Acts are administered. The Office also administers area vocational education grants authorized by the National Defense Education Act.

4. *Higher education.*—Advisory services are provided to Federal and State agencies, to professional groups, and to higher educational institutions; information is developed and publications are issued. The Office administers programs authorized by the National Defense Education Act which relate to higher education institutions, such as the student loan program, foreign language and area centers, institutes for training teaching personnel of modern foreign languages, institutes for training counseling personnel and the fellowship program.

5. *International education.*—Information is developed and disseminated on education in other countries; educational exchange programs are administered in cooperation with the Department of State and International Cooperation Administration.

6. *State and local school systems.*—Information is developed and publications are issued related to elementary and secondary education and to State and local school administration; advisory services are provided to Federal, State, and local agencies, and to professional groups. The Office administers aid programs authorized by the National Defense Education Act, such as financial assistance to States for strengthening science, mathematics, and foreign language instruction; for guidance, counseling, and testing; and for assistance to the States for improvement of statistical services.

7. *Program direction and services.*—Central direction and services to the various programs of the Office are provided, as are informational services. Legislative programs and studies and reports on Federal and State educational legislation are developed; management services to the Office are provided. A program of regional representation has been provided to serve better the needs of education.

The National Defense Education Act was approved September 2, 1958, and an interim appropriation was made available to initiate the program in 1959. A supplemental appropriation for 1959 is anticipated under Proposed for later transmission.

Grants are made to the States on a dollar-for-dollar matching basis for the purpose of cooperating with the States in paying the salaries of teachers of agriculture, trade, home economics, and industrial subjects, and for the training of teachers of these subjects (20 U. S. C. 11–18).

In accordance with the recommendations of the Joint Federal-State Action Committee that the function of vocational education be assumed entirely by the States, legislation is expected to be proposed for repeal of grants under the Smith-Hughes Act of 1917. Therefore, it is not anticipated that the 1961 budget will include funds for this purpose.

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Program by activities—Continued			
2. Science, mathematics, and foreign language instruction:			
(a) Acquisition of equipment and minor remodeling:			
(1) Grants to States		$32,560,000	
(2) Loans to nonprofit private schools		4,440,000	
3. National defense fellowships		4,500,000	
4. Guidance, counseling, and testing:			
(a) Grants to States		2,000,000	
(b) Institutes for counseling personnel		1,000,000	
5. Advanced training in foreign areas and languages:			
(a) Training centers		625,000	
(b) Institutes for language teachers		1,100,000	
(c) Research		2,475,000	
6. Educational media research		1,000,000	
8. Grants to States for statistical services		600,000	
Total obligations		75,300,000	
Financing:			
Proposed supplemental appropriation		75,300,000	

Under existing legislation, 1959.—A supplemental request of $75.3 million is anticipated, since the interim 1959 supplemental appropriation of $40 million to initiate the programs authorized by the National Defense Education Act of 1958 is not sufficient to meet expected requirements.

SALARIES AND EXPENSES

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Statistics and research: Services		$22,630	
2. Vocational education		24,400	
3. Higher education		184,000	
4. State and local school systems		231,570	
5. Program direction and services		87,400	
Total obligations		550,000	
Financing:			
Proposed supplemental appropriation		550,000	

Under existing legislation, 1959.—A supplemental appropriation of $550,000 is anticipated, since the 1959 appropriation of $750,000 was only an interim appropriation to begin administration of the National Defense Education Act of 1958.

OFFICE OF VOCATIONAL REHABILITATION

Current authorizations:

GRANTS TO STATES [AND OTHER AGENCIES]

For grants to States [and other agencies] in accordance with the Vocational Rehabilitation Act, as amended, [$51,600,000] *$51,900,000*, of which [$45,500,000] *$50,400,000* is for vocational rehabilitation services under section 2 of said Act; *and* $1,500,000 is for extension and improvement projects under section 3 of said Act [; and $4,600,000 is for special projects under section 4 of said Act]: *Provided*, That allotments under section 2 of said Act to the States for the current fiscal year shall be made on the basis of [$56,000,000] *$59,500,000*, and this amount shall be considered the sum available for allotments under such section for such fiscal year.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, grants to States under sections 2 and 3 of the Vocational Rehabilitation Act, as amended, for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation therefor for that fiscal year: *Provided*, That the payments made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the current fiscal year. *(29 U. S. C. 31–42; Department of Health, Education, and Welfare Appropriation Act, 1959.)*

Appropriated 1959, **$51,600,000** Estimate 1960, [a] **$51,900,000**

[a] Excludes $6,300,000 for activities transferred in the estimates to "Research and training." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Vocational rehabilitation services	$41,083,273	$45,500,000	$50,400,000
2. Extension and improvement projects	1,094,483	1,500,000	1,500,000
Total obligations	42,177,756	47,000,000	51,900,000
Financing:

OFFICE OF VOCATIONAL REHABILITATION—Con.

Current authorizations—Continued

Research and Training [and Traineeship]—Continued

1. *Research and demonstrations.*—This program supports research and demonstration projects which hold promise of making a contribution to the solution of vocational rehabilitation problems common to all or several States. Funds are made available to public and private nonprofit organizations to cover part of the costs. Selected demonstrations provide prompt and widespread application of research findings and accelerate services to selected groups of severely disabled persons.

This Office administers grants to States for vocational rehabilitation, vocational rehabilitation research and training, and licensing the blind to operate vending stands on Federal and other properties.

1. *State plans, grants, and program evaluation.*—State plans are approved and allotments and grants are made; field relationships with States are coordinated; overall program plans are developed; program accomplishments are evaluated; special studies are made; a program of research and statistics is conducted; publications are prepared and assistance is given to States in interpreting their programs to the public; and old-age and survivors insurance referrals are coordinated.

2. *Specialized services to States.*—Standards and services pertaining to technical aspects of rehabilitation, medical services and facilities and special services to the blind are developed; and technical advisory services, including organization and management advisory services, are provided.

3. *Research and demonstrations.*—Grants for projects to develop and demonstrate new rehabilitation methods and techniques are administered.

4. *Training and traineeships.*—Grants for training and traineeships to provide additional specialized personnel to work in rehabilitation are administered.

PUBLIC HEALTH SERVICE

The Service attends to the Federal interest in safeguarding public health by: Providing grants-in-aid; furnishing consultative assistance to States for such public health services as the prevention and control of disease, hospital planning and construction; conducting research in biology and medicine; enforcing foreign and interstate quarantine regulations; disseminating information on health problems; and conducting medical and hospital care programs. To perform these functions the Service is organized as follows:

(1) The Bureau of State Services operates principally in the fields of Federal-State, interstate, and international public health programs, through grants and direct operations involving research, development, demonstrations, consultative services, and training.

(2) The Bureau of Medical Services administers the medical care programs for merchant seamen, coastguardsmen, Indians, Alaskan natives, and other beneficiaries designated by the Congress; furnishes assistance in the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

form of grants and technical services in the planning and construction of public and nonprofit hospitals and other medical care facilities; provides for the construction of medical facilities for Indians both in the form of grants and as direct construction; and through the foreign quarantine program performs examinations of aliens at United States ports and of visa applicants in foreign countries.

(3) The National Institutes of Health constitutes the primary research arm of the Service and is further described in a subsequent statement.

(4) The National Library of Medicine collects and disseminates medical literature.

(5) The Office of the Surgeon General formulates general policy, furnishes central administrative services, and operates special programs such as the national health survey.

A summary of obligations for grants, direct operations, and construction for the Public Health Service follows:

[In thousands]

	1958	*1959*	*1960*
Grants	$386,660	$485,697	$414,420
Direct operations	188,009	209,732	217,670
Construction	7,654	40,499	7,306
Total, Public Health Service	582,323	735,928	639,396

Current authorizations:

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U. S. C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including expenses for active commissioned officers in the Reserve Corps and for not to exceed one thousand nine hundred commissioned officers in the Regular Corps; and [except as otherwise authorized by the Act of September 30, 1950 (20 U. S. C. 236–244),] for expenses of primary and secondary schooling of dependents, *in foreign countries,* of Public Health Service personnel stationed in foreign countries, in amounts not to exceed an average of $250 per student, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207 (f) or section 207 (g) of the Act at rates established by the Surgeon General not to exceed $15,000 per annum; as follows: (*Department of Health, Education, and Welfare Appropriation Act, 1959.*)

ASSISTANCE TO STATES, GENERAL

To carry out the purposes not otherwise specifically provided for, of section 314 (c) of the Act; to provide consultative services to States pursuant to section 311 of the Act; to make field investigations and demonstrations pursuant to section 301 of the Act; to provide for collecting and compiling mortality, morbidity, and vital statistics; [to provide traineeships pursuant to section 306 of the Act;] and not to exceed $1,000 for entertainment of officials of other countries when specifically authorized by the Surgeon General; [$22,889,000] *$22,497,000.* (*Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Appropriated 1959, **$22,889,000** Estimate 1960, [a] **$22,497,000**

[a] Includes $308,000 for activities transferred in the estimates as follows:

"Grants and special studies, Territory of Alaska"	$64,000

(1) Health of the aged and chronic disease	1,031,350	1,153,800	1,155,500
(2) Occupational health	686,326	855,100	869,900
(3) Accident prevention	357,352	373,800	374,400
(*e*) Administration	110,619	115,900	116,200
Total, direct operations	5,982,589	6,497,000	6,497,000
Total obligations	22,917,198	23,497,000	22,497,000
Financing:			
Comparative transfers from (−) other accounts	−295,068	−308,000	----------
Unobligated balance no longer available	83,770	----------	----------
New obligational authority	22,705,900	23,189,000	22,497,000
New obligational authority:			
Appropriation	$22,592,000	$22,889,000	$22,497,000
Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	113,900	----------	----------
Appropriation (adjusted)	22,705,900	22,889,000	22,497,000
Proposed supplemental due to pay increases	----------	300,000	----------

1. *Grants*—(*a*) *To States for general health.*—Grants are made to assist the States in supporting basic State and local health services, such as public health nursing, laboratory services, vital statistics, sanitary engineering, and control of communicable diseases. The 1960 estimate will (1) permit the support of State and local public health units; (2) provide specialized health services; (3) stimulate and develop such health services as diabetes control, health services for the aged, occupational health, and accident prevention; (4) stimulate application of new research discoveries; and (5) train public health personnel. The 1959 grant level is proposed to be maintained in 1960.

(*b*) *For public health training.*—Legislation to provide grants and awards to professional personnel for training in public health expires at the end of 1959.

(*c*) *To schools of public health.*—Grants will be made to schools of public health to alleviate the financial deficits resulting from operating costs which exceed tuition payments. These grants will assist in maintaining an adequate supply of trained public health personnel for all levels of government. The 1960 estimate will permit the schools to improve the quality of their public health training by: (1) improvement of staff in number and quality; (2) broadening and improvement of curriculum; and (3) procurement of necessary educational equipment. A supplemental estimate for 1959 is proposed for later transmission.

2. *Direct operations*—(*a*) *Technical assistance to States.*—Assistance is rendered to the States through technical and professional consultative services, conducting special studies of public health practices, and training programs.

(*b*) *Vital statistics.*—Vital statistics data are collected, analyzed, and disseminated on births, deaths, stillbirths, illnesses, marriages, and divorces.

Federal Reserve Bank of St. Louis

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

ASSISTANCE TO STATES, GENERAL—Continued

(*c*) *International health activities.*—International health responsibilities are to (1) develop the United States position on international health matters, and provide representation at international health meetings; (2) serve as a clearinghouse for information on health conditions and needs in other countries; and (3) administer training programs for foreign health personnel in the United States.

(*d*) *Special health services—(1) Health of the aged and chronic disease.*—Studies to develop and improve methods for the identification and prevention of chronic illness, for the care and restoration of the chronically ill and aged, and for meeting special health problems of the aged population will be continued, and assistance given in the application of techniques through technical assistance, demonstrations, and training.

(2) *Occupational health.*—Research on occupational hazards and diseases such as silicosis and other pneumoconioses is conducted and assistance is provided to Federal, State, and local agencies, and industry in preventing and controlling occupational hazards and diseases.

(3) *Accident prevention.*—A program of research to determine the extent and cause of accidents, and to develop techniques for their prevention and control will be continued and, through demonstrations and technical assistance, the adoption of accident prevention and control techniques will be encouraged.

CONTROL OF VENEREAL DISEASES

To carry out the purposes of section 314 (a) and 363 of the Act with respect to venereal diseases and for grants of money, services, supplies, equipment, and use of facilities to States, as defined in the Act, and with the approval of the respective State health authorities, to counties, health districts, and other political subdivisions of the States, for venereal disease control activities, in such amounts and upon such terms and conditions as the Surgeon General may determine; [$5,400,000] *$4,673,000. (Department of Health, Education, and Welfare Appropriation Act, 1959.)*

Appropriated 1959, **$5,400,000** Estimate 1960, [a] **$4,673,000**

[a] Excludes $27,000 for activities transferred in the estimates to "Assistance to States, general." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Grants to States for venereal disease control	$1,675,964	$2,400,000	$1,700,000
2. Direct operations:			
(*a*) Clinical and laboratory research	709,575	813,000	813,000
(*b*) Technical assistance to States	1,835,646	1,928,000	1,928,000

Unobligated balance no longer available	42,885		
New obligational authority	4,502,800	5,400,000	4,673,000
New obligational authority:			
Appropriation	$4,415,000	$5,400,000	$4,673,000
Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	87,800		
Appropriation (adjusted)	4,502,800	5,400,000	4,673,000

While, during 1958, reported cases of primary and secondary syphilis showed an increase of 6.4% and gonorrhea an increase of 1.7%, there was a total decrease of 1.5% in cases of major venereal diseases reported as compared to 1957. The 350,000 such cases indicate the continued seriousness of the venereal disease problem despite more effective methods of treatment.

1. *Grants to States for venereal disease control.*—Case-finding projects are supported in selected areas where venereal disease incidence and prevalence remain high. It is anticipated that State and local governments in these areas will increase their support of case-finding projects.

2. *Direct operations—(a) Clinical and laboratory research.*—Research and evaluation activities are directed toward maintenance of uniformly satisfactory nationwide serologic services; development and introduction of new syphilis diagnostic tests; development of an immunizing agent for syphilis; improvement of diagnostic techniques for gonorrhea; evaluation of more effective methods of therapy; and the improvement of control procedures.

(*b*) *Technical assistance to States.*—Epidemiologic services are directed toward the maintenance of nationwide and international intelligence and control of venereal disease in areas of particular concentrations of agricultural, industrial, and military personnel and in numerous small high-prevalence areas that might become the foci for spread of infection. Consultation is furnished to States through the regional offices in determining problem areas, infection sources, and control techniques required. Scientific information and educational media are disseminated through State agencies.

Control of Tuberculosis

To carry out the purposes of section 314 (b) of the Act, [$6,386,000] *$5,452,000*, of which not less than [$4,000,000] *$3,000,000* shall be available only for grants to States, to be matched by an equal amount of State and local funds expended for the same purpose, for direct expenses of prevention and case-finding projects including salaries, fees, and travel of personnel directly engaged in prevention and case-finding and the necessary equipment and supplies used directly in prevention and case-finding operations, but excluding the purchase of care in hospitals and sanatoria. (*Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Appropriated 1959, **$6,386,000** Estimate 1960, [a] **$5,452,000**

[a] Excludes $49,000 for activities transferred in the estimates to "Assistance to States, general." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

Appropriation (adjusted)	7,050,800	6,386,000	5,452,000
Proposed supplemental due to pay increases		115,000	

The death rate of tuberculosis per 100,000 population decreased from 9.1 in 1955 to 7.8 in 1957 in continental United States. New cases reported declined from 100,000 in 1955 to 87,000 in 1957.

1. *Grants to States for tuberculosis control.*—Grants are made to assist States in planning and administering specific control measures, including training of professional workers, case finding, and case followup. The estimate for 1960 assumes that State and local governments will increase their support of tuberculosis control activities.

2. *Direct operations*—(a) *Cooperative applied research.*—In cooperation with State and local health departments, medical schools, private investigators, and others, studies are conducted in the epidemiology, prevention, detection, diagnosis, and therapy of tuberculosis.

(b) *Technical assistance to States.*—Assistance is provided through demonstrations, consultative services, operational studies, and training activities in case finding, case management, and other community tuberculosis control practices.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

COMMUNICABLE DISEASE ACTIVITIES—Continued

cal infections; aseptic meningitis; poliomyelitis; viral encephalitis; diarrheal diseases; the acute respiratory diseases; and rodent-borne diseases. Upon request of State health officers, emergency aid is provided to prevent and control disease outbreaks in disaster areas, or during epidemics. During 1958 aid was provided in 76 emergencies in 32 States, the District of Columbia, the Virgin Islands, and Puerto Rico. The higher level in 1959 is for studies and assistance to the States on the emergent problem of staphylococcal infections and for rabies activities in the upper Midwest. The 1960 estimate provides for intensification of the development of the fluorescent antibody diagnostic techniques; studies and assistance to control staphylococcal infections; and funds to cover the cost of moving the Communicable Disease Center to new facilities now under construction in Atlanta, Ga. A supplemental for 1959 is proposed for later transmission.

2. *Training.*—This program provides for training course materials and audiovisual aids on modern public health practices for use by the State and local health departments in training their personnel; evaluation of the effectiveness of training courses; specialized training of Public Health Service personnel in newer methods for disease control; and direction of all Communicable Disease Center training functions.

The following table shows selected measurable workload items:

Workload item	*1957 actual*	*1958 actual*	*1959 estimate*	*1960 estimate*
Laboratory specimens processed	51,393	42,353	52,000	52,000
Training program:				
Trainees	1,099	2,189	2,200	2,200
Courses	61	98	98	98
Audiovisual aids:				
Films loaned or sold	10,830	10,709	12,500	12,500
New productions completed	41	34	52	52

4. *Arctic health research.*—At the Arctic Health Research Center in Alaska, studies are made on problems of low temperature environmental sanitation, endemic and epidemic communicable diseases including diseases transmissible from animals to man, and the nutrition and physiologic problems of Arctic life.

Unobligated balance no longer available	238,768		
New obligational authority	12,811,700	13,256,000	14,275,000
New obligational authority:			
Appropriation	$12,640,000	$12,815,000	$14,275,000
Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	171,700		
Appropriation (adjusted)	12,811,700	12,815,000	14,275,000
Proposed supplemental due to pay increases		441,000	

This program is concerned with the identification of public health problems related to the environment and the development of preventive and control measures in supporting sanitary engineering activities of States and localities.

1. *Air pollution.*—This provides for research and technical assistance to study the effect of air pollution on man's health and welfare, and to develop effective methods of control. Public Health Service facilities as well as those of other public and private institutions and individuals through contracts and grants are utilized in carrying out the program. Technical assistance is provided State and local agencies upon request. The increase will be utilized in expanding research activities related to automotive exhaust studies.

2. *Water supply and water pollution control.*—Aid is provided in safeguarding public water supplies and protecting the quality of water resources, through grants to States and interstate agencies, collection of basic data, research, demonstrations, and technical assistance. In addition, training and consultative services are provided personnel from public agencies, and from industries. This activity also provides for enforcement against pollution of interstate waters, the development of plans for water supply and water pollution control on an interagency

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

river basin basis, and for the administration of grants for the construction of waste treatment facilities.

3. *Radiological health.*—Overall stimulation and direct assistance is provided to States and communities in the development of programs to protect the health of the public against radiation hazards. This includes research on public health techniques for control of such hazards; training of local, State, and Federal personnel; and collection, analysis, and dissemination of technical information. The increase proposed for 1960 will be used to (1) expand the epidemiological studies on the long-term effects of radiation on humans and animals and research on the public health significance of background radiation levels in the environment; (2) increase the number of technically competent public health workers in the field of radiological health through graduate training and short-course training; and (3) provide expanded on-the-spot technical consultation to States and communities in all phases of radiological health programs.

4. *Milk and food sanitation.*—Research is carried on to insure that new methods of milk and food processing and distribution will not be hazardous to the public health. Technical services are provided State and local agencies and industry through the certification of interstate milk and shellfish shippers, development and demonstration of methods, evaluation of laboratory techniques, and the presentation of research results.

5. *Interstate carrier and general sanitation.*—This implements the direct Federal responsibility for protecting the health of passengers aboard interstate carriers. It also provides for technical assistance to States on basic sanitation problems, including rural sanitation.

6. *Sanitary Engineering Center research services.*—This provides the supporting services and specialized technical skills required in common for the various research programs, as well as the maintenance and operating costs of the center.

Grants for Waste Treatment Works Construction

For payments under section 6 of the Water Pollution Control Act, as amended (33 U. S. C. 466e), [$45,000,000] *$20,000,000*, to remain available only until June 30, [1960: *Provided*, That allotments under such section 6 for the current fiscal year shall be made on the basis of $50,000,000] *1961. (Department of Health, Education, and Welfare Appropriation Act, 1959.)*

Appropriated 1959, **$45,000,000** Estimate 1960, **$20,000,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Grants for construction (total obligations)	$47,708,666	$49,670,242	$25,000,000
Financing:			
Unobligated balance brought forward	−12,378,908	−9,670,242	−5,000,000
Unobligated balance carried forward	9,670,242	5,000,000	
Appropriation (new obligational authority)	45,000,000	45,000,000	20,000,000

Grants are made to States, municipalities, and interstate agencies to stimulate and assist in the construction of sewage treatment works. Funds appropriated for such grants are allocated to States and Territories on the basis of population and economic need. Within these allocations, grants for the specific projects may not exceed 30% of the cost of a project or $250,000, whichever is smaller, with at least 50% of the funds appropriated reserved for communities of 125,000 population or less.

It is expected that by the end of 1960 the Federal Government and the States will have had an opportunity to act on the recommendation of the Joint Federal-State Action Committee that the States assume this function entirely. Therefore, it is anticipated that no funds will be included in the 1961 budget for sewage treatment works grants, should this recommendation be accepted as practicable by the Congress.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

GRANTS FOR HOSPITAL CONSTRUCTION—Continued

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Financing:			
Unobligated balance brought forward	−$86,082,937	−$76,336,388	−$97,400,000
Recovery of prior year obligations	−148,012		
Unobligated balance carried forward	76,336,388	97,400,000	65,000,000
Unobligated balance no longer available	1,053,561		
Appropriation (new obligational authority)	121,200,000	186,200,000	101,200,000

Federal funds are provided on a grant or loan basis to assist States and Territories, other public agencies, and nonprofit organizations in the construction of hospitals, rehabilitation facilities, diagnostic or diagnostic and treatment centers, nursing homes, public health centers, and related health facilities. In addition, these funds permit the Surgeon General to conduct research, experiments, and demonstrations relating to the effective development and utilization of hospital services, facilities, and resources, and to make grants-in-aid to States, political subdivisions, universities, hospitals, and other public and private nonprofit institutions or organizations for such projects.

Funds for construction are allocated to the States and Territories on a formula basis which takes into account population and per capita income. Federal participation varies from one-third to two-thirds. Payments are computed and made as construction progresses.

As of November 30, 1958, a total of 4,253 construction projects had been approved, of which 2,801 were completed and in operation, 1,168 under construction, and 284 in preconstruction stages. Upon completion, these projects will provide 182,650 hospital beds and 1,127 public health and other medical facilities. Of the approved projects 65% were for general hospitals, 3% for mental hospitals, 2% for tuberculosis hospitals, 3% for chronic disease hospitals, 3% for nursing homes, 16% for public health centers, 5% for diagnostic centers, 2% for rehabilitation centers, and 1% for State health laboratories.

Appropriation (adjusted)	1,498,600	1,600,000	1,604,000
Proposed supplemental due to pay increases		35,000	

Operations and technical services.—States and communities are assisted in making inventories of their hospitals, public health centers, and other classes of facilities, in determining the types of additional facilities required, and in developing coordinated programs, including planning and designing facilities, to meet the indicated needs. Proposed hospital and other health facilities projects are reviewed to determine eligibility and compliance with the law and regulations. State plans and their annual revisions are reviewed and approved. Project applications, plans and specifications, wage rates, contracts, and payment requests are reviewed for compliance with standards.

A total of 16 hospitals and 125 outpatient facilities are operated to furnish medical and dental care to legal beneficiaries of the Service. The major beneficiary groups are American seamen, coastguardsmen and their dependents, Bureau of Employees' Compensation cases, persons afflicted with leprosy, and narcotic addicts. Among these, the largest single category is the American seaman, for whom the Marine Hospital Service was established in 1798, and who receives free, comprehensive medical care in its facilities in the United States for all conditions. Medical care is also provided to foreign seamen and beneficiaries of other Federal agencies on a reimbursable basis.

1. *Operation of hospitals.*—This activity consists of 12 general hospitals, 1 tuberculosis hospital, 2 neuropsychiatric hospitals which specialize in the treatment of narcotic addiction, and the National Leprosarium at Carville, La.

Inpatient loads and outpatient visits are expected to be as follows:

AVERAGE DAILY PATIENT LOAD AND ANNUAL TOTAL OUTPATIENT VISITS

	1958 actual	*1959 estimate*	*1960 estimate*
Hospital patients, by type of hospital:			
General hospitals	2,743	2,710	2,724

Uniformed service dependents	163	199	199
All other	405	370	369
Total	5,282	5,280	5,274
Hospital outpatient visits	586,803	575,000	575,000

2. *Operation of outpatient clinics and offices.*—This activity consists of 26 full-time outpatient clinics and 99 outpatient offices, with 560,537 visits in 1958, and 545,000 estimated for 1959 and 1960. It also finances care of patients in contract hospitals.

3. *Operation of health units.*—The Service operates health programs for Federal agencies on a reimbursable basis. Consultative and related services are performed for Federal agencies relative to their employee health programs.

4. *Coast Guard medical services.*—Medical services are provided for Coast Guard personnel at shore stations and on vessels.

5. *Development and coordination of nursing resources.*—Methods are developed and applied to increase and improve nursing services and education throughout the country, and to better utilize nursing personnel skills; research is conducted on the fundamental problems of nursing, and research on nursing problems by independent investigators is stimulated.

6. *Nurse training grants.*—Grants are provided for traineeships to prepare nurses to be teachers, supervisors, and administrators under Public Law 911, approved August 2, 1956. This authorization expires June 30, 1959. Continuation is the subject of a legislative proposal for 1960.

7. *Personnel detailed to other agencies.*—Medical, dental, and other professional personnel are detailed to certain other Federal agencies on a reimbursable basis.

8. *Dependents' medical care.*—This activity provides funds for care in non-Public Health Service facilities for dependents of Public Health Service beneficiary members of the uniformed services. Direct care is provided for in activities 1 and 2 above.

9. *Payments to Hawaii.*—Grants are made to Hawaii to defray the cost of care and treatment of persons afflicted with leprosy. Average daily patient load is expected to be 292 in 1960.

FOREIGN QUARANTINE ACTIVITIES

For carrying out the purposes of sections 361 to 369 of the Act, relating to preventing the introduction of communicable diseases from foreign countries, the medical examination of aliens in accordance with section 325 of the Act, and the care and treatment of quarantine detainees pursuant to section 322 (e) of the Act in private or other public hospitals when facilities of the Public Health Service are not available, including insurance of official motor vehicles in foreign countries when required by law of such countries, [$4,108,000: *Provided*, That appropriations under this head for fiscal year 1958 are hereby made available for payment of overtime for the period July 1, 1957 to May 2, 1958 computed in accordance with administrative instructions issued November 4, 1957 by the Public Health Service, Division of Foreign Quarantine] *$4,460,000.*

[Section 364 (c) of the Public Health Service Act, as amended, is amended to read as follows:]

["(c) The Surgeon General shall fix a reasonable rate of extra compensation for overtime services of employees of the United States Public Health Service, Foreign Quarantine Division, performing overtime duties including the operation of vessels, in connection with the inspection or quarantine treatment of persons (passengers and crews), conveyances, or goods arriving by land, water, or air in the United States or any place subject to the jurisdiction thereof, hereinafter referred to as 'employees of the Public Health Service', when required to be on duty between the hours of 6 o'clock postmeridian and 6 o'clock antemeridian (or between the hours of 7 o'clock postmeridian and 7 o'clock antemeridian at stations which have a declared workday of from 7 o'clock antemeridian to 7 o'clock postmeridian), or on Sundays or holidays, such rate, in lieu of compensation under any other provision of law, to be fixed at two times the basic hourly rate for each hour that the overtime extends beyond 6 o'clock (or 7 o'clock as the case may be) postmeridian, and two times the basic hourly rate for each overtime hour worked on Sundays or holidays. As used in this subsection, the term 'basic hourly rate' shall mean the regular basic rate of pay which is applicable to such employees for work performed within their regular scheduled tour of duty."] (*Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Appropriated 1959, **$4,108,000** Estimate 1960, **$4,460,000**

Program and Financing

1. *Hospital health services.*—This activity finances hospitals, outpatient clinics, and tuberculosis sanatoria in the continental United States and Alaska for the care of Indians and Alaska natives. No change in the eligibility of Alaska natives is proposed as a result of Alaska statehood. Workloads are expected to be as follows:

NUMBER OF HOSPITALS, AVERAGE DAILY PATIENT LOAD (EXCLUDING NEWBORN), AND TOTAL OUTPATIENT TREATMENTS

	Number of hospitals	*1958 actual*	*1959 estimate*	*1960 estimate*
Inpatient load by type of hospitals:				
Continental United States:				
General hospitals	42	1,358	1,390	1,450
Tuberculosis hospitals	4	484	440	415
Alaska: General hospitals	8	731	725	735
Total	54	2,573	2,555	2,600
Outpatient visits (all hospitals)	--	574,235	606,000	640,000

2. *Contract patient care.*—Indian and Alaska native patients are hospitalized in non-Federal hospitals and are provided medical care by private physicians where Indian hospital or medical care facilities are not available. Patient loads in hospitals are estimated to be as follows:

AVERAGE DAILY CONTRACT PATIENT CARE LOAD

	1958 actual	*1959 estimate*	*1960 estimate*
By type of patient:			
General patients	372	465	465
Tuberculosis patients	475	335	325
Neuropsychiatric patients	219	250	260
Total	1,066	1,050	1,050

3. *Field health services.*—These include programs in sanitation, health education, nutrition, maternal and child health, school health, tuberculosis and other communicable disease control, medical social service, public health nursing, and oral health. The services are provided through health centers, clinics, and other field units operated directly by the Service, as well as through contractual arrangements with State and local health organizations, and university groups.

CONSTRUCTION OF INDIAN HEALTH FACILITIES—Continued

equipment for the hospitals at Shiprock, N. Mex., and Gallup, M. Mex., are also requested.

Planning funds are included for a hospital at San Carlos, Ariz.

Funds for construction of the hospital at Sells, Ariz., will be requested through a supplemental for 1959 proposed for later transmission.

2. *Personnel quarters.*—Construction of 36 permanent units is planned in 1960: 32 units in the Continental United States and 4 in Alaska.

3. *Alterations.*—Funds are included for alteration projects at several health facilities and planning of alteration projects at three hospitals (Cass Lake, Minn., Fort Defiance, Ariz., and Talequah, Okla.).

4. *Other plant facilities.*—This activity provides for utility projects such as replacement of sewer lines or electrical systems.

5. *Community hospitals serving Indians and non-Indians.*—Grants are made to communities for construction of hospital facilities in proportion to the ratio of Indians served to total beds.

Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	58,000		
Appropriation (adjusted)	14,084,000	28,974,000	28,974,000

The National Institutes of Health constitutes the primary research arm of the Public Health Service. It is made up of the following seven individual institutes each with responsibility for a particular disease category: National Cancer Institute, National Institute of Mental Health, National Heart Institute, National Institute of Dental Research, National Institute of Arthritis and Metabolic Diseases, National Institute of Allergy and Infectious Diseases, National Institute of Neurological Diseases and Blindness.

Operations of the institutes are divided between grant programs largely for support of research and for training of individuals, and activities performed directly or through contracts by the Service. A portion of the funds from each of the eight appropriations is pooled through a management fund to provide central services for all institutes.

A distribution of obligations for the National Institutes of Health by major activity follows:

[In thousands]

	1958 actual	*1959 estimate*	*1960 estimate*
Grants:			
Research projects	$99,954	$138,362	$142,410

Federal Reserve Bank of St. Louis

The above figures exclude amounts for construction and construction grants. They include grants for State-control programs for cancer, heart, and mental health which are administered by the Bureau of State Services, and funds for the coordination and development of dental resources which are administered by the Bureau of Medical Services.

The major activities shown in the table above are common to all institutes and are described below. The workload, where applicable, is shown under the appropriate institute together with an explanation of any unique activities.

Grants for research projects.—Grants are made to institutions and to individuals to undertake research projects in the medical and biological sciences. Grants are awarded by the Surgeon General on the basis of merit after review and recommendation by scientifically competent study groups and the appropriate national advisory council.

Research fellowships.—Grants are made to individuals in order to increase the research manpower in the medical sciences. There are several different types of awards such as predoctoral, postdoctoral, and part-time student research fellowships, each designed to develop research talent. Fellowships are reviewed by specialty boards and advisory councils and are awarded on the basis of merit.

Training grants.—Grants are made to institutions to develop or support training programs in the medical sciences and to individual trainees to enable them to undertake special training at an institution of their choice. Awards are made to both graduates and undergraduates. Both institutional and individual grants are awarded by the Surgeon General on the basis of merit after review by an appropriate advisory council.

Grants for State control programs.—Funds are provided to States and Territories on a formula basis for strengthening State and local clinical and educational services in the cancer, mental health, and heart disease areas.

Direct operations—Research.—The National Institutes of Health conduct research activities largely within the framework of the various specific institutes, directed to the disease categories represented thereby.

Review and approval of grants.—Applications for grants for research projects, fellowships, and training are reviewed for merit by panels of private professional and lay persons distinguished in the field of medical science. Staff of the National Institutes of Health provide the administrative support and executive direction for the national advisory councils and study sections.

Professional and technical assistance.—Professional guidance and leadership are provided to States and other interested organizations in the knowledge and application of research findings through the provision of consultative services, demonstrations, training, field studies and investigations of improved methodology.

Contracts.—In addition to research undertaken through grants and by National Institutes of Health staff, contracts are made with public and private organizations for directed research in cancer chemotherapy.

In addition to an appropriation for each program there is an appropriation for general research and services which finances activities not related to particular categories of disease.

The appropriation for general research and services finances the division of general medical sciences which administers research and training activities relating to basic problems in public health, medical, biological and chemical fields. It also finances the division of biologics standards which is responsible for the regulation of biologic products and the conduct of related research. The activities listed in the Program and financing schedule for the general research and services are described below.

1. *Grants*—(*a*) *Research projects.*—Funds for 1960 will support approximately 1,150 grants compared to 1,099 in 1959.

(*b*) *Research fellowships.*—Approximately 737 fellowships will be supported in 1959 and 1960.

(*c*) *Training.*—Approximately 170 research training programs will be in effect in 1959 and 1960 in the areas of basic biological, medical, and health related sciences, and in the specialties where acute shortages of research trained manpower exist. The experimental training grant program initiated in 1957 will continue in 1959 and 1960.

2. *Direct operations*—(*a*) *Biologics standards.*—Activities include administration of the Biologics Control Act, establishment of standards for preparation of biologics, testing of vaccines and their preparation, and research related to development, manufacture, testing and use of vaccines and analogous products.

National Cancer Institute

To enable the Surgeon General, upon the recommendations of the National Advisory Cancer Council, to make grants-in-aid for research and training projects relating to cancer; to cooperate with State health agencies, and other public and private nonprofit institutions, in the prevention, control, and eradication of cancer by providing consultative services, demonstrations, and grants-in-aid; [and to contract on a cost or other basis for supplies and services by negotiation, without regard to section 3709 of the Revised Statutes, in connection with the chemotherapy program, including indemnification of contractors to the extent and subject to the limitations provided in title 10, United States Code, section 2354, except that approval and certification required thereby shall be by the Surgeon General;] and to otherwise carry out the provisions of title IV, part A, of the Act; [$75,268,000] *$75,218,000. (42 U. S. C. 281–286; Department of Health, Education, and Welfare Appropriation Act, 1959.)*

Appropriated 1959, **$75,268,000** Estimate 1960, [a] **$75,218,000**

[a] Excludes $50,000 for activities transferred in the estimates to "Assistance to States, general." The amounts obligated in 1958 and 1959 are shown in the schedule as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Grants:			
(a) Research projects	$23,298,311	$28,632,000	$29,209,000
(b) Research fellowships	1,169,344	1,427,000	1,427,000
(c) Training	4,532,857	6,050,000	6,050,000
(d) State control programs	2,214,023	2,250,000	2,250,000
Total, grants	31,214,535	38,359,000	38,936,000
2. Direct operations:			
(a) Research	9,437,639	10,653,000	11,404,000
(b) Review and approval of grants	538,309	797,000	840,000
(c) Professional and technical assistance	2,641,789	4,504,000	5,532,000
(d) Chemotherapy contracts	11,102,569	18,142,000	18,142,000
(e) Administration	267,418	356,000	364,000
Total, direct operations	23,987,724	34,452,000	36,282,000
Total obligations	55,202,259	72,811,000	75,218,000
Financing:			
Comparative transfers to other accounts	251,801	50,000	
Unobligated balance no longer available	947,940	2,407,000	
Appropriation (new obligational authority)	56,402,000	75,268,000	75,218,000

1. *Grants—(a) Research projects.*—Funds for 1960 will support approximately 2,005 grants compared to 1,966 in 1959 and 1,409 in 1958.

(b) Research fellowships.—Approximately 615 fellowships will be supported in 1959 and 1960, compared to 462 in 1958.

(c) Training.—Grants are awarded to accredited schools for the improvement of instruction in the curriculum; clinical traineeships are awarded to individuals for postgraduate training in such fields as surgery, pathology, radiobiology, and internal medicine, and technician traineeships for specialized cytologic training; and grants are awarded to research training centers for individual traineeships. The following table summarizes these grants:

	1958 actual	*1959 estimate*	*1960 estimate*
Improvement of instruction	139	138	138
Clinical traineeships	165	165	165
Technician traineeships	30	85	85
Research training centers	33	55	55

(d) State control programs.—Funds are provided to States and Territories on a formula basis, to support activities such as consultation in the establishment of registries in cancer clinics, evaluation of diagnostic and therapeutic results, support of diagnostic and treatment clinics, and home nursing care for patients.

2. *Direct operations—(a) Research.*—Research is conducted in biochemistry, biology, biometry, epidemiology, chemotherapy, endocrinology, environmental cancer, pathology, physiology, radiation, and surgery.

(c) Professional and technical assistance.—Field studies and investigations are supported for the acquisition, development and application of new knowledge pertinent to the prevention, control and treatment of human cancer. Contracts are made with public and private nonprofit organizations for virus studies and diagnostic test development.

(d) Chemotherapy contracts.—In addition to chemotherapy activities undertaken through direct research and grants, contracts are made with public and private organizations and universities for directed research in cancer chemotherapy.

Program and Financing—Continued

	1958 actual	1959 estimate	1960 estimate
Financing:			
Comparative transfers to other accounts	$817,758	$35,000	
Unobligated balance no longer available	90,272	3,161,000	
New obligational authority	39,331,000	52,419,000	$52,384,000
New obligational authority:			
Appropriation	$39,217,000	$52,419,000	$52,384,000
Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	114,000		
Appropriation (adjusted)	39,331,000	52,419,000	52,384,000

1. *Grants*—(*a*) *Research projects.*—Funds for 1960 will support approximately 839 grants compared to 798 in 1959 and 615 in 1958.

(*b*) *Research fellowships.*—In 1958, 167 fellowships were provided and it is estimated that 280 can be provided in 1959 and 299 in 1960.

(*c*) *Training.*—In 1959, 609 training grants can be awarded, and 659 training grants in 1960. These include funds for about 2,500 traineeships. In 1958, 523 grants provided funds for 1,902 traineeships.

(*d*) *State control programs.*—Grants are made to States and Territories on a formula basis. These grants help to establish, improve, and administer statewide mental health programs, including development of community services at the local level; and the development of pilot projects and demonstrations in areas such as juvenile delinquency, mental illness, school mental health, alcoholism, aging, and industrial mental health.

2. *Direct operations*—(*a*) *Research.*—Laboratory and clinical research is conducted in neurochemistry, neurophysiology, psychology, neuropsychiatric studies, socio-environmental studies, and neuropharmacology (including narcotics and barbiturate addiction).

(*c*) *Training activities.*—Consultation is furnished to schools on modification of training procedures, techniques, and curriculum development, and for the inservice training of employees.

(*d*) *Professional and technical assistance.*—These operations consist of assistance to States in developing, and expanding local mental health programs through consultation services, and field studies in developing preventive and outpatient services; survey and development of special areas in mental health; consultation services for mental hospitals and related institutions and the psychopharmacology service center.

Current authorizations—Continued

NATIONAL HEART INSTITUTE—Continued

the area of cardiovascular diseases. Approximately 535 awards will be supported in 1960 as compared to 482 in 1959 and 434 in 1958.

(*c*) *Training.*—Grants in 1960 will provide assistance to 104 schools of medicine, osteopathy, and public health for support of undergraduate training. Funds will also provide for 200 grants for graduate research and clinical training including 985 traineeships. Funds for 1959 will provide for support of 102 undergraduate schools and for 182 graduate training grants, including 845 traineeships.

(*d*) *State control programs.*—Grants are made to States and Territories distributed on a formula basis. These grants are used to develop community services, epidemiological projects, and methods for applying new technical knowledge in reducing death and disability from heart diseases.

2. *Direct operations*—(*a*) *Research.*—Research emphasizes the acquisition of basic biochemical and physiological knowledge, and includes studies in new and improved therapeutic agents, diagnostic instrumentation, and clinical medicine on coronary artery disease, hypertension, arteriosclerosis, congestive heart failure, and related problems.

(*c*) *Training activities.*—Inservice training is provided for positions requiring unique combinations of cardiovascular training and experience.

(*d*) *Professional and technical assistance.*—Technical guidance and professional leadership are furnished to State and local health departments on heart program management in the fields of medicine, nursing, nutrition, medical social work, records and statistics, and program promotion.

1. *Grants*—(*a*) *Research projects.*—Funds for 1960 will support approximately 1,172 grants compared to 1,136 in 1959 and 746 in 1958.

(*b*) *Research fellowships.*—Approximately 259 fellowships, including 167 part-time awards, will be supported in 1959 and 1960, as compared to 232 fellowships in 1958.

(*c*) *Training.*—Funds for 1959 and 1960 will support approximately 158 and 166 grants, respectively, to training institutions to establish and improve programs to train teachers and clinical investigators in neurology, ophthalmology, and otology. Approximately 180 traineeships will be awarded to individuals for specialized postgraduate training in 1959 and 1960. The grants and traineeships were 137 and 112, respectively, in 1958.

2. *Direct operations*—(*a*) *Research.*—Research is being conducted on disorders of the brain, spinal cord and peripheral nerves, such as epilepsy, cerebral palsy, multiple sclerosis, apoplexy, and Parkinson's disease; on neuromuscular disorders, such as muscular dystrophy; and on visual and other sensory disorders, such as glaucoma, uveitis, cataract and hearing impairments.

(*c*) *Training activities.*—Support is given for in-service training of qualified staff members in subjects related to neurological and other sensory disorders.

Construction of Animal Quarters, Hamilton, Montana

For the construction of quarters at the Rocky Mountain Laboratory, Hamilton, Montana, for small animals, $150,000, to remain available until expended.

Estimate 1960, **$150,000**

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Construction and equipment (total obligations)			$150,000
Financing:			
Appropriation (new obligational authority)			150,000

Funds are provided for construction of facilities at Hamilton, Mont., for production of animals for laboratory research on allergy and infectious diseases. This building would replace inadequate temporary facilities. It is proposed to award the construction contract early in 1960. Construction time is estimated at 210 days.

The National Library of Medicine assists the advancement of science through the collection and exchange of medical and other scientific information. In addition to cataloging and indexing, the Library also publishes bibliographical guides and provides reference and research assistance.

The estimate for 1960 contemplates an increase for measures necessary for the maintenance and preservation of the book collection.

Proposed supplemental due to pay increases		406,000	

Public health methods and reports.—This program is primarily concerned with studies of public health practice, economics, and health trends. It includes (*a*) interpretation of data to evaluate health problems, to measure the available facilities, health personnel, supplies and organizations against those needs, and to provide a factual foundation for public health programs; (*b*) the national health survey to obtain information on the amount, distribution, and effects of illness and disability in the United States and the services received for such conditions, and the study of techniques for obtaining such statistical information with a view toward their continuing improvement; (*c*) the provision of advisory services to other government and nongovernment organizations; (*d*) staff services for the Surgeon General; and (*e*) publication of Public Health Reports, the official technical journal of the Public Health Service.

Construction (total obligations)		$6,500,000	
Financing:			
Appropriation (new obligational authority)		6,500,000	

An appropriation of $6,500,000 was made in 1959 for assistance in the construction of hospital facilities for the care and treatment of Alaskan mentally ill. There is contemplated the construction of a central hospital of about 225 beds in Anchorage and smaller acute treatment units of 30 and 20 beds each in Fairbanks and Juneau. In addition, 1- or 2-bed brief-care units, with facilities for the administration of preventive and outpatient services, will be provided in general hospitals in strategic areas.

[GRANTS AND SPECIAL STUDIES, TERRITORY OF ALASKA]

[To enable the Surgeon General to conduct, in the Service, and to cooperate with and assist the Territory of Alaska in the conduct of, activities necessary in the investigation, prevention, treatment, and control of diseases, and the establishment and maintenance of health and sanitation services pursuant to and for the purposes specified in sections 301, 311, 314 (without regard to the provisions of subsections (d), (f), (h), and (j) and the limitation set forth in subsection (c) of such section), 361, 363, and 371 of the Act, including the hire, operation, and maintenance of aircraft, and the purchase, erection, and maintenance of portable buildings, $2,165,000.] (*Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Appropriated 1959, **$2,165,000**

NOTE.—Estimate of $64,000 has been transferred in the estimates to "Assistance to States, general," and $487,000 to "Communicable disease activities." The amounts obligated for this purpose in 1958 and 1959 are shown in the schedules as comparative transfers.

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Special grant for general health	$638,000	$638,000	
2. Special grant for mental health	1,000,000	1,000,000	
Total obligations	1,638,000	1,638,000	
Financing:			
Comparative transfers to other accounts	534,585	551,000	
Unobligated balance no longer available	3,815		
New obligational authority	2,176,400	2,189,000	
New obligational authority:			
Appropriation	$2,165,000	$2,165,000	
Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	11,400		
Appropriation (adjusted)	2,176,400	2,165,000	
Proposed supplemental due to pay increases		24,000	

This program was initiated to supplement public health services in Alaska to meet the needs of an expanding population and settlement of new areas. The grant programs in Alaska are now being consolidated in a fund which is to be administered by the President, pending the full assumption of these responsibilities by the State of Alaska.

This fund is used to provide canteen items for sale to patients at Fort Worth, Tex., and Lexington, Ky., hospitals (57 Stat. 617). Proceeds of sales are available for replenishing stock and operating expense. The capital investment consists of $10,000 appropriated in 1944 and $1,715 of donated assets. Earnings are retained to meet possible future losses.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Commodities for sale	$17,765	$17,589	$17,444	$17,994

Total financing	19,567,246	22,235,000	22,929,000

The National Institutes of Health management fund was established to facilitate the conduct of operations of the National Institutes of Health which are financed by two or more appropriations. The activities of the fund are financed primarily from advances and reimbursements from the several institutes. Formulas for determining the contribution from each institute are designed to reflect utilization of services performed by the management fund. Taken into consideration are such factors as use of beds in the clinical center, number of laboratory workers, total personnel, and dollar level of grant or direct operations funds obligated by the institute. A small portion of the funds comes from reimbursements from outside sources, principally cafeteria receipts, and some miscellaneous reimbursements from other Government agencies. The 1960 estimate for these activities holds substantially to the 1959 level of service operations.

The centralized organizations of the National Institutes of Health provide supporting services to all programs as follows:

1. *Research supporting services* provide the central administration and operation of services for the conduct of research activities such as the care and breeding of experimental animals, laboratory equipment design and manufacture, and the operation and maintenance of utility services.

2. *Clinical supporting services* consist of the operation of the 516-bed clinical center together with the laboratory space required for the treatment of research patients.

3. *Business operations* provide the business management and plant safety services including financial management, personnel, supply management, transportation, and housekeeping services.

4. *Program direction* provides for the executive direction of research activities and fosters the extramural research and other activities.

5. *Research planning* provides for advice on the development, installation, and maintenance of the intramural research program and the relationship with related research programs and develops analyses related to the Nation's total medical research resources.

6. *Review and approval of grants* consists of the central administration of the research grant programs through the review of grant applications for eligibility and the formulation of policies and procedures governing the administration of the research grant and fellowship programs.

7. *The cafeteria* of the clinical center is operated by the nutrition department and furnishes meals for sale to employees and visitors at rates sufficient to cover the cost thereof. Income and expenses for 1958, 1959, and 1960 are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Income from cafeteria sales	$362,628	$400,000	$400,000

SERVICE AND SUPPLY FUND

This fund finances the providing of certain supplies, services, and equipment to programs of the Service. It is reimbursed from the appropriations supporting the programs benefited (42 U. S. C. 231).

Budget program.—The principal operations under the fund are carried out at (*a*) the medical supply depot at Perry Point, Md., which maintains stocks of drugs and other medical supplies to meet in part the requirements of the Service and requisitions of other Government organizations; and (*b*) the central supply activities at the National Institutes of Health which maintain stores of scientific and other general-use materials and supplies for the laboratories and offices at Bethesda, Md. In contrast to the operations under this revolving fund, the "National Institutes of Health management fund" is an annual account to which appropriated funds are advanced to facilitate the financing of clinical research, research services, administration, and other activities where the costs of operation are not readily susceptible of distribution.

Operating results.—Retained earnings amounted to $135,827 as of June 30, 1958, and are being retained in the fund against the possibility of future losses.

WORKING CAPITAL FUND, NARCOTIC HOSPITALS

Farms and other industries operated at the Fort Worth, Tex., and Lexington, Ky., narcotic hospitals provide patients with occupational outlets as a part of their therapeutic rehabilitation. Useful products are made for sale to the hospitals and other Government institutions (42 U. S. C. 258). The investment of the United States Government at the end of 1960 is estimated at $512,859, including $134,300 in appropriation and $65,383 in donated assets. Earnings are retained to meet possible future losses.

PUBLIC HEALTH SERVICE—Continued

Proposed for later transmission—Continued

CONSTRUCTION OF INDIAN HEALTH FACILITIES—Continued

Under existing legislation, 1959.—Funds appropriated for construction of a new Indian hospital at Sells, Ariz., were reprogramed to support increased costs of other projects, since the absence of an adequate supply of water forced a delay in the Sells project. Water has now been located and funds currently available will finance its development as well as plans for the hospital. It is anticipated that invitations to bid may be issued by May 1, 1959. A supplemental appropriation of $1,886,000 is anticipated to provide construction and equipment of the 50-bed hospital and 34 quarters units.

SAINT ELIZABETHS HOSPITAL

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the maintenance and operation of the hospital, including [purchase of one passenger motor vehicle,] clothing for patients, and cooperation with organizations or individuals in the scientific research into the nature, causes, prevention, and treatment of mental illness, [$3,154,000] *$3,715,000. (24 U. S. C. 161–221; Department of Health, Education, and Welfare Appropriation Act 1959.)*

Appropriated 1959, ° **$3,186,000** Estimate 1960, **$3,715,000**

° Includes $32,000 appropriated in Supplemental Appropriation Act, 1959.

Saint Elizabeths Hospital provides care and treatment for the mentally ill who are either beneficiaries of the Federal Government or residents of the District of Columbia which reimburses the hospital for its residents.

1. *Operation and maintenance of hospital.*—This major activity covers care and treatment of the mentally ill, research on the causes, prevention, and treatment of mental illness, maintenance of hospital buildings, procurement of supplies and materials, and administrative services.

Actual and estimated average daily patient load is as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Federal beneficiaries	1,833	1,860	1,880
District of Columbia residents	5,132	5,095	5,040
Total	6,965	6,955	6,920

2. *Operation of farm.*—The hospital farm provides occupational therapy benefits for patients. The value of produce usually exceeds the cost of operation.

3. *Operation of cafeteria.*—The hospital is authorized to operate a cafeteria for employees and others, and to sell meals at not less than cost. Proceeds are credited to the appropriation.

4. *Training program.*—The training program provides a source for medical and nursing staff recruitment by training interns, residents in psychiatry, student nurses, and other groups concerned with care and treatment of psychiatric patients. The numbers of trainees are as follows:

	1958 actual	*1959 estimate*	*1960 estimate*
Interns and other postgraduates	47	62	62
Student nurses	82	90	90

Federal Reserve Bank of St. Louis

1. *Building repairs and improvements.*—Funds requested in 1960 will provide for (*a*) replacement of guttering and repairs to roofing on two patient buildings, (*b*) replacement of elevators in the Charles H. Nichols Building, and (*c*) a survey to determine feasibility and cost of installing automatic sprinkler system in certain patient buildings.

2. *Ground maintenance and improvements.*—Funds are requested for the resurfacing of certain roads within the hospital grounds.

3. *Utility facilities, repairs, and improvements.*—Funds are requested in 1960 to provide for (*a*) rewiring and extension of electrical facilities in certain patient buildings, (*b*) replacement of electric feeders to buildings on the east side of the hospital grounds, and (*c*) repairs to roadbed and tracks for the hospital locomotive.

SOCIAL SECURITY ADMINISTRATION

Current authorizations:

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

(Trust fund)

For necessary expenses, *including the purchase of two passenger motor vehicles,* not more than [$133,300,000] *$191,600,000* may be expended from the Federal old-age and survivors insurance trust fund: *Provided,* That such amounts as are required shall be available to pay the cost of necessary travel incident to medical examinations for verifying disabilities of individuals who file applications for disability determinations under title II of the Social Security Act, as amended. *Provided further, That $10,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes as amended (31 U. S. C. 665), only to the extent necessary to process claims workloads not anticipated in the budget estimates and after maximum absorption of the costs of such claims workload within the existing limitation has been achieved: Provided further, That this authorization shall be available for research and development of electronic or automatic equipment, by contract, which shall be coordinated with similar activities and requirements of other Government agencies: Provided further, That any such contract shall contain appropriate provisions to protect the interest of the Government and the public, including provisions relating to the disposition of rights in any inventions made or developed in the course of work under the contract:*

[The amount authorized by the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1959, to be expended from the Federal old-age and survivors insurance trust fund for necessary expenses, is increased by $5,831,000:] *Provided further,* That persons who have been admitted to practice before a Federal or State court of record who have had a minimum of three years' experience in the adjudication or consideration of claims for retirement, survivors, or disability benefits may be temporarily appointed by the Commissioner of Social Security to hold hearings under title II of the Social Security Act, as amended, but such temporary appointments shall terminate not later than December 31, [1959] *1960: Provided further,* That no person shall hold a hearing in any case with which he has been concerned previously in the administration of such title II.

Advances to States, next [suceeding] *succeeding* fiscal year: For making, after May 31 of the current fiscal year, advances to States under section 221 (e) of the Social Security Act, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary from the above authorization may be expended from the Federal old-age and survivors insurance trust fund. *(42 U. S. C. 401–425; Department of Health, Education, and Welfare Appropriation Act, 1959; Supplemental Appropriation Act 1959.)*

1959 limitation available in 1958	−607,311	607,311	
Unobligated balance no longer available	243,263		
Limitation	144,085,000	139,131,000	191,600,000
Proposed increase in limitation due to pay increases		11,295,000	

The old-age, survivors, and disability insurance program provides protection to over 90% of the persons in the labor force and their families against the loss of earnings because of old-age, disability, and death. Tax contributions from employees (including members of the Armed Forces of the United States), employers (including Federal, State, and local governments as employers of covered workers), and the self-employed, are deposited in the Federal old-age and survivors insurance and Federal disability insurance trust funds, out of which benefit payments and administrative costs are paid.

The 1958 amendments to the Social Security Act (Public Law 85–840) approved August 28, 1958, provided larger benefits to present and future beneficiaries of the program; extended monthly benefits to dependents of disabled workers; revised eligibility requirements for disability benefits, parents' benefits, and childhood disability benefits; increased the tax contribution rate; and made various technical changes to the law. The effect of the 1958 amendments is to sharply increase the work to be received by the Bureau of Old-Age and Survivors Insurance in 1959. To process this added work, a supplemental request in the amount of $23,106,000 is proposed for later transmission. The volume of work appearing under the activities below includes the estimated additional receipts due to the amendments; however, the figures shown for 1959 in the program and financing schedule do not provide for financing this additional work.

1. *Maintenance of earnings accounts.*—Eligibility for insurance benefits and the amount of benefit payments are based on lifetime earnings records of individuals maintained by the Bureau. The volume of earnings record work depends primarily on the level of employment. An upturn in the economic situation is forecasted for 1959 and continuing into 1960. The 1960 estimate reflects this expected increase in employment and consequently, an increase in the number of items reported.

	1958 actual	*1959 estimate*	*1960 estimate*
Earnings items:			
Received	254,024,863	254,559,000	267,539,000
Processed	249,189,529	254,559,000	272,374,334

2. *Processing old-age and survivors insurance claims.*—Prospective beneficiaries file claims in district offices located in almost 600 cities throughout the country. When a claim is approved the Treasury Department is authorized to issue benefit checks. The 1959 estimated workload is only slightly lower than the 1958 receipts because the initial impact of the 1958 amendments in 1959 almost equals the increase in the 1958 receipts stemming from the economic recession. The claims estimate for 1960 reflects a return to a more normal level of work.

	1958 actual	*1959 estimate*	*1960 estimate*
Old-age and survivors insurance claims:			
Received	2,678,598	2,657,000	2,483,000
Processed	2,699,300	2,650,500	2,507,350

3. *Maintenance of old-age and survivors insurance beneficiary rolls.*—The beneficiary rolls require continuing maintenance so that benefit checks may be mailed promptly each month to beneficiaries whose entitlement continues, and so that checks may be discontinued when entitlement ceases. The number of benefits in current pay status increased sharply in 1958, reflecting the heavy volume of claims awarded. The number of benefits in current pay status in 1959 will continue to grow at a high rate consistent with the high claims workload, while the estimate for 1960 reflects the return to a lower level of normal long-term growth of the program. Benefit payments will continue to rise with the increasing number of beneficiaries and the higher benefit amounts provided in the 1958 amendments.

	1958 actual	*1959 estimate*	*1960 estimate*
Old age and survivors insurance benefits in current pay status at end of year	11,704,913	12,806,000	13,635,000
Old age and survivors insurance benefit payments (in millions)	$7,875	$9,060	10,025

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

4. *Processing disability claims and maintaining beneficiary rolls.*—All disability claims are received in the Bureau's district offices. The determination of the existence of a disability is made in most cases by State agencies and is subject to review by the Bureau to assure uniform administration among States. In addition, the Bureau has the function of maintaining the beneficiary rolls for disabled beneficiaries.

The 1958 amendments provide for the first time for the payment of benefits to dependents of disabled workers. In addition they liberalize the work requirements, necessary for initially establishing eligibility. The revisions in the law will bring in 1959 a sharply increased rate of claims filings over that which would otherwise have existed and will continue in 1960. The number of disabled beneficiaries receiving monthly benefits will more than triple from June 30, 1958, to June 30, 1960.

	1958 actual	*1959 estimate*	*1960 estimate*
Disability claims:			
Received	447,948	490,000	425,000
Processed	459,121	494,531	438,450
Disability dependents claims:			
Received		170,000	83,000
Processed		163,800	86,400
Disability benefits in current pay status at end of year	200,375	470,000	642,000
Disability benefit payments (in millions)	$168	$387	$485

5. *Hearings and appeals.*—Individuals whose claims are disallowed have the right to appeal. In 1958 the Bureau handled the peak of disability claims loads arising as a result of the 1956 amendments. The effect of the Bureau's 1958 peak loads on the appeals process is reflected in the high receipts and sizeable pending load of the appeals council for 1959. Anticipating this peak steps were taken sometime ago to expand the staff of appeals council referees. It is expected that the larger staff will soon be producing more work than it receives and thus reduce the present high backlog. However, receipts of new appeals will continue heavy in 1960 as a result of the increased claims filings in the Bureau stemming from the 1958 amendments and a normal in processed load will not be achieved until late in 1960.

	1958 actual	*1959 estimate*	*1960 estimate*
Appeals cases:			
Received	18,594	22,155	25,145
Processed	13,254	25,100	31,880

6. *Actuarial services.*—Actuarial studies and estimates are prepared for long-range program planning.

7. *Administration.*—This activity includes executive direction, divisional management, program planning work, and housekeeping services. Moderate increases are planned to keep pace with the increased staff service needs as a result of larger workloads.

8. *Contingency reserve.*—Beginning in 1960 additional funds are recommended should the claims workload be greater than that specified above.

Limitation	5,710,000		

Ground was broken and construction got underway in the fall of 1957. Completion date is expected by February 1960. It is estimated that construction will be approximately 70% complete by the end of 1959. The Bureau plans to move into the building at the earliest practicable date after completion.

Because of major amendments to the Social Security Act since 1953 when space requirements were formulated, the building will be too small to house the Bureau's Baltimore operations. Therefore, an addition is being planned which will be financed by savings from funds in the current limitation plus supplemental funds of $1,300,000 in 1959 which are shown under Proposed for later transmission.

Grants for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled are made to States that have plans for these programs approved by the Department of Health, Education, and Welfare. Fifty-three jurisdictions including all the States, the District of Columbia, Hawaii, Puerto Rico, and the Virgin Islands have approved plans for old-age assistance, aid to dependent children, and aid to the blind; 48 jurisdictions have approved plans for aid to the permanently and totally disabled.

The Social Security Amendments of 1958, effective October 1, 1958, increased the Federal contributions to assistance expenditures for each of the four federally-aided programs. With the exception of Puerto Rico, the Virgin Islands, and Guam, the Federal Government will continue to provide four-fifths of the first $30 per recipient for old-age assistance, aid to the blind, and aid to the permanently and totally disabled, and fourteen-seventeenths of the first $17 per recipient for aid to dependent children. For the balance of expenditures in which the Federal Government will participate, the Federal share, previously 50%, will vary among States from 50% to 65%, depending upon variations in average per capita income. Under the amendments, the new maximum amounts of assistance subject to Federal financial participation are related to the average monthly expenditure per recipient, and cover both money payments to recipients and payments to vendors for medical and remedial care. Previously, payments to suppliers for medical care were matched separately from money payments to recipients, except in a few States that chose to apply the same formula and a single maximum to combined expenditures for money and vendor medical payments.

Prior to October 1, 1958, maximums for Federal financing, which related to each individual monthly payment to each recipient, were $60 for the adult categories and for aid to dependent children, $32 each for the first child and the adult caring for the child, and $23 for each additional child in the family. In addition, the maximum matchable amounts for vendor medical payments, related to average expenditures per recipient, were $6 per adult recipient and $3 per child recipient; the Federal share of vendor medical payments was 50% in all jurisdictions using the provision for separate matching of such payments. The new average maximums which cover both money payments

Federal Reserve Bank of St. Louis

and vendor payments are $65 per recipient for the adult categories and $30 per recipient for aid to dependent children.

In addition, the 1958 amendments extend, for the first time, Federal participation in public assistance programs to Guam on a basis similar to Puerto Rico and the Virgin Islands. Total Federal expenditures in Guam are not to exceed $400,000 in any year. The amendments raised limitations on the total annual Federal payments for public assistance in Puerto Rico and the Virgin Islands to $8,500,000 and $300,000, respectively, and revised limitations on matchable expenditures to which the Federal Government contributes 50% to relate to average expenditures per recipient as in other jurisdictions but at lesser amounts ($35 per recipient for the adult categories and $18 per recipient for aid to dependent children).

Certain amendments to the provisions for the program of old-age, survivors, and disability insurance will also affect public assistance costs. These amendments include those (1) increasing benefit amounts for all present and future beneficiaries; (2) providing benefit payments for wives, dependent husbands, and children of disability insurance beneficiaries; (3) providing benefit payments for the dependent parent of a deceased worker even though a widow, dependent widower, or child survived the worker; (4) providing payment of benefits to a disabled adult child of deceased workers or retired beneficiaries without requiring proof of dependency; and (5) providing certain liberalizations for disabled workers. These amendments to the old-age, survivors, and disability insurance program are expected to result in a decrease in the Federal share of public assistance costs amounting to about $12,200,000 for the last 3 quarters in 1959 and $22,000,000 in 1960.

For 1960, the total amount of Federal, State, and local expenditures for assistance and administration is estimated at $3,523,600,000, of which $2,051,000,000 represents the Federal share. The appropriation request of $2,033,500,000 is $17,500,000 less than the estimated Federal share, because the States will have available for expenditures $17,500,000 representing the Federal share of collections and adjustments for prior years. Of the total Federal share, $1,167,400,000 is for old-age assistance, $654,800,000 for aid to dependent children, $50,900,000 for aid to the blind, and $177,900,000 for aid to the permanently and totally disabled.

It is anticipated that a supplemental appropriation of $168,400,000 will be required for 1959 which is shown under Proposed for later transmission. Of the supplemental amount, $42,900,000 is due entirely to larger than anticipated caseloads for aid to dependent children and $125,500,000 to the net combined effect of the 1958 amendments to the public assistance and old-age, survivors, and disability insurance programs. The gross cost of the public assistance amendments in the last 3 quarters of the year would be $137,700,000; the old-age, survivors, and disability insurance amendments, however, are expected to decrease these costs by $12,200,000.

The increase of $58,700,000 for 1960 over 1959 is accounted for by $21,200,000 rise in Federal costs in 1960 which was anticipated under Federal provisions in effect before October 1, 1958, as a result of increases in average payments, number of recipients, and administrative costs; by $37,500,000 covering the combined net effect of the public assistance and old-age, survivors, and disability insurance amendments, which will be in operation the full year in 1960 compared with 3 quarters of 1959. It is estimated that the public assistance amendments will add approximately $47,300,000 to Federal costs in 1960 compared with 1959 and that the larger effect of the old-age, survivors, and disability insurance amendments in 1960 will reduce these costs by about $9,800,000.

The figures for 1959 used in the tables appearing under the activities below include the supplemental of $168,400,000; the figures shown in the program and financing schedule include only the $1,806,400,000 already appropriated.

1. *Payments to recipients*—(*a*) *Old-age assistance.*—The average number of recipients per month for 1960 is estimated at 2.1% fewer than was estimated for 1959. The estimated average monthly payment is $1.60 more than the estimate for 1959.

	1958 actual	*1959 estimate*	*1960 estimate*
Average number of recipients per month	2,481,954	2,442,100	2,390,000
Average monthly payment	$60.38	$64.25	$65.85
Total expenditures for assistance (Federal, State, and local)	$1,798,374,143	$1,882,900,000	$1,888,600,000
Federal share	$1,002,076,981	$1,094,600,000	$1,108,500,000

(*b*) *Aid to dependent children.*—The average number of persons to receive assistance per month for 1960 is 0.7% higher than is estimated for 1959. The estimated average monthly payment per person is $0.45 more than the estimate for 1959.

	1958 actual	*1959 estimate*	*1960 estimate*
Average number of recipients per month:			
Families	679,476	764,000	770,000
Children	1,945,244	2,188,000	2,204,000
Persons	2,541,959	2,860,000	2,880,000
Average monthly payment per person	$26.72	$28.00	$28.45
Total expenditures for assistance (Federal, State, and local)	$815,195,939	$961,000,000	$983,000,000
Federal share	$486,997,394	$583,400,000	$599,500,000

(*c*) *Aid to the blind.*—The average number of recipients per month for 1960 is estimated at 0.7% more than was estimated for 1959. The estimated average monthly payment is $1.60 more than the estimate for 1959.

	1958 actual	*1959 estimate*	*1960 estimate*
Average number of recipients per month	108,264	108,800	109,600
Average monthly payment	$65.73	$69.25	$70.85
Total expenditures for assistance (Federal, State, and local)	$85,396,735	$90,400,000	$93,200,000
Federal share	$41,082,667	$45,400,000	$47,300,000

(*d*) *Aid to the permanently and totally disabled.*—The average monthly number of recipients is estimated to be 7.1% more than for 1959. The estimated average payment for 1960 is $2.05 more than that for 1959. The estimates cover costs under the presently approved plans for 48 jurisdictions.

	1958 actual	*1959 estimate*	*1960 estimate*
Average number of recipients per month	295,056	336,000	360,000
Average monthly payment	$59.93	$64.65	$66.70
Total expenditures for assistance (Federal, State, and local)	$212,209,016	$260,700,000	$288,100,000
Federal share	$111,661,922	$143,900,000	$160,700,000

2. *State and local administration.*—The grants to States include 50% of the administrative costs that are found by the Department of Health, Education, and Welfare to be necessary for the proper and efficient administration of the State public assistance programs. The Federal share contributes toward the salaries and expenses of about 53,000 State and local personnel.

Total costs in 1960 are estimated at $20 million more than in 1959; $10 million of this will come from Federal funds. The increases in costs are attributable primarily to (1) salary rises given to keep pace with rising living costs and to compete successfully with other professions and agencies for staff and (2) staff increases, to provide services to recipients directed toward self-care, self-support, and strengthened family life.

The Bureau administers Federal grants to States for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled. During 1960 emphasis will be given to improving administration of the programs and the provision of welfare services and medical care for the needy people served by them.

1. *Program policies and standards.*—Interpretive statements, other written materials and specialized technical assistance are provided to assist State agencies.

2. *Review State plans and grants, evaluate State operations.*—This involves analyzing and approving State plans and amendments thereto; making grants; reviewing State and local operations to insure proper expenditure of Federal funds and conformity with Federal requirements; and providing general consultative services to State agencies to improve administration and quality of service.

3. *Collect and interpret statistics.*—Information developed cooperatively with State agencies is used by the Bureau and the States in formulating policies, planning program content, setting standards, justifying appropriation requests, making legislative recommendations, and guiding administrative action.

Federal Reserve Bank of St. Louis

The Bureau investigates and reports on the health and welfare of children and administers grants to the States for extending and improving maternal and child health services, crippled children's services, and child welfare services.

1. *State and local health services for children.*—Policies and requirements for State maternal and child health and crippled children's programs are developed; State plans are reviewed and approved; consultative services are given to State agencies, other public and voluntary agencies and organizations, and educational institutions engaged in training professional personnel; and guides and recommendations are prepared on the provision of child health services.

2. *State and local social services for children.*—The same approach is used for child welfare services as for child health services.

3. *Technical assistance to States and communities for juvenile delinquency programs.*—Consultation is given to States, communities, and organizations, both public and voluntary, on standards and methods for care and treatment of juvenile delinquents, on content of State or local programs, and on problems of organization and coordination on a statewide or local basis; assistance is given to State agencies and educational institutions in planning for training of professional and nonprofessional personnel in the field of juvenile delinquency.

4. *Research in child life and services for children.*—Studies on child health and welfare, particularly social and economic problems are conducted, and the programs and services for children are evaluated. The results are interpreted to the public through pamphlets and bulletins.

5. *Information for parents and others working with children.*—Publications are prepared and distributed on child health and welfare services. Upon request, assistance is given to States in interpreting their child health and welfare programs. Free distribution of the Bureau's popular publication, *Infant Care*, will total approximately 1,200,000 in 1959. An increase is requested for 1960 to meet the expected demand for this and other Bureau publications.

Every 10 years since 1909 the President has called a White House Conference on Children and Youth. These conferences are joint undertakings of the Government, States, Territories, voluntary organizations and individual citizens. The 1959 appropriation provided for conference planning. The 1960 request will provide for completion of the planning and for holding the conference.

SOCIAL SECURITY ADMINISTRATION—Continued

Current authorizations—Continued

GRANTS TO STATES FOR MATERNAL AND CHILD WELFARE—Con.

The States are required to match one-half of the amounts appropriated for maternal and child health services and crippled children's services, and the remaining funds are distributed to the States in proportion to their financial need. Under the 1958 Social Security Amendments (Public Law 85–840) the States are required to match all appropriated funds for child welfare services, but the percent of matching required varies in accordance with per capita income from 33⅓ to 66⅔. The amendments also increased the amounts authorized to be appropriated for each program by $5 million.

1. *Maternal and child health services.*—Grants are provided to States for the extension and improvement of health services for mothers and children, especially in rural areas.

2. *Crippled children's services.*—Grants are made to States to extend and improve services for crippled children including medical, surgical, corrective, and other care, especially in rural areas. A supplemental appropriation of $1,500,000 in 1959 for services to children with congenital heart disease is anticipated under Proposed for later transmission.

3. *Child welfare services.*—Grants aid States to establish, extend, and strengthen child welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent, and for the return of runaway children to their homes in other States. The 1958 Social Security Act Amendments to the child welfare provisions eliminated the reference to rural areas and other areas of special need thus making services and Federal funds available to urban children on the same basis as for rural children.

GRANTS FOR SOCIAL SECURITY TRAINING AND STUDIES

For grants to States for increasing the number of adequately trained public welfare personnel, pursuant to section 705 of the Social Security Act, as amended (42 U. S. C. 906), and for making grants, contracts, and jointly financed cooperative arrangements for research or demonstration projects pursuant to section 1110 of said Act, as amended (42 U. S. C. 1310), including necessary expenses of Federal administration, $1,785,000, of which $1,000,000 shall be grants under said section 705.

Estimate 1960, **$1,785,000**

Program and Financing

Program by activities:			
1. Training			$1,000,000
2. Cooperative studies			700,000
3. Administration			85,000
Total obligations			1,785,000
Financing:			
Appropriation (new obligational authority)			1,785,000

The Social Security Act amendments of 1956 had as one of its stated objectives assistance to individuals in attaining self-support and self-care. It is proposed to achieve this objective through increasing the number of adequately trained State and local public welfare personnel and by conducting jointly financed cooperative studies in social security.

1. *Training.*—The budget request will permit increasing the number of adequately trained personnel in 1960 by providing for approximately 350 fellowships and traineeships. Provision is also made for special short-term courses of study or seminars to provide opportunities for State and local staff administering the public assistance programs and for a few teaching grants.

2. *Cooperative studies.*—Grants, contracts, and jointly financed cooperative arrangements will be made with States, public, and nonprofit organizations for the conduct of studies in social security. The budget request will finance the initiation of approximately 30 studies ranging in the amount of award from $10,000 to $50,000.

3. *Administration.*—The Federal cost of administering these two activities is provided for herein.

The Office of the Commissioner directs and coordinates the social security program; and performs basic research covering the broader phase of social security.

1. *Direction and coordination of the social security program.*—This consists of (*a*) formulation of administrative policies; (*b*) certification of compliance of State laws, plans, and operations with Federal requirements and approval of grants to States; (*c*) coordinating interprogram activities; and (*d*) review of administrative management throughout the Social Security Administration.

2. *Appraisal and development of the social security program.*—Provision is made for (*a*) basic studies beyond the immediate scope of any bureau; (*b*) review and coordination of research and statistics work in the Administration; and (*c*) the development of ways of improving economic security through social insurance and related measures.

Federal credit unions are privately owned, cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident or productive purposes, authorized by the Federal Credit Union Act (act of June 26, 1934) as amended to July 31, 1956 (ch. 14, U. S. C. 12).

The Bureau finances its activities out of fees charged for services performed. Additional working capital was provided in 1954 by the appropriation of an interest-bearing loan of $250,000. It is estimated that this loan will be repaid by the end of 1960.

The Bureau's activities consist of: (1) Chartering new Federal credit unions; (2) supervising established Federal credit unions; (3) making periodic examinations of their financial condition and operating practices; and (4) administrative services. Data relating to activities are shown below.

	1958 actual	*1959 estimate*	*1960 estimate*
Number of Federal credit unions chartered	617	660	660
Number of regular examinations	8,618	9,283	9,643
Number of operating Federal credit unions as of December 31 of the previous calendar year	8,735	9,095	9,455
Assets of Federal credit unions as of December 31 of the previous calendar year	$1,788,768,332	$2,089,690,799	$2,417,248,772

6. *Relation of costs to obligations.*—The relationship is derived by year-end balances of selected resources as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year:				
Deferred charges	$1,704	$1,466		
Unpaid undelivered orders	2,639	10,373	$5,000	$5,000
Total selected resources at end of year	4,343	11,839	5,000	5,000
Selected resources at start of year (−)		−4,343	−11,839	−5,000
Costs financed from obligations of other years, net (−)			−6,839	
Obligations incurred for costs of other years, net		7,496		

Operating results.—Fees from receipts cover the costs of operations. Retained earnings are expected to show an increase to $675,648 through 1960.

Proposed for later transmission:

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

Under existing legislation, 1959.—A $23,106,000 increase in the Limitation on salaries and expenses, Bureau of Old-Age and Survivors Insurance, is anticipated in 1959 to process the increased workloads resulting from enactment of Public Law 85–840, the Social Security Amendments of 1958.

LIMITATION ON CONSTRUCTION, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

Under existing legislation, 1959.—An addition to the building now being constructed in Baltimore County, Md., is needed because of increased requirements unforeseen when space arrangements were formulated. A supplemental estimate is anticipated to increase the existing limitation by $1,300,000. This amount, when added to the unobligated funds under the existing limitation, will provide for the addition.

GRANTS TO STATES FOR PUBLIC ASSISTANCE

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
State expenditures:			
Payments to recipients:			
(a) Old age assistance		$84,700,000	
(b) Aid to dependent children		68,000,000	
(c) Aid to the blind		3,200,000	
(d) Aid to the permanently and totally disabled		12,500,000	
Total obligations		168,400,000	
Financing:			
Proposed supplemental appropriation		168,400,000	

Under existing legislation, 1959.—It is anticipated that a supplemental appropriation of $168,400,000 will be required for 1959, because the estimated number of recipients for aid to dependent children, based on current trends, is larger than estimated when the appropriation request was approved by the Congress, and because the 1958 amendments will increase the Federal share for all programs.

GRANTS TO STATES FOR MATERNAL AND CHILD WELFARE

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Crippled children's services (total obligations)		$1,500,000	
Financing:			
Proposed supplemental appropriation		1,500,000	

Under existing legislation, 1959.—A supplemental appropriation of $1,500,000 is anticipated for 1959 for grants to States for crippled children's services, to be used exclusively for services to children with congenital heart disease. It will be proposed that these funds remain available until June 30, 1960.

OFFICE OF THE SECRETARY

SALARIES AND EXPENSES

For expenses necessary for the Office of the Secretary, [$1,809,000] *$2,151,000*, together with not to exceed [$263,000] *$318,000* to be transferred from the Federal old-age and survivors insurance trust fund. (*Department of Health, Education, and Welfare Appropriation Act, 1959.*)

Proposed supplemental due to pay increases		162,000	

This Office is responsible for the supervision, direction, and guidance of the operating agencies of the Department.

1. *Executive direction and program coordination.*—In addition to overall direction of the Department, special attention is given the federally aided corporations, Federal-State relations, internal security, and problems affecting the aging population.

2. *Publications and reports.*—This Office directs the Department's public information activities, providing services to press, radio, and other media and specific information to those interested.

3. *Administrative and financial management.*—Guidance is furnished the operating agencies with regard to administrative management, personnel, property and records management, office services, organization, staffing and control problems. Budget analysis is made of the Department's programs; fiscal policies and procedures are developed and internal audit is conducted. In addition, certain direct administrative services are furnished.

Transferred from "Grants to States for public assistance," Social Security Administration (72 Stat. 243)	54,700		
Appropriation (adjusted)	2,354,700	2,358,000	2,735,000
Proposed supplemental due to pay increases		213,000	

1. *Field administration.*—This includes review and evaluation of Department field activities; planning for the field organization; and coordination of program operations through 9 regional offices, which provide administrative services for 15,900 employees located in the field.

Public Law 85–840, approved August 29, 1958, expands the workload and hence the employment of the Social Security Administration. A proposed increase in the limitation on funds from Federal old-age and survivors insurance trust fund to cover the cost of increased central services to be furnished the Social Security Administration by the Office of Field Administration in 1959 is anticipated under Proposed for later transmission.

2. *Grant-in-aid audits.*—The Division audits 33 grant-in-aid programs to determine whether these grants were expended by the States and local subdivisions for the purposes for which they were appropriated. There will be an incoming current workload of approximately 2,170 audits in 1960 compared with 1,870 in 1958 and 1,970 in 1959. Audits of expanded construction grants, changes in requirements of medical care for public assistance recipients, surplus property audits and national defense education grants will require more staff time in 1960.

3. *State merit system.*—State merit systems are reviewed for compliance with the requirements of Federal law in the various programs. Division activities involve 17 types of grants-in-aid and apply to 70 State merit systems, and 290 agencies administering grant programs.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1957 actual	*1958 actual*	*1959 estimate*	*1960 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$12,919	$30,109	$8,200	$9,200

The Office of the General Counsel acts as legal adviser to the Secretary, all the operating agencies of the Department, and the directors of the nine regional offices.

Public Law 85-929, the Food Additives Amendment, approved September 6, 1958, imposes certain enforcement workloads upon this Office and this will occasion a supplemental in 1959.

Public Law 85-840, approved August 29, 1958, extends the Social Security Act and imposed certain additional workloads upon this Office, and this will occasion a supplemental in 1959.

Financing:			
Appropriation (new obligational authority)		100,000	452,000

In January 1961, a national conference will be held to discuss and develop recommendations for programs in the field of aging. The $100,000 appropriated in 1959 starts the preliminary work. Additional staff is recommended in 1960, primarily to assist the States in the conduct of State conferences and in preparing for the White House Conference.

In addition, a supplemental appropriation for 1959 is anticipated under Proposed for later transmission principally, to provide grants to help pay the costs incurred by each State.

Intragovernmental funds:

WORKING CAPITAL FUND

The fund provides reproduction, tabulating, and supply services on a central basis for Department headquarters (42 U. S. C. 905).

Budget program—1. *Reproduction.*—Consists of offset printing, mimeographing, photographic, visual aids, microfilming, and addressograph services for the Department's headquarters and for other Government agencies as required. Also includes procurement of printing from Government Printing Office and other sources and procurement and distribution of congressional materials.

2. *Tabulating.*—Provides tabulating services on a centralized basis for all of the headquarters units of the Department. The services performed cover fiscal, payroll, and statistical processing.

3. *Supply services.*—Includes purchasing and supply functions on a centralized basis for the headquarters units of the Department.

Operating results and financial conditions.—Government investment at end of 1960 is expected to consist of donated assets and retained earnings. The earnings are retained to meet future needs.

OFFICE OF THE SECRETARY—Continued

Proposed for later transmission:

SALARIES AND EXPENSES, OFFICE OF FIELD ADMINISTRATION

Under existing legislation, 1959.—A proposed increase in the transfer from the Federal old-age and survivors insurance trust fund of $98,000 is anticipated for 1959 as a result of Public Law 85–840, approved August 29, 1958, which expanded the operation of the Social Security Administration resulting in an increased workload of claims, hearing, and appeal work involving a substantial increase in employment. This in turn has increased the operations of this Office requiring additional staff to provide administrative services for the expanded employment of the Social Security Administration.

SALARIES AND EXPENSES, OFFICE OF THE GENERAL COUNSEL

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
Departmental program services (total costs—obligations)		$16,000	
Financing:			
Proposed supplemental appropriation		16,000	

Under existing legislation, 1959.—A supplemental appropriation of $16,000 is anticipated for 1959 as a result of the enactment of Public Law 85–929, approved September 6, 1958, which amends the Federal Food, Drug, and Cosmetic Act and imposes certain responsibilities on this Office.

In addition, an increase in the Federal old-age and survivors insurance trust fund in the amount of $16,000 will be requested in 1959 because of the enactment of Public Law 85–840, approved August 29, 1958, which also imposes certain workloads on this Office.

WHITE HOUSE CONFERENCE ON AGING

Program and Financing

	1958 actual	1959 estimate	1960 estimate
Program by activities:			
1. Grants to States		$810,000	
2. Technical assistance to States and planning of conference		36,000	
Total obligations		846,000	
Financing:			
Proposed supplemental appropriation		846,000	

Under existing legislation, 1959.—A supplemental request of $846,000 is anticipated for 1959, primarily for grants to the States for conducting State conferences on aging.

GENERAL PROVISIONS

SEC. 202. Appropriations under this title available for salaries and expenses shall be available for payment in advance for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public *and for payment in advance for publications available only upon that basis or available at a reduced price on pre-publication orders.*

[SEC. 203. Appropriations under this title available for salaries and expenses shall be available for travel expenses and for expenses of attendance at meetings concerned with the functions or activities for which such appropriations are made.]

SEC. [204] *203.* Appropriations under this title available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

SEC. [205] *204.* None of the funds appropriated by this title to the Social Security Administration for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. [206] *205.* The Secretary is authorized to make such transfers of motor vehicles, between bureaus and offices, without transfer of funds, as may be required in carrying out the operations of the Department.

[SEC. 207. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 15 per centum of the direct costs.]

SEC. [208. Any] *206. Hereafter any* appropriation available for the pay and allowances of commissioned officers of the Public Health Service may be utilized for the payment of claims as authorized by the Act of September 2, 1957 (71 Stat. 575).

SEC. 207. Not to exceed an aggregate of $5,000 shall, when authorized by the Secretary, be available, from appropriations under this title available for salaries and expenses, for entertainment of officials of and visiting scientists and other experts from other countries and of officials of international organizations, and the amount made available by this section shall be in lieu of any other amounts made available in this title for such purposes.

SEC. 208. Appropriations to the Public Health Service available for research grants pursuant to the Public Health Service Act shall also be available, on the same terms and conditions as apply to non-Federal institutions, for research grants to hospitals of the Service or to Saint Elizabeths Hospital.

SEC. 209. Any obligational authority for planning or construction of any building made available to the Department of Health, Education, and Welfare, which otherwise expires for obligation on June 30, 1959, shall remain available until June 30, 1960. (Department of Health, Education, and Welfare Appropriation Act, 1959.)

GENERAL PROVISIONS

SEC. 901. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 902. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) [and for expenses of attendance at meetings concerned with the function or activity for which any such appropriation is made]. *(Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1959.)*

DEPARTMENT OF THE INTERIOR

The 1960 request for new obligational authority for the Department of the Interior is $745 million, a reduction of $58 million from the current year. Most of the reduction is in the construction programs of the Department, and includes a nonrecurring item of $20 million for a highway on Navajo-Hopi Indian lands. Expenditures in 1960 are estimated at $757 million. The decrease of $52 million from the 1959 estimate is largely in the construction programs of the Bureau of Reclamation and the National Park Service. Work on these and other public works projects was accelerated in the latter part of 1958 as an antirecession measure, and the high rate of construction has continued into 1959. The 1960 budget provides for the work to be continued at somewhat reduced rates.

About 90% of the funds requested for 1960 are for conservation and development of natural resources. Most of the remainder is for educational services for the Indians and administration of Territories and possessions.

Many programs of the Department of the Interior, in addition to providing long-range economic benefits, also result in direct financial returns. These revenues, estimated at $403 million in 1960, come mostly from the sale of power generated at Government dams, collections from water users on irrigation projects, grazing fees, park permits, timber sales, and mineral leases on public lands (including the outer Continental Shelf) and on Indian lands. Some of the revenues are used to repay earlier investments of the Government in irrigation and power facilities; others are (1) shared with the States and counties as authorized by the Congress, (2) appropriated or placed in revolving funds to finance Federal programs, or (3) added to the general revenues of the Treasury.

Land and water resources.—Expenditures for the conservation and development of land and water resources make up about 57% of total expenditures for the natural resources programs. Much of this total is for multipurpose development of the water resources of the West for irrigation, water supply, flood control, navigation, hydroelectric power, and related recreational and fish and wildlife purposes.

Total expenditures for the Bureau of Reclamation in 1960 are estimated at $250 million, largely for continued progress on 57 projects. The budget for 1960 provides no funds to initiate construction of new projects by the Bureau of Reclamation. A supplemental appropriation of $4,860,000 will be requested for 1959 to finance two small project loans for which applications have been presented to the Congress. The Bureau will continue to construct and operate transmission facilities to market power from Reclamation and Corps of Engineers, Army, projects in the Missouri River Basin and other Reclamation projects except those in the Pacific Northwest.

The 1960 budget recommendations will permit continuation of research on the utilization of saline water. Also, the planning phase of the program for demonstration plants, started in the current year, will go forward in 1960.

The Bonneville Power Administration will continue to construct and operate high voltage transmission facilities to integrate 17 Federal hydroelectric plants and to interconnect the Federal grid with non-Federal utility systems in the Pacific Northwest. The Southwestern and Southeastern Power Administrations will market power generated at 19 Corps of Engineers, Army, projects in operation in their respective areas. Expenditures for the three agencies are estimated to increase from $36 million in 1959 to $41 million in 1960, chiefly because of an increase in construction on the Bonneville system.

The Bureau of Land Management will administer 475 million acres of public lands of the United States, of which approximately 300 million acres are in Alaska, for the purpose of conserving the forest, range, mineral, and water resources. Applications for all types of land use and for lease of mineral resources are increasing. Cadastral surveys will be increased somewhat to locate the legal boundaries of public lands to be selected by Alaska under the provisions of the Statehood Act. New obligational authority for the Bureau of Indian Affairs to promote the economic activity of the Indians through utilization of the resources of their lands will increase slightly. Construction will continue in 1960 on roads, irrigation systems, and schools and other buildings, with expenditures somewhat below the 1959 level.

Forest resources.—Expenditures for payments to the counties as shared revenues from the sale of timber on the Oregon and California revested lands and the Coos Bay Wagon Road grant lands are classified under this subfunction. However, the timber management activities on the public domain lands and the Indian trust lands are classified under the heading of land and water resources, since these activities are carried on in connection with other land management activities.

General resource surveys and mineral resources.—Funds recommended for 1960 for the Geological Survey and the Bureau of Mines will permit these agencies to carry on mapping, investigations and research directed toward discovery of additional sources of essential minerals, improvement of mining techniques, and better utilization of mineral supplies at about the 1959 levels. Recommended appropriations for the Bureau of Mines for 1960 are $13 million below the 1959 total since no funds are recommended for construction. The Minneapolis laboratory and the Keyes helium plant, now under construction, will be substantially completed in 1959 with the $13 million provided for that year. Legislation to conserve the Nation's helium resources, with private participation in accomplishing this objective, will be presented for early consideration of the Congress.

During the past session legislation was enacted to encourage private exploration for minerals by Federal financial participation in the costs of exploration along the lines of a prior program which had been conducted under the Defense Production Act. The current program provides for Federal contributions of 50% of the operator's cost of accepted exploration projects. The advance will be repaid with interest if ore is produced within a specified period.

Other expenditures for mineral resources include payments to the States of a share of the revenues from the mineral leasing of lands in the public domain. These payments are estimated at $43 million in 1960, an increase of $5 million over the 1959 estimate.

Federal Reserve Bank of St. Louis

Recreational use of natural resources.—Expenditures by the National Park Service in 1960 will be somewhat below the 1959 level, but substantially above the total for 1958. They will provide for management and operation of the park system and for construction of parkways, roads and trails, and buildings and facilities to meet the needs of 65 million visitors estimated for 1960.

Fish and wildlife resources.—The Bureau of Sport Fisheries and Wildlife will carry on research and will operate and maintain 91 fish cultural stations and administer 18 million acres in wildlife refuges in 1960. Funds recommended for 1960 are at about the 1959 level. Some increase is recommended, however, for acquisition of additional wildlife areas.

During the past session of the Congress an additional authorization of $10 million was provided for the fishery loan fund, administered by the Bureau of Commercial Fisheries. It is recommended that $3 million of this amount be appropriated for 1960 to make loans to segments of the fishing industry unable to obtain commercial loans on reasonable terms. In 1960 the Bureau will begin operation of the vessel mortgage insurance program, recently transferred from the Department of Commerce.

The Fish and Wildlife Service cooperates with the States in fish and wildlife restoration projects. Assistance is provided by appropriation of funds equal to the excise taxes on hunting and fishing gear. These payments are estimated to be about $23 million in 1960. As a State, Alaska will receive 70% of the net proceeds from the Pribilof Islands and a payment under the Alaska game law, administered by the Service. These payments to Alaska are estimated to be $1 million in 1960.

Promotion of education.—New obligational authority requested for the Bureau of Indian Affairs for 1960, to provide educational services for the Indians living on tax-exempt Indian trust lands, is approximately $1 million less than the amount appropriated for 1959. Increased costs of operating Federal facilities will be largely offset by a decrease of approximately $4.5 million in funds needed to assist States in the education of Indian children enrolled in public schools. This decrease results from the fact that Indian children are now included under the program administered by the Department of Health, Education, and Welfare to provide assistance to States in which Federal programs are so large as to place an extraordinary burden on local school districts. The Bureau will continue to assist local districts in which Indian children are not otherwise eligible for aid and will provide certain types of special services to Indian children.

Community development and facilities.—1959 marks the completion of appropriations for the $70 million program of public works in Alaska, financed by the United States Government on a grant and loan basis. The Alaska communities will operate the facilities and repay 50% of the construction costs. Grants to Samoa and the Trust Territory of the Pacific Islands, to help defray the costs of government, will continue at about the 1959 level. Supplemental appropriations totaling $1.5 million will be recommended in 1959 for the Virgin Islands Corporation to construct a desalination water and related power facility to meet critical shortages in St. Thomas.

Other aids to business.—For the present the Department will continue to operate the Alaska railroad. Net expenditures will decrease by about $3 million as the need for track improvements decreases.

Labor and manpower.—The Bureau of Mines carries on inspections, investigations, research, and rescue work to reduce the working hazards in mines. Under the 1960 budget recommendations, the program will be carried on at the same level as in the current year.
