## EXPLANATORY STATEMENT

The revenues for the Post Office Department for the fiscal year 1938 are now estimated at \$755,000,000. The fall in postal receipts was checked during the fiscal year 1934, and since January 1934 the trend has continued upward. The receipts for the fiscal year 1935 were \$630,795,000, or 7.5 percent over 1934; for 1936 they amounted to \$665,343,000, or 5.5 percent over 1935; for 1937 it is estimated that the receipts will reach \$715,000,000 or 7.5 percent over 1936; and that for 1938 the receipts will total \$755,000,000, or 5.5 percent over the estimate for 1937. These estimates for 1937 and 1938 are based on the upward trend of postal business sustained since 1934, and especially upon the trend since last July and the present prospects that such improvement in business will continue through 1938. The Revenue Act of 1932 increased the rate of postage for first-class mail from 2 cents to 3 cents an ounce, but provided that such increase should not continue beyond June 30, 1933. Each subsequent year the provision for the increase in rate has been continued. The latest extension will expire on June 30, 1937. The estimate of receipts for 1938 is in part predicated on the assumption that the Congress will enact legislation, recommended elsewhere in this Budget, continuing such 3-cent letter rate through the fiscal year 1938. Failure to do so will result in a reduction in postal revenues of approximately \$100,000,000 for 1938 which in turn will involve an increase in the postal deficit by that amount.

The estimates of appropriations for the Post Office Department for the fiscal year 1938 aggregate \$785,744,478, which, compared with the appropriations for 1937, \$780,584,589, shows a facial increase of only \$5,159,889. The appropriations for 1937, however, include \$26,500,000 for payments of ocean-mail contracts under the Merchant Marine Act of 1928. This appropriation for 1937 includes \$4,500,000 as representing the equivalent of the poundage-rate cost of transportation of the mail carried on vessels under such contracts, and \$22,000,000 as the estimated amount of subsidy in aid of the development of the American merchant marine. For 1938 the Postal Service will pay only for transportation of ocean mail at poundage rates, while any subsidies or differentials in favor of American vessels will be determined and provided for by the United States Maritime Commission. After making

allowance, therefore, for the appropriation of \$22,000,000 for ship subsidy in 1937, not included in the estimates for 1938, the estimates for 1938 represent an increase of \$27,159,889 over the appropriations for similar purposes for 1937. This would represent an increase in expenditures of 3.5 percent, while the increase in receipts is estimated at 5.5 percent. Comparing estimates of appropriations for 1938, \$785,744,478, with estimated receipts, \$755,000,000, indicates an excess of \$30,744,478 for postal operations to be financed from the general revenues of the Treasury.

An increase in postal revenues reflects an increase in the volume of mail to be handled, which in turn requires additional expenditures for personnel, transportation, office and work space, equipment, supplies, and other facilities. The principal reason for practically every increase in the estimates of appropriations for 1938 over 1937 is the fact that the revenues for 1938 are estimated at \$40,000,000 more than for 1937, which reflects an increased volume of mail to be handled with its attendant increase in expenditures. There are a few items hereinafter mentioned for which the increases requested are due in part to other causes.

The estimates contemplate the expansion of the air mail, both foreign and domestic, by the establishment of new or additional routes, the extension of existing routes, and the increase in the frequencies of trips over existing routes.

The item for foreign mail transportation includes \$4,500,000 to cover at poundage rates the cost of transportation of ocean mail previously paid from the appropriation for transportation of mail under the Merchant Marine Act of 1928.

The other major increases of importance not directly related to the increase in the volume of the mails are those appearing under the appropriation items for operating force and operating supplies for public buildings. The increases in these items are due to the large number of Federal buildings that will be completed during the last half of the fiscal year 1937 and during the year 1938 and turned over to the Post Office Department for administration and operation. The cost of operation of the new buildings is usually considerably more than the savings in rents of the privately owned buildings vacated.

<sup>1</sup> Includes \$22,000,000 for payment of ocean-mail subsidy contracts for 1937 for which no estimates are required under the Post Office Department for 1938. It is estimated that the Post Office Department will require \$7,900,000 of such amount to meet obligations accrued up to Oct. 26, 1936, the date the U. S. Maritime Commission assumed administrative control over such contracts, and that the remainder, \$14,100,000, will be transferred to and administered by said Commission.

### EXPLANATORY STATEMENT

The Reconstruction Finance Corporation, organized under the act of January 22, 1932 (47 Stat. 5), was created for the purpose of providing emergency loaning facilities for banking and other financial institutions, and for agricultural, commercial, and industrial purposes. The general scope of the Corporation's functions, as authorized by that act, has been extended by subsequent legislation. The act of January 31, 1935 (49 Stat. 1), extended the obligating authority of the Corporation to February 1, 1937, subject to being terminated at such earlier date as may be fixed by the President by proclamation. The estimates for the fiscal year 1938, transmitted pursuant to section 7 of the First Deficiency Appropriation Act, fiscal year 1936, are to cover the necessary administrative expenses of the Corporation on a liquidation basis should the Congress not extend the authority of the Corporation beyond February 1, 1937.

The capital stock of the Corporation, \$500,000,000, was subscribed and paid by the Secretary of the Treasury from an appropriation made by Congress in accordance with the terms of the original law. Additional funds are provided by an authorization to issue notes, debentures, bonds, and other obligations within limits prescribed by law. The Secretary of the Treasury purchases the obligations of the Corporation whenever additional funds are needed, so that for all practical purposes it is financed almost entirely by the Federal Government.

The Corporation operates by two general methods in carrying out its corporate purposes and functions. It renders financial aid directly to eligible applicants by making loans or by purchases of preferred stock. Such transactions are referred to as "direct operations." The Corporation also furnishes funds to other governmental agencies or corporations, such transfers of funds being referred to as "allocations." These financial operations

are indicated in the Corporation's Annexed Budget summary shown above.

The direct operations of the Corporation include loans made to banks, railroads, and commercial business; loans made for financing the marketing of agricultural products; purchases of stock in banks, insurance companies, and mortgage corporations; and for all administrative expenses incurred in connection with such transactions. Direct receipts include repayment of principal and interest (see Supporting Statements Nos. 1 and 2).

Allocations make funds available for advances to other Government agencies and corporations, or for subscriptions to capital stock. These funds have been employed to purchase the capital stock of the Regional Agricultural Credit Corporations, Home Owners' Loan Corporation, Federal Home Loan Banks, Export-Import Banks, Federal Farm Mortgage Corporation, and the RFC Mortgage Company. Funds have been also supplied to the Federal Emergency Relief Administration, Farm Credit Administration, Federal Housing Administration, Commodity Credit Corporation, Rural Electrification Administration, and for the purchase of securities from the Federal Emergency Administration of Public Works and for transfer to the appropriation under the Emergency Relief Appropriation Act of 1935.

Most of the agencies or corporations, which have obtained allocations from the Reconstruction Finance Corporation have also had funds from other sources. Some are authorized to sell obligations directly to the public. Others obtain additional capital from private subscriptions to capital stock, or from moneys appropriated by Congress. The receipts, expenditures, and means of financing these corporations, together with the direct receipts and expenditures of the Reconstruction Finance Corporation, are shown in detail in the foregoing statements.

**EXPLANATORY STATEMENT**

The appropriation requested for the fiscal year 1938 amounts to \$43,000,000. This amount together with a contract authorization of \$5,500,000, makes a total budget for 1938 of \$48,500,000, which provides for the continuation or completion of construction of the dam and reservoir projects provided for by the 1937 Appropriation Act, for continuation of investigations of proposed dam and reservoir projects on the Tennessee River and its tributaries, and for the continuation of other activities.

Previous appropriations of \$150,900,000 have provided for construction expenditures on the Norris, Wheeler, Pickwick Landing, Gunter'sville, Chickamauga, and Hiwassee Dams; the conducting of general investigations of water-control problems; the construction, purchase, and operation of electric transmission and distribution facilities; the manufacture and testing of plant foods and other activities for the promotion of soil conservation and a balanced agricultural economy; the maintenance of public property and the conducting of investigations for national defense purposes; and the conducting of studies, investigations, and experiments authorized by sections 22 and 23 of the Tennessee Valley Authority Act.

The estimates include expenditures for four additional power generating units. The capacity represented by these units will be needed to meet the expected increased power needs in the area by 1939 and 1940. In order to have these units available when required, orders must be placed for the major portion of the equipment in 1938.

NAVIGATION, FLOOD CONTROL, AND HYDROELECTRIC PROGRAM

Cumulative expenditures for the navigation, flood control, and hydroelectric program through the period covered by this Budget will be approximately \$179,000,000. To complete the construction projects already started or proposed to be started in 1938 will require in addition \$121,000,000. These projects are all necessary to provide flood-control benefits and a navigation channel from the mouth of the Tennessee River to Knoxville as authorized by Congress.

In March 1936 the directors of the Authority reported to Congress their recommendations for the unified development of the Tennessee River system, in compliance with section 4j of the Tennessee Valley Act, as amended. The program for 1938 follows that presented in this report. In addition, the 1938 program also contemplates taking advantage of a schedule designed to promote efficient and coordinated construction of several projects at the same time. Thus as one feature of the work on one project is completed, plant, equipment, and personnel employed in the construction of this feature can be transferred to the same type of work at the site of another project.

Moreover, in the case of projects already started, the schedule provides for continuation of the work at a steady pace designed to secure the maximum of engineering efficiency, and the greatest possible stability of employment.

**General investigations projects:** This phase of the program includes, first, continuation of investigations contributing to the integrated development of the river system to achieve the greatest possible navigation and flood-control benefits. Second, there are included studies leading to the improvement of methods for the generation, transmission, and distribution of surplus power. Finally, these projects include the compilation of planimetric, topographic, land use, and other maps of the Tennessee Valley area. Such maps are essential materials for a unified program of development of resources. They are being prepared in cooperation with the United States Geological Survey.

**Structures and improvements:** The estimates under this phase of the program provide for the continuation or completion of construction on dam and reservoir projects already started, investigations on projects considered for future construction on the Tennessee River and tributaries, continuation of construction of electrical transmission and distribution projects, and necessary additions and betterments to dam and reservoir projects now in operation.

The amount requested for Wilson Dam provides for needed improvements to the powerhouse and generating equipment, and the dam, lock, and spillway. The estimate for Norris Dam is principally for legal costs on lands still in condemnation, and for the completion of final records. Additions and betterments are contemplated for facilities necessary to the maintenance of the reservoir.

The estimate for Wheeler Dam provides a small amount for the completion of the acquisition of land now in condemnation and miscellaneous relocation and other construction work. Additions and betterments are contemplated for facilities necessary for the maintenance of the reservoir.

Pickwick Dam and Reservoir will be approximately 60 percent completed by the end of the fiscal year 1937. The amount requested for the fiscal year 1938 provides for the substantial completion of the project.

The Hiwassee project will be approximately one-fourth completed at the end of the fiscal year 1937. The amount requested for the fiscal year 1938 provides for another quarter of the work, including purchase of practically all of the land required, and completion of backwater protection and camp construction.

Construction of the Gunter'sville project was authorized in the fiscal year 1936. By the end of the fiscal year 1937, approximately one-third of the work will be completed.

The estimate for the fiscal year 1938 provides for continuation of the work to 85 percent of completion, and includes a large part of the funds required for the installation of two generating units of 25,000 kilowatts each.

Construction of the Chickamauga project which was authorized in the fiscal year 1936 will, by the end of the fiscal year 1937, be approximately 25 percent completed. The amount requested for the fiscal year 1938 provides for another quarter of the work, including part of the funds required for the installation of two generating units of 25,000 kilowatts each. Most of the reservoir clearing and relocation work and all river-channel improvement will be undertaken in ensuing fiscal years.

The amount requested for the Gilbertsville project for the fiscal year 1938 provides for the continuation of preliminary investigations now in progress. It is proposed to proceed with engineering surveys and studies on all features of the project.

Funds are requested for investigations, surveys, studies, and foundation explorations for projects on the upper Tennessee and on its tributaries. These will include the projects known as Watts Bar and Coulter Shoals, described in the report on the Unified Development of the Tennessee River System (Tennessee Valley Authority, March 1936), which, when constructed, will provide, with the other projects for which construction funds are requested in this Budget, a 9-foot navigation channel to Knoxville. Also included are similar investigations for the purpose of preparing plans for water-control projects on the French Broad, Little Tennessee, Holston, and other tributaries.

The amount for electrical plant and equipment provides for the continuation of construction of a transmission system interconnecting all dams and providing an outlet for disposal of surplus power. It also provides for the continuation of a program of rural electrification, and for necessary additions to the revolving fund for general equipment and inventories.

Operations: Estimated revenues to be derived from the disposition of surplus power will be sufficient to meet all direct operating expenses of electricity and navigation and flood-control operations, and leave a balance of \$2,717,843, which serves to reduce the net amount of the appropriation requested. Water-control operations include planning for the unified control of all projects so as to obtain maximum benefits, control of malaria and sanitation in the reservoirs, services furnished for lock operations, and the maintenance of reservoir properties. Electricity operations include operation and maintenance of dams and power-houses, transmission facilities, and general administrative costs.

#### FERTILIZER AND SOIL CONSERVATION PROGRAM

The estimate for the fertilizer and soil conservation program provides for continuation of the development and manufacture of new forms of plant food, testing of these plant foods in cooperation with agricultural agencies, and other work resulting in the prevention of soil erosion and the silting of reservoirs.

Chemical engineering research and experimentation: This project provides for chemical engineering and related research on the development of equipment and processes pertaining to the manufacture of plant foods,

chiefly those produced by electrical processes and relating to phosphorus and other elements.

Major plant and demonstration units: This amount provides for improvements in the existing fertilizer plant, a portion of Nitrate Plant No. 2, to reduce operating expenses and to better working conditions; for construction of semiworks units to demonstrate the feasibility of fertilizer-producing processes and equipment designed and developed in the research laboratories; for construction and improvement of an experimental blast furnace; and for improving the major equipment of the fertilizer plant.

Phosphate rock production equipment and leases: This amount provides for net expenditures for additional equipment necessary for handling phosphate rock in the mining area, for prospecting for new phosphate rock deposits, and for obtaining a supply of phosphate rock. Charges to fertilizer manufacturing operations on the basis of quantities of ore removed and processed are credited to this account, the entire cost of which will eventually be charged into manufacturing operations. The estimated expenditures will assure an adequate supply of raw materials for manufacturing operations.

Manufacturing operations: This amount provides for the costs of manufacture of new plant-food products to be used to demonstrate their agricultural values and to encourage cover crops for purposes of erosion control and watershed protection. It covers labor, raw materials actually taken into process and credited to the phosphate rock production account, power credited to electricity operations, and other general expenses.

Controlled soil and fertilizer investigations: This estimate provides for studies of the physical and chemical characteristics and biological relations of the new found plant foods and the physical, chemical, and biological characteristics of the various types of soils in the area to discover the relationship between plant food deficiencies and proper fertilization. These studies are made with plant foods such as superphosphate, metacalcium phosphate, fused phosphate, and dicalcium phosphate. The methods employed include laboratory and greenhouse investigations; use of experimental plots, pasture and meadow tests, feeding tests, selected pilot farms, soil management studies, and classification, description, and mapping of the soils in the area. These studies are performed in cooperation with agricultural experiment stations and the Bureau of Chemistry and Soils.

Farm unit and large-scale tests and demonstrations: The farm unit tests covered by this estimate involve the practical application of the Authority's fertilizer products in cooperation with the farmers and experiment stations of the area, including the maintenance of records of field results, efficiency of farm organization, economy of production, and increased standards of farm living; terracing as an adjunct to improved cover crops; intensive use of cover crops as an aid to soil fertility and erosion control; and extension of methods through educational demonstration. The large-scale area tests involve the same sort of methods employed under the farm unit tests, but applied in cooperation with all the farmers in selected areas, such as small watersheds or rural-electrification districts.

Research and development of farm equipment: The estimate for this project provides for the development of farm equipment which is required if the most effective

results are to be obtained from the use of the new forms of plant foods. During 1938, many of these projects will reach the practical demonstration stage, requiring a small increase over the estimate for 1937, during which they were in the experimental stage.

Reforestation and erosion control: This project comprises reforestation, forest protection, and related erosion control on lands adjacent to and draining into T. V. A. reservoirs for the purpose of preventing silting. This work is performed in cooperation with the Civilian Conservation Corps, agricultural agencies, and farmers.

#### NATIONAL DEFENSE PROGRAM

The estimate for the national defense program provides for the continued maintenance in a stand-by condition of the nitrate plants and related facilities at Muscle Shoals. It also includes investigations of mineral resources of the area representing valuable national defense assets. The estimate for 1938 represents a decrease under that for 1937, resulting from a reduction in the amount for mineral investigations and the completion of construction and rehabilitation improvements.

The estimate for mineral investigations provides for the continuation of chemical engineering investigations of processes, products, and equipment utilizing the mineral resources of the area which are basically needed for national defense purposes. Included are experimentation in the production of manganese, magnesium, coal, alunite, and alumina. In addition to their national defense aspects, some of these investigations will also provide new uses for surplus power and new fertilizer products. The chemical engineering laboratory at Nitrate Plant No. 2 is in itself an important national defense asset.

#### REGIONAL STUDIES, EXPERIMENTS, AND DEMONSTRATIONS PROGRAM

Sections 22 and 23 of the Tennessee Valley Authority Act authorize surveys and general plans for the Valley and adjoining territory in cooperation with local governmental agencies or other organizations for the general purpose of recommending legislation along the lines of flood control, navigation, surplus power, use of marginal lands, reforestation, and otherwise.

Included in this program are studies of the region's scenic and recreational resources; studies of general transportation facilities as related to river navigation; plans for utilizing forest resources for protecting the watershed and developing new forest-product industries; studies of the opportunities for cooperative undertakings; and the general exploration of mineral resources in relation to industrial development, river traffic, and a market for surplus power.

#### OTHER UNDISTRIBUTED EXPENDITURES

These items represent expenditures not allocable to specific programs and projects.

General equipment and inventories: A small increase is requested for this revolving account, through which is handled transportation, office and similar general equipment, and inventories.

Administrative and service expense: It is estimated that this revolving account, which is distributed to programs and projects, will require no additional funds in 1937 and 1938.

Reserve for contingencies: An amount of \$1,000,000 was set up in 1937 in accordance with section 26 of the Tennessee Valley Authority Act as a reserve for emergencies and to insure continuous operation.

## EXPLANATORY STATEMENT

The financial requirements of the District of Columbia for the fiscal year 1938 are summarized in the preceding statements. It will be noted from the Annexed Budget summary that the estimated revenues (general, special, and trust accounts) of the District for 1938 are expected to total \$37,593,053, which, together with the estimated unobligated balances (general, special, and trust accounts) of \$1,693,733 carried over from the fiscal year 1937, will total \$39,286,786. The obligations (general, special, and trust accounts) for 1938 are estimated at \$49,034,043. It is expected that there will be a net deficit of \$9,747,257 at the close of the fiscal year 1938, made up as follows: General revenue account, deficit of \$11,740,281; special accounts, surpluses \$132,058 (gas tax account) and \$695,204 (water account); and trust accounts, surplus of \$1,165,762. The deficit in the general revenue account will be subject to a deduction in such amount as Congress may determine to be the Federal contribution. Any remaining deficit should be met by such increases in the property tax rates as the District Commissioners may find it necessary to make and by such additional revenue measures as Congress may enact.

## REVENUES OF THE DISTRICT OF COLUMBIA

Supporting Statement No. 1 shows the revenues of the District estimated for 1938, as allocated to the general, special, and trust accounts. In the aggregate, these estimates for 1938 are approximately the same as those for 1937 and also correspond closely to the actual revenues for 1936, if the Federal emergency grants listed as trust account revenues for the years 1937 and 1936 are excluded.

It will be observed that by far the largest source of revenues for the District is the tax on real estate, estimated to yield \$17,525,000 for 1938. This yield includes both current and back taxes, the levy being based on an assessed valuation of \$1,155,000,000 at \$1.50 per hundred. This valuation is an increase of \$7,500,000 over the 1937 valuation with no change in tax rate.

The tax on tangible personal property is estimated to yield \$1,100,000, including delinquency payments. This estimate is based on an assessment of \$80,000,000 at \$1.50 per hundred. The assessment is \$10,000,000 in excess of the assessment for 1937.

The yield from the tax on intangible personal property is estimated at \$2,525,000, based on an assessed valuation of \$515,000,000 at \$0.50 per hundred. The valuation is increased \$15,000,000 over 1937.

Other large items in the revenue estimates of the District for 1938 are the tax on public utilities, banks, etc., amounting to \$2,400,000; personal property tax on motor vehicles, \$675,000; penalties and interest on taxes, \$350,000; alcoholic beverage taxes and license fees, \$2,000,000; miscellaneous revenue items, \$3,900,000; 2-cent gasoline tax, \$2,450,000; and water rates, \$1,510,000. In 1935 the water rates were decreased by 25 percent and the metered allowance was increased to 10,000 cubic feet, and the 1938 estimates are based on a continuance of these changes.

## APPROPRIATIONS FOR THE DISTRICT OF COLUMBIA

The appropriations recommended for the District in the fiscal year 1938 amount to \$47,581,285. This amount exceeds the District appropriations for 1937 by \$2,067,375. The increases and decreases which account for this net increase are explained in some detail below.

## GENERAL EXPENSES

Appropriations are made under this heading for the salaries, and in some instances the expenses, of the principal administrative offices of the District government, and certain other municipal agencies, such as the Superintendent of Weights and Measures, the Public Utility Commission, the Department of Vehicles and Traffic, the Recorder of Deeds, and Register of Wills. The net increase under general expenses of \$762,300 is due principally to the following items: Civil-service retirement and disability fund, \$692,760 (this large increase in the District's liability is required in order to place the District's share in the fund on a sound actuarial basis as established under the recent evaluation by the Board of Actuaries); unemployment compensation (District of Columbia contribution), \$50,000; Municipal Architect's Office, \$10,060; employees' compensation fund (compensation), \$6,000; office of the pound master (transferred to this head from the Health Department), \$10,620; smoke and boiler regulation, \$5,500, less a net reduction of \$12,640 due to nonrecurring items.

## CONTINGENT AND MISCELLANEOUS EXPENSES

Under this head are included automobile, printing, postage, and office expenses, together with the item of the Public Employment Service. The net increase of \$22,393 is accounted for principally as follows: Printing and binding, \$5,000; postage, \$3,000; general advertising, \$2,000; refunding taxes, \$25,000, less \$12,607 for nonrecurring items.

The net decrease of \$67,500 for buildings and grounds is made up of a construction and land-purchase program totaling \$1,500,000, less the nonrecurring 1937 program of \$1,567,500. The 1938 program consists of the following items: To complete new Dennison Vocational School, \$180,000; to begin new junior high school on Banneker Playground, \$200,000; Bundy School addition, eight rooms and an assembly-gymnasium, \$125,000; to begin new vocational school replacing Lenox School, \$100,000; Cleveland School addition, six rooms, \$95,000; to begin new northern senior high school, \$350,000; Shepherd School, finish four rooms, upper floor, \$25,000; and additional land, \$425,000, including additional playground land in vicinity of Banneker Playground; site for elementary school in vicinity of Third Street and Concord Avenue NW.; additional land, Margaret Murray Washington Vocational School; additional land adjoining site for new Lenox Vocational School; and additional land adjoining site of old Dennison School to provide space for new building.

## COURTS

Provision is made under this head for the operation of the Juvenile Court, Municipal Court, Police Court, District Court of the United States for the District of Columbia, and United States Court of Appeals for the District of Columbia, and for the maintenance of District prisoners confined in Federal penitentiaries. In all, there is a decrease of \$551,905 made up as follows: Increases—Juvenile Court, \$420; support of convicts, \$11,200; less decreases—Police Court, \$549,500 (net result of a non-recurring building item); District Court of the United States for the District of Columbia, \$10,525 (net result of nonrecurring repair item); and Court of Appeals, \$3,500 (net result of nonrecurring repair item).

## PUBLIC WELFARE

The Board of Public Welfare has general supervision of all public charitable and correctional institutions and of the care and maintenance of dependent and delinquent children. The net increase of \$17,620 under the Board proper, which includes the Division of Child Welfare, is made up of \$1,800 for an additional social worker; \$15,000 for the board and care of guardianship children; and \$820 for the reception and detention of children.

For the jail there is an increase of \$10,530. There is a net increase of \$36,780 for the Workhouse and Reformatory which is made up of increases of \$86,780 less a \$50,000 nonrecurring construction item. There is an increase of \$50,000 for the National Training School for Boys. For the National Training School for Girls there is a decrease of \$98,800 on account of nonrecurring construction items.

Under medical charities, Children's Hospital is decreased \$35,000, and the Eastern Dispensary and Casualty Hospital item of \$40,000 is eliminated. These reductions in services are, however, offset by a corresponding increase in such services at Gallinger Municipal Hospital.

The estimates for the tubercular hospital and sanatorium and the Children's Hospital have been consolidated, and show a total net increase of \$9,770 as follows: Increases—\$55,770 for personal services and \$26,000 for maintenance; and a decrease of \$72,000 under repairs to buildings due to a large nonrecurring furniture item for the adult hospital. There is an increase of \$67,430 for Gallinger Municipal Hospital, primarily for additional nurses, additional maintenance, two new ambulances, and a truck. This will permit the hospital to care for its increased patient load and likewise to perform certain services to be discontinued at Children's and Casualty Hospitals.

For the District Training School there is an increase of \$191,250, made up as follows: Personal services, \$9,000; maintenance, \$12,000; repairs to buildings, \$8,500; purchase of truck, \$2,500; construction of a new hospital and administration building, \$160,000; less a \$750 nonrecurring item. The increase of \$29,520 in the item for the Home for the Aged and Infirm includes the following: \$4,020 for personal services, \$8,000 maintenance, \$15,750 for the installation of an additional boiler in the heating plant, and \$2,500 for a truck, less a nonrecurring item of \$750.

The amount for public assistance has been reduced \$135,000, which reduction is offset by an increase for old-age pensions in an amount of \$144,000, while pensions for the needy blind have been reduced \$9,000 on account of overestimating this item in 1937. The National Library for the Blind item of \$5,000 is eliminated. There is an increase of \$91,980 to care for the District's indigent insane at St. Elizabeths Hospital. There is likewise an increase of \$135 for burial of ex-service men.

## RECLAMATION OF ANACOSTIA FLATS

This item, amounting last year to \$50,000, has been eliminated. It is felt that this work should be temporarily discontinued until the District's financial situation undergoes improvement.

The Commissioners of the District of Columbia are authorized and empowered, in their discretion, to fix or alter the respective widths of sidewalks and roadways (including tree spaces and parking) of all highways that may be improved under appropriations contained in this Act.

No part of any appropriation contained in this Act shall be available for repairing, resurfacing, or newly paving any street, avenue, or roadway by private contract unless the specifications for such work shall be so prepared as to permit of fair and open competition in paving material as well as in price.

In addition to the provision of existing law requiring contractors to keep new pavements in repair for a period of one year from the date of the completion of the work, the Commissioners of the District of Columbia shall further require that where repairs are necessary during the four years following the said one-year period, due to inferior work or defective materials, such repairs shall be made at the expense of the contractor, and the bond furnished by the contractor shall be liable for such expense.

No part of the appropriations contained in this Act shall be used for the operation of a testing laboratory of the highways department for making tests of materials in connection with any activity of the District government (act June 23, 1936, 49 Stat. p. 1864).
