BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

Pursuant to provisions of law I transmit herewith the Budget of the United States Government for the fiscal year ending June 30, 1939, together with this message, which is a part thereof. The estimates have been developed after analysis of the revenues, obligations, and reasonable needs of the Government, and I recommend appropriations for the purposes specifically detailed herein.

In simple fairness to the Treasury of the United States I am confident that the Congress and the public will bear in mind certain fundamentals relating to the making of the National Budget.

The first step calls for the presentation, before the 15th of September, by every department and agency head, of estimates of appropriations for the fiscal year beginning the first day of the following July—in other words at least 9 months before the spending of the money can begin. These estimates, carefully prepared by the budget officers and other officials of each department and agency, are intended to represent what they consider the minimum needs of the work assigned to them by law.

Thereupon the Director of the Budget presents these totals to the President who without taking up the thousands of separate items asks the Secretary of the Treasury for estimates of the total amount of tax receipts which the Government may obtain during the 12 months beginning 9 months later. This estimate by the Secretary of the Treasury is furnished him by civil-service experts who have long-standing experience with the whole subject of forecasting economic conditions in what may well be called the remote future. These experts properly call attention to the fact that they are asked to guess what the economic status—and therefore the tax receipts—will be during the fiscal year beginning the first of the following July.

If the forecast of tax receipts made by these experts, who are at least of equal competence with the experts of the largest banks and industrial corporations of the United States, show that the departmental estimates of expenditures will exceed the estimated tax receipts, the President instructs the Director of the Budget to make every possible effort as a result of his hearings to pare the departmental estimates in order to reduce the total.

During the months of November and December and after the hearings have been held by the Director of the Budget, he presents to the President the total estimates with his recommendations.

Again the President obtains from the Treasury Department a check-up on estimated revenue during the year beginning the following 1st of July. If the new report shows a probable falling off of revenue, he makes every effort with the assistance of the Director of the Budget to make further reductions before approving the final department and agency budgets.

It should be remembered that the laws provide that the departments and agencies shall carry out certain duties. By these laws, the President and the Director of the Budget are, in effect, prohibited from eliminating Government functions or curtailing them to the point of ineffectiveness.

The result is that the President and the Director of the Budget arrive at a figure for each department and agency which they believe to be the proper amount under which the functions required by law can be carried out with reasonable efficiency.

During the final 2 weeks of the calendar year, the President obtains once more from the Treasury Department its final estimates of tax revenues during the fiscal year which begins more than 6 months later.

Since the tax revenues from practically every major source depend on business conditions during that future fiscal year the Treasury's figures of necessity are based on a prophecy of business conditions beginning 6 months later and ending 18 months later.

Business concerns are more fortunate. They also lay out programs months and even a year and a half in advance. But their programs are flexible. They are controlled currently by the condition of business, which permits the making of necessary changes from month to month and even from week to week.

The affairs of the Government are not so flexible. The Budget reports are the administration's fiscal plan; and in the form adopted by the Congress during the winter and spring, it becomes practically a fixed program of expenditure which cannot be changed for many months even though economic conditions radically change the receipt side of the ledger.

While I re-emphasize the difficulty of estimating the revenue of the Federal Government from 6 to 18 months before that revenue flows in, there is satisfaction in knowing that during the past 4 years the estimates of tax receipts thus made far in advance, have been infinitely

Digitized for FRASER

Federal Reserve Bank of St. Louis

more accurate as proven by the final result than in the preceding years. Estimates remain a prophecy; but our prophecies have been far better borne out by later events than prophecies of earlier years.

It is also worth while to call the attention of the Congress and the public to the fact that a very large proportion of our total expenditures represent fixed charges which cannot be reduced by Executive action. These charges are obligatory on the President and the Treasury, and include interest on the public debt, military and naval pensions, contributions to retirement funds and to the old age reserve account, and many grants in aid to States.

Another class of expenditures, which, though subject to some measure of administrative control, does not afford opportunity for large reductions, is made up of those which carry on the normal, everyday operations of the Government. For example, the major part of the appropriations for the State Department is required to pay the reasonable salaries of consuls, diplomatic agents, secretarial staffs, and ministers who represent American interests in every part of the world.

The third type of expenditure is represented by the major effort of the Government to help the economic security of large groups of citizens in every part of the country who, for many reasons, definitely require some form of Government assistance. This includes various kinds of aid to save farms and homes from foreclosure, to furnish work relief for needy able-bodied unemployed, and to provide old-age pensions, unemployment insurance and other assistance under the social-security program. Obligations such as these, though large in amount, can be reduced only by depriving a very large proportion of our population of benefits which modern civilization insists on.

The final category includes items of public expenditure for capital improvements—such as new highways, new river and harbor projects, new flood control, new public buildings, new reclamation projects, and other new public works. All of these items can be contracted or expanded to conform with the contraction or expansion of Government income.

This year I recommend that such items be curtailed. First, because expected Government income will be less, and second, because it has been amply demonstrated that they do not provide as much work as do other methods of taking care of the unemployed.

For example, we have appropriated as Federal aid to new permanent State highways almost $1,500,000,000 during the past 5 years; and

Digitized for FRASER

Federal Reserve Bank of St. Louis

an equal sum has been spent during the same period for constructing, repairing, and improving roads and streets by Federal agencies administering unemployment relief. These vast expenditures have put our highway systems far in advance of what would have been normal expansion. I do not propose eliminating Federal aid to highways, but I do ask that such aid be restored to approximately the pre-depression figures.

We have a great accumulation of unliquidated "matching" authorizations for aid to States running into the year 1940—but the States also should be encouraged to bring their highway budgets back to a more normal figure. Therefore I hope that the Congress will start at this session to cut down the actual appropriations used to match State funds.

For the 10 years up to June 30, 1933, the Federal Government spent an average of $40,000,000 a year for river and harbor improvements. During the past 5 years we have spent an average of over $100,000,000 a year. Meanwhile, a justified demand for greater protection against floods has developed. Flood protection is necessary and in this Budget I am curtailing the estimates for new river and harbor improvements in order to provide more money for flood emergencies.

Reclamation projects have been started which will call for future appropriations of nearly $600,000,000. It seems obvious to me and I hope it will be to the Congress, that no further projects should be authorized until projects now under construction have reached a substantial stage of completion.

During the past 5 years we have built more than 1,100 new Federal buildings—almost doubling the number of such buildings throughout the country. It is true that this saves the renting of buildings but to offset that saving we are paying in many cases far more for maintenance of these new buildings than we formerly paid for leasing private quarters. Except for meeting the problem of adequate housing for Government departments and agencies in the District of Columbia, I am strongly of the opinion that the public-building program should be restricted to the comparatively small number of projects where the capital investment will be returned through savings in annual operating costs.

Expenditures.—The most important fact of this Budget is the reduction of $539,000,000 in the estimated expenditures for the fiscal year 1939. They amount to $6,869,000,000, compared with estimated expenditures during the current fiscal year of 1938 of $7,408,000,000.

It is hoped that this fact will not be overlooked. It is fair to say that this estimated reduction may, by force of circumstances, become smaller because of future events which today cannot definitely be foretold. I refer specifically to the possibility that due to world conditions over which this Nation has no control, I may find it necessary to request additional appropriations for national defense. Furthermore, the economic situation may not improve—and if it does not, I expect the approval of Congress and the public for additional appropriations if they become necessary to save thousands of American families from dire need.

Revenues.—During the first 10 months of the calendar year 1937 business conditions improved materially and it was the consensus of opinion in Government and in business circles that the improvement would be maintained in 1938. There was every reason to expect that the revenues for the fiscal year 1939 would be greater than the expected revenues for 1938 and that with a reduction in the cost of relief, the total expenditures for 1939 would greatly decline. That was the basis for our expectation of a balanced Budget for the fiscal year 1939.

The recent recession in business has changed that outlook. Today it is necessary to revise the estimates of revenues. They will be less than we had anticipated. They will, as far as we can tell, remain below our estimated necessary expenditures.

We hope that the calendar year 1938 will bring an improvement in business conditions and, therefore, in tax receipts. The Treasury, leaning to the conservative side, predicts some improvement over the present level but does not assume in its figures that business in the calendar year 1938 will reach as high a level as in the calendar year 1937.

The present estimate of revenue for the fiscal year 1939 is $5,919,000,000 compared with the present estimate of receipts for the fiscal year 1938 of $6,320,000,000—or, in other words, a falling off of $401,000,000.

Balance.—The net result of these estimates of expenditures and receipts shows for the fiscal year 1939 a net deficit of $950,000,000, but it is fair to state at the same time that this deficit will be $138,000,000 less than the expected deficit in the current fiscal year. In other words, for the third year in succession we would continue to decrease the deficit.

It will be of interest to compare the major classes of receipts and expenditures for the fiscal years 1931 to 1939 as set forth in the following table:

Recommendations

Appropriation item veto.—An important feature of the fiscal procedure in the majority of our States is the authority given to the executive to withhold approval of individual items in an appropriation bill, and, while approving the remainder of the bill, to return such rejected items for the further consideration of the legislature. This grant of power has been considered a consistent corollary of the power of the legislature to withhold approval of items in the budget of the executive; and the system meets with general approval in the many States which have adopted it. A respectable difference of opinion exists as to whether a similar item veto power could be given to the President by legislation or whether a constitutional amendment would be necessary. I strongly recommend that the present Congress adopt whichever course it may deem to be the correct one.

Commodity Credit Corporation.—At present the funds for the operations of the Commodity Credit Corporation are provided through allocations from the Reconstruction Finance Corporation. Such losses as the Commodity Credit Corporation may sustain upon its commodity loans remain an indefinite charge against the Treasury until the liquidation of the Reconstruction Finance Corporation. In order to provide for an annual review of the operations of the Commodity Credit Corporation and of its annual net cost to the Government, I recommend the enactment by the Congress of legislation which will require an annual appraisal of the assets of the Corporation, and, as a means of providing funds to make and guarantee its loans, provide the Corporation with adequate capital and authorize the issuance by it of obligations guaranteed by the United States. Congress would be advised annually of the Corporation's net profit or loss and be in a position to make such appropriations as might be necessary to meet any annual impairment of the capital of the Corporation that would result from losses sustained upon its loans.

Review of the Fiscal Years 1937 and 1938, and the Fiscal Program for 1939

This review concerns itself with the cash actually received and paid out by the Treasury in the fiscal year 1937, with the estimates of receipts and expenditures for the fiscal year 1938, and with the fiscal program for 1939.

FISCAL YEAR 1937

Receipts.—Total general fund receipts for the fiscal year 1937 amounted to $5,293,840,237 which was $534,000,000 less than was estimated 1 year ago but a gain over 1936 of $1,178,000,000. The

receipts from income taxes were $215,000,000 less than the estimate contained in the 1938 Budget, while miscellaneous internal-revenue taxes were $94,000,000 less.

It was believed last January that taxes on carriers and their employees would produce $134,552,000, but litigation delayed collection of these taxes and only $345,088 was received in 1937. The tax on unjust enrichment produced only $5,886,836 as against Budget estimates of $82,000,000 a year ago, while the receipts from social-security taxes were $72,000,000 less than was estimated at that time. Customs and miscellaneous receipts, however, exceeded the amount anticipated a year ago by $40,000,000 and $18,000,000, respectively.

As pointed out in my message of April 20 last, the March 1937 tax returns brought to light certain defects in the present revenue law. As a result of these disclosures, committees of Congress have been considering corrective tax legislation; and I hope that there may be enacted at an early date such amendments to the revenue law as will maintain the revenue producing power of the present tax structure while correcting at the same time existing proven inequities.

Expenditures.—The total expenditures for the fiscal year ended June 30, 1937 (exclusive of expenditures from postal revenues), amounted to $8,105,158,547 as compared with an estimate of $8,480,804,493 in the Budget submitted a year ago. This latter estimate included an amount of $404,525,000 for statutory debt retirement while the actual expenditures for this purpose were $103,971,200. Thus, excluding debt retirement, the expenditures for the fiscal year 1937 were $75,092,146 less than the estimate for that year contained in the 1938 Budget. The total expenditures for recovery and relief were $3,014,589,913 as against an estimate of $3,144,689,700. Revolving funds showed a net credit of $243,569,165, which was $84,963,435 less than the previous Budget estimate of $328,532,600. Transfers to trust accounts totaled $872,386,048, while the estimates for this purpose amounted to $842,235,300. For the operation and maintenance of the regular departments and establishments of the Government, including interest on the public debt, there was expended $4,357,780,551, while the amounts estimated for these purposes totaled $4,417,887,093.

Deficit and public debt.—The gross deficit for the fiscal year 1937 amounted to $2,811,318,311. Excluding $103,971,200 for statutory debt retirement, the net deficit was $2,707,347,111. The estimated net deficit, as contained in the Budget submitted a year ago, was $2,248,128,774. The increase in the net deficit is more than accounted for by the decline in receipts.

The increase in the gross public debt during the year amounted to $2,646,070,239, bringing the total gross debt on June 30, 1937, to $36,424,613,732.

FISCAL YEAR 1938

Receipts.—The income of the Federal Government during the fiscal year 1938 is expected to increase $1,026,673,000 over that of 1937, the increase of $1,101,573,000 in internal-revenue collections being partially offset by a reduction of $74,900,000 in other classes of receipts. The total revenues from all sources (exclusive of postal revenues) will amount to $6,320,513,000. This figure, however, is less by $973,100,000 than the estimate of revenues for 1938 contained in the Budget last year.

Income taxes are expected to produce $2,692,900,000 as compared with 1937 receipts of $2,157,526,981. Miscellaneous internal-revenue taxes will amount to $2,279,511,000 as compared with actual collections in 1937 of $2,181,217,856. The re-enactment of legislation levying taxes upon carriers and their employees will produce $150,300,000 in 1938, whereas last year's receipts amounted to only $345,088. Taxes under the Social Security Act, levied on a 6-month basis in 1937, produced $252,160,840, and in 1938, on a full-year basis, will produce $571,002,000. The tax on unjust enrichment is estimated at $5,000,000, or $886,836 less than the receipts from this source in 1937. Customs duties are expected to yield $415,300,000 in 1938, whereas in 1937 they produced $486,356,599. Miscellaneous revenues are $2,411,030 less than last year, the estimate for the current year being $165,409,083; and from realization upon assets there will be derived a total of $41,090,917, or $1,432,505 less than in 1937.

Expenditures.—The total expenditures (exclusive of expenditures from postal revenues) for the fiscal year 1938 are now estimated at $7,614,858,300. Included in this amount, however, are statutory debt retirements of $206,215,700. Eliminating debt retirement and the non-recurring item of adjusted compensation payments, the 1938 expenditures are expected to be about $35,900,000 less than last year. There is a decrease of $1,185,600,000 in expenditures for recovery and relief, the agricultural adjustment program, the Civilian Conservation Corps, and refunds of taxes, and an increase of $1,149,700,000 for the following purposes: $52,500,000 for the legislative, executive, and judicial offices and the civil departments and agencies; $167,800,000 for the general public works program; $89,700,000 for national defense; $2,300,000 for veterans' pensions and benefits; $90,900,000, principally for grants to States, under the Social Security Act; $60,600,000 for interest on the public debt; $280,100,000 for payments into the old age reserve account and the railroad and Government employees' retirement funds; $200,000,000 for supplemental items; and $205,800,000 representing a reduction in revolving fund credits.

Deficit and public debt.—Excluding public-debt retirements, the net deficit for 1938 is now estimated at $1,088,129,600 as against an actual deficit in 1937 of $2,707,347,111. The gross public debt on June 30, 1938, is estimated at $37,603,646,918. This, of course, does not take into account any future changes in the debt which may occur as a result of the Treasury policy with respect to the sterilization of gold.

FISCAL PROGRAM FOR 1939

Receipts.—The estimates of revenues for the fiscal year 1939, which are necessarily based on existing tax laws, amount to $5,919,437,000. This is $401,076,000 less than the anticipated receipts for 1938. With the exception of social-security taxes and realization upon assets, each major class of revenue shows a decline below the 1938 level. Income taxes are estimated at $2,414,200,000, or $278,700,000 less than for 1938. Total miscellaneous internal revenue will be $2,190,072,000, which is $89,439,000 less than 1938. The taxes upon carriers and their employees are expected to total $116,900,000, a decline of $33,400,000 from 1938, which is due largely to the fact that the 1938 collections included 1937 accruals deferred by litigation. Social-security taxes will be $598,865,000, an increase of $27,863,000 over 1938. The tax on unjust enrichment will produce $10,000,000, as compared with $5,000,000 for 1938. Miscellaneous revenues show a total of $148,882,320, or less than the current year by $16,526,763. Realization upon assets is estimated at $50,117,680, an increase of $9,026,763 over 1938.

Expenditures.—The expenditures contemplated for the fiscal year 1939 (exclusive of those from postal revenues) total $7,070,558,000. This includes $201,515,000 for statutory debt retirement, leaving $6,869,043,000 for other purposes, which is $539,600,000 less than the amount estimated for 1938. There are net increases of $52,917,000 in the regular activities of the civil departments and agencies which are more than accounted for by increases of $62,000,000 under the Rural Electrification Administration and the United States Maritime Commission. The general public works program will require $404,026,500, or $73,957,000 less than for 1938. Expenditures for national defense are expected to be $54,847,000 greater than for 1938, reaching a total of $988,623,400 in the fiscal year 1939. On the other hand, the expenditures for veterans' pensions and benefits will decline from $573,682,800 for 1938 to $538,610,000 for 1939, because of the completion of payments of insurance claims on account of deaths occurring during the World War. Expenditures under the agricultural adjustment program will increase $143,573,000 in 1939, due principally to the legislation enacted during the last regular session of Congress providing for subsidy payments to cotton producers.

The Civilian Conservation Corps, because of a contemplated reduction in the number of camps and reduced expenditures for cooperating agencies, will require $230,000,000, or $80,000,000 less than for 1938. Expenditures for administration and grants to States under the Social Security Act will reach a total of $338,230,000, which represents an increase of $66,525,000 in grants to States and a decrease of $1,991,000 in administrative expenses. The interest payments on the public debt will amount to $976,000,000, or $49,000,000 more than for 1938.

Expenditures for recovery and relief are estimated at $1,138,304,000, or $841,356,600 less than for 1938. The operations of the Social Security Act and the unemployment-compensation laws of the States have the effect of materially reducing our program for work relief. Moreover, operations under the new Housing Act will greatly assist in providing employment. We can also look to the regular public works program to provide a certain amount of employment. With these aids and the assistance confidently expected from private industry, I hope that the foregoing amount for expenditure will be sufficient to meet the needs for 1939. An estimate of appropriation of $1,000,000,000 for this purpose is contained in the 1939 Budget.

Expenditures from revolving funds are expected to amount to $141,961,000, which represents, because of an excess of receipts of $37,778,200 in 1938, an increase in total expenditures of $179,739,200. For the old age reserve account the estimate is $475,000,000, an increase of $90,000,000 over 1938. For the railroad retirement account $117,250,000 will be required, $20,286,000 less than for 1938. An accumulation of payments due in 1937 had to be met in 1938, whereas there will be no accumulation to be carried over into 1939. The amount for supplemental items is $75,000,000, which is $125,000,000 less than the amount now indicated for 1938.

Deficit and public debt.—The net deficit for the fiscal year 1939 is $949,606,000, or $138,523,600 less than the deficit for the current year. The gross public debt on June 30, 1939, is estimated at $38,528,252,918. This does not take into account any changes in the debt which may occur as a result of the Treasury policy with respect to the sterilization of gold.

It should be pointed out, however, that the increase in the debt by reason of the deficit does not mean that the Treasury will borrow that additional sum on the market. There will be available during the fiscal year for investment in special issues of Government obligations, the net sum of approximately $1,163,000,000, which represents investments of $600,000,000 from the old age reserve account and the railroad and Government employees' retirement funds and $573,000,000 from the unemployment trust fund, and a reduction of $10,000,000 in investments held for account of the adjusted service certificate fund. As a result of these investment operations the

Treasury financing for the fiscal year 1939 would be confined to refunding maturing obligations.

The following table shows the gross public debt at the end of the fiscal years 1936 and 1937 and the estimated gross debt at the end of the fiscal years 1938 and 1939:

Appropriations.—The appropriations and reappropriations recommended in this Budget, including those for the Postal Service, the District of Columbia, and probable supplemental items, total $7,973,843,219. The appropriations and reappropriations already made and prospective supplemental items for the fiscal year 1938 for the same purposes total $8,629,921,393. This is a decrease of $656,078,174.

ANALYSIS OF REVENUE ESTIMATES

The estimates of the revenues of the Federal Government for the current fiscal year and for the fiscal year 1939 are based on the existing tax structure.

Legislative Enactments Affecting Revenue Estimates

Numerous legislative enactments, the results of which were reflected only partially in 1937 collections, exert an upward influence on the estimates for the fiscal years 1938 and 1939. Thus the Revenue Act of 1936, by raising rates, extending the scope of taxable income, and introducing the undistributed-profits tax, made very definitely for larger individual and corporate income-tax collections. Being first applicable to incomes of the calendar year 1936, it affected the fiscal year 1937 collections only from January through June, whereas the entire income-tax collections for fiscal years 1938 and 1939 will be affected by these provisions. Similarly the estate-tax provisions of the Revenue Act of 1935, by raising the rate scale, lowering the exemption, extending the period for filing returns, and permitting the choice as to whether the estate should be valued at time of death or a year later, were only partially reflected in the estate-tax collections throughout the fiscal year 1937 (when a substantial minority of the estate-tax returns were filed under the 1934 act). In making both the 1938 and 1939 estimates, however, the full year effects of these provisions have been appraised and considered.

Obviously the Social Security Act and the Carriers Taxing Act of 1937 provide for major additions to the revenues, only partially reflected in the fiscal year 1937 collections. Other new revenues of smaller amount are provided by the Sugar Act of 1937, which imposes an excise tax on sugar manufacture and a compensating duty on imports of refined sugar, and by the Bituminous Coal Act of 1937, which imposes a regulatory tax on the sale or other disposal of bituminous coal domestically produced. Furthermore, the preventive tax evasion and avoidance provisions of the Revenue Act of 1937 will tend to prevent revenue losses which might otherwise occur. The anticipated results of such legislative enactments exert an effect upon the estimates for the fiscal years 1938 and 1939.

Total Revenues and Receipts

Total revenues and receipts, general and special accounts, are estimated (on daily Treasury statement basis, unrevised) in the amounts of $6,321,000,000 for the fiscal year 1938, and $5,919,000,000 for the fiscal year 1939. These amounts represent an increase of $1,027,000,000 and $625,000,000, respectively, over the $5,294,000,000 actual receipts for the fiscal year 1937.

The subjoined table depicts the percentage distribution of the major sources of revenue, both for the estimated receipts for the fiscal years 1938 and 1939 and for the actual receipts for the fiscal years 1935, 1936, and 1937. The most significant feature of this tabulation is the reflection of the fact that the income tax is again becoming the most important source of Federal revenue. Whereas during the whole period between 1918 and 1932 approximately one-third of the Federal revenue receipts was derived from customs and miscellaneous internal-revenue taxes and slightly over one-half from income taxes, the income tax in the fiscal year 1935, reflecting the incomes of 1933 and 1934, produced only 29.1 percent of the total of revenues and receipts of that year. Percentages for 1935 and subsequent years are shown in the table below. It is estimated that the income tax will produce approximately two-fifths of the revenue receipts for the fiscal years 1938 and 1939.

FISCAL YEAR 1938

As shown in the foregoing Statement No. 1, present estimates place receipts to general and special accounts for the fiscal year 1938 at $6,321,000,000, or $1,027,000,000 higher than the receipts of the fiscal year 1937. The rise from the 1937 level may be ascribed primarily to two sources—the income and the social-security (including carrier) taxes. Numerous other sources of receipts are expected to yield larger collections in 1938 than in 1937, but the increases do not approach in magnitude the $535,000,000 estimated gain from income taxes, nor the $456,000,000 increase from social-security taxes, including those levied upon carriers and their employees. Moreover, against the numerous smaller increases are to be set anticipated decreases of small amount in the tobacco and stamp taxes and in miscellaneous receipts, as well as a substantial decrease in the customs. The sources of these revenues may be broadly summarized as follows:

[In millions of dollars]

	Actual, 1937	Estimated, 1938
Income taxes	2,157.5	2,692.9
Miscellaneous and other internal revenue	2,439.6	3,005.8
Customs	486.4	415.3
Miscellaneous revenues and receipts	210.3	206.5
Total	5,293.8	6,320.5

Income taxes.—Under this head are the receipts from individual and corporation income taxes, both on current and on back account, and the much smaller receipts from the excess-profits tax on corporations. Individual income taxes, which yielded $996,000,000 on current account in the fiscal year 1937, will, according to present estimates, yield not far from a quarter billion more, or $1,233,000,000, in the current fiscal year. The basic causes making for

expansion include a higher level of individual incomes in the calendar years 1936 and 1937, a full year of collections reflecting not only application of the normal tax to dividend income, but also the higher surtax rates made effective by the Revenue Act of 1936, and the preventive measures set up by the Revenue Act of 1937 against tax avoidance and evasion.

Corporation income tax collections on current account are expected to run somewhat lower than collections from individuals in the fiscal year 1938, as they did in 1937. Their augmentation to $1,184,000,000, from the 1937 level of $894,000,000 is predicated on the higher aggregate corporate profits of 1936 and 1937, upon which these estimated receipts depend, as compared with those of 1935 and 1936; also on the alterations in the rate scale under the Revenue Act of 1936, the partial inclusion of dividend receipts in income subject to tax, and the imposition of surtaxes on undistributed profits—influences that did not affect the fiscal year 1937 collections until the second half year.

Collections of back income taxes are expected to decline moderately in the present fiscal year to $250,000,000 as against the 1937 volume of $258,000,000. A slight rise in the relatively small receipts from the excess-profits tax is estimated for the fiscal year 1938 as a result of the improvement in corporate profits in the calendar years 1936 and 1937, already referred to.

Social-security (including carrier) taxes.—The comparatively recent enactment of this group of new taxes largely accounts for the sharp rise in 1938 of estimated receipts therefrom. As stated in an earlier section of this report, the 1937 fiscal-year collections from taxes levied under the Social Security Act are representative of hardly more than 4 full months' receipts. In the case of title VIII, even the 1938 receipts—though covering a much larger fraction of a year than the 1937—will not be representative of a full year, because of the technical circumstance that after the December 1937 liabilities are settled, payments will be due only quarterly, with the due date for the second quarter of 1938 falling in July. Hence collections emanating from all of the liabilities of April and a small portion of those of May 1938, which would have entered fiscal-year 1938 receipts, were payments on a monthly basis continued, will be received in the fiscal year 1939. The present conclusion is that the title VIII collections of $207,000,000 in the fiscal year 1937 will be succeeded by collections of $491,000,000 in the fiscal year 1938.

The title IX estimate for the fiscal year 1938 collections covers a full 12 months' liability, as compared with the part-year liability covered in the fiscal year 1937 receipts. Furthermore, the tax rate under this title advances from 1 percent on 1936 pay rolls to 2 percent on those of 1937, with a continuation of the tax credit of up to 90 percent for amounts paid as similar taxes to States whose unemployment insurance laws had been approved by the Social Security Board. All States and Territories have now passed approved laws, which under certain conditions will entitle their taxpayers to this tax credit. However, the title IX collections during the fiscal year 1937, and to a much less extent during the fiscal year 1938, in respect of calendar year 1936 liabilities, were swollen by the nonrecurring collection of taxes at the full 1 percent on pay rolls from the 13 States and 2 Territories whose unemployment insurance laws had not been passed in time to qualify their taxpayers for the tax credit. Receipts under title IX, amounting to $58,000,000 in the fiscal year 1937, are estimated at $81,000,000 for the fiscal year 1938.

Collections under the Carriers Taxing Act, approved June 29, 1937, are expected to display a very great increase over collections under the disputed prior act. This rise is augmented in the fiscal year 1938 by the fact that liabilities accrued for the first 9 months of 1937 did not become due until November 30. Hence the estimate of receipts from this source for the fiscal year 1938 covers, in effect, the liabilities of 5 quarters. Whereas receipts in the fiscal year 1937 under the former act amounted to but $287,000, estimated receipts for the fiscal year 1938 amount to $150,000,000.

Capital stock tax.—Receipts from the capital stock tax, according to the present estimate, will advance slightly to $142,000,000 in the fiscal year 1938, from actual collections of $137,000,000 in the fiscal year 1937. One factor in this advance is the presumable increase, associated with larger business profits, in adjusted declared value of the capital stock of corporations from December 31, 1935, to December 31, 1936, since fiscal year 1938 collections depend chiefly on adjusted declared value at the end of the calendar year 1936.

Estate and gift taxes.—From the standpoint of revenues, the estate tax is much the more important of these two levies. In the fiscal year 1937, when a majority of the estate-tax returns was filed under the Revenue Act of 1935, with its higher rates and lower exemption as compared with the Revenue Act of 1934 and prior acts, collections from the tax reached the record total of $282,000,000. For the fiscal year 1938, when practically all returns will be filed under the 1935 act, still larger collections, of $303,000,000, appear to be in prospect, even after allowance is made for a probable decrease in number of returns as executors take advantage of the extension of the filing period and the option of valuing estates at death or a year later.

Collections from the gift tax have never attained much relative importance except in the fiscal year 1936. The $160,000,000 collected in that year on the tremendous volume of gifts made principally after the effective date of the higher estate-tax rates contained in the Revenue Act of 1935 but prior to the effective date of rate increases on gifts was followed by collections of but $24,000,000 in the fiscal year 1937. For the fiscal year 1938 an estimate of $25,000,000 is made, on the assumption that the volume of gifts in the calendar year 1937 will approximate that in the calendar year 1936 but will in part be subject to the rise in applicable rates as additional gifts are made.

Liquor taxes.—Receipts from this source in the fiscal year 1938 are expected to aggregate $614,000,000 as against actual collections of $594,000,000 in 1937. Of the two large revenue-producing taxes in the group, that on beer is expected to rise more in 1938 than that on domestic distilled spirits. A slight increase is estimated for most of the small liquor taxes, although a decline in collections from imported distilled spirits, as domestic whisky becomes sufficiently aged, is indicated for the current fiscal year.

Tobacco taxes.—Tobacco is one of the few tax groups expected to yield less revenue in the fiscal year 1938 than in 1937, so that the estimate shows a slight downturn to $545,000,000 in 1938 from the record receipts of $552,000,000 during the past fiscal year. The decline is expected to affect not only the major product—cigarettes—but also the lesser products in the group, with the exception of snuff, consumption of which shows little variation.

Stamp taxes.—While actual collections in 1937 for this group of small taxes approximated, in the aggregate, $70,000,000, the estimate for 1938 approximates only $66,000,000.

Manufacturers' excises.—Estimated receipts of $458,000,000 for the fiscal year 1938 will, if realized, constitute

the maximum collections of record for excise taxes of this type. The comparable record, however, does not extend back farther than the fiscal year 1933—the first year in which the increased number of excises imposed by the Revenue Act of 1932 was fully reflected in the revenues. In 1937, actual collections totaled $451,000,000.

Not all the separate excises are expected to contribute to the gain of collections in 1938. On the contrary, a larger yield principally from gasoline and from electrical energy is expected to offset more numerous declines, most notable in passenger automobiles and parts and in toilet preparations. These conflicting changes reflect the dissimilar impact of cyclical changes in business on various products.

Miscellaneous taxes.—The sharp increase displayed by this group in the aggregate, from actual collections of $79,000,000 in the fiscal year 1937 to estimated collections of $127,000,000 in the fiscal year 1938, results from the inclusion in the latter year of receipts from two new taxes in connection with which no liabilities were due or paid in the fiscal year 1937. The more important of these new taxes in point of size is that on sugar, which is estimated to yield $44,000,000 in 1938. The second new source, the bituminous-coal tax, is of minor importance in revenue yield, yet serves to outweigh the decline of revenues from a few of the other miscellaneous taxes.

Changes in estimated collections from principal sources of miscellaneous internal revenue in the fiscal year 1938, as compared with actual collections of the fiscal year 1937, are summarized in the following table:

Collections from principal sources of miscellaneous internal revenue

[In millions of dollars]

Total miscellaneous internal revenue	2,188.7	2,279.5	+90.8

Customs.—After 4 consecutive years of recovery in customs receipts, extending from a low of $251,000,000 in the fiscal year 1933 to a high of $486,000,000 in 1937, receipts from this source appear likely to decrease rather markedly in the fiscal year 1938 to $415,000,000. Decline of receipts in 1938, because of reduced imports, is estimated for most of the important commodities which produce customs revenues, including agricultural products, vegetable oils, whisky, wool, cotton manufactures, metals, and sundries. Among the diverse influences making for reduction of such imports are a larger domestic crop output in 1937 than in the drought year 1936, the partial displacement of imported whiskies by the aged domestic product, and smaller markets for cotton textiles and wool.

Miscellaneous revenues and receipts.—Unimportant changes appear likely to take place in collections from these sources in the fiscal year 1938. A small decline is, however, indicated from total collections of $210,000,000 in 1937 to an estimated figure of $207,000,000 in 1938.

When the Budget for the fiscal year 1938 was presented to Congress last January, estimates were made on the basis of then existing laws. Since that date, however, considerable changes have been made in the tax structure, and an additional year of business is now a matter of history rather than a forecast. The following table shows the original and the present estimates of receipts for the fiscal year 1938:

FISCAL YEAR 1939

For the fiscal year 1939, a slight decline in receipts to general and special accounts is anticipated, from the exceptional total of $6,321,000,000 estimated for 1938 to $5,919,000,000. The latter estimate, however, points to a volume still markedly above the 1937 figure of $5,294,000,000.

For 1939, as for 1938, the net expansion over the 1937 level is attributable, in the main, to social security and income taxes. Smaller gains from 1937 are indicated for the capital-stock, estate, and gift taxes, as well as for the group of miscellaneous taxes as a whole, but are more than outweighed by declines in numerous other sources, which suffice even to reduce to some extent the gain recorded by the social security (including carrier) and the income tax estimates. Moreover, though a net expansion over 1937 is anticipated, receipts from most sources, including the two important groups of taxes last mentioned, are expected to be lower in the fiscal year 1939 than in the fiscal year 1938.

Income taxes.—The yield on current account from individual income taxes will, according to present estimates, decline in the fiscal year 1939 to $1,145,000,000 from $1,233,000,000 in the current fiscal year. A sustaining influence, affecting the fiscal year 1938 receipts in the second half year only but the fiscal year 1939 receipts throughout the entire year, is the stoppage by the Revenue Act of 1937 of loopholes utilized by individuals to reduce or avoid tax payment.

The estimate of corporation income-tax collections on current account for the fiscal year 1939 drops to $1,006,000,000 or $178,000,000 below that for 1938. Further retardation of collections on back account, both from corporations and from individuals, appears likely to reduce the back-tax collections from $250,000,000 in 1938 to $240,000,000 in 1939. The revenue derived from the excess-profits tax is also expected to recede.

Social security (including carrier) taxes.—It has been explained above that, due to a shift from a monthly to a quarterly basis of payment, receipts under title VIII of the Social Security Act will cover in the fiscal year 1938 less than a 12-month liability, as contrasted to collections in 1939 for a full 12-month liability. The effect of this shift is the main factor accounting for an estimated increase in receipts under this title from $491,000,000 in 1938 to $500,000,000 in 1939. The estimated collections under title IX likewise increase, from $81,000,000 in the

fiscal year 1938 to $99,000,000 in the fiscal year 1939; but here the controlling factor is the advance in the rate of tax from 2 percent on pay rolls for the calendar year 1937 to 3 percent on those for the following year.

Receipts from taxes on carriers and their employees, the third in the group of social security levies, decline very sharply according to present estimates between the fiscal years 1938 and 1939, from $150,000,000 to $117,000,000. This reduction reflects, in part, the inclusion of the liabilities of only 4 quarters in the 1939 estimates, whereas the 1938 estimate comprises, as explained above in the discussion relative thereto, the liabilities of 5 quarters.

Capital stock tax.—The estimated increase of receipts under this tax, from $142,000,000 in the fiscal year 1938 to $146,000,000 in the fiscal year 1939, is a result of the increased adjusted declared valuation of the capital stock reflecting the increase in its book value. Thus, the fiscal year 1939 collections for a majority of corporations are based on the adjusted declared value of the capital stock on December 31, 1937.

Estate and gift taxes.—Estate tax collections in the fiscal year 1939 are estimated at $289,000,000, a figure intermediate between the actual collections of $282,000,000 in the fiscal year 1937 and the estimated receipts of $303,000,000 in the fiscal year 1938. Though it is possible that more returns will be filed than during the current fiscal year, in which declining property values offer a reason for deferment of filing, the increase in number of returns is likely to be more than offset by the lower valuation of estates for which they are filed. Yet while thus decreasing moderately from the estimate for 1938, the yield of the tax will probably hold above the 1937 level, since an important minority of the returns in that year were filed under the lower rate-scale and higher exemption of the Revenue Act of 1934.

The much less important gift tax may produce, in the fiscal year 1939, somewhat more revenue than in the fiscal year 1938, even if a relatively constant volume of transfers is assumed, because of the higher rates that apply to new gifts made by former donors. The present estimates set receipts from this source in 1939 at $27,000,000, as against $25,000,000 in 1938.

Liquor taxes.—The revenue from liquor taxes now forecast at $565,000,000 compares with estimated receipts of $614,000,000 for the fiscal year 1938. The same products that account for the bulk of the revenue from this source—beer and domestic distilled spirits—will account for the bulk of the decline, though the shrinkage of receipts is expected to be considerably less important for beer than for distilled spirits.

Tobacco taxes.—Continuance into the fiscal year 1939 of the 1938 downturn of receipts from tobacco taxes is indicated by the estimate of $529,000,000 in 1939 as compared with the estimate of $545,000,000 for 1938.

Stamp taxes.—Collections from this minor revenue source are expected to recede by less than half a million dollars in the fiscal year 1939 to roundly $65,000,000. While stamp taxes upon stock transfers may produce a somewhat larger amount than in the fiscal year 1938 the slight gain appears likely to be outweighed by decline in amounts from the various other transactions and products for which such collections are separately reported.

Manufacturers' excises.—A prospective decrease in receipts from all individual excises except that on electrical energy reduces estimated aggregate receipts from this group of levies to $423,000,000 in the fiscal year 1939 from the figure of $458,000,000 estimated for the fiscal year 1938.

Miscellaneous taxes.—Although decreases among miscellaneous tax receipts are more numerous than increases, according to the estimates, the aggregate for the group as a whole is expected to advance in the fiscal year 1939 to $145,000,000 from an estimated $127,000,000 in the fiscal year 1938. The rise is predominantly a result of anticipated expansion in collections under the new tax upon sugar, which will in 1939 cover a full 12 months for the first time.

The principal changes in the estimated miscellaneous internal-revenue receipts in the fiscal year 1939, as compared with the estimates for the fiscal year 1938, are summarized in the following table:

Collections from principal sources of miscellaneous internal revenue

[In millions of dollars]

Source	Collection basis		Increase (+) decrease (−) 1939 compared with 1938
	Estimated, 1938	Estimated, 1939	
Capital-stock tax	141.5	145.7	+4.2
Estate tax	303.2	289.4	−13.8
Gift tax	25.2	26.8	+1.6
Alcoholic-beverage taxes	613.8	564.8	−49.0
Tobacco manufactures	545.1	529.4	−15.7
Documentary stamp taxes	65.9	65.4	−0.5
Manufacturers' excise taxes	458.1	423.2	−34.9
Sundry taxes	126.7	145.4	+18.7
Total miscellaneous internal revenue	2,279.5	2,190.1	−89.4

Customs.—Estimated customs receipts of $390,000,000 in the fiscal year 1939 reduce such receipts to practically the 1936 level. Reasons suggesting a decrease in imports of commodities subject to customs duties have been enumerated above. For 1939, reduction in such imports may not be of such general character as during the fiscal year 1938; but it is anticipated that small gains in receipts on some articles will be counteracted by a further decrease in receipts from agricultural products and whisky, and a downturn in receipts from sugar.

Miscellaneous revenues and receipts.—For the fiscal year 1939 a further small decline in aggregate collections from miscellaneous sources is presaged, the estimates placing the total at $199,000,000 as compared with $207,000,000 in 1938.

ANALYSIS OF APPROPRIATION ESTIMATES

The foregoing Statement No. 2 presents in three parallel columns the appropriation estimates for the fiscal year 1939 and the actual appropriations for 1938 and 1937. Adjacent to these columns are three additional columns showing the estimated expenditures for 1939 and 1938 and the actual expenditures for 1937. To avoid confusion in comparing the figures in these six columns the basis upon which the figures are presented should be explained.

With respect to the first-mentioned three columns of figures, the 1937 and 1938 columns carry the appropriations which have already been made by Congress for the various departments, bureaus, establishments, and agencies of the Government for these fiscal years, and the purposes for which the appropriations were made. The 1939 column presents the amounts for these organization units which the President has recommended to the Congress for appropriation for the fiscal year 1939.

The practice of reappropriating unexpended balances of annual appropriations for the same or other purposes in succeeding fiscal years has grown to such an extent that an accurate picture of the amounts available to the various departments and agencies cannot be shown unless reappropriations are taken into consideration. Accordingly, the appropriation amounts in Statement No. 2 include the amounts added, but exclude the amounts deducted, by such reappropriations.

The appropriations, it will be observed, are of two general types—annual and permanent. The annual appropriations, ordinarily found in the departmental supply bills, are voted each year by the Congress. They are usually definite and specific as to amounts. They may be obligated only during the year to which they relate, but remain available for payment of unliquidated obligations for 2 years thereafter before any unused balance is covered into the so-called surplus fund of the Treasury. The permanent appropriations are automatically renewed each year over a period of time by virtue of permanent legislation, without annual action by the Congress. Such appropriations may be either specific or indefinite as to amounts. An example of the latter is the indefinite appropriation to cover the interest on the national debt. This type of appropriation, while sometimes difficult to ascertain as to amount, does not preclude an estimated figure for use in the Budget. The number of permanent appropriations was greatly reduced, effective July 1, 1935, by the Permanent Appropriation Repeal Act of June 26, 1934. The Congress makes some appropriations available until expended, or until the object for which they are made is accomplished. These appropriations are without a definite time limit, and may, therefore, be called "no-year" appropriations. They are generally for the construction of public-works projects.

Turning to the three columns under the caption "Expenditures," the column for 1937 shows the actual expenditure figures for that fiscal year. These figures, usually on a checks-issued basis, are adjusted at appropriate totals to the cash (checks-paid) basis, as shown on the daily Treasury statement. The totals, therefore, are on an actual cash basis. The columns for 1938 and 1939 show the estimated expenditures for these fiscal years on a cash basis. The fact that these columns show expenditures which are larger than the appropriations made for the same years is due to the carry-over of prior obligations for payment in 1938 and 1939. The figures in these three columns are those carried in totals to the General Budget Summary and supporting schedules. Hence the Budget is, in effect, on a cash basis with respect to expenditures, as well as with respect to receipts.

The italicized items appearing in the statement represent emergency appropriations and expenditures. The totals of these various items are summarized and presented in the General Budget Summary under the expenditure group called "Recovery and relief." This group is carried in detail in Supporting Schedules Nos. 2 and 2–A.

LEGISLATIVE ESTABLISHMENT

The appropriation estimates for 1939 show a net decrease of $2,740,097.78 below the appropriations for 1938.

Senate

The estimates of the United States Senate show a decrease of $31,168.78 principally on account of nonrecurring items.

House of Representatives

There is a net reduction of $67,714 in the estimates of the House of Representatives. The principal items of decrease include $20,279 for salaries in the office of the doorkeeper; $26,200 on account of contingent expenses, and $30,000 for nonrecurring items, which decreases are offset, in part, by miscellaneous increases totaling $8,765.

Joint Committee on Tax Evasion and Avoidance

The appropriation of $50,000 for 1938 for the Joint Committee on Tax Evasion and Avoidance is nonrecurring in the fiscal year 1939.

Office of Legislative Counsel

The estimate of the office of Legislative Counsel shows an increase of $5,000 for salaries and expenses of maintenance.

Architect of the Capitol

The estimates submitted for the Architect of the Capitol for 1939 show a net decrease of $2,997,448. The principal items of decrease are $2,800,000 for the completion, during the current fiscal year, of the Library of Congress Annex, $387,890 for the Capitol power plant, $32,160 for maintenance of the Senate Office Building, and miscellaneous items totaling $850. The increases include $47,969 for improving the Capitol grounds, $75,670 for maintenance of the House Office Buildings, $89,046 for salaries and other expenditures for the Library buildings and grounds, and miscellaneous items totaling $10,767.

Botanic Garden

There is an increase of $24,725 in the estimate for the maintenance of the Botanic Garden.

Library of Congress

The net increase in the estimates for the Library of Congress amounts to $453,008, of which $170,540 is for salaries, $12,820 for distribution of card indexes, $43,000 for increase of the Library, $76,500 for printing and binding, $149,008 for the care and maintenance of the Library buildings, and $7,840 for miscellaneous items. These increases are offset to the extent of $6,700 by a decrease on account of the index to State legislation.

Federal Reserve Bank of St. Louis

There is an increase of $8,500 in the permanent appropriations for the Library of Congress, and a decrease of $68,000 in the estimates for trust accounts under the Library of Congress.

INDEPENDENT OFFICES AND ESTABLISHMENTS

Executive Office

The estimates for 1939 for the Executive Office show a decrease of $61,568 below the appropriations for the current fiscal year, due to the elimination of nonrecurring items for improvements to the Executive Mansion and grounds.

American Battle Monuments Commission

The amount required for the Commission for 1939 is estimated at $185,000 less than the total made available for 1938. The reduction consists of $10,000 for maintenance and other operating costs and $175,000 due to the expiration of the appropriation for dedication of chapels and memorials in Europe.

Board of Tax Appeals

The estimate for the Board for 1939 provides a net decrease of $3,000 below the appropriation for the fiscal year 1938. The decrease is due to a reduction in the amount required for printing.

Central Statistical Board

The estimates for the fiscal year 1939 provide an increase of $89,000, to place the Board on the same base as for 1937.

Civilian Conservation Corps

The estimate for 1939 for the corps is $123,669,000 less than the amount provided for the fiscal year 1938. It should be noted, however, that approximately $25,000,000 of the 1938 amount is expected to be saved, and that no provision is made in the 1939 estimate for clothing, an item which was carried at $31,142,000 in the 1938 appropriation. This item has been eliminated for 1939 because of provision being made during the current fiscal year to provide clothing necessary to carry the corps during the fiscal year 1939 and into the opening months of 1940. The remaining reduction is due to the decrease in the number of camps and in the expenditures for the cooperating agencies.

Civil Service Commission

The estimates for 1939 provide for an increase of $2,002,000. For administrative expenses, $2,585,000 will be required for 1939, representing a net increase of $150,000 over the appropriation for 1938, arrived at as follows: An increase of $242,500 for salaries and expenses and $7,500 for printing, offset by a decrease of $100,000 on account of nonrecurring items provided in 1938. It is expected that these increases will enable the Commission to keep its work current and provide for more up-to-date registers. The remaining increase of $1,852,000 on account of the civil service retirement fund is based upon the needs of this fund as determined by the Board of Actuaries.

District of Columbia Alley Dwelling Authority

The Authority contemplates continuation of the program for elimination of alley dwellings in the District of Columbia as provided in the District of Columbia Alley Dwelling Act of June 12, 1934. To carry out this program, the Authority will use the unexpended balances of the "Conversion of inhabited alleys fund," receipts derived from sales, leases and other sources as authorized in section 3 (b) of that act, and such allocations as may be provided under section 28 of the United States Housing Act of 1937.

Employees' Compensation Commission

The estimates for the Commission for 1939 show an increase of $149,050 over the appropriation for 1938. There will be increased administrative costs of $23,550 to provide for additional work due to the continuous increase in accidents, and $500 for the biennial printing of the "Schedule of Designated Medical Facilities." In addition, an increase of $125,000 is required for the employees' compensation fund to meet cumulative increases in benefits payable for death and permanent disability cases.

Farm Credit Administration

The estimate of $3,750,000 for the Farm Credit Administration for salaries and expenses for the fiscal year 1939 is the net amount to be appropriated and is $250,000 less than the amount appropriated for 1938. The gross amount, including reimbursements, that will be available for 1939 is $8,574,921 in comparison with $9,962,376 in 1938. The decrease in the total requirements for 1939, amounting to $1,387,455, is due primarily to the fact that funds available for 1938 included administrative expenses incidental to the making of loans to farmers for crop production and harvesting. No authority exists for making loans of this character during the fiscal year 1939 and administrative expenses will be decreased accordingly. It is estimated that $32,880 will be expended in 1939 for the supervision of Federal credit unions from fees collected from such unions under the provisions of the act of June 24, 1934. The corresponding figure for 1938 was $37,505.

Federal Communications Commission

The estimate of $1,752,820 for the Federal Communications Commission for the fiscal year 1939 represents a net decrease of $9,180 below the total appropriations for 1938. There is an increase of $37,000 in the appropriation for salaries and expenses, and of $7,820 in the appropriation for the special study of radio requirements for vessels operated on the Great Lakes and inland waters of the United States, but these increases are more than offset by the elimination of a nonrecurring 1938 item of $54,000 for monitoring equipment.

Federal Power Commission

The estimates for 1939 for the Commission show an increase of $34,500 over the appropriation for 1938. The administration of the Federal Water Power Act of 1935, approved August 26, 1935, is estimated to require an increase of $50,000 for general purposes, which amount is offset in part by decreases of $500 in the item for payments to States from a special-receipts fund authorized by the Federal Water Power Act and $15,000 in the amount for printing and binding.

Federal Trade Commission

The estimates for the Commission for 1939 show an increase of $199,700 over the appropriation for 1938. The increase provides an additional $130,315 for unlawful trade practices work, $13,415 for work in connection

with voluntary trade practice agreements, $40,270 for increased administrative duties of the Commission, and $15,700 for printing and binding, including the printing of a report to Congress on the farm implement survey. An item of $150,000 has been recommended for special investigations, replacing a like amount provided in 1938 for the farm-implement study.

Foreign Service Pay Adjustment

The estimate of 1939 for payments to officers and employees of the United States due to appreciation of foreign currencies shows a decrease of $245,342. This decrease is due to the decline in exchange value of certain foreign currencies.

General Accounting Office

The estimate of $5,306,540 is the same as the amount appropriated for the fiscal year 1938.

Great Lakes Exposition Commission

No estimate is submitted for 1939, since the appropriation of $75,000 for 1938 will enable the Commission to complete its work.

Interstate Commerce Commission

The estimates of appropriations for 1939 for the Interstate Commerce Commission show an increase of $1,036,500 over the appropriations for 1938. The increases are $58,500 for signal safety systems due to the broadening by the act of August 26, 1937, of the provisions of section 26 of the Transportation Act of 1920, and $1,050,000 for expansion of work in connection with the enforcement of the Motor Carrier Act, and the decreases are $12,000 for regulating accounts, and $60,000 for the valuation of the property of carriers.

National Advisory Committee for Aeronautics

The estimates for 1939 show an increase of $219,150. This increase provides $138,000 for additional personnel and supplies required for operating new facilities, $50,000 for an airplane for research purposes, $20,000 for studies in aircraft materials, and $11,150 for other operating expenses. An estimate for new construction in the amount of $200,000 is included under "General Public Works."

The National Archives

The estimates for 1939 show a net increase of $72,000 over the amount appropriated for 1938. There is an increase of $75,000 for employment of additional personnel and for other expenses incident to the operation of additional stack space, the use of which will be necessary during the fiscal year 1939, and there is a decrease of $3,000, due to a reduction in the amount required for printing and binding.

National Capital Park and Planning Commission

The estimate for 1939 for the Commission is $268,700 less than the amount appropriated for 1938. The appropriation is incident to the needs of the Commission in its work in developing a well-rounded park, parkway, and playground system in the District of Columbia.

National Labor Relations Board

The estimates for 1939 show an increase of $465,000. The increase will enable the Board to provide for an increased staff and for other expenses necessary to an expeditious handling of the increased number of cases filed with the Board.

National Mediation Board

The estimate of $377,400 for the Board for 1939 is $8,365 less than the appropriation for 1938. There are decreases of $12,900 for referee fees, $3,465 in miscellaneous expenses for the National Railroad Adjustment Board, and $200 for printing and binding for the National Mediation Board; and increases of $3,200 for one digest clerk for the National Railroad Adjustment Board and $5,000 for printing of index of awards in disputes involving various classes of railroad employees.

Provision has been included for continuing during the fiscal year 1939 the unexpended balances of prior year appropriations for "Salaries and expenses, arbitration boards" and "Emergency boards."

Pan American Exposition

Public Resolution No. 72, approved August 26, 1937 (50 Stat. 831–834), authorized an appropriation of $100,000 for participation by the United States in the Pan American Exposition to be held in Tampa, Fla., in the year 1939 in commemoration of the four-hundredth anniversary of the landing of Hernando de Soto at Tampa Bay. This amount is provided for in the estimate.

Railroad Retirement Board

The estimates for payment of annuities in 1939 show an apparent increase of $18,260,000 over 1938, whereas the actual availability is $23,845,077 less, due to the reappropriation for 1938 of 1937 funds in the amount of $42,105,077.

Rural Electrification Administration

The estimates for 1939 show an increase of $200,000 over the appropriations for the fiscal year 1938, to provide for additional supervisory activities incident to an increase in the number of projects.

Securities and Exchange Commission

The estimates for 1939 provide an increase of $12,000, to permit the printing of a report to Congress of the Commission's findings in connection with its study of investment trusts and investment companies.

Smithsonian Institution

The estimates for 1939 show a net decrease of $2,500, which is occasioned by increases of $7,950, and by a decrease of $10,450 on account of a nonrecurring item for 1938.

The estimates of appropriations for "salaries and expenses," "international exchanges," "American ethnology," "Astrophysical Observatory," "maintenance and operation, National Museum," and "national collection of fine arts," have been consolidated in one estimate of appropriation for the fiscal year 1939, in order to facilitate administrative operations.

Social Security Board

The estimates for the Board for the fiscal year 1939 show an increase of $71,159,322 over the availability for 1938. The Appropriation Act for the fiscal year 1938 provided for direct appropriations of $226,100,000 and in addition made available $32,640,678 from the unexpended balances of the 1937 appropriations. For grants, the net increase is $71,559,322, as follows: Old-age assistance, $83,000,000 and grants to States for unemployment compensation administration, $1,159,322, which are offset in part by decreases of $9,600,000 for grants for aid to dependent children and $2,000,000 for grants for aid to the blind. For general administrative expenses, the estimate for 1939 is $22,000,000, or $300,000 less than the amount available for 1938. For printing and binding the amount provided is $100,000 less than for 1938.

Tariff Commission

The estimates for 1939 show a decrease of $7,000 for general administrative expenses, and $5,000 for printing.

Tennessse Valley Authority

An Annexed Budget has been set up for the Tennessee Valley Authority as in 1938, with the appropriation requirements as they affect the general revenues of the Treasury brought into Statement No. 2. The net expenditures are carried to the General Budget Summary and supporting schedules. The estimate for the fiscal year 1939 is in the amount of $40,000,000 or $166,270 less than the 1938 appropriation. Provision is made, however, as in 1938, for incurring contractual obligations in an amount not to exceed $4,000,000. The details of this estimate will be found under the caption "General Public Works Program."

Thomas Jefferson Memorial Commission

This Commission, created by Public Resolution No. 49, Seventy-third Congress, approved June 26, 1934, is authorized to consider and formulate plans for the construction of a permanent memorial to the memory of Thomas Jefferson in the city of Washington. For the fiscal year 1938, $20,000 was appropriated to meet expenses of the Commission in carrying out its duties as described in the above-mentioned resolution.

United States Constitution Sesquicentennial Commission

Under authority of a joint resolution approved August 23, 1935 (49 Stat. 735), there was authorized to be created a commission to plan for the celebration of the one hundred and fiftieth anniversary of the drafting of the Constitution of the United States, and for the fiscal year 1938, $100,000 was appropriated for its expenses.

United States Golden Gate International Exposition Commission

Under authority of a joint resolution approved July 9, 1937 (50 Stat. 488–493), there was authorized to be created a Commission to provide for the participation of the United States in the world's fair to be held in San Francisco, Calif., during the year 1939. The act authorized $1,500,000, the full amount of which was appropriated.

United States Maritime Commission

The Merchant Marine Act of 1936, approved June 29, 1936, created the United States Maritime Commission as the agency of the Government for the purpose of further developing and maintaining an adequate and well-balanced American merchant marine. There were transferred to the Commission funds approximating $100,000,000. These moneys were placed in a revolving fund, in which there will remain a sufficient amount for 1939 operations. Hence, no additional funds are requested for that year.

United States New York World's Fair Commission

Under authority of a joint resolution approved July 9, 1937 (50 Stat. 759), there was authorized to be created a Commission to provide for the participation of the United States in the New York World's Fair, 1939. The act authorized $3,000,000, the full amount of which was appropriated.

Veterans' Administration

It is estimated that for 1939 the various activities of the Veterans' Administration can be conducted with a net decrease in appropriations of about $40,306,825 below the sum appropriated for 1938.

There is an increase for pensions of $9,045,000, due to recent liberalizing legislation, a decrease of $1,000,000 for administrative expenses, due chiefly to the transfer to the Public Works program of all construction items in excess of $25,000 each, and a decrease of $12,500 for printing and binding. For military and naval insurance, there is a decrease of $48,697,000 due to the fact that the twenty-year payments of war-risk life-insurance policies are now rapidly terminating. The decrease of $1,750,000 for adjusted service and dependent pay is explained by the decreasing number of new applications received as the bonus-payment activity subsides.

Under trust accounts, there is an increase of $2,107,675, representing increases of $2,200,000 in the United States Government life-insurance fund and $235,000 in personal funds of patients, less decreases of $300,000 in the adjusted-service-certificate trust fund and $27,325 in the general post fund.

GOVERNMENT CREDIT CORPORATIONS AND CREDIT ADMINISTRATIONS

The First Deficiency Appropriation Act, 1936, required that in pursuance of section 7 thereof there should be submitted for certain independent offices estimates of appropriation for administrative expenses for inclusion in the Budget. The governmental credit corporations and credit agencies mentioned below are those affected by the provisions of the act above referred to.

Commodity Credit Corporation

The estimate of $520,288 is $4,712 less than the amount provided for the fiscal year 1938.

Electric Home and Farm Authority

The estimate of $400,000 for the fiscal year 1939 is the same as provided for 1938.

Federal Reserve Bank of St. Louis

Export-Import Bank of Washington

The estimate of $50,000 for the fiscal year 1939 is the same as provided for 1938.

Federal Emergency Administration of Public Works

The estimate of $9,000,000 for 1939, while $6,000,000 less than the amount provided for 1938, will be sufficient for the conduct of the work of the Administration during 1939.

Federal Farm Mortgage Corporation

The estimate of $10,000,000 for the Federal Farm Mortgage Corporation for the fiscal year 1939 represents a decrease of $5,000,000 under the estimate for 1938. The estimate, while predicated on actual expenditures for the fiscal year 1937 amounting to $8,117,902, allows an increase for the larger volume of loans to be serviced and collections to be made, as well as for increased supervision, maintenance, and disposal of the properties, which are acquired by the Corporation under mortgage foreclosures.

Federal Home Loan Bank Board

The estimate for 1939 covers the expenses of the Board that are to be paid from the appropriation of receipts derived from assessments on Federal home loan banks and from other sources. The increase of $180,000 over the amount for 1938 will provide for necessary expansion due to the increase in the number of member institutions.

Federal Housing Administration

The estimate of $8,500,000 for administrative expenses for the fiscal year 1939 is $1,500,000 less than was provided for 1938. The reduction is due to the gradual decrease in expenditures for the collection of delinquent title I accounts and for the supervision of financial institutions which provide F. H. A. mortgage insurance.

Federal Savings and Loan Insurance Corporation

The estimate of $277,000 for the fiscal year 1939 is $20,820 more than the allowance for 1938. This increase will be required for additions to the supervisory force on account of an increase in the number of insured institutions.

Home Owners' Loan Corporation

The estimate of $28,000,000 for the fiscal year 1939 is $2,000,000 less than the amount provided for the fiscal year 1938. The decrease is due to a gradual clearing up of the foreclosure program and general improvement in procedures offset in part by increases in property management.

Reconstruction Finance Corporation

The estimate of $9,250,000 for administrative expenses of the Corporation during 1939 is $250,000 less than the amount for 1938. See the Annexed Budget for details of 1939 operations.

RFC Mortgage Company

No estimate is submitted since all of the expenses of this agency are paid by the Reconstruction Finance Corporation.

GENERAL PUBLIC WORKS PROGRAM

The estimates of appropriations for the General Public Works program for 1939 amount to $343,130,517 as compared with appropriations of $480,010,862 for 1938. This program includes the items of public construction, such as Federal highways, river and harbor improvements, flood control and reclamation projects, buildings at Army posts and naval shore stations, and other structures of various kinds, but does not include approximately $225,000,000 provided elsewhere in this Budget for construction of battleships and other vessels and the purchase or construction of airplanes and other military and naval armament.

National Advisory Committee for Aeronautics

There is submitted for the Committee an estimate of $200,000 for beginning the construction of a wind tunnel under a contract or contracts at a total cost not to exceed $540,000 for construction and equipment.

Tennessee Valley Authority

For the construction program of the Tennessee Valley Authority during 1939, $40,000,000 is provided, a decrease of $166,270 below the appropriation for 1938. In addition, however, to the appropriation for 1938, there is also available for expenditure during that year $3,916,848 from unexpended balances of former years, whereas no unobligated balance at the close of the fiscal year 1938 is expected to be available for expenditure in 1939. There will thus be a total availability of $44,083,118 for the fiscal year 1938 as compared with $40,000,000 for the fiscal year 1939, or $4,083,118 less for 1939 than for 1938. Supplemental to the appropriation for 1938, authority is provided for incurring contractual obligations in an amount not to exceed $4,000,000 and a like authority is recommended for 1939. In addition to the appropriations, revenues are available for expenditure.

Veterans' Administration

The amount provided in 1939 for "hospital and domiciliary facilities and services," involving the construction of new hospitals, additions to existing hospitals, appurtenant services and other major improvements, is $4,500,000. In addition to this sum, however, there will be available funds carried over from prior year appropriations in the amount of $866,002. The latter funds will permit completion of the 1936–37 building program for which $26,175,000 was appropriated. The 1939 amount of $4,500,000 marks the beginning of a new policy which contemplates an annual construction program for the Veterans' Administration, particularly to provide each year for additional beds to meet the increasing load of neuropsychiatric patients, but also to include all major improvements at existing facilities where the cost of such improvements is $25,000 or more, which improvements have heretofore been carried in the "salaries and expenses" appropriation.

Department of Agriculture

For the Department of Agriculture there are submitted estimates of $63,000,000 for the Federal-aid highway system; $10,000,000 for Federal-aid secondary or feeder roads (including farm-to-market roads, rural-free-delivery mail roads, and public-school bus routes); $20,000,000 for

Federal aid in the elimination of hazards to life at railroad grade crossings; and $7,000,000 for the construction and maintenance of roads and trails in the national forests; a total of $100,000,000. This is a decrease of $80,000,000 below the total for 1938. This decrease is principally due to the fact that no estimates are carried in the 1939 Budget for payments under the authorizations of appropriations for the fiscal year 1939, contained in the act of June 16, 1936, amounting to a total of $216,500,000. In his message to the Congress of November 27, 1937, the President recommended that, in the interest of a balanced Budget, these 1939 authorizations be canceled.

The $100,000,000 of estimates of appropriation carried in the 1939 Budget is the amount required for the liquidation of obligations maturing during that year under the authorizations of appropriations for the fiscal year 1938 provided for in the act of June 16, 1936. This will leave a balance of $92,000,000 to be appropriated for the fiscal year 1940 to complete all authorizations for the fiscal year 1938 provided for in said act.

Department of Commerce

The amount of the estimates of appropriations for 1939 for public works of the Department of Commerce is $578,400 in excess of the 1938 appropriations for such works. The availability, however, in 1938 of unexpended balances of appropriations of prior years, amounting to $623,600, will permit obligation in the current year of $45,200 more than the amount of the 1939 estimates.

The estimate of $508,000 for the National Bureau of Standards is for the construction and equipment of a laboratory building on the site of the Bureau for testing electrical and X-ray equipment and for the generation of high voltages to provide facilities for calibrating the standards of measurement used in connection with the production and distribution of electric power at high voltages and the physical standards essential for the further development of the use of X-rays.

The estimate of $1,705,000 for the Lighthouse Service includes $1,266,000 for replacing 3 tenders 40 or more years old, reconditioning 2 lightships and 1 tender, installing structural tanks on a lightship and tender, improving living quarters on 10 vessels, and $439,000 for major projects for establishing, repairing, or improving aids to navigation.

Department of the Interior

The estimates for 1939 for public works under the Department of the Interior amount to $50,876,000, as compared with appropriations for 1938 of $58,652,775, or a reduction of $7,776,775 below the current fiscal year. The amount required by the Bureau of Reclamation to provide for the continuation of construction and for administrative expenses to be expended from the reclamation fund is $7,410,000, divided as follows: Gila project, Arizona, $900,000; Salt River project, Arizona, $200,000; Boise project, Idaho, Payette division, $500,000; Minidoka project, Idaho, $400,000; Upper Snake River storage project, Idaho, $250,000; Sun River project, Montana, $300,000; Carlsbad project, New Mexico, $100,000; Rio Grande project, New Mexico-Texas, $500,000; Deschutes project, Oregon, $400,000; Owyhee project, Oregon, $310,000; Yakima project, Washington, Roza division, $1,000,000; Kendrick project, Wyoming, $1,000,000; Riverton project, Wyoming, $100,000; Shoshone project, Wyoming, Heart Mountain division, $700,000; and for administrative expenses, $750,000. For continuation of construction of projects to be expended from the general fund of the Treasury there is included $24,980,000, divided as follows: Central Valley project, California, $9,000,000; Grand Coulee Dam, Washington, $13,000,000; Colorado River project, Texas, $2,030,000; general investigations $200,000; and administrative expenses, $750,000. For the continuation of the construction of Boulder Canyon Dam and incidental works, there is included $3,500,000; and for the continuation of the construction of the All-American Canal, there is also included $500,000, making a total for the Bureau of Reclamation of $36,390,000 as compared with 1938 appropriations of $40,375,000.

The estimates of the National Park Service for public works construction in 1939 include $3,000,000 for construction of roads and trails in national parks and monuments under the authority of section 4 of the act of June 16, 1936, and $4,000,000 for continuing the construction and maintenance of the Blue Ridge and Natchez Trace Parkways, under the authority of section 5 of the same act.

For the Bureau of Indian Affairs, there is included $5,456,000 of which $2,686,000 is for the construction, repair and rehabilitation of irrigation systems on Indian reservations, $1,000,000 for the construction of roads on Indian reservations, under the authority of section 6 of the act of June 16, 1936, and $1,770,000 for the construction, repair and rehabilitation of buildings and utilities of the Indian Service.

There is also included $1,450,000 for the construction of the power-distribution system, Bonneville project, Oregon, under the authority contained in the act approved August 20, 1937, providing for the completion, maintenance and operation of that project.

There is also included $580,000 for construction at St. Elizabeths Hospital.

Department of Justice

The estimates for public works under the Department of Justice are for the penal and correctional institutions and amount to $2,406,000.

The amount requested includes $236,000 for construction and repair at McNeil Island, Wash., of which $173,000 is for extensions to existing facilities and $63,000 for development of the island area; $670,000 for extensions to existing facilities at Leavenworth, Kans., Atlanta, Ga., Alcatraz Island, Calif., Alderson, W. Va., Chillicothe, Ohio, El Reno, Okla., Springfield, Mo., La Tuna, Tex., and Petersburg, Va., including $23,200 for construction of dwellings for prison officers at several institutions, and $86,600 for the construction of a sedimentation basin, filter plant, and other appurtenances, to be operated by the city of El Reno as part of the water facilities of said city, for the purpose of assuring to the United States a satisfactory water supply for the Federal reformatory at that place; and $1,500,000 for beginning the construction of three new institutions, one in eastern Kentucky, one in eastern Texas, and one at Braggs, Okla., at a total cost of not to exceed $4,500,000.

The estimates for 1939 are in contrast to appropriations amounting to $1,567,000 for 1938, which consisted of $137,000 for construction and repair at McNeil Island, $280,000 for extensions to facilities at existing institutions, $50,000 for repairing and extending the warehouse at Alderson, and $1,100,000 for completion of the new jails at Los Angeles, Calif., Sandstone, Minn., and Tallahassee, Fla.

Navy Department

The appropriations under the head of "Public Works, Bureau of Yards and Docks" for 1938 amounted to $6,829,000. The estimates for such purposes for 1939 amount to $10,787,000. This amount, together with any remaining unexpended balance of this continuing appropriation on June 30, 1938, will be required during 1939 to carry forward work on projects incompleted at the end of the fiscal year 1938 and, in addition, will provide for the commencement, continuation, or completion of the several projects specifically described in the estimates. The items selected for inclusion in the estimates are considered of the highest priority, and are required principally for the improvement and expansion of shore facilities to meet the increasing needs of the fleet and to provide additional quarters for naval personnel at isolated stations. Referring to major projects, funds are requested to continue the improvement of the channel and the ship-berthing and overhaul facilities at Pearl Harbor, Hawaii; to continue the development of the air station at Alameda, Calif.; to provide quarters for naval personnel at Coco Solo and Balboa, Canal Zone, and the air station, Norfolk, Va.; and to commence construction of the naval medical center at or in the vicinity of Washington, D. C.

Department of State

The estimates for 1939 for public works under the Department of State amount to $1,600,000 as compared with appropriations for 1938 of $3,025,000. However, in addition to the amount of $1,600,000, it is proposed to continue available for 1939 unexpended balances totaling $1,528,000 of the appropriations for the fiscal years 1936–37, thus making a total request for 1939 of $3,128,000 which is $103,000 in excess of the 1938 appropriations. It is also proposed to continue available for expenditure in 1939 any unexpended balances in the appropriations for 1938, the amount of which cannot be determined at this time.

The entire amount of $3,128,000 is for construction work by the International Boundary Commission, United States and Mexico. Of this amount $583,000 is for the completion of the Rio Grande rectification project in the El Paso-Juarez Valley under the convention concluded February 1, 1933 between the United States and Mexico; $1,530,000 is for the United States portion of the project for flood control on the lower Rio Grande, as authorized by the act approved August 19, 1935, as amended by the act of May 22, 1936; and $1,015,000 is for the Rio Grande canalization project as authorized by the acts approved August 29, 1935, and June 4, 1936.

Treasury Department

The estimates for 1939 for public works under the Treasury Department amount to $15,200,000, as compared with appropriations for 1938 of $35,432,065.94. For the construction of public buildings outside the District of Columbia to be selected by the Secretary of the Treasury and the Postmaster General, acting jointly, from public-building projects specified in the Third Revision of House Report No. 1879, Seventy-third Congress, second session, the sum of $11,000,000 is requested. For public buildings in the District of Columbia there is included $3,500,000 for continuation of construction of annex buildings for the Government Printing Office. There is also included an item of $700,000 for the construction and equipment of two harbor cutters for the Coast Guard.

War Department

For the War Department there is included a total estimate of $115,348,517, consisting of estimates of $9,348,517 for the construction and installation of buildings, utilities, and appurtenances at military posts; $30,000,000 for the prosecution of such projects of improvement on rivers and harbors heretofore authorized by Congress as may be most desirable in the interests of commerce and navigation; $50,000,000 for prosecuting work of flood control on various rivers and waterways under the Omnibus Flood Control Act of June 22, 1936, as amended, including $500,000 for the making of preliminary examinations and surveys of flood-control projects by the War Department, $500,000 for expenditure by the Department of Agriculture for preliminary examinations and surveys for run-off and water-flow retardation and soil-erosion prevention on the watersheds of flood-control projects, and $197,000 for flood control of Lowell Creek, Alaska, as authorized by the act of August 25, 1937; and $26,000,000 for continuing the work of flood control on the Mississippi River and tributaries under the Flood Control Act of May 15, 1928, as amended by the act of June 15, 1936. The total net decrease below 1938 amounts to $37,355,634, and consists of decreases of $33,533 for construction at military posts and $60,822,101 for the improvement of rivers and harbors, and increases of $20,000,000 for general flood control and $3,500,000 for flood control on the Mississippi River.

DEPARTMENT OF AGRICULTURE

For the Department of Agriculture the Budget estimates include a total of $786,190,987, an increase of $26,714,948 over the appropriations of $759,476,039 for the fiscal year 1938. Included in the 1938 total are reappropriations provided by Congress for that year in the sum of $158,857,552, and for 1939 the estimates contemplate the provision of funds of this character to the extent of $116,605,000. The principal items of increase and decrease which constitute the difference of $26,714,948, 1939 over 1938, are accounted for as follows:

The increases of $269,375, of $25,080, and of $220,640 for the Office of the Secretary, the Office of the Solicitor, and the Office of Information, respectively, are due almost entirely to transfers from other appropriations, and are the result of the consolidation of activities in the interest of better administration. Corresponding decreases have been made in the other appropriations concerned.

For the Office of Experiment Stations, the sum of $17,500 is provided for statutory increases in payments for Federal aid to Hawaii, Alaska, and Puerto Rico, offset in part by a decrease of $2,066 under the item for the insular experiment station in Hawaii.

For the activities of the Extension Service, which unit administers the Smith-Lever, Capper-Ketcham, Bankhead-Jones, and other acts providing payments to States, Hawaii, Alaska, and Puerto Rico for cooperative agricultural extension work, a net increase of $579,162 is provided. Increases of $1,000,000 for payments to States under the Bankhead-Jones Act, $2,500 for payment to Alaska, $88,000 for payment to Puerto Rico, and $143,162

for carrying into effect the provisions of the Clarke-McNary Act of June 7, 1924, and the Norris-Doxey Act of May 18, 1937, relating to cooperative farm forestry, are offset in part by a reduction of $645,000 in two other appropriations made annually for cooperative agricultural extension work, and a reduction of $9,500 in the item for farmers' cooperative demonstration work.

Under the Weather Bureau, a net increase of $516,951 is included, consisting of an increase of $541,951 for commercial airway meteorological service, and a $25,000 decrease in the item for general administrative expenses.

A decrease of $9,298,175 is made in the estimates of the Bureau of Animal Industry, which reduction is accounted for almost wholly under the item for elimination of diseased cattle. For 1938 this work was financed from the unobligated balances of prior-year appropriations for this purpose, the sum of $15,864,000 having been made available. While providing that the work be financed in a similar manner in 1939, the Budget contemplates the reappropriation of only $6,600,000, a reduction of $9,264,000 below 1938.

For the Bureau of Dairy Industry an increase of $19,921 has been included for studies of dairy-herd-improvement association records to determine the effect of the application of breeding and feeding practices on the level and economy of production.

The estimates of the Bureau of Plant Industry indicate a decrease of $287,373, composed of a number of reductions under projects relating to the general work of the Bureau.

Under the Forest Service, the estimates show a net decrease of $491,775 below the amount appropriated for 1938. This net decrease is made up of increases of $78,804 for protection and administration of national forests, $200,000 for private forestry cooperation, and $1,229,421 for carrying out the provisions of the Clarke-McNary Act of June 7, 1924, and the Norris-Doxey Act of May 18, 1937, relating to cooperative farm forestry, and a decrease of $2,000,000 in the item for acquisition of lands for national forests.

A net increase of $791,969 for the Bureau of Entomology and Plant Quarantine results from an increase of $1,000,000 under the item for the control of incipient and emergency outbreaks of insect pests and plant diseases to replenish the fund to the original amount of $2,000,000 authorized by law to be available at the beginning of each fiscal year; and decreases of $208,031 in several other appropriations.

For the Bureau of Biological Survey there is an increase of $1,000,000 for Federal aid to States in wildlife restoration projects, which estimate is submitted under the act of September 2, 1937, authorizing an appropriation for such projects of an amount equal to the revenue accruing during each fiscal year from the tax imposed by section 610, title IV, of the Revenue Act of 1932, on firearms, shells, and cartridges.

While no amount for 1939 is included for the Bureau of Public Roads in the estimates for the Department of Agriculture, there is included under the heading "General Public Works Program" an estimate of appropriation of $100,000,000 for the construction of Federal-aid highways, secondary or feeder roads, and forest roads and trails, and for the elimination of grade crossings.

For the Bureau of Agricultural Economics a net increase of $155,985 over appropriations for 1938 is provided. This difference is composed mainly of increases of $225,483 for classification and information service in communities organized for cotton quality improvement in pursuance of the provisions of an act approved April 13, 1937, and $33,200 under the appropriation for market inspection of farm products, which increases are offset in part by several small reductions in other items dealing with the work of the Bureau.

An increase of $100,000 has been included for carrying out the purposes of the Commodity Exchange Act of June 15, 1936, which expanded the scope of the Grain Futures Act of September 21, 1922, and provided for the control and supervision of future trading in grain, cotton, butter, eggs, potatoes, and millfeed on 16 boards of trade and commodity exchanges designated as contract markets by the Secretary of Agriculture.

For the Food and Drug Administration, an increase of $100,000 has been included to permit that agency to strengthen its enforcement activities under the Federal food and drugs law.

The estimates of the Soil Conservation Service are $865,780 below the appropriations for 1938, which is the initial step in the transition from the operation and maintenance of demonstration projects by the Federal Government to the furnishing, in lieu thereof, of technical advice and assistance to State and other organizations with reference to soil conservation practices.

Under the appropriation "Conservation and use of agricultural land resources, Department of Agriculture," for carrying out the provisions of the Soil Conservation and Domestic Allotment Act of February 29, 1936, a total of $440,000,000 is provided, a reduction of $60,000,000 below all available funds for this purpose for 1938. For the latter year a direct appropriation of $340,000,000 was made, plus an authorization for the use of not to exceed $110,000,000 of the funds made available for the fiscal years 1937 and 1938 by section 32 of the act to amend the Agricultural Adjustment Act, dated August 24, 1935, and plus $50,000,000 of the unexpended balance of the appropriation of $100,000,000 provided by section 12 (a) of the Agricultural Adjustment Act of May 12, 1933, making a total availability of $500,000,000. For the fiscal year 1939 the Budget provides an estimate of direct appropriation of $330,000,000 but also makes provision for an additional amount of $110,000,000 from other sources. Although a total of $500,000,000 was provided for 1938, a revision of the program will necessitate the use of only $440,000,000; and the estimate of $440,000,000 for 1939 is predicated upon a continuation of the present program during that fiscal year.

For carrying out the provisions of the Sugar Act of 1937 a total of $48,000,000 is provided. This is an increase of $47,750,000 over the appropriation of $250,000 for 1938, which latter amount was for administrative expenses only. The total of $48,000,000 for 1939 will provide for the first full year's operation under the act, including conditional payments to be made with respect to sugar, as authorized under its provisions.

An increase of $7,000,000 is included in the Budget under the provisions of the Bankhead-Jones Farm Tenant Act of July 22, 1937. Of this amount, $5,000,000 is applicable to title I, relating principally to the promotion of more secure occupancy of farms and farm homes, and the making of loans to enable farm tenants, farm laborers, sharecroppers, and others to acquire farms; and $2,000,000 is to provide for the liquidation and management under title IV of the act, of such resettlement projects and rural rehabilitation projects for resettlement purposes as have been completed or are now in the process of construction or development.

Under the classification of "permanent appropriations" a total increase of $39,109,234 is included in the Budget

for 1939. Of this amount, $38,924,234 represents the difference between the 1938 sum of $108,075,766 (appropriation of $125,097,214 less $17,021,448 made available for the purposes of the appropriation for "Conservation and use of agricultural land resources, Department of Agriculture"), and the sum of $147,000,000 for 1939, made available by section 32 of the Agricultural Adjustment Act, as amended, which section provides permanent indefinite annual appropriations equal to 30 percent of the gross annual receipts from customs duties collected under the customs laws, to be used by the Secretary of Agriculture to encourage exportation and domestic consumption of agricultural commodities. The balance of the increase, amounting to $185,000, consists of statutory payments to States from receipts derived from national forests located within the respective States.

DEPARTMENT OF COMMERCE

Estimates for the Department of Commerce for 1939, exclusive of items under the general public works program, contemplate a net increase of $2,815,978 over the appropriations for 1938. The net increases for the bureaus of the Department in the order of their amounts are $3,121,500 for the Bureau of Air Commerce, $375,100 for the Bureau of Lighthouses, and $39,220 for the Bureau of Marine Inspection and Navigation. The net decreases are $291,600 for the Bureau of Foreign and Domestic Commerce, $179,842 for the Office of the Secretary, $167,000 for the Bureau of Fisheries, $49,400 for the Coast and Geodetic Survey, and $32,000 for the Patent Office.

A net decrease of $179,842 in the estimates for the Office of the Secretary results from a nonrecurring 1938 item of $17,500 for the General Committee of the Accident Prevention Conference, a decrease of $169,000 for travel of the department, and increases of $6,658 in other appropriation items.

For the Bureau of Air Commerce a net increase of $3,121,500 is provided in the estimates. The estimate of $4,750,000 for establishment of air-navigation facilities, which is an increase of $1,838,200, will provide for payment of 1938 contract obligations not exceeding $2,000,000, and for the establishment of additional aids to air navigation and the continued modernization and improvement of existing aids. The provision for authority to incur contractual obligations for establishment of aids, not exceeding $2,000,000, is continued for 1939.

For maintenance of air-navigation facilities the estimate contemplates an increase of $1,311,300, of which $187,200 is for teletype-line rentals incident to air-traffic control paid in 1938 from the appropriation for aircraft in commerce, and the remainder is for operating costs of additional aids established. The transfer of air-traffic control teletype-line rentals to the appropriation for maintenance of air-navigation facilities converts an apparent decrease of $2,000 in the appropriation for aircraft in commerce into an availability increase of $185,200 and this amount, together with a reduction of $100,000 in the limitation for purchase of aircraft, will make available $285,200 for additional air-traffic control and inspection personnel in 1939. There are decreases of $23,000 in the appropriation for safety and planning and $3,000 in the appropriation for salaries.

The decrease of $291,600 in the estimates for the Bureau of Foreign and Domestic Commerce contemplates a total appropriation for 1939 approximating the total of expenditures in 1937, but exceeding such expenditures in the estimates for domestic commerce, customs statistics, and foreign-commerce service.

Estimates for the Bureau of the Census are in the same total amount as for 1938. Increases of $50,000 for expenses of the sixteenth decennial census and $25,000 for salaries and expenses, Social Security Act, are offset by a decrease of $75,000 for the biennial census of manufactures and the quinquennial census of electrical industries, which will be nonrecurring items for 1939.

For the Bureau of Marine Inspection and Navigation there is a net increase of $39,220 over 1938 appropriations. This results from a reduction of $38,000 for the purchase of a vessel in 1938, a reduction of $40,000 in the amount available for authorized pay of field personnel for overtime services, and an increase of $117,220 for additional inspectors and personnel to complete the organization necessary to administer laws enacted by the Seventy-fourth Congress.

For the National Bureau of Standards the estimates provide the same amounts as appropriated for 1938.

An increase of $375,100 is provided in the estimates for the Lighthouse Service. The principal items of increase are $157,000 for general expenses due to increased prices of supplies and materials, particularly fuel oil, and the servicing of additional aids to navigation; $144,000 for personnel for new vessels, additional employees to permit compliance with prescribed hours of labor, longevity pay, and differential pay rates between masters and mates and engineers and assistant engineers on lightships; and $56,000 for pay of retired field personnel.

The decrease of $49,400 in the estimates for the Coast and Geodetic Survey contemplates appropriations for that year slightly exceeding expenditures in 1937.

The net decrease of $167,000 in the estimates for the Bureau of Fisheries is accounted for by decreases of $260,000 for construction of fish-cultural stations, $15,000 for purchase of fish distribution trucks, and $9,000 for travel and protecting seal and salmon in Alaska, and increases of $117,000, the principal items of increase being $80,000 to complete the construction and development of stations commenced in 1938, and $32,000 for the operation of new hatcheries.

A net decrease of $32,000 in the estimates for the Patent Office involves decreases of $30,000 for printing and binding, and $12,000 for photolithographing, and an increase of $10,000 for steel filing equipment.

DEPARTMENT OF THE INTERIOR

Estimates for the Department of the Interior for 1939, exclusive of items appearing in the Budget under the General Public Works Program, amount to $95,214,106.66, which is a net decrease of $532,694.44 below the appropriations for 1938. The principal items of increase or decrease follow:

For the Office of the Secretary, there is a total increase of $234,240, the principal items of which are $54,960 for salaries, Office of the Secretary, $100,000 for the Division of Grazing, principally for additional personnel resulting from the increased volume of work in the administration of the Taylor Grazing Act, $50,900 for a proposed Division of Information, $11,560 for contingent expenses, and $20,000 for printing and binding.

It is anticipated that the work of the War Minerals Relief Commission will be concluded during 1938, which will result in a saving of $20,000 for salaries and expenses.

For the National Bituminous Coal Commission, a decrease of $600,000 is shown, based on a contemplated

reduction in the expenses of that organization after the establishment in 1938 of base prices for bituminous coal.

For the Bonneville project, Oregon, an increase of $65,000 is requested for administrative expenses. An estimate for the construction of transmission lines and development of power is contained in the General Public Works Program.

For the General Land Office, there is a net increase of $31,000, which is occasioned almost entirely by increases of $15,000 for maps of the United States (a biennial appropriation), $15,000 for payment of proceeds of sales of Coos Bay, Oreg., wagon road grant lands and timber, and $250,000 for payment to certain counties in Oregon in lieu of taxes on Oregon and California grant lands, and by a decrease of $250,000 in the amount for surveying the public lands.

A net increase of $1,404,859.56 for the Bureau of Indian Affairs results from total increases of $2,288,675.05 and total decreases of $883,815.49. The principal items of increase are $57,460 for general expenses, $45,000 for administration of Indian forests, $15,000 for supervising mining operations on leased Indian lands, $55,860 for developing agriculture and stock raising among Indians, $60,500 for operation and maintenance of Indian irrigation and drainage projects, $348,145 for education of Indian children, $403,310 for the conservation of the health of Indians, and $38,000 for medical relief in Alaska, $95,400 for the general support of Indians and the administration of their property, $1,000,000 for the organization and management of the reindeer industry in Alaska, under the act of September 1, 1937, $10,000 for payment to Indians of Sioux reservations, and $25,000 on account of interest on Indian trust funds. The principal items of decrease are $450,000 for acquisition of land for Indian tribes, $25,000 on account of a nonrecurring item for redemption of restricted Indian property subject to taxation, $161,400 on account of a nonrecurring item for payment to the Confederated Band of Utes, $79,038 on account of a nonrecurring item for payment to Sioux Indians, $20,000 in the estimate for the revolving fund for loans to individual Indians and Indian corporations, $44,302 in the amount for operation and maintenance of Indian irrigation and drainage projects (including a nonrecurring item of $35,338), $10,000 in the item for repair to Indian school buildings, $50,000 on account of a nonrecurring item covering the appropriation of receipts from activities carried on by the Indians of the Annette Islands Reserve, Alaska, and $35,500 for reindeer service, Alaska, by reason of the consolidation of the item with the item for organization and management of the reindeer industry.

For the Bureau of Reclamation, there is a decrease of $47,000, of which $17,000 is due to decreased cost of operating existing irrigation distribution systems paid from the reclamation fund, and $30,000 is on account of a nonrecurring item for the expenses of the commission to investigate reclamation projects. The other items of the Bureau of Reclamation will be found under the General Public Works Program.

For the Geological Survey, the increase of $252,480 contemplates $150,000 additional for gaging streams, $75,000 additional for topographic surveys, $15,000 additional for the classification of lands, and $12,480 for miscellaneous increases.

For the Bureau of Mines, the net increase of $44,910 is accounted for in the main by increases of $23,960 for operating mine rescue cars and stations and investigation of accidents, $7,000 for oil and gas investigations, $16,540 for the operation of mining experiment stations, $7,310 for maintenance of the buildings and grounds at Pittsburgh, Pa., and $12,000 for economics of mineral industries; and decreases of $12,000 for gas production from helium plants, which appropriation is no longer required in view of the provisions of the Helium Act of September 1, 1937, and $10,000, due to a nonrecurring item for additional land acquisition for the helium plant at Amarillo, Tex.

A net increase of $647,925 is provided for the National Park Service, of which $23,100 is for salaries and general expenses in the District of Columbia, $158,105 for the operation and maintenance of the various national parks, monuments, and reservations, $375,720 for the maintenance and operation and rent of Government buildings under the jurisdiction of the National Park Service in the District of Columbia, and $91,000 for expenses incurred in connection with the maintenance of National Capital parks.

For the Bureau of Education, there is a net decrease of $1,463,450, which is occasioned by a decrease of $1,983,000 in the appropriation for the further development of vocational education, and by increases of $500,000 in the appropriation for the further endowment of colleges of agriculture and the mechanic arts, as authorized by the act of June 29, 1935, and $19,550 for miscellaneous items.

There is a net decrease of $57,210 in the estimates of annual appropriations for government in the Territories, which results from total decreases of $235,000 and total increases of $177,790. The decreases consist of a nonrecurring item of $200,000 for capital expenditures for the Alaska Railroad, and a reduction of $35,000 in the appropriation for defraying the deficit in the operating expenses of the municipalities of St. Thomas and St. Croix. The increases are $47,000 for expenses of the territorial legislature of Hawaii (biennially appropriated), $7,000 for administrative expenses of the government of the Virgin Islands, $46,000 for expenses of the Alaska Legislature (biennially appropriated), $10,790 for contingent expenses of the Territory of Alaska (principally for repairs to the Governor's mansion), $12,000 for the care and custody of Alaska insane, $25,000 for Alaska public schools, and $30,000 for wagon roads, bridges, and trails in Alaska.

For the several institutions in the District of Columbia under the supervision of the Department of the Interior the following increases are shown: St. Elizabeths Hospital, for maintenance, $32,850; Columbia Institution for the Deaf, $5,950; Howard University, $23,000; and Freedmen's Hospital, $70,670.

The 1939 estimates of permanent appropriations show increases of $55,381 for payments to States from receipts under the Mineral Leasing Act, and $211,900, from operating revenues for cost of operation of the Alaska Railroad.

There is a net decrease of $1,425,200 in trust accounts, which is occasioned by an estimated decrease of $1,400,200 in expenditures of contributed funds for the construction of Parker Dam by the Bureau of Reclamation, and a reduction of $30,000 in the funds contributed for improvement of roads, bridges, and trails, Alaska, and by an increase of $5,000 for pension money of patients in St. Elizabeths Hospital.

DEPARTMENT OF JUSTICE

The estimates of appropriations for the Department of Justice for 1939 amount to $42,347,201, a net increase of $1,901,436 over the appropriations for 1938. The estimates of $42,347,201 are exclusive of $2,406,000 recom-

mended for construction and major repairs at penal and correctional institutions, the estimates for which are included in the General Public Works chapter of the Budget for 1939.

The net increase of $319,750 in the estimates for the Office of the Attorney General results from increases of $293,650 for salaries, $9,200 for contingent expenses, $53,000 for traveling expenses, $53,000 for printing and binding, $43,200 for the Federal Bureau of Investigation, $5,800 for the examination of judicial offices, and $8,900 for the Bureau of Prisons; and decreases of $38,000 for the Taxes and Penalties Division, $30,000 for the Bureau of War Risk Litigation, and a nonrecurring item of $79,000 for expenses in the conduct of the case of *United States* v. *Northern Pacific Railway Co.*

There are included in the Department of Justice budget for 1939 the estimates for the District Court of the United States and the United States Court of Appeals for the District of Columbia, which heretofore have been submitted with the budget for the District of Columbia. The estimates for these courts for 1939 amount to $528,065, compared to appropriations for 1938 of $474,565, an increase of $53,500. The Budget contains a provision that 60 percent of the expenditures from appropriations for the District Court of the United States and 30 percent of the expenditures from appropriations for the United States Court of Appeals for the District of Columbia shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia. Under this provision the United States will receive a reimbursement of $272,335.

For salaries of circuit, district, and retired judges an increase of $30,000 is recommended. There is an increase of $15,680 in the estimate for salaries and expenses of district attorneys to provide additional assistant attorneys and clerks to district attorneys in several of the larger districts where there has been an expansion of judicial activity. An increase of $149,400 is recommended for the employment of special assistant attorneys in antitrust cases.

The increase of $260,000 in the estimate for fees of jurors and witnesses is to meet the proposed restoration of the per diem for attendance of jurors to $4, which is the rate prescribed by the act of April 26, 1926, but which was fixed at $3 by the Economy Act and subsequent appropriation acts. An additional amount of $16,000 is required for the pay of bailiffs, in order to provide for a $5 instead of a $4.50 per diem rate of pay.

Under miscellaneous expenses, United States courts, there is an increase of $50,500, of which $22,500 is for stenographic reporting service in antitrust cases and $28,000 for stenographers to special assistant attorneys in the field.

There is a nonrecurring item of $105,000 for fees and expenses of conciliation commissioners in connection with agricultural compositions and extensions under section 75 of the act of March 3, 1933.

It is estimated that there will be an increase in prison population at Federal penal and correctional institutions of approximately 8 percent for 1939 over 1938, and to provide the necessary funds for personnel and maintenance the following additional amounts are requested: Leavenworth, Kans. (Main), $29,490; Atlanta, Ga., $37,970; McNeil Island, Wash., $11,600; Lewisburg, Pa., $23,910; Alcatraz Island, Calif., $3,935; Alderson, W. Va., $4,230; Chillicothe, Ohio, $34,440; El Reno, Okla., $58,620; Springfield, Mo., $25,680; Petersburg, Va., $40,075; Federal jails, including the new jails at Los Angeles, Calif., Sandstone, Minn., and Tallahassee, Fla., $382,375; prison camps, including two new camps at sites to be selected, $197,320; and the National Training School for Boys, Washington, D. C., $13,340. A reduction of $15,960 is recommended for Leavenworth, Kans. (Annex), as it is anticipated that there will be a decrease in the number of inmates at this institution next year.

There is an increase of $3,080 in the estimate for repairs and alterations at the National Training School for Boys. The estimate for probation system, United States courts, provides an increase of $85,500 for additional probation service in a number of districts where it is found to be inadequate. For medical and hospital service at the penal and correctional institutions, there is an increase of $94,660, the greater part of which is for service at the three new jails. The estimate for support of United States prisoners in non-Federal institutions is reduced from $2,000,000 to $1,500,000, as it will be possible to care for some of these prisoners in the new Federal institutions.

The expenditures from trust accounts, which consist of personal funds of inmates and commissary and welfare funds at the several penal and correctional institutions, are estimated at $700,000 for inmates' funds and $400,000 for other funds for 1939, compared to $650,000 and $350,000, respectively, for 1938.

DEPARTMENT OF LABOR

Estimates for the Department of Labor for the fiscal year 1939 provide a net increase of $763,840 over the appropriations for 1938. The major items of increase are $614,000 additional for payments to States and administrative expenses, under the act establishing a national system of public employment offices and title V of the Social Security Act; $64,520 for activities in the Office of the Secretary; $38,400 for the Immigration and Naturalization Service; and $36,000 for the Bureau of Labor Statistics.

For the Office of the Secretary the net increase of $64,520 includes increases of $31,200 for travel of the Department; $30,080 for salaries of additional personnel, particularly for the establishment of a centralized personnel division; $17,800 for additional commissioners of conciliation; and $5,000 for the transfer of items from the Division of Public Contracts to contingent expenses of the Department; and total decreases of $19,560 for printing and binding, expenses of the office at the International Labor Organization in Switzerland, and salaries and expenses of the Division of Public Contracts.

The estimate for salaries and expenses, Bureau of Labor Statistics, provides an increase of $36,000 over the appropriation for 1938 for collection and compilation of additional and more detailed statistics of employment and and pay rolls, wages and hours, cost of living, wholesale and retail prices, and industrial relations.

For the Bureau of Immigration and Naturalization the estimated increase of $38,400 over appropriations for 1938 is for mandatory promotions of inspectors; increased prices of supplies, particularly fuel oil; and one additional departmental employee.

An increase of $48,000 in the estimates over 1938 appropriations for the Children's Bureau provides additional amounts of $23,000 for salaries and expenses, maternal and child welfare, Social Security Act, for studies of crippled children, reviewing State budgets, and computing payments to States and field audit of State expenditures;

and $25,000 additional for grants to States for child-welfare service.

The net increase of $10,920 in the estimates for the Women's Bureau over the 1938 appropriation is occasioned by a decrease of $31,625 for 1938 studies nonrecurring in 1939, and an increase of $42,545 for further development of standards for the employment of women and for additional studies relating to employment of women in industry.

For the United States Employment Service the estimates contemplate an increase for 1939 of $566,000, of which $500,000 is the additional amount required to augment the fund for payments to States on an equal matching basis and $66,000 is for added costs of administration.

NAVY DEPARTMENT

For 1938 the appropriations for public works, Bureau of Yards and Docks, aggregate $6,829,000, and for 1939 the Budget estimates for such purposes amount to $10,787,000. In the Budget for 1939 the estimates for naval public works are excluded from the Navy Department chapter and are included under the heading "General Public Works Program." After excluding the items for public works, and including a reappropriation of $10,000,000 pertaining to 1938, the total funds appropriated and made available for 1938, exclusive of trust funds, amount to $519,714,308. The estimates for the same purposes for 1939 total $553,619,461, indicating a net increase over 1938 of $33,905,153.

For purposes of comparison the funds appropriated for 1938 and the estimate of appropriations for 1939 are allocated under general purpose heads as follows: For naval and Marine Corps personnel, including Reserve activities, $226,824,841 for 1938 and $237,072,100 for 1939, an increase of $10,247,259; for operation of the fleet, $25,383,772 for 1938 and $27,756,462 for 1939, an increase of $2,472,690; for repairs to the fleet, $33,411,228 for 1938 and $36,394,401 for 1939, an increase of $2,983,173; for miscellaneous operating charges, $11,230,985 for 1938 and $11,752,522 for 1939, an increase of $521,537; for maintenance and operation of shore stations, $33,472,275 for 1938 and $34,246,339 for 1939, an increase of $774,064; for repairs and improvements to shore stations, $4,120,356 for 1938 and $6,404,430 for 1939, an increase of $2,284,074; for experiments and tests, $7,950,900 for 1938 and $7,172,900 for 1939, a decrease of $778,000; for training, education, and welfare, $4,920,551 for 1938 and $4,961,707 for 1939, an increase of $41,156; for fleet improvements, $6,878,300 for 1938 and $11,160,100 for 1939, an increase of $4,281,800; for yard and district craft, $1,442,600 for 1938 and $1,656,000 for 1939, an increase of $213,400; for additions and improvements, Marine Corps, $475,500 for 1938 and $687,500 for 1939, an increase of $212,000; for construction of naval aircraft, $30,203,000 for 1938 and $23,155,000 for 1939, a decrease of $7,048,000; for construction of naval vessels, $130,000,000 for 1938 and $143,700,000 for 1939, an increase of $13,700,000; for strategic and critical materials, $3,500,000 for 1938 and $500,000 for 1939, a decrease of $3,000,000; for increase of the naval supply account fund, nothing for 1938 and $7,000,000 for 1939, an increase of $7,000,000.

The increase in the amount requested for military personnel is chiefly required to man the increased number of ships and planes that will be in operation during 1939, and to increase the strength of the fleet marine force. The estimates provide for an average of 107,785 enlisted men of the Navy (an increase from 105,000 men at the beginning of 1939 to 110,570 men at the end of that year); for an average of 17,500 enlisted men of the Marine Corps (an increase from 17,000 men at the beginning of 1939 to 18,000 men at the end of that year); for an increase of 241 officers, Navy, and 20 officers, Marine Corps; for additional officers and enlisted men on the retired lists and additional men on the transferred Reserve lists of the Navy and Marine Corps; and for training of Naval and Marine Corps Reserves, including aviation cadets.

Under construction of naval vessels, funds are requested for the purpose of completing or continuing construction that has been provided in part by previous appropriations and that will not be completed during the present fiscal year, and to begin construction during the fiscal year 1939 of two battleships, two light cruisers, eight destroyers, and six submarines. The construction of these vessels was authorized by the Vinson-Trammel Act of 1934 as replacement vessels for overage combatant ships. The estimates also include funds for the commencement of construction of four auxiliary vessels, viz, one submarine tender, one oiler, one mine sweeper, and one fleet tug, in accordance with legislation already enacted which authorizes the replacement of old auxiliary vessels with modern, more efficient vessels of the same types.

The amount of $7,000,000 requested as an increase in the naval supply account fund (a revolving fund) is necessary to permit an increase of present inadequate stocks (at prevailing higher prices), the acquirement of stocks of supplies for operating new vessels, the enlargement of provisions stocks to care for the subsistence of the increased number of men in service, and a continuation of the policy of seasonal and slack season purchases.

The remaining increases under the various heads are necessary to provide for the maintenance, repair, operation, and improvement of the fleet and shore facilities for the Navy and Marine Corps, due to the larger number and larger types of ships and aircraft that will be in commission and to the increased quantities and higher prices of supplies and materials required.

The estimate for construction of naval aircraft is $7,048,000 less than for 1938. The amount requested for replacement of aircraft will be sufficient to maintain naval aviation at its present high standard of efficiency and provide some increase in the number of planes.

For strategic and critical materials $3,500,000 was appropriated for 1938 to remain available until expended. It is anticipated that, with the unobligated balance of this amount that will remain available for 1939, an additional amount of $500,000 for that year will be sufficient to carry forward the program of purchases of such materials in an orderly manner.

The estimated expenditures under the various trust accounts for 1938 aggregate $1,570,650, and it is estimated that the requirements under such accounts for the fiscal year 1939 will approximate $1,523,000, indicating decreased requirements of $47,650.

POST OFFICE DEPARTMENT

The estimates for the Post Office Department are included as an Annexed Budget, since the excess of expenditures over the postal revenues is payable from the general fund of the Treasury and only such excess is carried to Statement No. 2 of the Budget for 1939 and to the General Budget Summary and supporting schedules.

The estimated expenditures for postal operations for the fiscal year 1939 aggregate $793,193,000. The postal revenues for 1939 are estimated at $775,000,000. These

estimates indicate that the revenues will fail to meet obligations by $18,193,000, which amount will become a charge against the general fund of the Treasury.

Further details concerning the estimates of postal revenues and appropriations will be found in the summary tables and explanatory statement under the Annexed Budget.

DEPARTMENT OF STATE

The estimates of appropriations for the Department of State for the fiscal year 1939 amount to $15,537,970.73, a net decrease of $997,742.61 below the appropriations for 1938. The estimates of $15,537,970.73 are exclusive of $1,600,000 for construction projects of the International Boundary Commission, United States and Mexico, the estimates for which are included in the General Public Works chapter of the Budget for 1939. The net decrease of $997,742.61 comprises decreases of $539,243.34 for the Foreign Service, $468,839.27 for international obligations, commissions, congresses, and bureaus, and $100,000 in trust accounts, and an increase of $110,340 for the Office of the Secretary of State.

The net increase of $110,340 in the estimate for the Office of the Secretary of State consists of increases of $60,080 for additional personnel to care for a substantial increase in business, and to provide for the transfer to the field of a number of Foreign Service officers now detailed to the Department, $6,590 for contingent expenses, $31,950 for printing and binding, $6,520 for passport agencies, and $10,000 for promotion of foreign trade, and a decrease of $4,800 for collecting and editing the official papers of the Territories of the United States.

The estimate for salaries of ambassadors and ministers provides an increase of $1,666.66 for the salary on a full-year basis of the Minister to Lithuania. The increase of $50,600 for salaries of Foreign Service officers covers automatic promotions authorized by the Foreign Service Act of February 23, 1931. The decrease of $53,300 in the estimate for transportation of the Foreign Service is the amount of a nonrecurring item included in the 1938 appropriation to effect transfers of Foreign Service officers. There are decreases of $50,000 in the estimate for office and living quarters in the Foreign Service, and $400 for the Foreign Service retirement and disability appropriated fund.

For salaries of Foreign Service clerks an increase of $54,020 is requested for 1939, of which $19,020 is for 15 additional clerks, and $35,000 is to provide promotions for clerks in the lower pay brackets. An increase of $30,170 in the estimate for miscellaneous salaries and allowances in the Foreign Service includes $10,170 to provide for the salaries of 30 additional employees, principally for custodial duties, and $20,000 for promotions of lower-paid employees. The net decrease of $72,000 in the contingent expenses for the Foreign Service results from decreases in various items, the principal one being $79,219 for repairs to Government-owned buildings in foreign countries, and an increase of $15,000 for the return to this country of archives now located abroad.

The decrease of $500,000 in the amount of the estimate to cover emergencies arising in the Diplomatic and Consular Service is due to a nonrecurring 1938 item for the safeguarding and evacuation of Americans in China, and for meeting unusual demands for protection and assistance resulting from the situation in Spain.

The estimate for United States contributions to international commissions, congresses, and bureaus for 1939 amounts to $830,590.73, a decrease of $12,272.02 from the appropriation for 1938. There is a decrease of $28,120 in the estimate for the annual operating expenses of the International Boundary Commission, United States and Mexico, on account of the transfer to the appropriation for Rio Grande rectification of salaries and expenses of employees engaged exclusively on the construction project. For the Waterways Treaty, United States and Great Britain, a total decrease of $25,000 is estimated, $15,000 of which is due to the anticipated completion during the current fiscal year of the arbitration of the question of damage to lands in the State of Washington by fumes from a smelter located at Trail, British Columbia, and a decrease of $10,000 in the amount required for miscellaneous investigations. For the International Pacific Salmon Fisheries Commission there is an increase of $7,500 to provide for this Commission on a full-year basis. For the expenses of organizing and holding the Fifteenth International Congress of Architects in the United States during the calendar year 1939, it is estimated that $10,000 will be required. There is also included in the Budget an estimate of $3,500 for the expenses of participation by the United States in the Tenth Pan American Sanitary Conference to be held at Bogota, Colombia, in the year 1938. Appropriations for 1938 for various international commissions, conferences, and miscellaneous items, which are nonrecurring, amount to $424,447.25.

The expenditures from miscellaneous trust accounts are estimated at $120,000, a decrease of $100,000.

TREASURY DEPARTMENT

The estimates of appropriation for the Treasury Department for the fiscal year 1939, exclusive of items for public works, amount to $3,150,784,539, a net increase of $215,088,707 over the appropriations for 1938.

Annual appropriations.—The principal items of increase are Office of the Secretary, $78,547,000; Bureau of Engraving and Printing, $2,200,000; Public Debt Service, $773,800; the Public Health Service, $664,800; Bureau of Customs, $379,940; and Coast Guard, $148,847; and the chief decreases are Bureau of Internal Revenue, $9,247,620; Commissioner of Accounts and Deposits, $268,500; and Procurement Division, Public Buildings Branch, $83,750.

The net increase of $78,547,000 in the estimates of the Office of the Secretary is largely accounted for by increases of $90,000,000 in the amount for the old-age reserve account under the Social Security Act, $6,200,000 in the amount for payment to Federal land banks on account of the reduction in the rate of interest on certain land bank loans, and $3,350,000 in the amount for payment to the Federal Farm Mortgage Corporation on account of the reduction in the rate of interest on Land Bank Commissioner's loans provided for in the act of July 22, 1937, and by decreases of $20,000,000 for subscriptions to paid-in surplus of Federal land banks, and $1,000,000 for payments on account of subscriptions to the capital stock of the United States Housing Authority in accordance with the provisions of the United States Housing Act of 1937.

Of the increase of $773,800 in the amount requested for the Public Debt Service, $432,100 represents the increased cost of distinctive paper for United States securities, and $341,700 is to provide for additional personnel required in connection with the redemption of United States savings bonds, and for handling adjusted service bonds (heretofore paid from a separate appropriation which will not be available in 1939).

The increase of $379,940 for collecting the revenue from customs will provide for necessary additional personnel to

take care of the substantial increase in the volume of customs business.

The decrease of $9,247,620 in the estimates of the Bureau of Internal Revenue results almost entirely from a decrease of $15,000,000 in the amount for refund of processing taxes collected under the Cotton, Tobacco, and Potato Acts, and from increases of $5,000,000 for the refunding of internal-revenue collections and $759,480 for additional field personnel and incidental expenses to handle social security tax administration and various classes of internal revenue tax returns and collections.

The net decrease of $268,500 for the Office of the Commissioner of Accounts and Deposits is accounted for by an increase of $83,000 for necessary additional personnel to take care of the largely increased volume of work of that office, and by decreases of $300,000 in the amount to be appropriated to the revolving fund authorized by the Government Losses in Shipment Act, and $51,500 in other appropriations.

The net increase of $148,847 for the Coast Guard is almost entirely accounted for by the following items of increase: Fuel and water, $100,000; outfits, $35,000; communication lines, $21,400; rebuilding and repairing stations, $65,000; and repairs to vessels, $210,347; and by the following decreases: $93,500 for replacement airplanes, $57,000 for pay and allowances, and $125,000 for rebuilding and repairing stations.

The increase of $2,200,000 for the Bureau of Engraving and Printing is necessary to meet the Bureau's increased work program and to provide for the operation of the new annex building which will be completed within the present fiscal year.

The net increase of $664,800 for the Public Health Service results from increases of $307,000 for additional personnel and other expenses required for the hospitals operated by the Service, and $365,000 for 7 months' operation of the new Narcotic Farm at Fort Worth, Tex., and from minor decreases in the amount of $7,200.

The net decrease of $83,700 in the amount requested by the Procurement Division, Public Buildings Branch, results from a nonrecurring item of $100,000 for the rewiring of the Treasury Department Building, and from small increases in the appropriations for personnel and supplies for the operation of public buildings. Items for construction of public buildings are included under General Public Works Program.

There are other increases of $100,000 for personnel for the Division of Research and Statistics, and $180,760 for the Division of Printing.

Permanent appropriations.—There is an increase of $362,500 for payment of interest on funds of the Philippine Government on deposit with the Treasurer of the United States, and an increase of $1,022,000 in expenses of loans under the Public Debt Service.

Trust accounts.—There is an increase of $83,150,840 in trust accounts, due almost entirely to the inclusion in the Budget, for the first time, of estimates covering the investment of and payments from the unemployment trust fund and the investment of interest accruals to the old-age reserve account.

The 1939 estimate for public-debt operations shows for debt-retirement payments an increase of $7,790,000, and for interest payments an increase of $49,000,000.

WAR DEPARTMENT

The total net increase of Budget estimates for the War Department for 1939 over the appropriations for 1938 is $20,129,281, made up as follows: Increases of $50,220 for departmental activities and $20,611,144 for military activities; and a decrease of $532,083 for civil functions including $266,635 for the Panama Canal. There is included elsewhere in the Budget, under the heading "General Public Works Program", estimates totaling $115,348,517 for construction and installation of buildings, utilities, and appurtenances at military posts, for continuing work of improvement on rivers and harbors in the interest of commerce and navigation, and for continuing work of flood control.

Departmental activities.—The above-mentioned net increase of $50,220 for departmental activities is occasioned by increases of $47,220 for additional personnel and for meeting the cost of reclassification of various positions under the Classification Act, and $8,000 for the replacement of unserviceable typewriters and other office devices, and by a reduction of $5,000 for printing and binding.

Military activities.—The estimates for the Finance Department for 1939 show a net increase of $3,745,596 over the appropriations for 1938 and consist principally of increases of $299,048 to cover automatic increases in the base pay of officers; $148,137 for flying pay for officers of the Air Corps; $664,596 for automatic longevity increases in the pay of officers; $1,662,273 for pay of enlisted men, due mainly to a greater average strength of the Army and the necessity of providing additional grades and ratings for enlisted men because of the progress made in the mechanization and motorization of the Army and expansion of the Air Corps; $297,973 for automatic longevity increases in the pay of enlisted men; $327,501 on account of increases in the retired lists of officers and enlisted men; and $250,000 for necessary travel of personnel of the Regular Army. The estimates for 1939 provide for average active strengths of 12,300 commissioned officers, 162,000 enlisted men of the Regular Army, and 6,415 enlisted men of the Philippine Scouts. In addition provision is made for 185 officers of the Corps of Engineers, to be employed on river and harbor and flood-control works and paid from the appropriations for such works.

For the Quartermaster Corps there is a gross increase of $2,800,398, less decreases totaling $1,383,000, leaving a net increase of $1,417,398. The principal items of increase are: For subsistence of the Army, $200,850, due to a larger average number of enlisted men to be subsisted; for regular supplies, $254,520, due principally to increased cost of forage for animals; for clothing and equipage, $1,519,580, due to increased costs, a larger number of enlisted men to be paid clothing savings on discharge, and reduction in stocks for issue; for Army transportation, $547,300, mainly to meet increased needs for the transportation of ordnance and other material from source of manufacture to troops and storage establishments, an increase in pay of water transportation employees, and increased costs of gasoline, fuel oil, and other supplies and materials; and $171,400 for the maintenance, operation, and repair of barracks and quarters. The total decrease of $1,383,000 is almost wholly due to nonrecurring items of land acquisition.

For the Signal Corps a net increase of $2,307,240 is shown, of which $1,020,000 covers the payment of a contract authorization for radio equipment for airplanes provided in the 1938 Appropriation Act, and the balance is principally for new radio equipment for combat organizations of the Army and for the replacement of obsolete or unserviceable radio, telephone, telegraph, and other Signal Corps equipment.

For the Air Corps the appropriation for 1938 was $58,618,406 together with a contract authorization of $19,126,894, making a total availability of $77,745,300. The estimate of appropriation for 1939 is $70,556,972 together with a contract authorization of $19,126,894, or a total availability of $89,683,866. This is an increase over 1938 of $11,938,566. Of this increase $5,457,108 represents the difference between the amount required for payments under the contract authorization in 1938 and the amount required for such purpose in 1939. The balance of the increase consists principally of $500,000 for the procurement of new models of equipment for airplanes in service; $3,143,444 for the procurement of spare engines for new aircraft in a ratio of 75 percent instead of 50 percent, which latter ratio has proven inadequate; $1,623,145 for maintenance of airplanes, due to a larger average number of airplanes to be maintained; $1,276,338 for the procurement of fuel and oil, due to a larger average number of airplanes to be in operation and to increased cost of higher grades of fuel; and $801,636 for labor and material for the maintenance and operation of depots, stations, and organizations, due to the expansion of the Air Corps. These increases are offset by a number of minor decreases, to make the total net increase of $11,938,566.

The 1939 estimates for the Air Corps of the Regular Army provide for the procurement of 394 new airplanes and in the estimates for the Organized Reserves and the National Guard provision has been made for the purchase of a total of 80 planes.

A net increase of $811,725 is shown for seacoast defenses of the United States, Insular Departments, and the Panama Canal. Various phases of the work are handled by the Corps of Engineers, the Signal Corps, the Ordnance Department, and the Coast Artillery Corps. The increases are distributed among a number of items concerned with the construction, maintenance, and repair of fixed fortifications; the procurement, installation, and maintenance of fire-control systems, and antiaircraft and submarine-mine defenses; and the procurement and maintenance of ordnance and ordnance matériel.

For the National Guard there is provided a net increase of $488,493, due principally to increased attendance at armory drills and summer field training camps. For 1939 the estimates provide for a National Guard strength of 205,000 officers and men.

For the Organized Reserves a net increase of $1,373,617 is provided. The principal increases allowed are: $976,974 for the pay and allowances of 307 additional Air Corps Reserve officers for detail with the Regular Army Air Corps, this additional number being required to supplement Regular Army Air Corps officers by reason of expansion of the Air Corps; and $651,734 for active and inactive duty flying of Air Corps Reserve officers for training, and the principal decrease is a reduction of $275,835 because of fewer second lieutenants of the Officers' Reserve Corps to be called to active duty for 1 year with Regular Army units. The 1939 estimates make provision for 14 days' active-duty training of 25,530 Reserve officers; for detail of five such officers with the General Staff for 1 year; for detail on extended active duty with the Regular Army Air Corps of 857 Air Corps Reserve pilots; for attendance of 200 Reserve officers at Regular Army service schools; and for active duty for 12 months with the Regular Army of 500 Reserve officers of the grade of second lieutenant. The estimates also provide for the maintenance and operation of 245 Organized Reserve headquarters in 188 cities; for inactive duty flying of Air Reserve officers; and for extension courses and training manuals for Reserve officers.

For citizens' military training camps the 1939 estimates show a reduction of $1,275,000, and for holding the annual rifle matches at Camp Perry, Ohio, a reduction of $153,726. Provision is made for 1 month's training of 15,000 youths of the Nation, instead of some 35,000 provided for in 1938, and the national matches have been restricted to the scope provided for in 1936. These reductions have been made in order to provide for other more vital needs of national defense.

Civil functions.—The net decrease of $532,083 for civil functions of the War Department, which include the Panama Canal, is largely accounted for by an increase of $494,381 for cemeterial expenses of the Quartermaster Corps, due to the provision of new national cemeteries to replace others which have become filled, and by decreases of $797,508 in contributions for river and harbor improvement and flood control and $313,000 in the requirements for the operation and maintenance of the Panama Canal.

DISTRICT OF COLUMBIA

The estimates of appropriations for the District of Columbia for the fiscal year 1939, together with prior year appropriations, are to be found in an Annexed Budget. The net expenditures to the extent that they affect the general fund of the Treasury are carried to the General Budget Summary and supporting schedules. The appropriation requirements for 1939, insofar as they constitute a charge upon the United States Treasury, are estimated at $5,000,000, the amount appropriated for 1938. The details of the requirements of the District of Columbia are to be found in the summary and supporting schedules of the Annexed Budget.

Statement of proposed expenditures for purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles, for the fiscal year ending June 30, 1939, as required by 5 U. S. C. 78

GOVERNMENT PRINTING OFFICE

Appropriation	For purchase					Old vehicles still to be used	Total maintenance, repair, and operation, all cars	Public purpose and users
	New vehicles (motors unless otherwise indicated)		Old vehicles to be exchanged		Net cost of new cars			
	Number	Gross cost	Number	Allowance (estimated)				
Public printing and binding	2	$1,750	2	$600	$1,150		$1,350	New cars to be used for official business by the officials of the Government Printing Office when in writing ordered by the Public Printer.

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the fiscal year [1938] *1939* any executive department or independent establishment of the Government ordering printing and binding from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office for the year in which the work is done, and be subject to requisition by the Public Printer.

All amounts in the Budget for the fiscal year [1939] *1940* for printing and binding for any department or establishment, so far as the Bureau of the Budget may deem practicable, shall be incorporated in a single item for printing and binding for such department or establishment and be eliminated as a part of any estimate for any other purpose. And if any amounts for printing and binding, including the total cost of work produced on the multilith, multigraph, and other similar equipment, are included as a part of any estimates for any other purposes, such amounts shall be set forth in detail in a note immediately following the general estimate for printing and binding: *Provided*, That the foregoing requirements shall not apply to work to be executed at the Bureau of Engraving and Printing.

No part of any money appropriated in this Act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in the executive branch of the public service of the United States unless such detail be authorized by law (*50 Stat. 185*).

Dedication of Chapels and Memorials in Europe, American Battle Monuments Commission—

[*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That for the purpose of providing for the dedication of the chapels and other World War memorials erected in Europe under the authority of the Act of March 4, 1923 (42 Stat. 1509), there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $175,000, to remain available until June 30, 1938, and to be available for expenditure by the American Battle Monuments Commission for such objects and in such manner as the Commission may deem necessary and proper to accomplish the purposes hereof without regard to the provisions of other laws or regulations relating to the expenditure of public funds except that this exemption shall not be construed as waiving the requirement for the submission of accounts and vouchers to the General Accounting Office for audit. The Commission may utilize the services, materials, supplies, equipment, and other facilities of any other agency of the Government when, in the discretion of such other agency, it is convenient and practicable to furnish the same, the cost thereof to be paid from this appropriation, except that when, in the discretion of the furnishing agency, the public interest will be subserved thereby such services, materials, supplies, equipment, and other facilities may be furnished free of charge to the Commission. The Commission may, within such limits and under such terms and conditions as it may prescribe, delegate to its chairman, secretary, or other designated representatives such of its authority as it may deem necessary and proper in carrying out the purposes hereof. The official delegation designated by the Commission to attend such dedication shall include three Members of the United States Senate, to be appointed by the Vice President or the President pro tempore of the Senate, and three Members of the House of Representatives to be appointed by the Speaker] (*50 Stat. 324–325*).

UNITED STATES MARITIME COMMISSION

Construction Fund, United States Maritime Commission, Act of June 29, 1936, Revolving Fund—

[In addition to the contracts which may be entered into under funds available to the United States Maritime Commission for carrying out the provisions of the Merchant Marine Act, 1936, the Commission is authorized to enter into contracts for further carrying out the provisions of such Act in an amount not to exceed $115,000,000.]

[Out of funds available to the Commission, not to exceed $75,000 may be expended, including payment for obligations heretofore incurred, for the employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, deemed necessary by the Commission, without regard to section 3709 of the Revised Statutes (41 U. S. C. 5): *Provided further*, That such section 3709 shall not apply hereafter to any purchase by or service rendered to the Commission where the aggregate amount involved does not exceed $100] (*50 Stat. 759*).

NOTE.—Created by the Merchant Marine Act, 1936 (49 Stat. 1985–2017), and consisting of funds formerly available to the Shipping Board Bureau, Department of Commerce, and the United States Shipping Board Merchant Fleet Corporation and of the appropriations to the Post Office Department for the transportation of foreign mails under contracts authorized by the Merchant Marine Act of 1928 (less any amounts necessary to be paid out by the Post Office Department) (49 Stat. 1985–2017).

HOME OWNERS' LOAN CORPORATION

Salaries and Administrative Expenses, Home Owners' Loan Corporation—

Not to exceed [$30,000,000] *$28,000,000* of the funds of the Home Owners' Loan Corporation, established by the Home Owners' Loan Act of 1933 (48 Stat. 128), shall be available during the fiscal year [1938] *1939* for administrative expenses of the Corporation, including personal services in the District of Columbia and elsewhere; travel expenses, in accordance with the Standardized Government Travel Regulations and the Act of June 3, 1926, as amended (5 U. S. C. 821–833); printing and binding; law books, books of reference, and not to exceed $500 for periodicals and newspapers; procurement of supplies, equipment, and services; maintenance, repair, and operation of motor-propelled passenger-carrying vehicles, to be used only for official purposes; typewriters, adding machines, and other labor-saving devices, including their repair and exchange; rent in the District of Columbia and elsewhere; use of the services and facilities of the Federal Home Loan Bank Board, Federal home-loan banks, and Federal Reserve banks; and all other necessary administrative expenses: *Provided*, That all necessary expenses (including services performed on a force account, contract or fee basis, but not including other personal services) in connection with the acquisition, protection, operation, maintenance, improvement, or disposition of real or personal property belonging to the Corporation or in which it has an interest, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further*, That except for the limitations in amounts hereinbefore specified, and the restrictions in respect to travel expenses, the administrative expenses and other obligations of the Corporation shall be incurred, allowed, and paid in accordance with the provisions of said Home Owners' Loan Act of 1933, as amended (12 U. S. C. 1461–1468) (*50 Stat. 349*).

FEDERAL HOUSING ADMINISTRATION

Salaries and Expenses, Federal Housing Administration—

Not to exceed [$10,000,000] *$5,000,000 of the mutual mortgage insurance fund and $3,500,000* of the funds advanced by the Reconstruction Finance Corporation to the Federal Housing Administration, created under authority of the National Housing Act of June 27, 1934 (48 Stat. 1246), shall be available during the fiscal year [1938] *1939* for administrative expenses of the Administration, including: Personal services in the District of Columbia and elsewhere; travel expenses, in accordance with the Standardized Government Travel Regulations and the Act of June 3, 1926, as amended (5 U. S. C. 821–833), except employees engaged in the inspection of property may be paid an allowance not to exceed 4 cents per mile for all travel performed by motor vehicle in connection with such inspection *and in addition thereto may be paid for the cost of ferry, bridge, and tunnel tolls*; printing and binding; law books, books of reference, and not to exceed $1,500 for periodicals and newspapers; not to exceed $1,500 for contract actuarial services; procurement of supplies, equipment, and services; maintenance, repair, and operation of motor-propelled passenger-carrying vehicles, to be used only for official purposes; payment, when specifically authorized by the Administrator, of actual transportation expenses and not to exceed $10 per diem in lieu of subsistence and other expenses to persons serving, while away from their homes, without other compensation from the United States, in an advisory capacity to the Administration; not to exceed $2,000 for expenses of attendance, when specifically authorized by the Administrator, at meetings concerned with the work of the Administration; typewriters, adding machines, and other labor-saving devices, including their repair and exchange; rent in the District of Columbia and elsewhere; and all other necessary administrative expenses: *Provided*, That all necessary expenses (including services performed on a contract or fee basis, but not including other personal services) in connection with the operation, maintenance, improvement, or disposition of real or personal property of the Administration acquired under authority of title II of said National Housing Act, shall be considered as nonadministrative expenses for the purposes hereof, and shall be paid from the mutual mortgage insurance fund created by said Act: *Provided further*, That except for the limitations in amounts hereinbefore specified, and the restrictions in respect to travel expenses, the administrative expenses and other obligations of the Administration shall be incurred, allowed, and paid in accordance with the provisions of said Act of June 27, 1934, as amended (12 U. S. C. 1701–1723): *Provided further*, That not exceeding $300,000 of the sum herein authorized [to be advanced from the Reconstruction Finance Corporation] shall be expended in the District of Columbia during the fiscal year [1938] *1939* for purposes of the Public Relations and Education Division (*50 Stat. 350*).

[The paragraph in the Independent Offices Appropriation Act, 1938, under the caption "Federal Housing Administration" is hereby amended by striking out the words and sum "not to exceed $10,000,000" and inserting in lieu thereof "not to exceed $5,000,000 of the mutual mortgage insurance fund and $5,000,000"] (*50 Stat. 758*).

FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

Administrative Expenses, Federal Emergency Administration of Public Works—

No to exceed [$10,000,000 of the amount of $300,000,000 made available, upon the direction of the President, to the Federal Emergency Administration of Public Works by Emergency Relief Appropriation Act of 1936] *$9,000,000, from funds on hand or to be received from the sale of securities*, shall be available during the fiscal year [1938] *1939* for administrative expenses in connection with the liquidation of said Administration, including personal services in the District of Columbia and elsewhere; travel expenses, in accordance with the Standardized Government Travel Regulations and the Act of June 3, 1926, as amended (5 U. S. C. 821–833); printing and binding; law books, books of reference, and not to exceed $500 for periodicals, newspapers, and press clippings; procurement of supplies, equipment, and services; maintenance, repair, and operation of motor-propelled passenger-carrying vehicles, to be used only for official purposes; typewriters, adding machines, and other labor-saving devices, including their repair and exchange; not to exceed $1,000 for expenses of attendance, when specifically authorized by the Administrator, at meetings concerned with the work of the Administration; rent in the District of Columbia and elsewhere; and all other necessary administrative expenses: *Provided*, That except for the limitations in amounts hereinbefore specified, and the restrictions in respect to travel expenses, the administrative expenses and other obligations of the Administration shall be incurred, allowed, and paid in accordance with the provisions of Title II of the National Industrial Recovery Act (*50 Stat. 351*).

[SEC. 204. The paragraph in the Independent Offices Appropriation Act, 1938, under the caption "Federal Emergency Administration of Public Works" is hereby amended by (a) striking out the words "in connection with the liquidation" and (b) striking out the sum of "$10,000,000" and inserting in lieu thereof the sum of "$15,000,000"] (*50 Stat. 358*).

ESTIMATES OF APPROPRIATIONS

Salaries and Expenses, Veterans' Administration—

Administration, medical, hospital, and domiciliary services: For all salaries and expenses of the Veterans' Administration, including the expenses of maintenance and operation of medical, hospital, and domiciliary services of the Veterans' Administration, in carrying out the duties, powers, and functions devolving upon it pursuant to the authority contained in the Act entitled "An Act to authorize the President to consolidate and coordinate governmental activities affecting war veterans", approved July 3, 1930 (38 U. S. C. 11–11f), and any and all laws for which the Veterans' Administration is now or may hereafter be charged with administering, [$94,000,000] *$93,000,000*: *Provided*, That not to exceed $3,500 of this amount shall be available for expenses, except membership fees, of employees, detailed by the Administrator of Veterans' Affairs to attend meetings of associations for the promotion of medical science and annual national conventions of organized war veterans: *Provided further*, That this appropriation shall be available also for personal services and rentals in the District of Columbia and elsewhere, including traveling expenses; examination of estimates of appropriations in the field, including actual expenses of subsistence or per diem allowance in lieu thereof; for expenses incurred in packing, crating, drayage, and transportation of household effects and other property, not exceeding in any one case five thousand pounds, of employees when transferred from one official station to another for permanent duty and when specifically authorized by the Administrator; furnishing and laundering of such wearing apparel as may be prescribed for employees in the performance of their official duties; purchase and exchange of law books, books of reference, periodicals, and newspapers; for passenger-carrying and other motor vehicles, including purchase, maintenance, repair, and operation of same, including not more than two passenger automobiles for general administrative use of the central office in the District of Columbia; and notwithstanding any provisions of law to the contrary, the Administrator is authorized to utilize Government-owned automotive equipment in transporting children of Veterans' Administration employees located at isolated stations to and from school under such limitations as he may by regulation prescribe; and notwithstanding any provisions of law to the contrary, the Administrator is authorized to expend not to exceed $2,000 of this appropriation for actuarial services pertaining to the Government life-insurance fund, to be obtained by contract, without obtaining competition, at such rates of compensation as he may determine to be reasonable; for allotment and transfer to the Public Health Service, the War, Navy, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans' Administration, including minor repairs and improvements of existing facilities under their jurisdiction necessary to such care and treatment; for expenses incidental to the maintenance and operation of farms; for recreational articles and facilities at institutions maintained by the Veterans' Administration; for administrative expenses incidental to securing employment for war veterans; for funeral, burial, and other expenses incidental thereto for beneficiaries of the Veterans' Administration accruing during the year for which this appropriation is made or prior fiscal years: *Provided further*, That the appropriations herein made for the care and maintenance of veterans in hospitals or homes under the jurisdiction of the Veterans' Administration shall be available for the purchase of tobacco to be furnished, subject to such regulations as the Administrator of Veterans' Affairs shall prescribe, to veterans receiving hospital treatment or domiciliary care in Veterans' Administration hospitals or homes: *Provided further*, That this appropriation shall be available for continuing aid to State or Territorial homes for the support of disabled volunteer soldiers and sailors, in conformity with the Act approved August 27, 1888 (24 U. S. C. 134), as amended, for those veterans eligible for admission to Veterans' Administration facilities for domiciliary care.

No part of this appropriation shall be expended for the purchase of any site for or toward the construction of any new hospital or home, or for the purchase of any hospital or home; and not more than [$4,000,000] *$3,100,000* of this appropriation may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans' Administration either by contract or by the hire of temporary employees and the purchase of materials (*5 U. S. C. 673–738; 24 U. S. C. 71–154; 38 U. S. C. 1–724; 50 Stat. 54, 241–242, 345–347, 660–662, 786*).

OFFICE OF THE SECRETARY

SALARIES

Salaries, Office of Secretary of Agriculture—

For the Secretary of Agriculture, Under Secretary of Agriculture, Assistant Secretary, and for other personal services in the District of Columbia, and elsewhere, [$452,700] *$581,920*: *Provided*, That in expending appropriations or portions of appropriations contained in this Act for the payment of personal services in the District of Columbia in accordance with the Classification Act of 1923, as amended, with the exception of the Assistant Secretary, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such Act as amended and in grades in which only one position is allocated the salary of such position shall not exceed the average of the compensation rates for the grade, except that in unusually meritorious cases of one position in a grade advances may be made to rates higher than the average of the compensation rates of the grade but not more often than once in any fiscal year and then only to the next higher rate: *Provided further*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed as of July 1, 1924, in accordance with the rules of section 6 of such Act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade, in the same or different bureau, office, or other appropriation unit, (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by the Classification Act of 1923, as amended, and is specifically authorized by other law, or (5) to reduce the compensation of any person in a grade in which only one position is allocated: *Provided further*, That the Secretary of Agriculture is authorized to contract for stenographic reporting services, and the appropriations made in this Act shall be available for such purposes: *Provided further*, That the Secretary of Agriculture is authorized to expend from appropriations available for the purchase of lands not to exceed $1 for each option to purchase any particular tract or tracts of land: *Provided further*, That not to exceed $40,000 of the appropriations available for salaries and expenses of officers and employees of the Department of Agriculture permanently stationed in foreign countries may be used for payment of allowances for living quarters, including heat, fuel, and light, as authorized by the Act approved June 26, 1930 (5 U. S. C. 118a): *Provided further*, That with the approval of the Secretary of Agriculture employees of the Department of Agriculture stationed abroad may enter into leases for official quarters, for periods not exceeding one year, and may pay rent, telephone, subscriptions to publications, and other charges incident to the conduct of their offices and the discharge of their duties, in advance, in any foreign country where custom or practice requires payment in advance: *Provided further*, That no part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department of Agriculture who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast with respect to future prices of cotton or the trend of same: *Provided further*, That no part of the funds appropriated by this Act shall be used for laboratory investigations to determine the possibly harmful effects on human beings of spray insecticides on fruits and vegetables (*5 U. S. C. 511–517 (secs. 511, 512, establishing Department of Agriculture, apply to all appropriation items of the Department which are not based upon specific legislative authority either incorporated in the language of the item or cited immediately thereunder), 520a; 50 Stat. 395–396*).

SPECIAL RESEARCH FUND, DEPARTMENT OF AGRICULTURE

Special Research Fund, Department of Agriculture—

For enabling the Secretary of Agriculture to carry into effect the provisions of an Act entitled "An Act to provide for research into basic laws and principles relating to agriculture and to provide for the further development of cooperative agricultural extension work and the more complete endowment and support of land-grant colleges", approved June 29, 1935 (7 U. S. C. 427, 427b, 427c, 427f); for administration of the provisions of section 5 of the said Act, and for special research work, including the planning, programming, and coordination of such research, to be conducted by such agencies of the Department of Agriculture as the Secretary of Agriculture may designate or establish, and to which he may make allotments from this fund, including the employment of persons and means in the District of Columbia and elsewhere, and the purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of field work outside the District of Columbia, $1,200,000 (*50 Stat. 399–400*).

Cooperative Agricultural Extension Work—

For the purpose of paying the expenses of cooperative agricultural extension work and the necessary printing and distributing of information in connection with same, the Act of May 8, 1914 (7 U. S. C. 341–348), permanently appropriated $480,000 for each year, $10,000 of which is paid annually to each State which has by action of its legislature assented to the provisions of the Act. It also appropriated an additional sum of $600,000 for the fiscal year following that in which the foregoing appropriation first became available, and for each year thereafter for seven a sum exceeding by $500,000 the sum appropriated for each preceding year, and for each year thereafter there is permanently appropriated the sum of $4,100,000 in addition to the sum of $480,000. The additional sums are allotted annually to each State by the Secretary of Agriculture and paid in the proportion which the rural population of each State bears to the rural population of all the States as determined by the next preceding Federal census, but no payment out of the additional appropriations can be made in any year to any State until an equal sum has been appropriated for that year by the legislature of such State, or provided by State, county, college, local authority, or individual contributions from within the State, for the maintenance of cooperative agricultural extension work. On May 16, 1928 (7 U. S. C. 386–386b), this appropriation was amended to include a permanent allotment to the Territory of Hawaii of $10,000 plus an additional sum of $12,935.43, subject to the same terms and conditions as the original act. The permanent annual appropriation was thereby increased to $4,602,935.43. Under the 1930 census the amount of money available to Hawaii increased by $3,160, thereby automatically raising the total amount available under the original Smith-Lever Act by this amount. The Act of March 4, 1931 (7 U. S. C. 386d–386f) provides that the Smith-Lever Act and Acts supplementary thereto be increased without diminishing the amount now received by any State or other Territory, to carry out the provisions of this Act in the Territory of Puerto Rico and specifies that the appropriation for 1933 and subsequent years shall be $50,000, this amount to be increased by $10,000 annually, or such part thereof as may be necessary, until the total to which Puerto Rico is entitled under the provisions of this Act is reached. [The permanent annual appropriation is thereby increased to $4,701,165.] The maximum for Puerto Rico ($95,069) was reached during the fiscal year 1938, bringing the total permanent annual appropriation to $4,701,165 (*7 U. S. C. 341–348*).

S. C. 95), as amended by the Act of March 4, 1907 (21 U. S. C. 71–94), as extended to equine meat by the Act of July 24, 1919 (21 U. S. C. 96), and as authorized by section 2 (a) of the Act of June 26, 1934 (31 U. S. C. 725a); and for carrying out the provisions of the Act approved March 4, 1913 (21 U. S. C. 151–158), regulating the preparation, sale, barter, exchange, or shipment of any virus, serum, toxin, or analogous products manufactured in the United States and the importation of such products intended for use in the treatment of domestic animals; and for carrying out the provisions of the Packers and Stockyards Act, approved August 15, 1921 (7 U. S. C. 181–229), as amended by the Act of August 14, 1935 (7 U. S. C. 218–218d); and the Secretary of Agriculture, upon application of any exporter, importer, packer, owner, agent of, or dealer in livestock, hides, skins, meat, or other animal products, may, in his discretion, make inspections and examinations at places other than the headquarters of inspectors for the convenience of said applicants and charge the applicants for the expenses of travel and subsistence incurred for such inspections and examinations, the funds derived from such charges to be deposited in the Treasury of the United States to the credit of the appropriation from which the expenses are paid; and to enable the Secretary of Agriculture to collect and disseminate information concerning livestock and animal products; to prepare and disseminate reports on animal industry; to employ [and pay from the appropriation herein made as many] persons *and means* in the city of Washington or elsewhere [as he may deem necessary]; to purchase in the open market samples of all tuberculin, serums, antitoxins, or analogous products, of foreign or domestic manufacture, which are sold in the United States, for the detection, prevention, treatment, or cure of diseases of domestic animals, to test the same, and to disseminate the results of said tests in such manner as he may deem best; to purchase and destroy diseased or exposed animals, including poultry, or quarantine the same whenever in his judgment essential to prevent the spread of pleuropneumonia, tuberculosis, contagious poultry diseases, or other diseases of animals from one State to another, as follows (*5 U. S. C. 511, 512—establishing Department of Agriculture; 7 U. S. C. 391—establishing Bureau of Animal Industry (the foregoing citations apply to all appropriation items under the Bureau); 50 Stat. 403–404*):

[ELIMINATION OF DISEASED CATTLE, DEPARTMENT OF AGRICULTURE]

Elimination of Diseased Cattle, Department of Agriculture—

[For carrying into effect the provisions of section 37 of the Act entitled "An Act to amend the Agricultural Adjustment Act and for other purposes", approved August 24, 1935 (U. S. C., Supp. II, title 7, sec. 612b), $5,119,135, the unobligated balance of the $21,364,000 made available under this head for the fiscal year 1937 by the Agricultural Appropriation Act for that year, and $10,744,865 of the unobligated balance of the funds appropriated by Public Resolution Numbered 27, Seventy-third Congress (48 Stat., p. 805), and reappropriated by said section 37 of the Act approved August 24, 1935, are hereby made available as one fund for obligation during the fiscal year 1938 for the elimination of diseased dairy and beef cattle, including cattle suffering from tuberculosis or Bang's disease, for payments to owners with respect thereto, and for experimentation, as authorized by said section 37, including the employment of persons and means in the District of Columbia and elsewhere, printing and binding, the purchase, maintenance, operation, and repair of passenger-carrying vehicles necessary in the conduct of field work outside the District of Columbia, and other necessary expenses: *Provided*, That $2,000,000 of the amount herein reappropriated may be used only in those States which have made appropriations for indemnifying the owners of cattle reacting to the test for Bang's disease] (*50 Stat. 432–433*).

NOTE.—Provision for continuing the work under the above item during the fiscal year 1939 is contained in the appropriation "Eradicating tuberculosis and Bang's disease, Bureau of Animal Industry."

ERADICATION OF FOOT-AND-MOUTH AND OTHER CONTAGIOUS DISEASES OF ANIMALS

Eradication of Foot-and-Mouth and Other Contagious Diseases of Animals—

Eradication of European Fowl Pest and Similar Diseases in Poultry—

In case of an emergency arising out of the existence of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious disease of animals, which, in the opinion of the Secretary of Agriculture, threatens the livestock industry of the country, he may expend in the city of Washington or elsewhere, any unexpended balances of appropriations heretofore made for this purpose in the arrest and eradication of any such disease, including the payment of claims growing out of past and future purchases and destruction, in cooperation with the States, of animals affected by or exposed to, or of materials contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations: *Provided*, That the payment for animals hereafter purchased may be made on appraisement based on the meat, dairy, or breeding value, but in case of appraisement based on breeding value no appraisement of any animal shall exceed three times its meat or dairy value, and, except in case of an extraordinary emergency, to be determined by the Secretary of Agriculture, the payment by the United States Government for any animals shall not exceed one-half of any such

Total	50,000	50,000	50,000

Total, Forest Service, [$18,892,182] *$18,400,407*, of which amount not to exceed [$61,187] *$57,915* shall be available for the purchase of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of field work outside the District of Columbia, and in addition thereto there is authorized for expenditure from funds provided for carrying out the provisions of the Federal Highway Act of November 9, 1921 (23 U. S. C. 21, 23), not to exceed [$7,803] *$7,087* for the purchase of motor-propelled passenger-carrying vehicles for use by the Forest Service in the construction and maintenance of national-forest roads.

Annual appropriations, general account:

Estimate 1939, **$18,400,407** Appropriated 1938, **$18,892,182**

Special accounts:

Payments to States and Territories from the National Forests Fund—

Twenty-five percent of all money received from each forest reserve during any fiscal year is paid at the end thereof by the Secretary of the Treasury to the State or Territory in which the reserve is situated, to be expended as the State or Territorial legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the forest reserve is situated. When any forest reserve is in more than one State or Territory, or county, the distributive share to each from the proceeds of the reserve is proportional to its area therein (*16 U. S. C. 500*).

Estimate 1939, **$1,275,000** Appropriated 1938, **$1,100,000**
Revised 1938, **$1,200,000**

22 Grants to States: Obligations—1939, $1,275,000; 1938, $1,200,000; 1937, $995,891.

Payments to School Funds, Arizona and New Mexico, National Forests Fund—

At the close of each fiscal year there is paid by the Secretary of the Treasury to each of these two States, as income for its common-school fund, an amount equivalent to such proportion of the gross proceeds of all the national forests within the State as the area of lands granted to the State for school purposes within these forest reserves may bear to the total area of all national forests within these States (*36 Stat. 561*).

Estimate 1939, **$30,000** Appropriated 1938, **$20,000**
Revised 1938, **$30,000**

22 Grants to States: Obligations—1939, $30,000; 1938, $30,000; 1937, $31,685.

Roads and Trails for States, National Forests Fund—

An additional 10 per centum of all moneys received from the national forests during each fiscal year is available at the end thereof, to be expended by the Secretary of Agriculture for the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived (*16 U. S. C. 501*).

Estimate 1939, **$510,000** Appropriated 1938, **$400,000**
