THE BUDGET
OF THE
UNITED STATES GOVERNMENT
FOR THE FISCAL YEAR
ENDING JUNE 30

1962

U.S. GOVERNMENT PRINTING OFFICE
WASHINGTON : 1961

For Sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C. Price \$6.00 (Paper Cover)

INTRODUCTION

Pursuant to the provisions of the Budget and Accounting Act (31 U.S.C. 1-24) and other applicable laws, the budget for the fiscal year 1962 contains the President's recommendations for the work program and financial program of the Government for the 12 months beginning July 1, 1961, and ending June 30, 1962. It also presents comparable information for the fiscal years 1960 (actual) and 1961 (partly actual and partly estimated).

The material in the budget covers both groups of funds administered by agencies of the Government—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government), although only the Federal funds are included in the computation of the budget surplus or deficit.

ARRANGEMENT OF THE BUDGET

The budget document consists of the President's budget message and four parts which contain summary tables, detailed data, and special analyses.

In the budget message (pp. m4 through m96), appear the general statement of the President's financial program and an outline of his major recommendations.

Part I of the budget (pp. 1 through 8) contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

Part II (pp. 9 through 918) contains the detail of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Also included is material on a few trust funds which require congressional action. This part of the budget begins with four statements (tables 6 through 9) which supplement the tables of part I. The remainder

of part II is arranged in chapters reflecting the organization of the Government.

Part III (pp. 919 through 976) contains a summary table on trust and deposit funds, and detailed schedules and explanatory statements on the various trust funds.

Part IV (pp. 977 through 1023) contains a limited number of special analyses of budget data supplementing material appearing in other parts of the budget. Some of these give details for certain summary figures appearing in part I—for example, a classification of budget receipts by source, and a classification of budget expenditures according to functions and subfunctions. Other special analyses in part IV contain additional data or classifications not summarized elsewhere.

An appendix, printed separately, contains more detailed information on personal services by grade and title.

The budget for the municipal government of the District of Columbia is also printed separately. This main volume of the budget contains detail with respect to the District government only for the Federal payments and loans to the District.

EXPLANATORY STATEMENTS

Introductory statements at the beginning of each part give further explanations as follows:

Pages 2-3—Types of funds; basis of stating receipts and expenditures; concept of budget surplus or deficit; types of new obligational authority; certain budget classifications.

Pages 10-12—Operation of Federal funds and format of material printed for most accounts and funds in part II.

Page 920—Operation of trust and deposit funds covered by part III.

Page 978—Coverage of the special analyses printed in part IV.

Note.—Detail in the tables of this document may not add to the totals because of rounding.

Balance of appropriations carried forward at end of year ..	46.0	43.9	40.1	38.8	38.8	40.4	39.4

¹ Includes amounts for proposed legislation.

Notes.—(1) Detail in this and subsequent tables may not add to the totals shown due to rounding. Unless otherwise noted, all references to years are to fiscal years ending June 30.

(2) The totals of budget receipts and expenditures have been revised to exclude certain interfund transactions (mainly interest payments to the Treasury by Government corporations and agencies that borrow from the Treasury) which are shown both as expenditures in the totals of the affected agencies and functions, and as miscellaneous receipts of the Treasury. The deductions made reduce total budget receipts and expenditures equally and do not affect the amount of the budget surplus or deficit. For purposes of comparability, budget totals for prior years have also been adjusted to exclude these transactions. Such interfund transactions are estimated to be \$676 million in 1961 and \$667 million in 1962.

(3) The budget totals for 1961 and 1962 are not precisely comparable to those for prior years as a result of a change made by the Social Security Act Amendments of 1960. Under this law amounts equal to the receipts from the Federal Unemployment Tax Act are transferred from the budget to the unemployment trust fund and the expenditures for employment security grants and administration (financed by these receipts) are made from that trust fund. Since the same amounts are involved for both expenditures and receipts, the budget surplus is not affected.

BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

For the fiscal year 1962 I send you budget and legislative proposals which will meet the essential domestic needs of the Nation, provide for the national defense, and at the same time preserve the integrity and strength of our Federal Government's finances.

With this budget, I leave to the new administration and the Congress a progressive and workable financial plan which recognizes national priorities and which reflects my confidence in the strength of our economy now and in the years to come.

A budget surplus was achieved in the fiscal year which ended on June 30, 1960. A narrowly balanced budget is anticipated for fiscal year 1961. The recommendations in this budget provide for still another balanced budget, with a surplus, in fiscal year 1962. The achievement of balanced budgets this year and in the coming fiscal year will help foster noninflationary prosperity at home and strengthen confidence in the dollar abroad.

Despite the persistence of hardship in some local areas, economic activity continues at a high level. It is imperative for the extension of economic growth at a high and sustainable rate that the budget be kept balanced and that we act responsibly in financial matters.

For 1962 the budget estimates reflect expected gains in the national economy and provide for carrying programs forward in an efficient and orderly manner. The estimates also reflect, as in previous years, the budgetary effects of proposed changes in legislation, including the cost of certain new programs. Most of the legislative proposals have been previously recommended. I again urge their enactment.

In total and in its parts, this budget embodies a sensible and forward-looking plan of action for the Government. In brief, it provides for:

1. Increasing our own military capabilities and promoting increased strength in other free world forces;
2. Advancing activities important to economic growth and domestic welfare;
3. Continuing assistance to the less-developed nations of the world whose peoples are striving to improve their standards of living;
4. Increasing support for scientific activities in outer space;
5. Achieving savings by making desirable modifications in existing programs and by charging users the costs of special benefits received by them; and
6. Continuing present tax rates to maintain the revenues needed for a sound fiscal plan.

The policies and proposals in this budget will enable us to meet fully our national and international responsibilities and to promote real and sustainable national progress.

GENERAL BUDGET POLICY

This budget, like each of the seven which I have previously sent to the Congress, reflects the conviction that military strength and domestic advancement must be based on a sound economy, and that fiscal integrity is essential to the responsible conduct of governmental affairs. A surplus in good times, as provided in this budget, helps make up the deficits which inevitably occur during periods of recession. To ignore these principles is to undermine our strength as a Nation through deficits, unmanageable debt, and the resulting inflation and cheapening of our currency.

An 8-year effort has been made by this administration to stabilize the purchasing power of the dollar. This effort, which was a necessary undertaking in view of the heavy depreciation of the dollar's purchasing power following World War II, has had a large measure of success, but the problem of maintaining reasonable price stability will require close and continuing attention in the future.

Our national economy is strong and our national welfare continues to advance. Despite a leveling out in economic activity during the latter part of the calendar year just ended, the total market value of all goods and services produced in our country in the calendar year 1960 increased by approximately \$20 billion over the preceding year

and crossed the half-trillion-dollar mark for the first time in our history. Personal incomes increased more than 5% over 1959, the previous record high. The Economic Report will describe the trends which indicate that further substantial increases can be expected during the calendar year 1961, carrying the gross national product and personal incomes to new highs.

The budgetary outlook for the future reinforces the need for self-discipline in meeting current national demands. Over the next 10 years and beyond,

BUDGET TOTALS

[Fiscal years. In billions]	In billions

Budget surplus (available for debt retirement)	<u>1.2</u>	<u>.1</u>	<u>1.5</u>
New obligational authority	<u>79.6</u>	<u>82.1</u>	<u>80.9</u>
Public debt at end of year	286.3	284.9	283.4

Note.—Receipts and expenditures on new basis, which eliminates interfund transactions amounting to \$0.7 billion for each of the 3 years shown.

we will be faced with the consequences of many commitments under present laws for nondefense expenditures, in addition to the heavy military burden we must continue to bear.

We can confidently expect that a growing economy will help pay for these commitments. As the labor force grows and employment expands, as business discovers new techniques of production and invests in a larger and more efficient productive base, the national output and income will grow, and with them our ability to finance needed public services. But our resources will not be unlimited. New and expanded Federal programs being urged by special groups are frequently appealing, but, added to existing commitments, they threaten to swell expenditures beyond the available resources.

The Federal Government cannot reasonably satisfy all demands at the same time. We must proceed first to meet those which are most pressing, and find economies to help pay their costs by reappraising old programs in the light of emerging priorities. We must encourage States and localities to increase further their participation in programs for meeting the needs of their citizens. And we must preserve and strengthen the environment in which individual initiative and responsibility can make their maximum contribution.

Our unsatisfactory balance of international payments provides another compelling reason for pursuing sound financial policies. The relationship between our budgetary actions and the balance of payments needs to be carefully examined to assure a minimum adverse effect. Whether the dollar will continue to enjoy high prestige and confidence in the international financial community will depend on the containment of inflation at home and on the exercise of wise restraint and selectivity in our expenditures abroad.

The need for concern about our spending abroad is not strange or surprising. It results from the recovery, profoundly desired and deliberately encouraged by our country, of the major centers of production in Western Europe and Japan following the devastation and disruption caused by war. To reflect this developing state of affairs, changes are now required in some policies established in earlier years. Therefore, I have prescribed certain actions in international transactions under direct governmental control and others are under study. Such measures, combined with proper financial prudence in the handling of domestic affairs and strong export promotion, should significantly improve our balance of payments.

In summary, if we plan wisely and allocate our resources carefully, we can have both public and private advancement. Sound fiscal policies and balanced budgets will sustain sound economic growth and, eventually, will make possible a reduced tax burden. At the same time, we can have necessary improvements in Federal programs to meet the demands of an ever-changing world. If, however, we

deliberately run the Government by credit cards, improvidently spending today at the expense of tomorrow, we will break faith with the American people and their children, and with those joined with us in freedom throughout the world.

BUDGET TOTALS—1961

Current estimates indicate a close balance in the 1961 budget. On the newly adopted basis of excluding interfund transactions, expenditures are estimated at \$78.9 billion and receipts at \$79.0 billion, resulting in a budget surplus of \$0.1 billion. The revenue estimate reflects a justifiably optimistic view as to the course of our economy, based on circumstances described in my Economic Report.

Last January, I proposed a budget for 1961 that showed a surplus of \$4.2 billion. The enactment by the Congress of unrecommended expenditures and the unwillingness of the Congress to increase postal rates reduced this prospect by approximately \$2 billion. In the meantime, lower corporate profits have materially reduced our expectation of tax collections from this source.

The small surplus of \$79 million currently estimated for 1961 takes into account an assumption that postal rates will be increased not later than April 1, 1961.

Despite the congressional increases in the budget last year, the present estimate of \$78.9 billion for 1961 expenditures is about \$900 million less than the figure of \$79.8 billion which appeared in the budget a year ago. The apparent reduction results from (1) the elimination, as announced in last year's budget, of certain interfund transactions totaling \$0.7 billion from the current estimate of expenditures and (2) the shift of employment security grants of \$0.3 billion to trust fund financing as provided by law. As explained elsewhere in this budget, these changes affect receipts as well as expenditures and do not affect the surplus.

Apart from these accounting adjustments, the increases and decreases from last year's estimate of 1961 expenditures are approximately offsetting.

Major increases from the original budget include \$766 million for Federal employee pay raises; \$554 million in losses of the postal service because rates were not increased as proposed; \$269 million for defense programs; \$188 million for health, education, and welfare activities; and \$164 million for civil space activities.

Major decreases from the original estimates include \$600 million for interest on the public debt; \$496 million for the activities of the Commodity Credit Corporation; \$311 million for veterans compensation, pensions, and readjustment benefits; \$93 million for the Export-Import Bank; and \$50 million for military assistance. In addition, a reduction of \$160 million is estimated under the proposal to reduce the postal deficit in 1961 by increasing postal rates effective April 1.

Other reductions, including a normal downward revision in the allowance for contingencies, total \$210 million.

BUDGET TOTALS—1962

For the fiscal year 1962, my recommendations provide for \$82.3 billion in budget receipts and \$80.9 billion in budget expenditures. The resulting budgetary surplus of \$1.5 billion will permit another modest payment on the public debt.

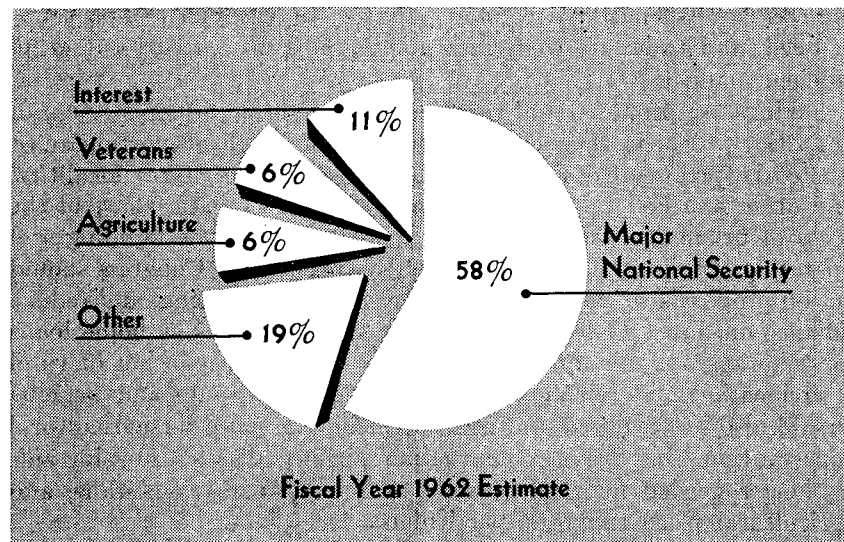

The estimate of receipts in 1962 is \$3.3 billion higher than the current estimate for 1961, and \$4.6 billion more than the receipts actually collected in 1960. Expenditures are also increasing, from a total of \$76.5 billion in 1960 to \$78.9 billion currently estimated for 1961 and \$80.9 billion proposed for 1962.

Budget expenditures.—The increase of \$1.9 billion in estimated expenditures between 1961 and 1962 reflects several factors which are worthy of special note.

First, outlays for our Nation's defenses are estimated to rise by \$1.4 billion in 1962 to a total of \$42.9 billion. Much of this increase reflects continued emphasis on certain expanding defense programs, such as Polaris submarines, the Minuteman missile, the B-70 long-range bomber, a strengthened airborne alert capability, airlift modernization, and modernization of Army equipment. These improvements are for the purpose of keeping our military might the strongest in the world.

Second, the budget provides for substantial continuing efforts to support the cause of freedom through the mutual security program.

PURPOSES OF BUDGET EXPENDITURES

Expenditures for this program in 1962 are estimated at \$3.6 billion, an increase of \$250 million over 1961.

Third, civil space vehicles and space exploration will require \$965 million in 1962, up \$195 million from 1961, and \$564 million more than in 1960. In total, the recommendations in this budget provide for \$9.4 billion in expenditures in 1962 for carrying forward research and development efforts, of which \$7.4 billion is for major national security purposes. The total represents an increase of \$770 million over 1961. As part of the overall research and development effort, increasing Federal support for basic research is being provided. This budget includes \$1 billion for the conduct and support of basic research in universities, industrial establishments, Government laboratories, and other centers of research.

Fourth, increases in expenditures are proposed for certain activities important to domestic well-being and to the future development of our Nation. These include, among others, broadening medical care for the aged; making major improvements in transportation programs; continuing development of our natural resources at a new record level of expenditures; improving our health and welfare programs; providing assistance for construction of elementary and secondary schools and college facilities; assisting areas of substantial and persistent unemployment; and fostering rural development. Expenditures in 1962 for labor, education, health, welfare, community development, transportation aids and services, and conservation of natural resources are estimated to total \$8.6 billion, an increase of \$627 million over 1961.

To some extent these recommended budget increases are offset by proposed reductions which can be effected in existing programs through improved operations and through changes in present laws. These reductions result from a continuous search for ways to restrain unnecessary expenditures in going activities, to recognize real priorities of need, and to assure that Federal programs are carried out in an efficient manner.

Savings are proposed and can be achieved through modification of activities which, in their existing form, require a disproportionate or wasteful expenditure of Federal funds. For example, States, localities, and other non-Federal interests should assume a greater share of the costs of urban renewal, local flood protection, and the building and operating of schools in federally affected areas. The Congress should act on proposals to encourage nongovernmental financing, and reduce reliance on direct Federal financing, in such activities as home loans for veterans and for military personnel, and the expansion of rural electrification and telephone systems. Certain grants and benefits should also be reviewed and revised, including those for agricultural conservation, civil airport construction, airline subsidies, housing aids no longer needed for readjustment of World War II veterans, and agricultural price supports, particularly for wheat.

Benefits to the general taxpayer are also proposed in the coming fiscal year and later years through the enactment of measures to charge users for special services which they derive from particular Government activities. Among these are proposals to eliminate the postal deficit and to provide more adequate taxes on aviation and highway fuels.

Budget receipts.—Estimated budget receipts of \$82.3 billion in 1962 are based on an outlook for higher production, employment, and income as the calendar year 1961 progresses. The accompanying table shows the sources of budget receipts for the fiscal years 1960, 1961, and 1962.

Budget Receipts:

LEGISLATIVE PROPOSALS

1. Extend corporate and excise tax rates scheduled for reduction or termination July 1, 1961.
2. Establish adequate fees and charges for special services or benefits.
3. Raise highway fuel tax to 4½ cents per gallon and repeal the pending diversion of excise taxes from the general fund.
4. Tax aviation fuels at 4½ cents per gallon and credit the receipts to the general fund.
5. Provide equitable taxation of cooperatives.
6. Revise tax on gains from sale of depreciable personal property.

BUDGET RECEIPTS

(See special analysis B in part IV of this document)

[Fiscal years. In billions]

Source	1960 actual	1961 estimate	1962 estimate
Individual income taxes.....	\$40.7	\$43.3	\$45.5

Excise taxes.....	9.1	9.3	9.7
All other receipts.....	7.1	6.7	6.9
Total.....	78.5	79.7	83.0
Deduct interfund transactions (included in both receipts and expenditures).....	.7	.7	.7
Budget receipts.....	77.8	79.0	82.3

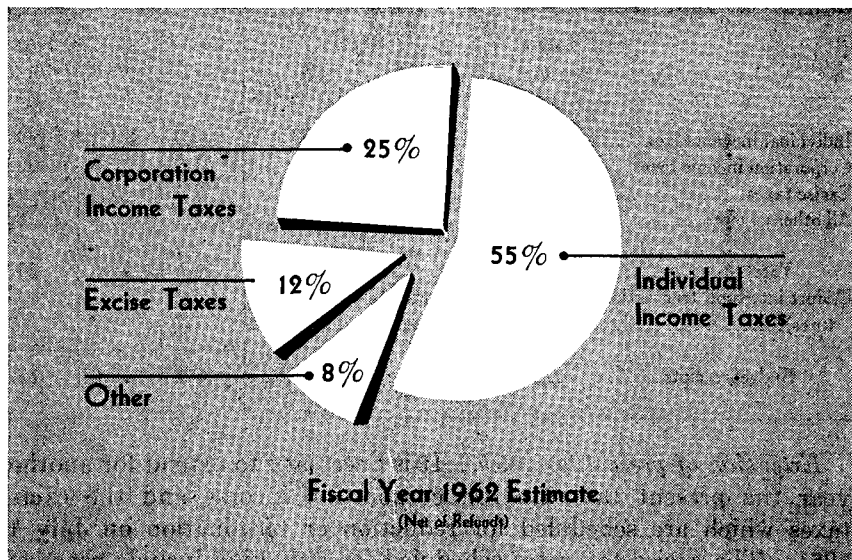

Extension of present tax rates.—It is necessary to extend for another year the present tax rates on corporation income and the excise taxes which are scheduled for reduction or termination on July 1, 1961. The excise tax rates scheduled for reduction include those on distilled spirits, beer, wines, cigarettes, passenger automobiles,

automobile parts and accessories, and transportation of persons; the 10% tax on general telephone service is scheduled to expire. Unless these tax rates are extended, the Federal Government will lose an estimated \$2.6 billion in revenues in 1962, and \$3.7 billion on a full annual basis.

Changes in fees and charges.—In the conduct of certain of its activities, the Government provides special services, sells products, and leases federally owned resources, which convey to the recipients benefits above and beyond those which accrue to the public at large. In fairness to the general taxpayer, the cost of these services or the fair market value of the products and resources which are transferred to private use should be recovered, wherever feasible, through adequate fees and charges. To this end, the Congress was requested last year to provide increased fees and charges for a number of special benefits. With the one exception of fees for non-competitive oil and gas leases no final action was taken. The Congress is again requested to raise postal rates to eliminate the postal deficit and to act favorably on the proposals for increased highway and aviation fuel taxes and for a number of other fees or charges.

The present highway fuel tax rate should be increased by one-half cent per gallon and the resulting rate of 4½ cents should be continued through 1972. This step is necessary to permit timely completion of the Interstate System. It will also make possible the repeal of the unwise diversion from the general fund to the trust fund of excise tax

SOURCES OF BUDGET RECEIPTS

receipts amounting to 5% of the manufacturers' price of passenger automobiles and automobile parts and accessories; this diversion is presently scheduled by law to begin July 1, 1961, and to continue for the fiscal years 1962 through 1964. The Congress should also raise the excise tax rate on aviation gasoline from 2 to 4½ cents per gallon; impose the same excise tax rate on jet fuels, now untaxed; and retain the receipts from these taxes in the general fund to help pay the cost of the Federal airways system. Other aspects of these recommendations are set forth in the discussion of transportation programs in this message.

ESTIMATED SAVINGS TO THE GENERAL TAXPAYERS FROM MORE ADEQUATE
FEES AND CHARGES

[In millions]

Proposal	Fiscal year 1962
Increase postal rates.....	\$843
Support highway expenditures by highway use taxes:	
Repeal pending diversion of general fund excise taxes to trust fund (and increase motor fuel tax).....	810

Increase taxes on aviation gasoline and retain in general fund.....	38
Tax jet fuels.....	62
Increase patent fees.....	7
Increase miscellaneous fees now below costs.....	9
Total savings.....	1,807

Public debt.—Achievement of the proposed budget surplus for 1962 will enable the Federal Government to make another modest reduction in the public debt. It is estimated that the public debt, which stood at \$286.3 billion on June 30, 1960, will decline to \$284.9 billion by the end of fiscal year 1961 and to \$283.4 billion on June 30, 1962.

If the Congress accepts the proposals in this budget, and the proposed budget surplus for fiscal year 1962 is achieved, at the end of that year the Government will have some operating leeway within the permanent debt limit of \$285 billion. Due to the seasonal pattern of tax collections, however, it will again be necessary for the Congress to provide a temporary increase in the debt limit during 1962. The present temporary debt limit of \$293 billion expires June 30, 1961.

Public Debt:**LEGISLATIVE PROPOSALS**

1. Provide temporary increase in debt limit.
2. Remove interest rate ceiling on Treasury bonds.

The Congress is again urged to remove the 4¼% statutory limitation on new issues of Treasury bonds, which remains a serious obstacle to efficient long-run management of the public debt. The marketable debt is still too heavily concentrated in

securities of relatively short maturity, with almost 80% of the total coming due within 5 years. Although interest rates have declined in recent months, the continued existence of the interest rate ceiling limits the flexibility of debt operations by the Treasury. It effectively prevents the Treasury under certain circumstances from lengthening the debt by offering longer term securities or exchanges at maturity and, more importantly, it reduces considerably the possible use of the advance refunding technique, which offers the greatest promise for lengthening the average maturity of the debt.

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The budget totals exclude the transactions of funds held in trust by the Federal Government as well as certain other transactions affecting the flow of money between the public and the Federal Government as a whole. Trust fund operations are an important factor in this flow and are consolidated with budget transactions to measure the Federal Government's cash receipts from and payments to the public. In this consolidation, certain transactions involving no flow of cash between the Government and the public are eliminated.

Expenditures from trust funds are financed through taxes and other receipts which are specifically designated to serve the special purposes for which the funds were established. About one-half of total trust fund transactions are accounted for by the old-age and survivors insurance system. Other important programs carried on through trust funds include the railroad retirement system, the Federal employees' retirement systems, disability insurance, unemployment compensation, grants for highway construction, purchase of insured and guaranteed mortgages, and veterans life insurance. In certain areas of Government activity, notably labor and welfare, trust fund expenditures far exceed the amounts spent through budget funds and, with the taxes levied to finance them, exert a considerable influence on the economy of the Nation.

Total receipts and expenditures of trust funds more than tripled during the decade of the fifties, and passed the \$20 billion mark in 1960. In 1962, they are both estimated to total \$25.2 billion. Total

receipts from the public in 1962 are estimated at \$103.1 billion and payments to the public at \$101.8 billion, with a resulting excess of receipts of \$1.3 billion.

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

(See special analysis A in part IV of this document)

[Fiscal years. In billions]

	1960 actual	1961 estimate	1962 estimate
Receipts from the public.....	\$95.1	\$99.0	\$103.1
Payments to the public.....	94.3	97.9	101.8
Excess of receipts over payments.....	+ .8	+1.1	+1.3

IMPROVEMENTS IN THE TAX SYSTEM

There is a continuing need for a reappraisal of the tax system to assure that it operates equitably and with a minimum of repressive effects on incentives to work, save, and invest. Continued close cooperation between the Treasury and the committees of the Congress is necessary to formulate sound and attainable proposals for the long-range improvement of the tax laws.

However, as the development of a comprehensive tax revision program will take time, the Congress should consider promptly this year certain changes in the tax laws to correct inequities. For example, it is again recommended that the Congress promptly consider amending the laws on taxation of cooperatives to provide for more equitable taxation by insuring that taxes are paid on the income of these businesses either by the cooperative or by its members.

It has been many years since certain of the tax laws which now apply to the Nation's various private lending institutions and to fire and casualty insurance companies became effective. The Congress should review these statutes and the tax burdens now carried by lending institutions and insurance companies to determine whether or not inequities exist and to remedy any inequitable situations which may be found. The Treasury Department has under way studies relating to the operation of the existing statutes in this area. These studies should be of assistance to the Congress in any such review.

There is a need for review of present depreciation allowances and procedures. More liberal and flexible depreciation can make a major contribution toward neutralizing the deterrent effects of high tax rates on investment. A better system of capital recovery allowances

would provide benefits to those who invest in productive plant and equipment and would encourage business expenditures for modernization and greater efficiency, thus helping to foster long-range economic growth. By bringing the allowances for American business more nearly into line with those available to many foreign producers, improved depreciation procedures would not only strengthen the competitive position of American producers, but their benefits would also accrue to American workers through increased productivity and greater job opportunity.

The depreciation rules should not be substantially liberalized, however, without accompanying remedial legislation with respect to the taxation of gains from sale of depreciable property. The legislation recommended last year to treat income on disposition of depreciable property as ordinary income to the extent of the depreciation deductions previously taken on the property is an essential first step.

IMPROVEMENTS IN GOVERNMENT ORGANIZATION

During the past 8 years major improvements have been made in the organization of the executive branch of the Government. An executive Department of Health, Education, and Welfare was established to give Cabinet status to its important programs. The organization of the Department of Defense was strengthened to bring it more closely into line with the requirements of modern warfare. A National Aeronautics and Space Administration was created to provide effective civilian leadership over appropriate parts of our national space program. The Council of Economic Advisers was reconstituted and reorganized to strengthen its internal administration and clarify its relationships with the President. Functions of coordinating governmental planning for defense mobilization and civil defense were consolidated. The establishment of the Federal Aviation Agency brought about substantial improvements in aviation programs.

Many of the numerous organizational improvements were effected by Presidential reorganization plans authorized by the Reorganization Act of 1949, which has now expired. The Congress should renew that authority and make it permanently available for all future Presidents in the effective form as originally enacted. The task of conforming Government organization to current needs is a continuing one in our ever-changing times.

Executive Office of the President.—The duties placed on the President by the Constitution and the statutes demand the most careful attention to the staffing and organization of the President's Office. While the present organization of the Executive Office of the President reflects many constructive steps taken over a period of years, much

remains to be done to improve the facilities available to the President. The first requirement for improvement is for the Congress to give the President greater flexibility in organizing his own Office to meet his great responsibilities.

Specifically, the Congress should enact legislation authorizing the President to reorganize the Executive Office of the President, including the authority to redistribute statutory functions among the units of the Office; to change the names of units and titles of officers within the Office; to make changes in the membership of statutory bodies in the Office; and, within the limits of existing laws and available appropriations, to establish new units in the Executive Office and fix the compensation of officers. Such action would insure that future Presidents will possess the latitude to design the working structure of the Presidential office as they deem necessary for the effective conduct of their duties under the Constitution and the laws. Enactment of such legislation would be a major step forward in strengthening the Office of the President for the critical tests that will surely continue to face our Nation in the years to come. These matters are obviously devoid of partisan considerations.

My experience leads me to suggest the establishment of an Office of Executive Management in the Executive Office of the President in which would be grouped the staff functions necessary to assist the President in the discharge of his managerial responsibilities. In an enterprise as large and diversified as the executive branch of the Government, there is an imperative need for effective and imaginative central management to strengthen program planning and evaluation, promote efficiency, identify and eliminate waste and duplication, and coordinate numerous interagency operations within approved policy and statutory objectives. The establishment of an Office of Executive Management is highly desirable to help the President

Improvements in Government Organization:

LEGISLATIVE PROPOSALS

1. Renew and make permanent President's authority under Government Reorganization Act.
2. Give President power to organize his Executive Office.
3. Establish a Department of Transportation.
4. Strengthen position of Chairmen of the Interstate Commerce Commission, the Federal Communications Commission, and the National Labor Relations Board.
5. Consolidate civil water resources functions.

achieve the high standards of effective management that the Congress and the people rightfully expect.

I have given much personal study to the assistance the President needs in meeting the multitude of demands placed upon him in conducting and correlating all aspects of foreign political, economic, social, and military affairs. I have reached the conclusion that serious attention should be given to providing in the President's Office an official ranking higher than Cabinet members, possibly with the title of First Secretary of the Government, to assist the President in consulting with the departments on the formulation of national security objectives, in coordinating international programs, and in representing the President at meetings with foreign officials above the rank of Foreign Minister and below the rank of Head of State.

Recognizing the personal nature of the relationship of each President to his Cabinet and staff, I am not submitting formal legislative proposals to implement these latter two suggestions, but I do commend them for earnest study.

Other improvements.—Several other organizational reforms should be considered by the Congress:

First, a Department of Transportation should be established so as to bring together at Cabinet level the presently fragmented Federal functions regarding transportation activities.

Second, legislation should be enacted to strengthen the position of the chairmen of the Interstate Commerce Commission, the Federal Communications Commission, and the National Labor Relations Board by vesting in them the executive and administrative duties of their agencies. The legislation should provide that the Chairman of the Interstate Commerce Commission be designated by the President. These steps would place these chairmen generally on a comparable basis with the chairmen of other regulatory bodies. In the case of the National Labor Relations Board, the legislation should vest all regulatory responsibilities under the National Labor Relations Act in the Board. Additionally, the responsibility of the President to control and supervise the exercise of executive functions by all Federal regulatory bodies should be clarified.

Third, action should be taken to consolidate the civil water resources functions of the Corps of Engineers of the Department of the Army, the Department of the Interior, and the responsibilities of the Federal Power Commission for river basin surveys, in order to bring about long needed improvements in the coordination of the increasingly important Federal civil water resources activities.

REVIEW OF AUTHORIZATIONS AND EXPENDITURES BY MAJOR FUNCTIONS

The remaining sections of this message discuss the budget and legislative proposals for 1962 in terms of the functions they serve. In the following table, estimated expenditures for 1962 are compared with the actual figures for 1960 and the current estimates for 1961 for each of 9 major functional categories.

The expenditure total for 1962 includes an allowance for contingencies, which is intended to provide for unforeseen developments in existing programs and for programs proposed in this budget but not itemized separately.

BUDGET EXPENDITURES

[Fiscal years. In billions]

Function	1960 actual	1961 estimate	1962 estimate
Major national security.....	\$45.6	\$45.9	\$47.4
International affairs and finance.....	1.8	2.3	2.7
Commerce, housing, and space technology.....	2.8	3.8	3.4
Agriculture and agricultural resources.....	4.8	4.9	5.1
Natural resources.....	1.7	2.0	2.1
Labor and welfare.....	4.4	4.5	4.8
Veterans services and benefits.....	5.1	5.2	5.3
Interest.....	9.3	9.0	8.6
General government.....	1.7	2.0	2.1
Allowance for contingencies.....		(¹)	.1
Total.....	77.2	79.6	81.5
Deduct interfund transactions (included in both receipts and expenditures).....	.7	.7	.7
Budget expenditures.....	76.5	78.9	80.9

¹ Less than \$50 million.

MAJOR NATIONAL SECURITY

The deterrent power of our Armed Forces and the forces of our allies is based on a carefully planned combination of nuclear retaliatory weapons systems together with worldwide deployment of ground, naval, and air forces in essential forward areas, backed up by strong ready reserves. These forces make up a collective security system for the Free World more versatile and powerful than any military alliance in world history.

*Major National Security:***BUDGET TOTALS**

[In billions]

	1960 <i>actual</i>	1961 <i>estimate</i>	1962 <i>estimate</i>
Expenditures	\$45.6	\$45.9	\$47.4
New obligational authority .	44.8	45.9	46.3

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Discontinue statutory minimum strength for Army National Guard.
2. Reestablish traditional relationship between military retirement pay and active duty pay.
3. Authorize sale of Alaska communications systems.
4. Transfer responsibility for petroleum reserves of the Navy Department to the Department of the Interior.
5. Authorize appropriate financial relief for officers removed from flying status.
6. Repeal required prior authorization for procurement of aircraft, missiles, and ships.
7. Authorize construction of linear electron accelerator at Stanford University.

Our Nation's objective in pursuing a policy of collective security is peace with justice for all peoples. However, while we strive to eliminate the fear of war among nations, we must maintain our military strength. The recommendations made in this budget provide for an increasingly strong defense posture along with a strong national economy.

Expenditures for major national security programs in fiscal year 1962 are estimated to be \$47,392 million, or \$1,462 million more than for 1961. The bulk of the increase is for the military functions of the Department of Defense, reflecting mainly evolutionary growth in our country's defense programs. Military assistance in conjunction with the efforts of our allies will continue to provide

the Free World with modern weapons and equipment, thus strengthening the collective defense. Programs of the Atomic Energy Commission continue to emphasize weapons development and production while also providing increases for research and development on peaceful applications of atomic energy. Expenditures for stockpiling and for expansion of defense production will again decline as nearly all stockpile objectives have been met.

Department of Defense—Military.—Recommended new obligational authority of \$41,840 million for the military functions of the Department of Defense for fiscal year 1962 reflects the continued policy of adapting the Defense Establishment to expected long-run requirements. Expenditures in 1962 are estimated at \$42,910 million,

MAJOR NATIONAL SECURITY

[Fiscal years. In millions]

Military functions:				
Present programs.....	\$41,215	\$41,500	\$42,879	\$41,809
Proposed retirement pay legislation.....			31	31
Military assistance.....	1,609	1,700	1,750	1,800
Atomic energy.....	2,623	2,660	2,680	2,598
Stockpiling and expansion of defense production.....	180	70	52	40
Total.....	45,627	45,930	47,392	46,278

¹ Compares with new obligational authority of \$44,761 million enacted for 1960 and \$45,912 million (including \$289 million in anticipated supplemental appropriations) estimated for 1961.

which is \$1,410 million more than the estimate for the current fiscal year.

This increase reflects, in part, certain steps recently taken to increase the readiness of our military commands. These steps can be financed in 1961 mainly within available appropriations. However, some supplemental appropriations will be required for this year and are included in this budget.

The recommendations for 1962 continue a strong posture of readiness and add to the capability of our military forces.

To take full advantage of the results of scientific and technological developments, rapid and sometimes drastic changes must continually be made in military forces and programs. Just a few years ago the United States was programming twice as much money for manned bomber systems as for strategic missile systems. The budget for the coming fiscal year, by contrast, programs more than four times as much for strategic missile systems as for manned bomber systems. Similarly, defense against ballistic missile attack took only a small part of the total capital investment in continental air defense as recently as the fiscal year 1957, whereas in the coming fiscal year it will be a substantial percentage of the total. There has been a gradual shift from guns to missiles on surface ships, and from conventional to nuclear power for submarines. For surface ships, the relative utility of nuclear or conventional power is a question that requires case by case consideration in each year's shipbuilding program. In total, there has been an increased emphasis on versatile and modern multi-

purpose military units equipped and prepared for all forms of military action—from limited emergencies to a general war.

Forces and military personnel.—To carry out basic military missions, this budget provides for a total strength in our Active Forces of 2,492,900 men and women on June 30, 1962, the same as now estimated for the end of fiscal year 1961 and 4,000 over the year-end strength originally planned for this year. A supplemental appropriation is being requested to provide for this 1961 increase, which is primarily to bring our naval forces to a greater degree of preparedness.

The Active Forces to be supported include an Army of 14 divisions and 870,000 men; a Navy of 817 active ships and 625,000 men; a Marine Corps of 3 divisions and 3 aircraft wings with 175,000 men; and an Air Force of 84 combat wings and 822,900 men.

Worldwide deployment of these forces, and of civilian employees of the Department of Defense as well, requires a considerable amount of travel to and from duty stations. The dollar limitation on travel established by the Congress in the 1961 appropriation for the Department is not sufficient to cover all essential travel costs of military and civilian personnel. Accordingly, it is recommended that this limitation be increased by \$54 million for the fiscal year 1961 and that no limitation be imposed for 1962.

If the reserve components of our Armed Forces are to serve effectively in time of war, their basic organization and objectives must conform to the changing character and missions of the Active Forces. Under modern conditions the quality and combat readiness of the reserve forces are more important than numbers. The nature of warfare has changed so drastically during the last decade that the whole concept of the roles and missions of the reserve forces must be re-evaluated.

Accordingly, the Secretary of Defense and the Joint Chiefs of Staff have been directed to make a new study of the reserve missions and requirements. This should be aimed at the objectives of efficiency, economy, and promoting administrative effectiveness. As a first step toward a more fundamental revision, this budget provides for a reduction in the number in the Army National Guard and Army Reserve paid for participation in reserve training from the present 400,000 and 300,000, respectively, to 360,000 and 270,000 by the end of fiscal year 1962. These recommended reserve personnel strengths are fully adequate to meet the needs of our national defense. The statutory minimum placed on the personnel strength of the Army National Guard in the 1961 Department of Defense Appropriation Act should not be continued. The excess strengths which have been provided by the Congress above my recommendations in the last several years are unnecessarily costing the American people over \$80 million annually and have been too long based on other than strictly military

needs. Even with the proposed lower reserve personnel strengths, the cost of pay, allowances, travel, and operation and maintenance for the military reserves will amount to well over \$1 billion in 1962.

Strategic forces.—The strategic forces provided for in this budget consist of a combination of nuclear weapons systems of land-based and carrier-based aircraft, fixed and mobile missiles of intercontinental and intermediate range, and overseas missile systems under the military command of mutual defense treaty organizations. The composite capability of these forces represents an enormous destructive potential and should deter any potential aggressor.

Up to the present time our strategic striking forces have relied in large measure on manned bombers. Manned bombers—both land-based and carrier-based—will continue to be required. However, with the advent of operational missile systems, more and more of the strategic force in the years ahead will be composed of fixed-base and mobile ballistic missiles—both land- and sea-based. The recommendations in this budget reflect this change.

By the end of fiscal year 1962, the largest part of the planned squadrons of the Atlas ballistic missile system will be operational, and a significant number of the planned Titan missiles will be in place and ready. The solid propellant Minuteman missile system is now well along in development, and the first missiles are scheduled to become operational during the calendar year 1962. Funds are requested for 5 additional Polaris submarines, making a total of 19 submarines which will have been fully funded, and for the procurement of long leadtime components of 5 more; procurement of the appropriate number of Polaris missiles to arm these submarines is also planned, as is the continued development of a much longer range version of the Polaris missile.

Thor and Jupiter intermediate range ballistic missiles, provided to our allies overseas under the military assistance portion of the mutual security program, add still another important element of strength to the strategic forces.

All production of B-52 and B-58 manned bomber aircraft is scheduled to end in the calendar year 1962. However, as indicated in my special message to the Congress last August, additional effort is being devoted to the development of the B-70 long-range bomber. Funds are included in this budget to continue work in 1962 on the airframe and engine, and on the essential subsystems.

In addition to the forces equipped uniquely for nuclear attack, the tactical fighters and missiles of the Air Force also contribute importantly to our strategic capability. Deployed overseas, with an increasing all-weather strike capability, these tactical forces can deliver megaton-class nuclear weapons to potential enemy targets.

As a further step in strengthening the strategic forces, the Navy has been authorized to increase significantly the proportion of attack aircraft aboard carriers of the 6th and 7th Fleets. This action will substantially increase the capability of those fleets to strike enemy targets.

The very diversity of our weapons systems has created an increasing need for fully integrated operational planning. To meet this need, the Secretary of Defense has established a special staff group composed of members of the services and representatives of unified commands contributing forces to our nuclear strike capability. I have recently approved the integrated strategic operational plan prepared by that group and recommended by the Secretary of Defense and the Joint Chiefs of Staff.

The advent of nuclear-armed intercontinental ballistic missiles in the hands of a potential adversary has confronted this Nation with a problem entirely new to its experience. The speed with which these weapons could be delivered against us and their tremendous destructive power make them suited to use by an enemy for surprise attack. Accordingly, this budget will continue the major effort under way during the last few years to increase the protection of our forces from surprise attack. Except for the first few squadrons of Atlas, all Atlas and Titan missiles are being deployed in hardened underground sites. All fixed-base Minuteman missiles will be so deployed. There will also be mobile squadrons of the Minuteman. The submarine Polaris system, of course, lends itself ideally to mobility and concealment and should be able to survive under all conditions.

There has also been an intensive effort to make the manned bomber force increasingly less vulnerable. Some 4 years ago the Air Force began the dispersal of these aircraft and commenced construction of special alert facilities to assure that one-third of the force could be airborne within 15 minutes of warning of an attack. Both of these programs are substantially completed. Under emergency conditions, the long-range bomber force could also use a large number of additional bases throughout the country.

As a further measure, steps have been taken to provide the heavy bomber force with an airborne alert capability. Funds are provided in this budget to continue to train crews and to acquire spare parts and other materiel so that a substantial portion of the heavy bomber force could immediately mount a 24-hours-a-day, 365-days-a-year airborne alert, should that step ever become necessary in an emergency.

Air defense forces.—The emergence of the ballistic missile threat has, of course, required a revamping of our air defense forces. The speed and destructiveness of the nuclear armed ballistic missile have placed an extremely high premium on timely warning of an attack.

Therefore, systems designed to provide such warning have been receiving urgent attention.

The ground-based Ballistic Missile Early Warning System (BMEWS), involving a cost of nearly a billion dollars, has already been largely financed. Work on this system has been greatly accelerated and is proceeding as fast as practicable. The first of the three sites is now in operation. The second site will be in operation this year, substantially increasing the coverage. The third site is planned to become operational somewhat later. When the entire system is in full operation, our air defense forces and civilian population, as well as the strategic retaliatory forces, should have 15 minutes of warning of intercontinental ballistic missile attack.

The matter of reliable warning of ballistic missile attack is of such crucial importance to the safety of the Nation, however, that a number of other approaches are also being explored. The most advanced of these is the satellite-borne missile early warning system, Midas, which is now under accelerated development. Midas is designed to detect an enemy missile attack at the time of launching; this could about double the amount of warning time available to our military forces and civilian population. Substantial funds are included in this budget to continue development of this system at a high rate.

With the increasing reliability, accuracy, payload, and sophistication of the ballistic missile, our problem of safeguarding against surprise attack will become ever more onerous. Development of an active defense against ballistic missiles is progressing. The Nike-Zeus anti-missile system is proceeding under the highest national priority, and funds for its Pacific range test facilities are included in this budget. Funds should not be committed to production until development tests are satisfactorily completed.

The entire problem of detection, tracking, and destruction of the attacking missile must be dealt with as a whole. Every avenue of research which offers any reasonable chance of success must be explored beyond the present frontiers of knowledge. That is the purpose of the group of studies now under way, which has been designated by the Department of Defense as Project Defender. Additional funds to continue this project through the coming fiscal year are also included in this budget.

As long as a manned bomber threat to this Nation exists, we shall have to maintain a reasonable degree of defense against it. The Air Force now has under way a large-scale program for improving the capability of its existing fighter interceptor force, particularly against the low level manned bomber. The Bomarc B ground-to-air-missile program has already been funded. Production is going forward, and missiles will be delivered to the air defense units over

the next few years. Additional funds are recommended to complete and modernize the Nike-Hercules ground-to-air-missile system.

The Bomarc B and Nike-Hercules, together with the early models of these missiles and the very substantial force of supersonic manned interceptors armed with air-to-air guided missiles, provide a formidable defense against manned bomber attack. To provide the detection, warning, and control for these forces, an extensive network of radars and communications lines is being maintained and modernized. Funds for additional construction and for the procurement of equipment are included in this budget.

Sea control forces.—Control of the seas is vital to the maintenance of our national security. The naval forces, which are being provided during this fiscal year with new combat ships and increased personnel, carry the primary responsibility for this important mission.

The 1962 budget provides for active naval forces consisting of 817 combatant and support ships, including 14 attack carriers, 16 attack carrier air groups, 11 carrier antisubmarine air groups, and 37 patrol and warning air squadrons.

New and modernized ships to be delivered in 1962 from prior year authorizations will enhance the combat capability of the naval forces and permit the replacement of older ships. Among the new and modernized ships to join the fleet in 1962 will be the first nuclear-powered attack aircraft carrier, the *Enterprise*; the first nuclear-powered cruiser, the *Long Beach*, armed with Talos and Terrier surface-to-air missiles; three nuclear-powered attack submarines; four Polaris submarines; and several guided missile destroyers.

The 1962 shipbuilding program provided in this budget will further improve the fleet and help offset the increasing number of over-age ships. The program consists of construction of 30 new ships and conversion of 22 others. In addition to the 5 Polaris fleet ballistic missile submarines, new ships will include 7 guided missile frigates, 3 nuclear-powered attack submarines, 6 escort vessels, and 9 amphibious, supply, and research ships. The conversion program includes 14 destroyers, 1 communications relay ship, 1 missile range instrumentation ship, and 6 conventionally powered attack submarines.

A great deal of emphasis in the 1962 shipbuilding program is on antisubmarine warfare. Progress has been made in antisubmarine warfare organization and tactics. Improvements have been made in weapons and equipment, particularly antisubmarine rockets, torpedoes, and sound detection gear. However, the fast, deep running, nuclear-powered submarine of today is exceedingly difficult to detect and attack. An increase in the capability to detect and destroy enemy submarines is needed. Additional funds are requested in this budget for research and development in this area.

Tactical forces.—The tactical forces include ground, naval, and air elements which are organized and trained to deal with cold war emergencies and limited war situations, as well as to be prepared for combat roles in the event of a general war. Recommendations in this budget will continue the modernization and improve the effectiveness of the tactical forces.

This budget provides for a further increase in procurement for the ground forces. Procurement of additional quantities of rifles and machineguns employing standard ammunition of the North Atlantic Treaty Organization will fill the high priority needs of the Army and Marine Corps forces; the M-113 armored personnel carrier will be made available for high priority active Army forces; the M-60 tank will be provided for the Army's highest priority deployed forces; and increasing quantities of new field communications equipment, vehicles, and self-propelled weapons will be produced.

The Army and Marine Corps will continue to buy a wide variety of tactical guided missiles and rockets, including initial quantities of the Pershing, a solid-propellant missile; a new lightweight shoulder-fired assault weapon; the Davy Crockett, which provides infantry units with a close range atomic support weapon; and missiles such as Hawk and Redeye for defense of field forces against air attack.

Army aircraft procurement proposed for 1962 provides for 261 new aircraft compared to 229 in the 1961 program, and includes funds for surveillance and utility planes, as well as for medium cargo helicopters.

The tactical forces of the Army are supported by the tactical air wings of the Air Force, which will also be provided with an increased capability under these budget recommendations. Funds are provided for continued procurement of F-105 supersonic all-weather fighter-bombers. These aircraft, with their low-altitude performance characteristics and large carrying capacities for both nuclear and non-nuclear weapons, will strengthen significantly the air support available to tactical ground units.

Continued modernization of our existing fleet of military airlift aircraft is needed. Although the cargo and troop transport airlift now available is generally adequate, much of the fleet is approaching obsolescence. Last year a program was started to acquire the best existing transports for the most immediate needs and also to develop a new aircraft specifically designed for cargo and transport needs. The budget includes funds to continue the orderly development of this program.

Proposed legislation.—Legislation is again recommended to make the necessary adjustments in military retirement pay so as to reestablish for all retired personnel the traditional relationship of their pay with active duty pay. This relationship was broken for those retired prior to June 1, 1958, when the 1958 Military Pay Act increased active

duty pay without a comparable increase for those on the retirement rolls. The people affected are in most cases those who have fought through two or three of our major wars. Legislation to correct this situation should no longer be delayed.

Basic long lines communications systems in Alaska which are now operated by the Army, Air Force, and the Federal Aviation Agency should be sold to private enterprise for operation and development under appropriate regulatory supervision. Legislation is recommended which will permit the sale of these Government-owned communications facilities under adequate safeguards.

The need for maintaining the relatively small naval petroleum reserves for strictly military purposes no longer exists. Legislation is therefore recommended to transfer responsibility for the administration of these petroleum reserves from the Department of the Navy to the Department of the Interior.

The need for manned aircraft, and for the pilots and other persons necessary to fly them, is declining gradually as more and more missiles enter the inventory of our operating forces. During the transitional period it will be necessary to remove from flying status a number of officers whose professional and managerial skills are still required by the services. The complete loss of flight pay which such removal now entails would represent a serious hardship to many officers who have served their country well and who believed they would qualify for flight pay as long as they maintained their flying proficiency. To help ease the transition which this group faces as a result of conversion to new weapons systems, the Congress should make provision for appropriate financial relief by reducing flight pay gradually for officers removed from flying status because of changing technology.

The provision of section 412(b) of the Military Construction Act of 1959 requiring prior congressional authorization of appropriations for the procurement of aircraft, missiles, and naval vessels is inappropriate and should be repealed. Pending its repeal, the required authorizations for 1962 should be enacted promptly so that national security planning and preparation can go forward with the least possible delay. Further, in enacting the authorizations, the Congress should allow flexibility in the administration of the Department of Defense procurement programs to meet changing threats and take advantage of technological breakthroughs.

The Capehart military family housing program has admirably served its purpose. Over the last 6 years, more than 100,000 such family units were provided at a time when they were badly needed. It is now apparent that the most urgent family housing needs of the Department of Defense have been met. However, in order to place under contract presently authorized projects and to provide for a final increment of 2,025 units in 1962, it is recommended that a 1-year extension of the existing authority be enacted.

In 1958, I recommended to the Congress a comprehensive program for reorganizing the Department of Defense. While many of these recommendations were enacted, and substantial progress has been made in implementing them, one area still needing attention is the method of providing funds for the Department. As a first step, appropriations have now been enacted on a broad category basis but with specific limitations by Service. I now recommend that the Congress, in acting upon the appropriation structure for the fiscal year 1962 for the Department of Defense, give earnest consideration to a plan which would make the necessary authorizations and appropriations to that Department to be administered by the Secretary, but with a substructure of sufficient identification which will retain for the Congress its constitutional prerogatives of raising and supporting the military forces of the United States.

North Atlantic Treaty Organization.—The evolutionary changes in warfare that have taken place over the last decade have had a profound effect on the military plans and programs of the North Atlantic Treaty Organization. These plans are again being reviewed and studied to take account of new weapons, better organization of the NATO military forces, and more direct channels of command to carry out NATO objectives effectively.

It is expected that the revised military plans for NATO will recognize the changes that have taken place. However, the menace of Communist military strength is growing. The NATO alliance remains vital to the security of the United States, no less than to the security of the other NATO allies. The United States will continue to contribute to the constructive and defensive tasks it has assumed.

Some changes in U.S. force deployments may become advisable in light of continuing studies of overall U.S. programs. Nevertheless, the United States will continue to provide a fully effective strategic deterrent force and will contribute to the forward deployed forces of NATO.

Military assistance.—U.S. military planning has long recognized the importance of allied forces in maintaining the security of the free world. Military assistance under the mutual security program helps to strengthen the forces of more than 40 nations. New obligational authority of \$1.8 billion is recommended for military assistance for 1962 to provide training and materiel for essential maintenance and modernization of forces in the countries receiving aid.

In light of the expanding scope and cost of vital military programs being borne by the United States, we cannot continue indefinitely to provide military equipment on a grant basis to nations which now have the economic and financial capability to shoulder more of the

burden of the common defense. The recent improvement in the financial position of many of our allies has highlighted the need for greater sharing of this burden.

Some of the Western European countries have now assumed full financial responsibility for equipping their own military forces, in which the United States had assisted earlier. We are confident that as full partners in the common defense all nations of the North Atlantic Treaty Organization who are able to assume this responsibility will do so. In 1962, military assistance to our Western European allies will be concentrated on selected types of new weapons and on the training required for their effective use.

This budget also reflects the continuing need to develop and maintain effective forces in other nations which are faced with serious threats of internal subversion or external aggression. Individually, and within mutual defense organizations, such as the South East Asia Treaty Organization (SEATO) and the Central Treaty Organization (CENTO), these forces play vital roles in the defense of vast areas, predominantly in Asia and the Near East. Assistance to these nations will be concentrated largely on the strengthening of conventional forces. In addition to its military value, this assistance in the common defense effort contributes to the sharing of technical knowledge and strengthens the bonds of friendship and mutual respect among the nations of the Free World.

Atomic energy activities.—In 1962, expenditures by the Atomic Energy Commission are estimated to be \$2,680 million, compared with an estimated \$2,660 million in 1961. There will be increases in several program areas, but these will be largely offset by reductions elsewhere, notably in the procurement of uranium concentrates.

Expenditures for the production of nuclear weapons in 1962 will increase over 1961, while those for the development of weapons will continue at the same rate. Work will be carried forward in 1962 to improve methods for seismic detection of underground nuclear weapons tests. The Atomic Energy Commission is also cooperating with the Department of Defense in the improvement of methods for detecting high altitude tests.

In the naval reactor program, continued efforts will be made to develop longer lived nuclear fuel. The development of a nuclear ramjet engine for missiles and of nuclear powerplants for use at remote military installations will be pursued. The efforts to develop a nuclear engine for military aircraft will be continued in 1962 on one technical approach.

Peaceful uses of atomic energy.—Fundamental to progress in the peaceful uses of atomic energy is a sound and balanced program of basic research in the physical and life sciences. An important seg-

ment of this work is high energy physics. Last July, the United States began operating the alternating gradient synchrotron at the Atomic Energy Commission's Brookhaven National Laboratory on Long Island at the highest energy level ever attained anywhere in the world. During fiscal year 1962 two more high energy accelerators, at Cambridge, Mass., and Princeton, N.J., will begin operation. A high intensity accelerator is under construction at the Commission's Argonne National Laboratory near Chicago, Ill. Legislation is again proposed to authorize construction at Stanford University of a high energy linear electron accelerator which will be 2 miles long.

The development of civilian atomic power is being carried forward intensively. Expenditures of \$250 million estimated for 1962 will support major development efforts on seven reactor types, and preliminary studies and experimental work on a number of other reactor concepts. The breadth and scope of our technology in this field are unmatched in the world.

The next 18 months will see further advances toward our long-term objective of making atomic energy an alternative and economic source of power at home and abroad. The total number of major Government-owned experimental power reactors in operation will increase by 5 to a total of 10, and the number of power reactors operating in public and private utility systems will increase from 3 to 10. The 1962 budget proposes additional funds for cooperative arrangements with private and public power groups in undertaking atomic power projects which would further the objectives of the program.

Jointly with the National Aeronautics and Space Administration, the Atomic Energy Commission is pursuing Project Rover to develop a nuclear powered rocket for possible future space missions. Expenditures for this project will increase in 1962. Continued emphasis will be given to development of small, long-lived nuclear power sources for space vehicles and other special applications. With the completion of a major experimental device in 1961, expenditures for long-term development of thermonuclear power will decrease somewhat, but the research work will continue at about current levels.

Stockpiling and expansion of defense production.—Expenditures for stockpiling and expansion of defense production are estimated to decrease from \$70 million in 1961 to \$52 million in 1962, as outstanding contracts for delivery of strategic materials are progressively completed or terminated. Most of the objectives for the strategic stockpile are completed, and no new expansion programs are in prospect.

Of major concern now are the storage and maintenance of large quantities of strategic materials and the orderly disposal over a period of years of surplus materials. Efficient management is hampered because these materials are in several inventories, each subject

to different statutory requirements. Therefore, legislation is being developed to enable consolidation of the inventories of strategic materials and provide uniform procedures for disposing of surplus materials whenever disposal will not seriously disrupt markets or adversely affect our international relations.

Nonmilitary defense.—Closely related to the major national security programs are the civil defense activities of the Government. These activities are discussed with other community facilities programs in the commerce, housing, and space technology section of this message, under which the expenditures for civil and defense mobilization are classified.

INTERNATIONAL AFFAIRS AND FINANCE

The national security and prosperity of the United States under conditions of peace and freedom require us to maintain our position of world leadership. Thus we must continue to assist in developing the resources and skills needed in many parts of the non-Communist world for the common defense and for economic growth.

Since the end of World War II, military and economic programs launched by the United States have helped to make possible the reconstruction of Europe and have thwarted the advance of Communist domination in most other areas. In recent years, the focus of these efforts has been shifting increasingly to the broader and more difficult problems of helping less-developed countries maintain their independence, build the foundations of growth, and advance the welfare of their people. Accordingly, increasing emphasis is being placed on such aspects of our international programs as development loans, technical assistance, and educational exchange. Greater use of multilateral channels is being fostered.

Expenditures for international affairs and finance programs in fiscal year 1962 are estimated at \$2,712 million. The increase of \$401 million over 1961 expenditures is due mainly to a greater volume of loan disbursements by the Development Loan Fund, to the second payment of our subscription to the Inter-American Development Bank, and to the expansion of activities in Latin America and Africa.

New obligational authority of \$3,102 million is recommended for fiscal year 1962. This is a decrease of \$105 million from the amount estimated for 1961. Increases for special assistance, commodity grant programs, and the second subscription to the Inter-American Development Bank are more than offset by the nonrecurrence of the 1961 supplemental appropriation requested for the new Inter-American Social and Economic Cooperation Program.

Mutual security program.—The military portion of the mutual security program was discussed as an integral part of our national

security effort in the preceding section of this message. For the total mutual security program, this budget recommends new obligational authority of \$4,000 million for 1962, of which \$1,800 million is for military assistance, \$1,950 million for economic and technical programs, and \$250 million for contingencies.

The 1962 recommendation has been determined with consideration for our present balance of payments situation and the steps being taken to improve it. I have recently directed that the use of the funds provided for assistance abroad should emphasize the purchase of the necessary goods and services in the United States. Such foreign pro-

urement as may continue will be largely confined to less-developed countries, most of which do not increase their dollar reserves to any significant extent but tend rather to use their earnings to increase their imports.

Organization and financing of international programs.—Attention has been given constantly to the problem of improving the organization and administration of our international programs. For example, most of the recommendations of the President's Committee To Study the Military Assistance Program have already been fully or partially adopted. As required by section 604 of the Mutual Security Act of 1960, further analysis is being made of ways to improve the overall management and coordination of our various assistance programs. These studies will provide the basis for specific recommendations on organization later in the year when the detailed mutual security program for 1962 is presented to the Congress. Other studies concerning possible changes in the appropriation structure are currently under way.

In addition to possible improvements in the organization of foreign economic activities, the Congress is urged to consider means by which

funds can be provided through the normal budgetary process to meet the needs of more than one specific fiscal year. This applies particularly to programs of long-term economic development and technical assistance in the training of manpower and the creation of basic economic, social, and governmental institutions. The provision of longer term financing should not only enable a more effective use of aid but, in the long run, should be more economical.

Eligibility for assistance.—Legislation is again requested to allow greater flexibility in providing assistance to certain countries which

¹ Compares with new obligational authority of \$3,226 million enacted for 1960 (\$1,331 million military, \$1,895 million economic and contingencies) and \$3,931 million estimated for 1961 (\$1,800 million military, \$2,131 million economic and contingencies).

are not in a position to meet the requirements of the Mutual Defense Assistance Control Act (Battle Act). Complex, time-consuming waiver procedures are now required for cases in which our own interests would be clearly fostered by the prompt extension of aid to countries endeavoring to reduce their dependence on the Soviet bloc.

Economic and financial assistance.—The efforts of less-developed countries in mobilizing their domestic resources for economic growth will have to be supplemented during the next decade by continued investment from the economically more advanced countries. This investment will have to come from four major sources.

First, an increasing share should be private capital, which could increase directly the productive capacities within these countries. Among the steps taken by the U.S. Government to foster this goal are the negotiation of investment treaties and the provision of information on investment opportunities. Efforts are also being made to use, where appropriate, existing guarantee authority. Private sources, such as foundations and other specialized groups, should also continue their substantial contributions to the overseas schools, hospitals, and churches, so important in promoting democratic society.

Second, increased investment may be expected through international organizations. In addition to the International Bank for Reconstruction and Development there are now the International Development Association and the Inter-American Development Bank. These institutions are supported by contributions from many countries. Also, the United Nations Special Fund is receiving increasing subscriptions from member countries. Further, the Congress should

authorize the United States to join the countries of Europe and Canada in the new Organization for Economic Cooperation and Development which will replace the Organization for European Economic Cooperation. The new organization will extend and invigorate the practice of consultation among its members and will help find ways to facilitate the flow of investment funds to less-developed countries.

Third, a greatly increased share of the needed investment must come from the bilateral programs of other industrialized nations. In the post-World War II era many of the other developed countries have succeeded in rebuilding their economies and have established a high rate of economic growth. In recent years they have substantially increased their gold and foreign exchange reserves. The time has come for such countries to augment materially their financing of the growth of the less-developed areas, and there is evidence of growing willingness on their part to do so. Strenuous efforts are being made to persuade our partner nations to accelerate significantly the pace at which they are taking on responsibilities for economic assistance as well as for the common defense.

Finally, common sense, goodwill, and national interest require that the U.S. Government continue substantial assistance. The needs of the less-developed countries cannot be met wholly by the efforts of private investors, international organizations, or other industrial countries.

Loans for economic development.—In 1962, the United States will pay the second installments of its subscriptions to both the International Development Association and the Inter-American Development Bank. However, successful development in many countries is dependent upon additional loans from outside sources. The Export-Import Bank expects to commit \$602 million for development loans, and this budget proposes that \$700 million be made available in 1962 to the Development Loan Fund. Both agencies now have requests for a variety of productive projects in such fields as electric power, transportation, and industrial facilities. In some countries, such as India and Pakistan, loans will be needed on a basis broader than individual projects to insure the success of development plans.

There is a pressing need to approve financing for development projects in several countries over and above the level of funds presently available to the Development Loan Fund. Accordingly, a supplemental appropriation of \$150 million for 1961 is required. This supplemental request, if approved, together with funds already appropriated for 1961, would make available the full amount requested in the 1961 budget.

Mainly because of earlier commitments, expenditures by the Development Loan Fund are estimated at \$425 million in 1962, an in-

crease of \$150 million over 1961. The Export-Import Bank plans to finance its operations without incurring net budget expenditures in 1962 by encouraging private lenders to participate in its loan programs, by using funds obtained from repayments and interest on prior loans, and by selling notes from its large portfolio.

Loans of the Development Loan Fund will continue to be made repayable largely in local currencies in order not to draw on the limited foreign exchange resources of the recipient countries.

Latin America.—A supplemental appropriation of \$500 million is recommended for 1961 for the Inter-American Social and Economic Cooperation Program which was authorized by the last Congress. This amount represents the total authorization and therefore no further appropriation will be required for 1962. These funds will be used for a broad range of projects of direct benefit to the people of Latin America in such fields as housing, education, agricultural improvements, and land utilization.

When plans become firmer, a supplemental appropriation for 1961 should be requested for earthquake reconstruction in Chile under the \$100 million authorization enacted by the last Congress. To cover interim needs a \$20 million grant from mutual security contingency funds has been made available to Chile, and surplus agricultural commodities valued at \$29 million are being shipped under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480).

Defense support and special assistance.—New obligational authority of \$650 million for 1962 is proposed for defense support, a reduction of \$25 million from 1961, and \$298 million is recommended for special assistance, an increase of \$66 million over 1961. These programs not only help maintain substantial military strength by free world countries rimming the Soviet bloc, but also include special economic programs in certain vital countries, and provide for the continuance of other special programs such as malaria eradication. The increase in special assistance funds recommended for 1962 is due principally to the growing need for aid to Africa. Other countries which have had a traditional interest in that continent may be expected to continue the constructive work started there, and their assistance, like ours, should increasingly be channeled through an expanded United Nations effort which we have proposed.

In estimating the requirements for defense support and special assistance, full account has again been taken of the substantial amount of economic assistance in the form of surplus agricultural commodities which may be programmed under Public Law 480. For 1962, the budget estimates provide for placing almost complete reliance on Public Law 480 for financing the Government programs for export of

surplus farm products, but the mutual security program will continue to finance exports which cannot readily be programed under Public Law 480. The requirement that a specified portion of mutual security funds be used to finance exports of these commodities should be eliminated.

Technical cooperation.—The scope and effectiveness of our technical assistance activities have been expanding, and this trend may be expected to continue. Experience has shown that improved human resources within a country are just as vital to development as capital assistance from without. New obligational authority of \$203 million is requested for 1962 for technical cooperation programs, compared with \$184 million enacted for 1961. Part of the increase is for a larger contribution to the United Nations Special Fund and United Nations technical assistance programs to support the continuing expansion of their work which has been made possible by larger contributions from other countries.

Contingency fund and other assistance.—Events of the past year have reemphasized the need for a fund to provide the President with the flexibility to meet international contingencies which cannot be foreseen in the budget. The situation in Africa continues fluid, and major emergency requirements are possible in other areas as well. To provide for such contingencies new obligational authority of \$250 million is recommended under the mutual security program for 1962, about the same as provided for 1961. This is the minimum amount required for the coming year consonant with the responsibilities of the President.

Funds are also authorized under the Mutual Security Act for administration and for contributions to specialized programs such as those for refugees, Atoms for Peace, and children's welfare. For these purposes, new obligational authority of \$99 million for 1962 is recommended. This amount is \$6 million higher than available for 1961, due mainly to expanding administrative needs in Africa and Latin America.

Conduct of foreign affairs.—In 1962, the Department of State plans to expand further its activities in three important areas of its work. The number of diplomatic and consular posts in Africa is expected to increase from 36 in 1960 to 49 by the end of 1962. A Disarmament Administration has been established within the Department of State, and expansion of this activity is proposed. The Department will also intensify its efforts to increase U.S. exports, complementing efforts of the Department of Commerce.

During the calendar year 1960, there were 17 countries in Africa which gained their independence. Official representation with these new governments must be established as early as possible and preparation must be made for representation in other countries soon to be-

come independent. Because of the large number of new nations, a supplemental appropriation for 1961 is requested to cover costs of establishing new diplomatic and consular posts in Africa and raising certain existing consulates to embassy status.

Legislation previously recommended to authorize payment of certain war damage claims of the Philippine Government should be enacted at an early date. The Congress should also act promptly to remove the existing reservation on acceptance by the United States of jurisdiction of the International Court of Justice (the World Court).

Foreign information and exchange activities.—Substantial increases have been recommended in the 1962 budget for exchange programs and the programs of the United States Information Agency in Latin America and Africa, made possible, in part, by reductions in activities in Western Europe. It is essential that these activities be stepped up in these areas to the extent of our ability to do so effectively. The 1962 budget recognizes this need. However, if the developing situation indicates both a further need for additional resources and an ability effectively to utilize them, we should stand ready to expand further these efforts. In Africa, 20 new information centers requiring sizable initial costs will be put into operation in 1961 and 1962, mostly in the newly independent countries. In Latin America, special efforts will continue toward expanding and strengthening activities of the binational cultural centers. Construction of new, more powerful radio facilities for worldwide broadcasting is under way in North Carolina, with completion expected in December 1962. Initial activities are under way toward the construction of a radio facility in Liberia. In 1962, further improvement of facilities of the Voice of America abroad is proposed by quintupling the transmitter power in the United Kingdom and by procurement of a transportable radio relay station to meet special needs on short notice.

The budget also provides for an expansion of cultural presentation activities and exhibits at international fairs abroad. Funds for this purpose are included in the estimates for the United States Information Agency instead of being appropriated to the President as in previous years. The trade mission segment of the program is included in the estimates for the Department of Commerce.

Activities under our cultural exchange agreement with the Soviet Union continue to progress mainly under private auspices. There are plans to exchange three Government-sponsored exhibits beginning this spring, each of which will be shown in several cities. A supplemental appropriation is proposed for 1961 to take advantage of this opportunity to demonstrate American achievements to a wide segment of the Russian people.

Further expansion in the programs of the Department of State for the exchange of persons is proposed in 1962, particularly in Africa. Continuing support of workshops and foreign university chairs in

American studies, as well as assistance to American-sponsored schools abroad, is planned. An increase in the Department's new program of cultural and educational development abroad will permit many new contacts between foreign and American universities. The 1962 estimates include funds for the continued development of the Hawaii Center for Cultural and Technical Interchange between East and West.

COMMERCE, HOUSING, AND SPACE TECHNOLOGY

The Federal Government provides a wide variety of aids to transportation, operates the postal service, fosters local and private initiative in housing and urban renewal, provides financial and other aids to small businesses and to areas suffering from substantial and persistent unemployment, and helps finance civil defense preparations. Expenditures for many of these and other commerce and housing programs will continue to increase as workloads rise and past commitments for construction and expansion fall due. Moreover, the Government's outer space activities are requiring substantially increased expenditures. Nevertheless, the total expenditures of \$3.4 billion estimated for the fiscal year 1962 for commerce, housing, and space technology are \$413 million less than the expenditures now estimated for 1961, primarily because legislation is proposed to increase postal rates and thus eliminate the postal deficit financed from the general fund.

Space exploration and flight technology.—Civil space activities being carried forward under the National Aeronautics and Space Administration include: (1) the development of larger and improved space vehicles, new types of propulsion and equipment, and a wide range of necessary supporting research and development; (2) the development of systems of meteorological and communications satellites; and (3) the search for new knowledge about the universe through unmanned, and eventually manned, space exploration. The NASA also carries on research related to new and improved types of aircraft and missiles, chiefly to support programs of the military services.

Expenditures for civil space programs are estimated at \$965 million during fiscal year 1962, which is \$195 million more than in 1961 and \$564 million more than in 1960. Appropriations of \$1,110 million for 1962, and supplemental appropriations of \$50 million for 1961, are recommended in this budget. Legislation is being proposed to authorize the appropriations required for 1962 and to provide permanent authorization for later years. In addition, amendments to the National Aeronautics and Space Act of 1958 are again being proposed to improve the organization and management of the space programs.

We have just cause to be proud of the accomplishments of our space programs to date and can look forward with confidence to future achievements which will succeed in extending ever further the horizons of our knowledge.

The first attempts to develop communications systems have met with outstanding success with both the Echo I passive communications satellite, which has reflected signals between widely distant stations on the ground, and the Courier active communications satellite of the Department of Defense, which has stored and relayed messages transmitted to it from the ground. We are now ready, therefore, to take the first steps leading to a practical satellite communications system for commercial use. While the special nature of space operations makes it necessary and proper for the Government to take the lead in advancing the needed research and development of satellites for commercial communications use and to conduct the launchings, private industry should participate in the development phase and should be aggressively encouraged to assume the costs of the establishment

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Provide permanent authorization for space programs.
2. Strengthen organization and management of space programs.
3. Modify program of grants for airport construction.
4. Incorporate the Washington, D.C., airports.
5. Make domestic trunk airlines ineligible for future subsidy.
6. Increase aviation gasoline tax to 4½ cents, tax jet fuels, and credit receipts to general fund.
7. Provide flexible interest rates on Government ship mortgage loans.
8. Provide for reimbursement by Panama Canal Company for various costs borne by the U.S. Treasury.
9. Raise highway fuel tax to 4½ cents and repeal pending diversion of excise taxes.
10. Finance forest and public lands highways from highway trust fund.
11. Increase postal rates.
12. Provide permanent authority for major housing programs.
13. Increase reserves of Federal Savings and Loan Insurance Corporation.
14. Revise ceilings on interest rates on veterans, military, and rental housing loans.
15. Extend direct housing loans for Korean conflict veterans but terminate these readjustment benefits for World War II veterans.
16. Authorize loans and grants to assist areas with chronic unemployment.
17. Improve antitrust legislation.
18. Strengthen programs for fallout protection.

¹ Less than one-half million dollars.² Reflects proposed financing of Federal-aid highways in national forests and public lands from highway trust fund.³ Compares with new obligational authority of \$3,784 million enacted for 1960 and \$4,612 million (including \$203 million of anticipated supplemental appropriations) estimated for 1961.

and operation of the commercial system. The recommendations in the 1962 budget, including a supplemental estimate for 1961, provide for moving ahead rapidly with the development of an active communications satellite system for commercial use, and anticipate that private concerns will provide \$10 million in 1962 in support of the program.

In the field of meteorology we have also achieved success with the Tiros I and Tiros II satellites. The 1962 recommendations provide for further experiments with more advanced Tiros and Nimbus satellites, which may provide the basis for an operational system for weather forecasting and research.

In the program for manned space flight, the reliability of complex booster, capsule, escape, and life-support components of the Mercury system is now being tested to assure a safe manned ballistic flight into space, and hopefully a manned orbital flight, in calendar year 1961. Further testing and experimentation will be necessary to establish whether there are any valid scientific reasons for extending manned space flight beyond the Mercury program.

In unmanned space exploration, the scientific information received from our earth satellites and space probes has taught us a great deal about the earth and surrounding space. In the near future, the first launching under the Ranger unmanned lunar exploration program will take place. This program will eventually include the increasingly complex Surveyor and Prospector series. Investigations in the vicinity of the planets Mars and Venus are planned under Project Mariner with initial launchings scheduled for 1962. Large earth-orbiting astronomical and geophysical observatories are also planned as successors to our present scientific satellites.

The success of many of the advanced projects planned for 1962 and future years will depend on the success of the new and powerful Centaur and Saturn launch vehicles. Steady progress has been made on these boosters, which use proven liquid propellant in the lower stages and advanced liquid hydrogen propellant in the upper stages. The weight-lifting capability of the Saturn launch vehicle will surpass any currently known to exist.

Transportation and communication.—Few segments of our economic system are more essential to economic growth and national defense than an adequate and efficient transportation and communication network. This budget reflects important actions under way to modernize Federal transportation and communication programs. As a basis for future legislation, the Congress also has before it a comprehensive study of our Nation's transportation system completed last year by the Secretary of Commerce.

Aviation.—The expanded program to improve air traffic control and navigation services, begun in 1957, is advancing rapidly under the direction of the Federal Aviation Agency. Over this period

budget expenditures for the promotion of civil aviation have risen from \$219 million to an estimated \$811 million for 1962. Large numbers of radars and instrument landing aids, as well as many new navigation aids and other airway facilities, have been placed in operation. Substantial progress has been made in achieving joint use of facilities for air defense and air traffic management purposes. The improvements being provided and those now under active development by the Federal Aviation Agency will help assure accommodation of a growing volume of air traffic with maximum safety and efficiency.

The continuing expansion of the modernization effort will cause expenditures of the Federal Aviation Agency to rise by \$90 million to an estimated \$730 million in 1962. New obligational authority of \$686 million is being requested, primarily for procurement of additional equipment, for operating the airways system, and for conducting research and development of new equipment and techniques.

New legislation is recommended to authorize appropriations for continuing Federal grants-in-aid for airport construction beyond 1961. In this legislation, the present method of providing new obligational authority by contract authorization in substantive legislation should be changed to appropriations which are subject to the normal executive and congressional review process, but still provide for adequate advance planning by localities. For 1962, this budget includes recommended appropriations of \$40 million, which is \$23 million less than the presently authorized level. The reduction reflects the sound policy that the level should progressively be reduced and that, after a reasonable transition period, users and benefiting communities should assume full responsibility for the construction of airports, which should be largely self-financed.

Legislation is again recommended to establish a Federal corporation to operate the Washington National and Dulles International Airports in the Washington, D.C., metropolitan area. This arrangement will provide greater management flexibility to meet changing requirements and permit more business-like operations.

Subsidies to local-service airlines, including intra-Alaska operations and helicopter services in Chicago, Los Angeles, and New York, continue to be excessive. These Federal payments currently average about \$12 per passenger-trip for all trips of local-service carriers. The reduction in subsidy expenditures of the Civil Aeronautics Board from \$87 million in 1961 to \$82 million in 1962 reflects the large non-recurring payments in 1961 to reduce the backlog of unpaid subsidies from prior years rather than any reduction in accruing subsidies. According to current Board estimates, subsidies will rise to a peak in fiscal year 1963 and will remain above \$80 million through 1966. Strong demands for additional services and for new routes to smaller communities could cause further increases in subsidies because the potential traffic is inadequate to pay the full costs of the services.

The dependence of these local-service carriers on the Federal Government should be reduced. Toward this end positive action is needed from both the Civil Aeronautics Board and the Congress. The Board should discontinue the least essential routes and stops in accordance with its use-it-or-lose-it policy, and should also develop other means of limiting Federal support. The Congress should review the basic promotional policy of the Federal Aviation Act, giving special attention to the question of whether the national interest justifies continuing substantial Federal payments to sustain deficit operations for service to points with very limited traffic.

Domestic trunk airlines, now self-supporting, provide more passenger miles of transportation than any other common carriers. In view of this evidence of the industry's growing maturity, the Congress should enact legislation to make trunk lines ineligible for subsidies after a period of subsidy-free operations. This will remove a potential burden on Federal resources.

Airway user charges.—The civilian users of the Federal airways system enjoy substantial benefits from the large and growing Government outlays for improved traffic control and navigation services. Federal costs for operating and improving the airways system, excluding airport grants and weather and other indirect services, now approach \$600 million a year. It is wholly appropriate that civilian users begin to assume a more reasonable share of these costs, most of which are now borne by the general taxpayer.

To achieve this purpose, it is again recommended that the present tax on aviation gasoline be increased from 2 to 4½ cents per gallon and that the 4½-cent tax rate be extended to jet fuels, which are now tax free. In addition, receipts from the existing and proposed aviation gasoline taxes should be placed in the general fund rather than transferred to the highway trust fund as at present. There is no sound reason for using these taxes to finance highway construction. The airlines should be assured that these tax increases may be reflected promptly in fare adjustments.

Promotion of water transportation.—The steadily rising cost of operating U.S. merchant ships is seriously hampering our efforts to achieve a healthy, competitive merchant marine industry. Net expenditures by the Department of Commerce, chiefly the Maritime Administration, in 1962 are estimated at \$338 million, up from \$279 million in 1961. Expenditures for replacement of war-built cargo ships are estimated to rise by \$23 million, and outlays for operating subsidies are expected to be \$32 million more than in 1961.

In order to assist the shipping industry to achieve lower costs and a stronger competitive position, the Government has recently initiated a new research and development program. A primary objective

of this program is to make available the new equipment necessary to mechanize shipboard operations along the lines already well established in shoreside industries. The full cooperation of Government, industry, and labor will be required to assure the success of this program. Established practices and legislative policies must be reassessed, and attention must be focused on measures most likely to enhance the competitive position of U.S. merchantmen in international trade. If the United States is to maintain its position as a maritime nation, if the industry is to be reasonably profitable and less dependent upon Government aid, and if maritime employment is to be stable and wages high, continuous bold innovations are necessary.

It is again requested that the inflexible $3\frac{1}{2}\%$ interest rate on ship mortgage loans made by the Maritime Administration be replaced by authority to charge the Government's full cost for such loans.

Expenditures by the Coast Guard are estimated at \$272 million in 1962, which is \$10 million more than in 1961. This increase reflects the operation of new loran stations, higher repair and maintenance costs, modernization of facilities, and replacement of equipment, such as patrol vessels, rescue helicopters, and aids to navigation.

Construction will continue on the Balboa Bridge across the Panama Canal. Widening of the canal from 300 to 500 feet in the area of the Continental Divide will also continue, in order to accommodate increased ship traffic. As a result of some increase in toll revenues and some decrease in capital outlays, budget expenditures of the Panama Canal Company in 1962 will be \$6 million less than in 1961. The Company should be authorized to reimburse the U.S. Treasury for various costs associated with its operations which are not now recovered, including the increased annuity payable to the Republic of Panama in accordance with the treaty of 1955, and legislation to this end is proposed.

Following extensive study, I have concluded that the commercial activities of the Panama Steamship Line should be discontinued and the Board of Directors of the Panama Canal Company has been requested to take appropriate steps to do so. Commercial shippers now using the Panama Line have been notified of this action, and complete cessation of commercial activities of the Line is to be accomplished by February 10, 1961. Thereafter, the activities of the Line should be confined solely to the transportation of passengers and freight for the account of the Panama Canal Company and the Canal Zone Government. This action will undoubtedly require a reappraisal of the Line's operations, including a review of the need for supplying Company-owned shipping services to the Panama Canal Company from the continental United States, in the light of national maritime considerations and established Government policy to avoid undue competition with private enterprise.

Highways.—The Interstate Highway System has progressed considerably since the enactment of the Highway Act of 1956, with almost 10,000 miles now open to traffic. Active work is under way on another 14,600 miles, of which approximately 1,600 miles are expected to be open to traffic by the end of calendar year 1961. To continue this progress and assure timely completion of the Interstate System, two important legislative actions are required. The highway fuel tax should be increased to 4½ cents per gallon, as previously recommended, and the rate should be continued at this level through 1972, instead of reverting to 3 cents on July 1, 1961, as provided by present law. The unwise diversion of automotive excise taxes from the general fund to the highway trust fund, also scheduled for July 1, 1961, should be rescinded.

Adoption of these recommendations will make it possible to complete the Interstate System in 1973 to meet the traffic needs for which it is designed. The enactment of my previous recommendations to (1) transfer financing of forest and public lands highways, which for the most part are components of the Federal-aid systems, from the general fund to the highway trust fund and (2) retain the receipts from aviation gas taxes in the general fund, will not extend this planned completion date. Under the proposed program, Federal payments from the trust fund for highways in fiscal year 1962 are estimated at \$3,029 million, up from \$2,868 million in 1961.

The Secretary of Commerce, in a report submitted to the Congress this month, is presenting a current estimate of \$37 billion as the total Federal cost of the Interstate System. The estimated construction costs of this 41,000-mile system are about \$1 billion less than in the 1958 estimate, but the new total includes the cost of highway planning and administration not previously included.

Postal service.—During recent years, the Post Office Department has been conducting a large-scale modernization program to improve the delivery of mail and to reduce handling costs per unit. For example, a new system of mail transportation and distribution is now providing overnight delivery of letter mail within all principal metropolitan areas. Modern mail processing systems with electronic and mechanical equipment developed under the direction of the Department are already in operation in 17 major postal facilities, and similar installations will soon be in use in 48 others.

While the modernization program has increased the efficiency of postal operations and will contribute to savings in future costs, it cannot materially reduce the enormous postal deficit. In fiscal year 1962 this deficit is estimated at \$843 million, after deduction of the \$63 million estimated cost of services benefiting the public at large computed in accordance with the principles used by the Congress in previous years. The deficit is largely the result of the

enactment by the Congress in the postwar years of postal pay increases without corresponding rate increases.

In the Postal Policy Act of 1958, the Congress established the policy that postal rates should be kept high enough to recover postal expenses except for the cost of certain public services as fixed by appropriation acts. In accordance with this policy, rate increases adequate to cover such expenses were proposed to the Congress in 1959 and again in 1960. No rate legislation was enacted in either year. With record postal deficits in prospect for the current fiscal year and for 1962, rate increases must be provided promptly to achieve a self-supporting postal service. Accordingly, I strongly urge that additional revenue of \$843 million be provided for the fiscal year 1962 and that the higher rates be made effective by April 1, 1961, in order to reduce the postal deficit for the fiscal year 1961. Such action is necessary to eliminate the drain upon the Treasury of this mounting deficit for which there is no justification in law or in equity.

Housing and community development.—During the past decade, housing construction and improvement have gone forward at the highest level in history. The housing shortages of the postwar period have been largely met, and the housing conditions of the great bulk of the population improved. At the same time, major new governmental and private programs have begun to reverse the blight and deterioration afflicting our urban areas. Thus, a solid base has been laid for greater progress in the decade of the sixties.

In the future, as in the past, the best results will be obtained by emphasizing leadership and financial participation by private industry and by local and State public agencies. Federal assistance can be most effective, most consistent with our free institutions, and least costly to the taxpayers if it emphasizes the supplementary action needed to help overcome obstacles to private and local accomplishment.

The major needs for the immediate future can best be met by assuring private groups and local governments of the continuing availability of existing Federal programs. Unfortunately, at the present time most housing programs require legislative action at frequent intervals merely to continue present operations. These programs are no longer experimental. Their continued availability should not depend upon the enactment of legislation which also often includes controversial changes. Rather, the major existing housing programs, like most other Federal programs, should be authorized permanently, subject only to normal annual budgetary review by the executive branch and the Congress.

Urban renewal.—The nationwide program to rebuild and rehabilitate our cities continues to grow. By the close of the current fiscal year, an estimated 68 projects in 50 cities will be completed, another 577 projects will be under way, and planning for 310 more will be in process.

These 955 projects will ultimately have required a total of almost \$2 billion in Federal grants to pay two-thirds of the net cost. If present trends continue, approximately the same amount may also be needed for Federal purchases of mortgages to finance construction of housing connected with the same projects. This Federal aid will generate much greater private and local investment and will result in substantial increases in property values and in tax revenues to local public agencies.

This vital program should move forward on a basis which gives adequate assurance to local communities of continuing Federal assistance and also places proper emphasis on local participation. Accordingly, permanent authority should replace the present annual statutory limitations on Federal grants, with annual amounts provided through the normal appropriation process. Further, the local share in project costs should be increased from one-third to one-half to reflect more adequately the increases in local tax revenues and other direct benefits to the communities participating in the program. For the fiscal year 1962 new obligational authority of \$300 million is recommended.

Urban planning.—The various housing and urban renewal programs and the Federal-aid highway program have important impacts on the character and development of our rapidly growing metropolitan areas. To help assure that these aids make the maximum contribution to sound community development, the Secretary of Commerce and the Housing and Home Finance Administrator have established a new procedure for the joint use of urban planning grants and Federal-aid highway research and planning funds for comprehensive metropolitan planning. This procedure is intended not only to produce better planning for the use of Federal, State, and local funds, but also to encourage effective coordination and cooperation among the many local governments and the State and Federal agencies engaged in metropolitan development activities. To help carry out the new approach, as well as to aid mass-transit planning and to meet other expanding requirements, it is recommended that the present statutory limitations on appropriations for urban planning grants be removed and that the appropriation for such grants be increased to \$10 million for 1962 from the \$4 million appropriated for 1961.

Public housing programs.—By the close of the fiscal year 1962 an estimated 522,000 federally aided public housing units will be occupied, and construction will be underway on 49,000 more units. Another 49,000 units will be under contract for Federal contributions but construction will not yet have been started on these units. In view of the large number of authorized units not yet under construction, no additional authorization is recommended in this budget. Ex-

penditures for contributions to local authorities will increase in 1962 largely because of subsidies required on newly occupied units.

Federal Savings and Loan Insurance Corporation.—A year ago legislation was recommended to provide needed increases in the insurance reserve of the Federal Savings and Loan Insurance Corporation, which insures the share accounts of institutions representing the largest source of home mortgage financing. Because of the continuing rapid growth of these institutions, the Corporation's reserves are still only 0.66% of the insured liability, and legislation is even more necessary now. Therefore, it is recommended that the present unnecessarily high requirement for investment in stock of the Federal Home Loan banks be reduced, and that insured savings and loan associations be required to make additional prepayments of insurance premiums of approximately the amounts of that reduction. The objective should be to build up the secondary reserves of the Corporation until total reserves reach 2% of the insurance liabilities. This proposal would cause a much more rapid increase in the insurance reserves of the Corporation, by adding an extra \$164 million in 1962. It would not significantly increase the costs to member associations, but would allocate more realistically the combined resources of the Home Loan banks and the Corporation.

Insurance of private mortgages.—The Federal Housing Administration expects to increase its commitments to insure mortgages from about 800,000 housing units in the fiscal year 1961 to over 900,000 units in 1962; about 40% of the 1962 commitments will be mortgages on newly built houses. However, since the present amount of insurance authority will be used up within the next few months, prompt action is needed to prevent interruption of this important program. The Congress should remove the present ceiling on this authority so that home buyers, builders, and lenders can count upon the continued availability of Federal mortgage insurance.

Legislation should also be enacted to make permanent the authority to insure loans on home improvements, which expires October 1, 1961. This program, initiated in 1934, has proved to be an important aid to modernization of existing homes, and its continuance should no longer depend on periodic congressional action.

Statutory ceilings on interest rates for certain types of mortgages insured by the Federal Housing Administration, as well as for direct and guaranteed loans of the Veterans Administration, have from time to time limited the effectiveness of these programs. In the past, the Congress has recognized the need for some increased flexibility in such interest rates in order to attract adequate private capital. In the present situation, the interest rate ceiling of 5¼% on housing loans guaranteed by the Veterans Administration is a serious obstacle to adequate private financing. The similar ceiling on insured mort-

gages for rental housing, especially for the new housing program for the elderly, and the ceiling of 4½% on family housing for members of the armed services also discourage private financing. As previously recommended, these ceilings should be increased or removed by the Congress. The success of the new mortgage insurance program for nursing homes in obtaining private funds through slightly higher interest rates illustrates the importance of adequate flexibility in such rates.

Veterans housing loans.—The last Congress extended the veterans direct housing loan program of the Veterans Administration for another 2 years, provided new obligational authority of \$150 million for such loans for each of the fiscal years 1961 and 1962, and provided for a 2-year extension of the loan guarantee program for World War II veterans. The need for continuing the readjustment benefit programs of direct loans and loan guarantees for World War II veterans has long since passed.

Changes are recommended in the direct loan program to (1) confine this program, beginning July 26, 1961, to veterans of the Korean conflict, (2) extend the program for Korean conflict veterans from the present termination date of July 25, 1962, until February 1, 1965 (the same termination date as for loan guarantees for these veterans), and (3) finance the extended program from funds already authorized, augmented by funds from repayment of loans previously made. These changes will permit a satisfactory program of aid for veterans of the Korean conflict with expenditures of \$85 million in 1962, a reduction of \$15 million from 1961.

Voluntary Home Mortgage Credit Program.—Authority for the Voluntary Home Mortgage Credit Committee expires October 1, 1961. Under present unrealistic interest rate limitations, this program cannot contribute substantially to the financing of guaranteed home loans to veterans in remote areas. Other federally insured loans are, however, being placed for borrowers in such areas and for members of minority groups. The Committee is also now trying to find private financing for mortgages eligible for special assistance by the Federal National Mortgage Association. This program should, therefore, be extended for another 2 years.

Mortgage purchases.—Mortgage financing requirements for housing for displaced families, for elderly families, and in urban renewal areas, will continue to increase in 1962. Despite the progress made by the Voluntary Home Mortgage Credit Committee in finding some private financing, the bulk of the financing needs for these types of housing will continue to be met through mortgage purchases by the Federal National Mortgage Association under its special assistance functions. The Association will require, for this purpose, additional new obliga-

tional authority of \$250 million in 1962; the legislation should authorize provision of this amount through the appropriation process.

Through its secondary market operations trust fund, the Federal National Mortgage Association will purchase an estimated \$1 billion of insured and guaranteed mortgages of all types at market prices. Unlike the special assistance program, which is wholly financed by the Federal Government, almost all of the necessary funds for secondary market operations will be provided by sale of debentures to private investors and by purchase of common stock by mortgage sellers. New obligational authority of \$35 million, however, is estimated to be required for additional Treasury subscriptions to the Association's preferred stock.

College housing.—Legislation enacted by the last Congress provided sufficient authority to continue the present college housing program into the fiscal year 1962. I have previously recommended a new program to be administered by the Department of Health, Education, and Welfare to provide Federal assistance for university facilities of all types through loan guarantees and grants. As a transition to that new and broader program, new obligational authority of \$100 million for college housing loans is recommended for 1962. Together with funds from existing authorizations, this will permit new loan commitments of \$200 million in 1962.

Promotion and regulation of business.—The Federal Government provides a variety of direct and indirect aids to business enterprises. At the same time, Federal regulatory agencies and programs enforce competition and regulate monopoly in many specific areas.

Small business.—Federal assistance to small business will continue to grow in 1962. Financial aid under the Small Business Investment Act to both small business investment companies and to State and local development companies is increasing at a rapid rate. The number of such investment companies is expected to exceed 400 by the end of June 1962, compared to 109 in June 1960, thus expanding the supply of private capital available to small businesses. Other loans by the Small Business Administration will continue at a high level, as will the efforts to assist small businesses in obtaining a larger share of Federal procurement and research contracts and in improving management methods. Special efforts are being made to provide assistance to firms displaced by urban renewal projects and firms in labor surplus areas.

Legislation should be enacted to extend the important program of loans to local development companies, which otherwise expires at the end of the current fiscal year. In addition, legislation is again re-

quested to extend the privilege of simplified filings under the Securities Act of 1933 to a wider range of securities issues, and thus to facilitate small business financing.

Area assistance.—The Department of Commerce, with the assistance of 16 other departments and major agencies, has further extended in the past year the wide range of Federal aids to local communities suffering from severe and chronic unemployment. However, private groups and local public officials must provide the primary initiative in finding successful permanent solutions for the difficult problems of their specific areas.

For the past 5 years I have repeatedly recommended legislation which would provide the authority necessary for more effective Federal assistance without merely substituting temporary Federal aid for indispensable local leadership. Alternative proposals enacted by the Congress, which would have been less effective and more expensive, have been vetoed. The Congress is again urged to enact sound legislation to permit reasonable increases in Federal aid through a program of loans and grants. This program should continue to be administered by the Secretary of Commerce to avoid establishment of an unnecessary new agency. Appropriations of \$83 million for 1962 are requested to initiate the expanded Federal program.

Export expansion.—The national export expansion program launched early last year by the Department of Commerce has already had considerable success. This budget includes recommendations for additional appropriations to help achieve further increases in exports and to place greater emphasis on encouraging travel to the United States.

New York World's Fair.—The Secretary of Commerce, at my request, is developing plans, in anticipation of authorizing legislation, for Federal participation in the New York World's Fair scheduled to open in the spring of 1964.

Regulation of commerce and finance.—Under this budget, the Federal Communications Commission, the Federal Trade Commission, the Interstate Commerce Commission, the Securities and Exchange Commission, and the Civil Aeronautics Board will be further strengthened. The appropriations recommended for these five independent regulatory agencies will finance a staff 40% greater than at the end of 1956, an expansion clearly required by the growth of regulated industries, by new legislative responsibilities, and by the increased complexity of the problems involved. Numerous improvements in agency operations to simplify procedures and reduce backlogs are anticipated from a series of management studies made in recent months. The increas-

ing workload of these agencies increases the need to adjust or impose charges on the regulated industries or activities sufficient to cover the costs of administration.

The antitrust laws should be strengthened by legislation (1) requiring large businesses to notify the antitrust agencies of proposed mergers, (2) empowering the Attorney General to issue civil investigative demands in antitrust cases when civil procedures are planned, and (3) authorizing the Federal Trade Commission to seek preliminary injunctions when it is likely that a proposed merger would violate the law.

Civil and defense mobilization.—Prudent concern for the protection of the civilian population from hazards in a nuclear world makes it necessary to recommend increases for 1962 in appropriations for civil defense. The largest increases for nonmilitary defense will provide funds for increasing medical stockpiles and for the first full-year cost of a program begun in 1961 to match State and local costs for civil defense personnel and administration. Additional funds are also requested for procurement of radiological equipment and for strengthening Federal activities in emergency health and manpower programs.

The Congress and the executive branch have recognized that civil defense is the joint responsibility of Federal, State, and local governments. As exercise of its partnership, the Federal Government has, by leadership and example, implemented a national shelter policy, which recognizes the fallout shelter as the best single nonmilitary defense measure for the protection of the greatest number of people. Under this policy the Federal Government has instructed people in protective measures, conducted a sample survey of existing shelter capabilities, accelerated shelter research, and constructed prototype shelters for example and guidance. Moreover, the Congress has been urged to provide funds for inclusion of fallout shelters in appropriate new and existing Federal buildings. Funds and appropriate legislation are being requested to accelerate these activities in 1962.

In order to strengthen the program, legislation is being proposed to require appropriate fallout shelters in certain new private construction where the Federal Government provides some form of financial assistance. This legislation will also provide for a 1-year program of grants to States to assist in the construction of fallout protection shelters in selected State buildings. Upon the enactment of this legislation, supplemental appropriations will be required.

AGRICULTURE AND AGRICULTURAL RESOURCES

In the fiscal year 1962, Federal programs for agriculture will continue to require heavy expenditures for much the same reason

as in the immediately preceding years: the lack of adequate modifications in the price-support laws to make them conform to the increased efficiency and growing productive capacity of the agricultural industry.

Estimated expenditures for agriculture and agricultural resources in 1962 are \$5.1 billion, which is \$165 million more than the estimate for the current year and \$263 million more than was spent in 1960. Total new authority to incur obligations requested for 1962 is \$4.6 billion, which includes \$936 million to restore, to the extent necessary, the capital impairment of the Commodity Credit Corporation resulting from previous price-support losses, and \$1.7 billion to reimburse the Corporation for estimated costs and losses through fiscal year 1961 of other programs financed through that agency.

Each year that the current unrealistic price-support program is continued complicates further the production adjustments that will have to be made before present Government controls over farm operations can be relaxed. Carryover stocks of wheat continue to rise. Current indications are that by July 1, 1961, wheat stocks will amount to about 1.5 billion bushels, which is more than an average year's production and 2½ times an average year's domestic consumption. Carryover stocks of corn and other feed grains have risen each year since 1952, and by the fall of 1961 are expected to reach 82 million tons, or about one-half an average year's production. While cotton

Expenditures	\$4.8	\$4.9	\$5.1
New obligational authority . . .	5.2	4.7	4.6

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Modify price-support legislation, particularly wheat.
2. Extend and expand conservation reserve concurrent with modification of wheat program.
3. Extend and amend Sugar Act.
4. Establish borrower-owned institution to finance rural electrification and telephone loans.
5. Simplify and consolidate authority of Secretary of Agriculture for making farm ownership and operation loans.
6. Require greater sharing by States in costs of farm disaster relief.
7. Reduce advance authorization for agricultural conservation program.

¹ Less than one-half million dollars.² Compares with new obligational authority of \$5,151 million enacted for 1960 and \$4,696 million (including \$23 million in anticipated supplemental appropriations) estimated for 1961.

carryover stocks are expected to be down slightly by the beginning of the fiscal year 1962 as compared with a year earlier, the cotton program continues to be a substantial drain on the budget, principally as a result of the sale of cotton abroad at prices substantially lower than support levels.

Among the many aspects of the price-support program in need of major changes, the most urgent is the enactment of realistic price-

support legislation for wheat. It is imperative that the Congress take early action so that farmers can make the necessary adjustments in their plans. Because of the time lag between enactment of new price-support legislation and its budgetary impact, legislation enacted in this session of the Congress can have little effect before the 1963 budget. My previous recommendations for wheat legislation allow for considerable latitude in method of approach as long as the legislation deals realistically with the problem.

The last session of the Congress did not extend the authority of the Secretary of Agriculture to bring additional land into the conservation reserve. Since the rental rates needed to induce farmers to place large quantities of surplus-producing land in the conservation reserve depend in large part on levels of price supports, it would be unsound to attempt to set such rates high enough to compete with the present unrealistic level of price supports, particularly for wheat. Therefore, legislation proposed by this administration to extend the conservation reserve through the calendar year 1964 and to expand the program from the present level of 28.6 million acres to a maximum of 60 million acres should be enacted only if satisfactory legislation for wheat is also enacted. An expanded conservation reserve would not be effective unless largely concentrated in areas producing wheat and other surplus commodities. For this reason, the Secretary of Agriculture should be provided with specific authority to give special consideration, in allocating conservation reserve funds, to those States and regions where curtailment of the production of wheat or other surplus commodities is consistent with long-range goals for adjusting production.

Stabilization of farm prices and income.—In fiscal year 1962, expenditures for price supports and other programs to stabilize farm prices and income are estimated at \$3.4 billion, which is \$132 million more than the amount currently estimated for 1961, and \$118 million more than expenditures in 1960. Expenditures for these programs are not subject to regular annual budgetary control, since they are determined mainly by the loan, commodity purchase, and other price-supporting activities that the Commodity Credit Corporation is required to carry out under existing laws. In 1962 farm price support and related activities account for about two-thirds of the estimated expenditures for agricultural programs. The budget estimate assumes that yields per acre of price-supported crops for the 1961 crop year will be in line with recent years. It also assumes a continued favorable level of exports of farm commodities.

This high level of expenditures reflects, directly or indirectly, the continuation of present price supports in the face of a volume of agri-

cultural production that cannot be absorbed by the domestic and world markets at currently supported prices. Total farm production for the calendar year 1960 established an all-time record both on an absolute and a per capita basis. It was 29% above the 1947-49 average, and was achieved with 30% fewer farmworkers and 6% fewer crop acres.

Surplus wheat, cotton, corn, rice, and other commodities are being utilized in our Food for Peace program to promote economic development and common defense and to provide emergency relief for needy people abroad. The largest part of the program is the sale of farm commodities for foreign currencies under title I of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480). Because of the size of past sales, particularly a 4-year agreement with India, additional authority of \$1.1 billion is recommended for the remainder of the calendar year 1961. Titles II and III of this act provide for donating surplus commodities to foreign governments primarily for emergency relief needs and to private relief organizations in support of their activities abroad; over 55 million people benefited this past year from these donations. Continuation of the programs currently carried on under titles I and II will require legislation this year to extend them beyond December 31, 1961.

Surplus agricultural commodities are also made available to the needy at home through the direct distribution program of the Department of Agriculture, which is carried on under the permanent appropriation for the removal of surplus agricultural commodities and through the Commodity Credit Corporation's surplus disposal operations. In the fiscal year 1960, there were donations of 526 million pounds of surplus food, valued at \$59 million, directly to needy families in the United States. In October 1960, there were 3.3 million people in the United States receiving surplus foods through these programs; additional persons benefited from food donations to the school lunch program and to institutions providing aid to the needy.

Since the Sugar Act expires on March 31, 1961, prompt legislative action extending this program is required. In line with my previous recommendation, the Congress should amend the Act to provide the President with urgently needed flexibility in the allocation of quotas.

The National Wool Act, which expires on March 31, 1962, should be extended, and its financing should be shifted to a direct appropriation basis.

To conserve fiscal resources and to implement the principle that identifiable recipients of certain special services should pay for them, legislation is again proposed to permit the Federal Crop Insurance

Corporation to include its administrative expenses in determining appropriate premium rates for crop insurance.

Rural electrification and telephones.—Expenditures of the Rural Electrification Administration are estimated at \$340 million for 1962, and new obligational authority of \$255 million is recommended, including \$100 million for telephone loans and \$145 million for electrification loans.

The Rural Electrification Administration has made a major contribution to the development of rural America. About 97% of our farms now have central station electric service as compared with 11% in 1935. The telephone program also is making a real contribution to a better rural America by improving rural telephone service.

The expanding use of power in the areas served by electric cooperatives, however, requires substantial amounts of new capital each year to provide additional generating capacity and heavier transmission and distribution facilities. More than half of the total power sales by the REA system are made to rural industrial, recreational, and other nonfarm users. These nonfarm users comprise about 80% of the new customers being added.

The capital needs of the Rural Electrification Administration are being financed currently by loans from the Treasury at 2% interest. Loans are made to borrowers at this same rate. While special treatment of these programs through favorable Federal financing was justified in earlier years, the progress that has been made by the local systems in achieving the objectives of the Rural Electrification Act and in developing financial stability indicates that the time has come to plan for methods of financing other than through the Federal Government. To that end, legislation should be developed for a federally chartered institution to finance the future requirements of the rural electrification and rural telephone programs. Such an institution should be owned and managed by the REA borrowers subject to the examination and supervision of the Secretary of Agriculture. To launch the new institution on a sound basis, it should be assisted initially by a Federal loan, with provision for orderly retirement of the loan. Future capital needs of the REA borrowers should be met by the sale of the institution's obligations to the public. Provision should also be made for loans by the institution on behalf of the Secretary of Agriculture to borrowers who are unable to qualify for regular loans.

Farm ownership and operation.—Expenditures for the loan programs of the Farmers Home Administration are estimated at \$231 million for 1962, compared with \$264 million estimated for 1961. Loans are

made by the Farmers Home Administration to borrowers who are unable to obtain credit from other sources at interest rates currently prevailing in their communities, in order to finance farm ownership and enlargement, farm operations, and soil and water conservation. Direct loans for farm ownership and soil and water conservation are supplemented with private loans insured by the Federal Government.

Legislation previously recommended to simplify, consolidate, and improve the authority of the Secretary of Agriculture to make these types of loans should be enacted. Included in this legislation is a proposal to place the operations of the Farmers Home Administration on a revolving fund basis.

Authority to make loans under the farm housing loan program expires June 30, 1961. Extension of this separate farm housing loan authority is not recommended, since loans similar to the farm housing loans would be authorized under the general legislation being recommended relating to the loan authority of the Secretary of Agriculture.

Legislation should be enacted, as recommended previously, to require the States to share a greater part of the costs of farm disaster relief assistance.

Conservation of agricultural resources.—Expenditures in 1962 under the conservation reserve program are expected to be \$357 million under existing legislation. If legislation extending and expanding this program is enacted as proposed in this budget, additional expenditures of \$19 million in 1962 would result. Under the proposal, there would be a net increase of 10.5 million acres during the 1962 program year, bringing the total at the end of that year to 39 million acres. However, most of the increase in expenditures required for the 1962 program would not occur until 1963 and later fiscal years. To the extent that additions of land to the conservation reserve result in curtailment of the production of price-supported agricultural commodities, the added expenditures resulting from extension and expansion of this program will be accompanied by lower outlays for price supports.

An advance authorization of \$100 million is recommended for the 1962 agricultural conservation program. This will affect primarily the expenditures for the fiscal year 1963. In recent appropriation acts the Congress maintained this program at a level which far exceeded my recommendations. As a result, expenditures for the agricultural conservation program are estimated to be \$236 million in 1961 and \$234 million in 1962. The \$100 million advance authorization, together with other aids for soil and water conservation, will provide substantial incentives for the Nation's farmers to meet our high-priority conservation needs.

Federal cost-sharing assistance in the future under this program should be concentrated on conservation measures which will foster needed shifts to less intensive uses of cropland, and assistance should be eliminated for practices which increase capacity to produce agricultural commodities already in surplus supply. Continuation of cost sharing for output-increasing practices directly conflicts with the recommended expansion of the conservation reserve program under which cropland is removed from production.

New obligational authority of \$66 million is recommended for the upstream watershed programs, including \$46 million under the Watershed Protection and Flood Prevention Act. Of this amount, \$10 million is for initiating construction of projects involving an estimated total Federal cost of \$70 million. Expenditures under these programs are expected to be \$65 million in 1962, which is an increase of \$12 million over 1961 and \$21 million over 1960. New obligational authority requested for the Great Plains program totals \$10 million, the same as for 1961.

Research and other agricultural services.—Expenditures for research, education, and other agricultural services in 1962, including \$17 million for purchases of foreign currencies to finance research and market development programs abroad, are estimated at \$357 million, which is an increase of \$22 million over 1961. This increase reflects primarily additional support for the research programs of the Agricultural Research Service and continuing progress on laboratory construction.

Rural development.—The rural development program inaugurated by this administration is successfully stimulating economic progress and growth in low-income farming areas of the Nation. It is becoming widely accepted as a major national approach to helping families in these areas. By June 30, 1961, it is expected that some 350 counties in 39 States will be participating in the program. Among the impressive gains reported in participating areas are the following: (1) new farm crops have been introduced and production on small farms improved; (2) the number of jobs has increased through the establishment of new industries and enlargement of others; (3) income has increased from nonfarm sources such as recreation, tourist services, and expanded business activities; and (4) educational and training programs have been inaugurated for those who have little opportunity to enter commercial farming.

The Federal Government supports this program principally through a redirection and strengthening of existing services and activities. Emphasis is placed on cooperation among Federal and State agencies and local groups. In the Department of Agriculture, the program is conducted as a part of the continuing responsibilities of 10 of its agencies, with general leadership furnished by the Extension Service,

for which an increase of \$2 million is estimated in this budget. Other Federal departments and agencies have accelerated their activities that contribute to the aims of the rural development program. These agencies include the Small Business Administration, and the Departments of the Interior, Commerce, Labor, and Health, Education, and Welfare. All of these activities are carried out under the general guidance of the Committee for Rural Development Program which was established by Executive order.

NATURAL RESOURCES

Sound development of our natural resources is necessary to meet the needs of our growing population and expanding economy. The budget recommendations for the fiscal year 1962 provide for appropriate Federal participation in the development, conservation, and use of these resources, in cooperation with State and local agencies and private interests.

Federal expenditures for natural resources are estimated to be \$2.1 billion in 1962 compared with \$2 billion in 1961. These expenditures are higher than in any previous year.

Water resources.—Approximately two-thirds of the Federal expenditures for natural resources in 1962 will be for water resources activities. The programs of the Corps of Engineers and the Bureau of Reclamation will require expenditures estimated at \$1.2 billion—a record level. Of this amount, \$1 billion will be spent on construction. This includes \$976 million for continuation of work on projects started in 1961 or prior years, \$11 million for first-year expenditures on 37 proposed new project starts, and \$13 million for advance planning of projects needed in later years. A large share of the construction expenditures of these agencies will be for multiple-purpose river basin projects, including flood control, navigation, irrigation, water supply, hydroelectric power, and in some cases related recreational and fish and wildlife benefits.

For the Corps of Engineers, the budget includes appropriations of \$15 million for starting 31 new projects and an additional number of smaller projects costing less than \$400 thousand each. The estimated total cost of building these new projects is \$302 million. Appropriations of \$6 million are also recommended to enable the Bureau of Reclamation to begin construction on five new projects, with an estimated total cost of \$141 million, and to make a loan for one small reclamation project for which the total Federal commitment will be \$5 million.

The 1962 program of the Bureau of Reclamation includes protective works for the Rainbow Bridge National Monument, as required by law in connection with construction of Glen Canyon Dam.

It is again recommended that the Congress authorize construction by the Bureau of Reclamation of the Fryingpan-Arkansas project in Colorado.

A few months ago agreement was reached between the United States and Canada on the basic terms of a treaty for the cooperative development of the water resources of the Columbia River Basin. The proposal envisages the construction in Canada, within a 10-year period, of three major reservoirs and the construction by the United States of the authorized Libby project in northern Montana. The substantial flood control and power

benefits which will result from this agreement will be realized at a much earlier date with materially less cost than would be the case if they were provided by unilateral rather than by cooperative endeavor. The location of the proposed storage reservoirs will not interfere with the cycle for salmon and other anadromous fish, which constitute an important economic and recreational asset of the Pacific Northwest. The Senate should give prompt attention to the ratification of the treaty when it is presented. Following this ratification, preconstruction planning of Libby Dam should be started by the Corps of Engineers.

The previous Congress enacted legislation to authorize negotiation of an agreement between the United States and Mexico for the joint construction of Amistad (Friendship) Dam on the Rio Grande, and appropriated \$5 million for this project. The 1962 budget includes \$12 million to finance further work on the dam as soon as the technical details relating to its construction are approved by the two Governments.

Legislation should be enacted to place the financing of the Bureau of Reclamation and the power marketing agencies of the Department

¹ Compares with new obligational authority of \$2,533 million enacted for 1960 and \$2,049 million (including \$139 million of anticipated supplemental appropriations) estimated for 1961.

of the Interior on a revolving fund basis, retaining annual review and control by the Congress.

Net budget expenditures of the Tennessee Valley Authority are estimated at \$103 million in the fiscal year 1962. The increase of \$48 million over the current year will be largely for construction of power and navigation facilities. Under the authority to sell revenue bonds, enacted in August 1959, the TVA issued \$50 million of such bonds in November 1960. The Authority plans to issue an additional \$140 million in the fiscal year 1962 which, together with power revenues, will provide funds for continuing construction of power facilities and for starting construction of a new steam powerplant in the eastern part of the TVA power area. Construction will continue on Wheeler and Wilson locks and on the navigation features of the Melton Hill project, financed by appropriated funds. The Authority plans to make a payment of \$50 million from power proceeds to the Treasury in fiscal year 1962, of which \$40 million is a dividend and \$10 million is a return of Government capital. A similar payment, estimated at \$51 million, is being made in 1961.

The 1961 and 1962 programs of the TVA contemplate the acquisition of certain coal land or mining rights, on which options have been

taken, in the eastern portion of its coal supply area. Since it has not been clearly established that such acquisitions are necessary to assure an adequate reserve of coal for TVA's operations, I have directed that these actions not be taken without specific Presidential approval.

Research conducted by the Department of the Interior over the past several years has reduced substantially the cost of obtaining fresh water from saline water. Two demonstration plants for conversion of sea and brackish water into fresh water will be completed in the fiscal year 1962. Appropriations of \$3.5 million are recommended for starting two additional plants in 1962, one at Roswell, N. Mex., and the other at a location to be selected on the east coast.

River basin planning commissions.—In addition to the Corps of Engineers, Bureau of Reclamation, Tennessee Valley Authority, and International Boundary and Water Commission, several other Federal agencies participate in phases of water resources programs. The Department of Agriculture assists local groups in watershed protection and flood prevention; the Department of Health, Education, and Welfare has responsibility relating to control of water pollution; and the Federal Power Commission has broad river basin planning authority in connection with licensing construction of private power projects. The Fish and Wildlife Service, National Park Service, and other agencies also participate in certain aspects of water resources projects. Furthermore, activities of State and local agencies and private interests in the field of water resources are of increasing importance. Only with coordinated planning on the part of all groups concerned can there be assurance that all possible uses of water are adequately considered.

To provide for comprehensive, coordinated planning, legislation is being submitted to authorize the President to establish water resources planning commissions as needed in the various river basins or regions. These commissions would be composed of Presidentially appointed members from the various Federal agencies and the States. They would prepare and keep current comprehensive, integrated river basin plans. This proposed general authority would be an improvement over separate laws such as those which established the two *ad hoc* river basin study commissions for the Southeastern and Texas areas.

Cost sharing for local flood protection.—The varied requirements for financial participation by State and local interests in local flood protection projects have resulted in inequities among the various beneficiaries of such projects. In the case of projects of the Corps of Engineers, the Bureau of Reclamation, and the Department of Agriculture, non-Federal contributions range from zero to over 60% of flood protection costs. In previous budget messages, legislation has been recommended to provide an equitable, uniform minimum of 30%

non-Federal cost sharing for all flood protection projects. Although the Congress did not act on that proposal, a forward step was taken in the Flood Control Act of 1960, which provides for a uniform minimum of 20% non-Federal cost sharing on local flood protection projects of the Corps of Engineers authorized by that act. The Congress is urged to broaden this action by requiring a minimum of 30% cost sharing on all local projects providing flood protection benefits which are authorized in the future for the Corps of Engineers, the Bureau of Reclamation, and the Department of Agriculture.

Public domain and Indian lands.—In the fiscal year 1962, expenditures for the conservation and development of the public domain lands, administered by the Bureau of Land Management, will be \$43 million, somewhat higher than in 1961. Receipts from grazing fees, timber sales, and mineral leases on the public domain lands, including the Outer Continental Shelf, are estimated at \$221 million in the fiscal year 1962, an increase of \$55 million over the revenues estimated for the current year. A portion of the estimated increase will result from the increases authorized last year in the fees for noncompetitive oil and gas leases. Some of these revenues are shared with States and counties. Shared-revenue payments to these governmental units in 1962 from the public domain lands amount to \$58 million.

Estimated expenditures of \$63 million for the management of Indian lands in the fiscal year 1962 include \$33 million for construction of roads; for irrigation facilities; and for buildings and utilities, mainly additional school facilities for Indian children who reside on lands held in trust by the United States.

Forest resources.—Some increases in expenditures of the Forest Service in 1962 are needed to carry forward its long-range development program for the national forests. These increases will be for forest roads and trails and for forest protection and utilization, including forestry research, fire prevention, and recreational facilities. A supplemental appropriation of \$69 million is being requested for the fiscal year 1961 to enable the Forest Service to pay for those portions of the forest lands of the Klamath Indians which are not sold to competitive bidders by April 1, 1961 (as required by Public Law 85-731), with expenditures estimated in the fiscal year 1962. These increases will be offset in part by an expected decrease from the expenditures of \$33 million in 1961 for fire fighting in the national forests—the highest annual expenditures on record.

Management of the national forest lands yields substantial revenues, mostly from timber sales and grazing permits. These receipts—which are in addition to the amounts cited earlier under public domain lands—are estimated at \$156 million in the fiscal year 1962. Shared revenue payments to the States in 1962 are estimated at \$29 million.

Legislation is recommended to provide authority for the Secretary of Agriculture to complete acquisition of the remaining lands in the Boundary Waters Canoe Area of the Superior National Forest in order to preserve this unique wilderness area for public use.

Mineral resources.—Amendments to the Helium Act during the last session of the Congress authorize a long-range program for conserving vital helium resources. Under these amendments, effective March 1, 1961, private industry will be encouraged to finance, build, and operate plants to recover helium for sale to the Department of the Interior. Where necessary, the Secretary of the Interior may take direct steps to conserve this important resource. The program is to be financed from borrowing authority, subject to the appropriation process. Supplemental borrowing authority of \$12 million for the fiscal year 1961 is recommended so that the Bureau of Mines can start the program promptly, and provision is made in the 1962 budget to augment this initial amount by \$15 million.

The Bureau of Mines will continue its research on improved methods of production and utilization of coal and other minerals. Under recent legislation, the Department of the Interior will contract with educational, trade, and other organizations for research aimed at early solutions to some of the problems confronting the coal industry.

Recreational resources.—The rapidly expanding use of public recreational facilities is placing great demands on the resources of our national park system. The estimated increase of \$14 million in expenditures of the National Park Service from 1961 to 1962 will provide for needed maintenance and rehabilitation of the park areas and for operation of new facilities and areas added to the system in recent years. Prompt action should be taken on legislation, as recommended last year, to permit the Secretary of the Interior to acquire three of the remaining undeveloped seashore areas for the national park system. Such action will enable these areas to be preserved for public benefit.

The forthcoming report of the Outdoor Recreation Resources Review Commission will provide a comprehensive survey of outdoor recreational resources and needs. The report should be useful as a guide for Federal, State, local, and private interests in their plans for meeting increasing needs for recreation.

Fish and wildlife resources.—Expenditures for fish and wildlife resources in the fiscal year 1962 are estimated at \$84 million, an increase of \$9 million over the current year. Part of the increase will be for management and operation of fish hatcheries and wildlife refuges by the Bureau of Sport Fisheries and Wildlife. Outstanding refuges recently established by the Secretary of the Interior are the Arctic, Kuskokwim, and Izembek wildlife ranges in Alaska, comprising 11.2 million acres, with unique values as waterfowl breeding grounds and with wilderness areas of scenic beauty. Increases for the Bureau of Commercial Fisheries are for construction of oceanographic research facilities, and for biological and technological research to be initiated in 1962 under a special foreign currency program to aid the fishing industry.

General resource surveys.—Expenditures of the Geological Survey will increase primarily as a result of increased interest and participation by the States in the cooperative programs for topographic and geological mapping and water resources investigations.

LABOR AND WELFARE

The labor and welfare programs of the Federal Government have assumed in the last decade a growing role in meeting human needs in our increasingly complex, urbanized society. These programs provide manpower, health, education, science, economic security, and welfare services of great importance to the entire population and also assist many special groups such as the aged, the children, the disabled, the unemployed, and the needy.

Budget expenditures for labor and welfare programs in the fiscal year 1962 are estimated at \$4.8 billion, an increase of \$276 million over 1961. In the last decade these budget expenditures have more than doubled. Labor and welfare benefit payments from the social security and other trust funds, supported largely by payroll taxes on employers and employees, have increased fivefold in the same period to an estimated \$19.6 billion in 1962.

Of estimated expenditures of \$24.4 billion from budget and trust accounts for labor and welfare programs for 1962, an estimated \$13 billion will be for benefits and services for elderly persons. When benefits for veterans and others are added, total estimated expenditures in 1962 for benefits and services for persons who are 65 and over exceed \$16 billion.

New obligational authority recommended for 1962 for labor and welfare programs in the budget totals \$5 billion, and is \$88 million more than estimated for the current fiscal year. The largest program increase is for public assistance, including medical care for the aged. The proposed appropriations for hospital construction grants are lower

than the amounts enacted for 1961, but expenditures will increase by \$13 million as a result of commitments under obligational authority provided in prior years. Recommended appropriations, as well as estimated expenditures, for programs to assist federally affected school districts are reduced for 1962 in view of the modifications proposed in those programs.

Education.—The vitality of our democracy and the productivity of our economy depend in large measure on the development of our human resources through an effective educational system. Primary responsibility for education rests with the local communities and States and with private institutions and groups. The strength of our American educational system flows from its freedom and this broad basis of support. Thus, the Federal role in education is properly a supplementary one, limited primarily to providing assistance where there is a special national concern. For such assistance, the Federal Government will spend in all budget categories about \$1 billion in 1962 for educational activities, including college

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Authorize financial aid for public elementary and secondary school construction.
2. Authorize financial aid for construction of college facilities.
3. Modify programs for aid to schools in federally affected areas.
4. Remove affidavit requirement from National Defense Education Act.
5. Remove limitation on grants to States for administration of employment security programs.
6. Extend coverage of unemployment compensation system to 3 million additional workers.
7. Adjust minimum wage and extend coverage.
8. Strengthen Welfare and Pension Plan Disclosure Act.
9. Assure equal pay for equal work.
10. Improve laws governing hours of work and overtime pay on Federal construction projects.
11. Improve hospital construction grant program.
12. Authorize grants for construction of medical and dental schools.
13. Establish loan guarantee program for construction of group practice medical and dental facilities.
14. Strengthen authority for air and water pollution control.
15. Transfer Freedmen's Hospital to Howard University.
16. Extend coverage of old-age and survivors insurance system to Federal civilian employees and to physicians.
17. Broaden medical aid for aged through voluntary Federal-State programs.
18. Revise military service reimbursement to railroad retirement and old-age and survivors and disability insurance trust funds.

¹ By law the receipts and expenditures for employment security grants are shown as trust fund transactions for 1961 and 1962, and as budget transactions for 1960.

² Compares with new obligational authority of \$4,574 million enacted for 1960 and \$4,937 million (including \$34 million in anticipated supplemental appropriations) estimated for 1961.

housing loans and readjustment aid to veterans, but excluding indirect assistance through research contracts and grants.

In the last few years, it has become increasingly clear that the national interest requires an expansion of Federal activities in the field of education. Accordingly, I recommended in 1958, and the Congress enacted, the National Defense Education Act to assist students, particularly those interested in science, mathematics, and languages, and to help States improve school facilities and services. I have also recommended repeatedly and again recommend the enactment of temporary legislation to provide Federal assistance for construction of primary and secondary school classrooms and for construction of college classrooms and supporting facilities.

As outlined in last year's budget message, the proposed program would stimulate and assist in the construction of \$3 billion of public elementary and secondary schools in the next 5 years by a Federal commitment to pay half the debt service (principal and interest) on school bonds. The cost to the Federal Government over a 30-year period would be about \$2 billion. To help institutions of higher education finance construction of required facilities, the legislation would authorize a 5-year program which would provide (1) Federal guarantees of principal and interest on \$1 billion of non-tax-exempt bonds to be sold by colleges to private investors and (2) Federal grants, payable over 20 to 35 years, of 30% of the principal of \$2 billion of bonds to be issued by colleges. The aggregate Federal cost of the aid to institutions of higher education would be about \$600 million.

The precise requirements for Federal aid to local school districts are difficult to determine because of the inadequacy of available information on the classroom needs of districts in various parts of the country and on their financial capacity to meet these needs. Accordingly, funds are included in the budget for improvement of education statistics, including data on local school construction requirements and the actions local communities and States are taking to meet them.

National Science Foundation educational activities.—Expenditures of \$69 million in 1962 are estimated for graduate fellowships in science and mathematics and for other programs to train new scientists, to improve the teaching of science and mathematics, and to stimulate interest in scientific careers. This represents more than a fourfold expansion in the training programs of the National Science Foundation in 5 years.

Schools in federally affected areas.—The Federal Government has recognized an obligation to assist school districts in which enrollments are significantly increased by its activities. Legislation for this purpose was enacted as a temporary measure during the Korean emer-

gency. However, legislation providing aid to districts with children whose parents both reside and work on Federal property was made permanent in 1958. The budget provides funds required to meet Federal obligations under this program.

The programs of assistance to school districts on behalf of pupils whose parents work on Federal property but live on private taxable property expire on June 30, 1961. This budget includes \$93 million to cover the cost of extending the program for operating grants, but on a modified basis which would discharge more equitably than the expiring legislation the Federal responsibility to these districts. In the case of construction grants, where general aid for needy districts is again proposed, no separate provision is included for continuing the special program for federally affected districts. It is recommended, furthermore, that the Congress defer consideration of any extension legislation until after it has considered and enacted the broad program of Federal aid for school construction which is being recommended. The Congress would then be in a better position to determine the kind of support which should be provided to discharge the Government's obligations to these areas.

Defense education program.—The National Defense Education Act, which will be in its fourth year in 1962, the last under the current authorization, has provided outstanding assistance to American education. Expenditures under this act in 1962 are estimated to be \$190 million, an increase of \$29 million from 1961. The proposed 1962 appropriation of \$194 million will provide modest increases for fellowships, language and cultural training centers, counseling institutes, and area vocational programs. The amount requested for student loans for 1962 is estimated at the 1961 level pending further information as to the rate of applications.

I am again recommending repeal of the provision of the National Defense Education Act that requires a student seeking aid to supply an affidavit stating that he does not believe in or belong to any organization that teaches the illegal overthrow of the Government. This requirement is unwarranted and discriminatory.

Science and research (including libraries and museums).—The advancement of our national security and welfare depends in great measure upon the strength and progress of American science. The Federal Government plays a major role in the development of the Nation's scientific capacity through the research programs of many agencies.

Expenditures for promotion of science, research, libraries, and museums in 1962 are estimated to be \$251 million, which is \$48 million more than in 1961 and over three times the amount 5 years earlier.

In addition to these figures, there are large amounts of expenditures for research and development included in other functional categories.

New scientific knowledge which stems from basic research is indispensable to the technological progress of modern industrialized society. Expenditures of \$119 million are estimated for general purpose basic research grants by the National Science Foundation, chiefly for research projects and facilities, including the support of national research centers and the improvement of graduate school laboratories. This represents an increase of \$29 million over 1961 and a sevenfold expansion in these activities in 5 years. Many other agencies are engaged in the support and conduct of basic research where it is recognized that such fundamental research is important and desirable in the attainment of their objectives.

Increased funds are included in the budget for the National Bureau of Standards, particularly for the completion of the major laboratories and service buildings at its new Gaithersburg, Md., site. Expansion is also provided in the regular scientific program of the Bureau, including initiation of a program for research projects abroad financed with foreign currencies which the Government holds in excess of its normal needs.

Certain scientific areas of broad national interest have been given special attention in recent years by the Federal Council for Science and Technology. These include long-range programs for oceanography, high-energy physics, and the atmospheric sciences, which will be further expanded under this budget. Part of the financing of these activities is included in other functional categories.

The scientific program for the Antarctic is developed, financed, and managed by the National Science Foundation with logistic support from the Department of Defense. Under this program the United States is cooperating with many other nations in the peaceful development of the Antarctic.

Government statistical services.—An estimated \$56 million in obligations is provided throughout the budget for gathering, processing, and disseminating the statistical information which is used by Government, private institutions, and individuals in policy formulation and decision making. Increases in 1962 for collecting the regular recurring statistics are more than offset by the decrease from the funds required in 1961 for the Eighteenth Decennial Census.

Further improvement is planned in the scope and reliability of statistical data on current economic and social conditions. These include information on retail and service trade, foreign trade, manufacturing, construction, crop and livestock production, prices, manpower utilization, characteristics of the unemployed labor force, health and medical care, vital statistics, and education. Provision

is also made for completion of the processing and publication of the results of the 1960 decennial census, for taking the 1962 Census of Governments, for planning the 1963 economic censuses, and for continuing a substantial portion of the work, begun over a year ago, looking toward a major revision of the Consumer Price Index.

Labor and manpower.—The manpower programs of the Department of Labor and other labor agencies help maintain an efficient labor market and a healthy national climate in labor-management relations.

Employment security.—Of particular importance are the job placement services and unemployment compensation payments made through the State employment security offices. In addition to general job placement services, farm people are assisted in finding industrial work and workers in depressed areas are helped in finding jobs in other areas.

Last year the administration proposed, and the Congress enacted, amendments to the Social Security Act that placed Federal receipts and expenditures for the employment security program on a trust fund basis starting July 1, 1960. This is the same arrangement that is used for other social insurance programs. Expenditures for this program are now expected to exceed the 1961 tax receipts, and the Treasury, as authorized by present law, will advance to the trust fund the additional \$36 million needed in 1961. This advance will be repaid with interest in 1962 from the excess of receipts which will come from the increased Federal unemployment tax rate taking effect on January 1, 1961, from 0.3% to 0.4% of covered payrolls.

Based on the level of claims for unemployment compensation, this budget estimates \$41 million more than enacted to date for the limitation on 1961 grants to States for administering unemployment insurance and employment services. Together with the \$326 million already enacted, this brings the estimated 1961 requirement to \$366 million, which is in excess of the \$350 million annual ceiling established by the Social Security Act Amendments of 1960. In view of the number of workers now filing claims for unemployment compensation, it is necessary to ask the Congress to remove this ceiling so that adequate funds can be provided to pay claims promptly.

Last year, coverage of unemployment compensation was extended to about 60,000 additional workers, but further legislation is still needed to extend unemployment compensation to some 3 million workers, most of whom are employed in small businesses employing fewer than 4 workers each. Such action, together with action by States to increase the amount and duration of unemployment compensation benefits, would provide more adequately against economic hardship for the Nation's work force. This program has proved to

be one of the most successful means for combining the interest of the economy as a whole with the interest of the individual worker.

Other labor programs.—In the last several years the operating programs of the Department of Labor have been strengthened by additional funds and new legislation. The 1962 budget provides an increase of \$4 million in appropriations to strengthen further such activities of the Department as the enforcement of the Labor-Management Reports Act and the statistical and research programs of the Bureau of Labor Statistics.

Last year the Secretary of Labor endorsed expanded coverage and a moderate adjustment in the level of the minimum wage under the Fair Labor Standards Act. This recommendation is repeated. Legislation should also be enacted to make the Welfare and Pension Plan Disclosure Act more effective. Legislation is again proposed to assure equal pay for equal work and to improve the laws relating to hours of work and overtime pay on Federal construction projects.

Health.—Americans enjoy a high standard of health service. About three-quarters of the more than \$25 billion devoted annually to health services and facilities in this country is being spent through private channels. However, State and local as well as Federal agencies also play an important role.

Promotion of public health.—The Federal Government's contribution toward improved health care for the American people has been increasing rapidly in recent years. Expenditures for the promotion of public health in 1962 are estimated at \$1.1 billion, more than twice the amount spent only 5 years earlier. Total Federal expenditures for all health programs in the various categories of this budget (including military and veterans hospitals) are about \$4 billion.

In 1962, expenditures by the National Institutes of Health for medical research and training will represent about half the total spent for promotion of public health. The programs of the National Institutes will have multiplied more than threefold from 1957 to 1962.

The budget for 1962 recommends appropriations of \$540 million for the National Institutes, compared to the \$560 million enacted by the Congress for 1961. While this is \$20 million less than the 1961 appropriation, it actually represents a substantial program increase for medical research and training. The reduction results from the elimination in 1962 of nonrecurring projects and from the transfer of programs to other parts of the Public Health Service which were included in the total for the National Institutes of Health for 1961. These decreases more than offset increases for new research activities. Expenditures by the Institutes will rise by an estimated \$76 million in 1962.

Appropriations of \$153 million for hospitals, mainly construction grants, are recommended for 1962. Although this is less than the level of appropriations for 1961, it will not result in a decrease in federally assisted hospital construction. On the contrary, it is anticipated that expenditures in 1962 for this program will be at an alltime high because of the prior authorizations and the volume of construction which has been initiated but not yet completed. The appropriation recommended for 1962 will permit initiation of new projects for general hospital beds, which, together with construction not federally assisted, will be sufficient to provide for growth in population, cover current obsolescence, and reduce the backlog by over 5,000 beds. The 1962 appropriation will also permit starting the same volume of new projects for specialized facilities for long-term care as is provided for in the appropriation for the current year. In recognition of the need for medical care facilities and the continuing rise in the cost of hospital services, new legislation is proposed to encourage coordinated community and regional planning of hospital facilities, to augment research on design and operation of hospitals, and to permit use of grants for high priority modernization projects.

Federal grants for construction of health research facilities in the last 5 years have materially helped expand our Nation's medical research capacity. This budget continues appropriations for this purpose at the full authorization of \$30 million.

One of our greatest national health needs is the expansion of existing schools and establishment of new schools to train doctors and dentists. The shortage of physicians, already a critical factor in the rising cost of medical care, will become increasingly acute as the population and the demand for medical services increase. The Congress should at an early date enact legislation to authorize \$100 million of matching grants over a 5-year period to stimulate construction of additional medical and dental school facilities.

Legislation should also be enacted to authorize a loan guarantee program to facilitate the construction of clinics for the group practice of medicine and dentistry. The sharing of such clinics by groups of physicians and dentists is economical in terms of reducing capital expenditures for such purposes and leads to more complete care for the patient by enabling the practitioners to combine their diverse skills.

In our urbanized and industrial society, environmental and community health is assuming increasing importance. Appropriations of \$104 million for 1962 are proposed for Public Health Service activities in these fields. Increased funds are provided to augment the research and operating arms of the Public Health Service in the fields of air pollution, water pollution, community sanitation, and radiological health control activities. Larger amounts are also proposed for

community health service activities to make the benefits of improved medical knowledge more widely and quickly available. Legislation is again recommended to authorize greater Federal leadership in combating air pollution.

The budget also includes an appropriation of \$50 million for construction of waste treatment works, the full amount authorized for this program. These funds will help stimulate local action to correct immediate pollution problems. The control of water pollution is principally a local responsibility and requires greater financial and enforcement efforts by local interests. The Federal Government can most appropriately assist State and local governments through legislation (1) to strengthen its enforcement powers under the Federal Water Pollution Control Act and (2) to provide flexibility assuring that highest priority is given to waste treatment construction grants for projects which contribute to the reduction of pollution of interstate and coastal streams. Legislation to accomplish these and related objectives should be enacted by the Congress.

Of daily importance to each of us is the work of the Food and Drug Administration in establishing and enforcing standards of safety for food and drugs. The 1962 budget continues a long-standing policy of strengthening this agency, which in 1962 will spend three times as much as it did 5 years earlier.

Legislation should be enacted to transfer Freedmen's Hospital to Howard University and to provide for construction of a new teaching hospital. Such legislation would give essential support to Howard University's program of medical education and end the divided responsibility and control now existing.

Social insurance and other welfare.—Since the Social Security Act first became law in 1935, the United States has made great strides in its public income maintenance programs, both under the social security system and other public retirement systems. Today 93% of our workers are protected under the basic old-age, survivors, and disability insurance program or under other Federal or State-local retirement systems. To assist the unemployed we also have the Federal-State unemployment insurance system, and the Federal Government further provides or helps finance assistance to needy groups through other programs.

In 10 years the benefit payments made because of loss of income due to old age, death, disability, or unemployment under Federal, State, and local programs have trebled, rising in the calendar year 1960 to approximately \$26 billion, of which about \$24 billion was paid from federally administered or federally aided programs. Benefits were paid during the calendar year 1960 to an average of more than

20 million families or single persons. The cost of these benefits, 6% of our national income, is funded from employee and employer contributions and taxes. Benefit payments and taxes under laws already in effect will increase greatly over the years.

Social insurance.—The Federal old-age, survivors, and disability insurance system now covers 9 out of 10 American workers and their families. In fiscal year 1962 it will pay \$12.9 billion in benefits to an average of 16.5 million people of all ages, including 12 million persons aged 65 and over. Coverage should be extended to Federal civilian employees and self-employed physicians, the largest groups of regularly employed persons in our economy not now covered by this system.

Benefit payments and administrative costs are paid from trust funds supported by payroll taxes shared equally by workers and employers and from contributions of the self-employed. The combined employer-employee rate is now 6% of covered payrolls. Under present law it will rise by steps to 9% in calendar year 1969. Expenditures for the administration of this vast insurance system will be increased in fiscal year 1962 to cope with the increased workloads resulting from extension of disability protection to workers below age 50 and from other amendments enacted by the last Congress.

Public assistance.—Total Federal expenditures for public assistance and medical aid in 1962 under existing law are estimated to increase by \$128 million over 1961, largely reflecting the cost of the newly enacted medical assistance program for the aged. In 1962, the Federal share of payments for an average of 6.3 million recipients is estimated to be \$2.3 billion, which is 58% of the total. Caseloads for old-age assistance and aid to the blind are declining moderately, while caseloads for aid to dependent children and aid to the permanently and totally disabled are increasing.

Medical care for the aged.—In recent years, the American people have greatly improved their ability to obtain and pay for medical care through private and nonprofit health organizations. This approach has produced excellent results and should be preserved.

However, some aged persons are finding it increasingly difficult to pay for the medical services which they require. Medical and institutional care for the aged financed by public funds (Federal, State, and local) is currently estimated to cost over \$1 billion annually. The last Congress authorized substantial expansion in Federal assistance for medical care of the aged through (1) increased Federal participation under the regular old-age assistance program and (2) a new program of medical assistance for the aged who are not recipients of public assistance but who nevertheless require aid to pay their medical and hospital bills.

In the 1962 budget, \$400 million is included in the amount shown for public assistance for the old and the new programs of medical care for the aged. There will be a substantial increase in these expenditures in future years under existing law as additional States participate in these programs.

Extension of medical care assistance to the aged through a voluntary program under Federal-State-local auspices—as authorized by the Congress—is sound national policy both from a fiscal standpoint and from the standpoint of encouraging the widest participation of private as well as public agencies in the improvement of medical care for this group. However, under the program approved by the Congress many of the aged will still not be able to obtain needed protection against catastrophic hospital and medical expenses even though under ordinary circumstances they are able to pay their normal medical bills. The Congress is therefore urged to broaden the existing program in keeping with the recommendations which were made by this administration last spring. This would further increase the number who receive assistance.

Public action in providing assistance for medical care and the sharply rising costs of hospital and medical care underline the need for more adequate information regarding medical costs and the best methods of organizing to meet them. This budget provides for augmented research in medical economics under the Department of Health, Education, and Welfare. Likewise, it expands the related program of research and demonstration projects on causes of dependency for which appropriations were first authorized last year.

Military service credits.—Both the Railroad Retirement Act and the Social Security Act provide that military service during certain periods of military conflict should be counted toward the rights of employees in determining benefits even though the employee made no contribution during this period. As has been previously indicated, it is appropriate for the Federal Government to reimburse the trust funds for the cost of benefits paid on the basis of such military service credits. But it is not sound policy for the Government to pay more than the true cost of such benefits or to pay both the railroad retirement and old-age and survivors and disability insurance trust funds for the same military service credits, as the present law requires.

Under statutes now in effect the Federal Government has paid the railroad retirement account an estimated \$400 million more than the estimated cost of military service benefits. At the same time the Federal Government is obliged to reimburse the old-age and survivors and disability insurance trust funds for an estimated \$450 million for military service benefits. The Congress is again urged to enact legislation to recover the overpayments to the railroad retirement account

and to transfer them to the social security trust funds to cover the Government liability. Pending action on such legislation, no appropriations are included in this budget for military service payments to these trust funds.

Other welfare services.—Between 1950 and 1960, the number of disabled people rehabilitated annually through the Federal-State rehabilitation program increased by 48%, to 88,000. The budget for 1962 includes enlarged appropriations of \$97 million for this program, mostly for grants to State agencies for the rehabilitation of an estimated 103,000 persons.

The authorization for the special milk program, financed by the Commodity Credit Corporation, expires June 30, 1961. Appropriations are recommended in this budget to reimburse the Corporation for costs of the 1960 and 1961 operations. This program was originally established as a temporary measure to aid the dairy industry. An evaluation presently under way in the Department of Agriculture will provide a basis for determining the proper level of the program. Pending the results of this evaluation, an appropriation of \$95 million is included under proposed legislation to provide for a continuation of the special milk program in 1962 through a regular annual appropriation. Including this amount, grants to the States through the school lunch and special milk programs of the Department of Agriculture would be \$250 million in 1962.

Our society must continue to encourage all our citizens to achieve the maximum degree of self-realization and economic independence. There are two large groups which as a nation we have recognized must be given special attention—the 16 million aged persons and the 65 million children and young people under 18. A White House Conference on Children and Youth was held last spring. Widespread local and State preparations have been made also for this month's White House Conference on Aging. Such conferences can help State, local, and Federal agencies, as well as private organizations and individuals, to increase opportunities for the aged and for the youth of our land.

VETERANS SERVICES AND BENEFITS

Budget expenditures for veterans programs are estimated to total \$5.3 billion in 1962, which is \$69 million more than in 1961. Continued increases in pensions for non-service-connected disabilities and deaths and in costs of medical care are expected to be largely offset by a decrease in readjustment benefits for veterans of the Korean conflict.

Expenditures for pensions are estimated to increase in 1962 principally because World War I veterans and survivors of World War II

veterans will continue to be added to the pension rolls. These additions reflect both the number of World War I veterans reaching age 65 by 1962 who will be able to meet the eligibility standards, and the effect of the liberalizations provided in the Veterans' Pension Act of 1959.

The decline in the education and training assistance provided to veterans of the Korean conflict foreshadows the approaching end of this second historic venture in providing readjustment assistance for wartime service.

Henceforth, the bulk of the veterans expenditures will be for pensions, compensation, and medical care benefits. Because of the growth in non-service-connected disability and survivor pension costs, veterans expenditures will continue to increase for many years under laws now in effect.

In the 6-year period 1957-62, annual pension, compensation, and medical care expenditures will have risen by over \$1 billion. This increase is in part the result of liberalizations in pension laws and improved standards of medical care. It also results from the advancing age of our veterans, which makes more of them or their survivors eligible for benefits. The trends are illustrated by the fact that from 1957 to 1962 there will be a net increase of 750,000, or about 20%, in disability and survivor cases on the rolls. Of the 22½ million living veterans, 1 out of every 7 will be receiving compensation or pension benefits at the end of 1962.

An increasing proportion of the total expenditures of the Veterans Administration is attributable to disabilities, diseases, or deaths not related to military service. Between 1957 and 1962, non-service-connected costs will increase by 70%, rising from less than one-third to nearly one-half of all budget expenditures for veterans services and benefits.

This trend raises serious questions about the further expansion of veterans programs, particularly since veterans, their dependents, and survivors of veterans total about 80 million people or over two-fifths of our total population. The improvement in recent years of general

welfare programs, for which veterans as well as others are eligible, coupled with the improvements in veterans programs, has reduced the justification for providing additional special benefits to veterans on the basis of non-service-connected factors. Any further expansion of non-service-connected benefits would create serious inequities of treatment between veterans and others in our population. I particularly oppose measures which would increase or make available non-service-connected pensions for veterans of World War I contrary to the principle of need incorporated in the Veterans' Pension Act of 1959.

Readjustment benefits.—Expenditures for readjustment assistance, estimated in 1962 at \$205 million, continue their decline from a post-Korean high mark of about \$900 million in 1957. The principal reduction is in the education and training program, in which the average number of Korean conflict veterans participating will be reduced to 85,000 in 1962, compared to 288,000 in 1960 and 170,000 in 1961.

The previous Congress extended until July 25, 1962, the home loan guarantee program as it applies to veterans of World War II. The direct loan program was similarly extended for both Korean conflict veterans and World War II veterans. It is clear that continuation of

direct loan assistance and of loan guarantee assistance is no longer required to help World War II veterans in their readjustment to civilian life 15 years after the end of that war.

Veterans, like other citizens, can and should participate in the regular housing programs when their special readjustment needs resulting from military service have passed. The loan guarantee program for World War II veterans should therefore be terminated as of July 25, 1961. Changes proposed in the veterans direct loan program have been described with other housing programs elsewhere in this message.

Legislation is again recommended to provide vocational rehabilitation for peacetime ex-servicemen having substantial service-connected disabilities. This would add to other benefits which the Federal Government provides peacetime ex-servicemen, such as unemployment compensation, employment service, and reemployment rights. On the other hand, there is no justification for the extension of special educational or housing benefits to peacetime ex-servicemen. Such benefits cannot be justified by conditions of military service and are inconsistent with the incentives which have been provided to make military service an attractive career for capable individuals.

Compensation and pensions.—Expenditures for service-connected death and disability compensation benefits continue a slow decline from their 1959 peak as compensation rolls are reduced by the deaths of veterans or their widows and by the transfer of many aging veterans to pension rolls. These decreases are offset in small part by the addition of veterans of the Korean conflict and of peacetime ex-servicemen or their survivors. Compensation will be paid to an average of 2,397,000 veterans and survivors of veterans in 1962 compared to 2,410,000 in 1961 and 2,428,000 in 1960.

The continued rise in expenditures for non-service-connected pensions, however, will more than offset the decline in compensation payments. Approximately half of all World War I veterans over 65 will be receiving pensions by the end of 1962, and the pension rolls will carry an average of nearly 2 million veterans and survivors in 1962. The Veterans' Pension Act of 1959 is expected to increase expenditures by adding over 100,000 new beneficiaries to the rolls at an estimated additional cost of \$77 million in 1961. These additional expenditures also reflect higher rates for many veterans on the rolls before July 1, 1960.

Hospitals and medical care.—The budget includes expenditures of approximately \$1 billion for hospital and medical care for eligible veterans in 1962, an increase of \$43 million over 1961. The increase

will permit continued improvement in the quality of medical care in the hospitals and clinics. The new 1,000-bed hospital at Brecksville, Ohio, is scheduled to be opened in 1962 and the new Palo Alto, Calif., hospital addition will be fully activated. Hospital and domiciliary care will be provided for an average of 141,500 beneficiaries per day in Veterans Administration, contract, and State facilities, and a total of 3,622,000 visits for medical services are expected to be made by veterans to outpatient clinics and to private physicians on a fee basis.

Hospital construction.—An appropriation of \$75 million is proposed for 1962, the same as for 1961, as the second step in carrying out a 12-year hospital modernization program of \$900 million initiated in 1961. Of the 1962 appropriation, \$26 million will be for construction of a 1,250-bed replacement hospital at Wood (Milwaukee), Wis., \$11 million will be for replacement of 500 beds at Charleston, S.C.; the remainder will be for planning a new 580-bed general hospital at Atlanta, Ga., planning the replacement of approximately 1,000 beds in the Los Angeles, Calif., area, and for a large number of modernization projects.

Administration.—The general operating expenses of the Veterans Administration (other than the direct costs of administration of medical, dental, and hospital services) in 1962 are expected to be \$162 million, slightly less than in 1961. Reductions in administrative costs are expected to accrue in future years from the program now under way to convert the recording and payment of veterans benefits to automatic data processing equipment.

INTEREST

Interest payments are estimated to decrease by \$400 million to \$8.6 billion in the fiscal year 1962. These payments are almost entirely for interest on the public debt and represent 11% of budget expenditures.

INTEREST

[Fiscal years. In millions]

Item	New obligational authority and budget expenditures		
	1960 actual	1961 estimate	1962 estimate
Interest on public debt.....	\$9,180	\$8,900	\$8,500
Interest on refunds of receipts.....	76	83	83
Interest on uninvested funds.....	10	10	10
Total.....	9,266	8,993	8,593

Market rates of interest have been decreasing from the levels prevailing last year. This makes it possible for the Treasury to pay, on the average, lower interest on securities issued to refinance maturing obligations. The reduction in the public debt during the year, facilitated by the surplus in the budget in 1960 as well as currently, is also helping to a lesser extent to reduce interest payments.

GENERAL GOVERNMENT

Expenditures for general government activities are estimated to rise by \$89 million to \$2.1 billion in the fiscal year 1962. The increase is primarily for more construction of Government buildings and for strengthening the tax collection system.

Central fiscal operations.—The 1962 budget includes an increase of \$36 million in new obligational authority to \$450 million for the

LEGISLATIVE PROPOSALS

1. Authorize consolidated annual reporting of wages for income and social security tax purposes.
2. Charge civil service benefits for certain widows and retired employees to trust fund after 1961.
3. Revise laws regulating Government employment of retired military personnel.
4. Provide annuities for widows and dependent children of Tax Court judges.
5. Restore home rule to the District of Columbia.
6. Authorize nonvoting territorial deputies for Guam and the Virgin Islands.
7. Establish uniform policies governing (1) local taxes imposed on contractor use of Federal property and (2) payments in lieu of taxes.
8. Include goal of price stability in Employment Act.
9. Amend immigration and nationality laws.
10. Enact civil rights legislation.
11. Create additional Federal judgeships.
12. Reimburse citizens for certain World War II property damage.
13. Authorize civilian achievement awards.
14. Incorporate Alaska Railroad.

Internal Revenue Service. This will finance the second year's cost of a program to provide more effective enforcement of our tax laws and will thus reduce the revenue losses which arise from the failure of some individuals and businesses to report their incomes fully or accurately. Ultimately, all aspects of tax administration capable of being mechanized will be handled electronically. With the growth of the economy, tax returns are increasing in volume and necessarily become more complex. Installation of the new and modernized system for the processing of these returns will make possible the collection of taxes with lower expenditures than would otherwise be the case. Legislation should be enacted to authorize the adoption of tax account numbers which are needed for mechanical and electronic processing.

Legislation to authorize the consolidated reporting by employers of wages for income tax and social security purposes should also be enacted. Such legisla-

tion would produce considerable savings for both employers and the Government by reducing paperwork and would also help in enforcing the tax laws. Nearly 4 million employers could be relieved of the need to file for social security purposes 14 million separate quarterly wage reports each year covering over 230 million wage items. The

Treasury Department and the Department of Health, Education, and Welfare have already agreed on the cooperative steps to be taken for improved administration of the tax laws and the social security system once such legislation is enacted.

Presidential office space.—There is a pressing need for providing future Presidents with modern and efficient office facilities. My experience during the last 8 years strongly confirms the conclusion of the Advisory Commission on Presidential Office Space that present facilities “are outmoded, overcrowded, inefficient, and not consistent with effective and well coordinated management of the highest office of the executive branch of the Government.” The Commission recommended: (1) a new building to house only the White House office on the site of the existing Executive Office Building; (2) a new building for other units of the Executive Office; and (3) remodeling of the west wing of the White House for use as quarters for visiting dignitaries.

As a first step in carrying out these recommendations, the Congress should provide funds for constructing a new Executive Office Building on the west side of Lafayette Square, and this budget includes \$26 million of new obligational authority for this purpose. More than two decades ago, the Congress wisely provided new quarters for the Supreme Court of the United States. In recent years, major improvements and expansions have been made in the facilities necessary to carry on the increasingly complex and important duties of the legislative branch. The next logical step is to remedy the serious deficiencies in the office space of the Chief Executive of the United States. I strongly urge the Congress to give early attention to the needed building as well as to the other recommendations of the Commission.

General property and records management.—New obligational authority of \$516 million is requested for the general property and records management activities of the General Services Administration, predominantly for management of existing buildings, construction of new buildings, purchase and distribution of supplies, and custody of Government records. Of this total, \$212 million is for the construction of Federal office buildings, \$26 million more than enacted for 1961. Budget expenditures for new buildings will be \$169 million in 1962, nearly 50% above the 1961 level. This large increase results from an acceleration in construction initiated in 1959 to remedy some serious deficiencies of space which interfere with effective operations in many Federal agencies.

The expanded program of the General Services Administration for improving the utilization of excess Federal personal property is accomplishing significant results. Transfers of property in 1962 from agencies having an excess to those which can use it are expected to be

\$350 million valued at acquisition cost, compared to \$218 million in 1960.

As a part of an overall program for improving supply management, the responsibility for the procurement and distribution of subsistence items for the civilian agencies has been centralized in the Veterans Administration. Substantial progress has also been made toward centralizing in the Veterans Administration the procurement and distribution of medicines, drugs, and pharmaceuticals for the civilian agencies. Progress is also being made in transferring from the Department of Defense to the General Services Administration responsibility for managing the supplies of certain items which are used by civilian agencies as well as by the military services.

Central personnel management and employment costs.—Appropriations of \$147 million are recommended in 1962 for the Department of Labor to provide unemployment compensation for former Federal civilian employees and ex-servicemen. Another \$69 million will be required for workmen's compensation for present and past Federal employees. The new obligational authority recommended for the Civil Service Commission includes \$26 million to finance the Government's share of the new health benefits programs for retired Federal personnel. The remaining appropriations in this category are predominantly for administration of the civil service system.

A long-range policy should be established for financing the civil service retirement system, which covers over 90% of Federal civilian employment. Previous recommendations to accomplish this objective should be enacted. This legislation would assure continued availability in the fund of the full amount of the net accumulations from employee contributions and would establish a definite basis for meeting the Government's share of the costs consistent with the principle that its full faith and credit support the authorized benefits.

Under present law, an appropriation of \$45 million would be required for 1962 to finance the cost of civil service retirement benefits enacted in 1958 for certain retired employees and certain widows or widowers of former employees. Without this appropriation these benefits could not be continued. Legislation is again recommended to assure that in 1962 and later years such benefits are paid from the civil service retirement and disability fund on the same basis as other benefits, without specific annual appropriation.

A number of outmoded and inconsistent statutes now regulate the employment and compensation of retired military personnel in civilian positions with the Government. We should replace this legal maze with a single, rational statute which would eliminate unnecessary dual payments, adequately safeguard the civilian career service, and permit the Government to hire members of this group possessing needed skills under conditions that are fair to the individual.

Efforts must be continued to improve Federal job evaluation and other pay practices so as to make Federal pay, including that at the executive level, more comparable with private enterprise. This is essential to recruit and retain superior personnel for Federal programs, particularly in the middle and upper professional and managerial positions, and to overcome the severe competitive disadvantages with which the Federal Government must now contend in recruiting personnel.

To help attain this objective, the accuracy of comparisons of Federal salary rates with private business rates should be improved. Funds are recommended in this budget for the Department of Labor to continue its recently expanded surveys which provide annual reports on salaries currently paid in private business. In time the Federal Government should make full use of this information as a guide in fixing salaries for its own officers and employees.

Legislation should be enacted to provide a system of survivorship annuities for the widows and dependent children of judges of the Tax Court of the United States comparable to the system already in effect with respect to the other Federal courts.

Civilian weather services.—The successful launching of meteorological satellites has created vast possibilities for increasing our knowledge about the atmosphere and for improving daily weather services and forecasts. To realize some of this potential, an appropriation increase of \$9 million over 1961, to a total of \$70 million, is recommended for the Weather Bureau for 1962. This increase will provide for the establishment of processing facilities to permit the immediate use of worldwide cloud data received from satellites, as well as for increased research in applying this new source of information to improve understanding of atmospheric motion. The budget also continues the efforts of the past several years to transfer to Weather Bureau appropriations the financing of certain meteorological activities of other Federal agencies which are national in scope and serve both civilian and military needs.

Territories, possessions, and District of Columbia.—The expenditures required to meet the Federal share of the financing of governmental operations in the District of Columbia will increase substantially in 1962, primarily because of loans authorized in prior years to meet capital requirements of the area, including a metropolitan sewage system to connect with the Dulles International Airport.

A constitutional amendment to permit residents of the District to vote for President and Vice President is now before the States for ratification. The States should act promptly on this amendment.

Another basic step, recommended on many past occasions, would be the restoration of home rule for the 764,000 District of Columbia residents. I repeat my recommendation in this respect. Such local self-government is essential not only to carry out our democratic principles but also to remove excessive and unnecessary responsibilities from the Federal Government.

To promote the further development of democratic institutions, and in keeping with the growth of local self-government, the Congress should authorize representation of the Virgin Islands and Guam in the Congress through nonvoting territorial deputies.

Intergovernmental relations.—Federal financial assistance to State and local governments plays a large role in financing their operations. In 1962 such aid, including budget and trust funds, will amount to \$7.9 billion and account for a substantial portion of total annual State and local revenues. Continuous attention must be given to Federal-State-local fiscal interrelationships so that they reflect the proper distribution of responsibilities. The Advisory Commission on Intergovernmental Relations established in 1959 can make an important contribution through its work in reexamining intergovernmental relations and fiscal problems.

In this field, a uniform Federal policy is needed (1) defining immunity from local taxation on the use or possession of Federal property in the custody of contractors and lessees, and (2) governing payments in lieu of taxes made by the Government to localities on certain real properties. Legislation on these matters should be enacted in accordance with the recommendations made by the administration in the last session of the Congress, which call for partial restoration of immunity from taxation of Federal property in the hands of contractors or lessees and authorization of a system of payments in lieu of taxation on certain real properties in cases of local hardship.

Other recommendations.—It is again recommended that the Employment Act of 1946 be amended to make reasonable price stability an explicit goal of Federal economic policy, coordinate with the goals of maximum production, employment, and purchasing power now specified in that Act.

In support of our position of world leadership, legislation is again recommended to liberalize and modernize our immigration laws. The quota system should be brought up to date by revising the methods of determining, distributing, and transferring quotas, and the total number of immigrants admitted under quotas should be doubled. A permanent program for admission of refugees should also replace the inadequate and piecemeal legislation now in effect.

The enactment of the Civil Rights Acts of 1957 and 1960, the activities of the Department of Justice in enforcing these statutes, and the contribution of the Civil Rights Commission in identifying basic problems and legislative action required, represent significant progress in the field of civil rights. To permit the Commission to explore more thoroughly the necessity for further legislation in this field, its life should be extended for another 2 years. As part of an effort to extend civil rights in education to all our citizens, the Congress should enact legislation to assist State and local agencies to meet costs of special professional services needed in carrying out public school desegregation programs. Also, legislation should be enacted to establish a Commission on Equal Job Opportunity to make permanent and expand, with legislative backing, the important work of the President's Committee on Government Contracts.

The seriously congested conditions in the courts require that the Congress give early consideration to the creation of additional Federal judgeships as proposed by the Judicial Conference.

It is important that the Congress enact legislation, such as that passed by the House of Representatives last year, to reimburse Americans for certain World War II property damage.

A system of awards to recognize outstanding civilian achievements should also be established, as previously recommended.

Legislation should be enacted to incorporate the Alaska Railroad to place its operations on the same basis as other Federal activities of this type.

Last spring, legislation was introduced in the Congress to enlarge and change the boundaries of the site for the National Cultural Center in accordance with the design for the structure contemplated as a national center for the performing arts on the banks of the Potomac. It is important that such legislation be enacted as early as possible so that the fund-raising activities of the Center's Board of Trustees may be energetically continued.

I have repeatedly urged construction of a freedom monument symbolizing the ideals of our democracy as embodied in the freedoms of speech, religion, press, assembly, and petition. I still believe such a living, ever-building monument would be fitting.

IMPROVEMENTS IN BUDGETING

The budget process is a means of establishing Government policies, improving the management of Government operations, and planning and conducting the Government's fiscal role in the life of the Nation. Whether that role is increasing, decreasing, or remaining unchanged,

Budget Improvement:

LEGISLATIVE PROPOSALS

1. Establish revolving funds for major business-type activities.
2. Extend budget provisions of the Government Corporation Control Act to certain mixed-ownership corporations.
3. Review and reduce number of permanent appropriations.
4. Repeal requirements for reservations of foreign currencies, and require accounting for their use in the same way as dollar transactions.
5. Eliminate requirements for annual authorizations for continuing programs.
6. Authorize the item veto for appropriation bills.

the budget process is perhaps our most significant device for planning, controlling, and coordinating our programs and policies as well as our finances. Thus, the President and the Congress will always need to give attention to the improvement and full utilization of the budget system.

Improvements in presentation.—The budget totals in this document reflect a technical accounting adjustment which affects budget expenditures and budget receipts equally,

and does not affect the budget surplus for any year. This is the exclusion from the totals of expenditures and receipts, for all years shown in this document, of certain interfund transactions, mainly interest payments to the general fund of the Treasury by wholly owned Government enterprises which have borrowed from the Treasury. The amounts involved continue to be included in the figures for each function and for each agency, but are deducted in one sum to reach expenditure totals. Similarly, they continue to be included as miscellaneous budget receipts of the Treasury, but are deducted to arrive at the total of budget receipts. Since the beginning of the present fiscal year, various statements and reports on Government financial operations have been eliminating these interfund payments from budget totals.

Steady progress is being made in applying the principles of performance budgeting. In this budget, the appropriation pattern or activity classifications of several agencies and bureaus have been improved and greater use is being made of program and workload measurement data. Cost-type budgets, which present the most adequate measure of financial performance, are used for more than 80 appropriation accounts for the first time. With these additions, about two-thirds of the appropriation accounts are now presented on a cost-type basis.

Funding arrangements.—Recommendations placed before the Congress in this budget are again based upon the principle that authority

to incur budget obligations and make expenditures should be granted in appropriation acts, rather than in substantive legislation handled outside the regular appropriation process. Of course, the budget totals include—as they have for many years—all of the new obligational authority actually granted each year and the subsequent spending, no matter what the method by which provided. The Congress ought to pass upon all new obligational authority in a regular systematic way as part of the appropriation process. We must never be led into thinking that special funding arrangements, which are a claim against budget receipts or borrowing, are somehow not a part of the budget or not a cost to the taxpayers.

From time to time, the Congress has enacted legislation and appropriations under which additional sums become available for obligation and expenditure annually without further congressional action. These are so-called permanent appropriations. In a few cases, such as interest on the public debt, permanent obligational authority may be desirable. In many other cases, however, permanent appropriations give unnecessary preferential treatment. A complete congressional review is needed of all such provisions of permanent authority, including those to use borrowed money, to enter into contracts ahead of appropriations, and to use collections to supplement appropriations. Those provisions which cannot be fully justified at this time should be repealed.

It is again recommended that major business-type activities of the Government be placed on a revolving fund basis, through which receipts can be used to meet obligations and expenditures, subject to annual review and control by the Congress. Such a system, which is presently applied successfully to all of the Government-owned corporations and many unincorporated Government enterprises, provides a clear display of the business-type nature of these activities, their income or loss from current operations, and the extent to which they are adding to or using up the Government's capital assets. In accordance with legislation enacted in response to a previous recommendation, the loan guarantee program of the Veterans Administration is thus presented in this budget. Legislation should be enacted to provide revolving funds for the Farmers Home Administration, the Bureau of Reclamation, and the power marketing agencies of the Department of the Interior.

A few mixed-ownership Government corporations having authority to draw money from the Treasury or to commit the Treasury for future expenditures are presently outside the Government's budget system. This is largely because of the unrealistic and inconsistent distinction the law now makes between wholly owned and mixed-ownership Government corporations, even though both may affect the Government's finances. All Government corporations with such authority,

namely, the Federal Deposit Insurance Corporation, the banks for cooperatives, and the Federal intermediate credit banks, should be brought within the flexible budget provisions of the Government Corporation Control Act, and thus within the normal budgetary and reporting structure of the Government.

The extensive recommendations made a year ago for the control of foreign currencies generally were adopted by the Congress, and this action has proved helpful in obtaining more adequate budget control of these resources. However, there still remain various special provisions of law, requiring reservations of currencies for certain programs, that hinder the Government in making the wisest use of the foreign currencies coming into its hands. They should be repealed. Expenditures of all foreign currencies owned by the Government and used for its activities should be controlled through the annual budget process and should be accounted for in the same way as dollar expenditures.

The budget process in the Congress.—Although the President presents one budget for the entire Government to the Congress each year, the Congress considers the budget in a multitude of pieces rather than as a whole. The financing methods outside the regular appropriation process, already mentioned, are but one phase of this problem. Another is the tendency to require a double budget process each year for certain agencies—requiring them, first, to seek legislation to authorize appropriations annually and, second, to seek their appropriations. The subcommittee arrangement and time schedule for processing appropriation requests further fragments the budget process. The complete separation of the handling of tax legislation from the consideration of appropriations and expenditures adds to the total problem.

The Congress should therefore provide a mechanism by which total receipts and total appropriations (and expenditures) can regularly be considered in relation to each other. Further, substantive legislation with respect to all continuing programs should be written so that new legislation is not required each year, thus permitting the budget and appropriation process to proceed in an orderly manner:

In accordance with recommendations of the second Hoover Commission, legislation was enacted in 1958 authorizing the Congress to establish limitations on accrued expenditures as a means of enabling more direct control over spending. Limitations were proposed for selected accounts in the last two budgets, but were rejected by the Congress without exception. Therefore, and since the law providing for accrued expenditure limitations expires in April 1962, no such limitations are proposed in this budget.

Provision of item veto.—Future Presidents should have the authority to veto items of appropriation measures without the necessity of disapproving an entire appropriation bill. Many Presidents have recommended that this authority be given to our Chief Executive, and more than 80% of the States have given it to their Governors. It is a necessary procedure for strengthening fiscal responsibility. As in the case of other vetoes, the Congress should have the authority to override an item veto.

In my first budget message to the Congress, I described the philosophy of this administration in the following words:

By using necessity—rather than mere desirability—as the test for our expenditures, we will reduce the share of the national income which is spent by the Government. We are convinced that more progress and sounder progress will be made over the years as the largest possible share of our national income is left with individual citizens to make their own countless decisions as to what they will spend, what they will buy, and what they will save and invest. Government must play a vital role in maintaining economic growth and stability. But I believe that our development, since the early days of the Republic, has been based on the fact that we left a great share of our national income to be used by a provident people with a will to venture. Their actions have stimulated the American genius for creative initiative and thus multiplied our productivity.

This philosophy is as appropriate today as it was in 1954. And it should continue to guide us in the future.

Over the past 8 years, we have sought to keep the role of the Federal Government within its proper sphere, resisting the ever-present pressures to initiate or expand activities which could be more appropriately carried out by others. At the same time, the record of this administration has been one of action to help meet the urgent and real needs of a growing population and a changing economy. For example, Federal expenditures between 1953 and 1961 for aids to education have more than doubled; outlays for public health have more than tripled; civil aviation expenditures have more than quadrupled; highway expenditures are five times the 1953 level; and urban renewal expenditures are more than seven times as great.

The major increases in spending which have taken place have not been devoted to the tools of war and destruction. A military posture of great effectiveness and strong retaliatory capability has been maintained without increasing defense expenditures above 1953, despite

rising costs. We have, fortunately, been able to direct more of our public resources toward the improvement of living conditions and the enlargement of opportunities for the future growth and development of the Nation.

By applying the test of necessity rather than desirability to the expenditures of government, we have made significant progress in both public and private affairs during the past 8 years. And it is significant that requirements have been met while holding budget expenditures to a lesser proportion of the national income than in 1953.

The 1962 budget has been designed to promote further advancement for all of our people on a sound and secure basis. In that spirit, I commend it to the consideration of the next administration and the Congress.

DWIGHT D. EISENHOWER.

JANUARY 16, 1961.

PART I

SUMMARY TABLES

- Table 1. Summary of Budget Receipts and Expenditures
- Table 2. Summary of Budget Expenditures (by Agency)
- Table 3. Summary of New Obligational Authority (by Function and Agency)
- Table 4. Summary of Changes in Status of Public Debt
- Table 5. Summary of Budget and Trust Transactions for Fiscal Year 1962

INTRODUCTION TO PART I

Part I of the budget contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

TYPES OF FUNDS

A basic distinction is made between Federal funds on the one hand, and trust and deposit funds on the other.

The *Federal* (Government-owned) funds are of four types as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Public enterprise (revolving) funds are those which finance a cycle of operations, in which the expenditures generate receipts coming primarily from the public and available for continuing use. They include nearly all of the Government-owned corporations, the postal fund, and various unincorporated enterprises.

Intragovernmental revolving and management funds (including *consolidated working* funds) are those which are created to facilitate financing operations within and between Government agencies. They consist of two types—*intragovernmental revolving* funds which finance a cycle of operations, like public enterprise funds but with receipts primarily from within the Government; and *management* funds which permit the pooling of advance payments from two or more appropriations to carry out certain activities.

The other funds, for which the Government serves in a fiduciary capacity, are of two types—*trust* funds and *deposit* funds. They are explained in the introduction to part III.

BUDGET RECEIPTS, EXPENDITURES, AND SURPLUS OR DEFICIT

The budget totals and the budget surplus or deficit relate only to the Federal funds, and exclude trust and deposit funds. Tables 1, 2, and 3 are therefore limited to transactions of the Federal funds.

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Budget receipts represent the total received for the general fund and the special funds, less (a) refunds of receipts and (b) transfers to trust fund receipts in the five cases where the law provides an indefinite appropriation to a trust fund in an amount equal to certain tax receipts. Gross receipts and the deductions are itemized in special analysis B of part IV.

Internal revenue and customs receipts are stated on the basis of collections received by collecting officers and placed

under accounting control. Other receipts are reported on the basis of confirmed deposits.

Basis of stating budget expenditures.—Tables 1 and 2 include information on budget expenditures. Such expenditures cover the general fund, the special funds, the public enterprise funds, and the intragovernmental revolving and management funds. Expenditures for the public enterprise funds and for the intragovernmental funds are included in the totals on a *net* basis—that is, their collections are deducted from gross expenditures and the results are the net expenditures. Interagency payments and reimbursements to appropriations are also netted; that is, to avoid double counting they are treated only as expenditures of the agency whose appropriation or fund is ultimately bearing the charge. Some incidental reimbursements from outside the Government to appropriations are similarly netted out of expenditure figures.

Under the *checks-issued* basis which is used, expenditures are reported for the fiscal year in which the checks are issued, regardless of when the obligation was incurred or when the goods and services were received. Modifications in this basis are made as follows: (a) Where payment is made in cash instead of by check, the cash payment is an expenditure; (b) where payment is made by the issuance of debt or by an increase in its redemption value, instead of by the issuance of checks, such an issuance or increase is an expenditure; and (c) interest on the public debt, other than increases in the redemption values of savings bonds, is reported on an accrual basis.

Debt and investment transactions.—Receipts never include money obtained from borrowing by any type of Federal fund. Nor are borrowings considered as a deduction in arriving at budget expenditures. Similarly, retirement of debt is always excluded from budget expenditure figures of all types of Federal funds. The purchase of U.S. Government securities, and redemptions or sales thereof, are also excluded from expenditure and receipt figures.

Nonexpenditure transfers.—Transfers to the general fund of earnings and dividends on capital of revolving funds are treated as nonexpenditure transactions of the revolving funds and do not affect budget receipts, just as the investment of general fund capital in a revolving fund does not affect either expenditures or receipts. None of these transactions involves any expense. Dividends and capital returns are called "capital transfers" and are reported in special analysis F of part IV.

Deductions from both receipts and expenditures.—Certain expenses of revolving funds require payments from such funds to the general fund; for example, interest on borrowings. The amounts of such payments are included in the expenditures for the funds concerned and in the receipts of the general fund. The amounts are deducted as a lump sum in arriving at total budget receipts and total budget expenditures for the Government. Details are reported in special analysis F of part IV.

Budget surplus or deficit.—The budget surplus or deficit shown in table 1 represents the difference between the *budget receipts* and *budget expenditures* of a given year. Cash balances, appropriation balances, and surpluses and deficits of previous years are not a part of the calculation.

NEW OBLIGATIONAL AUTHORITY

Table 3 summarizes the new obligational authority—the total of authority becoming available in a given fiscal year for entering into new obligations.

The obligation basis.—Expenditures can be made only pursuant to appropriations or other specific authority granted by Congress. Government agencies are generally permitted by law to incur obligations requiring the future payment of money only when they have an appropriation or other specific authority to do so. Congressional action on the budget must therefore include authority to cover obligations expected to be incurred within the fiscal year, rather than to cover only the expenditures which are expected to be made during that year in payment of obligations.

Types of new obligational authority.—There are three basic types of new obligational authority: Appropriations, contract authorizations, and authorizations to expend from debt receipts. In addition, there are sometimes reappropriations and reauthorizations.

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the appropriation to permit the payment of such obligations is said to be to *liquidate contract authorizations* and it is not a part of new obligational authority. In all other cases appropriations confer authority both to incur new obligations and to pay for them.

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to incur obligations and make expenditures from borrowed money. Such authorizations may take these forms: (a) Authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (b) authorizations for a Government-owned corporation to borrow directly from the public; and (c) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation has the effect of permitting further expenditures to be made (through restoring previously used authority to borrow from the Treasury).

Reappropriations and reauthorizations are actions to continue available part or all of the unused balances of prior appropriations or authorizations which would otherwise expire. When the authorizations thus continued had been previously granted for current operations of the year, the continuation of their availability into a new year constitutes new obligational authority.

Distinction between permanent and current authorizations.—Some new obligational authority is *permanent*, but most is *current*. The permanent items are those under which additional sums become available from time to time under action previously taken by the Congress; no further action is required each year. Most permanent authorizations are in force until repealed; a few are in effect for only a few years as specified in the law. The current authorizations are those enacted by Congress in or immediately preceding each fiscal year.

PROPOSED FOR LATER TRANSMISSION

Tables 1, 2, and 3 identify in separate columns the portion of receipts, new obligational authority, and expenditures which are anticipated under supplemental budget items, not provided for in the appropriation text in this budget, but planned for formal transmittal to the Congress later. Such estimates include, in addition to the various items which are identified in part II, an "allowance for contingencies" to cover items which cannot be foreseen now but which may be transmitted later if the need arises. Congressional action upon this allowance may be requested later, not at a single time nor as a single lump-sum item, but in the form of a number of specific appropriations for individual items.

As a general rule, where legislation is proposed to extend or renew the authorization for current programs, this budget includes, in part II, recommendations for the necessary new obligational authority in the form of detailed estimates ready for congressional consideration when action on the authorizing legislation will allow.

EFFECT ON THE DEBT

Table 4 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount necessary to borrow or available to repay is also influenced by: Changes in cash balances; the result of trust fund transactions; the use of borrowing directly from the public (not Treasury borrowing) as a means of financing budget expenditures of certain enterprises (and the repayments of such borrowing as an application of public enterprise fund receipts); and the change in the amount of checks outstanding and other items in process of clearance through the accounts.

CONSOLIDATED STATEMENT

Table 5 brings together the total financial plan for the Government—the budget figures for Federal funds and the estimates for trust and deposit funds—for 1962; and it presents a consolidated statement of receipts from and payments to the public. The statement not only eliminates interfund payments, but also brings in transactions of certain Government-sponsored enterprises which are not otherwise reflected in the budget, converts to a cash basis those expenditures which are made in the form of debt issuances (or increases in the redemption value of debt), and eliminates noncash receipts resulting from seigniorage. Details and further explanations are given in special analysis A of part IV.

CLASSIFICATIONS

Receipts are classified in tables 1 and 5 by *source*, a classification which is set forth in detail in special analysis B of part IV.

Expenditures and new obligational authority are classified in two ways in the part I tables. A classification by *function*, used in tables 1 and 5 and the first part of table 3, groups transactions according to broad governmental purposes; subcategories of this classification as applied to Federal funds are set forth in special analysis C. A classification by *agency*, used in table 2 and the second part of table 3, shows transactions by major organizational units of the Government, with most agencies that are independent of the ten executive departments being grouped together. The main entries in this classification correspond to "chapters" in part II of the budget and to the way in which part III is organized.

TABLE 1
SUMMARY OF BUDGET RECEIPTS AND EXPENDITURES

Based on existing and proposed legislation

[In millions of dollars]

Description	1960 actual	1961 estimate			1962 estimate		
		Under existing laws and author- izations enacted or recom- mended	Proposed for later trans- mission	Total	Under existing laws and author- izations enacted or recom- mended	Proposed for later trans- mission	Total
BUDGET RECEIPTS (special analysis B):							
Individual income taxes.....	40,715	43,300		43,300	45,500		45,500
Corporation income taxes.....	21,494	20,400		20,400	19,900	1,000	20,900

Deduct interfund transactions (included in both receipts and expenditures) (special analysis F).....	694			676			667
Total budget expenditures.....	76,539			78,945			80,865
Budget surplus (+).....	+1,224			+79			+1,468

¹ Includes reduction of \$314 million reflecting proposed rescission of appropriations for employment security now provided from the Unemployment trust fund.

² Includes proposed postal rate increases of \$160 million in 1961 and \$843.1 million in 1962.

³ Includes proposed temporary premium rate increase of \$164 million for the Federal Home Loan Bank Board.

⁴ Includes proposal to charge to the trust fund civil service benefits amounting to \$44.6 million for certain widows and retired employees.

⁵ Less than one-half million dollars.

- District of Columbia

INTRODUCTION TO PART II

Part II contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Material is also included on a few trust funds which require congressional action.

This part of the budget begins with 4 summary statements (tables 6 through 9) which supplement the tables of part I. The remainder of part II is arranged in chapters reflecting the organization of the Government. Each chapter has summary tables, followed by details for each account.

SUMMARY TABLES AND THEIR CONTENTS

BUDGET AUTHORIZATIONS AND EXPENDITURES

Listing of accounts.—A principal table for each chapter shows the new obligational authority and budget expenditures by appropriation or fund account. It is arranged by bureau or comparable organization unit and for each such unit, is divided into several sections: Current authorizations (other than for public enterprise and intragovernmental funds), permanent authorizations, public enterprise funds, intragovernmental funds, and items proposed for later transmission. However, supplementals required in 1961 to cover the Federal employee pay increase enacted last year are shown with the accounts to which they relate.

Authorizations by type.—Forms of new obligational authority other than appropriations are set forth under the applicable account titles, identified by separate line entries. A recapitulation shows the authorizations divided between current and permanent and classified by type. In this recapitulation new obligational authority for public enterprise and intragovernmental funds is classified with other authority of the same type. The figures are summarized in table 7.

Expenditures from 1962 authority.—The final column shows the portion of the expenditures in the budget year which is estimated to result from new obligational authority for the same year. It is generally assumed that prior year balances available in commingled accounts will be obligated before the new authorizations are obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience.

TRANSACTIONS OF PUBLIC ENTERPRISE FUNDS

A second table in each chapter is used for public enterprise funds. It shows gross expenditures, receipts from operations, and budget expenditures (the difference between the two other figures). Gross expenditures and receipts are derived from the detailed business-type budget statements, which show expenditures and receipts on an accrual basis with a single adjustment (on either the expenditure or receipt side but not both) for the conversion from an accrual to a checks-issued basis, net. The figures from the chapters are totaled in table 9.

UNEXPENDED BALANCES CARRIED FORWARD

An analysis of unexpended balances for each chapter shows the balances of budget authorizations carried forward at start and end of the past, current, and budget years. These balances are summarized in table 8.

Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time or without time limit. In the case of those which are for a specific period of time, unobligated balances are written off at the end of that time, but obligated balances are carried forward indefinitely to pay outstanding obligations lawfully incurred.

In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be 1 or 2 years or even longer.

The unobligated balance for each account represents the difference between the unexpended balance and the net obligations outstanding. Net obligations outstanding represent the unpaid obligations (both those which have accrued into liabilities and those which are undelivered or unperformed) less the accounts receivable and intragovernmental orders for services or material which have been accepted but have not yet become receivables.

RELATIONSHIP OF TRANSACTIONS AND BALANCES

The relationship between new obligational authority, obligations incurred, and budget expenditures for each year is shown in another table of each chapter, and summarized for the Government in table 6.

The obligations incurred constitute the most significant step between the opening and closing entries. The other lines represent balances carried forward between years; transfers between chapters; and writeoffs, restorations, and adjustments.

Obligations incurred, net.—The obligations incurred are stated on a gross basis in the detailed schedules, but are summarized on a net basis, consistent with the method of stating budget expenditures and new obligational authority. Thus, the summary figures are based on total obligations incurred less reimbursements to appropriation accounts, revenues and other receipts of revolving funds, and recoveries of prior obligations.

Writeoffs, restorations, and adjustments in availability.—Writeoffs of unused balances of authorizations occur in four ways: (a) rescissions by act of Congress; (b) the automatic lapsing of unobligated balances when an appropriation expires for purposes of obligation; (c) the return of capital and transfer of dividends from revolving funds to the general fund; and (d) adjustments in the obligated balances of expired accounts due to the payment of obligations in smaller amounts than anticipated or to the amendment or canceling of obligations. Restorations of balances previously written off occur in the case of expired accounts when the balances left for payment of old obligations are insufficient to cover them, due to payments in larger amounts than anticipated, the amendment of obligations, or the discovery of previously unrecorded items. Such restorations are netted in the table with other adjustments.

RECAPITULATION BY FUNCTION

The final table of each chapter summarizes the new obligational authority and expenditures according to the functional categories used in special analysis C of Part IV. Each line on this table consists of the total of the figures appearing on the first of the chapter summary tables opposite the corresponding functional code number.

FORM OF DETAILED MATERIAL

For each appropriation, the budget includes certain detailed material, as follows: (1) appropriation language, if applicable; (2) a schedule of program and financing; (3) a narrative statement on program and performance; (4) a schedule of object classification. An exception occurs in the case of certain permanent appropriations and older appropriation accounts on which only a residual balance remains; such accounts of a bureau or independent agency are often combined into a single presentation instead of having separate schedules. Where the obligations fall in a single object class, the classification is identified in the program and financing schedule, rather than in a separate schedule.

For revolving funds, there are usually three additional schedules covering (5) sources and application of funds; (6) revenue, expense, and retained earnings; and (7) financial condition. For some intragovernmental funds the program and financing schedule is omitted.

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1962 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for later transmission. The language of the 1961 appropriation acts is used as a base. Following the language are citations to relevant laws and the appropriation act from which the text is taken, as in this example:

SALARIES AND EXPENSES

For necessary expenses, including uniforms or allowances therefor, as authorized by law (5 U.S.C. 2131), and services as authorized by section 15 of the Act of August 2, 1943 (5 U.S.C. 55a), [**\$8,912,500**] \$10,915,000. (15 U.S.C. 77a-77bbb, 78a-78jj, 79-79z-6, 80a1-80a52, 80b1-80b21; 11 U.S.C. 501-676; 5 U.S.C. 1001-1011; 60 Stat. 810; Independent Offices Appropriation Act, 1961.)

Roman type shows the text used in the 1961 appropriation acts. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of two parts. In the section for program by activities, costs or obligations are classified by purpose, program, or project.

Program and Financing (in thousands of dollars)			
	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Full disclosure provisions	2,105	2,539	3,436
2. Prevention and suppression of fraud	3,229	3,693	4,051
3. Supervision and regulation of securities markets	217	243	254
4. Regulation of investment and public utility holding companies	500	650	744
5. Corporate reorganizations	288	329	330
6. Operational and business statistics	225	243	245
7. Executive and staff functions	932	1,049	1,087
8. Administrative services	681	772	790
Total program costs ¹	8,168	9,518	10,915
9. Unfunded adjustment to total operating costs: Property transferred in (-) without charge, net	-16	-4	
Total program costs, funded	8,152	9,514	10,915
10. Relations of costs to obligations:			
Costs financed from obligations of other years, net (-)	-58		
Obligations incurred for costs of other years, net		4	
Total obligations	8,094	9,518	10,915
Financing:			
Unobligated balance lapsing	6		
New obligational authority	8,100	9,518	10,915
New obligational authority:			
Appropriation	8,100	8,912	10,915
Proposed supplemental due to pay increases		605	

¹ Includes capital outlay as follows: 1960, \$45 thousand; 1961, \$32 thousand; 1962, \$59 thousand.

The financing section shows the appropriation provided and other means of financing the program, and the disposition of amounts not used during the year.

Where the data are available in the accounting system, cost-type budgets are presented, as in the preceding example. In such cases, figures opposite the activity entries are the value of goods and services consumed in carrying out the program, in the case of operating costs; and they are the value of capital assets received, in the case of capital outlay programs.

The relation of costs to obligations is summarized in one or two lines on this schedule, but is amplified further in an additional table inserted in the narrative statement:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by activities)	18	6	10	10
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	81	35	35	35
Total selected resources at end of year	99	41	45	45
Selected resources at start of year (-)	-99	-41	-45	-45
Costs financed from obligations of other years, net (-)		-58		
Obligations incurred for costs of other years			4	

Obligations refer to orders placed, contracts awarded, loan agreements made, and services received during the year, regardless of the time of payment. Total obligations are always shown; activities are reflected on an obligation basis where cost data are not available. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable the narrative statement indicates the expected accomplishment in relation to the financial estimates, and it gives some measures of program and performance.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a classification of obligations, costs, or accrued expenditures according to a uniform list of objects, as follows:

Object Classification (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
11 Personnel compensation:			
Permanent positions	6,811	8,031	9,190
Positions other than permanent	25	18	20
Other personnel compensation	72	45	52
Total personnel compensation	6,908	8,094	9,262
12 Personnel benefits	432	566	647
21 Travel and transportation of persons	270	338	335
22 Transportation of things	5	10	10
23 Rent, communications, and utilities	213	220	312
24 Printing and reproduction	29	38	36
25 Other services	103	146	140
26 Supplies and materials	89	104	114
31 Equipment	45	32	59
Total obligations	8,094	9,518	10,915

The object classes reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

The complete list of object classes is as follows:

10 PERSONAL SERVICES AND BENEFITS	30 ACQUISITION OF CAPITAL ASSETS
11 Personnel compensation	31 Equipment
12 Personnel benefits	32 Lands and structures
13 Benefits for former personnel	33 Investments and loans
20 CONTRACTUAL SERVICES AND SUPPLIES	40 GRANTS AND FIXED CHARGES
21 Travel and transportation of persons	41 Grants, subsidies, and contributions
22 Transportation of things	42 Insurance claims and indemnities
23 Rent, communications, and utilities	43 Interest and dividends
24 Printing and reproduction	44 Refunds
25 Other services	
26 Supplies and materials	

A personnel summary is appended to the object classification schedule, as illustrated:

Personnel Summary

	1960 actual	1961 estimate	1962 estimate
Total number of permanent positions.....	1,000	1,090	1,235
Full-time equivalent of other positions.....	7	4	5
Average number of all employees.....	952	1,035	1,170
Number of employees at end of year.....	980	1,100	1,245
Average GS grade.....	8.9	9.2	9.3
Average GS salary.....	\$7,114	\$7,801	\$7,881

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments. The "number of employees at end of year" represents the number of (a) full-time and regularly scheduled part-time employees in pay status on the last workday in June, and (b) intermittent employees who work at any time during June. This is the basis for reports of the Civil Service Commission.

Average grades and salaries are computed arithmetically. Thus the average salary sometimes falls outside the salary range of the average grade.

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

For all revolving funds, there is a presentation of funds applied and provided, other than borrowings and other financing transactions.

The statement generally reflects receipts and expenditures on an accrual basis; an adjustment is made for changes in selected working capital (current assets, other than cash and inventories for sale or manufacture, less current liabilities) in either section of the statement as appropriate. Because of such an adjustment, the gross expenditures shown on the statement, less the receipts from operations, equal budget expenditures on a check-issued basis, as in the following example:

Sources and Application of Funds (Operations) (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Gross expenditures (funds applied):			
Acquisition of equipment.....	76	71	73
Operating expenses.....	3,071	2,736	2,930
Increase in selected working capital.....	259		
Total gross expenditures.....	3,406	2,807	3,003
Receipts from operations (funds provided):			
Revenue.....	5,473	3,674	4,154
Decrease in selected working capital.....		199	36
Total receipts from operations.....	5,473	3,873	4,190
Budget expenditures.....	-2,067	-1,066	-1,187

Since the statement is built on the basis of transactions which affect working capital, it excludes depreciation, losses on loans, and other "nonfund" transactions.

STATEMENT OF REVENUE, EXPENSE, AND RETAINED EARNINGS

For revolving funds there is also presented a statement of revenue and expense, computed on an accrual basis, and

the resulting net income or loss for the year. This statement is usually on a full accrual basis, including sums for depreciation, provision for losses on receivables, etc. Where a fund consists of several programs, revenue and expense may be identified for each; otherwise they are shown only for the fund as a whole, as here illustrated:

Revenue, Expense, and Retained Earnings (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Revenue.....	5,473	3,674	4,154
Expense.....	3,112	2,782	2,980
Net operating income for the year.....	2,361	892	1,174
Analysis of retained earnings:			
Retained earnings, beginning of year.....	2,061	3,089	2,485
Transfer to "Salaries and expenses, Mexican farm labor program," net.....	-1,327	-1,496	-1,519
Prior year adjustment, not affecting working capital.....	-6		
Retained earnings, end of year.....	3,089	2,485	2,140

The statement includes an analysis of the retained earnings or the cumulative deficit. This analysis shows any additions to earnings, other than net income for the year, any charges made against retained earnings, and the balance of profits kept in the enterprise as of the end of the year (whether in the form of cash, inventories, other current assets, or fixed assets).

STATEMENT OF FINANCIAL CONDITION

For each revolving fund there is presented a balance sheet of assets, liabilities, and investment of the Government at the close of the year, as in this example:

Financial Condition (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Assets:			
Cash with Treasury.....	3,369	2,939	2,607
Accounts receivable, net.....	18	11	14
Supplies.....	105	103	103
Deferred charges.....	170	150	150
Land, structures, and equipment, net.....	372	397	420
Total assets.....	4,034	3,600	3,294
Liabilities:			
Current.....	507	677	716
Government investment:			
Non-interest-bearing capital (start and end of year).....	438	438	438
Retained earnings.....	3,089	2,485	2,140
Total Government investment.....	3,527	2,923	2,578

The balance sheet excludes balances of appropriations or borrowing authorizations which have not yet been paid into the revolving fund. The section on investment of the Government is divided into three subsections as appropriate: (a) interest-bearing capital, (b) non-interest-bearing capital, and (c) retained earnings.

Because the balance sheet is on an accrual basis, it does not reflect the obligations incurred which have not yet matured into liabilities, nor does it reflect unfilled customer orders received and available as a basis for obligation in the case of intragovernmental revolving funds. Therefore, there is normally appended to the balance sheet a schedule which shows the unobligated balance, relating it to the unexpended balance and showing the computation of the obligated balance as in the following example:

Status of Certain Fund Balance (in thousands of dollars)

	1959 actual	1960 actual	1961 estimate	1962 estimate
Unexpended balance: Cash.....	2,629	3,369	2,939	2,607
Obligated balance, net:				
Current liabilities.....	757	507	677	716
Unpaid undelivered orders.....	40	71	50	50
Accounts receivable, net, and cash in transit (-).....	-47	-18	-11	-14
Total obligated balance.....	750	560	716	752
Unobligated balance.....	1,879	2,810	2,223	1,855

LIBRARY OF CONGRESS

The Library of Congress, established in 1800, is not only the library of the Congress itself, but is also the principal general library of the Government of the United States. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the oriental languages, etc., and manuscripts, maps, music, motion picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of the general and basic services connected therewith, including

the Legislative Reference Service, certain specialized functions are performed: registration of copyrights, catalog card distribution, and the service of books in raised characters and talking books to the blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1960 and estimated 1961 and 1962 are (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
General and basic services:			
Acquisition of library materials.....	1,216	1,381	1,450
Organization of the collections.....	2,754	3,017	3,136
Reader and reference services.....	1,931	2,147	2,274
Maintenance and protective services.....	991	1,335	1,408
Executive direction and general administrative services.....	890	968	1,018
Total general and basic services.....	7,782	8,848	9,286
Special service to the Congress: Legislative Reference Service.....	1,451	1,780	1,843
Specialized services:			
Copyright.....	1,449	1,589	1,617
Catalog card distribution service.....	1,980	2,101	2,388
Books for the blind.....	1,617	1,723	1,786
Total specialized services.....	5,046	5,413	5,791
Total obligations.....	14,279	16,041	16,920

The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, working funds, and allocations.

Estimates for the physical equipment, maintenance, and operation of the Library buildings are carried under the request of the Architect of the Capitol.

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Library of Congress, not otherwise provided for, including development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; rental of buildings in the District of Columbia; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; **[\$7,667,800] \$8,510,200: Provided, That not to exceed \$50,000 of the appropriation granted under this head in the Legislative Branch Appropriation Act, 1961, is hereby continued available until June 30, 1962. (2 U.S.C. 131-166; 5 U.S.C. 150; 17 U.S.C. 1-215; 20 U.S.C. 91; Legislative Branch Appropriation Act, 1961.)**

Appropriation.....	7,160	7,668	8,510
Proposed supplemental due to pay increases.....		455	

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The Library's collections are developed in accordance with established acquisition policies: materials are procured by purchase, gift, exchange, copyright deposit, transfer, and official deposit; and materials are selected for addition to the permanent collections. The objective for 1962 is: continued improvement in acquisitions procedures and in exchange relations with institutions in the more important areas of the world. The collections totaled 38,995 thousand items as of June 30, 1960, and consisted of 12,075 thousand books and pamphlets; 16,531 thousand manuscript pieces and 10,389 thousand maps, pieces of music, reels of microfilm, photographs, and other miscellaneous items. Of the items received, about 1 million are added to the permanent collections annually. Those received from various sources in 1960 and estimated for 1961 and 1962 are as follows (in thousands):

Description	1960 actual	1961 estimate	1962 estimate
Purchase.....	524	555	550
Deposit by virtue of law:			
Copyright.....	391	392	395
Other.....	602	650	650
Transfer from Federal agencies.....	1,668	1,700	1,700
Official donation from State and local agencies.....	104	120	130
Exchange.....	655	700	750
Gift from individual and unofficial sources.....	840	1,000	1,000
Total.....	4,784	5,117	5,175

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs and the main National Union Catalog (card catalog) are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1962 are the cataloging of a larger number of the materials received during the year particularly those in oriental languages; improved cataloging methods and procedures to assure the usefulness of the collections; and the filing into, and general maintenance of, the card catalogs on a more current basis.

Selected performance data for 1960 and estimated for 1961 and 1962 (not including processing activities performed by the Reference Department and the Law Library) are as follows (in thousands):

Description	1960 actual	1961 estimate	1962 estimate
Volumes fully cataloged and added to the classified collections.....	138	150	153
Items otherwise organized for use (without full cataloging).....	18	22	25
Cards filed in catalogs.....	1,395	1,475	1,525
Volumes bound.....	112	115	115
Items repaired, cleaned, mounted, etc.....	233	250	250
Cards received by the National Union Catalog.....	1,200	1,225	1,250
Serial parts processed.....	1,783	1,825	1,850

3. *Reader and reference services.*—Books and other library materials are provided inside and outside of the

Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objectives of this activity for 1962 are to provide more adequate access to special collections and to improve reference service in the reading rooms. The workload in all major activities is expected to increase in 1961 and 1962 as follows (in thousands):

Description	1960 actual	1961 estimate	1962 estimate
Reader and reference services:			
Materials served.....	1,784	1,800	1,820
Units issued on loan.....	202	220	225

Reference letters.....	81	85	90
Law library reader and reference services:			
Books and pamphlets served.....	316	325	335
Reference inquiries answered.....	55	57	59

4. *Maintenance and protective services.*—A staff of 194, including 82 part-time charwomen, preserves, cleans, and maintains the two Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stock rooms. The guard force staff of 76 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

The Copyright Office is responsible for recording copyright claims, assignments, and renewals; for supplying copyright information to the public; for collecting and accounting for copyright fees; and for printing complete and indexed catalogs for each class of copyright entries. The office is conducted as a business operation. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and costs for 1960 and estimates for 1961 and 1962 are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Income:			
Fees applied.....	975	985	995
Estimated value of materials deposited.....	551	557	562
Total income.....	1,526	1,542	1,557
Costs:			
Salaries.....	1,280	1,395	1,431
Other costs.....	169	194	186
Total costs.....	1,449	1,589	1,617

The program and performance under each of the activities described are predicated on an estimated 249 thousand copyright registrations during 1962, an estimated 246 thousand during 1961, and an actual 244 thousand during 1960.

1. *Receiving and accounting for applications, etc.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1960 and estimates for 1961 and 1962 are as follows (in thousands):

	1960 actual	1961 estimate	1962 estimate
Registrations.....	244	246	249
Mail received and dispatched.....	538	543	549

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows (in thousands):

	1960 actual	1961 estimate	1962 estimate
Cases and documents examined.....	294	297	300
Registrations and recordation of documents.....	253	255	258

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 244 thousand registrations cataloged in 1960 and estimates for 1961 and 1962 are 246 thousand and 249 thousand, respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows (in thousands):

	1960 actual	1961 estimate	1962 estimate
Titles searched.....	66	67	67
Letters and search reports written.....	27	27	28

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects.

The Legislative Reference Service prepares research reports, digests, etc., and supplies information in answer to inquiries from Members and committees of Congress.

1. *Research and analysis.*—The Legislative Reorganization Act of 1946 lists 19 specific fields of Congressional concern in which top-level research by senior specialists is authorized. These fields correspond in general to the areas of committee responsibility. The following 14 fields are now covered by one or more senior specialists: International trade, international affairs, taxation and fiscal policy, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, national defense, social welfare, science and technology, and transportation and communications. The senior specialists provide authoritative research and consultative services. In addition, six subject matter divisions, upon request, furnish to Members and committees information on, or analysis of, public affairs problems in report form or otherwise, charts, translations, and bibliographies, and answers to spot reference questions. In 1960, a total of 81 thousand congressional inquiries were answered, an increase of 5.4% over the number answered in 1959. For the past 10 years, the average annual increase in the number of inquiries has been 7%. The number of inquiries in 1961 is estimated at 87 thousand; and in 1962 at 93 thousand.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covers all public bills and resolutions. It is expected that there will be about the same number of bills to be digested during the second session of the Eighty-seventh Congress as were digested for the second session of the Eighty-sixth Congress.

3. *Reference files, bibliographies, and congressional reader services.*—Reference files, containing clippings, pamphlets, and documents, are maintained as the basis for reply to a high percentage of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by

the congressional reading room. During 1960, a total of 100 thousand reference file items were processed, 14 thousand bibliographic citations prepared, 86 thousand published items acquired and processed, and 4 thousand readers served.

The card division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 140 million catalog cards representing some 3.4 million titles, and fills orders from over 10 thousand regular subscribers—mostly libraries—in the United States and abroad. In 1960, about 110% of this appropriation was recovered in the form of receipts from card and publica-

SALARIES AND EXPENSES—continued

tion sales. Receipts of \$2,171 thousand were deposited in miscellaneous receipts of the Treasury in 1960. The objectives for 1962 are: meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy; providing older series of cards by electrostatic printing process thereby conserving space and providing fuller service; and the continued improvement of the National Union Catalog.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1960 was 4,970 thousand; estimated for 1961, at 5,000 thousand; and for 1962, at 5,050 thousand.

2. *Supplying cards for other libraries.*—The number of cards sold in 1960 was 32.1 million; estimated for 1961 at 33 million; and for 1962 at 34 million.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing, and distribution of the National Union Catalog.*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), and Music and Phonorecords (issued on a 6-month basis and annual cumulation). There were 1,090 paid subscriptions for all issues in calendar year 1959, and it is estimated that there will be 1,130 subscriptions for 1960 and 1,160 for 1961. Included under this activity is the National Library of Medicine Catalog.

5. *Preparation, printing, and distribution of the Subject Catalog.*—This catalog is issued in three quarterly volumes with an annual cumulation. There were 409 paid subscriptions for calendar year 1959. It is estimated that there will be 415 paid subscriptions in 1960 and about 420 in 1961.

INCREASE OF THE LIBRARY OF CONGRESS

GENERAL INCREASE OF THE LIBRARY

For necessary expenses (except personal services) for acquisition of books, periodicals, and newspapers, and all other material for the increase of the Library, [\$400,000] \$470,000, to continue available during the next succeeding fiscal year. (2 U.S.C. 131, 132, 132a; Legislative Branch Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

Purchase of books and other library materials (total obligations).....	348	406	470
Financing:			
Unobligated balance brought forward.....	-4	-6	-----
Unobligated balance carried forward.....	6	-----	-----
New obligational authority (appropriation)	350	400	470

This appropriation constitutes the only means of acquiring regular domestic trade publications (except for copyright deposits) and many foreign trade publications, both current and noncurrent, from approximately 100 countries or areas. The publications acquired by purchase constitute a most important part of the Library's acquisitions although they represent only a small portion of the material received annually. The objectives for 1962 are: to continue the procurement of important research materials to strengthen the Library's collections; to acquire selected important foreign newspapers and periodicals; to increase the acquisition of important materials from critical areas, particularly from Eastern Europe, Africa, and the Orient; to increase the acquisition of materials in the fields of science and technology; to continue the purchase of selected current titles on microfilm as an economy measure in lieu of binding; and to greatly expand the microfilming of deteriorating materials as a necessary preservative and space-saving measure.

The division for the blind is responsible for administering a national program to provide reading material for the blind of the United States and its possessions. It has two closely related operations.

1. *Procurement and distributions.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 32 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 53 State agencies. The maintenance and procurement of these books are shown in the following table:

	1960 actual	1961 estimate	1962 estimate
Talking books purchased:			
(a) New titles.....	345	313	315
(b) Old titles re-recorded.....	45	30	30
Embossed books and magazines:			
(a) Press braille, made to order, titles.....	177	246	245
(b) Purchased from catalog, readymade, titles.....	95		
Talking-book machines:			
Purchased.....	7,000	11,250	11,250
Repaired.....	13,210	9,000	10,000
Salvaged-scrapped.....	522	6,000	6,000
Records replaced.....	13,794	15,000	15,000

Objectives for 1962 include the sustained procurement of titles of books, of more copies of the popular titles, of a sufficient number of machines to equip newly registered blind readers and to replace scrapped machines, and continuation of the quality inspection program on machines and with increased emphasis on research in sound reproduction.

2. *Cataloging, reference, circulation, and training services.*—Catalogs of talking and braille books are prepared and maintained, including a Union Catalog of Hand Copied Books in Braille which brings together a record of holdings of all libraries. The division also maintains a unique collection (about 28 thousand volumes) of books in braille not available elsewhere for loan in the United States. During the period 1946 to 1959 the number of readers throughout the country requiring catalogs from which to select reading matter has grown from 30 thousand to 63 thousand and circulation from 802 thousand units (volumes or containers) to about 1,950 thousand. The number of readers and circulation are expected to continue to increase in 1961 and 1962. Inquiries are received concerning library and related services available to the blind. Individuals throughout the nation who are interested in transcribing or proofreading braille are trained and those qualified are certified. During 1960, there were 544 individuals certified as compared to 573 in 1959, and it is anticipated that this level will continue during 1961 and 1962.

Public Law 85-147 (2 U.S.C. 131), approved August 16, 1957, authorizes an appropriation of \$720 thousand, to remain available until expended, to arrange, index, and microfilm the papers of the Presidents of the United States in the collections of the Library of Congress. The purpose is to preserve their contents and to make them more readily available for research. The program was started

in 1959 with an appropriation of \$107 thousand. Completion of the entire program is contemplated in another 4 years. The objectives for the fourth year will be to provide negative and positive service copy on microfilm of material arranged and indexed, and to continue publishing indexes by photo-offset in editions of 1,000 copies each.

For 1960, an appropriation of \$60 thousand was made to enable the Librarian of Congress to provide for the conversion to safety base film of the George Kleine collection of nitrate film, and the paper prints of early American motion pictures now in the custody of the Library.

During 1960, approximately 116 thousand feet of paper prints were converted and the remainder of 157 thousand feet of nitrate film in the George Kleine collection were converted to safety base film.

It is anticipated that with the \$60 thousand appropriated for 1961, an additional 105 thousand feet of paper prints will be converted.

The \$61 thousand requested for 1962 will allow for the conversion of an additional 105 thousand feet of paper prints. This will leave another 227 thousand feet to be copied.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress. (Legislative Branch Appropriation Act, 1961.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriation, "International educational exchange activities," Department of State.

The Oliver Wendell Holmes devise fund was established by 69 Stat. 533 to (1) prepare a history of the Supreme Court of the United States, and, if deemed advisable, (2) finance an annual lecture or series of lectures, and (3) publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court. A grant of \$37.5 thousand from the Rockefeller Foundation has been made available for the period 1960-62 to pay salaries of authors preparing the history during leaves of absence from their universities for one or more academic semesters.

The work programs of the Office of the Superintendent of Documents are of a service nature, and hence there is no control over the volume of work which is required by law.

1. *Sales distribution.*—Government publications are purchased from the Public Printer to be placed on sale.

Acquisition costs are paid from sales receipts; hence no appropriation is required for printing sales copies. By law, the sale price is set at the cost of manufacture plus 50%. At the end of each year, excess receipts from sales not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For 1960, earnings from the sale of publications amounted to \$4,110 thousand. It is estimated that earnings for 1961 will be \$4,450 thousand and \$4,700 thousand for 1962. These earnings more than cover the appropriation required to finance the sales program.

The sale of Government publications has been steadily increasing, and in the last 10 years the sales volume has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of sales.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon request of any Government agency. Mailing services for farmers bulletins, soil surveys, and other publications which are allocated to Members of Congress on a quota basis are also provided.

3. *Depository library distribution.*—Upon request, 1 copy of every Government publication is supplied to more than 593 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of the U.S. Government Publications and the Numerical List and Schedule of Volumes.

5. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1959, \$15 thousand; 1959 adjusted, \$13 thousand; 1960, \$0; 1961, \$10 thousand; 1962, \$10 thousand.

Intragovernmental funds:

GOVERNMENT PRINTING OFFICE REVOLVING FUND

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various departments and independent establishments of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U.S.C.).

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (67 Stat. 330).

All work for Government agencies is done on a reimbursable basis and financed through the Government Printing Office revolving fund.

Receipts from sales of publications by the Superintendent of Documents are deposited to the revolving fund and cost of publications paid therefrom. All profits accruing from these transactions are deposited in the Treasury of the United States and credited to miscellaneous receipts (44 U.S.C. 63).

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in [H. Res. 314, 335, 340, 418, 429, 493, and 500] *House resolutions* of the Eighty-sixth Congress shall be the permanent law with respect thereto.

SEC. 104. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

SEC. 105. (a) The second sentence of section 502(b) of the Mutual Security Act of 1954, as amended, is amended to read as follows: "Within the first sixty days that Congress is in session in each calendar year, the chairman of each such committee shall prepare a consolidated report showing the total itemized expenditures during the preceding calendar year of the committee and each subcommittee thereof, and of each member and employee of such committee or subcommittee, and shall forward such consolidated report to the Committee on House Administration of the House of Representatives (if the committee be a committee of the House of Representatives or a joint committee whose funds are disbursed by the Clerk of the House) or to the Committee on Appropriations of the Senate (if the committee be a Senate committee or a joint committee whose funds are disbursed by the Secretary of the Senate)."

(b) Each member of the United States group or delegation to the Interparliamentary Union, the NATO parliamentarian's Conference, the Canada-United States Interparliamentary Group, the Mexico-United States Interparliamentary Group, or any similar interparliamentary group of which the United States is a member, and each employee of the Senate or House of Representatives, by whom or on whose behalf expenditures are made from funds appropriated for the expenses of such group or delegation, shall file with the chairman of the Committee on Foreign Relations of the Senate in the case of Members or employees of the Senate, or with the Committee on Foreign Affairs of the House of Representatives in the case of Members or employees of the House, an itemized report showing all such expenditures made by or on behalf of each Member or employee together with the purposes of the expenditure, in-

cluding lodging, meals, transportation, and other purposes. Within sixty days after the beginning of each regular session of Congress the chairman of the Committee on Foreign Relations and the chairman of the Committee on Foreign Affairs shall prepare consolidated reports showing with respect to each such group or delegation the total amount expended, the purposes of the expenditures, the amount expended for each such purpose, the names of the Members or employees by or on behalf of whom the expenditures were made and the amount expended by or on behalf of each Member or employee for each such purpose. The consolidated reports prepared by the chairman of the Committee on Foreign Relations of the Senate shall be filed with the Committee on Appropriations of the Senate and the consolidated reports prepared by the chairman of the Committee on Foreign Affairs of the House shall be filed with the Committee on House Administration of the House. Each such consolidated report shall be printed in the Congressional Record within ten days after receipt by the Committee on Appro-

priations of the Senate or the Committee on House Administration of the House.】

【(c) Section 60 of the Revised Statutes (2 U.S.C. 102) is amended by adding at the end thereof a new paragraph as follows:】

【“Reports of the Secretary of the Senate and the Clerk of the House of Representatives under this section shall be printed as Senate and House documents, respectively.”】

【No funds made available in this or any other Act shall be used to pay the expenses of travel or subsistence for any trip made by any Senator or Representative between the District of Columbia and his home State in the case of a Senator, or his district in the case of a Representative, other than (1) trips which are specifically authorized by law for mileage or transportation expense of Senators and Representatives, (2) official participation in the funeral services of deceased Senators or Representatives, or (3) official trips originating in the Senator's State or Representative's district during periods when Congress is not in session.】 (*Legislative Branch Appropriation Act, 1961.*)

The U.S. Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the U.S. Customs Court in all cases involving the construction of the law and facts respecting the classification of merchandise and the rate of duty imposed thereunder and all appealable questions as to the laws and regulations governing the collection of customs revenue. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only and in the matter of unfair practices in import trade, and appellate jurisdiction from decisions of the Patent Office in patent and trademark cases, except those involving equity.

This item is not subject to the approval of the Judicial Conference.

The U.S. Customs Court has exclusive jurisdiction over civil actions arising under the tariff laws, the internal revenue laws relating to imported merchandise, the several

customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes or quotas on imported goods. The court also has appellate jurisdiction of cases litigating the value of imported merchandise. It tries cases without a jury, making findings of fact and applying the law.

The Court of Claims has jurisdiction of all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It also has general jurisdiction to hear and determine claims for damages other than tort actions, provided the claimants would have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts, and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from the Commission. It also has jurisdiction in special act cases referred to the court by either or both Houses of Congress.

The court continues to carry a heavy load of cases and has been able to dispose of the cases which are ready to be heard as expeditiously as the Department of Justice can process them.

The primary and appellate jurisdiction of the courts of the United States are vested in the 91 district courts and 11 courts of appeals. Provision for the salaries of the administrative and legal aides required to assist the judges in the conduct of hearings, trials, and other judicial functions and to man the component offices of the courts including the Federal Probation System is made under this heading. The estimate for 1962 will permit the employment of additional deputy clerks to handle an increase in the volume of work in the clerks' offices due primarily to rising bankruptcy filings, an increase in civil cases filed and substantial increases in the number of passport applications and petitions for naturalization processed by the district courts. Funds also are included for additional probation officers, in an effort to reduce the caseload per officer so as to provide more effective probation and parole investigation and supervision. Provision has been made for the employment of additional law clerks and secretaries to judges; clerk-stenographers for probation officers; clerical assistants for U.S. commissioners; court reporters; and other court personnel. Provision also has been made for an increase in the allotments for temporary emergency employment for clerks' offices, probation offices, and judges, including temporary court reporters to serve visiting judges and in land condemnation proceedings; and for salary adjustments for certain court personnel under standards approved by the Judicial Conference of the United States.

FEES OF JURORS AND COMMISSIONERS

For fees, expenses, and costs of jurors; compensation of jury commissioners; [and] fees of United States commissioners and other committing magistrates acting under title 18, United States Code, section 3041; and compensation of voting referees fixed by the court pursuant to the provisions of the Civil Rights Act of 1960 (74 Stat. 86); \$4,500,000. (5 U.S.C. 2252(g); 11 U.S.C. 203(b); 28 U.S.C. 604, 631, 633, 636, 1864, 1865, 1871; 48 U.S.C. 867; 73 Stat. 147; 74 Stat. 90, 91; 11 D.C.C. 1401; Judiciary Appropriation Act, 1961.)

Financing:			
Unobligated balance lapsing.....	137		
New obligational authority (appropriation)	4,820	4,500	4,500

This appropriation provides for the statutory fees and allowances of jurors, fees of jury commissioners, and fees and personnel benefits of U.S. commissioners, who serve primarily as committing magistrates. A change in the language of the appropriation is proposed so as to permit the payment of compensation of voting referees pursuant to the provisions of the Civil Rights Act of 1960.

The amount of service and the compensation of jurors depends largely on the number of jury trials requested by the parties to civil and criminal cases in the U.S. courts and to the administration of the jury system. A substantial reduction in fees paid jurors was accomplished during 1960 through the efforts of the courts and the Administrative Office of the United States Courts in improving the jury system so as to provide for the greater utilization of jurors. A further reduction in fees of jurors is expected to be realized during 1961.

The earnings of commissioners are directly related to the volume of cases presented by law-enforcement officials.

New obligational authority (appropriation)	3,500	3,785	4,818

Funds appropriated under this heading are for expenses of travel and subsistence incurred by judges and supporting personnel in attending sessions of court or transacting other official business; and for equipment, furniture, lawbooks, supplies, and other incidental expenses of operating the 11 courts of appeals and 91 district courts of the United States.

The estimate for 1962 includes a request for funds to cover contract and other rate increases and general increases in the volume of printing supplies and services. Provision also has been made for equipment, furniture, and miscellaneous expenses for new personnel requested under the heading Salaries of supporting personnel.

The estimate includes additional funds for travel of judges attending seminars (including institutes on sentencing) and for travel of judges and staffs on assignments to other districts. It provides for the improvement of telephone facilities and for carrying out recommendations for management improvements based on a recently conducted survey. Provision also has been made for tenant alterations and services to be provided by the General Services Administration on a reimbursable basis and the nonrecurring expense of furniture and furnishings required incident to the occupancy of new buildings. A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

The office pursuant to section 604 of title 28, United States Code, under the supervision and direction of the Judicial Conference of the United States, is responsible for the administration of the U.S. courts, including the probation and bankruptcy systems. The principal functions consist of providing staff and services for the courts; conducting a continuous study of the rules of practice and procedure in the Federal courts; examining the state of the dockets of the various courts; compiling and publishing statistical data concerning the business transacted by the courts; and administering the Judicial Survivors Annuity System under title 28, United States Code, section 376. The office also is responsible for the preparation and submission of the annual budget estimates as well as supplemental and deficiency estimates; the disbursement of and accounting for moneys appropriated for the operation of the courts; the audit and examination of accounts; the purchase and distribution of supplies, equipment and furniture; and for securing adequate space for occupancy by the courts and for such other matters as may be assigned by the Supreme Court and the Judicial Conference of the United States.

The office in 1962 will continue its efforts to assist the courts with the enormous task of coping with the backlog of civil cases. The office plans on an expansion of the program of administrative supervision over the financial and administrative operations of the offices of the referees, trustees, and receivers in bankruptcy. It intends to provide more extensive staff assistance in the planning and development of national and circuit sentencing institutes; improvement and expansion of the research and statistical program as well as the program for personnel administration, including the study of classification standards and position evaluation.

The district courts of the United States are constituted courts of bankruptcy, vested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. Their compensation and benefits are paid from this appropriation, which is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings. The present system is self-sustaining, and no appropriation from the general fund of the Treasury is required.

Additional full-time referees and the conversion of a number of part-time referees to full-time have been requested for 1962 to cope with rising caseloads forecast for the current and ensuing years.

Office and other expenses of referees, including compensation and benefits of clerical employees, are payable upon authorization of the Director of the Administrative Office of the United States Courts. Caseload data appear under the account for salaries of referees. This appropriation is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings. The present system is self-sustaining, and no appropriation from the general fund of the Treasury is required.

In order to handle the pending caseload and the anticipated increase in the volume of cases to be filed in 1961 and 1962, it is necessary to provide for expansion of the referees' staffs and their facilities. A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

Under existing legislation, 1961.—A supplemental appropriation is anticipated for furniture and furnishings required incident to the occupancy of new buildings, and for the replacement of furniture in existing buildings. It is anticipated that funds will also be required for the purchase of West's Modern Federal Practice Digest for judges' libraries to replace the Lifetime Federal Digest. The purchase of the new digest at a cost of \$6.11 per volume requires a change in the limitation contained in the Gen-

eral Government Matters Appropriation Act, 1961, section 205, 74 Stat. 477, of \$4.25 per volume of the Lifetime Federal Digest, which limitation is considered applicable to the new digest.

Under existing legislation, 1961.—A supplemental appropriation is anticipated for salaries and related expenses (including equipment and furniture) of 60 additional clerks for the last 3 months of the year in order to cope with the rising bankruptcy caseload. It is anticipated that funds also will be needed for the replacement of furniture in existing buildings and for furniture and furnishings required incident to the occupancy of new buildings.

GENERAL PROVISIONS—THE JUDICIARY

SEC. 302. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

SEC. 303. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than \$6.50 per volume. (*Judiciary Appropriation Act, 1961.*)

SPECIAL PROJECTS

Current authorizations:

SPECIAL PROJECTS

For expenses necessary to provide staff assistance for the President in connection with special projects, to be expended in his discretion and without regard to such provisions of law regarding the expenditure of Government funds or the compensation and employment of persons in the Government service as he may specify, \$1,500,000: *Provided*, That not to exceed 10 per centum of this appropriation may be used to reimburse the appropriation for "Salaries and expenses, The White House Office", for administrative services. (*General Government Matters Appropriation Act, 1961.*)

BUREAU OF THE BUDGET—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

2. *Office of financial management.*—Direction is given to programs for improving accounting and financial management in the executive agencies, in collaboration with the General Accounting Office and the Treasury Department.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation and enrolled bills are reviewed for the President.

4. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

5. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (a) commerce and finance, (b) international, (c) labor and welfare, (d) military, and (e) resources and civil works.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:

1. *Policy coordination.*—The National Security Council advises the President regarding national security policies. Also, the Central Intelligence Agency is under the direction of the Council. Members of the Council are the President, Vice President, Secretary of State, Secretary of Defense, Director of the Office of Civil and Defense Mobilization, and, as directed by the President, other high officials. This appropriation provides staff services for the Council's policy coordination activities.

2. *Operations coordination.*—The Operations Coordinating Board, within the structure of the Council, advises with the responsible executive agencies to assist in coordinating implementation of national security policies assigned by the President to the Operations Coordinating Board for coordination. The Board is composed of the Under Secretary of State for Political Affairs, Deputy Secretary of Defense, Director of Central Intelligence, Director of the United States Information Agency, Director of the International Cooperation Administration, and one or more representatives of the President, and as necessary, officials of other agencies. This appropriation provides staff services for the Board.

OFFICE OF CIVIL AND DEFENSE MOBILIZATION

This Office was created by Reorganization Plan No. 1 of 1958 through the merger of the Federal Civil Defense Administration and the Office of Defense Mobilization. It coordinates all civil defense and mobilization activities of the Federal Government and provides guidance and assistance to the States and their political subdivisions in the planning of preparedness measures as an integral part of the national plan for civil defense and defense mobilization. Operational capability for attack warning and emergency communications is provided, stockpiles of medical and engineering equipment are maintained for emergency use, financial contributions are made to States and political subdivisions for civil defense personnel and administrative costs and the provision of facilities and equipment, and radiological defense equipment is furnished to the States and localities for training and operational use. Policies are developed for the administration of the Defense Production Act and the strategic and critical materials stockpile.

In 1962, major emphasis will continue to be devoted to programs for strengthening the capability of all governments to act effectively in emergencies, for developing an effective radiological defense, and for increasing the availability of appropriate fallout shelter.

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the Office of Civil and Defense Mobilization, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); reimbursement of the General Services Administration for security guard services; expenses of attendance of cooperating officials and individuals at meetings concerned with civil defense and defense mobilization functions; not to exceed \$2,500; \$6,000 for emergency and extraordinary expenses to be expended under the direction of the Director for such purposes as he deems proper, and his determination thereon shall be final and conclusive; and not to exceed \$900,000 for expenses of travel [; \$24,700,000], excluding rental of passenger motor vehicles; \$30,500,000: Provided, That contracts for not to exceed two persons under this appropriation for temporary or intermittent services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), may be renewed annually, and one such contract, for the services of an expert or consultant for telecommunications, may provide for a per diem rate of not to exceed \$75. 1. *Executive direction and policy planning.*—This activity provides the top level direction of nonmilitary programs for the defense of the United States. It also includes the development, coordination, and evaluation of civil and defense mobilization assumptions, policies, and programs for Federal, State, local, and individual implementation and participation.

2. *Research and development.*—Programs designed to meet current and projected research needs are coordinated and administered. In addition, damage assessment systems required for emergency operations and control of critical resources are provided. The administration of the research program is under this appropriation; actual research projects are financed under the Research and development appropriation.

3. *Emergency planning.*—This activity provides for the development of Federal mobilization plans and coordination of Federal, State, and local emergency operations plans. This includes supervision of Federal grant-in-aid programs for civil defense purposes; the overall coordination of civil defense and mobilization functions assigned to other Federal agencies; measures to minimize the effects of enemy attack by chemical, biological, or radiological means upon the people and national resources; and the development of shelter and other programs to reduce the vulnerability of the Nation to weapons of mass destruction. Tests are conducted to determine the adequacy of various types of emergency plans.

4. *Warning and communications.*—The Office of Civil and Defense Mobilization national warning system is being revised to make it compatible with the NORAD structure and techniques of operation. The warning system was expanded in 1961 to 447 key warning points. In 1962 it is proposed to add 53 warning points, making a total of 500. The system will then provide direct attack warning to all cities of 20,000 or more population, and those cities of 10,000 to 20,000 population which are adjacent to important civil and military targets. This activity also includes the national communications system for postattack emergency coordination of emergency government down to State level. Strengthening of the communications network will be continued in 1962 through installation of radio backup facilities at additional State control sites, providing a minimum emergency communications radio link to and between the eight Office of Civil and Defense Mobilization regional offices, the national and operational headquarters, and the States.

5. *Training, education, and public affairs.*—This activity provides training methods and materials to State and local organizations, and dissemination of promotional matter furthering civil defense preparedness. The 1962 request provides for further expansion of the adult education program to teach the principles of individual, family, and community protection, utilizing the existing adult education network in the States. By the end of 1962, it is estimated that 445,000 adults will have received training through the resources of this program.

6. *Resources and production planning.*—This office develops operating plans to stabilize the economy and manage the national resources under various emergency conditions. Plans are also developed for the restoration and rehabilitation of essential physical facilities after attack. During 1962, work will continue in exploring survival requirements, postattack, and various methods which can be used to fill these requirements.

7. *Field operations.*—Civil and defense mobilization programs are made available to States and localities through the eight regional offices; courses in civil defense subjects including instructor training are given at four training installations; and specialized activities in connection with attack warning, damage assessment, and emergency operations are conducted at various headquarters throughout the country.

8. *Management services and stockpile operations.*—In addition to centralized administrative services, this activity also finances the management of the civil defense stockpile. The stockpile is located in warehouses operated by other Federal agencies.

9. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:

1. *Agriculture.*—Agriculture's nationwide network of local representatives has been assigned responsibility for radiological monitoring on a widely dispersed basis. The 1962 program will be devoted to radiological defense training for this purpose, and continuation of food management planning and liaison responsibilities.

2. *Commerce.*—This Department will continue to plan for the mobilization of industrial production and the establishment and decentralization of controls; plan for the defense, emergency utilization, and control of U.S. ports; develop the defense air transportation program; provide specialized weather data including radiological fallout forecasts; plan for the integration of field installations in the Federal fixed monitoring network; and compile statistical resources data needed to assess damage from attack under various conditions.

3. *Federal Aviation Agency.*—This Agency will continue the planning and preparedness measures initiated in 1961 for the development of operational plans, technical standards, and procedures for improving the emergency readiness of the Nation's airlift capability and its supporting elements.

5. *General Services Administration.*—The emergency communications system connecting the Federal Government relocation sites in the field was terminated at the end of 1960. Certain other civil defense and defense mobilization activities, principally liaison in nature, will be performed without cost to this appropriation.

6. *Health, Education, and Welfare.*—Responsibilities have been assigned to this Department to improve the Nation's civil defense readiness in areas of emergency health and welfare. This involves development of organizational plans and training of medical personnel at the local level, and the preparation and dissemination of welfare guidance materials to the States and communities to stimulate emergency welfare planning and preparation.

Further, the supervision and management of the Nation's medical stockpile has been assigned to the Department by the Office of Civil and Defense Mobilization.

7. *Housing and Home Finance Agency.*—This Agency is charged with the responsibility of providing housing for the population under emergency conditions. The increase in 1962 results principally from the continuation on a full-year basis the civil defense liaison specialist in each of the Agency's eight regional offices.

8. *Interior.*—The Department's responsibilities include the mobilization planning required for strategic minerals and to marshal the fuel and power resources of the Nation to cope with an emergency. The Department will also provide radiological monitoring stations at dispersed locations throughout the United States.

9. *Interstate Commerce Commission.*—The Commission is assigned the responsibility for guidance to the domestic surface transportation industry on disaster preparedness. This covers the Nation's railroads, motor carriers, and inland waterway transportation systems.

10. *Labor.*—Funds made available in 1961 permitted this Department to plan to meet manpower problems at all levels of government in a postattack period. The 1962 budget will permit continuation and expansion of programs involving emergency management of the labor force, including manpower planning in various State employment security agencies.

14. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$0; 1960, \$445 thousand; 1961, \$229 thousand; 1962, \$228 thousand.

1-10. *Materials and facilities.*—Through 1960 this program was limited to matching funds for materials and facilities. All States participated in this program and a total of \$97.5 million has been contributed by the Federal Government, of which 53% has been used for warning and communications equipment and 15% for medical supplies and equipment.

11. *Personnel and administrative expenses.*—This new activity for matching the personnel and administrative expenses of State and local civil defense organizations results from legislation enacted by the 85th Congress making civil defense the joint responsibility of all levels of government. Sufficient funds were appropriated in 1961 to provide for an average cost of \$1 million per

1. *Medical supplies and equipment.*—Supplies and equipment are procured in quantities considered necessary to supplement commercial inventories expected to survive the blast and radiation effects of an attack. These are stockpiled in strategically located points of storage throughout the Nation. Planned procurement for 1962 will provide an additional 1,000 civil defense emergency hospitals, and medical supplies required to extend the operational capabilities of these hospitals, as well as those already pre-positioned throughout the Nation.

2. *Chemical, biological, and radiological defense equipment.*—Equipment is procured and granted to the States and localities for training and operational purposes. The main objective of this program is to equip a national chemical, biological, and radiological monitoring system consisting of 100,000 fixed monitoring stations manned by 500,000 monitors. (a) *Chemical and biological.*—Protec-

tive devices and detector kits will be procured in 1962 in sufficient quantities to equip an additional 25,000 monitors. (b) *Radiological.*—Detection instruments to be procured in 1962 will equip approximately 48,700 monitoring stations with one monitoring set each.

3-4. *Stockpile management.*—The stockpile is maintained in warehouses operated by other Federal agencies in strategically located points of storage throughout the Nation so as to best afford ample transportation facilities, security, strategic coverage, and geographical distribution. Due to the particular characteristics of the items stockpiled, certain maintenance, storage, and testing procedures must be employed in order to insure the serviceability of each during their normal storage life.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and

applicable adjustment as reflected in the following table (in thousands of dollars):

1. *Fallout shelter prototypes, surveys, and shelter design grants.*—Under the national shelter policy, Federal example and leadership is recognized as an indispensable element in stimulating State and local governments, private industry, and the individual citizen to build shelters for their protection. To set the example, Federal prototype shelters of various types are being constructed in different climatic and population areas and sampling surveys are being conducted to determine and identify the shelter potential of existing structures for protecting the population during an emergency. Also, a program has been initiated making grants to schools of architecture and engineering for development of curricula and training of students in new concepts of shelter design and contracting with architect-engineering firms to develop special designs for schools, churches, and apartment and office buildings.

2. *Research.*—This activity finances the development and application of scientific knowledge to the strategic requirements of the nonmilitary defense of the Nation through research contracts with Federal agencies, universities, industry, and private institutions. The research in 1962 covers the broad areas of shelter research (exclusive of construction), engineering and testing; radiological defense; operations research; economics research; social research; warning and communications research; and other research.

3. *Survival planning.*—In 1960 survival studies were terminated in New Mexico and South Carolina. This completed the survival planning program initiated in 1956.

1. *Construction of facilities.*—In 1960, funds were appropriated for construction of an Office of Civil and Defense Mobilization regional underground control center at Denton, Tex. In 1962, funds are requested for construction of an additional Office of Civil and Defense Mobilization regional center. Each of these centers will operate on a day-to-day basis with some 200 employees. In an emergency, each staff can be expanded to approximately 500 employees.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$0; 1960, \$90 thousand; 1961, \$1,483 thousand; 1962, \$1,685 thousand.

Financing applied to program.....	157	340	635

This fund finances the procurement of civil defense materials toward which contributions to the States are authorized on a matching fund basis. The fund is reimbursed for purchases from the Federal contributions appropriation and from funds provided by the States (65 Stat. 61). Increased procurement of radiological instruments for the State and local governments is anticipated during 1961 and 1962, thus accounting for the increased obligations projected for these years.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$219 thousand; 1959 (adjusted), \$211 thousand; 1960, \$224 thousand; 1961, \$320 thousand; 1962, \$520 thousand.

The Federal Radiation Council was established by Executive Order 10831 and Public Law 86-373, to advise the President with respect to radiation matters effecting the public health, including guidance for all Federal agencies in the formulation of radiation protection standards. Members of the council are the heads of the agencies most significantly involved with radiation—the Secretaries of Health, Education, and Welfare; Defense; Commerce; and Labor; and the chairman of the Atomic Energy Commission. The council's activities are supported by financial contributions from the member agencies.

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 201. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (5 U.S.C. 78), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at \$1,500 except station wagons for which the maximum shall be \$1,950.

SEC. 202. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 203. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for [living] quarters allowances [in accordance with the Act of June 26, 1930 (5 U.S.C. 118a), and regulations prescribed thereunder,] and cost-of-living allowances [similar to those allowed under section 901(2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of

State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby], in accordance with title II of the Act of September 6, 1960 (74 Stat. 793).

SEC. 204. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 205. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge [], or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest]: *Provided*, That limitations heretofore established on the cost of volumes of the Lifetime Federal Digest shall not apply to the Modern Federal Practice Digest.

SEC. 206. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U.S.C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 207. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building, without specific authority in law therefor, primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 208. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury: *Provided further*, That nothing in section 1415 of the Act of July 15, 1952, or in this section shall be construed to prevent the making of new or the carrying out of existing contracts, agreements, or executive agreements for periods in excess of one year, in any case where such contracts, agreements, or executive agreements for periods in excess of one year were permitted prior to the enactment of this Act under section 32(b)(2) of the Surplus Property Act of 1944, as amended (50 U.S.C. App. 1641(b)(2)), and the performance of all such contracts, agreements, or executive agreements shall be subject to the availability of appropriations for the purchase of credits as provided by law.

SEC. 209. No part of any appropriation contained in this or any other Act, or of the funds available for expenditure by any individual, corporation, or agency included in this or any other Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress. (*General Government Matters Appropriation Act, 1961.*)

DISASTER RELIEF

Current authorizations:

DISASTER RELIEF

For expenses necessary to carry out the purposes of the Act of September 30, 1950, as amended (42 U.S.C. 1855-1855g), authorizing assistance to States and local governments in major disasters, \$8,000,000, to remain available until expended: Provided, That not to exceed 3 per centum of the foregoing amount shall be available for administrative expenses.

Program and Financing (in thousands of dollars)

Recovery of prior year obligations.....	-1,483		
Unobligated balance carried forward.....	13,458	4,000	
New obligational authority (appropriation)			6,000

1. Administration.

2. Aid to disaster areas.—This program provides for a coordinated effort by the Federal Government to assist States and their political subdivisions affected by major disaster when they are unable to cope with the situation physically or financially.

Responsibility for administration of this program is delegated to the Office of Civil and Defense Mobilization. Disaster relief operations of the entire Federal Government are coordinated and funds are made available to affected areas and to reimburse Federal agencies for disaster operations.

State and local civil defense organizations are active in disaster operations and receive valuable operational training as a result. Unused prior appropriations will finance disaster operations through 1961 with unobligated balances of approximately \$4 million carrying forward into 1962. An appropriation of \$6 million is requested so that a minimum balance of \$10 million will be available for 1962 disaster operations.

During 1960 the President proclaimed major disasters in eight States and allocated funds as follows (in thousands of dollars):

State	Type of disaster	Date declared	Allocation
Oklahoma.....	Floods.....	July 21, 1959	127
Texas.....	do.....	do.....	174
Hawaii.....	Hurricane.....	Oct. 6, 1959	210

Total financing applied to program	202,197	69,991	46,829

Note.—Accrued interest to Treasury for General Services Administration, Department of Agriculture, and Department of the Interior totaling \$70.1 million in 1961 and \$75 million in 1962 is excluded from operating costs. Legislation is being proposed to eliminate the requirement for payment of interest to Treasury for activities carried on by these agencies.

Under the Defense Production Act of 1950, as amended, designated agencies are authorized with Presidential approval to incur obligations and make expenditures to secure expanded production of critical materials in furtherance of the defense effort. The program is conducted primarily through a revolving fund financed by borrowings from the Treasury. The amount borrowed may not exceed \$2.1 billion outstanding at any one time, but the act permits contingent liabilities to be considered as obligations only to the extent of the probable ultimate net costs to the United States, rather than in the full amount of the gross commitments outstanding. To the extent that money must be expended to fulfill commitments even though the expenditures are considered to be ultimately recoverable (through repayment of loans and sale of inventories, for example), portions of the borrowing authority are used for working capital on a current basis. Due to the imminent exhaustion of this borrowing authority, a direct appropriation of \$108 million was enacted for 1959, thus providing cumulative financing authority of \$2,208 million.

The following agencies have been designated to carry out programs to expand production capacity as follows:

General Services Administration.—Purchase and resale of metals, minerals and machine tools, and research and pilot plant operations to develop new materials and new techniques for utilizing low grade domestic ores.

Department of Agriculture.—Purchase and resale of agricultural commodities.

Department of the Interior.—Loans and grants to encourage exploration for strategic and critical minerals.

Treasury Department.—Loans to domestic private enterprises.

Export-Import Bank of Washington.—Loans to foreign private enterprises.

Programs must be certified as essential to the national defense by the Office of Civil and Defense Mobilization. The gross transactions (gross commitments) and financing authorized as of June 30, 1960, are as follows (in thousands of dollars):

	Gross trans- actions	Financing authority		
		Total al- located	Working capital	Probable ultimate net cost
General Services Administration	7,643,898	1,912,000	888,701	1,023,299
Treasury Department	430,389	156,600	155,000	1,600
Department of Agriculture	111,898	70,500		70,500
Department of the Interior	35,800	35,800		35,800
Export-Import Bank of Wash- ington	45,212	20,500	20,500	
Total authorized	8,267,197	2,195,400	1,064,201	1,131,199
Unused balance		12,600		
Total financing authority		2,208,000		

As one of the inducements for expanding production most of the contracts provide a guaranteed market for the production from the expanded facilities. Significant amounts of materials are being delivered to the Defense Production Act inventory under these contracts. Investment in inventory of \$1,371.6 million on June 30, 1959, and \$1,452.4 million on June 30, 1960 is expected to increase to \$1,540 million by June 30, 1962.

Every effort is made to dispose of Defense Production Act materials where sales will not disrupt markets. Progress in disposal is necessarily slow, however, since the capacity of the market to absorb these materials without undue effect is limited. Therefore, there is little likelihood in the near future of substantial disposal.

Interest continues to accrue, payable by the fund to the Treasury, not only on the borrowings invested in loans and inventories, but also on the borrowings which have been used to cover expenses and losses. Since there is no way for the fund to recover its realized losses or reduce inventories appreciably in a short period of time, the perpetuation of the interest-bearing arrangement on such expended capital merely makes the cumulative deficit even greater as the interest accrues.

Legislation is being requested which would direct the Secretary of the Treasury to honor non-interest-bearing notes and cancel accrued interest on existing notes for borrowings to carry out activities under section 303 of the act. If such legislation is enacted, existing financing authority of \$2,208 million should be sufficient to cover cumulative net disbursements through 1962. Future cash requirements are subject to many variables involved in unexpired options of expansion contracts and sales potential of Defense Production Act raw materials and real property inventories.

General Services Administration.—Financing of \$1,912 million has been authorized as of June 30, 1960, to cover the expansion of productive capacity for strategic metals, minerals, and machine tools. This amount includes \$1,023.3 million for probable ultimate net cost of specific programs of which \$792.5 million is for metals and minerals

EXPANSION OF DEFENSE PRODUCTION—Con.**Public enterprise funds—Continued**

REVOLVING FUND, DEFENSE PRODUCTION ACT—Continued

programs, \$18.3 million for machine tool and marine turbine and gear capacity programs, and \$212.5 million for Treasury interest, custodial and administrative expenses. The financing also includes \$888.7 million of working capital required for carrying inventories for which only a limited sale is now foreseen.

The bulk of the expansion programs have been completed, with the major problems being receipt, custody, and eventual disposition of the materials and facilities. The exercise of option rights by contractors has been carefully examined with a view to reducing deliveries to the Government as far as possible within the terms of the contracts whenever basic stockpiling objectives have been attained. Between July 1, 1957, and June 30, 1960, a reduction of \$316.2 million in gross commitments under the Defense Production Act was attained through renegotiation of contracts.

A summary of transactions involving strategic minerals and metals (including work-in-process inventory) under this fund follows (in millions of dollars):

	1960 actual	1961 estimate	1962 estimate
Opening inventory.....	1,371.6	1,452.4	1,494.6
Deliveries during year.....	135.1	82.2	62.3
Total available.....	<u>1,506.7</u>	<u>1,534.6</u>	<u>1,556.9</u>
Less cost of goods sold:			
Sales receipts.....	50.7	37.6	19.5
Profit (—) or loss on sales.....	3.6	2.4	—2.6
Cost of goods sold.....	<u>54.3</u>	<u>40.0</u>	<u>16.9</u>
Closing inventory.....	1,452.4	1,494.6	1,540.0

As of June 30, 1960, a total of \$7,492.7 million in gross value of contracts has been entered into by the General Services Administration under Defense Production Act authority. Of this amount a total of \$6,686.5 million has been completed as measured by procurement, expiration of contractor options on guaranteed production, completion of facilities, completed research, etc. The balance of \$806.2 million includes a total of \$653.2 million of commodity contracts, a few of which will not mature until 1965.

Department of Agriculture.—The purchase, management, and resale of agricultural commodities, except forest products, are carried out by the Commodity Credit Corporation, which is reimbursed from this fund for the net costs involved. The Secretary of Agriculture has been allocated borrowing authority for this purpose.

During 1960, the Corporation continued the management of inventories of castor beans and the remaining American-Egyptian cotton acquired under programs initiated in prior years. All of the castor beans and nearly all of the American-Egyptian cotton inventories had been disposed of by June 30, 1960. The remainder of the cotton has been sold during 1961.

The liquidation of the cotton inventory marks the completion of all programs certified to the Secretary of Agriculture under the Defense Production Act. Legislation is being proposed to cancel notes payable to Treasury equal to the \$70.5 million in probable ultimate net cost

under these programs and to reduce the total authorization to borrow from Treasury by an equivalent amount.

Department of the Interior.—New contracting under the minerals exploration program administered by the Defense Minerals Exploration Administration under the Defense Production Act was terminated on June 30, 1958. Under Public Law 85-701, August 21, 1958, the Office of Minerals Exploration was created and authorized to use appropriated funds to administer the Defense Production Act contracts and certified projects remaining in force, as well as to conduct a continuing exploration assistance program.

The Defense Minerals Exploration Administration entered into 1,159 contracts. The total cost of work involved was \$56.8 million and the maximum Government participation was \$34.8 million. Of the total Government participation, \$23.3 million has been disbursed, \$10.7 million has been canceled, and \$898 thousand, under 15 contracts, remains to be disbursed. The remaining commitment to disburse is expected to be reduced by disbursements and cancellations in the amount of \$596 thousand in 1961 and \$218 thousand in 1962.

The exploration contracts provide that if production results from any of the Government assisted projects within a 10-year period, part of the Government funds will be repaid according to a royalty arrangement. By June 30, 1960, the Office of Minerals Exploration had certified discoveries on 391 projects, and royalty payments totaling \$3.6 million had been received. Royalty payments are estimated at \$400 thousand each for 1961 and 1962.

Losses realized to June 30, 1960, total \$16.9 million, of which \$5.4 million represents losses under exploration contracts and \$11.5 million unrecovered administrative expense and interest on borrowings from Treasury. Assuming the enactment of proposed legislation to remove the requirement to pay interest on borrowings from Treasury after 1960, the net cost of this program through 1965 is estimated at \$32.1 million.

Treasury Department.—No loans to domestic enterprises were authorized during 1960. It is anticipated that there will be no additional loans authorized in 1961 and 1962.

Loans outstanding on June 30, 1960, after reserves for losses, totaled \$154.7 million and there were \$14.7 million in commitments to participate in loans made by banks wherein disbursement of Treasury funds is deferred. By the close of 1962 it is estimated that the net loans will be reduced to \$136.7 million and the deferred participation commitments to \$12.4 million. Cumulative net profit from operations as of June 30, 1960, was \$18.2 million and is expected to be \$25.1 million on June 30, 1962.

Export-Import Bank of Washington.—No certifications were received and no new loans were authorized by the Bank during 1960 for expansion of foreign productive capacity. It is contemplated that there will be no additional certifications to the Export-Import Bank in connection with these operations. Loans outstanding on June 30, 1960, of \$24.4 million are expected to be reduced to \$5.3 million by June 30, 1962. Cumulative net profit from operations as of June 30, 1960, was \$4.2 million and is expected to be \$5.1 million on June 30, 1962.

11. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and

applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Advances to other Government agencies, agents, and employees.....	183	44	44	44
Supplies.....	6,080	5,720	5,720	5,720

MUTUAL SECURITY—ECONOMIC AND CONTINGENCIES

Economic assistance is provided to help maintain political and economic stability, to assist in meeting the costs of relatively large military forces maintained by some of the less developed countries as part of the common defense, and to help improve economic conditions in the less developed areas of the world. Mutual security economic programs include defense support, technical cooperation, special assistance, Development Loan Fund, the investment guarantee program, and a number of other programs, such as contributions to certain special activities of the United Nations and other international agencies. The appropriation for contingencies, while used primarily for economic purposes, is also available for military assistance. Authorization for these nonmilitary programs for 1962 is required, with a number of minor exceptions. Information on the military assistance program appears in the chapter on Department of Defense—Military.

Current authorizations:

For expenses necessary to enable the President to carry out the provisions of the Mutual Security Act of 1954, as amended, to remain available until June 30, **[1961]** 1962, unless otherwise specified herein, as follows:

ECONOMIC ASSISTANCE

Defense support: For assistance authorized by section 131(b), **[\$610,000,000, including not less than \$35,000,000 for Spain]** \$650,000,000.

MUTUAL SECURITY—ECONOMIC AND CONTINGENCIES—Continued

Current authorizations—Continued

ECONOMIC ASSISTANCE—Continued

For an additional amount for defense support, as authorized by section 131(b) of the Mutual Security Act of 1954, as amended, \$65,000,000.

Technical cooperation, general authorization: For assistance authorized by section 304, \$150,000,000: *Provided*, That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the House of Representatives and the Senate \$162,000,000.

United Nations expanded program of technical assistance and related fund: For contributions authorized by section 306(a), \$33,000,000 \$40,000,000.

Technical cooperation programs of the Organization of American States: For contributions authorized by section 306(b), \$1,300,000. Special assistance, general authorization: For assistance authorized by section 400(a), \$230,000,000 \$293,000,000.

Special Assistance, special authorization: For assistance authorized by section 400(c) for hospital construction, \$1,500,000 to be used to purchase foreign currencies which the Department of the Treasury may determine to be excess to the normal requirements of the United States.

Intergovernmental Committee for European Migration: For contributions authorized by section 405(a), \$6,700,000 \$8,000,000: *Provided*, That no funds herein appropriated shall be used to assist directly in the migration to any nation in the Western Hemisphere of any person not having a security clearance based on reasonable standards to insure against Communist infiltration in the Western Hemisphere: *And provided further*, That no funds herein appropriated shall be used to pay transportation costs of any doctor or immigrant inspector or for any space not required to be allotted by the applicable U.S. maritime laws and regulations.

Program of United Nations High Commissioner for Refugees: For contributions authorized by section 405(c), \$1,300,000 \$1,000,000.

Escapee program: For assistance authorized by section 405(d), \$3,350,000 \$3,000,000.

United Nations Children's Fund: For contributions authorized by section 406, \$12,000,000.

United Nations Relief and Works Agency: For contributions and expenditures authorized by section 407, \$16,500,000 \$12,200,000.

North Atlantic Treaty Organization science program: For contributions authorized by section 408(a), \$1,200,000 \$1,500,000.

Ocean freight charges, United States voluntary relief agencies: For payments authorized by section 409(c), \$2,000,000 \$2,300,000.

General administrative expenses: For expenses authorized by section 411(b), \$38,000,000 including the purchase of not to exceed forty passenger motor vehicles for use abroad in addition to those otherwise authorized, \$47,000,000: *Provided*, That the cost of any such passenger motor vehicle for the chief of any special mission established under section 526 of the Mutual Security Act of 1954, as amended, shall not exceed \$3,500.

Administrative and other expenses: For expenses authorized by section 411(c) \$8,000,000 \$10,200,000.

Atoms for peace: For assistance authorized by section 419, \$1,500,000 \$3,500,000.

Unobligated balances as of June 30, 1961, of funds heretofore made available under authority of the Mutual Security Act of 1954, as amended, [and available as of June 30, 1960,] are, except as otherwise provided, hereby continued available for the fiscal year [1961] 1962, for the same general purposes for which appropriated.

Funds appropriated under each paragraph of this title, including unobligated balances continued available, and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made for the same general purpose as such paragraph, which amounts are hereby continued available for the same period as the respective appropriations in this title for the same general purpose, may be consolidated in one account for each paragraph. (Mutual Security and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961; authorizing legislation to be proposed for 1962.)

Note.—Estimate for 1962 excludes \$600 thousand for activities transferred in the estimates to "International educational exchange activities." Department of State. The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

1. *Defense support.*—Defense support is economic aid provided to 12 of the lesser developed countries in order to assist them to make specific contributions to the common defense effort. The existence of defense support is rooted in a specific military requirement: the continued contribution of forces of over 3 million men and military facilities vital to the United States. The dimensions of support are determined by analysis of the capability of a country to make its defense contribution without endangering political or economic stability. Funds are primarily used to finance imports of food, raw materials, and machinery, which are sold in commercial markets for local currency which in turn is used for support of military budgets and essential civilian economic activities.

(a) *Europe and Africa.*—Spain, where the United States has bases of strategic importance, is the only country in this region which received defense support aid.

(b) *Near East and South Asia.*—Greece, Turkey, Iran, and Pakistan are the countries in this area which receive defense support. All of them are members of regional defense pacts which are part of the common defense.

(c) *Far East.*—The major portion of defense support is allocated to the Far East countries of Korea, China (Taiwan), Vietnam, Cambodia, Laos, the Philippines, and Thailand.

2. *Technical cooperation.*—This is a program for the international exchange of technical knowledge and skills through surveys, training, and demonstration programs designed to introduce and improve needed institutions to increase the skills of peoples in less developed countries and to enable them to achieve a higher standard of living. Programs in health, education, agriculture, industry, and other fields are designed to lead to an early impact as well as to bring about long-term material benefits. The major share of the U.S. contribution to the widespread effort to improve knowledge and skills in the underdeveloped countries is provided through bilateral programs; the United States also contributes to United Nations organizations operating in the field of technical assistance and to the programs of the Organization of American States.

(a) *General.*—The bilateral program is being increased in accordance with our ability to recruit American technicians to carry out the program overseas and with the increasing ability of the cooperating countries to make good use of their services. It is estimated that there will be, by June 30, 1961, 3,700 direct-hire technicians plus 2,000 technicians employed by American firms, colleges, universities, and institutions which provide technical advice and services under contract.

(b) *United Nations.*—The United Nations expanded program of technical assistance is aiding over 95 countries and territories through the provision of experts and the financing of fellowships for training abroad. The special fund emphasizes interregional surveys and training institutes. The 2 programs are financed by voluntary contributions from some 90 governments. The United States contribution is about 40% of the total. The program has been expanding during the last several years as a result of higher contributions from European and Commonwealth countries.

(c) *Organization of American States.*—This appropriation provides for the annual U.S. contribution, which is about 70% of the total, to the technical assistance programs of the Organization of American States.

3. *Special assistance.*—This is economic aid which is necessary to achieve political, economic, or other objectives of the United States in countries where the United States is not providing military assistance in support of significant military forces and where the needs for economic assistance cannot be provided under other programs, such as technical cooperation or the Development Loan Fund. The country programs being implemented during the present year serve the following broad objectives: (1) To maintain or develop economic stability in countries in which U.S. support is essential to continued independence or identification with the free world; (2) to secure or maintain U.S. military facilities or other rights in a country or to deal with economic and other problems arising out of the existence of such facilities. Special assistance programs are also being implemented in the fields of health and education, the largest being the worldwide malaria eradication program. Others are support of international medical research activities and American schools abroad.

(a) *Europe and Africa.*—Nearly all of the special assistance for this area is furnished to countries in Africa. Certain of the programs in Africa are to be increased during 1961 and 1962. Some of these countries, many of which are just now becoming independent, require considerable improvements in education, administration, public health, and other fundamental skills as a foundation for economic development. In addition, for 1961 there was appropriated for hospital construction, \$1.5 million to be used to purchase foreign currencies. These currencies will be used to defray local costs (zlotys) incurred in the construction of a research hospital in Krakow, Poland.

(b) *Near East and South Asia.*—Countries in this area receive special assistance in order to help meet budgetary requirements, to overcome balance-of-payments difficulties, and to help resist Communist pressure.

(c) *Far East.*—Most of the countries in the Far East have military agreements with the United States and are eligible for defense support aid. The special assistance programs in this area (Burma and Indonesia in 1960) are relatively small.

(d) *Latin America.*—Two of the countries in Latin America, Bolivia and Haiti, which have especially critical balance-of-payments problems, receive the bulk of the special assistance.

(e) *Nonregional programs.*—This category includes the various worldwide programs in health and education mentioned above.

Loans.—Although the bulk of loans made from mutual security program funds are now made from the Development Loan Fund, a portion of the special assistance funds is loaned each year rather than granted. These loans are almost all for economic development projects, and may be repayable in either dollars or foreign currency. The tables below show the current status of these loans. Information on loans extended by the Development Loan Fund and under the authority of the Agricultural Trade Development and Assistance Act is shown in separate schedules.

The following table gives data on loans made from current mutual security obligational authority for both dollars and related foreign currencies in millions of dollars and dollar equivalents:

	1960 actual	1961 estimate	1962 estimate
Loan obligations incurred:			
U.S. currency.....	45	26	10
Foreign currency.....	5	--	5

ECONOMIC ASSISTANCE—Continued

The table below shows the status of loans in millions of dollars at the end of the respective years. The bulk of the loans outstanding were made to European countries in the early years of the European recovery program and are repayable in dollars:

End of year	1959 actual	1960 actual	1961 estimate	1962 estimate
Loans outstanding.....	2,387	2,471	2,521	2,538
Undisbursed loan obligations.....	232	172	119	81
Interest past due.....	(1)	1		

¹ Less than \$1 million.

4. *Other programs.*—Other programs include U.S. contributions to various international agencies, minor bilateral programs, and the costs of administering activities under the Mutual Security Act and related acts.

The United States assists in moving surplus populations and refugees from Europe and helps recent escapees from the Soviet bloc through contributions to the Intergovernmental Committee for European Migration and the United Nations High Commissioner for Refugees, as well as the U.S. escapee program.

Through its contribution to the United Nations children's fund (UNICEF), the United States joins with other contributors in improving the health and welfare of children and mothers, primarily in underdeveloped areas. The U.S. contribution to the United Nations Relief and Works Agency (UNRWA) assists in providing essential care and maintenance for the Arab refugees displaced in Palestine. Through the atoms for peace program the United States makes available to other countries the benefits derived from peaceful use of atomic science.

The United States along with other member countries contributes to the NATO science program, which provides for the exchange of scientists among the NATO countries and an advanced institutes program.

It is anticipated that administrative expense funds will be used by the International Cooperation Administration in Washington and in some 85 overseas locations for administering economic assistance programs and by the Department of State for personnel involved in coordinating and conducting policy review of the entire mutual security program in Washington and abroad and for other functions. The Office of the Inspector General and Comptroller, Mutual Security, State, conducts activities involving financial management, investigations, and evaluations of all mutual security programs. These activities have been financed during 1960 and 1961 from a management fund appearing below. Starting with 1962 it is proposed that it be financed from the appropriation Administrative and other expenses (State).

Appropriation (adjusted).....	123,753	248,000	250,000

This is a special fund, rather than a separate category of aid, which is used to meet requirements for which no specific provision can be made in the regular categories of assistance because requirements are uncertain or unknown at the time the budget is prepared. As an illustration, the rapid increase in newly independent countries may pose problems to which response should be made in the interests of the United States—yet the dimensions of funding requirements cannot at this time be predicted with accuracy. These funds can be used for both economic and military assistance. While in past years, they were used to meet unforeseen economic requirements, a portion was required to meet military assistance needs in 1960.

A part of the mutual security dollar appropriations is to be used to purchase agricultural surplus commodities which are then to be sold to friendly countries for their currencies. Local currencies accruing from these sales are deposited in a special account and are used for economic and military activities in furtherance of mutual security objectives. These activities include the local costs of projects, budget support of the lesser developed countries, and procurement of supplies and materials for third countries.

The Development Loan Fund extends loans, credits and guarantees to American or foreign individuals, businesses, financial institutions, or to foreign governments in order to provide capital for projects and programs contributing to the economic growth of less developed free countries.

To be eligible for DLF financing, an activity must be located in one of the less developed friendly countries and there must be a reasonable prospect that the loan will be repaid. DLF considers (1) the availability of other free-world financing on reasonable terms, (2) soundness of the activity, (3) contribution to development of economic resources, and (4) possible adverse effects upon the U.S. economy with the understanding that loan assistance will be most effective in countries where there is a clear willingness to take sound self-help measures, and where such assistance is consistent with long-term economic development objectives. The DLF is administered to avoid competing with either private investment capital, the Export-Import Bank of Washington, the International

Bank for Reconstruction and Development, or other international financial institutions.

Budget program.—As of June 30, 1960, the Fund had approved a total of 149 loans and 2 guarantees for development assistance in 44 countries, amounting to slightly less than \$1.4 billion. These loans cover power, irrigation, transportation, industry, and other projects contributing to economic development. About three-quarters of the loans have been for railways, roads, electric-power generation and transmission, multipurpose irrigation, power and flood control projects, manufacturing and industrial development, and industrial development banks.

As of June 30, 1960, agreements resulting in formal obligation of funds had been signed with borrowers for 117 loans and 2 guarantees totaling \$1,000.6 million. As the DLF is a new institution experiencing only its second full year of operations in 1960, and as the rate of completion of major projects extends over a period of years, expenditures under loans have not yet reached sizable levels. However, 1960 net expenditures of \$202.4 million reflected a significant increase over 1959.

It is estimated that loan approvals, loan agreements, and expenditures will all increase in 1961 and 1962.

Financing.—The Fund is financed by means of appropriations totaling \$1.95 billion through 1961. In addition, financing is provided by receipts from operations.

Repayment of loan principal and payment of interest may be made either in dollars or local currencies as specified in loan agreements. The Fund's foreign currency receipts are made available for sale by the Treasury, and dollar proceeds become available to the Fund. Other available revenue is anticipated from fees received from borrowers for issuance of loan guarantees.

Operating results.—Revenue from interest and fees in 1960 included \$2 million in dollars and \$12.5 million in dollar equivalents of foreign currencies. Such revenue is expected to increase to about \$3.5 million in dollars and \$17.7 million in foreign currencies for 1961 and to about \$7 million in dollars and \$28.1 million in foreign currencies for 1962. A total of \$0.8 million was realized in dollars during 1960 from sales of the Fund's foreign currency holdings. This amount is expected to increase to \$4.1 million in 1961 and \$9.7 million in 1962. All earnings will be retained for future lending.

The investment guarantee program encourages and facilitates private American investment in economically underdeveloped areas of the world. It provides guarantee protection against loss from the following noncommercial risks: (a) inconvertibility of local currency receipts from the investment; (b) expropriation or confiscation of all or part of the investment; and (c) war damage. The guarantees, which have a maximum term of 20 years, are now available in any economically underdeveloped country whose government has agreed with the U.S. Government to institute the program. A total of 49 countries and their overseas dependent territories have participated through October 1960. Negotiations for agreements with other countries are continuing.

Budget program.—Obligations of the program after June 30, 1956, are based on a fractional reserve, which is 25% of total guarantees issued and outstanding since that date. Guarantees issued prior to June 30, 1956, were issued with 100% backing. Guarantees to be issued during 1962 are estimated at \$200 million. Under the fractional reserve basis, this would require obligations of \$50 million in 1962 to support the guarantees issued in that year.

Financing.—The reserve funds for the program against which obligations are made come from the following three sources, and these sources would be used for payment of claims in the order given:

(a) Revenue from a fee of approximately 0.5% charged the investor for guarantee protection provided.

(b) Money recovered from the sale of assets or local currency acquired by the U.S. Government as a result of a loss due to payment of a claim.

(c) Borrowing authority given the program by the Congress.

Operating results and administration.—The fund has sustained no loss and no claims are pending. Fees collected through June 30, 1960, are \$5.4 million and are carried forward as retained earnings as a reserve against possible future loss. The fund bears no expense. Administrative expenses are paid from funds appropriated for general administrative expenses of the economic assistance programs and allocated to the International Cooperation Administration.

The Office of Inspector General and Comptroller, Mutual Security, is organizationally located in the Department of State and operates under authority of Section 533(a) of the Mutual Security Act of 1954.

Beginning in 1962 this program will be financed from the appropriation Administrative and other expenses (State) shown above. In 1960 and 1961 the expenses of the Office were funded in this account through expenditure transfers from various mutual security appropriations. Estimated requirements from the various appropriations are as follows (in thousands of dollars):

Financing applied to program.....		50,000	100,000

Note.—In addition, interest of \$360 thousand (in dollar equivalents) is estimated to be generated in foreign currencies.

Under existing legislation, 1961.—It is anticipated that a supplemental appropriation of \$150 million will be sought under existing authorization. The Development Loan Fund under current plans will have virtually exhausted its available capital by February. Additional funds will permit the lending program to proceed without delay.

LIMITATION ON ADMINISTRATIVE EXPENSES, DEVELOPMENT LOAN FUND

Under existing legislation, 1961.—An increase in the limitation is anticipated for 1961 in an amount of \$75,000 to provide for increased administrative costs including those related to the anticipated supplemental appropriation of \$150 million for loans.

GENERAL PROVISIONS

【Sec. 101. (a) Within sixty days following the date of enactment of this Act, the President shall transmit to the Committee on Appropriations of the Senate and the Committee on Appropriations of the House of Representatives a report containing a full and complete revision of the data presented to such committees in justification of appropriations requested for the mutual security program for the fiscal year 1961, showing any changes in such program approved subsequent to such presentation, including changes necessary to reflect actual appropriations for the program.】

【(b) Within thirty days following the approval of any change in the mutual security program for the fiscal year 1961, which will result in furnishing assistance of a kind, for a purpose, in an area, or in an amount, different from that described in the report transmitted under subsection (a), and which involves \$1,000,000 or more, or 5 per centum of the amount appropriated under any paragraph of this title whichever is the lesser, the President shall transmit to the Committee on Appropriations of the Senate and the Committee on Appropriations of the House of Representatives a full and complete report of such change and the reasons therefor.】

【(c) This section shall not apply to programs authorized by section 451 of the Mutual Security Act of 1954, as amended.】

【(d) *Sec. 101.* None of the funds herein appropriated shall be used to carry out any provision of chapter II, III, or IV of the Mutual Security Act of 1954, as amended, in any country or with respect to any project or activity, after the expiration of the thirty-five day period which begins on the date the General Accounting Office or any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering mutual security legislation, appropriations, or expenditures, has delivered to the office of the head of any department or agency carrying out such provision, a written request that it be furnished any document, paper, communication, audit, review, finding, recommendation, report, or other material in its custody or control relating to the administration of such provision in such country or with respect to such project or activity, unless and until there has been furnished to the General Accounting Office, or to such committee or subcommittee, as the case may be, (1) the document, paper, communication, audit, review, finding, recommendation, report or other material so requested, or (2) a certification by the President that he has forbidden the furnishing thereof pursuant to such request, and his reason for so doing.

【Sec. 102. None of the funds herein appropriated for Defense Support, the Development Loan Fund, Special Assistance, or the President's Special Authority and Contingency Fund shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation and other water and related land resource programs and projects proposed for construction within the United States of America as per circular A-47 of the Bureau of the Budget, dated December 31, 1952.】

【Sec. 103. Obligations made from funds herein appropriated for engineering and architectural fees and services to any individual or group of engineering and architectural firms on any one project in excess of \$25,000 shall be reported to the Committees on Appropriations of the Senate and House of Representatives at least twice annually.】

【Sec. 104. Except for the appropriations entitled "President's special authority and contingency fund" and "Development Loan Fund", not more than 20 per centum of any appropriation item made available by this title shall be obligated and/or reserved during the last month of availability.】

【Sec. 105. None of the funds herein appropriated nor any of the counterpart funds generated as a result of assistance hereunder or any prior Act shall be used to pay pensions, annuities, retirement pay or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.】

【Sec. 106. None of the funds herein appropriated shall be used to finance any of the activities under the Investment Incentive Fund Program.】

Sec. 【107】 102. The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of the Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations, the President is requested to inform the Congress insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.

Sec. 【108】 103. It is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to United States citizens generally is repugnant to our principles; and in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this title and funds appropriated pursuant to chapter I of the Mutual Security Act of 1954, as amended, these principles shall be applied as the President may determine.

【Sec. 109. The appropriations and authority with respect thereto in this Act shall be available from July 1, 1960, for the purposes provided in such appropriations and authority. All obligations incurred during the period between June 30, 1960, and the date of enactment of this Act in anticipation of such appropriations and authority are hereby ratified and confirmed if in accordance with the terms thereof.】

Sec. 【110】 104. None of the funds provided in this title or appropriated pursuant to chapter I of the Mutual Security Act of 1954, as amended, shall be available for assistance to any country, the

MUTUAL SECURITY—ECONOMIC AND CONTINGENCIES—Continued

GENERAL PROVISIONS—Continued

government of which sells arms, ammunition, or implements of war to the Castro regime, or which furnishes, by grant or loan, any military or economic aid to that regime, unless the President determines that the withholding of such assistance to such country would be contrary to the national interest.

SEC. [111] 105. None of the funds provided in this title or appropriated pursuant to chapter I of the Mutual Security Act of 1954, as amended, shall be available for assistance to any country the government of which sells arms, ammunition, or implements of war to any country in Latin America being subjected to economic or diplomatic sanctions by the Organization of American States, unless the President determines that the withholding of such assistance to such country would be contrary to the national interest. (*Mutual Security and Related Agencies Appropriation Act, 1961; authorizing legislation to be proposed for 1962.*)

PRESIDENT'S SPECIAL INTERNATIONAL PROGRAM

Note.—The appropriation under this head has been transferred to the United States Information Agency in the independent offices chapter.

Section 44 of the Alaska Omnibus Act (73 Stat. 151) authorizes grants to the State of Alaska for a 5-year period ending June 30, 1964, to facilitate assumption by the State of responsibilities hitherto performed in Alaska by the Federal Government.

These funds are to enable the President (a) to make grants to the State to assist in financing functions transferred from the Federal Government, and (b) to finance continued Federal operations for an interim period when the State requests a delay in transfer of functions. In June 1959, the State requested that the Federal Government continue operation of 17 primary and intermediate airports, and allocations were made to the Federal Aviation Agency for this purpose.

The \$6 million requested for 1962 is the maximum authorized by law.

Title I of the Agricultural Trade Development and Assistance Act of 1954 authorizes the sale of surplus agricultural commodities to friendly nations for their currencies, with reasonable precautions neither to displace U.S. sales for dollars nor to disrupt unduly world commodity prices. Such sales may include up to \$1.5 billion of commodities a year, plus unused prior authority. The Commodity Credit Corporation finances the costs. The foreign currencies generated by these sales may be used (a) to help develop new markets for U.S. agricultural commodities, (b) to purchase strategic and critical materials, (c) to procure military materiel and services for the common defense, (d) to purchase goods and services for other friendly nations, (e) to promote balanced economic development and trade among nations including loans to American and foreign business firms abroad, (f) to pay U.S. obligations abroad, (g) to make loans to promote multilateral trade and economic development abroad, (h) to finance international education exchange activities, (i) to translate and publish books and other publications abroad, (j) to aid American-sponsored schools, libraries, and binational centers overseas, (k) to finance the translation of scientific and technical publications and support scientific activities overseas, (l) to acquire buildings and grounds

MISCELLANEOUS—Continued

INFORMATIONAL FOREIGN CURRENCY SCHEDULE—Continued

abroad, (m) to finance participation in trade fairs and related activities, (n) to acquire books from abroad, (o) to aid American educational institutions abroad, (p) to support workshops and chairs in American studies, (q) to provide emergency relief, and (r) to finance audiovisual materials and programs.

Most of the currencies are used for grants to and loans in the foreign country without charge to appropriations. Some are sold to appropriations covering normal diplomatic, defense, and other operations overseas or in the case of excess or restricted currencies, to special foreign currency program appropriations. The proceeds of such sales go to the Commodity Credit Corporation. A lump-

sum appropriation is recommended to reimburse the Commodity Credit Corporation for its losses which are not made up through such sales.

As of June 30, 1961, it is estimated agreements will have been signed calling for deposits of sales proceeds totaling \$6.4 billion. This will represent the market value of commodities and ocean transportation in which the Commodity Credit Corporation investment will be approximately \$9.5 billion.

Schedules covering special currency programs are included in the budgets for mutual security program, Export-Import Bank, National Science Foundation, United States Information Agency, and the Departments of Agriculture, Commerce, Defense, Health, Education, and Welfare, Interior, and State. These schedules do not cover use of currencies for sale to regular appropriations.

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Act of September 24, 1959 (73 Stat. 703-706), **[\$115,000] \$375,000.**

[For an additional amount for "Salaries and expenses", \$28,500.]
(General Government Matters Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

New obligational authority (appropriation).....	50	144	375

1. *Intergovernmental relations.*—This appropriation provides for continued attention by the Commission to interrelations of Federal, State, and local governments.

Representatives of the Federal, State, and local governments are brought together for consideration of common problems, and to provide a forum for discussing the administration and coordination of Federal grant and other programs requiring intergovernmental cooperation.

Proposed Federal and State legislative and administrative programs are developed to coordinate taxes at all levels in order to reduce tax overlapping and simplify the tax structure, and to reduce taxpayer-compliance costs and costs of tax administration.

Technical assistance is provided in the review of proposed legislation to determine its overall effect in the Federal system, and the most desirable allocations of governmental functions, responsibilities, and revenue among the several levels of government are recommended.

2. *Relation of costs to obligations.*—The year-end balance of unpaid undelivered orders are as follows: 1960, \$7 thousand; 1961, \$2 thousand; 1962, \$4 thousand.

The American Battle Monuments Commission maintains cemeteries and memorials located in battle areas to commemorate the participation of American Armed Forces in the campaigns of World War I and World War II. In addition, the Commission maintains the U.S. National Cemetery, Mexico City, Mexico, and the Santiago, Cuba, Surrender Tree Site. Interred in the cemeteries are the remains of 125,621 servicemen who lost their lives in battle. An additional 91,438 dead whose remains were not recovered are commemorated by memorial structures inscribed with their names. There are 11 memorials and 8 cemeteries, each with a memorial chapel, at World War I sites, and 14 cemeteries and memorials at World War II sites.

Large numbers of American tourists and local citizens visit the cemeteries and memorials to pay homage and to view these points of historic, as well as artistic, interest.

New obligational authority (appropriation)			

This is the 13th and final year of a program of construction of cemeteries and memorials to commemorate the services of the American Armed Forces in World War II. The construction program includes 14 cemeteries and memorials in foreign countries, memorials in the national cemetery in Hawaii and on the east and west coasts of the United States, and reconstruction of a World War I memorial destroyed in World War II. Construction will be virtually concluded by the end of 1961, with the completion of the east coast memorial; the Hawaii memorial is expected to be completed in 1962. Dedication of the Manila cemetery and the west coast memorial took place in the fall of 1960, the other 13 cemeteries having been dedicated in the summers of 1956 and 1959.

In light of the expected completion of this program in 1962, the budget provides for termination of the obligation availability of this appropriation as of June 30, 1962.

ATOMIC ENERGY COMMISSION

Current authorizations:

OPERATING EXPENSES

For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the employment of aliens; [rental in or near the District of Columbia;] services authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); purchase of equipment; purchase, maintenance, and operation of aircraft; publication and dissemination of atomic information; purchase, repair, and cleaning of uniforms; official entertainment expenses (not to exceed \$30,000); [not to exceed \$3,650,000 for expenses of travel;] reimbursement of the General Services Administration for security guard services; [not to exceed \$53,400,000 for personal services;] purchase (not to exceed [four hundred and sixty] four hundred and fifty-two, of which [four hundred and thirty-seven] three hundred and fourteen are for replacement only [including two at not to exceed \$4,000 each]) and hire of passenger motor vehicles; [\$2,451,210,000, which, together with the unexpended balances, as of June 30, 1960, of prior year appropriations made available under this head to the Atomic Energy Commission] \$2,423,100,000, and any moneys (except sums received from disposal of property under the Atomic Energy Community Act of 1955 (42 U.S.C. 2301)) received by the Commission, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), [shall] to remain available until expended: *Provided*, That of such amounts \$100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended: *Provided further*, That from this appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided further*, That not to exceed \$15,000,000 of this appropriation may be transferred to the appropriation for "Plant acquisition and construction", if the Commission determines such transfer is necessary to carry out the purposes of such cooperative power reactor demonstration program as may be authorized under the Commission's authorization Act for the fiscal year 1962: *Provided further*, That no part of this appropriation shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-

fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of \$90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of \$45,000 per annum. (42 U.S.C. 2011, 2291; Public Works Appropriation Act, 1961.)

¹ Includes capital outlay for equipment: 1960, \$100,832 thousand; 1961, \$99,428 thousand; 1962, \$120,005 thousand.

The Commission procures raw materials; manufactures special nuclear materials and atomic weapons; develops improved weapons; conducts research and development aimed at generation of atomic power and protection of health against possible hazards arising from atomic energy operations; conducts investigations in the physical and life sciences related to atomic energy, including investigation of controlled thermonuclear reactions; establishes and enforces regulations for civilian uses of atomic energy; promotes industrial participation in atomic energy development for peaceful purposes; encourages scientific and industrial progress through the dissemination of atomic energy information; and participates in programs of international cooperation in peaceful applications of atomic energy.

The program is administered in the field through 12 major offices. Most of the Commission's activities are carried on in Government-owned facilities by industrial concerns and educational institutions operating under contracts. Coordination with the armed services is

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

achieved through the Military Liaison Committee of the Department of Defense.

Total program costs in 1962 are estimated at \$2,486.9 million, or \$2.9 million greater than the estimated 1961 costs of \$2,484 million, and \$47 million greater than actual costs of \$2,439.9 million for 1960. In 1962, increases are provided in the weapons program and in research in the physical and biomedical sciences. Costs for the procurement of raw materials, consistent with present contractual commitments, and for production of special nuclear materials in 1962 decrease from the prior year. In the reactor program, increases are provided for the development of civilian power, naval propulsion, rocket and ramjet propulsion reactors, and small auxiliary power units—these being more than offset, however, by a reduction in the level of development of propulsion reactors for military aircraft. In this latter area funds are provided in 1962 to continue development of one type of nuclear powerplant.

In 1962, as in 1960 and 1961, total program obligations will exceed program costs, the difference being obligations incurred for costs which will not materialize until future years. Total program obligations for operating expenses in 1962 are estimated to be \$2,504.7 million compared to \$2,545.7 million in 1961 and \$2,449.2 million in 1960.

1. *Raw materials.*—Uranium ores and concentrates are procured for processing in the production facilities of the Commission. An estimated 30,475 tons of concentrates, of which approximately 60% will come from domestic sources, will be obtained in 1962. This is a decrease of 1,575 tons from the 32,050 tons estimated to be procured in 1961. Procurement in 1960 was 34,581 tons. Resource evaluation will continue in the development of data on uranium reserves.

2. *Special nuclear materials.*—Uranium concentrates are processed into feed materials from which (a) plutonium is produced in the reactors at Hanford, Wash., and Savannah River, S.C., and (b) the isotope uranium 235 is extracted in plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. Production of special nuclear materials will be at rates required to meet weapons production schedules and nonweapons requirements. Work will continue on process improvements to assure continuity and safety of operation and more economical methods of production.

3. *Weapons.*—The program encompasses the production of weapons; the maintenance of stockpiled weapons in a state of constant readiness; the development and design of new weapons types; maintenance of the Nevada test site in a standby status; and test detection activities. The test detection activities include an experimental program for improving the technique of detecting underground nuclear detonations and developmental effort on systems to detect nuclear explosions at high altitude.

4. *Reactor development.*—This program includes primarily the development of (a) civilian power reactors leading to reliable and economic power, including associated work on fuel element development and related technology, (b) commercial ship reactors, (c) power and propulsion reactors for a variety of military and space applications, and (d) nuclear technology for other civilian

applications such as process heat reactors. The costs by major category are (in thousands of dollars):

Category:	1960 actual	1961 estimate	1962 estimate
Civilian power reactors:			
Government program.....	102,289	107,470	105,600
Cooperative arrangements program..	17,379	19,500	24,600
Euratom program.....	494	1,500	2,700
General supporting reactor research and development program.....	39,045	42,480	47,200
Subtotal, civilian power reactors.....	159,207	170,950	180,100
Merchant ship propulsion reactors....	8,137	10,500	11,400
Army power reactors.....	11,496	15,250	11,500
Naval propulsion reactors.....	77,581	87,500	94,700
Aircraft propulsion reactors.....	62,778	72,615	33,000
Missile propulsion reactors.....	15,199	20,070	20,510
Rocket propulsion reactors.....	14,724	23,230	29,990
Satellite and small power sources....	11,339	15,085	19,000
Equipment and operational services....	26,985	22,250	22,200
Total, reactor development.....	387,446	437,450	422,400

The Commission's civilian power reactor program provides increases to establish a foundation of technical knowledge through a program of research and development on promising reactor concepts; design, fabrication, and operation of power reactor experiments; the development of experimental reactors; and development of prototype powerplants usually on a cooperative basis with industry. Increases are provided for the cooperative arrangements program, whereby the Commission provides financial aid in development of full-scale power reactors built by private utilities and for public power bodies. This aid provides a basis for a privately financed nuclear power industry.

Costs of \$2.7 million shown for Euratom are for research and development under a joint program with the European Atomic Energy Community for which appropriations of \$10 million have been authorized.

To provide broad support primarily for civilian power reactor projects, the Commission's programs include general research and development on materials, components, moderators, control techniques, fuel elements, spent fuels reprocessing, and radioactive residues. Some of this work is also applicable to military reactor development programs. Increases are provided for developing improved fuel elements, radioactive waste processing and effluent control, and reactor components to accelerate development of economic power.

The Commission's program for 1962 includes the continuation of work to develop atomic powerplants for use in commercial vessels. The nuclear-powered merchant ship, the NS *Savannah*, is scheduled to undergo startup, test and trials in the latter half of 1961 and experimental operations in 1962. Research and development work will continue.

Efforts will be continued to develop reactors to meet requirements of the Department of Defense and the National Aeronautics and Space Administration. These include propulsion reactors for submarines, surface combatant ships, military aircraft, ramjet missiles (Project Pluto), space rockets (Project Rover), transportable power reactors for the generation of electric power and heat at remote military installations, and small power sources for satellites and other special purpose applications (Project SNAP). Increased cost levels in 1962 are principally for development of nuclear rocket and ramjet engines, for

Project SNAP, and for naval reactor development. Many of the advances in military and other specialized reactor development contribute significantly to the civilian power program.

The Commission also operates the National Reactor Testing Station in Idaho, including two test reactors which provide irradiation services for the Commission's programs.

5. *Physical research.*—Basic and long-range investigations in the fields of physics, mathematics, chemistry, and metallurgy are undertaken to provide an ever-expanding fund of theoretical and practical knowledge in fields related to nuclear energy. By major category the costs are (in thousands of dollars):

Category:	1960 actual	1961 estimate	1962 estimate
High energy physics, including related equipment.....	35,140	53,224	59,159
Controlled thermonuclear research (Project Sherwood), including related equipment.....	33,102	31,146	26,500
Chemistry research.....	28,927	33,900	37,300
Metallurgical research.....	11,236	14,900	16,897
Other physical research.....	19,822	22,985	23,977
Other equipment.....	7,056	7,627	7,471
Total physical research.....	135,283	163,782	171,304

Research in high energy physics continues to expand as new accelerators, on which construction was initiated in prior years, are put into operation. The 1962 amounts exclude provision for the Stanford accelerator which is being proposed for authorization. Project Sherwood, directed toward the production of power from the controlled fusion of heavy hydrogen nuclei, will continue. Costs for research in chemistry and metallurgy will increase in 1962. Approximately 74% of the physical research program is conducted at 13 laboratories owned by or operated for the Commission, and the remainder, comprising approximately 510 projects, is supported in more than 140 universities, colleges, institutes, and independent laboratories.

6. *Biology and medicine.*—Research is conducted on the effect of radiation on living things. It includes investigations of the biological effects of radioactivity in the body, and the development of methods for minimizing exposure to radioactive materials of all kinds and for minimizing and protecting against the injurious effects of radiation. Support is given to the development of methods of utilizing radioactive materials for human welfare and for the diagnosis, treatment, and understanding of human diseases, such as cancer. Evaluation of the significance of human exposure to radioactivity from all sources is given special emphasis. Research provides the basis for establishment of standards to insure that the Commission's activities are conducted with safety.

The major portion of the research is carried on at 15 laboratories which are owned by or operated for the Commission, and the remainder, comprising approximately 550 projects, is supported in more than 220 universities, colleges, hospitals and independent laboratories. The program includes the operation of several facilities in the United States devoted to cancer research and two laboratories in Japan for the determination of long-term effects of atomic bomb radiation on the affected population.

7. *Training, education and information.*—This activity includes operation of special schools; conduct of specialized

courses; granting of fellowships for graduate students; assistance to high schools, colleges, and universities; and dissemination of technical information, including participation in international conferences and exhibits on nuclear science and technology.

Two schools will be operated in 1962: The International Institute of Nuclear Science and Engineering at the Argonne National Laboratory and the Puerto Rico training center. Specialized courses are conducted at the Oak Ridge Institute of Nuclear Studies. In addition, at the New York Health and Safety Laboratory, at the Oak Ridge National Laboratory, and at the Shippingport reactor site, specialized courses including radiochemical and counting procedures and reactor hazards and supervisory instruction will be offered. Charges to nongovernment participants in these schools and courses are based on the type of training provided.

In order to assist the States in the implementation of Public Law 86-373, which provides for Federal cooperation with States in regulating the use of radioactive materials, training courses have been established in radiation safety, radiological health protection, waste disposal, etc., for State and local government employees. No tuition charges are made for these courses.

Under the fellowship program in 1962, approximately 150 college graduates, compared to 177 in 1961 and 134 in 1960, will receive assistance for graduate studies in reactor technology. In 1962, 133 fellowships will be offered in the fields of radiological physics, industrial hygiene, and industrial medicine, which compares to 102 fellowships in these fields in 1961 and 95 in 1960. Assistance to schools to provide for educational programs in atomic energy will be continued. Grants are made to universities to help them acquire reactor training equipment, teaching aids, demonstration apparatus, and special laboratory equipment. University summer courses in general radiobiology are made available to high school science teachers, and special faculty training in reactor technology and radiobiology for university faculty members is provided.

To broaden the dissemination of information on matters relating to atomic energy, the Commission operates the technical information service, maintains libraries, performs translation services, and conducts tours with traveling atomic energy exhibits. The Commission arranges for nuclear exhibits at selected foreign conferences and exhibitions in order to demonstrate U.S. technology.

8. *Civilian applications of isotopes and nuclear explosives.*—This program provides for Commission participation in expanded applications of isotopes and the peaceful uses of nuclear explosives (Project Plowshare). The costs for these programs are (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Isotopes development.....	3,821	3,780	5,500
Peaceful uses of nuclear explosives (Project Plowshare).....	6,588	7,000	6,500
Total.....	10,409	10,780	12,000

The isotopes development program is directed to (1) the development of principles of new and expanded uses of radioisotopes and radiation in civilian applications and (2) research and development in support of radioisotopes production. It provides for participation in research and development projects with educational, industrial, and research organizations in developing this technology.

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

Project Plowshare provides for the investigation and development of the peaceful uses of nuclear explosives, including research, development, and experimentation on specific applications. Applications include those for civil engineering, power and isotope production, and development of unique scientific data.

9. *Communities.*—The Commission operates the town of Los Alamos, N. Mex., with a population of about 14,000. In implementation of the Atomic Energy Community Act of 1955, all municipal facilities in Oak Ridge, Tenn., and Richland, Wash., were transferred, prior to the close of 1960, to the newly incorporated cities at these locations. Sale of all commercial and residential properties at these sites by the Housing and Home Finance Agency, initiated in 1957, is expected to be completed by midyear 1962. The 1962 estimates provide for the costs of operation at Los Alamos, financial assistance payments to Oak Ridge and Richland as authorized in Public Law 84-221, and operation of a small number of housing units at other sites. Operation of employee housing at Sandia Base, N. Mex., by the Atomic Energy Commission has been discontinued.

The relationship between costs and revenue included under Advances and reimbursements from non-Federal sources (revenue applied) is indicated in the following table (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Revenue.....	10,492	5,439	5,452
Operating costs, including Atomic Energy Commission costs related to assistance payments.....	14,248	9,707	8,583
Excess of costs over revenue.....	3,756	4,268	3,131

10. *Program direction and administration.*—This program includes the salaries and other costs for employees of the Federal Government engaged in executive direction, general management, and technical supervision of the atomic energy program; the negotiation and administration of contracts; establishment and enforcement of regulations for civilian uses of atomic energy; and other related administrative activities. Employees under this program are located in the Headquarters in Germantown, Md., and 12 operations offices. The 1962 increase of \$195 thousand is related to a small increase in average employment, which provides for full year employment at the June 30, 1961 level. No increase in staff is provided for 1962.

11. *Security investigations.*—The Atomic Energy Act of 1954 requires background investigations of those persons proposed for access to restricted data of the atomic energy program. The number of full background investigations to be requested in 1962 is estimated at 18,500 compared with 17,773 for 1961 and 19,443 for 1960.

12. *Cost of work for others.*—In furthering the objectives of the Atomic Energy Act of 1954 concerning utilization of atomic energy for peaceful purposes, the Commission furnishes materials and services, apart from those which it provides normally for its own basic programs, to industrial organizations and other private parties. Costs for

these are incurred only upon the request of others. Charges made for such products and services are reflected in the budget under Advances and reimbursements from non-Federal sources (revenue applied) and are applied as a source of funds, thereby reducing the amount of appropriations required. The items included are (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Cost of products sold.....	5,083	5,221	3,349
Cost of services performed.....	1,267	1,233	1,453
Total other funded costs (excluding depreciation).....	6,350	6,454	4,802
Related revenue.....	9,915	10,587	7,176
Excess of revenue over funded costs.....	3,565	4,133	2,374

14. *Relations of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Inventories and items on order:				
Inventories (goods unconsumed by activities).....	191,791	191,097	191,926	195,666
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	644,489	653,550	691,037	699,767
Advances (payments for goods and services not yet received).....	24,921	26,436	49,939	55,278
Collateral funds and other deposits (insurance collateral, employee benefit and annuity funds, merchandise deposits with vendors and miscellaneous deposits).....	20,694	20,185	20,078	20,078
Total selected resources at end of year.....	881,895	891,268	952,980	970,789
Selected resources at start of year (—).....	—	—881,895	—891,268	—952,980
Obligations incurred for costs of other years, net.....		9,373	61,712	17,809

The increase in 1961 over 1960 is attributable principally to increases in (1) advances related to procurement of uranium concentrates deferred until future years, and (2) unpaid undelivered orders associated with the Co-operative power demonstration program, the Euratom program, and special computer equipment for the weapons program. The increase in 1962 over 1961 is attributable principally to increases in (1) inventory balances related to program requirements, (2) advances related to procurement of uranium concentrates deferred until future years, and (3) unpaid undelivered orders related to higher operating levels for the weapons program.

15. *Advances and reimbursements from non-Federal sources (revenue applied).*—This item, shown as a source of financing on the program and financing schedule, reduces appropriation requirements and is obtained from services performed; the sale and lease of products, including sale and lease of nuclear materials produced as a part of the Commission's own basic program; the operation of Atomic Energy Commission-owned communities and housing; the sale of special reactor materials; and products and services for which costs are incurred only upon the request of others and are included under Cost of

work for others. The items included are (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Income from products sold and services performed the costs of which are included in program costs of current or prior years:			
Sale of source and special nuclear materials and related products	4,442	1,000	3,950
Income from lease of materials and consumption charges for special nuclear materials	2,056	2,300	6,900
Income from sale of steam	817	985	1,585
Income from research hospitals	370	398	398
Income from training, education and information	301	298	284
Income from communities	10,492	5,439	5,452
Miscellaneous income	1,978	1,593	1,955
Subtotal	20,456	12,013	20,524
Income from other products sold and services performed, costs of which are incurred at request of others and included under Cost of work for others:			
Products sold	8,403	9,056	5,386
Services performed	1,512	1,531	1,790
Subtotal	9,915	10,587	7,176
Total, advances and reimbursements from non-Federal sources (revenue applied)	30,371	22,600	27,700

16. *Equipment not included in construction projects.*—Equipment not included in construction projects is budgeted under the individual operating programs, and such costs are included in the amount shown for each program on the program and financing schedule.

A tabulation of capital outlays for equipment included in the operating programs is as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Equipment costs incurred:			
Raw materials	—43	29	66
Special nuclear materials	20,964	23,733	24,000
Weapons	36,139	31,810	48,000
Reactor development	25,698	21,250	21,600
Physical research	14,152	18,213	21,403
Biology and medicine	1,951	2,263	2,346
Training, education, and information	452	423	348
Civilian applications of isotopes and nuclear explosives	830	665	1,575
Communities	301	82	82

Transferred to—			
"Operating expenses," Atomic Energy Commission (74 Stat. 752).....	-----	-5,000	-----
"Other procurement, Navy" (74 Stat. 752).....	-----	-3,500	-----
Appropriation (adjusted).....	262,500	204,250	174,950

From this appropriation the Atomic Energy Commission constructs the plants and facilities necessary for its production, research and development, and supporting operations. Appropriations for plant acquisition and construction and for financial assistance in the development of reactors require specific authorization by the Congress. Of the new obligational authority being requested for 1962, \$53.5 million applies to construction projects previously authorized, with the balance of \$121.5 million being applicable to projects for which authorization is being requested for 1962.

The details of the 1962 estimates by activity are as follows:

1. *Raw materials*.—This activity provides for minor construction to support the Government-owned procurement installations.

2. *Special nuclear materials*.—This activity provides for additions, modifications, and improvements to feed materials plants, the gaseous diffusion plants, and the pro-

duction reactor installations. Obligational requirements in 1962 include \$7.2 million to complete funding for the new production reactor at Hanford, Wash., previously authorized.

3. *Weapons*.—This activity provides for the construction and modification of facilities for the production of weapons and for the development and engineering of new weapon types.

4. *Reactor development*.—This activity provides for the construction of laboratory buildings for fundamental engineering work on reactor concepts and materials, facilities for the housing of reactor experiments, civilian power experimental reactors generating electrical energy or producing over 10,000 kilowatts of heat, prototype power reactors as part of the cooperative arrangements program between the Commission and industry, prototype reactors for military purposes, and construction of testing and development installations. Funds provided in 1962 for new projects requiring authorization relate principally to construction of development and test facilities for nuclear aircraft and systems for nuclear auxiliary power, a fuels recycle pilot plant, and additional laboratory and technical support facilities. Obligational requirements in 1962 include \$12 million for projects already authorized, principally development and test facilities for nuclear rockets and missiles and a ground prototype for a naval natural circulation reactor.

5. *Physical research*.—This activity provides for construction of large research machines and laboratory buildings to further research in physics, chemistry, and metallurgy. It includes construction and modification of ultra-high energy particle accelerators in the multi-billion electron-volt range, which will assist in obtaining new knowledge about the atomic nucleus and the elementary particles. Funds provided in 1962 for new projects requiring authorization relate principally to new laboratory buildings for research in chemistry and high energy physics. Obligational requirements in 1962 include \$34.3 million to complete funding for projects already authorized, principally the materials research laboratory, the zero gradient synchrotron, and modifications to other accelerators.

6. *Biology and medicine*.—This activity provides for construction supporting biomedical research in atomic energy. The principal item included in 1962 is a laboratory for mixed fission products inhalation studies.

7. *Training, education, and information*.—This activity provides for minor construction in connection with the Commission's training program.

8. *Civilian applications of isotopes and nuclear explosives*.—This activity provides for the construction of facilities required for research and development directed toward the civilian applications of isotopes and the peaceful uses of nuclear explosives. No new obligational authority is being requested in 1962.

9. *Communities*.—This activity provides for improvements and additions to community facilities at Los Alamos, N. Mex.

10. *Administration*.—This activity provides for improvements and modifications of administrative facilities at the Commission headquarters in Germantown, Md.

The costs to this appropriation and the financing of these projects are analyzed in the following table (in thousands of dollars):

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations, as follows:
 "Construction and equipment," National Aeronautics and Space Administration.
 "Military construction, Army."
 "Mutual security—economic," funds appropriated to the President.
 "Navy management fund."
 "Operation and maintenance, Army."
 "Operation and maintenance, Navy."
 "Procurement of equipment and missiles, Army."
 "Procurement other than aircraft and missiles, Air Force."
 "Research and development," National Aeronautics and Space Administration.
 "Research and development," Office of Civil and Defense Mobilization.
 "Research, development, test, and evaluation, Army."
 "Ship construction," maritime activities, Department of Commerce.
 "Shipbuilding and conversion, Navy."
 "Ships and facilities, Navy."

GENERAL PROVISIONS

Any appropriation available under this or any other Act to the Atomic Energy Commission may initially be used subject to limitations in this Act during the fiscal year [1961] 1962 to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of any appropriation herein may be transferred to any other such appropriation, but no such appropriation, except as otherwise provided herein, shall be increased by more

ATOMIC ENERGY COMMISSION—Continued**Current authorizations—Continued****GENERAL PROVISIONS—Continued**

than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

No part of any appropriation herein shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (42 U.S.C. 2011; *Public Works Appropriation Act, 1961.*)

Guarantees may be given on loans made by public or private financial institutions to provide construction funds and working capital for defense production plants. At the beginning of 1960 guaranteed credit from private financial institutions amounting to \$3 million was available to two borrowers; by year-end all outstanding loans were fully paid. It is estimated that in 1961 and 1962 no guarantees will be in force. Although Public Law 86-560 extended the guarantee provisions of the Defense Production Act to June 30, 1962, net earnings will be paid to Treasury in 1961, thereby closing out the account (50 U.S.C. App. 2091, 2092).

The Board regulates the economic aspects of air carrier operations, both domestic and international; investigates aircraft accidents; participates in the development of international air transportation; and participates in the development of safety rules and standards. The increase proposed for 1962 is for expansion in certain critical program areas, primarily in the routes and safety areas.

1. *Economic regulation.*—This includes granting certificates of public convenience and necessity, prescribing or approving rates and rate practices of air carriers, fixing mail rate compensation, preventing unfair competition, approving business relationships between air carriers, and adjudicating complaints alleging violations of civil air regulations.

2. *Safety activities.*—These consist of the investigation of civil aircraft accidents involving aircraft over 12,500 pounds or causing fatalities, the determination of probable cause in all civil aircraft accidents, and the investigation of potential hazards and recommendation of preventive measures to avoid accidents in the future.

3. *Board adjudication, executive, and legal staff activities.*—In addition to the adjudication of cases, program planning, and top policy and decision making functions of the Board, legal advice and assistance is provided on all aspects of economic, regulatory, and safety activities; opinions of the Board are prepared; and litigation matters are handled.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

¹ Adjustment of prior year obligations.

The Board fixes rates for transportation of airmail to promote the development of air transportation required for the commerce of the United States, the postal service, and the national defense. Many of these rates include an element of subsidy. The subsidy portion is paid by the Civil Aeronautics Board, and the service portion is paid by the Post Office Department.

At present, subsidy obligations incurred by the Board in carrying out its ratemaking functions under section 406 of the Federal Aviation Act of 1958 are not subject to prior budgetary and appropriation control. Congressional appropriations provide only for making subsequent payments to air carriers and have no effect on the Board's authority to obligate the Federal Government for subsidies. These appropriations to liquidate contract authorizations are available until expended but are requested only in the amounts required for payments estimated to become due in the budget year. For 1961, it is currently estimated that a supplemental appropriation of nearly \$22 million, shown under Proposed for later transmission, will be required.

The obligations shown above, less the obligated balances recovered, reflect the amounts recorded each year as due the air carriers. These sums cover services performed during the year, computed at rates then in effect, plus or minus such adjustments as are needed to reflect

the issuance, during the year, of rate orders affecting prior years. Approximately 1 to 2 months of obligations are due but unpaid at the end of any year.

The following table reflects the estimated amounts becoming due finally for each year, together with the adjustments between years (in thousands of dollars):

ESTIMATED SUBSIDY EARNINGS AND OBLIGATIONS

	1960 actual	1961 estimate	1962 estimate
Estimated subsidy earnings under final Board action:			
Local service operations.....	54,399	62,104	68,198
Helicopter operations.....	4,960	5,280	6,941
Alaskan operations.....	8,923	8,611	9,195
Total earnings.....	68,282	75,995	84,334
Earnings in prior years recorded within the year.....	5,037	14,776	2,002
Earnings of the year recorded in later years (-).....	-10,970	-1,397	-2,101
Total program costs—obligations.....	62,349	89,374	84,235

The following analysis shows the subsidy outlook for 1962 under final Board actions:

CARRIER UNITS

	Non-subsidized	Subsidized	
Domestic:			All domestic trunklines are in nonsubsidized status. Subsidy need for local service and helicopter operations has increased as a result of certification of additional service, acquisition of new equipment, and increasing costs. Subsidy will continue to support routes between continental United States and Alaska and to remote localities. Hawaiian and international operations are in nonsubsidized status.
Domestic trunklines.....	12	--	
Local service operations.....	--	13	
Helicopter operations.....	--	3	
Alaskan operations.....	1	9	
Hawaiian operations.....	2	--

1. *Recruiting and examining.*—Most appointments in the competitive civil service are made under the open competitive merit system through examinations held by the office of the Commission and its boards of examiners, made up of agency personnel operating under the supervision and direction of the Commission. Appointments through such competitive examinations will accord career or career-conditional status. Physically handicapped persons are given special placement attention. Veterans are aided in securing the benefits to which they are entitled.

PRODUCTION COUNT

	1960 actual	1961 estimate	1962 estimate
Examinations announced by—			
The Commission.....	3,097	2,900	2,900
Boards of examiners.....	5,214	5,900	6,000

Total.....	1,867,826	1,859,300	1,868,000

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions, and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system.

PRODUCTION COUNT

	1960 actual	1961 estimate	1962 estimate
National agency check and inquiry cases.....	247,219	254,500	254,500
Suitability cases resulting from national agency check and inquiry.....	5,840	5,130	5,370
Other personal investigations.....	5,940	5,490	5,880

3. *Inspections and classification audits.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. The Commission also conducts classification reviews to insure compliance with classification standards and promotes interagency training programs for Federal employees.

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act and other benefit acts involves adjudicating annuity, death, benefit, refund, and deposit claims as well as maintaining the con-

rol accounts for the fund and making payments to annuitants and other claimants.

PRODUCTION COUNT

	1960 actual	1961 estimate	1962 estimate
Annuity and death claims.....	87,928	99,000	110,100
Refund claims.....	164,622	163,500	168,000
Claims for deposit.....	23,740	47,100	56,800
Inquiries.....	210,945	247,300	243,100

5. *Developing programs and standards.*—The Commission develops programs, devises tests, issues standards and regulations, and proposed legislation to improve the Federal personnel system for both competitive and non-competitive positions.

6. *Appellate functions.*—These consist of hearing and taking action on appeals; administering the political activities statutes; and providing advice to agencies and individuals regarding rights of appeal.

8. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1959, \$138 thousand; 1960, \$132 thousand; 1961, \$132 thousand; 1962, \$132 thousand.

This appropriation covers the Government's share of the cost of health insurance for annuitants who retire after the enactment of the Federal Employees Health Benefits Act of 1959. In addition to the amount requested for

CIVIL SERVICE COMMISSION—Continued

Current authorizations—Continued

GOVERNMENT PAYMENT FOR ANNUITANTS, EMPLOYEES HEALTH BENEFITS FUND—Continued

1962 (\$5,450 thousand), an estimated \$550 thousand will be available in the fund from the preceding year's appropriation.

It is estimated that 116,000 eligible employee and survivor annuitants will participate in this program by the end of 1962 and that they will pay an estimated \$9.8 million into the fund.

The use of these funds is reflected in the schedules for the Employees health benefits fund.

GOVERNMENT CONTRIBUTION, RETIRED EMPLOYEES HEALTH BENEFITS FUND

For payment to the "Retired employees health benefits fund" of Government contributions with respect to retired employees, as authorized by section 4 of the Retired Federal Employees Health Benefits Act (74 Stat. 850), \$20,900,000.

Financing:			
New obligatory authority (appropriation).....			20,900

This appropriation is used (1) to cover the Government's share of the cost of health insurance for employees who were retired when the Retired Federal Employees Health Benefits Act became effective; and (2) to cover the Government's contribution for administrative expenses of the Commission.

It is estimated that 380,000 retirees will participate in this program at the start with approximately 50% enrolling in the Government-wide plan.

The use of these funds is reflected in the schedules for the Retired employees health benefits fund.

Legislation enacted by the 85th Congress increased annuities of certain retired employees and survivors effective August 1, 1958, and provided annuities for certain widows and widowers. This legislation also requires the termination of such annuities and increases in annuities for each year after 1960, for which an appropriation has not been made to cover their cost. Annual appropriations are contemplated. The appropriation required for 1962 is \$44,637 thousand.

Legislation will be proposed to repeal the requirement for a specific appropriation to cover the cost of the annuities and increased annuities indicated above. If the proposed legislation is enacted, special annual appropriations for this purpose will not be required.

LIMITATION ON ADMINISTRATIVE EXPENSES, EMPLOYEES HEALTH BENEFITS FUND

(Trust fund)

Not to exceed \$1,148,000 of the funds in the "Employees health benefits fund" shall be available for reimbursement to the Civil Service Commission for administrative expenses incurred by the Commission during the current fiscal year in the administration of the Federal Employees Health Benefits Act of 1959 (73 Stat. 713), including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

Limitation.....			1,148

The Federal Employees Health Benefits Act of 1959, approved September 28, 1959, provides that beginning in 1962 the Employees health benefits fund will be available for administrative expenses incurred by the Commission, within such limitations as may be specified annually by the Congress. The act also authorized the Commission, for 1960 and 1961, to pay for these administrative expenses from the Employees life insurance fund without regard to limitation, subject to reimbursement from the Employees health benefits fund for any amounts expended in those years together with interest at a rate to be determined by the Secretary of the Treasury.

The use of these funds is reflected in the schedules for Advances and reimbursements.

LIMITATION ON ADMINISTRATIVE EXPENSES, EMPLOYEES LIFE INSURANCE FUND
(Trust fund)

Not to exceed **[\$250,000]** \$262,000 of the funds in the "Employees Life Insurance Fund" shall be available for reimbursement to the Civil Service Commission for administrative expenses incurred by the Commission during the current fiscal year in the administration of the Federal Employees Group Life Insurance Act of 1954, as amended (5 U.S.C. 2091-2103), including services as authorized by section 15 of the Act of August 2, 1948 (5 U.S.C. 55a): *Provided*, That this limitation shall include expenses incurred under section 10 of the Act, notwithstanding the provisions of section 1 of Public Law 85-377 (5 U.S.C. 2094(c)). (*Independent Offices Appropriation Act, 1961.*)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate

The Federal Employees' Group Life Insurance Act (5 U.S.C. 2091-2103), provides that the Employees life insurance fund is available for any expenses incurred by the Civil Service Commission in the administration of the act within such limitation as may be specified annually in appropriation acts. The use of these funds is reflected in the schedule for Advances and reimbursements.

1. *Administration of the basic insurance program.*—Expenses are incurred for functions pertaining to employees and annuitants covered under the basic provisions of the act.

2. *Beneficial association work.*—Expenses are incurred for functions pertaining to maintenance by the fund of life insurance agreements of employee beneficial associations.

Intragovernmental funds:

INVESTIGATIONS (REVOLVING FUND)

This fund finances on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (66 Stat. 107).

Budget program.—Because work on some investigations will be started in one fiscal year and completed in another, work-in-process is recognized as an asset of the fund. Agency estimates of investigations to be requested in 1961 and 1962 as compared to 1960 experience, are presented below. In addition the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1960 actual	1961 estimate	1962 estimate
On hand, beginning of year.....	3,669	4,805	4,055
Received.....	25,547	26,000	25,000
Total workload.....	29,216	30,805	29,055
Processed.....	24,411	26,750	25,500
On hand, end of year.....	4,805	4,055	3,555
Average positions.....	932	1,020	995
Unit cost.....	\$352	\$350	\$350

The estimated decrease in costs for 1961 and 1962 resulted primarily from the lower number of points of investigation because of the reduced period of coverage. This saving was partially offset, however, by the recent pay raise and the cost of the new health benefits program.

Operating results and financial condition.—The capital of the fund consists of \$4 million appropriated in 1952. Excess earnings are paid into miscellaneous receipts of the Treasury.

¹ Includes capital outlay as follows: 1960, \$5 thousand; 1961, \$6 thousand.

1. *Investigations and studies of civil rights matters.*—The Commission on Civil Rights is responsible for investigating allegations made that citizens are being deprived of their right to vote by reason of their color, race, religion, or national origin; collecting information concerning legal developments constituting a denial of equal protection of the laws under the Constitution; and appraising laws and policies of the Federal Government on equal protection of the laws. In 1961, the Commission has extended its studies to the areas of employment and administration of justice. Under present law, the life of the Commission will expire 60 days after the submission of a final report to the President and the Congress on September 9, 1961.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$21 thousand; 1959 (adjusted), \$43 thousand; 1960, \$26 thousand; 1961, \$30 thousand.

The Commission was established to investigate and study existing practices of judicial assistance and co-operation between the United States and foreign countries and to draft agreements to be negotiated by the Secretary of State and recommend legislation or other action to the President with a view to achieving improvements. An advisory committee, composed of persons active in public life, particularly in the legal profession was created to advise and consult with the Commission.

The life of the Commission was extended by law from December 31, 1959, to December 31, 1961. However, appropriated funds were available only until December 31, 1959.

The Export-Import Bank of Washington facilitates and assists in financing U.S. foreign trade. To do this it participates in or guarantees credits extended by U.S. exporters, commercial banks, and other financial institutions to foreign purchasers of exports from the United States, and also makes direct loans to finance U.S. exports. The Bank initiated two new services in 1960: First, a plan of guarantees covering political risks on short and medium term export transactions; second, participation by the Bank in

financing certain medium-term exporter loans relying solely upon the credit judgment of a U.S. commercial bank. In addition, the Bank insures against risks of war and expropriation of certain exports held abroad on consignment awaiting sale. The total amount of dollar loans, guarantees, and insurance which the Bank may have outstanding at one time is \$7 billion (12 U.S.C. 635).

The Bank's policy is to extend credit only when private capital is unavailable, and to encourage private participation in the credits extended. Loans generally are made only for specific purposes or projects. No loan is made unless the directors believe it has reasonable assurance of repayment.

Development project loans.—A major portion of the Bank's assistance for the exportation of U.S. materials, equipment, and services is in the form of medium and longer term credits for development projects abroad. These loans not only finance export sales, but help lay the foundation for expanded future trade through strengthening foreign economies.

It is estimated that 85 loans will be authorized by the Bank during 1962 to finance exports of equipment and related services for such projects abroad involving power, agriculture, transportation, and industrial development. This compares to 59 loans in 1960 and 80 estimated in 1961.

Loans outstanding June 30.....	1,767.5	1,895.4	2,052.7
Loans financed by private capital.....	20.2	90.0	124.0

Exporter loans.—Medium-term credit assistance requested by individual exporters is authorized on a case-by-case basis to assist them to sell abroad on deferred payments. Under each of these credits the Bank participates with an exporter or a U.S. bank in jointly financing an export sale. Such loans authorized in 1960 included credits to finance a wide range of capital goods shipped to countries throughout the world.

Some exporter credits are arranged on an individual basis, whereas others are provided under exporter credit lines. The Bank has continued to establish and renew exporter credit lines for individual exporters of capital equipment. The recipient of such a line knows in advance of new foreign sales the approximate terms he will be able to offer on such sales as are made on credit, provided that criteria on the type of export and the credit standing of the importer are met.

Loans financed by private capital.....	2.2	14.4	16.6

Commodity loans.—Credits are authorized by the Bank to finance the sale abroad of U.S. commodities such as cotton, wheat, barley, soybeans, and tobacco, involving medium-term financing for periods of from 9 months to several years when credit is not available from private

sources. Credits for the sale of U.S. beef and dairy cattle also have been authorized to Mexico and Latin America.

Loans financed by private capital.....	5.0	7.0

Emergency foreign trade loans.—From time to time the Bank is called upon to provide financial assistance to meet emergency situations adversely affecting normal trade between the United States and another country. Such loans may take the form of lines of credit to a foreign central bank or other bank or financial institution to provide dollar exchange for a wide range of U.S. exports; credits to fund commercial arrearages resulting from dollar exchange difficulties so that normal trade may be resumed; or credits to assist in financing purchases in the United States required for reconstruction abroad following a national disaster.

¹ Includes reinstatement of \$250 million to United Kingdom.

Political risk guarantees.—Under the new program of short-term political risk guarantees, as of June 30, 1960, the Bank had approved 28 contracts with total limitation on liability thereunder of \$17,204 thousand. It is estimated that 250 contracts with liability of \$150 million will be approved in 1961, and 350 contracts for \$225 million in 1962.

Insurance.—The Bank insures against the risks of war and expropriation certain property of U.S. exporters which is held abroad on consignment awaiting sale. A total of 242 policies were issued by the Bank in 1960 covering cotton and tobacco valued at \$9.3 million. It is estimated that policies covering cotton and tobacco to a value of \$10 million will be issued in 1962.

Administrative expenses.—To carry out the Bank's lending, collecting, and other operations in 1962 it is estimated that a limitation of \$2,750 thousand for administrative expenses is necessary, an increase of \$53 thousand over the 1961 limitation. In addition, it is estimated that audit and legal fees, and purchase of equipment will require \$93 thousand.

Other operations.—The Bank serves as administering agent for mutual security loans and guarantees against currency transfer risk and expropriation authorized by the International Cooperation Administration, and for defense production loans made by the Office of Civil and Defense Mobilization. The Bank also makes loans in foreign currency under the Cooley amendment to Public Law 480. It also acts as collecting agent for the Treasury on the debt settlement agreement with the Federal Republic of Germany, and in liquidation of certain foreign loans of the Reconstruction Finance Corporation.

EXPORT-IMPORT BANK OF WASHINGTON—Con.**Public enterprise funds—Continued****EXPORT-IMPORT BANK OF WASHINGTON FUND—Continued**

Financing.—The Bank is a Government-owned corporation in which the Treasury has invested \$1 billion in capital stock. It can borrow up to \$6 billion from the Treasury on a revolving basis. On June 30, 1960, outstanding borrowings from the Treasury were \$1,631.2 million. Notes outstanding on June 30, 1962, are expected to be \$1,579.2 million. In addition, the Bank arranges the participation of private capital in loans approved by the Bank, and sells notes from its portfolio, thus minimizing the investment of public funds necessary. It is anticipated that total receipts will equal total disbursements in 1962, resulting in no net budget expenditure in that year.

On June 30, 1962, the total amount committed is estimated to be \$5,461.2 million, leaving a margin of \$1,538.8 million for additional commitments. Because disbursements occur over a period following commitment, it is estimated that the unobligated balance of the Bank's authorization to borrow from the Treasury will be \$2,598.3 million at June 30, 1962.

Operating results and financial condition.—During the coming year the net income of the Bank is expected to amount to \$95.2 million. The budget provides for continuation of dividends to the Treasury of \$22.5 million annually through 1962 in lieu of interest on the Treasury investment in the Bank's capital stock. The remaining earnings are retained to meet future contingencies. Total investment of the Government in the corporation is expected to be \$3,361.1 million at the end of 1962, consisting of \$1 billion in capital stock, \$1,579.2 million of borrowings from Treasury, and \$781.9 million of retained earnings available for future contingencies.

The Export-Import Bank administers foreign currency loans to American firms for business development, and to domestic or foreign firms for facilities aiding in the utilization of U.S. agricultural products abroad. These loans are made from a share of the proceeds of the sale of surplus agricultural commodities as authorized by the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691-1724). This program was initiated in 1958. The Bank anticipates that obligations will increase sharply in 1961 over 1960 by a speedup in obtaining signed loan agreements with borrowers, and because allocations will become funded at a faster rate as current Bureau of the Budget and Treasury Department procedures for funding become fully operative.

The Corporation is in liquidation, its only remaining activity being the collection of non-interest-bearing notes sold to Federal land banks on June 30, 1955, and paying the proceeds as dividends to the Treasury. Its mineral interests with the exception of two in the St. Paul district which are in litigation, were transferred to the Department of the Interior during 1958.

Operating results.—The retained earnings at the end of 1962, after making dividend payments to the Treasury of \$800 thousand, are expected to be \$1.6 million. Payments will continue to be made to the Treasury until final liquidation.

FEDERAL INTERMEDIATE CREDIT BANKS INVESTMENT FUND
Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate	
Program by activities:				
Purchase of capital stock of Federal intermediate credit banks (total costs—obligations) (object class 33).....	6,250	9,000	8,000	
Financing:				
Unobligated balance brought forward.....	28,100	21,850	12,850	
Unobligated balance carried forward.....	-21,850	-12,850	-4,850	
Financing applied to program.....	6,250	9,000	8,000	

This fund is available to the Governor of the Farm Credit Administration as a revolving fund for investment in capital stock of the Federal intermediate credit banks (12 U.S.C. 1061(a)(1), 1131i(e)).

Budget program.—Funds will be required in 1961 and 1962 for investment in class A stock of the banks. An estimate of \$9 million net investment is made for 1961 and \$8 million for 1962, leaving an unobligated balance of \$4,850 thousand available for future purchases of stock. The estimate of requirements is based on recent projections made by the 12 intermediate credit banks which indicate that several of the banks will need additional capital in order to keep their debt-to-capital ratios within the 10 to 1 maximum permitted by law.

Financing.—Under section 105(d)(3) of the Farm Credit Act of 1956, the revolving fund authorization was increased from \$40 million to \$70 million by making this fund in effect the owner of \$30 million of class A stock. Of the \$87,405 thousand of such stock outstanding as of January 1, 1957, the sum of \$57,405 thousand must be retired by payments into the Treasury as miscellaneous receipts. When the balance is reduced to \$30 million the remaining proceeds from retirement of such stock will be credited to the revolving fund.

Financing applied to program.....	60	3,500	4,000

This fund is available to the Governor of Farm Credit Administration for investment in class A and class C stock of production credit associations and is designed to enable the Farm Credit Administration to supply capital needs which cannot be met by an association from local sources (12 U.S.C. 1131i(a)).

Budget program.—An estimate for purchase of stock in production credit associations of \$3.5 million is made for 1961 and \$4 million for 1962. The need arises primarily because the volume of business of associations is increasing more rapidly than net worth can be accumulated from local sources.

Financing.—Of the \$60 million in the fund authorized for financing the capital needs of the production credit

FARM CREDIT ADMINISTRATION—Continued**Public enterprise funds—Continued****PRODUCTION CREDIT ASSOCIATIONS INVESTMENT FUND—Continued**

associations, it is estimated that \$4.6 million will be invested at the end of 1961. An additional \$2 million net investment in the associations is expected in 1962, leaving an unobligated balance of \$53.4 million available for future purchases of stock.

Financing applied to program			

This fund, formerly the Agricultural marketing revolving fund, is available to the Governor of the Farm Credit Administration for investments in class A capital stock of the banks for cooperatives (12 U.S.C. 1134).

The fund was created with \$500 million capital in 1929. The capital had been reduced to \$169,969 thousand by June 30, 1953, by writeoffs as follows (in thousands of dollars):

Losses:	
On Red Cross donations.....	197,385
On assets acquired under Agricultural Adjustment Act.....	46,306
On stabilization loans.....	85,551
On drought relief loans.....	789
Total	330,031

Budget program.—No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with section 42(a)(1) of the Farm Credit Act of 1933, as amended.

Operating results and financial condition.—Investment in capital stock will continue to be reduced through 1962, thereby increasing the cash of the fund. Earnings are retained to provide for the future purchase of stock.

MIXED-OWNERSHIP CORPORATIONS

BANKS FOR COOPERATIVES

The banks for cooperatives make loans to finance the operations of farmers' cooperatives. The banks' capital funds are from the Banks for cooperatives investment fund and from borrowing farmers' cooperative associations (12 U.S.C. 1134). The Farm Credit Act of 1955 provides for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government investment.

No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with the act. Repayments of \$8,052 thousand have been made for 1961, and it is estimated that \$8 million will be retired in 1962. As of June 30, 1960, the U.S. Government owned capital stock in the banks in the amount of \$126,339 thousand.

FEDERAL INTERMEDIATE CREDIT BANKS

The Federal intermediate credit banks serve as banks of discount for agriculture, discounting agricultural and live-stock paper for local financing institutions, such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks, and making loans to them on the security of such paper, and providing the production credit associations with necessary supervision and services. The banks were originally wholly owned Government corporations set up to serve exclusively as banks of discount; however, pursuant to the

act of 1956 the banks became mixed-ownership corporations and were made responsible for supervising and assisting the production credit associations to enable them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the acquisition of credit bank stock by production credit associations and the gradual retirement of the Government's investment in the banks. However, in the last few years the banks have been called upon to provide associations with substantially more funds to finance the short-term needs of farmers and it has been necessary for the Federal Government to invest additional capital in the banks in order to keep the debt-to-capital ratios within the 10 to 1 maximum permitted by law. These funds have been obtained from the Federal intermediate credit banks investment fund which was authorized in the 1956 act.

FEDERAL AVIATION AGENCY

The Federal Aviation Agency encourages and fosters the development of civil aeronautics and air commerce by (a) managing the use of the navigable airspace and regulating civil and military air operations; (b) installing and operating aids to air navigation and traffic control for civil and military aviation; (c) conducting research to develop facilities and techniques needed to meet future traffic control and navigation requirements; (d) licensing airmen and aircraft; (e) establishing standards and rules to promote safety; and by (f) administering a program of grants-in-aid for construction and improvement of civil airports.

A system of airways user charges will be proposed involving increased and new taxes on aviation fuel to recover a reasonable share of the costs of airways services from the groups which are directly benefited.

Current authorizations:

[EXPENSES] OPERATIONS

For necessary expenses of the Federal Aviation Agency, not otherwise provided for, including administrative expenses for research and development and for establishment of air navigation facilities, and carrying out the provisions of the Federal Airport Act; purchase of twenty passenger motor vehicles for replacement only; not to exceed **[\$5,000]** \$10,000 for representation allowances and for official entertainment; and purchase and repair of skis and snowshoes; **[\$373,064,000]** \$441,000,000: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the maintenance and operation of air navigation facilities. (49 U.S.C. 1301 et seq.; 49 U.S.C. 1151-1160; 50 U.S.C. 1622, a-c; *Convention on International Civil Aviation, 61 Stat. 1180; Convention on International Recognition of Rights in Aircraft, 4 U.S.T. 1830, 1953; Independent Offices Appropriation Act, 1961.*)

Note.—Estimate for 1962 includes \$150 thousand for activities previously carried under "Research and development." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

1. *Traffic management.*—This activity covers the operation of the national system of air traffic management in the United States and its possessions. With the aid of radar, communications, and other facilities, traffic management personnel at 36 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Control towers are operated at 237 major civil airports to guide traffic movements on and in the vicinity of the airports. Some 339 flight service stations transmit weather and other essential information to pilots, and relay traffic control data between ground controllers and pilots. Major increases in 1962 are for (a) operating newly commissioned traffic management facilities installed with funds appropriated under Facilities and equipment; (b) training of traffic management personnel; and (c) full-year cost of facilities and services operated on a part-year basis in 1961.

TRENDS IN VOLUME OF AIR TRAFFIC

	Aircraft operations at airports with FAA towers (in millions)	Instrument operations at airports with FAA traffic control service (in millions)	General aviation hours flown (in millions)	Revenue passenger miles (in billions)
1956.....	20.4	---	9.9	25.8
1957.....	23.7	4.6	10.6	29.3
1958.....	26.3	4.9	11.3	31.4
1959.....	26.8	6.0	12.0	33.2
1960.....	26.4	6.2	12.7	38.0
1961 estimated.....	26.4	6.5	13.4	41.5
1962 estimated.....	26.9	6.8	14.1	45.3

2. *Facilities maintenance.*—This covers maintenance of the national network of aids to air navigation and traffic control in the United States and its possessions. Major increases in 1962 are for (a) maintenance and operation of more aircraft used more intensively in checking the accuracy of airways facilities, particularly at higher altitudes, and maintenance of newly acquired training aircraft; (b) improvements in communications between and within traffic control installations; and (c) full-year costs of facilities and services operated for part of 1961.

3. *Administration of flight standards program.*—This activity covers the establishment and enforcement of the civil air regulations which are designed to assure high standards of safety in aviation. Inspections are made and certificates issued for aircraft, airmen, aircraft operators, and air agencies that meet safety or competency requirements. Certain facility flight inspection functions

are also included in this activity. Increases in 1962 are chiefly for (a) strengthening enforcement of air safety regulations; (b) providing basic flight training and proficiency flying for inspectors; (c) handling increasing workload incident to the growing volume of aviation activity and the new types of aircraft being placed in service.

4. *Administration of medical standards.*—This covers the development of regulations governing the mental and physical fitness of airmen and other persons whose health affects safety in flight; and administration of an aviation medical research program, the project costs of which are financed under Research and development. Increases in 1962 are for augmenting supervisory capability in line with increases being proposed for medical research projects and for more intensive supervision and training of designated medical examiners.

5. *Research direction.*—This covers (a) administration of the research and development program for improving air traffic control and navigation facilities, the direct project costs of which are financed by the appropriation, Research and development; and (b) support costs of the National Aviation Facilities Experimental Center at Atlantic City, N.J., which were formerly financed under Research and development. Increases in 1962 provide technical supervision to handle the expanded research and development program proposed for 1962.

6. *Administration of airport program.*—This activity includes costs of administering grants for airport construction, inspection of airport facilities to determine their utility, and to assure compliance with law and regulations, and the provision of advisory services on airport design and engineering.

【ESTABLISHMENT OF AIR NAVIGATION】 FACILITIES AND EQUIPMENT

For an additional amount for the acquisition, establishment, and improvement by contract or purchase and hire of air navigation and experimental facilities, including the initial acquisition of necessary sites by lease or grant; the construction and furnishing of quarters and related accommodations for officers and employees of the Federal Aviation Agency stationed at remote localities where such accommodations are not available (at a total cost of construction of not to exceed **【\$50,000】** an average of **【\$55,000】** per housing unit in Alaska); and purchase of **【six】** nine aircraft; **【and the initial flight checking of air navigation facilities and the transportation by air to and from and within Alaska and the Territories of the United States of materials and equipment secured under this appropriation; \$163,250,000】** **【\$126,000,000】**, to remain available until expended: *Provided*, That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment of air navigation facilities. (49 U.S.C. 1301 et seq.; 49 U.S.C. 1507, 1156-1159; Independent Offices Appropriation Act, 1961.)

Note.—Estimate for 1962 includes \$6,900 thousand for activities previously carried under "Research and development." The amounts obligated in 1960 and 1961 are shown in the schedules as comparative transfers.

Under this appropriation, the Federal airways system is being improved by the installation of new equipment and the construction and modernization of facilities. In addition, the appropriation finances major capital items required by other agency programs such as aircraft for facility flight inspection and personnel training, and experimental facilities for the research and development program. The 1962 estimate will carry forward the program begun in 1957 to increase the capacity of the

[ESTABLISHMENT OF AIR NAVIGATION] FACILITIES AND EQUIPMENT—Continued

airways system and to make its operations more efficient and safe. Operating costs of facilities procured under this appropriation are financed by the appropriation entitled Operations.

1. *Air traffic control centers.*—(a) *Long-range radar aids* en route air traffic control by displaying aircraft positions at distances up to 230 miles. (b) *Other center facilities* cover the establishment, improvement, and relocation of centers and associated traffic control aids.

2. *Airport traffic control towers.*—(a) *Terminal area radar aids* traffic control in the vicinity of airports by displaying aircraft positions at distances up to 70 miles. (b) *Other tower facilities* covers the establishment, improvement, and relocation of standard airport towers and associated equipments.

3. *Flight service stations.*—(a) *Domestic flight service stations* include the structures, communications, and other equipment used to relay traffic control information and to provide other flight assistance to pilots. (b) *International flight service stations* include structures and long-distance communications equipment for providing flight assistance and controlling traffic over transoceanic international routes.

4. *Air navigation facilities.*—(a) *VORTAC* covers the ground installation portion of the standard short-range navigation system which defines the location of the principal airways and indicates to pilots of equipped aircraft their distance and direction from ground stations. (b) *Low/medium frequency facilities* include radio-beacons, ranges and associated equipment which provide pilots of equipped aircraft with direction information and define the location of certain airways. (c) *Instrument landing systems* cover the ground installations of this standard system which provides pilots with direction, distance, and glide slope information necessary for making approaches to runways when visibility is poor. (d) *Approach lighting systems* consist of a row of lights extending outward from runways to guide pilots during landings. (e) *Intermediate fields* are emergency landing areas provided on certain air routes in areas where public airports are not available.

5. *Aircraft and related equipment.*—(a) *Facility flight checking* covers aircraft and avionic equipment used to flight check accuracy and other characteristics of navigation and traffic control aids. (b) *Training* covers aircraft used to train and provide proficiency flying for safety inspectors. (c) *Research support* aircraft are used in development and testing of airways facilities.

6. *Research, test, and evaluation facilities.*—This activity covers construction and improvement of facilities and the procurement of equipment for general purpose use in the research and development program.

7. *Housing, utilities, and miscellaneous facilities.*—This includes supporting facilities and items not covered elsewhere.

The following table lists the major facilities already funded and those budgeted in 1962:

NUMBER OF FACILITIES

	<i>Authorized through 1961</i>	<i>Proposed in 1962</i>
1. Air traffic control centers:		
(a) Long range radars.....	82	2
(b) Other center facilities: Construct and equip transition terminal centers.....	24	1
2. Airport traffic control towers: Terminal radar ATC: Radar beacon systems.....	33	15
3. Flight service stations: International.....	12	1
4. Air navigation facilities:

GRANTS-IN-AID FOR AIRPORTS (LIQUIDATION OF CONTRACT AUTHORIZATION)

For liquidation of obligations incurred under authority granted in the Act of August 3, 1955 (69 Stat. 441), to enter into contracts, [\$80,000,000] \$70,000,000, to remain available until expended. (49 U.S.C. 1101-1106, 1108-1119; Independent Offices Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)			
	1960 actual	1961 estimate	1962 estimate

Unobligated balance carried forward (contract authorization).....	28,721	21,721	6,721
New obligational authority (contract authorization).....	63,000	63,000	
Status of Unfunded Contract Authorization (in thousands of dollars)			
Unfunded balance brought forward.....	128,500	134,000	117,000
Contract authorization (new).....	63,000	63,000	
Unfunded balance carried forward.....	-134,000	-117,000	-47,000
Appropriation to liquidate contract authorization.....	57,500	80,000	70,000

Under the Federal Airport Act, as amended, grants are made to public agencies to aid the development and improvement of public airports. These grants generally cover 50% of project costs and are limited to facilities deemed essential for the safety, convenience, or comfort of the traveling public. Contract authorizations for this program are provided by existing legislation through 1961. The following tabulation summarizes the activity under this program:

	[Dollars in millions]		
	1947 through 1960 actual	1961 estimate	1962 estimate
Airports having projects in program.....	1,526	365	70
Projects physically completed.....	3,659	390	300
Grant funds.....	\$528.8	\$63.0	
Prior year balance available.....		\$28.7	\$21.7
Grant obligations.....	\$499.3	\$70.0	\$15.0
Federal expenditures.....	\$378.4	\$81.2	\$80.0

It is estimated that an appropriation of \$70 million will be required for 1962 to pay obligations incurred under available contract authorization.

Legislation authorizing appropriations for the program at a reduced level in 1962 and 1963 will be proposed. For this purpose the budget includes \$40 million under Proposed for later transmission.

RESEARCH AND DEVELOPMENT

For expenses, not otherwise provided for, necessary for research, development, and service testing in accordance with the provisions of the Federal Aviation Act (49 U.S.C. 1301-1542), including construction of experimental facilities and acquisition of necessary sites by lease or grant, [\$64,000,000] \$85,000,000, to remain available until expended. (49 U.S.C. 1301 et seq.; Independent Offices Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$6,900 thousand for activities transferred in the estimates to "Facilities and equipment," and \$150 thousand for activities transferred to "Operations." The amounts obligated in 1960 and 1961 are shown in the schedules as comparative transfers.

The Federal Aviation Agency carries out a program to improve and modernize the national system of aviation facilities through the development of new systems, procedures, and devices. The Agency also conducts a program of medical research to provide basic data needed in the development of rules and regulations governing the certification of airmen and to assure aviation safety.

Research is conducted through contracts with qualified firms, universities, and individuals, or by Agency staff or other governmental agencies. The data, procedures, or equipments resulting from this research are evaluated and tested to determine their potential value in meeting future air traffic control and navigation needs.

Supervision and administrative support costs for research projects financed by this appropriation are covered by the Operations appropriation. Costs of acquiring experimental facilities and major equipment for the research program are included in the Facilities and equipment appropriation.

1. *Air traffic control and navigation.*—This provides for improving the airways system by adapting existing technology to air traffic control and navigation problems and by long-range research and development to meet future needs. The 1961 and 1962 program provides for increased emphasis on development and testing of an automatic data processing and display system for traffic control, as well as for continuing studies of present airways system operations and future requirements, theoretical analyses of proposed facilities, and work in data acquisition, communications, navigation, and landing systems.

2. *Aviation weather.*—This provides for continuing a program, coordinated with the Departments of Defense and Commerce, to develop a national aviation weather system. The 1962 estimate provides for studies and equipment development on weather data acquisition, use in forecasting, and presentation.

3. *Aircraft safety.*—This provides for research, testing, and experimentation on aircraft structures and systems in order to provide a sound basis for airworthiness standards and safety regulations. Work is also being done on techniques and devices for airborne collision avoidance. The 1962 estimate provides for an expanded effort on fire protection, structural soundness, collision avoidance, as well as other aircraft systems and equipment that affect safety.

FEDERAL AVIATION AGENCY—Continued

Current authorizations—Continued

RESEARCH AND DEVELOPMENT—Continued

4. *Airports.*—This provides for research and experimentation to establish criteria for designing and equipping airports.

5. *Aviation medicine.*—This covers the conduct of an aeromedical research effort on those physical and psychological conditions which affect safety in flight, and standards for the medical certification of airmen. The 1962 estimate provides for expanding programs at the Civil Aeromedical Research Institute recently established at Oklahoma City, Okla.

OPERATION AND MAINTENANCE, [WASHINGTON NATIONAL AIRPORT] NATIONAL CAPITAL AIRPORTS

For expenses incident to the care, operation, maintenance, improvement and protection of the [Washington National Airport] federally owned civil airports in the vicinity of the District of Columbia, including purchase of [one] five passenger motor [vehicle, for replacement only,] vehicles, including two for police-type use which may exceed by \$300 the general purchase price limitation for the current fiscal year; purchase, cleaning, and repair of uniforms; and arms and ammunition; [\$3,230,000] \$6,000,000. (49 U.S.C. 1348 (b); 54 Stat. 636; 61 Stat. 94; Independent Offices Appropriation Act, 1961.)

Note.—Estimate for 1962 includes \$2,576 thousand for activities previously carried under the appropriation "Operation and maintenance, Dulles International Airport." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

New obligational authority (appropriation).....	2,400	3,230	6,000

This appropriation finances management, operation and protection activities as well as capital costs for equipment and maintenance projects at the federally owned Washington National and Dulles International Airports which serve the National Capital area. Major construction at the airports is financed under the appropriation Construction, National Capital airports. The 1962 request provides for increased traffic at Washington National Airport, and commencement of operations at the new Dulles International Airport.

Direct operating costs and capital outlays of the airports are currently financed by direct appropriations while revenue received for services to tenants and other users are deposited in the Treasury. Legislation is being proposed to establish a National Capital Airports Corporation to operate these airports.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects).....	92	115	145	176
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)....	464	282	551	94
Total selected resources at end of year.....	556	397	696	270
Selected resources at start of year (-).....		-556	-397	-696
Adjustment of selected resources reported at start of year.....		24		
Costs financed from obligations of other years, net (-).....		-135		-426
Obligations incurred for costs of other years, net.....			299	

The following statements reflect financial results of the total operations including unfunded depreciation on all depreciable assets, interest on the Government's investment on a basis comparable to that of other major commercial airports, and total actual revenue together with amounts representing the value of services furnished other Government agencies for which no collections are made. Unrealized revenue includes landing fees for Government aircraft and rent for office and hangar space used by Government agencies.

At Washington National Airport operations will continue to reflect a sound profit position. Increased costs resulting from the expansion and modernization program initiated in 1961 will be offset by the application of more realistic charges in the landing area as expiring long-term airline use agreements are renegotiated during the current fiscal year. Operations at the new Dulles International Airport will result in substantial deficits during the early years of operations when traffic volume will be relatively low. The anticipated rate structure at the new airport is being developed on a basis to assure the recovery of operating costs including interest and depreciation charges and an appropriate return on the Government's investment during the useful life of the facility. The following table shows the revenue and expenses of the airports (in thousands of dollars):

Unobligated balance carried forward.....			21	1,091	270				
New obligational authority (appropriation).....				4,500	8,000				

This appropriation finances modernization and expansion programs at Washington National Airport and Dulles International Airport. These programs are designed to insure the convenience and safety of airport users. The amounts for 1962 will finance the second phase of a modernization and rehabilitation program at Washington National Airport. Projects include construction of a new cargo building, runway and taxiway improvements, and construction of an access road. Projects proposed at Dulles International Airport include the extension of utilities, roadways and taxiways to serve proposed hangar and industrial areas, provision of aircraft servicing and storage aprons, permanent airfield maintenance facilities, and enclosed walkways for feeder-line passengers. All outlays for physical improvements are added to the respective airport's capital investment and will be subsequently recovered through fees and charges paid by airport tenants and users.

3. Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$238 thousand; 1960, \$202 thousand; 1961, \$68 thousand; 1962, \$3,431 thousand.

GENERAL PROVISION

During the current fiscal year applicable appropriations to the Federal Aviation Agency shall be available for the Federal Aviation Agency to conduct the activities specified in the Act of October 26, 1949, as amended (5 U.S.C. 596a), under determinations and regulations by the Administrator of the Federal Aviation Agency; maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131). (5 U.S.C. 596a; 5 U.S.C. 2131; Independent Offices Appropriation Act, 1961.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
 "Civil defense and defense mobilization functions of Federal agencies," Office of Civil and Defense Mobilization.
 "Mutual security—economic," funds appropriated to the President.
 "Payments to school districts," Office of Education.
 "Procurement other than aircraft and missiles," Air Force.
 "Transitional grants to Alaska," funds appropriated to the President.

Grants for construction of airports (total obligation).....			35,000
Financing:			
Unobligated balance carried forward.....			5,000
New obligational authority (proposed supplemental appropriation).....			40,000

Under proposed legislation, 1962.—Existing legislation provides no new obligational authority beyond 1961 for the program of grants for public airport construction. Legislation will be proposed to authorize appropriations for grants in 1962 and 1963. A supplemental appropriation of \$40 million is anticipated for 1962.

FEDERAL COAL MINE SAFETY BOARD OF REVIEW

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Federal Coal Mine Safety Board of Review, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), \$70,000. (30 U.S.C. 475, 477; 66 Stat. 709; Department of the Interior and Related Agencies Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

New obligational authority (appropriation).....	70	70	70

Coal mine operators, affected by orders issued by Federal coal mine inspectors, may appeal to the Board for annulment or revision of, and temporary relief from, such orders. During 1960, a total of 115 orders were issued. When operators appeal, hearings are held, and the Board rules upon the application. It is estimated that there will be 100 to 125 orders subject to appeal to the Board in 1961 and 1962.

¹ Includes capital outlay as follows: 1960, \$279 thousand; 1961, \$242 thousand; 1962, \$416 thousand.

The Federal Communications Commission regulates interstate and foreign commerce in communications by wire and radio. The Communications Act requires the Commission to (1) attain and maintain maximum benefits for the people of the United States in the use of the radio spectrum and (2) regulate the rates and services of communications common carriers.

1. *Applied technical research and frequency allocation.*—The Commission undertakes broad research designed to improve the utilization of the radio spectrum, approves certain equipment for public use, and licenses experimental radio stations.

2. *Broadcast.*—Standard broadcast (AM), frequency modulation (FM), television (TV), and other related services are licensed and regulated by the Commission. Pertinent data are shown in the following table:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Stations regulated ¹	5,160	5,391	5,794	6,272

FM.....	1,325	1,794	2,050	2,300
TV.....	183	160	180	200

¹ As of June 30 of each year.

3. *Safety and special radio services.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. Pertinent data follow (in thousands):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Stations regulated ¹ (excluding amateur).....	302	435	565	729
License applications received.....	250	350	390	453

¹ As of June 30 of each year.

4. *Field engineering and monitoring.*—Field employees inspect radio stations; administer operator examinations; collect engineering data; monitor the spectrum; and determine the location of lost ships, lost aircraft, and illegal sources of radio emission.

5. *Common carrier.*—The Commission regulates the rates and practices of telephone, telegraph, and cable companies and considers proposed mergers and acquisitions of properties, extensions and reductions in service, construction of facilities, and applications to use radio in communication services.

7. *Ultra-high frequency television.*—A comprehensive study of ultra-high frequency television transmission and reception is being undertaken. The study will provide technical information essential to the resolution of television channel allocation problems.

9. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:

New obligational authority (appropriation).....			

The Corporation insures accounts of depositors in insured banks up to \$10 thousand for each depositor. As of June 30, 1960, the deposit insurance fund for the protection of depositors amounted to \$2.16 billion or approximately 1.54% of all insured deposits on that date. Total insured deposits at the end of 1959 and 1960, estimated on the basis of information furnished as of June 10, 1959, and June 15, 1960, amounted to \$137 billion and \$140 billion, respectively. It is estimated that total insured deposits as of June 30, 1961 and 1962 will amount to \$145.6 billion and \$152.3 billion, respectively. No tax funds are used in its operations. Its expenses are paid and the fund is accumulated from assessments paid by insured banks and from income on investments in obligations of the Treasury. However, the Corporation is authorized to borrow from the Treasury, not to exceed \$3 billion outstanding at any one time, as required for insurance purposes. No borrowings under this authorization have been made to date and none are anticipated in 1961 or 1962.

CORPORATIONS

The following corporations and agencies, respectively, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1961] 1962 for each such corporation or agency, except as hereinafter provided: (*Independent Offices Appropriation Act, 1961.*)

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies and supervises the operations of the 11 Federal Home Loan Banks, the System of Federal Savings and Loan Associations and the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. Section 2 of Public Law 895, approved July 3, 1948, provides that all expenses of the division of examinations, Federal Home Loan Bank Board, shall be considered non-administrative. All expenses of the division of examinations are defrayed from fees charged against and collected from the institutions examined.

The administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal Home Loan Banks, the division of examinations, and the Federal Savings and Loan Insurance Corporation.

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance

Corporation (12 U.S.C. 1421 et seq., 1461 et seq., and 1464 et seq.). Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the division of examinations, and the Federal Savings and Loan Insurance Corporation.

Budget program.—The Board's budget is based on six activities.

1. *Examination and supervision of Federal home loan banks.*—The Board supervises and examines the operations of the Federal home loan banks.

2. *Supervision of Federal- and State-chartered institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

3. *Chartering savings and loan associations.*—Federal savings and loan associations are chartered and regulated. In addition, applications of State-chartered associations for conversion into Federal savings and loan associations are examined.

4. *Examining savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of approximately 68% of all insured institutions in conjunction with supervisory examinations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

5. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services that are common to the Board and the Insurance Corporation.

6. *Administrative services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

The amounts shown in the schedules for the above activities include administrative expenses under annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under limitation. Administrative expenses are estimated to decrease from \$2,071 thousand to \$1,725 thousand mainly as a result of reclassifying the expenses of the No. 2 activity (supervision of Federal- and State-chartered institutions from administrative to nonadministrative). Non-administrative expenses covering the expenses of examining savings and loan associations are discussed separately below.

The office of examinations conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations, other institutions of the savings and

loan type which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal Home Loan Bank System that are not subject to State supervision. The office also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts, or for conversion from a State to a Federal charter. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the division.

The following table reflects the work of the office:

FEDERAL HOME LOAN BANK BOARD—Continued**Public enterprise funds—Continued****INVESTMENT IN FEDERAL HOME LOAN BANKS—Continued**

The Federal home loan banks, together with the building and loan associations and similar institutions which are members of the banks, constitute the Federal home loan bank system and are designed to stabilize and strengthen institutions promoting private thrift and individual home ownership.

The 11 Federal home loan banks obtain their funds from capital stock, issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists entirely of subscriptions of member institutions. Authority to borrow from the Treasury in the amount of \$1 billion is provided in 12 U.S.C. 1431 (64 Stat. 257). No borrowings have been made to date and none is anticipated in 1962.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act (12 U.S.C. 1724 et seq.) to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and are approved for insurance. The protection thus afforded, which insures savers in member associations against financial loss up to a statutory limit of \$10 thousand, may be provided through the prevention of default or the payment of insurance to savings account holders in the event of liquidation. The former course of action, which results in complete protection to each investor regardless of the amount in his account, is accomplished by making cash grants or by purchasing all or a part of the association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Wherever possible, preventive measures are taken to eliminate the necessity of liquidation. However, in the event liquidation is necessary, the Corporation acts as receiver for all federally chartered associations and may act as receiver or coreceiver upon request of State authority in cases involving State-chartered institutions.

The Corporation functions under direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff officers are paid from assessments made on the Corporation, the Federal home loan banks, and the division of examinations.

[Dollars in thousands]

	1960 actual	1961 estimate	1962 estimate
Number of insured member institutions.....	4,044	4,155	4,265

Percent of authorization to total income.....	1.6	1.4	1.4

1. *Administrative expenses—(a) Underwriting.*—This activity constitutes an analysis and evaluation of the insurance risk in connection with applications for insurance of accounts and other applications submitted pursuant to regulatory requirements. The assets of insured institutions have increased \$15.7 billion or 32.9% in the last 2 years. The continuing interest in insurance of accounts on the part of uninsured institutions, plus the anticipated rate of normal growth, will increase the potential liability of the Corporation to an estimated \$71 billion by June 30, 1962, as compared to \$54.8 billion on June 30, 1960.

(b) *Prevention of default and payment of insurance.*—In carrying out its role of protecting savings in insured savings and loan associations, the Corporation has settled 38 cases since its creation 26 years ago. Total losses to June 30, 1960, have amounted to \$5,204 thousand or slightly

more than 1% of cumulative gross income. Detailed information with respect to all of the insurance cases is summarized in the following table (dollars in thousands).

Method of settlement	Number of associations	Number of investors	Assets of associations	Loss to corporation
Contribution.....	29	55,037	\$57,216	\$4,878
Purchase of assets.....	2	11,791	27,153	17
Receivership.....	7	7,705	9,210	309
Summary.....	38	74,533	93,579	5,204

Still pending as of this date are two cases; in one, loans totaling \$30 million had been made and, in the other, it is anticipated that a purchase of assets will be effected to facilitate a merger.

(c) *Analysis of operations.*—The Corporation maintains a current analysis of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending, including selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance.

2. *Payment to the Federal Home Loan Bank Board—(a) Services and facilities.*—The Corporation will subscribe 42% of the administrative expenses of the Federal Home Loan Bank Board in 1962 in return for services and facilities by the Board and staff offices.

(b) *Conservatorship, supervisory representative in charge, and other.*—Represents the Corporation's share of expenses incurred by the Board in 1960 in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation and preparation for or conduct of proceedings under section 407 of the National Housing Act, as amended.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Supplies and deferred charges.....	2	5	1	1
Pending and unclaimed insured accounts in liquidated institutions, gross.....	7	---	---	---
Unpaid undelivered orders.....	2	---	---	---
Total selected resources at end of year.....	11	5	1	1
Selected resources at start of year (—).....	---	—11	—5	—1
Costs financed from obligations of other years, net (—).....	---	—6	—4	---

Financing.—The original capital of \$100 million has been completely repaid to the Treasury, together with an additional \$43 million for the use of the funds.

The Corporation has continuing authority to borrow from the Treasury for insurance purposes, with a limitation of \$750 million outstanding at any one time. No borrowings under this authorization have ever been made.

The Corporation is further authorized to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation; except that the total amount so assessed in any one year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured members and its creditor obligations.

Operating results and financial condition.—The Corporation is entirely self-supporting and in no one year have its operating expenses amounted to more than 5.3% of total income; in 1960 it amounted to 3%. Revenue

from all sources has been sufficient to meet all insurance losses, operating expense, return on capital stock, and to establish a reserve for contingencies of \$353.6 million as of June 30, 1960. Total revenue since 1934, of \$417.2 million, has been applied as follows (dollars in thousands):

	Amount	Percent
Expense.....	\$15,444	3.7
Net insurance losses.....	5,204	1.2
Return on capital stock to U.S. Treasury.....	42,975	10.3
Reserve for contingencies.....	353,590	84.8
Total.....	417,213	100.0

¹ Includes provision for accrued annual leave of employees of \$82 thousand established prior to July 1, 1960.

Operating expense for 1962 is estimated at \$1.9 million, consisting primarily of administrative expenses of the Corporation of \$0.9 million and \$1 million for services rendered by the Federal Home Loan Bank Board.

Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

Net income for 1962, which is expected to be increased by \$15.6 million or 32.5% above the net income for 1960, will be retained by the Corporation to meet future contingencies.

The Corporation is required by law to accumulate a reserve equal to 5% of all insured accounts and creditor obligations of all insured institutions before collection of premiums may be discontinued. It is estimated that this statutory requirement will amount to \$3.6 billion by June 30, 1962. The insurance reserve as of that date is expected to reach \$473.7 million or 0.67% of an estimated potential liability of \$71 billion.

HOME OWNERS' LOAN CORPORATION FUND

The Corporation was created to provide credit facilities to refinance the mortgages of destitute urban homeowners. Its lending authority expired on June 12, 1936, and since that time the Corporation has been dissolved. Liabilities, representing matured bonds held by the public together with accrued interest thereon, totaled \$423 thousand at the end of 1960 and are estimated to be reduced to \$330 thousand by the end of 1962.

Proposed for later transmission:

Under proposed legislation, 1962.—Legislation will be proposed for the temporary prepayment of premiums by insured associations to the Federal Savings and Loan Insurance Corporation at the rate of 2% annually on the net increases in savings in the institutions. This amount

is additional to the regular premium of one-twelfth of 1%, and will increase the receipts of the Corporation by an estimated \$164 million in 1962. The additional premiums will be continued only until the reserves of the Corporation reach 2% of the insured liability.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the Service to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U.S.C. 171-180, 182), including expenses of the Labor-Management Panel as provided in section 205 of said Act; expenses of boards of inquiry appointed by the President pursuant to section 206 of said Act; temporary employment of arbitrators, conciliators, and mediators on labor relations at rates not in excess of \$75 per diem; and Government-listed telephones in private residences and private apartments for official use in cities where mediators are officially stationed, but no Federal Mediation and Conciliation Service office is maintained; **[\$3,905,400] \$4,388,000.** (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1961.*)

The Federal Power Commission administers the Federal Power Act and Natural Gas Act and has additional duties under other acts relating to Federal power development.

1. *Non-Federal hydroelectric projects.*—Licenses are issued for hydroelectric projects affecting public lands and streams subject to Federal jurisdiction; construction and operation of projects are inspected; and cost of construction is determined for projects under license to private interests. Pertinent data are:

Description	1960 actual	1961 estimate	1962 estimate
Licensed projects (2,000 h.p. and over).....	204	208	223
Claimed cost of licensed projects (in millions).....	\$5,046	\$5,100	\$5,250
Applications completed during the year.....	95	110	105
Applications pending, end of year.....	129	124	124
Annual receipts from licenses (in thousands).....	\$1,900	\$2,742	\$2,518

2. *Electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, dispositions of properties, mergers, and the interconnection and coordination of facilities of those public utilities subject to the Commission's jurisdiction. Statistics about the electric utility industry are gathered and published. Pertinent data are:

Description	CALENDAR YEAR BASIS		
	1959 actual	1960 estimate	1961 estimate
Number of public utilities regulated.....	183	185	185
Operating revenue of regulated utilities (in millions).....	\$7,000	\$7,500	\$8,100
Number of utilities reporting for statistical purposes.....	850	850	850
Operating revenue of reporting utilities (in millions).....	\$10,800	\$11,600	\$12,400

3. *Natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices. Certificates of public convenience and necessity are issued to those natural gas companies subject to the jurisdiction of the Commission. Statistics about the natural gas industry are gathered and published. In calendar year 1959, there were approximately 19,000 independent producers, of which 3,372 had rate schedule numbers assigned. There were also 96 regulated natural

gas pipeline companies, with operating revenue of \$4.1 billion. It is estimated that the number of independent producers and pipeline companies will remain substantially unchanged in 1960 and 1961. However, the operating revenue of the pipeline companies is expected to increase to \$4.4 billion and \$4.8 billion, respectively. Other pertinent data are:

Description	1960 actual	1961 estimate	1962 estimate
Certificate applications filed:			
(a) Pipeline companies.....	294	300	300
(b) Independent producers.....	1,788	1,800	1,800
Pipeline gas rate cases handled.....	153	179	179
Independent producer rate cases handled.....	2,773	2,993	3,033
Rate cases on hand, end of year.....	2,442	2,562	2,503
Total rate filings received.....	10,080	10,100	10,100

4. *Federal river development projects.*—Of a potential 127.1 million kilowatts of hydroelectric power in the United States, 31.9 million kilowatts had been developed by Federal agencies and non-Federal interests as of December 31, 1959.

Studies are made of proposed Federal river development projects to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from Federal projects. Information on the power features of river development projects is furnished to Congress and to Federal and State agencies. In 1960, a total of 107 studies were carried on and it is estimated that there will be 99 in 1961 and 101 in 1962.

5. *International Joint Commission.*—A Commission staff member serves on the International Joint Commission, which adjudicates controversies between the Governments or nationals of the United States and Canada over boundary waters and waters that cross the boundary.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

Penalty suits completed	8	11	20	30
Cases pending in Federal court	29	41	47	53
Cases completed in Federal court	23	27	33	39

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions are corrected; economic data and criteria are brought to bear on monopoly and related problems; and supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade. In 1962, field investigation and trial of merger and other antimonopoly cases will be expedited.

2. *Deceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade-practice conferences and advertising guides; business and the public are protected from the evils of misbranding and nondisclosure of fiber content of manufactured wool products and household textile articles; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. In 1962, field investigation and trial of deceptive practice cases will be expedited, and the Commission will continue with the program of enforcement of the Textile Fiber Products Identification Act.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

FOREIGN CLAIMS SETTLEMENT COMMISSION

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to carry on the activities of the Foreign Claims Settlement Commission, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a) [, at rates not to exceed \$50 per diem for individuals] ; allowances and benefits similar to those provided by title IX of the Foreign Service Act of 1946, as amended, as determined by the Commission; expenses of packing shipping, and storing personal effects of personnel assigned abroad; rental or lease, for such periods as may be necessary, of office space and living quarters for personnel assigned abroad; maintenance, improvement, and repair of properties rented or leased abroad, and furnishing fuel, water, and utilities for such properties; insurance on official motor vehicles abroad; and advances of funds abroad; not to exceed [\$10,000] \$20,000 for expenses of travel; advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission; hire of motor vehicles for field use only; and employment of aliens; [\$340,000] \$725,000, and in addition \$40,000 (to be merged with this appropriation) to be derived from the War claims fund created by section 13(a) of the War Claims Act of 1948 (50 U.S.C. App. 2012a).

[For an additional amount for "Salaries and expenses", including allowances and benefits similar to those provided by title IX of the Foreign Service Act of 1946, as amended, as determined by the Commission; expenses of packing, shipping, and storing personal effects of personnel assigned abroad; rental or lease, for such periods as may be necessary, of office space and living quarters for personnel assigned abroad; maintenance, improvement, and repair of properties rented or leased abroad, and furnishing fuel, water, and utilities for such properties; hire of passenger motor vehicles abroad; insurance on official motor vehicles abroad; and advances of funds abroad; \$145,000: Provided, That the limitation under this head in the General Government Matters Appropriation Act, 1961, on the amount available for expenses of travel, is increased from "\$10,000" to "\$30,000".] (62 Stat. 1240; 64 Stat. 12; 68 Stat. 1279; General Government Matters Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

The Foreign Claims Settlement Commission is responsible for the settlement of claims authorized by the War Claims Act and the International Claims Settlement Act.

1. *Administration and settlement of international claims.*—Processing of claims of U.S. nationals for the nationalization or other taking of property has com-

menced under the terms of an en bloc agreement with Poland. Funds totaling \$40 million will be deposited by Poland over a period of 20 years from which the Treasury will make payments against awards certified by the Commission. An estimated 20 thousand claims are expected to be received in the Commission by the filing deadline of September 30, 1961. This program is expected to be completed within 5 years. A small field office in Warsaw, Poland, will investigate validity of claims data.

A total of 4,012 claims of U.S. nationals against Czechoslovakia has been received. The processing of claims should be approximately 90% completed by the end of 1962. Awards will be paid out of a \$9 million trust fund held by the Treasury and a 5% deduction will be made as an offset against appropriations for administrative expenses.

2. *Review of claims programs.*—Research, reports, documentation, and similar functions responsive to requirements of the Congress and of other agencies of the Government concerning past, present, and proposed programs and problems are covered by this activity.

3. *Administration and settlement of World War II claims.*—Liquidation of previous programs under the War Claims Act will continue during 1962 financed by reimbursement from the War claims fund.

The General Accounting Office is directly responsible to the Congress for conducting independent reviews, audits, and investigations of the management and control of the financial transactions of the Government; for the rendition of legal decisions relating to Government fiscal matters; for developing, prescribing, and evaluating accounting systems on a governmentwide basis; for the

settlement of certain claims for and against the Government; and, for advising and assisting the Congress and Government agencies on matters relating to public funds.

1-3. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General who is assisted by the Assistant Comptroller General and staff assistants.

4. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

5. *Transportation division.*—This division audits freight and passenger transportation payments for account of the United States and settles claims involving transportation charges. The transportation audit recovered \$21,545 thousand during 1960.

7. *Office of the general counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government the general counsel and his staff assist the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual members, participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and render all other required legal services.

8. *Accounting and auditing policy staff.*—This staff develops accounting policy and related requirements for observance by each agency and for the guidance of audit work performed by General Accounting Office auditors, and develops internal auditing objectives, principles, and standards for guidance of the executive agencies; reviews and develops, in cooperation with the Treasury Department and the Bureau of the Budget, central accounting processes and financial reporting; reviews agency accounting systems in whole or in part; develops and directs a coordinated program to assure effective application of modern electronic systems and other advanced methods to accounting and related financial operations of the Government; and, assists and advises Congress on accounting and auditing policy matters.

9. *Office of staff management.*—This staff performs the staff management function for the accounting, auditing, and investigative activities which involves (a) formulating and executing a recruiting program to obtain a high quality professional staff of accountants, auditors, and investigators, (b) developing and carrying out a training and professional career development program, (c) exercising, in cooperation with the accounting and auditing divisions, general control over the assignment of the staff and, (d) securing appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

10. *Defense accounting and auditing division.*—This division performs the accounting, auditing, and investigative functions of the General Accounting Office in the Department of Defense, including the military departments. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the Military Establishment in discharging its financial obligations including the audit and settlement of accounts; and the conduct of investigations of matters relating to the receipt, disbursement, and application of public funds.

11. *Civil accounting and auditing division.*—This division performs the accounting, auditing, and investigative functions of the General Accounting Office in all departments

and agencies of the Federal Government, other than those assigned to the defense accounting and auditing division. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the civil departments and agencies in discharging their financial obligations, including the audit and settlement of accounts; and, the conduct of investigations of matters relating to the receipt, disbursement, and application of public funds.

12. *Field operations division.*—This division, which is composed of a central office and regional offices under the direction of regional managers, performs, outside the metropolitan area of Washington, D.C., all assigned accounting, auditing, and investigative functions.

13. *European branch.*—This branch, with headquarters in Paris, France, performs General Accounting Office functions as they relate to U.S. Government operations in the European area, including north Africa and the Near East. A suboffice is located in Frankfurt, Germany.

14. *Far East branch.*—This branch, with headquarters in Tokyo, Japan, performs General Accounting Office functions as they relate to U.S. Government operations in the Far East area.

15. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

Appropriation	180	196	280
Proposed supplemental due to pay increases		10	

This independent commission of three members was created to hear and adjudicate claims, existing before August 13, 1946, of tribes, bands, or other identifiable groups of American Indians. Of the 596 claims filed, 124 have been completed. Payments of awards are dependent upon subsequent appropriations made through claims, judgments, and private relief acts to the Treasury Department. These appropriations total \$37,127 thousand through August 1960.

Legislation is required and will be proposed to extend the life of the commission beyond April 10, 1962, in order to permit completion of pending claims.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

The Commission regulates common and, in the case of motor and water carriers, contract carriers engaged in interstate commerce and foreign commerce, to the extent that it takes place within the United States. The types of carriers covered include railroads, express companies, sleeping car companies, motor carriers, water carriers, pipelines (except water and gas), and freight forwarders.

The increase of \$748 thousand is requested in order to handle the continually increasing number of applications for motor carrier permanent and temporary operating authorities and applications for mergers and consolidations of motor carriers and railroads, to improve the economic and cost data necessary for regulatory activities, and to provide a more adequate level of compliance with the provisions of the Interstate Commerce Act and related acts.

1. *Regulation of carrier rates, practices, operating authorities, and finance.*—This activity of the Commission consists of regulating rates; granting operating authorities; approving applications for abandonments of and extensions of railroad lines, financial reorganizations, and rate agreements between carriers; reviewing proposed discontinuances of or changes in the operation or service of trains and ferries; and guaranteeing loans (\$53 million outstanding June 30, 1960) to railroads.

INTERSTATE COMMERCE COMMISSION—Con.

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

2. *Compliance.*—The Commission enforces statutes and regulations affecting transportation and carriers. Examinations are made to ascertain that motor carriers and freight forwarders are adequately insured, and surveys of motor carrier operating practices are conducted to reduce accidents and to promote highway safety.

3. *Supervision and analysis of carrier accounting and statistics.*—The Commission is responsible for the formulation and policing of uniform systems of accounts; the preparation of studies of operating costs for use in rate proceedings; the maintenance of current inventory and cost records; the development of elements of value used in regulating carriers; the compiling of statistics from carrier reports; and the preparation of studies of operating, financial, and related transportation problems.

4. *Supervision and interpretation of tariffs.*—Carrier tariffs, or rate schedules, are examined for compliance with the Commission's tariff rules; authority to publish rates on less-than-statutory notice is, under certain conditions, granted; and informal complaints and carrier requests to pay reparations are processed.

5. *Railroad safety and car service.*—Commission field personnel work with carriers and shippers in handling problems of safety and efficient use of equipment in the transportation of passengers and property by railroad. This work includes inspection of safety appliances and signal installations, inspection of locomotives, and enforcement of car-service regulations designed to increase the utilization of railroad rolling stock.

6. *Executive and advisory functions.*—This activity includes the work of the Commissioners and their staffs; the defense of Commission orders in court; the rendering of legal advice to the Commission; and the formal issuance of orders, rules, and regulations.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Current authorizations:

CONTRIBUTION TO INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), \$5,000. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1961.*)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
Contribution to the Commission (total obligations) (object class 41).....	5	5	5
Financing:			
New obligational authority (appropriation).....	5	5	5

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution.

This appropriation represents the Federal Government's pro rata share of the general expenses of the Commission. The Commission also receives financial assistance from the Public Health Service under the program of grants for water pollution control activities.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The National Aeronautics and Space Administration (NASA) was established in 1958 to plan, develop, and conduct the nonmilitary space programs of the United States, including the exploration of space and its utilization for peaceful purposes; and to conduct and support advanced research and development related to both aeronautics and space in support of both military and civil programs. The 1962 budget contains total program costs under the several appropriation accounts of the agency as summarized below, based on the new obligational authority recommended for 1962 and anticipated 1961 supplemental estimates totaling \$49.6 million.

[In millions of dollars]

	Costs			1962 new obligational authority
	1960 actual	1961 estimate	1962 estimate	
Operating expenses.....	409.4	755.9	899.2	1,009.8
Construction of facilities.....	59.2	168.5	105.5	99.8

Total, National Aeronautics and Space Administration. 468.6 864.4 1,004.7 1,109.6

Pursuant to existing law, authorizing legislation will be proposed for the 1962 appropriations. Permanent authorization for appropriations for later years will also be proposed.

OPERATING EXPENSES

Operating expenses of the NASA are provided in two appropriations, Salaries and expenses and Research and development. The combined amounts in the two accounts are shown in the following table and discussed in the narrative that follows.

[In millions of dollars]

	Costs			1962 new obligational authority

Total, operating expenses ("Salaries and expenses" and "Research and development").....	409.4	755.9	899.2	1,009.8

1. *Aeronautical and space research.*—These activities finance basic and applied research on problems related to design, development, construction, and operation of aeronautical and space vehicles; on the effects of the space

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION—Continued

environment on living organisms; and on the implications of civil space programs for the Nation and mankind. In 1962, the principal emphasis will continue on research related to manned and unmanned space vehicles, but a substantial portion of the work is directed or applicable to aircraft and missiles. The research is conducted at the Langley, Ames, Lewis, and Flight Research Centers located respectively at Hampton, Va.; Sunnyvale, Calif.; Cleveland, Ohio; and Edwards Air Force Base, Calif.; and at universities, nonprofit organizations, and industrial research laboratories under NASA research grants and contracts.

(a) *Aerodynamics and environmental physics.*—This activity reflects NASA's continuing work in subsonic through hypersonic aerodynamics, and its efforts to solve operating and environmental physics problems. One of the chief research problems is to find aerodynamic shapes, unmanned and manned, which can be controlled during sudden injection into orbit or deep space trajectory and which will survive a controlled return journey through the earth's atmosphere, at speeds decreasing from hypersonic to subsonic, to a specific landing area and eventually to a controlled landing point. Research on prospective military and civil aircraft will range from continuing efforts on short and vertical takeoff and landing aircraft to work on supersonic aircraft.

(b) *Propulsion and energy conversion.*—Increasing effort will be applied in 1962 to research problems related to space vehicle propulsion by nuclear and electric means and to methods of electrical power generation to make electric plasma and ion jet propulsion possible. In addition, substantial work on more sophisticated chemical propulsion systems and some advanced air-breathing engine work will continue.

(c) *Structures.*—Research on problems related to structures will increase in 1962 to find strong but lightweight structures which can withstand the vibration, shock, heat, radiation, and environments encountered on various aeronautical and space missions.

(d) *Materials.*—Under this increased activity, a great variety of materials are studied and tested to find and develop those which can withstand the extremes of the space environment. Improved materials are needed for space vehicles, high performance aircraft, and for the instruments which make possible the recording and transmission of test data back to earth.

(e) *Life sciences.*—Increased research emphasis will be given in 1962: to the problems of assuring man's contribution to the success of space flight missions; to the study of space environmental effects on living organisms to advance basic biological sciences; and to the detection, collection, and analysis of possible extraterrestrial life forms.

(f) *Special studies.*—This activity provides for studies of the social, economic, legal, and international implications of civil space activities.

2. *Space flight programs.*—This activity covers NASA's space flight programs for scientific research and other applications; the necessary launch and recovery operations; and the operation of tracking and data acquisition networks. The estimates cover development work on spacecraft which carry the payloads and procurement costs of those launch vehicles which have already been developed. The funds provided support the activities of both the contractors and the NASA organizations working in each field. NASA's work related to this activity is

centered at the Goddard Space Flight Center, Greenbelt, Md., and the Jet Propulsion Laboratory, Pasadena, Calif. Launching operations are carried on at the Atlantic Missile Range in Florida, the Pacific Missile Range in California, and at the NASA Wallops Station in Virginia. Tracking and data acquisition activities are conducted at stations located around the world.

(a) *Scientific investigations in space.*—This activity includes the sounding rocket, scientific satellite, and lunar and planetary exploration programs. The increase over 1961 reflects the increased costs of two major projects being initiated in the scientific satellite program, the large orbiting astronomical observatory and the orbiting geophysical observatories. This activity also includes increases in the Ranger, Surveyor, and Prospector programs for lunar exploration and the Mariner program to gain knowledge about space in the vicinity of the nearest planets, Venus and Mars.

(b) *Satellite applications.*—In 1961, with funds included in a proposed supplemental appropriation, work will begin on the development of a new active communications satellite program for civil uses. The estimates assume that beginning in 1962 part of the cost of this program will be met by contributions from commercial communications concerns. This activity also provides for work on rigidized passive communications satellites of the Echo satellite type launched this year and meteorological satellites like Tiros I and II. In 1962, emphasis will be on active communications satellites and on the advanced Rebound passive communications and Nimbus meteorological satellites.

(c) *Manned space flight.*—The Mercury and Apollo manned space flight programs and related work are funded here. Amounts for the Mercury program will be less than provided in 1961 because the program will be in the flight stage in 1962, but the successor Apollo program will require increased support for studies and experiments which may lead eventually to long-lived orbiting space stations and manned circumlunar flight.

(d) *Launch operations.*—This activity includes the general costs associated with the launching of NASA space vehicles.

(e) *Tracking and data acquisition.*—The costs related to the operation of the worldwide tracking and data acquisition nets are funded in this activity.

3. *Space vehicle and supporting development.*—This activity includes the costs of developing new launch vehicles and of advancing technology in the propulsion, launch vehicle, and spacecraft fields to the point where the results can be used in space flight programs. The work is accomplished primarily by contract with industry, except for the NASA effort at the Marshall Space Flight Center, Huntsville, Ala., and the work in spacecraft technology at the Jet Propulsion Laboratory.

(a) *Vehicle systems.*—The costs of development, fabrication, and launching of developmental launch vehicles are funded here. The principal projects on which work will continue in both 1961 and 1962 include the small Scout solid propellant launch vehicle; Centaur, larger and more powerful than existing launch vehicles because of the use of high energy liquid hydrogen in the upper stage; and Saturn, which will produce a thrust of 1.5 million pounds in the first stage with conventional propellants and will use liquid hydrogen as the propellant in its upper stages. Major emphasis will be on Saturn and Centaur.

(b) *Propulsion technology.*—This activity includes costs for the development of advanced propulsion techniques

and systems for use in future space vehicles. Work will continue on the single chamber 1.5 million pound thrust engine, advanced liquid and solid fuel rocket engines, electrical propulsion systems, and solar electric power supply systems for spacecraft. Jointly with the Atomic Energy Commission, development of nuclear rocket engines under project Rover and of nuclear electric power systems under project SNAP will also continue.

(c) *Other development.*—Work funded here will support the development of future space vehicles by providing, for example, the technology necessary for guiding interplanetary space vehicles, attitude control of spacecraft, improved equipment for launch operations, and advanced space vehicle designs.

4. *Program direction and coordination.*—This activity funds the operating costs of NASA's headquarters and the Western Operations Office.

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, of the National Aeronautics and Space Administration, including [hire of passenger motor vehicles; not to exceed \$5,375,000 for expenses of travel; and] uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); [\$170,760,000] \$189,986,000. (42 U.S.C. 2451 et seq.; 50 U.S.C. 151-160, 511-515; Independent Offices Appropriation Act, 1961; authorizing legislation to be proposed for 1962.)

Note.—Estimate for 1961 includes \$34,316 thousand transferred in the estimates from "Salaries and expenses, Advanced Research Projects Agency, Department of Defense." The amount obligated in 1960 is shown in the schedule as a comparative transfer.

CONSTRUCTION OF FACILITIES

The construction of facilities required by NASA for the conduct of its programs is provided in the appropriation Construction of facilities, the details of which are shown below. This appropriation provides for construction and equipment of new facilities and for modernization of existing facilities when major construction is involved. Beginning in 1962, equipment not related to major construction projects, some of which was formerly carried in the Construction and equipment appropriation, will be provided in the Research and development appropriation.

CONSTRUCTION [AND EQUIPMENT] OF FACILITIES

For construction [and equipment] of facilities for the National Aeronautics and Space Administration and for the acquisition or condemnation of real [property] property, as authorized by law, [\$122,787,000] \$99,825,000, to remain available until expended. (42 U.S.C. 2451 et seq.; 50 U.S.C. 151-160, 511-515; Independent Offices Appropriation Act, 1961; authorizing legislation to be proposed for 1962.)

Note.—Estimate for 1961 includes \$13,000 thousand transferred in the estimates from "Salaries and expenses, Advanced Research Projects Agency, Department of Defense." The amount obligated in 1960 is shown in the schedule as a comparative transfer.

**NATIONAL AERONAUTICS AND SPACE
ADMINISTRATION—Continued**

Current authorizations—Continued

CONSTRUCTION [AND EQUIPMENT] OF FACILITIES—Continued

This appropriation provides for the construction and modernization of facilities, including design by contract, the purchase of major items of related equipment, and the advance design of facilities planned for future authorization. The costs shown in 1962 include amounts for projects previously authorized. The principal construction projects in the proposed 1962 program are described below.

1. *Aeronautical and space research facilities*—(a) *Langley Research Center*.—The recommendation provides for a research facility to determine the properties of structures in a hard vacuum and equipment for research in the properties and space uses of plasmas.

(b) *Ames Research Center*.—A facility for research in hypervelocity free flight and building modifications needed to accommodate life sciences research will be funded in 1962.

(c) *Lewis Research Center*.—A facility for basic heat transfer studies is included as well as modifications to a large space environment tank.

2. *Space flight program facilities*—(a) *Goddard Space Flight Center*.—Construction is proposed for a space environmental testing laboratory, an advanced data processing facility, and an isolation laboratory.

(b) *Jet Propulsion Laboratory*.—The estimates provide for modernization or modification of laboratory facilities for physical sciences, structural test, and materials research, and an extension of utilities. Additions are planned to the spacecraft assembly building and the microwave antenna range.

(c) *Wallops Station*.—Provision is made for facilities for tracking, dynamic balancing of launch vehicles, rocket storage, and safety system modifications.

(d) *Atlantic Missile Range*.—The proposal provides for completion of one Saturn launch complex and modification of another including the addition of facilities to handle liquid hydrogen, for a new Centaur launching facility, and for the construction of an additional barge for transporting Saturn vehicles. Three additional projects are planned in the industrial area: a central shop and maintenance facility, a spacecraft assembly and checkout building, and an extension to the launch vehicle assembly building.

(e) *Pacific Missile Range*.—Construction of a telemetry building, an engineering facility, and a storage building are included.

(f) *Various locations*.—Improvements will be made to Minitrack and deep-space tracking networks and equipment for a new radar will be provided for use in the active communications satellite program. Construction of new facilities to launch sounding rockets is also included.

3. *Space vehicle and supporting development facilities*—(a) *Marshall Space Flight Center*.—Projects at this center include the construction of a high vacuum test facility and a technical services building; construction in the static test area of a liquid hydrogen facility, a liquid oxygen storage facility, and extension of the blockhouse; and extension of the existing engineering building, structural test building, and primary utilities.

(b) *Various locations*.—Money is recommended for propulsion development facilities for the large F-1 engine, and for the 200,000 pound thrust liquid hydrogen engine intended for an advanced Saturn. Also included are amounts for unforeseen construction requirements such as damage repair.

4. *Advance planning*.—These funds are for architectural and engineering design of facilities to be included in future construction programs.

5. *Relation of costs to obligations*.—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

¹ Capper-Cramton Act, May 29, 1930, as amended (46 Stat. 482).

² Includes \$3 million for loan (advances) to Maryland.

The National Capital Planning Commission acquires land for the comprehensive development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along both shores of the Potomac River, above and below Washington from Great Falls to Mount Vernon. One-half the cost is borne by the local jurisdictions. Funds requested herein in the amount of \$200 thousand will provide for the purchase of approximately 160 acres of Madeira School property in Fairfax County.

2. *Stream valley parks.*—Land is acquired by public bodies with the aid of a one-third contribution from the National Capital Planning Commission.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia, with all expenditures being repaid over a period of years to the United States by the District of Columbia. Acquisitions are part of the Commission's comprehensive plan for the park, parkway, and playground system of the National Capital. Funds appropriated during 1960 completed the amount authorized by law.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$750 thousand; 1960, \$661 thousand; 1961, \$1,203 thousand.

transportation survey prepared by the National Capital Planning Commission and National Capital Planning Regional Council outlined a unified and coordinated transportation system consisting of a network of freeways, rapid rail transit, express buses, and parking facilities to meet the projected expansion of the region's economy and population. In preparing its transit development program, the Agency is continuing the work begun in the survey. During this initial period its activities will include preliminary engineering plans, descriptions of the character of services, a timetable for providing the facilities, estimates of costs and revenues, and the financial and organizational arrangements for bringing into being an improved transportation system, giving special consideration to expanded use of existing rail and transit facilities. Actions to implement any part of the program must be expressly authorized by Congress and must be coordinated with the respective governing bodies of the area.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$0; 1960, \$0; 1961, \$8 thousand; 1962, \$11 thousand.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Additional funds are requested to enable the agency to further reduce backlogs so that the time delay in getting formal decisions from the Board can be reduced.

1. *Field investigations.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated by regional office personnel. Failing settlement, dismissal, or withdrawal, these cases are prepared for public hearing. About 85% of the unfair labor practice cases and about 75% of the representation cases are closed without the need for public hearing or further formal action.

2. *Trial examiner hearing.*—Trial examiners conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in intermediate reports. In 1960, 764 hearings were held and 582 reports were issued; the estimate for 1961 is 885 hearings and 797 reports; the estimate for 1962 is 875 hearings and 855 reports.

3. *Board adjudication.*—In unfair labor practice cases a trial examiner's intermediate report becomes a Board order if no exceptions are filed. Exceptions are filed to approximately 80% of the intermediate reports and are referred to the Board for decision. In contested representation cases the Board may either order an election in an appropriate unit to determine the choice of bargaining representative or dismiss the case. The Labor-Management Reporting and Disclosure Act of 1959 authorizes the Board to delegate to regional directors authority over representation cases with provision for appellate review. It is estimated the Board will delegate 50% of the representation decisional process to the regions in 1961 and 75% in 1962. The Board issued decisions in 383 contested unfair labor practice cases in 1960; the estimate for 1961 is 610 cases (an increase of 59%); the estimate for 1962 is 763 cases (an increase of 25%).

4. *Securing compliance with Board orders.*—If the parties do not voluntarily comply with the Board's

order, the Board must request the courts to enforce its decisions. Most of these contested decisions involve unfair labor practices. In 1960 a total of 142 Board decisions of all kinds required court litigation; the estimate for 1961 is 240 (an increase of 69%); the estimate for 1962 is 270 (an increase of 13%).

The Foundation supports basic research, basic research facilities, national research centers, national programs of research, pre- and post-doctoral fellowships, education in the sciences, the interchange of scientific information among scientists in the United States and foreign countries and the interchange of scientists and science scholars between the United States and other countries. It is also responsible for developing and encouraging the pursuit of a national policy for the promotion of basic research and education in the sciences, and for recommending to the President policies for strengthening the Nation's scientific effort. The increased appropriation will provide for strengthening support of basic research, national research programs, and research facilities and for increased costs in programs relating to the support of scientific manpower.

1. *Support of science.*—The Foundation supports basic research through grants for specific projects, principally in institutions of higher learning, and through institutional grants to colleges and universities.

GRANTS FOR SUPPORT OF RESEARCH PROJECTS

	1960 actual	1961 estimate	1962 estimate
Number of project grants awarded.....	1,896	1,754	1,800

It also supports (1) national research programs including the Antarctic research program, U.S. participation in an international expedition to the Indian Ocean, deep crustal studies of the earth, and a weather modification program; (2) basic research facilities at educational and other nonprofit institutions in such fields as oceanography and electronic computation and for the improvement of graduate laboratories and specialized biological facilities; (3) national research centers for the atmospheric sciences, optical astronomy, and radio astronomy; and translating and disseminating information on the results of scientific research, and developing improved methods for the exchange of scientific data.

2. *Support of scientific manpower.*—The Foundation awards fellowships to graduate science students, college science faculty fellowships, summer fellowships for high school science and mathematics teachers, and supports summer study programs for graduate teaching assistants.

FELLOWSHIPS FOR ADVANCED STUDY IN SCIENCE AND MATHEMATICS

Proposed increase in limitation due to pay increases.....		300	

The Board administers the railroad retirement system, financed by employer and employee taxes. This system provides annuities for age and disability and benefits for survivors. Funds for the administrative expenses of the Board in the operation of this program are derived from the Railroad retirement account.

1. *Maintenance of earnings accounts.*—Eligibility for and the amount of benefits are based on individual accounts of compensation. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. Compensation items processed were 1,665 thousand in 1960 and are estimated at 1,698 thousand and 1,732 thousand in 1961 and 1962. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing claims.*—Applications for annuities and benefits are adjudicated and certified for initial payment. In past years the claims intake has followed an upward trend as more railroad workers, their spouses or survivors, become entitled. However, the claims received in 1960 exceed the estimates for 1961 and 1962 because of one-time loads received in that year as a result of the 1959 amendments to the Railroad Retirement Act. Claims processed were 205 thousand in 1960 and are estimated at 189 thousand and 193 thousand in 1961 and 1962.

3. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments will increase from 9,196 thousand in 1960 to an estimated 9,750 thousand and 10,300 thousand in 1961 and 1962. The number of persons on the rolls receiving monthly benefit payments will increase from 794 thousand at the end of 1960 to an estimated 825 thousand and 855 thousand in 1961 and 1962.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. Appeals dispositions were 216 in 1960 and are estimated to be at about the same level in 1961 and 1962.

5. *Actuarial services.*—Actuarial studies and estimates are required by the Railroad Retirement Act to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments.

6. *Administration.*—The cost of administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$23 thousand; 1960, \$16 thousand; 1961, \$16 thousand; 1962, \$16 thousand.

Proposed supplemental due to pay increases.....		145	

The Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. All contractors and subcontractors who have any business subject to the act, which extends through June 30, 1962, are required to file with the Board. The Board has determined or recovered \$836,521 thousand in excessive profits from the date of its establishment through June 30, 1960. Of this total, \$52,708 thousand was determined during 1960.

1. *Executive direction.*—The Board is responsible for final action in all cases. This includes screening all filings involving renegotiable business over \$1 million and requests for exemption.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations (field).*—The three regional boards conduct renegotiation proceedings and make initial determinations. The field boards make the excessive profit determination in all cases involving \$800 thousand or less of renegotiable profits; however, this determination may be appealed to the statutory board. All determinations in cases involving more than \$800 thousand renegotiable profits are reviewed and approved by the statutory board.

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, is responsible for the construction, operation, and maintenance of that part of the Saint Lawrence Seaway within the territorial limits of the United States (33 U.S.C. 981). The Seaway has been constructed and is being operated and maintained jointly by the Saint Lawrence Seaway Development Corporation and the St. Lawrence Seaway Authority of Canada, in conjunction with the related power development works provided by the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario.

Budget program—Capital outlay.—The Corporation's construction program consists of a 10-mile canal, two locks, and navigation channels in the 46-mile International Rapids section of the St. Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

The revised total construction cost of the U.S. share of the Seaway, excluding interest during construction, is estimated at \$123.8 million. Work in place at the end of 1961 is estimated at \$121.8 million, and the budget year 1962 program to complete the project is estimated at \$2 million, consisting principally of channel enlargements, as well as additional pier protection for the high-level bridge.

Operating costs.—The Seaway has been operating on a toll basis since the 1959 shipping season. These costs consist of interest, administrative expenses, operation of locks and canals, control of traffic, and the related maintenance of the plant, navigation aids, and other equipment. Interest expense represents 76% of the operating costs in the budget year 1962. The estimates for Administrative expenses for 1962 are \$425 thousand, an increase of \$11 thousand over the program for 1961. These additional funds are proposed for augmenting traffic developmental activities.

13. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Unpaid undelivered orders.....	706	379	1,000	200
Supplies, deferred charges, etc.....	-----	85	100	100
Total selected resources at end of year.....	706	463	1,100	300
Selected resources at start of year (-).....	-----	-706	-463	-1,100
Cost financed from obligations of other years, net (-).....	-----	-243	-----	-800
Obligations incurred for costs of other years, net.....	-----	-----	637	-----

Financing.—The Corporation is authorized to borrow \$140 million from the Treasury to finance the costs of the

Seaway and to provide for working capital and claims. Borrowings through fiscal year 1961 are estimated at \$121.4 million, and an additional \$2 million is required for the budget year 1962. Capitalized interest amounting to \$6.7 million has not been charged against the borrowing authority. During the past year, 1960, a \$45 thousand repayment on borrowings was returned to the Treasury as a result of the Cornwall International Bridge Company's revenues being in excess of interest and operating expenses.

Operating results.—The operating expenses for the budget year 1962 are estimated at \$5.9 million and the revenues at \$4.7 million, resulting in a loss for the year of \$1.1 million. During this developmental period, operating deficits were anticipated until such time as the volume of shipping traffic increases.

The toll rates have been established at a level which will repay all the costs of the investment in the Seaway, including interest and operating expenses, all within the 50-year statutory payout period, including any deficit incurred during the developmental period. No additional borrowing authority will be required to finance this deficit.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure provisions.*—Issuers of securities for public sale are required to file a registration statement and related prospectus containing significant information about the issuer and the offering with the Commission. This is to insure that investors will be provided with the material facts concerning security offerings.

SELECTED WORKLOAD DATA

	1959 actual	1960 actual	1961 estimate	1962 estimate
Registration statements examined.....	1,119	1,545	1,750	1,885
Preliminary proxy statements examined..	1,937	2,205	2,250	2,350

The primary purpose of the Selective Service System is effective manpower utilization through classification under the Universal Military Training and Service Act. The System is responsible for supplying men to keep the Armed Forces at their authorized strength and to the extent that their needs are not met by voluntary enlistment. It will be required to supply an estimated 90,000 men for this purpose in 1962 as compared to approximately 100,000 in 1961 and 90,000 in 1960.

1. *National administration.*—The overall administration of the act including planning, training, and records management is accomplished by the national headquarters and six regional field offices.

2. *State administration.*—Administration of the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting over 23 million registrants are accomplished by the over 42,000 uncompensated citizens assisted by about 6,000 clerks at over 4,000 boards. These citizens determine who shall be deferred and for how long in the national interest in agriculture, industry, or other pursuits. They also determine the availability for military service of members of the Standby Reserve.

4. *Special boards*—(a) *National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists.*—This Committee acts in an advisory capacity to the Selective Service System. It is separately admin-

istered, but funds are furnished by the Selective Service System from its appropriation.

(b) *National Selective Service Appeal Board.*—This Board acts on the classification of registrants which have been appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

The Small Business Administration counsels, assists, and protects the interest of small business. In addition, it provides aid to business firms and homeowners who have suffered losses through disasters.

1. *Procurement and technical assistance.*—The objectives of this activity are (1) to insure that a fair proportion of Government contracts for purchases of supplies and services and the sale and disposal of property be placed with small business enterprises, (2) to insure that a fair proportion of Government contracts for research and development be placed with small business concerns and assist small firms to obtain the benefits of research and development performed at Government expense, and (3) to provide technical and managerial aid to small business concerns by advising and counseling on matters in connection with Government procurement, research and development, property disposal, methods engineering, and new and improved products and processes.

2. *Management and research assistance.*—Assistance is provided to small business through (1) management counseling, (2) developing and distributing management aids and bulletins, and (3) establishing administrative management courses. Research studies of matters ma-

terially affecting the competitive strength of small business are financed also under this activity.

3. *Investment and development company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns this agency is authorized to (1) charter, regulate, and examine small business investment companies, (2) provide capital to these companies, (3) lend funds to such companies, and (4) lend funds to State and local development companies.

4. *Financial assistance.*—Small business concerns and victims of disasters are aided through loans, which are administered so as to assure return of the Government investment. In addition, financial counseling is provided to small firms requesting assistance. Funds for administrative expenses of this activity are transferred from the revolving fund.

5. *Liquidation of Reconstruction Finance Corporation loans.*—As of June 30, 1960, there were 1,027 disaster loans outstanding amounting to \$2,412 thousand. These figures represent a reduction of 2,203 loans and \$12,334 thousand from those taken over on July 1, 1954. In addition, pursuant to Reorganization Plan No. 1 of 1957, Reconstruction Finance Corporation business loans amounting to more than \$14 million were transferred to the Small Business Administration on June 30, 1957, for liquidation. As of June 30, 1960, there were 149 loans outstanding amounting to \$2,810 thousand. Administrative expenses for this activity are also transferred from the Revolving fund, made up of receipts from these loans.

Grants (total obligations) (object class 41)....	1,990		
Financing:			
Unobligated balance brought forward.....	-25,644		
Unobligated balance rescinded (73 Stat. 209)....	23,654		
New obligational authority (appropriation)			

This special fund was established to finance grants to any State government, or agency thereof, State-chartered development credit or finance corporation, land-grant colleges and universities, and other schools for research and counseling concerning the managing and financing of small business enterprises. The amount appropriated was derived from repayments by each Federal Reserve bank of the aggregate amount which the Secretary of the Treasury had heretofore paid to such banks under the provisions of the Federal Reserve Act.

Only one grant could be made within any one State in any year, and no grant could exceed an aggregate amount of \$40 thousand. During 1960, a total of 53 grants were awarded. No grants will be made in 1961 and 1962 since the unobligated balance has been rescinded. If results obtained from studies made under the 1959 and 1960 grants program prove to be a valuable aid to small business, then further consideration will be given to the program after 1962.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations as follows:
"Civil defense and defense mobilization functions of Federal agencies," Office of Civil and Defense Mobilization.
"Limitation on administrative expenses, Fisheries loan fund," Fish and Wildlife Service, Department of the Interior.

Public enterprise funds:

REVOLVING FUND

Business loans.—Business loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that participation with a bank is not available and no immediate participation loan may be made unless it is shown that a deferred participation loan is not available. The Administration's participation in a loan is limited to 90%, and the agency's maximum commitment to any one borrower is limited to \$350 thousand, except for a loan to a corporation formed and capitalized by a

This fund finances business and disaster loans and investment and development company assistance activities authorized by the Small Business Act, as amended (72 Stat. 384), and the Small Business Investment Act, as amended (72 Stat. 689).

SMALL BUSINESS ADMINISTRATION—Continued**Public enterprise funds—Continued****REVOLVING FUND—Continued**

group of small business concerns for purposes authorized in the Small Business Act. With respect to such pool loans, the limitation is \$250 thousand for each separate small business participating in the corporation. Business loans, except for the purpose of constructing facilities, are limited to a maturity of 10 years and except for pool loans bear interest at a maximum rate of 5½% per annum on the agency's share thereof. For pool loans, the rate of interest on the Small Business Administration share shall be no less than 3% nor more than 5% per annum.

It is the policy to assist businessmen operating small firms to secure credit for constructive purposes on terms that will meet the borrower's individual requirements. Assistance includes counseling as well as the lending of funds. From the beginning of the lending program on September 29, 1953, through June 30, 1960, a total of 20,362 loans have been approved in a total amount of \$955.2 million (including participating banks' share of \$146.4 million). Sixty-four percent of these loans have been on a participation basis. The average size of loans approved to date is \$47 thousand. In 1962, it is estimated that 5,050 loans will be approved compared to an estimate of 4,490 in 1961 and 3,670 in 1960.

The following tabulation reflects certain data on business loans and includes funds disbursed or collected by banks on participation loans. Accordingly, the Small Business Administration share of disbursements and repayments will not agree with related data in the financial statements, which reflect transactions on the basis of only the Small Business Administration cash funds involved.

Small Business Administration share (estimate).....	97.0	120.8	147.4

Disaster loans.—No restrictions exist on the amount which may be loaned to an individual or business firm suffering loss from a disaster. The maximum term for disaster loans is 20 years and the interest rate may not exceed 3% on the Small Business Administration share of the loan. Through June 30, 1960, a total of 9,241 loans for \$97 million had been approved. In view of the unpredictable nature of the program, it is impractical to estimate the volume of new loans which may be committed in 1961 and 1962. For program purposes, a nominal amount of \$14 million in new commitments has been assumed in 1962, which would represent almost 1,400 loans based on the average size of loans approved through

1960; 625 loans were approved in 1960. The figure of \$20 million for new commitments in 1961 reflects an increase over the average of about \$14 million in order to recognize the increase in loan activity as a result of the widespread damage caused by Hurricane Donna in September 1960.

Small Business Administration share (estimate).....	10.3	10.1	11.2

Deferred participation business loans not expected to be purchased.—This reduction in loan commitments gives effect to the policy of committing funds for only a part of the agency's share of deferred participation loans, since experience shows that only a relatively small portion of its share of such loans will be purchased. Through 1960 only 20% of the agency share was committed. In 1961 the rate of commitment was increased to 30%, to recognize an upturn in the rate of purchases. This adjustment was made applicable for all such loans approved prior to 1961. The amount shown for 1961 gives effect to this retroactive adjustment.

Administrative expenses.—Administrative expenses are financed by transfer of funds from the revolving fund to the appropriation for salaries and expenses.

Investment and development company assistance program—Purchase of debentures of small business investment companies.—Small business investment companies provide a source of needed equity capital for small business concerns. To facilitate the formation of such companies with capital adequate to meet the demands from small business firms, the Small Business Investment Act of 1958 authorizes the Small Business Administration to purchase subordinated debentures of any such company in an amount equal to not more than \$150 thousand. It is estimated that 100 such companies will request a commitment from Small Business Administration for the purchase of debentures in 1962, the same as the 1961 estimate.

Loans to small business investment companies.—To further encourage the formation and growth of such companies, the Small Business Administration is also authorized to lend funds to them in amounts which may not exceed 50% of the paid-in capital and surplus of a company. A total of 135 loans is anticipated for 1962 at an average of \$200 thousand each compared with an estimate of 40 loans for \$150 thousand each in 1961.

Loans to State and local development companies.—The Small Business Administration is authorized to lend funds to State development companies for general use purposes; and to State and local development companies for plant construction, conversion, or expansion, including the acquisition of land. Latter type loans shall be so secured as reasonably to assure repayment, may be made directly

or in participation with banks or other lending institutions, may be made only when the proceeds are for use solely to assist an identifiable small business concern and for a sound business purpose approved by the agency, and are limited to a maximum of \$250 thousand for each such identifiable small business concern. This budget estimate assumes that legislation will be enacted to extend the program of loans to local development companies beyond the present expiration date of June 30, 1961. On such assumption a total of 170 loans (20 to State development companies for general use purposes and 150 to State and local companies for use in assisting identifiable small business concerns) will be approved in 1962.

Financing.—The capital of the revolving fund is provided by direct appropriation. Although Congress has authorized appropriations of \$950 million for loans and investments, \$740 million has been appropriated based on actual and estimated needs through June 30, 1961. After taking into consideration repayments, revenue, and cancellations of prior year loan commitments, and after making provision for a reserve for contingencies of \$29.4 million to provide for possible increases in the level of program operations, appropriations of \$20 million will be required as additional capital for the fund to finance the estimated program volume.

Operating results.—The deficit is expected to continue to increase because revenue from low-interest-rate disaster loans and from a large number of relatively small business loans is not sufficient to cover administrative and other expenses, including interest payable to Treasury on net expenditures from the fund. Administrative expenses for the investment and development company assistance program are not reflected in the schedules since funds for such expenses are provided by direct appropriation.

This fund finances the liquidation of business and disaster loans of the former Reconstruction Finance Corporation which have been transferred to the Small Business Administration for administration and liquidation. Under Reorganization Plan No. 2 of 1954, disaster loans in an amount of \$14.7 million were transferred to the Small Business Administration. Also, pursuant to Reorganization Plan No. 1 of 1957, business loans and other assets of the Reconstruction Finance Corporation liquidation fund, Treasury Department, in excess of \$14 million were transferred.

Budget program.—The program reflects the costs of the administration and liquidation activities relative to the loans and other assets transferred. Since the number of individual loans are gradually being reduced through liquidation, the costs are decreasing each year. Loans and other assets in the fund will be substantially liquidated by the end of 1962. In order to eliminate separate accounting records and budget schedules for the relatively nominal amount of assets then remaining, plans are being made to transfer to the SBA revolving fund at the beginning of 1963 the assets and liabilities of the RFC liquidation fund.

Financing.—Administrative expenses and other program obligations are financed from receipts from the liquidation of loans and other assets.

Operating results and financial condition.—In 1960 net budget receipts of \$2.3 million together with cash funds carried over from 1959 provided funds sufficient to permit a payment of \$3.4 million to the Treasury as a return on the Government's investment. Estimated net budget receipts of \$0.8 million in each of fiscal years 1961 and 1962 will enable similar payments of \$1.5 million in 1961 and \$0.9 million in 1962. As of June 30, 1962, it is estimated that the Government investment will have been reduced to \$2.1 million, comprised of capital of \$5.3 million and an accumulated deficit of \$3.2 million.

¹ Includes capital outlay as follows: 1960, \$674 thousand; 1961, \$543 thousand; 1962, \$483 thousand.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics, anthropology, geology, technology, and zoology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts; and participates in the international exchange of scientific literature. The Institution operates two museums, two scientific bureaus, two art galleries, the Canal Zone Biological Area, and the International Exchange Service. It is responsible also for the operation and maintenance of five main exhibition buildings, a facility at Silver Hill, Md., and an exhibits laboratory. A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

During the budget year, exhibit preparation for the new Museum of History and Technology will be accelerated, two exhibits renovation projects and five building rehabilitation projects will be completed. Visitors: 1958,

5,424 thousand; 1959, 6,351 thousand; 1960, 6,495 thousand.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$1,608 thousand; 1959 (adjusted), \$1,861 thousand; 1960, \$1,673 thousand; 1961, \$1,220 thousand; 1962, \$1,331 thousand.

1. *Planning, design, and supervision.*—Remodeling of the Civil Service Commission Building is planned to make it suitable to house certain art galleries of the Smithsonian Institution including a National Portrait Gallery and the National Collection of Fine Arts. Exhibited in this art museum building will be portraits of men and women who have made significant contributions to the history, development, and culture of the United States; the works of artists deserving of recognition; together with paintings, sculptures, bronzes, glass, porcelain, tapestry, furniture, and jewelry.

2. *Remodeling.*—It is anticipated that remodeling of the building will be started in 1963, and that the galleries will be opened to the public in the following year.

3. *Relation of costs to obligations.*—Year-end balance of unpaid undelivered orders is as follows: 1962, \$30 thousand.

Under existing legislation, 1961.—A supplemental appropriation is anticipated to meet the cost of wage-board salary increases.

SUBVERSIVE ACTIVITIES CONTROL BOARD

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Subversive Activities Control Board, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), not to exceed \$30,000 for expenses of travel, and not to exceed \$500 for the purchase of newspapers and periodicals, \$395,000. (Sec. 12, title I, of the Internal Security Act of 1950, 50 U.S.C. 791, as amended; General Government Matters Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Adjudication of cases and legal activities (total program costs).....	284	395	395
2. Relation of costs to obligations: Obligations incurred for costs of other years, net.....	1		
Total obligations.....	285	395	395
Financing:			
Unobligated balance lapsing.....	95		
New obligational authority (appropriation).....	380	395	395

1. Adjudication of cases and legal activities.—Upon petitions being filed, the Board holds formal hearings and determines whether: (a) organizations are Communist-action organizations, Communist-front organizations, or Communist-infiltrated organizations; (b) individuals are officers or members of a Communist-action organization or officers of a Communist-front organization and required to register as such; (c) the registration of particular Communist-action organizations or Communist-front organizations or of particular individuals should be canceled; and (d) a particular Communist-infiltrated organization has ceased to be a Communist-infiltrated organization. The Board's determinations involve the consideration of petitions, motions, answers, and evidence adduced at the hearings. In each case the Board issues a report in writing setting forth its rulings and findings as to the facts, and issues an appropriate order.

To date, the Board has heard and is hearing, only cases in which petitions against alleged Communist organizations have been filed by the Attorney General, who is the only person authorized by law to bring such actions. Under the act, proceedings concerning individuals in such

organizations must await final determinations by the Board and by the appellate courts where an appeal has been taken, that the organizations to which they belong are Communist-action or Communist-front.

2. Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1960, \$1 thousand; 1961, \$1 thousand; 1962, \$1 thousand.

New obligational authority:			
Appropriation.....	2,135	2,455	2,770
Proposed supplemental due to pay increases.....		156	

It is the responsibility of the Commission to determine the impact of U.S. and foreign tariff and trade policies on domestic industries and to provide reports and recommendations to the President, Congress or the public on these matters. The increase in foreign trade and the economic forces tending to change the established world trade patterns have resulted in a greater demand for research, investigations, and reports on tariff and trade activities. A moderate budget increase is proposed.

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

1. *Administration and adjudication.*—The Tax Court hears and decides cases involving income tax deficiencies

and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1962 the Court proposes a trial program of 160 weeks to be held in approximately 50 cities. This program should result in closing approximately 6,500 cases.

The actual and estimated work volume of the Court is presented in the following tabulation.

The Congress created the Tennessee Valley Authority in 1933 for the unified development of a river basin comprising parts of seven States. Engineering works improve and regulate the Tennessee River for navigation, flood control, and the generation of electric power. Fertilizer research and agricultural activities promote conservation and improved use of land and water resources. Forestry activities stress maximum use of forest resources consistent

with watershed protection. Watershed development work seeks integrated solution of problems in tributary areas. All these activities are interrelated. Their common purpose is to help develop the valley's agricultural and industrial potential for the benefit of both the region and the Nation.

Other national interests are directly served. The Tennessee waterway, a part of the inland waterway system, is an interregional artery for commerce moving to and from ports in 20 States. National defense requirements use over half of TVA's electric power generation. In national emergencies, defense needs have first call on the Muscle Shoals chemical facilities for munitions research and production; in peacetime, they serve as the country's only public research center equipped for complete development of fertilizers from laboratory to demonstration-scale production.

TVA is a corporation wholly owned by the Federal Government. Its 1962 activities will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and from borrowings against future power revenues; and (3) proceeds available from nonpower activities.

Budget program—1. *Navigation, flood control, and power program*.—A major objective of the TVA Act is development and use of the Tennessee River for the threefold purpose of navigation, flood control, and power. System facilities consist of 26 major dams with hydroelectric generating stations, 10 navigation locks at 9 dams, 11 major fuel-electric generating stations, and a power transmission network of about 11,851 circuit miles.

NAVIGATION—SUMMARY OF ESTIMATED OPERATING COSTS

	[In thousands of dollars]		
	1960 actual	1961 estimate	1962 estimate
Receipts.....	6	7	7
Operating costs:			
Operating expense.....	294	336	353
Distribution of administrative and general expense.....	17	19	19
Allocation of multipurpose reservoir operations expense.....	1,342	1,500	1,498
Provision for depreciation.....	1,666	1,820	1,820
Total operating costs.....	3,319	3,675	3,690
Net expense.....	3,313	3,668	3,683

(a) *Navigation operations* of the multipurpose reservoir system maintain the all-year 9-foot channel from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. Traffic on the Tennessee waterway in calendar year 1959 amounted to 12 million tons and 2.2 billion ton-miles. Transportation savings to shippers on this volume of traffic are estimated at \$24.8 million, the difference between freight charges actually paid and those which would have obtained if the river had not been improved for navigation. About \$23.7 million of these savings applied on freight originating outside the valley or moving from the valley to outside destinations. Engineering work assures that physical facilities are operated, maintained, and modified or improved to meet the needs of modern waterborne commerce. Technical studies appraise the opportunities for use of the waterway and the barriers inhibiting its use. Data supplied to shippers and carriers help solve transportation problems, looking to full utilization of the Federal investment in the navigation channel.

Capital outlay costs for navigation facilities in 1962 are estimated at \$10,358 thousand. This provides for continuing construction of the lock at Wheeler Dam started in 1961, for completing construction of the lock at Wilson Dam, started in 1957, and for beginning planning

and design of a new lock at Guntersville Dam, Ala. Minor alterations to the multipurpose features of the three dams incidental to lock construction are covered in the estimate.

FLOOD CONTROL—SUMMARY OF ESTIMATED OPERATING COSTS

	[In thousands of dollars]		
	1960 actual	1961 estimate	1962 estimate
Operating expense.....	329	379	376
Distribution of administrative and general expense.....	20	22	22
Allocation of multipurpose reservoir operations expense.....	1,348	1,513	1,508
Provision for depreciation.....	1,235	1,238	1,238
Total operating costs.....	2,932	3,152	3,144

(b) *Flood control operations* of the Tennessee River system maintain and use storage space in upstream reservoirs for seasonal retention of excessive runoff and regulate discharges to rates of flow which can be handled safely by downstream channels and reservoirs. Dams on the Tennessee River and its tributaries provide 11.8 million acre-feet of storage for flood control at the beginning of the flood season. Cities and agricultural lands in the Tennessee Valley are protected and flood crests can be reduced on the lower Ohio and Mississippi Rivers. Since 1936, regulation of the reservoirs for flood control has averted damages of about \$120.2 million at Chattanooga, Tenn., and about \$24.7 million on the lower Ohio and Mississippi Rivers. As a supplement to operating its reservoir system for flood control, TVA collects and analyzes flood data; studies potential flood control projects and ways to improve operations of the existing system. Technical advice and assistance to State and local agencies encourage them to assume responsibility for solving local urban and rural flood control problems. Of more than 100 communities in the valley needing to deal with such conditions, 67 had received technical data as of June 30, 1960. Ten have officially adopted flood-plain regulations, 6 have used the data in preparing plans for urban redevelopment or in selecting sites for new school buildings, and others are planning definite follow-up action. It is planned to develop and present technical data to 11 or more additional communities in each of fiscal years 1961 and 1962.

POWER—SUMMARY OF ESTIMATED REVENUE AND RECEIPTS AND OPERATING COSTS

	[In thousands of dollars]		
	1960 actual	1961 estimate	1962 estimate
Revenue and receipts:			
Sales of electric energy (outside):			
Federal agencies.....	110,035	110,390	110,620

(c) *Power operations* involve generation and transmission of power and sale of energy at wholesale to local distribution systems and to a small number of industries and Government agencies requiring large amounts of

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

power. As of September 1, 1960, power is distributed by 151 local public agencies and 2 small privately owned utility companies. Total energy to be supplied to the power system from generating facilities of TVA, the Army on the Cumberland River, and the Aluminum Company of America on the Little Tennessee River is estimated to be 70.1 billion kilowatt-hours in 1962. This is about 4.6 billion kilowatt-hours greater than the energy supplied to the system in 1960 and also about 4.6 billion kilowatt-hours above that estimated to be supplied in 1961. Net income from power operations, after depreciation, for 1962 is estimated to be \$62.7 million—\$11.6 million greater than in 1960, and \$7.8 million above the estimate for 1961. The estimates assume average streamflow conditions. Better than average streamflows could produce some increase in net income over the estimates; with subnormal streamflows, the net income would be significantly reduced by increases in production expense.

POWER SYSTEM FACILITIES—SUMMARY OF ESTIMATED CAPITAL OUTLAY FROM POWER PROCEEDS AND BONDS

[In thousands of dollars]

	1962 estimate
Multipurpose dam: Melton Hill Dam and Reservoir, units 1-2.....	8,508
Other power supply facilities:	
Continuing construction:	
Widows Creek steam unit 8.....	25,683
Colbert steam unit 5.....	23,056
Paradise steam units 1-2.....	85,207
Wilson hydro units 19-21.....	2,323
Wheeler hydro units 9-11.....	8,571
Beginning construction: Eastern area steam plant unit 1.....	12,128
Total, power supply facilities (including Melton Hill).....	165,476
Transmission system facilities.....	30,750
Additions and improvements at existing power facilities.....	1,499
Other, including investigations for future facilities.....	544
Total, power system facilities.....	198,269

The 1962 estimate for power supply facilities to be financed from power proceeds and bonds is \$165,476 thousand. Of this estimate, \$153,348 thousand is for continuing construction of steam generating units at the Widows Creek, Colbert, and Paradise projects and hydro-electric generating units at Melton Hill, Wilson, and Wheeler Dams; \$95,285 thousand from future power revenue and bonds will be required to complete the units started prior to 1962. Provision of \$12,128 thousand is made for starting construction of a new steamplant at a site in the eastern area of the system. The initial installation, to be in service in the winter of 1964-65, will consist of one 800,000-kilowatt unit at a total estimated cost of \$138 million, to be financed from power revenues and bond proceeds. Load growth indicates that at least a second 800,000-kilowatt unit will need to be in service in the winter of 1965-66. The second unit, to be ordered concurrently with the first, can be placed either in the same eastern area plant (in which case the total estimated cost of the two-unit plant will be \$225 million) or at another location, depending on further study of engineering and economic factors. As of June 30, 1960, the installed nameplate capacity of the system was 11.4 million kilowatts, including the Army plants on the Cumberland

River and Aluminum Company of America plants on the Little Tennessee River operated as a part of the TVA system. Completion on schedule of units started prior to 1961 (including those being installed at the Cheatham project by the Department of the Army) will bring the system nameplate capacity to 13.3 million kilowatts by the winter of 1962-63. The estimated dependable capacity of the system at that time of 13.6 million kilowatts provides a reserve of 12.3% over estimated system demands of 12.2 million kilowatts to allow for loss of capacity because of breakdown of generating equipment and needs for its maintenance, failure of substation equipment and transmission lines, and drawdown of reservoirs during extremely dry periods. The presently budgeted capacity additions will increase the system dependable capacity to 14.9 million kilowatts by the end of calendar year 1963 and to about 15.7 million kilowatts by the end of calendar year 1964. The presently estimated demands are 13.2 million kilowatts and 14.3 million kilowatts, leaving reserves of 12.9% and 9.8%, respectively, in the winters of 1963-64 and 1964-65. These margins are lower than those which are generally considered desirable by the electric utility industry. Additional capacity will need to be placed in service to meet future load growth, but the magnitude and location have not yet been determined.

Estimated capital outlay costs for power supply facilities in 1962 include \$8,508 thousand from power proceeds and bonds for continuing construction of the Melton Hill Dam and Reservoir on the Clinch River, about 23 miles upstream from its confluence with the Tennessee. The project will extend the navigation channel to Clinton, Tenn., and provide rated power generating capacity of 72,000 kilowatts. The cost of the lock, other navigation facilities, and an allocated portion of the multiple-purpose facilities will be financed with appropriated funds; and the balance with power proceeds and bond proceeds.

(e) *Topographic mapping* of the valley serves TVA's planning, construction, and operating needs and meets the standards of the Geological Survey for nationwide map coverage. The scheduled mapping carried on cooperatively with the Survey covers 763 quadrangles (about 46,100 square miles). As of June 30, 1960, 697 quadrangles (about 42,200 square miles) were completed and printed. To continue work on the remaining 66 quadrangles (about 3,900 square miles) and complete them by the end of 1962, operating costs in 1962 are estimated at \$145 thousand.

2. *Fertilizer, agricultural, and munitions program.*—Chemical facilities at Wilson Dam, Ala., are maintained and operated as a national fertilizer development center, but by statute they must likewise be available for munitions purposes and are an important segment of the national defense program.

RESEARCH ON FERTILIZER PRODUCTS AND PROCESSES—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1960 actual	1961 estimate	1962 estimate
Receipts.....	4	5	5
Operating costs:			
Operating expense.....	1,752	1,879	1,969
Distribution of administrative and general expense.....	66	72	72
Provision for depreciation.....	50	50	50
Total operating costs.....	1,868	2,001	2,091
Net expense.....	1,864	1,996	2,086

(a) *Research on fertilizer products and processes* has three phases—fundamental research, applied research, and process engineering in the laboratory and through pilot-plant operation. TVA works cooperatively with the Department of Agriculture and with industry to avoid duplicating efforts. Research results on technological developments and new and improved processes are made available to industry. Knowledge gained in fertilizer research is valuable also in the related field of munitions. Significant projects in 1962 will be research on the compound oxamide and on nonexplosive ammonium nitrate; studies and development work will continue on high-temperature techniques for the production of nitrogen compounds for use in fertilizers. Other continuing work relates to liquid fertilizers, new nitrogen compounds, ammonium polyphosphate fertilizer, and granular potassium metaphosphate fertilizer.

FERTILIZER PRODUCTION AND DISTRIBUTION—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1960 actual	1961 estimate	1962 estimate
Receipts.....	16,556	19,344	19,880
Operating costs:			
Operating expense.....	16,651	18,949	19,492
Distribution of administrative and general expense.....	393	420	420
Provision for depreciation.....	967	942	942
Total operating costs.....	18,011	20,311	20,854
Net expense.....	1,455	967	974

(b) *Fertilizer production and distribution* has these objectives: to demonstrate the technical and commercial feasibility of new or improved processes, thereby encouraging their adoption by industry; to supply materials for test-demonstration on practical farms and for widespread educational introduction among farmers; and to supply munitions materials or render other services for national defense. New or improved fertilizers are sold to farmers for educational purposes through cooperative and industry distributors who in turn furnish data to TVA concerning distribution costs and farmer acceptance. Significant aspects of 1962 production plans are increased tonnage of new materials—ammonium phosphate nitrate, ammonium nitrate sulfate, and liquid fertilizer—and reduced distribution of calcium metaphosphate and ammonium nitrate. Estimated cost of fertilizer production and distribution in 1962 is \$20,854 thousand; income from the sale of fertilizer products and byproducts is estimated at \$19,880 thousand.

FERTILIZER TESTS AND DEMONSTRATIONS—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1960 actual	1961 estimate	1962 estimate
Receipts.....	580	702	697
Operating costs:			
Operating expense.....	1,970	2,282	2,331
Distribution of administrative and general expense.....	60	65	65
Provision for depreciation.....	7	8	8
Total operating costs.....	2,037	2,355	2,404
Appropriated funds.....	1,362	1,537	1,597
Nonpower proceeds.....	675	818	807
Net expense.....	1,457	1,653	1,707

(c) *Fertilizer tests and demonstrations* are of three principal types: (1) laboratory and field plot tests to deter-

mine under controlled conditions the relative efficiency of materials; (2) studies and demonstrations aimed at developing more efficient and economical ways of distributing and applying fertilizer; and (3) farm test demonstrations of fertilizer use. Major objectives of the latter are to introduce experimental fertilizers and demonstrate their uses to farmers throughout the Nation and to improve the valley's agriculture, forestry, and watershed-streamflow relationships. In 1962 some 3,455 farms in 32 States will participate in the program. Farmer payments for TVA fertilizer used in test demonstrations will total \$697 thousand, averaging about 61% of the plant cost of the material. Agricultural extension services of the land-grant colleges supervise and technically guide farm test demonstration activities, with TVA bearing part of the cost. During 1962 cooperating institutions will pay an estimated \$1,050 thousand of the cost of field planning and supervision; TVA's payment is estimated at \$330 thousand.

Capital outlay costs for chemical facilities are estimated to be \$3,017 thousand in 1962, providing primarily for beginning construction of a new nitric acid unit to replace facilities built in 1918, for beginning construction of a demonstration-scale unit for producing solid ammonium polyphosphate fertilizer, and for continuing construction of a new electric phosphorus furnace to replace two small furnaces that are fully depreciated.

3. *Watershed protection and improvement program.*—The protection and improvement of the Tennessee River watershed constitute an important part of TVA's program for the proper use, conservation, and development of the region's natural resources. This work helps to protect the Federal investment in dam and reservoir projects from sedimentation. Investigations identify problems of watershed protection and improvement under conditions of optimum use. Research helps develop and test corrective measures. Cooperative projects with State and local groups apply these measures to regional and special problems.

WATERSHED PROTECTION AND IMPROVEMENT—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1960 actual	1961 estimate	1962 estimate
Receipts.....	77	49	45
Operating costs:			
Operating expenses.....	1,049	1,211	1,336
Distribution of administrative and general expense.....	68	75	75
Provision for depreciation.....	8	9	9
Total operating costs.....	1,125	1,295	1,420
Net expense.....	1,048	1,246	1,375

Watershed protection and improvement activities are of three types: tributary watershed projects, major tributary projects, and forestry projects. Through tributary watershed development projects, TVA assists in finding and demonstrating ways whereby State and local agencies and private groups can assume leadership and responsibility for joint solutions to problems of watershed protection and resource development in small tributary areas. Work planned for 1962 consists of research on the effects of changes in land use on the quality and behavior of water in the streams; continuation of demonstrations in the Chestee and Beech River watersheds in Tennessee and the Yellow Creek watershed in Mississippi. Another watershed project will be initiated in a valley State to be selected.

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

Major tributary projects involve TVA participation in the development of resources in the major tributary basins in the upper reaches of the valley. In these areas, water control and use are key factors in comprehensive resource development. This work is a cooperative enterprise in which citizen associations in major tributary basins will provide leadership.

Forestry projects aid the States, counties, landowners, and the timber industry in developing full production and use of the valley's forest resource consistent with the needs of watershed protection. Forestry projects include research and demonstrations in forest management and forest damage prevention, reforestation, and wood utilization.

4. *General service activities.*—Operating costs for this program cover primarily reimbursable services furnished at the request and expense of other agencies.

GENERAL SERVICE ACTIVITIES—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1960 actual	1961 estimate	1962 estimate
Receipts (reimbursements).....	3,991	4,961	6,523
Operating costs:			
Bridge maintenance (23 U.S.C. 320 (a)-(f)).....	6	9	10
Reimbursable services.....	3,991	4,961	6,523
Total operating costs.....	3,997	4,970	6,533
Net expense.....	6	9	10

The 1962 estimate of \$6,523 thousand for reimbursable services includes \$1,205 thousand for mapping services performed for the Army, the Geological Survey, and others. The estimate includes \$3,096 thousand for starting construction of a bridge over Pickwick Dam, for which reimbursement is to be received from the Bureau of Public Roads and the State of Tennessee. Also included is work for the Department of Defense in connection with keeping the Muscle Shoals Phosphate Development Works in standby status.

Estimated capital outlay of \$1,549 thousand for general facilities in 1962 is made up of a budget outlay of \$2,969 thousand, offset by depreciation credits of \$1,420 thousand. The \$2,969 thousand is for purchase of equipment used in all program activities and covers primarily replacement of trucks and other heavy mobile equipment.

6. *Relation of costs to obligations.*—The relationships for operating costs and for capital outlay costs are derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

RELATION OF OPERATING COSTS TO OBLIGATIONS

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Inventories, financed from power proceeds.....	33,913	34,896	32,860	30,615
Inventories, financed from appropriations and nonpower proceeds.....	5,114	5,375	5,560	5,560
Unpaid undelivered orders, financed from power proceeds and bonds.....	1,112	870	886	894
Unpaid undelivered orders, financed from appropriations and nonpower proceeds.....	261	2,478	764	2,154
Total selected resources at end of year.....	40,400	43,619	40,070	39,223

Financing.—Amounts estimated to become available in 1962 would be derived from (1) the requested appropriation of \$29,703 thousand; (2) nonpower revenue and receipts of \$27,961 thousand; and (3) power revenue and receipts of \$274,430 thousand. In addition, the budget program anticipates financing from borrowings (not guaranteed by the Government) of \$140 million backed by future power revenue. A summary of the application of appropriations follows (in thousands of dollars):

APPLICATION OF APPROPRIATIONS

	1960 actual	1961 estimate	1962 estimate
Operations:			
1. Navigation, flood control, and power program:			
Navigation operations.....	311	355	372
Flood control operations.....	349	401	398
Topographic mapping.....	208	187	144
Multipurpose reservoir operations.....	2,690	3,013	3,006
2. Fertilizer, agricultural, and munitions program:			
Research on fertilizer products and processes.....	1,818	1,951	2,041
Fertilizer tests and demonstrations.....	1,355	1,529	1,589
Agricultural development projects.....	88	109	96
3. Watershed protection and improvement program.....	1,117	1,286	1,411
4. General service activities: Bridge maintenance (23 U.S.C. 320 (a)-(f)).....	6	9	10
Total operations.....	7,942	8,840	9,067
Capital outlay:			
1. Navigation, flood control, and power program:			
Multipurpose dam: Melton Hill Dam and Reservoir....	154	4,050	7,954
Navigation facilities:

4. General service activities: General facilities.....	1,526	183	1,549
Total capital outlay.....	6,962	11,680	20,636
Total appropriation.....	14,904	20,520	29,703
Unobligated balance brought forward.....	5,291	4,073	1,494
Unobligated balance carried forward.....	-4,073	-1,494	-----
Obligations against appropriated funds.....	16,122	23,099	31,197

A summary of the power proceeds estimated for 1962 follows (in thousands of dollars):

Power proceeds for year:	
From revenue and receipts.....	274,430
From borrowings.....	140,000
Total proceeds.....	414,430
Add decrease in power inventories.....	2,245
Less program requirements for operations and capital outlay.....	357,190
Excess of proceeds over program requirements.....	59,485
Less requirements for payment to Treasury.....	50,000
Excess of proceeds over all requirements.....	9,485

The TVA Act permits investment of power proceeds derived from operations or from bond issues in securities approved for national bank funds. A resolution adopted by the Board of Directors requires TVA, insofar as it is authorized to do so, to invest proceeds from the sale of the first revenue bond issue of \$50 million only in obligations of or guaranteed by the United States. Power proceeds which are temporarily surplus to needs are invested in accordance with the foregoing provisions. Interest income, estimated at \$1,700 thousand for 1961 and \$700 thousand for 1962, is reflected in the budget schedules.

Operating results and financial condition.—Accumulated net income from power operations at the end of 1962 is estimated at \$687,979 thousand, of which \$62,677 thousand is derived from 1962 operations. The accumulated net expense of nonpower programs at the end of 1962 is estimated at \$238,552 thousand, of which \$13,205 thousand is from 1962 operations. Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriations from the Treasury. Payment to the Treasury in 1962 is estimated at \$50 million—\$40 million as a dividend (return on the appropriation investment in the power program) and \$10 million as a reduction in the appropriation investment in the power program.

Total equity of the Government at the end of 1962 is expected to be \$2,193,499 thousand—\$1,790,068 thousand being invested in power program assets and \$403,431 thousand in assets of other programs (in thousands of dollars):

	Total	Power program	Other programs
Appropriations by the Congress.....	2,026,419	1,369,045	657,374
Transfers of property.....	45,671	19,535	26,136

UNITED STATES INFORMATION AGENCY

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan No. 8 of 1953, and the United States Information and Educational Exchange Act, as amended (22 U.S.C. 1431 et seq.), to carry out international information activities, including employment, without regard to the civil service and classification laws, of (1) persons on a temporary basis (not to exceed \$120,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such as to be investigated for such employment in accordance with procedures established by the Secretary of State and the Attorney General); travel expenses of aliens employed abroad for service in the United States and their dependents to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801-1158); entertainment within the United States not to exceed \$500; hire of passenger motor vehicles; insurance on official motor vehicles in foreign countries; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; cost of transporting to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director may prescribe; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-

owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under the Travel Expense Act of 1949, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; **[\$102,557,300]** **\$110,600,000**, of which not less than \$14,000,000 shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States: *Provided*, That not to exceed **[\$90,000]** **\$135,000** may be used for representation abroad: *Provided further*, That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further*, That funds may be exchanged for payment of expenses in connection with the operation of information establishments abroad without regard to the provisions of section 3651 of the Revised Statutes (31 U.S.C. 543): *Provided further*, That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201(c) of the Act of June 30, 1949 (40 U.S.C. 481(c)), and the exchange allowances or proceeds of such sales shall be available for replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, except buses and station wagons, shall not exceed \$1,500: *Provided further*, That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), the United States Information Agency is authorized, in making contracts for the use of international shortwave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further*, That existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire during the current fiscal year may be extended for a period of one year in addition to the period of appointment or assignment otherwise authorized. (*Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1961.*)

Note.—Estimate for 1962 excludes \$2,182 thousand for activities transferred in the estimates to "Salaries and expenses (special foreign currency program)." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

The United States Information Agency submits evidence to peoples of other nations by means of communication techniques that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress, and peace. The intention is to encourage foreign peoples to take action consistent with U.S. national objectives.

The increase of approximately \$7.1 million in program level will provide for (a) approximately \$5.6 million for overseas program expenses plus related media and other support services to meet increased costs in foreign countries and to allow some expansion in programs in foreign countries; (b) about \$396 thousand for expansion of worldwide television, motion pictures, and information center activities; (c) \$640 thousand for costs in connection with radio facilities; and (d) a net increase of \$464 thousand for domestic support activities related to the overall program.

1. *Overseas missions.*—The program is conducted through 224 posts in 101 countries and is known abroad as the United States Information Service (USIS). The overseas missions carry out country programs designed to present to local audiences the enduring features of America's traditions, arts, and culture; and to influence local attitudes and actions in support of U.S. foreign policy. These programs are being expanded and strengthened in critical areas, especially in Africa and Latin America. Overseas missions prepare materials using local facilities whenever possible, but also utilize materials provided by the media services in Washington.

2. *Media services.*—These services provide support for overseas country programs.

(a) *Press and publications service* maintains communications facilities for the transmission of editorial and feature materials for adaptation by overseas missions. It produces two monthly magazines titled "America Illustrated," one for distribution in the Soviet Union and one for distribution in Poland; and one bimonthly magazine "Al Hayat Fi America" (Life in America) in Arabic, sold on newsstands throughout the Arab world. The service also operates two regional printing centers and provides overseas missions with printing supplies and equipment.

(b) *Motion picture service* produces and acquires films which are translated into 40 foreign languages. It adapts films for specific country or area use, and directs the foreign production, use, and distribution of films. The service also supplies the missions with mobile units and equipment for showing motion pictures.

(c) *Information center service* supports U.S. operated libraries and reading rooms and binational centers. The service provides all of these with collections of American books and other publications, both in English and in translations, and with English teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to overseas missions for local display and provides books and periodicals for presentation to selected individuals and groups. Emphasis is being placed on the expansion of the successful binational center program in 1962.

(d) *Broadcasting service* produces radio broadcasts in 35 foreign languages and in English. Programs originate from the United States and from one overseas location. It operates a total of 85 transmitters at 8 locations in the United States and at 8 overseas locations, with a combined radio frequency power output of over 8 million

UNITED STATES INFORMATION AGENCY—Con.

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

watts. The service also supplies the overseas missions with recorded radio programs and scripts, and with radio supplies and equipment.

(c) *Television service* acquires and produces television programs for placement in outlets overseas. It also provides guidance to the overseas missions in the production and use of television programs.

3. *Cooperative programs with private organizations.*—The United States Information Agency encourages, guides, and coordinates the efforts of private organizations to utilize their resources and initiative in building an information exchange program between the people of the United States and the people of foreign countries.

4. *Program direction and appraisal.*—Agency program planning, direction, and appraisal are accomplished through the Director's office, area assistant directors, planning staff, and research and analysis activities.

5. *Administration and staff support.*—This includes physical and personnel security functions, legal counsel, central administrative services, and emergency planning.

6. *Administrative support.*—Administrative services for the Agency's overseas operations, and certain special support services at headquarters, are obtained through reimbursable arrangements with the Department of State.

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by sections 104(i) [and 104(j)], 104(j), and 104(r) of that Act, to remain available until expended, \$3,000,000 of which not less than \$2,011,600 shall be available only to purchase currencies which the Treasury Department shall determine to be excess to normal requirements of the United States \$8,500,000: *Provided*, That this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) unless such currencies are excess to the normal requirements of the United States: *Provided further*, That the dollar value of the unexpended balances, as of June 30, 1960, of allocations of foreign currencies heretofore made for the purposes of such sections 104(i) and 104(j) is appropriated as of that date and shall be merged with this appropriation. (*Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1961.*)

Note.—Estimate for 1962 includes \$2,182 thousand for activities previously carried under "Salaries and expenses." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

New obligatory authority:			
Current indefinite.....	7,581	—	—
Current definite.....	—	3,000	8,500
Appropriation.....	7,581	3,000	8,500

Note.—The gross foreign currency authorization for 1960 was \$4,964 thousand. The schedule above covers foreign currency authorizations for 1960. The appropriation made for 1960 was equal to the unexpended balance of previous foreign currency authorizations as of June 30, 1960. All transactions in 1961 and 1962 relate to appropriations.

Foreign currencies derived from sales of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454) are available to the U.S. Government for certain informational and cultural activities. The use of these currencies for such activities is now subject to the regular appropriation process. A dollar appropriation of \$8,500 thousand, to remain available until expended, for the purchase of these currencies, is therefore requested for 1962 and will be merged with appropriations previously made for this purpose.

The total request for 1962 will provide: \$4,897 thousand for the translation, publication, and distribution of American textbooks, Agency-produced periodicals and pamphlets, and other works; \$1,403 thousand for assistance to binational organizations in carrying out programs which

serve U.S. interests including the acquisition of adequate quarters as well as operating expenses; and \$2,200 thousand for other regular program expenses including, but not limited to, radio activities, television activities, information placement, posters, motion picture production and distribution, and overseas exhibits.

The Agency's regular annual appropriation for Salaries and expenses contains funds for the support of these programs for requirements such as paper for publications and film raw stock.

The purpose of this program, heretofore known as the President's Special International Program, is to strengthen the ties which unite us with other nations by demonstrating the cultural interests, developments, and achievements of the people of the United States, and the contributions being made by the U.S. economic and social system toward a peaceful and more fruitful life for its own people and other people throughout the world.

The appropriations for this program are proposed as the responsibility of the United States Information Agency because the Director of that Agency has been designated by the President to coordinate this program and allocate funds to appropriate agencies to carry it out. Executive Order No. 10716 is currently being amended to authorize the Agency to administer exhibits at international expositions as well as the Department of Commerce so that the United States can meet any kind of exhibit requirement authorized by the International Cultural Exchange and Trade Fair Participation Act of 1956. The United States Information Agency publicizes the projects abroad and absorbs the cost of such publicity and coordination.

1. *Trade fairs and exhibitions.*—The Departments of Commerce and Labor and the United States Information Agency provide United States exhibits and labor missions at important international fairs and other strategic locations overseas. Authorizations for 1960 provided for 14 trade fair and solo exhibits and 3 labor missions. This compares with 17 exhibits and 6 labor missions in 1961, and 14 exhibits and 10 labor missions in 1962. The trade mission program will be financed in 1962 by the Bureau of Foreign Commerce of the Department of Commerce, the amounts for 1960 and 1961 being shown as a comparative transfer in the estimates.

2. *Artistic and athletic presentations.*—The Department of State administers this program, which supports outstanding American cultural attractions appearing abroad. This support is necessary primarily because of high international transportation costs and itineraries to places where commercial revenues are inadequate to cover operating expenses. Approved projects, with itineraries reaching all areas of the world, numbered 23 for 1960, and are estimated at 25 during 1961, and 43 during 1962.

3. *Coordinator's contingency reserve.*—Unforeseen, high priority requirements sometimes arise for which insufficient time is available to obtain appropriations. The estimates include \$1 million to be used for unforeseen needs

SPECIAL INTERNATIONAL PROGRAM (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of [Indian rupees] foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(m) [(A)] of that Act, to remain available until expended, [\$650,000] \$1,250,000, of which not to exceed [\$1,250] \$3,000 may be expended for representation: *Provided, That this appropriation shall be available only to purchase currencies which the*

Treasury Department shall determine to be excess to normal requirements of the United States. (Second Supplemental Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Trade fairs and exhibitions.....	1,221	1,701	250
2. Coordinator's contingency reserve.....			1,000

Financing:			
Comparative transfers from (-) other accounts.....	-1,221	-1,051	
New obligational authority (appropriation).....		650	1,250

Foreign currencies, excess to the normal requirements of the United States and derived from the sale of agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are available for United States participation in international fairs and expositions which demonstrate our industrial and cultural attainments. Currencies purchased with this appropriation supplement similar activities carried out by the appropriation immediately above.

1. *Trade fairs and exhibitions.*—Certain local expenses were provided for participation in two fairs in 1960 and in three fairs in 1961. Participation in three fairs in 1962 is estimated. Responsibility for participation in agricultural fairs for foreign policy reasons has recently been transferred by Executive order to the United States Information Agency from the Department of Agriculture.

2. *Coordinator's contingency reserve.*—Unforeseen, high priority requirements sometimes arise for which insufficient time is available to obtain appropriations. The estimates include \$1 million to purchase excess currencies for unforeseen needs at the discretion of the director of the United States Information Agency.

ACQUISITION AND CONSTRUCTION OF RADIO FACILITIES

For an additional amount for the purchase, rent, construction, and improvement of facilities for radio transmission and reception, purchase and installation of necessary equipment for radio transmission and reception, without regard to the provisions of the Act of June 30, 1932 (40 U.S.C. 278a), and acquisition of land and interests in land by purchase, lease, rental, or otherwise, [\$8,740,000] \$7,580,000, to remain available until expended: *Provided, That this appropriation*

shall be available for acquisition of land outside the continental United States without regard to section 355 of the Revised Statutes (40 U.S.C. 255), and title to any land so acquired shall be approved by the Director of the United States Information Agency. (22 U.S.C. 1461, 1477; Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1961.)

Unobligated balance carried forward.....	20,824	8,412	-----
New obligational authority (appropriation)	9,000	8,740	7,580

These funds, which remain available until expended, will be used for—

1. *Acquisition and construction of facilities.*—Planned obligation of funds in 1961 is for completion of the transmitting facility at Greenville, N.C., and acquisition of land and contracting for preliminary work at the new relay station in Liberia. The balance of funds available for the Liberian facility is planned for obligation in 1962. In addition, funds are requested in 1962 for construction of housing for station personnel in Liberia, for substantially more powerful transmitters at our leased facilities in the United Kingdom, and for a transportable radio station to meet critical broadcasting needs on short notice.

2. *Maintenance and improvement of existing facilities.*—Recurring maintenance and improvement of existing facilities, and replacement of obsolete or worn-out equipment will continue at a reduced level compared to 1961.

3. *Research and development.*—Continuing basic research in engineering development and design of new equipment and expanded studies in radio propagation techniques with special emphasis on problems of specific application to the Voice of America require an increase in 1961.

This program enables American exporters of books, periodicals, films, and other informational media to sell their materials, through regular commercial channels, in foreign countries having a shortage of U.S. dollar exchange (22 U.S.C. 1442). Under the program, foreign importers make payments to American exporters in foreign currency. The exporters then exchange their foreign currency for U.S. dollars through application to the U.S. Information Agency, in accordance with the terms of each exporter's informational media guarantee contract.

Program.—A small increase in the issuance of guarantee contracts is proposed for 1962 to permit taking advantage of opportunities for greater commercial distribution of American informational materials in East Europe, Africa, and Latin America. On the other hand, significant reductions in other countries in which currency stability is developing are planned.

The program provides for financing of interest on outstanding Treasury notes for the budget year only. This is in contrast with the 1961 program which provides for accrued interest for 3 years in order to eliminate deferred obligation of interest payments.

Financing.—No change in the method of financing is proposed for 1962. The appropriation requested will continue the current financing of interest which was begun in 1961, will permit the issuance of \$175 thousand in guarantees above the 1961 level and will reduce realized impairment to the fund by about \$120 thousand by the end of 1962.

Operating results.—In 1962 contracts will continue to be issued for commercial distribution of American informational materials in certain countries of Eastern Europe, Africa, the Near East and South Asia, and the Far East. Contracts will also be issued in certain countries of Latin America not heretofore included. In all cases, however, the program will be limited to those countries in which there are restrictions on the convertibility of the currency into dollars. Impairment of the fund will continue to result from the inability of the Treasury to sell some of the currencies purchased and from losses on currencies actually sold.

VETERANS ADMINISTRATION

Current authorizations:

GENERAL OPERATING EXPENSES

For necessary operating expenses of the Veterans Administration, not otherwise provided for, including expenses incidental to securing employment for war veterans; uniforms or allowances therefor, as authorized by law; and reimbursement of the General Services Administration for security guard service; and not to exceed \$67,000 for preparation, shipment, installation, and display of exhibits, photographic displays, moving pictures, and other visual education information and descriptive material, including purchase or rental of equipment; **\$153,500,000]** \$162,046,000: *Provided, That no part*

of this appropriation shall be used to pay in excess of twenty-two persons engaged in public relations work: *Provided further*, That no part of this appropriation shall be used to pay educational institutions for reports and certifications of attendance at such institutions an allowance at a rate in excess of \$1 per month for each eligible veteran enrolled in and attending such institution. (5 U.S.C. 43, 46-46e, 54, 55a-56, 59a, 61b, 62, 70a-70b, 73b-73c, 75a-75a-1, 78, 78a-1, 84-84c, 86a, 87c, 118a, 118h, 118p, 118q, 140, 150, 835-840, 842, 851-869, 901-926, 943-945, 948, 1071-1075, 1081-1083, 1091-1094, 1101-1107, 1111-1115, 1121, 1123-1125, 1131-1133, 1181-1184, 2061-2066, 2091-2092, 2094, 2121-2123, 2131-2133, 2203(a)(7), 2204(24), 2254, 2301-2319, 3001-3014; 6 U.S.C. 14; 24 U.S.C. 30; 28 U.S.C. 1823; 31 U.S.C. 686; 38 U.S.C. 111, chs. 3, 33 (sec. 1665b), 55, 57, 59, 71; 72 Stat. 1262-1264; 41 U.S.C. 5; *Independent Offices Appropriation Act, 1961; title II, General Government Matters Appropriation Act, 1961.*)

Appropriation.....	165,373	153,500	162,046
Proposed supplemental due to pay increases.....		9,763	

This appropriation provides for all administrative expenses of the agency with the exception of those applicable to the Department of Medicine and Surgery.

A decrease of \$1,217 thousand in appropriation requirements is forecast for 1962. This decrease is attributed primarily to savings expected from planned expansion of automatic data processing systems and to declining workloads in the vocational rehabilitation and education program.

Supplemental appropriation requirements of \$1,300 thousand resulting from recent loan guarantee legislation (74 Stat. 533, 820, 1023) are shown under Proposed for

later transmission. An additional supplemental appropriation of \$9,763 thousand resulting from pay raise legislation (74 Stat. 296), will also be required.

1. *General administration.*—The Administrator and his top staff assistants provide the executive direction of the agency, establish basic policies, interpret laws pertaining to veterans' affairs and promulgate supplementary regulations, and direct and coordinate the activities of the operating departments. The Board of Veterans Appeals, established by statutory enactment, renders appellate decisions final in all cases other than insurance cases, in appeals to the Administrator on claims involving benefits under laws administered by the Veterans Administration.

2. *Insurance.*—Approximately 6 million veterans are insured under the U.S. Government or national service life insurance programs. Obligational requirements for the administration of these programs have been reduced from approximately \$41.5 million in 1953 to an estimated \$25.8 million in 1962. These reductions, accompanied by only slight decreases in the number of policies maintained, have been made possible through consolidation of activities and improved operating methods and procedures.

AVERAGE NUMBER OF POLICIES IN FORCE

[In thousands]

	1960 actual	1961 estimate	1962 estimate
U.S. Government life insurance.....	332	314	296
National service life insurance.....	6,031	5,928	5,826

3. *Veterans benefits.*—Veterans and dependents claims for compensation, pensions, or other benefits are adjudicated, and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents, as indicated by the following workloads (in thousands):

	1960 actual	1961 estimate	1962 estimate
Rating actions (disability).....	1,271	1,165	1,090
Authorization actions (disability).....	827	875	850

This appropriation provides for the cost of care and treatment of eligible beneficiaries at Veterans Administration hospitals, domiciliary homes, and outpatient clinics, contract hospitals, and State homes. Provision has also been made beginning in 1962 for funding medical research operations out of this appropriation.

To be eligible for inpatient care and treatment a beneficiary must be a veteran of any war with a service-connected disability incurred or aggravated during a period of war, or, within the limits of Veterans Administration

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

[INPATIENT] MEDICAL CARE—Continued

facilities, for any other disability if the veteran is unable to defray the expenses of necessary hospital or domiciliary care. Outpatient medical and dental treatment is provided to veterans with service-connected disabilities by staffs of Veterans Administration outpatient clinics and by physicians and dentists participating in the hometown medical care program. It is also provided to veterans receiving vocational rehabilitation who require treatment to avoid interruption of training, pensioners of nations allied with the United States in World War I and in World War II, and veterans of the Spanish-American War, Boxer Rebellion, and Philippine Insurrection. Veterans are also provided examinations in outpatient clinics for purposes of rating for compensation or pension, insurance and determining their need for hospitalization or domiciliary care.

Medical services may be furnished on an outpatient basis for non-service-connected disabilities to veterans who have been determined to need hospital care and whose admission to a hospital has been scheduled, or who require posthospital treatment to complete hospital care.

Increases in 1962 are the result of: (a) an increase of 610 patients in Veterans Administration hospitals and 19 in contract hospitals, (b) activation of the new 1,000-bed neuropsychiatric hospital at Brecksville, Ohio, (c) transfer of charges for supply depot services from the appropriation for Maintenance and operation of supply depots, which is proposed for discontinuance, (d) an increase in staffing levels for improved physical facilities and to sustain quality medical care, (e) average salary increases resulting from periodic pay increases and reclassification actions, (f) cost of the new program of outpatient treatment before and after periods of hospitalization, as authorized by Public Law 86-639, (g) increased reciprocal per diem rates in Federal hospitals, (h) higher outpatient workloads, (i) increased costs of new prosthetic appliances, (j) increased Federal contribution toward the cost of operation of State soldiers' homes as authorized by Public Law 86-625, and (k) an expanded medical research program proposed for financing under this appropriation for the first time.

1. *Maintenance and operation of hospitals.*—This covers the operation of Veterans Administration hospitals. The estimated costs for 1962 exceed 1961 by \$36,483 thousand, and 1960 by \$90,019 thousand.

	1960 actual	1961 estimate	1962 estimate
Veterans Administration hospitals:

Employment per 100 patients..	103.5	104.7	106.7

2. *Contract hospitalization.*—This covers the hospitalization in other Federal hospitals for service- and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, veterans in training under the provisions of 38 U.S.C. 1506, and veterans in U.S. possessions and the Republic of the Philippines may also receive treatment of non-service-connected disabilities. The increase in the estimated costs over 1961 is approximately \$492 thousand, and \$426 thousand over 1960.

	1960 actual	1961 estimate	1962 estimate
Average daily patient load:			
Civil hospitals.....	980	974	974
Municipal and State hospitals.....	652	633	633
Other Federal hospitals.....	1,316	1,328	1,347
Total.....	2,948	2,935	2,954

3. *Maintenance and operation of domiciliary facilities.*—This covers the cost of domiciliary care for veterans in 18 Veterans Administration facilities and in 33 State institutions. The increase in the estimated costs over 1961 is \$2,393 thousand and over 1960, \$4,778 thousand.

	1960 actual	1961 estimate	1962 estimate
Domiciliaries:			
Average number of operating beds....	17,486	17,320	17,320
Average daily member load:			
Veterans Administration domiciliaries.....	16,339	16,340	16,340
Veterans Administration hospitals..	517	510	510
State homes.....	9,418	9,450	9,450
Average employment.....	3,920	4,110	4,153
Employment per 100 members in Veterans Administration domiciliaries..	24.0	25.2	25.4

4. *Outpatient care.*—This provides for the cost of operation of 91 clinics, 54 of which are located at Veterans Administration hospitals. The increase in the estimated costs over 1961 is \$3,058 thousand, and over 1960 is \$9,339 thousand.

NUMBER OF MEDICAL VISITS AND DENTAL CASES

[In thousands]

	1960 actual	1961 estimate	1962 estimate
Number visits, medical.....	3,511	3,592	3,622
Examinations, dental.....	32	31	31
Treatments, dental.....	26	24	24
Total.....	3,569	3,647	3,677
In Veterans Administration facilities:			
Number visits, medical.....	2,264	2,341	2,355
Examinations, dental.....	27	26	26
Treatments, dental.....	18	17	17
Total.....	2,309	2,384	2,398
By private physicians and dentists:			
Number visits, medical.....	1,247	1,252	1,267
Examinations, dental.....	5	5	5
Treatments, dental.....	8	7	7
Total.....	1,260	1,264	1,279

5. *Medical research.*—The research program is directly related to patient care in view of the part it plays in facilitating recruitment and retention of qualified physicians for the hospital system. Projects are conducted at Veterans Administration hospitals and are supplemented by contracts with universities or other institutions when such arrangements are more economical or more advantageous. Research in the Veterans Administration is funded from three sources: (1) direct appropriation, \$21,500 thousand in 1961, (2) grants from the National

Institutes of Health and other organizations sponsoring research, \$4,500 thousand and (3) services provided from funds budgeted for hospital operations, \$3,100 thousand, making a total research program of \$29,300 thousand. In 1962, this total is expected to approximate \$31 million, with \$500 thousand of the increase funded from this activity and the remainder from National Institutes of Health grants.

In addition the appropriation for Construction of hospital and domiciliary facilities includes \$1,064 thousand for 4 projects to improve research laboratory facilities at existing hospitals and improved facilities will also be incorporated in the replacement hospitals for which construction funds are proposed in 1962. Salaries of physicians engaged in research on a part-time basis are financed from patient care, partially offset by support to hospital operations rendered by the research program, resulting in a net contribution of \$3,100 thousand to research in 1961 and 1962.

Language is proposed elsewhere in the budget which will permit National Institutes of Health grants to be made directly to Veterans Administration hospitals beginning in 1962, on the same terms and conditions as applied to non-Federal institutions.

A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$1,907 thousand; 1959 (adjusted), \$1,710 thousand; 1960, \$2,410 thousand; 1961, \$2,410 thousand; 1962, \$2,410 thousand.

New obligational authority (appropriation)	3,400,000	3,800,000	3,568,000

This appropriation provides for compensation, pensions, and other related benefits and allowances that are authorized veterans and their survivors. On June 20, 1960, there were an estimated 22,534,000 living veterans of all wars and peacetime service and, as of that date 13.4% of these veterans, or 3,008,937, were receiving benefits under this appropriation. In addition, 1,261,985 dependents of 950,802 deceased veterans were receiving benefits. The increased cost is primarily attributable to the pension program and is caused largely by increases in caseloads of World War I veterans and their survivors; and by the impact of the Veterans' Pension Act of 1959. This law, effective July 1, 1960, modifies the pension program for veterans of World War I, World War II, and the Korean conflict and their widows and children, in the following major respects:

(1) A sliding scale of pension is provided based on specified income limitation and family status.

(2) Pension is provided for widows and children of World War II and Korean conflict veterans on the same basis as widows and children of World War I veterans by removing the requirement that the veteran must have had a service-connected disability at death.

(3) Pension for any war veteran receiving hospital or domiciliary care by the Veterans Administration will be reduced to \$30 after 2 months. The remainder of the pension may be apportioned for his wife and children. The act also provides that an invalid lift may be furnished, if medically indicated, for any veteran who receives pension based on a need for regular aid and attendance.

No pensioner on the rolls on June 30, 1960, will have his pension reduced by reason of this law. Pensioners may elect higher benefits under the law. It is estimated that the total additional cost of this legislation will approximate \$77 million in 1961, and this may decrease slightly in 1962.

74 Stat. 528, approved July 14, 1960, and effective September 1, 1960, provides an additional allowance for "housebound" service-connected disability cases and will cost approximately \$5 million during 1961 and \$6 million in 1962. 74 Stat. 820, approved September 8, 1960,

authorizes vocational rehabilitation to certain World War II veterans and is estimated to cost approximately \$600 thousand in 1961 and \$1,100 thousand in 1962. Other legislative proposals enacted during the second session of the Eighty-sixth Congress will not significantly affect the costs in 1961 and 1962.

1. *Compensation.*—Compensation is payable to living veterans for a disability connected with military service and compensation or dependency and indemnity compensation is payable to eligible dependents of deceased veterans for death connected with military service.

(a) *Living veterans.*—The basic rates of disability compensation provided in wartime cases range from \$19 for 10% disability to \$225 per month for total disability. Certain cases are compensated for specific disabilities as prescribed by law, to a maximum of \$600 a month per case. 74 Stat. 528 establishes a new statutory rate of \$265 monthly, effective September 1, 1960, for certain seriously disabled veterans who are permanently "housebound" because of their service-connected disability or disabilities. An additional allowance is payable for dependents of veterans rated 50% or more disabled to a maximum of \$100 a month per case, plus \$12 monthly for each child in excess of three, as provided by 74 Stat. 165, effective August 1, 1960. All rates of peacetime disability compensation are 80% of wartime rates.

The caseload of living veterans reflects a decreasing trend through 1962, attributable primarily to termination of payments to World War II veterans with minimum ratings. The increased average payment, in 1961 and 1962, is primarily attributable to the higher rates payable to "housebound" cases as indicated above.

AVERAGE NUMBER OF VETERANS AND COSTS

	1960 actual	1961 estimate	1962 estimate
Spanish-American War.....	212	200	200
World War I.....	180,492	165,200	151,300
World War II.....	1,553,282	1,538,600	1,527,300
Korean conflict.....	205,427	206,000	207,000
Peacetime.....	99,417	110,000	119,000
Total.....	2,038,830	2,020,000	2,004,800
Average payment per case per year.....	\$774	\$776	\$776
Total costs (in thousands).....	\$1,577,908	\$1,567,520	\$1,555,725

(b) *Deceased veterans.*—The caseload continues to increase. The largest group in this category (World War II) appears to have reached a plateau which is maintained through 1962. The average payment per case is expected to continue the downward trend experienced in 1960.

AVERAGE NUMBER OF CASES AND COSTS

	1960 actual	1961 estimate	1962 estimate
Spanish-American War.....	926	800	700
World War I.....	45,827	44,000	42,900
World War II.....	274,688	274,500	274,000
Korean conflict.....	37,190	38,000	38,600
Peacetime service.....	30,421	33,100	35,800
Total.....	389,052	390,400	392,000
Average payment per case per year.....	\$1,211	\$1,205	\$1,200
Total costs (in thousands).....	\$471,099	\$470,432	\$470,400

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability and death. The effects of the Veterans' Pension Act of 1959 (73 Stat. 432), effective July 1, 1960, are reflected in the increased requirements estimated for 1961 and 1962.

(a) *Living veterans.*—In general, pensions are payable to wartime veterans who are unable to secure substantially gainful employment as a result of a permanent and totally disabling non-service-connected disability. The legally

prescribed standards for determining eligibility are especially liberal for veterans who have attained 65 years of age. Effective July 1, 1960, a sliding scale of pensions is introduced based on income and family status, ranging from a minimum of \$40 monthly to a single veteran, with \$1,200 to \$1,800 annual income, to a maximum of \$100 monthly to a veteran with three or more dependents whose income is \$1,000 or less annually. These are increased by \$70 monthly when veteran needs regular aid and attendance.

The caseload continues to increase steadily with sizeable gains projected in the World War I category in 1961 and 1962. The rate of increase is greater in 1961 as a result of the initial effect of the new pension program. The average monthly payment will increase sharply in 1961, due to elections of higher rates, provided under the Veterans' Pension Act of 1959 for veterans with the greatest need, and due to an additional number of veterans not electing but who are entitled to receive higher monthly rates by attaining age 65. In 1962 a decrease in the average monthly payment is expected, since those veterans initially entitled under the Veterans' Pension Act of 1959 because of increases in the income limitation, will draw a lower monthly rate.

AVERAGE NUMBER OF VETERANS AND COST

	1960 actual	1961 estimate	1962 estimate
Yellow-fever experiments.....	2	2	2
Indian wars.....	54	45	35
Civil War.....	1		
Spanish-American War.....	35,770	32,600	29,300
World War I.....	802,609	914,300	1,040,600
World War II.....	85,780	95,500	107,700
Korean conflict.....	5,986	7,700	9,700
Peacetime service.....	251	225	215
Total.....	930,453	1,050,372	1,187,552
Average payment per case per year.....	\$979	\$1,019	\$1,008
Total costs (in thousands).....	\$910,700	\$1,069,968	\$1,197,234

(b) *Deceased veterans.*—Under the Veterans' Pension Act of 1959, pensions are payable to widows and children of World War II and Korean conflict veterans as indicated above. A sliding scale of pension based on income and family status is payable ranging from \$25 monthly to a maximum of \$105 monthly (plus \$15 for each additional child over 3).

The estimated caseload reflects a significant increase in 1961, primarily in the World War II and Korean conflict categories, where the effect of equalization with World War I is indicated. The average monthly payment increases sharply in 1961, due to elections of higher rates provided under the new pension program. In 1962 a decrease in the average payment is expected, since those veterans initially entitled under the new program because of the higher income limitation will receive a lower-than-average monthly rate.

AVERAGE NUMBER OF CASES AND COSTS

	1960 actual	1961 estimate	1962 estimate
Mexican War.....	4	3	2
Indian wars.....	720	670	600
Civil War.....	4,113	3,700	3,300

Total costs (in thousands).....	\$352,688	\$441,633	\$519,969

3. *Other*—(a) *Emergency officers.*—Emergency officers of World War I retired for service-connected disability are entitled to special retirement benefits at rates substantially higher than the normal compensation payments.

(b) *Subsistence allowance.*—Subsistence allowance payments to disabled veterans enrolled in vocational rehabilitation and education programs are made from this appropriation.

(c) *Initial burial allowance.*—Under present statutes the Administrator is authorized to provide an allowance of \$250 (plus transportation charges where death occurs under Veterans Administration care) for the funeral expenses of a deceased veteran. The estimated increases in obligations are directly related to the estimated increase in number of deaths of veterans in civil life.

(d) *Special allowance, dependents.*—Under certain conditions a special allowance is payable to certain dependents of a veteran who dies after December 31, 1956, but who was not a fully and currently insured individual under the Social Security Act. The award is based upon a certification to the Veterans Administration by the Social Security Administration.

(e) *Invalid lifts.*—The Administrator may furnish an invalid lift, if medically indicated, to any veteran in receipt of pension under chapter 15 of title 38, U.S. Code, based on the need of regular aid and attendance.

Unobligated balance carried forward.....	76,463	56,463	
New obligational authority (appropriation)	585,000	344,000	80,376

This appropriation provides education and training allowances for veterans of the Korean conflict, educational assistance allowances for eligibles under the War Orphans' Educational Assistance Act; for claim payments as well as loan and property acquisition costs on veterans loans; and special assistance to disabled veterans in the form of tuition and supplies and equipment for those requiring vocational rehabilitation, housing grants, and automobiles or other conveyances.

1. *Education and training.*—It is estimated that the number of Korean conflict veterans receiving benefits will decline. Indications point to an increase in orphan trainees. Forecasts of trainee loads based upon an analysis of trends in each of the major categories of training and average costs per trainee follow:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Korean conflict veterans:				
Higher learning.....	237,160	165,461	100,000	50,800
Below college.....	122,541	81,941	46,800	22,400
Correspondence.....	23,679	19,232	13,500	8,000
Institutional-on-farm.....	22,592	12,849	5,900	2,300
Job training.....	18,918	8,868	3,800	1,500
Total.....	424,890	288,351	170,000	85,000
Average cost per trainee.....	\$1,333	\$1,288	\$1,278	\$1,274
Orphans:				
Average number of trainees.....	4,486	6,915	9,650	11,960
Average cost per trainee.....	\$1,708	\$1,657	\$1,650	\$1,650

2. *Loan guarantee.*—Home, farm, and business loans are guaranteed or insured by the Veterans Administration. The payment of claims and the acquisition of loans and properties result from failure of veteran borrowers to keep up their mortgage payments, thus requiring the Government to assume the responsibility.

Direct payments.—Guarantee claims and costs of loan and property acquisitions are currently paid from this appropriation. Beginning in 1962, they will be paid from the new "Loan guarantee revolving fund," made available to the Administrator by 74 Stat. 533, enacted July 14, 1960, for all nonadministrative expenses of the loan guarantee program. The number and cost of payments

made in 1960 and estimated for 1961 are shown under the Loan guarantee revolving fund.

Though these expenditures are paid from appropriated funds, they do not represent full loss to the Government, since the proceeds from liquidation of assets are deposited into the general fund receipts of the Treasury as shown below (in thousands of dollars):

	1960 actual	1961 estimate
Expenditures from appropriated funds.....	121,835	121,207
Less returns to general fund receipts.....	34,727	41,000
Net appropriation expenditures.....	87,108	80,207

Proceeds from liquidation of assets in 1962 and thereafter will be credited to the loan guarantee revolving fund referred to above, to help defray loan guarantee program costs.

As of June 30, 1960, cumulative expenditures for claims and acquisitions totaled \$570,258 thousand. However, total cash receipts of \$169,026 thousand had been returned to the Treasury. Against the resulting cash deficit of \$401,232 thousand, Veterans Administration held assets worth \$395,155 thousand, consisting of real property, cash and loans and accounts receivable. Actual 1960 and estimated 1961 operations are compared in the following statement, the 1962 estimates appearing under the Loan guarantee revolving fund.

CONDENSED STATEMENT OF INCOME AND EXPENSE AND FINANCIAL CONDITION

3. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation are provided educational assistance for tuition, supplies, and equipment. Assistance also is available to provide grants for specially adapted housing to veterans having suffered the loss of both feet, and to paraplegic veterans. In addition, up to \$2 thousand is allowed certain disabled veterans toward the purchase of automobiles or other conveyances. Based on an analysis of trends, load forecasts, and average costs, total requirements are projected as follows:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Tuition:				
Average number of trainees paid tuition (job training excluded).....	9,117	7,002	5,710	4,560

VETERANS INSURANCE AND INDEMNITIES

For military and naval insurance, for national service life insurance, for servicemen's indemnities, and for service-disabled veterans insurance, [\$48,800,000] \$39,200,000, to remain available until expended: Provided, That certain premiums provided by law to be credited to the "Military and naval insurance" or "National service life insurance" appropriations shall hereafter be credited to appropriations granted under this head which shall be subject to the same statutory provisions and shall be available for the same purpose as formerly applied to the appropriations for "Military and naval insurance", "National service life insurance", and "Servicemen's indemnities". (38 U.S.C. ch. 19; 70 Stat. 887; Independent Offices Appropriation Act, 1961.)

1. *Military and naval insurance.*—Payments are made for claims on war-risk insurance issued to servicemen and veterans of World War I. Although no policies of this insurance remain in force, payments for death and disability claims continue. Payments are made also to the United States Government life insurance fund for claims (1) traceable to extra hazards of military service and (2) for claims while insured was under premium waiver provisions in active military service.

(a) *Payment to "United States Government life insurance fund."*—Transfers are made to reimburse the fund for the above purposes.

Description	1960 actual	1961 estimate	1962 estimate
Death and disability awards.....	269	320	320
Average payment per award.....	\$1,198	\$1,687	\$1,687

(b) *Direct payments to policyholders and beneficiaries.*

(1) *Disability awards.*—Payments of \$5.75 per month per \$1 thousand of war-risk insurance held are made to veterans becoming permanently and totally disabled for as long as the disability shall continue.

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

VETERANS INSURANCE AND INDEMNITIES—Continued

(2) *Death awards.*—Upon the death of a veteran receiving payments for disability, the remaining value of the policy is paid to the beneficiary as a death award.

Description	1960 actual	1961 estimate	1962 estimate
Average number of disability awards.....	6,500	6,400	6,300
Average number of death awards.....	40	25	25
Annual average payment per disability award..	\$535	\$535	\$535
Annual average payment per death award.....	\$435	\$1,000	\$1,000

2. *National service life insurance.*—This appropriation pays certain expenses of the National service life insurance fund and receives premiums and pays claims on nonparticipating insurance policies issued to certain disabled veterans of World War II. The permanent indefinite appropriation of premium receipts is authorized. (38 U.S.C. 802(c)(2)).

(a) *Payment to "National service life insurance fund".*—

(1) For death claims traceable to extra hazards of service an amount is transferred from this appropriation, which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to the extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund, (2) gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for National service life insurance, (3) the fund is reimbursed when recovery of erroneous payments or overpayments is waived, and (4) the fund is reimbursed for death claims on policies under waiver of premiums while the insured is on active military duty.

Description	Average payment per case, 1960	Caseload		
		1960 actual	1961 estimate	1962 estimate
(1) Claims for extra hazards of service:				
Death awards.....	\$6,644	507	495	755
Disability awards.....	142	22,620	21,400	20,250
(2) Gratuitous insurance.....	3,121	317	275	242
(3) Waiver of overpayments.....	2,323	5	20	20
(4) Death while under waiver of premiums.....	8,288	327	300	275

(b) *Direct payments to policyholders and beneficiaries.*—

(1) Claims are paid on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities, (2) claims may be paid in certain instances in which applicants for insurance were rejected for medical reasons and subsequently died in line of duty, (3) claims are paid on death which occurred after application but before effective date of a national service life insurance policy, and (4) claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

Description	Average payment per case, 1960	Caseload		
		1960 actual	1961 estimate	1962 estimate
(1) Claims on nonparticipating national service life insurance:				
Death awards.....	\$2,222	107	104	97
Disability awards.....	446	200	265	335
(2) Claims from applicants rejected for medical reasons who died in line of duty..	272	240	200	200
(3) Claims where applicant died between date of application and effective date..	515	313	300	290
(4) Claims on discontinued insurance.....	489	305	295	285

3. *Service-disabled veterans insurance.*—Payments are made to the Service-disabled veterans insurance fund to supplement the premium and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans whose service-connected disabilities made them ineligible for commercial insurance. The amount estimated for this program in 1962 is \$1,300 thousand.

4. *Servicemen's indemnities.*—Beneficiaries of servicemen who died prior to January 1, 1957, while in active service or within a period of 120 days after separation from active service are entitled to receive an indemnity in the amount of \$10 thousand less any national service life insurance and/or U.S. Government life insurance carried by the deceased. Payments are made to beneficiaries in 120 equal installments, plus interest at the rate of 2.25% per year. The payments on awards was \$35,900 thousand in 1960. Payments will decrease annually, as installments are completed beginning 1961.

Financing:			
Unobligated balance lapsing.....	1,286	500	
New obligational authority (appropriation)	2,000	1,500	1,000

Grants-in-aid are made to the Republic of the Philippines for the medical care and treatment of eligible Philippine Commonwealth Army veterans. Section 631 of title 38, U.S. Code, provides for reimbursement at agreed upon patient per diem rates up to a maximum annual amount of \$2 million. Medical care and treatment is provided by the Philippine Veterans Memorial Hospital in Manila, which was constructed from U.S. grants-in-aid totaling approximately \$9,400 thousand.

CONSTRUCTION OF HOSPITAL AND DOMICILIARY FACILITIES

For hospital and domiciliary facilities, for planning and for major alterations, improvements, and repairs and extending any of the facilities under the jurisdiction of the Veterans Administration or for any of the purposes set forth in sections 5001, 5002, and 5004, title 38, United States Code, \$75,000,000, to remain available until ex-

ended: *Provided, That the limitation under the head "Hospital and domiciliary facilities" in the Independent Offices Appropriation Act, 1957, on the amount available for technical services for replacement of the general medical and surgical hospital at Nashville, Tennessee, is reduced from "\$1,500,000" to "\$921,600". (Independent Offices Appropriation Act, 1961.)*

New obligational authority (appropriation).....			31,659	75,000	75,000				

These funds provide for the construction of new hospital and domiciliary facilities and replacement of existing hospitals and domiciliaries, including acquisition of sites, modernization and other improvements at existing facilities (including regional offices and supply depots) and for fixed and initial portable equipment at such facilities.

A construction program of \$77,913 thousand in new starts is recommended for 1962 to be financed with new obligational authority of \$75 million plus savings of \$2,913 thousand from existing obligational authority. The amount for construction of replacement hospitals includes \$11,200 thousand for a 500-bed general hospital to be located at Charleston, S.C., \$26,053 thousand for a 1,250-bed general hospital at Wood, Wis. (Milwaukee), \$1,228 thousand for planning a 580-bed general hospital at Atlanta, Ga., and \$750 thousand for planning the replacement of approximately 1,000 beds in the Los Angeles, Calif., area. The amount for modernization totals \$34,411 thousand for projects for which planning funds were previously appropriated and \$339 thousand for planning funds on new projects estimated to cost \$4,249 thousand. Other improvements total \$3,932 thousand for new projects estimated to cost \$4,462 thousand.

The above program provides for fallout shelter facilities in accordance with the Government's policy to provide such facilities in connection with new construction. Funds requested for the replacement hospitals include \$24 thousand for planning the Atlanta, Ga., fallout shelter facilities and for the full cost of facilities as follows—\$300 thousand at Charleston, S.C., and \$537 thousand at Wood, Wis. The requests for modernization and other improvements include \$4 thousand for planning and \$11 thousand for the full cost respectively, of fallout facilities at the White River Junction, Vt., and Syracuse, N.Y., projects.

1. *Hospitals*—(a) *New*.—This activity includes post-World War II new beds and conversion programs which consist of 77 projects that provide approximately 38,240 new beds and 12 projects for conversion of beds at existing hospitals. The status of this program follows:

STATUS OF NEW BEDS PROVIDED

	1960 actual	1961 estimate	1962 estimate
Under construction, beginning of year....	2,000	1,000	1,500

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
 "Civil defense and defense mobilization functions of Federal agencies," Office of Civil and Defense Mobilization.
 "Emergency supplies and equipment," Office of Civil and Defense Mobilization.
 "National Cancer Institute," Public Health Service.
 "Payments to school districts," Office of Education.
 "Research, development, test, and evaluation, Army."

ADMINISTRATIVE PROVISIONS

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

[Appropriations] The appropriation available to the Veterans Administration for the current fiscal year for ["Inpatient care" and "Outpatient care"] "Medical care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by section 902 of title 38, United States Code), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Construction of hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices Appropriation Act, 1961*.)

The Veterans Canteen Service was established by Congress in 1946 to furnish at reasonable prices merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U.S.C. 4201-08).

Budget program.—Sales are expected to be \$40,809 thousand in 1961 and it is estimated sales will be \$41,156 thousand during 1962. Operating costs increased as a result of the Federal employees health benefits program and the Federal Employees Salary Increase Act of 1960.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Commodities for sale.....	3,813	4,298	4,583	4,583

Selected resources at start of year (—).....	—4,634	—5,360	—5,643	-----
Obligations incurred for costs of other years, net.....	-----	726	283	-----

Financing.—Operations are financed from current revenue. The Congress originally appropriated a total of \$4,965 thousand to establish and operate the Service. Funds in excess of the needs of the Service totaling \$6,824 thousand have been paid to the Treasury as of June 30, 1960.

Operating results and financial condition.—Operating revenue is expected to be sufficient to cover operating expense. Funds at the close of the fiscal year in excess of the needs of the Service for the ensuing fiscal year will be paid to the Treasury.

Loans are made to veterans for the purchase, construction, or improvement of homes, including farm residences, in specified areas where mortgage loans made by private lenders and guaranteed by the Veterans Administration cannot be secured (38 U.S.C. 1811, as amended).

Budget program—1. Direct loans to veterans.—Under existing legislation, authority to make or to enter into commitments to make loans expires July 25, 1962. Lending authority is expected to be fully committed by that date. The amount of loans outstanding will reach a peak of \$1.3 billion in 1962. A summary of loan activity follows (dollars in thousands):

	1960 actual	1961 estimate	1962 estimate
Number of loan commitments.....	30,326	21,500	20,777
Number of loan disbursements.....	27,998	18,100	20,650
Amount of loan commitments (obligated).....	\$304,625	\$210,700	\$203,615
Disbursements on loans closed.....	\$281,253	\$177,380	\$202,400
Average per loan closed.....	\$10,045	\$9,800	\$9,800
Repayment of loans (includes exchange of noncash assets).....	\$52,464	\$57,311	\$64,854
Sale of loans.....	\$105	\$1,000	\$1,000
Losses on loans.....	\$56	\$60	\$65
Net loan disbursements.....	\$228,628	\$119,009	\$136,481
Loans outstanding end of year:			
Number.....	144,435	158,700	178,200
Amount.....	\$1,049,959	\$1,168,968	\$1,305,449

2. Vendee loans made.—Resale of real property acquired through foreclosure or voluntary conveyance normally involves a cash downpayment by the purchaser and the creation of a new mortgage loan to be held by the Veterans Administration. The noncash portions of these transactions are excluded from the program and financing schedule above and from the sources and application of funds; but they are included in the following activity summary (in thousands):

	1960 actual	1961 estimate	1962 estimate
Amount of properties sold.....	\$2,084	\$2,088	\$2,041
Amount of vendee loans acquired.....	1,897	1,900	1,850
Amount of vendee loans repaid.....	293	305	328

3. Real property acquired.—Properties are acquired through foreclosures and voluntary conveyance in defaulted loans. This involves primarily an exchange of noncash assets, with relatively small cash outlay. The

VETERANS ADMINISTRATION—Continued**Public enterprise funds—Continued****DIRECT LOANS TO VETERANS AND RESERVES—Continued**

noncash portion of these transactions are excluded from the program and financing schedule above and the statement of sources and application of funds; but they are included in the following activity summary (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Amount of properties acquired.....	2,320	2,300	2,200

4. *Interest on borrowings.*—These payments to the Treasury increase as the principal amount of notes held by the Treasury increases with additional borrowings.

5. *Operating expense, general.*—These include a variety of miscellaneous expense incident to closing and servicing loans. Costs will increase slightly with the increase in the number of loans outstanding.

6. *Property management and selling expense.*—These costs of maintaining and selling properties acquired through foreclosure is expected to increase slightly with the increase in the number of loans outstanding.

Financing.—Loans are made primarily with funds borrowed from the Treasury, and with repayment from loans previously made. Borrowing authority in the amount of \$1,183 million was authorized through June 30, 1960. Additional borrowing authority of \$150 million in the current year and \$150 million in 1962 has been authorized, at a quarterly rate of \$50 million less proceeds of loan sales in the preceding quarter. Of the total funds to be made available from borrowings and program operations, it is expected that \$177 million will be disbursed in current year and \$202 million in 1962 as compared to \$281 million in 1960. Expenses incident to closing loans are paid by the veteran, foreclosure expenses are met from interest income, and administrative expenses are borne by the appropriation for General operating expenses, Veterans Administration.

Operating results and financial condition.—Interest revenue from loans outstanding and other revenue exceeds interest expense on borrowings from the Treasury, providing a growing annual net income and increasing the retained earnings of the fund to \$106 million in 1962. As indicated in the Program and financing statement, \$70.6 million of these retained earnings will be used to finance the Loan guarantee revolving fund. The remaining \$35.8 million provides a reserve for losses on the estimated \$1.3 billion loans outstanding.

LOAN GUARANTEE REVOLVING FUND

During the current fiscal year, the Loan guarantee revolving fund shall be available for expenses for all property acquisitions and other loan guarantee and insurance operations, except administrative expenses, as authorized by section 1824 of title 38, United States Code: Provided, That the retained earnings of the Direct loans to veterans and reserves revolving fund shall be available, during the current fiscal year, for transfer to said Loan guarantee revolving fund in such amounts as may be necessary to provide for the foregoing expenses.

Beginning in 1962 all nonadministrative costs of the loan guarantee program will be financed through this fund. The fund was established, effective July 1, 1961, by 74 Stat. 533 enacted July 14, 1960. In the current year, as in prior years, these costs are being paid from the Readjustment benefits appropriation. Receipts generated by program operations, heretofore paid into the general fund of the Treasury, will accumulate in 1962 to form part of the capital of this fund for operations in future years.

Budget program.—In connection with the conversion of this program to a revolving fund, data shown below for 1959, 1960, and 1961 have been adjusted for comparability with the 1962 data which are presented on the new basis.

1. *Real property acquired.*—Private lenders who have acquired property as a result of foreclosure on defaulted

guaranteed or insured loans may elect to convey that property to the VA.

	1959 actual	1960 actual	1961 estimate	1962 estimate
Properties acquired:				
Number of properties acquired.....	10,466	10,617	10,450	10,350
Average cost per acquisition.....	\$10,045	\$9,346	\$9,346	\$9,465
Total cost (in thousands).....	\$105,134	\$99,230	\$97,674	\$97,960

2. *Loans acquired.*—Guaranteed or insured loans in a default status may be purchased by the Administrator to avoid foreclosure when it is felt that temporary forbearance will allow the veteran borrower to cure the default.

	1959 actual	1960 actual	1961 estimate	1962 estimate
Loans acquired:				
Number of loans acquired.....	153	149	150	150
Average cost.....	\$6,227	\$7,055	\$7,050	\$7,050
Total cost (in thousands).....	\$953	\$1,051	\$1,058	\$1,058

3. *Claims paid.*—These payments result from veteran borrowers failing to keep up their payments on VA-guaranteed or insured loans, thus requiring the Government to assume the responsibility. The estimate is based on the relatively low default ratio experienced during the program.

	1959 actual	1960 actual	1961 estimate	1962 estimate
Claims paid:				
Number of claims paid.....	10,881	10,550	10,630	10,500
Average cost per payment.....	\$1,365	\$820	\$807	\$867
Total cost (in thousands).....	\$14,849	\$8,654	\$8,575	\$9,106

4. *Property management expense.*—The cost of managing properties acquired are financed under this activity. With little change expected in the number of properties on hand these costs will remain approximately at the 1960 level.

5. *Sales expense.*—This item which consists principally of brokers fees and advertising costs incident to the sale of acquired properties, and no significant change is expected.

Financing.—Revenue and receipts consist principally of interest income and repayments on mortgage loans made incident to the sale of real property acquired as a result of foreclosure on guaranteed loans. It will be several years before this interest income and these principal repayments are sufficient to offset program costs, and make the fund self-sustaining. In the meantime, it will be necessary to transfer funds from Direct loans to veterans and reserves. It is estimated that a transfer of \$70.6 million will be required in 1962.

There are available for leasing to Federal employees 133 housekeeping units located at the Veterans Administration Hospital, Perry Point, Md. In addition, on the sites of the new hospitals to be constructed at Brecksville and Cleveland, Ohio, there are 20 units rentable as quarters.

The 133 units at Perry Point were constructed prior to World War I and consequently are in need of considerable repair. Revenue derived from rental of these quarters is necessary for the extensive backlog of modernization, maintenance, and repair (38 U.S.C. 455).

During the construction of the new hospitals, some of the buildings suitable for rental are being leased to the original owners pending completion of the hospital. Others are being rented to resident engineers, guards, and personnel associated with the construction. Several of these buildings will be disposed of through demolition before activation of the hospitals, and the others will become part of hospital quarters available to VA employees.

Relation of costs to obligations.—Unpaid undelivered orders as of June 30, 1960, were \$2 thousand.

This fund finances the payment of claims on non-participating insurance policies issued to veterans with service-connected disabilities which makes them ineligible for commercial insurance (38 U.S.C. sec. 722). Administrative expenses are paid from the appropriation General operating expenses.

Budget program—1. *Death claims paid*.—Payments to surviving beneficiaries continue to increase as new deaths occur among the increasing number of policyholders.

2. *Premiums waived and lien writeoffs*.—Premium payments are waived for policyholders who are totally disabled for 6 months or more. This is a cost to the fund which increases with the increased number of policies in force.

3. *Cash surrenders paid*.—A policyholder may terminate his insurance by cashing in his policy for its cash value. This activity continues to increase as the number of policies increases.

7. *Policy loans and liens made*.—A policyholder may borrow up to 94% of the cash value of his policy. This activity increases with the increased number of policyholders.

The general increase in the activity of this fund is indicated in the following table (dollars in thousands):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Number of policies.....	38,702	43,460	48,000	52,500
Insurance in force.....	\$339,871	\$381,137	\$420,960	\$460,425

Financing.—Operations are financed from premiums and other receipts. Additional funds are derived from the appropriation Veterans insurance and indemnities, instead of direct appropriations to this fund. It is estimated that the payment will be \$1.3 million in 1962.

Operating results and financial condition.—Because premium and other receipts continue to be insufficient to cover operations, the deficit is expected to continue to increase with capital impairment reaching an estimated \$20.6 million by June 30, 1962.

The capital of the fund consists of \$4,500 thousand—\$3,500 thousand appropriated directly in 1952, 1956–58,

VETERANS ADMINISTRATION—Continued**Public enterprise funds—Continued****SERVICE-DISABLED VETERANS INSURANCE FUND—Continued**

and \$1,000 thousand transferred from the Readjustment benefits appropriation in 1954.

The cumulative deficit of the fund to June 30, 1960, was \$17,246 thousand, offset by a \$500 thousand payment in 1960 from the appropriation Veterans insurance and indemnities.

The fund finances claims arising from the guarantee of premiums due on commercial life insurance policies held by servicemen while they are in service and for 2 years after discharge (72 Stat. 487). The Government guarantees the repayment of any indebtedness not liquidated by

the insured himself. Any payment by the Government on cases approved subsequent to October 6, 1942, creates a debt owed the Government by the insured. The Supreme Court has ruled that, in cases approved prior to October 6, 1942, the insured individuals may make claims for refunds of any payments made to the Government because of alleged indebtedness.

Budget program—Insurance program.—(a) Claims paid on guaranteed premiums are made to commercial insurance companies in cases where the servicemen failed to make premium payments which were guaranteed by the Government; (b) refund claims paid to former servicemen for payments made to the Government are one-time payments to a limited group of claimants which are expected to be completed in 1961.

The activity of the fund is indicated in the following table:

	1960 actual	1961 estimate	1962 estimate
Number of settlements.....	30	30	30
Number of refunds.....	500	440	---
Average cost per settlement.....	\$259	\$250	\$250
Average cost per refund.....	\$204	\$203	---

Financing.—Payment of claims against this fund are financed from collection of claims receivable, revenue, and appropriations as needed.

Operating results and financial condition.—The payment of refund claims has created expenses substantially in excess of the small revenue of the fund, thereby increasing the deficit to \$1.8 million in 1960.

The fund finances the payment of claims on non-participating insurance policies issued before January 1, 1957, to veterans who served in the Armed Forces subsequent to April 1951 (38 U.S.C. 723). Under Public Law 85-896, policyholders were given the right to convert to a permanent plan of insurance or to a new form of term insurance which may not be renewed beyond age 50 but which costs less than the present term insurance. Those who converted to a permanent plan also acquired the right to purchase total disability income coverage with an additional premium.

VETERANS ADMINISTRATION—Continued**Public enterprise funds—Continued****VETERANS SPECIAL TERM INSURANCE FUND—Continued**

Budget program—1. Death claims paid.—Payments to surviving beneficiaries continue to increase as new deaths occur among policyholders.

2. Disability claims paid.—Payments to individuals who have purchased total disability coverage and who subsequently become totally disabled began in 1960.

4. Premiums waived and liens written off.—Premium payments are waived for policyholders who are totally disabled for 6 months or more. This is a cost to the fund which increases with the number of policies under premium waiver.

8 and 9. Policy loans and liens made.—The policyholders who converted their insurance from term to permanent plan were subsequently entitled to borrow up to 94% of the cash value of the new policy. Disbursement of such loans from this fund exceeded \$50 thousand in 1960.

The general decrease in the activity of this fund is indicated in the following table:

	[Dollars in thousands]			
	June 30, 1959	June 30, 1960	June 30, 1961	June 30, 1962
Number of policies..	671,751	664,121	652,000	640,000
Insurance in force..	\$6,040,356	\$5,896,007	\$5,789,760	\$5,689,600

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claims payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund.

Intragovernmental funds:

SUPPLY FUND

During the current fiscal year, the Supply fund shall be available for the purchase of one passenger motor vehicle.

The Supply fund finances, on a reimbursable basis, the procurement of supplies and equipment throughout the Veterans Administration in accordance with the provisions of 38 U.S.C. 5011 and nonperishable subsistence supplies for all civilian agencies.

Budget program—Procurement, distribution, and services program.—This includes the procurement of supplies and equipment, the operation of service and reclamation shops at each of the three supply depots, and a centralized book and periodical procurement activity at Somerville, N.J. It is planned in 1962 to finance the operation of the Veterans Administration supply depot system through the fund and eliminate the appropriation Maintenance and operation of supply depots. The 1962 estimate therefor includes amounts for salaries and other operating costs for the operation of supply depots, the capitalization of operating equipment on hand, and the acquisition and depreciation of operating equipment. The three supply depots are located at Somerville, N.J.; Hines, Ill.; and Wilmington, Calif.

Personal services and other costs incidental to the operation and administration of supply activities in the Veterans Administration central office and field organizations are charged directly to applicable appropriations and are not an operating expense of the Supply fund.

The Veterans Administration has been designated as the Government's purchasing agent for nonperishable subsistence required by the civilian agencies. It is planned to transfer this responsibility not later than July 1, 1961. The increased volume of nonperishable subsistence is estimated at \$3,106 thousand and is reflected in the revenue and expense estimates for 1962. Expenditures and revenue for the procurement distribution and services program are estimated to be \$150,234 thousand in 1962.

Publication and reproduction program.—This program provides printing service to Veterans Administration installations on a centralized basis. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing from the Government Printing Office, the General Services Administration, a Veterans Administration-operated plant in Arlington, Va., and from commercial sources. Expense and revenue in 1962 are estimated at \$3,322 thousand.

Financing.—Consuming appropriations reimburse the fund for the cost of supplies and equipment provided and services rendered by the above specified activities, including related expense such as transportation, inspection, and testing. Costs related to financing supply depot operations through the fund in 1962 will be recovered from the appropriations and funds receiving supplies and equipment from the supply depots.

Operating results.—The fund recovered the 1959 loss of \$237 thousand in 1960 and returned to the Treasury a net profit of \$127 thousand. It is expected to break even in 1962 on a slightly higher sales volume.

2. Contract hospitalization:			
(c) Federal hospitals.....		327	
3. Maintenance and operation of domiciliary facilities:			
(a) Veterans Administration homes.....		223	
(b) State homes.....		1,090	
Total program costs—obligations.....		9,295	
Financing:			
New obligational authority (proposed supplemental appropriation).....		9,295	

Under existing legislation, 1961.—A supplemental appropriation of \$9,295 thousand is anticipated to cover the cost of wage-rate increases approved for wage-board employees after July 31, 1959, for increased aid to State homes pursuant to Public Law 86-625 and for increased reciprocal per diem rates for Federal contract hospitals, which were not included in the 1961 Inpatient care appropriation.

MAINTENANCE AND OPERATION OF SUPPLY DEPOTS

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Storage operations.....		38	
2. Utility operations.....		12	
Total program costs—obligations.....		50	
Financing:			
New obligational authority (proposed supplemental appropriation).....		50	

Under existing legislation, 1961.—A supplemental appropriation of \$50 thousand is anticipated to cover the cost of salary increases approved for wage-board employees, after July 31, 1959, and not included in the 1961 Maintenance and operation of supply depots appropriation.

DIRECT LOANS TO VETERANS AND RESERVES

Under proposed legislation, 1962.—Legislation is proposed in this budget to eliminate World War II veterans from the direct loan program as of July 25, 1961. Enactment of such legislation will result in a \$30 million reduction in direct loan expenditures in 1962.

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System, [or] to travel performed in connection with the investigation of aircraft accidents by the Civil Aeronautics Board, or to payments to interagency motor pools where separately set forth in the budget schedules.

SEC. 103. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 104. No part of any appropriation made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor. (*Independent Offices Appropriation Act, 1961.*)

GENERAL PROVISIONS

[SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress.]

SEC. [302] 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the corporation or agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend halftime or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; wage administration; and processing, recording, and reporting.

[SEC. 303. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for construction of fallout shelters in Government-owned or leased buildings except where specifically provided.] (*Independent Offices Appropriation Act, 1961.*)

Appropriation (adjusted).....	154,610	166,692	176,000
Proposed transfer for pay increases from "Strategic and critical materials".....		1,917	

¹ Includes capital outlay as follows: 1960, \$1,819 thousand; 1961, \$2,461 thousand; 1962, \$500 thousand.

This appropriation provides for basic real property operations of the General Services Administration including planning and direction of all real property programs; acquisition, operation, maintenance, protection, and utilization of general-purpose buildings and space; operation of communication facilities; management of excess real property and disposal of surpluses; and central direction of all buildings design, construction, repair, and improvement.

The appropriation request for 1962 is a net increase of \$4,391 thousand above a comparable amount for 1961 which includes proposed appropriation transfers of \$3

million for wage board increases and \$1,917 thousand for pay act costs. The net increase is primarily for management and operation of new Federal buildings scheduled for occupancy in 1961 and 1962 and includes \$127 thousand for annualization of wage board rate increases effective July 1 through September 17, 1960, but no provision is made for increases subsequent to that date.

For the first time in several years, funds are not included in this estimate to acquire and operate additional leased space to support expanding programs of other agencies nor for space previously financed by reimbursement from other agencies. For 1962, funds for these purposes are included in estimates of other agencies in order to reflect the initial cost of new or expanding programs in estimates considered by the Congress. Funds to cover costs incurred in providing such space and service will be transferred to this appropriation under authorization proposed in the general provisions for GSA.

Fair value of property received from other appropriations or funds without cost for use by GSA (in thousands of dollars):

1. *Buildings management.*—This activity provides for (a) rental, operation, protection, and utilization of Government-owned, leased, and purchase contract space, as indicated in the following table (in thousands):

AVERAGE NET SQUARE FEET

	1960 actual	1961 estimate	1962 estimate
Government-owned space.....	57,030	62,382	64,955
Leased space.....	22,067	22,935	22,305
Purchase contract space.....	621	1,049	1,269

(b) management and operation of joint-use communication facilities; (c) protection and maintenance of surplus and national industrial reserve properties; and (d) payments in lieu of taxes on certain properties as required by law.

The net increase for 1962 of \$4,334 thousand over the comparable amount for 1961 is composed generally of increased workload with fixed costs as follows (in thousands of dollars):

Operation and protection of Government-owned space.....	4,228
Operation and protection of purchase contract space.....	350
Increased rental rates and utilities, leased space.....	1,300
Reduction in leased space due to completion of new buildings.....	-1,500
Reduction in payments in lieu of taxes.....	-44
Net increase.....	4,334

2. *Acquisition and disposal.*—This activity provides for (a) acquisition of real property by lease, purchase, exchange, or donation, and management of available building sites pending construction; (b) utilization of excess and disposal of surplus and national industrial reserve property; and (c) appraisal services, including the procurement of appraisals under contract.

3. *Design and construction.*—This activity provides for a small staff responsible for central direction of all programs involving design, construction, and remodeling of Federal buildings.

4. *Program planning.*—This activity provides centralized planning of real property programs including immediate and long-range building needs for housing Federal activities throughout the country.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$1,880 thousand; 1959 (adjusted), \$1,759 thousand; 1960, \$3,763 thousand; 1961, \$1,327 thousand; 1962, \$1,076 thousand.

"Operation and maintenance, Army".....		288	
"Revolving fund, Corps of Engineers—Civil".....		118	
Appropriation (adjusted).....	60,000	58,406	60,000

This appropriation provides for maintaining, repairing, remodeling, improving and other changes in public buildings under the jurisdiction of General Services Administration for these purposes, except extensions and conversions estimated to cost \$200 thousand or more. The budget for 1962 provides for continuation of the long-range program initiated in 1957, to alleviate deterioration and obsolescence of buildings which adversely affect efficient operations of tenant agencies.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1960, \$109 thousand; 1961, \$1 thousand; 1962, \$1 thousand.

1. *Maintenance repairs.*—Normal needs for day-to-day repairs and minor improvements and renovations to buildings and equipment are programed at a rate of about \$0.17 per net square foot. Less than 2.5% of the activity provides for minor capitalized items too small to be considered as renovation projects.

2. *Major repair, replacement, modernization, and renovation.*—Elimination of major obsolescence and deterioration of buildings is provided by bringing the properties up to modern standards of usefulness to improve working conditions and efficiency of occupying agencies. It is estimated that about 38% of this work will be for capital improvements.

3. *Air conditioning.*—Improvements in working conditions are provided for occupants of buildings located in areas of high temperature and humidity. Costs except for amounts required for design, supervision, program development and direction under this activity are considered to be capital improvements. Based on a study made

several years ago, it is estimated that almost half of the requirements will have been provided for by the end of 1962 in buildings located in zones where the combination of the effective temperature and humidity exceeds 80°, exclusive of postal space being modernized by the Post Office Department.

4. *Fallout shelters* are being included in existing Federal buildings to stimulate and encourage State and local governments and private enterprise to provide such facilities in their buildings. Except for a nominal sum for program development and supervision, all costs are considered to be capital improvements.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$33,270 thousand; 1959 (adjusted), \$32,857 thousand; 1960, \$19,773 thousand; 1961, \$19,920 thousand; 1962, \$17,813 thousand.

Unobligated balance carried forward.....			27,290	25,627					
New obligational authority (appropriation).....				165,441	181,325				

This appropriation provides for financing (a) construction of new public buildings and (b) extension and conversion of existing structures where individual project expenditures exceed \$200 thousand. Expenses for related site acquisition, design, and supervision are provided for under Sites and expenses, public buildings projects. Also authorized under this appropriation is the construction of certain projects for which funds were appropriated in the Independent Offices Appropriation Act of 1959, the purchase of privately owned buildings and sites thereof for continued Government use, prepayment of purchase contracts, and certain alterations to Government-owned buildings. Costs estimates for 1962 were adjusted downward to reflect recent favorable bid experience and other special considerations.

1. *Construction.*—The total \$878 million estimated for this activity includes \$826 million for projects previously approved pursuant to the Public Buildings Act of 1959, or other law, and \$52 million for additional projects expected to be approved during the current session of Congress. About half of the \$878 million is for projects which are being started through 1962; the \$419 million required to complete represents those projects which will be undertaken in future years. The appropriation for 1961 provides for construction starts on 20 buildings costing \$159 million, including 2 projects only partially funded.

The estimate for 1962 provides for construction starts on 16 additional buildings costing \$141.9 million and includes \$37.7 million to complete the 2 buildings partially

funded in 1961. Provision is made for construction of fallout shelters in certain buildings in accordance with the national shelter policy.

2. *Extension and conversion.*—Through major extension and conversion projects, existing buildings are brought up to standards and expanded to make them suitable for the current and future needs of the tenant agencies. Individual projects involving expenditures of more than \$200 thousand are financed under this appropriation, while those costing less are financed under Repair and improvement of public buildings.

The program for 1961 includes 5 projects costing \$13 million. The estimate for 1962 provides for 2 additional projects costing \$1.7 million.

3. *Acquisition of buildings.*—Where economically advantageous to the Government privately owned leased buildings necessary for continued occupancy by tenant agencies are purchased and purchase contracts are prepaid. During 1960, 11 privately owned buildings were purchased and purchase contracts on 9 buildings were prepaid, at a total cost of \$27.5 million.

While no specific acquisitions are contemplated at this time in 1961 and 1962, economic considerations may justify selected acquisitions.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$30,004 thousand; 1960, \$64,818 thousand; 1961, \$109,222 thousand; 1962, \$124,174 thousand.

New obligational authority (appropriation).....			25,000	21,000	5,000				

This appropriation provides for preliminary planning of public buildings projects and for acquisition of sites, preparation of drawings and specifications, supervision of construction, and related costs. Costs of improvements, with minor exceptions, are financed from Construction, public buildings projects.

The program for 1961 contemplates design starts, including acquisition of sites, where necessary, on 60 projects involving improvement costs of \$306.4 million, and review of drawings or supervision of construction on other projects for which funds were previously appropriated.

The estimate of \$5 million for 1962 provides for design starts and acquisition of sites, where necessary, for additional high priority projects to be proposed. Continued administration of other projects will be financed out of funds previously appropriated.

1. *Site acquisition.*—Acquisition of sites, including cost of appraisals.

2. *Design and supervision.*—Preparation of drawings and specification, by contract or otherwise; technical services; soil surveys and tests, reproduction of plans and specifications; and supervision of construction, by contract or otherwise.

4. *Program development.*—Preliminary development of projects, by contract or otherwise, and program direction, not distributed to specific projects. Costs for 1962 are entirely financed from prior appropriations under this head.

6. *Relation of cost to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$16,735 thousand; 1960, \$12,465 thousand; 1961, \$11,170 thousand; 1962, \$1,270 thousand.

¹Includes capital outlay as follows: 1960, \$924 thousand; 1961, \$1,737 thousand; 1962, \$1,994 thousand.

Purchase contracts were executed to construct and acquire 29 specific buildings costing \$52.9 million through lease-purchase arrangements under the Public Buildings Purchase Contract Act of 1954. Twenty-seven buildings have been completed, one will be completed during 1961, and the last one is scheduled for completion early in 1962. Nine of the completed buildings were acquired by outright

purchase from Construction, public building projects, pursuant to authority provided in Public Law 86-255 (73 Stat. 507). The estimate for 1962 provides for payments to contractors and taxing authorities on all 20 projects remaining under purchase contract.

This appropriation provides for construction and related supervision of a Federal Office Building on the west side of Lafayette Square in the District of Columbia.

Design was started in November 1958, suspended in April 1960 pending approval of necessary changes in scope, and was resumed in July 1960 after necessary congressional authorizations were obtained. Completion of design is scheduled for August 1961 and award of construction contract is expected in January 1962.

3. Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$919

thousand; 1960, \$798 thousand; 1961, \$175 thousand; 1962, \$20,175 thousand.

New obligational authority (appropriation).....									

Improvements of private hospital facilities in the District of Columbia are made under legislation authorizing appropriations of \$40,730 thousand of which \$37,730 thousand has been appropriated. The remaining \$3,000 thousand was authorized to aid in financing construction of a hospital in the southeast area of the District of Columbia.

1. *Construction.*—Under appropriations of \$23,410 thousand a new hospital center was physically completed and occupied during 1958. Equipment installation will be completed in 1961.

2. *Grants.*—Under appropriations of \$14,320 thousand grants totaling \$13,995 thousand have been approved for private agencies in the District of Columbia for improving existing hospital facilities on which building costs are estimated at \$34,800 thousand. Approximately \$7,100 thousand, representing 50% of the grants, is to be reimbursed by the District of Columbia over a period of years.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$4,223 thousand; 1960, \$1,733 thousand; 1961, \$578 thousand; 1962, \$208 thousand.

REAL PROPERTY ACTIVITIES—Continued

Permanent authorizations—Continued

EXPENSES, DISPOSAL OF SURPLUS REAL AND RELATED PERSONAL PROPERTY—Continued

(Indefinite special fund)—Continued

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees of appraisers, auctioneers, and brokers and costs of advertising and surveying are paid out of receipts, subject to a limit of 12% of the proceeds of all dispositions within each year (40 U.S.C.A. 485(b)). Also paid from such proceeds are direct expenses in connection with the utilization of excess real and related personal property (68 Stat. 1051). Sales by auctioneers amounted to \$13.2 million in 1960 and sales by both auctioneers and brokers are estimated at \$35 million in 1961 and \$40 million in 1962.

Gross receipts from all sources were \$59.5 million in 1960 and are estimated to be \$68 million in 1961 and \$77 million in 1962.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$346 thousand; 1959 (adjusted), \$296 thousand; 1960, \$1,172 thousand; 1961, \$972 thousand; 1962, \$472 thousand.

This fund finances, on a reimbursable basis, building management activities consisting of: Management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; recurring repairs to Government-owned space under jurisdiction of General Services Administration; operation of joint-use communication facilities; protection and maintenance of excess and surplus properties; and maintenance and repair of sites or improvements thereon reserved for future construction of Federal buildings, including operation of space occupied by commercial tenants; and other related building services (66 Stat. 594). Retained earnings resulting from operations, after making provision for prior year losses, if any, are paid into the Treasury as miscellaneous receipts.

Operating costs for 1962 are estimated at \$315.5 million, a net increase of \$12.1 million over 1961, due mainly to net additional space to be serviced.

1. *Buildings management—(a) Operation and protection of Government-owned space.*—Provides for operation and protection of 91.6 million average square feet of space in 1962 compared to 89 million square feet in 1961 and 83.1 million in 1960. The change from 1961 reflects net additional space to be serviced due to construction of new buildings and full year maintenance and operating costs for Kansas City Records Center, Kansas City, Mo., which was transferred to GSA in October of 1960.

(b) *Rental, operation, and protection of leased space.*—Provides for 38.2 million average square feet of space in 1962 compared to 37.4 million in 1961 and 36.1 million square feet in 1960, based on currently projected programs of Federal agencies.

(c) *Operation and protection of purchase contract space.*—Provides for 1.3 million average square feet in 1962 compared to 1 million in 1961 and 621,000 in 1960. The increase over 1961 provides for part-year operation and protection of the Federal building at Sacramento, Calif., to be completed in August of 1961 and full year costs of the Federal building, Omaha, Nebr., completed in September 1960.

2. *Moving and space alterations.*—Provides for minimum of moving and related alterations based on experience factors derived from buildings management operations.

3. *Temporary space and moving costs incident to new buildings.*—Provides rents, alterations, etc., incident to setting up temporary quarters for agencies that must be moved to make way for demolition due to construction and moving agencies into temporary space or completed buildings.

4. *Operation of communication facilities.*—Provides for management and operation of telecommunication services and facilities for use of Federal agencies.

5. *Protection and maintenance.*—Provides for protection and maintenance of excess and surplus properties.

6. *Maintenance repairs.*—Provides for day-to-day maintenance to GSA operated buildings, Public Health Service facilities and other Government buildings under jurisdiction of General Services Administration.

7. *Security guarding.*—Provides extra guarding service for other agencies where specifically authorized by law.

8. *Operation and maintenance of sites held for future construction.*—Provides for maintenance and repairs of sites or improvements thereon reserved for future construction of Federal buildings, and operation of space occupied by commercial tenants.

9. *Job order work.*—Provides for special services and improvements to buildings for General Services Administration and other agencies. Increases in 1961 and 1962 are primarily for work which will be performed for the Post Office Department in connection with its modernization program.

10. *Other.*—Provides for program supervision of repair and improvement operations as distinguished from architectural and design activities initially financed from the Construction services fund, and utility services furnished in the District of Columbia to buildings operated by other agencies.

14. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

CONSTRUCTION SERVICES, PUBLIC BUILDINGS

Construction service activities consisting of surveys and test borings performed in connection with the acquisition of Federal building sites; preparation of drawings and specifications for the construction or alteration of public buildings; supervision of construction and alteration activities; and other related services are financed by this fund on a reimbursable basis from funds appropriated,

transferred, or advanced to General Services Administration (40 U.S.C. 296).

Operations.—Initial financing of salaries and related expenses of all personnel engaged in architectural and engineering services in connection with buildings design and construction, both departmental and field, is provided. No increase is projected over the 1961 level.

Operating results.—Retained earnings will be reduced in 1961 to approximately \$100 thousand and maintained at that level.

This appropriation provides for establishment of efficient personal property management practices throughout the Federal Government.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1960, \$5 thousand; 1961, \$2 thousand; 1962, \$2 thousand.

1. *Utilization and sales.*—Usable excess personal property is screened against the needs of Federal agencies and transferred to such agencies to achieve maximum utilization and obviate new purchases. Excess property not utilized by the Federal Government becomes surplus, and is either donated for educational, public health, or civil defense purposes or released for public sale. In addition, personal property is rehabilitated to extend its useful life and reduce new procurement. The increase for 1962 provides for the rising volume of sales of surplus personal property, acceleration of the rehabilitation program, and for increasing transfers of excess personal property for further use within the Federal Government as follows (acquisition cost in millions of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Utilization transfers.....	141	218	305	350
Excess generated.....	6,900	6,700	8,000	8,000

This activity is financed from proceeds of sales of surplus personal property.

2. *Supply standards.*—Standards of quality and other characteristics of common-use commodities are established by specifications and qualified products lists for mandatory use by Government agencies. The increase for 1962 is for the accelerated item reduction (AIR) program, in cooperation with the Department of Defense. The objective is to achieve greater item commonality and reduce the number and variety of items stocked Government-wide, to produce lower administrative costs, expand areas of competition in procurement to produce lower unit costs,

PERSONAL PROPERTY ACTIVITIES—Con.

Current authorizations—Continued

OPERATING EXPENSES, FEDERAL SUPPLY SERVICE—Continued

and reduce investments in inventory. This will be accomplished by thorough technical reviews of item characteristics as related to user requirements and to commercial capabilities and practices. GSA will perform these functions for specific Federal supply classes, and the Department of Defense for other classes, on a Government-wide basis.

3. *Federal catalog participation.*—Uniform catalog identification for each item in civilian agency supply operations is provided and coordination maintained with the Department of Defense in development of a single Federal catalog system. GSA will have completed work on approximately 290,000 items by the end of 1961. The request provides for completing 54,200 additional items in 1962, leaving approximately 356,000 items to be identified. The increase for 1962 is for catalog work in connection with the accelerated item reduction (AIR) program, described above.

4. *Motor vehicle management.*—Government-wide policies and procedures are developed for improving economy and efficiency in the use of Government-operated motor equipment. Motor equipment managerial assistance is furnished to agencies. Interagency motor pools are operated at locations where studies indicate savings and greater efficiency will result.

5. *Supply management.*—Policies and procedures for improving supply operations in Government agencies are developed with due consideration for the potential of automatic data processing, and installation of supply system improvements are coordinated through the conduct of training programs and supply conferences, continuous onsite technical assistance, and by special surveys as required.

6. *Procurement policy.*—Policies and procedures are developed for achieving the maximum of uniformity and simplification of regulations relating to purchasing and contracting throughout the Government.

9. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$68 thousand; 1959 (adjusted), \$51 thousand; 1960, \$114 thousand; 1961, \$50 thousand; 1962, \$63 thousand.

¹ Includes capital outlay as follows: 1960, \$219 thousand; 1961, \$119 thousand; 1962, \$49 thousand.

This appropriation provides for expenses of operating the nationwide supply system through which common-use commodities are sold to Government agencies from stocks in supply depots, or by direct delivery from suppliers, whichever is more economical. Except for customer orders placed directly with contractors under Federal supply schedules, most of the purchases of commodities are financed initially from the General supply fund, subject to reimbursement by ordering agencies. Wherever economical and feasible, costs of commodities furnished directly from suppliers are paid directly from funds of the requisitioning agency without involving the General supply fund. Total procurement of supplies and services was

\$862.4 million in 1960 as compared with \$939.8 million programmed for 1961 and \$989 million estimated for 1962.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1960, \$50 thousand; 1961, \$49 thousand; 1962, \$48 thousand.

1. *Stores activities—Stores operations.*—Stocks of common-use commodities are received, warehoused, and sold at cost to Federal agencies through a nationwide system of supply depots. Stores sales reflect a continuous increase as follows: 1957, \$116.4 million; 1958, \$120.7 million; 1959, \$145.5 million; 1960, \$154.3 million; and 1961 and 1962 estimated at \$171.7 million and \$190 million, respectively.

2. *Buying operations.*—Commodities are procured in three ways: (a) Stores type items are procured to maintain inventories at stores depots to insure availability in advance of sales orders; (b) where advantageous, stores-type items and certain other items are procured for direct delivery to agencies and (c) Federal supply schedules (term contracts for common-use commodities and services) are established for large aggregate volume requirements against which agencies place individual orders for direct delivery at uniform price advantages. Total procurement in 1962 is estimated at \$989 million compared to \$939.8 million in 1961 and actual purchases of \$862.4 million in 1960.

3. *Inspection operations.*—Delivery of commodities of specified standards is assured by inspection at contractors' plants or supply depots, and by laboratory tests and analyses of samples prior to acceptance.

4. *Interagency supply coordination.*—This provides for planning the expansion of GSA supply operations for service to Federal agencies, particularly the military services, including the development of improved supply systems, and automatic data processing applications.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$659 thousand; 1959 (adjusted), \$569 thousand; 1960, \$366 thousand; 1961, \$277 thousand; 1962, \$331 thousand.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation, "Mutual security—economic," funds appropriated to the President.

Intragovernmental funds:

GENERAL SUPPLY FUND

To increase the general supply fund established by the Federal Property and Administrative Services Act of 1949, as amended (5 U.S.C. 630g), \$8,000,000.

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Related operating expenses are provided under the appropriation Expenses, supply distribution (5 U.S.C. 630g).

Also financed by the fund and reimbursed by the using agencies are operations of interagency motor equipment pools established in areas of high vehicle density.

Budget program.—The estimates provide for continued increases in sales to the military under the program for progressively expanding use of these supply facilities by Department of Defense, and a slight increase in sales to civilian agencies. Activations of additional interagency motor equipment pools in 1961 and 1962 are also reflected.

Supply distribution.—(a) *Stores items.*—Stocks of common-use commodities are purchased in volume and stored in supply depots for issue to Government agencies. Sales reached an all-time high of \$171.9 million in 1960 and are estimated to increase to \$202.7 million in 1961 and \$227 million in 1962.

(b) *Nonstores items.*—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to customer agencies. Sales through the fund are estimated to increase from \$97.8 million in 1960 to \$130 million in 1961 with a slight reduction to \$126.8 million in 1962 due to an anticipated decrease in household and quarters furniture sales.

Motor pools.—Services are supplied to agencies through a system of interagency motor pools, still under development, to serve areas of high vehicle density. Sales are estimated to increase from \$14.4 million in 1960 to \$17 million in 1961 and \$19 million in 1962 due to activation of additional motor pools. The number of pools in operation is estimated to increase from 56 in 1960 to 68 in 1961 and 75 in 1962.

Rehabilitation and repair of furniture and equipment.—Furniture and equipment repair services, provided through commercial sources wherever feasible and economical, are estimated to increase from \$1.2 million in 1960 to \$1.5 million in 1961 and \$2.2 million in 1962.

Equipment rental.—Operating equipment necessary to carry out the supply distribution activity is acquired and charged on an accrual basis to the using activities. Col-

PERSONAL PROPERTY ACTIVITIES—Con.

Intragovernmental funds—Continued

GENERAL SUPPLY FUND—Continued

lections from using activities are expected to remain relatively stable through 1962.

Export packing.—Stores and nonstores items are packed for shipment to overseas destinations. Receipts from this operation are expected to increase slightly from \$4.6 million in 1960 to \$5 million in 1961 and 1962.

Other revenue and expense.—Gain or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

Operating results and financial condition.—Investment of the U.S. Government at the end of 1962 is estimated at \$140.2 million, consisting of \$128.8 million in direct appropriations, \$9.7 million donated assets, \$0.6 million capitalized surplus, and retained earnings of \$1.1 million. The estimates reflect \$25 million to be requested in a supplemental appropriation in 1961 and \$8 million requested for appropriation in 1962, required for continued expansion in warehouse and motor pool sales, equipment investment, and improvement of service to customer agencies.

Additional donated assets arising from transfers of motor vehicles from other agencies upon establishment of interagency motor equipment pools will be capitalized in the fund.

Any operating surplus, as determined by General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Payments so made in 1961 were \$1,013 thousand and it is estimated that \$1,397 thousand will be returned in 1962.

ADMINISTRATIVE EXPENSES, FOREIGN AID PROCUREMENTS

This fund was established to account for expenses incurred rendering foreign aid procurement to the Inter-

national Cooperation Administration (22 U.S.C. 1782). Earnings credited to the fund are derived from mutually agreed upon advances based on program workload received. Beginning with 1961, provision was made to finance these expenses from appropriated funds.

Operations.—Program workload arose from purchase authorizations received from the International Cooperation Administration. Services are programed in 1961 and 1962 under the appropriations Expenses, supply distribution, and Operating expenses, Transportation and Public Utilities Service.

Operating results.—Net earnings have been retained to insure financing of operating costs notwithstanding fluctuations in operating revenue. The unobligated balance will be returned to International Cooperation Administration in 1961 after obligations are liquidated.

Appropriation (adjusted).....	9,404	13,502	14,159
Proposed transfer for pay increases from "Strategic and critical materials".....	-----	699	-----

This appropriation provides for basic operations of the General Services Administration which deal with management of the Government's archives and records, including custody and administration of permanent records in the National Archives and other noncurrent records in Federal records centers, assistance to records management programs of Government agencies, operation of presidential libraries, and filing and publication of Federal laws and regulations. The estimate for 1962 is \$102 thousand less than 1961 financing.

In 1962 records in custody of the National Archives and Federal records centers will total 8 million cubic feet, the equivalent of 1.3 million four-drawer filing cabinets. Reference services will total 5.3 million.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1960, \$19 thousand; 1961, \$13 thousand; 1962, \$14 thousand.

1. *Records management and centers.*—Records of Federal agencies which must be retained for a period of time, but are not needed for frequent reference, are brought into and administered in regional Federal records centers serving specified geographical areas. National centers at St. Louis administer records of veterans of the armed services and records of former civilian employees of the Government, and maintain a locator file for civilians currently employed. In addition to civilian agencies, records center facilities are now furnished to the entire Naval Establishment, the Army, and Air Force at the seat of government, and for selected Army and Air Force records throughout the world.

The workload in Federal records centers is shown in the following table:

	1960 actual	1961 estimate	1962 estimate
Regional centers:			
Records administered (millions of cubic feet).....	6.17	6.49	6.73
Unit cost per cubic foot of records administered.....	\$0.590	\$0.598	\$0.593
Reference services (millions).....	2.95	2.97	3.10
National personnel centers:			
Reference services (thousands).....	1,481	1,660	1,720
Interfiling documents (thousands).....	3,247	3,505	3,530

2. *Archives and related services.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States. Related services consist of (a) publication of the Federal Register and related compilations and the United States Statutes at Large, (b) preservation and servicing of historical materials in presidential libraries,

and (c) servicing the National Historical Publications Commission.

The increase in 1962 is to provide for additional workload in the Office of the Federal Register, and for full year operation of the Eisenhower Library.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$144 thousand; 1959 (adjusted), \$122 thousand; 1960, \$159 thousand; 1961, \$180 thousand; 1962, \$180 thousand.

¹ Includes capital outlay as follows: 1960, \$49 thousand; 1961, \$4 thousand.

This appropriation provides for improving management of transportation and public utility services in civilian agencies, protecting the Government's interests in cases before regulatory bodies, and furnishing services to civilian agencies in these specialized fields.

1. *Transportation services.*—Plans and procedures for improving transportation practices and operations in civilian agencies are developed; reasonable rates are nego-

tiated with carriers; interests of the Government as a user in proceedings before regulatory bodies are protected; and procurement assistance, rates, routing, and related services are supplied to executive agencies.

2. *Public utilities management.*—As a central management activity for civilian executive agencies, studies of equipment utilization, service, rates and economic factors are made and contracts negotiated. Negotiations are conducted with public utilities companies on behalf of executive agencies and technical assistance is rendered in connection with regulatory proceedings. Representation is also provided at rate proceedings involving communications common carriers relating to the semiautomatic ground environment system (SAGE) for early defense warning (50 U.S.C.A. 491).

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$52 thousand; 1959 (adjusted), \$49 thousand; 1960, \$15 thousand; 1961, \$15 thousand; 1962, \$15 thousand.

¹ Includes capital outlay as follows: 1960, \$77 thousand; 1961, \$60 thousand; 1962, \$60 thousand.

The Defense Materials Service acquires and administers national stockpile inventories pursuant to the Strategic and Critical Materials Stock Piling Act, and has custody of the supplemental stockpile established by the Agricultural Trade Development and Assistance Act of 1954. Programs are administered in accordance with guidelines established by the Office of Civil and Defense Mobilization. This Service also administers the inventory of machine tools and industrial manufacturing equipment established under the National Industrial Reserve Act of 1948. The Department of Defense makes selections for the reserve and provides program guidance.

The 1962 obligational program of \$40 million is to provide \$2.1 million for new material acquisition and upgrading of existing materials required to meet stockpiling

DEFENSE MATERIALS ACTIVITIES—Con.

Current authorizations—Continued

STRATEGIC AND CRITICAL MATERIALS—Continued

objectives, \$32.7 million for inventory management and rotation of material subject to deterioration, \$2.2 million for national industrial equipment reserve activities, and \$3 million operating expenses. Increases in the rotation and disposal programs are more than offset by reductions in operating expenses, upgrading, and national industrial equipment reserve programs, resulting in a net reduction of \$3 million in obligations in 1962 from 1961. The Strategic and critical materials appropriation became an annual account in 1961; therefore, no unobligated balance is available for 1962 requirements.

In arriving at requirements to meet stockpile objectives, all U.S. Government inventories of strategic materials in GSA custody are taken into account. Data below reflect in composite the extent to which national stockpile objectives as of June 30, 1960, are provided: (a) from financing under the Strategic and Critical Materials Stock Piling Act, and (b) under all U.S. Government programs involving strategic materials.

Basic objectives are valued at \$2,336.3 million and maximum objectives at \$4,659.4 million. June 30, 1960, prices have been used.

STATUS OF ACQUISITION—MATERIAL IN INVENTORY AND ON ORDER

[In millions of dollars]

	1960 actual		1961 estimate		1962 estimate	
	National stockpile	All Government programs	National stockpile	All Government programs	National stockpile	All Government programs
In inventory:						
Basic objectives.....	2,277.6	2,319.4	2,280.9	2,326.9	2,282.6	2,330.1
Maximum objectives.....	4,303.0	4,607.3	4,307.0	4,624.2	4,308.6	4,627.6
On order:

Maximum objectives.....	354.0	31.9	352.3	30.3	350.8	28.7

1. *Acquisition of materials*—(a) *New materials*.—Direct acquisitions for the national stockpile are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
New materials.....	1,622	1,824	1,754

Based on national stockpile objectives, and the proposed budget, status of acquisition of the 75 materials now on the national stockpile list is as follows:

NUMBER OF MATERIALS, 1960 ACTUAL

	National stockpile		All Government programs	
	Basic objectives	Maximum objectives	Basic objectives	Maximum objectives
Percent completed:				
100.....	62	49	69	62
90 to 99.....	1	6	2	5
75 to 89.....	2	5	2	2
50 to 74.....	4	6	1	5
25 to 49.....	5	7	1	1
Under 25.....	1	2	---	---
Total.....	75	75	75	75

NUMBER OF MATERIALS, 1962 ESTIMATE

	National stockpile		All Government programs	
	Basic objectives	Maximum objectives	Basic objectives	Maximum objectives
Percent completed:				
100.....	63	50	70	63
90 to 99.....	1	6	3	5
75 to 89.....	2	5	1	3
50 to 74.....	4	6	1	4
25 to 49.....	4	6	---	---
Under 25.....	1	2	---	---
Total.....	75	75	75	75

(b) *Upgrading materials*.—Stockpiled materials are upgraded to more usable forms in order to provide a minimum readiness inventory of materials in forms suitable for immediate use to meet the initial surge of demand and abnormal conditions of intensive mobilization.

2. *Inventory management*.—This covers cost of maintaining the stockpile of strategic materials in prime condition for use in case of emergency, including storage, special preservation, inventorying, rotation, and surplus disposal.

Acquisition cost of these inventories is as follows (in millions of dollars):

	1960 actual	1962 estimate
National stockpile.....	6,153.5	6,017.1
U.S. supplemental stockpile.....	754.2	1,094.2
Total national and supplemental.....	6,907.7	7,111.3

(a) *Rotation of materials*.—Perishable materials in the stockpile are rotated periodically to prevent deterioration and replaced with fresh materials to maintain the quality of the stockpile. Materials to be rotated in 1962 are castor oil, cordage fibers, feathers and down, shellac, and sperm oil. Rotation sales and costs are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Gross replacement costs of materials rotated.....	14,395	15,465	18,000
Rotation sales.....	69,376	12,244	14,758
Net cost (—) or income to Government.....	54,981	—3,221	—3,242

(b) *Storage of materials*.—Strategic materials were stored at 215 locations as of June 30, 1960, utilizing approximately 25 million square feet of closed storage; 57 million square feet of open storage; and 2 million barrels of tank storage. Total weight of materials in national and supplemental stockpiles approximated 33.7 million tons on June 30, 1960, and it is estimated that approximately 3 million tons a year will be added to the supplemental stockpile in 1961 and 1962. Distribution of storage costs is as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Recurring storage costs.....	10,091	10,296	10,337
Nonrecurring storage costs.....	2,535	2,136	2,119
Relocation transportation and handling....	110	252	236
Net cost.....	12,736	12,684	12,692
Reimbursable operations.....	1,323	-----	-----
Total cost or estimate.....	13,059	12,684	12,692

¹ Deposited to miscellaneous receipts of the Treasury in 1960.

(c) *Physical inventorying*.—The physical inventory was initiated in 1957, and substantially completed by June 30, 1960. Minor expenses to close out the program in 1961 are included under estimates for storage of materials.

(d) *Disposal of materials.*—This covers handling and transportation expenses incurred in connection with the disposal of materials no longer required for stockpile objectives. Disposals in 1961 and 1962, expected to cover more than 200,000 short tons each year, are planned for materials in excess of revised objectives such as rubber and cordage fibers; materials removed from the stockpiling list such as coconut and palm oils; and various lots of subspecification metals, minerals, ores and other materials. Costs previously have been included in storage, and such expenses for rotation of perishable materials without replacement are included in rotation for 1960.

3. *National industrial equipment reserve.*—The reserve of Government-owned machine tools and other industrial manufacturing equipment authorized by the National Industrial Reserve Act of 1948 consists entirely of items selected by the Secretary of Defense from lists of such property declared excess to the needs of the three military departments and other executive agencies.

Items in the national industrial equipment reserve are intended primarily for the expansion in an emergency of defense-supporting industries such as manufacturers of ball bearings, gears, tools and dies, and machine tools. Each of the military departments also maintains a reserve of production equipment for current and mobilization requirements of direct military contractors and producers specifically designated as mobilization suppliers.

The Department of Defense estimates that for 1961 and 1962 approximately 3,000 items will be selected annually for the NIER from excess declarations of production equipment. Budget estimate for 1962 is based on anticipated receipt of 2,500 items. Items received in 1960 totaled 2,349.

4. *Operating expenses.*—Covers all expenses at the central and regional office levels for administering programs financed under this appropriation head including the Defense Materials Service and the integrated staff offices of General Services Administration. Although the decrease in workload in 1962 from 1961 will be limited, an overall reduction of \$117 thousand is planned in 1962.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$43,918 thousand; 1959 (adjusted), \$28,141 thousand; 1960, \$14,065 thousand; 1961, \$8,587 thousand; 1962, \$2,907 thousand.

The Central American abaca production program authorized by 50 U.S.C. 541 has been administered by General Services Administration since July 1, 1954.

DEFENSE MATERIALS ACTIVITIES—Con.

Public enterprise funds—Continued

ABACA FIBER PROGRAM—Continued

The program was completed in 1960 and all assets sold. Cash and other assets on June 30, 1960, amounted to \$448 thousand. After payment of remaining liabilities, cash of \$389 thousand will be returned to Treasury in 1961.

Since inception of the program in 1942, fiber production, used primarily for war and defense requirements, totaled approximately 342.3 million pounds. Gross expenditures of \$90.5 million were offset by revenue of \$69.5 million leaving the Government's loss at \$21 million.

4. *Relation of costs to obligations.*—The relation of costs to obligations is derived from year-end balances of selected resources and applicable adjustment, as reflected in the following table (in thousands of dollars):

Guarantees are given on loans made by public or private financing institutions, including Federal Reserve banks, to facilitate performance of defense production contracts. Upon demand of lending institutions the Government is required to purchase the guaranteed percentage of the loan or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use, although such action has not been necessary to date. Net earnings are retained to meet possible future losses. (50 U.S.C. App. 2091.)

The Government's maximum contingent liability as guarantor on one loan now in effect is estimated to be \$14.9 million at the end of 1962, compared to \$33.6 million on three loans June 30, 1960. In addition, the Government has a commitment to guarantee \$21 million on a new loan and \$28 million under a refinancing agreement covering the loan now in effect. Retained earnings are estimated to be \$6.3 million at the end of 1962.

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Revenue Act of 1951. Of the 4,151 claims with payments estimated at some \$54 million all but 62 had been settled through June 30, 1960. It is hoped that most of the remaining claims will be settled by the end of 1962 which would require a supplemental appropriation in 1961 of \$1,600 thousand shown under Proposed for later transmission.

Federal Facilities Corporation was created June 30, 1954, under the provisions of the Rubber Act of 1948 and Executive Order 10539, primarily to administer operations of the Government-owned synthetic rubber facilities until disposal of the properties to private interests was completed. In addition, the Corporation was designated to conduct operations of the Government-owned tin smelter at Texas City, Tex.

Administration and jurisdiction of the Federal Facilities Corporation was transferred to the Administrator of General Services from the Secretary of the Treasury pursuant to Executive Order 10720, dated July 11, 1957. Assets transferred to General Services Administration represented a net investment of the Government of \$29,443 thousand.

Operating results.—During 1960, the Corporation paid into the Treasury \$1.6 million from liquidation proceeds. This and the transfer of the remaining alcohol butadiene plant to the Public Buildings Service for disposal, and other actions, reduced the equity of the Treasury to \$10.2 million. As of June 30, 1961, it is anticipated that the remaining functions of the Corporation will consist of administration of sales contracts.

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity and the remaining functions of the Smaller War Plants Corporation and the World War II assets program were transferred to the General Services Administration for final liquidation.

Operations.—It is anticipated that there will continue during 1962 the servicing of leases and conditional sales agreements covering 12 facilities, plus servicing of 42 other miscellaneous assets. Financial and legal servicing will also be required on 13 liabilities, plus approximately 80 cases in the hands of the Department of Justice under the complex food subsidy program.

Administrative expense requirements are estimated to continue at the 1961 level.

Operating results.—Proceeds from liquidation will be paid into miscellaneous receipts of the Treasury.

¹ Includes capital outlay as follows: 1960, \$273 thousand; 1961, \$88 thousand; 1962, \$40 thousand.

Financial, administrative, legal, legislative, and business services and field supervision required to support all General Services Administration programs are provided by the integrated staff organization of General Services Administration. They are initially financed from an administrative operations fund into which the various benefiting appropriations and funds make deposits for their share of the obligations incurred. Of the amount deposited in the fund during a fiscal year, the total amount from appropriations made available to General Services Administration in the annual act for the year is subject to a specific monetary limitation and amounts from each appropriation are limited to those included in the respective program appropriations for that purpose. Deposits from other sources are not covered in the limitation as the scope of programs and supporting workload are seldom precisely known in advance.

Estimated amounts available for 1962 from the various sources and comparable data for 1960 and 1961 are (in thousands of dollars):

	1960 comparable	1961 comparable	1962 estimate
Included in limitation:			
Operating expenses, Public Buildings Service	3,840	4,543	4,600
Repair and improvement of public buildings	900	1,021	1,032
Operating expenses, Federal Supply Service	826	1,083	1,220
Expenses, supply distribution	4,977	5,337	5,688
Operating expenses, National Archives and Records Service	574	675	675

WORKING CAPITAL FUND

To increase the capital of the Working capital fund established by the Act of May 3, 1945 (40 U.S.C. 293), \$150,000.

Central blueprinting, photostating, duplicating, and distribution services are financed by a working capital fund pending reimbursements (40 U.S.C. 293). The

Joint Committee on Printing, U.S. Congress, authorized the establishment of four field printing plants in addition to the plant in Washington, D.C., to meet the needs of the General Services Administration and other Federal agencies. An increase in appropriated working capital from \$50 thousand to \$200 thousand is necessary to initially finance required equipment.

Operating results.—Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1960, a total of \$63 thousand has been deposited, and it is estimated that \$7 thousand and \$10 thousand will be deposited in 1961 and 1962, respectively.

Under existing legislation, 1961.—It is anticipated that an additional \$1,600 thousand will be required during the latter part of 1961 or early in 1962 due to refund payments for Red Sea cases which evolved out of lend-lease shipments to Russia. These claims arose from recent court action and were not anticipated heretofore.

GENERAL PROVISIONS

The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff), and such appropriations or funds may be so transferred, with the approval of the Bureau of the Budget.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

[No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental

limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.】

Not to exceed 2 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be increased thereby more than 2 per centum: *Provided*, That such transfers shall apply only to operating expenses, and shall not exceed in the aggregate the amount of \$2,000,000.

Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for (a) reimbursement to

the General Services Administration for those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 479) or other applicable law, and (b) *transfer or reimbursement to applicable appropriations to said Administration for rents and related expenses, not otherwise provided for, of providing, directly or indirectly, such suitable general purpose space as may be required by any such department or agency, in the District of Columbia or elsewhere.*

【In disposing of surplus real estate and buildings a reasonable period of time shall be allowed for local governmental units to perfect a comprehensive and coordinated plan of use and procurement.】 (*Independent Offices Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.*)

Total, Housing and Home Finance Agency	813,959	1,119,477	947,631	309,065	544,249	727,914

The Housing and Home Finance Agency is responsible for the administration of the Federal Government's major housing and community development programs, including grants and loans for urban renewal and public housing, insurance of home mortgages and improvement loans, purchase of Government insured and guaranteed mortgages, loans for housing for the elderly, loans for public facilities, advances for the planning of public works, and grants for urban planning. These aids are often closely interrelated, as the following examples indicate:

(a) Urban renewal areas are cleared or rehabilitated through the aid of Federal grants and loans; often, the housing built or modernized in these areas is financed with mortgages insured by the Federal Housing Administration. In turn, the market for these mortgages is supported by purchases by the Federal National Mortgage Association under its special assistance program. In some instances, private financing for these mortgages may be secured through the efforts of the Voluntary Home Mortgage Credit Committee.

(b) Similarly, FHA and FNMA provide financing for a special program of housing for families displaced from urban renewal areas and by other governmental action. Displaced families with incomes too low to afford private housing may be relocated in public low rent housing assisted by Federal annual contributions.

(c) In suburban areas, a considerable proportion of the new housing constructed is financed through FHA insured mortgages, frequently with the assistance of the FNMA secondary market operations, while the planning and, in certain instances, the construction of public facilities in these areas may be financed by advances and loans from the HHFA.

(d) A workable program for community improvement, including local action toward a comprehensive and integrated

approach to the problem of urban development, is required of cities participating in the urban renewal and public housing programs; grants made for urban planning in metropolitan areas and in small cities help advance the same objective on a broader geographical basis.

(e) Housing for elderly families is provided through three programs including low-rent public housing under Federal annual contributions, direct loans at subsidy interest rates, and a special FHA mortgage insurance program which is supported by mortgage purchases under the FNMA special assistance functions.

New obligational authority of \$948 million is recommended for the Housing and Home Finance Agency for 1962 compared with an estimated \$1,119 million for 1961. The major factor in the decrease is a \$400 million reduction in new authority for college housing loans. The budget proposes termination of this program except for necessary transitional authority, and the enactment, instead, of a new broader program for college facilities aids to be administered by the Department of Health, Education, and Welfare. The proposed reduction in new authority for college housing loans is, however, partially offset by other recommended increases, chiefly \$285 million for the FNMA.

Net expenditures are expected to increase from \$544 million in 1961 to \$728 million in 1962. This increase reflects, in the main, rising expenditures under prior commitments of the various programs of the agency with long leadtimes between initial obligation or other obligation of funds and eventual disbursement. Expenditures for the agency are not closely related to new obligational authority as a result of these long leadtimes and the effect of repayment of loans or other receipts from assets acquired in earlier years.

OFFICE OF THE ADMINISTRATOR

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Office of the Administrator, including [rent in the District of Columbia;] services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and purchase of two passenger motor vehicles for replacement only; **[\$10,327,000] \$12,400,000**: *Provided*, That necessary expenses of inspections and of providing representatives at the site of projects being planned or undertaken by local public agencies pursuant to title I of the Housing Act of 1949, as amended, projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, as amended, and projects and facilities financed by loans to public agencies pursuant to title II of the Housing Amendments of 1955, as amended, shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions, or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made, but such nonadministrative expenses shall not exceed **[\$2,900,000] \$3,000,000**. (5 U.S.C. 133y-16; 42 U.S.C. 1451; 12 U.S.C. 1749; *Independent Offices Appropriation Act, 1961; authorizing legislation to be proposed for \$140,000 of the above-proposed appropriation for 1962.*)

In addition to general supervision, the Administrator of the Agency is responsible for several activities administered by constituents of the Agency under delegation of authority. These include: Urban renewal and urban planning assistance, which have been delegated to the Urban Renewal Commissioner; and the programs of public works planning, college housing loans, public facility loans,

and certain liquidating activities, which have been delegated to the Community Facilities Commissioner. The Administrator serves as Chairman of the Board of Directors of the Federal National Mortgage Association. He also serves as Chairman of the National Voluntary Mortgage Credit Extension Committee and provides staff assistance to the national committee and regional committees through which the voluntary home mortgage credit program operates.

The appropriation requested for 1962, \$12,400 thousand, is an increase of \$1,385 thousand over the amount estimated to be available for 1961. The increase reflects primarily the need for increased field staff to carry out the growing urban renewal program.

2. *Consolidated compliance activities.*—A consolidated investigation and compliance staff serves the entire Agency.

3. *Voluntary home mortgage credit.*—Staff assistance is provided to the national and regional committees engaged in a program to facilitate the flow of funds for Federal Housing Administration insured and Veterans Administration guaranteed home mortgage loans into areas of shortage and for minority housing financing. The legislative authorization for this program would expire October 1, 1961, under present legislation; this budget assumes that the program will be extended and makes provision for staff expenses in connection with the extended authorization.

4. *Housing for the elderly.*—For detail of this activity, see public enterprise funds.

5. *Community disposition activities.*—For detail of this activity, see Community disposal operations fund under public enterprise funds.

6. *Community facilities programs.*—(a), (b), (c), and (d). For detail of these activities, see public enterprise funds.

(e). *School construction.*—The Administrator, under a working agreement with the Commissioner of Education, performs certain technical services in connection with the program of school construction. Funds appropriated to the Office of Education are transferred to the Administrator for this purpose.

(f). *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of college housing and public facility projects. The costs of these activities are recovered by the Government through fees.

7. (a) *Urban renewal activities.*—For detail of activities for this program see Urban renewal fund under public enterprise funds.

(b) *Project inspection and audit.*—The cost of site representation and inspection and financial audit of slum clearance and urban renewal projects being planned or undertaken by local public agencies is recovered by the Government through fees.

9. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$15 thousand; 1959 (adjusted), \$116 thousand; 1960, \$120 thousand; 1961, \$120 thousand; 1962, \$120 thousand.

New obligational authority (appropriation)	3,375	4,000	10,000

Section 701 of the Housing Act of 1954, as amended by the Housing Act of 1959, authorizes \$20 million in matching grants to State, metropolitan, or regional planning agencies to help finance surveys, land-use studies, and urban renewal plans in small cities and metropolitan or regional areas. An aggregate of \$16.4 million has been appropriated to date. The budget program, which calls for an appropriation of \$10 million in 1962, assumes legislation to increase the authorization for appropriation.

The Housing Act of 1956 provided \$2,500 thousand in contract authorization for a program of housing studies with emphasis on problems of housing need, demand, and supply. No activity is proposed in this budget.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation, as follows:
 "Assistance for school construction," Office of Education.
 "Civil defense and defense mobilization functions of Federal agencies," Office of Civil and Defense Mobilization.
 "Mutual security—economic," funds appropriated to the President.

Note.—Expenditures from the following funds for 1961 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1961. For 1962 this paragraph is shown in the independent offices chapter, p. 156, following Federal Deposit Insurance Corporation.

Public enterprise funds:

COLLEGE HOUSING

COLLEGE HOUSING LOANS

For loans pursuant to title IV of the Housing Act of 1950, as amended, to be borrowed from the Secretary of the Treasury, as provided in section 401(d) of said Act, \$100,000,000, to remain available until expended. (Authorizing legislation to be proposed for 1962.)

Unreserved.....	-16,060	-87,238	-2,970
Financing applied to program.....	187,704	382,185	419,718

Title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749), provides for direct long-term loans at low interest rates to assist institutions of higher education in the development of housing and related facilities for students and faculty, and to hospitals for housing facilities for nurses and interns. The program is funded by a Treasury borrowing authorization of \$1,675 million including \$500 million provided in the current year by Public Law 86-788 approved September 14, 1960. Interest rates are set by statute at the higher of 2.75% or 0.25% above the average rate on the total outstanding debt. The current rate is 3.5%.

Budget program.—During the current year new loan reservations will use all but an estimated \$100 million of the borrowing authorization. For the budget year legislation is being proposed to increase the borrowing

authority; recommended appropriation language for an additional \$100 million appears above. The budget program of \$200 million in new fund reservations in 1962 will exhaust both the new authority and the unused authority brought forward in 1961. This program is intended to be a transition to a proposed new and broader program of Federal assistance for university facilities of all types through loans and grants, to be administered by the Department of Health, Education, and Welfare.

Fund reservations are made on approval of applications filed to determine eligibility and feasibility of the project. Reservations are converted into loan contracts after detailed planning, filing of a full loan application, and agency review. Principal workload stages are set forth in the following table:

	1960 actual	1961 estimate	1962 estimate
Preliminary applications:			
Received.....	337	350	300
Withdrawn or rejected.....	12	20	11
Reservations issued.....	131	345	174
Full applications:			
Withdrawn or rejected.....	17	20	17
Loans approved.....	202	275	300
Reservations outstanding, and full applications on hand, close of year.....	284	264	342

After execution of the contracts, the institutions proceed with final plans and specifications, award of construction contracts and preparation of bond indentures.

Financing.—Bond purchases are estimated at \$215 million for the budget year and \$183 million for the current year. Purchase of bonds occurs when construction is well advanced. Disbursements are based on the following projected construction schedule:

	1960 actual	1961 estimate	1962 estimate
Construction starts.....	194	188	256
Substantial completions.....	225	211	207

Budgetary expenditures total \$172 million and \$200 million for 1961 and 1962 respectively, including the bond purchases, repayments of loans and net operating receipts.

Operating results and financial condition.—Net earnings of \$197 thousand are estimated for the budget year. Cumulative deficit is estimated to be further reduced in subsequent years.

The Housing Amendments of 1955 (65 Stat. 635, 642) and amendments thereto provide for a program of loans to assist State and local governments and their agencies to finance construction of specific public works. Initially funded by a Treasury borrowing authorization of \$100 million, an increase of \$50 million was authorized subsequently. The basic legislation extends priority to small municipalities and to water, sewage, and gas-distribution systems unable to market their obligations in the private market at reasonable rates. Assistance is also provided to communities of all sizes in labor surplus areas. The loans may run for as long as 40 years and are secured by tax-exempt revenue or general obligation bonds. Interest rates are adjusted from time to time to meet changes in the market interest rates on tax-exempt

securities. Initially established at 3.75% for general obligation bonds and 4.25% for revenue issues, present interest rates for 30-year maturities are 4.375% and 4.625% respectively.

Budget program.—In the current and budget years, loan commitments increase from \$16 million to \$25 and \$27 million, respectively. The following table shows the number of cases involved in principal workload stages:

	1960 actual	1961 estimate	1962 estimate
Applications received.....	103	125	140
Processing:			
Cases disapproved or withdrawn.....	42	42	40
Gross approvals.....	66	84	92
Attrition after approval.....	8	5	5
Net approvals.....	58	79	87

Financing.—The program is financed by a Treasury borrowing authorization of \$150 million. At the end of the budget year it is estimated that the Treasury will hold notes totaling \$91 million.

Operating results.—Cumulative deficit at the end of 1962 totals \$2.9 million, of which \$1 million represents an increase in allowance for losses for the years 1961 and 1962 at the rate of 2% on loans disbursed. Loans disbursed are estimated at \$19.5 and \$26 million in the current and budget years.

A program of interest-free advances to State and local public agencies for the planning of local public works was authorized by the Housing Act of 1954 (12 U.S.C. 1703; 40 U.S.C. 462) and revisions were made by the Housing Act of 1955 (12 U.S.C. 1462 note, 1464).

Budget program.—Program policies are aimed at achieving a reserve of planned public works reasonably assured of construction with consequent repayment of advances to the Federal Government. To reduce obsolescence of plans, the Agency requires assurance from the applicant that construction start is intended within 5 years. Actual and estimated program activity is shown in the following tabulation:

	1960 actual	1961 estimate	1962 estimate
Applications received.....	542	585	600
Processing:			
Cases disapproved or withdrawn.....	189	110	110
Gross approvals.....	467	496	516
Net approvals.....	379	429	439
Projects started and advances repaid.....	164	175	195

Financing.—The program is financed by an authorized revolving fund of \$48 million of which \$36 million has been appropriated through 1961. Cumulative repayments through 1960 amounted to \$6.9 million. Repayments are estimated at \$4 million in 1961 and \$4.5 million in 1962. Estimated approvals in the budget year amount to \$10 million requiring an appropriation of \$4 million.

Operating results.—The increase in the deficit of \$1.1 million for 1961 and the budget year chiefly represents a reserve for losses equal to 5% of advances disbursed to provide for projects which will not be started after the completion of planning. Budget expenditures are estimated at \$5.4 million for the budget year.

The Independent Offices Appropriation Act, 1955, established a single revolving fund for the more efficient liquidation of a number of Housing and Home Finance Agency programs as well as any other programs that may be transferred by legislation.

Budget program.—In accordance with provisions of the Housing Act of 1959 (73 Stat. 670) \$147 million of mortgages accepted by the revolving fund in financing of real property sales were sold to the Federal National Mortgage Association during 1960. The investment remaining to be liquidated at June 30, 1960, totaled \$123 million, chiefly represented by a payment of \$90 million due the fund from FNMA and a portfolio of some \$29 million of loans, advances, and installment sales contracts. The budget program centers on the accounting, servicing, collection, and related activities for this portfolio.

Financing.—In the budget year net budgetary receipts decline to \$1.5 million reflecting the decline in the remaining principal assets of the fund to be liquidated. The Government's original investment in the consolidated liquidating program totaled almost \$2.5 billion. By the close of 1962 there will remain on hand about \$32.9 million in net assets after allowance for outstanding liabilities. Cumulative repayments to Treasury will total \$887 million with a payment of \$3 million in 1962. The following schedule shows the Government's investment at the close of each year (in thousands of dollars):

URBAN RENEWAL

The Housing Act of 1949, as amended, authorizes Federal assistance to local governments for acquisition, clearance, and redevelopment of slums and blighted areas, and for conservation and rehabilitation of areas not requiring clearance action. Under current law, Federal grants defray two-thirds of net project costs. Contract authority totaling \$2 billion has been authorized through 1961. For 1962 it is proposed that an additional \$300 million in new obligational authority be made available, on an appropriation rather than a contract authority basis. Recommended appropriation language, based on proposed legislation, is set forth below. Temporary project financing and long-term financing of land disposed of under lease agreements through direct or guaranteed loans is provided under Treasury borrowing authorization of \$1 billion.

As a condition precedent to Federal assistance, a community is required to develop a program for community improvement to eliminate blight and achieve a stable, well-planned community with well-organized neighborhoods. The Administrator's certification of this program is made for 1 year, and annual recertification based on demonstrated satisfactory progress is required for continued eligibility for Federal assistance. The budget program projects the following activity:

	1960 actual	1961 estimate	1962 estimate
Original certifications.....	203	190	120
Recertifications.....	410	600	700

Since grants are nearly a complete measure of Government program costs, the program and financing schedule for grants and an outline of associated activities is presented first. This is followed by a similar schedule and discussion of the loan assistance portion of the program and combined financial statements for the entire program.

[GRANTS FOR SLUM CLEARANCE AND] URBAN RENEWAL FUND
(LIQUIDATION OF CONTRACT AUTHORIZATION)

For an additional amount for payment of grants as authorized by title I of the Housing Act of 1949, as amended (42 U.S.C. 1453, 1456), **[\$150,000,000] \$200,000,000.** (*Independent Offices Appropriation Act, 1961.*)

(GRANTS)

To enable the Administrator to enter into additional contracts for grants pursuant to title I of the Housing Act of 1949, as amended, \$300,000,000. (Authorizing legislation to be proposed for 1962.)

Appropriation to liquidate contract authorization.....	107,500	150,000	200,000

Budget program.—Administrative action is taken to earmark contract authority for grants at the time approval is given for planning a project, or for a more general neighborhood planning program presaging a specific project application. This is done to assure availability of grant assistance after a considerable period of time and after substantial community investment required for the urban renewal undertaking. Planning is, in the typical case, limited to 18 months. The following table reflects the number of projects in the planning stages:

	1960 actual	1961 estimate	1962 estimate
Planning approved.....	182	195	170
Planning terminated.....	35	29	25
Planning completed.....	85	184	180
Planning in process, end of year.....	328	310	275

The execution phase occurs usually over a period of several years, during which Federal grant progress payments are made as substantial action is completed both with respect to the project itself and the provision of the local share of project cost. These progress payments permit the retirement of temporary project financing, thus achieving savings in project costs. The budget recom-

mends appropriation of \$200 million for the payment in 1962 of grants under prior contracts, as compared with \$150 million appropriated for this purpose for the current year.

	1960 actual	1961 estimate	1962 estimate
Projects approved for loan and grant.....	89	176	190
Projects completed.....	12	30	60
Projects active, end of year.....	431	577	707

Federal grants are made to communities for renewal projects and for special demonstration projects reporting on improved methods for dealing with the problems of urban blight. Community renewal programs were authorized by the Housing Act of 1959 for the identification of eligible areas, the extent of need and resources available for appropriate action, and the scheduling of local renewal activities. These programs are also financed from grants. Federal grants defray full costs of relocating displaced families and businesses from urban renewal areas up to a maximum of \$200 per family, or \$3,000 per business establishment, and for restoration of loan fund losses from advances and accrued interest on terminated projects. The distribution of actual and estimated grant payments is shown in the schedule of Sources and application of funds.

URBAN RENEWAL—Continued

URBAN RENEWAL FUND (LOANS AND PLANNING ADVANCES)—CON.

Budget program.—The Treasury borrowing authority provides loan assistance in financing the planning and execution of urban renewal projects by the following types of commitments:

1. *Planning advances.*—The financing of planning costs directly associated with the project are repayable, with interest, from project funds.

2. *Temporary loans.*—Initial financing needs under the contract are generally met through direct short-term Federal loans. Thereafter the redevelopment agency generally relies upon private borrowings secured by pledge of the Federal loan commitment. Temporary loans are repaid from the proceeds of land sales and from local and Federal cash grants.

3. *Definitive loans.*—Commitments are issued to secure private financing for the net value of redeveloped land which is leased rather than sold. No commitments for these loans were made in 1960, and none are estimated for 1961 or 1962.

The loan commitments cover total expenditures by the local public agency in carrying out the project. However, experience demonstrates that only a minor portion of the Federal loan commitment is outstanding at any one time as a direct Federal loan, since project expenditures take place over several years and early borrowings are retired progressively from local and Federal grants and from the sale of land in portions of the project prepared for reuse. In addition, private financing obtained with a pledge of the Federal loan commitment as security is relied upon as the major source of funds for temporary loans and for all definitive loans. The following table shows the status of total Federal loan commitments at the end of each of the years covered by this budget (in thousands of dollars).

	1960 actual	1961 estimate	1962 estimate
Total Federal loans and loan commitments at end of year.....	1,258,464	1,585,500	1,952,000
Federal loans and advances outstanding.....	73,407	76,400	78,400
Guaranteed non-Federal loans outstanding.....	480,264	678,000	923,000
Unutilized.....	704,793	831,100	950,600

Technical amendments to section 102(c) of the Housing Act of 1949 were enacted in 1959, redefining obligations against the Treasury borrowing authorization. As a result, Federal loan commitments of \$494 million in 1962 are reflected in the schedule above at the maximum probable Federal exposure of \$191 million.

Financing.—Borrowing authority previously committed is restored through transactions of the following four types: (a) Repayment of planning advances; (b) repayment of temporary loans from project settlement funds, which include proceeds from the sale of land, Federal grants, and local grants; (c) cancellation of temporary loan commitments by waivers permitting the use of project settlement funds as a substitute for additional loans; and (d) retirement of commitments as a result of the repayment of guaranteed non-Federal loans from project settlement funds.

The full amount of repayments of planning advances is included in the program and financing schedule for all

3 years. Under Public Law 86-372, the repayment, cancellation and retirement of temporary loans represent restoration of amounts available for obligations of only 25% of gross recoveries, because this percentage was used in estimating the Federal exposure. Repayments of Federal temporary loans from the proceeds of non-Federal guaranteed loans are not reflected on the program and financing statement since the reduction in Federal loan balances is offset by an increase in undisbursed commitments. Such repayments are shown in the statement of Sources and application of funds.

Operating results.—The small margin of interest earnings has been inadequate to balance actual losses on the unsecured planning advances for terminated projects and the continually accruing interest on Treasury borrowings used to finance the advances. This impairment of capital is being corrected, as authorized by the Housing Act of 1959, by use of the grant appropriation to repay the Treasury borrowing associated with these terminated projects.

As the analysis below indicates, the deficit resulting from capital grant payments and from uncollectible planning advances for terminated projects has been offset by appropriations made for the purpose (in thousands of dollars).

The sales and financing of Government-owned residential and commercial properties at the Atomic Energy Commission installations of Oak Ridge, Tenn., and Richland, Wash., as authorized by the Atomic Energy Community Act of 1955 (69 Stat. 471) are administered by the Housing and Home Finance Agency.

Budget program.—It is estimated that the remaining inventory of some 621 parcels of apartments, commercial buildings, and vacant land will be disposed of by the end of 1961. During the budget year purchase money mortgages, accepted in financing property sales, totaling \$6.8 million will be serviced and disposed of in orderly fashion. Sales proceeds, after statutory allowances for priority purchasers, derived from property disposition through June 30, 1960, amounted to \$61 million as follows:

	Number	Amount (in millions)
Cash.....		\$29.3
Purchase money mortgages.....	5,467	31.1
Purchase contracts.....	176	.7
Total.....	5,643	61.1

Operating results.—With the residual real property inventory estimated to be disposed of in 1961 and the remaining mortgage portfolio to be disposed of in the budget year, cumulative net earnings at the close of 1962 are estimated at \$0.8 million. Total repayment of Government investment will amount to \$62 million with a payment of \$7 million in 1962. The following table shows the cumulative results of the program at the close of the 3 years covered by this budget (in thousands of dollars):

The Independent Offices Appropriation Act, 1961 (73 Stat. 667), provided an appropriation of \$20 million constituting a revolving fund to initiate a limited program of direct loans for housing for the elderly as authorized under section 202 of the Housing Act of 1959. Appropriations of \$50 million are authorized by that act. Loans are to be made only to private nonprofit corporate sponsors of rental housing and related facilities for elderly families and persons. The housing and related facilities may be provided through new construction or through the acquisition and rehabilitation or conversion of existing structures. Loans may be made for not more than 98% of the total development cost and must be repaid over a period not exceeding 50 years. Loans bear interest at a rate set by statutory formula each year; for 1961 the rate is 3½%. Disbursement of Federal funds will be made at completion of construction.

Budget program.—It is estimated that almost all of the initial \$20 million will be obligated during 1961. Anticipated workload is as follows (dollars in millions):

	1961 estimate	1962 estimate
Preliminary applications.....	400	---
Full applications.....	165	---
Loan commitments, number.....	49	---
Loan commitments, amount.....	\$19.4	---
Construction:		
Starts.....	20	29
Completions.....	2	33

Financing.—The program is financed by a revolving fund to which \$20 million has been appropriated. It is estimated that construction on two projects will be completed by the end of 1961 and \$800 thousand will be disbursed from the fund. During the budget year an estimated 33 projects will be completed for a total of \$13.2 million.

Operating results.—The deficit at the end of the current and the budget years represents administrative costs of operating the program and a provision for losses equal to one-half of 1% of loans disbursed. Budgetary expenditures for the 2 years are \$1 million and \$13.5 million, respectively.

INVESTMENT IN FLOOD INDEMNITY OPERATIONS—Continued

The Administrator is authorized to borrow up to \$500 million, plus such additional amounts as the President shall approve, from the Secretary of the Treasury in the furtherance of the programs enacted in the Federal Flood Insurance Act of 1956. No borrowings have been made nor are any proposed.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Association, operating under the Federal National Mortgage Association Charter Act (12 U.S.C. 1716, et. seq.) purchases, manages, and sells residential mortgages that are insured by the Federal Housing Administration or guaranteed by the Veterans Administration; it also manages and sells certain noninsured or nonguaranteed mortgages that have been or may be acquired from authorized sources. Under amendments made to the original enactment by the Housing Act of 1954, the Association's functions are carried out through three programs for which separate accountability is required by statute. These programs—secondary market operations, special assistance functions, and management and liquidating functions—are described in the following sections.

Note.—Expenditures from the following funds for 1961 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1961. For 1962 this paragraph is shown in the independent offices chapter, p. 156, following Federal Deposit Insurance Corporation.

Public enterprise funds:

SECONDARY MARKET OPERATIONS

PAYMENT FOR PREFERRED STOCK OF FEDERAL NATIONAL MORTGAGE ASSOCIATION

For payment for preferred stock of the Federal National Mortgage Association, issued and delivered to the Secretary of the Treasury pursuant to section 303(d) of the National Housing Act, as amended, \$35,000,000, to remain available until expended. (Authorizing legislation to be proposed for 1962.)

The secondary market operations of the Federal National Mortgage Association were authorized by the Housing Act of 1954 to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home mortgage financing. This assistance to the secondary market for home mortgages is provided by the purchase and sale of mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration on or after August 2, 1954, that are of such quality, type, and class as meet generally the purchase standards imposed by private institutional mortgage investors. Purchases and sales may be made only at such prices and on such terms as will reasonably prevent excessive use of the Association's facilities and permit the Association to operate on a fully self-supporting basis.

The authorizing statute contemplates that the secondary market operations will ultimately be completely owned and financed by private participants. Accordingly, these operations are treated in the budget as a trust enterprise and the financial statements relating thereto appear in part III of this document (pp. 946-947).

The secondary market operations were initially capitalized by the issuance of \$92.8 million of Federal National Mortgage Association preferred stock to the Secretary of the Treasury. Subsequently, increased preferred stock subscriptions by the Secretary of the Treasury, amounting to \$50 million (Public Law 85-10, approved Mar. 27, 1957) and \$65 million (Public Law 85-104, approved July 12, 1957) were authorized. Authorized preferred stock has actually been subscribed only as needed to support the Association's borrowing. At the end of 1960, authorized unissued stock amounted to \$65 million. These estimates contemplate the subscription of an additional \$28 million in preferred stock in 1961 and \$40 million in 1962. Additional legislative authorization and appropriations of \$35 million in 1962 are proposed to effect the increased subscriptions and to provide the additional capital required to finance in 1963 mortgage purchases under undisbursed commitments estimated to be outstanding at the end of 1962.

The preferred stock will be retired as rapidly as feasible and, in the meantime, the Association will pay dividends on it to the Treasury at rates determined by the Secretary of the Treasury. Private capitalization for these operations is accumulated pursuant to a statutory requirement which provides that sellers of mortgages to the Association must subscribe to common stock in an amount equal to not more than 2% nor less than 1% of the unpaid principal amounts of the mortgages involved, as determined from time to time by the Association, taking into consideration conditions in the mortgage market and the general economy.

Recommendations for legislation to transfer ownership of the Association to private owners of capital stock must be submitted to the Congress as promptly as practicable

after all the Treasury-held preferred stock has been retired.

The Association is authorized to finance its secondary market operations through borrowing from the public on the security of nonguaranteed debentures. Such obligations may not exceed the lesser of: (a) 10 times the sum of the capital and surplus applicable to these operations, or (b) the sum of assets free from any liens or incumbrances, represented by cash, mortgages, obligations of the United States or guaranteed thereby, or obligations which are lawful investments for fiduciary, trust, or public funds. The Secretary of the Treasury, so long as the preferred stock is outstanding, is authorized to purchase such debentures in an amount not exceeding \$2.25 billion outstanding at any one time.

Budget program.—The secondary market operations established in 1955, are now fully recognized by the home mortgage market and have reached significant levels. Because of the limited supply of funds which are estimated to be available for long-term investment and anticipated continuation of relatively high interest rates, mortgage purchases are estimated at a larger volume in 1962 than in 1961. For the same reason, only a limited volume of mortgages is estimated to be sold during the same period.

The following table sets forth the principal activities estimated for the secondary market operations (in millions of dollars).

	1960 actual	1961 estimate	1962 estimate
Mortgage purchases (net of discount).....	1,056.1	730.6	976.5
Mortgage sales (net of discount).....	5.0	96.3	48.0
Repayments and other credits.....	67.5	95.8	124.8
Balance in portfolio at end of year.....	2,494.9	3,033.5	3,837.2

The prices at which mortgages are purchased under these operations are established by the Association within the range of market prices for the particular class of mortgages involved. In establishing its purchase prices, the Association follows the policies and practices of private institutions and varies such prices by geographic location, interest rate of the loan, and the ratio of the purchaser's equity to the value or cost of the subject property. The budget assumes that mortgages will be purchased during 1961 and 1962 at average discounts of 2.6 and 2.3 points, respectively, below their face value and that sales will be made at average prices of 0.9 and 0.5 point, respectively, above the purchase price.

Financing.—Substantial interim Treasury borrowings will be necessary during 1961 and 1962, but the proceeds of borrowings from the public through the sale of debentures and short term discount notes are expected to provide the funds necessary to repay Treasury borrowings in the year in which made. Additional financing will be obtained from the sale of mortgages to the investing public, from subscriptions of common stock by program participants, from repayments and prepayments of mortgage principal and from earnings. No retirements of preferred stock are estimated for the period covered in this budget.

The amounts of the principal financing balances outstanding at year end are summarized in the following table (in millions of dollars):

	1960 actual	1961 estimate	1962 estimate
Private financing:			
Nonguaranteed obligations.....	2,284.5	2,761.3	3,481.3
Common stock subscribed.....	65.5	81.0	101.4
Treasury financing:			
Borrowing from Treasury.....	---	---	---
Preferred stock.....	142.8	170.8	210.8

Operating results.—Operations are reflected in budget expenditures only to the extent of Treasury financing.

Federal National Mortgage Association is authorized to provide special assistance to the extent that the President has determined that it is in the public interest for the financing of (1) selected types of home mortgages (pending establishment of their marketability) originated under special housing programs designed to provide housing of acceptable standards at full economic cost for segments of the national population which are unable to obtain adequate housing under established home-financing programs, and (2) home mortgages generally as a means of retarding or stopping a decline in mortgage lending and home building which threatens materially the stability of high-level national economy. The Association is authorized, for these purposes, to make commitments to purchase and to purchase mortgages up to \$950 million outstanding at any one time. Additional authorization in the amount of \$250 million is requested for 1962. Proposed appropriation language, subject to the enactment of authorizing legislation, is included above.

In addition to the special programs the Association may undertake pursuant to specific direction of the President, the Association is also authorized to enter into commitments to purchase and to purchase mortgages on cooperative housing insured under section 213 of the National Housing Act, as amended, up to a limit of \$225 million outstanding at any one time; to make commitments to purchase and to purchase mortgages on armed services family housing insured under title VIII of that act, up to a limit of \$500 million outstanding at any one time and, within a limitation of \$1 billion outstanding at any one time, to make commitments to purchase and to purchase Federal Housing Administration-insured and Veterans Administration-guaranteed mortgages of \$13,500 or less covering low and moderate priced housing on which construction had not commenced at the time application was made for Federal National Mortgage Association's commitment.

The prices paid for mortgages under these functions are established by the Association at the time of the announcement of each individual program, but may be adjusted thereafter from time to time.

Federal National Mortgage Association special assistance functions are financed principally by Treasury

borrowings, and all benefits and burdens of the program inure solely to the Secretary of the Treasury.

Budget program.—During 1961 and 1962, Federal National Mortgage Association will provide special assistance, under presidential determination, in respect to (1) housing in or supporting urban renewal areas; (2) housing for the elderly; (3) housing in Alaska and Guam, and (4) disaster housing. In addition, cooperative and armed services housing will receive limited assistance under the special authority cited above.

Mortgage purchase commitments under the special assistance functions are estimated to increase from \$299 million in 1960, to \$318 million in 1961, and to \$365 million in 1962. The principal factors in these changes occur in the support furnished housing in urban renewal areas and in housing for the elderly.

Commitments for mortgages on housing in urban renewal areas and for the relocation of displaced families are estimated to increase from \$169.6 million in 1960 to \$220 million in 1961 and to \$277 million in 1962. This increase is due chiefly to the rapid rate at which land is becoming available for redevelopment under the urban renewal program. Commitments for mortgages originated under the program of housing for the elderly will also increase in 1961 and 1962 over 1960.

Only limited usage will be made of the revolving feature of the authorization for armed services housing and for cooperative housing.

The purchase of mortgages lags well behind commitments. The following table shows actual and estimated purchases during 1960, 1961, and 1962 (in millions of dollars):

	1960 actual	1961 estimate	1962 estimate
Purchases:			
1. Urban renewal.....	133.9	184.0	187.0
2. Housing for the elderly.....	25.4	30.0	57.5
3. Alaska, Guam, and disaster areas..	14.5	14.0	6.5
4. Armed services housing.....	130.6	16.1	14.0
5. Cooperative housing.....	27.0	31.9	35.0
6. Low-cost housing (\$13,500 or less).....	186.3	-----	-----
Total purchases.....	517.7	276.0	300.0
Less purchase discount.....	1.9	3.2	3.0
Total purchases, net.....	515.8	272.8	297.0

Sales from this portfolio amounted to \$0.3 million in 1960 and are estimated at \$20 million for 1961. No mortgage sales are assumed for 1962.

Financing.—Net borrowings from the Treasury were \$449.4 million in 1960 and are estimated at \$180 million in 1961 and \$210 million in 1962, thereby increasing the interest-bearing investment of the Government to \$2,009 million at the end of 1962.

Operating results.—Previously, earnings were retained and paid into miscellaneous receipts of the Treasury following the year earned. A payment of \$189 thousand was made in 1957, another payment of \$2,445 thousand was made in 1958. In order to protect the Association against losses inherent in a portfolio of this size, earnings will be retained and accumulated. The following table shows the cumulative amounts at the end of each year covered by these estimates (in thousands of dollars):

RETAINED EARNINGS (CUMULATIVE)

The Association, in its management and liquidating functions, is required by law to manage and liquidate its portfolio of mortgages acquired under contracts made before November 1, 1954, and those other mortgages that have been or may be acquired from authorized sources (73 Stat. 670). Such liquidation is to be in an orderly manner, with a minimum of adverse effect upon the home mortgage market and minimum loss to the Federal Government. Liquidation of the portfolio is accomplished through regular repayments according to their amortization schedules, sales of mortgages as rapidly as they can be absorbed by private investors without serious disruption of normal market conditions, and as the result of other principal credits arising from prepayments and foreclosures.

The initial mortgage purchasing phase of this activity has been completed and normally only the management and ultimate liquidation of the portfolio would need to be completed. However, additional mortgages will be acquired for this portfolio from constituent agencies of

the Housing and Home Finance Agency from time to time pursuant to 73 Stat. 670.

Budget program.—There will be no mortgages purchased under commitments made prior to November 1, 1954, for this portfolio during the period covered by these estimates. That purchasing program was completed during 1958. Acquisitions of mortgages on war and emergency housing from the Revolving fund (liquidating programs) under 73 Stat. 670 during 1961 and 1962 are estimated at \$0.9 million and \$0.3 million, respectively.

During 1960, mortgages in the amount of \$311.3 million were exchanged for certain nonmarketable Treasury bonds which were, in turn, redeemed at par by the Secretary of the Treasury. There were no sales of mortgages during that period nor are any sales or exchanges contemplated for 1961 and 1962.

Liquidation of mortgage principal resulting from repayments, prepayments, foreclosures, and transfers in lieu of foreclosures are estimated to amount to \$165 million in 1961 and to \$160 million in 1962, and will reduce the portfolio by those amounts.

Financing.—As of June 30, 1960, outstanding notes of the management and liquidating functions held by private investors amounted to \$797.4 million. These nonguaranteed notes were issued to the public in January 1958 and matured in August 1960; they were redeemed by borrowing from the Treasury, thus increasing the indebtedness of the Association to the Treasury by that amount. These estimates make no provision for the sale of additional notes to private investors.

Net repayments of Treasury borrowings were \$420.8 million in 1960. It is estimated that net borrowings in 1961 will be \$704.4 million and net repayments in 1962 will be \$175 million.

Operating results.—As a consequence of a reduction in the outstanding portfolio of the management and liquidating functions, net income is estimated to decline from \$20,994 thousand in 1960 to \$18,050 thousand in 1961 and \$16,955 thousand in 1962.

All benefits and burdens of the management and liquidating functions inure solely to the Secretary of the Treasury. Retained earnings reserved for losses and contingencies at the end of 1960 amounted to \$152.3 million and are estimated at \$170.4 million and \$187.3 million, respectively, for 1961 and 1962.

POSITION WITH RESPECT TO MORTGAGE PURCHASE AUTHORITY
[In thousands of dollars]

	1960 actual	1961 estimate	1962 estimate
Mortgage purchase authority ¹	1,726,476	1,560,976	1,399,876
Charges against authority: Mortgages outstanding at end of year.....	1,726,476	1,560,976	1,399,876

The Federal Housing Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency. It was made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of FHA are to encourage and stabilize the home-mortgage market and to improve home-financing practices along with housing standards and conditions. These purposes are accomplished through the insurance of loans and investments to finance the purchase, production, repair, and improvement of residential structures. As of June 30, 1960, almost \$64 billion of insurance had been written, with more than \$32 billion outstanding.

FHA conducts a wide variety of insurance programs through 11 separate funds established by statute. The largest is the mutual mortgage fund for the insurance of mortgages on 1- to 4-family dwellings under section 203 of the National Housing Act. Other funds cover the insurance of loans on home repairs and improvements and mortgages on multifamily housing, urban renewal housing, armed services housing, other special-purpose housing and the insurance of equity investments in rental housing.

The mutual mortgage fund differs from the other insurance funds in that mortgagors of record at the time loans are paid off, as authorized by statute, share in the rebate of any premiums paid into the fund but not utilized for expenses or losses. Through June 30, 1960, such participation payments to homeowners have exceeded \$107 million, with more than \$148 million reserved for future payments. The participation payments through June 30, 1960, represent in the aggregate, 13% of the related cumulative insurance premiums paid by mortgagors.

All of the FHA insurance programs produce revenue. This is derived primarily from insurance premiums, ap-

praisal and miscellaneous fees, and interest from Government securities and other investments. Through June 30, 1960, income has totaled \$1.9 billion.

Budget program.—The Federal Housing Administration budget for 1962 is designed to carry out the FHA part of the President's housing program. In doing so it will operate at a level adequate to exert a stimulating influence in home financing and foster quality and cost stability in home building and improvements, with emphasis on housing for the elderly, nursing homes, cooperative housing, and prevention of slums. At the same time it must gird itself better to cope with a rising rate of insurance claims and property acquisitions.

FEDERAL HOUSING ADMINISTRATION FUND—Continued

Summary of individual insurance programs.—Summary statements and estimated workload are provided below for the major insurance programs:

1. *Home modernization and repair insurance program (title I, sec. 2).*—Loans insured under title I, sec. 2, are mainly for the alteration, repair or improvement of residential structures. Authorized financial institutions provide 10 percent coinsurance and are insured for 90% of these loans by FHA. The maximum loan for single units is \$3,500, and the maximum duration is 5 years (except for new nonresidential farm structures, which is 15 years). The average loan during 1960 was over \$900, maturing in 37 months. Workload data are as follows:

	1960 actual	1961 estimate	1962 estimate
Initiation: Loans insured.....	1,073,821	1,100,000	1,200,000
Servicing: Insurance in force, end of year.....	2,426,837	2,943,000	3,316,000
Liquidation—Acquired security or collateral on hand, end of year:			
Defaulted loans.....	83,694	87,850	92,585
Amount (in millions).....	\$43.6	\$45.8	\$48.2

2. *Basic 1- to 4-family mortgage insurance programs (secs. 8, 203, and 222).*—Mortgages are insured on 1- to 4-family homes under section 203, mutual mortgage insurance, and section 222, servicemen's mortgage insurance. No new insurance is being written under section 8 which was repealed by the Housing Act of 1954. Statutory limits for mortgage insurance under section 203 are 97% of the first \$13,500 of appraised value, 90% of the next \$4,500 of value, and 70% of value in excess of \$18,000, up to the maximum mortgage of \$22,500 on single-family homes.

This program has been augmented by the certified agency program which now has been extended to all but four of the insuring offices and brings the advantages of FHA mortgage insurance to communities remote from the insuring offices. Under this variation mortgagees approved by the Federal Housing Commissioner are authorized to process applications under sections 203 and 222, obtaining appraisals and inspections by FHA-approved fee appraisers and inspectors.

Servicemen's mortgage insurance covers mortgages for single-family homes purchased by servicemen who have been in the armed services for a minimum of 2 years. The maximum mortgage insurable is \$20,000, and the maximum loan-value ratio is the same as for section 203 except that the maximum ratio above \$15,390 is a more liberal 95%.

Sec. 203.....	3,784	7,374	13,639
Sec. 222.....	171	463	613

3. *Basic multifamily mortgage insurance program (secs. 207-210, 213, 231, and 232).*—Mortgages are insured on new or existing multifamily rental housing projects and trailer courts under the basic section 207 program. The maximum loan-value ratio is 90% for rental housing and 75% for trailer courts.

A more liberal loan-value ratio, up to 97%, is provided for mortgage insurance on single, attached, or multifamily projects undertaken by nonprofit cooperative groups under section 213.

Mortgages are insured with liberal terms on new or rehabilitated multifamily housing projects for occupancy by elderly persons under section 231 and on new or rehabilitated nursing homes under section 232. The maximum loan-value ratios under section 231 are 100% for nonprofit mortgagors and 90% for profit-motivated mortgagors and under section 232, 75%.

4. *Urban renewal, rehabilitation and relocation mortgage insurance program (secs. 220 and 221).*—Section 220 provides mortgage insurance on liberal credit terms for the construction or rehabilitation of single or multifamily housing in approved urban renewal areas.

Section 221 provides mortgage insurance for new or rehabilitated low-cost housing for persons displaced by governmental action in approved areas. This program includes both single and multifamily housing. The maximum loan-value ratio is 100% and the maximum term is 40 years.

5. *Armed services mortgage insurance program (secs. 803 and 809).*—Section 803 provides mortgage insurance for multifamily rental housing at military installations for military and civilian personnel. The maximum mortgage insurable may not exceed the estimated replacement cost, and the Secretary of Defense may be required to guarantee the armed services housing mortgage insurance fund against loss.

Section 809 provides mortgage insurance on one- to four-family homes for civilian personnel at armed services, Atomic Energy Commission, and National Aeronautics and Space Administration installations. While the maximum loan-value ratio is identical to that under section 203b, other considerations are more liberal.

Workload data are as follows:

¹ Inspections under section 803 are provided by the armed services.

6. *Emergency housing mortgage insurance programs.*—After World War II the liberal war housing mortgage insurance provisions of title VI were extended to provide veterans with emergency housing. Insurance authority for one- to four-family homes under this title was terminated by the Housing Act of 1948 and for multifamily housing by the act of 1950.

Title IX provided mortgage insurance for defense housing, covering both one- to four-family and multifamily. Authorization to insure under this title was terminated by the Housing Act of 1954.

Summary of operating expense estimates.—FHA operating expenses are paid out of operating income. It is estimated that total operating expense for 1962 will be \$71.2 million, of which \$61.5 million will be nonadministrative and \$9.7 million administrative. The 1961 estimate is \$61.6 million, of which \$52.6 million is non-administrative and \$9 million administrative.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$237 thousand, and \$138 thousand each for 1960, 1961, and 1962.

FEDERAL HOUSING ADMINISTRATION—Con.

Public enterprise funds—Continued

FEDERAL HOUSING ADMINISTRATION FUND—Continued

Financing.—Mortgage insurance claims are met by the issuance of debentures that are subsequently redeemed out of operating revenue and proceeds from the sale of acquired properties and mortgages. In 1960 \$87 million of debentures were issued. Debentures to be issued in 1961 are estimated at \$163.8 million, and in 1962, \$200.6 million. Debentures were retired in 1960 in the amount of \$58.6 million. Retirement of debentures in 1961 and 1962, respectively, are estimated at \$100.9 million and \$147.8 million.

Operating results and retained earnings.—Operations in 1960 resulted in a net income of \$122 million. This income was distributed as follows: \$59.5 million to the general surplus account, \$36 million to the participating reserve account of the Mutual Mortgage Insurance Fund, and \$26.5 million to the general insurance reserves under the nonmutual insurance funds.

Net income is expected to be \$105.4 million in 1961 and \$126.8 million in 1962. In the 2-year period it is estimated that income totaling \$115.8 million will be added to the general surplus account, \$68.8 million to the participating reserve account of the mutual mortgage insurance fund, and \$47.6 million to the insurance reserves under other funds.

Insurance reserves totaling \$757.9 million on June 30, 1959, increased to \$866.6 million during 1960 and are expected to reach \$957.1 million during 1961 and \$1,067.9 million during 1962. These reserves are available to meet insurance expenses and losses.

Insurance authority.—The housing repair and improvement insurance authorization, title I, section 2, was extended in unlimited amount through September 1961 by Public Law 86-788, 86th Congress. However, legislation should be enacted to make this authority permanent.

The general mortgage insurance authorization, section 217, applies to all mortgage insurance programs except new insurance written under title VIII. Public Law 1020, 84th Congress, and Public Law 86-372 amended the general mortgage insurance authorization. These amendments provide that the principal obligations of insured mortgages that may be outstanding under all titles, except title VIII, shall not exceed the sum of the principal balances of insured mortgages as of July 1, 1956 (\$18.9 billion), the principal amount of outstanding commitments to insure as of July 1, 1956 (\$3.9 billion), and \$15 billion, for a total of \$37.8 billion.

The present authorization will be sufficient to cover commitments until the Congress convenes in January; however, an additional authorization will be required early during the third quarter of 1961 if the issuance of commitments is not to be interrupted. To ensure continuity in this important program, the authorization ceiling should be removed.

The armed services housing insurance authorization, under title VIII, sections 803 and 809, provides for principal obligations not to exceed \$2.3 billion. This amount will be adequate to carry the program through October 1, 1961, the current expiration date of the program.

The United States Housing Act of 1937, as amended (42 U.S.C. 1401 et seq.), provides for a low rent public housing program comprising decent, safe, and sanitary dwellings within the financial reach of families of low income. The Public Housing Administration is responsible for administering this program. The Administration makes loans and annual contributions to local housing authorities to assist in financing the construction of low rent housing projects and in maintaining their low rent character after completion and occupancy.

Recent modifications of the United States Housing Act were made by the Housing Act of 1956, which authorized admission of single elderly persons, a first preference in admission for the elderly, and the construction of dwellings designed specifically for the elderly; and the Housing Act of 1959, Public Law 86-372, approved September 23, 1959, which removed specific limitations on income, exemptions, and rents, and substituted more general standards. This act also revised the age requirements for admission to and occupancy of low rent public housing for elderly single persons and families, and provided that the age requirements conform to those applicable for benefits under title II of the Social Security Act, namely, 65 for men, 62 for women, and 50 for disabled persons.

Budget program—Development.—The Housing Act of 1959 authorized the placing of an additional 37,000 housing units under annual contributions contracts. Under this authorization, which became available without a time limitation upon enactment of the act, annual contributions contracts were executed for 3,753 additional units in 1960.

The budget program plans for the execution in 1961 of new annual contributions contracts for the remaining 33,247 units under the existing authorization. The budget estimates for 1962 are based on 35,000 additional units advancing to the construction stage, with 30,000 units to be completed and moving to the management stage, where the workload is cumulative.

The Administration is continuing its efforts to accelerate development activity in order to place the maximum number of projects under construction during 1961 and 1962 and reduce the inventory of projects in the annual contributions contract stage. Program reservations, preliminary loan contracts, and annual contributions contracts which are not progressing are being reviewed con-

tinually by the Administration and when circumstances warrant are being canceled.

The following tables show workload accomplishments and the status of the program by stage:

Management.—The following table summarizes the annual contributions required to ensure the low rent character of locally owned projects assisted by this program:

	1960 actual	1961 estimate	1962 estimate
Number of units.....	425,850	470,433	501,140

[In thousands of dollars]

Fixed annual contributions.....	147,523	167,940	186,916
Deduct amounts available to reduce fixed annual contributions:			
Accrued interest.....	1,461	3,182	3,101
Capitalized interest.....	1,145	1,184	3,397
Residual receipts, end of initial operating period.....	699	153	302
Residual receipts, current period.....	13,031	11,760	10,858
Total amount available to reduce annual contributions.....	16,335	16,279	17,650
Annual contributions requirements.....	131,188	151,661	169,256
Rounded.....		151,700	169,300

Increased annual contributions requirements in 1961 and 1962, including an additional appropriation of \$11,700 thousand anticipated in 1961 (reflected above), are largely the result of an increased number of units eligible for annual contributions resulting from the completion and permanent financing of new projects. The Public Housing Administration may make payments up to \$336 million per annum. The maximum amount of annual contributions which the Administration will be committed to pay on the basis of contracts executed or authorized is estimated at \$257.7 million, leaving \$78.3 million of uncommitted authority to pay annual contributions. This represents approximately 115,000 additional units that could be authorized within this limitation.

Administrative expenses.—Administrative expenses for the low rent public housing program are financed by appropriation. These expenses amounted to \$12,298 thousand in 1960. For 1961 the amount of \$13,050 thousand was appropriated and an additional \$818 thousand is anticipated to cover the costs of the Federal Employees Salary Increase Act of 1960, making a total of \$13,868 thousand available. The estimate for 1962 is \$14,150 thousand.

These expenses involve primarily assistance to local housing authorities in (a) the development of projects, by rendering advice in project planning, land acquisition, and other phases of development; and (b) in the management

stage, by management review of projects and budget estimates, consulting engineering service, and other management services. These expenses also involve audits of all local housing authorities.

The increasing number of dwelling units entering the management stage during 1961 and 1962 is the principal reason for the rise in administrative expenses. Increased employment is required for 1962 to permit adequate review of local housing authority management operations to ensure that the objectives of relevant Federal legislation are being achieved and that the Federal Government's financial interest in the program is adequately protected.

Nonadministrative expenses.—The Public Housing Administration utilizes program receipts to meet certain expenses of the low rent public housing program, and the use of these funds correspondingly reduces the requirements for appropriated funds. The Congress, in order to maintain control over the use of these receipts, has established a nonadministrative expense limitation. The limitation applies to two activities: (a) Expenses incurred in the operation and maintenance of federally owned, directly operated projects; and (b) expenses incurred for technical services provided by the Public Housing Administration during construction.

As of June 30, 1960, only 3 *federally owned, directly operated projects*, containing 1,182 units, remained. These projects have not been sold or leased to local housing authorities for various reasons, such as absence of State enabling legislation, local conditions, and the lack of congressional authority to dispose of the projects for other than low rent use. Estimated program receipts and expenses for 1961 and 1962 are based upon the continued operation of these projects by the Administration.

Technical services are provided during the development stage by having representatives of the Administration visit the sites of low rent public housing projects under construction to ensure that projects will be built in accordance with specified and acceptable standards. The local housing authorities pay a fixed fee for this service based upon a percentage of the total development cost, and the receipts are used to pay the cost of the service. The estimated cost for 1962 is based upon the number of projects in the construction stage.

Capital outlay—Development financing.—The Public Housing Administration is authorized to borrow from the Treasury to finance the development of low rent public housing. These borrowings and certain available working capital funds are used to make loans to local housing authorities. In accordance with the provisions of the annual contributions contract, the Administration makes a loan commitment to finance the initial development costs of the project. The commitment is gradually increased during the development period as progress warrants. The maximum loan commitment by the Administration cannot exceed 90% of the development costs.

During 1961 and 1962, new loan commitments will reflect additional annual contributions contracts and an increase in the number of units under construction. The dollar volume of new loan commitments is estimated to increase from \$130 million in 1960 to \$316 million in 1961, and will increase to \$419 million in 1962.

The Public Housing Administration makes direct short-term development loans to assist local housing authorities in financing the initial planning and the early stages of construction of a low rent housing project. When loans to local housing authorities are of sufficient amount to be

PUBLIC HOUSING ADMINISTRATION—Continued**Public enterprise funds—Continued****LOW RENT PUBLIC HOUSING PROGRAM—Continued****LOW RENT PUBLIC HOUSING PROGRAM FUND—continued**

attractive to private investors, the local housing authority sells short-term temporary notes and utilizes the proceeds to repay the advance and interim notes held by the Administration and for immediate construction requirements. These notes are secured by the Administration through a pledge by the local housing authority of the Administration's loan commitment. This arrangement has established an excellent security rating for these notes, which sold at an average interest rate of 2.54% in 1960. In that year direct loans were refunded through loans by private investors, secured by the Public Housing Administration, in the amount of \$62 million. Refunding of the Public Housing Administration loans with private loans is estimated at \$133 million in 1961 and \$144 million in 1962. These temporary notes, financed by private investors, are issued for short periods, usually 5 months, and may be reissued several times, and in increasing amounts, before the project is completed and ready for occupancy. As a result, a considerable turnover of short-term notes takes place during each fiscal period. The volume of loan activity managed by the Administration during a fiscal year greatly exceeds the amount of loans outstanding at the fiscal year end.

The following table reviews the actual financing and refinancing of development loans by the Administration and private investors during 1960 and estimated transactions during 1961 and 1962 (in millions of dollars):

	1960 actual	1961 estimate	1962 estimate
Loans and investments made by Public Housing Administration to local housing authorities:			
Balance at beginning of year.....	89	92	93
Acquisitions during the year.....	136	227	228
Repayments during the year.....	133	226	227
Balance at end of year.....	92	93	94
Loans by private investors to local housing authorities—secured by Public Housing Administration:			
Balance at beginning of year.....	830	703	682
Acquisitions during the year.....	1,361	1,570	1,691
Repayments during the year.....	1,488	1,591	1,573
Balance at end of year.....	703	682	800

All short-term financing, both direct and federally secured, is retired when the local housing authority permanently finances the project. Refunding operations affect only the distribution between direct and secured loans and not the total outstanding.

The local housing authority obtains permanent financing principally through the sale of long-term bonds to the public. These are usually 40-year serial bonds and are secured by the Federal Government's pledge to pay annual contributions. During 1960, long-term bonds in the aggregate amount of \$337 million were sold at interest rates ranging from 3¼% to 3¾%. During 1960, permanent financing totaled \$373 million. This included the sale of local housing authority bonds and series A notes, and also permanent notes taken by the Administration. New permanent financing is estimated at \$366 million during 1961 and \$324 million during 1962.

Financing.—The Administration is authorized to have \$1,500 million of outstanding Treasury borrowings at any one time. These borrowings amounted to \$29 million on June 30, 1960. It is anticipated that this level will be \$32 million on June 30, 1961, and 1962.

Operating results.—Operating income is not intended to be sufficient to cover all program expense. Net losses, in the budget year, are approximately equal to the appropriations for administrative expenses and annual contributions payments.

LIMITATION ON ADMINISTRATIVE AND NONADMINISTRATIVE EXPENSES, PUBLIC HOUSING ADMINISTRATION

Not to exceed the amount appropriated for such expenses by title I of this Act shall be available for the administrative expenses of the Public Housing Administration in carrying out the provisions of the United States Housing Act of 1937, as amended (42 U.S.C. 1401-1433) [;], including purchase of uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131) [;]; and purchase of not to exceed one passenger motor vehicle for replacement only [;]. Provided, That necessary expenses of providing representatives of the Administration at the sites of non-Federal projects in connection with the construction of such non-Federal projects by public housing agencies with the aid of the Administration, shall be compensated by such agencies by the payment of fixed fees which in the aggregate in relation to the development costs of such projects will cover the costs of rendering such services, and expenditures by the Administration for such purpose shall be considered nonadministrative expenses, and funds received from such payments may be used only for the payment of necessary expenses of providing representatives of the Administration at the sites of non-Federal projects: Provided further, That all expenses of the Public Housing Administration not specifically limited in this Act, in carrying out its duties imposed by law, shall not exceed \$1,200,000. (Independent Offices Appropriation Act, 1961.)

Budget expenditures of the Department of Agriculture in 1962 are estimated at \$5,782 million which is \$43 million more than is estimated for 1961. The estimated expenditures for 1962 are \$763 million more than the average for 1956, 1957, and 1958, but \$1.3 billion less than in the peak year of 1959 (see table 1). New obligational authority for 1962 is estimated at \$5,509 million as compared with \$5,361 million in 1961 and \$5,684 million enacted for 1960.

While most of the activities of the Department of Agriculture are of special benefit, directly or indirectly, to farmers and rural people, many of them are of substantial benefit also to the public generally. For example, basic scientific research carried on by the Department of Agriculture contributes to the sum total of scientific

knowledge, and is available for general use as well as to improve the scientific basis for the solution of specific problems of immediate interest to farmers. Similarly, many of the regulatory programs protect consumers generally even though they may be designed principally to give protection to farmers as producers. Conservation programs are designed to conserve soil and related water resources and to promote their best long-time use in the interest of the Nation as a whole. Because of the economic interdependence of the agricultural and many other sectors of the economy, even those agricultural programs that are designed specifically to raise and stabilize farm income often have an indirect impact on the level and stability of the incomes of related nonfarm sectors of the economy.

¹ Includes proposed legislation.

Activities financed through the Commodity Credit Corporation.—Budget expenditures of the Commodity Credit Corporation for 1962 are estimated at \$3,285 million, which is 57% of estimated total expenditures of the Department of Agriculture for that year. Most of the Corporation's expenditures are made to finance price support, supply, and related commodity disposal programs of the Department. These programs, which account for \$3,225 million of the estimated total expenditures of the Corporation in 1962, include principally the regular price support programs, the surplus disposal operations under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), and the International Wheat Agreement. Certain other programs of the Department also are financed through the Corporation—for example, incentive payments to farmers under the National Wool Act, the special milk program (through 1961), and interim financing of a part of the cost of the agricultural conservation program through loans to the Secretary of Agriculture.

Budget expenditures of the Corporation consist largely of gross outlays for loans, commodity purchases, financing

or subsidizing exports, payments to producers, and storage and transportation costs; less applicable receipts, which are principally from commodity sales and collections on loans. These expenditures for a particular year are sometimes confused with the realized costs and losses reported by the Corporation for the same year. Although the realized costs and losses of the Corporation approximate net budget expenditures over an extended period of years, they may diverge sharply for any short period. The divergence would be especially great, for example, in a period in which a decline in the Corporation's commodity acquisitions, new loans, and related outlays is accompanied by a sharp reduction in commodity inventories. Gross expenditures under these circumstances would tend to fall and receipts would tend to rise, with net budget expenditures declining. But since commodity inventories usually are disposed of at a substantial loss, the realized losses in such a period would tend to rise. In 1957, a year in which heavy inventory liquidation and moderately reduced commodity acquisitions were accompanied by reduced price support outlays (see table 2), the Corpora-

tion's realized costs and losses amounted to \$4.2 billion whereas its net budget expenditures were \$3.4 billion, including expenditures of the soil bank programs in that year.

TABLE 2.—COMMODITY CREDIT CORPORATION: COMMODITY INVENTORY OPERATIONS AND INVESTMENT IN COMMODITIES AND LOANS 1956-62

[In millions of dollars]

Year	Commodity acquisitions (fiscal year)	Commodity dispositions (fiscal year)	Investment (end of fiscal year)

1961 estimate.....	3,946	3,740	7,429	1,263	8,692
1962 estimate.....	2,391	2,188	7,632	1,447	9,079

Related activities financed outside the Commodity Credit Corporation.—A number of agricultural programs that have a price- and income-supporting effect are carried on independently of the Commodity Credit Corporation. One of these is the Sugar Act program, which is expected to require expenditures of \$85 million for payments to sugar growers and administrative expenses in 1962. This is a somewhat higher amount than in the period 1956-61 (table 1). While these payments represent income supplements for growers, the price-supporting feature stems mainly from the authority of the Secretary of Agriculture to set an upper limit on the amount of sugar that may be marketed in the domestic market. In 1962 the sugar processing tax is expected to yield \$92 million, and the sugar import tax is expected to yield \$6 million. For the 20-year period 1941-60, total sugar tax collections have exceeded payments to growers by about one-third.

The program for the removal of surplus agricultural commodities, which dates from 1935 and is financed through a permanent appropriation, exerts a general price- and income-supporting effect through purchases of surplus commodities in the market and distribution through the school lunch program, relief agencies and other institutions caring for the needy. Purchases are restricted to the amounts that can be distributed through such outlets. Expenditures under this program are estimated at \$100 million in 1961 and \$110 million in 1962, which is somewhat higher than actual expenditures in 1960 but only about 63% of the average amount for 1956 and 1957. The surplus removal authority of the Secretary of Agriculture under this program parallels to some extent the authority of the Commodity Credit Corporation, with the result that year-to-year changes in expenditures under this program sometimes reflect variations in the extent of the activities of the Commodity Credit Corporation in this field as well as the need to remove price-depressing surpluses from the market.

The Federal contribution to the school lunch program is financed in part by a direct appropriation, in part by a transfer of funds from the permanent appropriation for the removal of surplus agricultural commodities, and in part by Government donations of commodities acquired under the surplus removal authority and in the price support operations. Because of its primary purpose, the school

lunch program is classified under labor and welfare in the functional classification. However, it contributes indirectly, by increasing consumption, to the objective of supporting farm prices and income. Total expenditures, excluding commodity donations, under this program are estimated at \$155 million in 1962, which is approximately the same as in 1960 and 1961. In 1956 and 1957, total expenditures were less than \$100 million.

Of the remaining programs shown in table 1, the conservation reserve contributes most directly to the price and income support objectives. Rental payments represent cash receipts for farm owners, but the principal impact on farm prices is through the withdrawal of land from production with the objective of reducing agricultural output. The present program, under which the authority to enter into new contracts expired on December 31, 1960, is expected to require expenditures in 1962 of \$357 million; and under proposed legislation extending the program additional expenditures of \$19 million will be required in 1962.

From the foregoing brief description of the several programs that involve farm price and income supports, it can be seen that budget expenditures for these programs are not a direct measure of the extent to which the programs increase the incomes of farmers as individuals or groups. While the connection between budget expenditures and the extent of income supplements for farmers is reasonably direct in a cash payment program such as that provided for under the National Wool Act, it is not so clear for other programs. For example, because of the inelastic demand for many farm commodities, a commodity acquisition program involving relatively small expenditures may result in a marked increase in the short-run in the incomes of the producers affected, particularly if the commodities are disposed of in such a way that they do not reenter the market. The results would be quite different, however, if a part of the commodities were permitted to reenter the market at some other point. The extent of the benefits received by farmers and rural people from the several types of programs described above, therefore, can be determined only on the basis of rather involved economic analysis.

Rural credit programs.—While the several programs carried out by the Commodity Credit Corporation utilize the loan contract as one of several program devices, the primary impact on farmers and rural people of the Corporation's loan activities is through their effect on farm commodity prices. In those programs, loans perform only to a limited extent their normal function of transferring control over capital resources, and represent more nearly a deferred purchase of farm commodities. Under the loan programs administered by the Rural Electrification Administration and the Farmers Home Administration, the Federal Government makes available capital resources to rural people and groups for specified purposes. Any effects on farm commodity prices and income are quite indirect. The impact on rural people and the rural economy is mainly through the added availability of capital and the favorable terms and conditions of the loans.

Expenditures of the Rural Electrification Administration in 1962 are estimated at \$340 million. Repayments on outstanding loans are expected to be about \$125 million. These repayments are returned to miscellaneous receipts of the Treasury, and expenditures of the Rural Electrification Administration are included in the budget on a gross basis.

A part of the expenditures for the activities administered by the Farmers Home Administration are reported on a net basis and a part on a gross basis. The disaster loan revolving fund and the farm tenant mortgage insurance fund are operated as revolving funds and reported on a net basis. The other programs of this loan agency are reported on a gross basis, and, as in the case of the Rural Electrification Administration, loan repayments are returned to the Treasury as miscellaneous receipts. Under existing legislation expenditures of the Farmers Home Administration are estimated at \$233 million. Under legislation considered by the Congress last year and again recommended, all of the operations of this agency would be reported on a revolving fund basis.

Conservation and resource development programs.—Conservation and development of forests, agricultural land and related water resources are major activities of the Department of Agriculture. Most of the activities in this area are carried on in the following agencies or programs: (1) Forest Service, (2) the agricultural conservation program, (3) Soil Conservation Service, and (4) the conservation reserve program. Total expenditures for these programs in 1962 are estimated at \$1,067 million, which accounts for 18% of total budget expenditures estimated for the Department in 1962.

Expenditures for this group of programs have risen steadily in recent years. The estimated total for 1962 is 2.4 times that for 1956. Excluding the conservation reserve, which appeared first as a budget item in 1957, the estimated total in 1962 is \$690 million, which is almost 1.6 times the total of \$435 million for these programs in 1956. The growth of expenditures under the conservation reserve reflects the prominent place that land retirement has occupied as an aid in dealing with agricultural surpluses.

The growth of expenditures of the Soil Conservation Service shown in table 1 reflects a steady rise of the expenditures for regular conservation operations, from \$63 million in 1956 to \$89 million estimated for 1962, combined with much more rapid growth in the other programs

administered by that agency. The watershed protection and Great Plains programs have been in the developmental stages in the period since 1956. In that year programs other than the regular conservation operations accounted for less than one-fourth of the expenditures of the Soil Conservation Service, whereas estimated expenditures for these programs in 1962 account for 45% of the total.

Research, education, and other agricultural programs.—Activities concerned with research, dissemination of information relating to agriculture, administration of regulations relating to agricultural production and marketing, promotion of export markets for farm commodities and other related programs are among the oldest in the Department of Agriculture. Unlike the programs such as those administered through the Commodity Credit Corporation and the credit programs of the Department, most of the expenditures of these programs are for salaries and operating expenses. The benefits accrue in part in the form of services of particular interest to the agricultural industry and rural people and also as indirect benefits to a much wider group.

Expenditures for the three programs in this group that are set out specifically in table 1 have risen substantially since 1956. Estimated expenditures for the Agricultural Research Service of \$201 million for 1962 are 1.8 times the expenditures for 1956; the \$70 million of estimated 1962 expenditures for the Extension Service are almost 1.5 times the 1956 level; and estimated 1962 expenditures of \$48 million for marketing research and service under the Agricultural Marketing Service are twice the 1956 level. Estimated expenditures under these three programs in 1962 are 74% higher than in 1956.

The residual group in table 1 includes a number of programs and agencies, among which are the following: The Office of the Secretary of Agriculture, the Office of the General Counsel, the Office of Information, the Federal Crop Insurance Corporation, the Foreign Agricultural Service, and certain miscellaneous programs and activities.

AGRICULTURAL RESEARCH SERVICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production, utilization, and home economics, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: *Provided*, That not to exceed \$75,000 of the appropriations hereunder shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two, of which one shall be for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to title 5, United States Code, section 565a, for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed \$15,000, except for five buildings to be constructed or improved at a cost not to exceed \$30,000 each, and the cost of altering any one building during the fiscal year shall not exceed \$5,000 or 5 per centum of the cost of the building, whichever is greater: *Provided further*, That the limitations on alterations contained in this Act shall not apply to conversion of animal disease and parasite research facilities at Beltsville, Maryland:

Research: For research and demonstrations on the production and utilization of agricultural products, home economics, and related research and services, including administration of payments to State agricultural experiment stations, [\$68,827,200] \$79,620,000: *Provided*, That the limitations contained herein shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a): *Provided further*, That the Secretary of Agriculture may sell the Entomology Research Laboratory at Orlando, Florida, in such manner and upon such terms and conditions as he deems advantageous and the proceeds of such sale shall remain available until expended for the establishment of an entomology research laboratory: *Provided further*, That in the establishment of such laboratory the Secretary may acquire land therefor by donation or exchange;

Plant and animal disease and pest control: For operations and measures, not otherwise provided for, to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine, and regulatory activities, as authorized by law, including expenses pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-[d]c), [\$52,236,000] \$55,045,000, of which \$1,500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases to the extent necessary to meet emergency conditions: *Provided*, That no funds shall be used to formulate or administer a brucellosis eradication program for fiscal year 1963 that does not require minimum matching by any State of at least 40 per centum: *Provided further*, That the Secretary is authorized to acquire land for the plant pest control activities presently located at Gulfport, Mississippi;

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat, and meat-food products, and the applicable provisions of the laws relating to process or renovated butter, [\$21,562,000;] \$23,801,000.

Special fund: To provide for additional labor to be employed under contracts and cooperative agreements to strengthen the work at research installations in the field, not more than \$1,000,000 of the amount appropriated under this head for the fiscal year 1960 may be used by the Administrator of the Agricultural Research Service in departmental research programs in the fiscal year 1961, the amount so used to be transferred to and merged with the appropriation otherwise available under "Salaries and expenses, Research".

For an additional amount for "Salaries and expenses", for "Research", \$1,500,000. (5 U.S.C. 511-512, 524, 541c-541e, 563-564, 565a, 576, 2131; 7 U.S.C. 135-135k, 145-164a, 166-167, 281-283, 361a-361i, 391, 394-396, 401-404, 421-422a, 424-425, 427, 427i, 428a, 429-431, 433-434, 436-437, 851-855, 1292, 1651-1656, 1704, 1901-1906; 15 U.S.C. 69e; 16 U.S.C. 581-581a, 581f, 590a-590b, 590f, 590k; 18 U.S.C. 287; 19 U.S.C. 1201, 1306; 20 U.S.C. 191-194; 21 U.S.C. 71-91, 94-96, 98, 101-105, 111-114c, 114e-128, 130-131, 151-158, 342a, 346, 346a; 26 U.S.C. 4817, 7235; 31 U.S.C. 725a; 42 U.S.C. 1891-1893; 45 U.S.C. 71-74; 46 U.S.C. 466a-466b; 48 U.S.C. 198, 1409m-1409o; 49 U.S.C. 1474(a), 1509(d); 46 Stat. 67; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961; Supplemental Appropriation Act, 1961.)

Proposed supplemental due to pay increases.....		6,745	

¹ Includes capital outlay as follows: 1960, \$5,197 thousand; 1961, \$4,686 thousand; 1962, \$5,031 thousand.

The Service conducts basic and applied research relating to the production and utilization of agricultural products, and to human nutrition and home economics, and carries out those control and regulatory programs of the Department which involve enforcement of plant and animal quarantines, meat inspection, the control of diseases and insect pests of animals and plants, and related work.

During 1960, the Service acquired at no cost property declared excess by other Federal agencies with an original acquisition cost to the Government of \$2,631 thousand. The current fair value of this property is estimated at \$315 thousand. About half of this amount was for expendable materials and most of the remainder for upgrading or providing additional necessary equipment. Congress authorized the acquisition of certain real estate without cost. The real estate so acquired in 1960 is valued at about \$365 thousand.

1. *Research*—(a) *Farm research*.—Improved breeding, feeding, and management practices are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases and parasites affecting them.

Investigations are conducted to improve varieties of food, feed, fiber and other plants, and to develop new crops; to improve crop-production practices, including methods to control plant diseases and nematodes; and to improve chemical, biological, and other methods for con-

AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

trol of harmful insects and other pests affecting farm production.

Research is conducted to improve fertilizers, soil management, irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to determine the relation of soils to plant, animal, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production.

Farm economics research is conducted on profitable adjustments in farming by type and size of farm; on efficiency in use of labor, equipment, land, and water; and on related economic problems, especially on adjustments in farming which may increase farmers' income without increase in output of farm products currently surplus to need.

Continuous review is maintained to emphasize work which will meet the problems of agricultural surpluses. The research is aimed at the profitable production of an adequate supply of food, feed, fiber, and other agricultural products of desired quality at minimum costs. Increased attention has been given to the production of agricultural products having industrial uses. Development of improved ginning processes and equipment is currently emphasized in order to avoid heat and other damage to cotton fiber during ginning. More than \$1.6 million of research funds are now used for the introduction and development of new crops.

The proportion of farm research funds going into basic research has steadily increased, and is currently estimated at 33% of the total funds for farm research. This basic research undergirds the other research efforts.

The estimates for 1962 propose increases for additional research at the new National Animal Disease Laboratory, Ames, Iowa, which will be completed in 1961; for partial staffing and operating costs at new cotton and grain insect laboratories to be ready for operation early in fiscal year 1962; and for research on tobacco quality and development of mechanized systems of tobacco production, on pear decline, and on farm adjustment problems. The direct appropriation of \$1 million is also proposed for employment of additional labor at research field stations in lieu of the special fund provided for this purpose in 1961 by reappropriation.

(b) *Utilization research and development.*—Chemical, physical, and biological research is conducted to develop increased industrial uses of farm products, and new and improved foods, feeds, and fabrics; and to develop improved methods for processing agricultural commodities.

(c) *Home economics research.*—Studies are made of human nutrition, household economics, and clothing and housing. The 1962 estimates include an increase proposed for research on the biological values of food for human nutrition. Such information is needed to guide future food programs.

(d) *Administration of payments to States, and research in Alaska, Puerto Rico, and Virgin Islands.*—Research under Federal grant funds at each State agricultural experiment station is coordinated with research conducted by other States and by agencies of the Department. The Secretary's responsibilities for the proper administration of these funds are financed under this appropriation (\$419 thousand estimated for 1961) and 3% of the grant funds.

Research stations are operated in Alaska, Puerto Rico, and the Virgin Islands.

2. *Plant and animal disease and pest control.*—(a) *Plant disease and pest control.*—Provision is made (1) through port-of-entry inspection to exclude from this country destructive insects, plant diseases, and nematodes that cause great damage to agricultural crops in other parts of the world; (2) to cooperate with States in eradicating or preventing spread of crop pests that become established in this country; and (3) to assist States in suppressing incipient and emergency outbreaks of crop pests when and where they occur. The Federal Insecticide, Fungicide, and Rodenticide Act, as amended, and related provisions of the Federal Food, Drug, and Cosmetic Act are administered. An increase is proposed in 1962 for plant quarantine protection necessary because of increased travel and shipping. The volume of workload is indicated in the following table (in thousands):

	1958 actual	1959 actual	1960 actual
Inspections at ports of entry:			
Airplanes.....	121	134	139
Vessels.....	55	59	60
Vehicles from Mexico.....	19,434	21,120	22,657
Baggage, pieces of.....	17,277	21,331	22,025
Interceptions of unauthorized plant material.....	311	320	314

(b) *Animal disease and pest control.*—Programs are conducted to exclude communicable diseases of foreign origin from this country; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases; and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine. The estimates for 1962 propose an increase for animal disease control work at the new National Animal Disease Laboratory, Ames, Iowa.

The volume of protective activities is indicated by selected examples in the following table (in thousands):

	1958 actual	1959 actual	1960 actual
Animal import inspection:			
All animals.....	1,127	1,150	783
Import animal byproducts:			
Wool, bone, glands, etc.....pounds..	590,000	664,611	965,480

Diagnostic agents.....do.....	66,791	75,281	62,097
Other serums.....do.....	10,773	11,799	9,832

3. *Meat inspection.*—Federal meat inspection is required for all meat in interstate commerce and is conducted to assure a clean and wholesome meat supply for human consumption, free from adulteration, and truthfully

labeled. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure informative labeling, and meats imported or exported are inspected. The estimates for 1962 include a proposed increase for additional inspection staff to service the expanding demand for Federal meat inspection.

The volume of inspections and examinations is indicated by examples given in the following table:

	1958 actual	1959 actual	1960 actual
Number of establishments covered.....	1,300	1,334	1,396
Cities in which plants are located.....	518	546	572
Inspections of live animals.....	97,604,152	99,419,254	107,504,884
Post mortem inspections.....	97,599,295	99,414,897	107,499,826
Animals and carcasses condemned.....	264,393	242,329	255,632
Inspection of processed meat and meat-food products (million pounds).....	16,792	17,618	18,698

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

Note.—The gross foreign currency authorization in 1960 was \$11,025 thousand. The schedule above covers foreign currency authorizations for 1960. The appropriation for 1960 was equal to the unexpended balance of previous foreign currency authorizations as of June 30, 1960. All transactions in 1961 and 1962 relate to appropriations.

AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)—Continued

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are used by the Department for market development research under section 104(a) and for agricultural and forest research under section 104(k). Work is carried on through contracts or grants, in both basic and applied fields, by research institutions and organizations in foreign countries. This research serves to develop new foreign markets and to expand existing markets for agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. It also provides for supplementary research on farm, forest, marketing, utilization, and human nutrition problems. In 1962 this appropriation will be used to purchase only those currencies determined to be excess to the normal requirements of the United States, plus a small amount of Korean currency previously earmarked for use by the Department of Agriculture. Total estimated cost in U.S. dollars (charged to regular appropriations) of the initiation and supervision of projects in 1962 is \$310 thousand.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders (representing primarily work under contract not performed) are as follows: 1959, \$1,805 thousand; 1960, \$4,017 thousand; 1961, \$32,429 thousand; 1962, \$29,072 thousand.

Funds were appropriated in 1961 for construction of facilities for poultry research at Athens, Ga., and State College, Miss.; for soil and water research at Twin Falls, Idaho, Pullman, Wash., and Bushland, Tex.; for entomology research at Gainesville, Fla.; for research on metabolism of agricultural chemicals in insects, plants, and livestock, and insect control through use of sterility techniques at Fargo, N. Dak.; for tobacco research at Lexington, Ky.; for tillage machinery research at Auburn, Ala.; for plant, soil, and nutrition research at Ithaca, N.Y.; and for a National Arboretum headquarters-laboratory building at Washington, D.C. Additional funds are requested for 1962 for facilities for research on biological control of insects at Columbia, Mo.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1961, \$1,304 thousand; 1962, \$950 thousand.

STATE EXPERIMENT STATIONS

Payments to States and Puerto Rico: For payments to agricultural experiment stations to carry into effect the provisions of the Hatch Act, approved March 2, 1887, as amended by the Act approved August 11, 1955 (7 U.S.C. 361a-361i), including administration by the United States Department of Agriculture, **[\$32,053,000]** \$34,053,000; and payments authorized under section 204(b) of the Agricultural Marketing Act, the Act approved August 14, 1946 (7 U.S.C. 1623), \$500,000; in all, **[\$32,553,000]** \$34,553,000.

Penalty mail: For penalty mail costs of agricultural experiment stations under section 6 of the Hatch Act of 1887, as amended, \$250,000. (39 U.S.C. 321q; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

¹ Includes capital outlay as follows: 1960, \$1 thousand; 1961, \$1 thousand; 1962, \$4 thousand.

Funds are allocated to agricultural experiment stations of the land-grant colleges in the States and Puerto Rico for agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural life. The States are contributing about \$3 for every \$1 paid by the Federal Government.

The proposed increase is to strengthen the cooperative research program at the agricultural experiment stations in the States and Puerto Rico.

The planned distribution of the grants for 1962 is (in thousands of dollars):

AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

DISEASES OF ANIMALS AND POULTRY—Continued

This appropriation item is available should it become necessary to finance measures to eradicate outbreaks of livestock diseases, including poultry, such as foot-and-mouth disease, rinderpest, European fowl pest, etc., which constitute an emergency as determined by the Secretary of Agriculture and threaten the livestock or poultry industry of the country. Costs reported represent deliveries of prior years' undelivered orders, and adjustments relating to former emergency programs financed until 1959 by transfers from other funds of the Department.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services not yet received).....	40	---	---	---

New obligational authority:			
Appropriation.....	64,123	67,431	70,040
Proposed supplemental due to pay increases.....		41	

¹Includes capital outlay as follows: 1960, \$29 thousand; 1961, \$14 thousand; 1962, \$16 thousand.

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics, and related subjects. This educational activity takes research results, technological advancements, and situation and program facts of the Department of Agriculture, the State agricultural colleges, and experiment stations, and incorporates them into a national educational program. Its objective is to help people develop their abilities to attain greater efficiency in farming, marketing, and homemaking.

1. *Payments to States and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payments to States and Puerto Rico are distributed primarily on the basis of farm and rural population and to a limited degree on the basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act for educational work in marketing are distributed to the States and Puerto Rico on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of county extension workers who work with rural families, marketing concerns, and others by providing counsel and assistance in the application of improved methods of production, marketing, and family living. They assist local leadership to determine extension programs of work. Work with youth is accomplished largely through 4-H Clubs.

The proposed increase is for payments to States for (1) cooperative agricultural extension work under the Smith-Lever Act to strengthen and expand extension work with disadvantaged rural families in connection with the rural development program, and (2) marketing educational work to improve methods of processing agricultural

products, increase the efficiency of marketing operations, introduce new uses of agricultural products, and maintain quality of agricultural products in the marketing system.

The scope of extension activities is reflected in the following selected statistics (in thousands):

	1957	1958	1959
Number of families assisted in adopting improved agricultural practices.....	6,819	7,947	8,040
Number of families assisted in adopting improved homemaking practices.....	6,873	7,475	8,453
Number of 4-H Club members.....	2,201	2,254	2,302
Number of voluntary local leaders.....	1,262	1,281	1,277
Number of bulletins distributed.....	30,894	32,873	34,230

2. *Retirement costs for extension agents.*—The increase proposed is required to meet retirement costs of cooperative extension agents as authorized under Public Law 854, approved July 31, 1956. Cooperative extension agents are joint employees of the U.S. Department of Agriculture and the cooperating land-grant institutions. The employer's contribution to the Federal retirement fund, to match contributions of these agents, is provided by this Federal appropriation.

3. *Penalty mail.*—Funds to cover the cost of penalty mailings for State extension directors and cooperative extension agents in the States are provided under this appropriation.

4. *Federal Extension Service.*—The Federal Extension Service provides leadership, counsel, and assistance to the States and Puerto Rico in developing extension programs, improved teaching methods, efficient use of available resources, evaluation of programs, in-service training for extension personnel, and providing administrative services. The proposed increase will strengthen the Federal staff of the Extension Service to meet increased responsibilities resulting from intensified extension programs, to meet requests from the States for increased program leadership and assistance, to provide liaison with research, service, and other authorized activities of USDA, and to provide leadership in subject-matter areas not now covered.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	426	326	196	146
Advances (payments for goods and services on order not yet received).....	169	151	96	60
Total selected resources at end of year.....	595	477	292	206
Selected resources at start of year (-).....		-595	-477	-292

SOIL CONSERVATION SERVICE

The Service is responsible for various soil and water conservation activities to aid farmers and ranchers in making physical adjustments in land use to conserve soil, water, and plant resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation. These activities are carried out in cooperation with Federal and State agencies and local organizations. The Service also has responsibility for administering the Great Plains conservation program and provides technical services in connection with the agricultural conservation program, and soil and water conservation loans made by the Farmers Home Administration.

Current authorizations:

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); operation of conservation nurseries; classification and mapping of soils; dissemination of information; purchase and erection or alteration of permanent buildings; and operation and maintenance of aircraft, **[\$83,132,000]** \$89,725,000: *Provided*, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed \$2,500, except for eight buildings to be constructed or improved at a cost not to exceed \$15,000 per building and except that alterations or improvements to other existing permanent buildings costing \$2,500 or more may be made in any fiscal year in an amount not to exceed \$500 per building: *Provided further*, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: *Provided further*, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U.S.C. 590a-590f), in demonstration projects: *Provided further*, That not to exceed \$5,000 may be used for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further*, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service: *Provided further*, That not to exceed \$600,000 of the amount appropriated under this head for fiscal year 1960 may be used to employ conservation aides and other nonprofessional personnel on a part-time or contract basis, and the amount so used may be transferred to and merged with this appropriation. (5 U.S.C. 133t, 511-512, 565a; 7 U.S.C. 1387, 1807; 16 U.S.C. 590q-1; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

Proposed supplemental due to pay increases.....		5,472	

¹ Includes capital outlay as follows: 1960, \$2,555 thousand; 1961, \$2,200 thousand; 1962, \$2,200 thousand.

1. Assistance furnished soil conservation districts and other cooperators consists primarily of: (a) standard soil surveys and special soils investigations to provide physical land facts needed for farm and ranch conservation planning and application of practices and by other Federal, State, and local agencies and the public;

MAIN WORKLOAD FACTORS

[In millions of acres]

	Total as of June 30, 1960	1960 actual	1961 estimate	1962 estimate
Soil surveys.....	658.7	50.2	53.0	54.0
Range site determinations.....	104.8	14.5	15.0	15.0

(b) technical assistance to farmers and ranchers in planning individual conservation programs for orderly adjustment of the use and treatment of their land; (c) management consultation and other technical assistance in installing the conservation practices provided for in their farm and ranch conservation plans;

MAIN WORKLOAD FACTORS

	1960 actual	1961 estimate	1962 estimate
Number of soil conservation districts....	2,867	2,887	2,905
Number of soil conservation district cooperators.....	1,849,525	1,870,000	1,887,000
Number of cooperators having farm and ranch conservation plans.....	1,301,450	1,336,000	1,370,000
Number of cooperators and other farms applying conservation practices.....	644,832	650,000	660,000

(d) technical assistance to group enterprises on soil conservation and water control problems that can best be solved by group action; (e) donation to soil conservation districts of special equipment acquired from Federal

Government surplus and needed in the application of conservation practices (the original acquisition cost to the Government of such equipment in 1960 was \$4,234 thousand); (f) streamflow forecasts, developed from snow surveys in the Western States, which serve as a basis for planning for efficient seasonal use of water; (g) the selection and testing of promising plant materials to determine their suitability for erosion control purposes; (h) technical assistance to agricultural conservation program participants in establishing specified conservation practices; (i) technical assistance to conservation reserve program participants in planning and applying specified conservation practices; and (j) technical assistance in planning and applying the practices for which soil and water conservation loans are made by the Farmers Home Administration.

During 1960, the Service acquired at no cost property declared excess by other Federal agencies with an original acquisition cost to the Government (exclusive of equipment donated to soil conservation districts) of \$178 thousand.

The increase proposed would be used to staff new districts expected to be organized in 1962.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

WATERSHED PROTECTION

For expenses necessary to conduct surveys, investigations, and research and to carry out preventive measures, including, but not limited to, engineering operations, methods of cultivation, the growing of vegetation, and changes in use of land, in accordance with the Watershed Protection and Flood Prevention Act, approved August 4, 1954, as amended (16 U.S.C. 1001-1008), and the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-f), to remain available until expended, **[\$35,000,000] \$46,287,000**, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for watershed protection purposes: *Provided*, That not to exceed \$100,000 may be used for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further*, That not to exceed \$2,500,000, together with the unobligated balance of funds previously appropriated for loans and related expense, shall be available for such purposes.

[\$1,800,000.] (5 U.S.C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961; Supplemental Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$75 thousand for activities transferred in the estimates to "Salaries and expenses," Office of the General Counsel. The amount obligated in 1961 is shown in the schedule as a comparative transfer.

¹Includes capital outlay as follows: 1960, \$625 thousand; 1961, \$673 thousand; 1962, \$746 thousand.

The Department cooperates with the States and other agencies in planning and installing works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water. It provides loans to local organizations to help them finance their share of the costs of certain works of improvement. The Department also cooperates with other agencies in making surveys and investigations of watersheds of rivers and other waterways as the basis for the development of coordinated programs.

1. *Investigations and planning.*—Surveys are made by the Department of proposed small watershed projects, and work plans are prepared in cooperation with the local sponsors. These plans outline the proposed works of improvement and include the estimated costs, a cost-benefits analysis, cost-sharing and maintenance arrangements, a proposed schedule of operations, and other facts necessary to determine whether Federal participation in project development should be approved.

2. *Installation of works of improvement.*—Assistance is provided to local organizations to install improvement measures for flood prevention and water management in accordance with approved watershed work plans.

Pilot demonstration watersheds.—The following table shows the status of the pilot watershed projects which were initiated in 1954 to demonstrate and evaluate the effects of works of improvement installed in small watersheds for watershed protection and flood prevention. The budget estimate reflects reductions due to completion of some pilot projects.

SOIL CONSERVATION SERVICE—Continued

Current authorizations—Continued

WATERSHED PROTECTION—Continued

Public Law 566 watersheds.—After local sponsoring organizations have developed watershed work plans with the Department's assistance and the projects have been approved as suitable for Federal participation (projects involving an estimated Federal contribution to construction costs in excess of \$250 thousand, or any single structure having a capacity in excess of 2,500 acre-feet require congressional approval), technical services and cost-sharing assistance are provided for specified works of improvement. Detailed construction plans and specifications are prepared. On non-Federal lands the local sponsoring organizations contract for the construction work; provide land easements and rights-of-way; operate and maintain the projects; and in the case of multiple-purpose structures, bear a share of the construction costs. The initiation of installation of works of improvement in new projects requires administrative approval in two stages: (a) approval for advance engineering and other technical assistance only, and (b) approval for construction of structural measures.

The advance engineering and technical assistance stage includes surveys, investigations, and preparation of de-

tailed designs, specifications, and engineering cost estimates for construction of structural works. It also includes precise delineation of required easement areas. Technical and other assistance for planning and applying land treatment measures for watershed protection and flood prevention is provided where acceleration of land treatment is needed.

The project construction stage begins with execution of the first project agreement for construction of works of improvement, after required easements are obtained or assured and the local organization has met all other requirements. Under a project agreement the local sponsoring organization agrees to construct a segment of the project which may consist of an individual or an inter-related group of structures. The agreement obligates the Government to furnish its share of the construction cost. Payments are made to the local contracting organization in accordance with the project agreement as the work progresses. Engineering and other services are provided for the preparation of contracts and inspection of construction. Technical assistance with the planning and installation of land treatment measures for watershed protection and flood prevention is continued.

The following tabulation shows the status of Public Law 566 projects with respect to approvals for advance engineering and technical assistance and for construction.

[Dollars in thousands]

Explanation	1960 actual		1961 estimate		1962 estimate	
	Number	Amount	Number	Amount	Number	Amount
Projects approved for advance engineering and technical assistance (number and estimated Federal cost of completion, unless otherwise indicated):						
Projects underway at beginning of year.....	73	\$50,551	118	\$103,967	158	\$149,291
Projects initiated during the year.....	84	84,249	100	100,000	80	80,000
Subtotal.....	157	134,800	218	203,967	238	229,291
Deduct projects approved for construction during the year.....	39	28,156	60	48,000	70	70,000
Net projects approved.....	118	106,644	158	155,967	168	159,291
Deduct amounts obligated during the year for advance engineering and technical assistance.....	---	2,677	---	6,676	---	8,647
Total, projects receiving only advance engineering and technical assistance at end of year.....	118	103,967	158	149,291	168	150,644
Projects approved for construction (number and estimated cost of completion, unless otherwise indicated):						
Projects underway at beginning of year.....	102	42,349	135	55,915	180	80,967
Projects initiated during the year.....	39	28,156	60	48,000	70	70,000
Total, projects under construction during the year.....	141	70,505	195	103,915	250	150,967
Deduct amounts obligated during the year for works of improvement on:						
(a) Projects approved for construction during the year.....	---	4,930	---	9,000	---	10,500
(b) Projects completed during the year.....	6	40	15	750	20	2,038
(c) Continuing prior year projects.....	---	9,620	---	13,198	---	16,170
Total, projects under construction at end of year.....	135	55,915	180	80,967	230	122,259
Grand total: Projects in progress at end of year.....	253	159,882	338	230,258	398	272,903
Projects completed (cumulative).....	11		26		46	

The 1961 program contemplates initiation of construction on about 60 watershed projects, involving 1961 obligations of \$9 million and total Federal cost of \$48 million. The 1962 estimates provide for starting about 70 projects, with 1962 obligations of \$10.5 million and total Federal cost of \$70 million.

Uniform cost-sharing legislation is recommended which would provide that non-Federal interests should bear at least 30% of the costs of flood protection benefits provided by local projects which are authorized in the future. The value of lands, easements, and rights-of-way contributed locally would be included as part of the non-Federal share. Operation and maintenance would be a State or local responsibility.

3. *Loans and related expense.*—Loans are made to local organizations to finance the local share of the cost of

works of improvement installed in the small watersheds. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Of the 1962 estimate for Watershed protection, not to exceed \$2.5 million is to be available for such purpose together with unobligated balances of loan funds from prior years.

4. *Surveys and investigations of water resources programs.*—Current work includes participation with the Corps of Engineers in the Potomac River Basin, the Delaware River area, the upper Mississippi River area, the Bayou Bartholomew in Arkansas and Louisiana, the Arkansas River navigation project in Arkansas and Oklahoma, and the Cape Fear River Basin in North Carolina. In addition, studies are now being conducted under a cooperative arrangement with the Department of the

Interior to reappraise the direct agricultural benefits anticipated from certain participating projects in the Upper Colorado River storage project. Upon completion of certain of the studies now underway, this arrangement will be concluded. Surveys are also being made of the Yazoo-Mississippi River area in cooperation with the Mississippi State board of water commissioners; in the Tombigbee River Basin in cooperation with the Mississippi State board of water commissioners and the Alabama water resources study commission; with the Nevada department of conservation and natural resources in the Humboldt River Basin; with the Oregon State water resources board in the upper Willamette and other river basins; and with agencies of the State of Utah in the Sevier River Basin. Some cooperative assistance is being provided to the river basin study commissions for the Southeast and the Texas River areas.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders (representing primarily the uncompleted portion of contracts for installation of structural measures in watershed projects) are as follows: 1959, \$18,189 thousand; 1960, \$17,523 thousand; 1961, \$18,800 thousand; 1962, \$19,700 thousand.

FLOOD PREVENTION

For expenses necessary, in accordance with the Flood Control Act, approved June 22, 1936 (33 U.S.C. 701-709, 74 Stat. 131), as amended and supplemented, [and the Watershed Protection and Flood Prevention Act, approved August 4, 1954, as amended (16 U.S.C. 1001-1008, 74 Stat. 131),] and in accordance with the provisions of laws relating to the activities of the Department, to perform works of improvement, including not to exceed \$100,000 for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), to remain available until expended, [\$18,000,000] \$19,463,000, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood prevention purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated: *Provided further*, That not to exceed \$1,000,000, together with the unobligated balance of funds previously appropriated for loans and related expense, shall be available for such purposes.

[For an additional amount for "Flood Prevention", \$1,570,000, for the purposes of Public Law 86-468.] (5 U.S.C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961; Supplemental Appropriation Act, 1961.)

1. *Works of improvement.*—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention and for furthering the conservation, development, utilization, and disposal of water in the 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares in the cost of works of improvement for flood prevention and, under recently enacted legislation (Public Law 86-468, approved May 13, 1960), for agricultural water management and fish and wildlife development features.

The Department furnishes accelerated technical assistance to landowners in the installation of land treatment measures with a view toward providing the highest feasible degree of runoff retardation, sediment control, and water management. Local sponsoring organizations must furnish all land, easements and rights-of-way, water rights, and the entire cost of works of improvement for nonagricultural water management measures, and operate and maintain all completed projects.

2. *Loans and related expense.*—Loans are made to local sponsoring organizations to help finance their share of the costs of planned works of improvement. Of the 1962 estimate for Flood prevention, not to exceed \$1 million is to be available for such purpose, together with unobligated balances of loan funds from prior years.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders (representing primarily the uncompleted portion of contracts for the installation of flood prevention measures) are as follows: 1959, \$5,830 thousand; 1960, \$5,180 thousand; 1961, \$8,400 thousand; 1962, \$6,800 thousand.
