## BUDGET MESSAGE OF THE PRESIDENT

*To the Congress of the United States:*

The Budget of the United States Government for the fiscal year ending June 30, 1936, of which this message is definitely a part, is transmitted herewith for your consideration. It deals principally with the moneys carried in the general and special accounts of the Government, which constitute the great bulk of the general fund, as this fund is shown on the first page of the daily Treasury statement. The remainder of the general fund consists mainly of moneys carried in trust accounts, which are not strictly Government moneys, and therefore enter only incidentally into the financial picture presented by the General Budget Summary.

### REVIEW OF THE FISCAL YEAR 1934

The total expenditures of the Government for the fiscal year ended June 30, 1934, as shown in the General Budget Summary and supporting schedules, amounted to \$7,105,000,000 in round figures. Of this amount, the sum of \$1,086,000,000 was spent for the operation and maintenance of the regular departments and establishments of the Government, \$556,000,000 to meet veterans' pensions and benefits, \$757,000,000 for interest on the national debt, \$360,000,000 for statutory debt retirements, and \$63,000,000 for tax refunds, making in the aggregate \$2,822,000,000. The remainder of the total expenditures for that year, amounting to \$4,283,000,000, was spent for recovery and relief. The general purposes to which this amount was applied are set forth in detail in Supporting Schedule No. 3. It will be seen that this amount was expended approximately as follows:

	<i>In millions of dollars</i>
Agricultural aid.....	847.0
Relief.....	1,844.4
Public works.....	653.5
Aid to home owners.....	194.9
Reconstruction Finance Corporation.....	584.6
Miscellaneous.....	158.6
Total.....	4,283.0

A part of this expenditure of \$4,283,000,000 for recovery and relief is repayable; indeed, substantial repayments have already been made to the Government. Loans amounted to \$732,000,000, and subscriptions to capital stock and preferred shares to \$826,-

000,000, making a total of \$1,558,000,000 which may be regarded as repayable expenditures made during the fiscal year 1934. The part regarded as nonrepayable totals \$2,725,000,000. This sum has been spent mainly for grants, aids, public-works projects, and administrative expenses.

The total receipts of the Government for the fiscal year 1934 reached in the aggregate \$3,115,500,000. Of this amount \$2,640,600,000 came from internal revenue, \$313,400,000 from customs, \$152,600,000 from miscellaneous revenues, and \$8,900,000 from receipts due to the realization upon assets. Income tax supplied \$818,000,000 of internal revenues; miscellaneous taxes (e. g., estate, capital stock, liquor, tobacco, stamp, and excise taxes), \$1,469,600,000, and processing taxes, \$353,000,000. Since the processing taxes are appropriated for the use of the Agricultural Adjustment Administration, their total should be subtracted from the aggregate receipts shown above in order to arrive at the general receipts of the Government.

The general receipts of \$2,762,500,000, excluding processing taxes, approximately equaled the regular expenditures for the year, a fact which should be duly recognized.

The deficit at the end of the fiscal year 1934, as shown in the General Budget Summary, was \$3,989,500,000 in round figures. After deducting \$359,900,000 for statutory debt retirements during 1934, the resulting net deficit financed from borrowings was \$3,629,600,000. The gross increase in the national debt amounted to \$4,514,400,000, making a total debt of \$27,053,000,000, as indicated in Supporting Schedule No. 6. This addition to the debt during 1934 included the financing of the net deficit of \$3,629,600,000 and an increase of \$884,800,000 in the cash balance of the general and special accounts, as shown in Supporting Schedule No. 4.

#### THE ECONOMIC SITUATION

Because of its profound influence on the Federal Budget, the economic situation may be briefly summarized at this point. Business was substantially more active during the fiscal year 1934 than in either of the two preceding fiscal years. At the opening of the year, in July 1933, producers were increasing their operations sharply reflecting in part larger orders placed in anticipation of code regulations. There was a temporary decline in output in the autumn and early winter, in response to an overaccumulation of inventories during this period, but production again advanced during the last half of the fiscal year. Industrial output for the period as a whole, when measured by the Federal Reserve Board index, was 25 percent greater than in the fiscal year 1933 and only slightly below the level

of the fiscal year 1931. The degree of recovery varied in the different industries. Production of nondurable goods, which had declined only moderately during the depression, approached within 1 percent of its 1923-25 average, while output in the durable-goods group, where prices showed relatively small declines since 1929, was 38 percent below its average in those years. Construction activity financed by private individuals continued to be restricted in amount, although public construction increased. This result was in no way surprising in view of the enormous sums spent on permanent structures, in many cases in excess of actual requirements, during the period 1925-29.

The average volume of industrial employment expanded in proportion to production, and the total number of unemployed at the end of the fiscal year 1934, although still very large, decreased by about 2 millions, as compared with June 1933, and 4 millions, as compared with the worst point of the depression, which fell in March 1933. Reflecting higher wage rates and an expansion in total hours worked, industrial pay rolls averaged sharply higher over the year. Distribution of commodities at retail to consumers increased, but in smaller proportion than output, with the result that inventories of manufactured goods showed a net growth over the year ended June 30, 1934.

At the end of the fiscal year 1934 the Bureau of Labor Statistics index of wholesale commodity prices stood at 74.8 percent of its 1926 average, as compared with 66.3 percent on June 30, 1933, and 59.6 percent early in March 1933. The sharpest rise in prices took place in farm products which were affected by anticipation of smaller crops during the summer of 1934. The rise in agricultural prices more than offset the decrease in farm output, and farmers' cash income, including governmental rental and benefit payments, was 34 percent higher than in the fiscal year 1933. Corporate profits, aided by larger volume as well as by inventory appreciation, also increased considerably.

Following the close of the fiscal year 1934, output in basic industries fell sharply through September, reflecting particularly an over-accumulation of inventories in steel and textile products and the delay in the placing of orders for autumn merchandise because of uncertainty as to the effect of the drought. Industrial prices, however, remained relatively stable and prices of farm products and foods moved into closer alignment with prices of nonagricultural commodities. In retail markets, goods continued to move in sustained volume with the result that inventories were reduced to lower levels and output was again increasing in the final quarter of the calendar year 1934.

## CONDITION OF THE FISCAL YEAR 1935

The total expenditure requirements for the fiscal year ending June 30, 1935, are estimated at approximately \$8,581,000,000, as shown in the General Budget Summary. Of this amount, the sum of \$3,321,000,000 is for regular expenditures, and \$5,260,000,000 for recovery and relief. The regular expenditures are for the following general purposes:

	<i>In millions of dollars</i>
Operation and maintenance of the regular departments and establishments.....	1, 235
Veterans' pensions and benefits.....	610
Interest on the national debt.....	835
Tax refunds (excluding processing taxes).....	68
Subtotal.....	2, 748
Debt retirements.....	573
Total.....	3, 321

The amount of \$1,235,000,000, mentioned above, includes \$20,000,000 for expenditures estimated to be made this year from an additional sum of approximately \$125,000,000 which will be required for 1935 to make up deficiencies in the appropriations for the regular departments and establishments, including the Veterans' Administration. Of this additional sum, approximately \$65,000,000 will be required to meet the needs of the Veterans' Administration due to the application of new laws or revised rules pertaining to service-connected disabilities.

Of the total expenditures for recovery and relief, \$788,000,000 are for the Agricultural Adjustment Administration and the refunding of processing taxes, while \$4,472,000,000 are devoted to other purposes in the recovery and relief program. During the first 5 months of the current fiscal year the Government expended for recovery and relief \$1,712,000,000, or at the rate of about \$350,000,000 per month.

A summary of the aggregate amounts expended for recovery and relief from February 1, 1932, to November 30, 1934, shows a total figure of \$8,164,900,000. This expenditure has been distributed approximately as follows:

	<i>In millions of dollars</i>
Agricultural aid.....	1, 337. 3
Relief.....	2, 783. 0
Public works.....	1, 226. 2
Aid to home owners.....	306. 3
Reconstruction Finance Corporation.....	2, 351. 2
Miscellaneous.....	160. 9
Total.....	8, 164. 9

From February 1, 1932, to November 30, 1934—nearly 3 years—provision for recovery and relief through appropriations and authorizations reached a grand total of \$14,412,400,000. Of this total there remained unexpended on November 30, \$6,247,500,000, a large part of which had already been obligated though not yet actually paid out by the Treasury. The sum of approximately \$900,000,000 from the unobligated portion must, however, be made available for transfer to emergency relief needs during the remaining months of the current fiscal year. Recommendation is therefore made that the Congress provide for the immediate transfer of such unobligated portion for relief during the transition period from direct relief to work relief as outlined in my annual message.

Appropriations for emergency relief purposes will be completely exhausted early in February. Hence it is vitally necessary that unobligated balances of moneys already appropriated be made immediately available to care for the unemployed during the remainder of the fiscal year 1935 and the transition period. Through such action no new appropriation will be required to carry our relief needs for the current fiscal year.

The total receipts for the fiscal year 1935 are estimated at \$3,711,000,000. After deducting from this amount the processing taxes, estimated at \$589,000,000, there remains \$3,122,000,000 to be applied against other expenditures of the Government.

The income tax for 1935 is estimated to yield \$234,000,000 more than in 1934, or a total of \$1,051,000,000. The receipts from miscellaneous internal-revenue taxes, exclusive of processing taxes, are expected to produce \$60,000,000 more in 1935 than in 1934, thus bringing the total yield up to \$1,543,000,000. It is estimated that customs will show a decrease for 1935 under 1934 of about \$26,000,000, due to the Cuban sugar agreement and to the foreign-trade situation in general. Miscellaneous revenues and other receipts from the realization of certain assets are expected to yield for 1935 about \$227,000,000, an increase of \$66,000,000 over 1934.

The deficit for the fiscal year 1935 is estimated at \$4,869,000,000, including \$573,000,000 for statutory debt retirements. On December 26, 1934, the gross national debt stood at \$28,484,000,000. It is estimated that the gross debt on June 30, 1935, will amount to about \$31,000,000,000. In the Budget message of last year it was estimated that the national debt on June 30, 1935, would amount to \$31,800,000,000. According to the latest estimates, the debt will not reach this amount by \$800,000,000.

THE FISCAL YEAR 1936

In the Budget message of last year I said, speaking of the fiscal year 1936, that we should plan to have a definitely balanced Budget for the third year of recovery and from that time on to seek a continued reduction of the national debt.

Despite the substantial measure of recovery achieved since that statement was made, unemployment is still large. The States and local units now provide a smaller proportionate share of relief than a year ago and the Federal Government is therefore called upon to continue to aid in this necessary work.

For this reason it is evident that we have not yet reached a point at which a complete balance of the Budget can be obtained. I am, however, submitting to the Congress a Budget for the fiscal year 1936 which balances except for expenditures to give work to the unemployed. If this Budget receives the approval of the Congress, the country will henceforth have the assurance that, with the single exception of this item, every current expenditure of whatever nature will be fully covered by our estimates of current receipts. Such deficit as occurs will be due solely to this cause, and it may be expected to decline as rapidly as private industry is able to reemploy those who now are without work.

A résumé of the financial plan which the General Budget Summary shows for 1936, as compared with 1934 and 1935, is presented below.

[In millions of dollars]

Gross deficit.....	3,989	4,869	4,528

The estimated expenditures for the fiscal year 1936, as shown in the General Budget Summary, total in round figures \$8,520,000,000, including statutory debt retirements. Of this amount, \$3,938,000,000 are for regular purposes, and the remainder for recovery and relief. The regular expenditures consist of \$1,622,000,000 for the operation and maintenance of the regular departments and establishments of the Government, which includes \$200,000,000 to be expended from an annual appropriation of \$300,000,000 for public works, as requested in the Budget and as explained below. The other items of regular expenditures are \$740,000,000 for veterans' pensions and benefits, \$875,000,000 for interest on the national debt, \$636,000,000 for statutory debt retirements, and \$65,000,000 for tax refunds (excluding processing tax refunds).

Some of the principal increases in the major expenditure items for 1936 may be cited. The restoration of the final 5 percent of the 15-percent salary reduction amounts to about \$40,000,000 for the regular departments and establishments, exclusive of the Postal Service. The latter service requires an additional sum of \$25,000,000 for this purpose. Provision has been made in 1936 for an increase in the civil-service retirement and disability fund of \$20,000,000 over 1935, making a total annual contribution to this fund of \$40,000,000. This increase will enable the Government to meet more nearly its annual obligation with respect to this fund. It has been estimated that this obligation amounts to \$52,000,000, but such estimate has not been sufficiently established to justify its inclusion in the Budget. An effort will be made during the coming year, however, definitely to establish the Government's annual liability, the amount of which will be included in the 1937 Budget. Likewise, an increase of \$50,000,000 is recommended in the veterans' adjusted-service certificate fund, thus bringing the total annual contribution to this fund up to \$100,000,000. The actuarial requirement of the fund for 1936 has been estimated at \$155,000,000. An effort will also be made during the coming year to establish this fund on a more definite basis consistent with the Government's actual liability under existing law. The expenditures for national defense have been increased for 1936 over 1935 by \$180,000,000. This increase is due to the current policy of the Congress and the Executive to make up for the delay by the United States in meeting the provisions of the naval treaties of 1922 and 1930, and to provide replacement and improved equipment for the Army. Veterans' pensions and other requirements have also been increased by about \$130,000,000, after adding to the 1935 figure the estimated supplemental amount previously mentioned, which is due to the application of new laws and revised rules pertaining to service-connected disabilities.

Another increase in the estimated expenditures is \$200,000,000 from an appropriation of \$300,000,000 which I am requesting for public works. This appropriation is intended to take care of the normal public-works requirements of the Government usually included in the annual supply bills, such as Federal highways, river and harbor improvements, and general public works, including the construction program of the Tennessee Valley Authority. This requested appropriation may therefore be regarded as regular instead of emergency. The debt charges for interest and retirements have increased considerably due to the growth of the national debt, but the decrease in the average annual interest rate has served to keep these charges down.

The estimated expenditures for recovery and relief during 1936 are placed at \$4,110,000,000, excluding \$472,000,000 for the Agricultural Adjustment Administration. I recommend that \$4,000,000,000 be appropriated by the Congress in one sum, subject to allocation by the Executive principally for giving work to those unemployed on the relief rolls. An estimate of expenditure covering this amount is included in the Budget.

The total receipts for the fiscal year 1936 are estimated at approximately \$3,992,000,000. When \$570,000,000 of estimated processing taxes are deducted from this amount, there will remain for general purposes, \$3,422,000,000.

The detailed estimates of revenues and receipts for 1936, shown in Statement No. 1, indicate a gain of \$137,000,000 in the collections from income tax over those for 1935. This gain is due to anticipated improvement in business and to the upward revision of rates in the Revenue Act of 1934. The miscellaneous internal-revenue taxes for 1936 are estimated to increase some \$143,000,000 over the collections for 1935. This increase is predicated on the assumption that the taxes terminating on June 30 and July 31, 1935, will be extended by the Congress, and also that the tax rates which would be reduced on June 30, 1935, will be continued. Otherwise there will be a reduction in the total estimate of miscellaneous internal-revenue taxes of \$378,000,000, thus bringing the total estimate down to \$1,308,000,000, excluding processing taxes. Customs are estimated to yield \$298,000,000 for 1936, representing a small increase of \$11,000,000 over 1935. Miscellaneous revenues and other receipts are estimated to produce \$250,000,000, a gain of about \$23,000,000 over 1935.

While I do not consider it advisable at this time to propose any new or additional taxes for the fiscal year 1936, I do recommend that the Congress take steps by suitable legislation to extend the miscellaneous internal-revenue taxes which under existing law will expire next June or July, and also to maintain the current rates of these

taxes which will be reduced next June. I consider that such taxes are necessary to the financing of the Budget for 1936.

In this connection, may I say, too, that the postal revenues, as estimated in detail in the annexed budget of the Post Office Department, are based on the continuation of the 3-cent postage rate for nonlocal first-class mail. Unless this rate is continued, the postal expenses for 1936, which include steamship and aircraft subsidies and free carriage of Government mail, will be increased by about \$75,000,000, all of which will become an added burden on the general revenues of the Treasury. I, therefore, recommend the extension of the 3-cent rate.

If the estimates submitted in this Budget are approved, and if the expenditures for which authorization is asked are made in full, the deficit, including statutory debt retirements, will amount to \$4,528,000,000 for the fiscal year 1936. The national debt will be increased during this year by approximately \$3,152,000,000, thus bringing the total debt up to \$34,239,000,000. But this increase, as I have pointed out, will be due solely to continued relief of unemployment.

#### CONTINUATION OF EMERGENCY AGENCIES

A number of the emergency agencies now authorized by law will terminate during the present fiscal year. Most of these agencies fill important present needs and should be continued. As rapidly as seems practicable, I am bringing the administrative expenses of these agencies under the supervision of the Director of the Budget.

#### ECONOMY LEGISLATION

Many of the estimates of appropriations contained in the Budget are based upon the continuation of certain legislative provisions with reference to economy which are now in force. They are appended hereto and should be reenacted if the estimates are to be sustained. Among those continued is the provision for certain special salary reductions, the suspension of the reenlistment bonus to men of the military and naval services, the reduction in travel allowances of certain postal employees, permitting temporary reassignment of duties of certain postal employees, reduction in fees of jurors and witnesses, permitting transfers between appropriations, and the involuntary retirement of Federal employees having 30 years' service. Specific provision is also made for service credits to certain personnel affected by the suspension of increases in pay during the fiscal years 1933 to 1935, in the determination of compensation accruing subsequent to June 30, 1935, but without authorizing the payment of the amount that would have been paid during these years. Among the economy provisions which now obtain and

which it is not proposed to continue is the 5-percent reduction in compensation of Government employees after July 1, 1935. I see no reason, however, for the restoration of this reduction prior to that date. The index figure of the cost of living, on the basis of which salary restorations are provided by section 3, title II of the Economy Act of 1933, now indicates that such restorations in all probability would not even be justified on next July 1, or for some time thereafter.

#### IMPROVEMENTS IN THE FORM OF THE BUDGET

Several important changes have been made in the form of the Budget document for 1936. The purpose of these changes has been twofold: (1) To improve the usefulness of the document from the citizens' standpoint, and (2) to provide more adequate treatment of the financial requirements of certain governmental units, such as the Post Office Department and the District of Columbia.

The General Budget Summary, following this message, is designed to present on one page a comprehensive picture of the financial requirements of the Government. It exhibits the anticipated receipts from all sources and the estimated expenditures for all purposes. It also shows the deficit and indicates the proposed means of financing this deficit. Since the figures presented in the summary are necessarily in aggregate amounts, the details of these amounts are shown in six supporting schedules. Both in the summary and in these schedules appropriate columns are carried to provide direct comparisons between the Budget figures for 1936 and the estimated and actual figures for 1935 and 1934.

The revenue estimates are emphasized in this Budget for the first time. These estimates are set forth in Statement No. 1 in sufficient detail to show all the principal sources from which the Government gets its income. Accompanying this statement is a supporting text, which analyzes and gives the reasons for the 1936 estimates, and compares them with those for 1935 and with the actual collections for 1934.

Annexed budgets are set up for the major self-supporting or self-contained units of the Government, namely, the Post Office Department, the Reconstruction Finance Corporation, the Tennessee Valley Authority, and the District of Columbia. The use of such budgets permits the receipts and expenditures of each of these units to be clearly and completely presented in gross figures and in balanced form, as has not hitherto been done. By following this method, the net figures for each unit, which may be either appropriation needs or surplus receipts, are calculated and then carried to the General Budget Summary. Thus the financial requirements of these units

are definitely tied into the general budgetary plan. The annexed budgets are therefore not in any sense independent or multiple budgets but simply integral parts of the Government's general Budget.

BETTER METHODS OF FISCAL CONTROL

In order to promote more satisfactory methods of budgetary control in the Government, I propose this year to inaugurate the policy of having a Summation of the Budget prepared for publication immediately after the Congress has acted on all financial matters. This summation will be ready on or before July 1, unless the Congress is still in session. It will be presented along the lines of the General Budget Summary and supporting schedules, including Statements Nos. 1 and 2, as shown in this Budget. It will exhibit the revenue estimates, so revised by the Treasury, as to reflect any changes in the economic situation during the preceding 6 or 7 months and also any revisions made by the Congress in the tax laws. It will provide a complete summary of all appropriations and expenditure authorizations made by the Congress and related estimates of expenditures. Lastly, it will indicate the need for executive or administrative measures in controlling the execution of the Budget during the fiscal year 1936.

A substantial reduction in the number of appropriation items would facilitate the exercise of budgetary control over expenditures and at the same time make for departmental economy. I, therefore, recommend that the Congress establish a special joint committee to make a detailed study of the appropriation items in each regular appropriation bill with a view to greatly reducing the number of them, consistent with proper budgetary and accounting requirements.

---

It is my belief that substantial adherence to the general recommendations and total figures presented in this Budget will accomplish three major objectives: (1) The normal functions of the United States Government can be carried on with economy and a high standard of efficiency, (2) the broad obligation of the Government to use all proper efforts to prevent destitution can be maintained under more practical methods than we are using at present, and (3) the excellent credit of the Government will be maintained for the common good.

I believe that the Congress will sustain these objectives.

FRANKLIN D. ROOSEVELT.

JANUARY 3, 1935.

## APPENDIX

TEXT OF LEGISLATION RECOMMENDED IN CONNECTION WITH THE  
BUDGET FOR 1936

## TITLE — ECONOMY PROVISIONS

SEC. —. Title II of the act entitled "An act to maintain the credit of the United States Government", approved March 20, 1933, as amended, is amended by inserting at the end thereof the following:

"SEC. 11. (a) The following sections, as amended, of part II of the Legislative Appropriation Act, fiscal year 1933, are hereby continued in full force and effect during the fiscal year ending June 30, 1936: Sections 107 (except paragraph (5) of subsection (a) thereof and subsection (b) thereof) (special salary reductions); 206 (except subsections (a) and (b) thereof) (reducing travel allowances); 214 (authorizing temporary assignments in the Postal Service); 317 (authorizing transfers of appropriations); and 323 (reducing jurors' and witnesses' fees).

"(b) Section 18 of the Treasury-Post Office Appropriation Act, fiscal year 1934 (suspending reenlistment allowances), is hereby continued in full force and effect during the fiscal year ending June 30, 1936.

"(c) Section 8 of the Independent Offices Appropriation Act, 1934 (involuntary separation from Government service), is amended by striking out 'July 1, 1935' and inserting in lieu thereof 'July 1, 1936.'

"(d) For the purpose of continuing the sections enumerated in subsections (a) and (b) of this section, in the application of such sections with respect to the fiscal year ending June 30, 1936: The figures '1933' shall be read as '1936'; the figures '1934' as '1936' (except in the case of the second proviso of such section 317); and, in the case of the first proviso of such section 317, the figures '1935' shall be read as '1938', the figures '1934' shall be read as '1937', and the figures '1933' shall be read as '1936'."

SEC. —. Notwithstanding the suspension during the fiscal years 1933, 1934, and 1935 of the longevity increases provided for in the tenth paragraph of section 1 of the Pay Adjustment Act of 1922, the personnel (active or retired) so affected shall be credited with service rendered subsequently to June 30, 1932, in computing their active or retired pay accruing subsequently to June 30, 1935: *Provided*, That this section shall not be construed as authorizing the payment of back longevity pay for the fiscal years 1933, 1934, and 1935 which would have been paid during such years but for the suspension aforesaid.

### ANALYSIS OF REVENUE ESTIMATES

The revenues of the Federal Government are mainly dependent upon the tax structure and the level of business activity. Hence, in the preparation of revenue estimates in November of each year, the Treasury is required, assuming the continuance of the then-existing tax structure, to forecast the probable trend of business activity for the ensuing 20 months—the period covering the remainder of the then-current fiscal year and the next fiscal year.

Because of our Federal taxation practices, it is not to be expected that Federal revenues will promptly reflect the anticipated improvement in business conditions. Income tax collections, which account for a large fraction of Federal revenues, are derived from incomes of the preceding calendar year for the most part. Our collections of income taxes during the next 6 months—that is, the latter half of the fiscal year 1935—will be based upon the business volume of the calendar year 1934, and our collections during the fiscal year 1936 will be based upon the business volumes of 1934 and 1935. The higher level of incomes anticipated for the calendar year 1936 will not be reflected in income-tax collections until the fiscal year 1937. Hence, it is anticipated that a rising level of business activity during the next 18 months would only moderately increase our income-tax receipts during that period. Certain miscellaneous internal rev-

enue receipts, notably estate and gift taxes, also show a lag in tax collections behind changes in general business conditions.

#### TOTAL ESTIMATED REVENUE COLLECTIONS

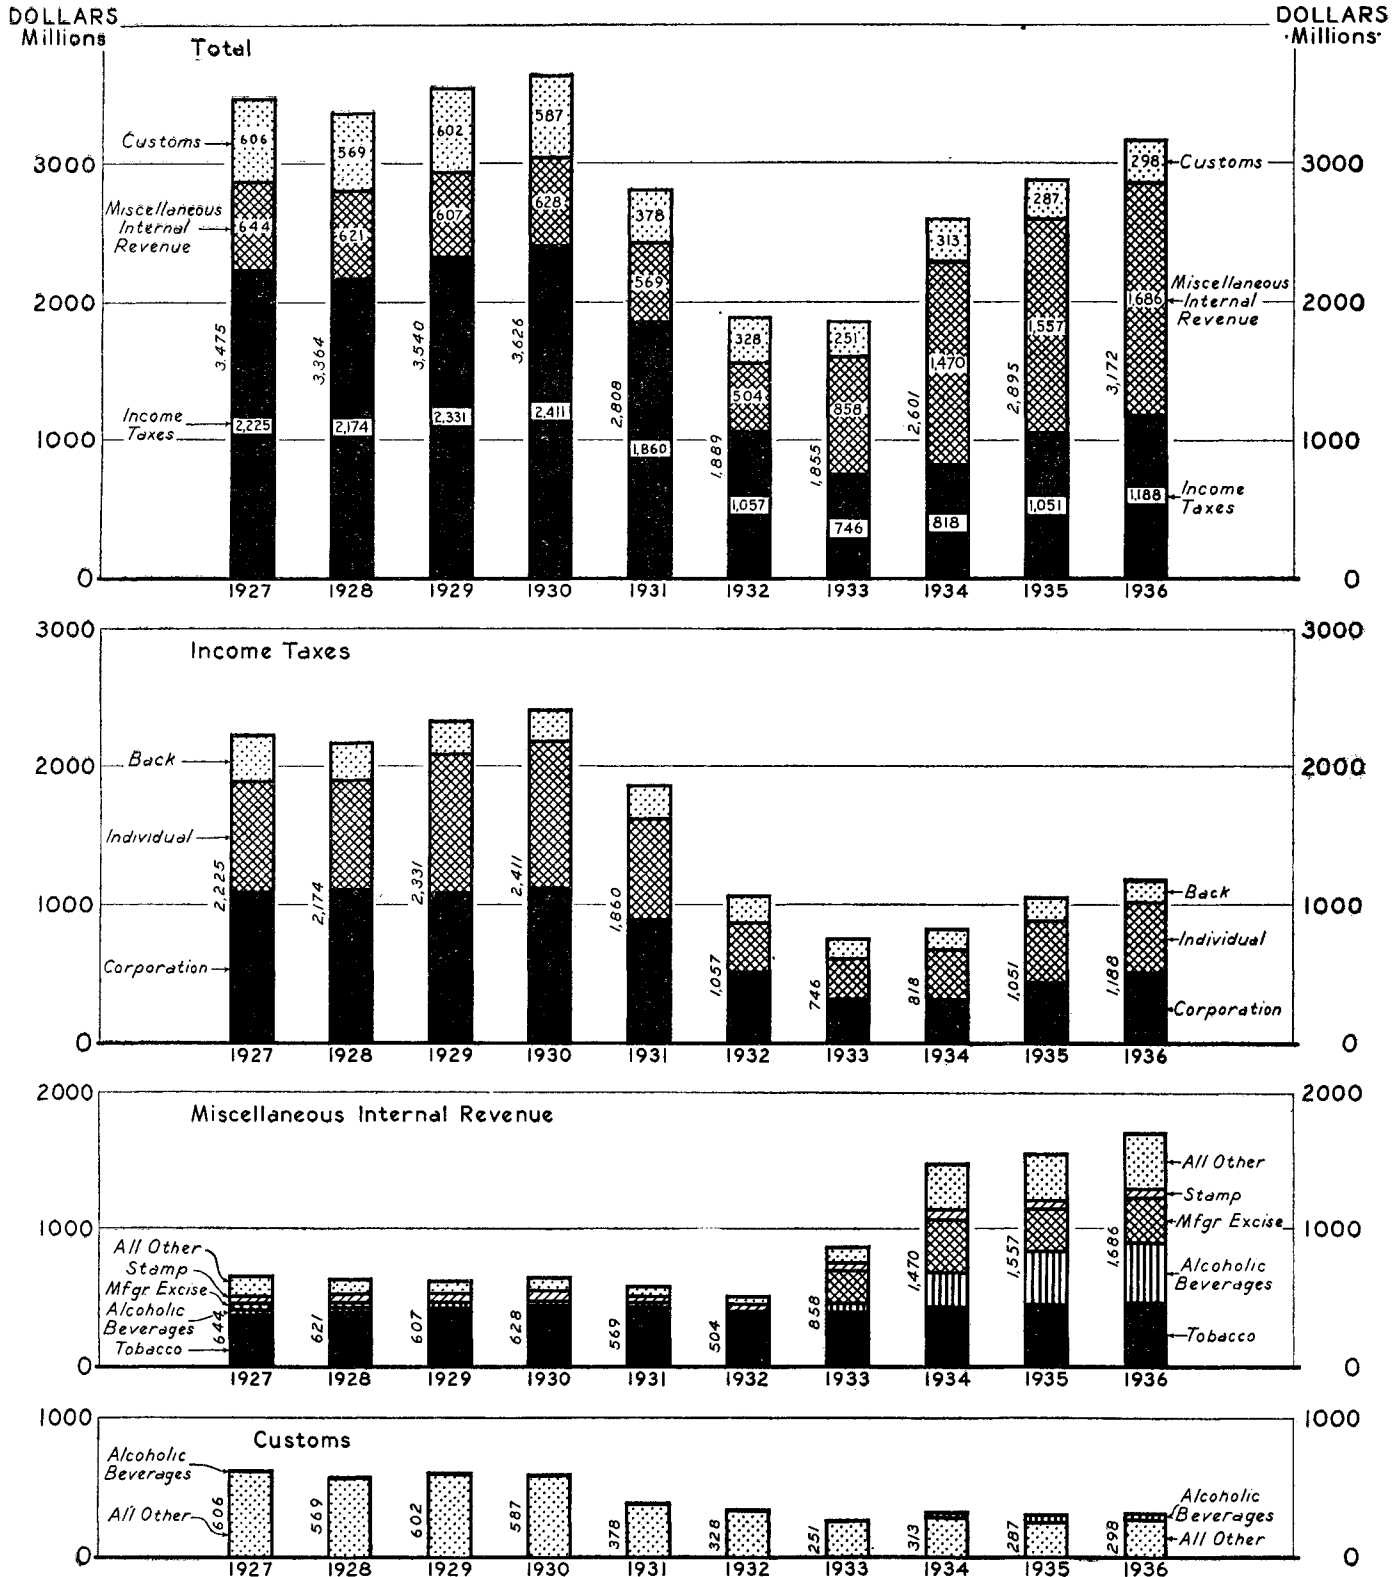

Total receipts from customs and internal revenue, exclusive of processing taxes, are estimated (on Treasury statement basis) at \$2,895,000,000 for the fiscal year 1935, and at \$3,172,000,000 for the fiscal year 1936, assuming in the latter case that the temporary taxes expiring June 30, and July 31, 1935, are reenacted. These estimated receipts represent increases of \$294,000,000 and \$571,000,000, respectively, over the actual receipts for the fiscal year 1934. If the temporary taxes are not extended, the resultant loss of revenue for the fiscal year 1936 is estimated at \$378,000,000 for internal revenue, and \$11,000,000 for customs.

A broad perspective of the actual and estimated changes in the principal sources of Federal revenues for the fiscal years 1927 to 1936, inclusive, may be derived from Chart I. Whereas up to the fiscal year 1932, roughly, one-third of the Federal revenue receipts had been derived from customs and miscellaneous internal-revenue taxes and, roughly, two-thirds from corporation and individual income taxes, the relative proportions had been reversed by the fiscal year 1934. This reversal was due both to

the large decline in income taxes and to substantial increases in manufacturers' excise and other taxes.

It is important to note, however, that the gains in miscellaneous internal-revenue receipts, particularly beginning with the fiscal year 1934, owe much to the taxes on alcoholic beverages, following the repeal of the eighteenth amendment, and to those on estates, gifts, capital stock, dividends, and excess profits. Alcoholic beverages, which yielded only \$8,700,000 in the fiscal year 1932 and \$43,200,000 in the fiscal year 1933, returned \$259,000,000 in the fiscal year 1934, and are estimated to yield \$392,000,000 and \$430,000,000, respectively, in the fiscal years 1935 and 1936. Estate, gift, capital stock, dividends, and excess-profits taxes yielded \$246,000,000 in the fiscal year 1934, and, despite the repeal of the tax on dividends, are expected to yield \$244,000,000 and \$312,000,000, respectively, in the fiscal years 1935 and 1936.

Receipts from processing taxes levied under the Agricultural Adjustment Act, are estimated (on Treasury statement basis) at \$589,000,000 for the fiscal year 1935, an increase of \$236,000,000 over those of the preceding year, bringing the total revenues and receipts for 1935, exclusive of postal revenues, miscellaneous revenues and receipts from the realization upon assets, to \$3,484,000,000. When miscellaneous revenues and receipts from the realization upon assets are added, the estimated total belonging to the general and special accounts becomes \$3,711,600,000, exclusive of postal revenues.<sup>1</sup>

For the fiscal year 1936 the estimated total revenues and receipts belonging to the general and special accounts, exclusive of postal revenues, miscellaneous revenues, and receipts from the realization upon assets, amount to \$3,742,000,000. When miscellaneous revenues and receipts from the realization upon assets are added, the estimated total becomes \$3,991,900,000, exclusive of postal revenues.<sup>1</sup>

#### EFFECTS OF RECENT REVENUE LEGISLATION

The effects of recent revenue legislation will be felt unequally in the fiscal years 1935 and 1936. The Revenue Act of 1934, which eliminated some taxes but increased the yields of others, will be fully reflected in the collections of the fiscal year 1936, but only partly so in the fiscal year 1935. Thus, the increased yields from income taxes provided by this act will affect 1935 collections only in the second half of that fiscal year, whereas they will be fully reflected in the collections of the fiscal year 1936. A similar situation obtains with respect to the changes in the gift taxes. Likewise, revisions made in the estate taxes will not become fully reflected in collections until the fiscal year 1936, because estate tax returns are not required to be filed until 1 year after death.

It is estimated that the net effect of the Revenue Act of 1934, combined with that of the Treasury's changed policy with respect to depreciation allowances, will be an addition of approximately \$80,000,000 to the revenues of the fiscal year 1935, and of approximately \$304,000,000 to those of the fiscal year 1936. The increased receipts from income taxes attributable to these changes are estimated at \$87,000,000 and \$142,000,000, respectively, in the fiscal years 1935 and 1936; and those from estate, gift, capital stock, and excess profits taxes, at \$23,000,000

<sup>1</sup> For the amounts and details of estimated postal revenues, see the Annexed Budget of the Post Office Department.

and \$162,000,000. From the total gains from these sources, a deduction of approximately \$42,000,000 in the fiscal year 1935 must be allowed, it is estimated, as a result of the repeal or reduction of taxes on soft drinks, candy, checks, furs, jewelry, and sales of produce for future delivery.

#### REVENUE ESTIMATES FOR THE FISCAL YEAR 1935

As shown in the foregoing Statement No. 1, the total receipts from customs and internal revenue, exclusive of processing taxes, for the fiscal year 1935 are estimated (on a collection basis) at \$2,881,000,000, an increase of \$280,000,000 over the actual receipts (on a Treasury statement basis) of the fiscal year 1934. The sources of these revenues may be broadly summarized as follows:

[In millions of dollars]

	1934	1935
Miscellaneous internal revenue.....	1,469.6	1,543
Income.....	818.0	1,051
Customs.....	313.4	287
Total.....	2,601.0	2,881

The estimated increase is the net result of gains in revenue derived from improvement in business activity, the changes inaugurated by the Treasury in its administration of depreciation allowances, the reenactment of the capital stock and excess-profits taxes, and the upward revisions in the yields of income, estate, and gift taxes incorporated in the Revenue Act of 1934, among other factors; less decreases in revenue occasioned principally by the removal of certain taxes, chiefly the taxes on dividends and checks, and by smaller customs receipts.

Collections from the current corporation income taxes in the fiscal year 1935 are estimated at \$440,000,000, an increase of \$119,000,000 over the actual collections for the fiscal year 1934. The higher level of corporate earnings is expected to contribute about \$83,000,000 of this increase. The remainder is expected to be derived from the effects of the elimination of consolidated returns, the imposition of a surtax on personal holding companies, and the changed provisions with regard to reorganizations in the Revenue Act of 1934; and from the Treasury's change in its administration of depreciation allowances.

The last-named factor is also expected to add to the results of the special efforts of the Bureau of Internal Revenue to collect back taxes, the collections of which are estimated at \$167,000,000 in 1935, an increase of \$26,000,000 over 1934.

Current individual income taxes are estimated to yield \$444,000,000 in the fiscal year 1935, an increase of \$89,000,000 over the preceding year, of which approximately \$26,000,000 is attributable to the net effect of changes in the rate structure and in the capital gains and losses provisions incorporated in the Revenue Act of 1934.

Despite a substantial decline in anticipated collections from manufacturers' excise taxes, stamp taxes, and certain other sources, total miscellaneous internal revenues are estimated at \$1,543,000,000 (on the collection basis) in the fiscal year 1935, an increase of \$60,000,000 over those of the preceding year. The Revenue Act of 1934 repealed taxes on soft drinks, candy, and checks, and reduced from 5 cents per \$100 to 3 cents per \$100 the

stamp tax on sales of produce for future delivery. Taxes on gasoline, moreover, are estimated to yield \$43,000,000 less in the fiscal year 1935 than in the previous year because a 1½-cent rate per gallon, imposed by the National Industrial Recovery Act, was in effect during part of the fiscal year 1934, whereas the 1-cent rate per gallon is scheduled to be in effect throughout the fiscal year 1935. A further loss of revenue in the fiscal year 1935 results from the repeal of the tax on dividends, which, during the 6 months it was in effect in the fiscal year 1934, yielded more than \$50,000,000.

Increased receipts from estate taxes, resulting mainly from the estimated increase in the value of estates, and, to a slight extent, from the application of the increased rates provided by the Revenue Act of 1934, as well as greater revenues resulting from the growing domestic manufacture and consumption of distilled spirits and wines, fermented malt liquors, and tobacco, will, it is estimated, more than counterbalance the losses in revenue mentioned immediately above.

Changes in estimated collections from principal sources of miscellaneous internal revenue in the fiscal year 1935, as compared with actual collections of the fiscal year 1934, are summarized in the following table:

*Receipts from principal sources of miscellaneous internal revenue*  
[In millions of dollars]

All other.....	147.3	182.6	+35.3
Total miscellaneous internal revenue.....	1,483.7	1,543.0	+59.3

Customs receipts for the fiscal year 1935 are expected to be about \$26,000,000 smaller than those of the preceding year. The decrease is to be attributed in part to the reduction in duty on Cuban sugar and to a smaller volume of other dutiable imports, exclusive of alcoholic beverages. The duty on Cuban sugar was reduced from 2 cents per pound to 1.5 cents per pound, effective June 8, 1934; and to nine-tenths of 1 cent per pound, effective September 3, 1934, after the signing of the Cuban Trade Agreement. The effect of the reduced sugar duty upon the customs receipts of the fiscal year 1935 was partly counteracted by the concentration in the latter half of the calendar year 1934 of a large part of the year's quota for Cuban sugar imports. Further counteracting, in part, the decline in customs revenues from sugar and other imports, is an estimated increase of \$10,000,000 in the fiscal year 1935 of revenues from imports of distilled spirits and fermented liquors.

Processing taxes are estimated to yield \$571,000,000 in the fiscal year 1935 an increase of \$200,000,000 over collections of the preceding fiscal year. The largest increase is anticipated in corn-hog taxes, which are expected to

rise from \$81,500,000 in the fiscal year 1934 to \$217,000,000 in 1935. A very substantial increase will likewise take place in the case of sugar receipts which are expected to rise from less than \$170,000 in 1934 to \$82,000,000 in 1935. Collections from processing taxes on tobacco are estimated to rise from \$18,000,000 to \$33,000,000, and on wheat from \$117,600,000 to \$121,000,000. Collections from the cotton taxes, including jute and paper fiber, on the other hand, are expected to decline from \$154,000,000 in 1934 to about \$111,000,000 in the fiscal year 1935. The processing tax on peanuts, which was not effective in the fiscal year 1934, is expected to yield \$5,000,000 in 1935.

The estimated collections of the various processing taxes for the fiscal year 1935 are based upon an analysis of the probable domestic consumption of each commodity. Factors likely to affect consumption, such as supply, demand and prices, were considered in making the estimates. Likewise, the actual volume of processing and the total collections from each tax up to October 31, 1934, were taken into account before arriving at the estimate of collections for each commodity.

Each processing tax, levied under the Agricultural Adjustment Act, becomes effective with respect to an agricultural commodity at the beginning of the next marketing year subsequent to the date on which the Secretary of Agriculture proclaims that rental and benefit payments are to be made with respect to that commodity. This tax continues in effect until the end of the marketing year in which the payment of rental and benefits cease. The act also provides for a tax equivalent to the processing tax on floor stocks when the tax first becomes effective; upon imports of products of basic commodities on which a tax is effective, and, under certain circumstances, upon competing commodities. The only compensating taxes currently effective are on the processing, under some conditions, of paper and jute fiber.

The rate of the processing tax imposed on each commodity is determined in accordance with the provisions of the Agricultural Adjustment Act. The rates currently effective are: Cotton, 4.2 cents per pound; wheat, 30 cents per bushel; corn, 5 cents per bushel; hogs, \$2.25 per hundredweight; sugar, 0.5 cent per pound (raw value); peanuts, 1 cent per pound, and tobacco, zero to 6.1 cents per pound—farm sales weight (different rates for different types of tobacco).

Miscellaneous revenues for the fiscal year 1935 are estimated at \$218,000,000, representing an increase over the previous fiscal year of \$65,000,000. This increase is practically all due to one item, that is, the profits of the mint from coinage and bullion deposit.

Receipts from the realization upon assets are estimated at \$9,400,000 for the fiscal year 1935, or only slightly above the actual receipts for 1934.

#### REVENUE ESTIMATES FOR THE FISCAL YEAR 1936

Total collections from customs and internal revenue, exclusive of processing taxes, for the fiscal year 1936 are estimated at \$3,172,000,000, if the temporary taxes expiring June 30, and July 31, 1935, are extended. This figure represents an increase from these sources of \$291,000,000 over the estimated collections of the fiscal year 1935, and of \$571,000,000 over the actual receipts of the fiscal year 1934. If the temporary taxes are not extended, customs and internal revenue, excluding proc-

essing taxes, will be reduced by approximately \$378,000,000; and \$11,000,000, respectively; that is, to \$2,783,000,000, or \$112,000,000 less than the estimated receipts from these sources in the fiscal year 1935.

Receipts from income taxes in the fiscal year 1936 will fully reflect the upward revision of the Revenue Act of 1934 and will gain further because of the moderately higher incomes anticipated for the calendar years 1934 and 1935, as compared with those of 1933 and 1934. Total income-tax collections are estimated at \$1,188,000,000, an increase of \$137,000,000 over the estimated collections for the fiscal year 1935.

Current corporation income taxes are estimated to yield approximately \$69,000,000 more than in the fiscal year 1935, principally by reason of the revised provisions of the Revenue Act of 1934. Current individual income taxes are estimated to gain \$62,000,000, the greater part of which will reflect the changes in the rate structure and in the capital gains and losses provisions incorporated in the Revenue Act of 1934. Revenue from back tax collections is estimated at \$173,000,000, or \$6,000,000 more than the estimate for 1935.

If the temporary taxes expiring June 30 and July 31, 1935, are extended, important increases are anticipated in miscellaneous internal revenue receipts during the fiscal year 1936. Receipts from estate taxes and gift taxes will reflect fully the increased rates of the Revenue Act of 1934 and are estimated to yield \$191,000,000 and \$25,000,000, respectively, representing increases of \$54,000,000 and \$14,000,000 as compared with estimated receipts from these taxes in the fiscal year 1935. Revenues from distilled spirits and wines and from fermented liquors, including special taxes, are estimated to show increases of \$27,000,000 and \$11,000,000, respectively, over 1935, partly in consequence of the estimated higher level of incomes and partly because of the rising trend in the domestic manufacture and consumption of distilled spirits and wines due to improvement in quality, combined with a reduction in illicit manufacture. The repeal of the tax on checks, effective as of January 1, 1935, collections from which are estimated to yield \$24,000,000 in the fiscal year 1935, will offset part of the gains over 1935 from other sources.

The total of miscellaneous internal revenue collections in the fiscal year 1936, assuming the extension of the temporary taxes, is estimated at \$1,686,000,000, an increase of \$143,000,000 over the estimated collections of the fiscal year 1935.

Principal changes in estimated miscellaneous internal revenue receipts in the fiscal year 1936 as compared with the fiscal year 1935, with and without the extension of the temporary taxes, are shown graphically on Chart II and summarized in the following tables:

Customs receipts are estimated at \$298,000,000 for the fiscal year 1936, assuming that temporary duties on certain commodities (coal, lumber, petroleum products, copper, and copper products) are extended, an increase of \$11,000,000 over the estimated collections of 1935. Decreases are expected in collections from Cuban sugar imports and from imports of distilled spirits and fermented liquors, but other dutiable imports are expected to more than counterbalance these reductions. The lower duty on Cuban sugar will be effective throughout the year and, hence, is not expected to yield as much revenue as in the fiscal year 1935, when imports that would normally have been made in the fore part of the calendar year 1934, were concentrated in the latter half of that year, thus swelling the customs receipts of the 1935 fiscal year. A decline of some \$3,000,000 is anticipated in the receipts from duties on imports of alcoholic beverages by reason of improvement in the quality of the domestic product.

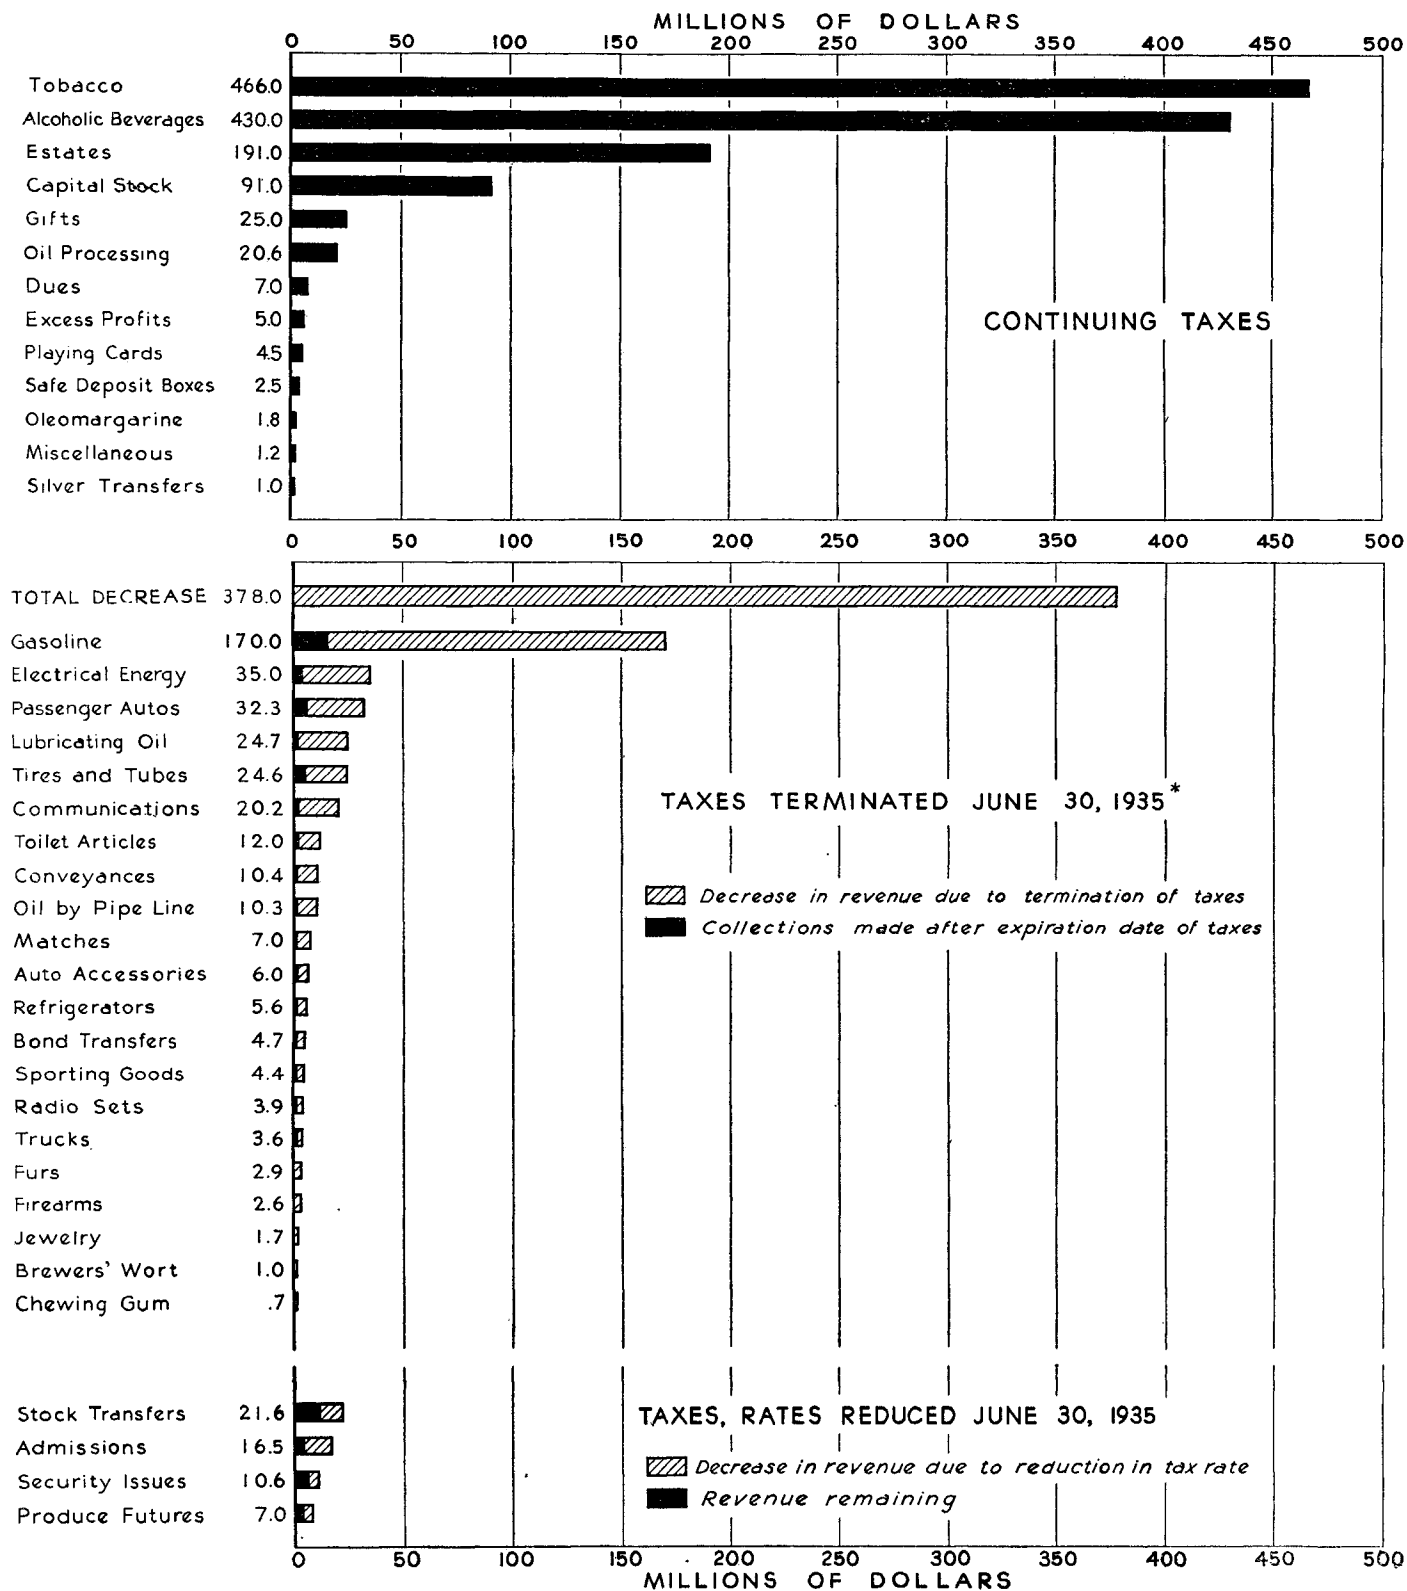

Receipts from processing taxes for the fiscal year 1936 are estimated at \$570,000,000. This estimate is made on

the assumption that it will be necessary to continue the work of the Agricultural Adjustment Administration on practically the same basis as during the fiscal year 1935.

Miscellaneous revenues for the fiscal year 1936 are estimated at \$171,000,000, a reduction of about \$47,000,000, from the estimates of the previous fiscal year. This reduction is due to an estimated falling off in the profits of the mint from coinage and bullion deposits.

Receipts from the realization upon assets for the fiscal year 1936 are estimated at \$79,000,000, or an increase over the estimates of the preceding fiscal year of \$70,000,000. This increase is due almost entirely to the anticipated repayment of loans made to the States and municipalities by the Public Works Administration.

The receipts of the various trust accounts, appended to Statement No. 1, are not applicable to the financing of the general expenditures of the Government. They are, therefore, not carried into the General Budget Summary and supporting schedules, except into Supporting Schedule No. 4, where the balances of the trust accounts enter into the computation of the general fund balance. These receipts for the fiscal year 1936 are estimated, in the aggregate, at \$169,000,000, or about \$2,000,000 more than the estimates for 1935 and some \$7,000,000 more than the actual figures for 1934.

**ANALYSIS OF APPROPRIATION AND EXPENDITURE ESTIMATES**

It will be noted that Statement No. 2 presents in three parallel columns the appropriation estimates for 1936 and the actual appropriations for 1935 and 1934. Adjacent to these columns are three additional columns exhibiting the estimated expenditures for 1936 and 1935 and the actual expenditures for 1934. To avoid confusion in comparing the figures in these six columns, one should have some knowledge of the basis upon which such figures are prepared.

Taking up the first three columns of figures, the 1934 and the 1935 columns carry the appropriations which have already been made by the Congress for those fiscal years. The 1936 column presents the amounts for the various organization units (i. e., departments, bureaus, establishments, and agencies) and objects which the President has recommended to the Congress for appropriation or authorization at its 1935 session. These amounts are not likely to be the same as those which will actually be expended during the fiscal year 1936, the latter amounts being shown in the column of estimated expenditures for that year, as explained below.

The appropriations, it should be observed, are of two general types—annual and permanent. The annual appropriations, ordinarily found in the departmental supply bills, are voted each year by the Congress. They are usually definite or specific as to amounts. They may be obligated only during the year to which they relate, their unexpended balances remaining available on the books for payment of obligations during 2 additional years before being closed into the so-called "surplus fund" of the Treasury. The permanent appropriations are automatically renewed each fiscal year over a period of time

by virtue of permanent legislation, without annual action by the Congress. Such appropriations may be either specific or indefinite as to amounts. An example of the latter is the indefinite permanent appropriation to cover the interest on the national debt. This type of appropriation, while sometimes difficult to ascertain as to amount, does not preclude an estimated figure for the Budget. The number of the permanent appropriations has been greatly reduced, effective July 1, 1935, by the Permanent Appropriation Repeal Act of June 26, 1934. Sometimes the Congress makes appropriations which are available until expended, or until the object for which they are made is accomplished. These appropriations are without a definite time limit, and may, therefore, be called "no-year" appropriations. They are generally for the construction of public-works projects.

Turning to the three columns under the caption "expenditures", the column for 1934 shows the actual expenditure figures for that fiscal year. These figures are usually on a checks-issued basis and are adjusted at appropriate subtotals or totals to the cash basis (checks-paid basis) as shown on the daily Treasury statement. The totals, therefore, are on an actual cash basis. The column for 1935 shows the estimated expenditures for that fiscal year on a cash basis. The fact that this column may show estimated expenditures which are larger than the appropriations made for 1935 is due to the carry-over of prior obligations for payment in this fiscal year. Likewise, the same condition holds true for the estimated expenditures in the column for the fiscal year 1936. The expenditure figures contained in these three columns are the ones which are carried in totals to the General Budget

Summary and supporting schedules. Hence the Budget is, in effect, on a cash basis with respect to expenditures, and, for that matter, receipts too.

The italicized items appearing in Statement No. 2 represent emergency appropriations and/or expenditures under the National Industrial Recovery program. The totals of these various items are comparable with the summary figures presented on the last page of the daily Treasury statement, under the caption "Funds appropriated and allocated to emergency organizations, expenditures, therefrom, and unexpended balances", with the exception of the items for the Agricultural Adjustment Administration, refunds of processing taxes, and subscriptions to stock of Federal land banks. The emergency (italicized) items from Statement No. 2 are summarized, including the exceptions just noted, and presented in the General Budget Summary under the expenditure group called "Recovery and relief." This group is carried in detail in Supporting Schedule No. 3.

#### ESTIMATED EXPENDITURES FOR THE FISCAL YEAR 1936

The estimated expenditures of the legislative branch, the judiciary, and executive office for the fiscal year 1936 are only slightly higher than those for 1935. These expenditures amount in the aggregate to \$36,600,000, or about \$4,000,000 more than the actual expenditures in 1934.

For the civil departments and agencies of the Government, the estimated expenditures for 1936, as shown on Supporting Schedule No. 2, total \$788,000,000, inclusive of \$200,000,000 for proposed public works. The net amount of \$588,000,000 is principally for the operation and maintenance of these departments and agencies. This sum is approximately \$22,000,000 higher than the estimated expenditures for 1935, which in turn are about \$8,000,000 less than the actual expenditures for 1934. The latter expenditures amounted in the aggregate to \$574,000,000.

Taking up the individual departments, the estimated expenditures of the Department of Agriculture are placed at \$65,000,000 for 1936, an increase of about \$1,000,000 over the 1935 requirements. But the latter requirements are some \$6,000,000 above the actual expenditures for 1934. The expenditures for the Department of Commerce for 1936 are estimated at \$27,000,000, which is about \$4,000,000 above the 1935 estimate and approximately \$9,000,000 above the actual expenditures for 1934. The estimated expenditures for the Department of the Interior are put at \$67,000,000 for 1936, an increase of \$14,000,000 over the 1935 estimate and an additional \$4,000,000 over the actual expenditures for 1934. This represents the largest increase made for any of the civil departments of the Government. The details of this increase may be ascertained by examining Statement No. 2. For the Department of Justice, excluding the judiciary, the expenditures for 1936 are estimated at \$18,000,000. This amount is approximately \$1,000,000 above the actual expenditures for 1934 and slightly more than that amount above the estimated expenditures for 1935. The Department of Labor is estimated to require \$16,000,000 for 1936, which is about \$1,000,000 above the estimated expenditures for 1935. But the 1935 figure is more than \$4,000,000 above the actual expenditures for 1934. The estimated expenditures for the Department of State for 1936 total \$14,000,000, a decrease of about \$1,000,000

under the 1935 estimated expenditures, but an increase of some \$2,000,000 over the actual expenditures for 1934.

The Treasury Department is estimated to expend 137,000,000 in 1936, exclusive of retirements and interest on the national debt and tax refunds. This amount represents a decrease of about \$8,000,000 under the estimated expenditures for 1935, and an additional decrease of approximately \$40,000,000 under the actual expenditures for 1934. The War Department, for its non-military activities exclusive of the Panama Canal, is estimated to require \$63,000,000 for 1936. This expenditure is about \$12,000,000 less than that estimated for 1935, which in turn is approximately \$7,000,000 less than the actual expenditure for 1934. The expenditure requirements of the Panama Canal are placed at \$11,000,000 for 1936, or an annual increase over the 2 previous years of about a million dollars. The regular independent offices and establishments of the Government are estimated to expend for 1936 about \$43,000,000. This amount is nearly \$2,000,000 more than the previous year's estimate, and approximately the same as the actual expenditure for 1934. The Government's share of the retirement funds for the civil, Canal Zone, and Foreign Service is placed at slightly more than \$40,000,000 for 1936, representing an increase over each of the 2 preceding years of about \$20,000,000. The postal deficiency for 1936 is estimated at \$80,000,000, an increase over the actual deficiency for 1934 of about \$16,000,000 (see Annexed Budget of the Post Office Department). The Federal contribution to the District of Columbia for 1936 remains at \$5,700,000, as in 1934 and 1935 (see Annexed Budget of the District of Columbia).

For national defense, an expenditure of \$792,000,000 is estimated for 1936, as shown on Supporting Schedule No. 2. This amount represents an increase of \$180,000,000 over the estimated expenditure for 1935, which in turn is \$133,000,000 more than the actual expenditure for 1934. Of this increase, the Navy Department receives the major part. Its estimated expenditures for 1936 are put at \$477,000,000, an increase of \$134,000,000 over the previous year's estimate and an additional increase of \$69,000,000 over the actual expenditure for 1934. The expenditures of the War Department for 1936 are estimated at \$315,000,000. This amount is \$45,000,000 more than the estimated expenditures for 1935, and an additional \$65,000,000 more than the actual expenditures for 1934.

Veterans' pensions and benefits are estimated to require for 1936 nearly \$705,000,000. This amount is approximately \$160,000,000 more than the estimated figure for 1935. The latter figure, however, will probably be revised upward by a supplemental amount before the end of the fiscal year.

The charges on the national debt approximate \$1,511,000,000 for 1936, as against \$1,407,000,000 for 1935, and \$1,116,000,000 for 1934. The interest for 1936 will amount to \$875,000,000, while retirements will reach \$636,000,000 for that fiscal year.

Refunds for customs and internal-revenue taxes, excluding processing taxes, are estimated to require \$65,000,000 for 1936. This amount is about \$3,000,000 less than the estimate for 1935, but some \$2,000,000 more than the actual expenditure for 1934.

The foregoing expenditures, totaling for 1936 approximately \$3,898,000,000, may be regarded as the regular requirements of the Government. These expenditures

for 1936 are \$662,000,000 greater than the regular expenditures estimated for 1935, and \$1,077,000,000 greater than the actual expenditures for these purposes in 1934.

The expenditures for recovery and relief, or the so-called "emergency expenditures", for 1936 are estimated at \$4,582,000,000. For 1935 these expenditures are estimated at \$5,260,000,000. In 1934 they actually amounted to \$4,283,000,000. Through appropriations and authorizations made by the Congress, there had been provided for recovery and relief to November 30, 1934, the grand total of \$14,412,000,000. Of the total amount provided for recovery and relief to November 30, 1934, there had been expended on that date (for a period reaching back to Feb. 1, 1932) the sum of \$8,164,900,000. This expenditure was distributed approximately as follows: Agricultural aid, \$1,337,300,000; relief, \$2,783,000,000; public works, \$1,226,200,000; aid to home owners, \$306,300,000; Reconstruction Finance Corporation, \$2,351,200,000; and miscellaneous purposes, \$160,900,000.

#### APPROPRIATIONS FOR THE FISCAL YEAR 1936

The detailed figures, representing the increases and decreases in the estimates of appropriations for 1936 over the appropriations actually made for 1935, are to be found in the Explanatory Synopsis at the beginning of the Estimates of Appropriations for each department or establishment, as these estimates are presented in the subsequent pages of the Budget. The major items in these figures are summarized below for those who wish simply a birdseye view of the appropriation changes recommended for 1936. Salary restoration to a 100-percent basis is discussed first, and after that the other important increases or decreases in the requested appropriations of the various departments and establishments.

##### 5-PERCENT SALARY AND COMPENSATION RESTORATION

The proposed restoration of the final 5 percent of salary reduction made by the 1933 economy legislation is estimated to require an annual increase in the salary rolls of \$65,000,000 for the regular departments and establishments of the Government. Of this amount, \$25,000,000 will go to the salaries of the Post Office Department, leaving \$40,000,000 for the other departments and establishments. In addition to this total sum, the Veterans' Administration will require \$20,000,000 to restore pensions and compensations to a 100-percent basis. Hence the restoration of the final 5 percent will require in the aggregate an increase of \$85,000,000 in the appropriation requirements for 1936.

##### LEGISLATIVE ESTABLISHMENT

The appropriation estimates of the legislative establishment for 1936 show a decrease of nearly \$600,000, aside from salary restoration. This decrease is due principally to the nonrecurring items in 1935 for repairs and for replacement of elevators in the Capitol and adjacent buildings.

##### INDEPENDENT OFFICES AND ESTABLISHMENTS

There are three important increases, aside from salary restoration, in the estimates of appropriation for the independent offices and establishments for 1936. One of

these is an increase of approximately \$20,000,000 for the civil-service and Canal Zone retirement and disability funds, so as to bring these funds more nearly up to the actuarial requirements. Another is an increase of \$760,000 for the new Federal Communications Commission, which succeeded the Federal Radio Commission. The third increase of \$2,056,000 is for the newly organized Security and Exchange Commission.

##### DEPARTMENT OF AGRICULTURE

The principal increases in the 1936 requests for appropriations for the Department of Agriculture are as follows: \$118,000 for the Weather Bureau, \$623,000 for the Bureau of Plant Industry, \$2,425,000 for the Forest Service, \$1,149,000 for the Bureau of Entomology and Plant Quarantine, \$585,000 for the Biological Survey, and \$474,000 for the Food and Drug Administration. In the total of requested appropriations for the Department, however, a large decrease is shown, due to the elimination of \$102,000,000 for the Bureau of Public Roads and about \$7,000,000 for miscellaneous purposes. But it should be added that most of this work will be carried on through allotments made from a requested appropriation of \$300,000,000 for public works to be executed on the basis of an annual program.

The Agricultural Adjustment Administration obtains the necessary moneys for its administrative expenses and general operation from unobligated balances of prior appropriations and from advances made by the Treasury against processing taxes. These taxes are currently appropriated to the work of the Administration. They are roughly estimated to amount to \$570,000,000 for the fiscal year 1936.

##### DEPARTMENT OF COMMERCE

The main increases for 1936, other than for salary restoration, in the requested appropriations for the Department of Commerce are as follows: \$117,000 for printing and binding; \$186,000 for aeronautics; \$170,000 for expansion of foreign and domestic commerce activities; \$295,000 for the censuses of manufactures, vital statistics, and financial statistics of cities; \$122,000 for the Bureau of Navigation and Steamboat Inspection; \$233,000 for the activities of the Bureau of Standards; \$207,000 for the Lighthouse Service; \$40,000 for the Bureau of Fisheries, to be used mainly in operating hatcheries; and \$330,000 for the Patent Office. The major items of decrease are \$946,000 for the agricultural census, and \$64,000 for disbursing activities transferred to the Treasury Department. The total trust accounts of the Department of Commerce are increased by \$106,000, due to the estimates for two new trust accounts as required by the Permanent Appropriation Repeal Act of 1934.

##### DEPARTMENT OF THE INTERIOR

The appropriation increases requested for the Department of the Interior for 1936 aggregate \$13,756,000, exclusive of salary restoration. These increases are largely the result of legislation enacted in the closing days of the last session of the Congress. Pursuant to the Wheeler-Howard Act of June 18, 1934, \$5,000,000 are provided for loans to Indian chartered corporations, \$250,000 for expenses of organizing such corporations,

\$1,000,000 for acquisition of lands for Indians, and \$175,000 for loans to Indians in payment of tuition at vocational and trade schools, high schools, and colleges. The Public Highways Act of June 18, 1934, made an increase of \$2,500,000 for roads in the national parks and monument grounds, and \$2,000,000 for roads in Indian reservations. The Taylor Grazing Act of June 28, 1934, accounts for an increase of \$250,000 for the new Division of Grazing Control. Finally, an increase of \$55,000 for the Mount Rushmore National Memorial Commission is provided, in accordance with the provisions of the act of June 26, 1934.

There are increases of \$408,000 for surveying the public lands and \$250,000 for topographic surveys, which replace in part moneys provided for these purposes during 1935 by the Public Works Administration. Increases for the custodial care of new buildings in the District of Columbia amount to \$895,000, and for buildings outside the District to \$340,000. The Alaska Railroad requires an increase in its appropriation of \$249,000. St. Elizabeths Hospital shows an increase of \$200,000 for construction of a new building to accommodate a larger number of inmates.

#### DEPARTMENT OF JUSTICE

The 1936 appropriation estimates for the Department of Justice show an increase of \$1,698,000 other than for salary restoration. About \$456,000 of this increase is for the judiciary, mainly for additional salaries and expenses. The penal and correctional institutions of the Department also show an increase of \$1,438,000, due principally to the fact that the appropriations for 1935 were reduced in anticipation of a falling off in the prison population which did not materialize. These increases are offset by decreases of about \$196,000 in some of the administrative units of the Department.

#### DEPARTMENT OF LABOR

The principal items involving increases in the requested appropriations of the Department of Labor for 1936 are the following: \$40,000 for reallocation of positions in grades; \$26,000 for additional employees in the Office of the Secretary; \$44,000 for expansion of the Division of Labor Standards; \$71,000 for printing and binding; \$385,000 for expansion of the Bureau of Labor Statistics and for completion of the cost of living investigation; \$267,000 for the Immigration and Naturalization Service; \$28,000 for the Children's Bureau; and \$251,000 for the Employment Service, as authorized by the act of June 6, 1933.

#### NAVY DEPARTMENT

Aside from salary restoration, the increase in appropriation requirements for the Navy Department in 1936 amounts to \$164,000,000. Of this increase, the sum of \$128,000,000 is to be used for the construction of naval vessels, aircrafts, and subsidiary works, and the remaining amount of \$36,000,000 is to be applied to annual maintenance and operating expenses. Out of the \$128,000,000 for construction, \$28,800,000 are to be assigned to the purchase of aircraft, \$4,500,000 for public-works projects, \$60,000,000 to continue the construction of 20 vessels laid down during the fiscal year 1935 under an allotment from the emergency appropriations of that

year, and \$32,000,000 to begin construction of 24 vessels to be laid down during the fiscal year 1936. The \$36,000,000 for maintenance include an increase of \$16,700,000 for pay and allowances of the regular and reserve personnel of the Navy and Marine Corps, embracing 165 additional officers for the Navy, 51 additional officers for the Marine Corps, 435 additional midshipmen at the Naval Academy, and 11,000 additional men for the Navy. These added men will bring the enlisted strength of the Navy from 82,500 men on July 1, 1935, to 93,500 at the close of the fiscal year 1936. This additional personnel is required to man the extra ships to be put in commission, to increase the complement for the larger vessels, to meet the increased requirements for aviation activities, and to replace the officers who will be placed on the retired list during the next 2 or 3 years. For the administration, maintenance, and operation of the fleet and shore activities there is included in the \$36,000,000 already noted an increase of \$19,500,000. This latter amount provides \$6,600,000 for repair, overhauling, maintenance, and operation of vessels; \$9,000,000 for maintenance and operation of shore stations, including ordnance plants; and \$3,750,000 for maintenance and operation of aircraft and air stations.

#### DEPARTMENT OF STATE

For the offices of the Department of State at Washington, an increase in appropriations of \$45,000 is requested for 1936. At the same time the Foreign Service shows a decrease in its estimated appropriations of \$1,822,000, principally due to the nonrecurring item of \$1,165,000 constituting its building fund; also international obligations, commissions, bureaus, etc., show a decrease of \$985,000, which consists mainly of nonrecurring items.

#### TREASURY DEPARTMENT

The principal increases for 1936 in the requested appropriations for the Treasury Department, aside from salary restoration, are as follows: \$1,424,000 for the office of Commissioner of Accounts, due to the requirements of the new Division of Disbursement, the equivalent of which has been deducted from the estimated appropriations of other departments, and to recoinage of silver coins; \$2,316,000 for the Bureau of Internal Revenue to augment tax collections; \$2,906,000 for the Coast Guard, intended to stabilize the force at 9,530 and to maintain stations, communication lines, vessels, aircraft and other equipment in good condition; \$705,000 for the Bureau of Engraving and Printing, mainly on account of an increase in nonreimbursable work, particularly internal-revenue liquor stamps; and \$748,000 for the Public Health Service, to be used for staffing new hospitals and narcotic farms, for longevity pay of officers, and for disease-prevention measures. The practical completion of the regular public-building program, under the act of May 26, 1926, accounts for a decrease under this item of \$12,000,000 below the 1935 appropriations. Refunds of customs and internal-revenue taxes are somewhat decreased below the requirements of 1935; trust accounts are increased \$15,535,000, principally due to the Philippine trust account relating to the coconut-oil tax; while debt retirements and interest charges mount upward by as much as \$104,000,000.

## WAR DEPARTMENT

For the military activities of the War Department an increase of \$38,500,000 is estimated in the appropriations for 1936. This added amount is principally due to automatic increases of \$3,049,000 provided by law in the pay and allowances of officers and enlisted men; to \$572,000 for travel of civilian and military personnel due to an enlarged program of Army field training and to the effect of legislation respecting the length of tours of duty overseas; to \$4,318,000 for the Quartermaster Corps, occasioned chiefly by an increase in the cost of the Army ration and the purchase of automotive vehicles to replace some of those acquired during the World War; to \$2,811,000 for the Signal Corps for radio equipment for the Army Air Corps; to \$20,353,000 for the Army Air Corps, mainly for the procurement of airplanes; to \$5,125,000 principally for the Ordnance Department in continuing mechanization of the Army, in improving field-artillery equipment, in furnishing modern armament for airplanes, and in manufacturing ammunition; to \$776,000 for the National Guard; and to \$1,073,000 for the Organized Reserves in procuring airplanes for replacement and in purchasing ammunition. For the nonmilitary activities of the War Department there was a decrease in the estimated appropriations for 1936 of \$12,500,000. Practically all of this decrease pertains to river and harbor improvements and flood control, and represents mainly an increase of approximately \$1,500,000 for maintenance of river and harbor improvements and a decrease of \$14,000,000 for

flood control of the Mississippi River made possible by the availability of old appropriation balances.

The appropriation estimates of the Panama Canal show an increase of \$3,159,000, largely for the replacement of structures, highways, and various canal accessories, many of which were built at the time the Canal was constructed and are now in a poor condition. A portion of this increase is for certain betterments that will aid in operating the Canal and for sanitation and civil government in the Canal Zone.

## THE ANNEXED BUDGETS

Inasmuch as the Post Office Department, the Reconstruction Finance Corporation, the Tennessee Valley Authority, and the District of Columbia are of a self-supporting or self-contained character, an annexed budget has been set up for each of these units. The appropriations requirements in each instance as they affect the general revenues of the Treasury are brought into Statement No. 2. The details of these requirements are to be found in the summary and supporting statements of each annexed budget. The net receipts or the net expenditures, as the case may be, are carried to the General Budget Summary and supporting schedules from each of the annexed budgets. In this way these budgets are integrated with the Budget as a whole and become subsidiary parts of the financial plan of the Government. At the same time a unified fiscal program in balanced form is presented for each of the units noted above through the medium of the annexed budget.

#### EXPLANATORY SYNOPSIS

The estimates of annual appropriations for the legislative establishment for the fiscal year 1936 indicate an apparent increase, over the appropriations for the fiscal year 1935, of \$1,273,839. However, this increase is offset by the indefinite appropriations carried in section 21 (e) of the act of March 28, 1934. The appropriations for the legislative establishment for the fiscal year 1935 were made on the basis of a 10-percent salary reduction. It is estimated that the diminution of the rate of salary reduction to 5 percent and the 40-hour-week provision under the above-cited act will increase the requirements of the legislative establishment for 1935 by \$1,059,422, thus making the 1935 appropriations \$19,292,453. The 1936 estimates include \$805,824 to provide for 100-percent salary payment during that year. As a result the other items reflect a net decrease of \$591,407 and the total net increase becomes \$214,417. The principal items involved are summarized below:

##### UNITED STATES SENATE

In the contingent expense items of the Senate there is an increase of \$31,045 for expenses of inquiries and investigations, and \$102,655 for "Miscellaneous items."

##### HOUSE OF REPRESENTATIVES

There is an increase of \$43,750 for mileage of Members and Delegates. A net decrease of \$96,500 is shown in the several contingent expense items, the principal decreases being \$59,500 in the appropriation for expenses of special and select committees and \$40,000 in the appropriation for the revision of the laws, and \$12,000 for folding documents with an increase of \$12,000 for miscellaneous items. Other small items of increase account for the net total decrease.

##### ARCHITECT OF THE CAPITOL

There is a net decrease of \$608,970 in the several appropriations under the Architect of the Capitol, principally due to nonrecurring items in 1935 not estimated for in 1936, including replacement and repair of elevators in the Capitol and other buildings, amounting to \$592,793; replacing roof of Senate Office Building, \$60,400; painting Senate Office Building, \$37,000; and installation of duplicate steam lines to new buildings, and so forth, \$25,000. New items requested in the 1936 estimate include \$28,000 for painting the dome of the Capitol and \$75,000 for changes in the terraces of the Senate Office Building.

##### LIBRARY OF CONGRESS

There is a net increase under the Library exclusive of the 5-percent salary restoration, of \$160,870, including \$64,952 for salaries, \$30,000 for increase of the Library for the purchase of books, etc., and \$65,000 for printing and binding.

##### GOVERNMENT PRINTING OFFICE

While the 1936 estimates of appropriations for the working fund of the Government Printing Office indicate an apparent increase of \$200,000 over the 1935 appropriation, this increase is more than offset by the 5-percent pay restoration and the cost of the 40-hour-week provision, and results in a net decrease in salaries and wages of \$118,750. Under the Superintendent of Documents there is an increase of \$15,000 for general expenses, including an increase of \$11,000 for supplies and materials and \$4,000 for printing and binding.

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the fiscal year [1935] 1936 any executive department or independent establishment of the Government ordering printing and binding from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office, for the year in which the work is done, and be subject to requisition by the Public Printer.

All amounts in the Budget for the fiscal year [1936] 1937 for printing and binding for any department or establishment, so far as the Bureau of the Budget may deem practicable, shall be incorporated in a single item for printing and binding for such department or establishment and be eliminated as a part of any estimate for any other purpose. And if any amounts for printing and binding are included as a part of any estimates for any other purposes, such amounts shall be set forth in detail in a note immediately following the general estimate for printing and binding: *Provided*, That the foregoing requirements shall not apply to work to be executed at the Bureau of Engraving and Printing.

No part of any money appropriated in this Act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in any other executive branch of the public service of the United States unless such detail be authorized by law (act May 30, 1934, 48 Stat., p. 832).

OFFICE OF SUPERINTENDENT OF DOCUMENTS

## EXPLANATORY SYNOPSIS

## EXECUTIVE OFFICE

The estimates for the Executive Office provide for the salaries of the President, the Vice President, and the President's office force, miscellaneous office expenses, printing and binding, traveling expenses, and maintenance of the Executive Mansion and grounds.

The Budget estimate for 1936 (which includes salaries on a 100-percent basis with all pay cuts restored) is \$16,980 less than the total appropriation for 1935 (which included salaries on a 95-percent basis). If it were not for the anticipated increase of \$12,162 for the 5-percent restoration in the compensation of employees, the net decrease would have been \$29,142.

## AMERICAN BATTLE MONUMENTS COMMISSION

The Commission, originally established by an act of Congress approved March 4, 1923, is charged under Executive Orders No. 6614 and No. 6690, dated February 26, 1934, and April 25, 1934, respectively, with the administration, including maintenance and upkeep, of the American military cemeteries, memorial chapels, and battle monuments which have been established in Europe in connection with the participation of the United States in the World War. There are 6 cemeteries, each with a memorial chapel, located in France, 1 just outside of Paris and the other 5 on the sites of the principal battlefields. One cemetery and memorial chapel is located in Belgium and one in England. These 8 military cemeteries embrace some 30,000 graves. There are also 8 battle monuments in France, 2 in Belgium, and 1 at Gibraltar.

The estimate of \$199,059 provides only for the administration, maintenance, and upkeep of the properties. It is expected that construction work will be completed in the fiscal year 1935. The work of the Commission was financed during 1935 by funds transferred from the War Department and unexpended balances carried over from the previous fiscal year.

## BOARD OF TAX APPEALS

The Board hears appeals of taxpayers from decisions by the Commissioner of Internal Revenue in cases involving income, excess profits, and estate taxes. It is com-

posed of 16 members, each member having the authority to hear cases assigned to him. The Board functions in the manner of a court. Its decisions are reviewable by the United States Circuit Court of Appeals and the Court of Appeals of the District of Columbia on petitions for review. From these courts appeals may be taken to the United States Supreme Court on writs of certiorari. Aside from the final 5-percent salary restoration, there is a net decrease of \$9,933 in this item.

## CIVIL SERVICE COMMISSION

The Commission prepares for and holds competitive examinations, and rates and certifies eligibles for approximately 1,700 different kinds of positions in the classified civil service comprising more than 460,000 positions. It maintains service records of permanent employees in the Federal classified service, and also of employees in other branches of the Government who are subject to the Retirement Act. It administers the Retirement Act, including the adjudication of claims for refunds and annuities and the maintenance of the Civil Service and Canal Zone Retirement and Disability Funds. It also carries out the provisions of the Classification Act, under which it ascertains the duties and responsibilities of positions within the scope of the act, allocates positions to appropriate salary grades, and prepares class specifications and standards for the guidance of appointing officers.

Exclusive of the final 5-percent restoration in salaries, the increase in the annual appropriation of \$51,799 is made for the purposes of providing for the quinquennial evaluation of the two retirement funds and for new equipment.

The increases in the Government's contributions to the Civil Service Retirement and Disability Fund and the Canal Zone Retirement and Disability Fund of \$19,150,000 and \$500,000, respectively, are made to enable the Government to approximate more closely its annual obligations with respect to these funds. It is quite likely that further additional contributions will be required in future years after the 1935 findings of the board of actuaries are published.

## EMPLOYEES' COMPENSATION COMMISSION

The act of Congress creating the Employees' Compensation Commission assures compensation, including reasonable medical and hospital treatment, to all civil employees of the Federal Government, employees of the District of Columbia except firemen and policemen, and officers and enlisted men of the Naval Reserve on authorized training duty in time of peace, who sustain personal injuries in performance of their duties.

In addition, Congress has by law designated the Commission to pass on all compensation claims of employees of the Civil Works Administration and enrollees of the Civilian Conservation Corps.

The Commission also administers the Longshoremen's and Harbor Workers' Compensation Act, which is for the protection of all employees engaged in maritime employment on navigable waters of the United States, who sustain injuries in line of duty, and for the benefit of their dependents in case of death. Under this act the employer bears all compensation and death benefit costs, the Commission bearing only the administrative costs.

The increase of \$60,515 in salaries and expenses includes \$20,320 which comprises unobligated funds available in 1935 and projected into 1936 and \$40,195 additional for salaries and expenses to provide for increased claims actively arising out of expanded regular departmental activities financed by emergency funds.

The decrease of \$106,445 in the employees' compensation fund is made to reduce to a minimum the unobligated balances reported in prior years.

## FEDERAL COMMUNICATIONS COMMISSION

The Communications Act of 1934 abolished the Federal Radio Commission and created in its stead the Federal Communications Commission. To this new Commission have been transferred not only the former duties imposed by the Radio Act of 1927, as amended, but also the duty of regulating telephone, telegraph, cable, and all other forms of electrical communication. These duties had previously been vested in several agencies, namely, the Interstate Commerce Commission, the Post Office Department, and the State Department.

The Commission is charged with the effective regulation of the industry and must investigate all interstate rates, prescribe uniform systems of accounts, and hear and determine all complaints. It must also receive, file, and examine all schedules of charges filed by the carriers, pass upon the public convenience and necessity of any proposed extensions of lines by telephone or telegraph carriers as well as the extension of radio-communication facilities, pass upon all applications for interlocking directorates between the various carriers, cooperate with the State commissions in harmonizing the Federal with the State forms of common-carrier accounting regulations, issue rules and regulations covering the use of franks, and make a valuation of all property of all the carriers.

The Commission is also charged with making certain specified investigations in the communication field, which include (1) the interrelationship between telephone and telegraph communication companies and their manufacturing subsidiaries; (2) the competition between various phases of communications; (3) new uses of communications; (4) allotment of radio broadcast facilities for educational, religious, charitable, labor organizations, and other nonprofit organizations; and (5) depreciation accounting.

The increase of \$759,089 provides for additional salaries and expenses, and printing and binding necessary to the performance of new regulative functions respecting interstate telephones, telegraphs, and submarine cables. The Commission was authorized by Congress to use in the fiscal year 1935 the sum of \$666,885 transferred from the Radio Commission. The allowance of \$1,525,000 is based on the needs of the Commission for the fiscal year 1936.

## FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board supervises and directs the operations of the Federal home-loan banks, 12 in number, as provided in the Federal Home Loan Bank Act, and causes studies to be made of home financing in the United States. The Federal home-loan bank system provides a permanent reservoir of credit (comparable with the Federal Reserve System) for eligible institutions as set forth in the act, such as building and loan associations, savings and loan associations, cooperative banks, home-stead associations, insurance companies, and savings banks, which institutions, however, must come within the requirements of the act.

Under authority of the Home Owners' Loan Act of 1933, approved June 13, 1933, the Federal Home Loan Bank Board has created the Home Owners' Loan Corporation, with the members of the Board serving as the board of directors of the Corporation, and by section 5 (a) of the same act the Board has provided for the organization, incorporation, examination, operation, and regulation of Federal savings and loan associations.

The operating expenses of the Federal Home Loan Bank Board are paid from semiannual assessments on Federal home-loan banks.

There is a net decrease of \$99,775 in this item due to tapering off of Federal Savings and Loan promotion activities.

## FEDERAL POWER COMMISSION

The Commission has general administrative control over the power sites on navigable waters, public lands, and reservations of the United States, and over the location, design, construction, maintenance, and operation of power projects upon such sites. It also has administrative control of the maintenance of a system of accounting for determining net investment in licensed power projects, and exercises limited jurisdiction over rates, service, and securities of licensees. It levies annual charges for reimbursement to the United States for the cost of administration of the Federal Water Power Act and for the use of United States property, including lands, dams, etc., and it makes general investigation of power resources and their relation to interstate and foreign commerce, and publishes reports relating thereto.

Aside from the final 5-percent salary restoration, there is an increase in salaries and expenses of \$7,424 to permit essential work to be brought current and an increase of \$1,500 in printing and binding to provide for the issuance of the revised rules and regulations and certain additional printing of records.

The decrease of \$6,851 in the permanent appropriation is made because of an estimated available balance of \$8,337 at the close of the fiscal year 1935.

## FEDERAL TRADE COMMISSION

Under the law it is the duty of the Commission to prevent unfair methods of competition in interstate commerce and the export trade of the United States. Upon

request of the President, Congress, the Attorney General, or on its own initiative, the Commission investigates alleged violations of the antitrust laws. It submits to Congress when requested factual reports in respect to corporations engaged in interstate commerce. The Commission investigates trade conditions in foreign countries, and administers the Export Trade Act, which exempts associations of American corporations engaged solely in export trade from the provisions of the antitrust laws. It also administers the Clayton Act relating to unlawful price discriminations, to tying and exclusive leases and sales, and to corporate-stock acquisitions and interlocking directorates.

The decrease of \$500,581 is due to the transfer of the Securities Division to the new Securities and Exchange Commission and the contemplated completion of certain special investigations during the fiscal year 1935.

#### GENERAL ACCOUNTING OFFICE

The Comptroller General of the United States is charged by law, independently of the executive departments, with the settlement and adjustment of all claims and demands for or against the Government of the United States and all accounts in which the Government of the United States is concerned either as a debtor or creditor.

The increase of \$42,115 is allowed to provide for the rental of additional space required to house expanded activities in connection with auditing the accounts of emergency agencies.

#### INTERSTATE COMMERCE COMMISSION

The Interstate Commerce Commission has jurisdiction over all common carriers engaged in the interstate transportation of passengers or property, wholly by railroad, or partly by railroad and partly by water under certain conditions; pipe lines for certain commodities; express- and sleeping-car companies, and certain other facilities used in the interstate transportation of persons and property. It enforces the provisions of the Interstate Commerce Act, which requires all rates to be just and reasonable, and prohibits unjust discrimination and undue or unreasonable preference, or advantage in transportation rates or facilities. It enforces the safety-appliance acts, requiring railroad cars and locomotives to be equipped with certain named appliances, to insure the safety of employees, and the safe operation of trains; the Locomotive Inspection Act requiring railroad companies to equip their locomotives with safe and suitable boilers and appurtenances thereto and applying with equal force to the tender and its appurtenances. It also enforces other acts intended to insure the safety of employees and the safe transportation of passengers and property by railroad.

Aside from the final 5-percent salary restoration, there is a net decrease of \$98,852 in the amount for the maintenance of this Commission.

#### NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

The Committee supervises, directs, and coordinates the scientific study of the problems of aviation, both civil and military, and prevents duplication of effort in this field. It operates at Langley Field, Va., an aeronautical research laboratory and conducts fundamental research work for War, Navy, and Commerce Depart-

ments to improve performance, efficiency, and safety of aircraft for all purposes.

The increase of \$46,625 is to provide for additional power with which to operate the new 500-mile wind tunnel and additional test models.

#### NATIONAL MEDIATION BOARD

The Board, in addition to carrying on its own functions, is closely related to the new National Railroad Adjustment Board and also to the arbitration boards and the emergency boards which are appointed when necessity requires. The Board also cares for their fiscal requirements.

When a controversy coming within the provisions of the Railway Labor Act arises between a carrier and its employees one party or both may request the appropriate division of the National Railroad Adjustment Board to mediate the dispute. Upon failure of such division to agree upon an award, a neutral referee shall be selected to end the deadlock. If the division fails to select one in 10 days, the National Mediation Board is required to select within 10 days of notification the required neutral referee. Whenever a party to a dispute concerning pay, rules, working conditions, or matters not referable to or adjusted by the National Railroad Adjustment Board so desires, it may request the National Mediation Board to undertake an adjustment of the difficulty, or the Board may tender its services. Should the Board fail to bring about an adjustment through mediation, it becomes its duty to try to persuade carriers and employees to submit their differences to a board of arbitration. One member of such a board is selected by the interested employees, one by the carrier, and the third—a neutral member—by the two other members. In the event a board is not selected, the National Mediation Board may name two members, the third member to be selected in the same manner as a third member is selected for a board of arbitration. Should the dispute still remain unadjusted, and in the opinion of the National Mediation Board threatens substantially to interrupt interstate commerce, it becomes the duty of the Board to notify the President of the situation, who may in his discretion create an "emergency board" to investigate and report to him the facts respecting the dispute.

The increase of \$204,936 is to provide for increased activities due principally to the establishment by law of an additional mediation agency in Chicago, Ill., viz: The National Railroad Adjustment Board.

#### PAYMENTS TO OFFICERS AND EMPLOYEES OF THE UNITED STATES IN FOREIGN COUNTRIES DUE TO APPRECIATION OF FOREIGN CURRENCIES

Pursuant to the authorization contained in the act entitled "An act to authorize annual appropriations to meet losses sustained by officers and employees of the United States in foreign countries due to appreciation of foreign currencies in their relation to the American dollar, and for other purposes", approved March 26, 1934, an amount of \$7,438,000 was appropriated for the payment of such losses from July 16, 1933 to June 30, 1935. The average rates of exchange covering the period of 3 years prior to April 1, 1933 were used in determining the basic rates on which the losses were to be computed, and these rates were prescribed by Executive Order No. 6657-A of March 27, 1934. The estimate of \$3,904,824 to meet losses sustained during the fiscal year 1936 is

computed on the average rates of exchange for the period of 5 years prior to April 1, 1933, and results in a decrease of \$3,533,176.

#### SECURITIES AND EXCHANGE COMMISSION

The Securities and Exchange Commission was created pursuant to section 4 of the Securities Exchange Act of 1934. This Commission is charged with the responsibility of carrying out the provisions of the Securities Exchange Act of 1934 and the Securities Act of 1933.

The functions of the Commission are (1) to provide for the regulation of securities exchanges and of over-the-counter markets which use means or instruments of interstate or foreign commerce or the mails; (2) to prevent inequitable and unfair practices on such exchanges and markets; (3) to provide fair disclosure of the character of securities sold in interstate or foreign commerce or through the mails, and to prevent frauds in the sale thereof; (4) to prescribe rules and regulations which will regulate national security exchanges, security issues, brokers, dealers, and others; (5) to make investigations of the operations and practices on registered exchanges, and the conduct of members and member firms; (6) to investigate suspected manipulative operations in connection with any security either on a registered exchange or in over-the-counter markets; (7) to audit the books and records of brokerage houses suspected of insolvency, to determine whether customers' accounts are protected; (8) to examine and act upon applications for registration and for exemption by organized security exchanges; (9) to supervise the distribution of securities not registered on any registered exchange; i. e., in over-the-counter markets; (10) to examine and act upon security registration statements and accompanying reports, documents, prospectuses, etc.; (11) to assemble and maintain economic, industrial and other statistics of a miscellaneous nature for use in the regulation of markets for securities of the different industries and for the development of trends, and indexes relating to the capital market and the stock exchanges; (12) to regulate and supervise the solicitation of proxies; (13) to prescribe the form for and examine the statements of holdings of officers, directors and large stockholders of issuers of securities; (14) to provide for the legal endorsement of the Securities Exchange Act of 1934 and the Securities Act of 1933 and to initiate and cooperate with the Department of Justice in the conduct of all prosecu-

tions thereunder; and (15) to perform related functions as prescribed by existing legislation or by rules and regulations of the Commission.

This is a new Commission for which Congress initially appropriated \$300,000 on June 19, 1934. Congress contemplated this total, together with the amount required to finance the Securities Division transferred from the Federal Trade Commission, would be sufficient to run the Commission until it met in January 1935, when it could provide for the future operations of the Commission. For the fiscal year 1936 the Commission is allowed \$2,340,000 for salaries and expenses and \$30,000 for printing and binding.

#### SMITHSONIAN INSTITUTION

The Smithsonian Institution was created by act of Congress in 1846 under the terms of the will of James Smithson, an Englishman, who in 1826 bequeathed his fortune to the United States to found, at Washington, under the name of the "Smithsonian Institution", an establishment for the "increase and diffusion of knowledge among men." Aside from the final 5-percent salary restoration, there is a net decrease of \$13,824 in the aggregate.

#### TARIFF COMMISSION

The Commission is the advisory and investigational agency of Congress, of the President, and of the executive departments and other governmental agencies, in matters pertaining to the tariff and related economic problems. It deals with unfair practices in the importation and sale of foreign merchandise; investigates and reports to the President, specifying such changes in the rates of existing duties as are found necessary to equalize cost of production at home and abroad; and observes and reports upon discriminations against the foreign trade of the United States. The increase of \$36,672 is due to projecting in 1936 a portion of the 1934 unexpended balance made available in 1935 in order to continue additional activities relative to the negotiation of reciprocal trade treaties.

**American Battle Monuments Commission—**

【The appropriations heretofore made for the American Battle Monuments Commission are hereby increased in an amount sufficient to cover all losses which have been or may hereafter be incurred by the Commission due to the fluctuation of the Franco-American exchange below the rate of 25.30 francs to \$1.】 For every expenditure requisite for or incident to the work of the American Battle Monuments Commission authorized by the Act of March 4, 1923 (U. S. C., title 36, secs. 121-133), and by Executive Order No. 6614 of February 26, 1934, including the acquisition of land or interest in land in foreign countries for carrying out the purposes of said Act and Executive order without submission to the Attorney General of the United States under the provisions of section 355 of the Revised Statutes (U. S. C., title 34, sec. 520; title 40, sec. 255); employment of personal services in the District of Columbia and elsewhere; travel expenses; rent of office space in foreign countries; the maintenance, repair and operation of motor-propelled passenger-carrying vehicles which may be furnished to the Commission by other departments of the Government or acquired by purchase; the purchase of one motor-propelled passenger-carrying vehicle at a cost not exceeding \$2,400.00; printing, engraving, lithographing, photographing, and typewriting, including the publication of information concerning the American activities, battlefields, memorials, and cemeteries in Europe; the purchase of maps, text-books, newspapers and periodicals, \$199,059: Provided, That notwithstanding the requirements of existing laws or regulations, and under such terms and conditions as the Commission may in its discretion deem necessary and proper, the Commission may contract for work in Europe and engage by contract or otherwise, the services of architects, firms of architects and other technical and professional personnel: Provided, further, That the Commission may purchase supplies and materials without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) when the aggregate amount involved does not exceed \$500: Provided further, That when traveling on business of the Commission officers of the Army serving as members or as Secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission: Provided further, that the Commission may delegate to its chairman, secretary or officials in charge of either its Washington or Paris offices, under such terms and conditions as it may prescribe, such of its authority as it may deem necessary and proper (U. S. C., title 34, sec. 520; title 36, secs. 121-133; title 40, sec. 255; act Mar. 28, 1934, 48 Stat., p. 510; Executive Order No. 6614, Feb. 26, 1934; Executive Order No. 6690, Apr. 25, 1934).

Estimate 1936, **\$199,059**

NOTE.—All functions of administration pertaining to national cemeteries and memorials in Europe were transferred from the War Department to the American Battle Monuments Commission on May 21, 1934, by Executive Orders Nos. 6614 and 6690, dated, respectively, Feb. 26 and Apr. 25, 1934.

**FEDERAL HOUSING ADMINISTRATION**

*Salaries and Expenses, Federal Housing Administration (Allocation from Reconstruction Finance Corporation)—Continued.*

“SECTION 1. The President is authorized to create a Federal Housing Administration, all of the powers of which shall be exercised by a Federal Housing Administrator (hereinafter referred to as the “Administrator”), who shall be appointed by the President, by and with the advice and consent of the Senate, shall hold office for a term of four years, and shall receive compensation at the rate of \$10,000 per annum. In order to carry out the provisions of this title and titles II and III, the Administrator may establish such agencies, accept and utilize such voluntary and uncompensated services, utilize such Federal officers and employees, and, with the consent of the State, such State and local officers and employees, and appoint such other officers and employees as he may find necessary, and may prescribe their authorities, duties, responsibilities, and tenure and fix their compensation, without regard to the provisions of other laws applicable to the employment or compensation of officers or employees of the United States. The Administrator may delegate any of the functions and powers conferred upon him under this title and titles II and III to such officers, agents, and employees as he may designate or appoint, and may make such expenditures (including expenditures for personal services and rent at the seat of government and elsewhere, for law books and books of reference, and for paper, printing, and binding) as are necessary to carry out the provisions of this title and titles II and III, without regard to any other provisions of law governing the expenditure of public funds. All such compensation, expenses, and allowances shall be paid out of funds made available by this Act.”

*Renovation and Modernization Loans and Insurance—*

"The Administrator is authorized and empowered to insure banks, trust companies, personal finance companies, mortgage companies, building and loan associations, which are approved by him as eligible for credit insurance against losses," (Sec. 2, National Housing Act) occurring to institutions so insured. "The Administrator is further authorized and empowered to make loans to institutions which are insured under Section 2, and to enter into loan agreements with such institutions" (Sec. 3, National Housing Act).

As a means for financing of the claims created by Title I of the National Housing Act (H. R. 9620) and approved June 27, 1934, funds shall be made available to the Administrator by the

Reconstruction Finance Corporation, and the total liability shall in no case exceed in the aggregate \$200,000,000.

*Railroad Retirement Fund—*

NOTE.—The Railroad Retirement Board was established by act of Congress, June 27, 1934 (48 Stat. 1283-1289), to take effect Aug. 1, 1934. The act provides for advances to be made by the railroads to the Board in the amount of one-tenth of 1 percent of the monthly pay rolls. Up to the time the Supreme Court of the District of Columbia enjoined the Board from collecting any further funds under the act, \$140,000 had been paid in and deposited in the Treasury where trust funds have been established for both receipts and expenditures. As further receipts and expenditures by the Board are contingent upon final decision by the courts as to the constitutionality of the act, no additional amounts other than the \$140,000 so far collected are shown herein.

### EXPLANATORY SYNOPSIS

With the exception of the United States Soldiers' Home, Washington, D. C., and the Naval Home, Philadelphia, Pa., this agency administers the laws pertaining to the welfare of war veterans, including the adjudication of claims for compensation, pensions, war-risk insurance and burial expenses, the medical treatment, hospitalization, and domiciliary care of those eligible therefor, and the maintenance and operation of the United States Government life-insurance fund and the adjusted-service compensation fund.

Aside from the final 5-percent salary restoration, there is a net decrease of \$5,961,499 in the item of administration, etc. There is likewise a decrease of \$5,000 in printing and binding.

The increase of \$69,615,403 in compensation and pensions is due to the passage by the recent Congress of legislation revising upwards most of the reductions in benefits made in 1933. On account of this same action, a deficiency of \$98,412,250 must be met during the current fiscal year.

The increase of \$4,610,000 under military and naval insurance is due to a court decision voiding a provision in the Economy Act which prevented adjudication in the Court of Claims incident to war-risk insurance contracts. A deficiency of \$6,081,000 will be required in 1935.

The allowance of \$925,000 for hospital and domiciliary facilities and services is to be made immediately available to supplement \$4,394,907, which is now in hand for the construction needs of the service at Danville, Ill.; Waco, Tex.; Los Angeles, Calif.; North Little Rock, Ark.; and Perry Point, Md.

The increase of \$50,000,000 in the estimate for the adjusted service certificate fund is made on the ground that it is poor budgetary policy to continue to ignore responsibility for building up this fund as required by law. The actuarial requirement is \$155,000,000 for the fiscal year 1936.

The increase of \$1,648,985 under the item of personal funds of patients, Veterans' Administration, is due to the establishment of a trust account under the act of June 26, 1934.

## VETERANS' ADMINISTRATION ESTIMATES OF APPROPRIATIONS

### Salaries and Expenses, Veterans' Administration—

Administration, medical, hospital, and domiciliary services: For all salaries and expenses of the Veterans' Administration, including the expenses of maintenance and operation of medical, hospital, and domiciliary services of the Veterans' Administration, in carrying out the duties, powers, and functions devolving upon it pursuant to the authority contained in the Act entitled "An Act to authorize the President to consolidate and coordinate governmental activities affecting war veterans", approved July 3, 1930 (U. S. C., Supp. [VI] VII, title 38, secs. 11-11f), and any and all laws for which the Veterans' Administration is now or may hereafter be charged with administering, [ \$86,740,099 ] \$86,700,000: *Provided*, [ That when found to be to the best interest of the United States, not to exceed \$500,000 of this amount may be used for payments to State institutions caring for and maintaining veterans, suffering from neuropsychiatric ailments, who are in such institutions on the date of the enactment of this Act: *Provided further*, ] That not to exceed \$3,500 of this amount shall be available for expenses, except membership fees, of employees detailed by the Administrator of Veterans' Affairs to attend meetings of associations for the promotion of medical science and annual national conventions of organized war veterans: *Provided further*, That this appropriation shall be available also for personal services and rentals in the District of Columbia and elsewhere, including traveling expenses; examination of estimates of appropriations in the field, including actual expenses of subsistence or per diem allowance in lieu thereof; for expenses incurred in packing, crating, drayage, and transportation of household effects and other property, not exceeding in any one case five thousand pounds, of employees when transferred from one official station to another for permanent duty and when specifically authorized by the Administrator; furnishing and laundering of such wearing apparel as may be prescribed for employees in the performance of their official duties; purchase and exchange of law books, books of reference, periodicals, and newspapers; for passenger-carrying and other motor vehicles, including purchase, maintenance, repair, and operation of same, including not more than two passenger automobiles for general administrative use of the Central Office in the District of Columbia; and notwithstanding any provisions of law to the contrary, the Administrator is authorized to utilize Government-owned automotive equipment in transporting children of Veterans' Administration employees located at isolated stations to and from school under such limitations as he may by regulation prescribe; and notwithstanding any provisions of law to the contrary, the Administrator is authorized to expend during the fiscal year 1935 not to exceed [ \$4,000 ] \$2,000 for actuarial services pertaining to the Government life insurance fund [ and the civil service retirement fund, ] to be obtained by contract, without obtaining competition, at such rates of compensation as he may determine to be reasonable; for allotment and transfer to the Public Health Service, the War, Navy, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans' Administration, including minor repairs and improvements of existing facilities under their jurisdiction necessary to such care and treatment; for expenses incidental to the maintenance and operation of farms; for recreational articles and facilities at institutions maintained by the Veterans' Administration; for administrative expenses incidental to securing employment for war veterans; for funeral, burial, and other expenses incidental thereto for beneficiaries of the Veterans' Administration accruing during the fiscal year [ 1935 ] 1936 or prior fiscal years: *Provided further*, That the appropriations herein made for the care and maintenance of veterans in hospitals or homes under the jurisdiction of the Veterans' Administration shall be available for the purchase of tobacco to be furnished, subject to such regulations as the Administrator of Veterans' Affairs shall prescribe, to veterans receiving hospital treatment or domiciliary care in Veterans' Administration hospitals or homes: *Provided further*, That the appropriations herein made for medical and hospital services under the jurisdiction of the Veterans' Administration shall be available, not to exceed \$10,000, for experimental purposes to determine the value of certain types of treatment: *Provided further*, That this appropriation shall be available for continuing aid to State or Territorial homes for the support of disabled volunteer soldiers and sailors, in conformity with the Act approved August 27, 1888 (U. S. C., title

24, sec. 134), as amended, for those veterans eligible for admission to Veterans' Administration facilities for domiciliary care.

No part of this appropriation shall be expended for the purchase of any site for or toward the construction of any new hospital or home, or for the purchase of any hospital or home; and not more than [ \$3,269,500 ] \$3,053,645 of this appropriation may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans' Administration either by contract or by the hire of temporary employees and the purchase of materials (U. S. C., title 5, secs. 691-738; title 24, secs. 71-154; title 38, secs. 1-633; U. S. <sup>1</sup> Repealed as a permanent appropriation, effective July 1, 1935, by the "Permanent Appropriation Repeal Act, 1934." Provided for in 1936 as an annual item.

<sup>2</sup> Estimated receipts of \$600,000 from sale of hunting stamps, act of Mar. 16, 1934, provided for subsequent to submission of the Budget for 1935.

<sup>3</sup> See statement in text below regarding Agricultural Adjustment Administration.

## EXPLANATORY SYNOPSIS

Of the total increases in the estimates for 1936 over the appropriation availability for 1935, \$1,926,925, represents the restoration of the remaining 5 percent of legislative reduction in compensation. The other principal increases and decreases are explained below.

## Annual appropriations:

## OFFICE OF THE SECRETARY

The organization comprises the administration of the scientific, extension, regulatory, personnel, and business activities of the Department and serves in planning the organization of the work, the expenditure of funds, the contracting for the purchase of materials and equipment, the handling of mails and files, the operation of the telephone and telegraph offices, and the initiation and direction of all phases of legal work involved in the Department's activities.

The estimates provide for the purchase of an automobile at a cost of \$1,500, an increase in salaries of \$12,370 for the employment of three additional investigators and an additional stenographer for the investigation force of the Secretary's office, utilized for making periodic and special inspections and investigations of the field activities of the Department, and an increase of \$4,000 in the traveling expenses of this force.

These and certain minor increases are offset by decreases totaling \$36,638, covering principally the transfer of all disbursing activities to the central disbursing agency in the Treasury Department, which produces a net decrease of \$23,911. Deducting this latter amount from the allowance for pay restoration leaves a net increase over 1935 of \$7,282.

## OFFICE OF INFORMATION

The work of this office consists of correlating and disseminating useful information and data developed by the economic, service, and regulatory programs of the Department and involves the handling of all printing and binding for the Department.

The net increase in 1936 is \$119,967 and covers the increase in cost of printing and binding charged by the Government Printing Office made necessary by pay restoration and the operation of the 40-hour-week law.

## LIBRARY, DEPARTMENT OF AGRICULTURE

The library is one of the basic units in the research, extension, and regulatory work of the Department and the State agricultural agencies. It circulates books and periodicals to departmental employees as needed in their work and in this manner also assists the State agricultural colleges and experiment stations and other scientific institutions. The net increase in 1936 is \$4,933, for the purchase of books and periodicals.

## OFFICE OF EXPERIMENT STATIONS

This unit administers what are known as the Hatch, Adams, and Purnell Acts, which provide Federal aid to the State and Territorial agricultural experiment stations, and also the acts which provide for the maintenance of Federal agricultural experiment stations in Hawaii and

Puerto Rico. The Federal aid to State and Territorial agencies for 1936 will amount to \$4,395,000.

The estimates for 1936 show a net increase over 1935 of \$10,008, consisting of statutory increases in Federal aid to Hawaii and Puerto Rico of \$2,000 and \$5,000, respectively, and of \$5,000 for additional clerical help and miscellaneous expenses of the Washington office of supervision, less a \$2,000 decrease in the cost of operating the Federal station in Hawaii and other decreases of a minor nature.

## OFFICE OF EXTENSION SERVICE

This unit administers the Smith-Lever, Capper-Ketcham, and other acts which provide for cooperative agricultural extension work, arranges for exhibits by the Department of Agriculture at State, interstate, and international fairs held within the United States, and cooperates with officials of the various States in assisting owners of farms in establishing, improving, and renewing woodlots, shelter belts, wind-breaks, and other useful timber crops. Federal aid to States and Territories in extension service will total \$4,072,000 in 1936 in annual appropriations, plus \$4,686,096, provided for by a permanent appropriation hereinafter mentioned.

The estimates for 1936 show an increase of \$21,965 over 1935, all of which is for agricultural exhibits at fairs, the amount available for this purpose in 1935 being inadequate for the minimum requirements of this activity.

## WEATHER BUREAU

The work of the Weather Bureau consists of the collection and dissemination of meteorological data and the issuance of weather forecasts, warnings, and advice. The forecasts include those for horticultural protection and forecasts under the Air Commerce Act of 1926 of the upper air on all airways designated by the Secretary of Commerce as routes suitable for air commerce. The advisory and warning service includes those in connection with the occurrence of storms, hurricanes, cold waves, frosts, fire-weather conditions, and floods.

The estimates for 1936 show an increase of \$118,229 for a reorganization and expansion of the hurricane warning service, with particular reference to the South Atlantic and Gulf coast areas, and for the furnishing of meteorological service on new airways established under authority of the Secretary of Commerce.

## BUREAU OF ANIMAL INDUSTRY

The work of this Bureau consists chiefly of the eradication of scabies in sheep and cattle, tuberculosis in livestock, cattle ticks (which spread splenic fever infection among cattle), hog cholera, and dourine; control over the interstate shipment of livestock; enforcement of the 28-hour law to prevent cruelty to animals in transit; quarantine of animals at ports of entry; inspection of animals offered for import; supervision over the importation of animal byproducts, forage, etc., to guard against the introduction of foot-and-mouth and other contagious animal diseases into the United States; inspection and testing of animals for export; investigations in animal husbandry, including poultry; investigations relating to animal diseases and parasites to discover their cause, mode of dissemination and methods of control; enforce-

ment of the Packers and Stockyards Act; and inspection of meat and meat products under the Meat Inspection Act.

The estimates for 1936 show a net increase over 1935 of \$1,867,584. The principal item of increase is \$3,290,601 for meat inspection. While this is shown as an increase under the head of "annual appropriations" it is not an increase in the total estimates for the Bureau of Animal Industry since it represents merely the transfer of this amount from the status of a permanent appropriation to that of an annual appropriation, as required by the provisions of the Permanent Appropriation Repeal Act, 1934. Other increases consist of \$25,000 for investigations in Danish Landrace hog breeding, \$25,000 for investigations in red Danish dual-purpose cattle breeding, \$27,000 for poultry-breeding experiments, and \$40,000 for administration, in cooperation with State authorities, of regulations for the improvement of poultry, poultry products, and hatcheries.

The principal item of decrease is \$1,505,659 for the payment of indemnities under the appropriation for the eradication of tuberculosis in cattle. This reduction is made possible by the availability of funds for this purpose from emergency appropriations.

#### BUREAU OF DAIRY INDUSTRY

The work connected under this Bureau involves scientific research and experimentation in practically every phase of the dairy industry. It contemplates the development of fundamental principles of dairy cattle breeding, feeding, and management; the development of new methods of manufacturing dairy products and the improvement of existing methods of manufacture; the effective utilization of dairy byproducts through the development of new uses for such products; and the introduction of such new and/or improved processes of manufacture into commercial creameries and cheese factories. The research program also includes a study of the problems in sanitary and economical methods of producing, processing, transporting, and distributing market milk and cream for use in fluid form.

The only increase in the 1936 estimates is a net of \$27,393 for use in connection with the operation of a semicommercial factory at the Department of Agriculture research center, Beltsville, Md., where results of laboratory experimentation with sweet-cream butter will be tried out to determine the manufacturing features involved and adjust the process to meet the requirements of industry. The necessary building and equipment will be provided during the fiscal year 1935.

#### BUREAU OF PLANT INDUSTRY

The primary object of the work of this Bureau is the development and establishment of varieties of crops better adapted to different regions of the country and less subject to damage from epidemics of diseases through the breeding of disease-resistant varieties of vegetables, fruits, small grains, or other crops. This is accomplished partly by determining the causes of the epidemics and partly by controlling or eliminating the diseases. In these activities the Bureau's effort is toward quality as well as acre yield of products, without increased cost of production. The work also includes efforts toward improving methods of handling, storing, and transporting perishable agricultural products. Other work of the Bureau includes investigations concerning rubber plants and forest trees, and enforcement of the Federal Seed Act.

The estimates for 1936 show a net increase of \$623,124, resulting from a number of increases and decreases in the 25 appropriations and the 64 projects coming thereunder which are administered by this Bureau. The principal increases consist of \$98,400 for forage crops and diseases; \$462,000 for the operation and maintenance of plant reserve stations for the production of plants for revegetation, soil protection, and related purposes; \$30,000 for investigation and experimentation with certain selected plants with a view to developing a nontoxic spray for the control of insect pests attacking fruits and vegetables; \$60,000 for the maintenance and operation of fruit products laboratories established at Beltsville, Md., and Meridian, Miss., with funds allotted by the Public Works Administration; \$30,000 for investigations in the breeding of subtropical fruits, lettuce, and potatoes; and \$10,000 for the National Arboretum at Washington, D. C. The decreases consist of \$50,000 in the appropriation for plant introduction and exploration, \$3,000 in the item covering investigation of vegetable crop and diseases, and a number of small decreases in various other projects.

#### FOREST SERVICE

The functions of the Forest Service are to maintain, improve, and protect the national forests belonging to the United States, including the prevention and suppression of forest fires; the classification of lands as they relate to the national forests; the construction and maintenance of sanitary facilities on national forests; the planting of trees within national forests; to estimate and appraise timber and other national forest resources; to sell timber and grazing privileges; to conduct investigations relating to forest management and to develop and improve ranges and methods of management; to conduct experiments, investigations, and tests of forest products at the forest products laboratory; to conduct a comprehensive survey of forest lands of the United States, the timber thereon, rate of depletion, and probable future rate of growth; to ascertain ways and means of halting forest devastation and speeding up sustained-yield management and other measures on privately owned lands; to cooperate with State agencies in forest-fire prevention and suppression; to conduct studies of the effect of tax laws and studies relating to timber insurance; to cooperate with the States in the procurement, production, and distribution of forest-tree seeds and plants in establishing windbreaks, shelter belts, and farm woodlots upon denuded or nonforested lands; to acquire additional lands for the protection of the watersheds of navigable streams; to construct roads in and adjacent to the national forests; and, under the supervision of the National Forest Reservation Commission, the purchase of additional forest lands.

The estimates for 1936 show a total increase over the 1935 appropriation availability of \$2,162,978. This increase consists of \$76,000 for general administrative expenses; \$1,775,942 for general expenses of protection and administration of the national forests; \$117,638 for continuing the forest survey in lieu of funds supplied for this purpose in 1935 by the Public Works Administration; \$192,498 for lumber code compliance inspection, a new project; and \$900 for expenses of the National Forest Reservation Commission.

More than five-sixths of the total increase is due to the necessity for maintaining improvements effected in the national forests by the expenditure of funds allotted by the Public Works Administration, and work performed by the Civilian Conservation Corps and emergency relief workers during 1934 and 1935, the need for the protection

and administration of the additional forest lands procured and to be procured during the fiscal year 1936, as well as the necessity for appropriating in 1936 for regular activities for which no appropriations were made in 1935 by reason of funds having been made available for such activities by the Public Works Administration.

The new project estimated for in 1936, namely, "Code compliance inspection," contemplates inspecting, in cooperation with code agencies, or otherwise, compliance with the rules of forest practice prescribed under and pursuant to the codes for forest industries approved under the National Industrial Recovery Act, and the preparation of recommended changes in such codes for the better protection of the public interest.

#### BUREAU OF CHEMISTRY AND SOILS

This Bureau conducts investigations and experiments relating to the application of chemistry to the various phases of agriculture; for the utilization, for coloring, and for medicinal and technical purposes, of raw materials grown or produced in the United States; for the development of insecticides and fungicides; for the development of methods of preventing various dust explosions, including fires, in cotton gins, cotton-oil mills, and grain elevators; for the improvement of methods or processes of developing naval stores, and the weighing, handling, transportation, and uses of such stores; for developing fertilizers and fertilizer ingredients; for ascertaining various properties of soils and their relation to soil formations; for ascertaining causes of infertility of soils, and related problems. The Bureau also conducts a soil survey of the United States and makes tests and inspections of commercial cultures of legume nodule bacteria to insure that the cultures sold to farmers are efficient.

The estimates for 1936 show a net increase over 1935 of \$81,709, consisting of \$14,250 for continuing investigations, carried on during 1934 and 1935 with emergency funds, with respect to selenium land poisoning and \$71,250 for the cooperative soil survey of the United States, less reductions of \$3,791 in several minor items.

#### BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

This unit conducts investigations in economic entomology, involving studies of the life history and habits of insects injurious and those beneficial to agriculture, horticulture, and arboriculture, with a view to developing methods of destroying those found to be injurious and promoting the increase and spread of those found to be beneficial. It also investigates the life history and method of controlling insects affecting man and animals and conducts studies of bee culture and bee-keeping practices. It enforces the Plant Quarantine Act to prevent entry into the United States of dangerous plant pests, and also various other acts to control the spread of the pink bollworm of cotton, *Thurberia weevil*, date scale, gypsy and brown-tail moths, Japanese beetle, Mexican fruit fly, and the white-pine blister rust.

The estimates for 1936 show a net increase over 1935 of \$1,149,044. The principal items of increase are: \$250,000 for the eradication, control, and/or prevention of the white-pine blister rust, \$200,000 for eradication of the common barberry for the control and/or prevention of spread of cereal rusts, and \$400,000 for the control and prevention of spread of the gypsy and brown-tail moths, for which items no appropriations were made for the fiscal year 1935 by reason of the availability of funds therefor from allotments made by the Public Works Administration; \$50,000

for continuing investigations with a view to the elimination of harmful insecticidal residues on fruits; \$60,000 for continuance of investigations for the development of insecticidal substitutes for lead arsenate as a spray for fruits and vegetables; \$100,876 for continuing the work of control of the Japanese beetle, including the inspection and certification of plant products to meet the requirements of the Federal quarantine; \$30,000 for continuing the work of control and prevention of spread of the Mexican fruit fly; and \$99,920 for continuing the work of control and prevention of spread of the Dutch elm disease. With regard to this last-named item the 1936 estimates provide for a total appropriation of \$261,156. This sum, together with an allotment of \$677,000, made by the Public Works Administration during the fiscal year 1935, will, it is believed, make it possible to gain control of this disease and effectively prevent its spread.

#### BUREAU OF BIOLOGICAL SURVEY

The work of this Bureau consists of research work, conservation and control operations, and enforcement of laws that relate to vertebrate wild animals (except fishes), in the interests of agriculture, horticulture, stock raising, forestry, recreation, and the natural requirements of the wildlife itself. These activities include field investigations and laboratory studies of the distribution, migration, classification, natural history, food habits, and food resources of birds and other animals and their diseases and parasites; studies of the propagation of game birds; development of effective methods for the control of predatory animals; and wildlife reservations are maintained for the conservation of game and other animals and birds. The Bureau also administers laws for the conservation of migratory birds, and for protection of wild animals, and assists in the enforcement of the Alaska game law.

The estimates for 1936 show a decrease below 1935 of \$154,555. The principal decrease, amounting to \$150,000 is occasioned by the fact that this amount was appropriated for 1935 for administering the Federal Hunting Stamp Act of March 16, 1934, pending the accumulation of receipts from the sale of hunting stamp licenses, which, under the act are made available for this purpose. For 1936 all costs of administration will be paid from receipts from the sale of stamps. See statement below under the heading "Permanent appropriations—Biological Survey, Migratory Bird Conservation Fund."

#### BUREAU OF PUBLIC ROADS

This unit administers appropriations made to the Department for Federal aid to the States for State highway construction and for the construction of highways within the national forests and across the public domain. On June 30, 1934, the Federal highway system totaled approximately 207,231 miles of the principal highways of the country and connected all the principal cities, county seats, and other market centers in the United States. About 122,055 miles of this system has been improved with Federal aid, with about 9,156 miles under construction on June 30, 1934. The initiation of and immediate supervision of the construction of Federal-aid projects is under the State highway departments with engineers of the Bureau of Public Roads making frequent inspections and approving all work from the inception of a project until its completion.

The estimates for 1936 show a reduction below 1935 of \$102,092,655.86. There is included in the estimates \$8,559,256.14 representing the unappropriated balance

of \$125,000,000 authorized to be appropriated for the fiscal year 1933 by section 1 of the act approved April 4, 1930, and is for the payment of obligations incurred under such authorization. Funds for road construction under the authorizations for 1936 contained in the act approved June 18, 1934, are to be provided for under a general public-works program for 1936.

#### BUREAU OF AGRICULTURAL ENGINEERING

This unit conducts investigations and experiments relating to farm drainage, farm machinery, farm buildings, cotton ginning, soil erosion, and land-clearing methods.

The estimates for 1936 show a net increase over 1935 of \$22,112. This consists of an increase of \$25,000 for investigation with a view to the development of improved types and methods of construction and repair of farm homes, less minor decreases in other items.

#### BUREAU OF AGRICULTURAL ECONOMICS

The functions of this organization are to conduct studies of the economics of production and marketing, farm organizations, farm labor, and the problems of rural life. It acquires and disseminates current information regarding the marketing and distribution of farm products; collects, compiles, summarizes, interprets, and makes public statistical data relating to agricultural production, including crop and livestock estimates; estimates of the grade and staple length of cotton crop and carry-over; studies marketing methods and conditions and the standardization, transportation, handling, financing, utilization, and storage of agricultural products; prepares and publishes reports on the outlook for farm products and issues quarterly reports on stocks of leaf tobacco. A market inspection service is maintained for the inspection of fruits and vegetables, hay, beans, broom-corn, and other products, and a grading service is conducted on dairy and poultry products, canned fruits and vegetables, meat, tobacco, and rice. The Bureau also enforces the United States Cotton Futures Act, United States Cotton Standards Act, United States Grain Standards Act, United States Standard Container Act, United States Standard Hamper Act, Produce Agency Act, and Perishable Agricultural Commodities Act, and administers the United States Warehouse Act.

The estimates show a net increase over 1935 of \$217,774, the principal items of increase being \$25,000 for administration of the United States Warehouse Act to provide for additional warehouse examiners and their expenses to meet the greatly increased demand for licenses, and \$189,000 for enforcement of the Cotton Futures and Cotton Standards Acts. The last-named amount, while representing an increase in the estimates for 1936, is actually not an increase in the availability of funds since certain receipts hereto available will, effective July 1, 1935, be thereafter deposited in the Treasury to the credit of "Miscellaneous receipts" under the provisions of the Permanent Appropriation Repeal Act, 1934.

#### BUREAU OF HOME ECONOMICS

This unit conducts experiments and investigations to develop basic or fundamental facts concerning the utilization of agricultural products for food, human nutrition, composition of foods, institutional cookery, standards for living, family budgets and purchasing, food-con-

sumption trends, housekeeping efficiency, household equipment, and cotton and wool utilization.

The Budget estimates for 1936 show a decrease below 1935 of \$3,531, practically all of which is due to a decrease in the cost, chargeable to this Bureau, of cleaning offices.

#### ENFORCEMENT OF THE GRAIN FUTURES ACT

The work of this unit is to supervise future trading in grain on 14 boards of trade and exchanges designated United States contract markets by the Secretary of Agriculture, and involves the observation of trading operations, compiling, and publishing daily reports on volume of trading and amounts of open interest, examination of books and records of clearing members for the purpose of discovering and preventing irregularities, examination of market news and gossip items to prevent the dissemination of false and misleading crop and market information, maintaining a daily check on accounts of large traders, investigation of complaints, and special studies and investigations relating to economic functions and general utility of the future markets for hedging and merchandising purposes.

There is a small decrease of \$1,991 in the estimates for 1936 below the appropriation for 1935.

#### FOOD AND DRUG ADMINISTRATION

This unit enforces the Food and Drugs Act, Insecticide Act, Tea Importation Act, Naval Stores Act, Milk Importation Act, and the Caustic Poison Act. The administration inspects and analyzes samples of the various products coming under its jurisdiction to the end that it may detect and cause to be removed from the channels of trade all those products which fail to comply with the terms of the regulatory acts which it administers. It institutes legal action against those who violate the laws. The primary object of these acts is to protect the public against misbranded or adulterated foods, drugs, naval stores, insecticides, and fungicides, and honest manufacturers against unfair competition with such goods.

The estimates for 1936 show a net increase over 1935 of \$473,984, all of which is for the more effective enforcement of the Federal Food and Drugs Act.

#### MISCELLANEOUS ITEMS

##### FOREST ROADS AND TRAILS

The work under the item "Forest roads and trails" consists of the survey, construction, reconstruction, and maintenance of roads and trails of primary importance for the protection, administration, and utilization of the national forests, or when necessary for the use and development of the resources upon which communities within or adjacent to the national forests are dependent. The amount appropriated is apportioned by the Secretary of Agriculture among the several States, Alaska, and Puerto Rico.

The estimates for 1936 show a decrease below the appropriations for 1935 of \$4,691,387.

##### SOIL EROSION

Soil-erosion investigations are conducted for the purpose of determining the causes of erosion, to devise methods for prevention or control, for conservation of rainfall, for the renewal of eroded lands, and to develop a comprehensive program of soil-erosion control for the

entire United States. Different phases of this work are conducted by the Forest Service, the Bureau of Chemistry and Soils, and the Bureau of Agricultural Engineering.

The estimates for 1936 show an increase over 1935 of \$67,586 for soil-erosion work by the Forest Service due to the fact that no appropriation was made for 1935 for this purpose by reason of the allotment of funds by the Public Works Administration.

#### GRASSHOPPER CONTROL

A supplemental appropriation of \$2,354,893 was provided for the fiscal year 1935 for combating a serious infestation of grasshoppers in certain agricultural areas in the middle western and northwestern portions of the United States. This was to meet an emergency and no estimate is therefore included in the Budget for 1936 for this purpose.

#### EXPERIMENTS AND DEMONSTRATIONS IN LIVESTOCK PRODUCTION

This covers the maintenance and operation of a regional station near New Iberia, La., where experiments and demonstrations are conducted in connection with the development of livestock production in the cane sugar and cotton districts of the United States.

The estimate for 1936 is practically the same as the amount provided for 1935.

#### BELTSVILLE RESEARCH CENTER

At Beltsville, Md., the Department of Agriculture maintains a research center where research and experimentation is conducted by 10 bureaus of the Department. This center comprises some 5,000 acres of land and approximately \$3,000,000 is being expended in 1935 from allotments of funds made by the Public Works Administration in providing permanent facilities. Due to this expansion a fund for general maintenance and protection of the property and for coordination of service facilities is essential, and for these purposes the estimates for 1936 include a separate item of \$75,000. Other expenses of operating the research center are contributed by the various bureaus of the Department of Agriculture concerned from appropriations available to them.

#### AGRICULTURAL ADJUSTMENT ADMINISTRATION

The function of this organization is to relieve the existing national emergency by increasing agricultural purchasing power pursuant to the policy of Congress as declared in the Agricultural Adjustment Act approved May 12, 1933. The act creating the Administration appropriated \$100,000,000 to remain available until expended for administrative expenses under the act and for rental and benefit payments made with respect to reduction in acreage or reduction in production for market. It also appropriated, to be available to the Secretary of Agriculture for carrying out the purposes of the act, the proceeds of taxes imposed under the act and provided for advances to the Secretary of Agriculture by the Treasury in anticipation of the collection of such taxes. Other funds were subsequently appropriated as set forth in the estimates.

The activities of the Agricultural Adjustment Administration are of such an emergency character that, at the time of preparation of the Budget estimates, it was

impossible to forecast the obligations that would be involved in the work of the Administration during the fiscal year 1936. Therefore, the estimated obligations for that year are placed in total at amounts which are comparable in certain respects with estimated expenditures for the fiscal year 1935. It should be understood, however, that these amounts are not accurate estimates of obligations during the fiscal year 1936, because of the difficulties involved in estimating.

The foregoing has particular reference to the permanent appropriation "Advances by the Secretary of the Treasury under section 12 (b) of the act of May 12, 1933." Under the head of "Annual appropriations" there was appropriated in 1935, by Public Resolution No. 27, approved May 25, 1934, the sum of \$150,000,000, of which \$100,000,000 was for the benefit of the cattle and dairy industry, including the removal of surplus cattle from drought-stricken areas, and \$50,000,000 was for the eradication of diseases in cattle and the purchase of beef and dairy products for relief distribution. No estimate for these purposes is included in the estimates of the Department of Agriculture for 1936.

#### Permanent appropriations:

##### EXPENSES, COTTON STANDARDS ACT

This appropriation, amounting to \$34,830 in 1935, was repealed as a permanent appropriation, effective July 1, 1935, by the Permanent Appropriation Repeal Act, 1934. For 1936 funds for this purpose are included in the estimates of annual appropriations for the Bureau of Agricultural Economics.

##### BIOLOGICAL SURVEY (MIGRATORY BIRD CONSERVATION FUND)

This permanent appropriation represents a special account created by the act entitled "An Act to supplement and support the Migratory Bird Conservation Act by providing funds for the acquisition of areas for use as migratory bird sanctuaries, refuges, and breeding grounds, for developing and administering such areas, for the protection of certain migratory birds, for the enforcement of the Migratory Bird Treaty Act and regulations thereunder, and for other purposes", approved March 16, 1934. The fund is derived from the sale of hunting stamps, or licenses, which are sold at \$1 each. For 1936 it is estimated that the expenditures from receipts will be \$750,000.

##### EXTENSION SERVICE

The 1936 estimate for the Extension Service is for the permanent annual appropriation for cooperative agricultural extension work and shows an automatic increase of \$10,000 provided for by law.

##### BUREAU OF ANIMAL INDUSTRY

This permanent appropriation for an additional \$3,000,000 for expenses of meat inspection was repealed as a permanent appropriation, effective July 1, 1935, by the Permanent Appropriation Repeal Act, 1934. For 1936 an equal sum is included in the estimates of annual appropriations for the Bureau of Animal Industry.

## FOREST SERVICE

In 1935 there were five permanent appropriations involved, namely: "Expenses of the National Forest Reservation Commission"; "Refunds to depositors in excess of deposits, National Forests Fund"; "Payments to States and Territories of 25 percent of all money received each fiscal year from forest reserves located therein for expenditure for the benefit of public schools and public roads of the counties in which such reserves are located"; "Payments to school funds of the States of Arizona and New Mexico"; and "Roads and Trails in States, National Forests Fund", providing for payment of an additional 10 percent of all moneys received from national forests during each fiscal year. For 1935 the available appropriations amounted to \$755,100. The estimates for 1936 show a net increase of \$261,400 resulting from the transfer from a permanent to an annual appropriation of \$6,600 for expenses of the National Forest Reservation Commission; the transfer of \$60,000, for refunds, to the Treasury Department; and the inclusion in the Budget of estimated expenditures of \$328,000 for payments to States of an additional 10 percent of forest receipts.

## Trust accounts:

## FOREST SERVICE

This permanent appropriation provides that all moneys received as contributions toward cooperative work in forest investigations, or the protection and improvement of the national forests, including deposits received from timber purchases to cover the cost to the United States of disposing of brush and other debris resulting from cutting operations in sales of national-forest timber, are covered into the Treasury and constitute a special account, to be used for expenses of investigations, protection, or improvements by the Forest Service, and for refunds to contributors of excess of deposits. The estimate for 1936 is the same as the appropriation available for 1935—\$2,000,000.

NOTE.—The appropriation for "Compensation, mechanical shops and power plant" was discontinued in 1934. Power plant operation, elevator service, and maintenance of buildings, were transferred to the Department of the Interior, funds for motor-transport service to "Salaries, Office of the Secretary", and a small portion of the funds to "Miscellaneous expenses, Department of Agriculture."

Miscellaneous Expenses, Department of Agriculture—

For stationery, blank books, twine, paper, gum, dry goods, soap, brushes, brooms, mats, oils, paints, glass, lumber, hardware, ice, furniture, carpets, and matting; for freight, express charges, advertising and press clippings, telegraphing, telephoning, postage, washing towels; for the maintenance, repair, and operation of one motorcycle and not to exceed three (including one for the Secretary of Agriculture, one for general utility needs of the entire Department, and one for the Forest Service) and purchase and exchange of one motor-propelled passenger-carrying vehicle, at a net cost of not to exceed \$2,500, and one motorcycle \$1,500, for official purposes only; for the payment of the Department of Agriculture's proportionate share of the expense of the dispatch agent in New York; for official traveling expenses, including examination of estimates for appropriations in the field for any bureau, office, or service of the Department; and for other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department, which are authorized by such officer as the Secretary may designate, \$115,048 \$116,448: Provided, That the Secretary of Agriculture, during the fiscal year [1935] 1936, may maintain stocks of stationery, supplies, equipment, and miscellaneous materials sufficient to meet, in whole or in part, requirements of the bureaus and offices of the Department in the city of Washington and elsewhere, but not to exceed in the aggregate, \$200,000 in value at the close of the fiscal year, and the appropriations made for such bureaus and offices for such stocks shall be available to reimburse the appropriation for miscellaneous expenses current at the time supplies are issued: Provided further, That the appropriations made hereunder shall be available for the payment of salaries of employees engaged in purchasing, storing, handling, packing, or shipping of supplies and blank forms, and the amount of such salaries shall be charged proportionately as a part of the cost of supplies issued, and in the case of blank forms and supplies not purchased from this appropriation the amount of such salaries shall be charged proportionately to the proper appropriation: Provided further, That the facilities of the central storehouse of the Department shall to the fullest extent practicable be used to make unnecessary the maintenance of separate bureau storehouse activities in the Department: Provided further, That a

separate schedule of expenditures, transfers of funds, or other transactions hereunder shall be included in the annual Budget (U. S. C., title 5, secs. 104, 542; act Mar. 26, 1934, 48 Stat., pp. 468, 469).

Permanent specific appropriation:

*Cooperative Agricultural Extension Work—*

For the purpose of paying the expenses of cooperative agricultural extension work and the necessary printing and distributing of information in connection with same, there is permanently appropriated \$480,000 for each year, \$10,000 of which is paid annually to each State which has by action of its legislature assented to the provisions of the act. There was also appropriated an additional sum of \$600,000 for the fiscal year following that in which the foregoing appropriation first became available, and for each year thereafter for seven years a sum exceeding by \$500,000 the sum appropriated for each preceding year, and for each year thereafter there is permanently appropriated the sum of \$4,100,000 in addition to the sum of \$480,000. The additional sums are allotted annually to each State by the Secretary of Agriculture and paid in the proportion which the rural population of each State bears to the rural population of all the States as determined by the next preceding Federal census, but no payment out of the additional appropriations can be made in any year to any State until an equal sum has been appropriated for that year by the legislature of such State, or provided by State, county, college, local authority, or individual contributions from within the State, for the maintenance of cooperative agricultural extension work. On May 16, 1928 (U. S. C., Supp. [VI] VII, title 7, secs. 386-386b), this appropriation was amended to include a permanent allotment to the Territory of Hawaii of \$10,000 plus an additional sum of \$12,935.43, subject to the same terms and conditions as the original act. The permanent annual appropriation was thereby increased to \$4,602,935.43. Under the 1930 census the amount of money available to Hawaii increased by \$3,160, thereby automatically raising the total amount available under the original Smith-Lever Act by this amount. The Act of March 4, 1931, provides that the Smith-Lever Act and Acts supplementary thereto be increased without diminishing the amount now received by any State or other Territory, to carry out the provisions of this Act in the Territory of Puerto Rico and specifies that the appropriation for 1933 and subsequent years shall be \$50,000, this amount to be increased by \$10,000 annually, or such part thereof as may be necessary, until the total to which Puerto Rico is entitled under the provisions of this Act is reached. The permanent annual appropriation is thereby increased to [§\$4,676,096, but pursuant to Executive Order No. 6166 of June 10, 1933, section 18 of which requires that payments for agricultural extension work be reduced 25 percent, this appropriation is reduced to \$3,507,072], \$4,686,096 (U. S. C., title 7, secs. 342, 343; U. S. C., Supp. VII, title 7, secs. 386-386b, 386f).

**BUREAU OF ANIMAL INDUSTRY**

Salaries and Expenses, Bureau of Animal Industry—

For carrying out the provisions of the Act approved May 29, 1884 (U. S. C., title 7, sec. 391; title 21, secs. 112-119, 130), establishing a Bureau of Animal Industry, and the provisions of the Act approved March 3, 1891 (U. S. C., title 45, secs. 75, 76), providing for the safe transport and humane treatment of export cattle from the United States to foreign countries, and for other purposes; the Act approved August 30, 1890 (U. S. C., title 21, secs. 101-105), providing for the importation of animals into the United States, and for other purposes; and the provisions of the Act approved February 2, 1903 (U. S. C., title 21, secs. 111-113, 120-122), to enable the Secretary of Agriculture to more effectually suppress and prevent the spread of contagious and infectious diseases of livestock, and for other purposes; and also the provisions of the Act approved March 3, 1905 (U. S. C., title 21, secs. 123-128), to enable the Secretary of Agriculture to establish and maintain quarantine districts, to permit and regulate the movement of

cattle and other livestock therefrom, and for other purposes; and for carrying out the provisions of the Act of June 29, 1906 (U. S. C., title 45, secs. 71-74), entitled "An Act to prevent cruelty to animals while in transit by railroad or other means of transportation"; and for carrying out the provisions of the Act approved March 4, 1913 (U. S. C., title 21, secs. 151-158), regulating the preparation, sale, barter, exchange, or shipment of any virus, serum, toxin, or analogous products manufactured in the United States and the importation of such products intended for use in the treatment of domestic animals; and for carrying out the provisions of the Packers and Stockyards Act, approved August 15, 1921 (U. S. C., title 7, secs. 181-229); and to enable the Secretary of Agriculture to collect and disseminate information concerning livestock and animal products; to prepare and disseminate reports on animal industry; to employ and pay from the [appropriation] appropriation herein made as many persons in the city of Washington or elsewhere as he may deem necessary; to purchase in the open market samples of all tuberculin, serums, antitoxins, or analogous products, of foreign or domestic manufacture, which are sold in the United States, for the detection, prevention, treatment, or cure of diseases of domestic animals, to test the same, and to disseminate the results of said tests in such manner as he may deem best; to purchase and destroy diseased or exposed animals, including poultry, or quarantine the same whenever in his judgment essential to prevent the spread of pleuropneumonia, tuberculosis, contagious poultry diseases, or other diseases of animals from one State to another, as follows (U. S. C., title 5, secs. 511, 512; title 7, secs. 181-229, 391; title 21, secs. 101-105, 111-128, 130, 151-158; title 45, secs. 71-76; U. S. C., Supp. VII, title 7, secs. 205, 231; act Mar. 26, 1934, 48 Stat., pp. 474, 475):

General administrative expenses: For necessary expenses for general administrative purposes, including the salary of chief of bureau and other personal services in the District of Columbia, [\$162,185] \$178,220 (U. S. C., title 5, secs. 511, 512; title 7, secs. 181-229, 391; title 21, secs. 101-105, 111-128, 130, 151-158; title 45, secs. 71-76; U. S. To enable the Secretary of Agriculture to experiment and to make and continue investigations and report on forestry, national forests, forest fires, and lumbering, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water-supply or sanitary system and of connecting the same with any such building, and exclusive of the cost of any tower upon which a lookout house may be erected, shall not exceed \$2,500; to pay all expenses necessary to protect, administer, and improve the national forests, including tree planting in the forest reserves to prevent erosion, drift, surface wash, and soil waste and the formation of floods, and including the payment of rewards under regulations of the Secretary of Agriculture for information leading to the arrest and conviction for violation of the laws and regulations relating to fires in or near national forests, or for the unlawful taking of, or injury to, Government property; to ascertain the natural conditions upon and utilize the national forests, to transport and care for fish and game supplied to stock the national forests or the waters therein; to employ agents, clerks, assistants, and other labor required in practical forestry and in the administration of national forests in the city of Washington and elsewhere; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service; to purchase necessary supplies, appa-

ratus, office fixtures, law books, reference and technical books and technical journals for officers of the Forest Service stationed outside of Washington, and for medical supplies and services and other assistance necessary for the immediate relief of artisans, laborers, and other employees engaged in any hazardous work under the Forest Service: *Provided further*, That the appropriations for the work of the Forest Service shall be available for meeting the expenses of warehouse maintenance and the procurement, care, and handling of supplies and materials stored therein for distribution to projects under the supervision of the Forest Service and for sale and distribution to other Government activities, the cost of such supplies and materials, including the cost of supervision, transportation, and handling, to be reimbursed to appropriations current at the time additional supplies and materials are procured for warehouse stocks from the appropriations chargeable with the cost of stock issued; to pay freight, express, telephone, and telegraph charges; for electric light and power, fuel, gas, ice, and washing towels, and official traveling and other necessary expenses, including traveling expenses for legal and fiscal officers while performing Forest Service work; and for rent outside of the District of Columbia, as follows (U. S. C., title 5, secs. 511, 512; title 16, secs. 471-572; U. S. C., Supp. VII, title 16, secs. 576-576b, 581, 581a, 581f-581i; acts June 9, 1916, 39 Stat., p. 218; Apr. 15, 1930, 46 Stat., pp. 167, 168; Mar. 26, 1934, 48 Stat., p. 481).

General administrative expenses: For necessary expenses for general administrative purposes, including the salary of the Chief Forester and other personal services in the District of Columbia, [\$258,092] \$358,300 (U. S. C., title 5, secs. 511, 512; title 16, secs. 471-572; U. S. NATIONAL FOREST ADMINISTRATION

For the employment of forest supervisors, deputy forest supervisors, forest rangers, forest guards, and administrative clerical assistants on the national forests, and for additional salaries and field-station expenses, including the maintenance of nurseries, collecting seed, and planting, necessary for the use, maintenance, improvement, and protection of the national forests, and of additional national forests created or to be created under section 11 of the Act of March 1, 1911 (U. S. C., title 16, sec. 521), and under the Act of June 7, 1924 (U. S. C., title 16, secs. 471, 499, 505, 564-570), and lands under contract for purchase or for the acquisition of which condemnation proceedings have been instituted for the purposes of said Acts, and for necessary miscellaneous expenses incident to the general administration of the Forest Service and of the national forests:

For the administration, protection and development of the national forests, including the compensation and traveling expenses of field personnel; the purchase of materials, supplies and equipment; the establishment and maintenance of forest tree nurseries, including the procurement of tree seed and nursery stock by purchase, production or otherwise, seeding and tree planting and the care of plantations and young growth; the maintenance and operation of aerial fire control by contract or otherwise, but not including the purchase of landing fields or aircraft; the maintenance of roads and trails and the construction and maintenance of all other improvements necessary for the proper and economical administration, protection, development and use of the national forests: Provided, That where, in the opinion of the Secretary of Agriculture, direct purchases will be more economical than construction, improvements may be purchased; the construction and maintenance of sanitary facilities and for fire preventive and other measures incident to recreational developments and use; control of destructive forest tree diseases and insects; timber cultural operations; development and application of fish and game management plans; propagation and transplanting of plants suitable for planting on semi-arid portions of the national forests; estimating and appraising of timber and other resources and development and application of plans for their effective management, sale and/or use; examination, classification, surveying and appraisal of land incident to effecting exchanges authorized by law and of lands within the boundaries of the national forests that may be opened to homestead settlement and entry under the act of June 11, 1906 (U. S. C., title 16, secs. 506-509), and the act of August 10, 1912 (U. S. C., title 16, sec. 506), as provided by the act of March 4, 1913 (U. S. C., title 16, sec. 512), and all other expenses necessary for the use, maintenance, improvement, protection and general administration of the national forests and lands under contract for purchase or for the acquisition of which condemnation proceedings have been instituted under the act of March 1, 1911 (U. S. C., title 16, sec. 521), and the act of June 7, 1924 (U. S. C., title 16, secs. 471, 499, 505, 564-570).

In national forest region 1, Montana, Washington, Idaho, and South Dakota, [\$984,763] \$1,424,678: Provided, That the Secretary of Agriculture is authorized to use not to exceed \$200 in caring for the graves of fire fighters buried at Wallace, Idaho; Newport, Washington; and Saint Maries, Idaho;

In national forest region 2, Colorado, Wyoming, South Dakota, Nebraska, and Oklahoma, [\$554,655] \$737,408: Provided, That

not to exceed \$1,000 of this appropriation may be expended for the maintenance of the herd of long-horned cattle on the Wichita National Forest;

In national forest region 3, Arizona and New Mexico, [\$566,390] \$618,279;

In national forest region 4, Utah, Idaho, Wyoming, Nevada, and Colorado, [\$764,409] \$873,047;

In national forest region 5, California and Nevada, [\$1,038,069] \$1,252,630;

In national forest region 6, Washington, Oregon, and California, [\$1,030,164] \$1,274,647;

In national forest region 7, [Arkansas, Alabama, Florida, Georgia, South Carolina, North Carolina,] Pennsylvania, [Tennessee,] Virginia, West Virginia, New Hampshire, Maine, Puerto Rico, Kentucky, [Louisiana, Mississippi, Oklahoma, Texas,] and Vermont, [\$438,488] \$417,607;

In national forest region 8, [Alaska, \$100,032] Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas, \$743,945;

In national forest region 9, Michigan, Minnesota, Illinois, Iowa, Missouri, and Wisconsin, [\$141,383] \$566,527: Provided, That not to exceed \$1,000 of this appropriation may be used for the repair and maintenance of the dam at Cass Lake, Minnesota;

In national forest region 10, Alaska, \$100,809;

In all, for the use, maintenance, improvement, protection, and general administration of the national forests, [\$5,618,353] \$8,009,577: Provided, That the foregoing amounts appropriated for such purposes shall be available interchangeably in the discretion of the Secretary of Agriculture for the necessary expenditures for fire protection and other unforeseen exigencies: Provided further, That the amounts so interchanged shall not exceed in the aggregate 10 per centum of all the amounts so appropriated (U. S. C., title 5, secs. 511, 512; title 16, secs. 471-572; U. S. C., Supp. VII, title 16, secs. 576-576b, 581, 581a, 581f-581i; acts June 9, 1916, 39 Stat., p. 218; Apr. 15, 1930, 46 Stat., pp. 167, 168; Mar. 26, 1934, 48 Stat., p. 482)

Special funds:

Payments to States and Territories from the National Forests Fund—

Twenty-five percent of all money received from each forest reserve during any fiscal year is paid at the end thereof by the Secretary of the Treasury to the State or Territory in which the reserve is situated, to be expended as the State or Territorial legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the forest reserve is situated. When any forest reserve is in more than one State or Territory or county, the distributive share to each from the proceeds of the reserve is proportional to its area therein (*U. S. C., title 16, sec. 500*).

Marketing and distributing farm products: For acquiring and diffusing among the people of the United States useful information, on subjects connected with the marketing, handling, utilization, grading, transportation, and distributing of farm and nonmanu-

factured food products and the purchasing of farm supplies, including the demonstration and promotion of the use of uniform standards of classification of American farm products throughout the world, including scientific and technical research into American-grown cotton and its byproducts and their present and potential uses, including new and additional commercial and scientific uses for cotton and its byproducts, and including investigations of cotton ginning under the Act approved April 19, 1930 (U. S. C., Supp. [VI] VII, title 7, secs. 424, 425), and for collecting and disseminating information on the adjustment of production to probable demand for the different farm and animal products, independently and in cooperation with other branches of the Department, State agencies, purchasing and consuming organizations, and persons engaged in the marketing, handling, utilization, grading, transportation, and distributing of farm and food products, and for investigation of the economic costs of retail marketing of meat and meat products, [§609,094] §688,654: *Provided*, That practical forms of the grades recommended or promulgated by the Secretary for wool and mohair may be sold under such rules and regulations as he may prescribe, and the receipts therefrom deposited in the Treasury to the credit of miscellaneous receipts (U. S. C., title 5, secs. 511-512; title 7, secs. 411-414; U. S. C., Supp. VII, title 7, secs. 423-425, 451-457, 471-476, 501-508, 541-545, 551-568; act Mar. 26, 1934, 48 Stat., p. 492).

*Passenger-carrying vehicles:* Within the limitations specified under the several headings the lump-sum appropriations herein made for the Department of Agriculture shall be available for the purchase of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of the field work of the Department of Agriculture outside the District of Columbia: *Provided*, That such vehicles shall be used only for official service outside the District of Columbia, but this shall not prevent the continued use for official service of motor trucks in the District of Columbia: *Provided further*, That the limitation on expenditures for purchase of passenger-carrying vehicles in the field service shall be inter-

changeable between the various bureaus and offices of the department, to such extent as the exigencies of the service may require: *Provided further*, That appropriations contained in this Act shall be available for the maintenance, operation, and repair of motor-propelled and horse-drawn passenger-carrying vehicles: *Provided further*, That the Secretary of Agriculture may exchange motor-propelled and horse-drawn vehicles, tractors, road equipment, and boats, and parts, accessories, tires, or equipment thereof, in whole or in part payment for vehicles, tractors, road equipment, or boats, or parts, accessories, tires, or equipment of such vehicles, tractors, road equipment, or boats purchased by him: *Provided further*, That the funds available for carrying into effect the Agricultural Adjustment Act may be used during the fiscal year 1936 for the purchase, at a cost of not to exceed \$2,500 and the maintenance, repair, and operation, of one passenger-carrying vehicle for official purposes (U. S. C., title 5, sec. 78; title 23, secs. 21, 23; act Mar. 26, 1934, 48 Stat., pp. 497, 498).

*Soil Erosion Investigations—*

To enable the Secretary of Agriculture to make investigation not otherwise provided for of the causes of soil erosion and the possibility of increasing the absorption of rainfall by the soil in the United States, and to devise means to be employed in the preservation of soil, the prevention or control of destructive erosion and the conservation of rainfall by terracing or other means, independently or in cooperation with other branches of the Government, State agencies, counties, farm organizations, associations of business men, or individuals, including necessary expenses, [\$168,326] \$256,362, of which amount not to exceed [\$11,280] \$22,032 may be expended for personal services in the District of Columbia, and \$875 shall be available for the purchase of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of field work outside the District of Columbia (act Mar. 26, 1934, 48 Stat., p. 498).

International Production Control Committees—

During the fiscal year [1935] 1936 the Secretary of Agriculture may expend not to exceed \$10,000, from the funds available for carrying into effect the Agricultural Adjustment Act approved May 12, 1933 (Public Numbered 10, Seventy-third Congress, 48 Stat., p. 38), the share of the United States as a member of the International Wheat Advisory Committee or like events or bodies concerned with the reduction of agricultural surpluses or other objectives of the Agricultural Adjustment Act, together with traveling and all other necessary expenses relating thereto (act Mar. 26, 1934, 48 Stat., p. 498).

Grasshopper Control—

For the application of such methods of control of grasshoppers as, in the judgment of the Secretary of Agriculture, may be necessary, in cooperation with such authorities of the States concerned, organizations, or individuals as he may deem essential to accomplish such purposes, including the employment of persons and means in the District of Columbia and elsewhere, printing and binding, rent outside of the District of Columbia, and for other expenses, \$2,354,893, to be available during the fiscal years 1934 and 1935, and to be immediately available, of which amount not to exceed \$7,500 may be expended for personal services in the District of Columbia: Provided, That this appropriation shall be used for expenditures of general administration and supervision, purchase and transportation of poisoned bait, or materials for its manufacture, and such other expenses as in the discretion of the Secretary of Agriculture may be deemed necessary and that the cooperating State shall be responsible for the local distribution and utilization of such bait on privately owned lands including full labor costs: Provided further, That, in the discretion of the Secretary of Agriculture, no part of this appropriation shall be expended for grasshopper control in any State until such State has provided the necessary organization for the cooperation herein indicated: Provided further, That no part of this appropriation shall be used to pay the cost or value of farm animals, farm crops, or other property injured or destroyed (act Mar. 26, 1934, 48 Stat., p. 498).
