MESSAGE TRANSMITTING THE BUDGET

TO THE CONGRESS OF THE UNITED STATES:

I transmit herewith the Budget of the United States for the fiscal year ending June 30, 1927. The receipts and expenditures shown in detail in the Budget are summarized in the following statement:

Summary (exclusive of postal revenues and postal expenditures paid from postal revenues)

	Estimates, 1927	Estimated, 1926	Actual, 1925
Total receipts-----	\$3, 824, 530, 203. 00	\$3, 880, 716, 942. 00	\$3, 780, 148, 684. 42
Total expenditures (including reduction of the public debt required by law to be made from ordinary receipts)-----	3, 494, 222, 308. 44	3, 618, 675, 186. 00	3, 529, 643, 446. 09
Excess of receipts-----	330, 307, 894. 56	262, 041, 756. 00	250, 505, 238. 33

The Budget for the fiscal year 1926, transmitted to the Congress December 1, 1924, indicated that for the fiscal year ending June 30, 1925, there would be a surplus of receipts over expenditures of \$67,884,489. The actual surplus was \$250,505,238. This gratifying difference between estimates and actual results was due mainly to unexpected increases in receipts, though a reduction in expenditures helped to swell the total.

In that Budget it was estimated that receipts for the current fiscal year, 1926, would amount to \$3,641,295,092 and expenditures \$3,267,551,378, forecasting a surplus of receipts over expenditures of \$373,743,714. This estimate, which was made one year ago, has materially changed. On the receipt side of the ledger the operations of the first five months of this fiscal year indicate that we will receive \$3,880,716,000, or approximately \$239,420,000 more than was estimated a year ago. There is an estimated increase of \$143,125,000 alone in our internal revenue, which indicates plainly the stimulating influence on business of the last tax reduction law. On the other side of the ledger the expenditures estimated a year ago as \$3,267,551,000 stand increased to-day to an estimated total of \$3,618,675,000, an increase of \$351,124,000. The indications to-day are that the surplus for 1926 will amount to \$262,041,000.

It is appropriate here to mention the principal items which enter into this increase in estimated expenditures for the current fiscal year, for which it will be necessary to submit supplemental estimates to the Congress. The Budget for 1926 carried an estimate of \$50,000,000 for the second payment to the adjusted service certificate fund established under the World War adjusted compensation act of May 19, 1924. In submitting that estimate it was stated that should the number of applications increase beyond what the then conditions indicated as being probable a supplemental estimate for the additional amount found necessary would be presented. The indications to-day are that there will be issued not less than 3,400,000 certificates of insurance at an average cost of \$1,033 each. On this basis the cost of the World War adjusted compensation act will reach \$3,500,000,000. The law contemplates that the financial obligation which it creates shall be equally distributed over a period of 20 years. To meet this obligation will require a payment of \$106,000,000 to the fund on January 1, 1926, in addition to the \$50,000,000 already appropriated. Subsequent payments to the fund will require approximately \$140,000,000 annually.

To meet refundment of taxes illegally collected it was estimated that our expenditures for 1926 would amount to \$90,000,000. The indications to-day are that \$151,000,000 will be required, a difference of \$61,000,000. The funds on hand July 1, 1925, amounted to \$60,000,000, which are now practically exhausted. An additional amount of \$91,000,000 will therefore be required to meet the refunds for the remainder of the current fiscal year.

For Federal aid to post roads, an additional amount of \$23,000,000 will be required this fiscal year, and to meet the estimated deficit in postal revenues \$37,100,000 will be required. This latter requirement grows out of the postal pay act which operated to change an estimated surplus of \$10,000,000 in postal revenues over postal expenditures to the deficit above stated.

The next item of importance is that of pensions, for which it is estimated an additional \$8,000,000 will be required this fiscal year.

The outlook for the coming fiscal year, 1927, is most favorable. For that year it is estimated that the ordinary receipts will be \$3,824,530,000 and expenditures \$3,494,222,000. This indicates a surplus of \$330,307,000.

The outlook for 1926 and 1927 shows clearly that the united effort of the executive and the legislative branches of the Government for economy in Federal expenditure is bearing further fruit. In the last four fiscal years there have been two substantial reductions in taxes. We have restored to the people a part of the moneys which we required of them to finance the World War. We are now in that favorable position of making further restoration. The Budget and Accounting Act contemplates that under the fortunate conditions in which we now find ourselves the Chief Executive will make recommendation to the Congress as to the disposition of the estimated surplus of revenue.

I therefore recommend to the Congress that there be a further reduction in taxes. The satisfaction of the Chief Executive in having opportunity to make such a recommendation I know is shared by the Congress whose cooperation with the Chief Executive in the conservation of public funds has made such reduction in taxes possible.

The Ways and Means Committee of the House of Representatives has been informed of our prospective surplus for 1927. That committee has prepared a tax-reduction measure. While this measure somewhat exceeds my judgment in amount and in exemptions, yet with continuing pressure for economy in the Federal service and the stimulation to business which will result from tax reduction, perhaps we can make further reduction in taxes of about the sum total of our prospective surplus for 1927 without jeopardizing the balancing of our annual Budget. Such reduction, however, should carry an obligation not to embark upon new projects involving large annual expenditure if we are to safeguard the integrity of our Budget.

The fruits of our labors are reflected in the coming tax reduction measure. It reflects the results of the efforts of the servants of the people and of their representatives in behalf of the people. There have been no partisan politics in expediting its preparation. I hope this same condition will prevail in the consideration of the measure.

This brings us to the estimates of appropriations contained in this Budget. These estimates reflect the continuing pressure for economy in Federal expenditure. We have about reached the time when the legitimate business of Government can not be carried on at a less expenditure than that which it now requires. With regard to our legitimate business the operating costs have been reduced to nearly a minimum. The normal expansion of the business of the Government in keeping pace with a growing nation will involve added expenditure from year to year. The effort for economy, however, must continue. So far as it lies within the power of the Chief Executive it will continue.

In the following table a comparison is made of the appropriations for 1926 with the estimates for 1927.

The foregoing table indicates that the estimates of appropriations for 1927, payable from the Treasury, will exceed by approximately \$50,600,000 the amount of the appropriations for 1926. However, in making a comparison we should take into consideration the lawful obligations for 1926 which have been determined since the appropriations were made for that year. Taking these into consideration the estimates for 1927 are less than the appropriations and lawful obligations for 1926.

For the air services the estimates carry a total of \$42,447,000, being \$16,793,000 for the Army, \$22,391,000 for the Navy, \$2,750,000 for the air mail service of the Post Office Department, and \$513,000 for the National Advisory Committee for Aeronautics. These amounts include contract authorizations, but do not include funds provided in other Budget items for the pay of commissioned Air Service officers, pay, housing, and general maintenance for the enlisted Air Service personnel, and certain classes of supplies and services of a general character furnished for Air Service activities. If we include these items, the total for the Air Service in 1927 will amount to not less than \$76,000,000. The estimates for the air services for 1927 are in furtherance of the program which was commenced this year. They propose procurement from the industries of airplanes, engines, and accessories to the amount of \$20,954,000. The remaining \$21,493,000 is for maintenance, operation, experimentation, and research. This Government is pursuing an orderly policy toward building up its air services. We realize that our national defense air problem is primarily an industrial problem. We also know that the airplane industry to-day is dependent almost entirely upon Government business for its development and growth. We do not contemplate any competition between the Government and industry in the production of airplanes. With the business already assured by the appropriations for the current year, and with the further assurance of the business contemplated by these estimates, there should be a normal and proper growth in this industry. If we continue this policy, there need be no fear of our national defense situation in so far as air strength is concerned.

The estimates carry a total of \$21,940,529 for prohibition enforcement. This includes \$12,634,000 for the activities of the Coast Guard in preventing rum smuggling. As an adjunct to prohibition enforcement, the Coast Guard has proved most effective. Its activities should be enlarged and strengthened at the earliest date possible. To this end I propose to recommend to the Congress additional appropriations for the Coast Guard for the remainder of this fiscal year and for all of the next fiscal year. This contemplates enlargement of the Coast Guard fleet and personnel. Provision is not made in this Budget for this additional equipment and personnel for 1927 for the reason that it should be presented to the Congress as one program, involving as it does the current as well as the next fiscal year. It is also proposed to recommend to the Congress that legislation be enacted which will authorize the construction of 10 new Coast Guard cutters which will cost approximately \$9,000,000. While the initial cost of these cutters is large, we will effect an economy, as they will replace the destroyers now being used and which are expensive of operation. The normal functions of the Coast Guard alone require these additional cutters so that their construction will serve a twofold purpose. Every available resource of the Government will be employed for prohibition enforcement. The recommendations which I propose to make to the Congress are for the purpose of increasing this available force. Such reinforcement is needed. It should be provided.

In furtherance of the policy of backing this salutary law with the full power of the Federal Government, funds are carried in these estimates for strengthening that branch of the Department of Justice which is charged with the prosecution of violators of its provisions.

Federal aid to States is annually requiring more than \$109,000,000. The estimates for this purpose for 1927 amount to something in excess of \$110,000,000. The principal item is for rural post roads, for which an appropriation is requested of \$80,000,000. The law authorizing Federal aid to States for the construction of rural post roads does not extend beyond the fiscal year 1927. The amount of \$80,000,000 does not discharge our entire obligation under existing law. In addition to this amount, the authorizations for which moneys have not yet been appropriated amount to \$116,700,000. Without further legislative action we therefore face an obligation of \$116,700,000 over and above the amount carried in this estimate.

The Federal Government has been generous in its participation in State road construction, having authorized appropriations amounting to \$690,000,000. Federal contribution to State highway construction was probably necessary in the beginning. It has expedited and so coordinated construction that all expenditures would be reflected in a definite and approved connecting highway system. On the other hand, there is no question but that Federal contributions have materially added to State expenditures of State funds. I am speaking for what I consider the best interest of the people. While Federal taxes have been reduced, State and other governmental taxes have been steadily increasing. Federal aid to States has influenced this latter condition. We should keep in mind that the moneys which we have contributed to the States are taken from the people who in turn also pay the moneys required by the States to finance their own portion of the cost. The entire cost falls upon the people. It is true that the necessity and demand for good roads are constantly increasing, but they should not be constructed faster than the taxpayers can afford to pay for them. The amount that taxpayers can afford to pay can best be determined by the citizens of each State.

Since the inauguration of the present plan of Federal aid for road construction, the States have changed their methods of financing their portion of the expenses. A large majority of the States now exact a gasoline tax, thereby distributing the cost of road construction and maintenance to those who benefit by their use. The construction of roads within a State is purely a State matter and ultimately should be financed by State funds. Without further legislative enactment the States would carry on their construction to an amount which they can afford to spend on it. But the National Government is committed to the policy of assisting in the building of good roads. Commitments have been made both by the States and the Nation in this direction. It is necessary to continue them for the present.

I do, however, recommend for the consideration of the Congress that future legislation restrict the Government's participation in State road construction to primary or interstate highways, leaving it to the States to finance their secondary or intercounty highways. This would operate to diminish the amount of Federal contribution.

For reclamation projects I am recommending \$6,437,000. In making appropriations this fiscal year for reclamation projects the Congress laid down certain restrictions on the use of the funds for new construction. These restrictions contemplated that the Government would have assurance of the paying ability of the projects before funds were expended on them. I am in full accord with this policy. Its continuance is recommended in the estimates appearing in this Budget.

Again I urge upon the Congress the need of additional office buildings in the District of Columbia in the interest of Federal efficiency and economy. The actual conditions that face some of the Government's most important activities because of lack of sufficient and suitable working space are almost inconceivable. The Department of Agriculture occupies 45 widely separated buildings in the District. The General Accounting Office is scattered in 20 different locations, while the Internal Revenue Bureau of the Treasury Department, with its financial problems involving the greater bulk of the Federal Government's receipts, is housed in 11 indifferent and in some cases most unsatisfactory offices. Efficient and economical administration for which we are striving is impossible under these conditions. I repeat my former recommendation that in the interest of good administration of Federal business provision be made at once by the Congress for an annual appropriation of not in excess of \$10,000,000 for the construction of buildings in the District of Columbia to properly house the Government's workers.

No general building bill has been enacted since before the war. This matter must necessarily come up for consideration. I am not in favor of the passage of an act which would be characterized as a general parceling out of favors that usually bears a name lacking in good repute. I am willing to approve an act similar in character to that which has already passed the House, providing a lump-sum appropriation to be expended under the direction of the Treasury, or any other proper authority, over a term of years, with such annual appropriations as the national finances could provide.

With regard to the physical plant of the Government, the policy was adopted of reaching a firm foundation before we attempted to build or rebuild. This was necessary because of the vast expansion of Federal agencies and activities growing out of the World War. We could not hope, nor was it necessary, to maintain this vast war inheritance. The only reasonable and proper course was to ascertain what part of it we did need so that money would not be wasted on the other. The time has now been reached when we know approximately the Government plant which should be maintained and the additions which are essential thereto. I have already directed your attention to the need of additional Federal buildings at the seat of government in order to adequately house and operate the business of the Government and protect its employees and records. The construction of Federal buildings at strategic points throughout the United States will be of material assistance in the transaction of public business and reduce rentals. This is not as urgent as the need for buildings in the District of Columbia. There is urgent need for new permanent construction to house the Army. This has been neglected primarily because we had the temporary shelter erected during the World War, but this has reached a stage when it is real waste to expend further funds upon its repair. The Congress in appropriating for the War Department for the fiscal year 1925 directed a study of the housing situation of the Army with a view to having laid before it a plan looking to the sale of property held by the War Department and the utilization of the proceeds to the erection of permanent buildings at places selected for permanent military posts and camps. This plan, which was reflected in bills introduced in Congress during the last session, would accomplish a very substantial commencement of the housing program for the Army. I commend this plan to the Congress for early consideration. It presents the means of meeting an urgent need.

The estimates include \$140,000,000 to be credited to the adjusted service certificate fund established under the World War adjusted compensation act of May 19, 1924. This amount is necessary for the third payment to the fund to be made January 1, 1927. The applications received clearly indicate that \$140,000,000 is the amount which should be paid into the fund on January 1, 1927.

During the fiscal year ended June 30, 1925, the gross public debt was reduced \$734,619,101.59. This was brought about through (1) retirements required to be charged against ordinary receipts, in amount \$466,538,113.83; (2) a reduction of \$17,575,749.43 in the general fund balance; and (3) the application of the entire surplus of \$250,505,238.33. The debt was at its peak on August 31, 1919, when the gross amount outstanding was \$26,596,701,648.01. The

gross amount outstanding on June 30, 1925, was \$20,516,193,887.90. The reduction accordingly has been \$6,080,507,760.11, and the annual saving in interest amounts to more than \$250,000,000.

Certain fixed debt charges for debt retirement are included in the regular Budget of the Government. This policy, which has become firmly established and which provides for an orderly retirement of the public debt, was inaugurated by the Congress in establishing the cumulative sinking fund and in directing that certain miscellaneous sources of revenue, including the repayment of loans to foreign governments made under authority of the Liberty bond acts should be applied to debt redemption. During the fiscal year 1925 debt amounting to \$306,308,400 was retired through the cumulative sinking fund. Other fixed debt charges amounted to \$160,229,714.

Interest payments during 1925 aggregated \$881,806,662.36 as compared to \$940,602,912.92 expended in 1924, and \$820,000,000 estimated to be expended during 1926. For 1927 estimated expenditures are \$795,000,000.

CALVIN COOLIDGE.

THE CHART PRESENTATION

The chart presentation of the estimates of receipts, expenditures, and appropriations for the fiscal year ending June 30, 1927, given opposite page A2, sets forth graphically the source of income and how the average dollar of the estimated expenditures and appropriations is apportioned to organization units and functions in the Budget for the fiscal year 1927.

Chart 1 exhibits the estimates of appropriations by organization units, exclusive of the Post Office Department payable from postal revenues, and gives the allocation of the average dollar to the several departments and establishments for which the appropriations are recommended. It will be seen that of the average dollar to be appropriated 0.52 cent is for the legislative establishment; 16.01 cents for independent offices, of which 14.54 cents is for the Veterans' Bureau; that 4.46 cents is for the Department of Agriculture; 7.95 cents for the Department of the Interior; 10.23 cents for the Navy Department; 10.64 cents for the War Department; 46.52 cents for the Treasury Department, of which 25.19 cents is for interest on the public debt and 16.34 cents for reduction in principal of the public debt payable from ordinary receipts; and only 3.67 cents for the Departments of Commerce, Justice, Labor and State, the District of Columbia, and the Executive Office.

Chart 2 gives the estimates of appropriations by governmental functions and exhibits the purpose for which the average dollar is to be appropriated for the fiscal year 1927. It shows that of each dollar recommended for appropriation 3.71 cents goes for general functions; 39.32 cents for military functions, of which 18.02 cents is for national defense and 21.30 cents for military pensions, retirement pay, annuities, World War allowances, and life-insurance claims. It also shows that of the average dollar to be appropriated 14.05 cents is for civil functions, of which 1.81 cents is for promotion, regulation, and operation of marine transportation and 5.03 cents for public works. Of the total, 42.92 cents of each dollar included in the estimates is for nonfunctional purposes. This includes 0.67 cent for refunds, drawbacks, and like appropriations; 16.34 cents for public-debt retirements, and 25.19 cents for interest on the public debt.

Chart 3 gives the estimates of expenditures by organization units for the fiscal year 1927. Of the average dollar to be expended it shows that 10.52 cents will be disbursed by the Veterans' Bureau; 4.33 cents by the Department of Agriculture; 0.86 cent by the Department of Commerce; 7.66 cents by the Department of the Interior; 0.70 cent by the Department of Justice; 0.25 cent by the Department of Labor; 9.55 cents by the Navy Department; 9.94 cents by the War Department; 0.47 cent by the State Department; 51.89 cents by the Treasury Department, of which 14.76 cents represents reduction in principal of public debt payable from ordinary receipts and 22.75 cents for interest on the public debt; 1.04 cents by the District of Columbia; and but 2.08 cents to be disbursed by the legislative branch, the independent establishments other than the Veterans' Bureau, and the Executive Office.

Chart 4 gives the estimates of expenditures by governmental functions. It supplies information showing for the average dollar the general end or purpose to be accomplished by the expenditures during the fiscal year 1927. Of the average dollar to be expended during that fiscal year 3.35 cents will be spent for the general functions of the Government; 32.87 cents will go for military functions, of which 16.32 cents is for national defense and 16.55 cents for military pensions, retirement pay, annuities, World War allowances, and life-insurance claims. The chart also shows that 14.88 cents will be expended for civil functions, of which 1.88 cents goes for promotion, regulation, and operation of marine transportation, 5.60 cents for public works, and 7.40 cents for other civil functions; that 48.90 cents will be expended for nonfunctional operations, of which 4.91 cents represents refunds and drawbacks; 37.51 cents for fixed-debt charges, of which 14.76 cents is for public-debt retirements payable from ordinary receipts, 22.75 cents for interest on the public debt, and 6.48 cents for the disbursement of trust funds.

Chart 5 exhibits the estimated receipts of the Government by sources of revenue, exclusive of postal revenues for the fiscal year 1927. Of the average dollar to be received 72.01 cents comes from internal revenue, 14.43 cents will be received from customs, and 13.56 cents will be derived from miscellaneous sources, which comprise interest and discount, sale of Government property, public-domain receipts, fees, fines, penalties and forfeitures, gifts and contributions, repayments of investments, District of Columbia receipts, Panama Canal receipts, and trust-fund receipts.

The amounts which form the basis for computing the allocation of the average dollar for the estimates of appropriations by functions for the fiscal year 1927, Chart 2, are given in detail in Budget statement No. 7. The data used for the income statement, Chart 5, are supplied by Budget statement No. 5; the data for computing the average dollar for the estimated expenditures by functions, Chart 4, are given in Budget statement No. 9. The data for Chart 3, giving the average dollar allocation of the estimates of expenditures by organization units, are given in Budget statement No. 2, and similar data for Chart 1 are given in the recapitulation of estimates of appropriations.

Chart 5 does not include the estimated postal revenues for the fiscal year 1927, because such revenues are not considered receipts of the general fund.

DESCRIPTION OF GOVERNMENTAL FUNCTIONS

INTRODUCTION

A classification by governmental functions has for its purpose to set forth the general end or purposes accomplished by the expenditures made by the several organization units of the Government. Each function of government represents a service rendered directly to the people or else a service performed as a means of promoting, protecting, regulating, or administering services directly rendered.

The classification set forth on statements Nos. 8 and 9 presents, first, the general functions of the Government. These correspond closely to the main organs of government established by the Constitution. The general functions have been divided into the following:

1. Legislative,
2. Judicial,
3. Executive, and
4. General administration.

The activities and duties of each of these deal with matters in all other functional fields.

Of the specific functions, it is important in the case of the National Government to segregate clearly the expenditures for military and distinctly war purposes from expenditures for civil services. Therefore a segregation is made of the specific functions into the following classes:

1. Military functions.
2. Civil functions.
3. Nonfunctional expenditures.

The military functions represent those activities conducted for military and war purposes and include those activities of special war agencies and expenditures made by civil services arising from war conditions. These were of special importance during the recent World War and some of them are likely to continue for an indefinite period.

The civil functions include those functions of government which have to do with the promotion of friendly relations with foreign powers; those which have to do with the conservation of social order and property; those which have to do with the conservation of natural resources and economic interests of the people; those activities which relate to the promotion and protection of health, the care and education of Indians, and the promotion of public education, educational research, and science.

The nonfunctional expenditures include certain important expenditures which are of a nonorganizational character. These are for the most part expenditures arising out of war, such as interest on and redemption of public debt, investments, refunds, and disbursement of trust funds.

The "refunds" and "investments" are segregated from other departmental expenditures because the former represents the repayment or refund of the whole or part of an amount previously received in payment of indebtedness to the United States, and the latter represents expenditures made in the purchase of notes, bonds, and other choses in action, and loans to foreign Governments, railroads, and the like, which are not expenses of operation but the conversion of cash into other assets.

DEFINITIONS OF GOVERNMENTAL FUNCTIONS

For the purpose of defining the expenditures or appropriations comprehended within each general function, the following definitions are given:

- A-1. *Legislative*.—Under this function are grouped only those activities of Congress as a legislative body.
- A-2. *Judicial*.—Under this function are grouped those expenditures having to do with the judicial branch of the Government. It includes all United States courts expenses other than the District of Columbia courts, which are included under "Local government."
- A-3. *Executive*.—Under this function are included the direct cost of the Executive Office, including the salary and expenses of the President and Vice President and the cost of maintaining the Executive Mansion and grounds.
- A-4. *General administration*.—Under this heading are grouped the expenditures of certain administrative agencies which are of a general character dealing with matters in all the various fields of administrative functions and those departmental expenditures which can not now be allocated to specific civil functions.

This general title includes expenditures for (1) financial administration, (2) Government supply services, (3) public buildings service, (4) civil pensions and allowance administration, and (5) institutional and general expenses.

Under "Financial administration" are included the Treasury fiscal services, the Bureau of the Budget, the services having to do with the collection of taxes, the public debt service, the World War Foreign Debt (Funding) Commission, and the General Accounting Office.

Under "Government supply services" are included those organization units of the Government whose function it is to supply personnel, services, or materials to all other agencies of the Government. It includes such services as the Civil Service Commission, the Bureau of Efficiency, the Government Printing Office, the Superintendent of Public Documents, the Bureau of Engraving and Printing, the Government fuel yards in the District of Columbia, the General Supply Committee, and the Coordinator of General Supply.

Under "Public buildings service" are included all expenses incurred in connection with the maintenance and operation of public buildings within and without the District of Columbia. It includes the maintenance and operation of the Capitol Building and grounds, the Senate and House Office Buildings, the Capitol power plant, all other building maintenance and operation expenditures connected with the legislative branch, and like expenses for maintenance and operation of the State, War, and Navy Department buildings, Interior Department buildings, Treasury Department buildings, public buildings under the Supervising Architect of the Treasury, public buildings and grounds under the Chief of Engineers of the Army, and the Congressional Library buildings and grounds.

The "Civil pensions and allowance administration" comprise the general expenses of the Employees' Compensation Commission and the cost of administering the act retiring civil service employees, which is supervised by the Pension Office of the Interior Department. It excludes the payments made out of the employees' compensation fund, which are reported under "promotion of labor interests," C-12, and the civil service annuities paid out of the civil service retirement and disability fund, reported under "trust funds," D-4.

The "Institutional and general expenses" include only the salaries and expenses of the Treasury and Interior Departments not directly chargeable to any specific civil function. These include the salaries of the chief clerk's office of the Treasury Department (other than those relating to buildings service); other institutional services of the Treasury Department, such as appointment division, the printing division, the disbursing clerk, and the mail and files division; and like expenses of the Interior Department.

B-1. *National defense*.—Under this general title are included the military activities of the War Department, the naval and military activities of the Navy Department, the expenditures of the civil establishment from War and Navy Department appropriations transferred to them for special research work, and the special defense appropriations given directly to the civil departments. It excludes all trust fund expenditures. These are reported under D-4.

This general title includes the military activities of (1) the War Department, (2) the Navy Department, (3) the War and Navy Department appropriations expended by civil establishments, and (4) the special defense appropriations given to civil establishments.

Under "War Department" are included the salaries and contingent expenses of the department proper and all military activities involved in recruiting, training officers and men at schools and training camps, maintenance and operation of armed forces, and provisions for war equipment and stores, which comprehend the purchase, operation, maintenance, or construction, as the case may be, of fortifications, ordnance, ammunition, and other military equipment and supplies.

Under the "Navy Department" are included the salaries and contingent expenses of the department proper, and all naval and military activities involved in the maintenance, equipment, and training of regular forces, the militia and other reserve forces as indicated in the preceding paragraph, inclusive of the cost of operation, maintenance, construction, or purchase of vessels, ordnance, ammunition, and of plants and materials for the manufacture of supplies and equipment for use by the Navy.

The "War and Navy Departments appropriations expended by civil establishments" comprise the expenditures made by the Bureau of Mines of the Interior Department, the Bureau of Standards of the Department of Commerce, the Forestry Service of the Department of Agriculture, and the expenditures made by the Department of Agriculture proper in conducting researches and scientific investigations for national defense purposes.

The "special defense appropriations given to civil establishments" are made up of the appropriations and expenditures for encouraging production of minerals, the adjustment and payment of mineral claims, the protection of health of the military forces, the enforcement of the act to regulate explosives, and the administration and operations under the wheat price guaranty act of March 4, 1919.

B-2. *Special war agencies*.—Under this caption are included the war agencies organized in 1917 as a result of the World War, exclusive of the relief expenditures of the American Relief Administration and European food relief reported under "Relief expenditures," and the expenditures made by such war agencies from the national security and defense fund.

B-3. *National security and defense fund activities*.—Under this caption are included the expenditures of the special fund placed in the hands of the President, allotted by him, and expended by various civil and military agencies in prosecuting the World War, with the exception of the amount expended for European food relief which is included under "Relief expenditures," the investments in capital stock of war emergency corporations, reported under "Investments," and the construction cost of the Arlington Building, grouped under "Public works."

B-4. *Military pensions, retirement pay, annuities, World War allowances, and life insurance claims*.—Under this group are included all payments to persons by way of accruals or fixed charges made as compensation for past military services to the Government, including pensions on account of disability or death due to military service, pensions on account of services, salaries commencing to accrue to retiring military officers and enlisted men immediately on their leaving active service, allowances on account of military and naval services in the World War, losses on Government life insurance policies, and salaries and expenses of the United States Veterans' Bureau; also the salaries and expenses of the Pension Office of the Interior Department, exclusive of the administration of the act retiring civil-service employees.

C-1. *Foreign relations and protection of American interests abroad*.—Under this general title of civil functions are included the activities of the State Department in the conduct of relations with foreign Governments, local representation abroad, cooperation for settlement of international controversies, and the promotion of friendly intercourse with foreign peoples.

C-2. *General law enforcement*.—Under this general title are included the activities having to do with the enforcement of the general laws and the administration and enforcement of special acts like the national prohibition act, the narcotic act, and the investigation and prosecution of war contract frauds.

C-3. *Provision for control of currency and banking*.—Under this function are included the expenses incurred in connection with the regulation of currency and of banking through the office of the Comptroller of the Currency and public debt service; the Federal Reserve Board; the Federal Farm Loan Bureau; and the expenditures made by the Bureau of the Mint and mint and assay offices in the maintenance of a money standard.

C-4. *Administration of Indian affairs.*—Under this caption are grouped the expenditures of the National Government in the care and education of the Indian wards of the Nation.

C-5. *Administration of public domain.*—Under this general title are included the activities of the Government having to do with the care and utilization of public lands and the care and utilization of the national forests.

C-6. *Promotion and regulation of commerce and industry.*—Under this general title are included those activities of the several departments and independent establishments having to do with the promotion and regulation of commerce and industry.

C-7. *Promotion, regulation, and operation of marine transportation.*—Under this general title are included the activities having to do with the preparation of charts and sailing directions, the supplying of public facilities for navigation, the provision for a merchant marine, and the rescue and relief of seamen and passengers, including the activities of the United States Shipping Board and Emergency Fleet Corporation, and the losses on war risk insurance of American vessels.

C-8. *Promotion and regulation of land transportation.*—Under this general title are included those activities of the Government having to do with the promotion and regulation of land transportation, including the Federal control of transportation systems exercised during the World War, and the payments and advances made by the Government since the termination of Federal control in the form of guaranties as provided by the transportation act of 1920.

C-9. *Postal Service and land telegraph and telephone communication.*—Under this general title are included the deficiencies in postal revenues and the cost of Federal control of telephone and telegraph systems during the recent World War.

C-10. *Promotion and regulation of agriculture.*—Under this function are grouped the activities of the Department of Agriculture in the promotion of agriculture and game preservation and the expenses incurred through the State Department in the support of the International Institute of Agriculture at Rome, Italy.

C-11. *Promotion and regulation of fisheries.*—Under this function are grouped those activities of the Department of Commerce in the propagation and distribution of food fishes, the protection of Alaska seal and salmon fisheries in Alaska, and other like activities.

C-12. *Promotion of labor interests.*—Under this particular function are grouped the activities of the independent establishments and the Department of Labor having to do with the compilation of labor laws and statistics, the investigation of labor questions, the improvement in housing conditions, the enforcement of the child labor laws, the establishment of employment agencies, the payments made by the United States Employees' Compensation Commission to Government employees from the compensation fund, and other like activities.

C-13. *Immigration and naturalization.*—Under this general title are included the expenses involved in regulating immigration, preventing importation of contract labor, the enforcement of laws against alien anarchists, deportation of aliens, care of interned aliens, and the regulation of naturalization.

C-14. *Promotion of public health.*—Under this general title are included those activities having to do with the promotion and protection of public health, exclusive of the Medical Corps of the Army, the Bureau of Surgery and Medicine of the Navy Department, the medical corps of institutions for the care of aged and sick soldiers and sailors, and like expenditures of the War Risk Insurance, now Veterans' Bureau, all of which are reported under military functions.

C-15. *Promotion of public education.*—Under this general caption are included those activities of the several departments and independent establishments having to do with the promotion of public education and all activities of the Federal Board for Vocational Education, except the vocational education of discharged World War veterans, which is reported under "Military functions."

C-16. *Science and research.*—Under this general title are included the activities of the Government having to do with the investigation and publication of knowledge gained and verified by exact observation; the reporting of results of investigations that have been worked out and systematized concerning some subject or group of subjects of ascertained facts, and the principles covering or attempting to give adequate expression to a great natural group or division of knowledge. In addition, it also includes those research activities conducted for the purpose of adding to human knowledge, such as investigations of some phenomenon or series of phenomena by experimental methods to discover facts or to coordinate them as laws.

C-17. *Public works.*—Under this general heading are included the capital expenditures of the Government in constructing public works within and without the District of Columbia other than those outlays for plant facilities and additions which, being essential to the proper performance of specific activities, are included under their respective functions.

This function is subdivided to segregate the expenditures under the captions of:

1. General supervision, design, and overhead;
2. Public improvements; and
3. Government plant additions.

The first subdivision represents the general expenses incurred in designing and supervising the construction of public improvements and plant additions.

The second subdivision comprises the capital outlays made by the Government in the construction of public works, such as the Panama Canal, rivers and harbors and flood-control structures, railroad construction in Alaska, construction of irrigation systems by the Reclamation Service, public roads and rural post roads, the construction of buildings and structures in and around Washington, hospital construction and hospital facilities for war patients, and like capital expenditures.

The third subdivision comprises those structures which are constructed or additions made thereto which are built primarily to house the personnel of the Government and to provide proper facilities for the efficient operation of governmental activities. It includes the cost of construction and cost of improvements only, the operation and maintenance expense being reported under "Public buildings service."

The structures comprehended within this group are those purchased or built under the direction of the Architect of the Capitol; the acquisition or construction of diplomatic premises and buildings by the State Department; the construction work performed under the Supervising Architect of the Treasury in erecting the Arlington Building, customhouses, courthouses and post offices, and like structures.

C-18. *Revenue-producing enterprises*.—Under this general title are included the operations of the Government which are (or it is assumed will become) self-supporting. It includes only the net results of those services of the Government which, after being provided with working capital, are financed out of their own earnings.

The only activity included in this group at the present time is the operation and management of the Center Market, District of Columbia, of the Department of Agriculture.

C-19. *Local government*.—Under this function are included the expenditures of the National Government in the administration of local government in the District of Columbia and the Territories of Alaska, Hawaii, and other insular possessions and such aid as is given to State governments by the National Government in the form of subventions, exclusive of specific grants for education and public health.

C-20. *Relief expenditures*.—Under this general title are grouped those expenditures of the Government made in giving relief to American citizens abroad, contributions toward the maintenance of foreign hospitals which admit citizens of the United States, and other like welfare operations, both foreign and domestic, such as those conducted to alleviate the distress and suffering in Russia and other foreign countries.

D-1. *Refunds, losses, contingencies, and miscellaneous*.—Under this general title of nonfunctional expenditures are grouped the expenditures made by the Government in repayment or refund of the whole or part of an amount or amounts previously received in payment of indebtedness to the United States, losses and contingencies, such as charges on bullion sold, losses on silver dollars melted or broken up, recoinage of gold, silver, and minor coins, and other bullion and coinage losses, and miscellaneous expenses incurred by the Government in connection with ter-centenary and other celebrations.

D-2. *Investments*.—Under this general title of nonfunctional expenditures are grouped those expenditures made by the Government in the purchase of capital stock of war emergency corporations, notes, bonds, and other choses in action; loans to foreign governments, and loans to railroads, exclusive of advances to carriers and the American Express Co. under section 209 of the transportation act of 1920, which are reported under "Promotion and regulation of land transportation," C-8.

D-3. *Fixed debt charges*.—Under this general heading are grouped the expenditures made from ordinary receipts in the redemption and purchase of outstanding bonded indebtedness and payments to the sinking fund. It also includes the amount of interest paid on the public debt, all of which is payable from ordinary receipts. It excludes refunding operations.

D-4. *Trust funds*.—Under this general heading are grouped all expenditures made by the Government (including District of Columbia trust funds) in the nature of repayments of amounts not subject to demand or claim by the United States, of which it has assumed custody. It is the repayment of those moneys received by the Government in trust for private purposes and over which it exercises the responsibility of custodian rather than owner.

D-5. *Acquisition of territory*.—This general title includes only the payment to Denmark for cession of the Danish West Indian Islands (Virgin Islands). These islands were acquired by the United States from Denmark by the convention entered into between said countries on the 4th day of August, 1916, and ratified by the Senate of the United States on the 7th of September, 1916.

DESCRIPTION OF BUDGET STATEMENTS

The Budget statements given herein supply data regarding the income and outgo of the Government, actual and prospective, during the last completed fiscal year, the year in progress, and the ensuing fiscal year. They also give financial data showing (1) the financial condition of the Treasury at the end of the last completed fiscal year (balance sheets), (2) the means by which such condition was reached (operating statements), and (3) the public-debt transactions and the condition at the close of business June 30, 1925.

Statement No. 1 is the master or key statement of the Budget. This statement, it will be seen, shows not merely the balance in the general fund at the end of the two last completed years, the estimated surplus that will exist at the end of the year in progress, and the estimated balance at the end of the ensuing fiscal year if the financial proposals contained in the Budget are adopted, but the means by which this balance has been and will be reached. It shows, in a word, the revenues and expenditures of the Government, past and prospective, for these years and exhibits the effect of these amounts in increasing or decreasing the available balance of the general fund.

In considering the showing, past and prospective, it should be noted that payments in respect to the reduction of the public debt figure among the general fund expenditures of the Government. The total amount of debt redemptions included among the general-fund expenditures during the fiscal year ending June 30, 1925, amounted to \$734,619,101.83, of which \$466,538,113.83 was required by existing law to be made from ordinary revenue, and the remainder, \$268,080,988 represents the amount of general fund applied to the redemption of debt in addition to that now required by law to be made from ordinary receipts.

The estimated surplus of \$262, 041, 756 for the fiscal year 1926 is reached after deducting the sum of \$500,428,595 for the reduction of public debt now required by existing law to be made from ordinary receipts. Taking this item into account, it shows that the ordinary revenue exceeds all other estimated ordinary expenditures by \$762,470,351, or an estimated improvement in the financial condition of the Government of this amount for the fiscal year ending June 30, 1926.

The estimated surplus of receipts of \$330,297,894.56 for the fiscal year 1927 has been decreased by the inclusion of \$515,583,398.44 for debt redemptions out of ordinary receipts. Adding these redemptions to the estimated surplus of receipts reported in Statement No. 1 indicates an improvement of the financial condition of the Government of \$845,881,293 for the fiscal year ending June 30, 1927.

A feature of especial interest in this table is the manner in which expenditures have been classified with a view to bringing out the general purposes for which they have been or are to be made. They are thus first classified under four main heads: (1) Ordinary expenditures, (2) Reduction in principal of public debt payable from ordinary receipts, (3) Investment of trust funds, and (4) Interest on the public debt. The ordinary expenditures have been further subdivided to show (a) the general expenditures, by organization units; (b) the operations in special accounts; and (c) the capital outlays for rights and obligations—that is, the purchase of stock of Federal intermediate credit banks and loans to railroads.

Statement No. 2 supports Statement No. 1 and supplies the details of the expenditures made for 1925, compared with the estimates for 1926, and the proposals for 1927, by main branches or administrative divisions of the Government.

Statement No. 3 is a detailed statement showing the agencies collecting Government revenue. It supplies the actual revenue items collected in 1925 and estimates of the revenue items to be collected by the several departments and other organization units during the fiscal years 1926 and 1927.

In Statement No. 4, the expenditures are classified according to character rather than by organization units, as is done in Statements 1 and 2. It will thus be noted that a distinction is made between those expenditures which are for the current operations of the Government, those that are of a nonadministrative character, those for construction work, including national-defense structures, and other expenditures. The importance of the distinctions here made may be seen from the fact that though the expenditure program for 1927 calls for a total expenditure of \$3,494,222,308.44, only \$820,130,321 is for the current operations of the Government. The latter sum, it will be seen, is \$6,667,412 less than the corresponding item for the year in progress, 1926. Nonadministrative expenses, including such items as interest on the public debt, pensions, etc., call for the expenditure of no less than \$1,498,602,414 in 1927.

Statement No. 5 also supports Statement No. 1 and supplies details of the sources of revenue of the Government. It sets out in detail the sources from which the income of the Government was derived in 1925 and is expected to be derived in 1926 and 1927.

Statement No. 6 has to do with the operations of the Post Office Department and Postal Service, payable from postal revenues. Beginning with the fiscal year 1923, the departmental expenditures of the Post Office Department at Washington are also financed from the postal receipts.

This statement shows the results of the operations, which for 1925, 1926, and 1927 show a deficit and gives in detail the expenditures made and to be made out of the postal revenues. The deficiency in postal revenues, it will be noted, is carried in Statement No. 1 and represents the amount of money which will need to be advanced from the general fund to meet the program recommended in the Budget for the Postal Establishment.

Statement No. 7 summarizes the estimates of appropriations by governmental functions for the fiscal year 1927 and the appropriations made for the fiscal year 1926. This statement sets forth the general end or purposes to be accomplished by the expenditure of the appropriations recommended, compared with the appropriations which have already been made for the fiscal year 1926. The classification given on this statement presents first the general functions of the Government. This corresponds closely to the main organs of the Government established by the Constitution. The general functions have been divided into (a) legislative, (b) judicial, (c) executive, and (d) general administration.

The specific functions are segregated to distinguish the expenditures for military and distinctly war purposes from expenditures for civil services; therefore, the segregation made in this statement divides the specific functions into (a) military functions, (b) civil functions, and (c) nonfunctional operations. This statement not only gives the amount of money recommended for appropriation for the fiscal year ending June 30, 1927, compared with the actual appropriations already made by Congress for the fiscal year 1926, but it also shows the percentages of the amounts allocated to the different purposes.

This statement will be found interesting and informative, showing as it does the approximate amounts devoted to important Government activities and interests.

It will be found that a total of \$117,015,248.33 is carried for general functions, which include the legislative, judicial, executive, and the general administrative operations of the Government which can not be allocated to specific civil functions.

The sum of \$1,241,281,065 is provided for military functions, which includes military pensions, retirement pay, annuities, and World War allowances, and national defense.

The amount recommended for national defense is divided into two classes: Army, \$253,626,369; Navy, \$315,077,919.

The amount provided in the Budget for military pensions and allowances includes \$193,895,000 for pensions, \$454,965,000 for World War allowances, and \$23,586,127 for retirement pay.

The amount recommended for civil functions totals \$443,447,146.89. Under this general function \$16,332,525.64 is allowed for foreign relations and protection of American interests abroad; \$23,552,770 for general law enforcement, which includes activities having to do with the enforcement of general laws and the administration and enforcement of special acts like the national prohibition act, the narcotic act, and the investigation and prosecution of war contract frauds; \$6,991,210 for the control of currency and banking; \$12,901,744 for the administration of Indian affairs; \$23,191,906 for the administration of public domain, which includes those activities of the Government having to do with the care and utilization of public lands and the care and utilization of national forests; \$14,829,667 for the promotion and regulation of commerce and industry, which includes the activities of the Tariff Commission, the Federal Trade Commission, the Patent Office, and those activities of the Departments of Agriculture and Commerce having to do with the promotion and regulation of commerce and industry; \$57,016,173 for the promotion, regulation, and operation of marine transportation, which includes \$14,198,574 for the Shipping Board and Emergency Fleet Corporation; \$6,034,109.25 for the promotion and regulation of land transportation; \$28,354,919 for the promotion and regulation of agriculture; \$1,687,253 for the promotion and regulation of fisheries; \$4,848,218 for the promotion of labor interests; \$5,984,705 for immigration and naturalization; \$17,469,798 for promotion of public health; \$11,890,020 for promotion of public education; \$13,373,953 for science and research; \$40,041,727 for local government, including the District of Columbia; and \$137,050 for civil relief.

For public works under civil functions \$158,638,399 is carried, which includes \$56,037,600 for rivers and harbors proper and items of similar character; \$80,000,000 for roads; \$7,639,094 for Panama Canal; \$6,437,000 for Reclamation Service; \$1,855,000 for railroads in Alaska; and \$2,347,440 for other public improvements and Government plant additions.

Under nonfunctional appropriations is carried a total of \$1,354,386,898.44, which includes \$21,165,500 for refunds, losses, contingencies, and miscellaneous; \$515,583,398 for public-debt retirements payable from ordinary receipts; \$795,000,000 for interest on the public debt; and \$22,638,000 for disbursement of trust funds.

Statement No. 8 summarizes the estimates of appropriations by character and objects of expenditures for the fiscal year 1927 and the appropriations made for the fiscal year 1926. It makes a distinction between those appropriations already made and herein recommended for (a) current expenses, (b) fixed charges, (c) acquisition of property, (d) payment of debt, and (e) payments for rights and obligations.

Statement No. 9 gives similar data to that presented by Statement No. 8. It is a summary of *expenditures* classified by governmental functions for the fiscal year 1927 compared with prior years. It not only gives the amount of money spent but that which it is estimated will be spent during the current fiscal year and the ensuing fiscal year. It also furnishes the percentages allocated to the different functions of the Government. The expenditures given for the fiscal year 1925 are on the basis of warrants issued and charged to appropriation accounts—that is, warrants issued authorizing withdrawal of cash from the Treasury as reported by the Secretary of the Treasury in the "Combined statement of receipts and disbursements, balances, etc., of the United States," brought to the actual cash expenditure by an adjustment figure.

Statement No. 10 gives the appropriations recommended and appropriations made by Congress during the fiscal year 1926, compared with the fiscal year 1925, classified by organization units, including those appropriations made by Congress for which no estimates were submitted by the Chief Executive.

Statement No. 11 summarizes the estimates of appropriations for the fiscal year 1927 and appropriations for 1926. It shows the amounts and percentages applied to current operations of the Government by Government departments and offices.

Statement No. 12 gives the amount of annual, permanent, or other appropriations, including balances of appropriations for prior fiscal years, available for expenditure during the fiscal year in progress, 1926, as of November 1, 1925. This statement shows the total amount available for expenditure during the fiscal year 1926 to date.

Statement No. 13 is a consolidated current balance sheet—that is, it consolidates the general fund, which includes all other expendable funds, with the loan funds.

Statement No. 14 is a statement of operations of the general fund showing how the condition reported in the general-fund balance sheet was reached.

Statement No. 15 is a consolidated statement of operations showing how the condition reported in Statement No. 13 was reached.

Statement No. 16 is a statement of operations of the public debt (loan) funds for the fiscal year ending June 30, 1925. It shows the receipts and expenditures of the loan funds for that year.

Statement No. 17 is a summary statement of outstanding debt at the close of business June 30, 1925, compared with June 30, 1924, and June 30, 1916, on the basis of revised figures reported in the "Statement of the public debt of the United States." It shows that the gross outstanding debt on June 30, 1916, was \$1,225,145,567.53 and that the gross debt as of June 30, 1924, was \$21,251,120,426.83, while the gross debt outstanding on June 30, 1925, was \$20,516,272,174.73. It will be noted that the gross debt was reduced over \$700,000,000 in the fiscal year 1925.

Statement No. 18 is a detailed statement of outstanding debt at the close of business June 30, 1925, compared with June 30, 1924, and June 30, 1916. It supports Statement No. 17.

Statements Nos. 19, 20, and 21 report information regarding the sinking-fund operations for the fiscal year 1925 and the estimated operations for the fiscal years 1926 and 1927.

Statement No. 22 supplies information as to the proposed borrowings from the public for redemptions and purchases of public-debt issues during the fiscal year 1927, compared with those expected to be made in 1926 and the actual borrowings and redemptions which were made during the fiscal year 1925, exclusive of those certificates of indebtedness which are issued and redeemed within the same fiscal year.

Statement No. 23 summarizes and compares by classification services and grades for the fiscal years 1927, 1926, and 1925, the average number of employees, the average salary rates, and the total salaries of the personnel of the executive departments and independent establishments in the District of Columbia classified under the act of March 4, 1923.

Statement No. 24 summarizes and compares by departments and independent establishments, for the fiscal years 1927, 1926, and 1925, the average number of employees, the average salary rate, and the total salaries of the personnel in the District of Columbia classified under the act of March 4, 1923.

³ Treasury (war) savings certificates, series of 1918, matured Jan. 1, 1923. The entire outstanding principal amount, taken at issue price less amounts retired on basis of redemption value, has already been charged out, so that the balance still outstanding appears as discount accrued, partly estimated.

⁴ Accrued discount calculated on basis of exact accrual at rate of 4 per cent per annum compounded quarterly, with due allowance for cash redemptions to date.

⁵ No deduction is made on account of obligations of foreign governments or other investments.

Budget estimate for 1927.....	14, 198, 574
Reduction.....	10, 131, 426

The principal factors contributing to the reduction of \$10,131,426 are: (a) Improvement in the average turn-around of cargo ships, which it is estimated will result in an increase in the number of voyages being completed with a proportionate increase in revenue; (b) further reduction in personnel and other operating expenses; and (c) sale of ships and lines from the active list for operation by private American shipping interests.

UNITED STATES VETERANS' BUREAU

Appropriated for 1926.....	\$405, 700, 000
Budget estimate for 1927.....	458, 965, 000
Increase.....	53, 265, 000

This involves increases from \$127,000,000 to \$140,800,000 for military and naval compensation, due to increased rates of compensation for death and disability authorized by the World War veterans' act, 1924, as amended by the act approved March 4, 1925; from \$50,000,000 to \$140,000,000 for the adjusted service certificate fund due to pending and prospective applications which now indicate that a supplemental appropriation of \$106,000,000 for 1926 will be required to provide the necessary payment to fund on January 1, 1926; and a new item of \$4,000,000 to provide additional hospital and out-patient dispensary facilities pursuant to the act of March 3, 1925; and reductions from \$45,500,000 to \$44,000,000 for salaries and expenses; from \$200,000 to \$165,000 for printing and binding; from \$98,000,000 to \$95,000,000 for military and naval insurance; and the omission of items for "Vocational rehabilitation" and "Adjusted service and dependent pay" for which appropriations of \$38,000,000 and \$12,000,000, respectively, were made in 1926.

DEPARTMENT OF AGRICULTURE

Appropriated for 1926.....	\$138, 075, 191
Budget estimate for 1927.....	140, 717, 758
Increase.....	2, 642, 567

This net increase of \$2,642,567 is due primarily to an increase from \$76,000,000 to \$80,000,000 for the construction of rural post roads. While this estimate for the fiscal year 1927 is a clear increase over the amount appropriated for the fiscal year 1926, it does not contemplate an extension of the Government's road-building program. For the past few years appropriations for constructing such roads have been made under congressional authorizations. The funds appropriated have been available until expended. Therefore, at the close of each year, there has been an unexpended balance in this appropriation. In preparing the annual estimates, such balance has always been taken into consideration in determining the amount which should be included in the Budget for the following year. This has resulted in decreasing each annual estimate by the amount of the previous year's balance. As it is now estimated that balances from previous years will be exhausted by the close of the fiscal year 1926, the estimate of appropriation included in the Budget for 1927 does not contemplate that any balances from prior years will be available for the fiscal year 1927. This will account for the increase referred to above.

The net increase does not include any new items but involves increases from \$2,400,000 to \$2,880,000 for more complete endowment of State agricultural experiment stations, from \$69,180 to \$89,180 for administering the acts making appropriations for the State experiment stations, from \$144,000 to \$180,000 for miscellaneous expenses of the department (including \$35,000 for purchase of lands), from \$147,695 to \$156,695 for sugar plant investigations, from \$2,977,973 to \$3,007,973 for administration and protection of the national forests to provide protection for new forests created from existing military reservations, from \$202,020 to \$225,000 for silvicultural investigations, from \$171,250 to \$181,250 for truck crop insect investigations, from \$85,095 to \$90,000 for protection of game and reindeer and fur bearer investigations in Alaska, from \$370,000 to \$375,000 for enforcement of the plant quarantine act, from \$111,530 to \$121,530 for enforcement of the grain futures act; and reductions from \$8,421,540 to \$8,352,330 for salaries, from \$1,308,540 to \$1,268,454 for farmers' cooperative demonstration work, from \$3,560,000 to \$2,989,000 for eradication of bovine tuberculosis, from \$699,451 to \$583,730 for eradication of cattle ticks, from \$431,363 to \$390,820 for hog-cholera eradication, from \$40,520 to \$30,000 for eradication of dourine, from \$375,000 to \$300,000 for eradica-

tion of barberry, from \$383,264 to \$368,264 for forest products laboratory, from \$431,900 to \$406,900 for improvement of national forests, from \$255,440 to \$235,000 for southern field crop insect investigations, from \$740,000 to \$600,000 for preventing spread of moths, from \$383,630 to \$325,000 for preventing spread of European corn borer, from \$280,000 to \$240,000 for Japanese beetle control, from \$58,215 to \$40,000 for maintenance of mammal and bird reservations, from \$533,290 to \$478,026 for investigations of food habits of birds and animals, from \$400,000 to \$25,000 for upper Mississippi River wild life and fish refuge due to an anticipated unexpended balance June 30, 1926, from \$61,350 to \$55,000 for road management, from \$82,951 to \$65,000 for road building investigations, from \$207,170 to \$197,170 for agricultural engineering, from \$261,586 to \$250,000 for farm management and farm practice, from \$550,988 to \$525,988 for collecting and distributing market information, from \$719,748 to \$654,748 for market news service, from \$188,500 to \$175,000 for enforcement of the cotton futures act, from \$205,060 to \$199,060 for administration of the United States Warehouse Act, from \$300,000 to \$250,000 for eradication of pink bollworm of cotton, from \$39,610 to \$28,610 for experiments in dairying and livestock production in semiarid and irrigated districts in the western United States, from \$24,000 to \$5,000 for collecting seed loans, and from \$480,000 to \$440,000 for enforcement of the packers and stockyards act, and the omission of an item for experiments and demonstrations in livestock production in the sugar cane districts for which \$43,930 was appropriated for 1926.

The estimates for 1927 include \$5,000,000 for payment to the Government of Colombia which is the final annual installment of a payment of \$25,000,000 incident to the acquisition of the Panama Canal.

TREASURY DEPARTMENT

(Exclusive of interest on and retirement of the public debt)

Appropriated for 1926.....	\$153, 708, 404. 50
Budget estimate for 1927.....	157, 563, 713. 63
Increase.....	3, 855, 309. 13

The net increase of \$3,855,309.13 includes reductions from \$187,420 to \$157,640 for the office of the Secretary of the Treasury (including the organization for administering the foreign loans and transportation acts), due chiefly to the transfer of the section of statistics to the office of the Commissioner of Accounts and Deposits; from \$6,846,508 to \$6,621,408 for the public debt service, due to a decrease in the work of that office; from \$891,990 to \$889,000 for the division of printing, due chiefly to a reduction in printing and binding; from \$1,651,605 to \$1,528,000 for the office of the Treasurer of the United States, due to a decrease in work and more efficient organization; from \$49,926,860 to \$48,712,545 for the internal revenue service, due chiefly to decentralization and an improved organization; and from \$1,692,380 to \$1,674,710 for the mint service, due to a reduction in the expenses of assay offices; and increases from \$1,040,744 to \$1,090,000 for the chief clerk and superintendent (including the Division of Mail and Files), due chiefly to a transfer of personnel and items for freight and stationery from other appropriations from which corresponding deductions were made; from \$37,940 to \$84,800 for the office of the Commissioner of Accounts and Deposits (including the Division of Deposits), due chiefly to the transfer of personnel and of the section of statistics from the Secretary's office; from \$532,386 to \$598,000 for the Division of Bookkeeping and Warrants, due to a new item of \$25,000 for transportation of fit currency between banks and to an increased estimate of expenditures under the indefinite appropriation for recoinage of silver coins; from \$36,278,700 to \$37,258,000 for the customs service, due chiefly to increases in salaries of custom employees, and estimated increased expenditures under the indefinite appropriations for refunding collections and awards to informers; from \$417,600 to \$453,000 for the Federal Farm Loan Board, due chiefly to the necessity of providing for salaries and expenses of employees heretofore carried on the intermediate credit banks' rolls; from \$2,544,500 to \$2,586,000 for the Comptroller of the Currency, due chiefly to an increase in the special fund "Salaries and expenses, national bank examiners," of \$50,000; from \$20,597,835 to \$24,243,140 for Coast Guard, due chiefly to the fact that former estimates of expenditures for the added activities of the Coast Guard incident to prohibition enforcement were, in the light of actual experience inadequate for carrying out the requirement of the law; from \$7,738,150 to \$7,817,400 for the Bureau of Engraving and Printing, due to providing a reserve stock of finished currency for the Treasurer's vaults; from \$475,680 to \$485,180 for Secret Service, due to the necessity of increasing the field force; from \$9,128,101 to \$9,300,000 for Public Health Service, due chiefly to an increase in the appropriation for preventing the spread of epidemic diseases, to promotions and longevity pay for commissioned officers, and to a slight increase in the number of commissioned officers for the examination of immigrants at the ports of embarkation; and from \$13,238,586 to \$13,585,390 for activities under the office of the Supervising Architect, involving increases of \$97,540 for repairs of quarantine stations, \$25,000 for furniture, and \$860,394 for increases in the number and pay of the custodial force and reductions of \$546,150 for construction and remodeling of public buildings and marine hospitals and \$88,500 for operating supplies.

The amount estimated for the maintenance and operation of the Regular Army will provide for a force of 12,000 officers and an average enlisted strength throughout the year of approximately 118,000 exclusive of the Philippine Scouts. It will also provide for the training of 16,000 reserve officers and 692 reserve enlisted men for a period of 15 days, or approximately the same numbers as are being trained during the current fiscal year, and 551 reserve officers for a period of more than 15 days, as against 565 officers during the current fiscal year; for the attendance of 35,000 men at citizens' military training camps as against 33,681 during the current fiscal year; for an average enrollment of 119,200 students in the Reserve Officers' Training Corps units as against 119,000 during the current year; and will enable the Militia Bureau to continue an average strength throughout the year of 183,519, the same strength carried for the current year. In the cases of the Reserve Officers' Training Corps and the citizens' military training camps the total funds available for 1926 have been reduced in the Budget for 1927 by \$128,860.

The Budget estimate also provides for essentials connected with the maintenance and operation of active military posts, camps, and stations as now constituted. Pending action by Congress upon the call made on the War Department in the act of June 7, 1924, for "a comprehensive plan for necessary permanent construction at military posts * * * based on using funds received from the sale of surplus War Department real estate, and for the sale of such property now owned by the War Department as, in the opinion of the Secretary of War, is no longer needed for military purposes," no estimates for new construction at military posts have been included in the Budget.

Provision is made for necessary Army transportation, including the operation of the Army Transport Service; for the purchase of 1,818 horses for the Army to replace others incapacitated by old age; for the maintenance in part of the clothing and ammunition reserves; for the maintenance of laundries at disciplinary barracks, but not for continuing Army laundries at any other stations; for the upkeep of existing fortifications and accessories, and for the carrying forward of the general plan for the protection of the Panama Canal and the Hawaiian Islands.

For the Air Service \$18,050,000 is estimated, \$15,050,000 being for direct appropriation and \$3,000,000 for obligation by contract, as against \$14,700,000 directly appropriated for the current year with a contract authorization of \$2,150,000. This will not only enable the Air Service to maintain its present status in heavier-than-air craft and

at the same time assist in keeping alive the aircraft industry for use in time of emergency, but the funds provided will increase the efficiency of the Air Service through the replacement of old aircraft with new modern planes.

In addition to the normal maintenance of the Chemical Warfare Service, \$300,000 is provided for the manufacture of gas masks.

For the United States Military Academy provision is made for the essentials connected with its maintenance and operation and \$350,000 is provided toward the construction of a new cadet mess hall, dormitory, cadet store, and drawing academy.

Funds recommended will care for the various nonmilitary activities of the War Department, such as national cemeteries, national military parks, national monuments and memorials, the Alaskan cable system, and the construction and maintenance of roads, bridges, and trails in Alaska.

For rivers and harbors, \$40,000,000 is estimated for maintenance and improvement of existing river and harbor works, in addition to \$5,437,600 which will be available from permanent specific and indefinite appropriations; for flood control on the Mississippi and Sacramento Rivers \$10,000,000 and \$400,000, respectively, are estimated; the total provided for all items of river and harbor improvement being \$56,037,600, as compared with \$59,277,990 for the current year.

Net increase.....	15, 154, 803. 44

This net increase of \$15,154,803.44 includes increases, from \$325,304,445 to \$339,423,648.44, in the cumulative sinking fund in conformity with the requirements of law that the appropriation shall be increased each fiscal year by the amount of interest which would have been payable during that year on the debt redeemed through the operation of the sinking fund during such year; from \$31,187,200 to \$32,190,450 for redemption of bonds received as repayments of principal of war loans by foreign governments as the result of refunding operations; and from \$142,936,950 to \$142,969,300 for redemption of bonds received as interest payments on obligations of foreign governments.

POST OFFICE DEPARTMENT

Appropriated for 1926.....	\$636, 269, 415
Budget estimate for 1927.....	740, 077, 563
Net increase.....	103, 808, 148

Ordinarily the increase in the cost of the Postal Service from year to year is due to the growth of the service coincident with the growth of the country and the expansion of business activities. The increase in the Budget estimate for 1927 is extraordinary and is the result of two factors: First, the increased cost of personal services under the provisions of the act of February 28, 1925, known as the "postal pay act," estimated at approximately \$70,000,000; and, second, an effort to further improve conditions in post offices throughout the country in order that continued good service may be given to the people.

The principal increases under the several appropriation titles involved are: From \$1,775,000 to \$1,952,900 for post office inspectors' salaries; from \$46,600,000 to \$51,250,000 for compensation to postmasters; from \$6,000,000 to \$7,150,000 for compensation to assistant postmasters; from \$130,100,000 to \$163,650,000 for clerks and other employees at first and second class post offices, including printers, mechanics, and skilled laborers; from \$6,200,000 to \$7,884,600 for watchmen, messengers, and laborers; from \$1,575,000 to \$1,734,000 for clerks in charge of contract stations; from \$4,650,000 to \$8,650,000 for clerks at third-class post offices; from \$15,175,000 to \$16,450,000 for rent, light, and fuel; from \$975,000 to \$1,602,000 for miscellaneous items at first and second class post offices; from \$1,700,000 to \$1,980,000 for village delivery service; from \$1,000,000 to \$1,175,000 for car fare and bicycle allowance; from \$92,000,000 to \$116,600,000 for city delivery carriers; from \$7,600,000 to \$8,600,000 for special delivery fees; from \$15,400,000 to \$17,394,537 for vehicle service; from \$112,250,000 to \$115,000,000 for railroad transportation; from \$2,600,000 to \$2,750,000 for the Government-owned airplane service between New York and San Francisco, and \$2,000,000 for the new contract Air Mail Service, which represents not more than 80 per cent of the revenue on mail carried; from \$49,500,000 to \$55,904,121 for salaries of railway mail employees; from \$2,675,000 to \$3,800,000 for travel allowances of railway postal clerks; from \$1,500,000 to \$1,700,000 for balances due foreign countries; from \$1,400,000 to \$1,685,700 for post office equipment and supplies; from \$1,800,000 to \$2,450,000 for mail bags and equipment, due principally to the necessity of purchasing new canvas, the Army surplus being exhausted; from \$12,700,000 to \$13,100,000 for star routes; and from \$88,350,000 to \$104,000,000 for Rural Delivery Service.

Practically all of the above reported increases, especially those relating to the personnel of the service, are affected by the fact that provision has not as yet been made in postal appropriations to cover the increased cost of

the service under the terms of the "postal pay act," above referred to. This act was approved February 28, 1925, but the increased salaries and allowances provided for thereunder were made retroactive to January 1, 1925. The act making appropriations for the Post Office Department and Postal Service was approved January 22, 1925. It will therefore be necessary to present at this session of Congress supplemental estimates of appropriations required for this purpose, aggregating approximately \$68,000,000, and this amount should be taken into account in connection with 1926 appropriations when making comparisons with 1927 estimates. The amounts applicable to each item of appropriation involved have not as yet been finally determined.

The revenues of the Postal Service for the fiscal year 1927 have been estimated at \$704,400,000. As the Budget estimates for that year contemplate expenditures amounting to \$740,277,563 (including \$200,000 for indefinite appropriation items) a postal deficit in 1927 of approximately \$36,000,000 is apparent.

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the fiscal year [1926] 1927 any executive department or independent establishment of the Government ordering printing and binding from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office for the year in which the work is done, and be subject to requisition by the Public Printer.

All amounts in the Budget for the fiscal year [1927] 1928 for printing and binding for any department or establishment, so far as the Bureau of the Budget may deem practicable, shall be incorporated in a single item for printing and binding for such department or establishment and be eliminated as a part of any estimate for any other purpose. And if any amounts for printing and binding are included as a part of any estimates for any other purposes, such amounts shall be set forth in detail in a note immediately following the general estimate for printing and binding: *Provided*, That the foregoing requirements shall not apply to work to be executed at the Bureau of Engraving and Printing.

No part of any money appropriated in this act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in any other executive branch of the public service of the United States unless such detail be authorized by law.

PERMANENT SPECIFIC APPROPRIATION					
Cooperative Agricultural Extension Work—					
For the purpose of paying the expenses of cooperative agricultural extension work and the necessary printing and distributing of information in connection with same, there is permanently appropriated \$480,000 for each year, \$10,000 of which is paid annually to each State which has by action of its legislature assented to the provisions of the act. There was also appropriated an additional sum of \$600,000 for the fiscal year following that in which the foregoing appropriation first became available, and for each year thereafter for seven years a sum exceeding by \$500,000 the sum appropriated for each preceding year, and for each year thereafter there is permanently appropriated the sum of \$4,100,000 in addition to the sum of \$480,000. The additional sums are allotted annually to each State by the Secretary of Agriculture and paid in the proportion which the rural population of each State bears to the total rural population of all the States as determined by the next preceding Federal census, but no payment out of the additional appropriations can be made in any year to any State until an equal sum has been appropriated for that year by the legislature of such State, or provided by State, county, college, local authority, or individual contributions from within the State, for the maintenance of cooperative agricultural extension work (act May 8, 1914, vol. 38, p. 373, sec. 3)

To enable the Secretary of Agriculture more effectively to carry out the provisions of the act of March 1, 1911 (Thirty-sixth Statutes, page 961), entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," \$34,900 of the moneys appropriated therein, or for carrying out its purposes shall be available for the employment of agents, title attorneys, clerks, assistants, and other labor, and for the purchase of supplies and equipment required for the purpose of said act in the city of Washington (acts Mar. 3, 1899, vol. 30, p. 1095; June 3, 1902, vol. 32, p. 295; Feb. 1, 1905, vol. 33, p. 268; June 11, 1906, vol. 34, p. 233; Mar. 1, 1911, vol. 36, p. 963; Mar. 4, 1913, vol. 37, p. 842; Mar. 4, 1915, vol. 38, p. 1099; Feb. 10, 1925, vol. 43, pp. 833, 834; Mar. 3, 1925, vol. 43, p. 1132):

PERMANENT INDEFINITE APPROPRIATION

Refunds to Depositors, Excess of Deposits, National Forest Fund—

All money received, by or on account of the Forest Service for timber, or from any other source of forest-reservation revenue, is covered into the Treasury of the United States as a miscellaneous receipt; and there is appropriated so much as may be necessary to make refunds to depositors of money deposited by them in excess of amounts found actually due from them to the United States, and so much as may be necessary to refund to the rightful claimants such sums as may be found to have been erroneously collected for the use of lands, or for timber or other resources sold from lands located within, but not a part of, the national forests, or for alleged illegal acts done upon such lands, which acts are subsequently found to have been proper and legal. The Secretary of Agriculture is required to make annual report to Congress of the amounts refunded hereunder (acts Mar. 4, 1907, vol. 34, pp. 1256, 1270; Mar. 4, 1911, vol. 36, p. 1253):

Bureau of Entomology.	Motor-propelled.	Southern field crop insects.	4	Automobile.	\$2,000				\$2,000	\$500	Four additional Ford touring cars are needed at Tallulah, La., for the dusting experiments conducted by the Bureau for the control of the cotton-boll weevil. Investigations are conducted on 35 different plantations within a radius of 40 miles of Tallulah. The dusting experiments must be made on a large scale under actual growing conditions and it has been difficult to induce the farmer to leave two or three fields for the use of the Bureau's experiments because he suffers not only the loss of his crops on these fields but the weevils on the sections untreated by the Bureau are liable to migrate to the remainder of his cotton and increase his general control problem. As a result it has been necessary each year to secure experimental plots over a wider area, which increases the distance to be traveled from the Tallulah headquarters. An increasing difficulty in securing plots for experimental work is due to the fact that a high percentage of the farmers now carry on commercial control of the weevil on their property and this reduces the number of plantations on which experimental work can be located. In addition to the necessity for transporting the entomologists and field assistants to and from different fields it is also necessary to carry a large number of laborers who must be picked up wherever they can be located and transported to where they are needed. The Bureau has been compelled for a number of years during the spraying season to expend large sums for the hire of passenger-carrying vehicles and although the two additional Ford cars were purchased this year we find that through the increased distance to be traveled in visiting the experimental plots the expenditure for hire of passenger-carrying cars is still excessive. It is believed that through the purchase of the additional machines requested that a sufficient saving will be effected to pay for their cost and maintenance within the next two years.	
Do.....	do.....	Preventing spread of moths.	1	do.....	1,800				1,800	300	A high-power car is needed for the control operations in the barrier zone area that has been established to prevent the western spread of the gypsy moth. This area embraces a territory of over 250 miles long and 30 or more miles in width. A rather heavy car of sufficient power to cover long distances should be secured to properly supervise the work in this area. It will provide means for more frequent trips to the various field divisions without serious loss of time and will effect a more thorough coordination of the work. The official in direct charge of this project is constantly traveling throughout the barrier zone and is required to make frequent trips outside of this territory. The surveys often require two or three days of constant travel. A high power car that can be used under any conditions is necessary for the proper supervision of barrier zone operations.

--	--	--

[The Secretary of Agriculture is authorized to enter into leases for the Bieber Building, 1358 B Street southwest, and the warehouse now under construction at the southeast corner of Linworth Place and C Street southwest, for a period not to exceed ten years, provided in his judgment it is of advantage to the Government of the United States to do so. Such leases shall have the approval of the Public Buildings Commission.]

PERMANENT SPECIFIC APPROPRIATION

[Cooperative Construction, etc., of Roads and Trails, National Forests—

There is appropriated \$1,000,000 for the fiscal year ending June 30, 1917, and each fiscal year thereafter, up to and including the fiscal year ending June 30, 1926; in all, \$10,000,000 to be available until expended under the supervision of the Secretary of Agriculture, upon request from the proper officers of the State, Territory, or county, for the survey, construction, and maintenance of roads and trails within or only partly within the national forests, when necessary for the use and development of resources upon which communities within and adjacent to the national forests are dependent, when the State, Territory, or county has entered into a cooperative agreement with the Secretary of Agriculture for the survey, construction, and maintenance of such roads or trails upon a basis equitable to both the State, Territory, or county, and the United States. The aggregate expenditures in any State, Territory, or county can not exceed 10 per cent of the value of the timber and forage resources which are or will be available for income upon the national forest lands within the respective county or counties wherein the roads or trails are to be constructed. The Secretary of Agriculture is required to make annual report to Congress of the amounts expended hereunder. Out of the appropriations made by this act, the Secretary of Agriculture is authorized to employ assistants, clerks, and other persons in the city of Washington and elsewhere, to rent buildings outside of the city of Washington, to purchase supplies, material, equipment, office fixtures, and apparatus, and to incur travel and other expense for carrying out the purposes of this act.]
