GREAT PLAINS CONSERVATION PROGRAM

For necessary expenses to carry into effect a program of conservation in the Great Plains area, pursuant to section 16(b) of the Soil Conservation and Domestic Allotment Act, as added by the Act of August 7, 1956 (16 U.S.C. 590p), **[\$10,000,000]** \$10,168,000, to remain available until expended. (5 U.S.C. 511-512; 74 Stat. 1030; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

1. Cost-sharing contracts and technical assistance are offered by the Department to aid farmers and ranchers to develop and carry out long-range conservation plans designed to minimize climatic hazards and protect their lands from erosion and deterioration by natural causes. This is a voluntary program which supplements other conservation programs and activities in designated counties of the 10 Great Plains States. Cost-sharing contracts extend from 3 to 10 years and include a plan of operations for the farm and ranch and a time schedule for installing eligible conservation practices. All contracts must terminate by December 31, 1971. The maximum cost-share rate offered in any contract does not exceed 80% of the average cost of installing each eligible practice. Federal cost-sharing for constructing, enlarging, deepening or lining any individual dam, pit, or pond for irrigation water is limited to \$2,500. Furthermore, cost-sharing for conservation irrigation practices in any one contract must not exceed (1) \$2,500, or (2) one-fourth of the total Federal obligation, whichever is the larger. All producers are limited to a cost-share ceiling of \$2,500 times the number of years the contract is in force, or \$25 thousand for the maximum 10-year contract. The total cost-shares that may be paid to producers are limited to \$25 million for any one program year and \$150 million for the total program.

The producer who signs a Great Plains program contract is responsible for accomplishing his plan of operations as scheduled, and is encouraged to use all available sources of assistance under other local, State, or Federal programs that contribute to achieving conservation land treatment and economic stability of the farm or ranch unit.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders (representing primarily the uncompleted portion of contracts with farmers and ranchers for the installation of conservation practices) are as follows: 1959, \$11,218 thousand; 1960, \$14,227 thousand; 1961, \$15,500 thousand; 1962, \$16,000 thousand.

The Service has been developing irrigation farming units for sale on the Eden Valley project in Wyoming, where the Bureau of Reclamation has constructed the water storage facility and the principal canals. Land development for irrigation has been completed in accordance with the project plan prepared cooperatively with the Bureau of Reclamation. Lands surplus to the needs of the project program are being transferred to the Department of the Interior during fiscal year 1961. Sale of three developed tracts of land has been deferred because of irrigation water shortage this year. The Eden Valley project office has been closed. A soil conservation district has been organized and staffed to furnish technical assistance and guidance to project farmers with respect to good farming practices, soil and water conservation, and efficient land use. Sufficient funds are available from prior year appropriations to provide a reserve in case of need to protect the investment of the Government in the unsold tracts pending their disposal.

AGRICULTURAL CONSERVATION PROGRAM SERVICE

Current authorizations:

AGRICULTURAL CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 7 to 15, 16(a), and 17 of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U.S.C. 590g-590(o), 590p(a), and 590q), including not to exceed \$6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States, **[\$242,000,000]** \$238,000,000, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building and soil- and water-conserving practices authorized under this head in the Department of Agriculture and Farm Credit Administration Appropriation Act, **[1960] 1961**, carried out during the period July 1, **[1959] 1960**, to December 31, **[1960] 1961**, inclusive: *Provided*, That not to exceed **[\$26,832,950]** \$29,297,000 of the total sum provided under this head shall be available during the current fiscal year for administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged to such limitation; but not more than **[\$5,458,900]** \$5,785,700 shall be transferred to the appropriation account "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That none of the funds herein appropriated shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That such amounts shall be available for administrative expenses in connection with the formulation and administration of the **[1961] 1962** program of soil-building and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to **[\$250,000,000]** \$100,000,000, including administration, and no participant shall receive more than \$2,500, except where the participants from two or more farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community): *Provided further*, That no change shall be made in such **[1961] 1962** program which will have the effect in any county of restricting eligibility requirements or cost-sharing on practices included in either the 1958 or the 1959 programs, unless such change shall have been recommended by the county committee and approved by the State committee: *Provided further*, That the proportion of the State fund initially allocated to any county for the **[1961] 1962** program shall not be reduced from the distribution of such funds for the 1959 program year: *Provided further*, That not to exceed 5 per centum of the allocation for the **[1961] 1962** agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, and in addition, on the recommendation of such county committee and approval of the State committee, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions: *Provided further*, That for the **[1961] 1962** program \$2,500,000 shall be available for technical assistance in formulating and carrying out agricultural conservation practices and \$1,000,000 shall be available for conservation practices related directly to flood prevention work in approved watersheds: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming material, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.*)

¹ Includes capital outlay as follows: 1960, \$21 thousand; 1961, \$10 thousand; 1962, \$10 thousand.

Note.—Reimbursements from non-Federal sources are from proceeds of sale of aerial photographs (7 U.S.C. 1387).

The program is designed to encourage conservation by sharing with farmers and ranchers the cost of carrying out approved soil-building and soil- and water-conserving practices which farmers generally would not perform to the needed extent with their own resources. The rate of cost-sharing which may be given in the form of conservation materials and services or a payment after completion of the practice, averages approximately 50% of the cost.

Conservation measures for which cost-sharing is offered include those which are primarily for (1) establishment of permanent protective cover, (2) improvement and protection of established vegetative cover, (3) conservation and disposal of water, (4) establishment of temporary vegetative cover, and (5) temporary protection of soil from wind and water erosion.

Under the 1959 program, new or additional practices were established on 1,005,505 farms and ranches, consisting of 31% of the cropland and 31% of all farm land in the United States. The following practices were installed under the 1959 program:

[In thousands]

Dams and reservoirs.....	structures.....	61
Standard terraces.....	acres.....	633
Diversion and spreader terraces.....	miles.....	4
Permanent sod waterways.....	acres.....	42
Stripcropping.....	acres.....	411

AGRICULTURAL CONSERVATION PROGRAM SERVICE—Continued

Current authorizations—Continued

AGRICULTURAL CONSERVATION PROGRAM—Continued

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the agricultural stabilization and conservation State committees to counties, and the agricultural stabilization and conservation county committees make commitments for conservation practice cost-sharing to eligible farmers and ranchers.

Loans from Commodity Credit Corporation are used to make advance payments to vendors for conservation materials and services furnished to farmers and ranchers prior to the time funds are appropriated each year. Repayment is made from balances of prior appropriations or from new funds appropriated.

The status of the loan account is:

AMOUNTS repaid or estimated to be repaid on Commodity Credit Corporation loans

[In thousands of dollars]

	1960 actual	1961 estimate	1962 estimate	Total
Balance of 1959 loan.....	29,500	-----	-----	29,500
1960 loan.....	9,000	29,200	-----	38,200
1961 loan.....	-----	12,000	25,500	37,500
Total.....	38,500	41,200	25,500	105,200
Interest.....	266	361	200	827

A program level of \$100 million for the 1962 crop year is proposed, a reduction of \$150 million below the 1961 program. It is anticipated that Federal cost-sharing assistance under the 1962 program will be directed toward conservation measures in each county which will contribute to less intensive use of cropland, and that assistance will be curtailed or eliminated for those conservation measures which contribute to an early increase in production. Payments for the 1962 program will be made from the 1963 appropriation.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

New obligational authority (reappropriation).....	202		

Cost-sharing assistance (up to 80% of the cost of carrying out approved practices) is offered to assist and encourage farmers to rehabilitate farm lands damaged by natural disasters. Assistance is available only when, as a result of wind erosion, floods, hurricanes, or other natural disasters, new conservation problems have been created which (1) if not treated, will impair or endanger the land; (2) materially affect the productive capacity of the land; (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area; and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

Funds for emergency cost-sharing assistance are distributed among States on the basis of needs for restoration of damaged lands.

ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allotments from other accounts are included in the schedules of the parent appropriations as follows:
 "Conservation reserve program," Commodity Stabilization Service.
 "Great Plains conservation program," Soil Conservation Service.

Intragovernmental funds:

AGRICULTURAL MARKETING SERVICE

Current authorizations:

MARKETING RESEARCH AND SERVICE

For expenses necessary to carry on research and service to improve and develop marketing and distribution relating to agriculture as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627) and other laws, including the administration of marketing regulatory acts connected therewith: *Provided*, That appropriations hereunder shall be available pursuant to 5 U.S.C. 565a for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of erecting any one building shall not exceed \$15,000, except for two buildings to be constructed or improved at a cost not to exceed \$30,000 each, and the cost of altering any one building during the fiscal year shall not exceed \$5,000 or 5 per centum of the cost of the building, whichever is greater:

Marketing research and agricultural estimates: For research and development relating to agricultural marketing and distribution, for analyses relating to farm prices, income and population, and demand for farm products, and for crop and livestock estimates, **[\$16,515,000] \$18,398,000: Provided**, That not less than \$350,000 of the funds contained in this appropriation shall be available to continue to gather statistics and conduct a special study on the price spread between the farmer and the consumer: *Provided further*, That no part of the funds herein appropriated shall be available for any expense incident to publishing estimates of apple production for other than the commercial crop;

Marketing services: For services relating to agricultural marketing and distribution, for carrying out regulatory acts connected therewith, and for administration and coordination of payments to States, **[\$26,579,900] \$29,982,000**, including not to exceed \$25,000 for employment at rates not to exceed \$50 per diem, except for employment in rate cases at not to exceed \$100 per diem pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in carrying out section 201(a) to 201(d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1291) and section 203(j) of the Agricultural Marketing Act of 1946.

For an additional amount for "Marketing research and service", for Marketing services, **\$1,350,000.** (5 U.S.C. 511-512, 541a, 556b, 563-564, 575; 7 U.S.C. 51-65, 71-87, 91-99, 181-229, 241-273, 411, 411a, 411b, 414a, 415b-415e, 423, 440, 471-476, 491-497, 499a-499s, 501-508, 511-511g, 516, 581-589, 951-957, 1551-1610; 15 U.S.C. 251-257i; 21 U.S.C. 94a, 451-469; 26 U.S.C. 4851-4854, 4861-4865, 4871-4877, 6001, 6804, 7233, 7263, 7492, 7493, 7701; 31 U.S.C. 725d; 74 Stat. 328, 734; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961; Supplemental Appropriation Act, 1961.)

New obligational authority:			
Appropriation.....	41,417	44,445	48,380
Proposed supplemental due to pay increases.....		2,776	

The domestic agricultural marketing and distribution functions of the Department are concentrated primarily in the Agricultural Marketing Service. The marketing job has become more complex with growth and shift in population, technological developments in production and marketing, and as more functions have been transferred from the farm and home to various segments of the marketing system. The work under this appropriation is aimed at aiding in the orderly and efficient marketing and effective distribution of agricultural products from the Nation's farms to the consumers.

During 1960, the Service acquired at no cost property valued at an estimated \$109.5 thousand which had been declared excess by other Federal agencies and by other services of the Department of Agriculture. Such property was used primarily in lieu of purchasing new equipment.

1. *Marketing research and agricultural estimates*—(a) *Marketing research*.—This work is aimed at developing practical answers to problems encountered in moving products from the farm to the consumer. In cooperation with public and private agencies and trade groups, efforts are made to expand markets, reduce losses from waste and spoilage, and reduce marketing costs through improved marketing efficiency and organization. The work includes research at each stage of marketing, such as at assembly points, terminal or central markets, and retail markets.

	1958 actual	1959 actual	1960 actual
Individual research projects:			
Active at end of year.....	493	459	463
Completed during year.....	76	99	103
Initiated during year.....	78	77	111
Contracts for marketing research by private firms or other non-Federal agencies:			
Number negotiated during year.....	44	40	25

Research findings made public through:			
Marketing research reports.....	53	92	74
Articles and formal speeches.....	236	268	258
Periodic reports.....	60	80	59
Press releases.....	53	98	103

The proposed increase for 1962 would provide for continuation of and increased emphasis on research to improve the spinning, weaving and finishing qualities of cotton started in 1961 with Commodity Credit Corporation funds.

(b) *Economic and statistical analysis*.—This work involves the collection, analysis and interpretation of data affecting agricultural prices, farm income, supply and consumption of farm products, trends in farm population, and changes in the level of living of farm people. The results of these studies are made available through situation, outlook and research reports which serve as the basis for much of the economic work done by the Extension Service, farm organizations, businessmen, and organizations handling farm products. Farmers and others rely on informa-

tion from these reports in planning the most profitable adjustments in their operations and marketing programs. Approximately 80 of the 90 outlook and situation reports published by the Department were issued under this activity. Further technical reporting of economic and statistical analysis activities was contained in about 18 reports published during 1960.

(c) *Crop and livestock estimates*.—This service provides the official estimates on agriculture, including acreage, yield, and production of crops, stocks and value of farm commodities, numbers and inventory value of livestock items, and prices paid and received by farmers. These data also are basic to computation of parity prices. Data on approximately 150 crop and livestock products are covered in more than 500 reports issued each year. The activity is conducted through 43 State offices serving 50 States, most of which are operated as joint State and Federal services. Cooperative arrangements with State agencies provide a considerable volume of additional data which would not be collected or made available from Federal funds. During 1960, cooperating States expended an estimated \$1.4 million of their own funds on these associated State programs. A comparison of activity data for 1959 and 1960, including work performed under cooperative arrangements, is as follows:

	1959 actual	1960 preliminary
Separate mailings of inquiry forms, average per field office.....	344	346
Total questionnaires handled, all field and D.C. offices:		
Number distributed.....	9,500,000	9,700,000
Number of returns tabulated.....	2,900,000	3,050,000
Number of objective survey contacts (measurements and interviews).....	32,700	32,200
Number of official reports issued, all offices.....	9,600	9,700
Copies of reports distributed.....	13,500,000	13,800,000
Publications distributed:		
Federal (mainly Agricultural Situation).....	3,100,000	3,100,000
State: Statistical and other.....	360,000	360,000
Special requests for information answered.....	75,000	75,000

The increase for 1962 would be used to expand to additional States and commodities the long-range program to improve the crop and livestock estimating service.

2. *Marketing services*—(a) *Market news service*.—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 100 cities and towns, often with financial support and cooperation of the States. Every available means of dissemination is used—mail, press, radio, television, telephone, telegraph, bulletin boards, and trade and farm publications.

The proposed increase for 1962 would be used to improve the overall dissemination of market data by strengthening the leased wire system.

MARKET NEWS SERVICE

	1958 actual	1959 actual	1960 actual
States covered by cooperative agreement..	39	40	41
Field offices:

Names on mailing list.....	302,646	295,139	273,185

(b) *Inspection, grading, classing, and standardization.*—Uniform standards of quality for agricultural products are established and applied to specific lots of produce to promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied directly by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. The inspection of poultry for wholesomeness is also carried on under this project. Approximately 63% of the total cost of this work was offset by fees and other revenue in 1960, which are shown principally under "Agricultural Marketing Service trust funds" in part III of the budget.

STANDARDIZATION ACTIVITIES

(c) *Regulatory activities.*—These include the administration of regulatory laws such as packers and stockyards, standard container, United States warehouse, and Federal seed, to assure fair play in the market place and protect producers and handlers of agricultural commodities from financial loss due to deceptive, careless, or fraudulent marketing practices. Assistance is also provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The continued growth of facilities and means for transporting, storing, buying and selling results in more demand and need for protection and benefits from these activities.

The increase for 1962 would be used to provide for more effective administration of the Packers and Stockyards Act, as amended.

	1960 actual	1961 estimate	1962 estimate

AGRICULTURAL MARKETING SERVICE—Con.

Current authorizations—Continued

PAYMENTS TO STATES AND POSSESSIONS

For payments to departments of agriculture, bureaus and departments of markets, and similar agencies for marketing activities under section 204(b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623(b)), \$1,195,000. Financing:			
New obligational authority (appropriation)....	1,195	1,195	1,195

Payments are made on a matching fund basis to State marketing agencies for carrying out specifically approved marketing service programs designed to bring about improved marketing. Under this activity, marketing specialists work with farmers, marketing firms, and agencies in solving marketing problems and in putting to use marketing research results.

This program covers such projects as methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products; and the collection and dissemination of special State and local market information and statistics. Through this cooperative approach, the Federal Government's leadership and money are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

In 1961, with 40 States conducting 117 projects, the program is being carried on generally at the same level as in 1960. For 1962, the program level will be the same as in 1961.

SCHOOL LUNCH PROGRAM

For necessary expenses to carry out the provisions of the National School Lunch Act (42 U.S.C. 1751-1760), \$110,000,000: *Provided*, That no part of this appropriation shall be used for nonfood assistance under section 5 of said Act: *Provided further*, That \$45,000,000 shall be transferred to this appropriation from funds available under section 32 of the Act of August 24, 1935, for purchase and distribution of agricultural commodities and other foods pursuant to section 6 of the National School Lunch Act. 1. *Food assistance*, in the form of both funds and food, is provided to States and possessions in serving lunches to school children. Each State's portion of the funds available is determined by a statutory formula which takes into account the number of school-age children in the State and the relationship between the per capita income of the State and the average United States per capita income.

The program is operated under an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and if accepted are reimbursed for a part of the food cost of each meal served.

In 1960, the States contributed to this program \$777 million, most of which came from payments by children. This was far in excess of the statutory matching requirement of \$3 for each Federal dollar of cash payment.

In addition to providing cash assistance, this appropriation is used to purchase food for distribution to the schools according to their need under section 6 of the School Lunch Act. Transfers are made to this appropriation from the fund authorized under section 32 of the Act of August 24, 1935, as amended, for the purchase and distribution of agricultural commodities and other foods pursuant to section 6 of the National School Lunch Act. Further, commodities acquired under price support programs and assistance through the Special Milk Program are available to the schools. The volume of surplus commodities distributed to schools, however, depends upon market conditions and the need for the Federal Government to remove surpluses.

The program in 1960 during the peak month provided lunches to over 31% of the approximately 40.7 million school children in the country. The number of type A lunches served, which must meet established nutritional requirements, increased approximately 7% over 1959. Participation in the program in December 1959 reached 12.8 million children in 62,300 schools and an appreciable increase in number of participating children is expected in 1961 and 1962.

During 1960 about \$672 million worth of agricultural commodities were used in the program. About 20% of this amount represented commodities contributed under section 6 of the School Lunch Act and the Federal surplus removal and price support programs.

Participation in the program from 1959 through 1962 is as follows:

	1959 actual	1960 prelim- inary	1961 estimate	1962 estimate
Number of schools (month of peak participation).....	61,442	62,975	63,000	63,500
Number of school children (peak-thousands).....	12,053	12,839	13,500	14,200
Number of meals served (millions)....	2,009	2,144	2,272	2,375

Financing of the program in the last 3 years was as follows (in millions of dollars):

	1958	1959	1960
State and local contributions (total, including payments by children).....	634.9	708.8	1,777.2
Federal appropriation (National School Lunch Act):

(b) Commodity distribution (sec. 6).....	14.8	42.7	61.1
Surplus commodity distribution.....	76.0	66.8	70.9
Special milk program.....	65.1	72.4	78.2
Federal contributions.....	239.6	275.7	303.9
Total, all contributions.....	874.5	984.5	1,081.1

¹ Preliminary.

2. *Operating expenses* consist of furnishing administrative and technical assistance to State agencies and participating schools; apportioning cash to States, Guam, Puerto Rico, and the Virgin Islands; administering directly the program for over 2,700 private schools where the State educational agency is prohibited by law from disbursing funds to such schools; procuring and distributing section 6 commodities; and formulating and administering overall policies and procedures, including audits and administrative reviews.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$28 thousand; 1959 (adjusted), —\$230 thousand; 1960, \$9 thousand; 1961, \$9 thousand; 1962, \$9 thousand.

¹ Includes capital outlay as follows: 1960, \$1 thousand; 1961, \$2 thousand; 1962, \$2 thousand.

License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U.S.C. 491–497, 499a–499s, 581–589).

These acts are intended to assure equitable treatment to farmers and others in the marketing of fresh and frozen

AGRICULTURAL MARKETING SERVICE—Con.**Permanent authorizations—Continued****PERISHABLE AGRICULTURAL COMMODITIES ACT FUND—Continued**

fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal settlements agreeable to both parties, (b) formal decisions involving payments of reparation awards between parties, and (c) suspension or revocation of license and/or publication of the facts. Approximately 25,000 licenses were in effect on June 30, 1960, and it is expected that licenses will remain at that level through 1962. Formal complaints have continued to increase and more than 2,400 are expected during 1962. Emphasis on assisting growers and shippers to correct or prevent misbranding of produce will tend to reduce the number of potential complaints.

Proposed transfer for pay increases to "Salaries and expenses," Foreign Agricultural Service.....		—178	

Under section 32 of the act of August 24, 1935 (7 U.S.C. 612c), an amount equal to 30% of customs receipts during each calendar year (except for an amount equal to 30% of such receipts collected on fishery products transferred to the Department of the Interior to encourage the distribution of fishery products), and unused balances up to \$300 million are available for expanding domestic and foreign market outlets for farm commodities. As provided in recent appropriation acts, transfers have been made from this fund to the school lunch program for the purchase and distribution of agricultural commodities and other foods pursuant to section 6 of the National School Lunch Act. Section 32 funds are also authorized for the administration of marketing agreements and orders, and the section 22 import-control programs. The basic legislation provides that funds devoted to any one commodity or product thereof must not exceed 25% of funds available. It also provides that the funds must be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949. It has been determined that this provision can be legally satisfied by setting aside or reserving the principal portion of section 32 funds for the use of perishable nonbasic agricultural commodities when the occasion arises warranting their use for such purpose.

1. *Commodity program payments* include direct purchases which are donated to the school lunch program, charitable institutions serving needy persons, and persons certified by welfare agencies as eligible for relief; diversion payments which enable processors to purchase surplus commodities on the domestic market, divert them to by-products and new uses, and sell them at prices comparable to competing products, thus creating new markets for

surplus commodities; export payments which enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices; and production payments which help to reestablish farmers' purchasing power. During the past 2 years assistance under these programs was given to the following commodity groups (in millions of dollars):

	1959	1960
Dairy products.....	101.1	51.9
Eggs and poultry.....	6.4	24.1
Fruits.....	.1	7.8
Grains.....		10.8
Livestock.....		8.0
Peanut butter.....	1.1	2.4
Vegetables.....	7.6	.2
Miscellaneous.....	.3	.3
Total.....	116.6	105.5

The use of section 32 program funds is contingent upon economic conditions. The estimates for both 1961 and 1962 reflect in total the requirements based on the situation as now foreseen. Distribution of this total in advance would be highly tentative since the type of program to be used is dependent upon a determination at the time of the kind of action which will best meet the particular need which had developed. If troublesome surpluses not now foreseen should develop, steps will be taken to use additional available funds for their removal or diversion as conditions might warrant.

2. *Surplus removal operating expenses* occur mainly in connection with purchasing, exporting, and diverting surplus commodities and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Distribution in 1960, including those under section 6 of the National School Lunch Act, is summarized below (in millions):

Distribution	Number of recipients (peak month)	Value of commodities distributed	Pounds of commodities distributed
By recipients:			
School children.....	14.6	\$132.0	523.5
Needy persons.....	4.3	59.4	525.9
Persons in charitable institutions.....	1.5	15.7	127.9
Foreign countries: 91.....		148.9	1,862.4
Total.....		356.0	3,039.7
By program:			
Section 32.....		62.4	178.1
Donation by Commodity Credit Corporation under section 416.....		232.5	2,602.5
Section 6, National School Lunch Act.....		61.1	259.1
Total.....		356.0	3,039.7

Supervisory assistance is furnished local and State groups to encourage the preservation of surpluses for year-round use. In cooperation with the food trade, press and radio, greater consumption of abundant foods is encouraged. In 1960 the monthly plentiful foods list contained an average of 10 foods, and 10 National and 24 area, State, and local drives were conducted.

3. *Marketing agreements and orders* are put into effect upon request of producers or handlers after hearings and investigations, and approval by producers (and handlers in case of marketing agreements). They help to stabilize prices and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessments upon handlers. On June 30, 1960, there were 80 orders

in effect for milk and 38 covering tree fruits, tree nuts, and vegetables.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects).....	1,536	9,443	-----	-----

SPECIAL MILK PROGRAM

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
Special milk program (total costs—obligations).....			95,000
Financing:			
New obligational authority (proposed supplemental appropriation).....			95,000

Under proposed legislation, 1962.—The current authority for the special milk program expires June 30, 1961. The program has been financed with funds advanced from the Commodity Credit Corporation. Pending results of an evaluation of this program, \$95 million is recommended to provide for a program in 1962 through a regular annual appropriation. The primary objective for this program is to increase the consumption of fluid milk. Funds will be used to provide assistance in the form of reimbursement

payments to eligible schools and child care institutions and for the necessary Federal administrative costs.

FOREIGN AGRICULTURAL SERVICE

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses for the Foreign Agricultural Service, including carrying out title VI of the Agricultural Act of 1954 (7 U.S.C. 1761-1768), *market development activities abroad*, and for enabling the Secretary to coordinate and integrate activities of the Department in connection with foreign agricultural work, including not to exceed \$25,000 for representation allowances and for expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1766), **[\$4,487,000]** \$13,686,000: *Provided*, That not less than \$400,000 of the funds contained in this appropriation shall be available to obtain statistics and related facts on foreign production and full and complete information on methods used by other countries to move farm commodities in world trade on a competitive basis: *Provided further*, That, in addition, not to exceed **[\$2,539,000]** \$3,117,000 of the funds appropriated by section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c), shall be merged with this appropriation and shall be available for all expenses of the Foreign Agricultural Service [in carrying out the purposes of said section 32].

[For an additional amount for "Salaries and Expenses", \$137,500; and in addition, \$100,000 of the funds appropriated by section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c), shall be merged with this appropriation and shall be available for all expenses of the Foreign Agricultural Service in carrying out the purposes of said section 32.] (5 U.S.C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

Note.—Estimate for 1962 includes \$8,893 thousand for activities previously carried under "Salaries and expenses (special foreign currency program)," Foreign Agricultural Service. The amounts obligated in 1960 and 1961 are shown in the schedules as comparative transfers.

The Foreign Agricultural Service administers programs and policies relating to foreign agriculture. It provides information and assistance as guides in the planning of production and marketing of U.S. agricultural commodities and helps smooth the channels through which exports move.

1. *Analysis of foreign agriculture and trade.*—Analyses are made of world trends in foreign agricultural production, trade, price, finance, marketing, consumption, competition, commercial, and trade policies, and economic policies of foreign governments, as such trends affect U.S. foreign agricultural trade and the domestic economy. The Service directs and coordinates Department participation in the formulation of trade programs and agreements to stabilize and expand world trade in American agricultural products, and to reduce restrictive tariff and trade practices against import of American agricultural commodities. Recommendations for the departmental positions on trade agreements and international commodity agreements are formulated. Continuous review is made of the trade regulations and financial conditions of signatories to the General Agreement on Tariffs and Trade as these factors relate to American farm products. Policies, programs, positions, and standards of participation in public and private international organizations are developed.

2. *Agricultural attachés.*—A worldwide agricultural attaché program is conducted by the Department. Assistance is provided in development of markets abroad for U.S. agricultural commodities. A comprehensive schedule of foreign agricultural market and trade reporting is maintained to meet the needs of the American agricultural industry.

3. *Foreign market promotion.*—Maintenance and expansion of foreign markets for surplus agricultural products are promoted by (a) obtaining and analyzing information on foreign-market requirements and making such information available to farm and trade groups; (b) developing market programs for use by producers, exporters, and Government officials to maintain and expand the market abroad of U.S. farm products; (c) assisting domestic trade representatives in negotiations with foreign government officials, importers, and consumers, and bringing together American exporters and foreign importers under conditions favorable to trade; (d) developing agreements with foreign countries for sales of U.S. agricultural commodities under title I of Public Law 480, and followup on the shipments of those commodities; and (e) directing and financing the operation of market development projects for agricultural products. In 1962, funds provided under foreign market promotion include the dollars required in countries where the only foreign currencies available to the United States are needed, and may be used, to meet the normal requirements of other agencies. Funds for programs in countries where the United States has "excess" currencies or currencies which are "restricted" in their use are included in the appropriation Salaries and expenses (special foreign currency program).

4. *Import controls.*—Importation of articles which interfere with programs carried out by the Department of Agriculture is investigated and the information is developed in accordance with section 22 of the Agricultural Adjustment Act, as amended. During the fiscal year ending June 30, 1960, investigations were conducted in 10 commodities and 4 recommendations were submitted to the President or the Tariff Commission. Under import

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes of market development activities under section 104(a) of that Act, \$13,621,000, and for the purposes of section 104(m) of that Act, relating to agricultural and horticultural fair participation and related activities, \$1,000,000] \$3,444,000, to remain available until expended: *Provided*, That [the dollar value of the unexpended balances, as of June 30, 1960, of allocations of foreign currencies heretofore made available to the Foreign Agricultural Service for the foregoing purposes of such sections 104 (a) and (m) is appropriated as of that date and shall be merged with this appropriation: *Provided further*, That funds appropriated herein shall be used to purchase such foreign currencies as the Department determines are needed and can be used most effectively to carry out the purposes of this paragraph, and such foreign currencies shall, pursuant to the provisions of section 104(a), be set aside for sale to the Department before foreign currencies which accrue under said title I are made available for other United States uses] *this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) of such Act unless such currencies are excess to the normal requirements of the United States.* (Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$8,893 thousand for activities transferred in the estimates to Salaries and expenses, Foreign Agricultural Service. The amounts obligated in 1960 and 1961 are shown in the schedules as comparative transfers.

Authorization to expend foreign currency receipts (net of appropriation to cover balances as of June 30, 1960).....	5,475		
New obligational authority (appropriation)	11,553	14,621	3,444

Note.—The gross foreign currency authorization in 1960 was \$6,078 thousand. The schedule above covers foreign currency authorizations for 1960. The appropriation for 1960 was equal to the unexpended balance of previous foreign currency authorizations as of June 30, 1960. All transactions in 1961 and 1962 relate to appropriations.

1. *Market development projects.*—Foreign currencies generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, are used under the provisions of section 104(a) by the Foreign Agricultural Service to develop new foreign markets and expand existing markets for U.S. agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. The type of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. In 1962 this appropriation will be limited to

dollar funds to purchase only those currencies determined to be excess to the normal requirements of the United States and those which by the terms of the sales agreements are limited to specific uses. Dollar funds for use in other countries are included in the appropriation "Salaries and expenses."

2. *Agricultural attachés.*—Foreign currencies were used in 1960 to pay certain costs of the agricultural attaché program. Foreign currencies are not being used for attaché program costs in 1961, nor are foreign currencies being requested for that purpose in 1962.

3. *Travel of U.S. agricultural specialists abroad.*—Foreign currencies were used in 1960, pursuant to section 104(f) of the Agricultural Trade Development and Assistance Act of 1954, as amended, to finance the travel of U.S. agricultural specialists to the U.S.S.R. under the cultural, technical, and educational exchange agreement between the two countries. Unexpended balances under section 104(f) were not covered by the 1960 appropriation.

Note.—Responsibility for participation in agricultural and horticultural exhibitions, for foreign policy reasons, has recently been transferred by Executive Order from the Department of Agriculture to the United States Information Agency.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

¹ Includes capital outlay as follows: 1960, \$4 thousand; 1961, \$3 thousand; 1962, \$3 thousand.

The major objectives of the Commodity Exchange Authority are to maintain fair and competitive pricing in the commodity futures markets by preventing manipulation and other abusive trading practices. Enforcement of the Commodity Exchange Act requires supervision over fu-

tures trading in 19 commodities on 16 exchanges currently designated as contract markets. Transactions on contract markets were estimated at 7.4 million in 1960, and the value of trading approximately \$26.4 billion, compared to an estimated 7.1 million transactions with a value of approximately \$27 billion in 1959.

1. *Licensing and auditing of brokerage houses.*—This consists of (a) prevention of the misuse of customers' funds by the analysis of financial statements of futures commission merchants and the periodic audits of their books and records; and (b) annual registration of futures commission merchants and floor brokers. The 1960 audits revealed that customers had to their credit \$80 million required to be segregated from the funds of the carrying brokers.

AUDITS AND REGISTRATIONS

	1960 actual	1961 estimate	1962 estimate
Audit of customers' segregated funds.....	563	575	580

Futures commission merchants registered.....	483	490	500
Floor brokers registered.....	739	750	775

2. *Supervision of futures trading.*—This embraces (a) examination and analysis of reports and other market data, the making of market position surveys, and publication of summary data; (b) establishment, review, and enforcement of speculative limits; and (c) cooperative activities with control committees of contract markets. In 1960, position surveys covered 9,278 traders.

Acreage allotment and marketing quota programs are designed to keep the production and marketing of cotton, wheat, rice, tobacco, and peanuts in line with demand in order to give each farmer a fair share of the available market and the total production required.

Acreage allotments, when necessary, are established at National, State, and county levels (only at State level in the case of tobacco). In general, the acreage allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed whenever the total supply for the designated basic commodities, except corn, reaches a level specified in the Agricultural Adjustment Act of 1938, as amended. However, quotas do not become effective unless approved by two-thirds of those voting in a farmer referendum.

Acreage allotments and marketing quotas have been proclaimed for the 1961 crops of wheat, cotton, peanuts, Flue-cured tobacco, and rice. Acreage allotments and marketing quotas will be proclaimed on the 1961 crops of the other kinds of quota tobaccos, not later than February 1, 1961. It is assumed that marketing quotas will also be in effect on the 1962 crops of these basic commodities. In order to maintain a carryover of upland cotton on August 1, 1962, at about the same level as for August 1, 1961, a national acreage allotment of 18,458,424 acres was proclaimed for the 1961 crop of upland cotton.

Under existing legislation, the Choice A and B plans, which were available to cotton producers in 1959 and 1960, are not applicable to the 1961 cotton crop.

Workload factors in the fiscal years 1961 and 1962 will consist primarily of the following:

	Tobacco	Peanuts	Wheat	Cotton	Rice

3. Relation of costs to obligations: Obligations incurred for costs of other years, net.....	2		
Total obligations.....	71,500	74,500	81,314
Financing:			
New obligational authority (appropriation).....	71,500	74,500	81,314

Total United States requirements and quotas are determined to provide consumers with adequate supplies of sugar at reasonable prices, to protect the domestic sugar industry, and to promote the export trade of the United States. The quota for each domestic area is allotted to individual sellers when necessary to achieve orderly marketing, and restrictive farm acreage allotments are established for producers when necessary to avoid surpluses.

Continuation of the sugar program is contingent upon enactment of legislation prior to the expiration of the present act on March 31, 1961. A recommendation will be submitted shortly to the Congress. Assuming that the effect of the basic quota and deficit reallocations will be offsetting in the enactment of legislation extending the program, this estimate will not be materially affected. However, in the event the new legislation varies materially from the present act with respect to the bases for payments to producers, consideration will necessarily be given to a supplemental estimate for 1962.

1. *Payments to sugar producers.*—Payments are made (a) to domestic producers of cane and beets who meet specified conditions of employment, production and price; and (b) for abandonment of planted acreage and crop deficiencies on harvested acreage due to natural calamities.

The increase of \$6.8 million as proposed for 1962 is due primarily to increased conditional payments to sugar producers.

Estimated production by areas is shown in the following table:

Area	SHORT TONS, RAW VALUE		
	1959 crop year	1960 crop year	1961 crop year
Continental beet area.....	2,304	2,450	2,700
Continental cane area.....	615	670	750
Hawaii.....	975	940	1,200
Puerto Rico.....	1,019	1,200	1,250
Virgin Islands.....	13	7	12
Total.....	4,926	5,267	5,912

2. *Operating expenses.*—This consists of the expenses of (a) the agricultural stabilization and conservation State and county offices in establishing farm production controls, determining compliance, and making payments to producers; and (b) the Service's departmental work in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price

determinations, establishing area production controls, and formulating overall policies and procedures.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$2 thousand; 1959 (adjusted), —\$2 thousand.

CONSERVATION RESERVE PROGRAM

For necessary expenses to carry out a conservation reserve program as authorized by subtitles B and C of the Soil Bank Act (7 U.S.C. 1831–1837 [and 1802], 1802–1814, and 1816), and to carry out liquidation activities for the acreage reserve program, to remain available until expended, \$330,000,000, with which may be merged the unexpended balances of funds heretofore appropriated for soil bank programs: *Provided*, That not to exceed [\$12,000,000] \$12,884,000 shall be available for administrative expenses, of which not less than [\$10,000,000] \$10,931,000 may be transferred to the appropriation account "Local administration, section 388, Agricultural Adjustment Act of 1938": *Provided further*, That no part of these funds shall be paid on any contract which is illegal under the law due to the division of lands for the purpose of evading limits on annual payments to participants. (74 Stat. 42, 411, 1030–1031; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Conservation reserve program (total program costs ¹).....	335,001	322,786	359,137
2. Relation of costs to obligations: Costs financed from obligations of other years, net (—).....	—456	—98

New obligational authority:			
Appropriation.....	335,000	330,000	330,000
Reappropriation.....		21,825	

¹ Includes capital outlay costs as follows: 1960, \$918 thousand; 1961, \$450 thousand; 1962, \$78 thousand.

The objective of this program is to help adjust total crop acreage more nearly in line with demand by withdrawing cropland from production and to establish and maintain sound conservation practices on the land withdrawn. Under authority which has now expired, the Secretary, through calendar year 1960, entered into 3- to 15-year contracts with producers. In return for removing designated cropland from production and for estab-

lishing necessary conservation practices, the producer receives an annual rental payment each year of the contract period, and cost-sharing assistance for the establishment of the required practices. Total annual rental payments to a producer are limited to \$5 thousand.

Participation in the program is summarized below:

Number of agreements 1956-60 programs.....	306,182
Number of acres.....	28,659,973
Payments made in calendar year 1959, estimated.....	\$321,522,121
Estimated payments to be made in calendar year 1960.....	\$375,400,000

Legislation is proposed which would extend authority to enter into new contracts for the 3-year period 1962-64 and increase total acreage to 60 million acres. A 1962 supplemental appropriation of \$19,381 thousand would be required for this purpose. See Proposed for later transmission.

Program by activities:			
Conservation reserve program (total costs—obligations).....			19,381
Financing:			
New obligational authority (proposed supplemental appropriation).....			19,381

COMMODITY STABILIZATION SERVICE—Con.**Proposed for later transmission—Continued****CONSERVATION RESERVE PROGRAM—Continued**

Under proposed legislation, 1962.—Legislation is being proposed to extend the Secretary's authority to enter into Conservation Reserve contracts for the 3-year period 1962 through 1964, and to increase total acreage in the reserve to 60 million acres by 1964, subject to appropriate changes in price support legislation, particularly for wheat. Under the 1962 program, total acreage would reach an estimated 39 million acres. A supplemental appropriation of \$19,381 thousand in 1962 would be required to provide for increased operating expenses and conservation practice payments under the extended program.

COMMODITY CREDIT CORPORATION**Current authorizations:****RESTORATION OF CAPITAL IMPAIRMENT**

To partially restore the capital impairment of the Commodity Credit Corporation determined by the [appraisals] appraisal of [June 30, 1959, and] June 30, 1960, pursuant to section 1 of the Act of March 8, 1938, as amended (15 U.S.C. 713a-1), [\$1,226,500,000] \$1,017,610,000. (Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF SPECIAL ACTIVITIES

To reimburse the Commodity Credit Corporation for authorized unrecovered costs through June 30, [1960] 1961 (including interest through date of recovery), as follows: (1) [\$32,572,000] \$83,790,000 under the International Wheat Agreement Act of 1949, as amended (7 U.S.C. 1641-1642); (2) [\$107,094,000] \$255,685,000 for commodities disposed of for emergency famine relief to friendly peoples pursuant to title II of the Act of July 10, 1954, as amended (7 U.S.C. 1703, 1721-1724); (3) [\$881,000,000] \$1,353,000,000 for the sale of surplus agricultural commodities for foreign currencies pursuant to title I of the Act of July 10, 1954, as amended (7 U.S.C. 1701-1709); (4) [\$18,000] \$13,000 for grain made available to the Secretary of the Interior to prevent crop damage by migratory waterfowl pursuant to the Act of July 3, 1956 (7 U.S.C. 442-[446]445); (5) [\$422,950,000] \$163,163,000 for strategic and other materials acquired by the Commodity Credit Corporation as a result of barter or exchange of agricultural commodities or products and transferred to the supplemental stockpile pursuant to Public Law 540, Eighty-fourth Congress (7 U.S.C. 1856); (6) \$1,264,000 for transfers to the appropriation "Marketing research and service" pursuant to the Act of August 31, 1951 (7 U.S.C. 414a), for grading tobacco and classing cotton without charge to producers, as authorized by law (7 U.S.C. 473a, 511d): Provided, That the unexpended balances of funds heretofore provided for the various purposes under this head may remain available until expended for the purposes for which appropriated and may be merged with the funds provided in this paragraph. (Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF SPECIAL MILK PROGRAM

To reimburse the Commodity Credit Corporation for amounts advanced for the fiscal year beginning July 1, 1960, for the special milk program for children pursuant to the Act of July 1, 1958, as amended (7 Stat. 276; 74 Stat. 84-85), \$90,000,000.

Permanent authorizations:**REIMBURSEMENT TO COMMODITY CREDIT CORPORATION, NATIONAL WOOL ACT****Public enterprise funds:**

Note.—Expenditures from the following fund for 1961 are subject to the first paragraph of title II of the Department of Agriculture and Farm Credit Administration Appropriation Act, 1961. For 1962 this paragraph is shown in the Department of Agriculture chapter, p. 392, preceding Federal Crop Insurance Corporation fund.

Under its corporate charter (15 U.S.C. 714-714p), and in accordance with specific statutes where applicable, the Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, food, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion.

Programs.—The budget is based on the following types of programs: (1) price support, (2) commodity export, (3) storage facilities, (4) supply and foreign purchase, (5) special milk program, and (6) special activities.

Obligations and expenditures for these programs include primarily loans, purchases, purchase agreements, carrying charges, incentive and other payments, operating and interest expenses, and advances and current obligations incident to special activities as authorized by specific legislation.

Budget assumptions.—The Corporation's budget estimates for 1961 and 1962 are based on the general assumptions (a) that employment, production, and national income will rise moderately both in 1961 and 1962 from the present level; (b) that on the average, the general level of prices will be the same as the present level; (c) that developments in international relations will not be

COMMODITY CREDIT CORPORATION—Continued**Public enterprise funds—Continued**

COMMODITY CREDIT CORPORATION FUND—Continued

such as to affect Government civilian programs generally; (d) that exports of agricultural products generally will be slightly higher than the 1960 level; (e) that acreage allotments and marketing quotas will be in effect for the 1961 crops of peanuts, rice, wheat, cotton and certain kinds of tobacco; (f) that the cotton program for the 1961 crop will revert to the program in effect on crops prior to the 1959 crop which does not provide for the choice A purchase program; and (g) that yields will be in line with recent averages.

In considering these estimates, it should be recognized that it is difficult to estimate requirements for the year ending June 30, 1962. They are dependent upon weather conditions and all other factors affecting volume of production of crops not yet planted in this country and abroad, economic conditions generally, food needs in this country and abroad, availability of dollar exchange, and other complex and unpredictable factors.

PRICE SUPPORT, SUPPLY, AND RELATED PROGRAMS AND SPECIAL MILK

1. *Price-support program.*—Price-support operations are carried out under the Corporation's charter powers (15 U.S.C. 714) and in conformity with the Agricultural Act of 1949, as amended, (7 U.S.C. 1421), and section 125 of the Agricultural Act of 1956 (7 U.S.C. 1813). Under the Agricultural Act of 1949, as amended, price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities, namely, tung nuts, honey, milk, butterfat, and the products of milk and butterfat, barley, oats, rye, and grain sorghums. Price support for wool and mohair is mandatory under the National Wool Act of 1954, through the marketing year ending March 31, 1962. Price support for other nonbasic agricultural commodities is discretionary except that whenever the price of either cottonseed or soybeans is supported, the price of the other must be supported at such level as the Secretary determines will cause them to compete on equal terms on the market. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissible price-support levels. Legislation should be enacted to make the necessary changes in the price-support program to reduce the heavy demands of the program on the Federal Treasury.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. Producers' commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are nonrecourse and the Corporation looks only to the pledged or mortgaged collateral for satisfaction of the loan. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity he may elect within the maximum specified in the agreement. Direct purchases are made from producers and processors depending on the com-

modities involved. The incentive payment program on wool and mohair is described under Special activities.

In all its price-support operations, the Corporation utilizes normal trade facilities to the maximum extent practicable. In its lending activities the Corporation uses local banks, cooperatives, and other financial institutions. Commercial storage facilities are used to a great extent in the storage of loan collateral and of stocks acquired by the Corporation.

Disposition of commodities acquired by the Corporation in its price-support operations is made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, as amended, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954, Public Law 83-480, as amended (7 U.S.C. 1691), title I of the Agricultural Act of 1954, as amended, title II of the Agricultural Act of 1956, as amended, the Agricultural Act of 1958, the act of August 19, 1958, in the case of cornmeal and wheat flour and the act of September 21, 1959 (7 U.S.C. 1427, note), with respect to sale of livestock feed in emergency areas. The provisions of section 202 of the Agricultural Act of 1949 with respect to furnishing dairy products to the armed services and veterans' facilities will expire on December 31, 1961.

To the extent that price-support commodities are disposed of through the commodity export program and special activities such as sales for foreign currencies, the furnishing of commodities for such purposes and similar operations, these disposals are, for accounting purposes, treated as price-support program disposals.

Realized losses.....	741,576	779,432	687,419

2. *Commodity export program.*—The Corporation promotes the export of agricultural commodities and products through sales, barter, payments and other operations. Such commodities and products may be those held in private trade channels as well as those in the Corporation's inventory. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5(d) and 5(f), and in accordance with specific statutes where applicable, such as sections 407 and 416 of the Agricultural Act of 1949, as amended, the International Wheat Agreement Act of 1949, as amended (7 U.S.C. 1641), the Agricultural Trade Development and Assistance Act of 1954, as amended, title I of the Agricultural Act of 1954 and title II of the Agricultural Act of 1956, as amended. In general, transactions involving foreign currencies are conducted pursuant to the Agricultural Trade Development and Assistance Act of 1954, as amended. However, other such transactions may be conducted under the charter authority.

Obligations under the International Wheat Agreement and titles I, II, and IV of the Agricultural Trade Develop-

ment and Assistance Act of 1954, as amended, are paid by the Corporation subject to reimbursement from appropriations authorized for such purpose. These programs are further described under Special activities.

In addition to the exports under the International Wheat Agreement, Corporation-owned wheat is available for export under barter programs of the Corporation at competitive world prices and under the Corporation's export credit sales program. It is also made available to exporters in payment of the price differential between the prevailing world export sales price and the domestic market price which is earned on exports of free-market wheat outside the International Wheat Agreement and under this agreement. Cash payments are made on all exports of wheat flour either under the International Wheat Agreement or outside the agreement. Wheat and flour payments outside the agreement are made on exports to countries not participating in the agreement.

In order to encourage movement of cotton, corn, barley, grain sorghums, oats, rye, and rice from free-market supplies into export channels, export payments are made in the form of these commodities from the Corporation's stocks. Cotton held in the Corporation's inventory is also sold for unrestricted use on a competitive price basis.

The Corporation conducts a cotton products export program designed to protect the competitive position of the domestic cotton industry in relation to sales of cotton products manufactured abroad from American cotton purchased at export prices. Equalization payments, based on the raw cotton content in the products exported, are made to exporters on cotton products of upland cotton grown and wholly processed in the United States.

Also, the Corporation furnishes agricultural commodities and products for distribution or exhibition at international trade fairs to aid in the development of foreign markets for such commodities.

3. *Storage facilities program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 4(h), 4(m), and 5 (a) and (b). The Corporation may (a) purchase and maintain (in storage-deficient areas) granaries and equipment for care and storage of grain owned or controlled by the Corporation; (b) make loans for the construction or expansion of farm-storage facilities; (c) provide storage-use guarantees to encourage the construction of commercial storage facilities; and (d) undertake other operations necessary to provide storage adequate to carry out the Corporation's programs.

4. *Supply and foreign purchase program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and (c) thereof. The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies, and to meet domestic requirements. Foods, agricultural commodities and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also, through purchases, loans, sales or other means, make available materials and facilities required in connection with the production and marketing of agricultural commodities.

Operations involving procurement for other Government agencies are conducted in accordance with section 4 of the act of July 16, 1943 (15 U.S.C. 713a-9), which requires that the Corporation be fully reimbursed for

services performed, losses sustained, operating costs incurred, or commodities purchased or delivered to or on behalf of any other Government agency from the appropriate funds of such agency. Operations not subject to section 4 of the act may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

The main activities now carried on are procurement for the International Cooperation Administration and other Government agencies of specialized commodities not in the Corporation's price-support inventory.

5. *Special milk program.*—Public Law 85-478 (7 U.S.C. 1446 note), as amended, authorized the use of not to exceed \$85 million for 1960 and \$95 million for 1961, of Commodity Credit Corporation funds to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under and in nonprofit institutions devoted to the care and training of children. The act further provides that amounts spent shall not be considered expended for the purpose of carrying out the price-support program. Public Law 86-446 (74 Stat. 85) authorized an appropriation to reimburse the Corporation for 1961 fiscal year costs separate from any other appropriation for the Corporation. It is recommended that extension of this program be financed on a direct appropriation basis. (See Agricultural Marketing Service.)

6. *Undistributed expenses.*—There are a number of expenses which are not allocated to a specific program. These include interest on (a) the capital stock of the Corporation, (b) borrowings from the Treasury, and (c) other obligations evidencing loans made by lending agen-

cies; administrative expenses; and other miscellaneous costs, including expenses of the agricultural stabilization and conservation county committees and Federal Reserve banks in connection with the Corporation's programs.

Administrative expenses are for the operating staff, including the services of employees of the Commodity Stabilization Service engaged in the Corporation's activities, services performed by other agencies of the Department, costs of audit, and payments to the General Services Administration for space in the District of Columbia and rent of field office space. Estimates for 1962 include a limitation of \$45 million for costs of administration including a reserve of not less than 7% for contingencies. The requested authorization excludes administrative expenses in connection with the supply and foreign purchase program, the wool and mohair program under the National Wool Act of 1954, the International Wheat Agreement, and the sale of long-staple cotton transferred from the national stockpile, since it is contemplated that full reimbursement will be received for these expenses. Such reimbursement will be obtained and used in 1962 in the same manner as in previous years.

Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses. Such expenses include inspection, classing and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors and work performed on a contract basis by agricultural stabilization and conservation county committees. Similarly, expenses of other Federal agencies whose services are utilized in the handling of Commodity Credit Corporation property are treated as program expenses. These include the fleet storage operation of the Maritime Administration conducted intermittently since 1949 and the services of the General Services Administration in connection with the strategic, critical, and other materials acquired by the Corporation.

During 1960, the Commodity Stabilization Service acquired at no cost property declared excess by other Federal agencies with an original acquisition cost to the Government of \$4 thousand. Such property was used to facilitate Commodity Credit Corporation price-support operations.

SPECIAL ACTIVITIES FINANCED BY COMMODITY CREDIT CORPORATION

These activities are carried out under authority of section 5(g) of the Corporation's charter and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted.

Except with respect to the activities set forth in items (10) and (11) where losses, if any, would be recovered through the general restoration of capital impairment, the Corporation receives reimbursement for costs of these activities through regular appropriations to the Department. The 1961 appropriation, together with the re-appropriation of the prior year's unused balances, covered 1960 costs. The proposed appropriations for 1962 will cover 1961 costs. Reimbursement for 1962 costs will be requested in a later budget.

Activities currently being carried out are as follows:

(1) *International Wheat Agreement (7 U.S.C. 1641-1642).*—This agreement, which was renewed for a period of 3 years effective August 1, 1959, operates to provide

an assured market for wheat to exporting countries and assured supplies of wheat to importing countries at stable and equitable prices. The maximum and minimum prices in the 1959 agreement are \$1.90 and \$1.50 per bushel, respectively, for the basic grade of wheat, No. 1 Manitoba Northern, at Fort William/Port Arthur, Canada, in terms of Canadian currency at the parity for the Canadian dollar determined for the purposes of the International Monetary Fund as at March 1949. The agreement total quantity represents about 36% of world trade in wheat, yet the nine exporting member countries export inside and outside the agreement about 90% of all wheat moving in world trade.

Funds of Commodity Credit Corporation and its stocks of wheat are used to pay (a) the difference between the selling prices prevailing under the agreement and the domestic market price of wheat, and (b) administrative and interest costs. The payment of the differential between the prevailing sales price of wheat under the agreement and the market price is paid to the exporter in Commodity Credit Corporation stocks of wheat rather than in cash. A cash payment for this differential is made for flour. The estimate for 1962 of \$88.8 million provides for reimbursing the Corporation for costs of \$71.5 million incurred in 1961 when an estimated 110 million bushels of wheat and wheat flour will be exported under the agreement and for unreimbursed 1960 costs of \$17.3 million.

(2) *Emergency famine relief to friendly peoples.*—The Commodity Credit Corporation, through December 31, 1961, is directed, under title II of Public Law 83-480, as amended (7 U.S.C. 1703, 1721-1724), to make its stocks of agricultural commodities available for emergency assistance to friendly peoples in meeting famine or other urgent relief requirements and to pay ocean freight charges for the shipment of donated commodities. Public Law 86-472, enacted May 14, 1960, authorized payment of transportation to point of entry of landlocked countries and general average contributions arising out of ocean transport of commodities transferred under title II. This law also amended section 202 of title II to authorize, through June 30, 1961, use of assistance under this title to meet the requirements of needy peoples and to promote economic development in underdeveloped areas in addition to that which can be accomplished under title I.

Through June 30, 1960, commitments undertaken under this authority totaled \$627.3 million. Of this amount the value of commodities authorized for shipment totaled \$479.4 million of which more than \$364.4 million was for grain, including rice. Actual commodity and freight costs incurred through June 30, 1960, were \$603 million. During 1961 and 1962, additional commodity and freight costs of \$275.2 million and \$140.9 million, respectively, are expected to be incurred under the program.

Appropriations are authorized to reimburse the Corporation for its costs in carrying out the program. Through December 31, 1959, a total of \$800 million was authorized. From January 1, 1960, \$300 million per calendar year is authorized through December 31, 1961, plus unused balances of the previous authorization. The estimate for 1962 of \$255.7 million provides reimbursement of \$275.2 million for estimated operations during 1961 less \$19.5 million of unused prior year balances applied against 1961 costs.

It is estimated that total costs under this program will approximate \$1,036 million by June 30, 1962, and the

following reflects the costs incurred in carrying out this program by fiscal years (in thousands of dollars):

	Program ex- penditures	Interest	Total
1955	86,623	273	86,896
1956	91,277	2,308	93,585
1957	120,430	4,461	124,891
1958	116,001	5,445	121,446
1959	95,511	2,417	97,928
1960	93,161	2,339	95,500
1961 (estimate)	272,388	2,797	275,185
1962 (estimate)	139,368	1,500	140,868
Cumulative totals	1,014,759	21,540	1,036,299

(3) *Sales of surplus agricultural commodities for foreign currencies.*—Under the Agricultural Trade Development and Assistance Act, as amended (7 U.S.C. 1701-1709), surplus agricultural commodities are sold for foreign currencies. These currencies may then be used within certain limitations by the United States Government for agricultural market development, purchase of strategic materials, military equipment facilities and services for the common defense, payment of U.S. obligations, military family housing, and other specified purposes.

If regular appropriations are available for any unrestricted purpose for which foreign currencies are used, the agency must buy the currency for dollars which are credited to the Corporation. Beginning with 1961, special appropriations have been made for uses of foreign currencies in excess of amounts needed for regular operations or where use of currencies is restricted by international agreement or understanding. As these currencies are used, the Corporation will receive reimbursement therefor from these appropriations. The Department of Defense directly reimburses the Corporation for foreign currencies used for military family housing prior to 1961 from quarters allowances and net rental receipts from such housing. Section 509 of Public Law 86-500, approved June 8, 1960 (74 Stat. 186), provides that at least 75% of the total cost of any family housing project or community facility hereafter constructed or acquired in any foreign country (with certain specific exceptions) by any military department shall be paid for from foreign currencies acquired by the Corporation under title I.

Through June 30, 1960, a total of 194 agreements had been signed with 38 countries for commodities representing an export market value of \$4,835.3 million including ocean transportation of \$515.7 million. The major commodities included were wheat, cotton, and fats and oils which together amounted to 81% of the total value of the agreements. Through that date commodities with an export market value of about \$3,623.1 million had been shipped. The total dollar equivalent of foreign currencies deposited in the Treasury through June 30, 1960, amounted to \$3,800.1 million.

Appropriations are authorized to reimburse the Corporation for its net costs in carrying out this program. Through December 31, 1959, a total of \$6.25 billion was so authorized. From January 1, 1960, \$1.5 billion per calendar year is authorized through December 31, 1961, plus unused balances of the previous authorization. Legislation will be proposed to the Congress to increase the authorization through calendar year 1961.

The estimate in 1962 of \$1,353 million covers estimated unreimbursed costs of operations through 1961 amounting to \$1,806.5 million less \$453.5 million representing the dollar equivalent of various foreign currencies

COMMODITY CREDIT CORPORATION—Continued**Public enterprise funds—Continued**

COMMODITY CREDIT CORPORATION FUND—Continued

received for agricultural commodities exported as of June 30, 1961, for which the Corporation may eventually be reimbursed in dollars from the sale of such currencies or from net rental receipts from military housing.

The following table reflects the net costs incurred by Commodity Credit Corporation by fiscal years (in thousands of dollars):

	Program expenditures	Interest	Total

(4) *Long-term supply contracts.*—Under title IV of the Agricultural Trade Development and Assistance Act (7 U.S.C., supp. 1, 1731–1736), the President is authorized to make agreements with friendly nations under which the United States would deliver surplus agricultural commodities over periods of up to 10 years and accept payment in dollars with interest over periods of up to 20 years. The funds and assets of the Corporation are authorized to be used to finance the sale and exportation of such commodities under title IV and appropriations are authorized to reimburse the Corporation therefor. In collaboration with other Government agencies, pilot programs are being developed during the fiscal year 1961 for deliveries under this title. Because of the current uncertainty of the volume of operations in 1961, no amount is included in the 1962 estimates to reimburse the Corporation for its costs.

(5) *Transfer of Commodity Credit Corporation grain to Interior for migratory waterfowl feed.*—The Commodity Credit Corporation is directed to make available to the Secretary of the Interior (7 U.S.C. 442–445), such grain acquired through price-support operations and certified by the Commodity Credit Corporation to be available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition.

During 1960, a total of 200 tons of Commodity Credit Corporation grain, with an investment value of \$13 thousand were transferred under this program. It is estimated that 400 tons of grain will be transferred in each of the fiscal years 1961 and 1962 at a cost to Commodity Credit Corporation of \$35 thousand in fiscal year 1961 and \$35 thousand in fiscal year 1962. The estimate for 1962 of \$13 thousand provides for reimbursement for operations during 1961 less \$22 thousand of unused prior year balance applied against 1961 costs.

(6) *Transfer of bartered materials to supplemental stockpile.*—The Commodity Credit Corporation is directed under title II of the Agricultural Act of 1956 (7 U.S.C. 1856) to transfer strategic and other materials acquired as a result of barter and exchange of agricultural commodities, other than those acquired for the national stockpile or for other purposes, to the supplemental stockpile. The act authorizes appropriations to reimburse the Corporation for amounts equal to the value of materials transferred.

During fiscal year 1960, materials valued at \$192 million were transferred under this program, and it is estimated that materials valued at \$207.9 million will be transferred during fiscal year 1961 and \$174.8 million in fiscal year 1962. The estimate for 1962 of \$163.2 million provides reimbursement for materials to be transferred during the fiscal year 1961 less \$44.7 million of unused prior year balance applied against 1961 costs.

(7) *Grading and classing activities.*—The Commodity Credit Corporation makes advances to the Agricultural Marketing Service for classing and grading of agricultural commodities without charge to producers (7 U.S.C. 414a). Such advances used for classing cotton and grading tobacco not placed under price-support loan must be repaid from subsequent appropriations. An appropriation for 1962 of \$1.3 million is proposed for repaying advances of \$1.4 million to be received in 1961 less \$147 thousand of unused prior year balance.

(8) *National Wool Act.*—Under the provisions of the National Wool Act of 1954, as amended, incentive payments are being used to encourage the annual domestic production of approximately 300 million pounds of shorn wool. Support of prices of wool and mohair is mandatory. Incentive payments are made to eligible producers on a percentage basis, reflecting the amount required to bring the national average received by all producers up to the announced incentive level. The incentive level shall not exceed 110% of parity. In a referendum conducted in September 1959, wool and lamb producers voted to continue the deduction from their incentive payment of an amount not to exceed 1 cent per pound of wool and 5 cents per hundredweight of unshorn lambs marketed. These funds financed promotional, advertising, and related market-development activities by the American Sheep Producers' Council, Inc., under an agreement with the Secretary of Agriculture.

570000—61—25

Funds of the Commodity Credit Corporation are used to carry on the wool incentive program. A permanent appropriation is provided to reimburse the Corporation, but the yearly amount is limited to 70% of all duties collected on wool and wool manufactures during the preceding calendar year.

Estimated costs and reimbursements to Commodity Credit Corporation during 1960, 1961, and 1962 are indicated in the following table (in thousands of dollars):

	<i>1960 actual</i>	<i>1961 estimate</i>	<i>1962 estimate</i>
Due at beginning of year.....	84,376	126,979	121,622

Appropriation: 1961, 1962, and 1963.....	67,190	59,000	52,000

(9) *Soil bank program.*—Pursuant to section 120 of the Agricultural Act of 1956 (7 U.S.C. 1808) the Secretary of Agriculture utilizes the facilities of the Corporation for making payments to farmers under this program. (See Commodity Stabilization Service.)

(10) *Military housing.*—During 1957 a contract was completed for the disposition of Commodity Credit Corporation-owned commodities valued at \$50 million for the construction of military housing in France with foreign currencies obtained from this transaction. Proceeds from rental and quarters allowances will be paid by the Department of Defense over a long period of years to reimburse the Corporation pursuant to the act of September 1, 1954 (5 U.S.C. 171z-1).

(11) *Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation.*—The act of July 10, 1957 (71 Stat. 290), authorizes the transfer of 50 thousand bales of domestically grown extra long-staple cotton from the national stockpile to the Corporation for sale. Proceeds less costs incurred, including administrative expenses, are covered into the Treasury as miscellaneous receipts.

(12) *Loans to Secretary of Agriculture for conservation purposes.*—Under section 391(c) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1391), the Corporation advances funds to the Secretary in amounts not to exceed \$50 million annually to purchase conservation materials and services. Repayments of the loans plus interest are made as soon as practicable in the succeeding fiscal year from funds appropriated for the agricultural conservation program. (See Agricultural Conservation Program Service.)

FINANCING THE PROGRAMS

Financing.—The programs of the Commodity Credit Corporation are financed by capital stock, borrowings, guarantees to purchase notes or other obligations evidencing loans made by lending agencies, issuance of certificates of interest in loans held by the Corporation, restoration of capital impairment, appropriations to reimburse the

COMMODITY CREDIT CORPORATION—Continued**Public enterprise funds—Continued**

COMMODITY CREDIT CORPORATION FUND—Continued

Corporation for costs of special activities, and receipts from operations.

Borrowing authority.—The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies. In connection with loan guarantees, the Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made by lending agencies or certificates of interest issued in connection with the financing of price-support operations. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U.S.C. 713a-4).

Interest on borrowings from the Treasury (and on capital stock) is paid in accordance with a policy of the Treasury that the rate shall be based upon the average interest rate on all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on certificates of interest and lending agency obligations for the period the agencies have their funds invested.

On the basis of the budgetary assumptions heretofore described, the consequent estimated program requirements currently indicate no need for an increase in borrowing authority. Since there are so many uncontrollable factors affecting the programs of the Corporation involving crops which have not even been planted, it must be recognized that estimates of the use of borrowing authority are highly tentative.

POSITION WITH RESPECT TO BORROWING AUTHORITY AS OF JUNE 30

[In millions of dollars]

	1960 actual	1961 estimate	1962 estimate
Statutory borrowing authority.....	14,500	14,500	14,500
Deduct borrowings from Treasury.....	12,704	13,396	13,653
Obligations to purchase loans or certificates held by lending agencies (guaranteed by Commodity Credit Corporation).....	156	224	327
Total statutory borrowing authority outstanding.....	12,860	13,620	13,980
Net statutory borrowing authority available.....	1,640	880	520

Note.—This table does not reflect the following charges: Accounts payable, accrued liabilities, and obligations outstanding other than obligations to purchase loans and certificates held by banks. These do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or loans or certificates held by banks.

Restoration of capital impairment.—Pursuant to the act of March 8, 1938, as amended (15 U.S.C. 713a-1), an appraisal of the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury to determine the net worth. If the net worth is less than \$100 million, the Secretary of the Treasury restores the amount of capital impairment; if net worth is more than \$100 million, the Corporation pays the surplus to the Treasury (15 U.S.C. 713a-2). The appraisal of the assets is on the basis of cost to the Corporation. The capital impairment, therefore, represents realized losses.

The realized losses reflected on the books of the Corporation for 1960 were \$1,612 million. An appropriation of \$1,226 million was received in fiscal year 1961 to restore the 1959 unrecovered realized losses of \$632 million and \$594 million for part of the 1960 estimated losses. The estimate for 1962 of \$1,018 million represents the remainder of the unrestored 1960 actual realized losses of \$1,612 million.

The capital impairment has previously been restored as follows (in thousands of dollars):

¹ Statutory obligations against borrowing authority include only borrowings from Treasury and obligations to purchase notes or other obligations evidencing loans made by lending agencies. Other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or in notes or other obligations evidencing loans made by lending agencies.

Note.—In addition to obligations other than liabilities reflected in the status of certain fund balances the Corporation does not reflect in its accounts claims by the Corporation on which adequate proof has not been established and the outstanding guarantee and occupancy agreements for storage space.

¹ Consists of the following items: Sales of surplus agricultural commodities for foreign currencies—amounts to be recovered from other agencies for future sales of foreign currencies for dollars and from Department of Defense for use of foreign currencies for construction of military housing abroad. Long-term supply contracts—amounts due from foreign countries for export value of commodities furnished and interest. Reimbursement to Commodity Credit Corporation, National Wool Act—amounts of liability for accrued payments due producers which will be paid in the succeeding fiscal year. Military housing (Public Law 84-161, barter and exchange)—amount to be recovered from Department of Defense for value of agricultural commodities exchanged for construction of military housing abroad. Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation—amount available for payment of additional costs or for deposit in the Treasury as miscellaneous receipts. Soil bank—unused advance received from funds appropriated for soil bank programs and small

residual balance of unpaid acreage reserve certificates. Loans for agricultural conservation purposes—amount due from Secretary of Agriculture for advance purchase of conservation materials.

² Because of the current uncertainty of the volume of operations in 1961, no amount is included in the 1962 estimates to reimburse the Corporation for its costs.

³ The estimated appropriation of \$59,000 thousand for 1962 to reimburse the Corporation represents an amount equal to 70% of the preceding calendar year's customs receipts on wool and wool products to which reimbursement is limited in each fiscal year. The additional amounts due will be reimbursed from subsequent years' customs receipts.

⁴ Amounts bracketed are contained in "Soil bank program" under Commodity Stabilization Service.

⁵ Includes \$25,412 thousand reappropriated of which \$20 thousand was not used, and excludes \$10 thousand return of prior year balances.

LIMITATION ON ADMINISTRATIVE EXPENSES

Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed \$45,726,000 \$44,956,000 shall be available for administrative expenses of the Corporation: *Provided further*, That \$1,000,000 of this authorization shall be available only to expand and strengthen the sales program of the Corporation pursuant to authority contained in the Corporation's charter: *Provided further*, That not less than 7 per centum of this authorization shall be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such time as may become necessary to carry out program operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further*, (1) That no part of this authorization shall be used to formulate or carry out a price-support program for 1960 under which a total amount of price support in excess of \$50,000 would be extended through loans, purchases, or purchase agreements

made or made available by Commodity Credit Corporation to any person on the 1960 production of any agricultural commodity declared by the Secretary to be in surplus supply, unless (a) such person shall reduce his production of such commodity from that which such person produced the preceding year, in such percentage, not to exceed 20 per centum, as the Secretary may determine to be essential to bring production in line within a reasonable period of time with that necessary to provide an adequate supply to meet domestic and foreign demands, plus adequate reserves, or (b) such person shall agree to repay all amounts advanced in excess of \$50,000 for any agricultural commodity within twelve months from the date of the advance of such funds or at such later date as the Secretary may determine, (2) that the term "person" shall mean an individual, partnership, firm, joint-stock company, corporation, association, trust, estate, or other legal entity, or a State, political subdivision of a State, or any agency thereof, (3) that in the case of any loan to, or purchase from, a cooperative marketing organization, or with regard to price support on an agricultural commodity extended by purchases of a product of such commodity from, or by loans on such product to, persons other than the producers of such commodity, such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount

of price support received by such person for purposes of such limitation, and (4) that the Secretary of Agriculture shall issue regulations prescribing such rules as he determines necessary to carry out this provision]. (7 U.S.C. 442-445, 624, 1282, 1901, 1385, 1391c, 1421-1432, 1441-1449, 1691-1697, 1701-1709, 1721-1724, 1731-1736, 1741-1747, 1808, 1813, 1851-1854, 1856-1857, 1859-1860; 12 U.S.C. 1148a-2; 15 U.S.C. 712a, 713a-10, 714-714p; 31 U.S.C. 841, 846-852, 866-868c, 869; 50 U.S.C. ¹ Includes capital outlay as follows: 1960, \$32 thousand; 1961, \$59 thousand; 1962, \$59 thousand.

This appropriation finances a portion of the administrative and operating expenses of the Corporation. The budget for insurance operations and other costs financed from capital funds appears below.

During 1960, the Corporation acquired at no cost property declared excess by other agencies of the Department of Agriculture, with an estimated original cost to the Government of \$2.7 thousand. Such property was used primarily for upgrading of older equipment, for use by seasonal employees, and during periods other property was being repaired.

4. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1959, \$11 thousand; 1960, \$45 thousand; 1961, \$45 thousand; 1962, \$45 thousand.

Purpose and financial organization.—The Federal Crop Insurance Corporation, a wholly owned Government Corporation, was created on February 16, 1938 (7 U.S.C. 1501-1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance and providing the means for the research and experience helpful in devising and establishing such insurance. The Corporation provides all-risk insurance protection to farmers against loss from unavoidable causes. Since 1948, the crop insurance program has been conducted on a limited basis in selected counties and on selected crops to obtain adequate actuarial data for the gradual expansion of the program to a national basis.

Capital stock of \$100 million is authorized to be subscribed by the United States. As of June 30, 1960, the Secretary of the Treasury held receipts for \$40 million of the authorized stock, leaving \$60 million unissued.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which are for deposit to this fund come mainly from premiums for insurance protection afforded farmers on their investment in the production of insured crops. The principal payments from this fund are for indemnities to insured farmers who suffer crop losses arising from causes against which crop insurance provides protection, the direct cost of adjusting losses, and part of the administrative and operating expenses. The annual appropriation for the major portion of the administrative and operating expenses of the Corporation is presented earlier in the budget.

Budget program.—The Corporation plans to continue its policy of gradually expanding the program to additional crops and counties. For the 1961 crop year (fiscal year 1962) the crop insurance program will be increased by 25 counties. The following table indicates the scope of the insurance program planned for 1960, 1961, and 1962. Amounts in the 1960 column are actual and pertain to the 1959 crop year. The 1961 column pertains to

the 1960 crop year and reflects the current favorable growing conditions for the 1960 insured crops. Indemnities shown in the 1962 column are estimated at 90% of the premium.

	1960 fiscal year (1959 crop year) actual	1961 fiscal year (1960 crop year) estimate	1962 fiscal year (1961 crop year) estimate

Indemnities (in thousands).....	\$14,131	\$7,902	\$22,000
Loss ratio.....	.76	.44	.90

Financing.—Income from operations for the past 3 years will provide adequate operating funds for 1962. Therefore, no additional capital funds are being requested for program operations. The authority to pay an increased amount of operating and administrative expenses from premium income, proposed for 1962, is required to cover the cost of servicing the additional crops insured and new counties budgeted for the 1962 crop year. Legislation will be proposed to permit the inclusion, on a gradual basis, of administrative expenses in the determination of premium rates.

Operating results and financial condition.—Preliminary estimates for crop year 1960 (fiscal year 1961) indicate a favorable loss ratio for the fourth consecutive year. Premiums of \$17.8 million are currently estimated to exceed indemnities by \$9.9 million. For the crop years 1948 through 1959, premium income of \$226.6 million exceeded indemnity costs of \$220.2 million by \$6.4 million. Premium income exceeded indemnity costs in 6 years of the 12-year period. As of June 30, 1960, the Corporation's surplus was \$1.7 million. The favorable loss experience which occurred the past 3 years is responsible for the elimination of the deficit which previously existed.

The following table summarizes the insurance operations by commodities for 1960, 1961, and 1962 (in thousands of dollars).

RURAL ELECTRIFICATION ADMINISTRATION

Current authorizations:

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-924), as follows:

LOAN AUTHORIZATIONS

For loans in accordance with said Act, and for carrying out the provisions of section 7 thereof, to be borrowed from the Secretary of the Treasury in accordance with the provisions of section 3(a) of said Act, as follows: Rural electrification program, **[\$110,000,000]** \$115,000,000; and rural telephone program, **[\$80,000,000]** \$100,000,000; and an additional [amounts] amount not to exceed **[\$60,000,000 for each program]** \$30,000,000, may be borrowed under the same terms and conditions to the extent that such amount is required during the fiscal year **[1961]** 1962 under the then existing conditions for the expeditious and orderly development of the rural electrification [program and rural telephone] program. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.*)

The Administration conducts two major programs: (a) the rural electrification program to provide electric service to farms and other rural establishments; and (b) the rural telephone program to furnish and improve telephone service in rural areas. Funds for making loans are borrowed from the Secretary of the Treasury.

1. *Rural electrification.*—This program is financed through loans which bear 2% interest and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2% interest to electrification borrowers to be reloaned to their consumers for wiring and for the installation of electrical and plumbing appliances and equipment.

When the rural electrification program was initiated in 1935, less than 11% of all farms had electric service. On June 30, 1960, about 97% of the farms were electrified. The major need for loan funds continues to be for system improvements and the generation of power to satisfy the steadily increasing requirements of consumers.

Cumulative consumers served (thousands).....	4,767	4,877	4,987
Number of borrowers.....	1,087	1,088	1,088

2. *Rural telephone.*—Loans are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

In 1950, when the telephone program started, the Census of Agriculture showed 38.2% of all farms with telephone service, fewer in both number and percentage than in 1920. Approximately 70% of the farms now have telephone service. Cumulative Rural Electrification Administration loans through June 30, 1960, will eventually provide initial or improved service to an estimated 1,372 thousand rural subscribers.

FARMERS HOME ADMINISTRATION

Current authorizations:

To carry into effect the provisions of titles I, II, and the related provisions of title IV of the Bankhead-Jones Farm Tenant Act, as amended (7 U.S.C. 1000-1031); the Farmers Home Administration Act of 1946 (7 U.S.C. 1001, note; 31 U.S.C. 82h; 12 U.S.C. 371; 35 D.C. Code 535; 60 Stat. 1062-1080); the Act of July 30, 1946 (40 U.S.C. 436-439); the Act of August 28, 1937, as amended (16

U.S.C. 590r-590x-3), for the development of facilities for water storage and utilization in the arid and semiarid areas of the United States; the provisions of title V of the Housing Act of 1949, as amended (42 U.S.C. 1471-1483), relating to financial assistance for farm housing; the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (40 U.S.C. 440-444); the items "Loans to farmers, 1948 flood damage" in the Act of June 25, 1948 (62 Stat. 1038), and "Loans to farmers, property damage" in the Act of May 24, 1949 (63 Stat. 82); the collecting and servicing of credit sales and development accounts in water conservation and utilization projects (53 Stat. 685, 719), as amended and supplemented (16 U.S.C. 590y, z-1 and z-10); and the Act to direct the Secretary of Agriculture to convey certain mineral interests, approved September 6, 1950 (7 U.S.C. 1033-1039), as follows:

LOAN AUTHORIZATIONS

For loans (including payments in lieu of taxes and taxes under section 50 of the Bankhead-Jones Farm Tenant Act, as amended, and advances incident to the acquisition and preservation of security of obligations under the foregoing several authorities, except that such advances under title V of the Housing Act of 1949, as amended, shall be made from funds obtained under section 511 of that Act, as amended): Title I and section 43 of title IV of the Bankhead-Jones Farm Tenant Act, as amended, [\$26,900,000] \$20,000,000, of which not to exceed \$2,500,000 may be distributed to States and territories without regard to farm population and prevalence of tenancy, in addition to the amount otherwise distributed thereto, for loans in reclamation projects and to entrymen on unpatented public lands; title II of the Bankhead-Jones Farm Tenant Act, as amended, [\$197,100,000] \$160,000,000; the Act of August 28, 1937, as amended, \$3,000,000: *Provided*, That not to exceed the foregoing several amounts shall be borrowed in one account from the Secretary of the Treasury in accordance with the provisions set forth under this head in the Department of Agriculture Appropriation Act, 1952 [*Provided further*, That an additional amount, not to exceed \$40,000,000, may be borrowed under the same terms and conditions to the extent that such amount is required during fiscal year 1961 under the then existing conditions for the expeditious and orderly conduct of the loan programs under the Bankhead-Jones Farm Tenant Act, as amended, not to exceed \$5,000,000 of which shall be available for loans under title I and section 43 of title IV of such Act, as amended]. The Administration makes and insures loans to farmers unable to obtain credit from other sources at reasonable rates. The total borrowing authorization requested in 1962 for loans amounts to \$183 million and compares to the 1961 authorization of \$227 million plus a contingency

FARMERS HOME ADMINISTRATION—Continued

Current authorizations—Continued

LOAN AUTHORIZATIONS—Continued

authorization of \$40 million of which not to exceed \$5 million may be made available for farm ownership loans.

The present authority to make loans to farmers and ranchers is the cumulative result of the enactment of many separate laws over a long period of years. Legislation is being proposed to simplify, consolidate, and improve the authority of the Secretary to make loans, and to provide for a revolving fund basis of operation.

In addition to the direct loans, farm ownership and soil and water conservation loans advanced by private lenders will be insured within the annual statutory insurance authority of \$125 million for farm ownership and \$25 million for soil and water conservation loans. Contingent liabilities for these insured loans are reflected in the farm tenant-mortgage insurance fund schedules.

1. *Farm ownership loans.*—Direct farm ownership loans are made to tenants, sharecroppers, farm laborers, owners of inadequate farms, and eligible veterans for the purchase or improvement of family-type or less-than-family-type farms. Until June 30, 1961, loans may be made to farm owners primarily for the refinancing of secured or unsecured indebtedness. These loans may be made up to the fair value of the farm (normal market value on less-than-family-type farms to owner-operators with off-farm income) at not to exceed 5% interest up to 40 years. Farm ownership and farm housing loans made with funds advanced by private lenders are insured by the Government up to 90% of the value of the farm for 40 years at not more than 4% interest, plus 0.5% as an insurance premium, and at least 0.5% as an administrative expense charge. The Administration services these insured loans, makes collections, and pays the lender.

FARM OWNERSHIP LOANS

Insured loans.....	1,204	16,885	1,490	20,000	1,620	25,000

2. *Farm operating loans.*—Direct loans are made for periods up to 7 years at 5% interest in amounts up to \$10 thousand, with a limitation of \$20 thousand on the total principal indebtedness, to provide reasonable farm and home credit for the purchase of livestock, feed, seed, farm equipment, and other farm necessities, including the refinancing of indebtedness to operators of not larger than family-type farms. In justifiable cases, loans may be made beyond 7 years but not beyond 10 years.

3. *Soil and water conservation loans.*—Direct and insured loans are made to farmers and associations for the effective development and utilization of water supplies and for the improvement of farmland by soil and water conserving facilities and practices. Interest rates on these loans usually are set administratively at the same rates as farm

ownership loans (5%) except that currently direct loans to associations are carrying a rate of one-half of one percent below loans to individuals. On each insured loan, 0.5% as an insurance premium and at least 0.5% as an administrative expense charge is retained by the Government. Loans are made for periods up to 20 years for individuals and 40 years for associations.

4. *Farm housing loans.*—Direct farm housing loans are made to farmowners for periods up to 33 years at 4% interest to construct, improve, alter, repair, or replace dwellings and other farm buildings. It is estimated that \$40 million will be borrowed from the Treasury in 1961 from the balance of \$292 million available at June 30, 1960. The current authority expires June 30, 1961. Loans similar to the farm housing loans will be authorized under the proposed general loan legislation referred to above.

¹ Includes capital outlay as follows: 1960, \$74 thousand; 1961, \$70 thousand; 1962, \$70 thousand.

1. These moneys are used to administer the loan programs of the Farmers Home Administration including reviewing applications, making and collecting loans, and providing technical assistance and guidance to borrowers.

During 1960, the value of property, acquired at no cost to the Farmers Home Administration, which had been declared excess by other Federal agencies, had an original acquisition cost to the Government of approximately \$4.1 thousand. Such property consisted primarily of office furnishings and was used for the upgrading of older equipment.

2. Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

Purpose and financial organization.—This fund finances loans to farmers and stockmen in the event of disasters and other emergencies, in areas where agricultural credit is not readily available. The fund is also available within statutory limits for emergency assistance in furnishing feed and seed in areas suffering major disasters. The fund was created by the transfer of the assets of the Regional Agricultural Credit Corporation of Washington which was abolished. Legislation is being proposed to require the States to share a greater part of the costs of farm disaster relief assistance.

Budget program—1. *Loan commitments*—(a) *Production emergency loans.*—Loans are made at 3% interest to farmers and stockmen suffering production disasters.

(b) *Economic emergency loans.*—Loans may be made at 3% interest in any economic disaster area declared by the President.

(c) *Special livestock loans.*—For 4 years after July 14, 1953, loans were authorized to be made at 5% interest to established livestock producers who had a reasonable chance of working out their difficulties with supplementary financing. Supplemental loans may be made for an additional 4 years after July 14, 1957, to individuals already indebted.

(d) *Other loans.*—Where necessary to protect the Government's investment, obligations are incurred in connection with outstanding loans to provide for payment of such costs as taxes and insurance. Such advances are charged to the borrowers' accounts.

3. *Administrative expenses.*—The principal administrative expenses are related to the loan programs of the Farmers Home Administration. These expenses are estimated at \$2.6 million in each of the years 1961 and 1962. Administrative expenses of the Commodity Stabilization Service are estimated at \$110 thousand in 1961 and \$100 thousand in 1962, in connection with the emergency feed program. Administrative expenses for the Office of the General Counsel are estimated at \$19 thousand in 1961 and \$29 thousand in 1962.

Financing the budget program.—No new budgetary authorization is required for 1962. A net loss of \$2.2 million is estimated on an accrual basis. Net expenditures of \$3.9 million are anticipated on a cash basis due primarily to estimated excess loan advances over loan repayments during the year. During 1962, the program will be wholly financed by receipts from operations.

Operating results and financial condition.—Revenue for 1962, consisting principally of interest on loans, is estimated at \$1.6 million, compared to expenses of \$3.8 million, resulting in an estimated loss of \$2.2 million. A net loss of \$2.1 million is estimated for 1961, and a net loss of \$0.4 million resulted in 1960. The improved repayment record on emergency loans dictated the need for a downward revision in the formula for determining valuation reserves on loans during 1960. This change resulted in reduced losses during that year.

Loans receivable, after allowance for losses, are expected to amount to \$35.3 million on June 30, 1962, as

compared with \$33.7 million at June 30, 1961, and \$37.5 million on June 30, 1960.

The Government investment at June 30, 1962, is expected to be \$118.5 million, consisting of \$205.9 million appropriated and donated, less a deficit of \$87.3 million.

Purpose and financial organization.—This fund, authorized in the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1005(a)), is used to insure farm ownership loans and soil and water conservation loans. The insurance endorsement on each loan includes an agreement by the Government to purchase the loan after a specified period of not less than 5 years, at the holder's option. The initial fund of \$1 million is supplemented by charges collected from insured farm ownership and soil and water conservation loan borrowers, inspection and appraisal fees, and other charges. Receipts are available for administrative expenses and to cover losses. Public Law 85-748, approved August 25, 1958 (72 Stat. 840), authorizes the making of loans from the fund to be sold individually or in blocks and insured. Up to \$5 million may be borrowed from the Secretary of the Treasury to facilitate the blocking of such loans. Interest paid the Secretary of the Treasury on borrowings is based on the current average market yields of outstanding marketable obligations of the United States.

Budget program.—Loan advances and purchases are estimated at \$19.7 million in 1962, an increase of \$5.9 million over 1961 and an increase of \$7 million over 1960. Included is \$1 million in 1961 and \$1 million in 1962 for

making loans which will later be sold on an insured basis. The increase in purchases of loans is attributable to the prevailing interest rate situation which makes unattractive the further retention of loans carrying 3 and 3½% interest to the holder, which currently are eligible for redemption.

Financing.—In order to finance operations, it is estimated that it will be necessary to utilize the statutory authorization (7 U.S.C. 1005c) to borrow from the Treasury in the net amount of \$1.1 million in 1961. Net borrowings from the Treasury of \$8.3 million are anticipated in 1962.

Operating results and retained earnings.—Total income, consisting principally of insurance premiums, is estimated at \$3.7 million in 1962, an increase of about \$0.2 million from 1961.

The need to purchase loans is expected to result in outstanding loans receivable of \$52.4 million at June 30, 1962. Retained earnings, available to cover future losses, are estimated to be \$10.6 million at the end of 1962. These earnings, when added to the \$1 million appropriation and estimated borrowings of \$44.9 million from the Treasury, represent a \$56.5 million Government investment.

The Office serves as legal counsel for the Secretary of Agriculture and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department's activities.

The increase in 1962 is to meet the increased legal workload connected with the loans made under section 8 of the Watershed Protection and Flood Prevention Act.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$7 thousand; 1959 (adjusted), \$3 thousand; 1960, \$5 thousand; 1961, \$5 thousand; 1962, \$5 thousand.

¹ Includes capital outlay as follows: 1960, \$22 thousand; 1961, \$8 thousand; 1962, \$8 thousand.

The Office provides overall planning, coordination, and administration of the Department's programs, and supplies certain services on a departmentwide basis.

During 1960, the Office of the Secretary acquired at no cost property declared excess by other agencies of the Department of Agriculture with an original acquisition cost to the Government of \$5.4 thousand. Such property was used primarily for upgrading of older equipment.

2. *Personnel administration and service.*—Departmental policies and procedures are promulgated for the personnel management program. The operational phases of this program have been substantially delegated to the agencies. A systematic review is conducted to insure unification thereof and to measure its effectiveness in serving the agencies' personnel management requirements.

3. *Budgetary and financial administration and service.*—This covers the fields of departmental budgetary and financial management, internal audit and related activities; policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial, and related implications.

4. *General operations.*—These embrace departmental policies and procedures for real and personal property, and supply management. Administrative services are provided for the Office of the Secretary, and departmental service operations are furnished, including the Department's post office, telephone switchboard, telegraph office, and reproduction and supply services.

5. *Administrative management.*—This covers the areas of organization, paperwork activities (forms, reports, correspondence, and records maintenance and disposition), administrative issuances, and management improvement. Departmental policies and procedures are promulgated, improvement studies are undertaken, and agency administrative management programs are evaluated to insure economical and effective administration.

6. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. Agriculture Decisions is published monthly.

7. *National Agricultural Advisory Commission.*—Provision is made for the payment of necessary expenses incident to periodic meetings of the National Agricultural Advisory Commission.

8. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$6 thousand; 1959 (adjusted), \$0; 1960, \$10 thousand; 1961, \$10 thousand; 1962, \$10 thousand.

WORKING CAPITAL FUND, DEPARTMENT OF AGRICULTURE

This fund finances on a reimbursable basis certain central services in the Department of Agriculture, including duplicating, photographic, art and graphics, motion picture, tabulating, supply, and library photocopying services. The capital consists of \$400 thousand appropriated (5 U.S.C. 542-1) and \$523 thousand donated assets, as of June 30, 1960. Earnings are retained to furnish adequate working capital.

OFFICE OF INFORMATION

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Office of Information for the dissemination of agricultural information and the coordination of informational work and programs authorized by Congress in the Department, **[\$1,488,000] \$1,610,000**, of which total appropriation not to exceed \$537,000 may be used for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by the Senators, Representatives, and Delegates in Congress, as they shall direct (7 U.S.C. 417), and not less than **[one hundred seventy-four thousand and seven hundred and thirty-six] two hundred and thirty-three thousand and fifty** copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture) as authorized by section 73 of the Act of January 12, 1895 (44 U.S.C. 241) **[** and for reprinting the 1959 yearbook "Food" for the use of the Senate and House of Representatives, respectively, of eighty-seven thousand and three hundred and sixty-eight copies (for which not to exceed \$67,300 shall be available) **]**: *Provided*, That in the preparation of motion pictures or exhibits by the Department, not exceeding a total of \$10,000 may be used for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a). (5 U.S.C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

¹ Includes capital outlay as follows: 1960, \$9 thousand; 1961, \$9 thousand; 1962, \$9 thousand.

The Office has responsibility for the information work of the entire Department. Its major objective is to report to farmers, agricultural and closely related groups, and to the public the Department's research, action, regulatory, and other programs, using any or all information media. This work is carried on in close cooperation with the land-grant colleges and with private industries which serve agriculture. Workload depends upon Department program demands, direct requests, and legislative requirements.

During 1960, the Office of Information acquired at no cost property declared excess by other Federal agencies and by other agencies of the Department of Agriculture with an original acquisition cost to the Government of \$4.9 thousand. Such property was used primarily for upgrading of older equipment.

1. *Publications review and distribution.*—The Department publications, both printed and processed, are reviewed for policy clearance and control. Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's activities require the issuance of about 3,600 periodic crop, price, and market reports and press releases annually. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Part 2 of the Secretary's annual report, known as the Yearbook of Agriculture, is published by the Office and distributed by Members of Congress. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks. Television package programs are prepared for use of land-grant colleges and television farm broadcasters.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and private industries which serve agriculture, produced on a reimbursable basis under the Department's Working

capital fund, are distributed through nearly 75 cooperating State film libraries. Still photographs, illustrations, and graphics are similarly produced. News and general-type photographs of Department programs and activities are available from a centralized library. Exhibits are produced and supplied to State extension workers for their use in State exhibit showings.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

CENTENNIAL OBSERVANCE OF AGRICULTURE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for planning, promoting, coordinating, and assisting participation by industry, trade association, commodity groups, and similar interests in the celebration of the centennial of the establishment of the Department of Agriculture; expenses of an honorary committee established in connection with such celebration; rental and restoration of property in the District of Columbia; and employment

pursuant to section 706(a) of the Organic Act of 1944 (5 U.S.C. 574); as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), \$130,000, to remain available until December 31, 1962.

Program and Financing (in thousands of dollars)

Total obligations.....			103
Financing:			
Unobligated balance carried forward.....			27
New obligational authority (appropriation)			130

This nonrecurring appropriation would provide for planning and carrying out activities related to the centennial observance of the establishment of the Department of Agriculture and the founding of the land-grant colleges in 1862.

1. *Coordination with trade, industry, and commodity groups.*—A program for the participation by agricultural trade, industry, and commodity groups in the centennial observance would be developed and coordinated with centennial activities to be carried out directly by the Department, the land-grant institutions, and other governmental agencies. The trade, industry, and commodity groups would finance the costs of the activities in which they participate.

2. *Centennial exposition site.*—Rental, preparation, and restoration of a suitable site in Washington, D.C., for a centennial exposition would be provided. The direct costs of constructing and operating exhibits at the exposition site would be financed by the individual exhibitors.

3. *Relation of costs to obligations.*—The year-end balance of unpaid undelivered orders is as follows: 1962, \$15 thousand.

¹ Includes capital outlay as follows: 1960, \$11 thousand; 1961, \$6 thousand; 1962, \$7 thousand.

The Library, a basic unit serving the research, extension, regulatory, and other programs of the Department and the State agricultural agencies, acquires and makes available books, periodicals, and other publications containing information on agricultural and allied fields. It contains approximately 1,181,000 volumes, probably one of the most extensive agricultural collections existing in any country. Its services are used by agricultural colleges and universities, other research and educational institutions throughout the world, Government departments, agricultural associations, industry, individual farmers, and the general public. It serves as the national agricultural library, one of the three national libraries.

During 1960, a total of 16,136 volumes and 239,610 separate issues of periodicals were added to the collection by purchase, gift, and exchange. During the same period 344,097 loans of books and periodicals were made and 86,508 reference questions were answered by the Department library. The increase proposed for 1962 would be used to strengthen and improve specialized library services to agricultural research programs.

During 1960, the Library acquired, at no cost, property declared excess by other agencies of the Department of Agriculture with an estimated depreciated value of \$7.3 thousand. Such property was used primarily for the upgrading of older equipment, and to meet current equipment needs.

FOREST SERVICE

The Service carries on three primary functions: (a) Protection, development, and use of about 185 million acres of land in national forests and national grasslands in the United States and Puerto Rico; (b) research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water, and other products; to improve methods for developing and managing recreation resources; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey; and (c) cooperation with States and private forest landowners to obtain better fire protection on approximately 435 million acres of forest lands and better forest practices on about 345 million acres of privately owned commercial timberlands, to encourage reforestation and stimulate development and management of State, county, and community forests. These primary functions include construction and maintenance of roads and trails, control of forest pests, protection against floods, land acquisition and exchange, and a number of cooperative projects.

Current authorizations:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; **[\$92,159,700] \$105,517,000**, of which \$5,000,000 for fighting and preventing forest fires and \$1,910,000 for insect and

disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided*, That not more than \$100,000 may be used for acquisition of land under the Act of March 1, 1911, as amended (16 U.S.C. 513-519): *Provided further*, That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; **[\$17,332,000]** \$20,278,000.

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; **[\$12,334,800]** \$14,009,000.

During the current fiscal year not to exceed \$100,000 of the funds appropriated under this heading shall be available for the acquisition of sites authorized by the Act of March 3, 1925, as amended (16 U.S.C. 555), without regard to any other limitation on the amount available for this purpose.

For an additional amount for "Forest protection and utilization", as follows: "Forest land management", \$750,000, and "Forest research", \$500,000. (5 U.S.C. 511-512, 524, 555a; 7 U.S.C. 428a, 1010-1012, 1621-1627; 16 U.S.C. 471-533i, 594-1-594-5, 594a; 30 U.S.C. 601-604, 611-615; 31 U.S.C. 534; 43 U.S.C. 1131h-1181j; 36 Stat. 557; 74 Stat. 205-206, 215; Department of the Interior and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

¹ Includes capital outlay as follows: 1960, \$14,595 thousand; 1961, \$17,700 thousand; 1962, \$22,400 thousand.

During 1960, the Service acquired at no cost property declared excess by other Federal departments and agencies with an original acquisition cost to the Government of \$3.2 million.

1. *Forest land management*—(a) *National forest protection and management*.—The 152 national forests and 14 units of national grasslands are managed under multiple use and sustained yield principles. The natural resources of outdoor recreation, range, timber, watershed, and wildlife are utilized in a planned combination that will best meet the needs of the Nation without impairing productivity of the land. These management and utilization principles were recognized in the Multiple Use-Sustained Yield Act of June 12, 1960 (Public Law 86-517, 74 Stat. 215). Work programs and budget estimates are related to the Program for the National Forests, a plan to meet the increasing demands for national forest resources during the next 10 to 15 years and beyond. Increases are provided in the budget to further attainment of these program objectives. Construction funds of \$10.6 million in 1961 and \$14.9 million in 1962 are budgeted, compared with \$6.7 million used in 1960, for construction or rehabilitation of campground and picnic facilities and other recreation improvements, the construction of dwellings or barracks for employee housing, fire lookouts, service and storage buildings, communication facilities, and other improvements. Funds appropriated under Cooperative range improvements are merged with this appropriation for obligational purposes.

FOREST SERVICE—Continued

Current authorizations—Continued

FOREST PROTECTION AND UTILIZATION—Continued

(b) *Fighting forest fires.*—This provides for employment of additional manpower and other facilities for forest fire emergencies which cannot be met by the fire control organization provided under national forest protection and management. Costs above the amounts estimated for the current and budget year are authorized to be met from advances from other Forest Service appropriations (repayments of such advances were made in 1960 and 1961 to Expenses, brush disposal). In addition, a supplemental appropriation for fighting forest fires is anticipated for 1961 under Proposed for later transmission.

	1960 actual	1961 estimate	1962 estimate
Forest fires controlled (number).....	9,497	12,500	10,000
Area burned (acres).....	272,561	440,000	200,000

(c) *Insect and disease control.*—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and appraise infestations of forest insects and infections of tree diseases and determination of protective measures to be taken, and (2) control operations to suppress or eradicate forest insects and diseases, including white pine blister rust.

(d) *Acquisition of lands.*—Lands are purchased to protect the watersheds of navigable streams and to increase the production of timber with the approval of the National Forest Reservation Commission. The present program is only for purchase of small tracts within the 55 approved purchase areas.

2. *Forest research.*—Research is conducted at nine regional forest experiment stations, the Forest Products Laboratory, and elsewhere.

(a) *Forest and range management.*—This research provides private and public land managers and owners with a sound basis for management of timber, forage, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage for domestic livestock and improve habitat for wildlife without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce floods and sedimentation; and improve methods for developing and managing recreation resources.

(b) *Forest protection.*—Research is conducted to develop sound measures for the protection of forests from damage by fire, insects, and diseases. Forest fire research provides improved methods of predicting fire danger, preparing for, and combating fire by combinations of ground and aerial methods. Insect and disease research develops direct controls, silvicultural measures, and biological agents to combat forest pests.

(c) *Forest products utilization.*—Studies are conducted to develop new and improved forest products, reduction and utilization of waste, and use of low-quality wood and less-desirable species. They include studies to reduce costs of logging and wood utilization, and to develop basic knowledge of wood and disseminate this to forest owners, manufacturers, fabricators, and consumers.

(d) *Forest resources.*—These investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, and the potential need for timber products. Studies of the eco-

nomics of forest crop production and of marketing of forest products are also included.

MAIN WORKLOAD FACTORS

	[Acres in millions]		
	1960 actual	1961 estimate	1962 estimate

Initial surveys (cumulative since 1930).....	577	607	637
To be surveyed (total) ¹	193	163	133
Resurveys (annual).....	43	30	30

¹ Includes all of Alaska and Hawaii.

(e) *Forest research construction.*—The budget estimate provides for construction of a laboratory at Riverside, Calif., for research on forest fire control problems of the Pacific Southwest.

3. *State and private forestry cooperation.*—This program, carried on in cooperation with the States, encourages private timber management. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce about 85% of all timber cut.

(a) *Forest fire control.*—Assistance is furnished 48 States in preventing and suppressing forest fires on private and State owned lands by financial aid, training, procurement of equipment, and a nationwide fire prevention campaign. About 92% of the 435 million acres of non-Federal ownership is now partially covered. During 1959 the acreage burned on protected areas was 0.42% as against an estimated 4.63% on unprotected lands. Of the total expenditures under this program, 79% is contributed by States and counties, 4% by private owners, and 17% by the Federal Government.

(b) *Forest tree planting.*—To encourage woodland owners to reforest unproductive portions of their holdings, and farmers to plant wind barriers around their fields and farmsteads—a total of more than 47 million acres altogether—the States provide planting stock at less than cost. The Federal Government shares the cost of producing the stock with the State and private landowners.

(c) *Forest management and processing.*—In cooperation with State foresters, 452 projects in 2,091 counties are operated to aid small woodland owners in applying good management to their timber holdings. In 1960 these projects covered some 82,188 owners and 4.1 million acres.

(d) *General forestry assistance.*—Technical forest management assistance is provided to State, community, private, and other Federal agencies, forest industries, colleges, and landowners.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

Appropriation to liquidate contract authorization.....	28,000	30,000	35,000

¹ Includes capital outlay as follows: 1960, \$25,537 thousand; 1961, \$28,500 thousand; 1962, \$30,300 thousand.

Roads and trails are essential to protection and management of national forests and utilization of their resources. The system consists of approximately 156,000 miles of earth- or gravel-surfaced roads and 108,500 miles of supplemental trails.

The Federal Highway Act of 1960, approved July 14, 1960, Public Law 86-657, provides authorizations of \$35 million for 1962 and \$40 million for 1963. These authorizations are available for obligation a year in advance of the year for which authorized. The program level for roads and trails proposed in this budget for the second year of the program for the national forests is \$37.5 million. The 1962 program will involve the construction and reconstruction of about 335 miles of general purpose roads and about 465 miles of timber access roads to harvest national forest timber, a total of approximately 800 miles. This compares with 851 miles built in 1960 and 646 miles being built in 1961.

Of the amounts received annually from national forest activities 10% is available under the permanent appropriation Roads and trails for States, for construction and maintenance within the State from which such proceeds

Unobligated balance carried forward.....	1,000		
New obligational authority (appropriation).....	1,000	1,000	1,000

Full or partial interest in existing roads or rights-of-way is purchased (or obtained by condemnation if purchase negotiations fail) to provide access to national-forest areas where road access is a serious problem.

ACQUISITION OF LANDS FOR NATIONAL FORESTS

SUPERIOR NATIONAL FOREST

For the acquisition of forest land within the Superior National Forest, Minnesota, under the provisions of the Act of June 22, 1948 (62 Stat. 570; 16 U.S.C. 577c-h), as amended, by purchase, condemnation or otherwise, [\$750,000] \$250,000, to remain available until expended and to be available without regard to the restriction in the proviso in section 1 of that Act: *Provided*, That no part of this appropriation shall be used for the acquisition of any land without the approval of the local government concerned. (*Department of the Interior and Related Agencies Appropriation Act, 1961.*)

Financing:			
Unobligated balance brought forward.....	-15	-1	-----
Unobligated balance carried forward.....	1	-----	-----
New obligational authority (appropriation)	-----	750	250

As of June 30, 1960, approximately 38 thousand acres of land have been acquired to preserve the wilderness conditions of part of the Superior National Forest in Minnesota. The appropriation proposed under existing legislation will complete the current authorization of \$2.5 million. Legislation is being proposed to increase the total authorization to \$4.5 million, primarily for acquiring the improved tracts within this wilderness area. If the proposed legislation is approved, a supplemental appropriation for 1962 will be required to complete the program contemplated by the additional authorization.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$149 thousand; 1960, \$36 thousand; 1961, \$36 thousand; 1962, \$36 thousand.

COOPERATIVE RANGE IMPROVEMENTS

(Special fund)

For artificial revegetation, construction, and maintenance of range improvements, control of rodents, and eradication of poisonous and noxious plants on national forests in accordance with section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), to be derived from grazing fees as authorized by said section, \$700,000, to remain available until expended. (*Department of the Interior and Related Agencies Appropriation Act, 1961.*)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
Advanced to "Forest protection and utilization" (total costs—obligations) (object class 25).....	700	700	700
Financing:			
New obligational authority (appropriation)....	700	700	700

Part of the grazing fees from the national forests, when appropriated, are used to protect or improve the productivity of the range, mainly by construction and maintenance of fences, stock watering facilities, bridges, corrals, and driveways. These funds are advanced to and merged with the appropriation Forest protection and utilization, subappropriation Forest land management.

GENERAL PROVISIONS, FOREST SERVICE

SEC. 201. Appropriations available to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed [ninety-eight] *one hundred and fifty* passenger motor vehicles of which *one hundred and thirty-five* shall be for replacement only, and hire of such vehicles; operation and maintenance of aircraft and the purchase of not to exceed [four of which two shall be] *two* for replacement only; (b) employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in an amount not to exceed \$25,000; (c) uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); (d) purchase, erection, and alteration of buildings and other public improvements (5 U.S.C. 565a); [and] (e) expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U.S.C. 514); and (f) *acquisition of land and interests therein for sites for administrative purposes, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a).*

SEC. 202. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

[SEC. 203. No part of any appropriation to the Forest Service in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.]

SEC. [204] 203. Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U.S.C. 513-519, 521), where such land is not within the boundaries of a national forest nor shall these lands or lands authorized for purchase in Sanders County, Montana, be acquired without approval of the local government concerned. (*Department of the Interior and Related Agencies Appropriation Act, 1961.*)

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations or allotments from other accounts are included in the schedule of the parent appropriation as follows:

- “Watershed protection,” Soil Conservation Service.
- “Flood prevention,” Soil Conservation Service.
- “Agricultural conservation program,” Agricultural Conservation Program Service.
- “Great Plains conservation program,” Soil Conservation Service.
- “Conservation reserve program,” Commodity Stabilization Service.
- “Construction, general,” Corps of Engineers—Civil.
- “Mutual security—economic,” funds appropriated to the President.
- “Civil defense and defense mobilization functions of Federal agencies,” Office of Civil and Defense Mobilization.

Permanent authorizations:

EXPENSES, BRUSH DISPOSAL

(Indefinite special fund)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Brush disposal.....	5,646	6,700	7,000

Appropriation.....	30,402	36,208	29,208

¹ Includes capital outlay in 1961 of \$23 thousand.

1. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (18 U.S.C. 711).

FOREST SERVICE—Continued

Permanent authorizations—Continued

OTHER FOREST SERVICE PERMANENT APPROPRIATIONS—Continued

2. *Restoration of forest lands and improvements.*—Funds received from settlement of claims involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement or forfeiture (16 U.S.C. 556c).

3. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid 0.75% of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and St. Louis for distribution to these counties (16 U.S.C. 577g).

4. *Payments due counties, submarginal land program.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated for school and road purposes (7 U.S.C. 1012).

5. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national forest receipts for school purposes (36 Stat. 562, 573).

6. *Payments to States and Territories.*—With minor exceptions, 25% of the money received from the national forests is paid to the States and Territories for public schools and roads of the county in which such forests are situated (16 U.S.C. 500).

8. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1959, \$2 thousand; 1960, \$1 thousand; 1961, \$1 thousand; 1962, \$1 thousand.

Intragovernmental funds:

WORKING CAPITAL FUND, FOREST SERVICE

This fund finances on a reimbursable basis various services such as repairing and replacing equipment, including aircraft, stocking and issuing supplies, operation of photographic and reproduction facilities, and tree nurseries in support of programs of the Forest Service (16 U.S.C. 579b). These service activities facilitate the operation of programs of fire protection, timber utilization, construction and maintenance of roads and other improvements, reforestation, grazing, watershed, forest and forest products research, and kindred conservation activities of the Forest Service, including cooperative assistance with other Federal agencies, States, counties, and individuals engaged in the same objectives.

Operating results and financial condition.—Government investment in the fund as of June 30, 1960, including donated assets at its inception and retained earnings for 1960, is \$20,518 thousand. By the end of 1962 the investment is anticipated to be \$23,747 thousand, an increase of \$3,229 thousand, which represents estimated earnings and donations during 1961 and 1962. Earnings are retained to furnish adequate working capital.

Program by activities:			
Forest land management: Fighting forest fires (total costs—obligations).....		31,500	
Financing:			
New obligational authority (proposed supplemental appropriation).....		31,500	

Under existing legislation, 1961.—A supplemental appropriation for 1961 is anticipated for fighting forest fires.

ACQUISITION OF LANDS, KLAMATH INDIANS

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
Acquisition of lands, Klamath Indians (total costs—obligations).....		68,717	
Financing:			
New obligational authority (proposed supplemental appropriation).....		68,717	

Under existing legislation, 1961.—A supplemental appropriation for 1961 in the amount of \$68,717 thousand is anticipated for acquisition of Klamath Indian lands under the act terminating Federal supervision over the Klamath Indian Tribe in Oregon (68 Stat. 718; 72 Stat. 816).

GENERAL PROVISIONS

SEC. 401. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed three hundred and [thirty-seven] ninety-eight passenger motor vehicles, of which three hundred and [thirty-two] eighty-five shall be for replacement only, and for the hire of such vehicles.

SEC. 402. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 403. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 404. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 405. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 406. Not less than \$1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621-1629; [72 Stat. 1793] 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts.

[SEC. 407. No part of any appropriation contained in this Act or of the funds available for expenditure by any corporation or agency included in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.] (Department of Agriculture and Farm Credit Administration Appropriation Act, 1961.)

OFFICE OF FIELD SERVICES—Continued

SALARIES AND EXPENSES—continued

1. *Field services.*—This Office is responsible for the execution of the field programs of the Business and Defense Services Administration, the Bureau of Foreign Commerce, the Office of Business Economics, and provides outlets for the statistical data published by the Department. These programs provide the means for enabling the Department of Commerce to deal with the business public on a local basis covering all phases of the Department's trade promotion and development programs, foreign and domestic. In addition, the Office also gathers information required by the constituent units it represents.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$5 thousand; 1960, \$5 thousand; 1961, \$6 thousand; 1962, \$6 thousand.

New obligational authority (appropriation).....		60	

The Great Lakes Pilotage Act of 1960 established certain pilotage requirements for ocean-going vessels of

U.S. and foreign registry while navigating the Great Lakes, parts of the Saint Lawrence River, and adjacent port area. The Secretary of Commerce is designated in consultation with the Department of State, the Coast Guard, and the Canadian Government to establish and administer a pilotage service prescribed in the act. Financing of these activities in 1962 will be provided under "Salaries and expenses," general administration.

【WEST VIRGINIA CENTENNIAL CELEBRATION】

【For expenses necessary to carry out the provisions of the Act of June 11, 1960 (74 Stat. 204), \$10,000, to remain available until expended.】 (Second Supplemental Appropriation Act, 1961.)

Funds have been provided for Federal Government participation in the Seattle, Wash., international exposition known as Century 21, to take place from April 21 to October 21, 1962.

1. *Exhibit program.*—Exhibits will be constructed in 1961. The program theme and content encompass the

"Role and Meaning of Science," "Methods and Laws of Science," "Dimension of Space, Time and Distance," "Science at Work," and "Frontiers of Science." Exhibit ideas, as developed by various government agencies, are considered and recommended for inclusion by the Science Advisory Committee and The U.S. Science Exhibit staff.

2. *Program direction and administration.*—The management of the Federal Government participation is supported herein together with administrative costs.

3. *Exhibit hall.*—Federal participation includes the construction of appropriate exhibit buildings. Design, construction, and supervision of these exhibit areas are the responsibility of the Federal Government. Initial architectural plans have been completed and construction will begin in February 1961 with completion scheduled for February 1962.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$0; 1960, \$186 thousand; 1961, \$2,359 thousand; 1962, \$11 thousand.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations as follows:
 "Emergency fund for the President, national defense," funds appropriated to the President.
 "President's special international program," funds appropriated to the President.

Public enterprise funds:

AVIATION WAR RISK INSURANCE REVOLVING FUND

The Secretary of Commerce is hereby authorized to make such expenditures, within the limits of funds available pursuant to section 1306 of the Act of August 23, 1958 (72 Stat. 803), and in accordance with section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 849), as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for aviation war risk insurance activities under said Act (72 Stat. 800). (72 Stat. 800-806; Department of Commerce and Related Agencies Appropriation Act 1961.)

Financing applied to program.....		6	

This fund provides aviation war risk insurance in the event of an outbreak of war. Binders are issued to cover aircraft and cargo, and will become war risk insurance automatically on the outbreak of war. Administrative costs are paid out of fee receipts (72 Stat. 731, expires June 13, 1961). Legislation will be requested to extend the authority.

Intragovernmental funds:**WORKING CAPITAL FUND**

This fund finances duplicating, central stocks of office supplies, health services, relocation expenses, and other common departmental services which can be operated better on a centralized basis (5 U.S.C. 607). Duplicating facilities are being temporarily expanded during 1961 and part of 1962 to care for increased workload following the 1960 Decennial Census. Sales are priced essentially at cost. Earnings are paid to the Treasury periodically. Capital includes an appropriation of \$100 thousand.

The Bureau is the principal fact-finding and statistical agency of the Federal Government.

1. *Retail, wholesale, and service trade statistics.*—Estimates of sales and inventory trends are computed monthly for the retail and wholesale trades, including an advance report of retail sales within 10 days of the close of the month. Once a year, data for retail trades are collected to provide annual regional sales and a base for the projection of the monthly inventory estimates. In 1962, estimates of total retail sales and of the subtotal consisting of

businesses in the general merchandise-apparel-furniture-appliance groups will be provided weekly. Also monthly estimates of total retail sales and of sales of some of the major kind-of-business groups will be provided for geographic divisions of the Nation. Monthly estimates for 20 large metropolitan centers of the retail sales of the general merchandise-apparel-furniture-appliance subgroup will be made available. Monthly estimates of receipts of the major service trades segments also will be initiated.

2. *Manufacturing and industrial statistics.*—Periodic surveys are made of production, shipments, orders, and materials consumed for important commodities. An annual survey of manufactures produces data on the number, size, industrial classification, and location of manufacturing establishments and by measures of factory operations such as employment, shipments, inventories, etc. In 1962, periodic surveys will extend coverage to key products of growth industries. Timing, accuracy, and amount of industrial detail of monthly survey will be improved.

3. *Agriculture statistics.*—Information is compiled on cotton ginned at 11 dates during the ginning season.

4. *Foreign trade and shipping statistics.*—Monthly, quarterly, and annual reports are published on the kind, quantity, shipping weight, and dollar value of imports and exports. In 1962, data will be presented on air cargo shipments.

5. *Population statistics.*—This activity includes current estimates of the number of households, the farm population, school enrollment, personal income, population mobility, and other characteristics of the population, as well as annual estimates of the population of the United States and of each of the States, and projections of future population. In 1962, quarterly surveys of consumer buying anticipations will be initiated as a regular census program.

6. *Construction and housing statistics.*—Monthly reports are published for housing starts, number of dwelling units and value of residential construction authorized by building permits, and construction costs, as well as quarterly data on housing vacancies and expenditures for residential alterations and repairs. In 1962, a quarterly survey of expenditures for nonresidential repairs, additions, and alterations and development of a construction-price index will be initiated.

7. *State and local government statistics.*—Reports are published providing national estimates of total governmental finances, employment, and payrolls, and comparative statistics for State governments and larger cities.

8. *Statistical abstract and special reports.*—The Statistical Abstract, issued annually, summarizes government and private statistics on the industrial, social, political, and economic activities of the United States. Historical and other general reports are also published periodically. A report showing for each county in the United States the number and kind of all business establishments, and their employment and payrolls is published on a biennial basis. A new survey initiated in 1961 will provide for annual publication of selected financial data, such as company sales, inventories, new capital expenditures, and assets, in which the unit of tabulation is the company rather than the individual establishment.

10. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate

This census will identify, count, and classify all local governmental units, and produce data regarding the employment, receipts, expenditures, and indebtedness of all State, city, county, and other local governmental units. Last conducted in 1957, it is scheduled by law to be conducted in 1962. Work planned for 1962 consists of collecting and processing most of the data to identify local governmental units, the data regarding public employment and taxable wealth, and for the completion of preparation for the governmental finances survey.

8. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1962, \$10 thousand.

The request of \$3,630 thousand will provide for the completion of the tabulation and publication of the Eighteenth Decennial Census, total cost being about \$128,000 thousand. The work in 1962 will include: completion of the electronic computer processing of the remaining statistical and analytical tabulations; post-tabulation work consisting of table review, analytical review, and correction of errors; completion of printing and publication; and orderly disposition of files and records. As in past censuses, the appropriation is available for 6 months beyond the close of the fiscal year (until December 31, 1962) to assure an orderly final liquidation.

COAST AND GEODETIC SURVEY

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Act of August 6, 1947, as amended (33 U.S.C. 883a-883i), including uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); lease of sites and the erection of temporary buildings for tide, magnetic or seismological observations; hire of aircraft; operation, maintenance, and repair of an airplane [extra compensation at not to exceed \$15 per month to each member of the crew of a vessel when assigned duties as recorder or instrument observer, and at not to exceed \$1 per day for each station to employees of other Federal agencies while making oceanographic or magnetic observations or tending seismographs]; pay, allowances, gratuities, transportation of dependents and household effects, and payment of funeral expenses, as authorized by law, for not to exceed an annual average of 185 commissioned officers on the active list; payments under the Uniform Services Contingency Option Act of 1953; and pay of commissioned officers retired in accordance with law; [\$17,400,000] \$18,555,000, of which [\$759,000] \$809,000 shall be available for retirement pay of commissioned officers: *Provided*, That during the current fiscal year, this appropriation shall be reimbursed for press costs and costs of paper for charts published by the Coast and Geodetic Survey and furnished for the official use of the military departments of the Department of Defense: *Provided further*, That the property known as the Fleet Landing Site at foot of York Street, Norfolk, Virginia, may be transferred, without reimbursement, from the Department of Defense to the Department of Commerce.

[For an additional amount for "Salaries and expenses", \$90,000: *Provided*, That appropriations granted under this head for the fiscal year 1961, shall be available for additional duty compensation to members of crews of vessels and to employees of other agencies as authorized by section 1 of the Act of March 28, 1960 (74 Stat. 11).]

[For an additional amount for "Salaries and expenses", \$24,000.] (5 U.S.C. 591, 597; 33 U.S.C. 851, 852, 853a-853r, 854-858, 860-865, 870, 873, 874, 883a-883i; Department of Commerce and Related Agencies Appropriation Act, 1961; Supplemental Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

Note.—Reimbursements from non-Federal sources were derived from the sale of special maps and charts and for providing special surveys and related data (33 U.S.C. 883(e)).

The survey publishes aeronautical and nautical navigation charts of the United States, its possessions, and

surrounding waters, using data obtained through field surveys. In addition, seismological and geodetic control data are obtained and disseminated, and worldwide tide and current information is compiled and published.

Increases for 1962 are primarily to support an expanded agency role in oceanography, increased requirements for nautical and aeronautical charts, and expansion of the research and development program.

Direct program—1. *Surveys and charts for marine and air navigation.*—Hydrographic, topographic, tide and current, magnetic, and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables required for safe sea and air navigation. A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

Miscellaneous receipts returned to the Treasury from the sale of charts and related publications were \$801 thousand in 1960 and are estimated to be \$850 thousand during 1961 and \$900 thousand in 1962.

CHARTS AND TABLES PRINTED AND DISTRIBUTED

(In thousands)

	1959 actual	1960 actual	1961 estimate	1962 estimate
Nautical charts:				
Military.....	356	469	600	700

Total.....	31,159	35,644	45,000	52,400
Coast pilots, tide and current tables.....	77	86	86	86

2. *Geodetic control.*—Surveys are made in the United States and its possessions to determine the horizontal position (latitude and longitude) and the vertical positions (elevation above mean sea level) of a network of control points which are permanently marked on the ground. These points are spaced so that adequate survey control is available for topographic, geologic, and other types of mapping, and for planning large-scale engineering projects. The positions and descriptions of these points are published and distributed to Federal, State, and local agencies and the general public.

AREA SURVEYED AND MARKED POINTS ESTABLISHED

	1959 actual	1960 actual	1961 estimate	1962 estimate
Triangulation:				
Area (square miles).....	46,650	37,041	38,000	42,000
Marked stations established.....	908	702	860	990
Leveling (Linear miles).....	6,326	4,839	5,500	5,500

3. *Earthquake investigation.*—Earthquakes are located and investigated to determine their severity and to obtain engineering data for the design of earthquake-resistant structures and information concerning ground movements.

The Bureau operates 13 seismograph and 77 strong-motion stations, and collaborates with 15 other institutions; cooperates with 250 domestic and foreign seismograph stations to determine the location of distant earthquakes; and investigates an average of 15 severe earthquakes annually. The seismic sea wave warning

program furnished data for six alerts for earthquakes in the Aleutians, in the Queen Charlotte Islands region, and off the coast of southern Chile.

4. *Research and development.*—This activity includes basic and applied research and development in oceanography, geodesy, geomagnetism, seismology, cartography, photogrammetry, gravimetry, astronautics, and related supporting fields. Research staff will be strengthened under the 1962 program.

5. *Instrument services.*—These include the design and construction, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations.

8. *Relation of costs to obligations.*—The relationship between direct cost and direct obligations is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by activities).....	498	476	589	592
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	608	981	804	734

Adjustment of selected resources reported at start of year.....		—263		
Costs financed from obligations of other years, net (—).....			—62	—62
Obligations incurred for costs of other years, net.....		266		

Reimbursable program.—The major part of this activity is to provide aeronautical, nautical and airport obstruction (financed prior to 1962 under direct program) charts of the United States and its possessions to user agencies and to perform seismological investigations and geodetic control surveys where required. Reimbursements from non-Federal sources are primarily from the States to carry out geodetic surveys under the Interstate highway program.

8. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$208 thousand; 1959 (adjusted), \$171 thousand; 1960, \$146 thousand; 1961, \$160 thousand; 1962, \$150 thousand.

The Administration provides statistical and informational services to the business community and carries out industrial mobilization readiness programs.

1. *Industries and commodities.*—A focal point for the cooperation of Government and industry is provided in promoting economic stability and growth of industry; industrial and commercial information is analyzed, and basic, special and periodic studies and reports for use by both industry and Government are published; data on production and distribution of commodities in foreign countries are analyzed for use in foreign trade promotion; industrial capabilities to meet the requirements for industrial production in a national emergency are measured; and assistance is provided to industry in the current military procurement programs.

2. *Marketing and distribution.*—The office promotes the more effective distribution of goods and services by disseminating market facts and distribution information to Government, industry, and business.

3. *Technical information.*—Domestic and foreign scientific and technical data are compiled primarily from Government research or translation and made available upon request to business, industry, the general public, and Government agencies. In addition, direct assistance is furnished to industry in development of voluntary programs for standardization of commodities.

4. *Area development.*—This office in cooperation with State development agencies (1) helps communities identify the more promising opportunities for achieving growth and stability; (2) provides technical help for planning and carrying out action programs; and (3) identifies the many sources of assistance available in the local community and from the State and Federal Governments. It also provides staff for the Interdepartmental Committee to Coordinate Federal Urban Area Assistance Programs.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$377 thousand; 1959 (adjusted), \$199 thousand; 1960, \$224 thousand; 1961, \$231 thousand; 1962, \$231 thousand.

1. *Promotion of U.S. foreign trade, travel, and investment.*—Information and service is provided to U.S. private commercial activities for the purpose of helping to expand U.S. production and employment, to improve the health of the U.S. economy, and U.S. balance of payments in particular. Specialists in foreign trade analyze economic and business conditions of foreign countries, international marketing problems, commercial laws and government regulations affecting business and related fields vital to the expansion of foreign trade. The national export expansion program provides service to U.S. business in locating and utilizing export payments opportunities, and makes available the results of U.S. trade missions and diverse other trade promotion aids.

2. *Trade missions.*—Funds are included herein for the trade missions program which was formerly financed from

the President's Special International Program. These missions promote goodwill for American business abroad and stimulate opportunities for expanding trade.

3. *Relations of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$89 thousand; 1959 (adjusted), \$40 thousand; 1960, \$42 thousand; 1961, \$62 thousand; 1962, \$132 thousand.

1. *Export control* protects the domestic economy from excessive drain of scarce commodities, safeguards the national security by regulating exports of strategic commodities, and implements U.S. foreign policy. In the absence of improvement in relations with certain countries, these controls must be continued and, as necessary, extended to other areas to guard against transshipment. The Bureau of Customs is responsible for the policing of shipments at points of export.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$46 thousand; 1959 (adjusted), \$20 thousand; 1960, \$12 thousand; 1961, \$15 thousand; 1962, \$15 thousand.

Analyses of national economic trends.—Basic indicators of the condition of the national economy and current analyses of business trends are prepared and distributed to the public.

1. *Preparation of national income and product data.*—Calculations are made of the national income and gross national product, consumption expenditures and other subsidiary measures of the Nation's economic well-being.

2. *Analysis of business trends.*—Business developments are assessed monthly, and the results of continuing analysis of the major underlying factors and long-range business trends are published regularly for business use.

3. *Computation of the balance of international payments.*—The U.S. balance of international payments is determined and the official statistics of foreign expenditures by the U.S. Government are maintained.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$28 thousand; 1960, \$43 thousand; 1961, \$43 thousand; 1962, \$43 thousand.

MARITIME ACTIVITIES

The objective of the maritime activities of the U.S. Government is to promote U.S. foreign commerce and to aid in the national defense. The budget program includes funds for operating and construction subsidies

to compensate for differences between foreign and domestic costs, research and development with respect to ship designs and operations, maintenance of a reserve fleet and shipyard capacity, training of cadets to become licensed merchant marine officers, and regulation of the shipping industry. Through public enterprise funds a capability to provide emergency shipping is maintained, vessel mortgages and construction loans guaranteed, and binders for war-risk insurance provided.

Total expenditures to carry out this program in 1962 are estimated at \$339 million, of which \$182 million is required to meet obligations arising under operating subsidy contracts. These contracts, now covering operations conducted by 15 companies, represent a long-term obligation of the Government. In addition to the maximum of 1,988 voyages now under contract, authorization has been enacted to permit the Board to contract for a maximum of 412 voyages. It is estimated that conduct of the total authorized program would require subsidy support for the operation and eventual replacement of 422 ships. Over the typical 20-year contract period each authorized voyage, including a pro rata construction subsidy, is estimated to create a cumulative cost of \$2.6 million. The long-term obligation of the Government for support of operations now under contract until ex-

piration of these agreements is estimated to approximate \$4 billion. The foregoing estimates are based on existing legislation, current operating and construction costs, and current conditions in the shipping industry.

Current authorizations:

SHIP CONSTRUCTION

For construction-differential subsidy and cost of national-defense features incident to construction of ships for operation in foreign commerce (46 U.S.C. 1152, 1154); for construction-differential subsidy and cost of national-defense features incident to the reconstruction and reconditioning of ships under title V of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1154); and for acquisition of used ships pursuant to section 510 of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1160); [and (not to exceed \$5,900,000) for research, development, and design expenses incident to new and advanced ship design, machinery, and equipment; \$126,200,000] \$98,000,000, to remain available until expended: *Provided*, That transfers may be made to the appropriation for the current fiscal year for "Salaries and expenses" for administrative and warehouse expenses (not to exceed [\$2,900,000] \$3,150,000) and for reserve fleet expenses (not to exceed \$500,000), and any such transfers shall be without regard to the limitations under that appropriation on the amounts available for such expenses. (74 Stat. 95; Department of Commerce and Related Agencies Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$7 million for activities transferred in the estimates to "Research and development." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

¹ Includes capital outlay costs as follows: 1960, \$13,454 thousand; 1961, \$22,450 thousand; 1962, \$11,350 thousand.

The 1962 estimate provides for—
 1. *Construction-differential subsidy* and national defense allowances for construction of 14 vessels under the ship replacement program. Over the 3-year period the average construction-differential subsidy for each of the 58 ships for which contracts have been placed or are planned are

estimated at \$6 million. National defense features are estimated to require \$100 thousand per ship.
 2. *Acquisition costs* for an estimated 14 vessels being replaced.
 3, 5, and 6.—The 1960 and 1961 costs are anticipated to complete these projects.

New obligational authority (appropriation)			

A total of \$512,434 thousand was appropriated for this program, which covers all postwar construction activity prior to 1955. During 1960, \$6,362 thousand was returned to the Treasury in accordance with the Department of Commerce and Related Agencies Appropriation Act, 1960. Final costs have been determined and all obligations completely liquidated. As of June 30, 1960, the unexpended balance amounted to \$121 thousand. Subsequent to that date, \$100 thousand was transferred to Maritime training as authorized by Public Law 86-451. The remaining unrequired balance of \$21 thousand will be administratively rescinded and covered into the Treasury.

OPERATING-DIFFERENTIAL SUBSIDIES (LIQUIDATION OF CONTRACT AUTHORIZATION)

For the payment of obligations incurred for operating-differential subsidies granted on or after January 1, 1947, as authorized by the Merchant Marine Act, 1936, as amended, and in appropriations heretofore made to the United States Maritime Commission, \$150,000,000 \$182,000,000, to remain available until expended: *Provided*, That no contracts shall be executed during the current fiscal year by the Federal Maritime Board which will obligate the Government to pay operating-differential subsidy on more than two thousand four hundred voyages in any one calendar year, including voyages covered by contracts in effect at the beginning of the current fiscal year, of which one hundred and fifty shall be for companies which have not held contracts prior to July 1, 1959, and seventy-five shall be for companies operating into or out of the

Great Lakes]. (74 Stat. 96; Department of Commerce and Related Agencies Appropriation Act, 1961.)

Appropriation to liquidate contract authorization.....	152,750	150,000	182,000

This appropriation provides for the payment of subsidies to ship operators in order to maintain a U.S. flag merchant marine in support of U.S. foreign commerce and capable of serving as a naval auxiliary in time of war or national emergency. To be eligible for subsidy, an operator must provide regular berth services on an essential trade route, show that Government aid is necessary to place the operation on a parity with its foreign competition, and employ vessels constructed in the United States and manned by U.S. citizens. The operations for which subsidy support is currently provided and for which obligations are estimated to accrue during the budget period are detailed in the following table (dollars in thousands):

	Subsidized operators	Maximum voyages under contract	Voyages undertaken	Estimated obligation
Past years:				
Calendar years 1947-1957.....	—	—	14,579	\$732,976
Calendar year 1958.....	15	1,991	1,744	139,637
January to June 1959.....	15	—	862	76,333
Fiscal year 1960.....	15	1,988	1,732	153,232
Budget estimate, existing contracts, and pending applications:				
Fiscal year 1961.....	18	2,201	1,799	157,000
Fiscal year 1962.....	21	2,400	1,937	167,500

During calendar year 1959 the 15 subsidized operators incurred business expenses totaling \$727.6 million in the operation of 314 ships. The items of expense for which subsidies are paid and amount thereof prior to recapture are detailed in the following table for calendar year 1959 voyages (dollars in millions).

	Wages	Subsistence	Maintenance and repair	Insurance	Total expense: subsidized items
Total expense.....	\$184.4	\$12.1	\$25.6	\$33.2	\$255.3
Subsidy accrual.....	130.7	2.5	8.5	13.2	154.9
Average subsidy rate (percent).....	70.85	20.49	33.35	39.75	60.7
Percent of each item to total.....	84.4	1.6	5.5	8.5	100.0

Passenger and freight services.—During calendar year 1959, 30 passenger or combination passenger/cargo ships and 284 cargo ships were engaged in subsidized voyages over routes detailed in the following table:

	From ports on			
	Atlantic	Gulf	Pacific	Great Lakes
To: Northern Europe.....	47	20	—	—
Mediterranean.....	16	10	—	4
Indian Ocean.....	13	—	—	—
Far East.....	9	15	41	—
Australia and Oceania.....	8	—	6	—
South America.....	29	15	17	—
Africa.....	24	11	—	—
Caribbean.....	8	6	—	6
Round-the-world.....	9	—	—	—

Recapture of excess profits.—All contracts for operating subsidy provide that 50% of the net profits earned from the contractors' subsidized operations and services incident thereto which over a 10-year period exceed 10% of capital necessarily employed shall be withheld from payments made by the Government. This recapture is effected annually based upon the cumulative profits earned since the beginning of the recapture period. The estimate for the current and budget years, shown in the Program and financing schedule, assumes that the past year profit experience before subsidy of each operator will be continued.

Status of unfunded contract authorization.—The computation and approval of final subsidy rates and audit of annual accountings will make it possible to make payments of 100% of subsidy payable on account of operations prior to December 31, 1958. The \$125.9 million unpaid subsidy as of June 30, 1962, represents a normal backlog, consisting largely of amounts withheld pending final rate and audit determinations for operations subsequent to 1958 plus estimated amounts earned in the final 3 months of 1962 for which bills will not be presented or paid during the year.

RESEARCH AND DEVELOPMENT

For expenses necessary for research, development, fabrication, and test operation of experimental facilities and equipment; studies to improve water transportation systems; and supporting services related to nuclear ship operation; \$7,000,000, to remain available until expended: Provided, That transfers may be made to the appropriation for the current fiscal year for "Salaries and expenses" for administrative expenses (not to exceed \$600,000), and any such transfers shall be without regard to the limitation under that appropriation on the amount available for such expenses: Provided further, That the unexpended balances as of June 30, 1961, available for research and development under appropriations heretofore granted under the head "Ship construction" shall be merged with this appropriation.

Note.—Includes \$7 million previously carried under Ship construction. The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

¹ Includes capital outlay costs as follows: 1960, \$961 thousand; 1961, \$1,500 thousand; 1962, \$2,000 thousand.

1. *Transportation systems analyses.*—Conduct of transportation systems analyses to determine appropriate areas for maximum return on development work.

2. *Mechanized ship development.*—Concentrated effort leading to mechanized ship development through engineering studies, detailed design, installation and test of components and integrated automated systems.

3. *Advanced ship design and development.*—Expanded research and development in the area of advanced ship design, including methods by which capital costs for conventional ships may be reduced, investigation of advanced concepts such as the ground effects principle, and development of improved nuclear ships.

4. *Labor and management problems.*—Studies of labor and management problems arising from increased mechanization of ship operations and cargo handling.

5. *Vessel supporting services.*—Servicing and maintaining the NS *Savannah*, and for development and conduct of supporting functions related to operation of the NS *Savannah*.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

SALARIES AND EXPENSES

For expenses necessary for carrying into effect the Merchant Marine Act, 1936, and other laws administered by the Federal Maritime Board and the Maritime Administration, [\$14,500,000] \$15,600,000, within limitations as follows:

Administrative expenses, including not to exceed \$1,125 for entertainment of officials of other countries when specifically authorized by the Maritime Administrator, and not to exceed \$1,250 for representation allowances, [\$8,045,000] \$9,300,000;

Maintenance of shipyard facilities and operation of warehouses, [\$1,253,000] \$1,000,000;

Reserve fleet expenses, [\$5,202,000] \$5,300,000. (74 Stat. 96; Department of Commerce and Related Agencies Appropriation Act, 1961.)

1. *Administrative expenses.*—Expenses of administering most of the functions of the Federal Maritime Board and Maritime Administration are charged to this activity. Administrative expenses in connection with maritime training, general agency ship operation, new ship construction, and research and development are provided in other funds and are shown on a consolidated basis in the schedule for Advances and reimbursements. Resources for regulation of the shipping industry and for administration of subsidy contracts will be augmented in 1962.

2. *Maintenance of shipyard facilities.*—Two Government-owned reserve shipyards are maintained in a partial state of readiness for defense purposes.

3. *Operation of warehouses.*—Five warehouses store materials and equipment for vessel operations, repair and outfitting of reserve fleet ships, and reserve shipyards.

4. *Reserve fleet expenses.*—Provision is made for the preservation and security of merchant vessels maintained for national defense purposes. An accelerated scrapping program will be continued and preservation work, except for cathodic bottom preservation, has been discontinued on approximately 1,000 ships which are considered obsolete for mobilization purposes and are scheduled for scrapping.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

This program provides for the training of officers for service in the maritime industry.

1. *Merchant marine cadet training.*—By enactment of Public Law 84-415, the Merchant Marine Academy at Kings Point, N.Y., was established as a permanent institution. A 4-year course of training is provided, including 1 year of sea duty, designed to qualify graduates for licenses as merchant marine officers. The Academy provides subsistence, quarters, tuition, uniform and textbook allowances, and medical care for the cadets.

2. *Cadet training office.*—This office provides staff assistance to the Maritime Administrator on training matters, assists in the selection and appointment of cadets, and maintains liaison with the State marine schools.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

STATE MARINE SCHOOLS

For financial assistance to State marine schools and the students thereof as authorized by the Maritime Academy Act of 1958 (72 Stat. 622-624), \$1,270,000, of which \$250,000 is for maintenance and repair of vessels loaned by the United States for use in connection with such State marine schools, and \$1,020,000, to remain available until expended, is for liquidation of obligations incurred under authority granted by said Act, to enter into contracts to make payments for expenses incurred in the maintenance and support of marine schools, and to pay allowances for uniforms, textbooks, and subsistence of cadets at State marine schools. (74 Stat. 96; Department of Commerce and Related Agencies Appropriation Act, 1961.)

The States of Maine, Massachusetts, New York, and California maintain schools for the training of merchant marine officers, with Federal assistance given in the form of (a) direct grants of \$75 thousand, if matched by State appropriations and if out-of-State students are enrolled; (b) allowance to cadets for uniforms, textbooks, and subsistence; and (c) repairs to Federal training vessels loaned to the schools.

The Maritime Academy Act of 1958 (72 Stat. 622) authorizes the Secretary of Commerce to enter into agreements with States to provide grants and allowances over the 3- or 4-year course. While the act provides contract authority without limit as to amount or year, the estimated new obligational authority is based on an anticipated average enrollment of 1,200 students. Maintenance and repair of training vessels will continue to be accomplished through annual appropriations.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$51 thousand; 1959 (adjusted), \$47 thousand; 1960, \$1,563 thousand; 1961, \$1,529 thousand; 1962, \$1,529 thousand.

GENERAL PROVISIONS—MARITIME ACTIVITIES

No additional vessel shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers and slophest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slophest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. (74 Stat. 97; *Department of Commerce and Related Agencies Appropriation Act, 1961.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriations as follows:
 "Civil defense and defense mobilization functions of Federal agencies," Office of Civil and Defense Mobilization.
 "Commodity Credit Corporation fund," Department of Agriculture.
 "Construction of surveying ships," Coast and Geodetic Survey.
 "Plant acquisition and construction," Atomic Energy Commission.
 "Operating expenses," Atomic Energy Commission.
 "Mutual security—economic," funds appropriated to the President.
 "Salaries and expenses," Office of Civil and Defense Mobilization.

Under title XI, Merchant Marine Act, 1936, as amended, the Maritime Administration received authority to insure construction loans and mortgages, with aggregate outstanding balances of up to \$1 billion, on certain types of cargo and passenger-carrying vessels and other watercraft. Pursuant to Public Law 84-1024 (70 Stat. 1119), the Fish and Wildlife Act of 1956 (16 U.S.C. 742e), authority to insure mortgages on fishing vessels, with amount of loans outstanding at any one time limited to \$10 million, has been transferred to the Department of the Interior.

Budget program.—In 1960 two transactions were effected in connection with the SS *Leilani*, custody of which had been assumed in 1959 as a result of foreclosure proceed-

MARITIME ACTIVITIES—Continued**Public enterprise funds—Continued****FEDERAL SHIP MORTGAGE INSURANCE FUND—Continued**

ings, incident to which a loss of \$0.7 million had been written off: (a) a cash payment of \$100 thousand was received from the mortgagee in settlement of the account; (b) the vessel was sold for \$3.2 million, with a down payment of \$0.8 million and balance payable in annual installments of \$240 thousand over a 10-year period. A further loss of \$1.2 million was incurred incident to this sale, this being the difference between the book value, at time of sale, of \$4,374 thousand and the sale price of \$3,200 thousand.

Operating results and financial condition.—As of June 1960, balances outstanding plus commitments for additional ship mortgages total \$449 million. The outstanding balances for loans and mortgages at the end of 1961 and 1962 are projected at \$668.5 and \$707.4 million, respectively.

During 1960 two advances totaling \$130 thousand were made to a mortgagor, with depleted working capital, to meet mortgage installments. It is estimated that during 1961 and 1962 additional advances will be made to mortgagors in the amounts of \$825 thousand and \$580 thousand, respectively. As reflected in these estimates, by June 30, 1962, a total of \$1.5 million will have been advanced to seven mortgagors.

In the event of new mortgage defaults the fund is authorized to borrow from the Treasury. Earnings, resulting from premium and interest receipts, are retained to meet possible additional requirements for advances to mortgagors. During 1962 it is anticipated that the cash position of the fund will permit liquidation of its \$2,658 thousand liability to the general fund and to repay its \$1.4 million loan from Treasury.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

This fund, created in 1951, finances direct operation and charter of cargo vessels for transport of military and national interest cargo. It is also used for the operation of Government-owned experimental vessels (70 Stat. 531). The initial appropriation to the fund of \$20 million has been repaid to the Treasury.

Budget program—1. *Vessel operations*.—Cargo vessels are operated by private operators acting as agents of the Maritime Administration to carry shipments for the

Military Sea Transportation Service. Government ships operated under this arrangement have declined from a peak of 538 to 4 on June 30, 1960, and will further decrease to 3 during 1961.

2. *Charter operations*.—As of June 30, 1960, there were three Government-owned vessels under charter to private operators. At the end of 1960, a total of 34 vessels were also on loan without reimbursement to other Government and public agencies.

3. *Experimental ship operations*.—The world's first nuclear-powered cargo/passenger ship, the NS *Savannah* will go into service in 1961 under general agency agreement. During the period covered by these estimates the *Savannah* will be operated jointly by the Atomic Energy Commission and the Maritime Administration, in accordance with the March 9, 1959, interagency agreement. During the experimental period the vessel will carry no revenue-producing cargo. The estimate provides for the cost associated with actual operation and maintenance of the *Savannah* and covers the period extending from startup test and trials into a period of experimental operation through June 30, 1962. Included are crew salaries, subsistence, maintenance and repair of the vessel, insurance, port expense, agents' compensation, procurement of spare parts, etc. Costs for maintaining and operating the nuclear propulsion plant, including associated crew salaries, etc., and procurement of spare parts are reimbursed to the fund from AEC appropriations. The estimate assumes that criticality of the nuclear plant will occur in the fall of 1960 and will be followed by an extended period of tests and trials to be carried out by the builder. The general agent is expected to assume responsibility for experimental operations in calendar year 1961.

The 1962 estimate provides for a full year of operations with the ship making visits to major U.S. and foreign ports as a part of the experimental operating program.

4. *Relation of costs to obligations*.—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Advances.....	26	22	25	25
Supplies.....	6,022	5,972	5,984	5,984
Prepaid insurance and other deferred charges.....	59	56	60	60
Unpaid undelivered orders.....	542	540	50	50
Total selected resources at end of year.....	6,649	6,590	6,119	6,119
Selected resources at start of year (-).....		-6,649	-6,590	-6,119
Cost financed from obligations of other years, net (-)		-59	-471	

Operating results and financial condition—1. *Vessel operation*.—Rates charged the Military Sea Transportation Service cover full costs arising under general agency agreement for ship operations. During 1960 the fund was charged with a loss of \$463 thousand as a result of the need to maintain a nucleus administrative staff; during 1961 and 1962 the cost of this staff will be absorbed under the Salaries and expenses program. An additional loss of \$254 thousand over the 3-year period is also anticipated to result from payment of claims, inactive vessel expense, and special mobilization training of merchant marine officers.

2. *Charter operations*.—The net loss of \$146 thousand in 1960 is the result of the fund absorbing the cost of \$122 thousand for administrative expenses directly asso-

MARITIME ACTIVITIES—Continued**Public enterprise funds—Continued****VESSEL OPERATIONS REVOLVING FUND—Continued**

ciated with this program, the payment of \$283 thousand authorized by Public Law 85-721 (72 Stat. 710) to reimburse former charters for certain breakout costs and \$75 thousand for deactivation expenses (including purchases of inventories). The estimated net loss of \$97 thousand anticipated in 1961 will result from the payment of \$146 thousand for breakout cost authorized by Public Law 85-721 (72 Stat. 710) and \$40 thousand for deactivation expense (including purchases of inventories). A net income of \$48 thousand is anticipated in 1962 after meeting \$40 thousand in costs for deactivation expense.

3. *Experimental ship operations.*—The full costs of the NS *Savannah* program is charged to the fund; however, costs for maintaining and operating the nuclear propulsion plant, including associated crew salaries, etc., and procurement of spare parts are reimbursed to the fund from AEC. Over the 3-year period revenue totaling \$3,377 thousand represents reimbursement from AEC appropriations; the net difference of \$3,643 thousand represents a loss to the fund inasmuch as no revenue producing cargo will be carried by the vessel during the experimental period.

This fund was established to provide war risk insurance in the event that commercial insurance is not available at reasonable terms and conditions during time of war (46 U.S.C. 1281, 1283). Commercial war risk insurance policies are at present subject to an automatic termination clause upon the outbreak of war, the inception of a hostile act, or occurrence which results in a state of war between any member of the North Atlantic Treaty Organization and any of the contracting parties to the Treaty of Friendship Cooperation and Mutual Assistance signed at Warsaw, May 14, 1955, or the Central People's Government of the People's Republic of China.

As of June 30, 1960, interim binders for war risk hull, protection, and indemnity, and second seamen's insurance, which become effective upon the outbreak of war, had been issued covering approximately \$6 billion of insurance. War risk insurance was also in effect on 31 American vessels under construction in shipyards in the United States, covering the prelaunching period, totaling approximately \$110 million of insurance.

Budget program.—At the request of the Secretary of the Navy, second seaman's war risk insurance is provided without premium, as authorized under sections 1205-6 of title XII of the Merchant Marine Act of 1936, on tankers operated for the account of the Military Sea Transportation Service. On June 30, 1960, a total of 20 tankers were covered under this program. All losses on such insurance, paid through this fund, are reimbursed to the fund by the Secretary of the Navy. Expense of the fund therefore consists only of fees paid to underwriting agents, travel expense for marine insurance experts, and for contract appraisal costs.

During 1959, accidents were sustained by three Military Sea Transportation Service vessels, resulting in insurance claims against the fund. The estimate for 1961 provides for payment of the full amount of the remaining pending claims.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$4 thousand.

Financing.—Transfer of \$10 million is authorized from the Vessel operations revolving fund if necessary as an emergency measure (65 Stat. 747). To date no transfers have been made and none are anticipated in 1961 or 1962. In addition, revenue is provided by insurance premiums and fees paid for the issuance of interim binders and builder's risk insurance.

Operating results.—The Government's investment consists entirely of retained earnings totaling \$1,611 thousand on June 30, 1960. Retention of these earnings is necessary for this program to get underway immediately upon the outbreak of a national emergency.

The Inland Waterways Corporation, in liquidation, is engaged in the collection of debt and the policing of operations of the successor carrier, Federal Barge Lines, Inc.

Under the repayment schedule, the debt owed by the above carrier will be fully collected by June 30, 1969, and the United States is earning interest at the rate of 4% until June 30, 1964, with the remaining years at 5%.

Budget program.—Administrative costs cover policing and incidental expenses. Reserves are established at the estimated liability for suits against the Corporation.

Operating results.—Net income of \$218 thousand is expected in 1961, as the excess of interest over expenses.

The Office administers laws governing the granting of patents for invention and the registration of trademarks.

The 1962 estimate provides for continuation of the effort to reduce the backlog of pending patent applications. It also provides for continuance of a program to modernize the patent classification system, and for research and development of electronic devices applicable to the patent search process.

Receipts from fees were \$7.4 million in 1960, and are estimated to be \$7.6 million in 1961, under existing legislation. Legislation is proposed which would increase fees to cover approximately 75% of the cost of Patent Office operations.

1. *Examination and adjudication of patent applications.*—Applications are examined to determine the patentability of claimed inventions; and quasi-judicial functions are performed in appeal or interference proceedings within the Office. Specifications and drawings of successful applications are printed and the issuance of patents is regularly published.

	1959 actual	1960 actual	1961 estimate	1962 estimate
Patents:

BUREAU OF PUBLIC ROADS

Current authorizations:

LIMITATION ON GENERAL ADMINISTRATIVE EXPENSES

(Trust fund)

Necessary expenses of administration and research (not to exceed **[\$29,591,500] \$33,800,000**), including maintenance of a National Register of Revoked Motor Vehicle Operators' Licenses, as authorized by law (74 Stat. 526), and purchase of [thirty] forty-seven passenger motor vehicles of which thirty shall be for replacement only, shall be paid, in accordance with law, from appropriations made available by this Act to the Bureau of Public Roads and from advances and reimbursements received by the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative and research expenses pursuant to the provisions of title 23, United States Code, section 104(a), \$100,000 shall be available for carrying out the provisions of title 23, United States Code, section 309.

[The limitation under this head in title I of the Department of Commerce and Related Agencies Appropriation Act, 1961, on the amount available for expenses of administration and research, is increased from "\$29,591,500" to "\$29,626,500": *Provided*, That the foregoing limitation shall be available for expenses necessary to establish and maintain a National Register of Revoked Motor Vehicle Operators' Licenses, as authorized by the Act of July 14, 1960 (74 Stat. 526).] (23 U.S.C. 303, 307, 313; Department of Commerce and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

The 1962 estimates for administration and research continue the program authorized for 1961 and provide selected personnel increases in the headquarters and field staff. Highway research is carried out independently by the Bureau of Public Roads as well as in cooperation with the State highway departments. Increases for research will permit greater emphasis on the problems of urban highway development. Funds are also provided for the operation of the national register of revoked motor vehicle operators' licenses. Administrative services for other programs of the Bureau of Public Roads are initially financed from this activity and reimbursements of their pro rata share are collected periodically from the other programs.

Expenses of this activity are met by deductions from Federal-aid authorizations and by reimbursement from other appropriations for highway construction as prescribed by specific limitation.

Transfer from "Highway trust fund" to liquidate contract authorization.....	3,028,000	2,688,692	2,991,000

Grants are made to States for construction and improvement of Federal-aid highways. Authorizations are provided in the Federal-Aid Highway Act of 1956 to cover 90 percent of the costs of completing the 41,000-mile National System of Interstate and Defense Highways, and to match State funds on a 50-50 basis for the primary, secondary, and urban programs. The Federal share of the cost is increased in those States with large areas of public domain. Payments to the States are made out of transfers from the Highway trust fund into which are deposited certain percentages of tax receipts on motor fuel, tires and tubes, tread rubber, trucks, buses, trailers, and truck use.

As a result of additional authorizations provided by the 1958 act and the suspension for 2 years of section 209(g) of the Highway Revenue Act of 1956, estimated revenue available to the Highway trust fund was inadequate to meet demands on the fund beginning in 1960. The Federal-Aid Highway Act of 1959 partially remedied this imbalance in the Highway trust fund by the provision of additional revenue beginning in 1960 and the reduction of interstate authorizations for 1961 from \$2.5 to \$2

billion. The 1959 act increased the tax on motor fuel from 3 to 4 cents per gallon effective October 1, 1959, and continuing through June 30, 1961. In addition the act authorized the diversion from the general fund to the Highway trust fund of one-half of the present excise tax on automobiles and five-eighths of the present tax on parts and accessories beginning July 1, 1961, and extending through June 30, 1964. This additional revenue, however, will not be sufficient to provide for a continuance of the interstate program authorized for subsequent years.

It is proposed that motor fuel taxes be increased to 4½ cents per gallon, effective July 1, 1961, to continue through 1972. Enactment of this proposal will return the interstate program to a schedule of completion consistent with the intent expressed in the 1956 Highway Act of providing a system adequate to handle traffic needs for 1975. The increase in revenue will permit completion of the Interstate System by 1973 under cost estimates to be presented Congress in January 1961, and will permit repeal of the diversion of certain excise taxes to the Highway trust fund for the period July 1, 1961, to June 30, 1964.

As of October 1, 1960, 9,579 miles on the 41,000-mile Interstate System were open to traffic. More than half (4,962 miles) was built or improved under the Federal-aid interstate program, most of it under the 90% Federal, 10% State matching program launched in 1956. Toll roads, bridges, and tunnels incorporated in the system totaled 2,268 miles. In addition to the sections open to traffic 4,575 miles were under construction with interstate funds, and engineering and right-of-way acquisition was in progress on another 9,993 miles. Thus on October 1, 1960, some form of work was underway or completed on 24,147 miles of the 41,000-mile system—about three-fifths of the total system mileage.

Construction projects involving 106,400 miles in the regular Federal-aid program (primary, secondary, and urban) have been completed since July 1, 1956, at a total cost of \$6.55 billion; and contracts involving 24,384 miles at a cost of \$2.68 billion were underway on October 1, 1960. In addition, \$443 million of engineering work and right-of-way acquisition had been completed and \$305 million was underway.

Actual and estimated progress of Federal-aid highway programs are summarized in the following tables (dollars in thousands):

PAYMENTS UNDER CONTRACT AUTHORIZATION

[In thousands of dollars]

Fiscal year:	Contract authorization ¹	Unobligated contract authorization end of year	Federal payments	Projects approved		
				Number	Total cost	Federal share
1956.....	2,000,000	1,939,236	740,343	6,650	1,695,808	885,000
1957.....	2,550,000	2,268,148	965,507	7,966	3,361,000	2,212,000
1958.....	3,590,000	2,918,432	1,511,396	9,490	4,128,000	2,914,000
1959.....	3,400,000	2,805,112	2,612,576	11,590	4,656,000	3,479,000
1960.....	2,876,613	3,072,783	2,940,251	9,682	3,668,000	2,580,000
1961.....	3,073,685	3,052,314	2,867,963	8,400	4,185,000	3,062,000
1962.....	3,125,000	2,861,679	2,991,000	8,550	4,422,000	3,285,000

¹ Annual authorizations become available for obligation not later than January 1, in the preceding year and are shown in the year in which they become available. Amounts exclude contract authorizations for disaster assistance.

1. *Construction.*—Main highways within or adjacent to the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau of Public Roads on the basis of their contribution to meeting traffic and national defense requirements within the national forests. Authorizations are apportioned by States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authorizations of \$33 million are available for 1960, 1961, and 1962. The 1962 estimate finances the balance of the 1960 authorization and \$25.1 million,

a portion of the 1961 authorization both of which were provided by section 3 of the Federal-Aid Highway Act of 1958.

Legislation will be proposed to transfer the financing of this program to the Highway trust fund. These highways are similar in character and use to Federal-aid highways and should be financed in the same manner as the regular Federal-aid programs.

Actual and estimated progress of the program are summarized in the following table (dollars in thousands):

Fiscal year	Annual authorization ¹	Miles completed	Unobligated balance, end of year	Obligations for projects	Expenditures
1956.....	\$22,500	701	\$22,079	\$19,762	\$23,648

1959.....	33,000	429	38,490	32,250	27,798
1960.....	33,000	481	43,733	26,879	27,812
1961.....	33,000	550	40,000	35,421	30,893
1962.....	33,000	625	36,000	35,555	33,000

¹ Each fiscal year authorization becomes available for obligations not later than January 1 in the preceding fiscal year.

2. *Administration.*—In addition to administration this covers the costs of engineering supervision of the program.

3. *Forest Service administration.*—Payments to the Forest Service are made to cover its administrative and engineering costs in connection with the Forest highway program.

1. *Construction.*—Highways are constructed and improved through public lands in those States with large areas of such lands. The 1962 estimate finances the balance of the 1961 authorization provided by the Federal-Aid Highway Act of 1958 and \$2.7 million of the 1962 authorization provided by the Federal Highway Act of 1960. Legislation will be proposed to transfer the financing of this program to the Highway trust fund. These highways are similar in character and use to Federal-aid highways, are all on either the primary or secondary systems, and therefore should be financed in the same manner as the regular Federal-aid programs.

2. *Administration.*—This activity represents the estimated cost of administration and engineering supervision of the program.

REPAYABLE ADVANCES TO THE HIGHWAY TRUST FUND

For repayable advances to the "Highway trust fund" during the current fiscal year, as authorized by section 209(d) of the Highway Revenue Act of 1956 (70 Stat. 399), \$160,000,000. (Department of Commerce and Related Agencies Appropriation Act, 1961.)

The appropriation for 1961 provides an advance to the Highway trust fund required to satisfy expected demands for reimbursement to the States during the fiscal year. This advance was required because expenditures during the first half of 1961 will exceed revenues available in the trust fund. Thereafter, receipts will begin to exceed expenditures and will be adequate to permit repayment to the general fund of the full amount of the advance, with interest, prior to June 30, 1961. No advance is anticipated as being necessary in 1962.

1. *Inter-American Highway.*—The Central American section of the Inter-American Highway is being constructed in cooperation with the Republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama. These republics pay one-third of the cost of the highway through their countries. The highway in these countries will be approximately 1,555 miles in length and will connect with the completed Mexican section to permit uninterrupted motor travel from the United States to Panama. It is anticipated that by June 30, 1962, it will be possible to drive from the Mexican border to the Panama Canal, although some sections of the highway will only be all-weather surface roads.

2. *Woodrow Wilson Memorial Bridge.*—Funds provide for the construction of a bridge over the Potomac River near Jones Point, Virginia. It is expected that the bridge will be completed by September 1, 1961.

3. *Access roads (act of September 7, 1950).*—These funds are currently being utilized for the maintenance of the Pentagon Network and Shirley Highway in Arlington County, Va.

The Highway Revenue Act of 1956 (70 Stat. 374) provides for the transfer from the general fund of sums equal to certain percentages of taxes received on gasoline, diesel fuel, trucks, buses, tires, etc. The Secretary of the Treasury estimates the amounts to be so transferred.

In turn annual appropriations are authorized from this trust fund to Federal-aid highways (trust fund). Amounts in the fund not currently required are invested in U.S. securities, and interest thereon is added to the fund.

The Highway Act of 1959 increased motor fuel taxes by 1 cent per gallon to 4 cents, beginning on October 1, 1959, and extending through 1961. Effective July 1, 1961, and extending through June 30, 1964, half of the present excise tax on automobiles and five-eighths of the present tax on parts and accessories will be deposited in the Highway trust fund.

It is again proposed that the tax on motor fuel be increased to 4½ cents effective July 1, 1961, to continue through 1972. If enacted this proposal will provide adequate revenues in the Highway trust fund to complete the Interstate System by 1973 and continue authorizations for regular Federal-aid programs at an annual level of \$925 million. This action will make unnecessary the impending diversion of certain excises on automobiles, parts and accessories from the general fund and legislation will also be proposed to rescind these excise tax provisions of the Highway Act of 1959.

In addition, legislation will be proposed to transfer the financing of forest and public lands highways programs from the general fund to the Highway trust fund and, accordingly, the above schedules have been adjusted to show the effect of this proposal. The above schedules also

reflect action being proposed in 1962 to retain the revenues from aviation gasoline taxes in the general fund instead of depositing them in the Highway trust fund.

The status of the fund is as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate

BUREAU OF PUBLIC ROADS—Continued**Proposed for later transmission:**

FEDERAL-AID HIGHWAYS (TRUST FUND)

Status of Unfunded Contract Authorization (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Unfunded balance transferred from "Federal-aid highways (trust fund)"		92,000	
Unfunded balance carried forward		0	
Proposed transfer from "Highway trust fund" to liquidate contract authorization		92,000	

Under existing legislation, 1961.—The 1961 estimated expenditures of \$2,868 million will require a supplemental appropriation of \$92 million to reimburse the States for the Federal share of work done under Federal-aid highway authorizations. Increased revenue estimates over those originally anticipated have permitted the program to go forward faster than originally planned. The Highway trust fund estimated 1961 revenues, together with the carryover balance from 1960, will be sufficient to meet the additional appropriation and will leave a balance in the Highway trust fund of \$108 million at June 30, 1961.

FOREST AND PUBLIC LANDS HIGHWAYS (TRUST FUND)

Under proposed legislation, 1962.—Legislation is proposed to transfer financing of the forest and public lands highways programs from the general fund to the Highway trust fund. These highways are similar in character and use to Federal-aid highways and should logically be financed from the Highway trust fund in the same manner as the regular Federal-aid programs.

[In thousands of dollars]

1962 estimate

Reduction in new obligational authority: Contract authorization:		
"Forest highways".....	33,000	
"Public lands highways".....	3,000	
Reduction in appropriations to liquidate contract authorization:		
"Forest highways".....	27,400	
"Public lands highways".....	3,000	

HIGHWAY TRUST FUND

Under proposed legislation, 1962.—It is proposed that motor fuel taxes be increased to 4½ cents per gallon, effective July 1, 1961, to continue through 1972. Enactment of this proposal will return the Interstate System to a schedule of completion consistent with the intent expressed in the 1956 Highway Act of providing a system adequate to handle traffic needs for 1975 and permit repeal of the provisions of the 1959 act which will divert certain excise taxes to the Highway trust fund for the period July 1, 1961, to June 30, 1964.

Approval of this legislation will enable the Secretary to step up apportionments of Interstate authorizations beginning with the authorization for 1964, and will permit completion of the Interstate System by 1973 based on cost estimates presented to the Eighty-seventh Congress.

[In thousands of dollars]

1962 estimate

Reduction in trust fund receipts:		
Increase in motor fuel taxes to 4½ cents.....	777,000	
Decrease in excise taxes on automobiles and parts and accessories....	810,000	
Reduction in balance carried forward.....		—33,000

Under proposed legislation, 1962.—Revenue from excise taxes on aviation gasoline now goes into the Highway trust fund a portion of which is subsequently refunded to the taxpayer. Legislation will be submitted to the Congress providing for an increase in the tax rate and for the retention of aviation gasoline taxes in the general fund. If this proposal is enacted the Highway trust fund will reflect a net reduction of \$22 million in revenue for 1962, as follows:

	[In thousands of dollars]	1962 estimate
Net reduction in trust fund receipts: Excise taxes (transfer from general fund receipts).....		—22,000
Reduction in balance carried forward.....		—22,000

NATIONAL BUREAU OF STANDARDS

The National Bureau of Standards is the agency of the Federal Government responsible for the national standards of physical measurement. Against these standards, all the working standards of the Nation—those used by scientists and engineers in research and development, those used by industry in the measurement and production of interchangeable parts, and those used by other Government and State agencies to ascertain conformity—are calibrated. Closely associated with the standards activity, the Bureau serves science, industry, and Government as a national laboratory conducting research and development on methods of measurement and instrumentation; determining fundamental physical constants and basic properties of materials; developing improved methods for testing materials and equipment; developing codes and specifications; and assisting other Government agencies through advisory services on technical problems and by invention and development of devices to meet special needs.

Current authorizations:

RESEARCH AND TECHNICAL SERVICES

For expenses necessary in performing the functions authorized by the Act of March 3, 1901, as amended (15 U.S.C. 271–278e), including general administration; operation, maintenance, alteration, and protection of grounds and facilities; and improvement and construction of facilities as authorized by the Act of September 2, 1958 (15 U.S.C. 278d); **[\$18,800,000] \$24,000,000**, of which not to exceed **[\$1,275,000] \$2,000,000** shall be available for payments to the "Working capital fund", National Bureau of Standards, for additional capital: *Provided*, That during the current fiscal year the maximum base rate of compensation for employees appointed pursuant to the Act of September 2, 1958 (15 U.S.C. 278e), shall be equivalent to the entrance rate of GS-12. (15 U.S.C. 271–278e; 40 U.S.C. 14a; 5 U.S.C. 596a; Department of Commerce and Related Agencies Appropriation Act, 1961.)

Proposed supplemental due to pay increases.....		953	

The proposed increase of \$4,247 thousand for the research programs of the Bureau will provide for an important expansion of those programs and increased procurement of scientific equipment. The Bureau's programs of basic and applied research, development of instruments and methods of measurement, and general technical services are classified under six major activities.

1. *Physics and electronics.*—This activity includes the work of the metrology, heat, atomic physics, radiation physics, electricity, radio standards, instrumentation and data processing systems divisions. These divisions are primarily responsible for the Bureau's research underlying the national standards of physical measurement needed for our advancing technology and broadening range of scientific exploration. Particular emphasis will be given to standards for radio and microwave quantities, measurement and standards problems in plasma physics and astrophysics, and to high-temperature standards and measurement methods.

2. *Chemistry and metallurgy.*—This activity includes the work of the chemistry, organic and fibrous materials, metallurgy, and mineral products divisions. These divisions will continue their emphasis on research on the fundamental properties of materials under varying environmental conditions and on the preparation and analysis of high-purity substances.

3. *Mechanics and engineering.*—This activity includes the work of the mechanics, building research, and cryogenic engineering divisions. These divisions will contribute to the Bureau's high-temperature and high-pressure standards programs and will conduct studies of the engineering properties of materials at extremely high and low temperatures. A comprehensive program of basic and applied research on flames and fires will be funded under this activity in 1962.

4. *Radio propagation.*—This activity includes the work conducted by the divisions comprising the Central Radio Propagation Laboratory at Boulder, Colo., and supplementary field stations. The program planned for 1962 includes basic research on upper atmosphere physics and theoretical and experimental research in plasma physics and astrophysics.

5. *General services.*—This activity includes those technical programs of the Bureau that are primarily directed toward supporting other activities of the Bureau as well as the calibration and standard samples services provided to the States. Included are the applied mathematics division, the office of weights and measures, the reactor design group, certain special research programs, and research planning for advanced programs.

6. *Payment to "Working capital fund".*—Additional equipment required in support of the research programs will be procured by the Bureau's Working capital fund and added to the depreciable equipment inventory of that fund. It is estimated that in 1962 payments of \$1.8

million will be made from the Research and technical services appropriation to the Working capital fund to finance these capital outlays.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$402 thousand; 1959 (adjusted), \$397 thousand; 1960, \$562 thousand; 1961, \$575 thousand; 1962, \$660 thousand.

RESEARCH AND TECHNICAL SERVICES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, to remain available until expended, \$1,000,000, which shall be available to purchase currencies which the Treasury Department shall determine to be excess to the normal requirements of the United States. (7 U.S.C. 1701, 1704; 15 U.S.C. 271-278e; 40 U.S.C. 14a; 5 U.S.C. 596a.)

Program and Financing (in thousands of dollars)

Total obligations.....			990
Financing:			
Unobligated balance carried forward.....			10
New obligational authority (appropriation)			1,000

National Bureau of Standards responsibilities for basic and applied research, improvement of standards, and dissemination of information on properties of materials, measurement techniques, and radio propagation are of sufficient breadth to permit ready utilization of research capabilities in other countries. The proposed foreign currency program will supplement the Bureau's existing program, allow an acceleration of research effort in selected areas, and permit economies to the Bureau's regular appropriations over the long term.

The 1962 program, authorized by section 104(k) of the Agricultural Trade Development and Assistance Act of 1954, is made up of 13 separate projects to be conducted over a 3-year period in 3 countries. A cost of \$6 thousand, U.S. dollars, charged to the appropriation for Research and technical services, will be required for the initiation and supervision of the program.

4. *Relation of costs to obligations.*—Year-end balance of unpaid undelivered orders for 1962 is \$763 thousand.

PLANT AND FACILITIES

For expenses incurred, as authorized by section 1 of the Act of September 2, 1958 (15 U.S.C. 278[d]c-278e), in the acquisition, construction, improvement, alteration, or emergency repair of buildings, grounds, and other facilities; in the design of a nuclear

research reactor and associated laboratories], including a warehouse and an addition to the cryogenics laboratory and equipment for the main laboratory building, Boulder, Colorado; a standard frequency broadcast station (including land and equipment); land for an access road to a radio field station; a building and seawall at Maui, Hawaii; and [in the] procurement and installation of special research equipment and facilities therefor; \$2,000,000, to remain available until expended. (15 U.S.C. 271-278e; 40 U.S.C. 14a; 5 U.S.C. 596a; Department of Commerce and Related Agencies Appropriation Act, 1961.)

This appropriation provides for construction and improvements to the plant facilities of the National Bureau of Standards and procurement of major special facilities. The Bureau's laboratories and administrative offices occupy 86 buildings on a 68-acre tract in Washington, D.C. The Bureau also has a large laboratory on a 217-acre site at Boulder, Colo., and several small radio field stations, some of which are outside the continental limits.

Operating costs—1. *Improvements and modifications*.—Noncapitalized maintenance and repair projects are charged to operating costs including costs associated with closing the Sterling, Va., radio field station. None are anticipated in 1962.

Capital outlay—1. *Improvements and modifications*.—The budget includes \$237 thousand for minor capital improvements of a general nature required for the Bureau's laboratories and field stations. Other minor improvements, when of a special, project-related character, are charged to the appropriation for Research and technical services. Noncapital alterations are charged to the operating costs of this appropriation.

2. *Special equipment*.—This activity includes the procurement of large and unusual items of equipment for which the investment of working capital is not appro-

priate. The budget provides \$440 thousand for completion of a scatter radar transmitter and antenna designed to study the character of the upper atmosphere and \$284 thousand for construction and equipping of a standard frequency broadcast station. In addition, anticipated costs in 1962 include \$151 thousand for an atomic frequency standard financed in prior years.

3. *Construction*.—The budget includes \$935 thousand for construction of additional facilities at the Boulder laboratories and \$56 thousand for construction at the Maui, Hawaii, field station. Anticipated costs in 1962 include \$776 thousand for an addition to the Boulder radio laboratory building and \$100 thousand for the design and engineering of a nuclear research reactor, both financed in prior years, and \$625 thousand for Boulder facilities financed in the 1962 budget.

4. *Acquisition of land*.—Land will be acquired for a standard frequency broadcast station and an access road to a radio field station. Anticipated costs in 1962 include \$75 thousand for other field station sites financed in prior years as well as the \$48 thousand budget program.

5. *Relation of costs to obligations*.—Year-end balances of unpaid, undelivered orders are as follows: 1959, \$133

thousand; 1960, \$167 thousand; 1961, \$856 thousand; 1962, \$370 thousand.

CONSTRUCTION OF FACILITIES

For an additional amount for "Construction of facilities", including construction, equipment, and expenses of occupying the facilities, **[\$23,500,000]** \$50,000,000, to remain available until expended: *Provided*, That not to exceed **[\$2,500,000]** \$500,000 of this amount shall be available for payment to the "Working capital fund," National Bureau of Standards, for additional capital for purchase of equipment. (15 U.S.C. 271-278e; Department of Commerce and Related Agencies Appropriation Act, 1961.)

New obligational authority (appropriation).....				23,500	50,000				

This appropriation finances the construction, equipping, and occupancy of new laboratory, administrative, and service buildings to be constructed on a site near Gaithersburg, Md., to house the activities of the National Bureau of Standards now conducted in Washington, D.C. The new facilities are replacements for present facilities and do not provide for new programs, although they will house certain equipment for radiation physics research and large force measurements not heretofore available.

The first increment of the construction program was provided in the 1961 budget. The 1962 budget provides for the second increment of the program, including construction of seven general-purpose laboratory buildings and administration, shops, and warehousing buildings, as well as the completion of site development and utilities work and financing of major built-in equipments. Additional appropriations will be required in future years for

various special-purpose laboratories and to make equipment purchases necessitated by the relocation.

1. *Design and engineering.*—Detailed planning and preparation of architectural designs and engineering drawings are now underway, and much of this phase of the work will be completed during 1961. Estimated costs for 1962 cover continued architectural and engineering services, preparation of invitations to bid, bid analysis and awarding of construction contracts, and construction supervision. An appropriation is required to finance supervision of the construction to be contracted in 1962.

2. *Site acquisition.*—It is anticipated that court action in the condemnation proceedings for the Gaithersburg site will be completed during the current year. No further costs are estimated under this activity after 1961.

NATIONAL BUREAU OF STANDARDS—Continued

Current authorizations—Continued

CONSTRUCTION OF FACILITIES—Continued

3. *Construction.*—This activity includes the construction of laboratories and other buildings, including mechanical and electrical equipment, special laboratory services, site development, and utilities. Costs estimated for 1962 reflect continued activity on the items included in the first construction increment as well as initial activities under new contracts.

4. *Equipment.*—Estimated costs for major scientific facilities are primarily for the linear electron accelerator and the large force measurement equipment financed by the 1961 appropriation. These facilities will be donated to the Bureau's Working capital fund and no depreciation charged against their use.

The budget for 1962 provides funds for such other large items as have long procurement lead time. Other equipment, the replacement or acquisition of which is necessitated by the relocation program, will be purchased through investment of working capital and will be depreciated in subsequent years. Payment of not more than \$2.5 million from the Construction of facilities appropriation to the Working capital fund to provide the necessary capital has been authorized. Payment of an additional \$0.5 million from the appropriation to the fund is proposed in 1962.

5. *Moving and occupancy.*—This activity includes the costs of moving and installing scientific apparatus as well as certain semifixed furnishings for laboratory, library, cafeteria, and other areas. Estimated costs for 1962 are for furnishings for the two laboratories now under construction. The budget includes financing of built-in furnishings for buildings to be contracted in 1962. The balance of furnishing and moving costs will be deferred until a subsequent year.

6. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1959, \$2,049 thousand; 1960, \$1,765 thousand; 1961, \$17,436 thousand; 1962, \$38,547 thousand.

This fund finances from advances and reimbursements all operations of the National Bureau of Standards except major construction projects. The principal of the fund, as of June 30, 1960, consisted of \$5 million in appropriations, \$1 million in capital provided by appropriations of the Bureau, and \$39 million in net donated assets. The Government investment is estimated to grow through donation of cash and other assets financed by National Bureau of Standards appropriations to \$87 million by June 30, 1962.

Operating costs—1. *Technical program*.—Research and development activities are conducted by the National Bureau of Standards on the request of other Government agencies and the public, as well as in support of the Bureau's own research program.

The total research and development program conducted on contract with other agencies is expected to decline as the Bureau's own appropriation increases, although in certain of the Bureau's divisions the demands of the missile and space programs are expected to result in increases in other agency programs. The provision of mathematical computation services to other agencies and the provision of calibration services to the public and to other agencies are also expected to increase.

2. *Plant improvement and special equipment*.—This activity includes the costs of the Working capital fund which are reimbursed from the Bureau's capital outlay appropriations. The plant improvements and special equipment procured are donated to the fund upon completion and carried as assets of the fund at cost.

3. *Other operating costs*.—The donation or sale of excess material and the donation of excess equipment to other agencies are recorded as operating costs of the fund.

Capital outlay.—Working capital of the fund is invested in equipment which is subject to depreciation charges. In 1962 the equipment requirements of the expanded Bureau research program will require an augmentation of working capital, which will be accomplished through payments to the fund for additional capital from the National Bureau of Standards' appropriation for Research and technical services. Some of the equipment for the new laboratories of the Bureau will also be purchased as investments of the fund, the additional capital being provided by payments from the appropriation for Construction of facilities. All other equipment and facilities fi-

nanced by Bureau appropriations are shown as donated assets of the fund.

7. *Relation of costs to obligations*.—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate

WEATHER BUREAU

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the Weather Bureau, including maintenance and operation of aircraft; not to exceed \$25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); purchase of upper air supplies for delivery through December 31, of the next fiscal year; and not to exceed \$10,000 for maintenance of a printing office in the city of Washington, as authorized by law; [\$46,042,900: Provided, That, during the current fiscal year, the maximum amount authorized under section 3(a) of the Act of June 2, 1948 (15 U.S.C. 327), for extra compensation to employees of other Government agencies for taking and transmitting meteorological observations, shall be \$5 per day; and the maximum base rate of pay authorized under section 3(b) of said Act, for employees conducting meteorological investigations in the Arctic region, shall be \$6,500 per annum, except that not more than five of such employees at any one time may receive a base rate of \$9,000 per annum, without regard to the Classification Act of 1949, as amended.] \$55,615,000.

For an additional amount for "Salaries and expenses", \$185,000: *Provided*, That appropriations granted under this head for the fiscal year 1961 shall be available for compensation to employees conducting meteorological investigations in the Arctic region and to employees of other agencies as authorized by the Act of March 28, 1960 (74 Stat. 11). (15 U.S.C. 311-313, 325-328, 72 Stat. 783; Department of Commerce and Related Agencies Appropriation Act, 1961.)

Note.—Includes \$936 thousand for activities previously carried under "Operation and maintenance, Navy," and "Operation and maintenance, Air Force." The amounts obligated in 1960 and 1961 are shown in this schedule as comparative transfers.

The Weather Bureau measures, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of U.S. commerce, industry, agriculture, and the general public.

1. *Weather measurements and forecasts.*—Regularly scheduled forecasts are issued for U.S. territory and waters with special emphasis on severe storms. Special forecast and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper-air weather measurements are taken at several hundred locations to serve forecasting requirements. Current weather information is disseminated widely for the benefit of aviation and other interests.

Expansion of the Bureau's observation and service facilities is designed to keep pace with more exacting air-traffic control requirements as well as to advance general weather services. The increase for 1962 provides for (a) transfer of numerical weather predictions from the Department of Defense, (b) improvements in the upper-air observing program, (c) establishment of quality control program for distribution of aviation weather information, and (d) operational utilization of data from meteorological satellites.

2. *River and flood forecasts and warnings.*—The hydrologic service furnishes flood warnings and public forecasts of river height and flow on the country's principal rivers and their tributaries. The estimate provides for a modernized river forecast center for the west gulf and Rio Grande River basins.

3. *Climatology.*—The climatological service seeks to determine and record the various types of climate, to explain the causes of these climates, their variation, trends, geographical locations, and the effect climate has on the economy of the Nation, and to communicate this intel-

ligence in such a manner as to insure the fullest realization of its potential benefits. The increase for 1962 provides for the decennial climatological census.

4. *Administration.*—This activity provides executive direction and administrative support to the three appropriations: Salaries and expenses, Research and development, and Establishment of meteorological facilities.

RESEARCH AND DEVELOPMENT

For expenses necessary for the conduct of research by the Weather Bureau, including development and service testing of equipment; operation and maintenance of aircraft [including the transfer from the Department of Defense, without payment therefor, of one aircraft]; not to exceed \$25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and for acquisition, establishment, and relocation of research facilities and related equipment; [\$6,262,500] \$9,000,000, to remain available until June 30, 1964. (15 U.S.C. 313; 72 Stat. 783; Department of Commerce and Related Agencies Appropriation Act, 1961.)

Note.—Includes \$2,200 thousand for activities previously carried under "National Aeronautics and Space Administration." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

Research is conducted to increase fundamental knowledge of the science of meteorology and in order to improve the accuracy and timeliness of weather forecasts; the development program is concerned with new instrumentation and procedures, including related activities of test and evaluation.

1. *Meteorological*—Covers: (a) *Hurricane, tornado, and other severe storms*.—To discover why and where these storms will form, when they will intensify, and how they will move so as to provide improved warnings to the public. (b) *Atmospheric processes and forecasting methods*.—Research on fundamental meteorological problems such as the physical basis for the global circulation of the atmosphere, the physics of clouds and precipitation, and short- and long-range weather forecasting. (c) *Aviation*.—A program of research and development to improve terminal and enroute weather forecasts and warnings for civil and military aviation operations. (d) *Satellite*.—Development of instrumentation for meteorological satellites and conduct of basic and applied research using data from meteorological satellites. (e) *Instrumental*.—The development and testing of improved instrumentation and automation methods.

The increase in 1962 provides for transfer of meteorological satellite research from National Aeronautics and Space Administration, and for new atmospheric studies.

2. *Hydrologic*.—Efforts are concerned with improving techniques for forecasting river heights and with the utilization of weather radar to permit issuance of flash flood warnings.

3. *Climatic*.—Methods of analysis and presentation of climatic information are developed for application to operational and planning aspects of business, industry, commerce, and agriculture.

The accuracy of weather measurements, forecasts, and warnings is being improved by the procurement and installation of new instrumental equipment and by the modernization of existing facilities. The 1962 estimate is to carry forward the modernization program begun in 1956 to make possible a more accurate aviation weather system and more timely hurricane and tornado warnings.

The cost of operating and maintaining equipment installed under this appropriation is covered by the appropriation "Salaries and expenses."

1. *Upper-air observational facilities*.—Consists of ground installations to continuously track radio transmitters carried to altitudes of 100,000 feet by sounding balloons. It also includes shelters for the equipment and miniaturized equipment for use on shipboard to obtain measurements of high altitude weather conditions over the oceans.

2. *Weather surveillance radar*.—Provides a continuous picture of changing weather conditions up to 250 miles

from the stations, facilitating the preparation of forecasts and increasing the advance-warning time.

3. *Surface observational facilities.*—Modern electronic instruments that provide continuous automatic measurements of cloud height, visibility, temperature, humidity, wind direction and velocity, including computers to convert these data for optimum use in controlling air traffic.

4. *Construction, remote facilities.*—Covers construction of office and housing units at places where these facilities are not available from any other source.

5. *Engineering and technical support.*—Provides staff for planning, site surveys, actual installation and initial calibration of equipment.

The following table lists the major facilities already funded and those budgeted in 1962:

	Funded through 1961	Proposed, 1962
1. Upper-air equipment:

The Weather Bureau conducts for other agencies special projects in weather measurements and forecasts, and meteorological studies and statistics, including river and rainfall observations, climatological studies and studies of atmospheric pollution, and the procurement of technical equipment.

The estimate reflects the transfer to the Weather Bureau of military support for the joint numerical weather prediction program and certain research and development work on meteorological satellites formerly supported by the National Aeronautics and Space Administration.

Under proposed legislation, 1962.—Legislation will be proposed to authorize broader assistance to areas of substantial and persistent unemployment, including loans and grants for the purpose of promoting economic re-development in such areas. An appropriation of \$83 million is anticipated for the program of which \$75 million is to provide capital for a revolving fund.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

Sec. 102. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (5 U.S.C. 596a), to the extent and in the manner prescribed by said Act.

Sec. 103. Appropriations in this title available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), but, unless otherwise specified, at rates for individuals not to exceed **[\$50]** \$100 per diem; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131). (*Department of Commerce and Related Agencies Appropriation Act, 1961.*)

[GENERAL PROVISIONS]

[Sec. 401. No part of any appropriation contained in this Act, or of the funds available for expenditure by any individual, corporation, or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation proposed or pending before Congress.]

[Sec. 402. No part of any appropriation contained in this Act shall be used to pay any expenses incident to or in connection with participation in the International Materials Conference.] (*Department of Commerce and Related Agencies Appropriation Act, 1961.*)

This chapter of the 1962 budget includes funds for the military functions of the Department of Defense and for the military assistance portion of the mutual security program. Although the appropriation for military assistance will continue to be made to the President, it is shown with the appropriations for the military functions of the Department of Defense.

¹ Additional obligational authority available by transfer: \$430 million in 1960; \$365.5 million in 1961; \$150 million in 1962.

Military personnel.—Expenditures for Active Forces, Reserve Forces, and retired pay in 1962 are estimated at \$12,390 million, which is \$247 million higher than 1961 and \$652 million higher than 1960.

Active Forces personnel.—Military personnel expenditures for Active Forces in 1962 are estimated at \$10,850 million, which is \$153 million more than 1961 and \$460 million more than 1960. The budget estimate provides for a total strength of 2,492,900 on June 30, 1962, the same as now estimated for June 30, 1961 and 17,675 more than the actual strength on June 30, 1960.

ACTIVE FORCES MILITARY PERSONNEL

[In thousands]

	June 30, 1960	June 30, 1961	June 30, 1962
Total, Department of Defense.....	2,475	2,493	2,493
Army.....	872	870	870
Navy.....	618	625	625
Marine Corps.....	171	175	175
Air Force.....	814	823	823

Average strength in 1962 is estimated at 2,494,748, compared with an average of 2,489,171 in 1961 and 2,487,685 in 1960. The average cost per military man is expected to rise to \$4,361, up from \$4,319 in 1961 and \$4,254 in 1960. Responsible for the increase of \$42 in per capita costs in 1962 are such factors as: (1) higher longevity payments; (2) higher separation costs resulting from the larger personnel turnover anticipated in 1962; and (3) a small increase in the grade structure, both officer and enlisted.

Furthermore, although the number of enlisted personnel receiving proficiency pay during 1962 will be held to the level planned for June 30, 1961, the higher average number participating during 1962 will also increase personnel costs for the fiscal year.

Reserve Forces.—Expenditures for Reserve Forces military personnel in 1962 are estimated at \$614 million, which is \$57 million less than 1961 and \$40 million less than 1960. The decrease in 1962 reflects a 10% reduction in Army Reserve and Army National Guard paid drill training strength from June 30, 1961, to June 30, 1962, to a level considered adequate to meet our national security objectives. Other Reserve components will be maintained during 1962 at about their June 30, 1961, levels. Reservists on paid status at the end of 1962 are

expected to number 1,002,695, compared to 1,068,268 at the end of 1961 and 1,078,589 at the end of 1960.

Total.....	1,079	1,068	1,003

¹ Includes 3- to 6-month active duty trainees.

The Reserve Forces program in 1962 provides for the maintenance of the high standards of readiness already achieved and for the progressive modernization of the forces. The latter objective includes the provision of more modern equipment as well as a reorientation in mission for some of the Reserve components.

In order to provide the ability to augment immediately the active fleet upon mobilization, the Naval Reserve during 1962 will continue to emphasize the selected Reserve program. Personnel have been assigned and formed into crews for 21 air antisubmarine warfare squadrons, 13 destroyers, and 27 destroyer escorts. In addition, 11 coastal mine warfare ships and 63 logistic support aircraft will be maintained in a state of readiness during 1962.

All elements of the Marine Corps Reserve have been brought into organizational conformity with the combat elements of the Regular Fleet Marine Forces. This, coupled with the steadily increasing level of training conducted under multiple paid drills, is effecting an improvement in the mobilization readiness of the Marine Reserve.

The Air National Guard will continue to shift a portion of its efforts from the air defense role to airlift support in response to the changing needs of the active forces. To this end, the number of operational support squadrons will increase, especially in the transport and tanker categories. However, the Air National Guard will continue to provide a significant air defense and tactical fighter capability during the period. Twenty-two fighter interceptor squadrons contribute pilots and planes which in an active alert status participate daily in missions assigned by the Air Defense Command. State civilian employees who are members of three aircraft control and warning units operate and maintain their stations continuously and provide radar coverage and aircraft control in areas not covered by regular Air Force units.

Similarly, the airlift capability of the Air Force Reserve will also increase during 1962 as some of the C-119 squad-

rons are converted to the larger C-124 transport/cargo aircraft. The troop carrier units will continue to participate with Army airborne troops in training exercises.

The Army reserve components during 1962 will continue to support both combat divisions and separately organized combat and service support units. The training of these units is coordinated closely with the Active Army. In addition, 4,325 State civilian employees who are members of 82 batteries of Army National Guard missile battalions will maintain Nike-Ajax and Nike-Hercules air defense sites on an around-the-clock basis at critical locations throughout the United States.

Retired pay.—Expenditures for retired pay in 1962 are estimated at \$926 million, which is \$151 million more than 1961 and \$232 million more than 1960. Of the increase, \$31 million is associated with proposed legislation which would authorize military personnel retired prior to June 1, 1958, to receive benefits consistent with the higher rates provided by the Military Pay Act of 1958. The balance of the increase results from the large number of annuitants added to the retired rolls. The average number of retired military personnel during 1962 will total 320,000, an increase of 46,000 over 1961 and 76,000 over 1960. This accelerating rise in numbers and cost reflects a trend which is expected to continue well into the next decade as personnel who entered service during World War II become eligible for retirement.

Operation and maintenance.—Expenditures for operation and maintenance of the Active and Reserve Forces in 1962 are estimated at \$10,671 million, which is \$271 million more than 1961 and \$448 million more than 1960.

Civilian man-years, flying hours, steaming hours, numbers of installations and inventories of some major weapons such as aircraft, will continue to decline gradually in 1962 from the levels of the previous 2 years. The numbers of active duty military personnel and active ships are scheduled to remain virtually unchanged during 1962, but missile inventories will increase significantly. Some activities and costs will decline but this will be more than offset by additional costs associated with new systems such as the Ballistic Missile Early Warning System (BMEWS) and by higher unit costs of operating and maintaining the new and more complex weapons which are continually entering the inventories of the military services.

For example, the total cost per flying hour will continue to rise, reflecting the increasing number of higher performance aircraft entering Service inventories. The average cost per flying hour of an F-105 is almost three times that of an F-100. The cost per steaming hour in the Navy rises sharply as the number of larger and more powerful ships and nuclear-powered ships in the fleet increases. A nuclear-powered attack submarine costs considerably more to operate than a conventionally powered attack submarine.

Ship maintenance costs show a like pattern. An overhaul of a nuclear-powered attack submarine costs about twice that of its conventional counterpart. Also, because of their more complicated armament and complex electronics, modern ships are considerably more expensive to maintain.

In addition to the higher unit costs of operating today's equipment, the expansion of certain going programs and the introduction of entirely new types of weapons and equipment all generate further cost increases in 1962.

Tactical missiles, which will enter the operational inventory at an increasingly rapid rate, require new and costly maintenance support. In the area of strategic missiles, the marked increase in the number of operational ICBM sites throughout the country will claim a growing share of operation and maintenance resources. Similarly, activities supporting the Polaris missile firing submarine fleet will require increased funds as additional ships are deployed on station.

The Ballistic Missile Early Warning System (BMEWS), the semiautomatic ground environment (SAGE) surveillance and control system, and other electronic warning, control and communications systems now coming into full operation are causing significant increases in operation and maintenance costs. A substantial increase also results from the stepped up rate of indoctrination flight training in the Air Force for the standby airborne alert capability.

The increased readiness measures ordered by the President will generate additional expenditures in 1962. These measures involve added field training and mobility exercises for the Army's Strategic Army Corps (STRAC) forces and additional ship deployments by the Navy.

The increase in the number of family quarters that will be occupied by military personnel in the United States in 1962 is another factor in the rising cost of operating and maintaining the Defense Establishment.

Procurement.—Expenditures for the procurement of major weapon systems and equipment in 1962 are estimated at \$14,372 million. This is \$619 million more than in 1961 and \$60 million more than in 1960.

The 1962 budget provides new obligational authority for the procurement of 1,420 aircraft, which is 96 less than in 1961 but 30 more than in 1960. Of the total aircraft planned for 1962 procurement, 515 are for the Air Force, 644 are for the Navy and Marine Corps, and 261 are for the Army. Inasmuch as the equipping of the presently approved Strategic Air Command heavy and medium bomber forces will be completed with the aircraft procurement programs funded in 1961, no additional appropriations for the B-52 and B-58 aircraft are requested for 1962. However, development work on the B-70 Mach 3 intercontinental bomber will go forward with the first flight test planned for 1963. The current rate of production of KC-135 jet tankers will be maintained in 1962. These aircraft will further improve the in-flight refueling capability of the Strategic Air Command.

A substantial number of F-105 supersonic all-weather fighter bombers are planned for procurement in 1962. The high performance and wide versatility of this aircraft will provide a major increase in the effectiveness of Air Force tactical squadrons in supporting ground combat operations and in other tactical air missions. Also contributing substantially to the Nation's capability for limited war operations will be the increased procurement of C-130-B turbo-prop transport aircraft.

The development of a new long range cargo transport specifically designed for MATS is being accelerated. This aircraft should also be suitable for procurement by commercial carriers because of its expected low operating ton-mile cost. Another major increment in the modernization of the Air Force's training and support fleet will be undertaken with the procurement of over 200 T-38, T-39, and T-40 jet aircraft.

Naval aircraft procurement in 1962 will be somewhat lower than the level of 1961 but above that of 1960. A significant number of the versatile A4D attack aircraft will be procured as well as an increased quantity of the new A2F low level attack aircraft. A considerable number of supersonic Navy fighters will be purchased—including an increased quantity of all-weather F4H-1's—as well as a variety of short and long range ASW patrol aircraft and four models of helicopters. The Navy, in 1962, will begin the modernization of its air training establishment with the purchase of a small number of T-39 jet utility trainers.

Army aircraft procurement in 1962 will be above that in 1961 and over 50% higher than that in 1960. Included in the 1962 program are the Mohawk combat surveillance aircraft, the Caribou transport, and the Iroquois and Chinook helicopters.

Work on the four main strategic ballistic missile systems will be continued at a high level. Procurement funds required in 1962 for the 13 authorized Atlas squadrons, however, will be considerably less than in previous years as the funding of this earliest ICBM system approaches completion. Funds recommended for Titan, on the other hand, will be above the high level of 1961 and, will largely complete the 14-squadron program. Funding for Minuteman will be sharply increased as this missile moves into the production phase. Procurement funds for the Polaris missile system will be at about the same high level achieved in the present 1961 program. Allowing for the difference in leadtime, Polaris missiles will be purchased in phase with the five submarines planned for construction in 1962. Additional funding will also be provided for the Hound Dog air-to-surface missile for use on the B-52 heavy bombers.

In the air defense area, no new funding will be required for the Bomarc, and 1962 appropriations for the Nike-Hercules surface-to-air missile system will generally complete the financing of this program. However, funds are included for over 1,000 Terrier, Tartar, and Talos surface-to-air missiles for anti-air-warfare to bring Navy inventories in line with the commissioning of guided missile ships. In addition, several thousand Sparrow III, Sidewinder, and Falcon air-to-air missiles will be procured in 1962. Air defense of ground forces in the field will be strengthened by the planned procurement of a considerable number of mobile Hawk and man-carried Redeye surface-to-air missiles.

A wide variety of other missiles for use in support of the ground forces is planned for procurement in 1962. A large number of Bullpup air-to-surface missiles will be purchased to enhance the effectiveness of Air Force fighter bombers and Navy light attack bombers in non-nuclear air operations against enemy ground forces.

Work on the Pershing solid fuel, tactical missile will go forward at a high rate, and procurement funds in 1962 will provide the first significant production quantities of this missile for the equipping of operational units. An appreciable number of Sergeant surface-to-surface tactical missiles for field Army use will also be purchased. Improved Honest John and Little John rockets to be procured in 1962 will largely complete the planned programs for these weapons. A third substantial increment of the Davy Crockett man-carried nuclear rocket will be purchased in 1962, as well as improved guided antitank missiles. All of these weapons will add considerably to the Army's ability to provide close range tactical firepower.

Army modernization, generally, and divisional mobility and firepower, in particular, will be increased with the continued procurement in 1962 of substantial numbers of M-60 tanks, M-113 personnel carriers, M-88 tank recovery vehicles, new self-propelled artillery pieces, and tactical trucks of several types. Production of the new 7.62 mm. M-14 rifle and M-60 machinegun will be continued into 1962 together with increased quantities of ammunition for these and other new weapons.

Funds for electronics procurement in 1962 will be somewhat less than in 1961 and about \$150 million less than in 1960. Army and Navy procurement of tactical electronic and communications equipment in 1962 will be at about the levels of the previous 2 years. Procurement of Air Force command and control communications equipment associated with the ballistic missile systems is also increased. However, overall Air Force electronics procurement will be less than in 1961 since the SAGE system, Distant Early Warning (DEW) line, BMEWS, etc., will be substantially completed with 1961 and prior year funds.

The 1962 shipbuilding program provides for a total of 52 ships—30 new construction and 22 conversions. This ship construction program, costing about \$1.9 billion, is larger than the program underway for 1961 both in dollar value and in the number of ships to be constructed or converted. Included in the 1962 new construction program are the following: 7 guided missile frigates; 3 nuclear-powered attack submarines; 6 escort ships including 3 guided missile types; 1 amphibious assault ship; 2 amphibious transports (dock); 1 combat store ship; 1 fast combat support ship; 3 oceanographic research and survey ships; and 1 hydrofoil research ship. Another 14 World War II-type destroyers will undergo major modernization under that part of the fleet rehabilitation and modernization program funded in the shipbuilding appropriation. By the end of 1962, 36 destroyers will have undergone this modernization and rehabilitation. These are in addition to the less extensive modernizations provided for in the operation and maintenance programs. Six conventionally powered attack submarines, and two other ships, will undergo major conversion in the 1962 program.

The 1962 shipbuilding program will also provide funds for another increment of 5 Polaris fleet ballistic missile submarines. This will increase to 19 the number of Polaris submarines fully funded in 1962 and prior years. Advance procurement of long leadtime components for an additional 5 Polaris submarines will also be provided in 1962.

Research, development, test, and evaluation (RDT&E).—Expenditures for basic and applied research and for the development, test, and evaluation of new and improved weapons and equipment under this title are estimated at \$4,388 million in 1962. This is \$240 million more than in 1961 and \$656 million more than in 1960.

Under the rearrangement of the Defense budget adopted in 1960, funds for the development, test, and evaluation of major weapons systems and components, which were previously carried in the procurement accounts, were largely transferred to this title. In this budget, such transfers are virtually complete, except for funds for the development, test, and evaluation of Air Force ballistic missiles, the B-70, the new cargo aircraft for the Military Air Transport Service, and the completion of development of certain Navy aircraft which remain in the procurement accounts separately identified.

Aircraft development in 1962—in line with the declining emphasis on manned aircraft—will be slightly lower than in 1961. Funds are provided for the development of a new vertical takeoff and landing transport aircraft prototype, to be developed jointly by the military departments. The Army will initiate development of a new surveillance aircraft, and the Air Force will continue to support its part of the aircraft nuclear propulsion program conducted jointly with the Atomic Energy Commission. The latter project can now be carried at a lower funding level than was programed in previous years, as work is to be continued on one propulsion system. Funding for the Dynasoar, a boost-glide rocket vehicle, designed to explore the fringes of space in suborbital flight, will be at a somewhat higher level than in 1961.

The development of missiles and related equipment continues to constitute a major portion of the total RDT&E effort. Funds devoted to this area in 1962, however, will be somewhat less than in 1961, as the largest portion of the early development effort on ballistic missiles of all kinds approaches completion. However, funds will be provided at about the 1961 level to continue important work related to missiles and on devices and techniques to enable ballistic missiles to penetrate possible enemy defenses.

About one quarter of a billion dollars will be provided to continue the development and testing program for the Nike-Zeus anti-missile missile, culminating in full-scale system tests in the summer of 1962. Substantial funds will be devoted in 1962 to the continued development of the solid fuel, tactical missile Pershing. Work will go forward on a new, highly mobile surface-to-surface missile to support battle groups in the combat area, as well as on Mauler, a surface-to-air missile for air defense of the forces in the field.

Substantial funds will continue to be provided for the development of the Polaris missile, including the longer range A-3 version. These developments will enable the Polaris submarines to be deployed with greater flexibility. Development work will also continue on the long-range, air-launched ballistic missile Skybolt and further development effort will be devoted to the air-to-surface tactical support missile Bullpup.

Military space and satellite development activities are rapidly rising in importance and in 1962 will rank as one of the largest categories within the RDT&E title. Substantial funds are provided for development of Midas and Samos early warning and reconnaissance satellites; for Advent, an instantaneous repeater communications satellite system; and for Transit, the navigation satellite.

Development effort on Shillelagh, a short-range combat vehicle mounted weapon system primarily useful against enemy personnel and tanks will be emphasized and further work will be done on the nuclear-capable Davy Crockett system. A wide variety of other projects will also be supported, including airborne assault vehicles, biological and chemical warfare techniques, strategic and tactical control and communications systems, and fleet air defense.

In 1962 a large and diversified program of research on antisubmarine warfare will be carried forward. A large number of antisubmarine warfare developments, including surveillance systems and continued work on antisubmarine weapons such as the Subroc will be supported.

Fundamental research will be continued at a somewhat higher level than that achieved in earlier years. Extensive work in electronics, materials research, oceanography, and other basic and general applied research will be undertaken in 1962.

As in past years, \$150 million is included for the Department of Defense Emergency Fund. These funds will permit rapid exploitation of scientific breakthroughs and unanticipated technological developments which may occur during the coming year.

Military construction.—Expenditures for military construction in 1962 are estimated at \$1,327 million, which is \$41 million less than 1961 and \$299 million less than 1960. Construction of Strategic Air Command dispersal bases and alert facilities, and basic air defense installations will be virtually completed. However, decreases in these areas are partially offset by increases for missile base construction.

Funds to complete work on Atlas ICBM bases were provided last year. The 1962 budget provides for further Titan and Minuteman base construction. It also includes funds for additional base construction to support the Polaris submarine fleet, including expanded training facilities required for this program. Funds for the improvement of radar systems associated with the Nike-Hercules air defense system in this country and overseas and control facilities for Hawk air defense missiles overseas are also provided.

Other important projects include: Additional construction of test facilities for the Nike-Zeus antimissile development program; support facilities for ground equipment for military space projects including Midas and Samos earth satellites; additional construction of facilities for the worldwide communications system; and the first portion of the Atlantic Underwater Test and Evaluation Center.

The existing physical plant, including aviation, waterfront, medical, and maintenance facilities will also be improved and modernized. Construction at overseas bases will be held to the minimum necessary for combat and training effectiveness. No provision is made for further family housing or dependent community facilities in foreign countries.

Reserve construction expenditures are estimated at \$64 million, slightly above the level of 1961 and 1960. This program will complete a substantial amount of the remaining requirements for the replacement and improvement of existing reserve facilities.

Revolving and management funds.—The \$20 million of reappropriations shown under this title for 1962 is the amount to be added to the revolving fund for Wherry housing. These funds will be utilized by the Department to continue in 1962 its program of acquiring and rehabilitating Wherry housing units.

Again this year there will be an excess, estimated at \$238 million, of receipts over expenditures in the Department's revolving and management funds. This excess will serve to reduce the Department's net expenditures for military functions to \$42,910 million.

Composition of the Armed Forces.—For 1962, the budget will provide the following major forces:

	DEPARTMENT OF DEFENSE—SUMMARY OF MAJOR FORCES		
	Actual June 30, 1960	Planned June 30, 1961 June 30, 1962	
Army:			
Divisions.....	14	14	14
Armored cavalry regiments.....	5	5	5
Armored combat commands.....	1	1	1
Brigades (infantry).....	2	2	2
Battle groups (infantry).....	9	9	9
Field artillery missile groups (heavy) (Redstone).....	3	3	3

DEPARTMENT OF DEFENSE—SUMMARY OF MAJOR FORCES—Con

	Actual	Planned

Air refueling squadrons.....	62	65	63
MATS air transport squad- rons.....	22	21	19
Other specialized squadrons.....	33	25	25
Active aircraft inventory.....	18,712	16,941	16,080

¹ The 817 ships originally programmed for this date were not actually achieved until October 1960.

² Does not include temporary upward adjustment associated with the increase in certain operating requirements.

Army.—During 1962, the Army will continue to support 14 divisions and 24 other major combat units, including 5 armored cavalry regiments, 1 armored combat command, 2 infantry brigades, 9 infantry battle groups, 3 field artillery missile groups (heavy) and 4 missile commands, the same force as planned for the end of the current fiscal year. Separately organized surface-to-surface missile battalions will increase in number as new Sergeant and Pershing units are activated.

The Army's 14 divisions will be deployed in the same manner as in 1961, with 7 in critical overseas areas, 1 in Hawaii, and 6 in the continental United States, including 3 divisions in the Strategic Army Corps.

In the area of air defense, the last Active Army antiaircraft gun battalion will be inactivated during 1962. In addition, the program of conversion from Nike-Ajax to the nuclear capable Nike-Hercules surface-to-air missile will be completed as the last Active Army Nike-Ajax battalion is transferred to the Army National Guard. The number of both Hawk and Nike-Hercules battalions will be increased, thus greatly increasing the Army's air defense effectiveness.

Modernization of Army ground forces will continue with large deliveries of the new M-151 jeep, the M-113 armored personnel carrier, and the M-60 tank, scheduled to be made to the troops during 1962. In addition, significant quantities of new tactical missiles such as Sergeant and Little John, and the man-carried close support nuclear rocket Davy Crockett will be placed in the hands of operational units.

The active aircraft inventory will continue to rise during 1962 as additional modern planes, such as the Mohawk and Caribou fixed-wing aircraft and the Iroquois and Chinook helicopters, are delivered.

Navy and Marine Corps.—The Navy will support 817 ships in the Active Fleet during 1962. This is the same level as originally planned for the end of 1961. Because of an increase in certain operating requirements, there has been a temporary upward adjustment in the number of ships during the current year.

The combat capability of the fleet will be markedly increased during the year as several modern ships are received from new construction. Among them will be the first nuclear-powered attack aircraft carrier, *Enterprise*, and the first nuclear-powered cruiser, *Long Beach*, armed with Talos and Terrier anti-air-warfare missiles. Several new guided missile destroyer types will also join the fleet during the year.

The Polaris ballistic-missile-firing submarine force will be augmented by four submarines during 1962, bringing the total commissioned to nine by the end of the year. In addition, three nuclear-powered attack submarines will be commissioned during the year.

The antisubmarine warfare (ASW) forces will also be improved during 1962 by the commissioning of new ships with this capability; by the delivery of older ships newly rehabilitated and modernized for ASW tasks; and by the provision of the latest ASW equipment to the existing forces. Additional numbers of ships will be furnished the latest sonar equipment, the rocket assisted torpedo Asroc, and homing torpedoes of the latest design. Increasing numbers of the new HSS-2 all-weather ASW helicopter and of the S2F-3 carrier-based ASW aircraft will be available for fleet employment. The first fleet deliveries of P3V long range ASW patrol planes will also be made during 1962.

The active aircraft inventory of the Navy will decline in 1962, although the overall effectiveness of the naval air arm will be enhanced by the continued delivery of such modern aircraft as the F4H fighter, the A4D attack bomber and the A3J attack plane.

The composition of the Marine Corps combat forces will remain stable at three reinforced divisions and three air wings during 1962. In addition to those forces based in the United States and capable of immediate deployment anywhere in the world, elements of the Marine Corps will be maintained in the vicinity of certain potential trouble spots overseas. Continued improvement in personnel management and a low turnover pattern will make possible the allocation of a very high proportion of Marine Corps strength to the combat forces and will permit the restoration of all cadre battalion landing teams by early 1962.

The ability of the Corps to conduct amphibious operations will be substantially improved by the commissioning of four new ships capable of carrying both helicopters and landing craft and especially designed for beachhead operations. Combat effectiveness will be improved through the modernization of equipment including the delivery of additional 7.62 mm. weapons, the introduction of the Redeye missile, and the provision of an improved tracked landing vehicle especially configured for mine clearing. In addition, new improved ammunition for mortars, field artillery and antitank weapons will be delivered for troop use.

Marine Corps aviation effectiveness will be raised by the increased deliveries of such conventional aviation weapons as the Zuni rocket and the low drag firebomb; by the activation of a second inflight air-refueling squadron; and by the delivery of A4D attack aircraft and the F4H all-weather interceptor. The vertical lift capability for Marine Corps units will be considerably enhanced by the delivery of additional transport helicopters.

Air Force.—During 1962, the Air Force will continue the modernization of the strategic forces, as the older B-47

medium bomber is progressively retired from service. More than offsetting the overall numerical reduction in strategic aircraft wings, however, will be the much improved effectiveness achieved through the activation of the 14th long-range B-52 bomber wing and the 2d wing of B-58 supersonic medium-range bombers. Perhaps more important will be the very significant increase in strategic capability which will be provided by the rapidly growing operational missile force.

During 1962, the Air Force will continue to have the capability of placing a portion of the heavy bomber fleet on continuous airborne alert, should the need to do so arise. In addition, the ability of the entire strategic bomber force to penetrate enemy defenses will be improved by the provision of the latest electronic countermeasures equipment, Quail decoy missiles, and Hound Dog air-to-surface missiles.

Several more Atlas and the first Titan ICBM units will become operational in 1962. Capable of delivering a thermonuclear warhead over 5,500 nautical miles, these weapons provide a strategic delivery system with a very high penetration capability.

The tactical forces during 1962 will be further modernized by the replacement of some F-100 aircraft with the supersonic, all-weather F-105's and by the introduction of the improved Mace B missile. The F-105's will be deployed both overseas and in the United States, while the tactical missiles will be deployed in Europe and in the Pacific area.

The air defense forces through the 1962 period will be improved through the modification of F-101, F-102, and F-106 aircraft and the increased operational availability of Bomarc surface-to-air missiles. In addition, for warning against ICBM attack, the second of the three long-range radar warning sites of the BMEWS is planned to come into operation.

There will be an overall decrease in the size of the active aircraft inventory during 1962. This numerical reduction, however, will be more than offset in terms of total effectiveness, as more capable aircraft are introduced into the forces and missiles continue to take over manned aircraft missions.

Military assistance.—Military assistance expenditures in 1962 are estimated at \$1,750 million; this compares with \$1,700 million estimated for 1961 and an actual expenditure of \$1,609 million in 1960. Recommended new obligational authority for 1962 is \$1,800 million, the same amount as appropriated for 1961 and \$469 million more than 1960.

Over one-half of the weapons and equipment provided under the 1962 program will contribute to the improvement of Free World forces. The remainder will provide for the maintenance and training of forces which were equipped in past years.

A large portion of the modernization funds will be devoted to advanced aircraft, missiles, electronics, and related ground and shipboard equipment, primarily for NATO and selected Far East countries. Other important items are naval ships and aircraft for antisubmarine warfare, as well as tactical missiles and other equipment for the modernization of ground forces. Funds for the improvement of forces include the U.S. contribution to the NATO program for construction of bases and facilities and for the U.S. share of the cost of joint weapons development and production.

The type and extent of military assistance are determined by the nature of the threat in each area and by the internal capabilities of each recipient country. As their economic

capacity improves, cost-sharing and sales arrangements are being used to apportion the burden more equitably among the more developed nations. Grant aid is concentrated in the less developed areas of the world, primarily in the Middle East and Asia. In conjunction with defense support assistance which is also provided under the Mutual Security Act, this aid helps those countries maintain military establishments required to resist the threats of external aggression and internal subversion.

Summary.—In summary, the 1962 budget for military functions and military assistance provides for the Department of Defense as follows:

New obligational authority.—New obligational authority of \$43,640 million is recommended and, in addition, \$150 million to be derived by transfers from the revolving funds of the Department. For the Army, this includes \$10,406 million and \$125 million to be transferred from the Army stock fund; for the Navy, \$12,237 million; and for the Air Force, \$17,856 million and \$25 million to be transferred from the Air Force stock fund. New obligational authority of \$1,341 million is recommended for the Office of the Secretary of Defense; and \$1,800 million for military assistance.

Direct obligations.—Total direct obligations are estimated at \$45,297 million. These are shown by category, on a comparable basis, in the following table.

DIRECT OBLIGATIONS			
[In millions of dollars]			
	1960 actual	1961 estimate	1962 estimate
Military personnel.....	11,934	12,196	12,416
Operation and maintenance.....	10,243	10,728	10,842
Procurement.....	12,732	15,133	14,641

DIRECT OBLIGATIONS—Continued

[In millions of dollars]

	1960 actual	1961 estimate	1962 estimate
Research, development, test, and evaluation.....	3,967	4,667	4,365
Military construction.....	1,350	1,327	1,159
Total, military functions.....	40,225	44,051	43,423
Military assistance.....	1,605	1,896	1,875
Grand total.....	41,831	45,946	45,297

By excluding intragovernmental transactions from the amounts in the preceding table, data can be obtained on obligations which result in the purchase of goods and services from private individuals and businesses. This measure, set forth in the following table, more closely portrays the economic impact of the Department of Defense activity:

OBLIGATIONS TO THE PUBLIC

[Excludes intragovernmental transactions]

[In millions of dollars]

	1960 actual	1961 estimate	1962 estimate
Military personnel.....	11,933	12,195	12,416
Operation and maintenance.....	10,305	10,722	10,830
Procurement.....	12,119	15,340	14,138
Research, development, test, and evaluation.....	3,738	4,667	4,365
Military construction.....	1,346	1,325	1,159
Revolving and management funds.....	-447	74	-280
Total, military functions.....	38,995	44,323	42,628
Military assistance.....	1,573	1,866	1,855
	40,568	46,189	44,483

Net expenditures.—\$44,660 million: Army, \$10,073 million; Navy, \$12,078 million; Air Force, \$19,344 million; the Office of the Secretary of Defense, \$1,415 million; and for military assistance, \$1,750 million.

MILITARY PERSONNEL

The following narrative statement covers the active duty appropriations for the Army, Navy, Marine Corps, and Air Force.

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel on active duty, including cadets and midshipmen at the three service academies, aviation cadets, and other officer candidates.

The number of active duty military personnel provided for is shown in the following table. The personnel in the Reserve components of the defense forces are described under the pertinent appropriations below.

	YEAR-END NUMBER		
	1960 actual	1961 estimate	1962 estimate
Defense total.....	2,475,225	2,492,900	2,492,900
Officers.....	315,933	314,375	312,375
Enlisted.....	2,148,604	2,167,528	2,169,192
Officer candidates.....	10,688	10,997	11,333
Army.....	872,407	870,000	870,000

Aviation cadets.....	2,612	1,685	656

Additional amounts required in 1961 by the Army and Navy to support the average numbers in the above table are shown under Proposed for later transmission.

Provision is made for amounts otherwise available as quarters allowances to be paid (a) to the revolving fund for acquisition, rehabilitation, and rental of Wherry Act housing, in cases where such housing is assigned as public quarters, (b) as mortgage payments on Capehart housing, (c) to the Commodity Credit Corporation in payment for foreign currencies used to construct family housing, and (d) to the operation and maintenance appropriations to maintain and operate surplus commodity housing.

In addition, provision is made for payment for proficiency advancements to selected enlisted personnel in critical skill areas. Funds are provided for the payment of proficiency pay to 222,226 men June 30, 1961, and June 30, 1962. It also provides for the Government's contribution to the Federal old-age and survivors insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act, purchase of individual clothing for initial issue to enlisted personnel, replacement clothing issues in Korea, and payment of clothing maintenance allowances.

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel including emergency and operational rations.

3. *Movements, permanent change of station.*—This provides for permanent change of station travel for individuals and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household goods in commercial facilities, and transportation of personal property. Payment for services furnished by the Military Sea Transportation Service and Military Air Transport Service for transportation to and from overseas of military personnel, their dependents, household goods, and automobiles is also included.

4. *Other costs.*—This provides for expenses of apprehension of deserters and escaped military prisoners, payment of interest on money deposited by enlisted personnel, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

Current authorizations:

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except those undergoing reserve training), expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed \$25 in any one case, [\$3,247,548,000] \$3,401,000,000, and, in addition, [\$260,000,000] \$125,000,000, to be derived by transfer from the Army stock fund: Provided, That no part of these funds shall be available for the pay and allowances of personnel assigned to departmental administration in excess of the number so assigned on December 31, 1959. (10 U.S.C. 1035, 1475, 3536, 3687, 4561, 4562, 4741; 37 U.S.C. 31a-36, 231-238, 251, 253, 305; 38 U.S.C. 691a-g; 50 U.S.C. App. 2201-2216; Department of Defense Appropriation Act, 1961.)

1. *Reserve personnel.*—This program provides funds for training members of the Army Ready Reserve. Personnel assigned to combat and support units are expected, on the average, to perform 36 two-hour drills, and 12 four-hour drills and, in addition, are required to participate in 15 days of active duty training each year. Although the Army Reserve strength in drill pay status will be reduced to 270,000 at the end of 1962, the program will continue to provide an effective reserve which will be fully adequate to support our national objectives.

In addition, training is provided for individual reservists who have been assigned to fulfill designated early mobilization requirements. Other reservists scheduled for early mobilization as individual reinforcements also receive necessary training. The paid personnel strength is indicated in the following table:

ARMY RESERVE PERSONNEL STRENGTH

[In paid status]

	1959 actual	1960 actual	1961 planned	1962 proposed
End of year:				
Officers.....	77,345	82,086	81,881	83,395
Enlisted.....	272,828	279,711	269,419	237,905
Total.....	350,173	361,797	351,300	321,300
Average:				
Officers.....	79,290	81,456	81,207	82,758
Enlisted.....	257,925	284,795	270,093	251,400
Total.....	337,215	366,251	351,300	334,158

Army Reserve enlisted personnel are obtained either from personnel with prior military service who have an interest or an obligation to train actively in Army Reserve units, or from newly enlisted men participating in the 6-month active duty training program. Enlisted personnel in drill pay status obtained from these sources are summarized below:

	1959 actual	1960 actual	1961 planned	1962 proposed

2. *Reserve Officers' Training Corps.*—This program provides training for Reserve officer candidates who have enrolled in the advanced course while attending a collegiate institution. Reserve Officers' Training Corps units providing such training have been established at 233 institutions. The curriculum of the advanced course includes instruction in military and academic subjects together with a 6-week summer camp at an Army post. College graduates, who satisfactorily complete the advanced course, are commissioned and are either ordered to active duty for a 2-year period to meet the requirements of the Active Army or to a 6-month tour of active duty training. When these officers complete their tour of active duty or active duty for training they are assigned to the Ready Reserve, where they participate with a unit of the Army National Guard or Army Reserve, or constitute a pool of individual reinforcement officers.

Utilization of these graduates is summarized below:

	1959 actual	1960 actual	1961 planned	1962 proposed
2-year active duty tours.....	5,013	6,252	7,500	5,400
6-month active duty training.....	7,440	5,540	4,610	6,754

In addition, 2 years of basic military training are provided for college students who elect or are required by the institution to enroll in the course. Training is also provided for students who elect to enroll at 289 high schools in a junior program.

Details of the program and the average annual enrollment are summarized below:

Course	1959 actual	1960 actual	1961 planned	1962 proposed
Junior division.....	67,331	66,403	60,400	60,400

1. *Reserve personnel.*—The program provides funds for training members of the Navy Ready Reserve who will be required for immediate service in the event of mobilization. These reservists will, as individuals, augment existing active fleet and aviation units and fleet support and Shore Establishment activities. Most of these reservists perform forty-eight 3-hour drills and are ordered to 2 weeks of active duty training each year.

Occasional training is also provided for other reservists scheduled for early mobilization to prepare them to meet requirements of active duty.

In addition, antisubmarine and mine warfare units, composed of selected reservists, will join the active forces in the event of mobilization to perform missions required by current war plans. The development of this program is summarized below.

	1959 actual		1960 actual		1961 planned		1962 proposed	
	Units	Men	Units	Men	Units	Men	Units	Men
Fleet antisubmarine warfare.....	34	3,837	40	4,348	40	4,950	40	4,985
Fleet mine warfare.....					11	220	11	220
Aviation antisubmarine warfare.....	84	8,254	84	8,003	84	8,250	84	8,300

These fleet ships or aviation squadrons perform a minimum of forty-eight 4-hour drills each year and are assigned to active fleet units for 2 weeks of active duty for training each year. Six additional drills are provided for anti-submarine warfare units to increase their readiness for immediate mobilization.

The total Reserve personnel program is summarized in the following table.

NAVAL RESERVE PERSONNEL STRENGTH

[In paid status]

	1959 actual	1960 actual	1961 planned	1962 proposed
End of year:				
Officers.....	34,498	37,536	27,980	26,580

MILITARY PERSONNEL—Continued

Current authorizations—Continued

RESERVE PERSONNEL, NAVY—Continued

Navy Ready Reserve personnel are obtained either from personnel with prior military service who have an interest or an obligation to serve in the Ready Reserve or from men without prior service participating in a 6-month active duty training program or who are enlisting for a 2-year period of duty with the active forces. Enlisted personnel in drill pay status obtained from these sources are summarized below:

	1959 actual	1960 actual	1961 planned	1962 proposed
6-month training program.....			1,500	1,250
2-year active duty program.....	20,895	20,549	23,500	22,760
Other prior military service.....	40,933	36,299	32,960	31,085

Estimated strengths by training categories for 1962 are as follows:

Paid drills	Paid days of active duty for training		Beginning strength	Average strength	Ending strength
48	15	Officers.....	22,030	21,200	21,330
		Enlisted.....	98,540	99,810	100,420

		Enlisted.....	99,683	102,730	103,325
		Total.....	127,663	129,130	129,905

2. *Reserve officer candidates.*—This program provides training for officer candidates who are attending the 53 collegiate institutions where NROTC units have been established.

Candidates for commissions as Regular officers are selected on a nationwide competitive basis and are appointed as midshipmen. They attend three summer practice cruises and complete prescribed military training. Successful candidates, commissioned in the Regular Navy and the Marine Corps, are regarded as career officers. They are expected to serve at least 4 years on active duty.

Students who enroll as candidates for a Reserve commission in the Navy or Marine Corps under the terms of a contract with the Department of the Navy attend one summer practice cruise in addition to completing prescribed military training. They are expected to serve for at least 2 years with the Active Forces after graduation.

In addition, students attending colleges or universities may enlist in the Naval Reserve and enroll in the Reserve officer candidate program. Such students participate in two summer training sessions of 8 weeks' duration, and upon successful completion of the program and graduation from college receive a commission in the Naval Reserve and are expected to serve for 3 years with the Active Forces.

Details of the program and the average enrollment are summarized as follows:

Type of program	1959 actual	1960 actual	1961 planned	1962 proposed
NROTC regular.....	5,599	5,271	5,035	4,975

¹ Reimbursements from non-Federal sources are derived from the sale of clothing to Regular Marine Corps personnel (10 U.S.C. 7601).

1. *Reserve personnel.*—The purpose of this program is to train members of the Ready Reserve immediately required in the event of mobilization for augmentation of existing units of the Active Forces and as a nucleus for new units. Most reservists in paid status are organized for training purposes into ground and aviation units similar to Fleet Marine Force units. They perform 48 drills of at least 4 hours' duration, and 2 weeks of active field training annually. In addition, some reservists scheduled for early mobilization, but who are not assigned to units, also

receive periodic active duty training. The paid personnel strength is indicated in the following table:

	1959 actual	1960 actual	1961 planned	1962 proposed
End of year:				
Officers.....	4,721	4,778	5,518	5,518
Enlisted.....	41,695	41,692	41,882	42,282
Total.....	46,416	46,470	47,400	47,800
Average:				
Officers.....	5,015	4,746	5,397	5,505
Enlisted.....	40,826	41,096	40,862	41,455
Total.....	45,841	45,842	46,259	46,960

Ready Reserve personnel are obtained either from personnel with prior military service with an interest or an obligation to serve further in the Ready Reserve, or from men without prior service participating in a 6-month active duty training program. Enlisted personnel in drill pay status obtained from those sources are summarized below:

	1959 actual	1960 actual	1961 planned	1962 proposed
6-month training program.....	6,003	7,170	8,200	8,375
Other prior military service.....	6,495	4,391	3,270	2,234

The composition of the Marine Corps Reserve for 1962 by training category is shown below:

Paid drills	Paid days of active duty for training		Beginning strength	Average strength	Ending strength

1. *Reserve personnel.*—This program provides for training and instruction of Air Force Reserve personnel. The Reserve program is designed to provide trained units to supplement Regular Air Force units and trained individuals to augment Regular Air Force organizations and activities. During 1962 there will continue to be 15 troop carrier wings (with 45 troop carrier squadrons) plus supporting units. In 1962, it is planned to activate a number of recovery and base support units whose mobilization mission will be to provide capability for emergency Air Force operations at nonmilitary airfields, and to augment forces at Active Air Force bases in the reconstitution of operational capabilities, in the event of enemy attack. Most of the personnel for such units will be reassigned from the air reserve center program which will be discontinued.

Total.....	64,562	65,028	69,905	71,960
Average:				
Officers.....	26,217	27,502	27,821	27,333
Enlisted.....	32,900	37,619	38,580	39,768
Total.....	59,117	65,121	66,401	67,101

Ready Reserve personnel are obtained either from personnel with prior military service who have an interest or an obligation to serve further in the Ready Reserve or from newly enlisted airmen participating in the 3-6 month active duty training program. Enlisted personnel obtained from those sources are summarized below:

	1959 actual	1960 actual	1961 planned	1962 proposed
3-6 month training program.....	2,918	3,026	3,277	2,184
Prior military service.....	22,915	14,400	19,171	16,441

The program is based on 48 paid drills of 4-hour duration and 15 days of active duty for training for personnel assigned to Reserve troop carrier wings, combat support training units, and mobilization assignees who occupy positions that require proficiency in an aeronautical skill. Nonflying mobilization assignees are provided 24 paid drills of 4-hour duration when training at their place of assignment and 15 days of active duty for training. Reserve personnel assigned to the Reserve base recovery and base support program will be provided 24 paid drills of 4-hour duration and 15 days of active duty for training. Those individuals receiving 15 days of active duty training only, are mobilization assignees assigned to the major air commands whose civilian occupations are so closely allied to their military specialties that they do not require frequent inactive duty training. In addition to normal on-the-job training, selected courses at Air Force schools and special tours of active duty for training have been provided to increase individual proficiency. Estimated strengths by training categories for 1962 are as follows:

Paid drills	Paid days of active duty for training	Beginning strength	Average strength	Ending strength	
48	15	Officers.....	9,630	7,820	7,925

2. *Air Reserve Officers' Training Corps.*—This program is designed to provide qualified officers to meet the requirements of the Active Air Force and will be conducted at 175 colleges and universities during 1962. Military training is also provided for college students who elect or are required to enroll in the basic course. The curriculum of the AROTC course includes instruction in military and academic subjects together with a 4-week summer camp at an Active Air Force base.

Students completing the advanced course receive commissions as Reserve officers and are ordered to active duty with the Air Force for periods ranging from 3 years for nonflying officers to 5 years for officers completing flying training. Officer production is summarized below:

	1959 actual	1960 actual	1961 planned	1962 proposed
Pilots or navigators.....	1,743	1,726	1,600	1,688
Other (nonflying).....	2,327	2,059	1,889	1,920

This program provides funds for training members of units of the Army National Guard. The troop structure of the Army National Guard now consists of approximately 4,500 company size units including all elements of 27 combat divisions. Current plans contemplate early utilization of six of these divisions which are manned and equipped to permit immediate mobilization and use. Personnel assigned to Guard units are expected, on the average, to perform thirty-nine 2-hour drills and nine 4-hour drills as well as 2 weeks of annual field training at a summer camp. Selected personnel receive additional training at Army service schools and command post exercises to improve their military qualifications. With the reduction in strength to 360,000 at the end of 1962 the Army National Guard will be manned at a level fully adequate to fulfill its assigned role in support of our national objectives. The paid personnel strength is summarized in the following table:

ARMY NATIONAL GUARD PERSONNEL STRENGTH

(In paid status)

	1959 actual	1960 actual	1961 planned	1962 proposed
End of year:				
Officers.....	37,884	37,142	37,000	37,000
Enlisted.....	361,543	364,623	363,000	323,000
Total.....	399,427	401,765	400,000	360,000
Average:				
Officers.....	37,881	37,388	36,900	37,000
Enlisted.....	352,900	360,246	363,100	338,100
Total.....	390,781	397,634	400,000	375,100

Army National Guard personnel are obtained either from personnel with prior active military service who have an interest or an obligation to serve further in the Ready Reserve, or from newly enlisted men participating in a 6-month active duty training program. Enlisted personnel in drill pay status obtained from these sources are summarized below:

	1959 actual	1960 actual	1961 planned	1962 proposed
6-month training program.....	47,798	69,130	67,800	30,500
Other prior military service.....	53,711	32,498	30,500	29,500

It is expected that 62,000 men will begin a 6-month tour of active duty training in 1961 and 28,000 in 1962.

The composition of the Guard by training category during 1962 is indicated below:

This program provides funds for training members of units of the Air National Guard required by current mobilization plans. These are organized into 24 wings of tactical type aircraft as well as a number of nontactical flying and ground support organizations. Three aircraft control and warning units and 22 fighter interceptor squadrons augment their training by participating in an active alert status and in so doing contribute to the mission accomplishment of the Air Force Air Defense Command. Personnel assigned to Guard units are required to perform 48 4-hour drills and to participate in 15 days of active duty training. The personnel strength in 1962

MILITARY PERSONNEL—Continued

Financing:			
Unobligated balance lapsing.....	22,078		
New obligational authority (appropriation).....	715,000	775,000	895,000

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense. The estimate represents the consolidated requirements of the military departments for (a) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force, (b) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve, and (c) survivors' benefits payable under the Uniformed Services Contingency Option Act of 1953. The amount requested is exclusive of any administrative expense. The substantial gains to the retired rolls can be directly attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. A supplemental appropriation is anticipated for 1962 under Proposed for later transmission. This account, presently managed by allocations to each of the four services, will be administered on a consolidated basis beginning July 1, 1961. The following tabulation shows the average number of personnel on the rolls during 1960 compared with the estimated numbers for 1961 and 1962:

AVERAGE NUMBER

Type of retirement	1960 actual	1961 estimate	1962 estimate
1. Nondisability.....	126,489	143,800	173,895
2. Temporary disability.....	13,532	14,722	16,037
3. Permanent disability.....	70,442	72,062	73,686
4. Fleet reserve.....	30,343	41,264	53,826
5. Survivors' benefits.....	2,098	2,550	2,993
Total.....	242,904	274,398	320,437

Proposed for later transmission:

MILITARY PERSONNEL, ARMY

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Pay and allowances.....		4,993	
2. Subsistence in kind.....		895	
3. Movements, permanent change of station.....		1,100	
4. Other costs.....		12	
Total obligations.....		7,000	
Financing:			
New obligational authority (proposed supplemental appropriation).....		7,000	

Under existing legislation, 1961.—Additional funds are anticipated for increased costs resulting from the maintenance of a strength higher than the 870,700 average provided for in the 1961 budget. Provision is made for the pay and related costs of 2,500 man-years in addition to those in the revised 1961 program.

MILITARY PERSONNEL, NAVY

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Pay and allowances.....		10,030	
2. Subsistence in kind.....		2,339	
3. Movements, permanent change of station.....		2,617	
4. Other costs.....		14	
Total obligations.....		15,000	
Financing:			
New obligational authority (proposed supplemental appropriation).....		15,000	

Under existing legislation, 1961.—Additional funds are anticipated due to the increase in readiness requirements for the Regular Navy which provides for an increase from 619,000 to 625,000 in the end strength with an average of 624,775. The manpower increase of 6,000 in end strength is required to man the ships and air groups included in the increased readiness posture.

RETIRED PAY, DEPARTMENT OF DEFENSE

¹ Reimbursements from non-Federal sources are principally sales of surplus U.S. Government property; sales of goods and services to individuals, including laundry services, subsistence of hospital patients, surcharge on commissary sales and unofficial telephone service; and mutual security sales to foreign governments (10 U.S.C. 4621, 4624, 4625, 4626, and 4627; 22 U.S.C. 1816).

This appropriation provides for the day-to-day operations and activities of an 871 thousand-man Active Army and a 1 million-man Army Ready Reserve. This includes the direct operational support of the Army forces deployed within the United States and oversea commands; the maintenance and operation of facilities used for the recruitment, training, administration, and logistical support of these forces; and the maintenance of a mobilization base for the expansion of Army forces in the event of emergencies or war. The Active Army Forces include Army units assigned to the unified and specified commands in Europe, the Pacific, Alaska, and the Caribbean; and air defense units in the United States. They also provide for forces deployed in other strategic locations. Other Active Army Forces are the strategic Army forces located in the United States for deployment as necessary, and the substantial support and training forces associated with these combat forces. While the composition and deployment of these forces remain relatively unchanged, their equipping with more modern weapons will continue to improve their striking power.

To accomplish these missions and activities, funds are required for the logistics system, which procures, stores, distributes, and maintains materiel; for expenses of the departmental and other major command headquarters; and local support costs. This latter category includes maintenance and repair of the fixed plant, essential welfare and recreational activities, the maintenance of equipment, and local headquarters and administration. Increased funds are included in 1962 for the modernization of World War II family housing and barracks, reduction in deferred facilities maintenance, replacement of repairs and utilities equipment, and quarters furniture procurement.

This appropriation also provides for the expenses of administration and training of the Army Reserve Forces and for 6 months active duty training of Army Reserve and National Guard personnel at basic training centers, Army schools, and with Army units.

1. *Tactical forces.*—This provides for the training and support of Army combat forces. These costs include the operation and maintenance of the installations where these units are stationed; and the operation and maintenance of the missiles, aircraft, vehicles, and other equipment assigned to these units. By providing additional special training exercises, the 1962 program places an increased emphasis upon operational readiness.

Basic training of recruits, including 6-month Reserve forces trainees, is accomplished at 12 training centers with the following average loads:

	1960 actual	1961 estimate	1962 estimate
Active Army.....	42,386	46,800	55,900
Reserve and National Guard.....	38,845	40,900	24,850
Total trainees.....	81,231	87,700	80,750

2. *Training activities.*—This provides for the training of individual officers and enlisted men as contrasted with the training of combat units. It includes two general types of training: training of career personnel with accent on doctrine, strategy, and tactics; and training in specific military and support skills such as missile maintenance, counter mortar radar operation, aircraft mechanics, electronic repair, financial management, personnel administration, languages, and the operation of the complex and intricate weapons and equipment of the modern Army. Most individual training is conducted through the Army service schools and colleges which conduct resident and nonresident courses of instruction for U.S. Army personnel, Reserve forces trainees, personnel from other services, and foreign military personnel, prepare Army training publications, and develop military doctrine and techniques.

In addition, this activity finances the U.S. Military Academy at West Point which provides instruction for approximately 2,400 cadets annually for careers as Army officers; tuition costs for officers and enlisted men in training at nonmilitary institutions; and the production of training devices, simulators, training films, and visual training aids.

The number of students supported by these funds are as follows:

	1960 actual	1961 estimate	1962 estimate
Service schools (average load):			
Schools.....	30,628	28,930	29,099
Colleges.....	1,088	1,090	1,091
U.S. Military Academy (average load)....	2,392	2,396	2,400
Civilian institutions (number attending)....	4,341	3,684	3,685

3. *Central supply activities.*—This program finances the worldwide Army supply system which is controlled through commodity managers at 27 national inventory

control points. Here up-to-date inventories are kept on the quantity, location, and condition of Army stocks worldwide; and requirements are determined as a basis for materiel maintenance and procurement. In support of commodity management, current catalogs and data are maintained on about 910 thousand items. About 1.5 million cyclical supply control studies are made each year. Requisitions are processed at the rate of 55 million line items annually. Overseas supply agencies are operated at three major ports to insure timely and adequate support to overseas commands. The Army operates 80 depots which receive, store, and care for the multibillion dollar inventory, and ship an average of 12,020 tons of supplies each workday.

This program also provides for the execution of a \$4.6 billion annual central procurement program, including contracting, contract administration, inspection, preparation of specifications, standardization, and industrial support measures for current procurement and mobilization. Provision is made for the expenses of transportation of supplies and equipment between depots and from depots to the point of use, and the operation of Army ports and terminals in the United States and overseas. In doing this the Army ships approximately 5 million short tons by inland line haul and approximately 4 million measurement tons by ocean transport annually. Included also is the maintenance and protection of production facilities retained on standby status in peacetime against possible mobilization requirements.

In addition to the above activities, this program provides substantial supply support for the Navy, Air Force, and the Marine Corps. This support includes the operation of six single manager agencies, the Military Traffic Management Agency, the Military Clothing and Textile Supply Agency, the Military Subsistence Supply Agency, the Military General Supply Agency, the Military Construction Supply Agency, and the Military Automotive Supply Agency.

A summary of total workload data specifically related to the central supply activities program follows (including reimbursable workload):

	1960 actual	1961 estimate	1962 estimate
Supply depots.....	80	81	80
National inventory control points.....	25	26	27
Line items processed.....	50,473,000	52,839,000	55,000,000
Short tons received.....	2,667,000	2,789,000	2,655,000
Short tons shipped.....	2,953,000	2,803,000	2,798,000
Short tons in storage ¹	10,876,000	10,844,000	10,700,000

¹ Excludes strategic and critical materials which are GSA owned.

4. *Major overhaul and maintenance of materiel.*—This activity assures that Army equipment is maintained in effective operating condition. To meet this objective, worldwide maintenance management and assistance is provided to field commanders through maintenance publications, maintenance engineering services and technical assistance in the introduction and use of complex modern equipment; parts are provided for missiles, aircraft, special weapons, and radio-controlled drones; and the overhaul and modification of equipment and the renovation of ammunition and special weapons, are provided as needed. This program also provides for the major overhaul of materiel for the mutual aid program and for other Defense agencies, on a reimbursable basis.

Cost reduction is continually emphasized. Improved maintenance techniques, standards of performance, active product improvement program, and improved management practices are developed through maintenance engineering services and are implemented under the direction and guidance of national maintenance points. All levels

of maintenance are made aware of improved techniques and standards through the technical manuals and publications developed under this program.

Of the total funds (direct and reimbursable) available for this program, approximately 40% will be used for overhaul, modification, and ammunition renovation; approximately 38% for maintenance engineering and other related costs; and approximately 22% for procurement of parts and modification kits.

5. *Medical activities.*—This covers medical, dental, and veterinary support of the Army, Army National Guard, Army Reserve and Reserve Officers' Training Corps; medical care and hospitalization of civilian employees and their dependents in the Canal Zone; medical care of dependents of military personnel; training of military personnel in medical specialties, and operation of the Surgeon General's office. It cost the Army \$15.4 million in 1960 for care of dependents of its military personnel in civilian hospitals and these costs are estimated at \$15.7 million in 1961 and \$18.1 million in 1962.

MEDICAL FACILITIES AND PATIENTS

	1960 actual	1961 estimate	1962 estimate
Army hospitals.....	86	87	87
Patients (average daily load):			
In Army hospitals.....	12,623	12,549	12,529
Active duty.....	6,859	6,699	6,634
Dependents.....	3,483	3,533	3,550
Others.....	2,281	2,317	2,345
In non-Army facilities.....	2,845	2,994	3,147
Active duty.....	1,231	1,238	1,238
Dependents:			
In Federal hospitals.....	545	566	579
In civilian hospitals.....	819	923	1,047
Others.....	250	267	283
Medical personnel in training.....	4,115	4,369	4,666

6. *Armywide activities.*—This includes the management and direction of the Army and finances the headquarters in Washington, D.C., and the major field commands. These headquarters will operate at lower cost in 1962 due to personnel reductions accomplished during 1961. Funds are provided for the Army part of the worldwide Defense Department communication network which includes communications-electronics facilities used for prompt communications between headquarters and the unified commands, and furnishes administrative communications between the many separate activities of the Army. The Army Intelligence program operates the attaché system and the Army Intelligence Center, and covers counter-intelligence, and technical and field intelligence. Mapping and geodesy are accomplished to fulfill the Army's assigned responsibility for ground mapping throughout the world, with added emphasis being placed on the more precise maps and geodesy required in the missile age. Miscellaneous administrative services are also provided for the entire Army, ranging from records centers, the processing of military personnel, and the education of dependents overseas to financial accounting and auditing. Some of the workload indicators for this activity are:

	1960 actual	1961 estimate	1962 estimate
Records and publications centers.....	11	9	9
Personnel centers.....	11	12	12
Message groups handled (in millions).....	22,080	22,223	22,499

7. *Army Reserve and Reserve Officers' Training Corps.*—This activity provides support for training and administering the Army Reserve and includes the cost of Reserve training performed at local training sites and at summer camps. Workload is indicated as follows (in thousands):

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, ARMY—Continued

	1960 actual	1961 estimate	1962 estimate
Reservists in drill pay status (total end strength).....	301	300	270
Total Reserve strength:			
Ready Reserve.....	1,025	1,033	1,073
Standby Reserve.....	1,118	1,102	1,085

Operation and maintenance of facilities in this program is limited to Corps headquarters, reserve training centers, and inactive installations used solely for summer training. An average of 157 thousand Reserve Officers' Training Corps students at civilian colleges and universities will be supported in 1962.

8. *Joint projects.*—This program collects under one heading those interdefense projects for which the Army has been assigned administrative or executive agent responsibility. Included herein are the necessary resources to provide: (a) Joint educational facilities which enhance the preparation of selected personnel of the Armed Forces for the exercise of joint and combined high-level policy, command and staff functions and for the planning of national strategy; (b) information and education programs to give the individual service member an understanding of his responsibilities and obligations to our form of government, the missions of the Armed Forces and their relationships to each other, and the individual's contribution to the national program of defense and to provide opportunities for off-duty programs of academic, technical, and vocational education; (c) international activities supporting national policy, principally in the field of inter-American relations; (d) unified command headquarters in Europe and Caribbean; and (e) classified activities, which will continue to increase in 1962.

In addition, the 1962 program will include for the first time the support costs of the Defense Communications Agency established in 1961 to control the worldwide strategic and administrative communications network of the Defense Department.

Proposed supplemental due to pay increases.....		41,500	

The current readiness of naval forces capable of prompt and sustained combat operations depends upon this appropriation, which finances the day-to-day costs of organizing, training, preparing, and operating these forces. These include carrier striking forces, submarine forces, anti-submarine forces, amphibious forces, and anti-air warfare forces, most of which are assigned to unified and specified commands. The appropriation also finances the routine operating costs of the supporting Naval Shore Establishment which provides supply, overhaul, modernization, repair, and other services for the operating forces and their personnel.

In 1961, the level of naval readiness has been increased by deploying two additional aircraft carriers with attack aircraft to the Sixth and Seventh Fleets, commissioning two Marine Corps air attack squadrons, and commissioning one naval air group together with other actions contributing to an improved defense posture. These units augment the forces of the unified commands in the Pacific and Mediterranean. The cost of these measures in 1961 is included in the estimate for a supplemental appropriation. This program will continue into 1962.

Advances in military technology, the growing obsolescence of the fleet and combat readiness considerations result in increased cost. The fleet rehabilitation and modernization program, which began in 1960, will be continued at approximately the same level as 1961. Increased funds for improvements to active fleet ships have been necessitated by a rising level of installation of more complex shipboard electronic and communication equipments.

Flying hours are approximately the same as 1961 but will increase the readiness capability of naval aviation, particularly in the combat units. The continued introduction of modern, high performance jet aircraft, such as the A3J heavy attack aircraft and the F4H all-weather fighter will augment combat capability and increase operating and maintenance costs.

Successful development of the Polaris weapons system has provided a new contribution to our national deterrent. By the end of 1962 a total of nine Polaris submarines will have been commissioned of which seven will be assigned to the Atlantic unified command. This is an increase of four submarines over end 1961. Additional funds are required as the Navy phases this weapons system into operational status.

Navy is now to fund the newly established Military Industrial Supply Agency and host service responsibilities at Keflavik, Iceland. The impact of technological innovation upon traditional methods of naval warfare has brought about a need for the Fleet Computer Programming Center. A National Oceanographic Data Center has been established, administered by the Hydrographic Office. The Navy Information Center will be expanded to provide the Chief of Naval Operations with more timely intelligence and logistic data required for Navy support of the unified commands.

Logistic support of the National Antarctic program where the Navy is executive agent for the Defense Department will include installation of modern equipment and more permanent facilities. Support of the Antarctic program will cost \$16,726 thousand in 1962.¹ The Shore Establishment will provide supporting services to the fleet and its personnel, and be maintained in readiness for support, including a capability to support expanded operations. However, the number of shore facilities will be reduced in 1962 to provide a better balance between

¹ Charged to this appropriation, \$9,169 thousand; other appropriations, \$985 thousand; estimated statistical costs, \$6,572 thousand.

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, NAVY—Continued

the operating forces and shore support. Funds for departmental administration and travel have been maintained at the 1961 level. Other support costs include provision for community services, medical care, and additional family housing units.

1. *General expenses, Navy personnel.*—Modern naval operations dictate the recruiting and training of highly adaptable and capable personnel. The training program includes that for 105,000 recruits and technical training, scientific training, and professional education of 58,000 officers and 288,000 enlisted men. Reserve training activities provide for the training of over 140,000 reservists annually and support for over 12,000 NROTC midshipmen in civilian colleges. In addition, the Naval Academy annually prepares 3,700 midshipmen for officer careers.

Reserve training activities.....	464	457	457

2. *Weapons and facilities.*—From its worldwide responsibilities the Navy decided the number and types of aircraft to be deployed aboard carriers and ashore. The number of aircraft in turn is a factor in determining the number of pilots required and the flying hours necessary to accomplish missions and to train pilots. The flying hour program in 1962 is approximately at the 1961 level to provide for a continued level of combat readiness. This program contains increased hours for the new supersonic two-man fighter and heavy attack aircraft and corresponding reductions in the models which they replace. Operating and maintenance unit costs continue to increase for these higher performance, more complex aircraft, along with the rise in aircraft speed, power, and weight. Inventories of naval missiles, such as Terrier, Tartar, Talos, Sidewinder, Bullpup, Sparrow, and Polaris continue to increase in 1962. The additional number of missiles in operational status will require additional maintenance effort and costs. The Shore Establishment providing logistic support for these weapons systems include air stations, ammunition depots and magazines, ordnance plants and other activities.

	1960 actual	1961 estimate	1962 estimate
Average operating aircraft:			
Regular.....	6,368	6,214	6,280
Reserves.....	773	729	715
Flying hours:			
Regular (in millions).....	2.97	3.11	3.10
Reserves (in millions).....	.38	.35	.37
Aircraft reworks.....	3,566	4,178	3,625
Engine overhauls.....	10,413	9,540	9,125
Aviation training:			
Pilots completing training.....	1,600	1,500	1,500
Technical (average load).....	9,507	9,437	10,582
Tons of ammunition received, stored, and issued (in thousands).....	1,052	1,047	1,019

3. *Ships and facilities.*—The Navy plans to operate 817 active fleet and 88 Naval Reserve training ships in 1962. These naval ships comprise multipurpose forces capable

of attack, amphibious, antisubmarine and antiair warfare operations. Ships are continually deployed in the major trouble spots of the world to assist in the carrying out of American foreign policy. Other ships are in preparation for deployment or are assisting in several national programs from Antarctica to space capsule recovery. The Naval Reserve ships and crews are being kept at a level of capability to deploy with the Active Fleet in case of emergency.

The program to modernize World War II ships with modern weaponry is being continued in 1962. This program will provide additional modern capability to the fleet at much less cost than new ship construction. Newer ships with complex nuclear, electronic and missile systems; the need to keep abreast of modern warfare technology; and the increased costs of maintaining older ships account for increased costs in this activity.

	1960 actual	1961 estimate	1962 estimate
Ships (end of year).....	817	824	817
Steaming hours (based on average number of ships).....	1,984,000	1,956,000	1,923,000
Ship overhauls.....	343	314	312
Major facilities.....	28	28	28
Naval Reserve training ships.....	88	88	88

4. *Medical care.*—Medical care and hospitalization of Navy and Marine Corps personnel and their dependents is provided by operating naval hospitals, dispensaries, dental clinics, and other specialized medical facilities. The program provides for higher standards of performance, and equipment and materials required for advanced diagnostic and therapeutic procedures. Obligations for care of dependents in civilian hospitals in 1960 were \$21,525 thousand and obligations are estimated at \$21,433 thousand in 1961 and \$22,462 thousand in 1962. These activities are shown in the following table:

	1960 actual	1961 estimate	1962 estimate
Navy hospitals.....	25	25	25
Patients (average daily load):			
In Navy hospitals:			
Active duty.....	7,227	7,064	7,078
Dependents.....	1,817	1,813	1,854
Other.....	1,182	1,285	1,370
In other hospitals:			
Active duty.....	683	667	668
Dependents:			
In Federal hospitals.....	517	519	531
In non-Federal hospitals.....	984	1,069	1,082
Other.....	114	131	149
Medical personnel in training.....	3,809	4,006	4,026

5. *Civil engineering.*—In 1961 Navy family housing was placed under the management of the Bureau of Yards and Docks. The 1962 program is expanding because of additional acquisition of Capehart and Wherry units. Other programs included are (1) operations of six public works centers to provide services in areas of concentrated naval activities, and (2) engineering services for long-range construction planning and contract administration of repair and utility contracts. The Seabee forces comprised of 15 construction battalions are also supported herein.

	1960 actual	1961 estimate	1962 estimate
Housing units maintained end of year.....	60,344	66,690	69,615
Seabee battalions.....	15	15	15
Active duty Seabees.....	7,513	7,318	7,318
Value of contracts administered (in thousands).....	\$67,027	\$68,000	\$70,000

6. *Service-wide supply.*—The workload of this activity is directly responsive to fleet, air, and shore station operations, including major procurement actions. This activity

encompasses the major active force logistical support, both continental and overseas, at shipyards, and at 15 major supply depots and centers. Planning and programming for this support, including procurement and requirements determinations, for 11 categories of material is accomplished by 11 supply demand control points of which the Aviation Supply Office at Philadelphia is the largest. Transportation costs of intra-Navy movement of material directed by these supply demand control points, including the moving by Military Sea Transportation Service, are also funded by this activity. In addition to the above control points, and under single manager assignment to the Navy, this activity funds the maintenance and operating costs for the Military Medical Supply Agency, the Military Petroleum Supply Agency, and the newly established Military Industrial Supply Agency.

A summary of workload data specifically related to these programs follows:

	1960 actual	1961 estimate	1962 estimate
Supply outlets.....	37	37	37
Inventory control points.....	14	14	14
Supply actions.....	19,084,000	18,895,000	18,850,000
Tons received.....	2,438,000	2,414,000	2,408,000
Tons shipped.....	2,788,000	2,760,000	2,753,000
Tons in store (average number).....	8,715,000	8,629,000	8,608,000

7. *Service-wide operations.*—The Office of the Secretary of the Navy and the Office of the Chief of Naval Operations perform operational planning, coordination of research, and business management. In addition, the Office of the Chief of Naval Operations has planning, management and funding responsibility for naval stations, district and command headquarters, communications system activities, the Hydrographic Office, Naval Observatory, and other service activities.

	1960 actual	1961 estimate	1962 estimate
District and command headquarters....	14	14	14
Major naval stations.....	15	14	14
Major communication installations.....	19	21	21

8. *Naval petroleum reserves.*—This activity provides for Navy's share of operating and production costs in Naval Petroleum Reserve No. 1 (Elk Hills Field) in California under the unit plan contract with the Standard Oil Co. of California; supervision of oil and gas leases on Navy's lands in Naval Petroleum Reserve No. 2 (Buena Vista Hills Field) in California; drilling and production of offset wells on Naval Petroleum Reserve No. 3 (Teapot Dome Field) in Wyoming; and administration of the reserves including the hire of petroleum consultants.

General.—The objective of the Marine Corps is to train and maintain the Fleet Marine Forces in a high state of combat readiness for service with the Fleet in amphibious

operations or for such duties as the President may direct. The Fleet Marine Forces, composed of three reinforced Marine divisions—air wing teams and related support units, are assigned to the Atlantic and Pacific Fleets, which are naval components of unified commands. In 1962, the deployment of these forces will remain substantially unchanged, and there will be a continuation of the improved readiness position attained in 1961, within available resources, through higher manning levels in combat units and the reactivation of six battalion landing teams.

This appropriation principally supports the ground elements of the Fleet Marine Forces; the operations of the three Marine air wings are financed primarily by the Operation and maintenance, Navy, appropriation. Other units supported by this appropriation include Marine detachments aboard naval vessels, landing force training units, Marine Reserve ground forces, and the security forces that guard naval bases, U.S. embassies and certain classified facilities. The major installations supported by this appropriation are:

	1960 actual	1961 estimate	1962 estimate
Operational and training bases.....	7	7	7
Supply activities.....	4	4	3
Security detachments.....	4	4	4
Administrative installations.....	2	2	2
Total.....	17	17	16

1. *Training and operations.*—Operational deployments of Fleet Marine Force units with the Atlantic and Pacific Fleets will continue in 1962 at the present tempo of activity. During 1962, a third Hawk missile battalion will be fielded to provide improved protection against low-level air attack. The Fleet Marine Forces training objectives stress the vertical envelopment concept in amphibious operations through major exercises by combined air and ground units. To support training objectives, the Corps recruits and trains military personnel and operates five major combat-unit support bases, two recruit training depots and one school.

Significant workload data for this activity are:

	1960 actual	1961 estimate	1962 estimate
Fleet Marine Forces (average number of military personnel).....	89,965	93,390	100,848
Security forces (average number of military personnel).....	12,276	11,768	11,716
Major field training exercises.....	11	9	10
Recruit training (average load).....	9,912	9,800	8,041
Other training (average load):			
Officer.....	1,954	1,500	1,594
Enlisted.....	8,090	7,202	6,039

2. *Depot supply system.*—This activity includes the overhaul and preservation of major equipment and materiel and the receipt, issue and storage of materiel to support combat forces. Major equipment repair is programed on the basis of scheduled rotation of items in the hands of troops to assure materiel readiness and to achieve a workload compatible with manpower and plant capacity. Supply-activity workload is more directly related to the level of manning and operations of combat forces. Programing and planning for this logistic support is accomplished at the Marine Corps supply activity, Philadelphia; storage and issue functions are accomplished primarily at two major supply centers. In 1962 the Corps will begin a 6-year program of overhaul and modernization of amphibious landing vehicles and will discontinue supply activity at the Marine Corps forwarding annex, San Francisco.

Related workload data follow:

	1960 actual	1961 estimate	1962 estimate
Tons received.....	75,025	83,000	84,000
Tons shipped.....	62,200	61,000	62,000

4. *Marine Corps Reserve training.*—The objective of this program is to provide a strong Reserve organization capable of rapid assimilation into the operating forces when needed. This activity finances the annual field training of Reserve units, maintenance and operation of Reserve training centers, and Marine Corps furnished supplies and equipment for ground and aviation units.

¹ Reimbursements from non-Federal sources are principally sales of surplus U.S. Government property; and sales to individuals of goods and services, including subsistence of hospital patients, surcharges on commissary sales and unofficial telephone service.

This appropriation finances the daily operating expenses required for Air Force combat forces as well as for supporting forces. It provides the financial resources to transform the military personnel, facilities and equipment financed by other appropriations into a combat readiness of strategic, tactical and defense forces. Inherent in our military posture are significant changes in the composition of the forces with parallel changes occurring in the support forces. These changes are brought about by the introduction of strategic, tactical, and defense missiles of improved performance accompanied by the phase out of older weapons systems and concomitant numerical reductions in the manned aircraft inventory. These forces and their related training, logistic, and administrative support components will be manned by an average active duty military personnel strength of 824,000 and 270,250 civilian personnel. While the military and civilian manpower programs remain relatively constant in 1961 and 1962 the number of dependent personnel is estimated to increase from 1,595,000 to 1,615,000. The increase in dependents has a significant effect on this appropriation, primarily in the medical care, family housing, and base support programs.

Examples of the changes occurring in the force structure of the Air Force are found in the strategic field. Atlas missile units are already in operation. During 1962 additional Atlas squadrons are programmed to become operational as are the first Titan squadrons. During this period the strategic bomber force will decrease in total numbers, although the reduction of approximately 25% in the B-47 medium bomber force will be partially offset by increasing quantities of B-52 heavy bombers. Because

of their much greater range, larger bomb load, greater speed, more advanced electronics systems and missile launching potential, the lesser number of new B-52's will provide a greater capability than was provided by the B-47's being phased out.

The air defense area is experiencing major program adjustments designed to create the most effective degree of defense possible within current and expected resources. During 1962 Air Force units assigned to the unified commander will have in operation additional Bomarc interceptor missiles, fighter interceptor units reequipped with more modern aircraft, and an improved radar network. Concurrently there will be a reduction of one wing in manned air defense units. The current objective of 22 SAGE Direction Centers will be attained and two ballistic missile early warning sites will be fully operational.

An overall improved posture is also programmed for the tactical forces. In the oversea areas, tactical missiles of improved performance are expected and manned aircraft units both overseas and within the United States will receive more modern F-105 aircraft as replacements for F-100's.

The foregoing changes in composition of the combat force structure of the Air Force have a significant financial impact on this appropriation. For example the hourly operation and maintenance cost to fly a B-52 is \$760 as compared to \$397 for a B-47. In the tactical forces the hourly cost of an F-105 is \$468 as compared to \$177 for an F-100.

Provision has also been made for additional flying hours for the Strategic Air Command to perform airborne alert indoctrination training.

1. *Aircraft fuel and oil.*—This program covers funds for aviation fuel and oil to support the operation of all Air Force and Air Force Reserve aircraft except those assigned to research and development activities and that portion of the airlift services of the Military Air Transport Service which is financed by the Air Force industrial fund. While there is an overall reduction in flying hours from 1961 to 1962 there are numerous variations in the aircraft type and model composition of the total activity. Generally, the types of aircraft for which increased hours are provided are more expensive to operate than the aircraft leaving the inventory. For example, increased hours are provided for the B-52, KC-135, F-106, F-105, F-102, F-101, T-38 and T-37. These are offset by decreases due to the continued phase out of the B-47/KC-97 programs and the reduced use of T-33 aircraft.

The following table reflects the fiscal year comparison of the principal program elements supported by these funds:

	1960 actual	1961 estimate	1962 estimate
Total active aircraft, end of year:			
Regular Air Force.....	14,231	12,846	12,322
Air Force Reserve.....	770	828	797
Aircraft flying hours:			
Regular Air Force.....	6,173,722	5,516,711	5,385,700
Air Force Reserve.....	165,891	158,579	185,333

These flying hours provide for the training of strategic, tactical and defense units as well as individuals for possible later assignment to flying units.

2. *Logistical support.*—This activity finances the operation of the Air Force depot system, including the costs related to procurement, storage, distribution and maintenance of Air Force materiel. The changing composition of the Air Force in 1962 with greater emphasis on missiles, sophistication of the warning network, and a greater proportion of higher performance planes in the aircraft inventory all affect the logistic support workload. The

introduction of additional operational missile squadrons, activation of the ballistic missile early warning stations, and further expansion of the communications network including the SAGE program will increase the maintenance program under this activity. The current concept provides for major depot maintenance of missiles to be performed at the operational site with only the components of the missile being returned to overhaul facilities. Depot level maintenance will be largely done through the use of teams dispatched to the operating site.

In 1962, this activity will finance the depot maintenance costs of certain types of aircraft which were classified as modernization aircraft in 1961 and for which the maintenance expenses were included in the "Aircraft procurement" appropriation as a part of the modernization costs.

In the transportation area financed by this budget activity, provision is made for the modernization of the Logair network, which is the contract airlift system for the logistic support of the Air Force within continental U.S. under the control and supervision of the Air Materiel Command. This program will begin in the latter half of 1961. The newer aircraft, the Argosy, will replace C-46/C-54 aircraft now being used by contractors in the operation of the Logair system.

The following shows workload in the logistic support program:

	1960 actual	1961 estimate	1962 estimate
Dollar value of depot-level maintenance.....	687,410,100	682,347,000	713,891,000
Supply depots.....	15	12	11
Inventory control points.....	11	11	11
Supply actions.....	35,115,316	34,432,000	33,633,000
Tons received and shipped (U.S. depots).....	1,977,600	1,951,000	1,834,000

3. *Training support.*—This provides for the individual training of officers, airmen, and cadets, as contrasted with the training of combat units. Operating costs of the Air Force Reserve program are also included.

The decrease in costs in 1962 is related to the transfer of missile training to Air Force facilities from the more expensive contracted training, and to the consolidated pilot training program. That program, which is being implemented in 1961, reduces the number of pilot training bases from five contractor-operated primary schools and six Air Force operated basic schools to seven consolidated Air Force schools.

Technical training loads will remain relatively stable overall. Courses of instruction providing skills for new weapons systems and the need to replace personnel losses in specific skill areas, offset the phaseout of courses no longer required.

The flying portion of the Reserve training program continues at 15 wings. Two wings now using two engine C-119 aircraft will be reequipped with four engine C-124 aircraft by the end of 1962.

Major elements of the Air Force training program are tabulated below:

	1960 actual	1961 estimate	1962 estimate
Basic military and technical training (average training load).....	43,046	47,222	44,660
Service schools:			
Advanced technical training (average training load).....	4,901	4,868	4,986
Air University (average training load).....	2,657	2,522	2,382
Undergraduate flying training (average training load):			
Pilot training.....	2,900	2,047	1,956
Navigator training.....	2,040	2,053	1,273
Air Force Academy (average cadet load).....	1,517	1,842	2,174
Civilian institutions (input).....	2,191	2,472	2,494

	1960 actual	1961 estimate	1962 estimate
Language training (average training load).....	1,015	1,100	1,220
Factory training (average training load).....	1,431	1,355	1,126
(Missile training input included in various training above).....	9,147	12,719	13,179
Reserve training:			
Reservists in pay status (average strengths).....	65,121	66,401	67,101
AFROTC graduates.....	3,785	3,489	3,608

4. *Operational support.*—This activity provides for the day-to-day operating requirements at air base level of all the combat forces, the several operational support commands, SAGE, DEWLINE, BMEWS, and ballistic missile squadrons. This includes on-the-line maintenance of aircraft and weapons, care of the airfields, operation of the control towers, maintenance of troop and family housing and all other day-to-day expenses customary at air base level to keep the forces operationally ready.

The change in Air Force composition has a significant impact on this budget activity during 1962. Most of the increased funds are related to the support of missile programs and air defense systems. During 1962, this program will support two additional SAGE centers, equipment and operation of 13 additional missile squadrons and 20 additional air defense gap filler stations. The overall number of major installations supported by this budget program reduces from 176 in 1961 to 166 in 1962.

The following table shows comparative data for 3 years detailed by function.

MAJOR OPERATIONAL INSTALLATIONS				
Type	1960 actual	1961 estimate	1962 estimate	
Strategic.....	67	66	62	
Air Defense.....	30	29	29	
Tactical.....	69	65	61	
Other.....	16	16	14	
Total.....	182	176	166	

Because of the special characteristics of missile sites the above table does not reflect the impact of the increased numbers of such separate facilities becoming operational in 1962. It does include those regular Air Force installations which have been designated as support bases for the respective missile squadrons. With variations depending upon the particular weapon system involved, missile sites generally consist of a number of launch stations dispersed at varying distances from a launch control center. Each launch complex is self-sufficient with respect to electrical power and communications. This assures that the highly complex equipment installed can be maintained in a state of constant readiness.

This activity also finances that portion of the Military Air Transport Service airlift not financed under Industrial Fund tariffs. This airlift includes medical evacuation, special air missions and Air Force troop carrier responsibilities in support of Army units. The latter is programed at a higher level than in 1961.

5. *Medical support.*—This activity covers the cost of medical care of Air Force personnel, active and retired, and their families and includes the operation of hospitals and other medical treatment facilities. An increase in dependent population will result in greater use of civilian facilities for dependents' treatment.

Selected major workloads are shown in the following table:

	1960 actual	1961 estimate	1962 estimate
Hospitals.....	133	133	130
Patients (average daily load):			
In Air Force hospitals:			
Active duty.....	4,750	4,844	4,804
Dependents.....	3,319	3,499	3,510
Other.....	471	465	532

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, AIR FORCE—Continued

	1960 actual	1961 estimate	1962 estimate
Patients (average daily load)—Con.			
In other hospitals:			
Active duty.....	1,193	1,148	1,166
Dependents:			
In Federal hospitals.....	840	871	876
In non-Federal hospitals.....	1,258	1,479	1,614
Other.....	80	102	119
Medical personnel in training (entries).....	9,022	11,760	11,077

6. *Service-wide support.*—This support includes the operations of Air Force and various command headquarters, air attaché and mission offices, intelligence efforts and the lease of commercial communication systems and networks. An increasing communications program in 1962 is related to air defense warning systems, to launching control of missiles, and to the operation of a new communication network linking all depots and major bases with one another.

7. *Contingencies.*—These are extraordinary expenses approved and certified by the Secretary of the Air Force.

The 1962 program will provide support for a year-end strength of 360,000 men, about 10% less than 1961. Twenty and one-half missile battalions, the same number as at the end of 1961, will participate in the active anti-aircraft defense program. The operating expenses of these battalions include the costs of 4,325 State civilian employees who are members of these units and who maintain Nike missile sites in a state of operational readiness

which will permit their immediate use in the event of an emergency.

The program also provides for employment of 182 civilians in the National Guard Bureau, and 17,454 other State civilian employees for the administration of the 4,500 units, maintenance and repair of equipment, and operation of State and Federal field training camps.

For 1962, funds have been included in the amount of \$2.8 million to initiate payment of the employer's contribution to States which authorize civilian employees paid from this appropriation to participate in their retirement systems. Since the pay rates of such employees are equated to those of comparable Federal employees, the total employer's contribution to be paid from Federal funds is limited to the rate authorized for Federal employees participating in the Civil Service retirement system.

This appropriation provides for all operation and maintenance costs of the Air National Guard as a Reserve component of the Air Force. It includes funds for the operation of Air National Guard installations, including unit equipment and the pay of 13,847 State civilian employees. The significant elements of the program are summarized in the following table:

The National Board for the Promotion of Rifle Practice continues to promote civilian interest in small arms marksmanship. It provides assistance to 4,931 rifle clubs and schools with 278,446 members. This assistance includes the loan and repair of rifles and equipment; free issue of targets and supplies for use in marksmanship practice; and the free issue of trophies, medals, and badges for marksmanship. Funds are provided to partially defray the travel expense of State civilian shooting teams to the national matches. The principal increase in 1961 and 1962 is for the first two payments to the State of Ohio under the proposed 25-year lease of Camp Perry.

The program is augmented by the free issue of ammunition, purchased with funds provided under other appropriations, to members of rifle clubs and to competitors at national, regional, and State competitions.

The Alaska Communication System provides telegraph and long-distance telephone service for Alaska. Although legislation to authorize the sale of the system is to be proposed to the Congress, the sale is not anticipated until after 1962. Pending sale and transfer of facilities to private ownership, no significant expansion of the system is planned. Interconnection with the BMEWS rearward communications facilities is being provided in 1961 and 1962.

The amount appropriated provides for all expenses incident to normal maintenance and operation of the system and equipment modernization, except for costs of compensation of military personnel assigned.

Revenue from commercial customers was \$4.7 million in 1960 and is estimated at \$4.8 million for 1961 and \$5 million for 1962. Except for a portion of the 1960 receipts utilized for minor capital improvements, this revenue is deposited to miscellaneous receipts of the Treasury.

The Secretary of Defense serves as the principal assistant to the President on all matters relating to the Department of Defense, which operates under his direction, authority, and control. He is assisted in his immediate office by the Deputy Secretary of Defense, the Director of Defense Research and Engineering, seven assistant secretaries of Defense, the General Counsel, and such special assistants as are required to advise him in specialized fields. Military advice and assistance is provided by the Joint Chiefs of Staff. These activities will continue at substantially the same level in 1962 as in 1960 and 1961. The increase in the 1962 estimate is primarily for support of the Weapons Systems Evaluation Group and special research studies.

The U.S. Court of Military Appeals serves as the court of last resort for all of the more serious court-martial convictions of military personnel. The number of cases docketed totaled 1,336 in 1959 and 1,021 in 1960. Based on the first 4 months of operation, an approximate number of 1,000 cases is anticipated for this fiscal year. The number of opinions released by the court totaled 159 in 1959 and 150 in 1960, and it is estimated that a similar number will be published during 1961.

In compliance with the mandatory requirement of article 67 of the Uniform Code of Military Justice, the court is maintaining a current docket with the review completed, as of December 2, 1960, in 14,702 cases out of 14,825 cases filed since the court's establishment in 1951, leaving a balance of 123 under review.

Under existing legislation, 1961.—A supplemental appropriation for 1961 is anticipated to cover the payment of additional noncontractual claims against the Department of Defense as authorized by law.

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of capital equipment, such as aircraft, missiles, ships, combat vehicles, weapons, and communications; major items for support of the capital equipment when it is in service; the industrial facilities necessary to produce that equipment; and major modification of older equipment where feasible to provide a means of modernization in lieu of buying new equipment. The capital equipment financed by these appropriations is either procured from private contractors or produced in Government arsenals, shipyards, and plants.

The 1962 budget reflects no significant revisions in the content of the procurement appropriations. The separate appropriation for Airlift modernization, Air Force, enacted by the Congress last year, is continued in this budget.

The 1962 procurement program of the Department of Defense continues the large scale procurement and production of new weapons in support of the basic military missions of the armed services. As shown in the table below, direct obligations for missiles, ships, and all other procurement except aircraft increase steadily during the 1960-62 period. However, total direct obligations for the procurement and production category will be about three percent less in 1962 than in 1961. The peaking in aircraft obligations in 1961 is due in part to a higher program level in that year, associated with the last procurement of the B-52 and B-58 strategic bombers and simultaneous acceleration of the B-70 development program. In addition, it is estimated that about \$300 million in obligations initially planned for 1960 will be incurred in 1961. Direct obligations, adjusted for comparability with the new obligational authority and expenditures for procurement and production, are estimated as follows (in millions of dollars):

Current authorizations:**PROCUREMENT OF EQUIPMENT AND MISSILES, ARMY**

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, equipment, vehicles, vessels, and aircraft for the Army and the Reserve Officers' Training Corps; purchase of not to exceed [one] three thousand [two] one hundred and [eighty-seven] fifty-nine passenger motor vehicles for replacement only (including [twenty] thirty at not to exceed \$2,900 each); expenses which in the discretion of the Secretary of the Army are necessary in providing facilities for production of equipment and supplies for national defense purposes, including construction, and the furnishing of Government-owned facilities and equipment at privately owned plants; and ammunition for military salutes at institutions to which issue of weapons for salutes is authorized; [\$1,495,352,000] \$1,803,000,000, to remain available until expended. (5 U.S.C. 78; 10 U.S.C. 2353, 3012, 4386, 4531, 4532, 4683; Department of Defense Appropriation Act, 1961; authorizing legislation to be proposed.)

New obligational authority (appropriation)	1,407,300	1,495,352	1,803,000

This appropriation provides the major items of combat and support equipment to enable Army forces to meet successfully both atomic and non-atomic requirements of limited and general war. Additionally, this appropriation provides for production engineering, tooling and facilities in support of current procurement programs and for the modernization of arsenals and production facilities.

The total obligations reflected in the Army's program for 1962 are \$2,155 million, which will be increased to the extent that new procurement is required on the basis of 1962 orders for military assistance. The total 1962 obligations will be substantially greater than the \$1,762 million obligated in 1960 and should exceed the \$2,339 million expected to be obligated in 1961.

A large part of the increase in 1961 and 1962 over the 1960 obligation level is to enable the Army to modernize further and to increase its inventories of combat and support equipment, particularly of newly developed items. For this purpose, the Army plans direct obligations of

\$1,848 million in 1962, including \$45 million carried forward from 1961, as compared to \$1,637 million in 1961 and \$1,388 million in 1960. In each of these years additional Army requirements, estimated on the order of \$100 million, are being provided through reimbursable obligations financed from funds received through sale of equipment from stock without direct replacement. Other sales of equipment from stock assist further in modernizing the Army's inventories, as replacement is made by procurement of newer models of the same items.

The reimbursable obligations to be incurred in 1962 will provide standard Army items of ammunition, missiles, and equipment for the Marine Corps and various items of ammunition and equipment for the Air Force. The reimbursements from non-Federal sources are principally derived from the Federal Republic of Germany, which is supplied with certain missiles, tanks, and other items of combat equipment.

Firepower.—The 1962 program reflects a continuation of the emphasis on increasing the combat capability of Army forces, with both atomic and nonatomic weapons and munitions. This program will continue the production of modern combat equipment initiated in prior years, including the M-60 medium tank to provide greater firepower, range and crew protection; the M-14 lightweight rifle, M-60 machinegun, and an acceleration in the production of NATO standard ammunition; the Davy Crockett system to provide close-in atomic support to combat infantry units; the shoulder-fired medium assault weapon to provide increased antitank capability to combat infantry units; and atomic, chemical, and antipersonnel munitions for use by tactical forces. Additionally, provision is made for the introduction of a new air-transportable self-propelled mortar which, together with the 175-mm. self-propelled gun procured in 1961 and the new 105-mm., 155-mm., and 8-inch air-transportable self-propelled howitzers, provides combat forces with increased firepower and mobility; and the new shoulder-fired light assault weapon which provides combat forces with close-in antitank capability. To improve mobile firepower for combat forces, modification of the M-48A1 series tanks will obtain performance capabilities approximating those of the M-60 tank.

The surface-to-air missile program continues to support the air defense mission assigned to the Army. Major emphasis continues on the Nike-Hercules improvement program. Production of the Hawk missile system will continue for defense against low altitude aircraft and air-breathing missiles. The procurement of the Redeye missile system, a shoulder-fired guided missile, designed to arm small combat units against low altitude enemy aircraft, will be continued.

The surface-to-surface missile program provides the initial procurement of tactical missiles and ground sets of equipment for the Pershing, a modern, solid-fueled successor to Redstone, which can be transported by the medium helicopter. Production will continue for the solid-fueled Sergeant missile, and the improved Honest John and Little John rockets to provide tactical units with an effective missile delivery capability. Increased quantities of antitank missiles will be procured to provide an additional means for ground forces to combat enemy armored vehicles.

Mobility.—Effectiveness and survival on the modern battlefield is dependent upon the ability of ground forces to remain mobile. Combat power, a combination of mobility and firepower, will be enhanced by the continued procurement of the modern M-113 aluminum armored personnel carriers. Tactical trucks for use in supply and

PROCUREMENT—Continued

Current authorizations—Continued

PROCUREMENT OF EQUIPMENT AND MISSILES, ARMY—Continued

support functions in combat and other areas will be procured to meet the pentomic field army's need for increased mobility. The new M-88 tank recovery vehicle will continue in production to provide a means to return combat-damaged tanks to rear echelons for repair. A new armored full-track wrecker and a modern heavy equipment transporter will be procured for the first time to repair and recover vehicles in the 15-30 ton-weight class, and to carry combat vehicles in the 50-60 ton-weight class.

Aerial mobility continues to receive emphasis to meet the Army's need for battlefield surveillance, troop movement, and rapid logistical support for combat forces. Aircraft programed for procurement total 261 and include Mohawk, a twin engine observation airplane designed for battlefield surveillance and aerial photography; the Caribou, a twin engined transport aircraft to be used in combat zone resupply, transportation of troops, and emergency aero-medical evacuation; Iroquois, a utility helicopter, for the transportation of personnel, special teams, equipment, supplies and medical evacuation; and the medium transport helicopter, Chinook, designed to carry 26 fully armed combat troops or 3 tons of normal cargo.

Communications-electronics.—In the area of communications and electronics, the major effort is directed toward providing the Army with swift, accurate target surveillance equipment and light, rugged, mobile communications equipment which will support the high degree of mobility and dispersion dictated by modern weapons. For these purposes, the 1962 program provides for the procurement of surveillance and navigational equipment for Army aircraft, additional short endurance combat surveillance drone systems, the first procurement for test of the USD-5 long endurance combat surveillance drone systems, and the modernization and replacement of combat radio, telephone, and teletype communications and control equipment. Provision is also made for the continuing program for the improvement of the missile-master system to ensure compatibility with the semi-automatic ground environment (SAGE) system of the North American Air Defense Command.

Logistics support.—Included in this category are items designed to improve the Army's capability to move over streams and other obstacles; and equipment to build and maintain the support roads and airfields which are directly related to the mobility of combat forces. The 1962 program provides for continued procurement of materials handling and construction equipment, Conex containers, rolling fluid transporters, and other items essential to the balanced support of combat forces.

The Army's logistical capability will be improved through the continued procurement of additional amphibious lighters and rough-terrain forklift trucks to assist in over-the-beach operations. The 1962 program provides for the initial procurement of the new mobile nuclear powerplant to provide electrical power in remote combat areas. A variety of generators is planned for continued procurement to provide combat forces with electrical power to operate missile sites and radar stations, as well as for lighting and other uses where local power will not be available.

Facilities necessary to support production programs will continue to be modernized to meet program requirements.

The projects supported will lead to conservation of critical materials, improvements in production techniques, and the development of mass production methods for new items planned for production.

New obligational authority (appropriation).....	2,141,760	2,000,000	

This appropriation finances the procurement of new aircraft, guided missiles, and supporting equipment for the Navy and Marine Corps. It also provides for necessary safety-of-flight and operational modifications to service aircraft as well as the procurement of drones and major flight and maintenance training simulators. The funds requested permit carrying out a program costing \$2,198.7 million during 1962 compared to \$2,270.0 million in 1961.

1. *Aircraft and related equipment.*—This activity finances procurement of 644 new aircraft together with their supporting components and spare parts; the cost of modifying and modernizing in-service aircraft including mandatory operational and safety-of-flight improvements; and related items such as aircraft production tools and training equipment. Procurement requirements for new aircraft are based on projected aircraft operating programs and replacement of losses caused by attrition and obsolescence. The 1962 procurement program consists, with one exception, of additional quantities of aircraft currently in production. The Navy's attack mission is supported by follow-on procurements of light and close-support jet attack models as well as two Marine assault helicopters, one of which is new to the program in 1962. Antiair warfare requirements are being met, insofar as aircraft are concerned, through follow-on procurements of two fighters, one of which has limited and the other full all-weather capability. Provisions are also made in this category for a buildup in the production of a newly developed carrier-based early warning and control aircraft. In the antisubmarine warfare field, naval aviation's contribution includes procurement of an advanced helicopter, a carrier-based fixed wing and a land-based 4-engine turbo-prop model. A utility helicopter and a navigational trainer complete the program for 1962.

2. *Missiles, drones, and related equipment.*—The procurement of all missiles for fleet outfitting, training, and operational evaluation is financed under this activity.

The 1962 program provides for continued delivery of air-to-air Sidewinder and Sparrow missiles and air-to-surface Bullpup missiles to fleet squadrons and training commands. It continues the integration of ship-launched Tartar, Talos, and Terrier missiles into the active fleet in consonance with the construction and conversion of vessels with guided missile capability and provides for the procurement for operational evaluation of the Subroc antisubmarine weapon. Polaris missiles for the fleet ballistic missile submarines are also funded from this activity. Related projects such as powered and unpowered target procurement, antisubmarine drone procurement, and missile industrial facilities also financed under this activity are programed at minimum levels. In addition, provision is made for the procurement of hardware items associated with the Transit navigation system.

3. *Development, test, and evaluation support.*—This activity provides for development, test, and evaluation of new aircraft and missiles not yet ready for production.

Appropriation (adjusted).....	1,330,700	2,245,590	1,825,000

This appropriation provides for ship construction and conversion programs as authorized by law, including machinery, conventional and nuclear propulsion systems, electrical systems, gun, torpedo, and missile armament, communications equipment, and electronic detection, countermeasures, and tactical data systems.

The 1962 shipbuilding program includes 30 new ships and 22 conversions, at a total estimated cost of \$1,933.8 million, as compared to the 1961 program of \$1,616.5 million which provides for 20 new ships and 15 conversions. This budget continues a long-term modernization and replacement program to maintain a balanced fleet which can respond effectively to a wide variety of challenges—in cold war, limited war, or all-out nuclear war. To this end, major emphasis is placed on the exploitation of proven technological advances in hull design, propulsion, armament, and electronics.

The program includes 5 fleet ballistic missile submarines, which will bring to a total of 19 the number of

submarines armed with the Polaris missile, a vital element of the Nation's deterrent force. In addition, long lead-time components are provided for 5 Polaris submarines. The primary mission of 16 of the new ships is antisubmarine warfare. These include 3 nuclear-powered submarines, 7 guided missile frigates, and 6 escort ships. Further improvement in antisubmarine readiness is provided by the conversion of 20 World War II ships—14 destroyers and 6 submarines—which will prolong their service life and equip them with modern ordnance and electronics. Two amphibious transports, dock, and 1 amphibious assault ship will increase the capability of the Marine Corps for limited war. Two fast underway replenishment ships will provide improved fleet logistic support. Research and experimental ships include 1 hydrofoil research ship, 2 oceanographic research ships, 1 surveying ship, and 1 missile range instrumentation ship, a conversion. The remaining conversion in the program is a major communications relay ship.

In this budget, as in the 1961 budget, construction and conversion costs represent the full amount required to complete all ships in the program, allowing for growth factors—such as changes in ship characteristics and design—which can reasonably be expected to affect costs during long building periods.

Appropriation (adjusted).....		424,480	625,000

This appropriation represents a consolidation of all major procurement other than ships, aircraft, and missiles.

1. *Ships support equipment.*—This activity provides for the procurement of ship support equipment for the active

fleet, fleet support activities, continental and harbor defense activities. Polaris equipment to support maintenance and training for the fleet ballistic missile submarines accounts for virtually all of the increase in this activity. The procurement of electronics equipment for the modernization of the active fleet continues at levels which increase slightly over 1961. In the electronics program, greater emphasis is given to equipment for command combat direction systems and to anti-air warfare. Other items included in this activity are the procurement of ship components, machine tools, special shipboard mobile equipment, and first destination transportation costs of items procured by this program.

2. *Weapons and support equipment.*—This activity provides for ammunition, weapons, and technical support equipment for ordnance, aircraft, and the Shore Establishment. Major emphasis in the ammunition program is on the air-launched Zuni rocket, the new high speed and antisubmarine torpedoes, and on the Asroc antisubmarine weapon. Antisubmarine capability is further improved by the inclusion of more reliable air-dropped submarine detection buoys. Shore station support equipment comprises the ground communication and terminal navigation aids required for Navy and Marine Corps stations. Polaris equipment comprises one of the larger programs in this activity and accounts for over half of the increased funding.

3. *Command support equipment.*—This activity provides principally for the procurement of electronics and communications equipments for the shore based elements of the naval communications system. The primary objective is to modernize the system by improving the speed, reliability and security of communications for command-control of operating forces and modern weapons systems. Provision is also made for the improvement and modernization of facilities employed in electronics intelligence functions.

4. *Civil engineering support equipment.*—This activity provides for procurement of passenger-carrying vehicles and both general and special-purpose automotive equipment. The increased 1962 program provides for a phased replacement of overage equipment on an economic basis. Also provided are construction and weight-handling equipments, amphibious vehicles, and materials for fleet moorings.

5. *Supply support equipment.*—Provides for the centralized procurement of material-handling equipment (such as warehouse tractors, cranes and fork trucks) common to supply operations.

6. *Personnel support equipment.*—This activity provides for procurement of training equipments, devices and training aids. The principal program in this activity, accounting for most of the increase since 1961, is for specialized training equipment to support the growing number of Polaris submarines in the active fleet.

This appropriation provides the major items of equipment needed to support approved Marine Corps forces in achieving their assigned mission. The 1962 program will enable the Marine Corps to procure the third increment of new lightweight 7.62-mm. weapons and related ammunition; initial increments of new type ammunition; a variety of ammunition items to augment reserve stocks; the replacement of ammunition consumed during training programs; modifications and modernization of landing vehicles to improve over-the-beach capabilities; Hawk missiles to provide an effective defense against low altitude aircraft and air-breathing missiles; Redeye missiles to provide combat troops with a means to destroy low altitude aircraft; radar and radio improvements to provide forces with an increased capability for the detection, direction, and control of aircraft and control of ground forces; and the replacement and modernization of a variety of equipment items.

New obligational authority (appropriation).....	4,284,600	3,251,449	3,040,000

This appropriation provides for the development and procurement of aircraft other than the transport aircraft included under Airlift modernization, Air Force; components, spares, industrial production facilities, and modification of inservice aircraft of all types; and direct ground support equipment. The funds requested provide a procurement and development program for other than transport aircraft for 1962 of \$3,256.3 million compared to a revised program of \$4,296.6 million for 1961.

1. *Aircraft procurement and production.*—This activity provides for the procurement of 473 new aircraft and in addition associated guided air-to-air rockets, to continue modernization and support of the forces comprising 79 aircraft wings by end 1962. In the strategic forces, procurement of jet tankers is continued for the support of the heavy and supersonic bombers and modernization of the tanker support for the tactical forces to improve their mobility and radius of action. The procurement of increased quantities of supersonic tactical-fighter aircraft with all-weather capability is planned in 1962. These improved tactical mission aircraft will be capable of being rapidly deployed to deliver conventional as well as nuclear munitions and will strengthen capabilities for close support of ground forces. Provision is made for additional quantities of jet training aircraft to meet current training requirements for high performance combat aircraft. In addition, provision is made for modernization of inservice aircraft and their components and for production facilities which cannot be provided by private capital.

2. *Development, test and evaluation.*—This activity provides, in 1962, for the continued development of the B-70 intercontinental strategic bomber weapon system.

This appropriation provides for the development and procurement of transport aircraft including peculiar direct ground support equipment. The funds requested provide for a procurement and development program for 42 transport aircraft in 1962 of \$193.7 million compared to \$278.3 million for 1961.

1. *Aircraft procurement and production.*—Additional tactical transport aircraft are provided to improve the mobility of the modernized operational forces needed in the event of localized threats or conflicts.

2. *Development, test, and evaluation.*—This activity provides for the development, test, and evaluation of a long-range heavy cargo transport, specifically designed for the Military Air Transport Service mission.

Appropriation (adjusted).....	2,465,550	2,615,120	2,811,000

This appropriation provides for development and procurement of missiles and drones, launching and ground support equipment, installation and checkout of equipment preliminary to activation of operational squadrons, and expansion of industrial facilities.

1. *Missile procurement and production.*—This activity provides funds for missiles required for operational squadrons and related training. The 1962 estimates substantially complete the procurement of the 13 squadron Atlas intercontinental ballistic missile program; continue procurement of Titan intercontinental ballistic missiles toward the 14 squadron objective; and initiate the first major procurement of operational Minuteman intercontinental ballistic missiles. Procurement of the Hound Dog air-to-surface missiles continues, greatly increasing the effectiveness of the B-52 heavy bombers. In addition, a major buy of Hound Dog spares is included to effect the standby airborne alert program. Procurement of Bullpup air-to-surface missiles increases above the 1961 level. Provision is also made for procurement of target drone missiles used in testing and training of weapon systems.

2. *Ground support equipment.*—The principal amounts required in 1962 are for installation and checkout and for launching and related ground equipment for the Atlas, Titan, and Minuteman ballistic missiles; for Hound Dog air-to-surface missiles; and for spare parts support of other operational Air Force missile weapon systems, such as the Snark intercontinental missile, Quail decoy missile, and Bomarc air defense system. Lesser amounts are also included for training equipment.

3. *Development, test, and evaluation support.*—The amounts contained in 1962 provide for continuing improvement to the Atlas weapon system, and for continuing development of Titan and of the Minuteman fixed and mobile weapon systems.

New obligational authority (appropriation)	1,109,650	877,171	977,000

This appropriation provides for ground equipment integral to command, control and warning systems, support equipment for aircraft and missile systems and for other centrally procured equipment for the Air Force, the Air Force Reserve, the Air National Guard, and the Air Reserve Officers Training Corps. The funds requested will provide for a procurement program of \$1,007 million for 1962 and a revised program of \$1,106 million in 1961.

1. *Weapons, ammunition, and propellants.*—The 1962 program provides for increasing the capability of the Air Force to meet air defense and tactical ground forces requirements for both limited and general war and to support training programs. Procurement of a variety of munitions will continue, including: Air-to-air rockets; 20-mm. am-

munition; new antipersonnel/materiel bombs; atomic ordnance components except for fissionable materiel; and conventional ammunition and mines.

2. *Vehicular equipment.*—The 1962 program provides for the completion of the 4-year modernization program for the general purpose fleet and for continuation of an orderly replacement program; for procurement of new fire trucks; for continued procurement of commercial model trucks to replace inventories of military design; and for supplies and materials for the operation of the vehicular fleet.

3. *Ground communication—Electronic equipment.*—The 1962 program provides for (1) completion of the major procurement for the ballistic missile early warning system (BMEWS), the semiautomatic ground environment system (SAGE), and the surveillance and gap-filler radar improvement programs for the continental United States and oversea air defense systems; (2) procurement of equipment, including central data processing and display components, for the command and control systems of the Strategic Air Command and North America Air Defense Command; (3) procurement of communications cable and launch control equipment for operational ballistic missile sites; (4) augmentation of other weapon supporting systems including electromagnetic intelligence gathering, weather observation and forecast, ground navigational aids, worldwide high frequency and tropospheric scatter communication systems; (5) cryptologic equipment including teletype and data encryption devices and voice security; and (6) supplies and materials and modifications required to sustain operational programs.

4. *Other base maintenance and support equipment.*—The 1962 program provides for annual procurement levels of common support equipment; special test and calibration equipment; personal, safety and rescue equipment; photographic and shop equipment, continuation of programs for airfield lighting, aircraft arresting barriers, auxiliary power units, and related airfield support equipment; and supplies and materials required for overall program support.

New obligational authority (appro- priation).....	1,961,644		

This appropriation provided funds in 1960 and prior years for the procurement of aircraft, guided missiles, and supporting equipment for the Navy and Marine Corps. It also financed necessary safety-of-flight and operational modifications to service aircraft, as well as the procurement and modernization of ground electronics equipment required for aircraft and missile operations.

In 1961 and subsequent years this procurement will be in the two new appropriations, "Procurement of aircraft and missiles, Navy" and "Other procurement, Navy". The amounts shown in 1961 and 1962 represent obligations necessary to complete previously initiated programs and cover, in general, costs of short leadtime components, engineering changes, pricing adjustments, and spare parts. The 1960 and prior year funded programs in this account are fully financed and new appropriations are not required for this purpose.

**RESEARCH, DEVELOPMENT, TEST, AND
EVALUATION**

The appropriations in this title provide the principal support for the research, development, test, and evaluation activities of the Department of Defense, including basic and applied research, general technical development, development of new weapons and equipment, fabrication and procurement of items under development for test and evaluation, and operation and maintenance of laboratories

and test facilities engaged in the conduct of research, development, test, and evaluation. Of the additional obligation amounts for development, test, and evaluation which have been carried in procurement appropriations in the past, only those for certain aircraft and missile systems of the Air Force and minor amounts for Navy aircraft remain in procurement accounts in 1962. The amounts in this title together with those identified as development, test, and evaluation in the procurement appropriations come to the following combined total estimates for research, development, test, and evaluation activities:

TOTAL DIRECT OBLIGATIONS

(In millions of dollars)

	1960 actual	1961 estimate	1962 estimate
Research, development, test, and evaluation appropriations.....	3,966.7	4,666.7	4,365.4
Development, test, and evaluation identified in procurement appropriations.....	1,512.2	1,602.7	1,378.2
Total research, development, test, and evaluation ¹.....	5,478.9	6,269.4	5,743.6

¹ Exclusive of military personnel and military construction.

The amounts provided in 1962 will generally continue and in some fields augment the present high levels of effort in basic research, applied research, and general technical development, and will maintain approximately the current level of operation of the laboratories and test installations of the Department of Defense. They will also carry forward the development of a wide variety of major weapons systems and other specific developments for which the annual requirements fluctuate depending on the status of development, the phasing of the effort, and the quantities and cost of the test articles required.

The peaking in 1961 of total obligations shown above is the net result of fluctuating requirements for development projects in the years involved. In the case of the development, test, and evaluation items remaining in the procurement appropriations, 1961 is the last year of large scale development funding for several major projects which are progressing into the stage of production for service use, such as the Navy A2F attack and W2F early warning-control aircraft and the Air Force Atlas missile system. In 1962 the decreases for these projects more than offset the increases for the Air Force B-70 supersonic bomber project. In the research, development, test, and evaluation appropriations, total obligations peak in 1961 partly because of changes in program phasing under which obligations previously planned for 1960 are now to be incurred in 1961, and partly because the obligation requirements are higher in 1961 than in 1962 for a number of major specific programs, such as the Army Pershing missile, the Navy Polaris missile, and the Air Force Discoverer satellite. In the case of the Air Force, the increased 1961 obligations will be financed in part by the transfer of unprogramed balances from procurement accounts.

The estimated obligations under the appropriations in this title for the Army, Navy, Air Force, Advanced Research Projects Agency, and the emergency fund are summarized below (in millions of dollars):

Summary of program by activities:	1960 actual	1961 estimate	1962 estimate
1. Military sciences.....	513.3	687.4	623.7
2. Aircraft and related equipment.....	333.3	403.2	365.6
3. Missiles and related equipment.....	1,542.1	1,838.9	1,580.5
4. Military astronautics and related equipment.....	421.4	511.2	584.0
5. Ships and small craft and related equipment.....	196.4	207.2	171.7

	1960 actual	1961 estimate	1962 estimate
Summary of program by activities—Con.			
6. Ordnance, combat vehicles, and related equipment.....	214.8	159.6	153.0
7. Other equipment.....	519.8	473.3	493.9
8. Programwide management and support.....	225.6	245.2	243.0
9. Emergency fund.....	-----	140.7	150.0
Total direct obligations.....	3,966.7	4,666.7	4,365.4

1. *Military sciences.*—This activity includes basic research in the life, physical, and social sciences to add to the store of fundamental scientific knowledge; applied scientific research of importance for military purposes; operations research; and the development of new materials, components, and techniques. Among the many and widely varied problems to be investigated under this activity in 1962 are materials with physical properties superior to those presently available, higher performance rocket fuels, thermoelectric materials, nonlethal chemical and biological agents, neurosensory phenomena, radio astronomy, oceanography, high altitude phenomena, cargo packaging, blood substitutes, nuclear phenomena, advanced radar techniques, more reliable electronic components, underwater sound propagation characteristics, and automatic data processing. Amounts have been provided in 1962 for augmenting the research effort in such fields as high energy physics, materials, the physics of matter, and atmospheric and biomedical sciences. In addition to the amounts in this activity, basic and applied research performed within overhead arrangements on some procurement contracts is funded in the procurement accounts. Supporting research associated with development projects is funded under the other activities below. The principal support of such organizations as the Naval Research Laboratory, the Air Force's Cambridge Research Laboratories and Rand Corporation, and the Army's Operations Research Office and Human Resources Research Office is provided under this activity in addition to work performed by universities, nonprofit organizations, and industry.

2. *Aircraft and related equipment.*—This activity funds research, development, test, and evaluation related to airframes, engines, armament, electrical devices, and other installed equipment, except that the development of the Air Force B-70 and the new jet cargo aircraft for the Military Air Transport Service remain in the procurement accounts. The 1962 program in this activity emphasizes the development of Army tactical aircraft including mobility and reconnaissance types, and a prototype tri-service vertical takeoff and landing transport aircraft. Research and development will be continued in 1962 on the ground launched near orbital Dynasoar vehicle initiated as a system development in 1961. Under the aircraft nuclear propulsion program conducted jointly by the Air Force and the Atomic Energy Commission, one powerplant development program will be continued. Research and test centers primarily funded under this activity include the Air Force's Arnold Engineering Development Center and Edwards Flight Test Center and the Naval Air Test Center.

3. *Missiles and related equipment.*—This activity provides for research, development, test, and evaluation of guided missiles of all types except that procurement funds are used for the major portion of the development work on Air Force ballistic missile systems—Atlas, Titan, and Minuteman. A major research and development effort is being continued in 1962 in the field of defense against ballistic missiles under the Army's Nike-Zeus antimissile project; this is in addition to an extensive research effort

on new techniques funded by the Advanced Research Projects Agency within the activity "Military sciences," above. Other Army missile developments include the tactical surface-to-air missiles Mauler and Hawk, and the surface-to-surface missiles Sergeant and Pershing. In the strategic field, the Navy's Polaris system is continued as a high priority development. Development work will continue on the Air Force Skybolt air launched ballistic missile. Other significant Navy missile development projects include Typhon and Eagle for fleet air defense and the Subroc antisubmarine system. In addition to funding industrial participation in the missile research and development program, this activity is the principal source of funds for the operation of three national missile ranges: the Atlantic, Pacific, and White Sands Missile Ranges; the Air Proving Ground and Missile Development Centers of the Air Force; the Naval Ordnance Test Station and Applied Physics Laboratory of the Navy; and the research divisions under the Army Ordnance Missile Command at Huntsville, Ala.

4. *Military astronautics and related equipment.*—This activity provides for the conduct of programs directed at the improvement of space technology for military purposes and the investigation of specific military applications of space vehicles. Research and development in such areas as upper stage propulsion, secondary power, guidance, navigation components, and payload equipment for space and satellite systems are included under this activity. During 1960, technical and management responsibility was transferred from the Advanced Research Projects Agency to Air Force for continuing development effort on the Samos reconnaissance satellite, the Discoverer vehicle development system, and the Midas early warning satellite, and to Navy for continuing development effort on the Transit navigation satellite. In 1961 the remaining uncompleted space vehicle development program, Advent, the communication satellite, was transferred from the Advanced Research Projects Agency to the Army. Provision is made for carrying all of these development programs forward at high levels in 1962.

5. *Ships and small craft and related equipment.*—This activity provides for research, development, test, and evaluation related to ships and small craft, except that funds are included in the regular shipbuilding appropriation for the construction of ships of advanced design and ships employed in the development, test, and evaluation of new components and techniques. Funds in this activity will provide in 1962 for the development of advanced engines and propulsion machinery, communications and other shipboard electronic equipment, catapults and arresting gear, and other installed equipment. A significant part of the research and development effort of the Naval Electronics Laboratory and David Taylor Model Basin is funded under this activity.

6. *Ordnance, combat vehicles, and related equipment.*—The Army's program includes improved artillery, rockets, mortars, antitank weapons, tank armament, and small arms. Vehicle development includes tactical carriers and high mobility logistic transporters. Development will be continued on more effective ammunition, mines, and grenades. Among the developments which will be emphasized in 1962 are new division and direct support weapons to provide an advanced capability, giving both atomic and nonatomic firepower. The 1962 Navy program continues to emphasize antisubmarine weapons and includes mines, depth charges, torpedoes, bombs, rockets, and other types of ammunition. Weapons and support vehicles, including ground effect "air cushion" machines, for the Marine Corps are also provided for in this activity.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION—Continued

This activity provides the principal support of the Naval Ordnance Laboratory and of research, development, test, and evaluation activities at several Army arsenals.

7. *Other equipment.*—This activity provides for research, development, test, and evaluation of equipment not separately provided under other activities. Examples of the types of equipment under development in 1962 are communications equipment in all three services; mine warfare, combat surveillance, materials handling, obstacle crossing equipment, and protective clothing and equipment for the Army; detection, and warning equipment, and shore-based antisubmarine and mine countermeasures systems in the Navy; and photographic and personal equipment, and aircraft control and warning, missile detection, and other electronic systems in the Air Force. Much of the support of the research and development effort of the Lincoln Laboratories and the Signal Research and Development Laboratory is provided under this activity by the Air Force and Army, respectively.

8. *Programwide management and support.*—This activity provides for those costs of operation, management, and maintenance of research, development, and test facilities of the Department of Defense which are not distributed directly to the other budget activities, and for certain costs of central administration such as the headquarters of the Air Research and Development Command.

9. *Emergency fund.*—The Emergency fund appropriation enables the Secretary of Defense to supplement appropriations of the departments available for research, development, test, and evaluation in order to defray the cost of preliminary exploitation of new developments and other such contingencies.

Current authorizations

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, **[\$1,041,286,000]** \$1,130,400,000, to remain available until expended: *Provided*, That during the current fiscal year there may be merged with this appropriation such amounts of the unexpended balances of appropriations heretofore made available for research, development, test, and evaluation, as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (10 U.S.C. 2353; Department of Defense Appropriation Act, 1961.)

SALARIES AND EXPENSES, ADVANCED RESEARCH PROJECTS AGENCY, DEPARTMENT OF DEFENSE

For expenses necessary for such advanced research projects as may be designated and determined by the Secretary of Defense, pursuant to law, **[\$215,000,000]** \$165,000,000, to remain available until expended: *Provided*, That such amounts as may be determined by the

Secretary of Defense to have been made available for related programs in other appropriations available to the Department of Defense during the current fiscal year may be transferred to and merged with this appropriation to be available for the same purposes and time period: *Provided further*, That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to carry out the purposes of advanced research to those appropriations for military functions under the Department of Defense which are being utilized for related programs, to be merged with and to be available for the same time period as the appropriation to which transferred. (74 Stat. 348, 349; Department of Defense Appropriation Act, 1961.)

Note.—Estimate for 1961 excludes \$140 million for activities transferred in the estimates to National Aeronautics and Space Administration appropriations as follows (in thousands of dollars):
 "Salaries and expenses"..... 34,316
 "Research and development"..... 92,684
 "Construction and equipment"..... 13,000
 The amounts obligated in 1960 are shown in the schedule as a part of the comparative transfers.

MILITARY CONSTRUCTION

The military construction programs for the Armed Forces, both Regular and Reserve, in terms of dollar obligations shown in the individual schedules of this title are summarized in the following table (in thousands of dollars):

MILITARY CONSTRUCTION OBLIGATIONS

	1960 actual	1961 estimate	1962 estimate
Current authorizations:			
Regular Forces.....	1,273,757	1,298,794	1,111,000
Reserve Forces.....	56,343	67,674	64,000
Interservice activities.....	31,451	38,384	10,000
Total.....	1,361,551	1,404,852	1,185,000

Most of the new appropriations for the military construction accounts are dependent on the enactment of new authorizing legislation. The details of this legislation have been completed and are being submitted to the Congress for early consideration.

1. *Major construction.*—This program provides for acquisition of land for and construction of military projects in the United States and overseas as authorized in currently effective military construction acts and the new authorization referred to above.

The 1962 program continues the support required for our expanding ballistic missile arsenal through the construction of facilities for the Polaris system and additional operational sites for the Titan and Minuteman missiles. The capabilities of the manned bomber forces and their associated tankers will be increased by the construction of additional facilities at existing installations.

In the field of air defense, facilities will be provided to accommodate the F-106 aircraft coming into the inventory as well as a minor redeployment of the interceptors. Improvements to the Nike-Hercules and Hawk systems will be made and further construction for the installation

of improved radars will be provided for the aircraft control and warning net.

Facilities for the aviation units in support of the Army and Marine Corps ground forces will be constructed. Several major projects are proposed to improve the training facilities of the ground forces, and additional construction is required to support their deployment overseas.

Continued improvement of the waterfront and air installations in support of the Navy striking forces will be accomplished by a variety of projects including improvement of piers and pier utilities, dredging to accommodate deeper draft submarines, provision of maintenance hangars, aircraft parking aprons, and runway improvements. Provision is also made for additional training facilities required to keep operating personnel abreast of rapidly changing technologies in both fleet and air operations.

The research and development projects will provide facilities to increase our capabilities in many fields, such as ballistic missiles, space, electronics, chemical, and medical. The facilities range from laboratory buildings housing many separate but associated activities to unique structures performing one main function, such as the simulation of pressure and other conditions affecting the payload of space vehicles from blast-off to orbit. Construction is also proposed for the first increment of the Atlantic Underwater Test and Evaluation Center to study the problems associated with undersea warfare.

Additional links and improvements to the various communications systems will be built and a number of facilities are to be constructed to provide the Defense Communications Agency with control points for the major long-haul networks of the Armed Forces. There also will be facilities to augment the logistic, materiel, and administrative functions of the Armed Forces, as well as facilities for personnel in the housing, medical, and community areas of the many installations.

The facilities required for the training of the Reserve Forces include: Armories and training centers; nonarmory facilities such as maintenance shops and warehouses; and aviation facilities such as airfield pavements, maintenance shops, and training buildings.

2. *Minor construction.*—Provision is made for construction of permanent and temporary projects that are not otherwise authorized by law but which are determined to be urgently required and do not exceed \$200 thousand per project for the Regular Forces and \$50 thousand per project for the Reserve Forces.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and the architect-engineer services, land, and utilities, in support of the privately financed Capehart housing program, and minor land acquisitions.

Current authorizations:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as currently authorized in military public works or military construction Acts, in sections 2673 and 2675 of title 10, United States Code, to remain available until expended, **[\$148,407,000]** \$210,000,000. (*Military Construction Appropriation Act, 1961; authorizing legislation to be proposed for 1962.*)

MILITARY CONSTRUCTION—Continued**Current authorizations—Continued**

LORAN STATIONS, DEPARTMENT OF DEFENSE—Continued

These funds are advanced to the Coast Guard for construction of loran stations in areas essential to the defense of the United States. Loran transmitting stations permit safe and effective operation of ships, submarines and aircraft of the military services in all kinds of weather, day or night, by an electronic system of navigation which provides continuous navigational positions by means of intersecting lines of position.

【MILITARY CONSTRUCTION】

【For construction as authorized by title IV of the Act of June 8, 1960 (Public Law 86-500), to remain available until expended, not to exceed \$20,000,000, to be derived by transfer from funds available to the Office of the Secretary of Defense for advanced research projects.】 (*Military Construction Appropriation Act, 1961.*)

This program provides for construction of installations and facilities required for advanced research projects as authorized by title IV of the act of August 20, 1958 (Public Law 85-685), as amended, and title IV of the act of June 8, 1960 (Public Law 86-500).

The Military Construction Appropriation Act, 1960 (Public Law 86-275), provided \$23.5 million for construction of advanced research projects. \$7 million of the 1960 appropriation was transferred to "Military construction, Air Force."

The Military Construction Appropriation Act, 1961 (Public Law 86-630), provided that an additional \$20 million could be derived by transfer and made available for construction of advanced research projects.

The Alaska Communication System provides telegraph and long distance telephone communications within Alaska and between Alaska and other States for the Department of Defense, other Government agencies, and the general public. Although legislation to authorize the sale of the System is to be proposed to the Congress, its disposition is not anticipated until after 1962. This account provides for the construction of buildings for the System.

¹ Includes following amounts derived from barter transactions for facilities in France for which Army is executive agent: 1959 and prior years, \$43,010 thousand; 1960, \$5,930 thousand; 1961, \$1,060 thousand.

The Department of Defense is authorized (68 Stat. 1125, as amended by 70 Stat. 1017) to construct or otherwise acquire family housing for occupancy as public quarters and community facilities in foreign countries utilizing foreign currencies to a value not to exceed \$250 million. The foreign currencies are acquired pursuant to the provisions of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454) or through other commodity transactions of the Commodity Credit Corporation. In addition, the Department is authorized appropriated funds not to exceed 25% of the total cost of each family housing and community facilities project as may be necessary to supplement the foreign currencies to obtain the required facilities.

The Department is required to reimburse the Commodity Credit Corporation in a dollar amount equivalent to the value of the foreign currencies utilized. For this purpose, the Department is authorized to utilize appropriations otherwise available for the payment of quarters allowances to personnel who occupy such housing. Amounts chargeable for the maintenance and operation of such housing are authorized (69 Stat. 350) to be deducted from the quarters allowances withheld for reimbursing the Commodity Credit Corporation. Beginning in 1961, a policy was adopted to purchase all currencies required to construct or acquire such facilities with dollar appropriations restricted solely to such purchases.

Operating results.—The accompanying schedules indicate the indebtedness of the Department to the Commodity Credit Corporation and costs realized and anticipated through 1962 for the construction of housing and community facilities projects in foreign countries for use by Defense personnel.

CAPEHART HOUSING

The Secretary of Defense is authorized under title VIII of the National Housing Act (69 Stat. 646) to contract for the construction of family housing on military installations in the United States, its Territories, and possessions, and assume mortgage indebtedness, not to exceed \$2.3 billion in principal obligations outstanding at any time, required to fund such construction. The Federal Housing Administration is authorized to insure such mortgages through the Armed Services Housing Mortgage Insurance Fund established for this purpose, for which insurance premiums are charged at the rate of $\frac{1}{4}$ of 1% per annum on the outstanding principal obligations of the mortgages. The authority to insure such mortgages expires October 1, 1961, except pursuant to a commitment to insure issued before this date (73 Stat. 682).

Mortgage funds are provided primarily through private investment; however, the Federal National Mortgage Association has provided a limited amount of funds under a special assistance fund authorization. The mortgages have a maturity date not to exceed 30 years and bear interest at a rate not to exceed $4\frac{1}{2}$ % per annum. No mortgage may involve a principal obligation which exceeds the least of: (a) the Federal Housing Administration estimate for replacement cost of the completed housing project; (b) an average of \$16,500 per family dwelling unit; or (c) the lowest acceptable of the bids submitted by eligible bidders seeking award of the construction contract.

MILITARY CONSTRUCTION—Continued

Current authorizations—Continued

CAPEHART HOUSING—Continued

Mortgage payments which provide for the reduction of the principal obligation, for interest expense, and for mortgage insurance premiums, are made from the appropriations for military pay and allowances. The amounts required for this purpose are included in the budget schedules for these appropriations. Such payments may not exceed an average of \$90 per month per housing unit and total payments for all such housing may not exceed \$21 million per month.

Funds are authorized (65 Stat. 365) to be appropriated to acquire land, prepare sites, and install off-site utilities for these projects. Expenditures incurred for this purpose may not exceed an average of \$1,500 per unit in any housing project nor more than an average of \$1,000 per unit in respect of all housing projects for which appropriations are made under this authorization. Costs incurred for architectural and engineering contracts and for inspec-

tion of construction are reimbursable from mortgage proceeds.

In accordance with 73 Stat. 323, mortgage proceeds may no longer be used to pay the costs of title search and title insurance. Where a military guarantee of title can be utilized, the cost of obtaining a title search to support such a guarantee is authorized (40 U.S.C. 255) to be paid from funds appropriated for military construction. Where a determination is made that necessary financing cannot be obtained unless commercial title insurance is provided, the cost of such insurance must be paid (73 Stat. 323) from the Wherry revolving fund (70 Stat. 1112).

Operating results.—The following schedule indicates the mortgage indebtedness and costs realized and anticipated through 1962 for Capehart housing completed and occupied by defense personnel. The contingent liability of the Department for contracts awarded as of the end of each year is indicated for housing projects under construction. The schedule does not reflect operation and maintenance costs for this housing, which are financed from the military operation and maintenance appropriations, nor depreciation.

OVERSEAS RENTAL GUARANTEE MILITARY FAMILY HOUSING

The Department of Defense is authorized (66 Stat. 622) to guarantee rental payments to private sponsors of family

housing projects built in foreign countries for use by defense personnel. The guarantee may not exceed 95% of the scheduled rentals the sponsors would receive from full occupancy of the housing by defense personnel over periods ranging from 5 to 10 years depending upon the length of time Defense expects to occupy the housing and the prospect for its eventual use by native populations. The amount of such guarantees outstanding at any time may not exceed \$100 million. The housing is wholly owned by the private sponsors who build, operate, and maintain it in accordance with the terms of the rental guarantee agreements. Commanders of the military installations served by the housing projects are responsible for maintaining occupancy by installation personnel at the guaranteed 95% level. Under this program 4,838 housing units have been built at 31 locations in France, and 700 housing units at 3 locations in Morocco. In 1960, the guarantee on 410 units in France expired and in 1962 the guarantee on 484 units in France will expire.

Operating results.—The following schedules indicate the extent to which the rental guarantee authority has been used and the estimated reduction of the Government's contingent liability under these guarantees through 1962.

This fund finances the acquisition costs, mortgage payments and initial alteration, improvement, rehabilitation, and repair of certain family units of Wherry Act Housing (70 Stat. 1111-12).

Budget program.—The budget program contemplates acquisition of about 76,300 units of Wherry family housing by the end of 1962, at a total cost of \$732.5 million, which includes 6,800 units in 1961 and 4,300 units in 1962. Acquisition of Wherry Act housing is mandatory at installations where the construction of housing under the armed services housing mortgage insurance program (Capehart housing) has been approved by the Secretary of Defense and is permissive in all other cases. There is also provided approximately \$7 million in 1961 and \$12 million in 1962 representing additional costs required to satisfy sponsors' equities in cases pending litigation.

Through 1962 it is planned to rehabilitate approximately 70,000 of the acquired units. Funds provided in the budget program for this purpose are as follows: 1961, \$44 million; 1962, \$30 million.

Financing the budget program.—This program is funded from reappropriations, rentals, and, where the housing is assigned as public quarters, from payments from appropriations for pay and allowances of military personnel in amounts equal to the quarters allowances to which the occupants would otherwise be entitled. The cost of maintaining and operating the housing is financed from the military operation and maintenance appropriations. Mortgage indebtedness assumed in acquiring the housing is reflected in the schedules.

A reappropriation of \$20 million is estimated in 1962 pursuant to the authority in section 512 of the Housing Act of 1956. Income from quarters allowances and rentals is expected to increase from an estimated \$60 million in 1961 to approximately \$65 million in 1962.

Operating results and financial condition.—Net budget expenditures of \$30 million are expected in 1961 and \$35 million in 1962 since outlays for acquisition of sponsors' equities, mortgage payments, rehabilitation, and other costs will substantially exceed the amounts available from quarters allowances and rentals. In addition, there is included in both 1961 and 1962 an estimate of \$1 million for Capehart mortgage insurance, pursuant to section 415, Public Law 86-149 (70 Stat. 1111). Operating income is expected to exceed operating expenses paid from the fund by an estimated \$35.7 million in 1961 and \$38.5 million in 1962. This income is available for financing the acquisition and rehabilitation of additional units as well as for payments of operating expenses. The schedules do not reflect depreciation or operation and maintenance costs. Government investment is estimated at \$422 million at June 30, 1962, consisting of \$267 million in reappropriations and \$155 million in retained earnings.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$29,228 thousand; 1960, \$40,347 thousand; 1961, \$50,347 thousand; 1962, \$57,347 thousand.

Average monthly operating cost.....	\$27.75	\$27.75	\$27.75

The 50 units planned for disposal in 1962 are at Fort Stewart, Ga. The remaining 208 units at Fort Stewart are expected to be disposed of in 1963 and 1964. These units have been replaced by Capehart housing. The remaining units to be kept in operation are located at Fort Carson, Colo.; Fort Leonard Wood, Mo.; Camp Irwin, Calif.; and at the Navajo Ordnance Depot, Ariz. In 1960, \$450 thousand, which was surplus to operational requirements of the fund, was returned to the Treasury. It is anticipated that an additional \$200 thousand in 1961 and \$150 thousand in 1962 will become surplus to requirements and will be available for payment to the Treasury.

This fund finances the maintenance, operation, improvement, and liquidation of temporary family housing units (70 Stat. 1105). Funds are provided by rental receipts. The number of housing units available under this program is as follows:

	1960 actual	1961 estimate	1962 estimate
Available units, beginning of year.....	3,900	3,817	3,551
Units disposed of during year.....	83	266	100
Units available, end of year.....	3,817	3,551	3,451
Average number of units rented during year.....	3,750	3,450	3,350
Average monthly rental.....	\$30.58	\$31.40	\$31.97
Average monthly operating cost.....	\$23.78	\$26.54	\$26.55

Disposal of units uneconomical to maintain is being accomplished as rapidly as housing needs can be met otherwise. These housing units, most of which are trailers, are located on or nearby 15 Navy and Marine Corps installations. In 1960, the sum of \$150 thousand which was surplus to operational requirements of the fund was returned to the Treasury. It is anticipated that an additional \$300 thousand in 1961 and \$200 thousand in 1962 will become surplus to requirements and will be available for payment to the Treasury.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders as follows: 1959, \$178 thousand; 1960, \$139 thousand; 1961, \$139 thousand; 1962, \$139 thousand.

This fund finances inventories of consumable supplies, minor items of equipment, and repair parts throughout the Army depot supply system and at certain stations in the continental United States, and in depots of the major overseas commands. Material is purchased and held at these locations for resale and for mobilization reserve (5 U.S.C. 172d).

Supply and financial operations of the fund are centrally directed and controlled by the Department of the Army. In the financial statements the 570,000 items under the fund, about 85% of the total Army items, are classified into 12 material categories, which are managed through the Army's seven technical services and the defense supply service. Beginning in 1960, stock fund operations at nine stations in the 3d Army area are being managed through the U.S. Continental Army Command and the 3d Army headquarters. Among the 12 material categories are three single manager assignments giving the Army responsibility for continental U.S. depot inventories of clothing, subsistence, and general supplies for all the military services. Sales of single manager owned stocks are made either to military service retail stock funds which hold station and overseas theater inventories for resale to consuming appropriations or are made directly to consumer appropriations.

No significant changes were made in 1960 in the types of material or geographic areas covered by the fund. A substantial reduction in the number of line items in the fund was made through improved cataloging, standardization, and elimination of obsolete items. During 1960 three new single manager assignments were made to the Army. The single manager for general supplies is beginning operations during 1961. The budget statements do not reflect program data for the single managers for automotive supplies and for construction supplies because they will not begin supply operations until late in 1962. Further plans now under consideration, but not reflected in the budget, include (1) the possible capitalization of selected items currently procured from operating appropriations such as repair parts for aircraft and guided missiles, (2) the transfer from the stock fund of selected high dollar value items of equipment and major component parts, and (3) the extension of the stock fund to the remaining major stations in the United States.

The net change in capitalized inventories of \$121 million during 1960 was due principally to material returns from customers of \$138 million, offset by a decrease of \$17 million due to other adjustments. The net change projected for 1961 is an increase of \$229 million. Of this amount \$107 million reflects the transfers from other military services to the single manager for general supplies, \$110 million represents returns from customers, and the remaining \$12 million reflects miscellaneous adjustments. The change of \$95 million during 1962 reflects anticipated returns from customers of \$83 million and \$12 million of transfers between the military services and other adjust-

Budget programs.—Obligations of \$2,053 million in 1960 are estimated to increase to \$2,302 million in 1962, an increase of \$249 million. Total obligations include procurement for the highest priority mobilization reserves of \$35 million in 1960 and \$40 million in both 1961 and 1962. Of the total increased obligations \$124 million is for the new single manager for general supplies. The other increases reflect increased procurement requirements to meet sales due to the steady attrition of long-supply stocks which can be sold without replacement. Continued emphasis on maximum utilization of long-supply stocks and on conservative procurement of material in relation to sales requirements has limited obligations for peacetime stock to 85.6% of sales in 1960 and an estimate of approximately 89% in 1961 and 1962. The budget program provides for year-end inventories as follows (in millions of dollars):

During the 3 fiscal years, inventories are expected to decrease \$2,027 million. Of this reduction \$826 million results from estimated sale of peacetime stocks without replacement and \$1,450 million from disposal of surplus material, in keeping with the Army's continued emphasis on a critical review of its stock retention policy and the elimination of unneeded stocks from the system. It is estimated that approximately \$195 million of material will be donated to the military assistance program and \$115 million to education, public health, and civil defense activities as authorized by law. Changes in standard prices will reduce inventory book values by \$109 million, and other inventory reductions such as inventory losses and transfers will amount to \$58 million. Offsetting these reductions are estimated increases from net changes in capitalization of \$441 million, receipts of \$140 million from new mobilization reserve procurement, and an accounting adjustment reflecting a return to inventory of \$145 million of material reported in 1959 as donated to the military assistance program but which had not actually been transferred.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. A sales increase of \$182 million is forecast from 1960 to 1962, of which \$138 million is due to sales by the new single manager for general supplies.

Collections exceeded expenditures by \$314 million in 1960 and are expected to exceed expenditures by \$250 million in 1961 and \$210 million in 1962. An account receivable decrease of \$94 million in 1960, reflecting improvements in billing and collection procedures, contributed to the negative budget expenditure for that year. The reduced negative expenditures in 1961 and 1962 reflect delivery of mobilization reserve material and the progressively diminishing stocks which can be sold without replacement.

Transfers of \$281 million in 1960 and \$260 million in 1961 were effected to Military personnel, Army, and an additional \$125 million is proposed for transfer to that account in 1962.

Operating results and financial condition.—Net losses are estimated at \$638 million in 1961 and \$509 million in 1962, compared with \$537 million in 1960. These losses reflect principally the loss on disposal of surplus stocks, and donations. These losses will decline as the amount of surplus material in the supply system is reduced. Although generation of excess stocks is inevitable in supply operations, every effort is being made in current stock fund management to minimize the disposal losses which will occur and to provide for the recovery of such losses from operating appropriations in order to protect the integrity of the capital of the stock fund.

Government investment at June 30, 1962, is estimated at \$4,296 million, including \$11,376 million in capitalized assets less a \$4,270 million deficit and less \$2,810 million of net transfers.

This fund, initially established in 1893, finances the procurement and maintenance of inventories of common-use material and supplies for resale and for mobilization reserve (5 U.S.C. 172d). It includes items in all levels of shore-based inventories and in inventories of fleet issue ships and service force vessels afloat.

In 1960 inventories capitalized under the fund increased \$362 million, due principally to the capitalization of ordnance repair parts. The estimates reflect changes in the inventory capitalized under each major supply category of the fund as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Clothing and textiles.....	459	—470	—3,220
General material.....	5,447	5,710	2,100

Single manager medical and dental material.....	1,542	1,000	1,000
Single manager industrial supplies.....		22,520	
Other.....	43,431	—20,810	—14,830
Net change in capitalized inventories.....	361,664	57,500	15,080

Budget program.—The \$65 million increase in 1962 obligations over the 1960 level will finance inventory levels for the new industrial supplies single manager and ordnance repair parts which were capitalized into the fund in 1960. The 1962 program also provides for the procurement of \$10 million of mobilization reserve stocks. The budget program provides for year-end inventories as follows:

During 1960, total inventory increased by \$55 million, the net of \$371 million in increases and \$316 million in decreases. The decreases consisted of \$204 million in disposals of excess and surplus property, \$34 million in authorized donations, \$13 million in inventory losses, and \$65 million of material sold without being replaced. In 1960, \$362 million in inventory was capitalized, and standard price markups added \$9 million to book value of the inventory. During 1961 and 1962 a further decrease in inventory of \$342 million is forecast, the net of \$85 million in increases, and \$427 million in reductions. The reductions reflect an estimated \$306 million in losses on disposal of surplus inventory, \$67 million in sales of stocks without replacement, \$33 million in authorized donations, and \$21 million in losses and adjustments.

Financing the budget program.—Funds for financing the budget program are derived from sales of material to authorized customers. Sales in 1962 are estimated at \$34 million above the 1960 level. Cash receipts exceeded disbursements by \$54.7 million in 1960 and are expected to exceed disbursements by \$75 million in 1961 and \$35 million in 1962.

Operating results and financial condition.—The statements show substantial net losses of \$176 million in 1961 and \$134 million in 1962 compared with a loss of \$222 million in 1960. These losses result largely from disposal of excess and surplus inventories at an average of about 7% of standard price.

Net inventory losses, included in the net operating losses, are forecast at \$11 million for 1961 and \$10 million for 1962, compared with \$13 million in 1960. These losses represent the net from discrepancies in shipments, pilferage, losses in storage, differences disclosed by physical inventories, and accounting adjustments.

The Government investment at June 30, 1962, is estimated at \$1,922.8 million, consisting of net appropriations of \$336.6 million, net capitalized inventory of \$2,459.6 million, less \$873.5 million deficit.

This fund began operations on July 1, 1953 and finances the procurement and maintenance of inventory for resale and mobilization reserve (5 U.S.C. 172d). All inventories except individual clothing and commissary stores are in the United States.

The fund was extended in 1959 and 1960 to include additional items of ordnance and general material, including certain locally procured items. In 1961, additional communications items will be financed in the fund. In 1961 and 1962, some general material inventory is being transferred to the newly established single managers for general and industrial supplies in Army and Navy. Otherwise, changes in capitalized inventories result from returns from users without credit. Estimates contemplate changes in capitalized inventory under each category as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Ordnance-tank-automotive.....	3,245	500	200

Decrease (—) in undelivered purchases to be paid from other accounts.....	—275	—800	—100
Net change in capitalized inventories.....	9,660	—373	1,775

Budget program.—The increase for ordnance in 1961 results from initial parts requirements for new items. The increase in general material relates to supplying additional items through the fund. The other principal increase, in subsistence—commissary, reflects the increasing use of commissary sales stores by authorized personnel. The budget program is based on year-end inventories as follows (in millions of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Ordnance-tank-automotive:				
Operating stocks.....	114.5	121.1	81.4	45.1

Total inventories.....	393.0	393.2	354.7	315.4

The inventory decrease of \$77.6 million from the end of 1959 to the end of 1962 is the net of \$12.2 million in capitalized inventories, markup of inventory of \$5.6 million, \$5.8 million in inventory gains and adjustments, and \$101.2 million in decreases. These decreases include \$17.1 million in sale of stocks without replacement, \$74.5 million in losses on disposal, and \$9.6 million in donations of surplus stocks.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. Sales in 1962 are estimated to increase about \$9.5 million over 1960, largely in new items of ordnance, and in subsistence—commissary, reflecting greater use of commissary stores. Cash receipts are expected to exceed expenditures by \$5 million in both 1961 and 1962 primarily due to sale of stocks without replacement.

Operating results and financial condition.—Net losses of \$19.6 and \$34.7 million are forecast from 1961 and 1962 operations, respectively. These result largely from the disposal or donation of material in long supply at the time of capitalization. Cumulative operating results and financial condition through 1962 are estimated as follows (in millions of dollars):

This fund, established July 1, 1950, finances for 1962 the procurement of approximately 71,000 items for operating and mobilization reserve stocks (5 U.S.C. 172d). These items are stocked and sold at approximately 1,000 locations. A base level service test operation for certain general material items was concluded in 1960. In 1962, organizational clothing and medical-dental supplies and equipment will revert from stock fund to general appropriation financing. Transfers of some general material stocks to recently established single managers in Army and Navy are also reflected in 1961 and 1962. The decrease in capitalized inventory in 1960 relates primarily to adjustments of initially capitalized organizational clothing items which were subsequently disposed of as surplus. The decreases in 1961 and 1962 are due to the transfers of organizational clothing and medical-dental items. Changes in capitalized inventory by category are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Clothing.....	6,908	-16,346	-2,900
Medical-dental.....	-141	-28,858	-3,068
Aviation fuels.....	11	-----	-----
Subsistence—commissary.....	73	-----	-----
General material.....	-1,939	-12,252	1,912
Total inventories capitalized during year (net of decapitalizations).....	4,912	-57,456	-4,056
Charges (-) against capital for loss on disposal of inventory surplus at time of capitalization.....	-7,889	-----	-----
Net change in capitalized inventories.....	-2,977	-57,456	-4,056

Budget program.—Obligations increase by \$62 million in 1961, attributable to aviation fuels, resulting from the significant inventory drawdown in that area in 1960 and an increase in material on order. The decrease of \$68 million in 1962 reflects the reduced scope of operations resulting from decapitalizations and decreased aviation fuels requirements. The budget program provides for year-end inventories as follows (in millions of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Clothing:				
Operating stocks.....	28.2	25.2	10.9	10.6

Subsistence—commissary:				
Operating stocks.....	49.0	49.5	47.0	46.1
Mobilization reserve stocks.....	4.7	4.0	4.2	4.2
General material:				
Operating stocks.....	70.8	68.3	45.8	42.1
Excess or surplus stocks awaiting disposal.....	6.9	9.3	4.9	3.1
Summary:				
Operating stocks.....	240.4	233.6	195.1	193.8
Mobilization reserve stocks.....	177.7	136.5	109.8	106.7
Excess or surplus stocks awaiting disposal.....	18.5	20.0	5.2	3.3
Total inventories.....	436.6	390.1	310.1	303.8

Inventory decrease of \$80 million in 1961 is due to the decapitalizations mentioned above and to disposal and operating losses, offset by minor changes in operating stocks. The further decrease of \$6 million in 1962 rep-

resents basically a reduced mobilization reserve requirement in aviation fuels, and minor drawdowns in all other categories.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. Transfers to "Military personnel, Air Force," of \$50 million and \$30 million were effected in 1960 and 1961 and an additional \$25 million is proposed for 1962. Collections are expected to exceed payments in 1961 due to drawdowns in inventory and accounts receivable. It is estimated that expenditures and collections will be equal in 1962.

Operating results and financial condition.—The net gain in 1960 resulted primarily from variances between actual costs and standard prices in purchases of aviation fuels. The losses in 1961 and 1962 are due to the disposal of general material stocks at less than standard prices and reflect the continuing effort to dispose of excess property. The deficit of \$208 million at June 30, 1962, is attributable largely to downward revision of standard prices for items initially capitalized and losses sustained in the disposal of excess and surplus stocks. Cumulative operating results and financial condition through 1962 are estimated as follows (in millions of dollars):

This fund finances industrial and commercial-type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Army pictorial center.—This installation produces, procures, evaluates, and distributes motion pictures, film strips, recordings, transparencies, and television programs for use in military training, research, orientation, and education. The use of performance standards and operating expense budgets has stabilized operations at an economical level of performance which is expected to be continued with small volume variances in 1961 and 1962.

Depot manufacturing and maintenance divisions.—Activities under this program are organizational units of multiple mission installations. The maintenance divisions include three Quartermaster activities, three Engineer shops, an Ordnance shop, a Signal shop, and a railroad repair shop. These activities rebuild and restore equipment to combat readiness. The Ordnance shop was deactivated June 30, 1960, and an Engineer shop is scheduled for deactivation by January 1, 1961, resulting in program decreases in 1961 and 1962. The manufacturing division manufactures clothing and other textile items.

Ordnance arsenals.—These six installations are engaged in the research, development, engineering, pilot manufacturing, testing, and evaluation of small arms and artillery-type weapons. Programmed costs increase in 1961 and 1962 because of the 1961 salary increase for classified employees, use of higher priced materials in the fabrication of special weapons, and provisions for the purchase of components previously supplied by customers.

Ordnance missile command.—This activity finances research, development, production and logistical support operations of Headquarters, Army Ordnance Missile Command, the Army Ballistic Missile Agency, the Army Rocket and Guided Missile Agency, and Redstone Arsenal. The estimates for 1961 reflect transfer of a former part of the Army Ballistic Missile Agency to the National Aeronautics and Space Administration, pursuant to Executive Order No. 10870 dated March 19, 1960. The lower level of production forecast in 1961 and 1962 reflects the transfer of nonmilitary activities.

Ordnance proving ground and research.—This includes a laboratory specializing in work on fuzes and a proving ground engaged primarily in research, development, and testing of ordnance weapons, materials and equipment. Salary increases and an increase in employees to reduce the backlog in programmed workload, increase estimated production costs in 1961 and 1962.

Chemical arsenals.—These two arsenals are equipped for volume production and loading of hazardous chemical materials. Production in 1960 was limited to orders in support of research and development and maintenance of standby plant and equipment. The substantial cost increases forecast in 1961 and 1962 result from the use of higher cost components in the items being manufactured.

Chemical proving ground and research.—These three activities are engaged primarily in work on chemical and biological warfare agents, delivery systems, and protective items. Salary increases for classified employees, and the expanded manufacturing program increase estimated costs in 1961 and 1962.

Transportation terminal commands.—These three commands plan, regulate, and control the export and import movement of personnel and cargo through Army terminals on the Atlantic, Pacific, and Gulf coasts. In addition, this program includes cost of auxiliary port services and support of tenants and satellites. No increase in mission workload is anticipated in 1961 and 1962 but costs will increase primarily because of 1961 salary and wage increases. Estimated workload is (in thousands):

	1960 actual	1961 estimate	1962 estimate
Cargo in measurement tons.....	7,585	7,535	7,535
Passengers.....	458	464	464

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Inventories and items on order:				
Materials and supplies.....	24,749	33,964	30,119	30,888
Advances and other assets.....	1,302	356	333	332
Provision for subsequent maintenance, claims, etc. (—).....	—957	—1,376	—1,236	—1,309
Unpaid undelivered orders.....	80,381	108,222	97,252	96,006
Total selected resources at end of year.....	105,475	141,166	126,468	125,917
Selected resources at start of year (—).....	—	—105,475	—141,166	—126,468
Increase or decrease (—) in selected resources.....	—	35,691	—14,698	—551
Materials and supplies capitalized (—).....	—	—11,460	—	—
Material and supplies transferred to National Aeronautics and Space Administration (42 U.S.C. 2473).....	—	—	6,625	—
Liabilities assumed or canceled (—): Accrued leave.....	—	3,362	—2,574	—
Costs financed from obligations of other years, net (—).....	—	—	—10,647	—551
Obligations incurred for costs of other years, net.....	—	27,593	—	—

Obligations exceeded costs by \$27.6 million in 1960, primarily because of increases in contracts and orders outstanding for undelivered materials and supplies. This is attributable to prerequisitioning of materials required for the manufacture of special ordnance weapons in 1961, and the establishment of orders for the newly capitalized Army Ordnance Missile Command activities. Obligations are expected to be \$10.6 million less than costs in 1961 and to equal costs in 1962.

Financing the budget program.—This program is financed from customer orders. These orders constitute valid obligations of customers' appropriations and authorize activities financed through the fund to requisition materials and to commence production. Costs are charged initially to the working capital of the fund and are billed to customers as the jobs are completed or period-

ically as work progresses. Estimated orders in 1961 and 1962 are based upon program guidance from major customers plus estimates of work to be performed for other customers, determined on the basis of previous experience. New orders in 1961 are estimated at \$68 million less and in 1962 at \$46 million less than in 1960. The backlog of incomplete and unbilled orders is expected to be reduced from \$425 million at June 30, 1960, to \$351 million at June 30, 1962. This is consistent with the Army policy of restricting the financing of workload backlog to the minimum required for advance planning and stability of operations at an optimum level.

Operating results and financial condition.—The following table indicates 1960 net revenue and expense by activity (in thousands of dollars):

	Revenue	Expense	Gain or loss (—)
Army pictorial center.....	8,280	8,200	80
Depot manufacturing and maintenance divisions.....	31,802	31,802	—
Ordnance arsenals.....	265,803	269,245	—3,442
Ordnance missile command.....	151,922	152,582	—660
Ordnance proving ground and research.....	69,815	69,576	239
Chemical arsenals.....	13,317	13,207	110
Chemical proving grounds and research.....	61,532	61,844	—312
Transportation terminal commands.....	91,774	92,144	—370
Total.....	694,244	698,600	—4,356

The net loss in 1960 was realized primarily at a few installations which made inadequate provisions for charging customers for the full cost of work done and services furnished. On the basis of improved management no gain or loss is projected in 1961 or 1962, with the objective of avoiding either augmentation or overcharging of customer appropriations.

Expenditures exceeded collections by \$7.1 million in 1960. This represents fluctuations in inventory levels and other year-to-year changes in working capital balances. Expenditures are expected to equal collections in 1961 and 1962. Employee annual leave accruals, included in the statements as a current liability, were \$38.7 million as of June 30, 1960. The Government investment at the end of 1962 is estimated at \$223.5 million, composed of \$206.9 million in reappropriations and \$18.3 million in capitalized assets, less an accumulated operating loss of \$1.7 million. Of this total, \$123.5 million covers working capital requirements of the activities currently financed through the fund. The balance of \$100 million is available for contingent requirements.

This fund finances 62 industrial and commercial type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Printing.—This program covers 31 plants, including 6 overseas, which provide common printing services at the seat of Government and throughout the field establishment. Costs increase in 1961 and 1962 due to increased workload, increased wages, the addition of two plants during 1961, and the increase in local printing of departmental forms. Printing prices have been revised to agree with the improved and more definitive cost process structure effected in 1961.

Ordnance.—This program includes nine plants performing work relating to missile launchers, propellants, torpedoes, avionics equipment, guns and mounts, and other items of ordnance and ammunition. Costs are expected to increase in 1961 by \$8 million primarily because one

activity was financed under the fund for only a part of 1960. The 1962 decrease of \$30 million results from the phasing out of industrial operations at the Naval Weapons Plant, Washington, D.C. Costs for 1962 at other plants are expected to approximate those of 1961.

Shipyards.—The estimates include 11 shipyards and 1 ship repair facility engaged in the construction, conversion, overhaul, repair, and alteration of active and reserve fleet vessels. Consideration is being given to the feasibility of reducing the number of shipyards. Cost of goods and services produced is expected to increase by \$15 million in 1961 over 1960. The increases are primarily due to greater workload in the overhaul and repair programs, and wage and salary increases.

Military Sea Transportation Service.—This organization provides ocean transportation of dry cargo, passengers, and petroleum. Estimates reflect costs of operating Government-owned ships and procuring commercial transportation. Revenue is received from billings to customers on the basis of published tariff rates for point-to-point lift, on a per diem basis for use of ships, or on the basis of costs applied. Costs decline in 1961 due to a continuing decline in passenger operations and reduced operations of petroleum and per diem ships, offset by a slight increase in cargo lift. A further decline of costs is planned in 1962 due to a leveling-off of cargo operations and reduced passenger lift, offset by an increase in project ship operations.

The following is a summary of estimated workload and costs (dollars in thousands):

	1960 actual	1961 estimate	1962 estimate
Cargo ships:			
Measurement tons (cargo).....	10,581,079	10,962,304	10,797,718
Per diem ship-days.....	5,917	4,173	4,173
Cost.....	\$210,507	\$215,700	\$215,100
Passenger ships:			
Cabin passengers.....	146,858	130,387	117,713
Troop passengers.....	258,746	239,701	234,077
Total passengers.....	405,604	370,088	351,790
Per diem ship-days.....	80		
Cost.....	\$59,516	\$51,200	\$46,900
Petroleum ships:			
Long tons (petroleum).....	14,415,555	14,218,305	14,903,864
Per diem ship-days.....	1,870	1,041	1,041
Cost.....	\$80,501	\$79,200	\$78,700
Project ships and miscellaneous:			
Per diem ship-days.....	1,641	3,285	4,379
Cost (reimbursable).....	\$8,112	\$9,900	\$11,300
Total costs.....	\$358,636	\$356,000	\$352,000

Cargo operations indicate a leveling-off slightly above the 1960 level. Passenger lift continues to decline in accord with the Department of Defense policy to transport more passengers by air.

Marine Corps clothing and equipment.—This factory in Philadelphia serves as a pilot production plant to test design specifications and production methods. It also manufactures some clothing and textile items, particularly those of a short notice or small lot nature, and it establishes material usage allowances for clothing and equipment production. Workload during 1961 and 1962 is expected to be slightly above the 1960 level.

Research.—This includes the Naval Research Laboratory, the David Taylor Model Basin, and the Naval Ordnance Laboratory, Corona, Calif. Significant items contributing to the cost increase in 1961 are the classified pay raise, additional facilities being placed in operation, and an overall increased effort in research programs. The

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

NAVY INDUSTRIAL FUND—Continued

net decrease in costs of \$6 million in 1962 in comparison to 1961 results primarily from estimated decreases in contractual services at the Naval Research Laboratory and decreases in materials used at the David Taylor Model Basin and Naval Research Laboratory.

Base services.—This includes three public works centers providing utility, maintenance, custodial, and transportation services, and one transportation center providing transportation and vehicle repair for adjacent commands. Costs increase in 1961 and 1962 by \$5 million and \$8 million over 1960, respectively, due to increased workload resulting from the consolidation of all public works type functions at naval complexes with public works centers in the area. Savings and improved operations through better utilization of both equipment and manpower will result.

Aircraft maintenance.—This activity at the Quonset Point Naval Air Station is financed in the industrial fund on a test basis. It reworks aircraft, missiles, and accessories, and manufactures aircraft parts and assemblies. An evaluation currently underway will determine the desirability of continuing industrial fund financing of this activity.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Inventories and items on order:				
Materials and supplies.....	102,193	93,569	91,569	90,569
Advances and deferred charges..	6,435	6,216	3,216	2,916
Provision for subsequent maintenance, claims, etc. (—).....	-17,580	-15,466	-14,566	-14,766
Unpaid undelivered orders.....	288,726	284,756	254,946	186,604
Total selected resources at end of year.....	379,774	369,075	335,165	265,323
Selected resources at start of year (—).....	-379,774	-369,075	-335,165	-335,165
Decrease (—) in selected resources.....	-10,699	-33,910	-69,842	-69,842
Materials and supplies capitalized (—).....	-435	-37	-	-
Liabilities assumed: Accrued leave.....	733	543	-	-
Costs financed from obligations of other years, net (—).....	-10,401	-33,404	-69,842	-69,842

Costs exceeded obligations by \$10.4 million in 1960 and are expected to exceed obligations by \$33.4 million in 1961 and by \$69.8 million in 1962. This reflects the continued decrease in unpaid, undelivered orders which are primarily long-term Military Sea Transportation Service contracts with commercial shippers.

Financing the budget program.—This program is financed by orders received from customer appropriations which authorize industrial fund installations to incur costs in performing the work or services required. Orders are expected to decrease by \$90.7 million in 1961 and \$58.3 million in 1962 as compared to the \$1,582.3 million received in 1960. Major reductions occur in the ordnance, shipyard, and research programs. The decrease in ordnance results primarily from the phasing out of industrial operations at the Naval Weapons Plant. Shipyard decreases in 1961 relate primarily to reduced orders for shipbuilding work, offset by increases in orders for overhaul and repair work; increased orders in 1962 relate primarily

to Polaris shipbuilding. The decrease in research reflects estimated reductions in new orders to be received by the Naval Research Laboratory from the Goddard Space Flight Center.

Operating results and financial condition.—The following table presents 1960 revenue and expense by activity (in thousands of dollars):

	Revenue	Expense	Gain or loss (—)
Printing.....	12,777	12,790	-13
Ordnance.....	169,582	168,773	809
Shipyards.....	913,286	913,752	-466
Military Sea Transportation Service.....	355,783	359,386	-3,603
Marine Corps clothing and equipment..	5,380	5,329	51
Research.....	79,570	79,528	42
Base services.....	33,706	33,512	194
Aircraft maintenance.....	19,483	19,622	-139
Total.....	1,589,567	1,592,692	-3,125

Retained earnings increased \$0.9 million in 1960, the net of \$3.1 million operating loss for the year plus \$4.0 million in adjustments of prior-year revenues and expenses. Revenue is expected to fall slightly below the 1960 level in both 1961 and 1962, as installation working capital balances achieve proper levels. Measures are being taken to assure break-even operations at the installations where gains or losses in significant amounts were recorded in 1960. As a result of adjustments in working capital balances, expenditures will exceed collections by \$10 million in 1961 but will be \$15 million less than collections in 1962. In 1960 collections were \$14.5 million greater than expenditures, reflecting primarily a decrease in amounts receivable from customers. Employee annual leave accruals, included in the statements as a current liability, were \$70.3 million as of June 30, 1960. Total Government investment at June 30, 1962, is expected to be \$290.1 million, the net of \$303.1 million in reappropriations and \$22.6 million in retained earnings, less \$35.6 million representing the excess of liabilities assumed over assets capitalized. Of this total \$260.4 million covers working capital requirements of the activities currently financed through the fund. The balance of \$29.7 million is available for contingent requirements.

Financing applied to program	298,315	336,422	342,295

This fund finances industrial and commercial type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Printing and duplicating service.—This program covers nine printing and duplicating plants. Production in 1960 was approximately 2.2 billion printing units and is estimated to increase to 2.3 billion in 1961 and 1962. The increased production is due to a further consolidation of duplicating workload into the printing plants and increased productivity per press unit due to upgrading of equipment.

Laundry and dry cleaning service.—At June 30, 1960, there were 48 plants operating under this fund. Two plants will be deactivated and one transferred to Department of the Army during 1961 leaving 45 plants operating on June 30, 1962. Total production in 1962 is estimated at approximately 103.2 million pieces of laundry and dry cleaning as compared with 103.3 million for 1961 and 107.1 million for 1960.

Military Air Transport Service.—The airlift service portion of the Military Air Transport Service was covered under this fund on July 1, 1958. The size of MATS and the extent and nature of its operations are keyed to approved military wartime airlift requirements. These requirements include (1) the hard-core requirements which, because of their nature or timing, must move in military operated aircraft and (2) civil eligible requirements for which military airlift is used only to the extent that civil airlift capability is not available.

The airlift capability produced by exercising the airlift system is used in the interests of economy in meeting peacetime airlift needs of the Department of Defense. Military aircraft are utilized to provide for air evacuation of patients; special air missions; training of airborne troops; and augmented by commercial aircraft, for common-user airlift of passengers, cargo, and mail. Airlift service workload and operating data are as follows:

	1960 actual	1961 estimate	1962 estimate
Operating aircraft, average number:			
Common-user	431	406	393
Other	92	82	81
Total	523	488	474

[In millions of ton-miles]

The unpaid undelivered orders in the estimates for 1961 and 1962 reflect continuation of fixed annual contracts for commercial airlift which are effective until September 30 of each year.

Financing the budget program.—This program is financed by customer orders for services. These orders constitute valid obligations of the ordering appropriations and authorize activities financed through the fund to provide services requested. Costs are charged initially to the working capital of the fund and are billed to customers on the basis of established tariff rates for services provided.

Operating results and financial condition.—For 1960 revenues exceeded expenses by \$12 million, mainly as a result of the operation of the airlift service. The \$11.8 million by which revenues of the airlift service in 1960 exceeded expenses has been returned to the Treasury. This amount represented a part of the \$20.9 million difference between the \$64.1 million commercial airlift purchased in 1960 and the \$85 million which, under section 631 of the 1960 appropriation act (73 Stat. 383), was available only for procurement of commercial air transportation service. The balance of \$9.1 million has been returned to the Treasury from the unobligated balances remaining in various user appropriations.

Collections exceeded expenditures by \$10.4 million in 1960, primarily due to the excess of revenues over expenses of the airlift service. It is estimated that collections will exceed expenditures by \$14.2 million in 1961 primarily as a result of reducing the accounts receivable. Collections and expenditures are expected to be equal in 1962.

Employee annual leave accruals, included in the statements as a current liability, were \$2 million at June 30, 1960. Government investment is estimated at \$82 million at June 30, 1962, consisting of \$81 million in reappropriation

tions and transfers and \$1.8 million in retained earnings less \$0.8 million representing the excess of liabilities assumed over assets capitalized. Of this total \$65 million covers working capital requirements of the activities currently financed through the fund. The balance of \$17 million is available for contingent requirements.

This fund was created to simplify operations which are financed by two or more appropriations (5 U.S.C. 172e). The corpus of the fund consists of \$1 million. Activities presently financed through the fund are as follows:

1. *Defense telephone service, Washington, D.C.*, finances the operations of the telephone service of the Department of Defense in Washington.

2. *Transportation services* provide for the payment centrally of transportation charges for Government bills of lading, transportation requests, meal tickets, and other charges incident to transportation costs by all agencies in the Army.

3. *Construction activity, Europe*, finances certain administrative and overhead expense of the Department of Defense construction programs in Western Europe.

4. *Interchange fleet* maintenance costs, including repairs and overhauls, are financed by non-Federal revenue from railway carriers in the form of mileage payments for the use of Government-owned cars of the fleet, and from commercial contractors for car rentals.

This fund was created to facilitate the financing of operations supported by two or more appropriations (5 U.S.C. 172e). The principal activity financed through the fund is the Polaris ballistic missile program. Reimbursable orders for the Polaris program are issued to the fund from Navy appropriations for procurement, operation and maintenance, and research, development, test, and evaluation. Other operations financed are construction of the Army, Navy, and Air Force bases and stations in Spain; the material inspection service; incentive award payments; departmental telephone and maintenance services; transportation of the supplies, materials and equipment of the Navy; the Electronics Production Resources Agency which coordinates the production and allocation of electronics equipment for the Department of Defense; and certain interdepartmental activities involving the Navy and either or both of the other military departments.

This fund was created to facilitate the financing of activity supported by two or more appropriations (5 U.S.C. 172e). The corpus of the fund is \$1 million.

The Armed Forces Supply Support Center administers the defense standardization program, the interservice supply support program, the defense materiel utilization and excess screening program and centralized operations for the Federal Catalog System. The Center also conducts management analyses in promoting more effective administration of common supply functions among the military services. This project is financed jointly through advances from the three military departments with certain cataloging services performed by the General Services Administration on a reimbursable basis.

This fund was originally established to account for advances received by the Navy for the cost of work or services to be furnished other Government agencies, foreign governments, and private parties (31 U.S.C. 643). Beginning in 1961 the cost of work or services furnished by the Navy to other Government agencies will be accounted for under the Operation and maintenance, Navy, appropriation. The private individuals and organizations involved advance amounts to cover the estimated costs to this fund, which amounts are then used to reimburse the Operation and maintenance, Navy, appropriation for the costs involved. These activities relate primarily to: (a) utilities, repairs, and maintenance furnished to morale, welfare, and recreation activities; (b) utilities furnished to tenants of Navy housing projects; and (c) utilities, sale of material, equipment rental, and other services for contractors and other private parties, primarily in overseas locations. Advances received from foreign governments are primarily for sales of material and miscellaneous services.

More than 40 free-world countries are receiving grant aid under this program, and others are eligible to buy military equipment on cash or credit terms. Their combined military forces are numerically much greater than the U.S. Armed Forces, and provide free world striking power, depth in reserves, and flexibility. Many of these countries have joined in regional defense pacts, such as NATO, SEATO, and CENTO, or in bilateral defense arrangements with the United States. Most of the U.S. contributions to these regional organizations are derived from military assistance program funds.

Most of the military equipment and supplies which the United States provides to its foreign allies are obtained by placing orders with the U.S. military services. Military assistance funds are reserved when the orders are placed, and the military services are paid when the items are delivered. When the materiel ordered is not on hand, the military services take procurement action in anticipation of reimbursement.

The kind of materiel supplied by the United States varies with our mutual security objective in each area and the internal capabilities of the individual countries. In Europe, the emphasis is on newer weapons which are not yet fully within the production or financial capability of our NATO allies. In less-developed areas, modernization of conventional equipment is emphasized. Whenever possible, materiel already on hand but excess to the needs of U.S. forces is supplied, at no charge to the military assistance program except for the cost of rehabilitation and transportation.

Grant aid operations: Reservations for requirements ordered from U.S. military services—

1. *Aircraft.*—In 1961 and 1962, aircraft will be funded partly through reservations and partly by direct obligations as shown above. Emphasis is to be placed on more advanced aircraft in NATO and selected Far Eastern countries. At the same time, the air forces of many less developed countries are replacing obsolete planes with later model aircraft, now becoming excess to the United States and NATO. Spare parts support as well as modifications of existing aircraft form a large part of the 1962 program.

2. *Ships.*—New construction of patrol, mine-sweeping and other type vessels are included in 1962. The 1962 program also reflects increased emphasis on cost-sharing arrangements under which the United States contributes 50% of the cost of constructing certain new ships, primarily in NATO countries. Reactivation and rehabilitation of ships from the U.S. "mothball" fleet continues to meet other naval requirements of our allies under authority of ship loan legislation, i.e., Public Law 86-482 (70A Stat. 452), Public Law 86-57 (70A Stat. 452), and Public Law 85-532 (70A Stat. 452).

3. *Tanks, other vehicles, and weapons.*—Included is combat and support equipment ranging from artillery, tanks, and other heavy vehicles to small arms and jeeps. Many of these items are supplied from existing U.S. stocks, and through a program of rebuilding vehicles which Far Eastern countries have returned to the military assistance program. The 1962 program includes continuing replacement of wornout or obsolete equipment in the forces of less-developed countries.

4. *Ammunition.*—Most of the ammunition to be supplied as grant aid in 1962 will be used for training allied troops.

5. *Missiles.*—Programing for modernization of forces with ballistic and other guided missiles, primarily in NATO, reaches a peak in 1961, but continues at a decreased level in 1962. In addition, the 1962 program

The military assistance program is designed to strengthen the mutual security of the free world by contributing to the development, maintenance, and training of modern military forces, to deter or resist external aggression, combat internal subversion, and protect valuable overseas military bases. Appropriations for 1962 were authorized in the Mutual Security Act of 1959.

MILITARY ASSISTANCE—Continued**Current authorizations—Continued****MILITARY ASSISTANCE—Continued**

provides for maintenance of equipment previously furnished.

6. *Electronic equipment.*—The 1962 program continues the modernization of military communications systems in less-developed countries and also provides ground control equipment in conjunction with guided missiles and modern aircraft, primarily in Europe.

7. *Military public works.*—Materiel and equipment supplied by the United States for military assistance construction are procured through the military service supply systems. Other U.S. costs for this construction are met initially by the military assistance program and are cited in paragraph 14 below.

8. *Other.*—A variety of special purpose equipment, petroleum, medical, and other supplies, and repair and rehabilitation of used equipment not covered above are provided through orders placed with the U.S. services.

Because of the timelag inherent in a complex, worldwide supply operation, a large proportion of the items delivered by the U.S. services in any year result from orders placed in previous years.

The following table reflects the unfilled orders placed with the military services in prior years, the new items ordered and the deliveries made (detail table appears on pp. 570–571).

[In millions of dollars]

	1960 actual	1961 estimate	1962 estimate
Unfilled orders at beginning of year...	1,735	1,495	1,440
New items ordered.....	845	992	1,000
Deliveries.....	1,085	1,047	1,054
Unfilled orders at end of year.....	1,495	1,440	1,386

Obligations for requirements other than through reservations—

9. *Offshore procurement.*—The reduction in the procurement of equipment and supplies abroad for the military assistance program reflects declining U.S. purchases in other industrial countries. U.S. overseas procurement in prior years helped these countries establish a defense production base, which they are now capable of maintaining as a source of supply for their own forces.

10. *Supply operations.*—The annual cost of packing, handling, storing, and transporting military assistance materiel varies in proportion to the types, volume, and destination of goods delivered.

11. *Training.*—Increased training programs in free-world countries are required to insure effective use of the new weapons and equipment supplied through the military assistance program.

12. *Administration.*—The administrative expenses of U.S. military assistance advisory groups overseas and the departmental costs of the program are included.

13. *Contributions to international military headquarters and agencies.*—Included are the assessments levied against the United States in accordance with cost-sharing agreements for administrative support of the North Atlantic Treaty Organization, Southeast Asia Treaty Organization, and the Central Treaty Organization.

14. *Contributions to construction of facilities in other countries.*—Included are (a) construction of military and logistical facilities under the jointly financed NATO infrastructure program, and (b) contract expenses, architect-engineering services and other overhead items for military assistance construction.

15. *Research and development.*—This program assists in the research and development of weapons by our allies and aids in combining their scientific capability with U.S. weapons technology.

16. *Other activities.*—These include U.S. support for rapidly expanding programs of coordinated weapons production in Europe and integrated NATO procurement of spare parts.

Sales operations—

Military materiel is purchased in the United States by many countries, including some which do not receive grant aid. Most sales on a credit basis are initially financed by military assistance appropriations. Depending on the circumstances, repayment of credit sales may be in dollars or in local currency.

The following table shows the repayments and their reuse for new credit sales (in millions of dollars):

	1960 actual	1961 estimate	1962 estimate
Unused collections, beginning of year....	21.4	27.3	15.0
Collection of credit sales.....	26.0	30.0	20.0
Collections reused.....	20.1	42.3	20.0
Unused collections, end of year.....	27.3	15.0	15.0

Local currency repayments may be used to finance additional sales or grants of military assistance. It is anticipated that any local currency repayments used will be converted into dollars to finance additional credit sales. Dollar conversions so made are included in the above table.

GENERAL PROVISIONS

SEC. 501. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 502. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 503. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of Government of the United States of America or elsewhere, in connection with communication and other services and supplies as may be necessary to carry out the purposes of this Act: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive, compensation at a rate below the minimum rate of pay for positions allocated to grade GS-5 under the Classification Act of 1949, as amended.

SEC. 504. Any appropriation available to the Army, Navy, or the Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 505. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land as authorized by section 2672 of title 10, United States Code.

SEC. 506. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding an average of **[\$275]** \$285 per student, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) **[for payment of rentals at the seat of Government or elsewhere,]** and, in administering the provisions of 43 U.S.C. 315q, rentals may be paid in advance.

SEC. 507. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed \$25 to each prisoner upon each release from confinement in military or contract prison (except disciplinary barracks) and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners (except those in disciplinary barracks); (c) subsistence of selective service registrants called for induction, applicants for enlistment while held under observation, prisoners (except those in disciplinary barracks), and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; and (e) expenses of prisoners confined in nonmilitary facilities: *Provided*, That section 212 of the Act of June 30, 1932 (5 U.S.C. 59a), shall not apply to retired military personnel on duty at the United States Soldiers' Home.

SEC. 508. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 509. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than \$2.25 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deductions from the pay of civilian employees.

SEC. 510. No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.

SEC. 511. Appropriations of the Department of Defense available for operation and maintenance, may be reimbursed during the current fiscal year for all expenses involved in the preparation for disposal and for the disposal of military supplies, equipment, and materiel, and for all expenses of production of lumber or timber products pursuant to section 2665 of title 10, United States Code, from amounts received as proceeds from the sale of any such property: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to the Committees on Appropriations of the Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. 512. (a) During the current fiscal year, the President may exempt appropriations, fund, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of R.S. 3732 (41 U.S.C. 11).

SEC. 513. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. 514. Notwithstanding any other provision of law, Executive order, or regulation, no part of the appropriations in this Act shall

be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided*, That without regard to any provision of law or Executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 204(b) of the Career Compensation Act of 1949 (63 Stat. 802) as amended, to certain members of the Armed Forces otherwise entitled to receive flight pay during the current fiscal year (1) who have held aeronautical ratings or designations for not less than twenty years, or (2) whose particular assignment outside the United States or in Alaska makes it impractical to participate in regular aerial flights.

SEC. 515. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of eleven thousand pounds net in any one shipment: *Provided*, That the limitations imposed herein shall not be applicable in the case of members transferred to or serving in stations outside the continental United States or in Alaska under orders relieving them from a duty station within the United States prior to July 10, 1952, and who are returned to the United States under orders relieving them from a duty station beyond the United States or in Alaska on or after July 1, 1953.

SEC. 516. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. 517. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That this limitation shall not apply to the off-duty training of military personnel as prescribed by section 521 of this Act.

SEC. 518. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps.

SEC. 519. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

[In addition to the foregoing] *Except as provided in this section, after June 30, 1961*, agencies of the Department of Defense may not accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and [such agencies may] use the same for the support of the United States forces in such areas, without [specific] appropriation therefor: *Provided*, That within thirty days after the end of each quarter the Secretary of Defense shall render to the Committees on Appropriations of the Senate and the House of Representatives and to the Bureau of the Budget a full report of such property, supplies, and commodities received during such quarter].

SEC. 520. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

SEC. 521. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

SEC. 522. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. 523. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, cloth-

ing, cotton, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: *Provided, however*, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a competitive basis to the lowest responsible bidder].

SEC. 524. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 525. During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. 526. Appropriations of the Department of Defense available for the payment of rental allowances shall be available for the leasing of quarters in foreign countries constructed under the authority of section 302 of Public Law 534, approved July 14, 1952, for assignment as public quarters to military personnel of the Department of Defense.

SEC. 527. Appropriations contained in this Act shall be available for the purchase of household furnishings and automobiles from military and civilian personnel on duty outside the continental United States, for the purpose of resale at cost to incoming personnel, and for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. 528. During the current fiscal year appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 529. During the current fiscal year, the Secretary of Defense shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition from stock or which has been procured for the purpose in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national, or international rifle matches.

[SEC. 530. Funds provided in this Act for congressional liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed \$950,000: *Provided*, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.]

[SEC. 531. Of the funds made available by this Act for the services of the Military Air Transport Service, \$80,000,000 shall be available only for procurement of commercial air transportation service from carriers participating in the Civil Reserve Air Fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: *Provided*, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to be used based upon modern aircraft operated by the civil airfleet.]

GENERAL PROVISIONS—Continued

【SEC. 532. Not to exceed \$9,000,000 of the funds made available in this Act for the purpose shall be available for the hire of motor vehicles.】

【SEC. 533. Not to exceed \$677,854,000 of the funds made available in this Act shall be available for travel expenses in connection with temporary duty and permanent change of station of civilian and military personnel of the Department of Defense.】

【SEC. 534. Effective January 1, 1961, no part of any appropriation contained in this Act shall be used to provide flight pay at the rates prescribed in section 204(b) of the Career Compensation Act of 1949 (63 Stat. 802), as amended, for more than 99,046 officers (other than Reserve officers on active duty for training and officers receiving flight pay pursuant to section 514 of this Act and flying student officers).】

SEC. 530. *During the current fiscal year, appropriations available to the Department of Defense for Operation and Maintenance may be used for civilian clothing, not to exceed \$40 in cost for enlisted personnel: (1) discharged for misconduct, unfitness, unsuitability, or otherwise than honorably; (2) sentenced by a civil court to confinement in a civil prison or interned or discharged as an alien enemy; (3) discharged prior to completion of recruit training under honorable conditions for dependency, hardship, minority, disability or for the convenience of the Government.*

SEC. 531. *No appropriation available for payment of the expenses of State civilian personnel of the Army National Guard and the Air National Guard, shall be available for employers' contributions to retirement systems at a rate in excess of six and one-half percent of the compensation on which such contribution is based.*

SEC. 【535】 532. *During the current fiscal year, the Secretary of Defense, should he deem it advantageous to the national defense to accelerate any strategic or tactical missile or satellite program, may transfer under the authority and terms of the Emergency Fund, an additional \$150,000,000 for the acceleration of such missile or satellite program or programs: Provided, That the transfer authority made available under the terms of the Emergency Fund appropriation contained in this Act is hereby broadened to meet the requirements of this section: Provided further, That the Secretary of Defense shall notify the Appropriations Committees of the Congress promptly of all transfers made pursuant to this authority. (Department of Defense Appropriation Act, 1961.)*

GENERAL PROVISIONS—MILITARY CONSTRUCTION

SEC. 101. Funds appropriated to the military departments for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the 【second】 first session of the Eighty-【sixth】 seventh Congress.

SEC. 102. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work where cost estimates exceed \$25,000 to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 103. None of the funds appropriated in this Act shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction and the application of economical construction practices.

SEC. 104. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be fur-

nished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 105. Funds appropriated to the military departments for construction are hereby made available for: (1) hire of passenger motor vehicles, and (2) the construction, or acquisition by lease or otherwise, of family housing and community facilities projects in foreign countries as authorized by section 407(b) of the Act of September 1, 1954 (68 Stat. 1119), as amended.

SEC. 106. Appropriations to the military departments for construction may be charged for the cost of administration, supervision and inspection of family housing authorized pursuant to title IV of the Act of August 11, 1955 (Public Law 345), as amended, in an amount not to exceed 3½ per centum of the cost of each such project: *Provided*, That such appropriations shall be reimbursed from the proceeds of any mortgage executed on each such project.

SEC. 107. Funds appropriated to the military departments for construction may be used for advances to the Bureau of Public Roads, Department of Commerce, for the purposes of section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 108. None of the funds appropriated in this Act may be used to begin construction on new bases for which specific appropriations have not been made.

SEC. 109. During the current fiscal year, appropriations available for construction of family quarters for personnel shall not be obligated for such construction at a cost per family unit in excess of \$22,000 on housing units for generals or equivalent; \$19,800 on housing units for colonels or equivalent; \$17,600 on housing units for majors and lieutenant colonels, or equivalent; \$15,400 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or \$13,200 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed \$32,000 and in no event shall the individual cost exceed \$40,000, and except that the Secretary of the Army may provide 156 units of family housing for company grade officers at the United States Military Academy at a unit cost of not more than \$20,300 per family unit.】

SEC. 110. No part of the funds contained in this Act shall be used to incur obligations for the planning, design, or construction of facilities for an Air Force Academy the total cost of which will be in excess of 【\$139,797,000】 \$141,797,000, *except for construction pursuant to section 2674 of title 10, United States Code, as amended.*

SEC. 111. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Bureau of Yards and Docks, except: (a) where there is a determination of value by a Federal court, (b) purchases negotiated by the Attorney General or his designee, and (c) where the estimated value is less than \$25,000.

SEC. 112. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor. (*Military Construction Appropriation Act, 1961.*)

GENERAL PROVISIONS—MILITARY ASSISTANCE

SEC. —. *Funds appropriated in this Act for military assistance shall not be subject to other general provisions of this Act, except that, when pursuant to section 522 of the Mutual Security Act of 1954, as amended, authority granted in such other general provisions is utilized with respect to such funds, they may be utilized only in accordance with the terms and conditions applicable to such authority.*

DEPARTMENT OF THE ARMY

CEMETERIAL EXPENSES

Current authorizations:

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of [one] four passenger motor [vehicle] vehicles, of which three shall be for replacement only; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries; [\$9,400,000] \$10,440,000: *Provided*, That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further*, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of \$17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services [exclusively] primarily for the purposes of this appropriation. (24 U.S.C. 271, 273-276, 278-279, 279a-b, 282, 288, 290; Public Works Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Operation and maintenance.....	4,540	5,100	5,385
2. Construction.....	829	400	1,125
3. Headstone procurement.....	2,886	3,118	3,190
4. Administration.....	633	722	740
Total obligations.....	8,888	9,340	10,440
Financing:			
Advances and reimbursements from non-Federal sources.....	-7		
Unobligated balance lapsing.....	84	60	
New obligational authority (appropriation)	8,964	9,400	10,440

Note.—Reimbursements from non-Federal sources are derived from payments by commercial carriers for headstones damaged in shipment (31 U.S.C. 489a).

This appropriation finances operation and maintenance of the national cemetery system, and provides free headstones and markers for the graves of eligible persons. The workload consists of three main factors: gravesites maintained, interments, and headstone applications. Each of these has increased steadily over the last decade as the death rate of the veteran population has increased. This workload will continue to increase each year.

1. *Operation and maintenance.*—The national cemetery system consists of 85 national cemeteries and 33 smaller burial plots and monument sites. Major workload factors are:

	1960 actual	1961 estimate	1962 estimate
Interments.....	32,608	34,800	37,250
Gravesites maintained.....	931,084	985,717	1,042,273

2. *Construction.*—Funds are included for four gravesite development projects, two landscaping projects, one building project, and future planning and engineering investigations. In addition, provision is made for preliminary planning for the expansion of Arlington National Cemetery into the present South Post of Ft. Myer.

3. *Headstone procurement.*—Headstones are provided for graves in national cemeteries and for graves of military personnel and veterans buried in private cemeteries. The

1962 program is based on an increase of 3½% in new applications, 1,500 replacements, and 1,000 memorial markers for persons whose remains are not recoverable.

HEADSTONE PROCUREMENT REQUIREMENTS

	1960 actual	1961 estimate	1962 estimate
Applications from previous year.....	15,172	14,971	13,500
Applications received.....	123,208	128,529	133,000
Less applications carried forward.....	14,971	13,500	13,500
Total procurement.....	123,409	130,000	133,000

4. *Administration.*—This item provides for processing applications for headstones and markers, determination of eligibility for interment, and management of the national cemetery system.

[RIVERS AND HARBORS AND FLOOD CONTROL] CORPS OF ENGINEERS—CIVIL

The Corps of Engineers—Civil improves and maintains rivers and harbors throughout the United States, Puerto Rico, and the Virgin Islands in the interest of navigation, control of floods, related hydroelectric power development, and allied water uses.

The total appropriation requested amounts to \$931.7 million, representing an increase of \$800 thousand compared with the amount appropriated for 1961 and an increase of \$59 million compared with the appropriation for 1960. Funds in the amount of \$15.1 million are requested for new construction starts. Approximately 81% of the requested appropriations will be applied to construction and 16% to operation and maintenance activities.

Current authorizations:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the

DEPARTMENT OF THE ARMY—Continued

CORPS OF ENGINEERS—CIVIL—Continued

Current authorizations—Continued

Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, surveys and studies (including cooperative beach erosion studies as authorized in Public Law 520, approved July 3, 1930, as amended and supplemented), of projects prior to authorization for construction, [\$12,023,000] \$11,900,000, to remain available until expended: Provided, That [\$50,000] \$55,000 of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army. (33 U.S.C. 426-426c, 540, 541, 701; Public Works Appropriation Act, 1961.)

Unobligated balance carried forward.....	1,434	987	
New obligational authority (appropriation)	10,481	12,023	11,900

1. *Surveys and studies.*—Surveys are made to determine the need and economic justification of proposed naviga-

tion and flood control improvements. These surveys are made in cooperation with appropriate Federal and State agencies and will be restricted to a limited number of high-priority investigations.

In addition, cooperative beach erosion control studies are conducted at specific localities. These cooperative studies are paid for equally by the Federal Government and by State and local agencies.

Special studies are made in cooperation with State and other Federal agencies in the interest of navigation, flood control, power, and related purposes.

NUMBER OF STUDIES

Status	1960 actual	1961 estimate	1962 estimate
Prior year studies continuing.....	145	125	97
Prior year studies completed.....	67	99	120
Initiated or resumed and completed during the year.....	25	36	8
Initiated or resumed but not completed.....	79	92	19

Completed studies are those acted upon by the Board of Engineers for Rivers and Harbors or the Beach Erosion Board.

2. *Collection and study of basic data.*—Funds will be made available in the amounts of \$370 thousand to the Weather Bureau for hydrometeorological studies and precipitation stations, \$248 thousand to the Geological Survey for installation, operation, and maintenance of stream gaging stations, and \$55 thousand to the Fish and Wildlife Service for preauthorization studies of the effect of proposed navigation and flood control projects upon fish and wildlife. Also, members of the Corps of Engineers will participate in a number of engineering and control boards to study and control international streams and watersheds which mutually affect the United States and bordering nations. In addition, the Corps of Engineers will compile and disseminate, to States and responsible local governmental agencies upon their request, information on floods and potential flood damages, and general criteria for guidance in the use of flood plain areas.

3. *Research and development.*—General beach erosion development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures, related to shore protection and improvement. The results of these studies are disseminated to other interested Federal, State, and local agencies and individuals.

Hydrologic studies include investigations of such phenomena as storms, rainfall, streamflow, and sedimentation to provide basic data used in the design, construction, and operation of water control structures.

Civil works investigations assist in the solution of engineering problems. The solutions are widely applicable to the design, construction, and operation and maintenance of civil works projects. This item also provides for the operation of the research center at the Waterways Experiment Station, Vicksburg, Miss.

Construction of the Mississippi basin model at the Waterways Experiment Station will be continued. In addition, funds are requested to continue the Mississippi River comprehensive study on the completed portion of the Mississippi basin model. The primary objectives of this basinwide testing program are to improve the operation of the reservoir system in the Mississippi River Basin, to assure optimum operation of the reservoir system, and to study potential flood levels on the lower Mississippi River.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year: Inventories and items on order:

Total obligations	672,945	742,374	712,503
Financing:			
Comparative transfers to other accounts	1,079	2,029	
Unobligated balance brought forward	-62,402	-49,842	-11,931
Recovery of prior year obligations	-108		
Unobligated balance carried forward	49,842	11,931	
New obligational authority (appropriation)	661,356	706,492	700,572

The requested appropriation of \$700.6 million represents a decrease of \$5.9 million compared with the amount appropriated for 1961, and an increase of \$39.2 million compared with 1960. About 74% of the requested appropriation will be applied to 42 major projects in amounts of \$5 million or more each.

The monetary authorization available for appropriation after 1962 for projects in this program amounts to \$4,299.7 million. The status of the overall construction program, excluding projects classified as inactive or deferred for restudy but including projects completed in prior years, is summarized in the following table:

NUMBER AND ESTIMATED COST OF AUTHORIZED PROJECTS¹

Activity:	Number of authorized projects				Estimated cost in millions				
	Total	Completed ²	Underway ³	Balance authorized ⁴	Total	To June 30, 1960	1961	1962	Balance to complete
Navigation ⁵	2,438	2,121	188	129	\$5,480.2	\$2,582.0	\$211.3	\$197.3	\$2,489.6
Alteration of bridges	19	10	8	1	36.6	30.7	2.3	0.6	3.0
Beach erosion control	88	21	16	51	58.3	6.5	1.2	0.4	50.2
Flood control ⁶	830	401	189	240	5,873.6	2,425.0	228.5	282.5	2,937.6
Multiple-purpose projects, including power	62	22	28	12	5,746.6	3,163.9	254.9	252.8	2,075.0
Total	3,437	2,575	429	433	17,195.3	8,208.1	698.2	773.6	7,555.4

¹ Excludes projects classified as inactive or deferred for restudy.
² Also includes projects essentially complete.
³ Uncompleted projects in the active program for which construction funds have been appropriated. Includes projects or project modifications that do not have funds presently available for expenditure.

⁴ Includes projects not yet funded and parts of approved comprehensive basin plans for which funds are not yet available.
⁵ Includes authorized modifications of original projects.
⁶ Excludes snagging and clearing and emergency flood control projects.
⁷ Program total: Actual appropriation request is \$683.6 million.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high priority projects to the stage where they will be ready for construction, and will permit continuation or initiation of planning on other needed projects. The program of restudying deferred projects will be continued.

2. *Navigation projects.*—This activity includes improvement of channels and harbors by dredging and by construction of breakwaters, jetties, and dikes and construction of locks, dams, and canals. Provision also is made for the construction of small navigation projects not specifically authorized by Congress.

With the funds requested, work will be continued on 32 channel and harbor projects, of which 8 will be completed, and on 11 lock, dam, and canal projects, of which

one will be completed in 1962. Construction will be initiated on 10 channel and harbor and 2 lock and dam projects or project modifications as follows:

CHANNEL AND HARBOR PROJECTS

- | | |
|---|---|
| 1. Noyo River and Harbor, Calif. | 7. Ashtabula Harbor, Ohio (channel deepening and turning basin) |
| 2. Santa Cruz Harbor, Calif. | 8. Cleveland Harbor, Ohio (approach channel, outer harbor and lower Cuyahoga River) |
| 3. Calumet Harbor and River, Ill. and Ind. | 9. San Juan Harbor, Puerto Rico |
| 4. Detroit River, Mich. (Trenton Channel) | 10. Everett Harbor, Snohomish River, Wash. |
| 5. Duluth-Superior Harbor, Minn. and Wis. (outer harbor) | |
| 6. Buffalo Harbor, N.Y. (south entrance and south outer harbor) | |

LOCK AND DAM PROJECTS

- | | |

Current authorizations—Continued

CONSTRUCTION, GENERAL—continued

4. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and

currents of the shores of the United States and possessions. Federal contributions may not exceed one-third of the construction costs of such projects.

With the funds requested, reimbursements will be made to compensate local interests on five projects as follows:

1. Imperial Beach, Calif.
2. Silver Beach to Cedar Beach, Conn.
3. Key West, Fla.
4. Lake Worth Inlet to South Lake Worth Inlet, Fla.
5. Atlantic City, N.J.

[In thousands of dollars]

BEACH EROSION CONTROL PROJECTS	Costs to this appropriation					Analysis of 1962 financing				
	Total estimate	To June 30, 1959	1960 actual	1961 estimate	1962 estimate	Deduct selected resources and unobligated balance, start of year	Add selected resources, end of year	Appropriation required for 1962	Appropriation required to complete	Percent cost complete through 1962
(1) Imperial Beach, Calif.	98	3	-----	-----	27	-----	-----	27	68	30.6
(2) Silver Beach to Cedar Beach, Conn.	67	5	-----	-----	34	-----	-----	34	28	58.2
(4) Key West, Fla.	397	11	-----	-----	115	-----	-----	115	271	29.0

(8) Atlantic City, N.J.	2,203	872	33	4	140	-----	-----	140	1,154	47.6
Projects not budgeted in 1962.	5,380	237	941	797	-----	-----	-----	-----	3,405	36.7
Total, beach erosion control projects..	8,555	1,156	974	919	322	-----	-----	322	5,184	39.4

5. *Flood control projects.*—This activity includes local protection projects and flood control reservoirs without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for emergency bank protection; for snagging and clearing work on navigable streams and tributaries when such work is necessary in the interest of flood control; and for the construction of small flood control projects not specifically authorized by Congress.

With the funds requested, work will be continued on 50 local protection projects, 11 of which will be completed, and on 39 reservoir projects, 7 of which will be completed

in 1962. Nine new local protection projects and six new reservoir projects will be initiated as follows:

LOCAL PROTECTION PROJECTS

1. Paint Rock River, Ala.
2. Pawcatuck, Conn.¹
3. Mason J. Niblack levee, Ind.
4. Iowa River-Flint Creek levee district No. 16, Iowa
5. Frankfort, Kans.
6. Socorro, N. Mex.
7. Herkimer, N.Y.
8. Turtle Creek, Pa.
9. Texas City, Tex.

RESERVOIR PROJECTS

1. East Branch Reservoir, Conn.
2. Salamonie Reservoir, Ind.
3. Fishtrap Reservoir, Ky.
4. Littleville Reservoir, Mass.
5. Curwensville Reservoir, Pa.
6. Stillhouse Hollow (Lampasas) Reservoir, Tex.

¹ To be completed with funds recommended for 1962.

¹ Advance design and engineering only.

7. *Recreation on completed projects.*—Public use facilities will be provided at about 70 completed projects to accommodate a rapidly increasing number of visitors.

8. *Small authorized projects.*—The Federal Government assists in the construction of authorized channel and harbor, shore protection, and flood control projects, each of which has a total estimated Federal cost of \$400 thousand or less.

9. *Fish and wildlife studies.*—This program provides for detailed studies and reports by the Fish and Wildlife Service to determine the effects on fish and wildlife resources of water-control projects of the Corps of Engineers. Prior

to 1960, this activity was financed by charges against individual projects.

10. *Rehabilitation.*—Provision is made for the planning and the accomplishment of major rehabilitation work on completed projects, each of which has an estimated Federal cost of more than \$400 thousand, and for work on minor rehabilitation projects, each of which has an estimated Federal cost of \$400 thousand or less. The major rehabilitation work consists of the repair of breakwaters, revetments, and piers on 1 flood control and 19 navigation projects.

New obligational authority:			
Appropriation.....	117,685	126,420	133,600
Proposed supplemental due to pay increases.....		1,800	

The appropriation requested is \$133.6 million. This represents an increase of \$7.2 million compared with 1961 and an increase of \$15.9 million compared with 1960. This appropriation finances the operation of existing facilities and the accomplishment of essential maintenance work designed to hold costly repair work in the future to a minimum. The Lower Columbia River fish sanctuary program is now financed under appropriations for the Bureau of Commercial Fisheries. A supplemental appropriation for wage-board increases for 1961 in the amount of \$2 million is anticipated under Proposed for later transmission.

1. *Navigation.*—This provides for operation and maintenance of 220 channel and harbor projects and 29 locks, dams, and canals.

2. *Flood control.*—In 1962, 139 flood control reservoirs will be operated and maintained. Provision is also made for the minimum regular maintenance of 19 local flood protection projects and inspection of completed flood control projects to determine adequacy of compliance by local interests with prescribed maintenance requirements.

3. *Multiple-purpose projects, including power.*—At the end of 1962, 38 multiple-purpose projects with an installed capacity of 7,380,400 kilowatts will be operated and maintained.

4. *Emergency project maintenance.*—This provides for emergency replacement of equipment and facilities, unforeseen nondeferrable project requirements, and emergency structure repairs which may be required for unpredictable occurrences such as storm damage.

5. *Protection of navigation.*—This provides for the administration of certain laws for the protection, preservation, and regulation of navigable waters of the United States.

6. *Emergency flood control activities.*—The amount requested will finance expenses in connection with flood emergency preparation, flood fighting and rescue operations, and emergency repair and restoration of flood control works.

7. *Niagara remedial works.*—The costs of operation and maintenance of works to preserve and enhance the scenic beauty of Niagara Falls are divided equally between the United States and Canada.

8. *National emergency activities.*—This provides for planning, education and training activities in the implementation of the national plan for civil defense and defense mobilization relative to civil functions.

9. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

New obligational authority (appropriation)	69,069	71,896	70,500

The Corps of Engineers—Civil is responsible for the flood control program for the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, Lower Arkansas, Yazoo, Tensas, and Atchafalaya Rivers, and Bayou LaFourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for channel improvement and bank stabilization on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for 5 flood-detention reservoirs on minor tributaries.

The following tabulation sets forth the program, in terms of costs, reconciled to fund requirements, for each activity (in thousands of dollars). Percentages of completion at the end of 1962 are shown for construction features.

¹ Advance engineering and design only.

1. *General investigations.*—Provision is made for one study and the collection of basic data which are subsequently used in planning and designing projects.

3. *Construction.*—The estimated total cost of flood control and related improvements in the lower Mississippi River and its alluvial valley is estimated at \$1,709 million, of which \$1,163 million has been appropriated through 1961. The funds requested will be applied to continuation of 14 features of the project which by the end of 1962 will have been brought to respective percents of completion shown in the tabulation above.

4. *Maintenance.*—Provision is made for operation and ordinary maintenance of the major features of the project.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

The U.S. section of the Saint Lawrence River Joint Board of Engineers reviews plans and coordinates construction, in conjunction with the Canadian section of the Joint Board, of power facilities being constructed in the International Rapids section of the Saint Lawrence River by the Power Authority of the State of New York jointly with the Hydro-Electric Power Commission of Ontario. These expenditures will be repaid to the general fund by the Power Authority of the State of New York.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for expenses of attendance by military personnel of meetings in the manner authorized

by section 19(b) of the Act of July 7, 1958 (72 Stat. 336), uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131), and for printing, either during a recess or session of Congress, of survey reports authorized by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed one hundred and [sixty] seventy-two, of which one hundred and forty-eight shall be for replacement only) and hire of passenger motor vehicles. (*Public Works Appropriation Act, 1961.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation as follows:

- “Disaster relief,” funds appropriated to the President.
- “Mutual security—economic,” funds appropriated to the President.
- “Salaries and expenses,” National Science Foundation.
- “Construction of hospital and domiciliary facilities,” Veterans Administration.
- “Limitation on operation and maintenance and capital outlay,” United States Soldiers’ Home.
- “Construction,” Bureau of Indian Affairs.
- “Construction and rehabilitation,” Bureau of Reclamation.
- “Construction,” Bureau of Sport Fisheries and Wildlife.
- “United States dollars advanced from foreign governments, United States educational exchange program,” Department of State.
- “Passamaquoddy tidal power survey,” Department of State.
- “Operating expenses, Washington Aqueduct,” District of Columbia.

Permanent authorizations:

PAYMENTS TO STATES, FLOOD CONTROL ACT OF 1954

¹ Excludes property transferred in without reimbursement, net, as follows: 1960, \$1,292 thousand; 1961, \$3,173 thousand; 1962, \$461 thousand.

The fund provides for expenses necessary for the acquisition, operation, and maintenance of plant and equipment of the Corps of Engineers—Civil used in civil works functions, for temporary financing of services finally chargeable to appropriations for civil works functions and for furnishing of facilities and services for the military functions of the Department of the Army and other governmental agencies and private persons (67 Stat 199).

Budget program—Operating costs.—Plant and equipment services include operating costs of such items of plant as dredges, other floating plant, and land-based equipment. Warehousing covers cost of receipt, storage, and issue of inventories. Shop and facility services include operating costs of repair and maintenance shops, boatyards, and printing and reproduction plants. General administrative services include engineering and support functions of Corps of Engineers—Civil district and area offices. Operating costs of these activities are expected to increase in 1961 principally due to increased plant operation costs and remain at about the same level in 1962.

Capital outlay.—Land and structures includes replacement and improvement costs of buildings, facilities, and related land. There is included for this item \$314 thousand in 1961 and \$535 thousand in 1962 covering replacement costs of buildings destroyed by fire in October 1960. Dredges and other floating plant include replacement and improvement costs for dredges and dredging equipment and such other vessels as tugs, tenders, and towboats. Of the 1960 costs, \$3 million was for remainder of acquisition costs of a replacement hopper dredge for use on the Great Lakes, bringing total costs of this dredge to \$10.6 million. Outlay for dredges includes \$500 thousand in

1961 and \$1.4 million in 1962 for replacement of sump-rehandling capability of the dredge *New Orleans* which is nearing end of its economic life and has an estimated replacement cost of \$8.1 million. Outlay for other floating plant includes in 1961, \$1.3 million covering remainder of acquisition costs of a replacement towboat for the lower Mississippi River expected to cost \$1.5 million. Included in 1962 for other floating plant is \$155 thousand for conversion to quarter boats of vessels received from Navy without reimbursement bringing total for this item to \$400 thousand and \$250 thousand for purchase of a replacement derrick boat. Land-based equipment includes replacement and improvement costs of transportation and construction equipment and fixed land equipment such as shop tools and fixed power-driven equipment.

Financing.—Operations are financed from reimbursement or advances from the appropriations or individuals who utilize the services or facilities, at rates to cover all operating costs.

Operating results and financial condition.—The decrease in net operating income in 1960 is attributed to adjustments in rates charged for goods and services furnished, thereby resulting in a decrease in retained earnings from \$3.1 million to \$1.3 million. Retained earnings are expected to be further reduced to \$755 thousand in 1962.

The decrease in reserve for self-insurance in 1961 is attributed to loss of buildings and equipment valued at \$405 thousand which were destroyed in a fire at Waterways Experiment Station, Vicksburg, Miss., in October 1960, and to other costs incident to the fire such as restoration of technical material, records and reports, and provision of temporary office space amounting to \$590 thousand.

The initial capital of the fund was provided by assumption of the assets, liabilities, and obligations of the plant accounts, as carried on the records of the Corps of Engineers—Civil, as of June 30, 1953, and by an appropriation of \$100. Capital of the fund amounted to \$117.8 million on June 30, 1960, and is limited to \$140 million (67 Stat. 199). In 1960, capital of the fund was reduced \$151 thousand because of correction of prior year charges to capital for accrued annual leave of employees. Capital was increased \$1.3 million because of a net transfer of assets from other agencies and appropriations without reimbursement. Receipt of these assets without purchase cost was a principal cause of capital outlay in 1960 falling below the previous estimate. In 1961, capital will be increased by \$3.2 million because of a net transfer of assets without reimbursement and will be decreased by approximately \$80 thousand because of assumption of liability for accrued annual leave of civilian employees of the former Tullahoma District which was merged with the Nashville District in 1961. Accrued annual leave of these employees had not formerly been recorded within the fund.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:

The United States Soldiers' Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army and airmen of the Air Force. Funds for operation and maintenance of the home are appropriated from the Soldiers' Home permanent fund (trust fund) and not from the general funds of the Treasury.

1. *Medical care.*—A hospital operated as part of the home cares for the daily average patient loads shown below. In addition, certain members receive specialized care at other hospitals.

	1960 actual	1961 estimate	1962 estimate
Patients in home hospital.....	344	350	350
Patients in other hospitals.....	64	64	64

2. *Domiciliary care.*—The daily average number of members receiving domiciliary care is shown below.

	1960 actual	1961 estimate	1962 estimate
Members present.....	1,484	1,540	1,590

3. *Administration and central services.*—Included in this activity are service functions such as administration, supply, utility services, maintenance, transportation, and laundry.

4. *Permanent improvements.*—No new obligational authority is requested for 1962.

A proposed supplemental increase in limitation for wage board salary increases for 1961 is shown under Proposed for later transmission.

RYUKYU ISLANDS, ARMY—Continued

Current authorizations—Continued

ADMINISTRATION—Continued

Program and Financing (in thousands of dollars)—Continued

	1960 actual	1961 estimate	1962 estimate
New obligational authority:			
Appropriation.....	5,282	6,000	6,835
Proposed supplemental due to pay increases.....		89	

This appropriation supports the objective of the Act of July 12, 1960, to provide for the promotion of economic and social development in the Ryukyu Islands, and finances the administration of these islands by the United States, which exercises jurisdiction pursuant to the Treaty of Peace with Japan. Executive Order 10713 of June 5, 1957, establishes under the jurisdiction of the Secretary of Defense a civil administration of the Ryukyu Islands to execute the administrative, legislative, and jurisdictional powers reposed in the United States. To protect the security of the United States and of the free world, the United States will continue responsibility for the administration of the Ryukyu Islands as long as conditions of threat and tension in the Far East require the maintenance of military bases in these islands.

2. *Construction of facilities.*—Replacement of two cultural center buildings and construction of a U.S. courthouse were provided in 1960. Another cultural center is being reconstructed in 1961.

3. *Aid to Ryukyuan economy.*—Provision is made for observation and study of democratic procedures by Ryukyuan leaders through visits to the United States; advanced study by Ryukyuan students in the United States; vocational and technical training of Ryukyuan in other Far East areas; technical assistance for education and industrial development programs within the Ryukyu Islands; and transportation of donated welfare goods.

Grants are made to supplement revenues of the local government in meeting costs of essential public safety and public health services and in constructing public facilities. These grants were \$3 million in 1960; \$3.9 million in 1961; and \$4.6 million is proposed in 1962.

Additional economic aid is furnished by the United States through other programs. In 1960, these included \$286 thousand obligated from the military construction project for resettlement of persons displaced from land taken for military purposes; approximately 12.5 million pounds of surplus foodstuffs furnished through voluntary relief organizations; and \$846 thousand for typhoon relief and reconstruction, derived from foreign currency and surplus rice allocated by the International Cooperation Administration without reimbursement. In 1961, an additional \$1 million of military construction funds for resettlement have been allocated; \$2,306 thousand from prior-year allocations of surplus food and foreign currency by the International Cooperation Administration will be available to continue typhoon reconstruction projects; and 27.5 million pounds of relief foodstuffs are expected from voluntary relief organizations. Surplus commodity aid for relief purposes is expected to be continued in 1962, and can be increased if typhoons or other disasters occur.

In addition to this appropriation and other U.S. aid programs, the general fund of the civil administration

is available for economic and social development in the Ryukyus. It receives income from business-type instrumentalities and from investments in financial and public utility organizations. Summary statements of assets and cash receipts and expenditures of the general fund follow (in thousands of dollars):

	FINANCIAL CONDITION		
	1960 actual	1961 estimate	1962 estimate
Assets:			
Current assets:			
Cash.....	2,973	2,029	2,714
Accrued interest receivable.....	29	24	25
Investments:			
Wholly owned corporations:			
Ryukyu Development Loan Corp.....	26,680	28,883	30,176
Ryukyu Electric Power Corp.....	10,574	11,420	12,002
Ryukyu Domestic Water Corp.....	1,149	2,794	2,936
Okinawa Housing Corp.....	1,589	1,359	1,138
Ryukyu Warehouse Corp.....	300	-----	-----
Partially owned corporation:			
Bank of the Ryukyus.....	127	127	127
Working capital: Petroleum distribution fund.....	518	293	219
Fixed assets:			
Petroleum facilities (at cost).....	1,561	1,609	1,811
Refrigeration plant.....	991	-----	-----
Net worth, U.S. civil administration.....	46,492	48,538	51,148

The investments in business enterprises represent the total net worth of these organizations except the bank in which the U.S. civil administration holds 51% of the outstanding stock. In this organization, the investment is stated at cost but has substantially higher actual value because of accumulated earnings and established earning capacity. The housing corporation operates at a loss and will be liquidated when feasible on reasonable terms. Investment in the refrigeration plant, presently leased for a nominal rental return, and in the warehouse corporation is planned to be liquidated in 1961.

Total expenditures.....	5,390	4,615	2,421
Net increase or decrease (—) in cash balance.....	—2,544	—944	685

Income from operations is derived primarily from the net earnings of the electric power, water, and development loan corporations, from the handling of petroleum products, from interest and dividend receipts, and beginning in 1961 from the proceeds of fines and forfeitures levied by U.S. civil administration courts.

Receipts from liquidation of investments include the estimated proceeds from sale of the refrigeration plant and seven warehouses of the warehouse corporation in 1961 and reductions in the working capital used in the petroleum business and the housing corporation. In 1960, \$54.7 thousand was received from sale of a previous investment in the Ryukyu Life Insurance Co. In 1961, two warehouses with a cost value of \$104 thousand are planned to be transferred to the Government of the Ryukyu Islands without reimbursement, and paved roadways and other improvements with a cost value of \$147 thousand are planned to be transferred to the city of Naha, without reimbursement, in concluding the liquidation of the warehouse corporation. The earnings of the electric power, water, and development loan corporations are being reinvested within the respective corporations each year. The investment in the water corporation is being increased both by the cost of facilities constructed from a 1959 appropriation and by provision of additional capital from the general fund for expansion of the water system for central Okinawa. The investment in the electric power corporation has been increased in 1960 and 1961 by the completion of power transmission facilities constructed from a 1958 appropriation. Additional capital from the general fund has been invested in the development loan corporation in 1960 and 1961. Grants in limited amounts are made to municipalities for essential public facilities and programs.

The cash balance retained in the fund is available to meet emergency requirements and other programs authorized under the provisions of Public Law 86-629. A grant of \$75 thousand from the general fund has been made to the Government of the Ryukyu Islands in 1961 to cover the cost of actuarial surveys required for a proposed retirement system for teachers and public service personnel of the Government of the Ryukyu Islands. Upon the development of a detailed program it is anticipated that further United States assistance will be required.

In addition to local revenue derived primarily from income and excise taxes, the Government of the Ryukyu Islands receives grants to cover expenses related to requirements of the U.S. forces and for assistance in development of public facilities and services. This government has not been authorized by the United States to incur deficits in its fiscal operations or to borrow for any purpose, and it must, therefore, maintain a minimum working balance in its treasury. In the financial statement which follows, grants from U.S. appropriations are included as receipts in the fiscal year of expenditure. An estimated \$1,735 thousand of grants approved through 1961 will be recorded as receipts in subsequent years. \$1,385 thousand of the programmed grants through 1962 will be receipts of the Government of the Ryukyu Islands after 1962.

Unobligated balance carried forward.....	18,030	18,012	14,212
New obligational authority (appropriation)	18,000	-----	-----

1. *Transmission line and substations.*—Construction of the transmission line from Kadena to Henoko and four substations was substantially completed in 1960 and put in operation.

2. *Loans.*—Obligations to be incurred in 1962 are for loans to finance equipment of a power generating plant currently planned to consist ultimately of four 20,000-kilowatt generating units together with the necessary housing and ancillary facilities. The first of these units is expected to be in operation in 1964, and other units will follow, as required, to meet the demand load. The new units will permit the retirement from the integrated power system of certain over-age units operating presently at a relatively high cost.

The ultimate financing of this facility will use \$4.7 million from retained earnings of the Ryukyu Electric Power Corp., in addition to \$18 million appropriated to the Army for a loan to the Ryukyu Electric Power Corp.

This appropriation provides for those functions in the Canal Zone which, in the United States, would be performed by State and local governments and civilian departments of the Federal Government, and for the operation of hospitals and clinics. All operating expenses, including depreciation and other nonfund expense, are recovered and paid into the Treasury as miscellaneous receipts. Such recoveries are derived from revenue from individuals and agencies served and the balance from the Panama Canal Company as follows (in thousands of dollars):

1. *Civil functions*—(a) *Customs and immigration*.—This provides for the activities usually incident to such functions (except that no collection of customs duties is involved) and in addition includes special activities relating to transiting vessels and the execution of certain treaty obligations to the Republic of Panama.

(b) *Postal service*.—The postal system serves the entire Canal Zone and operates under policies and regulations generally similar to those of the U.S. Post Office Department, including money order and postal savings services.

WORKLOAD (IN THOUSANDS)

	1960 actual	1961 estimate	1962 estimate
Airmail dispatched (pounds).....	199	204	207
Airmail received (pounds).....	332	338	340
Surface mail dispatched (pounds).....	348	360	360
Surface mail received (sacks).....	72	72	73

(c) *Police protection*.—This includes the usual police functions of preservation of the peace and enforcement of the law in the Canal Zone (not including military reservations), operation of prisons, and police guards for certain facilities.

(d) *Fire protection*.—All firefighting facilities in the Canal Zone, except those required for aircraft crash fires and fires aboard naval vessels and ammunition depots, are consolidated under the Canal Zone Government.

(e) *Judicial system*.—This includes the operation of two magistrate courts and the expenses of the district court (exclusive of salaries) which serves as both a State and Federal court.

(f) *Education*.—This provides for the operation of schools, kindergarten through junior college, for the dependents of Canal Zone residents and, on a space available basis, certain residents of Panama. There are two school systems; one for U.S. citizens, the other, which is conducted in the Spanish language, for Panamanians and other non-U.S. citizens. There also are specialized facilities for handicapped children.

ENROLLMENT DATA (INDIVIDUALS)

	1960 actual	1961 estimate	1962 estimate
U.S. citizen schools.....	7,272	7,670	7,688
Latin-American schools.....	3,962	4,066	4,075
Total.....	11,234	11,736	11,763

(g) *Public areas and facilities*.—This includes the cleaning, lighting, and maintenance of streets and highways; maintenance of sewers, and care of public areas within the Canal Zone, not including military reservations.

(h) *Library*.—This provides for the operation of public library facilities for residents of the Canal Zone and technical reference services for Government agencies.

(i) *Internal security*.—This provides for loyalty investigations and related intelligence services for the Government and the Company.

(j) *Other civil affairs*.—This includes licensing, civil defense activities, and supervision of the civil functions program.

2. *Health and sanitation*—(a) *Hospitals and clinics*.—Two complete general medical and surgical hospitals with outpatient clinics, a neuropsychiatric and domiciliary hospital, and a leprosarium are operated and maintained. Medical care of all eligible civilians and military personnel in the Canal Zone is provided in the two general hospitals operated by the Canal Zone Government.

AVERAGE NUMBER OF INPATIENTS PER DAY (EXCLUDING NEWBORNS)

Current authorizations—Continued

CANAL ZONE GOVERNMENT—Continued

OPERATING EXPENSES—continued

(b) *Other public health services.*—This provides for communitywide public health services, sanitation, and quarantine work in the Canal Zone and for ships calling at its ports and transiting the canal; inspection of food processing establishments, and facilities for animal care and quarantine.

3. *General government expense*—(a) *Office of the Governor.*—This provides for the executive direction of all Canal Zone Government activities and includes the expenses of the office of the Governor and his residence, the office of the executive secretary, and provision for certain contingencies.

(b) *Other general government expense.*—This includes the Canal Zone Government's share of the cost of general and administrative expenses provided by the Panama Canal Company which the Canal Zone Government is without staff or facilities to perform or furnish, expenses of recruitment and repatriation, employees' home leave travel costs, and other general charges.

4. *Unfunded adjustments to total operating costs.*—This includes depreciation expense on facilities and equipment acquired under the capital outlay appropriation. Other costs include the undepreciated balance of such facilities and equipment which are retired, retirement expense, and other minor amounts chargeable to operations which were previously accrued as capital outlay expenditures.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate

CAPITAL OUTLAY

For acquisition of land and land under water and acquisition, construction, and replacement of improvements, facilities, structures, and equipment, as authorized by law (2 C.Z. Code, secs. 3 and 16; 63 Stat. 600), including the purchase of not to exceed [eight] seven passenger motor vehicles for replacement only [of which seven are] for police-type use without regard to the general purchase price limitation for the current fiscal year; and expenses incident to the retirement of such assets; [\$6,800,000] \$2,349,000, to remain available until expended: *Provided, That after July 1, 1961, the limitation under this head in the Second Supplemental Appropriation Act, 1961, on the unit cost of constructing quarters shall not apply to the construction of housing units from appropriations for "Capital outlay".*

[For an additional amount for "Capital outlay", \$121,000, to remain available until expended: *Provided, That no part of the foregoing amount shall be available for any expenses related to the construction of any quarters at an average cost in excess of \$9,000 per unit.*] (2 C.Z. Code, secs. 3, 5, 16; 63 Stat. 600; 64 Stat. 1038; 72 Stat. 852; Department of Commerce and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

THE PANAMA CANAL—Continued

Current authorizations—Continued

CANAL ZONE GOVERNMENT—Continued

CAPITAL OUTLAY—continued

This provides for the acquisition by purchase, construction, or otherwise, of capital assets required by the Canal Zone Government. In 1962, the principal projects in which the agency will be engaged are: (a) Air conditioning of the high school and junior college buildings at Balboa; (b) improvements to Coco Solo and Corozal Hospitals; (c) continuation of the Pacific side quarters replacement program; (d) construction of 500 non-U.S. citizen employee quarters; (e) completion of the alterations and additions to Gorgas Hospital and (f) routine continu-

ing projects among which are additions and replacements to municipal systems, and additions and renewals of equipment.

Relation of costs to obligations.—The year-end balances of unpaid undelivered orders are as follows: 1959, \$962 thousand; 1960, \$833 thousand; 1961, \$3,923 thousand; 1962, \$833 thousand.

New obligational authority (appropriation).....									

A \$750 thousand supplemental appropriation was enacted in 1958 and an appropriation of \$19,250 thousand was enacted in 1959 to provide for the \$20 million cost of constructing a high-level bridge across the Panama Canal at Balboa, C.Z., as authorized and directed by the act of July 23, 1956 (ch. 665, 70 Stat. 596). Construction of the bridge will fulfill the United States commitment to the Republic of Panama under the terms of point 4 of the General Relations Agreement between the United States and Panama of May 18, 1942 (Executive Agreement Series 452), and of item 5 of the Memorandum of Understandings Reached, signed January 25, 1955. The design work on the bridge proper was completed in 1959 while construction work, which started in 1959, will be completed in 1963.

Relation of costs to obligations.—The year-end balances of unpaid undelivered orders are as follows: 1959, \$4,172

thousand; 1960, \$11,618 thousand; 1961, \$5,821 thousand; 1962, \$731 thousand.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation, "Military construction, Army."

Public enterprise funds:

CORPORATION

The Panama Canal Company is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to it and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such corporation, except as hereinafter provided: (*Department of Commerce and Related Agencies Appropriation Act, 1961.*)

The Panama Canal Company is a wholly owned Government corporation chartered by the act of June 29, 1948 (62 Stat. 1076), as amended by the act of September 26, 1950 (64 Stat. 1041), for the primary purpose of maintaining and operating the interoceanic canal at the Isthmus of Panama. In furtherance of that mission, and in consideration of the international agreements under which the canal enterprise is operated, the Company conducts necessary supporting operations.

Budget program—1. Transit operations.—Operation and maintenance of the canal proper is the primary mission of the Company, and it is toward the successful accomplishment of that task that the transit operations are directed. Current and projected operating results, including income from tolls, are reviewed and evaluated at least annually by the Company's board of directors. In the period 1952 through 1960 the average annual net income has amounted to \$3.5 million, which is approximately equivalent to the tolls from two average-size ships per day.

The services performed by this activity and the cost of each are shown in the following table (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Maintenance of channels and harbors.....	4,306	4,017	2,501
Navigation service and control.....	7,817	8,771	9,514
Locks operations.....	8,373	9,296	10,910
General canal expense.....	1,840	1,828	1,849
Net operating costs.....	22,336	23,912	24,774

Major variations in the foregoing cost estimates reflect final amortization in 1961 of the cost of removing the slide hazard at Contractor's Hill, provision for increased locks overhaul accruals, and the additional expense incident to

handling actual and projected canal traffic volume as shown by the following data (dollars in thousands):

	1959 actual	1960 actual	1961 estimate	1962 estimate

Commercial vessel transits: Number of ships (over 300 net Panama Canal tons).....	9,718	10,793	11,230	11,400
Ships berthed.....	4,712	4,892	4,991	5,045
Tolls and toll credits at current rates.....	\$46,547	\$51,803	\$55,500	\$56,800
Other transit revenue.....	\$3,748	\$4,241	\$4,181	\$4,300

Capital outlay costs will amount to \$8,983 thousand in 1962 and include \$5,200 thousand for continuing the canal capacity program, \$1,738 thousand for replacement of locks towing locomotives and cranes, which project will be largely completed in 1963, and \$800 thousand for a marine traffic control system scheduled for completion in 1963.

2. Supporting services.—These are the Company's auxiliary activities, individually described below, which provide services and materials essential to the accomplishment of the transit operations program.

(a) *Maritime services.*—This program provides for the operation of vessel repair and harbor terminal facilities. Costs, which are directly related to customer demand for services, are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Vessel repair.....	2,940	2,936	2,992
Harbor terminals.....	4,775	5,050	5,368
Total operating costs.....	7,715	7,986	8,360
Less intra-agency recoveries.....	2,415	2,656	2,705
Net operating costs.....	5,300	5,330	5,655

(b) *Employee services.*—As shown below, these costs include housing and marketing operations for eligible employees against whom charges are made to reimburse the Company. Cost estimates, which are expected to remain relatively level, are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
U.S. community housing.....	1,736	1,803	1,830
Latin-American community housing.....	689	719	752
Marketing operations.....	17,581	18,062	19,376
Total operating costs.....	20,006	20,584	21,958
Less intra-agency recoveries.....	980	987	1,004
Net operating costs.....	19,026	19,597	20,954

Capital outlay costs estimated for 1962 include \$3,753 thousand for continuation of a quarters replacement program for U.S. and non-U.S. citizens, and \$347 thousand for the addition and replacement of marketing operation equipment.

(c) *Transportation and utilities services.*—The various types of service and the costs incident to each are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Railroad.....	1,668	1,745	1,805
Motor transportation.....	1,923	2,077	2,199
Steamship line.....	6,053	6,479	6,469
Power system.....	2,190	2,294	2,330
Communications system.....	613	629	688
Water system.....	1,305	1,342	1,407
Total operating costs.....	13,752	14,566	14,898
Less intra-agency recoveries.....	5,090	5,544	5,709
Net operating costs.....	8,662	9,022	9,189

Estimates for capital outlay in 1962 total \$1,319 thousand including \$540 thousand toward constructing a central air conditioning system on the Pacific side of the Isthmus, and \$569 thousand for motor vehicles and railroad rolling stock.

(d) *Other supporting services.*—These consist chiefly of the Company's construction, maintenance, and supply activities, with estimated costs as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Tivoli guest house.....	573	595	625
Printing plant.....	363	376	385
Grounds maintenance.....	1,045	1,079	1,172
Engineering and maintenance services.....	6,639	6,934	6,794
Supply operations.....	5,379	5,745	5,853
Total operating costs.....	13,999	14,729	14,829
Less intra-agency recoveries.....	11,349	12,189	12,317
Net operating costs.....	2,650	2,540	2,512

Capital outlay costs for 1962 are estimated at \$484 thousand, including \$165 thousand for relocating and modernizing the printing plant and \$279 thousand for the replacement and addition of equipment.

3. *General corporate expense.*—This includes payments to the Treasury for the net cost of Canal Zone Government, interest, general and administrative expenses under statutory limitation, and other general charges. The scope of general and administrative expenses under statutory limitation includes virtually all general charges (see Program and Financing schedule under "Limitation") other than interest on the investment of the United States and the net cost of the Canal Zone Government. Starting in 1962, annuity payments to non-U.S. citizens for-

merly employed by the agency are no longer included within the statutory limitation. The summary detail of general corporate expense is as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Net cost of Canal Zone Government.....	12,801	13,419	13,644
Interest expense.....	8,925	8,775	8,735
Other general corporate expense.....	8,767	10,027	9,885
Total general corporate expense.....	30,493	32,221	32,264

Capital outlay costs for 1962 are estimated at \$397 thousand and provide for minor replacements, additions and improvements, advance planning of future projects, and plant retirement and removal costs.

5. *Relation of costs to obligations.*—The relationships for operating costs and capital outlay are derived from year-end balances of selected resources as reflected in the following tables (in thousands of dollars):

RELATION OF OPERATING COSTS TO OBLIGATIONS

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:

Obligations incurred for costs of other years, net.....		3,341		1,091

Financing.—The Company is authorized to obtain appropriations for its capital needs and to cover losses sustained in the conduct of its activities. It is expected that the foregoing budget programs will continue to be financed entirely within its own resources. Under Public Law 86-200 (73 Stat. 428), approved August 25, 1959, the Company may borrow with interest from the Treasury amounts not exceeding a total of \$10 million outstanding at any time. A \$10 million emergency fund, previously deposited by the Company with the Treasury, is deemed under Public Law 86-200 to be a return of invested funds instead of a payment out of retained earnings and the capital structure of the Company is adjusted accordingly.

Operating results and financial condition.—There will be an increase in retained earnings in 1961 estimated at \$14,632 thousand, of which (a) \$5,971 thousand is from operations, and (b) \$8,661 thousand is from net credits to be gained through the final transfer of Panama Canal Company and Canal Zone Government properties to the Republic of Panama under the terms of the 1955 Treaty (71 Stat. 509) with the Republic of Panama. The \$6,460 thousand increase in retained earnings estimated for 1962 wholly represents net operating income for that year.

Note.—Contingent and other liabilities: The Company has outstanding, at all times, contingent and continuing liabilities in indeterminable amounts arising principally from monthly relief payments payable to retired alien employees; benefits payable under provisions of the Federal Employees Compensation Act; commitments for construction work, supplies and services; and pending suits and claims.

The annuity payments to be made to retired alien employees in fiscal year 1961 are estimated at \$2.1 million. Commitments under uncompleted construction contracts and unfilled purchase orders amounted to \$13.7 million at June 30, 1960. The maximum liability which could result from outstanding claims and lawsuits is estimated to be \$1.2 million.

LIMITATION ON GENERAL AND ADMINISTRATIVE EXPENSES, PANAMA CANAL COMPANY

Not to exceed **[\$8,680,000]** \$7,824,000 of the funds available to the Panama Canal Company shall be available during the current fiscal year for general and administrative expenses of the Company, which shall be computed on an accrual basis. Funds available to the Panama Canal Company for operating expenses shall be available for the purchase of not to exceed **[fourteen]** eighteen passenger motor vehicles of which **[twelve]** fourteen are for replacement only, and for uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

The limitation under this head in the Department of Commerce and Related Agencies Appropriation Act, 1961, on the amount available for general and administrative expenses of the Panama Canal Company, is increased from "\$8,680,000" to "\$9,393,900". (Department of Commerce and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

GENERAL PROVISIONS—THE PANAMA CANAL

SEC. 201. The Governor of the Canal Zone is authorized to employ services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in an amount not exceeding \$30,000: *Provided*, That the rates for individuals shall not exceed \$100 per diem [: *Provided further*, That no part of any appropriation contained in title II of this Act shall be used to construct a flag pole, platform, or any other device for the purpose of displaying the flag of Panama in the Canal Zone, the sovereign control of which is vested in the United States Government by virtue of long standing Treaty]. (Department of Commerce and Related Agencies Appropriation Act, 1961.)

SEC. 202. The Canal Zone Government is authorized to transfer to the Federal Aviation Agency, without reimbursement, such facilities and improvements within the Cardenas townsite in the Canal Zone as may be mutually agreed upon by such agencies, and the value of the property so transferred shall be determined in accordance with section 246(b) of title 2 of the Canal Zone Code. Payments to the Treasury otherwise required by section 246(e) of title 2 of the Canal Zone Code shall be reduced by the amount of such value.

Public enterprise funds:**DEFENSE PRODUCTION GUARANTEES**

Guarantees are given on loans made by public and private financing institutions by the Army, Navy, and Air Force to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are financed from guarantee fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Net earnings are retained to purchase loans when required under guarantee commitments and to cover possible future losses (50 U.S.C. app. 2091).

Proposed supplemental due to pay increases.....		796	

The laws enforced hereunder are designed to protect consumers against adulterated and misbranded foods, drugs, cosmetics, therapeutic devices, and caustic poisons.

The budget provides for an overall expansion of 14% in staff resources to continue the program of strengthening the agency to cope with increasing responsibilities due to industrial, economic, technological, and population growth of the Nation. The budget also provides for the first year cost of new or expanded office and laboratory space which will be occupied in 1962.

1. *Field inspections, investigations, and laboratory analyses.*—Inspections of domestic plants, examinations of interstate and import shipments, and special investigations are planned according to the relative incidence and seriousness of probable violations. About 100,000 establishments (manufacturing plants, warehouses, shippers) dealing in foods, drugs, devices, or cosmetics are subject to inspection. Retail establishments dealing in products received in interstate commerce are also subject to the prohibition against adulteration or misbranding. Samples are collected during inspections, and investigation and laboratory analyses are conducted to detect and identify adulteration. The budget provides for continuing the

program of modernizing certain district offices. Four additional offices are scheduled for modernization in 1962.

2. *Research and methodology.*—Research is conducted to evaluate the components of foods, drugs, devices, and cosmetics and to appraise their efficacy, toxicity, and acute and long-range effects. Research is also performed to develop analytical methods for use in field analysis of inspectional samples and to develop food standards and pesticide and food additive tolerances.

3. *Compliance, consultation, and education.*—Voluntary compliance with the law is promoted wherever possible, but legal action is taken when necessary. Legal proceedings include seizures of illegal products, injunctions and criminal prosecutions through the courts. Standards for foods, tolerances for poisonous substances in foods, and other regulations are promulgated. A program of consumer education is conducted. Liaison is maintained with, and assistance is given to, State and local food and drug agencies.

4. *Medical evaluation.*—Applications for new drugs to be marketed are evaluated and approved. The medical aspects of research and enforcement activities are coordinated.

Workload is reflected in the following summary data:

	1960 actual	1961 estimate	1962 estimate
Number of establishments inspected.....	21,241	25,500	29,500
Establishment inspections.....	26,311	31,500	36,500
Wharf examinations.....	6,005	7,200	7,500
Samples collected for examination.....	32,788	35,500	39,500
Laboratory analyses and other examinations.....	31,276	33,500	35,000

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$684 thousand; 1959 (adjusted), \$660 thousand; 1960, \$1,312 thousand; 1961, \$1,312 thousand; 1962, \$1,312 thousand.

SALARIES AND EXPENSES, CERTIFICATION, INSPECTION, AND OTHER SERVICES

(Indefinite special fund)

For expenses necessary for the listing, certification or inspection of certain products, and for the establishment of tolerances for pesticides and color additives, in accordance with sections 406, 408, 504, 506, 507, 604, 702A, and 706 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346, 346a, 354, 356, 357, 364, 372a, and 376), the aggregate of the advance deposits during the current fiscal year to cover payments of fees for services in connection with such certifications, inspections, or establishment of tolerances, to remain available until expended. The total amount herein appropriated shall be available for purchase of chemicals, apparatus, and scientific equipment; expenses of advisory committees; and the refund of advance deposits for which no service has been rendered. (*Departments of Labor, and Health, Education, and Welfare, Appropriation Act, 1961.*)

The Food and Drug Administration certifies batches of antibiotics, insulin, and color additives for use in foods, drugs, or cosmetics. FDA also establishes tolerances for residues of pesticide chemicals in or on raw agricultural products, and establishes tolerances for color additives in foods, drugs, and cosmetics. These services are financed wholly by fees paid by the affected industries.

Workload data are as follows:

	1960 actual	1961 estimate	1962 estimate
Batches of antibiotics tested.....	16,601	17,000	17,000

FREEDMEN'S HOSPITAL

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for operation and maintenance, including repairs; furnishing, repairing, and cleaning of wearing apparel used by employees in the performance of their official duties; transfer of funds to the appropriation "Salaries and expenses, Howard University" for salaries of technical and professional personnel detailed to the hospital; payments to the appropriation of Howard University for actual cost of heat, light, and power furnished by such university; **[\$3,294,600] \$3,736,000: Provided,** That no intern or resident physician receiving compensation from this appropriation on a full-time basis shall receive compensation in the form of wages or salary

from any other appropriation in this title: *Provided further,* That the District of Columbia shall pay by check to Freedmen's Hospital, upon the Surgeon General's request, in advance at the beginning of each quarter, such amount as the Surgeon General calculates will be earned on the basis of rates approved by the Bureau of the Budget for the care of patients certified by the District of Columbia. Bills rendered by the Surgeon General on the basis of such calculations shall not be subject to audit or certification in advance of payment; but proper adjustment of amounts which have been paid in advance on the basis of such calculations shall be made at the end of each quarter: *Provided further,* That the Surgeon General may delegate the responsibilities imposed upon him by the foregoing proviso. (*§2 D.C. Code 317-320; Department of Health, Education, and Welfare Appropriation Act, 1961.*)

OFFICE OF EDUCATION

Current authorizations:

PROMOTION AND FURTHER DEVELOPMENT OF VOCATIONAL EDUCATION

For carrying out the provisions of section 3 of the Vocational Education Act of 1946, as amended (20 U.S.C. 15j), and section 202 of said Act (20 U.S.C. 15bb), [section 4 of the Act of March 10, 1924 (20 U.S.C. 29), section 1 of the Act of March 3, 1931 (20 U.S.C. 30), the Act of March 18, 1950 (20 U.S.C. 31–33), and section 9 of the Act of August 1, 1956 (20 U.S.C. 34), including \$4,000,000 for extension and improvement of practical nurse training under title II of the Vocational Education Act of 1946, as amended, which sum shall be available under such title also for the expansion and improvement of programs of practical nurse training in effect prior to August 2, 1956, and \$180,000 for vocational education in the fishery trades and industry including distributive occupations therein, \$33,702,081 \$33,672,081: *Provided*, That the amount of allotment which States and Territories are not prepared to use may be reapportioned among other States and Territories applying therefor for use in the programs for which the funds were originally apportioned. (*Department of Health, Education, and Welfare Appropriation Act, 1961; authorizing legislation to be proposed for 1962.*)

New obligational authority (appropriation)	33,702	33,672	33,672

Grants are made on a matching basis to the States, Puerto Rico, the Virgin Islands, Guam, and the District of Columbia, according to different formulas, for training students and teachers in agriculture, home economics, trades and industry, distributive occupations, practical nursing, and the fishing trades. Additional grants for vocational education are provided through a permanent appropriation, and grants to support the training of highly skilled technicians are included under Defense educational activities. The 1962 estimate is based on extension of the authorizing legislation for practical nurse training. The appropriation for 1961 has been reduced by \$30 thousand by the Hawaii Omnibus Act (74 Stat. 411) which terminated the special grant for that State.

FURTHER ENDOWMENT OF COLLEGES OF AGRICULTURE AND THE MECHANIC ARTS

For carrying out the provisions of section 22 of the Act of June 29, 1935, as amended (7 U.S.C. 329), **[\$2,501,500]** \$8,194,000. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

Program and Financing (in thousands of dollars)

Financing:			
New obligational authority (appropriation)-----	2,502	2,502	8,194

This annual appropriation, plus the permanent appropriation for the same purpose, supports college instruction in agriculture, the mechanic arts, and related fields in the 68 land-grant colleges. Each State and Puerto Rico receives a minimum of \$90 thousand, the balance being distributed on the basis of population.

GRANTS FOR LIBRARY SERVICES

For grants to the States, pursuant to the Act of June 19, 1956, as amended (20 U.S.C. 351-358), \$7,500,000. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

Unobligated balance carried forward-----	32	916	
Unobligated balance lapsing-----	180		
New obligational authority (appropriation)-----	6,131	7,500	7,500

Grants are made to the States, Puerto Rico, Guam, and the Virgin Islands on a matching basis for the promotion and further development of public library service in rural areas. Each State and Territory receives a minimum of \$40 thousand (\$10 thousand for the Virgin Islands and Guam), the balance being distributed in proportion to rural population. This program was amended and extended for another 5 years, beginning in 1962, by Public Law 86-679.

A supplemental appropriation is anticipated in 1961 under Proposed for later transmission.

PAYMENTS TO SCHOOL DISTRICTS

For an additional amount for "Payments to school districts", fiscal year 1959, \$7,362,000.]

For payments to local educational agencies for the maintenance and operation of schools as authorized by the Act of September 30, 1950, as amended (20 U.S.C., ch. 13), **[\$187,310,000]** \$77,000,000: *Provided*, That this appropriation shall also be available for carrying out the provisions of section 6 of such Act. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Payments to local educational agencies-----	176,685	177,310	62,000
2. Payments to other Federal agencies-----	9,609	10,000	15,000
Total program costs—obligations-----	186,294	187,310	77,000
Financing:			
Unobligated balance lapsing-----	6		
New obligational authority (appropriation)-----	186,300	187,310	77,000

Payments are made to assist in the maintenance and operation of schools in areas where enrollments are affected by Federal activities. These payments are made primarily to local school districts. However, where such districts cannot assume responsibility for educating federally connected children, payments are made to other agencies for the direct operation of schools under Federal auspices.

This program authorizes assistance to school districts in 1962 mainly for federally connected children whose parents both reside and work on Federal property. Portions of the law expiring in 1961 also provide assistance to school districts for children whose parents work on Federal property but do not reside on such property. Legislation is again recommended to redefine the Federal responsibility in assisting these affected school districts. A supplemental is shown under Proposed for later transmission which is dependent upon enactment of legislation modifying the program.

In 1962 payments will be made to about 1 thousand school districts and Federal agencies on account of the attendance of approximately 274 thousand federally connected pupils in all States, Puerto Rico, Virgin Islands, Guam, and Wake Island. This compares to some 4 thousand districts and about 1,633 thousand pupils in 1961.

Payments are made to assist in construction of schools in districts where enrollments are affected by Federal activities. From 1951 through 1961, \$1,026 million has been appropriated for this program, aiding in the construction of an estimated 53,350 classrooms housing about 1.6 million pupils in the States, Puerto Rico, Guam, and Wake

Island. Funds requested for 1962 will assist in providing approximately 1,300 classrooms for about 36,430 children.

This program authorizes assistance to school districts in 1962 mainly for children whose parents both reside and work on Federal property. Portions of the law expiring in 1961 also provide assistance to school districts for children whose parents work on Federal property but do not reside on such property. It is recommended that the Congress reconsider the necessity for this part of the program when it considers general school construction legislation. No funds for continuation are included in this budget.

1. *Assistance to local educational agencies.*—Grants are made to local districts for school construction where enrollments are affected by Federal activities.

2. *Assistance for school construction on Federal properties.*—Where the local education agency is not able to provide school facilities for children living on Federal property, the Commissioner of Education provides for the construction of schools. Also, under certain circumstances, the Commissioner may arrange to provide, on a temporary basis, school facilities for children of members of the Armed Forces on active duty, not residing on Federal property.

3. *Payments for technical services.*—Technical services rendered by the Housing and Home Finance Agency are necessary in connection with the construction of school facilities now in process and proposed for 1962.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$9,309 thousand; 1960, \$7,023 thousand; 1961, \$9,755 thousand; 1962, \$7,782 thousand.

DEFENSE EDUCATIONAL ACTIVITIES

For grants, loans, and payments under the National Defense Education Act of 1958 (72 Stat. 1580-1605), **[\$173,050,000]** \$194,492,000, of which **[\$44,000,000]** \$58,430,000 shall be for capital contributions to student loan funds and loans for non-Federal capital contributions to student loan funds, of which not to exceed \$1,000,000 shall be for such loans for non-Federal capital contributions; **[\$57,750,000]** \$54,000,000 shall be for grants to

States and loans to nonprofit private schools for science, mathematics, or modern foreign language equipment and minor remodeling of facilities; [and] \$3,750,000 shall be for grants to States for supervisory and other services; [\$9,000,000] \$11,800,000 shall be for grants to States for area vocational education programs; and \$15,000,000 shall be for grants to States for testing, guidance, and counseling: *Provided [further], That the amount of any State's allotment under section 302(a) of such Act from this appropriation which such State certifies will not be applied for under title III of such Act may be reallocated from time to time by the Commissioner of Education among other States applying therefor in proportion to their original allotments from this appropriation, and deemed part of such allotments, except that no State's allotment shall be so increased as to exceed the allotment which would be made to it were this appropriation equal to the maximum authorized under such Act or as to exceed the amount which the Commissioner determines is needed and can be used by the State prior to July 1, 1963, for projects under its approved State plan [no part of this appropriation shall be available for the purchase of science, mathematics, and modern language teaching equipment, or equipment suitable for use for teaching in such fields of education, which can be identified as originating in or having been exported from a Communist country, unless such equipment is unavailable from any other source].*

[Grants, loans,] Loans and payments under the National Defense Education Act, next succeeding fiscal year: For making, after May 31 of the current fiscal year, loans, [and] payments under [all titles] title II of the National Defense Education Act, for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation for the same purpose for that fiscal year.

[For an additional amount for capital contributions to student loan funds under title II of the National Defense Education Act of 1958 (72 Stat. 1580-1605), applications for which were filed by the June 30, 1960, deadline date, and for loans for non-Federal capital contributions to student loan funds, \$14,430,000, of which not to exceed \$201,210 shall be for such loans for non-Federal capital contributions.] (Department of Health, Education, and Welfare Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

New obligational authority (appropriation)	159,700	187,480	194,492

Grants and payments are made to States and possessions, educational institutions, and individuals for the following purposes:

1. *Student loans.*—Funds are allotted among the States for payments to institutions of higher education to provide capital contributions to student loan funds. These payments must be matched at the rate of one dollar from institutional sources for each nine Federal dollars. In addition, loans are made to institutions which are unable to provide matching funds. In 1959, a total of 27,000 loans were made by 1,200 institutions of higher education; in 1960, loans were made to 120,002 students in 1,360 institutions; and 145,000 students in 1,407 institutions are expected to borrow in 1961.

2. *Science, mathematics, and foreign language instruction.*—Grants are made to States on a matching basis for acquisition of equipment and minor remodeling of laboratory or other space; each appropriation for this purpose is available for 2 years. Loans are made to nonprofit private schools for similar uses. The demand for these loans has not been as great as the percentage of the appropriation required to be reserved for this purpose, thus causing an unobligated balance to be lapsed each year. Grants are also made to States for supervision and administration of the program.

3. *National defense fellowships.*—Fellowships are awarded to individuals and grants are made to institutions where such individuals are enrolled. The objectives of the program are to expand graduate programs for training of college and university teachers and to promote broader geographical distribution of graduate training facilities.

	1959 actual	1960 actual	1961 estimate	1962 estimate
Number of fellowships awarded.....	1,000	1,500	1,500	1,500
Number of graduate programs.....	272	472	572	720

4. *Guidance, counseling, and testing.*—Grants are made to States to assist in establishing and maintaining programs of testing, guidance, and counseling, and contracts are made with institutions of higher education for operation of institutes for improved training of counseling personnel, including provision for stipends to those in attendance.

	1959 actual	1960 actual	1961 estimate	1962 estimate
Number of participants supported at institutions.....	2,421	3,632	3,356	3,500

5. *Advanced training in foreign areas and languages.*—Contracts are made with institutions of higher education for Federal payment of one-half the cost of operation of language and area study centers and full costs of institutes for advanced training of modern foreign language teachers. Stipends are paid to persons in attendance. In addition, 20 contracts in 1959 and 95 in 1960 were made for research in foreign language instruction.

	1959 actual	1960 actual	1961 estimate	1962 estimate
Number of individuals receiving stipends for language and area studies.....	160	474	843	1,150
Number of participants supported at institutes.....	970	2,145	4,333	4,333

6. *Educational media research.*—Research and demonstrations, financed by grants and contracts, are conducted in the use of new media for educational purposes. In 1961 a total of 120 grants and contracts were made compared with 114 in 1960 and 37 in 1959.

7. *Grants to States for area vocational programs.*—Grants are made on a matching basis to States to provide for establishing technical and subprofessional training programs.

OFFICE OF EDUCATION—Continued

Current authorizations—Continued

DEFENSE EDUCATIONAL ACTIVITIES—Continued

8. *Grants to States for statistical services.*—Grants are made on a matching basis to assist the States in improving educational statistics. Total payments to any State may not exceed \$50 thousand annually.

9. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$5,187 thousand; 1960, \$10,387 thousand; 1961, \$12,900 thousand; 1962, \$13,750 thousand.

EXPANSION OF TEACHING IN EDUCATION OF THE MENTALLY RETARDED

For grants to public or other nonprofit institutions of higher learning and to State educational agencies, pursuant to the Act of September 6, 1958, as amended (20 U.S.C. [61] 611-617), \$1,000,000. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

1. *Grants to institutions of higher education.*—Grants are made to assist in training of professional personnel in fields related to education of mentally retarded children. In 1960, about 84 fellowships, along with grants to assist in covering the cost of training each fellow, were allocated to 19 institutions. During 1961 and in 1962 about 68 fellowships are expected to be allocated, along with supporting grants, and 3 grants to stimulate development of advanced graduate programs in geographic regions not currently served.

2. *Grants to States.*—Grants are made to State educational agencies to assist in establishing fellowships for personnel engaged or preparing to engage in employment as supervisors of educational programs for mentally retarded children. In 1960, about 92 fellowships with supporting grants were awarded. During 1961 and in 1962 it is estimated that 100 fellowships will be awarded, and grants will be made to assist institutions in meeting the cost of training each fellow.

SALARIES AND EXPENSES

For expenses necessary for the Office of Education, including surveys, studies, investigations, and reports regarding libraries; coordination of library service on the national level with other forms of adult education; development of library service throughout the country; purchase, distribution, and exchange of educational documents, motion-picture films, and lantern slides; and cooperative research, surveys, and demonstrations in education as authorized by the Act of July 26, 1954 (20 U.S.C. 331-332); **[\$13,400,000]** \$15,100,000, of which not less than \$550,000 shall be available for the Division of Vocational Education as authorized. 1. *Statistics and research—(a) Services.*—Assistance is provided on planning research studies and major responsibility assumed for collection and analysis of basic educational statistics. Basic data and statistics on library resources are made available, and consultative services are rendered. The division administers grants to States for rural library services and makes studies and reports on this program. Educational media research grants, authorized by the National Defense Education Act, are administered, and advisory services in the area of educational media are provided. Motion picture films for the deaf are captioned and disseminated.

(b) *Cooperative research.*—Research and demonstration projects are carried on in cooperation with colleges, universities, and State educational agencies. Projects are supported in such areas as education of the mentally retarded, gifted, and handicapped; student achievement and characteristics; qualities of effective teachers; the learning process; and school administration. From 1957, when the program began, through 1960, 265 projects were supported, of which 104 have been completed.

2. *Administration of school assistance in federally affected areas.*—Applications for school construction and operation, aid to school districts affected by Federal activities are examined and acted upon.

3. *Vocational education.*—Information is developed and publications are issued. Advisory services are provided to Federal, State, and local agencies and to professional groups, and the States are given assistance in the appraisal and development of vocational educational programs. Grants to States are administered for vocational education under the George-Barden, Smith-Hughes, and National Defense Education Acts.

4. *Higher education.*—Advisory services are provided to Federal and State agencies, to professional groups, and to higher educational institutions; information is developed and publications are issued. The division administers programs authorized by the National Defense Education Act which relate to higher education institutions, such as the student loan program, foreign language and area centers, institutes for training teachers of modern foreign languages, institutes for training counseling personnel, and the fellowship program.

5. *International education.*—Information is developed and disseminated on education in other countries and educational exchange programs are administered in cooperation with the Department of State and International Cooperation Administration.

6. *State and local school systems.*—Information is developed and publications are issued concerning elementary and secondary education and State and local school administration; advisory services are provided to Federal, State, and local agencies, and to professional groups. The division administers aid programs authorized by the National Defense Education Act, such as financial assistance to States for strengthening science, mathematics, and foreign language instruction; for guidance, counseling, and testing; and for improving statistical services. The division also administers the grant program to increase training of personnel who will engage in education of mentally retarded children as well as the program to encourage and assist in establishment of science clubs.

7. *Program direction and services.*—Central direction, management, and other services to the various programs of the Office are provided; legislative programs and studies and reports on Federal and State educational legislation are developed; and information services are made available to the public. A program of regional representation is also provided.

8. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$1,492 thousand; 1960, \$1,712 thousand; 1961, \$1,615 thousand; 1962, \$1,531 thousand.

1. *Vocational rehabilitation services.*—Federal matching grants are made to States for providing rehabilitation services to handicapped individuals so they may engage in remunerative employment. These services include medical restoration as well as education and training. The requisite State matching varies with per capita income and averages about 38% of the total program.

2. *Extension and improvement projects.*—Under this activity funds are provided for grants on a matching basis more favorable to the States to encourage the extension of State programs in providing new services.

RESEARCH AND TRAINING

For grants and other expenses (including not to exceed \$150,000, in addition to funds provided elsewhere, for **]** *except* administrative expenses) for research, training, traineeships, and other special projects, pursuant to section 4 of the Vocational Rehabilitation Act, as amended, for expenses of carrying out the training functions provided for in section 7 of said Act, and for expenses of studies, investigations, demonstrations, and reports, and of dissemination of information with respect thereto pursuant to section 7 of said Act, **[\$15,430,000]** \$17,250,000. (29 U.S.C. 34, 37; Department of Health, Education, and Welfare Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$170 thousand for activities transferred in the estimates to "Salaries and expenses." The amounts obligated in 1961 are shown in the schedule as comparative transfers.

1. *Research and demonstration grants.*—Supports research and demonstration projects which hold promise of making a contribution to the solution of vocational rehabilitation problems common to all or several States. Funds are made available to public and private nonprofit organizations to cover part of the costs. Selected demonstrations provide prompt and widespread application of research findings and accelerate services to selected groups of severely disabled persons.

Studies of vocational rehabilitation overseas.—Research, demonstration, and research training programs are supported with foreign currencies accruing to the U.S. through the sale of surplus agricultural commodities and through other sources. The research and demonstration programs are directed to the solution of problems which hold promise of contributing knowledge to the advancement of rehabilitation both in the U.S. and in other countries. Research training and fellowships are provided to increase the rehabilitation research resources.

This Office administers the program of grants to States for vocational rehabilitation, the vocational rehabilitation research and training programs, and the program of licensing the blind to operate vending stands on Federal and other properties. Direction is provided for the Medical Facilities Survey and Construction Act as it pertains to rehabilitation facilities, and national and international program plans are developed.

1. *State program operations.*—State plans are approved and allotments and grants are made; administration of regional office activities and field relationships with States are coordinated; overall program plans are developed; old-age and survivors insurance referrals are coordinated; and Federal-State programs for rehabilitating blind persons are developed.

2. *Research and training.*—Research grants for projects to develop and demonstrate new rehabilitation methods and techniques and grants for training and traineeships to provide additional specialized personnel in rehabilitation are administered; standards and services pertaining to technical aspects of rehabilitation, medical services and facilities are developed; technical advisory services are provided.

3. *Management services.*—General administrative and management services are provided the several program areas; statistical measurement and analysis of programs is undertaken, including the development of special studies.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$13 thousand; 1959 (adjusted), \$10 thousand; 1960, \$16 thousand; 1961, \$22 thousand; 1962, \$26 thousand.

PUBLIC HEALTH SERVICE

The Service assists in safeguarding public health by: Providing grants-in-aid; furnishing consultative assistance to States for such public health services as the prevention and control of disease, hospital planning and construction; conducting research in biology, medicine and related areas of science; enforcing foreign and interstate quarantine regulations; disseminating information on health problems; and conducting medical and hospital care programs. To perform these functions the Service is organized as follows:

(a) The Bureau of State Services operates principally in the fields of Federal-State and interstate public health programs, through grants and direct operations involving research, development, demonstrations, consultative services, training, and construction of hospitals and other medical care facilities.

(b) The Bureau of Medical Services administers the medical care programs for merchant seamen, coastguardsmen, Indians, Alaskan natives, and other beneficiaries

PUBLIC HEALTH SERVICE—Continued

designated by the Congress; provides for the construction of medical facilities for Indians both in the form of grants and as direct construction; and through the foreign quarantine program performs examinations of aliens at U.S. ports and of visa applicants in foreign countries.

(c) The National Institutes of Health constitutes the primary research arm of the Service and is further described in a subsequent statement.

(d) The National Center for Health Statistics provides necessary information through the operation of the National Health Survey and the National Office of Vital Statistics.

(e) The National Library of Medicine collects and disseminates medical literature.

(f) The Office of the Surgeon General formulates general policy, furnishes central administrative services, and operates special programs such as international health activities.

Legislation has been proposed to reorganize the Public Health Service with particular reference to community and environmental health programs. The appropriation structure has been modified to reflect the proposed reorganization and the following table indicates comparable dollar levels of new obligational authority for 1960, 1961, and 1962, by major program (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate

Current authorizations:

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U.S.C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including expenses for active commissioned officers in the Reserve Corps and for not to exceed two thousand [one] six hundred commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; [and for] expenses of primary and secondary schooling of dependents, in foreign countries, of Public Health Service personnel stationed in foreign countries, in amounts not to exceed an average of [\$250] \$285 per student, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Act at rates established by the Surgeon General not to exceed \$19,000 per annum; Provided, That section 208(g) of the Public Health Service Act, as amended, is amended by striking out "eighty-five", and inserting in lieu thereof "one hundred and fifty", and by striking out "seventy-three" and inserting in lieu thereof "one hundred and fifteen"; as follows: (Department of Health, Education, and Welfare Appropriation Act, 1961.)

BUILDINGS AND FACILITIES

For construction, major repair, improvement, extension, and equipment of Public Health Service facilities, not otherwise provided, including plans and specifications and acquisition of sites, [\$3,470,000] \$16,630,000, to remain available until expended; Provided, That the balances of appropriations heretofore made available for construction, major repair, improvement, extension, or equipment of any Public Health Service facilities (except construction of Indian health facilities) and remaining unexpended on June 30, 1960, shall be merged with this appropriation. (42 U.S.C. 248; Department of Health, Education, and Welfare Appropriation Act, 1961.)

This appropriation includes all direct construction items of the Public Health Service except construction of Indian health facilities, planning for a cancer research facility, and construction of a mental health-neurology research facility. The cancer building planning funds were appropriated to the National Cancer Institute and the mental health-neurology facility is being financed by transfer of \$12.1 million in 1961 from the Mental health activities and Neurological diseases and blindness activities appropriations. A distribution of appropriations from this account for construction of buildings and procurement of facilities ancillary to various programs of the Public Health Service follows (in thousands of dollars):

National Library of Medicine.....	6,975	---	---	---
Total.....	22,397	300	3,776	16,630

PROPOSED PROJECTS

The following construction projects will necessitate the provision of additional funds in 1962:

1. *Communicable disease center.*—Arrangements for acquisition of a site and development of plans and specifica-

tions for the communicable disease center at Atlanta, Ga., will be concluded in 1961 with available funds. The request for 1962, in the amount of \$12 million is for construction of the new buildings: (a) laboratory, service, and office space, and (b) an off-site facility for breeding, holding, and grazing experimental animals. These would replace presently inadequate and geographically separated facilities at Chamblee and Savannah, Ga., and Chapel Hill, N.C.

2. *Construction of animal quarters (at the National Institutes of Health, Bethesda, Md.).*—Funds presently available are being used to construct and equip a new cage-washing facility and convert wings 14F and G from office space back to the originally intended purpose of animal production. Funds in the amount of \$85 thousand are required in 1962 for converting space to provide for proper control, rigid caretaker practices, and testing procedures required in the breeding of pathogen-free animals.

3. *Research facilities construction and site acquisition.*—Acquisition of a site for a large animal facility to serve the National Institutes of Health was accomplished in 1960. In 1961 the design of a records storage building and first stage of permanent animal buildings, construction of temporary bleeding stalls, and other minor structures will be concluded. Funds requested for 1962 are for the first

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

BUILDINGS AND FACILITIES—Continued

phase of construction: electrical feed line and part of an electrical distribution system; some animal facilities, initial water supply and sewage requirements, roads, heating and air conditioning, and development of plans and specifications for additional construction.

4. *Construction of general office building No. 2.*—The estimate provides \$700 thousand for plans and specifications for a second general office building on the NIH grounds at Bethesda, Md., for housing approximately 1,400 administrative and management personnel. Continued growth of the NIH programs indicates that the office building now under construction will not be adequate to meet foreseeable needs. Planning is estimated to require 18 months. The general office building shown in activity 14, financed from previous appropriations, is scheduled for completion in July 1961.

5. *Middle America Research Unit housing.*—Funds in the amount of \$400 thousand are required to provide housing facilities for staff members and their families stationed at the Middle America Research Unit in the Canal Zone. Planning and construction are estimated to require 14 months.

6. *Construction of master utilities extension (NIH).*—The estimate provides \$645 thousand for extension of the master utility resources to provide adequate facilities for servicing additional structures now being planned, as well as to alleviate already seriously overloaded utility resources.

CONTINUING PROJECTS

The following projects are being planned or constructed under appropriations currently available:

7. *Environmental health center.*—The 1961 appropriation act included \$785 thousand for planning a new environmental health center. Planning will continue through 1962 to determine the scope of this project.

8. *Construction of research facilities, Lexington, Ky.*

9. *Extension of Clinical Center cafeteria.*

10. *Construction of animal quarters, Hamilton, Mont.*

11. *Construction of library facilities.*

12. *Construction of dental research building.*

13. *Construction of surgical facilities.*

14. *General office building.*

The research facility at the Addiction Research Center, Lexington, Ky., is scheduled for completion in March 1962. The Clinical Center cafeteria extension will provide additional facilities for serving employees at NIH. Plans and construction will require about 16 months. The facility for small animals at the Rocky Mountain Laboratory at Hamilton, Mont., is complete except for a few items of equipment to be installed in 1961. The library facilities, scheduled for completion in June 1961, will provide a new location for the National Library of Medicine at Bethesda, Md. The dental research building is scheduled for completion about January 1961. The new surgical facilities are scheduled for completion in March 1961. Associated with the construction of the general office building is expansion of the powerplant for air-conditioning purposes. Included are extension of a building, erection of cooling tower, installation of compressor and space for installation of additional compressor equipment at a later date.

COMPLETED PROJECTS

15. *Equipment, Communicable Disease Center.*

16. *Construction of biologics standards laboratory building.*

17. *Construction of research facilities (Clinical Center, NIH).*

The purchase and installation of equipment at the Communicable Disease Center building at Atlanta, Ga., will be completed in 1961. The biologics standards laboratory and the research facilities at Bethesda, Md., form a part of the general expansion of the facilities of the National Institutes of Health.

18. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$10,597 thousand; 1959 (adjusted), \$10,523 thousand; 1960, \$10,997 thousand; 1961, \$3,431 thousand; 1962, \$7,481 thousand.

[ASSISTANCE TO STATES, GENERAL] COMMUNITY HEALTH ACTIVITIES

【To carry out the purposes】 For expenses not otherwise 【specifically】 provided for, 【of section,】 necessary to carry out sections 301, 311, 314 【(c)】, and 361 of the Act; 【to provide consultative services to States pursuant to section 311 of the Act; to make field investigations and demonstrations pursuant to section 301 of the Act; to provide for collecting and compiling mortality, morbidity, and vital statistics; and to provide】 for grants and traineeships pursuant to 【section】 sections 306, 307, and 309 of the Act; 【\$24,620,000】 and for grants of money, services, supplies, equipment, and use of facilities to States, as defined in the Act, and with the approval of the respective State health authorities, to counties, health districts, and other political subdivisions of the States, for venereal disease control activities, in such amounts and upon such terms and conditions as the Surgeon General may determine; including purchase of not to exceed three passenger motor vehicles for replacement only; and hire, maintenance and operation of aircraft; \$61,750,000, of which not less than \$4,000,000 shall be available only for grants to States, to be matched by an equal amount of State and local funds expended for the same purpose, for direct expenses of tuberculosis prevention and case-finding projects including salaries, fees, and travel of personnel directly engaged in prevention and case finding and the necessary equipment and supplies used directly of care in hospitals and sanatoriums.

【For an additional amount for "Assistance to States, general," \$2,500,000, including funds to provide project grants for public health training pursuant to section 309 of the Public Health Service Act, as amended.】 (Department of Health, Education, and Welfare

Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

Note.—Estimate for 1962 includes \$34,705 thousand for activities previously carried under the following titles (in thousands of dollars):

"Foreign quarantine activities".....	162
"Control of tuberculosis".....	6,493
"Communicable disease activities".....	15,236
"Hospitals and medical care".....	6,987
"General research and services, National Institutes of Health".....	1,967
"National Institute of Dental Research".....	2,459
"Environmental health activities".....	1,401
Excludes \$2,152 thousand for activities transferred in the estimates to:	
"Environmental health activities".....	63
"National health statistics".....	2,089

The amounts obligated in 1960 and 1961 are shown as comparative transfers.

Note.—Estimate for 1961 excludes \$170 thousand for activities transferred in the estimates to "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1960 is shown in the schedule as a comparative transfer.

1. *Grants to States for general health.*—Grants are made to assist States and local communities in providing and improving basic public health services such as public health nursing, laboratory services, communicable disease control and sanitation activities, and health services for the chronically ill and aged. An increase of \$820 thousand is requested primarily to strengthen radiological health programs.

2. *Grants for public health training.*—Grants and awards are made for approximately 625 traineeships for graduate or specialized public health training of professional health

personnel. Grants are also made to provide basic support for the public health training programs of the 11 schools of public health. In addition project grants will be made to schools of nursing, engineering, and public health to strengthen and expand graduate public health training in such schools. An increase of \$570 thousand is proposed for the project training grant program which would bring its level of support to the full \$2 million annual authorization.

3. *Accident prevention.*—Grants are made to individuals, organizations, and institutions to conduct research into the factors causing accidents. Approximately 37 research projects will be supported in 1962 as compared to 32 in 1961 and 24 in 1960. A comprehensive program of research to determine the extent and cause of accidents, and to develop sound techniques for their prevention and control will be continued. Through demonstrations and technical assistance, agencies ultimately responsible for accident prevention and control will be encouraged to adopt proven safety techniques.

4. *Chronic diseases and aging.*—Development and improvement of techniques and methods for the identification and prevention of chronic illness, for the care and restoration of the chronically ill and aged, and for meeting special health problems of older people will be continued, and assistance will be given in the application of proven techniques through technical assistance, demonstrations, and training. In 1962 particular emphasis will be given to the development of programs for care of the aged sick at home and in nursing homes, and periodic health appraisals.

5. *Communicable disease activities.*—This program provides for the investigation, prevention, and control of all communicable diseases through research, training, technical assistance to States, and emergency aid in the prevention of disease during epidemics and disasters.

(a) *Communicable Disease Center.*—Control techniques utilizing the scientific and technical skills of epidemiology, medicine, and microbiology are developed to provide aid to the State and local health departments in the prevention and control of infectious diseases. Important disease control programs include aseptic meningitis, poliomyelitis, viral encephalitis, disease vectors, staphylococcal infections, acute respiratory diseases, enteric diseases, and diseases of animals transmissible to man. The higher level in 1962 is for the intensification of studies in viral diseases and vector control; for field and laboratory investigations of polio and polioliike viruses.

The Communicable Disease Center's services to the States include epidemiologic services, laboratory diagnostic support, consultations, demonstrations, surveys, program reviews, training and audiovisual aids. Upon request of State health authorities, emergency assistance is provided to prevent and control disease outbreaks in disaster areas or during epidemics. The 1962 estimate provides increases to meet the problems associated with field use of oral polio vaccine, the development of a State laboratory improvement program, and the provision of necessary epidemic aid services and technical laboratory competence.

The following table shows selected measurable workload items:

Workload item	1959 actual	1960 actual	1961 estimate	1962 estimate
Laboratory specimens processed.....	54,382	53,910	54,000	54,500
Training program:				
Trainees.....	2,759	3,967	4,000	3,900
Courses.....	175	227	230	225
Audiovisual aids:				
Films loaned or sold.....	13,962	20,346	25,400	27,800
New productions completed.....	41	55	66	79

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

[ASSISTANCE TO STATES, GENERAL] COMMUNITY HEALTH ACTIVITIES—Continued

(b) *Control of venereal diseases.*—In 1960, as compared with 1959, infectious syphilis increased by 53% and for the third successive year there was an increase in reported cases of gonorrhea to a total of almost 250,000 cases annually.

(1) *Grants to States.*—Casefinding projects are supported in selected areas where venereal disease incidence and prevalence remain high. It is anticipated that State and local governments in these areas will increase their support of casefinding projects.

(2) *Direct operations.*—Research and evaluation activities are directed toward maintenance of uniformly satisfactory nationwide serologic services; development and introduction of better syphilis diagnostic tests; development of an immunizing agent for syphilis; improvement of diagnostic techniques for gonorrhea; evaluation of more effective methods of therapy; and the improvement of control procedures. Epidemiologic services are directed toward the maintenance of nationwide and international intelligence and control of venereal disease in areas of particular concentrations of agricultural, industrial, and military personnel and in numerous small high-prevalence areas that might become the foci for spread of infection. Scientific information and educational media are disseminated through State agencies.

(c) *Control of tuberculosis*—(1) *Grants to States.*—Grants are made to assist States in planning and administering specific control measures, including training of professional workers, casefinding, and case follow-up. The estimates for 1962 will permit the grant program to operate at the 1961 level, thereby supporting the efforts of the Public Health Service to encourage the States to put additional emphasis and resources on their tuberculosis control activities. (2) *Direct operations.*—Studies are conducted in epidemiology, prevention, detection, diagnosis, and therapy of tuberculosis in cooperation with State and local health departments, medical schools, private investigators, and others. The results of the applied research are made available to the States by providing technical assistance through demonstrations, pilot projects, consultative services, operational studies, and training activities in casefinding, case followup, and other public health practices in the tuberculosis control field.

(d) *Arctic Health Research Center.*—At the Arctic Health Research Center in Alaska, studies are made on problems of low temperature environmental sanitation, endemic and epidemic communicable diseases including diseases transmissible from animals to man, and the nutrition and physiologic problems of arctic life.

6. *Community health practice and research.*—Funds are included to conduct research, demonstrations, technical assistance and training directed toward more effective administration of State and local health services. The funds requested will support basic staff services in regional offices, research and development in public health practice, operational costs of training grant programs, health education services, and States relations activities.

7. *Dental services and resources.*—Funds are provided to (a) study the Nation's dental health and dental manpower supply, (b) conduct studies and demonstrations relating to the development and application of methods for pre-

venting and controlling dental diseases and disorders which can be applied on a community basis, (c) investigate and develop methods for extending the availability of dental care to the American people, and (d) provide professional and technical assistance relating to these activities. The increase in 1962 will be used primarily to support the development of dental programs for institutionalized and homebound patients.

8. *Nursing services and resources.*—The objectives of this program are the improvement of nursing practices of all kinds in hospitals, in the home, in health agencies, and in other allied medical care facilities. Problems related to the quality of nursing service and education, nurse supply, distribution of nursing services, and nurse-patient relationships are dealt with by means of a balanced program of intramural research, consultation based on this research, and by training grants.

(a) *Training grants.*—Grants are provided for traineeships to prepare an estimated 2,000 nurses to be teachers, supervisors and administrators, under section 307 of the Public Health Service Act. An estimated additional 2,000 nurses are engaged in short-term training.

(b) *Direct operations.*—By means of research consultation and application of research findings, professional guidance and leadership is provided to the States, local hospitals, and health services in improving their nursing practices.

9. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$402 thousand; 1960, \$570 thousand; 1961, \$481 thousand; 1962, \$481 thousand.

[GRANTS FOR] HOSPITAL CONSTRUCTION ACTIVITIES

[For grants and loans under parts C, D, and G,] To carry out the provisions of title [VI,] VI of the Act, as amended, [\$186,200,000] \$152,972,000, of which [\$150,000,000] \$115,000,000 shall be for grants or loans for hospitals and related facilities pursuant to part C, \$1,200,000 shall be for the purposes authorized in section 636 [of part D of the Act], and \$35,000,000 shall be for grants or loans for facilities pursuant to part G, as follows: \$7,500,000 for diagnostic or treatment centers, [\$7,500,000] \$12,500,000 for hospitals for the chronically ill and impaired, [\$10,000,000] \$5,000,000 for rehabilitation facilities, and \$10,000,000 for nursing homes: *Provided*, That allotments under such parts C and G to the several States for the current fiscal year shall be made on the basis of amounts equal to the limitations specified herein. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

Note.—Estimate for 1962 includes \$1,772 thousand for activities previously carried under "Salaries and expenses, hospital construction services." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

Federal funds are provided on a grant or loan basis to assist States and possessions, other public agencies, and nonprofit organizations in the construction of hospitals, rehabilitation facilities, diagnostic or treatment centers, nursing homes, public health centers, and related health facilities. Secondly, these funds permit the Surgeon General to conduct research, experiments, and demonstrations relating to the effective development and utilization of hospital services, facilities, and resources, and to make grants-in-aid to States, political subdivisions, universities, hospitals, and other public and private nonprofit institutions for such projects. Third, State agencies are provided technical assistance in making inventories of their hospitals, public health centers, and other classes of facilities, in determining the type, size, and location of additional facilities required, and in developing coordinated programs, to meet the indicated needs; technical assistance is also provided to States and communities

regarding the planning, programing, and design of hospital and medical facilities. Fourth, proposed hospital and other health facilities projects are reviewed to determine eligibility and compliance with the law and regulations. State plans and their annual revisions are reviewed and approved. Project applications, plans and specifications, wage rates, contracts, and payment requests are reviewed for compliance with standards.

Funds for construction purposes are allocated to the States and possessions on the basis of a formula which takes into account population and per capita income. Federal participation varies from one-third to two-thirds. Payments are made as construction progresses.

As of November 30, 1960, a total of 5,321 construction projects had been approved, of which 3,754 were completed and in operation, 1,324 under construction, and 243 in preconstruction stages. Upon completion, these projects will provide 223,575 hospital beds and 1,477 public health and other medical facilities. Of the approved projects 62% were for general hospitals, 3% for mental hospitals, 1% for tuberculosis hospitals, 3% for chronic disease hospitals, 5% for nursing homes, 16% for public health centers and State health department laboratories, 7% for diagnostic centers, and 3% for rehabilitation centers.

Funds requested for 1962 are estimated to be adequate to finance 561 hospital and medical facility projects which will include 22,200 beds. The general hospital beds in this total, together with those constructed without Hill-Burton program aid, will be sufficient to take care of the annual population increase, replace those which annually become obsolete and further reduce the general hospital bed deficit.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$13 thousand; 1960, \$22 thousand; 1961, \$22 thousand; 1962, \$22 thousand.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

ENVIRONMENTAL HEALTH ACTIVITIES

For expenses, not otherwise provided, necessary to carry out those provisions of sections 301, 311, 314(c), and 361 of the Act relating to environmental health, including enforcement of applicable quarantine laws and interstate quarantine regulations, and for carrying out the purposes of the Acts of July 14, 1955, as amended (42 U.S.C. 1857-1857f), [and] July 9, 1956 (33 U.S.C. 466-466d, 466f-466k), and June 8, 1960 (74 Stat. 162), including \$2,700,000 for grants to States and \$300,000 for grants to interstate agencies under section 5 of the Federal Water Pollution Control Act; purchase of not to exceed eleven passenger motor vehicles for replacement only; and hire, maintenance, and operation of aircraft; [and purchase, erection, and maintenance of portable buildings; \$27,640,000] \$41,860,000, to remain available only until June 30, [1961] 1962. (Department of Health, Education, and Welfare Appropriation Act, 1961; authorizing legislation relating to water supply and pollution control will be proposed for 1962.)

Note.—Estimate for 1962 includes \$10,773 thousand for activities previously carried under the following titles (in thousands of dollars):

“Community health activities”	63
“General research and services, National Institutes of Health”	7,366
“National Cancer Institute”	316
“Mental health activities”	236
“National Heart Institute”	968
“National Institute of Dental Research”	90
“Arthritis and metabolic disease activities”	432
“Allergy and infectious disease activities”	1,085
“Neurology and blindness activities”	217

Excludes \$1,401 thousand for activities transferred in the estimates to “Community health activities.”
The amounts obligated in 1960 and 1961 are shown in the schedules as comparative transfers.

1. *Air pollution.*—This program serves to isolate and investigate the causes of air pollution, and to determine the effects of air pollution upon life and property. These problems are dealt with through a coordinated program of research, technical assistance to State and local agencies, and a training program designed to improve competencies necessary to cope with complex problems aggravated by the increasing number of pollutants being emitted into the atmosphere and by the increasing concentration of our population in urban areas. To tap

resources outside the Service, funds are allocated to other Government agencies and to private institutions through both research contracts and research and training grants. In 1962, primary emphasis will be placed on automotive exhaust research in compliance with Public Law 86-493, which requires the Surgeon General to submit a formal report to Congress on both findings and recommendations by June 1962.

Research grants are administered to complement intramural research as an integral part of the overall research effort. Approximately 98 grants will be supported in 1962 as compared to 79 in 1961 and 74 in 1960. In both 1961 and 1962 it is estimated that 6 graduate-level traineeships will be awarded to qualified applicants to increase individual competence; in addition, grants will be made to 10 institutions to improve existing curricula.

2. *Milk, food, interstate, and community sanitation.*—This program provides leadership and technical assistance to States, municipalities, and industry in a joint effort to insure that only safe milk, shellfish, and food supplies are served to the public at large and to the 2 million travelers per day carried on interstate conveyances. Increases in 1962 will allow for the expansion of general research and an expanded training program as a necessary corollary of research expansion. Research grants made to encourage investigators and institutions to undertake research in neglected areas will increase to 265 projects in 1962 as compared to 208 in 1961 and 126 in 1960.

3. *Occupational health.*—Research grants are made to individuals, organizations, and institutions for research studies of hazards and diseases related to the occupational environment. Approximately 88 research projects will be supported in 1962, as compared to 63 in 1961 and 42 in 1960.

Research on occupational hazards and diseases is conducted and assistance provided to Federal, State, and local agencies, and industry in preventing and controlling occupational hazards and diseases. In 1962 increased emphasis will be given to the problem of occupational health hazards of uranium miners.

4. *Radiological health.*—The Public Health Service has responsibility for conducting a national program for the prevention and control of radiological hazards to public health. The Service is conducting a program of research to assess the levels and effects of radiation exposure and, in cooperation with other health agencies at Federal, State, and local levels, to minimize such dangers. Such a program involves both basic and applied research on the sources, levels, and effects of radiation, the provision of technical information and assistance to State and local agencies in developing their own radiation protection programs, and a training program to provide the competencies needed in this new and expanding area of radiation protection and control. In 1962, major emphasis will be placed on the expansion of research activities designed to determine the levels of radiation exposure to man from various sources and the precise biological effects, somatic, and genetic, of this exposure.

Research grants are administered to complement intramural research as an integral part of the overall research effort. Approximately 73 research projects will be supported in 1962, as compared to 59 in 1961 and 38 in 1960. Grants are made to institutions to provide support of expanded programs for training of radiological health specialists. Training projects will be continued at the 1961 level of 10.

While intramural research constitutes most of the direct operations under this program, technical assistance is also

supplied, and training courses for State, local, and industry personnel are conducted.

5. *Water supply and pollution control.*—Research grants are made to organizations and institutions to conduct research into problems related to water supply and pollution control. Approximately 208 projects will be supported in 1962 as compared to 161 in 1961 and 139 in 1960.

Grants are made to States and interstate agencies to assist them in safeguarding public water supplies and protecting the quality of water resources. Authorization for this program will expire June 30, 1961, and legislation will be proposed to extend the program for an additional 5 years.

Through collection of basic data, research, demonstrations, and technical services, assistance is given to public and private agencies in safeguarding public water supplies and protecting the quality of water resources. In addition, training and consultative services are provided personnel from public agencies and from industries. This program also provides for enforcement against pollution of interstate waters, the development of integrated plans for water supply and water pollution control including administration of the program for the construction of waste treatment facilities. The increase will be used to expand and accelerate programs for the control of water pollution through research, technical services, basic data collection and analysis, and interstate enforcement activities, with major emphasis being placed on the comprehensive study of the Great Lakes and Illinois River Basins.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$222 thousand; 1960, \$595 thousand; 1961, \$1,152 thousand; 1962, \$1,152 thousand.

GRANTS FOR WASTE TREATMENT WORKS CONSTRUCTION

For payments under section 6 of the Water Pollution Control Act, as amended (33 U.S.C. 466e), **[\$45,000,000]** \$50,000,000, to remain available only until June 30, **[1962: Provided, That allotments under such section 6 for the current fiscal year shall be made on the basis of \$50,000,000]** 1963.

[For an additional amount for "Grants for waste treatment works construction", fiscal years 1959-1960, \$1,816,000, to remain available until five days after the approval of this Act.] (Department of Health, Education, and Welfare Appropriation Act, 1961; Supplemental Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
Grants for construction (total costs—obligations) (object class 41).....	48,822	47,093	50,000

Unobligated balance carried forward.....	7,093	5,000	5,000
New obligational authority (appropriation)	46,816	45,000	50,000

Grants are made to States, municipalities, and interstate agencies to stimulate and assist in the construction of sewage treatment works. Funds appropriated for such grants are allocated to States and other jurisdictions on the basis of population and economic need. Within these allocations, grants for the specific projects may not exceed 30% of the cost of a project, or \$250 thousand, whichever is smaller, with at least 50% of the funds appropriated reserved for communities of 125,000 population or less. Approval and priority of construction projects are established by the State agency on the basis of financial and water pollution control needs. Projects must be included in a comprehensive program developed for water pollution control and be in conformity with the State water pollution control plan. In approving projects, the Surgeon General must consider the propriety of Federal aid in accordance with criteria approved by the President, the public benefits to be derived by the construction, the relation of the cost of the project to the public necessity, and the adequacy of provision by the applicant for proper operation and maintenance of the treatment works after completion of the construction.

1. *Indian health activities.*—This activity provides medical care and public health services for Indian and Alaska native beneficiaries.

The direct hospital program consists of 48 general hospitals and their outpatient clinics and 2 tuberculosis sanatoria. Field health services include programs in sanitation, health education, nutrition, maternal and child health, school health, communicable disease control, medical social service, public health nursing and oral health. These services are provided through health centers, clinics, and other field units. Where direct hospital and field health facilities are unavailable or inadequate, services are provided through contractual arrangements with non-Federal hospitals, private physicians and dentists, and State and local health agencies.

By 1962, direct hospital service will be discontinued at Shawnee, Okla.; White Earth, Minn.; Hoopa, Calif.; and Poplar, Mont. Care for beneficiaries involved will be provided through field health centers, contractual arrangements, or by other Public Health Service Indian hospitals. During 1961 hospitals will be opened at Gallup, N. Mex., and Sells, Ariz. New replacement hospitals will be opened in 1962 at Keams Canyon, Ariz.; Kotzebue, Alaska; and San Carlos, Ariz.

Outpatient visits..	659,410	---	689,000	---	710,000	---

A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

2. *Foreign quarantine activities.*—Aliens and visa applicants are examined in order to exclude those who are physically or mentally defective and to prevent issuance of visas to persons medically excludable from the United States. Other inspections are made to prevent the introduction into United States of quarantinable and other communicable diseases. Basic workload data are:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Medical inspection of aliens.....	2,669,768	2,945,264	3,160,000	3,380,000

Medical notifications (abroad)....	43,136	44,059	44,700	45,500

Note.—The figures for persons inspected for quarantine exclude "Local Crossers," persons who cross the U.S.-Mexican border daily or frequently.

3. *Hospital and medical care activities.*—A total of 15 hospitals and 136 outpatient facilities are operated to furnish medical and dental care to legal beneficiaries of the Service. The major beneficiary groups are American Seamen, Coast Guardsmen and their dependents, Bureau of Employees' Compensation cases, persons afflicted with

leprosy, and narcotic addicts. Among these, the largest single category is the American seamen who receive free, comprehensive medical care in its facilities in the United States for all conditions. Medical care is also provided to foreign seamen and beneficiaries of other Federal agencies on a reimbursable basis.

(a) *Inpatient and outpatient care.*—Under this activity are operated 12 general hospitals, 2 neuropsychiatric hospitals specializing in the treatment of narcotic addiction, and the National Leprosarium at Carville, La. Inpatient loads and outpatient visits are expected to be as follows:

AVERAGE DAILY PATIENT LOAD AND ANNUAL TOTAL OUTPATIENT VISITS

Hospital outpatient visits.....	627,738	634,000	637,000

¹ Hospital closed June 15, 1960.

Twenty-five full-time outpatient clinics and 111 outpatient offices serviced 546,999 visits in 1960 and 547,000 are estimated for 1961 and 1962. Care of patients in contract hospitals is also financed hereunder.

(b) *Dependents' medical care.*—This activity provides for contract care in facilities other than those operated by the Public Health Service for dependents of Public Health Service beneficiary members of the uniformed services.

(c) *Coast Guard medical services.*—Medical services are provided for Coast Guard personnel at shore stations and on vessels.

(d) *Operation of health units.*—The Service operates health programs for Federal agencies on a reimbursable basis. Consultative and related services are performed for Federal agencies relative to their employee health programs.

4. *Payments to Hawaii.*—Grants are made to Hawaii to defray the cost of care and treatment of persons afflicted with leprosy. Average daily patient load is expected to be 271 in 1962, compared with 278 in 1960 and 276 in 1961.

5. *Administration.*—This activity finances the immediate Office of the Bureau Chief.

6. *Unfunded adjustments.*—These are acquisitions of food, supplies and equipment secured without reimbursement.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

1. *Hospitals and clinics.*—Planning funds are included for the construction of a replacement general hospital for the Standing Rock Service Area in North Dakota.

Funds are included for construction of seven health stations and one health center replacement in 1962. Planning funds are also included for one health center.

2. *Personnel quarters.*—Construction of 81 permanent units is planned in 1962.

3. *Alterations.*—Funds are included for construction at 18 locations and planning of projects at 2 sites.

4. *Other plant facilities.*—This activity provides for utility projects such as replacement of sewer lines or electrical systems.

5. *Community hospitals serving Indians and non-Indians.*—Funds are requested to enable the Public Health Service to participate in the construction of needed community hospital facilities for joint use by Indians and non-Indians.

6. *Construction of Indian sanitation facilities.*—Pursuant to Public Law 86-121, funds are included for 34 sanitation projects in continental United States and Alaska.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$10,846 thousand; 1960, \$5,318 thousand; 1961, \$3,999 thousand; 1962, \$2,459 thousand.

GENERAL RESEARCH AND SERVICES, NATIONAL INSTITUTES OF HEALTH

For the activities of the National Institutes of Health, not otherwise provided for, including research fellowships and grants for research projects and training grants pursuant to section 301 of the Act; regulation and preparation of biologic products, and conduct of research related thereto; and grants of therapeutic and chemical substances for demonstrations and research; [\$83,900,000] \$87,404,000: *Provided*, That funds advanced to the National Institutes of Health management fund from appropriations included in this Act shall be available for [purchase of not to exceed ten passenger motor vehicles for replacement only;] not to exceed \$2,500 for entertainment of visiting scientists when specifically approved by the Surgeon General [; and erection of temporary structures]; *Provided further*, That all appropriations made to the Public Health Service in this Act, and available for research or training projects, may be expended pursuant to contracts made on a cost or other basis for supplies and services, including indemnification of contractors to the extent and subject to the limitations provided in title 10, United States Code, section 2354, except that approval and certification required thereby shall be by the Surgeon General. (42 U.S.C. 262, and 263; Department of Health, Education, and Welfare Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$9,333 thousand for activities transferred in the estimates as follows (in thousands of dollars):
 "Community health activities"..... 1,967
 "Environmental health activities"..... 7,366
 The amounts obligated in 1960 and 1961 are shown in the schedules as comparative transfers.

The National Institutes of Health constitutes the primary research arm of the Public Health Service. It is made up of the following seven individual institutes each with responsibility for a particular disease category: National Cancer Institute, National Institute of Mental Health, National Heart Institute, National Institute of Dental Research, National Institute of Arthritis and Metabolic Diseases, National Institute of Allergy and Infectious Diseases, and the National Institute of Neurological Diseases and Blindness.

Operations of the Institutes are divided between grant programs largely for support of research and for training of individuals, and activities performed directly or through contracts by the Service. A portion of the funds from each of the eight appropriations is pooled through a management fund to provide central services for all Institutes.

A distribution of obligations for the National Institutes of Health by major activity follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Grants:			
Research.....	192,028	277,625	296,758
Fellowships.....	14,856	22,000	22,000
Training.....	74,673	110,000	96,242
State control programs.....	10,006	13,000	13,000
Community demonstration projects....	1,347	1,500	2,000
Total, grants.....	292,910	424,125	430,000
Direct operations:			
Research.....	49,051	58,215	61,863
Review and approval of grants.....	5,971	8,211	8,646
Professional and technical assistance....	8,593	11,159	11,575
Contracts.....	19,795	21,538	21,538
Other.....	4,997	6,008	6,378
Total, direct operations.....	88,407	105,131	110,000
Grand total.....	381,317	529,256	540,000
Less nonrecurring research and training ..	-----	21,658	-----
Net program operations.....	381,317	507,598	540,000

The 1961 estimate for grants includes \$21,658 thousand for nonrecurring costs. Included in these nonrecurring costs are \$5 million for cancer research facilities and \$500 thousand for construction at the Gorgas Memorial Laboratory; both shown in the research activity; and \$16,158 thousand for advance funding under the training activity.

The above figures exclude amounts for direct construction and research facilities construction grants. They include grants for State control programs for cancer, heart, and mental health which are administered by the Bureau of State Services.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

GENERAL RESEARCH AND SERVICES, NATIONAL INSTITUTES OF HEALTH—Continued

The major activities shown in the table above are common to all institutes and are described below. The workload, where applicable, is shown under the appropriate institute together with an explanation of any unique activities.

Research grants.—Grants are made to institutions and to individuals to undertake research projects in the medical and biological sciences. Grants are awarded by the Surgeon General on the basis of merit after review and recommendation by scientifically competent study groups and the appropriate national advisory council.

Fellowships.—Grants are made to individuals in order to increase the research manpower in the medical sciences. There are several different types of awards such as pre-doctoral, postdoctoral, special, senior, and foreign research fellowships, each designed to develop research talent. Fellowships are reviewed by specialty boards and advisory councils and are awarded on the basis of merit.

Training grants.—Grants are made to institutions to develop or support training programs in the medical sciences and to individual trainees to enable them to undertake special training at an institution of their choice. Awards are made to both graduates and undergraduates. Both institutional and individual grants are awarded by the Surgeon General on the basis of merit after review by an appropriate advisory council.

Grants for State control programs.—Funds are provided to States and Territories on a formula basis for strengthening State and local clinical and educational services in the cancer, mental health, and heart disease areas.

Community demonstration projects.—Grants are awarded on a merit basis to professional and voluntary agencies, as well as State and local health departments and community hospitals, to apply more rapidly proven cancer control measures.

Direct operations—Research.—The National Institutes of Health conduct research activities largely within the framework of the various specific institutes, directed to the disease categories represented thereby.

Review and approval of grants.—Applications for research grants, fellowships, and training grants are reviewed for merit by panels of professional and lay persons distinguished in the field of medical science. Staff of the National Institutes of Health provide the administrative support and executive direction for the national advisory councils and study sections.

Professional and technical assistance.—Professional guidance and leadership are provided to States and other interested organizations in the knowledge and application of research findings through the provision of consultative services, demonstrations, training, field studies, and investigations of improved methodology.

Contracts.—In addition to research undertaken through grants and by National Institutes of Health staff, contracts are made with public and private organizations for directed research in cancer chemotherapy.

In addition to an appropriation for each program, there is an appropriation for general research and services which finances activities not related to particular categories of disease.

The appropriation for general research and services finances the division of general medical sciences which

administers research and training activities relating to basic problems in public health, medical, biological, and chemical fields. It also finances the division of biologics standards which is responsible for the regulation of biologic products and the conduct of related research. The activities listed in the program and financing schedule for the general research and services appropriation are described below.

1. *Grants*—(a) *Research.*—Funds for 1962 will support approximately 1,644 grants in 1962, as compared to 1,425 in 1961, and 1,014 in 1960.

(b) *Fellowships.*—Approximately 2,675 fellowships will again be supported in 1962 as in 1961 and 1,073 in 1960.

(c) *Training.*—Approximately 525 graduate research training grants will be in effect in 1961 and 1962 for the support of about 3,300 trainees in the areas of basic biological, medical and health-related sciences. This compares to 288 grants for the support of 2,100 trainees in 1960.

2. *Direct operations*—(a) *Biologics standards.*—Activities include administration of the Biologics Control Act, establishment of standards for preparation of biologics, testing of vaccines and their preparation, and research related to development, manufacture, testing and use of vaccines and analogous products.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$83 thousand; 1960, \$337 thousand; 1961, \$206 thousand; 1962, \$206 thousand.

NATIONAL CANCER INSTITUTE

To enable the Surgeon General, upon the recommendations of the National Advisory Cancer Council, to make grants-in-aid for research and training projects relating to cancer; to cooperate with State health agencies, and other public and private nonprofit institutions, in the prevention, control, and eradication of cancer by providing consultative services, demonstrations, and grants-in-aid; and to otherwise carry out the provisions of title IV, part A, of the Act; [\$111,000,000, of which \$700,000, to remain available until December 31, 1961, shall be available for plans and specifications for a research facility for the National Cancer Institute] \$109,292,000: Provided, That amounts appropriated under this head in the Department of Health, Education, and Welfare Appropriation Act, 1961, for plans and specifications for a research facility for the National Cancer Institute shall remain available until June 30, 1962. (42 U.S.C. 281-286; Department of Health, Education, and Welfare Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$316 thousand for activities transferred in the estimates to "Environmental health activities." The amounts obligated in 1960 and 1961 are shown in the schedules as comparative transfers.

1. Grants—(a) *Research*.—Approximately 2,168 grants will be supported in 1962 as compared to 2,017 in 1961, and 1,799 in 1960.

(b) *Fellowships*.—Approximately 301 full-time fellowships will be supported in 1961 and 316 in 1962, compared to 431 in 1960.

(c) *Training*.—Grants are awarded to accredited schools for the improvement of instruction in the curriculum; clinical traineeships are awarded to individuals for post-graduate training in such fields as surgery, pathology, radiobiology, and internal medicine; and grants are awarded to research training centers for individual traineeships. The following table summarizes these grants:

	1960 actual	1961 estimate	1962 estimate
Improvement of instruction.....	138	138	138
Clinical traineeships.....	236	240	240
Technician traineeships.....	85	---	---
Research training centers.....	59	61	61

(d) *State control programs*.—Funds are provided to States on a formula basis, to support activities such as consultation in the establishment of registries in cancer clinics, evaluation of diagnostic and therapeutic results, support of diagnostic and treatment clinics, and home nursing care for patients.

(e) *Community demonstration projects*.—Grants are awarded to professional and voluntary agencies, as well as State and local health departments and community hospitals, to apply more rapidly proven cancer control measures.

2. *Direct operations*—(a) *Research*.—Research is conducted in biochemistry, biology, biometry, epidemiology, chemotherapy, endocrinology, environmental cancer, pathology, physiology, radiation, and surgery.

(c) *Professional and technical assistance*.—Field studies and investigations are supported for the acquisition, development and application of new knowledge pertinent to the prevention, control and treatment of human cancer.

(d) *Chemotherapy contracts*.—In addition to chemotherapy activities undertaken through direct research and grants, contracts are made with public and private organizations and universities for directed research in cancer chemotherapy.

3. *Relation of costs to obligations*.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$562 thousand; 1960, \$996 thousand; 1961, \$953 thousand; 1962, \$953 thousand.

1. *Grants*—(a) *Research*.—Funds for 1962 will support approximately 1,366 grants compared to 1,350 in 1961 and 1,066 in 1960.

(b) *Fellowships*.—In 1960, 482 fellowships were provided and it is estimated that 480 can be provided in 1961 and 1962.

(c) *Training*.—In 1961 and 1962, 909 training grants can be awarded. These include funds for about 3,212 traineeships. In 1960, 736 grants provided funds for 2,548 traineeships.

(d) *State control programs*.—Grants are made to States and Territories on a formula basis. These grants help to establish, improve, and administer statewide mental health programs, including development of community services at the local level; and the development of pilot projects and demonstrations in areas such as juvenile delinquency, mental illness, school mental health, alcoholism, aging, and industrial mental health.

2. *Direct operations*—(a) *Research*.—Laboratory and clinical research is conducted in neurochemistry, neurophysiology, psychology, neuropsychiatric studies, socio-environmental studies, and neuropharmacology (including narcotics and barbiturate addiction).

(c) *Training activities*.—Support is given for in-service training of qualified staff members in subjects related to the field of mental health.

(d) *Professional and technical assistance*.—These operations consist of assistance to States in developing and expanding local mental health programs through consultation services, and field studies in developing preventive and outpatient services; survey and development of special areas in mental health; consultation services for mental hospitals and related institutions and the psychopharmacology service center.

3. *Relation of costs to obligations*.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$380 thousand; 1960, \$441 thousand; 1961, \$511 thousand; 1962, \$511 thousand.

1. *Grants—(a) Research projects.*—These grants are made to medical schools, other institutions, and to individuals for research projects. Approximately 2,515 research projects will be supported in 1962, as compared to 1,868 in 1960, and 2,412 in 1961.

(b) *Research fellowships.*—Postdoctoral, special, and senior fellowships are awarded to individuals to increase the number of research workers in the area of cardiovascular diseases. Approximately 434 awards will be supported in 1961 and 1962, as compared with 534 in 1960.

(c) *Training.*—These grants in 1961 and 1962 will provide assistance to 103 schools of medicine, osteopathy, and public health for support of undergraduate training. Funds will also provide for 238 grants for graduate research and clinical training including 714 traineeships. In 1960 comparable schools, grants, and traineeships were 103, 202, and 606, respectively.

(d) *State control programs.*—Grants are made to States and Territories, distributed on a formula basis, for improving State and local programs in prevention, education, community services, and operational research concerning cardiovascular diseases.

2. *Direct operations—(a) Research.*—Research emphasizes the acquisition of basic biochemical and physiological knowledge, and includes studies in new and improved therapeutic agents, diagnostic instrumentation, and clinical medicine on coronary artery disease, hypertension, arteriosclerosis, congestive heart failure, and related problems.

(c) *Training activities.*—Inservice training is provided for positions requiring unique combinations of cardiovascular training and experience.

(d) *Professional and technical assistance.*—Technical guidance and professional leadership are furnished to State and local health departments on heart program management in the fields of medicine, nursing, nutrition, medical social work, records and statistics, and program promotion.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$455 thousand; 1960, \$720 thousand; 1961, \$619 thousand; 1962, \$619 thousand.

1. *Grants*—(a) *Research*.—Approximately 420 grants will be supported in 1962 as compared to 405 grants in 1961 and 330 grants in 1960.

(b) *Fellowships*.—An estimated 462 fellowships including 404 part-time dental and public health students, will be supported in 1961 and 1962, as compared to 449 fellowships, including 395 part-time, in 1960.

(c) *Training*.—Approximately 51 grants will be awarded in 1962 to schools to train approximately 222 individuals for academic teaching and research careers in the various fields of dental science, as compared to 42 grants for 172 individuals in 1961 and 38 grants for 125 individuals in 1960. In addition, approximately 47 grants will be awarded in 1962 to dental schools to train students in the use of chairside assistants as compared to 40 grants in 1961.

2. *Direct operations*—(a) *Research*.—Research is conducted in the fields of periodontal diseases, growth and development, oral surgery, microbiology, pathology, histology, biochemistry, epidemiology, and biometry.

3. *Relation of costs to obligations*.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$19 thousand; 1960, \$33 thousand; 1961, \$193 thousand; 1962, \$193 thousand.

1. *Grants*—(a) *Research*.—Approximately 2,456 grants will be supported in 1962 as compared with an estimated 2,435 grants in 1961, and 1,910 in 1960.

(b) *Fellowships*.—Eighty-four fellowships are estimated for 1962, compared with 84 in 1961, and 66 in 1960.

(c) *Training*.—During 1961 and 1962 it is estimated that 267 grants will be awarded to accredited schools, for the improvement of instruction, and 80 traineeships will be provided to individuals for specialized postgraduate training. Total grants provided in 1960 were 211, and 65 traineeships were awarded.

2. *Direct operations*—(a) *Research*.—Clinical and laboratory research is conducted in the fields of arthritis, rheumatism, diabetes, and other metabolic disorders, as well as studies in the major disciplines including pharmacology, toxicology, physiology, biochemistry, nutrition, chemistry, pathology, endocrinology, and physical biology. International civilian nutrition studies are conducted throughout the world in collaboration with the Interdepartmental Committee on Nutrition for National Defense, and international programs in epidemiology, biometry, and geographic medicine and genetics provide

epidemiologic and biomathematic consultation and assistance to the intramural and extramural programs of this Institute.

3. *Relation of costs to obligations*.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$143 thousand; 1960, \$247 thousand; 1961, \$308 thousand; 1962, \$308 thousand.

1. *Grants*—(a) *Research*.—Funds for 1962 will support approximately 1,764 grants, while funds in 1961 will support approximately 1,755 grants, compared to 1,550 in 1960.

(b) *Fellowships*.—Estimated 229 awards will be made in 1961 and 1962 for postdoctoral, special, and career fellowships. This compares to 235 awards in 1960.

(c) *Training*.—Funds for 1962 will provide approximately 169 grants to train individuals in allergy and immunology, parasitology and tropical medicine, and mycology and rickettsiology. Funds in 1961 will support approximately 155 grants, compared to 85 grants in 1960.

2. *Direct operations*—(a) *Research*.—Laboratory, field and clinical research is conducted in the broad fields of allergic, infectious, and parasitic diseases. The increase in 1962 will provide for studies in biometrics research, cell biology, parasitic diseases, clinical investigations, and clinical and basic immunology.

3. *Relation of costs to obligations*.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$286 thousand; 1960, \$586 thousand; 1961, \$88 thousand; and 1962, \$88 thousand.

Transferred to "Construction of mental health-neurology research facility" (42 U.S.C. 292)		—7,000	
Appropriation (adjusted)	41,487	49,600	49,466

1. *Grants*—(a) *Research*.—Funds for 1962 will support approximately 1,301 grants compared to 1,288 in 1961 and 1,068 in 1960.

(b) *Fellowships*.—Approximately 112 fellowships will be supported in 1961 and 1962, compared to 188 in 1960.

(c) *Training*.—Funds for 1961 and 1962 will support approximately 202 grants to training institutions to establish and improve programs to train teachers and clinical investigators in neurology, ophthalmology and otology. Approximately 230 traineeships will be awarded to indi-

viduals for specialized postgraduate training in 1961 and 1962. The grants and traineeships were 182 and 188, respectively, in 1960.

2. *Direct operations*—(a) *Research*.—Research is being conducted on disorders of the brain, and spinal cord and peripheral nerves, such as epilepsy, cerebral palsy, multiple sclerosis, apoplexy, and Parkinson's disease; on neuromuscular disorders, such as muscular dystrophy; and on visual and other sensory disorders, such as glaucoma, uveitis, cataract, and hearing impairments.

(b) *Training activities*.—Support is given for inservice training of qualified staff members in subjects related to neurological and other sensory disorders.

3. *Relation of costs to obligations*.—Year-end balances of unpaid undelivered orders are as follows: 1959, \$269 thousand; 1960, \$196 thousand; 1961, \$240 thousand; 1962, \$240 thousand.

Funds are proposed for the sixth year of a \$180 million 6-year program of grants for the construction of new and improved non-Federal research facilities in the sciences related to health as authorized by the Health Research Facilities Act of 1956, as amended in 1958.

SCIENTIFIC ACTIVITIES OVERSEAS (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, and for carrying out the functions of the Public Health Service under the International Health Research Act of 1960 (74 Stat. 364), to remain available until expended, [\$3,707,000, of] \$10,084,000 which [not less than \$3,459,000] shall be available to purchase currencies which the Treasury Department shall determine to be excess to the normal requirements of the United States [; Provided, That this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) of such Act, unless such currencies are excess to the normal requirements of the United States]. (Department of Health, Education, and Welfare Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

Program by activities:			
Foreign health research (total costs—obligations) (object class 25).....	-----	3,707	10,084
Financing:			
New obligational authority (appropriation).....	-----	3,707	10,084

The research efforts to be supported with foreign currencies derived through the sale abroad of surplus agricultural commodities authorized by the Agricultural Trade Development and Assistance Act of 1954, will be directed toward the solution of disease and health problems which hold promise of contributing knowledge of value and significance to the advancement of medical research in the United States and other countries. The program for translation of research publications is a continuation and extension of activities conducted in cooperation with, and formerly financed through, the National Science Foundation.

NATIONAL HEALTH STATISTICS

For expenses of the National Center for Health Statistics in carrying out the provisions of sections 301, 305, 312(a), 313, 314(c), and 315 of the Act, \$4,642,000.

Note.—Estimate for 1962 is for activities previously carried under appropriations as follows (in thousands of dollars):
 "Community health activities"..... 2,089
 "Salaries and expenses, Office of the Surgeon General"..... 2,553
 The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

NATIONAL HEALTH STATISTICS—Continued

1. *Operations.*—The program of the National Center for Health Statistics comprises the major activities of the Public Health Service in the measurement of the health status of the Nation and in developing methods for the preparation of health statistics. It includes (a) the collection, compilation, analysis, and dissemination of statistics on births, deaths, fetal deaths, marriages, and divorces and other health data related to these basic vital events; (b) continuing surveys and special health statistics studies on the amount, distribution, and effects of illness and disability in the United States and the services received for or because of such conditions; (c) studies of health survey methods with a view to their continued improvement; and (d) technical advice and assistance on the application of statistical methods in the health and medical fields.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$128 thousand; 1960, \$115 thousand; 1961, \$115 thousand; 1962, \$115 thousand.

The National Library of Medicine assists the advancement of science through the collection and exchange of medical and other scientific information. In addition to cataloging and indexing services, the Library also publishes bibliographical guides and provides reference and research assistance.

The estimate for 1962 contemplates a continuation of the basic programs of the Library with increases for sustaining the interlibrary loan program, expanding coverage of medical literature indexed, and operating and maintaining the new library building.

Workload is reflected in the following summary data:

	1960 actual	1961 estimate	1962 estimate
Medical publications acquired.....	85,131	88,500	88,500
Titles cataloged.....	22,395	23,500	23,500
Volumes bound and repaired.....	19,447	22,000	22,000
Inquiries answered.....	9,046	10,000	12,000

Retirement payments and survivors' benefits.—Provision is made for the pay of officers retired for age, disability, or length of service, and for payments to survivors of officers who die while on the retired list. There were 298 retired officers on the rolls on June 30, 1960, and it is anticipated that there will be 335 in 1961 and 358 in 1962.

SALARIES AND EXPENSES, OFFICE OF THE SURGEON GENERAL

For the divisions and offices of the Office of the Surgeon General and for miscellaneous expenses of the Public Health Service not appropriated for elsewhere, including preparing information, articles, and publications related to public health; and conducting studies and demonstrations in public health methods, **[\$6,900,000]** \$5,275,000. (Department of Health, Education, and Welfare Appropriation Act, 1961.)

Note.—Estimate for 1962 excludes \$2,553 thousand for activities transferred in the estimates to "National health statistics." The amounts obligated in 1960 and 1961 are shown in the schedule as comparative transfers.

Includes \$170 thousand for activities previously carried under "Assistance to States, general." The amount obligated in 1960 is shown in the schedule as a comparative transfer and the amount obligated in 1961 is shown in the schedule as an actual transfer.

1. *Public health methods and reports.*—This program provides staff assistance for the Surgeon General in the formulation of Public Health Service policy. The greater part of current work has to do with the problems surrounding the delivery of health services in the Nation including (a) collection and interpretation of data to evaluate health problems, and measuring available facilities, health personnel, and organization of services against the need; (b) studies of the cost of, and methods of payment for, health services and the effect of these on utilization patterns; (c) publication of analyses of findings in order to provide a factual foundation for public and legislative consideration of national problems and proposals; (d) provision of advisory services to other government and nongovernment organizations; (e) staff services for the Surgeon General; and (f) publication of Public Health Reports, the official technical journal of the Public Health Service.

2. *International health activities.*—This program is concerned with the responsibilities in all phases of Public Health Service activities in the international field. It includes (a) participation in U.S. delegations to international, intergovernmental meetings; (b) development of policies covering all Public Health Service relationships in international matters; (c) provision of current information on the health status and conditions in foreign countries; (d) maintenance of Public Health Service relationships with multilateral and bilateral health agencies.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$59 thousand; 1960, \$37 thousand; 1961, \$37 thousand; 1962, \$37 thousand.

BUREAU OF STATE SERVICES MANAGEMENT FUND

For the purpose of facilitating the economical and efficient conduct of operations in the Bureau of State Services which are financed by two or more appropriations where the costs of operation are not readily susceptible of distribution as charges to such appropriations, there is hereby established the Bureau of State Services management fund. Such amounts as the Surgeon General may determine to represent a reasonable distribution of estimated costs among the various appropriations involved may be advanced each year to this fund and shall be available for expenditure for such costs under such regulations as may be prescribed by the Surgeon General: *Provided*, That funds advanced to this fund shall be available only in the fiscal year in which they are advanced: *Provided further*, That final adjustments of advances in accordance with actual costs shall

be effected wherever practicable with the appropriations from which such funds are advanced. (Department of Health, Education, and Welfare Appropriation Act, 1961.)

The Bureau of State Services management fund finances the research services, business operations, and program direction provided by the staff of the Chief, Bureau of State Services, and by field installations at the Communicable Disease Center, Atlanta, Ga., and the Sanitary Engineering Center, Cincinnati, Ohio. Activities of the management fund are financed by advances and reimbursements from those Public Health Service appropriations for which services are to be rendered by the fund. Formulas for determining the contribution from each appropriation are designed to reflect utilization of services performed by the management fund and take into consideration such factors as the numbers of personnel being serviced, and the dollar level for each program.

The centralized staffs of the Bureau of State Services, the Communicable Disease Center, and the Sanitary Engineering Center provide supporting services to program activities as follows:

1. *Research services* provide the central administration and operations of services required for the conduct of research activities at the Communicable Disease Center and the Sanitary Engineering Center. Included are such services as technical reporting, library and reference services, biometric services, laboratory equipment design and construction, and the operation and maintenance of buildings.

2. *Business operations* provide the centralized business management services for the Bureau of State Services and the business management services furnished by the central staffs of the Communicable Disease Center and the Sanitary Engineering Center. The activity includes such services as financial management, management advisory services, information activities, processing of Public Health Service claims, procurement, supply and property management, printing and reproduction, forms management, messenger, files and mail services.

3. *Program direction* provides for the executive direction and supervision of the various activities of the Bureau of State Services, including establishment of policies for program planning and development.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$70 thousand; 1960, \$200 thousand; 1961, \$136 thousand; 1962, \$152 thousand.

Total financing.....	24,476	27,541	30,912

Note.—Reimbursements from non-Federal sources are derived from the sale of meals to employees and others (40 U.S.C. 290).

The National Institutes of Health management fund was established to facilitate the conduct of operations of the National Institutes of Health which are financed by two or more appropriations. The activities of the fund

are financed primarily from advances and reimbursements from the several institutes. Formulas for determining the contribution from each institute are designed to reflect utilization of services performed by the management fund. Taken into consideration are such factors as use of beds in the clinical center, number of laboratory workers, total personnel, and dollar level of grant or direct operations funds obligated by the institute. A small portion of the funds comes from reimbursements from outside resources, principally cafeteria receipts, and some miscellaneous reimbursements from other Government agencies. The 1962 estimate for these activities makes provision for meeting deficiencies in the logistical supporting services and requirements for maintenance of the physical plant.

The centralized organizations of the National Institutes of Health provide supporting services to all programs as follows:

1. *Research supporting services* provide the central administration and operation of services for the conduct of research activities such as the care and breeding of experimental animals, laboratory equipment design and manufacture, and the operation and maintenance of utility services.

2. *Clinical supporting services* consist of the operation of the 516-bed clinical center together with the laboratory space required for the treatment of research patients.

3. *Administrative management* provides for the business management and plant safety services including financial management, personnel, supply management, transportation, and housekeeping services.

4. *Program direction* provides for the executive direction and planning of intramural and extramural research and other activities.

5. *Review and approval of grants* performs centralized review and approval services for the eight National Institutes of Health grants and awards programs and provides overall program coordination, application processing services, program reporting and analytical services, central records, and overall administration and audit of activated grants.

7. The *cafeteria* of the clinical center is operated by the nutrition department and furnishes meals for sale to the employees and visitors at rates sufficient to cover the cost thereof. Income and expenses for 1960, 1961, and 1962 are as follows (in thousands of dollars):

	1960 actual	1961 estimate	1962 estimate
Income from cafeteria sales.....	386	400	425
Expense:			
Foodstuff and supplies.....	164	176	183
Preparation of meals.....	219	224	242
Total expense.....	383	400	425

8. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$580 thousand; 1960, \$596 thousand; 1961, \$753 thousand; 1962, \$753 thousand.

SERVICE AND SUPPLY FUND

This fund finances the providing of certain supplies, services, and equipment to programs of the Service. It is reimbursed from the appropriations supporting the programs benefited (42 U.S.C. 231).

Budget program.—The principal operations under the fund are carried out at (a) the medical supply depot at Perry Point, Md., which maintains stocks of drugs and other medical supplies to meet in part the requirements of the Service and requisitions of other Government organizations; and (b) the activity at the National Institutes of Health which maintains a central supply of scientific and general-use materials, supplies, and special equipment and also provides services such as animal production, statistical processing, and instrumentation for the laboratories and offices at Bethesda, Md. In contrast to the operations under this revolving fund, the National Institutes of Health management fund is an annual account to which appropriated funds are advanced to facilitate the financing of clinical research, research services, administration, and other activities where the costs of operation are not readily susceptible of distribution.

Operating results.—Retained earnings amounted to \$128 thousand as of June 30, 1960, and are being retained in the fund against the possibility of future losses.

WORKING CAPITAL FUND, NARCOTIC HOSPITALS

Budget program.—Farms and other industries operated at the Fort Worth, Tex., and Lexington, Ky., narcotic hospitals provide patients with occupational outlets as a part of their therapeutic rehabilitation. Useful products are made for sale to the hospitals and other Government institutions (42 U.S.C. 258). The investment of the U.S. Government at the end of 1962 is estimated at \$590 thousand including \$134 thousand in appropriation and \$76 thousand in donated assets. Earnings are retained to meet possible future losses.

Saint Elizabeths Hospital provides care and treatment for the mentally ill, trains persons in the medical, nursing and associated disciplines concerned with the treatment of psychiatric patients, and conducts and cooperates with others in scientific research activities dealing with mental illness. The patient load consists of beneficiaries of the Federal Government, both direct and reimbursable, and residents of the District of Columbia. The sponsoring agencies such as the District of Columbia Government and the Veterans Administration reimburse the hospital on the basis of full program cost; however, beginning in 1962 it is proposed that the cost of the research activity and 40% of the cost of the training and education activity, the portion of such not directly related to patient care, be financed from this appropriation. Thus agencies reimbursing the hospital will be required to pay only the cost of patient care and treatment furnished. The average per diem reimbursement rate in 1959 and 1960 was \$6.77 and \$7.20 respectively and is estimated to be \$8.20 in 1961 and \$8.58 in 1962.

1. *Operation and maintenance.*—This activity covers the protective, therapeutic and rehabilitative programs of

the hospital, maintenance of hospital buildings, operation of a farm and an employees cafeteria, procurement of supplies and materials, and the provision of necessary administrative services.

Actual and estimated average daily patient load is as follows:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Federal beneficiaries.....	1,853	1,915	1,980	1,968
District of Columbia residents.....	5,047	5,068	5,030	4,980
Total.....	6,900	6,983	7,010	6,948

A proposed supplemental covering wage board pay increases and workload increases is shown under Proposed for later transmission.

2. *Training and education.*—The training and education program provides multidisciplinary clinical training for professional and ancillary personnel engaged or interested in mental health activities.

The number of trainees under this program are as follows:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Interns and other postgraduates.....	47	58	92	92
Student nurses.....	83	84	90	90
Total.....	130	142	182	182

3. *Research.*—The hospital plans, develops and conducts coordinated research programs and projects to obtain a better understanding of the causes of mental disorders, and of the factors bearing upon their development, treatment and possible prevention. A close working relationship with the National Institute of Mental Health is maintained and the resources of both institutions are combined in unified endeavors.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate

This appropriation consolidates all construction and facility improvement items of Saint Elizabeths Hospital, formerly financed by individual appropriations.

1. *Construction, continued treatment building.*—Funds are requested for the preparation of plans and specifications for a 450-bed treatment building to replace three smaller treatment facilities constructed during the period 1853-1872. Tentative drawings will be completed during the current fiscal year with funds appropriated in 1959.

2. *Miscellaneous improvements of existing facilities.*—Funds requested will provide for (a) renovation of Hitch-

cock Hall, (b) rebuilding of boilers, (c) modernization of dishwashing installations, (d) additional water supply line to Laundry and Warehouse, and (e) modification of electrical power substation.

3. *Construction and equipment, treatment and cafeteria building.*—This building will house 250 patients and food service facilities for these plus 500 patients from two adjacent buildings. Construction of this building, which will replace an antiquated treatment facility built in 1871, will commence in the current fiscal year.

SAINT ELIZABETHS HOSPITAL—Continued

Current authorizations—Continued

[MAJOR REPAIRS AND PRESERVATION OF] BUILDINGS AND [GROUNDS] FACILITIES—Continued

4. *Extension and modernization of administration building.*—The administration building is being modernized to furnish more adequate space and facilities. Construction is expected to commence early in calendar year 1961.

5. *Construction and equipment of treatment building.*—Construction of a 420-bed intensive treatment facility and an interdenominational chapel has been completed and both are in use.

6. *Construction and equipment of maximum security building.*—Construction of a 396-bed maximum security building has been completed. Small finishing-up projects are to be completed in the current fiscal year.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$237 thousand; 1960, \$105 thousand; 1961, \$2,910 thousand; 1962, \$499 thousand.

Under existing legislation, 1961.—A supplemental appropriation of \$297 thousand, covering the Federal share of (a) wage-board pay increases granted February 1960, (b) further increases of this type expected in January 1961, and (c) a revision in financing in recognition of increases in patient load and changes in the proportion

of reimbursable and nonreimbursable (Federal) patients, is anticipated for 1961.

SOCIAL SECURITY ADMINISTRATION

Current authorizations:

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

(Trust fund)

For necessary expenses, not more than **[\$203,200,000]** \$240,750,000 may be expended from the Federal old-age and survivors insurance trust fund: *Provided*, That such amounts as are required shall be available to pay the cost of necessary travel incident to medical examinations for verifying disabilities of individuals who file applications for disability determinations under title II of the Social Security Act, as amended: *Provided further*, That \$10,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes as amended (31 U.S.C. 665), only to the extent necessary to process claims workloads not anticipated in the budget estimates and after maximum absorption of the costs of such claims workload within the existing limitation has been achieved.

Advances to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, advances to States under section 221(e) of the Social Security Act, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary from the above authorization may be expended from the Federal old-age and survivors insurance trust fund. (42 U.S.C. 401-425; *Department of Health, Education, and Welfare Appropriation Act, 1961.*)

The old-age, survivors, and disability insurance program provides protection to over 90% of the persons in the labor force and their families against the loss of earnings because of old-age, disability, and death. Under the program, people in covered employment and the self-employed make tax contributions during their working years to provide protection for themselves and their families. Employers match the contributions made by their employees. These contributions are deposited in the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds, out of which benefit payments and administrative costs are paid.

The Social Security Amendments of 1960 were enacted September 13, 1960. Major provisions of these amendments include: (1) liberalization of insured status requirements for OASI benefits; (2) benefits for all disabled

workers, regardless of age, and their dependents; (3) increases in benefits for children; (4) a changed retirement test for beneficiaries; (5) benefits for survivors of workers who died before 1940; and (6) various technical changes to the law. The 1960 amendments will significantly increase the work to be received by the Bureau of Old-Age and Survivors Insurance in 1961. To process this added work and the costs of the Pay Raise Act of 1960, a supplemental request in the amount of \$24,460 thousand is proposed for later transmission. The volume of work appearing under the activities below includes the estimated additional workload receipts due to the amendments; however, the figures shown for 1961 in the program and financing and object schedules do not provide for financing this additional work.

1. *Maintenance of earnings accounts.*—Eligibility for insurance benefits and the amount of benefit payments are based on the lifetime earnings records maintained by the Bureau. The volume of earnings record work depends primarily on the level of employment. Employment levels are expected to continue to rise through both 1961 and 1962. This anticipated increase in employment plus a growing population will result in the receipt of a greater number of earnings items in 1962 than in 1961. The number of items to be processed in 1962 will decline because a backlog of 8.1 million items which was carried over from 1960 will be worked off in 1961.

	1960 actual	1961 estimate	1962 estimate
Earnings items:			
Received.....	262,868,846	274,887,000	279,961,500
Processed.....	254,752,215	283,003,631	279,961,500

2. *Processing OASI claims.*—Prospective beneficiaries file claims in 584 district offices located in cities throughout the country. When a claim is approved, the Treasury Department is authorized to issue benefit checks. The number of claims to be received in 1961 is higher than estimated for 1962 because of the heavy initial impact of the 1960 amendments in 1961, resulting from claims filed by those newly eligible under the amendments, and by those who will benefit from the liberalized retirement test.

	1960 actual	1961 estimate	1962 estimate
OASI claims applications:			
Received.....	2,451,974	3,113,000	2,916,000
Processed.....	2,451,809	3,065,883	2,946,300

3. *Maintenance of OASI beneficiary rolls.*—The beneficiary rolls require continuing maintenance so that benefit checks may be mailed promptly each month to beneficiaries whose entitlement continues, and so that checks may be discontinued when eligibility for benefits ceases. The number of benefits in current pay status increased by 920 thousand in 1960, in line with the normal claims activity during the year. The estimate of benefits in current pay status for 1961 increases by more than 1.2 million, reflecting the initial impact of claims activity due to the amendments. The 1962 estimate reflects a more normal rate of long-term growth of the program, as the initial effect of the amendments passes. Benefit payments will continue to rise each year with the increasing number of beneficiaries.

	[Dollars in millions]

(Trust fund)—Continued

ability claims. In most cases State agencies, under contractual arrangements, determine the existence of a disability. The Bureau reviews these determinations to assure uniformity among States. In addition, the Bureau maintains the beneficiary rolls for disability beneficiaries. The removal of the age 50 limitation for eligibility for disability insurance as provided in the 1960 amendments will result in: (a) the immediate conversion of 110 thousand disabled workers under age 50 from "freeze" to benefit status; (b) claims for benefits from workers under age 50 who become disabled; and (c) claims from dependents of both of these groups of workers. This will sharply increase the number of beneficiaries in 1961 and 1962 from the 1960 level.

[Dollars in millions]

	1960 actual	1961 estimate	1962 estimate
Claims from disabled workers:			
Received.....	1,341,973	411,000	397,000
Processed.....	347,473	410,016	403,308
Disability benefits in current pay status at end of year.....	521,550	925,000	1,102,000
Disability benefit payments.....	\$528	\$715	\$935

¹ Includes claims for a disability freeze.

5. *Hearings and appeals.*—Individuals whose claims are disallowed have the right to appeal. The increase in the estimated receipts for 1962 reflects the delayed impact of the 1960 amendments in this activity. The large number of hearing requests processed in 1960 represented the virtual elimination of an abnormal backlog carried over from prior years.

	1960 actual	1961 estimate	1962 estimate
Requests for hearings:			
Received.....	13,778	13,580	17,520

The Bureau's new headquarters building in Baltimore County, Md., was completed and occupied during 1960.

Because of major amendments to the Social Security Act since 1953 when space requirements were formulated, the building is too small to house all of the Bureau's Baltimore operations. An addition is being built to accommodate the Baltimore Payment Center and the Division of Disability Operations which at present are still housed in rented space in Baltimore. Authorization has been granted for the construction of this annex, and occupation is expected in 1962.

Current long-range projection of space needs support a conclusion that the present site may prove to be inadequate in future years. This factor coupled with rising land costs, changing zoning laws, and a limited amount of land still available adjacent to the present site requires timely action before development of the environs and prohibitive costs make it impossible to acquire more land. A request for supplemental funds in the amount of \$320 thousand is shown under Proposed for later transmission to purchase approximately 27 acres of additional land.

5. *Relation of costs to obligations.*—Year-end balances of unpaid, undelivered orders are as follows: 1959, \$8,013 thousand; 1960, \$370 thousand; 1961, \$2,676 thousand; 1962, \$0.

GRANTS TO STATES FOR PUBLIC ASSISTANCE

For grants to States for old-age assistance, *medical assistance for the aged*, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled, as authorized in titles I, IV, X, and XIV of the Social Security Act, as amended (42 U.S.C., ch. 7, subchs. I, IV, X, and XIV), **[\$2,083,000,000]** *\$2,285,800,000*, of which such amount as may be necessary shall be available for grants for any period in the prior fiscal year subsequent to March 31 of that year.

【The amounts made available for "Grants to States for public assistance", in the Department of Health, Education, and Welfare Appropriation Act, 1961, shall be available for grants for medical assistance for the aged, as authorized by the "Social Security Amendments of 1960".】 (*Department of Health, Education, and Welfare Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.*)

Grants for old-age assistance, medical assistance for the aged, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled are made to States that have plans for these programs approved by the Department of Health, Education, and Welfare. Fifty-four jurisdictions including all the States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands have approved plans for old-age assistance, aid to dependent children, and aid to the blind; 50 jurisdictions have approved plans for aid to the permanently and totally disabled.

The Social Security Amendments of 1960, authorized, effective October 1, 1960, Federal participation in a new program of medical assistance for the aged who are not recipients of old-age assistance but who require aid to pay their medical bills. State legislation is necessary in many States before they can initiate this new medical assistance for the aged program.

The Social Security Amendments of 1960 also increased Federal financial participation in medical care for the aged under the regular old-age assistance program. A higher Federal matching ratio was provided for medical vendor payments to suppliers of medical care to recipients of old-age assistance. This change, which is described below, is superimposed on the provisions for determining the Federal share that have been in effect since October 1958. Under these provisions the amount of assistance payments subject to Federal participation is limited to a monthly average expenditure of \$65 per recipient of old-age assistance, aid to the blind, and aid to the permanently and totally disabled, and \$30 per recipient of aid to dependent children. The average monthly amount is based on expenditures for money payments to recipients and payments to vendors for medical or remedial care. Within these maximums, the Federal Government provides four-fifths of the first \$30 per recipient of old-age assistance, aid to the blind, and aid to the permanently and totally disabled, and fourteen-

SOCIAL SECURITY ADMINISTRATION—Continued

Current authorizations—Continued

GRANTS TO STATES FOR PUBLIC ASSISTANCE—Continued

seventeenth of the first \$17 per recipient of aid to dependent children; plus a proportion of the balance, which varies among States from 50% to 65% depending on variations in average per capita income of the States. Somewhat different provisions are applicable to Guam, Puerto Rico, and the Virgin Islands. In all 54 jurisdictions, the Federal share of expenditures for State and local administration of the programs is one-half.

The increased Federal financial participation in payments to suppliers of medical care to recipients of old-age assistance (brought about by the 1960 amendments) is related to the amount spent for such payments up to a maximum of \$12. For States with average monthly payments over \$65, the Federal Government participates in the expenditures in excess of \$65 except that such participation is limited to the amount of the average vendor medical payment, with a maximum of \$12. The Federal share in the excess expenditure consists of the "Federal medical percentage" for the State, which ranges from 50% to 80% under a formula based on per capita income.

For States with average monthly payments of \$65 or less the additional Federal share in average vendor medical payments up to \$12 will be an additional 15% over the usual "Federal percentage" (based on per capita income) applicable to the amount of payments falling between \$30 and \$65. This percentage, when added to the usual "Federal percentage" for the second part of the payment, will give a total Federal share of from 65% to 80%. The additional Federal share of 15% will also be available to States with average monthly payments over \$65, when it is advantageous to them as an alternative to the method described in the preceding paragraph.

Comparable liberalizations of the formula for Federal participation in old-age assistance for Puerto Rico, the Virgin Islands and Guam are included in the legislation.

Under the *new* program of medical assistance for the aged, the Federal capital share of expenditures for all 54 jurisdictions is the "Federal medical percentage" of the amounts expended by the State for such assistance plus one-half the costs of State and local administration. The "Federal medical percentages" range from 50% to 80% under a formula based on per capita income.

For 1962, the total amount of Federal, State, and local expenditures for assistance and administration is estimated at \$3,992.3 million of which \$2,303.3 million represents the Federal share. The appropriation request of \$2,285.8 million is \$17.5 million less than the estimated Federal share, because the States will have available for expenditure \$17.5 million representing the Federal share of collections and adjustments for prior years. Of the total Federal share, \$1,278.6 million is for old-age assistance, \$69 million for medical assistance for the aged, \$715.9 million for aid to dependent children, \$49.4 million for aid to the blind, and \$190.4 million for aid to the permanently and totally disabled.

It is estimated that a supplemental appropriation of \$77 million will be required for 1961 in addition to the \$2,083 million already appropriated. The supplemental amount is needed to finance the additional costs due to the Social Security Amendments of 1960, described above.

Of the total increase for 1962 over 1961, about \$102 million reflects the effect of the Social Security Amendments of 1960; the rest is due to changes in average monthly payments, numbers of recipients, and the

costs of State and local administration. The increased cost of the amendments in 1962 is due in part to their being in effect for the entire year rather than for 9 months only as in 1961; and in part to anticipated growth in the program of medical assistance for the aged as more States initiate such programs.

The insurance provisions of the 1960 Social Security Amendments are expected to have the effect of somewhat reducing assistance costs.

The figures for 1961 used in the tables appearing under the activities below include the supplemental request of \$77 million; the figures shown in the program and financing schedule include only the \$2,083 million already appropriated.

1. *Payments to or on behalf of recipients.*—(a) *Old-age assistance.*—The average number of recipients per month for 1962 is estimated at 3% fewer than was estimated for 1961. The estimated average monthly payment is \$4.80 more than the estimate for 1961.

	1960 actual	1961 estimate	1962 estimate
Average number of recipients per month.....	2,386,889	2,306,000	2,236,600
Average monthly payment.....	\$66.15	\$70.80	\$75.60
Total expenditures for assistance (Federal, State, and local) (millions)....	\$1,894.6	\$1,959.1	\$2,028.9
Federal share (millions).....	\$1,112.6	\$1,163.7	\$1,213.3

(b) *Medical assistance for the aged.*—The total number of recipients of assistance under this new program in 1962 is estimated to be 1.4 times greater than was estimated for 1961. The estimated average annual amount per recipient is the same for both 1961 and 1962.

	1961 estimate	1962 estimate
Number of recipients during year.....	201,000	483,000
Average annual payment per recipient on whose behalf payments are made.....	1 \$240	\$240
Total expenditures for assistance (Federal, State, and local) (millions).....	\$48.3	\$115.8
Federal share (millions).....	\$25	\$60

¹ For 9 months of operation the average amount should be somewhat below that for 12 months, depending upon the proportion of the total represented by long-term cases. On the other hand, it is believed that the plans approved in the first 9 months of operation will be for high-income States, which may be assumed to have more comprehensive programs and therefore higher costs per recipient on whose behalf payments are made. For this reason an average of \$240 was used.

(c) *Aid to dependent children.*—The average number of persons to receive assistance per month for 1962 is 2.2% higher than is estimated for 1961. The estimated average monthly payment per person is \$0.50 more than the estimate for 1961.

	1960 actual	1961 estimate	1962 estimate
Average number of recipients per month:			
Families.....	782,156	794,300	811,900
Children.....	2,281,143	2,332,500	2,384,100
Persons.....	2,964,839	3,025,400	3,092,400
Average monthly payment per person.....	\$28.70	\$29.50	\$30.00
Total expenditures for assistance (Federal, State, and local) (millions)....	\$1,021.1	\$1,071.3	\$1,113.8
Federal share (millions).....	\$612	\$633.9	\$651.6

(d) *Aid to the blind.*—The average number of recipients per month for 1962 is estimated at 0.5 percent less than was estimated for 1961. The estimated average monthly payment is \$1 more than the estimate for 1961.

	1960 actual	1961 estimate	1962 estimate
Average number of recipients per month.....	108,723	108,000	107,500
Average monthly payment.....	\$70.75	\$73.25	\$74.25
Total expenditures for assistance (Federal, State, and local) (millions).....	\$92.3	\$94.9	\$95.8
Federal share (millions).....	\$45.3	\$45.3	\$45.4

(e) *Aid to the permanently and totally disabled.*—The average monthly number of recipients is estimated to be 3.6% more than for 1961. The estimated average payment for 1962 is \$2.10 more than for 1961. The estimates

cover costs under the presently approved plans for 50 jurisdictions.

	1960 actual	1961 estimate	1962 estimate
Average number of recipients per month.....	351,422	361,700	374,700
Average monthly payment.....	\$64.31	\$66.80	\$68.90
Total expenditures for assistance (Federal, State, and local) (millions).....	\$271.2	\$290	\$309.9
Federal share (millions).....	\$152.7	\$160.6	\$170

2. *State and local administration.*—The grants to States include half the costs of State and local administration that are found by the Department of Health, Education, and Welfare to be necessary for the proper and efficient administration of the State public assistance programs. The Federal share contributes toward the salaries and expenses of about 58,500 (including 3,400 for medical assistance for the aged) State and local personnel.

Total costs in 1962 are estimated at \$28.3 million more than in 1961; \$14 million of this increase will come from Federal funds. The increases in costs are attributable primarily to (1) salary increases given to keep pace with rising living costs and to compete successfully with other professions and agencies for staff and (2) staff increases to handle the increased number of recipients including those who are to receive medical assistance under the new program; and to provide services to recipients directed toward self-care, self-support, and strengthened family life.

Program by activities:			
Providing hospitalization and services for repatriated mentally ill American nationals (total costs—obligations).....	364
Financing:			
New obligational authority (appropriation).....	364

Public Law 86-571 (74 Stat. 308), approved July 5, 1960, provides for hospitalization and services to repatriated mentally ill American nationals until arrangements can be made for assumption of responsibility by State of residence or family.

This estimate provides for care of 60 repatriates expected to be received from abroad in 1962, and for continued care of 55 patients in Saint Elizabeths Hospital who have previously been repatriated and hospitalized. Two laws (24 U.S.C. 191a and 24 U.S.C. 196a) that have provided authority for Saint Elizabeths Hospital to care for some such patients will be repealed upon appropriation of funds for this program.

sistance for the Aged, Aid to Dependent Children, Aid to the Blind, and Aid to the Permanently and Totally Disabled. Over 6 million individuals are expected to receive aid under these programs in 1962, involving nearly \$4 billion in Federal, State, and local funds—of which over \$2.2 billion will be Federal.

A supplemental appropriation for 1961 is anticipated under "Proposed for later transmission" to enable the Bureau to implement the Social Security Amendments of 1960.

1. *Program policies and standards.*—Requirements of the Social Security Act are interpreted and specialized technical assistance is provided. Constructive developmental work with State agencies results in achieving more effective and economical administration.

2. *Review State plans and grants, evaluate State operations.*—Action is taken on new State plans and on amendments thereto to assure conformity to the act; reviews are made of operations and findings are used to assist States in administering their programs; consultation and advice are provided on problems arising in day-to-day operations; grants are processed; information is provided to the public.

3. *Collect and interpret statistics.*—Information is collected in cooperation with State agencies, to provide national statistics on public assistance which are used by the Bureau and the States in formulating policies, planning program content, setting standards, making legislative recommendations, justifying appropriation requests, answering requests, and guiding administrative action.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$15 thousand; 1959 (adjusted), \$12 thousand; 1960, \$24 thousand; 1961, \$10 thousand; 1962, \$10 thousand.

The Bureau investigates and reports on the health and welfare of children and administers grants to the States for extending and improving maternal and child health services, crippled children's services, and child welfare services.

1. *State and local health services for children.*—Policies and requirements for State maternal and child health and crippled children's programs are developed; State plans are reviewed and approved; consultative services are given to State agencies, other public and voluntary agencies and organizations, and educational institutions engaged in training professional personnel; and guides and recommendations are prepared on the provision of child health services.

2. *State and local social services for children.*—The same approach is used for the child welfare services as for the child health services.

3. *Technical assistance to States and communities for juvenile delinquency programs.*—Consultation is given to States, communities, and organizations, both public and voluntary, on standards and methods for care and treatment of juvenile delinquents, on content of State or local programs, and on problems of organization and coordina-

tion on a statewide or local basis; assistance is given to State agencies and educational institutions in planning for training of professional and nonprofessional personnel in the field of juvenile delinquency.

4. *Research in child life and services for children.*—Studies on child health and welfare, particularly social and economic problems are conducted, and the programs and services for children are evaluated. The results are interpreted to the lay and professional public through pamphlets and bulletins.

5. *Information for parents and others working with children.*—Publications are prepared and distributed on child health and welfare services. Upon request, assistance is given to States in interpreting their child health and welfare programs.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$14 thousand; 1960, \$32 thousand; 1961, \$14 thousand; 1962, \$18 thousand.

GRANTS [TO STATES] FOR MATERNAL AND CHILD WELFARE

For grants [to States] for maternal and child-health services, services for crippled children, and child-welfare services as authorized in title V, parts 1, 2, and 3, of the Social Security Act, as amended (42 U.S.C., ch. 7, subch. [V], \$51,833,000) V; 74 Stat. 995-997, \$54,833,000, of which \$20,000,000 shall be available for services for crippled children, [\$18,167,000] \$19,167,000 for maternal and child-health services, [and \$13,666,000] \$14,666,000 for child-welfare services, and \$1,000,000 for research or demonstration projects in child welfare: Provided, That any allotment to a State pursuant to section 502(b) or 512(b) of such Act shall not be included in computing for the purposes of subsections (a) and (b) of sections 504 and 514 of such Act an amount expended or estimated to be expended by the State: Provided further, That \$1,000,000 of the amount available under section 502(b) of such Act shall be used only for special projects for mentally retarded children. (Department of Health, Education, and Welfare Appropriation Act, 1961.)

New obligational authority (appropriation)	46,500	51,833	54,833

The States are required to match one-half of the amounts appropriated for maternal and child health and crippled children's services. The remainder is distributed to the States in proportion to their financial need, except that not to exceed 12½ percent of the appropriations for the above programs is available for special project grants to State agencies and to public or nonprofit institutions of higher learning.

The States are required to match all appropriated funds for child welfare services but the percent of matching required varies from 33½ to 66%. No matching funds are required for the program of grants for research or demonstration projects in child welfare authorized by the Social Security Amendments of 1960.

1. *Maternal and child health services.*—Grants are provided to States for the extension and improvement of health services for mothers and children, especially in rural areas.

2. *Crippled children's services.*—Grants are made to States to extend and improve services for crippled children including medical, surgical, corrective, and other care, especially in rural areas.

3. *Child welfare services.*—Grants aid States to establish, extend, and strengthen child welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent, and for the return of runaway children to their own homes in other States.

4. *Research or demonstration projects in child welfare.*—The Social Security Amendments of 1960 authorize grants to public or nonprofit institutions of higher learning or agencies and organizations engaged in research or child welfare activities for projects of regional or national significance or for those which demonstrate new facilities or methods which contribute to the advancement of child welfare. The \$1 million requested for this program represent an estimate of the full cost of projects that will be initiated in 1962, but which will extend into subsequent years. Actual costs are estimated at \$350 thousand in 1962 and \$650 thousand in subsequent years.

5. *Relation of costs to obligations.*—Year-end balance in 1962 for projects still in process is \$650 thousand.

SOCIAL SECURITY ADMINISTRATION—Continued**Current authorizations—Continued****COOPERATIVE RESEARCH OR DEMONSTRATION PROJECTS IN SOCIAL SECURITY**

For grants, contracts, and jointly financed cooperative arrangements for research or demonstration projects under section 1110 of the Social Security Act, as amended (42 U.S.C. 1310), **[\$350,000]** \$1,500,000. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Grants, contracts, and cooperative arrangements (total program costs).....		350	700
2. Relation of costs to obligations: Obligations incurred for costs of other years, net.....			800
Total obligations (object class 41).....		350	1,500
Financing:			
New obligational authority (appropriation).....		350	1,500

The Social Security Act authorizes grants to States, grants to public and non-profit organizations and contracts or jointly financed cooperative arrangements for the conduct of research or demonstration projects in social security. 1961 was the first year funds were appropriated for this purpose.

Funds appropriated for this program in 1961 provide (a) for studies in several localities to lay the basis for a demonstration project which will explore a broad range of community services to help the needy become more self-sufficient; (b) for exploration and review of existing knowledge and research in several special aspects of social security; (c) for approximately six projects relating to dependency and possible methods for its reduction or elimination.

The \$1.5 million requested in 1962 represents an estimate of the full cost of projects that will be initiated in 1961 and 1962 but which will extend into subsequent fiscal years. Costs are estimated at \$700 thousand in 1962 and \$800 thousand in subsequent years. Estimated costs in 1962 will provide funds to continue several of the projects started in 1961 and initiate approximately four new projects.

Relation of costs to obligations.—Year-end balance in 1962 for projects still in process is \$800 thousand.

RESEARCH AND TRAINING (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, and for carrying out the functions of the Social

Security Administration under the International Health Research Act of 1960 (74 Stat. 364), to remain available until expended, \$2,213,000, which shall be available to purchase currencies which the Treasury Department shall determine to be excess to the normal requirements of the United States.

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Maternal and child health.....			293
2. Medical care for the aged.....			7
3. Social welfare.....			398

4. Relation of costs to obligations: Obligations incurred for costs of other years, net.....			1,515
Total obligations (object class 25).....			2,213
Financing:			
New obligational authority (appropriation).....			2,213

The Agricultural Trade Development and Assistance Act of 1954, and the International Health Research Act of 1960 authorize the conduct of studies and research abroad in program matters for which the Social Security Administration has statutory responsibility in the United States. The estimate for 1962 contemplates the use of \$2.2 million in foreign currencies.

1. *Maternal and child health.*—Studies, research, research planning and research training in maternal and child health and handicapping conditions are proposed for six countries selected because of research opportunities in special health fields to gain knowledge of value to the United States, to the country involved, and internationally.

2. *Medical care for the aged.*—Studies of experiences of another country in providing medical services for the aged is proposed in order to obtain information which will help resolve problems of medical care programs for the aged in the United States.

3. *Social welfare.*—Studies of urban social welfare training programs, and specialized social services are proposed in seven countries selected because of country experiences in programs such as urban social welfare, community development of rural child welfare programs, programs to strengthen family life, juvenile delinquency, and various social security systems.

4. *Relation of costs to obligations.*—Year-end balance in 1962 for projects still in process is \$1,515 thousand.

SALARIES AND EXPENSES, OFFICE OF THE COMMISSIONER

For expenses necessary for the Office of the Commissioner of Social Security, **[\$350,800]** \$590,000, together with not to exceed **[\$278,000]** \$322,000 to be transferred from the Federal old-age and survivors insurance trust fund. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

The Office of the Commissioner directs and coordinates the social security program; and performs basic research covering the broader phases of social security.

1. *Direction and coordination of the social security program.*—This consists of (a) formulation of administrative policies; (b) certification of compliance of State laws, plans, and operations with Federal requirements and approval of grants to States; (c) coordinating interprogram activities; and (d) review of administrative management throughout the Social Security Administration.

2. *Appraisal and development of the social security program.*—Provision is made for (a) basic studies beyond the immediate scope of any bureau; (b) review and coordination of research and statistics work in the administration; and (c) the development of ways of improving economic security through social insurance and related measures.

3. *Administration of cooperative research program.*—Provision is made for administering a program of cooperative research or demonstration projects in social security.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$3 thousand; 1959 (adjusted), \$2 thousand; 1960, \$13 thousand; 1961, \$1 thousand; 1962, \$1 thousand.

SALARIES AND EXPENSES, WHITE HOUSE CONFERENCE ON CHILDREN AND YOUTH

For necessary expenses, for publication of reports, recommendations, guides, and other documents, provision of consultative or clearinghouse services, and other followup activities following the 1960 White House Conference on Children and Youth, including the expenses of continued employment of a conference director and other expenses incident to preparation of a final report of the President's national committee on such conference, \$150,000. (Act of Apr. 9, 1912, as amended, 42 U.S.C. ch. 6: Department of Health, Education, and Welfare Appropriation Act, 1961.)

The White House Conference on Children and Youth was held March 27–April 2, 1960, in Washington. A formal report was submitted to the President in October and forum recommendations and Conference proceedings have been published. With the presentation of the report to the President by the President's National Committee on Children and Youth, all official Conference activities terminated. A successor nongovernmental committee (National Committee for Children and Youth) is working closely with the Children's Bureau and State committees on followup of Conference recommendations.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States under titles I, IV, V, X, and XIV, respectively, of the Social Security Act, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under each of such titles to be charged to the appropriation therefor for that fiscal year.

In the administration of titles I, IV, V, X, and XIV, respectively, of the Social Security Act, as amended, payments to a State under any of such titles for any quarter in the period beginning April 1 of the prior year, and ending June 30 of the current year, may be made with respect to a State plan approved under such title prior to or during such period, but no such payment shall be made with respect to any plan for any quarter prior to the quarter in which such plan was submitted for approval. Federal credit unions are privately owned, cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident or productive purposes, authorized by the Federal Credit Union Act (act of June 26, 1934), as amended.

The Bureau finances its activities out of fees for services performed. These activities consist of (1) chartering new Federal credit unions, (2) supervising established Federal credit unions, (3) making periodic examinations of their financial condition and operating practices, and (4) administrative services. Data relating to activities are shown below.

	1960 actual	1961 estimate	1962 estimate
Number of Federal credit unions chartered.....	741	700	700

Operating results.—Fees from receipts cover the cost of operations. Prior to the creation of the fund in 1953, a total of \$879 thousand of appropriations had been expended.

By June 30, 1962, retained earnings are expected to increase to \$1,052 thousand. This amount includes \$315 thousand on hand at the time the fund was created. The retained earnings represent 23% of expenses in 1962, compared with 25% in 1953.

7. **Relation of costs to obligations.**—The relationship is derived by year end balances of selected resources as reflected in the following table (in thousands of dollars):

Proposed for later transmission:**LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE**

Under existing legislation, 1961.—A \$17,375 thousand increase in the Limitation on salaries and expenses, Bureau of Old-Age and Survivors Insurance, is anticipated in 1961 to process the increased workloads resulting from the enactment of Public Law 86-778, the Social Security Amendments of 1960.

LIMITATION ON CONSTRUCTION, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

Under existing legislation, 1961.—An increase of \$320 thousand in the existing Limitation on construction is needed for the purchase of approximately 27 acres of additional land adjacent to the present site for possible future expansion.

GRANTS TO STATES FOR PUBLIC ASSISTANCE**Program and Financing (in thousands of dollars)**

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
State expenditures:			
1. Payments to or on behalf of recipients:			
(a) Old-age assistance.....		58,000	
(b) Medical assistance for the aged.....		25,000	
(c) Aid to dependent children.....		-4,800	
(e) Aid to the permanently and totally disabled.....		-7,200	
2. State and local administration:			
(a) Old-age assistance.....		1,000	
(b) Medical assistance for the aged.....		5,000	
Total program costs—obligations.....		77,000	
Financing:			
New obligational authority (proposed supplemental appropriation).....		77,000	

Under existing legislation, 1961.—It is estimated that a supplemental appropriation of \$77 million will be required for 1961 to meet the net additional public assistance costs resulting from the Social Security amendments of 1960. These included amendments to title I of the Social Security Act that increased public assistance costs and amendments to the insurance provisions of the act that will reduce public assistance costs below what they would otherwise have been.

SALARIES AND EXPENSES, BUREAU OF PUBLIC ASSISTANCE**Program and Financing (in thousands of dollars)**

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Program policies and standards.....		135	
2. Review State plans and grants, evaluate State operations.....		105	
3. Collect and interpret statistics.....		60	
Total program costs—obligations.....		300	
Financing:			
New obligational authority (proposed supplemental appropriation).....		300	

Under existing legislation, 1961.—An estimated supplemental of \$300 thousand is to enable the Bureau to implement the Social Security Amendments of 1960 (Public Law 86-778). These amendments, effective October 1, 1960, increase the Bureau's workload and responsibilities because they require the Bureau to: (1) administer the new program of Medical Assistance for the Aged, (2) administer new provisions increasing Federal financial participation in the medical care provisions of Old-Age Assistance, (3) develop medical care guides and standards, publish reports on the level, content and quality of medical care and services furnished by States to recipients of public assistance and Medical Assistance for the Aged, and

(4) administer other new provisions relating to public assistance.

MEDICAL BENEFITS FOR THE AGED
Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
Providing medical benefits for the aged (total obligations).....			25,000
Financing:			
New obligational authority (proposed supplemental appropriation).....			25,000

Under proposed legislation, 1962.—Legislation is proposed to broaden medical care for the aged program enacted in 1960 to provide an opportunity for obtaining assured protection against catastrophic medical costs to an estimated total of 11 million persons. The \$25 million in the budget for 1962 represents the estimated Federal share of grants to States for the initial phase of a program which will involve estimated added Federal expenditures of about \$500 million per year by 1965.

SPECIAL INSTITUTIONS

Current authorizations:

AMERICAN PRINTING HOUSE FOR THE BLIND
EDUCATION OF THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U.S.C. 101-105), \$400,000. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
Grants for educational materials (total costs—obligations) (object class 41).....	400	400	400
Financing:			
New obligational authority (appropriation).....	400	400	400

Grants are made to this nonprofit institution in Louisville, Ky., to manufacture books and teaching materials for the blind and to distribute them on a per capita basis to all public educational institutions for the blind and to State departments of education throughout the United States and its possessions.

It is estimated that 15,800 blind students will be served by this program in 1962, compared with 14,762 in 1961 and 13,491 in 1960.

The Printing House also receives \$10 thousand annually from the Treasury Department under the appropriation, To promote the education of the blind, principal account, Bureau of Accounts.

GALLAUDET COLLEGE
SALARIES AND EXPENSES

For the partial support of Gallaudet College, including personal services and miscellaneous expenses, and repairs and improvements, as authorized by the Act of June 18, 1954 (Public Law 420),

[\$994,000] \$1,200,000: *Provided,* That Gallaudet College shall be paid by the District of Columbia, in advance at the beginning of each quarter, at [the] a rate [of] not less than \$1,295 per school year for each student attending and receiving instruction in elementary or secondary education pursuant to the Act of March 1, 1901 (31 D.C. Code 1008).

For an additional amount for "Salaries and expenses", \$80,000: *Provided,* That said appropriation shall be available for pay increases for employees of Gallaudet College, comparable to those provided by the Federal Employees Salary Increase Act of 1960, granted by administrative action, which may be effective on the same date as the pay increases provided by that Act. (*Department of Health, Education, and Welfare Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.*)

A construction program designed to replace aging buildings and provide modern facilities to accommodate increased enrollments was begun in 1956. Structures for which funds were appropriated through 1959 as well as plans and specifications for the remaining projects have been completed. Funds were appropriated in 1960 for athletic fields and stands and for major renovation and repair of existing buildings. Appropriations for 1961 provide for the construction of an auditorium, Kendall School facilities, and other items, together with additional renovation and repair projects. The 1962 estimate continues the renovation and repair projects and provides for special laboratory equipment in the Classroom-Science Building.

The following table shows appropriations through 1961 and the estimate for 1962 (in thousands of dollars).

Note.—Reimbursements from non-Federal sources above are from tuition, other student fees, gifts and grants, endowment income, and sales by auxiliary enterprises.

The University consists of an undergraduate college, a graduate school offering the master's degree and the degree

of doctor of philosophy (in chemistry, physics, zoology, and physiology), and eight professional schools. Federal funds provide approximately 55.6% of the operating costs.

1. *General administration.*—The University is administered by a private board of trustees and staff of officers.

2. *Resident instruction and departmental research.*—This activity includes all direct expenditures for the operation of the educational program in the 10 schools and colleges.

3. *Organized research.*—This activity includes expense incurred for 140 research projects financially supported by outside organizations in 1960 and for an estimated 155 projects in 1961 and 1962.

4. *University libraries.*—The general library serves the needs of 10 schools and colleges, and supervises, in part, the professional collections.

5. *Operation and maintenance of physical plant.*—The operation and maintenance staff services 41 buildings located on the University's 60-acre campus.

6. *Auxiliary enterprises.*—The dormitories, food service, bookstores, and athletic program included under this activity are intended to be self-supporting and render service at the lowest possible cost.

7. *Student aid.*—This activity represents costs of non-educational programs including the student-aid program.

CONSTRUCTION PROGRAM

Since 1945, the Federal Government has undertaken to finance a major construction program at Howard University which includes the erection of a number of new buildings and alterations and repairs to the existing physical plant. Both direct appropriations and contract authorizations have been available. Appropriations of \$12,183 thousand have been made to liquidate \$12,718 thousand in contract authorizations, leaving a balance of \$535 thousand for the auditorium-fine arts building. The following table sets forth the construction program through 1962 and the estimated obligational authority available (in thousands of dollars).

SPECIAL INSTITUTIONS—Continued

Current authorizations—Continued

HOWARD UNIVERSITY—Continued

CONSTRUCTION PROGRAM—continued

Project	Total ob- ligational authority	Status of project
1. Physical education building.....	3,947	Construction to start in 1962.
2. Powerplant facilities—electrical dis- tribution.....	500	Installation in 1962.
3. Home economics building.....	1,105	Construction to start in 1961.
4. Auditorium-fine arts building.....	4,128	To be completed in 1961.
5. Dental building.....	3,258	Completed. ¹
6. Powerplant facilities—steam.....	328	Installation in 1961.
7. Power substation.....	272	Completed.
8. Preclinical medical building.....	4,436	Completed.
9. Administration building.....	1,534	Completed.
10. Men's dormitory.....	1,898	Completed.
11. Biology-greenhouse building.....	1,770	Completed.
12. Engineering building.....	2,119	Completed.
13. Law school building.....	1,302	Completed.
14. Pharmacy building.....	904	Completed.
15. Powerplant boiler and engine.....	400	Completed.
16. Repairs to powerplant.....	100	Completed.
17. Science hall building.....	307	Completed.
18. Telephone duct system.....	122	Completed.
19. Vacuum pump.....	20	Completed.
20. Women's dormitory.....	1,750	Completed.
Total.....	30,202	

¹ Except for 1 item of equipment.

The 1962 estimate provides for a physical education building and completion of powerplant facilities and renovations.

The estimate also provides cash to liquidate obligations incurred under contract authority previously granted by law to meet cost increases for the auditorium-fine arts building. Construction delays and unforeseen subsoil conditions made necessary the obligation of an additional \$95 thousand. The remaining balance of \$440 thousand will be administratively rescinded.

CONSTRUCTION OF BUILDINGS

For the construction and equipment of a [home economics] physical education building and powerplant facilities under the supervision of the General Services Administration, on the grounds of Howard University, including engineering and architectural services and travel, [\$1,433,000] \$4,447,000, to remain available until expended. (20 U.S.C. 123; Department of Health, Education and Welfare Appropriation Act, 1961.)

1. *Executive direction and program coordination.*—Over-all direction and coordination are given to all activities of the Department. Staff assistance is provided to develop the Department's legislative programs; to analyze the Department's programs and goals, including identification of current and emerging problems; to appraise Federal-State relationships; to coordinate Department activities

concerning problems affecting the aging population; and to aid the Secretary in carrying out the Department's responsibilities with respect to international activities and the special institutions. Services are also provided for defense emergency operations plans of the Department and for internal security functions.

2. *Public information.*—The office of public information directs the Department's public information activities, providing services to press, radio, and other media and specific information to those interested.

3. *Administrative and financial management.*—Staff advice is provided to the Secretary and guidance is furnished to the operating agencies with regard to administrative and financial management, personnel, property and records management, office services, organization, staffing, and control problems. This activity includes the Department library which supplies headquarters staff with library materials and related services. Financial management including analyses of departmental program budgets, development of fiscal policies and procedures, and conduct of internal audits is provided. In addition, certain direct administrative and financial services are furnished the operating agencies as well as to the Office of the Secretary.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$10 thousand; 1959 (adjusted), \$9 thousand; 1960, \$12 thousand; 1961, \$12 thousand; 1962, \$12 thousand.

The Secretary is represented in each of the regions by a regional director who is responsible for carrying out departmental policies and for leadership, coordination, evaluation, and administrative supervision of all program representatives from the various operating agencies who are located in the regional offices.

The Social Security Amendments of 1960, Public Law 86-778, approved September 13, 1960, expands the workload and hence the employment of the Social Security Administration. A proposed increase in the limitation on funds from the Federal old-age and survivors insurance trust fund to cover the cost of increased administrative services for the expanded field employment of the Social Security Administration is anticipated. It is included under the Proposed for later transmission section.

1. *Field administration.*—This activity includes review, evaluation, and coordination of Department program operations conducted through the regional offices as well as personnel, fiscal, and office services for approximately 18,000 regional employees.

2. *Grant-in-aid audits.*—The Division audits 33 grant-in-aid programs to determine whether these grants were expended by the States, local subdivisions and nonprofit organizations for the purposes for which they were appropriated. In addition, it audits State activities in the utilization of Federal surplus property. There will be an incoming workload of about 1,800 audits in 1961, and 2,000 in 1962 as compared with 1,597 in 1960.

3. *State merit systems.*—Seventeen various grants-in-aid are made to States contingent upon compliance with Federal regulations and standards relating to State personnel administration. The division reviews 70 State merit systems in 290 State agencies administering grant programs and also renders technical services concerning increased efficiency of personnel administration to requesting States.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$21 thousand; 1959 (adjusted), \$17 thousand; 1960, \$70 thousand; 1961, \$13 thousand; 1962, \$16 thousand.

Under the Federal Property and Administrative Services Act of 1949, as amended, the Secretary (a) allocates needed surplus personal property to State agencies for educational, public health, and civil defense purposes; (b) transfers surplus real property for educational and public health purposes, subject to disapproval by the Administrator of the General Services Administration; (c) administers the rights of the United States under the terms and conditions of transfer; and (d) promulgates regulations governing the operation of the program and enforces such regulations.

The following table shows actual and anticipated property allocations to schools, hospitals, and civil defense agencies through operation of the program:

The Office of the General Counsel acts as legal adviser to the Secretary, the regional office staffs, and the operating agencies of the Department. The estimate for 1962 reflects an increased workload resulting from the expansion of the old-age and survivors insurance program, the Social Security Amendments of 1960, public health, and legislative activities.

Public Law 86-778, approved September 13, 1960, extends the Social Security Act and imposed certain additional workloads upon this Office, and this will occasion a supplemental in 1961.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$15 thousand; 1959 (adjusted), \$14 thousand; 1960, \$9 thousand; 1961, \$9 thousand; 1962, \$9 thousand.

Intragovernmental funds:

WORKING CAPITAL FUND

【The paragraph under this head in the Federal Security Agency Appropriation Act, 1953 (66 Stat. 369) is amended to read as follows:】

【Working capital fund: There is hereby established a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of (1) a central reproduction service; (2) a central visual exhibit service; (3) a central supply service for supplies and equipment for which adequate stocks may be maintained to meet in whole or in part the requirements of the Department; (4) a central tabulating service; (5) telephone, mail, and messenger services; (6) a central accounting and payroll service; and (7) a central laborers' service: *Provided*, That any stocks of supplies and equipment on hand or on order shall be used to capitalize such fund: *Provided further*, That such fund shall be reimbursed in advance from funds available to bureaus, offices, and agencies for which such centralized services are performed at rates which will return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.】 (Department of Health, Education, and Welfare Appropriation Act, 1961.)

The fund, in addition to its basic authority for providing reproduction, tabulating, and supply services on a central basis for department headquarters (42 U.S.C. 905) has been authorized by Public Law 86-703, to expand its activities to include a visual exhibit service, telephone, mail, messenger, laborers', accounting and payroll services on a centralized basis.

Central laboring services will be provided by the fund during 1961. However, before the other activities contained in the expanded authority are undertaken, studies will be made to ascertain if incorporation of these activities into the fund would be either more efficient or economical.

Budget program—1. *Reproduction.*—Consists of offset printing, mimeographing, photographic, visual aids, micro-filming, and addressograph services for the Department's headquarters and for other Government agencies as required. This activity also includes procurement of printing from Government Printing Office and other

sources and procurement and distribution of congressional materials.

2. *Tabulating.*—Provides tabulating services on a centralized basis for all of the headquarters units of the Department. The services performed cover fiscal, payroll, and statistical data processing.

3. *Supply services.*—Includes purchasing and supply functions on a centralized basis for the headquarters units of the Department. In 1961, laborers' services will be provided.

Operating results and financial conditions.—Government investment at end of 1962 is expected to consist of donated assets and retained earnings. The earnings are retained to meet future needs.

SALARIES AND EXPENSES, OFFICE OF FIELD ADMINISTRATION

Under existing legislation, 1961.—A proposed increase in the transfer limitation from the Federal old-age and survivors insurance trust fund of \$165 thousand is anticipated for 1961 as a result of Public Law 86-778 which expanded the operation of the Social Security Administration. This has increased the level of operations of the Office of Field Administration in that it requires additional staff to provide administrative services for the

expanded field employment of the Bureau of Old-Age and Survivors Insurance.

Under existing legislation, 1961.—A supplemental appropriation for \$16 thousand is anticipated for 1961 to provide necessary legal services for the program of medical assistance for the aged (title VI of Public Law 86-778).

In addition, a proposed supplemental for increase in Federal old-age and survivors insurance trust fund limitation of \$33 thousand is anticipated for 1961, to provide legal services to carry out the amendments to the Social Security Act made by Public Law 86-778.

GENERAL PROVISIONS

Sec. 202. None of the funds appropriated by this title to the Social Security Administration for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

Sec. 203. The Secretary is authorized to make such transfers of motor vehicles, between bureaus and offices, without transfer of funds, as may be required in carrying out the operations of the Department.

Sec. 204. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 15 per centum of the direct costs.

Sec. 205. Except as otherwise provided under the appropriation to the Public Health Service for "Buildings and facilities", any obligational authority for planning or construction of any building made available to the Department of Health, Education, and Welfare, which otherwise expires for obligation on June 30, 1960, shall remain available until June 30, 1961.

Sec. 206. The Secretary is authorized to make available not to exceed \$1,000 \$2,000 from funds available for salaries and expenses under this title for entertainment, not otherwise provided for, of officials, visiting scientists, and other experts of other countries.

Sec. 207. Appropriations to the Public Health Service available for research grants pursuant to the Public Health Service Act shall also be available, on the same terms and conditions as apply to non-Federal institutions, for research grants to hospitals of the Service, of the Veterans Administration, or to Saint Eliza-

beths Hospital. (*Department of Health, Education, and Welfare Appropriation Act, 1961.*)

GENERAL PROVISIONS

【SEC. 901. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.】

SEC. 【902】 901. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

SEC. 【903】 902. Appropriations contained in this Act available for salaries and expenses shall be available for payment in advance for dues or fees for library membership in organizations whose

publications are available to members only or to members at a price lower than to the general public and for payment in advance for publications available only upon that basis or available at a reduced price on prepublication orders.

SEC. 【904】 903. Appropriations contained in this Act available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 【905】 904. Appropriations contained in this Act available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1961.*)

OFFICE OF SALINE WATER
SALARIES AND EXPENSES

For expenses necessary to carry out provisions of the Act of July 3, 1952, as amended (42 U.S.C. 1951-1958), authorizing studies of the conversion of saline water for beneficial consumptive uses, **[\$1,355,000] \$1,755,000.**

[For an additional amount for "Salaries and expenses", \$400,000.]
(Department of the Interior and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate

New obligational authority (appropriation)	1,755	1,755	1,755

This program finances research to develop low-cost processes for converting saline water to fresh water in quantities sufficient for municipal, industrial, and agricultural use.

1. *Administration and coordination.*—This activity provides for administration of federally sponsored research, coordination of 100 Federal and non-Federal research projects, and stimulation of private and public saline water research including participation in scientific and technical organizations.

2. *Research and development.*—Both basic and applied research, development, and evaluation work are accomplished by means of contract or grant to Federal or non-Federal agencies, institutions, commercial organizations, and consultants.

3. *Relation of cost to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$316 thousand; 1959 (adjusted), \$315 thousand; 1960, \$731 thousand; 1961, \$501 thousand; 1962, \$301 thousand.

OFFICE OF SALINE WATER—Continued

CONSTRUCTION, OPERATION, AND MAINTENANCE—continued

This appropriation provides for the practical application of research in the conversion of saline water to fresh water.

1. *Engineering and design.*—Preconstruction planning has been completed on three plants and will be completed on the remaining two by the end of calendar year 1961.

2. *Construction.*—Construction is well underway on the first sea water conversion plant at Freeport, Tex., and recently has started on two others—a sea water plant at San Diego, Calif., and a brackish water plant at Webster, S. Dak. The 1962 program provides for construction of the second brackish water plant at Roswell, N. Mex., and the third sea water plant at an east coast location.

3. *Operation and maintenance.*—Completed demonstration plants are operated by the Federal Government for a limited time to obtain operational data for research purposes. In 1962 one plant will be operated for a full year and two plants for part of a year. Funds received from the sale of product water from these plants will be returned directly to the U.S. Treasury.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$0; 1960, \$1,311 thousand; 1961, \$1,116 thousand; 1962, \$1,151 thousand.

OFFICE OF OIL AND GAS

SALARIES AND EXPENSES

For necessary expenses to enable the Secretary to discharge his responsibilities with respect to oil and gas, including cooperation with the petroleum industry and State authorities in the production,

processing, and utilization of petroleum and its products, and natural gas, [\$480,000] \$531,000. (Department of the Interior and Related Agencies Appropriation Act, 1961.)

Program and Financing (in thousands of dollars)

	1960 actual	1961 estimate	1962 estimate
Program by activities:			
1. Coordination of oil and gas activities.....	345	418	418

1. *Coordination of oil and gas activities.*—This office provides coordination and advice to the Federal Government on all phases of petroleum and gas. Studies, domestic and worldwide, are made to maintain data on adequacy of petroleum and gas, to define deficient areas or elements, and to develop ways to alleviate actual or potential deficiencies.

2. *Administration of oil import program.*—This appropriation finances the Oil Import Administration established March 13, 1959, pursuant to Presidential Proclamation No. 3279 as amended. The Administration establishes quotas for importers of crude oil and oil products under the mandatory quota system.

3. *Oil import appeals.*—The Oil Import Appeals Board has been established to conduct hearings on appeals from importers who request a change in their quota or who do not qualify for a quota.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$1 thousand; 1960, \$2 thousand; 1961, \$2 thousand; 1962, \$2 thousand.

Unobligated balance carried forward.....	1,313	-----	-----
New obligational authority.....	21,255	18,720	15,706
New obligational authority:			
Appropriation.....	21,450	18,720	15,706
Transferred to "Operation and maintenance" (74 Stat. 47).....	-195	-----	-----
Appropriation (adjusted).....	21,255	18,720	15,706

The Administration is responsible for the marketing of electric power produced at 20 Federal hydroelectric generating plants in service or under construction and wheels power from certain non-Federal plants in the Pacific Northwest.

Transmission facilities programed are associated with generating capacity at Federal plants shown on the following schedule:

	First generation (fiscal year)	Installed capacity (kilowatts, name plate rating)
Projects in operation (July 1, 1961).....	---	6,189,250
Additional generation under construction:		
Hills Creek.....	1962	30,000
Ice Harbor.....	1962	270,000
Cougar.....	1963	25,000
Total.....	---	6,514,250

The transmission facilities program also will enable the Administration to wheel power over the Federal grid from the non-Federal Rocky Reach, Mayfield, Carmen-Smith and Wanapum Dams.

The amounts of peak generating capacity on the Federal system at the beginning and end of the 1962 budget construction period follow (in kilowatts):

	July 1, 1961	July 1, 1962
Federal projects.....	7,087,000	7,461,000
Power wheeled from non-Federal projects.....	838,000	1,811,000
Total.....	7,925,000	9,272,000

1. *Construction in progress.*—Includes amounts requested in 1962 to carry forward work on transmission facilities started in prior years.

2. *New construction.*—Includes the amounts needed in 1962 to start construction of new transmission and substation capacity to carry to load centers the power production of generating installations scheduled to be in operation by July 1965 and to meet service requirements of power customers.

3. *General plant.*—Provision is made for acquisition of items such as tools; office, shop, laboratory, and transportation equipment; and portable communication equipment used in the construction and operation of the Federal power system.

Program costs to this appropriation are presented in the following table (in thousands of dollars):

BONNEVILLE POWER ADMINISTRATION—Continued

This program provides for the operation and maintenance of the Administration's high-voltage electric grid system, and for commercial and administrative expenses in marketing wholesale electric power from Federal dams, and in wheeling power from non-Federal dams in the Pacific Northwest.

1. *System operation and maintenance.*—This activity consists of the scheduling and dispatching of power; the operation of substations; the maintenance of transmission lines, substations, and other electrical facilities; load estimating; the integration of resources; and system engineering.

Transmission facilities of the Administration are expanded as increased generating capacity becomes available. The system will be operated and maintained at a level which will insure safe operation and provide a reliable grade of service to customers. Power resources and requirements work will be continued to obtain the fullest utilization of generating capacity, streamflows and stored water. The following table shows the rising trend in several of the more important indexes of the operation and maintenance activity:

	1960 actual	1961 estimate	1962 estimate
Transmission plant in service (millions).....	\$446.6	\$461	\$495
Transmission lines (structure miles).....	7,462	7,555	7,703
Number of substations.....	193	201	207
Transformer capacity (kilovolt-amperes).....	14,005,000	14,109,000	14,558,000
Energy sales (millions of kilowatt hours).....	29,700	28,200	29,200
Points of delivery.....	360	374	380
Firm wheeling for non-Federal projects (kilowatts).....	374,000	560,000	838,000

2. *Purchase of energy and wheeling charges.*—Contract arrangements with certain customers provide annual settlements of energy exchange accounts on a net balance basis. Funds are provided for the first time to cover such a payment to a utility customer.

3. *Power contracts and rates.*—This activity provides for the negotiation of power sales and wheeling contracts, the billing and servicing of contracts, including the development of service plans, and the establishment of wholesale rate schedules. Receipts which are deposited in the Treasury amounted to \$69,311 thousand in 1960, and are estimated at \$70,000 thousand and \$73,800 thousand for 1961 and 1962.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, \$133 thousand; 1959 (adjusted), \$127 thousand; 1960, \$161 thousand; 1961, \$161 thousand; 1962, \$161 thousand.

A supplemental appropriation is anticipated for 1961 under Proposed for later transmission. Legislation will be proposed to put the accounts of this administration on a revolving fund basis.

ADMINISTRATIVE PROVISIONS

Appropriations of the Bonneville Power Administration shall be available to carry out all the duties imposed upon the Administrator pursuant to law [], including purchase of one aircraft for replacement only]. Appropriations made herein to the Bonneville Power Administration shall be available in one fund, except that the appropriation herein made for operation and maintenance shall be available only for the service of the current fiscal year.

Other than as may be necessary to meet local emergencies, not to exceed 12 per centum of the appropriation for construction herein made for the Bonneville Power Administration shall be available for construction work by force account or on a hired-labor basis. (16 U.S.C. 832-832l; Executive Order 8526; 43 U.S.C. 593-A; 16 U.S.C. 825s; 59 Stat. 10, 21-22; 62 Stat. 382; 43 U.S.C. 389, 485h; Public Works Appropriation Act, 1961.)

Unobligated balance lapsing.....	399		
New obligational authority (appropriation)	717	800	800

¹ Includes capital outlay as follows: 1960, \$3 thousand; 1961, \$3 thousand; 1962, \$3 thousand.

Note.—Reimbursements from non-Federal sources result from sale of power and are applied against charges for purchase of energy and wheeling by customers of the Administration.

Power generated at 14 Corps of Engineers—Civil hydroelectric generating plants in a 10-State area of the Southeast is marketed by the Administration through transmission facilities owned by others. A schedule of generation through 1964 of projects in operation or under construction follows:

	First generation (fiscal year)	Installed capacity (kilowatts—name-plate rating)
Projects in operation.....		1,283,600
Projects under construction:		
Hartwell.....	1962	330,000
Walter F. George.....	1963	130,000
Barkley.....	1964	130,000
Total.....		1,873,600

1. *System operation and maintenance.*—Provision is made for scheduling and dispatching power generation; scheduling storage and release of water; administering

contractual operation requirements; and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase of energy and wheeling charges.*—Provision is made for the payment of wheeling fees and for the purchase of firming energy in connection with disposal of power from the Kerr and Jim Woodruff projects under contracts with utility companies.

3. *Power contracts and rates.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Receipts which are deposited in the Treasury amounted to \$17,878 thousand in 1960 and are estimated at \$17,900 thousand and \$17,140 thousand for 1961 and 1962.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate

Power developed at Corps of Engineers—Civil dams in four Southwestern States is marketed by the Administration through transmission facilities owned by others and through its own system. The Administration also contracts for the sale, purchase, and interchange of power with other systems.

1. *System operation and maintenance.*—The Administration operates and maintains a transmission system as follows (dollars in thousands):

	1960 actual	1961 estimate	1962 estimate
Transmission system in service.....	\$24,548	\$27,050	\$27,910
Transmission lines, miles.....	1,061	1,061	1,061
Number of substations.....	8	8	8

2. *Power contracts and rates.*—This includes (a) negotiation of power contracts, (b) billing and servicing contracts, (c) development of wholesale power rates, and (d) participation in determination of the cost of amortizing the Federal Government's investment in power facilities.

Receipts which are deposited in the Treasury amounted to \$8,538 thousand in 1960, and are estimated at \$8,364 thousand and \$9,262 thousand for 1961 and 1962.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):

	1959 actual	1960 actual	1961 estimate	1962 estimate
Selected resources at end of year:				
Inventory and items on order: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	4	5	7	8
Accrued annual leave (leave earned but not taken by employees, charged to activity costs).....	-48	-48	-48	-48
Total selected resources at end of year.....	-44	-43	-41	-40
Selected resources at start of year.....		44	43	41
Obligations incurred for costs of other years, net..		1	2	1

Legislation will be proposed to put the accounts of this administration on a revolving fund basis.

Appropriation:			
Current indefinite.....	4,981	5,000	5,000
Permanent indefinite.....	19		
Appropriation.....	5,000	5,000	5,000

Note.—Reimbursements from non-Federal sources result from sale of power and are applied against charges for purchase of energy and wheeling by customers of the administration.

This fund, accumulated from power receipts, is available permanently for emergency expenses necessary to insure continuity of service. It is also available in such amounts as may be approved annually in appropriation acts to cover costs in connection with the purchase of electric power and rentals for use of facilities for transmission and distribution of power. Electric power is purchased from private utilities and generating and transmission cooperatives. Power is transmitted to customers through wheeling arrangements with private utilities, and through lease of the transmission capacity in facilities owned by the generating and transmission cooperatives (16 U.S.C. 825s-1).

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management administers 477 million acres of public lands for the purpose of conserving forest, range, mineral, and water resources. In addition, the Bureau administers mining and mineral leasing on other federally owned lands, on former Federal lands where the minerals have been reserved in public ownership for all the people, and on the submerged lands of the Outer Continental Shelf.

The work of the Bureau produces revenue from various sources which is distributed as follows (in millions of dollars):

Proposed supplemental due to pay increases.....		996	

1. *Lease and disposal of lands and mineral resources.*—Applications are acted upon for all types of land use and for lease of mineral resources, principally oil and gas. Field investigations are made to determine the best use of resources. General information is disseminated to the public. Land records are being modernized. The increase for 1962 will provide for additional workload in

adjudication of applications and field examination and classification. The status of land and minerals adjudication case workload is summarized below:

	1959 actual	1960 actual	1961 estimate	1962 estimate
Cases pending, start of year.....	95,296	100,675	105,246	93,000
New and reactivated cases.....	178,697	259,107	308,000	328,000
Cases closed.....	173,318	254,536	320,246	330,000
Cases pending, end of year.....	100,675	105,246	93,000	91,000

2. *Management of grazing lands.*—The 176 million acres of Federal range (exclusive of Alaska) used by nearly 29,000 stockmen are supervised. Proper management of these lands provides protection from fire, erosion, overuse, unseasonal use and trespass, thereby perpetuating forage resources. The increase for 1962 will accelerate the conduct of resource inventories, increase attention to multiple-use management of the public lands, and will expand substantially all aspects of fire presuppression.

3. *Forestry.*—A total of 46 million acres of commercial forest lands and 114 million acres of woodland-type lands are managed. The 1962 program includes the sale of 1.2 billion board feet of timber for anticipated receipts of \$41 million. The increase in 1962 will provide for improved management and development of forest resources and for increased fire protection in Alaska.

4. *Cadastral surveys.*—Surveys are performed to locate and identify legal boundaries of lands under application for lease or disposal, including submerged lands on the Outer Continental Shelf; administer timber sales; manage forest and range lands; provide legal descriptions needed by other Federal agencies; and to permit States to obtain title to lands granted them by law. The increase in 1962 will provide for additional surveys especially in Alaska.

5. *Soil and moisture conservation.*—Public lands in critical condition from erosion are conserved and rehabilitated. The 1962 program will benefit 1,841,000 acres. Cooperative programs will continue with other agencies in river basin areas. The net reduction in 1962 is due to completion of emergency rehabilitation work performed in 1961.

6. *Fire suppression.*—Fires are fought which are on or threatening lands under the jurisdiction of the Bureau of Land Management. During the first 3 months of fiscal year 1961 over 350,000 acres were burned and costs of suppression were in excess of \$2.9 million. A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

7. *Maintenance of physical facilities.*—Physical maintenance is provided for about 330 structures used as storehouses, equipment shelters, fire crew barracks and similar purposes. The increase in 1962 will provide for increasing costs of current and deferred maintenance.

8. *Maintenance of access roads.*—Maintenance is provided for access roads on Coos Bay Wagon Road grant lands and on the public domain.

9. *Weed control.*—Areas infested by halogeton, Medusa rye, host plants to the beet leafhopper, and other poisonous and noxious weeds are treated. The increase in 1962 will permit an expansion of this program.

10. *General administration.*—Executive direction is provided and services such as accounting, personnel administration, procurement, budgeting, and internal auditing are performed in support of the programs of the Bureau. The increase in 1962 will provide for replacement of accounting machines and more adequate staffing for administrative activities.

1. *Access roads.*—Rights-of-way are acquired and roads are constructed on public domain and Coos Bay Wagon Road grant lands to afford access to stands of marketable timber. Service roads to recreational areas are also provided.

2. *Buildings.*—Provision is made to house supplies, equipment, and personnel at isolated locations, principally in connection with fire control measures in Alaska.

3. *Recreational facilities.*—Minimum facilities are provided for outdoor recreation on certain public domain lands to be retained in Federal ownership for multiple-use management and where public use has become extremely heavy.

OREGON AND CALIFORNIA GRANT LANDS

(Receipt limitation) (indefinite)

For construction, operation, and maintenance of access roads, reforestation, and other improvements on the revested Oregon and California Railroad grant lands, on rights-of-way adjacent thereto, and on other Federal lands in the Oregon and California land-grant counties of Oregon; and acquisition of rights-of-way and of existing connecting roads on or adjacent to such lands; an amount equivalent to 25 per centum of the aggregate of all receipts during the current fiscal year from such lands, to remain available until expended: *Provided*, That the amount appropriated herein for road construction shall be transferred to the Bureau of Public Roads, Department of Commerce; *Provided further*, That the amount appropriated herein is hereby made a reimbursable charge against the Oregon and California land-grant fund and shall be reimbursed to the general fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876) [*Provided further*, That any unexpended balances heretofore appropriated under the head "Construction", for construction of access roads and acquisition of rights-of-way and of existing connecting roads on or adjacent to the revested Oregon and California Railroad grant lands shall be merged with this appropriation]. (16 U.S.C. 588, 594; 43 U.S.C. 1, 2; 50 Stat. 874; 69 Stat. 374; Department of the Interior and Related Agencies Appropriation Act, 1961.)

New obligational authority (appropriation).....		8,000	9,200

Twenty-five percent of the revenue from the revested Oregon and California grant lands is made available for the following:

1. *Construction and acquisition.*—Provision is made for construction of roads, acquisition of existing connecting roads and rights-of-way for roads into stands of high-value timber.
2. *Reforestation and improvements.*—Provision is made for reforestation of Oregon and California timberlands and development of recreation facilities.
3. *Operation and maintenance.*—Provision is made for maintenance of recreational facilities and of access roads to highly valuable stands of timber.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase of [twenty-eight] *seventeen* passenger motor vehicles for replacement only; purchase of two aircraft (one of which shall be for replacement only); purchase, erection, and dismantlement of temporary structures; and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title: *Provided*, That of appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than expenditures made under the appropriation "Oregon and California grant lands") shall be reimbursed from the 25 per centum referred to in subsection (c), title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund designated the "Oregon and California land-grant fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road grant fund": *Provided further*, That appropriations herein made may be expended on a reimbursable basis for (1) surveys of lands other than those under the jurisdiction of the Bureau of Land Management and (2) protection and leasing of lands and mineral resources for the State of Alaska [*Provided further*, That contributions may be accepted toward the costs of administration, management, and protection of lands under the jurisdiction of the Bureau of Land Management and of surveying federally controlled or intermingled lands].

[The limitation under this head in the Department of the Interior and Related Agencies Appropriation Act, 1961, on the number of aircraft that may be purchased is increased from two to three, of which two are for replacement only.] (Department of the Interior and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

RANGE IMPROVEMENTS

(Receipt limitation) (indefinite)

For construction, purchase, and maintenance of range improvements pursuant to the provisions of sections 3 and 10 of the Act of June 28, 1934, as amended (43 U.S.C. 315), sums equal to the aggregate of all moneys received, during the current fiscal year, as range improvements fees under section 3 of said Act, 25 per centum of all moneys received, during the current fiscal year, under section 15 of said Act, and the amount designated for range improvements from grazing fees from Bankhead-Jones lands transferred to the Department of the Interior by Executive Order 10787, dated November 6, 1958, to remain available until expended. (Department of the Interior and Related Agencies Appropriation Act, 1961.)

Unobligated balance brought forward.....	-297	-182	-15
Unobligated balance carried forward.....	182	15	
New obligational authority (appropriation)	769	863	917

This appropriation is derived from receipts from grazing of livestock on public lands and on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by Executive Order 10787. On public lands, the fee from grazing includes a range improvement fee (usually 25%) which is available for range improvements when appropriated (43 U.S.C. 315i). On Bankhead-Jones lands, 25% of the fees from grazing are designated as available for range improvements.

Public Law 86-649, approved July 14, 1960, permanently appropriated certain moneys to the Secretary of the Interior. Timber purchasers or permittees provide bond or deposit to assure fulfillment of contracts. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes. Moneys received in forfeiture of such bonds or for road maintenance are available for necessary forest improvement, protection, and rehabilitation, and for road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only and amounts in excess of the cost of doing the work are transferred to miscellaneous receipts (74 Stat. 507-8).

Appropriation.....	52,283	51,650	58,083

1. *Expenses, sale of timber, etc., on reclamation lands.*—A portion of the receipts from timber sales on public lands set aside for reclamation purposes is used to cover the cost of sales (41 Stat. 202; 53 Stat. 1196).

2. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

3. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal funds (42 Stat. 1448), to

be used for construction and maintenance of public roads and support of public schools (44 Stat. 740).

4. *Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

5. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant fund are paid the counties in which the lands are situated, to be used as other county funds (39 Stat. 218).

6. *Payments to States (grazing fees).*—The States are paid 33⅓% of the fees from each grazing district on Indian lands ceded to the United States within the State's boundaries (43 U.S.C. 315j).

7. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 711).

8. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

9. *Payments to States from grazing receipts, etc., public lands within grazing districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

10. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

11. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 37½% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on public lands.

14. *Payments due counties, submarginal land program, Farm Tenant Act.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U.S.C. 1012).

BUREAU OF INDIAN AFFAIRS

The responsibility of the United States toward the Indian people includes protection and development of trust property and the furnishing of services not otherwise available to Indians and which are normally provided other citizens through Government and private agencies. Active programs are being aimed toward the integration of like services to Indians and non-Indians

BUREAU OF INDIAN AFFAIRS—Continued

through the same sources and toward increased Indian participation in the management of Indian-owned resources. States and counties are participating at an increasing rate in the service programs, usually with financing by the United States demanded because of the tax-exempt status of Indian lands. The ultimate goal of the entire program is to have the Indian people take their proper place in the social and economic life of the Nation on the same basis as other citizens.

Current authorizations:

EDUCATION AND WELFARE SERVICES

For expenses necessary to provide education and welfare services for Indians, either directly or in cooperation with States and other organizations, including payment (in advance or from date of admission), of care, tuition, assistance, and other expenses of Indians in boarding homes, institutions, or schools; grants and other assistance to needy Indians; maintenance of law and order, and payment of rewards for information or evidence concerning violations of law on Indian reservations or lands; and operation of Indian arts and crafts shops and museums; **[\$63,669,000] \$71,521,000.** (25 U.S.C. 13, 631-640; 48 U.S.C. 169, 250a, 250f, Department of the Interior and Related Agencies Appropriation Act, 1961.)

1. *Educational assistance, facilities, and services.*—Financial assistance is extended to public schools enrolling Indian children under State and district contracts. Where such facilities are inadequate or nonexistent, the Bureau operates boarding and day schools. Pupils included in the following table under "Dormitories" attend public schools but are domiciled in federally operated dormitories. The figures shown for public schools include children for whom grants are also made under Federal impact legislation administered by the Department of Health, Education, and Welfare. Assistance is also given to adult Indians through an education and training program.

NUMBER OF PUPILS

	1960 actual	1961 estimate	1962 estimate
Boarding schools.....	24,485	27,835	27,835
Dormitories.....	3,814	3,730	3,730

This program promotes the economic advancement of the Indians through the utilization of their resources.

1. *Forest and range lands.*—This activity covers management, protection, and utilization of the forest, range, and wildlife resources on nearly 50 million acres of Indian-owned lands.

	1960 actual	1961 estimate	1962 estimate
Timber cut:			
Million board-feet.....	575	590	634
Dollar value (in thousands).....	11,874	12,172	13,079
Number of cattle units grazed.....	835,000	835,000	835,000

2. *Fire suppression.*—Funds under this item provide for the payment of the cost of suppression and prevention of fires on or threatening Indian reservations. Approximately 60 million acres require protection. A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

3. *Agricultural and industrial assistance.*—Funds under this activity provide for improved methods in farming, homemaking, the management of a revolving loan credit program for small business enterprises, administration of the Revolving fund for loans heretofore financed from that fund, and formulation of plans for readjustment legislation pertaining to special trust relationships between Indian tribes and the Federal Government.

4. *Soil and moisture conservation.*—Land-use practices based on land inventories and soil conservation plans are introduced to control erosion and promote more effective utilization of soil and water resources.

5. *Maintenance of roads.*—The Bureau of Indian Affairs road system which requires maintenance includes 16,229 miles of roads on Indian reservations.

6. *Development of Indian arts and crafts.*—Production and marketing of the products of Indian crafts are fostered through formation of production groups; establishing of standards; and improving of markets, design, and production methods.

7. *Management of Indian trust property.*—Banking services are provided for Indians; land is purchased, sold, exchanged, and leased; and Indian property and money rights are safeguarded. Consolidation or disposal of fractionated land holdings, especially in those areas affected by readjustment legislation, is to be accomplished.

8. *Repair and maintenance of buildings and utilities.*—Federal buildings and their related utility and communication systems are maintained.

	1960 actual	1961 estimate	1962 estimate
Square foot buildings maintained (in thousands).....	21,550	23,485	24,300

RESOURCES MANAGEMENT—Continued

9. *Operation, repair, and maintenance of Indian irrigation systems.*—Approximately 300 irrigation systems serving about 864,000 acres of Indian and mixed-ownership lands are operated and maintained. About 79% of the cost is financed from collections from water users, leaving 21% to be met from funds appropriated under this activity.

11. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table (in thousands of dollars):

CONSTRUCTION

For construction, major repair, and improvement of irrigation and power systems, buildings, utilities, and other facilities; acquisition of lands and interests in lands; preparation of lands for farming; and architectural and engineering services by contract; **[\$14,215,000]** \$19,561,000, to remain available until expended: *Provided*, That no part of the sum herein appropriated shall be used for the acquisition of land within the States of Arizona, California, Colorado, New Mexico, South Dakota, Utah, and Wyoming outside of the boundaries of existing Indian reservations: *Provided further*, That no part of this appropriation shall be used for the acquisition of land or water rights within the States of Nevada, Oregon, and Washington either inside or outside the boundaries of existing reservations.

For an additional amount for "Construction", \$2,050,000, to remain available until expended, of which \$250,000 shall be available for payment to the Parshall, North Dakota Special School District Numbered 3 for the construction of school facilities which shall be available to Indian children. (25 U.S.C. 13, 381b, 386, 465, 631-640; Department of the Interior and Related Agencies Appropriation Act, 1961; Second Supplemental Appropriation Act, 1961.)

1. *Buildings and utilities.*—This consists of construction and additions to schools, dormitories, quarters, office, and other buildings; improvement to sewer systems and waterworks; major alterations and rehabilitation of existing buildings and utilities; preparation of plans and engineering supervision and surveys. The 1962 program will include new construction of 15 school projects, 1 utility system, and rehabilitation of 9 school projects and 4 utility systems and rehabilitation of the U.S.M.S. *North Star*.

2. *Irrigation systems.*—This work consists of construction, extension, and rehabilitation of irrigation systems on Indian reservations for the utilization of irrigable lands.

3. *Land acquisition.*—Purchases are made to consolidate lands in heirship status. No program is planned for 1962.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table (in thousands of dollars):
