## FOREWORD

This publication presents data from the 1982 Benchmark Survey of U.S. Direct Investment Abroad, conducted by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce. U.S. direct investment abroad exists when one U.S. person owns or controls, directly or indirectly, 10 percent or more of a foreign business enterprise. The last benchmark survey was conducted for 1977; the next survey is scheduled to be conducted for 1989.
In terms of value, the 1982 benchmark survey covered virtually the entire U.S. direct investment universe. The survey collected detailed data on the financial structure and operations of U.S. parent companies and their foreign affiliates in fiscal year 1982. The data cover balance sheets; income statements; property, plant, and equipment; employment; employee compensation; U.S. merchandise trade; sales; technology; taxes; and, for foreign affiliates, external financial position. The survey also collected data on the U.S. direct investment position abroad and on balance of payments transactions between U.S. parent companies and their foreign affiliates in fiscal year 1982. The data for U.S. parent companies may be disaggregated by industry of parent; those for foreign affiliates may be disaggregated by country and industry of affiliate or by industry of U.S. parent.

The survey data will be helpful in formulating U.S. policy regarding direct investment and in analyzing the impact of that policy, and the policies of foreign host countries, on U.S. direct investment. The greater detail on services industries collected in this survey than in past surveys will be used to support U.S. efforts to liberalize world trade and investment in the rapidly growing services sector. In addition, the survey data will enable BEA to derive current universe estimates of direct investment from data collected in sample surveys in nonbenchmark years. They will serve as the benchmark for obtaining annual estimates of the U.S. direct investment position abroad and quarterly estimates of the transactions between parents and affiliates that are included in the U.S. balance of payments and gross national product accounts. They will also be used to expand to universe levels the financial and operating data of U.S. parents and foreign affiliates collected in BEA's new annual sample survey of U.S. direct investment abroad. Finally, the survey will provide extensive new data for researchers in business, labor, government, and universities to use in examining the relationships between direct investment and other economic variables, such as production, trade, and employment. The resulting research should promote a better understanding of the role of direct investment in the U.S. and world economies.

Allan H. Young<br>Director<br>Bureau of Economic Analysis

## ACKNOWLEDGMENTS

The Bureau of Economic Analysis gratefully acknowledges the efforts of the 2,245 U.S. companies that reported in the 1982 Benchmark Survey of U.S. Direct Investment Abroad. The information they provided will promote a better understanding and appreciation of the important role that U.S. multinational companies play in the U.S. and world economies.

The survey was conducted under the supervision of George R. Kruer, Chief, and Betty L. Barker, Assistant Chief, of the International Investment Division (IID), with general direction from Jack J. Bame, Associate Director for International Economics. Betty Barker also wrote the text material for this publication.

The Special Surveys Branch of IID, under the direction of John P. Bogumill, had primary responsibility for conducting the survey, editing and processing the report forms, and preparing the tables. Past and present members of the Branch directly involved were Juris E. Abolins, Margo R. Collier, Shirley J. Davis, Christopher J. Emond, David H. Galler, Maynard R. Guss, Earl F. Holmes, Carol L. Lefkowitz, Jeffrey H. Lowe, John A. Munz, George A. Parker, Willie P. Rivers, and Gwendolyn B. Singleton.

David Galler designed the computer edit checks and wrote the instruction manuals used in processing the data.

Juris Abolins coordinated the final review of the survey results to ensure reasonableness and accuracy. The primary reviewers of the financial and operating data were Leonard A. Lupo, of the Office of the Chief, and Arnold Gilbert, of the Data Retrieval and Analysis Branch; the primary reviewer of the direct investment position and
balance of payments data was Ralph Kozlow, of the Direct Investment Abroad Branch.

Christopher Emond coordinated the design and preparation of the tables in this publication and wrote the computer specifications for the tables.

Arnold Gilbert established a data retrieval system, designed programs to suppress the data for confidentiality reasons, and was responsible for the computer generation of tables. He was under the supervision of Smith W. Allnutt III, Chief of the Data Retrieval and Analysis Branch.

Secretarial services during preparation of the publication were provided by Patricia L. Collins, of IID.

Douglas J. Klear and Judith Dobry, of the Computer Systems and Services Division (CSSD), supervised the computer processing of the data. They were assisted by Marguerite E. Ellis, Effie M. Eason, Elizabeth L. Shumate, and Betty G. McNiel. Ida M. Brown, Chief of Data Conversion, CSSD, supervised the keytaping of the data. The keytape machine operators who worked on the project were Joan O. Adams, Brenda J. Bolden, Elverda M. Cunningham, Anna M. Harrington, Gertrude Jeffrey, Vanessa Marshall, Tandaleyia J. Nicols, Shirley A. Owens, and Ruth M. Scribner.

The manuscript was edited by Dannelet A. Teske, of the Current Business Analysis Division. Publication services were provided by Sybella G'Schwend and the cover was designed by Karin Duggan, of the same Division, under the supervision of Leland L. Scott.

Thanks are also extended to the many other individuals who were involved in the various phases of data preparation and publication, but who were too numerous to list separately.

## METHODOLOGY

## Introduction

Data in this publication are from BEA's BE-10 Benchmark Survey of U.S. Direct Investment Abroad-1982. Reporting in the survey was mandatory under the International Investment Survey Act of 1976 (Public Law 472, 94th Cong., 90 Stat. 2059, 22 U.S.C. 3101 through 3108).

The publication presents 308 tables that contain most of the data collected in the benchmark survey. Some tables present data for several related items disaggregated by country or by industry; others present data for a single item disaggregated by country (or industry) crossclassified by industry (or country).

The amount and type of data collected in the survey differed depending on whether the U.S. parents or foreign affiliates were banks or nonbanks and, for nonbank affiliates, on whether they were majority or minority owned. In this publication, data for foreign affiliates and for their U.S. parents are presented separately for five affiliate groups: (1) all affiliates of all U.S. parents, (2) nonbank affiliates of nonbank U.S. parents, (3) majority-owned nonbank affiliates of nonbank U.S. parents, (4) nonbank affiliates of U.S. parents in banking, and (5) bank affiliates of all U.S. parents: Data for other groups are not presented because of space and resource limitations.

Three related types of data are presented: (1) foreign affiliate financial and operating data, (2) U.S. parent financial and operating data, and (3) direct investment position and balance of payments data. Financial and operating data cover balance sheets; income statements; property, plant, and equipment; employment; employee compensation; U.S. merchandise trade; sales; technology; taxes; and, for foreign affiliates, external financial position. The direct investment position and balance of payments data cover positions and transactions between foreign affiliates and their U.S. parents. Thus, they are the intersection of the financial and operating data of the foreign affiliates with those of their U.S. parents. They are the basis for the official estimates of direct investment that enter the U.S. balance of payments accounts and for the associated direct investment position. Balance of payments data include data on capital flows between U.S. parents and their foreign affiliates, receipts of income and of royalties and license fees by U.S. parents from their foreign affiliates, and other services transactions between parents and affiliates. (Benchmark survey data on U.S. merchandise trade of parents and affiliates are grouped under financial and operating data, rather than balance of payments data, because they are not the source of the official merchandise trade statistics in the U.S. balance of payments accounts.)

In response to the rapid growth of international services transactions in recent years and the recognition that better data on such transactions are needed for policy purposes, the 1982 benchmark survey collected more detail on services than the last (1977) survey. For example, a number of services industry codes for use in classifying U.S. parents and foreign affiliates were added, and total
sales of U.S. parents and foreign affiliates were disaggregated to show sales of services separately from sales of goods. Also, the questions on services transactions between parents and affiliates were redesigned to obtain more complete information.

Two particularly important methodological changes from the 1977 benchmark survey were made in the 1982 survey. First, data were collected on a fiscal-year basis, rather than on the calendar-year basis used in the past. The fiscal-year basis was adopted to reduce the reporting burden on survey respondents. Second, more detailed information on the assets, liabilities, and owners' equity of unincorporated foreign affiliates was required, in order to make the data for such affiliates comparable with those for incorporated affiliates. These and other methodological changes are discussed in more detail below.

## Coverage

A 1982 benchmark survey report was required from every U.S. person (as defined below) having a foreign affil-iate-that is, having direct or indirect ownership or control of 10 percent or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in an unincorporated foreign business enterpriseat any time during its 1982 fiscal year. Reports were required even though the foreign business enterprise may have been established, acquired, seized, liquidated, sold, expropriated, or inactivated during the year.

Each BE-10 report consisted of (1) form BE-10A, which obtained data for the U.S. parent company, and (2) form BE-10B, which obtained data for each of the parent's foreign affiliates that had total assets, sales, or net income of at least $\$ 3$ million (positive or negative), or that owned another foreign affiliate for which a form $\mathrm{BE}-10 \mathrm{~B}$ had to be filed, regardless of the size of its own assets, sales, or net income. On a supplement to form BE-10A, U.S. parents had to list all foreign affiliates that were exempt from being reported on form $\mathrm{BE}-10 \mathrm{~B}$ and give a few selected data items-percentage ownership, total assets, sales, net income, and direct investment position-for each. If all foreign affiliates of a U.S. parent were exempt from being reported on form $\mathrm{BE}-10 \mathrm{~B}$, the U.S. parent was still required to file a form BE-10A, but only to identify itself and the exempt affiliates.
U.S. parents and foreign affiliates in banking-that is, parents and affiliates that had over 50 percent of their total revenues generated by activities classified in the banking industry-were permitted to report less detailed financial and operating data than nonbank parents and affiliates. Less detail was required because most of the information on bank parents and affiliates that was needed for policymaking purposes already had to be reported to other U.S. Government agencies. Shorter, specialized forms for bank parents (form BE-10A BANK) and for bank affiliates (form BE-10B BANK) were substituted for
the standard forms. The reporting criteria for banks, however, were the same as those for nonbanks, except that foreign bank affiliates that were owned indirectly 50 percent or less by their U.S. parents and that did not own another foreign affiliate for which a form BE-10B had to be filed were exempt from being reported, even if their total assets, sales, or net income were $\$ 3$ million or more.
Based on the above criteria, complete BE-10A forms were filed by 2,245 U.S. parents, of which 133 were banks; 1,412 U.S. parents filed only partial BE-10A forms because all their foreign affiliates were exempt. BE-10B forms were received for 18,339 foreign affiliates, of which 882 were banks; 15,311 foreign affiliates were listed by their U.S. parents as exempt from being reported on form BE-10B.
In table 1, foreign affiliates for which BE-10B forms were filed are compared with all foreign affiliates in the 1982 direct investment universe. Affiliates for which BE10B forms were filed accounted for 54.5 percent of the universe in terms of numbers. However, because of the relatively low exemption level on the form, they accounted for almost the entire universe in terms of value- 98.9 percent of total assets, 99.0 percent of sales, and 98.5 percent of the U.S. direct investment position abroad. They accounted for more than 100 percent of net income, because exempt foreign affiliates had, in aggregate, a net loss for the year. Thus, in value terms, coverage of the universe is virtually complete.

Nonbank affiliates for which BE-10B forms were filed accounted for 98.9 percent of total assets, 99.0 percent of sales, 100.4 percent of net income, and 98.4 percent of the U.S. direct investment position of the nonbank affiliate universe. The corresponding percentages for bank affiliates were $98.9,99.3,99.5$, and 99.8 percent, respectively.

All tables in this publication, except table 1, cover only foreign affiliates for which BE-10B forms were filed, and their U.S. parents. Thus, when the term "all foreign affiliates" is used, it refers to all foreign affiliates for which

Table 1.-Foreign Affiliates for Which BE-10B Forms Were Filed in the 1982 Benchmark Survey Compared With the Universe of Foreign Affiliates

|  | Number of affiliates | Millions of dollars |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Total assets | Sales | Net income | U.S. direct investment position abroad |
| Universe of foreign affiliates: |  |  |  |  |  |
| Total ${ }^{1}$............................ | 33,650 | 1,364,077 | 1,037,077 | 35,920 | 210,452 |
| Nonbanks........................ | 32,671 | 783,759 | 949,213 | 31,457 | 200,088 |
| Foreign affiliates for which BE-10B forms were filed: |  |  |  |  |  |
| Total ${ }^{\text {P }}$............................ | 18,339 | 1,348,494 | 1,026,891 | 36,010 | 207,320 |
| Nonbanks........................ | 17,457 | 774,773 | 939,671 | 31,570 | 196,978 |
| Banks ${ }^{1}$............................ | 882 | 573,721 | 87,220 | 4,440 | 10,342 |
| Foreign affiliates exempt from being reported on the BE-10B form: |  |  |  |  |  |
| Total............................... | 15,311 | 15,583 | 10,186 | -90 | 3,132 |
| Nonbanks........................ | 15,214 | 8,986 | 9,542 | -113 | 3,110 |
| Banks..................................... | 97 | 6,597 | 644 | 23 | 22 |
| Addendum-Affiliates for which BE-10B forms were filed as percentage of universe: |  |  |  |  |  |
|  | 54.5 | 98.9 | 99.0 | 100.3 | 98.5 |
| Nonbanks........................ | 53.4 | 98.9 | 99.0 | 100.4 | 98.4 |
| Banks ${ }^{1}$........................... | 90.1 | 98.9 | 99.3 | 99.5 | 99.8 |

1. Sales were not reported on the BE-10B BANK form. Thus, in this table, total income is used in place of sales for bank affiliates.

BE-10B forms were filed, not to the universe of affiliates shown in table 1.

## Basic concepts and definitions

This section describes the basic concepts and definitions used in the 1982 benchmark survey. Major differences from the concepts and definitions used in the 1977 benchmark survey, and from those used since 1977 in other BEA surveys of U.S. direct investment abroad, are noted.
Direct investment.-Direct investment implies that a person in one country has a lasting interest in, and a degree of influence over the management of, a business enterprise in another country. For the United States, ownership or control by a single person of 10 percent or more of an enterprise's voting securities, or the equivalent, is considered evidence of such a lasting interest or degree of influence over management. Thus, U.S. direct investment abroad is the ownership or control, directly or indirectly, by one U.S. person of 10 percent or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in an unincorporated foreign business enterprise. Any U.S. investment abroad that is not direct investment by this definition is considered portfolio investment; such investment was not covered by the 1982 benchmark survey.
"Person" is broadly defined to include any individual, branch, partnership, associated group, association, estate, trust, corporation or other organization (whether or not organized under the laws of any State), and any government (including a foreign government, the U.S. Government, a State or local government, and any agency, corporation or financial institution, or other entity or instrumentality thereof, including a government-sponsored agency). This definition treats an associated group as a single person. An associated group consists of two or more persons who, by the appearance of their actions, by agreement, or by an understanding, exercise their voting privileges in a concerted manner to influence the management of a business enterprise. The following are deemed to be associated groups: (1) members of the same family, (2) a business enterprise and one or more of its officers and directors, (3) members of a syndicate or joint venture, or (4) a corporation and its domestic subsidiaries. Even if each member of such an associated group owns less than 10 percent of a business enterprise, as long as all members combined own at least 10 percent, direct investment is considered to exist. The members of the group are considered to influence or control management in a manner comparable to that of a single person with the same total ownership interest.
Because direct investment is defined from a singleowner viewpoint, investment by a U.S. person of less than 10 percent in a foreign business enterprise is not considered direct investment, even if another U.S. person has an interest of a least 10 percent, unless both U.S. persons are members of an associated group. Thus, if one U.S. person owns 11 percent and another owns 9 percent, the 11-percent interest is included, but the 9 -percent interest is excluded. The person with the less-than-10-percent interest, by itself, is not considered to have sufficient ownership to influence management.

A U.S. person's direct investment ownership interest in a foreign business enterprise may be held directly, indirectly, or both. It is directly held if the U.S. person itself holds the ownership interest in the foreign business enterprise. It is indirectly held if the U.S. person holds an ownership interest in another foreign business enterprise that, in turn, directly or indirectly owns the given foreign business enterprise. Any number of tiers of ownership may intervene between a direct investor and an indirectly owned enterprise. A U.S. person's percentage of indirect voting ownership in a given foreign business enterprise is equal to the direct voting ownership percentage of the U.S. person in the first foreign business enterprise in the ownership chain, times that first enterprise's direct ownership percentage in the second enterprise in the chain, times the corresponding percentages for all other intervening enterprises in the chain, times the last intervening enterprise's direct ownership percentage in the given foreign business enterprise. If more than one ownership chain between a U.S. person and a given foreign business enterprise exists, the percentages of direct and indirect ownership in all chains are summed to determine the U.S. person's direct investment ownership percentage.

Only ownership percentages in the portion of an ownership chain that extends from the U.S. border outward enter into the above calculation. Ownership percentages in any portion of the chain that reenters or falls entirely within the United States do not enter into the calculation.

Determination of place of residence.-The "United States" means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and all U.S. territories and possessions. "Foreign" means that which is situated outside the United States, or which belongs to or is characteristic of a country other than the United States. A U.S. person is any person resident in, or subject to the jurisdiction of, the United States, and a foreign person is any person resident outside the United States or subject to the jurisdiction of a country other than the United States. Thus, in determining whether a direct investor or the business enterprise owned by a direct investor is a U.S. or foreign person, country of residence, not country of citizenship, is used.

Individuals are considered residents of, or subject to the jurisdiction of, the country in which they are physically located, as long as they reside or expect to reside in the country for 1 year or more. Under this rule, individuals who reside or expect to reside outside their country of citizenship for less than 1 year are considered residents of their country of citizenship, whereas individuals who reside or expect to reside outside their country of citzenship for 1 year or more are, with two exceptions, considered residents of the country in which they are residing. One exception is an owner or employee of a business enterprise who is residing outside the enterprise's country of location in order to further its business, where the enterprise's country is the same as the country of citizenship of the owner or employee. In this case, the owner or employee is considered a resident of the country of citizenship, even if he or she is outside that country for 1 year or

[^0]more, as long as he or she intends to return in a reasonable period of time. The other exception is that individuals and members of their immediate families who reside outside their country of citizenship as a result of employment by the government of that country-such as diplomats, consular officials, or members of the armed forces-are considered residents of their country of citizenship regardless of their length of stay elsewhere.
U.S. parent.-A U.S. parent is a U.S. person who has direct investment-that is, who has a 10 -percent-or-more direct or indirect ownership interest in a foreign business enterprise. If incorporated, the U.S. parent is the fully consolidated U.S. enterprise, consisting of (1) the U.S. parent corporation whose voting securities are not owned more than 50 percent by another U.S. corporation, and (2) proceeding down each ownership chain from that U.S. corporation, any U.S. corporation (including Domestic International Sales Corporations) whose voting securities are more than 50 percent owned by the U.S. corporation above it. All other U.S. corporations and all foreign business enterprises owned by the U.S. parent are excluded from the full consolidation. If a majority-owned (that is, more than 50 percent owned) domestic subsidiary of a U.S. parent is normally excluded from the parent's full consolidation in reports to stockholders-because, for example, the subsidiary is a finance company but the parent is a manufacturer, or the subsidiary's operations are otherwise unrelated to those of the parent-BEA nonetheless preferred that the subsidiary be consolidated on the U.S. parent's report form. In lieu of consolidation, the subsidiary's data could be either combined or aggregated on the U.S. parent's form or reported on a separate form. (In aggregation or combination, transactions between related entities are not eliminated, whereas, in consolidation, they are.) Aggregation, combination, or consolidation of such corporations may affect the industry classification of the U.S. parent or the industry distribution of the U.S. parent's data, if the corporation being aggregated, combined, or consolidated is in an industry different from that of the U.S. parent's other domestic operations.

A U.S. parent is a "person" in the broad sense defined above. Thus, it may be a business enterprise; a religious, charitable, or other nonprofit organization; an individual; a government; an estate or trust; etc. Most U.S. parents, however, are business enterprises. A business enterprise is any organization, association, branch, or venture, including ownership of any real estate, that exists for profitmaking purposes or to otherwise secure economic advantage.

Where a U.S. individual or other nonbusiness person (such as a nonprofit organization or a government) owns more than 50 percent of a U.S. business enterprise that, in turn, owns a foreign business enterprise, the U.S. business enterprise, not the individual or other nonbusiness person, is considered the parent. This treatment ensures that financial and operating data of the U.S. business enterprise are included in the U.S. parent data, and data on the transactions and positions of the U.S. business enterprise with the foreign business enterprise are included in the foreign affiliate data reported to BEA. Any direct transactions or positions of the individual or other nonbusiness person with the foreign business enterprise have to be reported by the U.S. business enterprise and are, therefore, also included in the direct investment accounts.

Although the U.S. Government may have equity investment in a foreign business enterprise, such investment is not covered by BEA's direct investment surveys. Data on such investment are reported to other agencies and are included by BEA in the Government or military accounts, rather than in the direct investment accounts, of the U.S. balance of payments.
In the case of a U.S. estate, the estate itself, not its beneficiary, is considered the U.S. parent. For a U.S. trust, however, either the beneficiary or the creator of the trust may be considered the U.S. parent with respect to any investments of the trust, depending on the circumstances. The creator is considered the parent if there is a reversionary interest-that is, if the interest in the trust may be returned to the creator after a period of time-or if the creator is a corporation or other organization that designates its own shareholders or members as beneficiaries. In all other cases, the beneficiary is considered the parent.

Foreign affiliate.-A foreign affiliate is a foreign business enterprise in which there is U.S. direct investmentthat is, it is a foreign business enterprise that is directly or indirectly owned or controlled by one U.S. person to the extent of 10 percent or more of the voting securities for an incorporated business enterprise or an equivalent interest for an unincorporated business enterprise. The affiliate is called a foreign affiliate, to denote that it is located outside the United States (although the direct investment interest in it is owned by a U.S. person).

A business enterprise, and therefore an affiliate, may be either incorporated or unincorporated. Unincorporated business enterprises may include branches, partnerships, and sole proprietorships. In fact, however, all unincorporated foreign affiliates reported in the 1982 benchmark survey were either branches or partnerships; there were no sole proprietorships.

A branch consists of operations or activities in one location that a person in a second location conducts in its own name, rather than through an entity incorporated in the first location. For example, if a person in country $X$ carries out operations in country $Y$ in its own name, rather than by incorporating the operations in country $Y$, the country Y operations are considered a branch. By definition, a branch is wholly owned. A branch located abroad but owned by a U.S. person is a foreign affiliate. If a company is incorporated in the United States, but carries out substantially all of its operations abroad, its foreign operations are treated by BEA as a branch (and, therefore, as a foreign affiliate) even though the U.S. company itself may consider the operations to be an integral part of, and would normally consolidate them with, its own operations and accounts.

In general, a U.S. person's foreign operations or activities are considered a foreign affiliate if they are legally or functionally separable from the domestic operations or activities of the U.S. person. In most cases, it is clear whether the foreign operations or activities constitute an affiliate. For example, if the operation or activity is incorporated abroad-as is true in the majority of cases-it is always considered a foreign affiliate. Even if it is unincorporated, the foreign operation or activity is usually legally or functionally separable from the U.S. person's domestic operations or activities. In cases where it is not clearly separable, the determination of whether the operation or activity
constitutes a foreign affiliate is made on a case-by-case basis, depending on the weight of the evidence.

Factors that would tend to indicate that the operation or activity is a foreign affiliate are:

1. It pays foreign income taxes.
2. It has a substantial physical presence abroad, as evidenced by plant and equipment, or by employees, that are permanently located abroad.
3. Separate financial records are kept on the foreign activity or operation that would allow preparation of financial statements, including a balance sheet and income statement, for it. (A mere record of disbursements to, or receipts from, the foreign activity would not constitute a "financial statement" for this purpose.)
4. It takes title to the goods it sells and receives revenues therefrom.
5. It receives funds for its own account from customers for services it performs.
Factors that would tend to indicate that it is not a foreign affiliate are:
6. It engages only in sales promotion or public relations types of activities.
7. It conducts business abroad for the U.S. person's account and not for its own account.
8. It has no separate financial statements.
9. It receives funds to cover its expenses only from the U.S. person.
10. It pays no foreign income taxes.
11. It has limited physical assets or employees permanently located abroad.
Foreign stations, ticket offices, and terminal or port facilities of a U.S. airline or ship operator that provide services only to the airline's or ship operator's own operations are not considered foreign affiliates and are excluded from U.S. direct investment abroad. The reason is that most of the revenues-such as passenger fares and freight charges-collected by these facilities are generated by the travel and transportation services rendered by the airline or ship operator of which they are a part, not by the activities of these facilities per se. However, if the foreign stations, ticket offices, or terminal and port facilities provide services primarily to unaffiliated persons, rather than to the U.S. airline or ship operator that owns them, they are considered foreign affiliates and are included in direct investment.

Ownership of real estate for profitmaking purposes is defined to be a business enterprise. Real estate held exclusively for personal use is exempt from being reported in BEA direct investment surveys and is excluded from the data in this publication. A residence that is leased to others by an owner who intends to reoccupy it is considered real estate held for personal use.
In the benchmark survey, each foreign affiliate had to be reported separately unless the recordkeeping system of the affiliate made this impossible or extremely difficult. In that case, an affiliate could have been consolidated with other foreign affiliates in the same country, if the affiliates were also in the same three-digit industry or were integral parts of the same business operation. ${ }^{2}$ (As an exam-

[^1]ple of the latter, if German affiliate A manufactured tires and a majority of its sales were to German affiliate B, which manufactured autos, then affiliates $A$ and $B$ could have been consolidated.) Under no circumstances could affiliates in different countries be consolidated; this rule facilitated the classification of affiliates and their data by individual country.

## Accounting principles

Use of generally accepted accounting principles.-In the benchmark survey, data were required to be reported as they would have been for purposes of preparing stockholders' reports, rather than for tax or other purposes. Thus, U.S. generally accepted accounting principles (GAAP) were followed unless otherwise indicated by the survey instructions. The survey instructions departed from GAAP in cases where the departure would have resulted in data that were conceptually or analytically more useful or appropriate for direct investment purposes. This was the case, for example, with the unique consolidation rules discussed above for affiliates and for U.S. parents.

Exchange gains and losses and translation adjust-ments.-Monetary amounts were reported to BEA in U.S. dollars. The report forms specified that, when a foreign affiliate's assets, liabilities, revenues, and expenses were denominated or measured on the affiliate's financial statements in a foreign currency, they must be translated into dollars using GAAP. Under GAAP, either Financial Accounting Standards Board Statement No. 8 or 52 (FASB 8 or FASB 52) could be used to translate 1982 data. (GAAP required companies to use FASB 52 for fiscal years beginning on or after December 15, 1982. For earlier years, use of FASB 52 was encouraged but not required; thus, for 1982, some companies had switched to FASB 52 while others continued to use FASB 8.)

Under FASB 8, the balance sheet is divided into monetary and nonmonetary accounts. Monetary accounts, which consist of cash and items settled in cash, are translated at current exchange rates, that is, at rates in effect on the balance sheet date. Nonmonetary accounts are translated at historical exchange rates, that is, at rates in effect when the asset was acquired or liability incurred. Most income statement items are translated at weightedaverage exchange rates for the period, as a proxy for using the rate in effect on the date each revenue or expense transaction occurred; however, revenues and expenses related to nonmonetary assets or liabilities, such as depreciation, are translated at historical exchange rates. Under FASB 8, the entire effect of changes in exchange rates on affiliates' balance sheets and income statements is included in affiliates' net income.

Under FASB 52, all assets, liabilities, revenues, and expenses are translated at current exchange rates. For assets and liabilities, the exchange rate at the balance sheet date is used. For revenues and expenses, weightedaverage exchange rates for the period are used. Under FASB 52, gains and losses resulting from translating for-eign-currency-denominated assets, liabilities, revenues, and expenses into the affiliates' principal, or functional, currency at exchange rates that differ from those used in the prior period are included in net income. Also included
in net income are gains and losses from translating foreign affiliates' income statements from their functional currency into U.S. dollars at exchange rates different from those in the prior period. Most other gains and losses, whether realized or unrealized, are excluded from affiliates' net income and, instead, are taken directly to a separate component of owners' equity, entitled "translation adjustments." Gains and losses taken directly to the translation adjustment account include gains and losses resulting from translating opening balances for foreign affiliates' assets and liabilities at exchange rates different from those for closing balances, and from foreign currency transactions that hedge the net investment in a foreign affiliate against changes in exchange rates. For a more complete description of translation procedures, refer to FASB 8 and FASB 52.

In this publication, the treatment of exchange gains and losses and translation adjustments in the income statements of foreign affiliates is as reported in the benchmark survey. Thus, for companies that used FASB 8, all effects of exchange rate changes on affiliates' financial statements are included in affiliates' net income, whereas, for companies that used FASB 52, only a portion of those effects are included. The effects of exchange rate changes that are not included in net income under FASB 52 were reported in the benchmark survey, together with certain extraordinary gains and losses, as a separate item, outside the income statement. That item, "capital gains/losses not included in income," is shown as an addendum to the income statements of foreign affiliates in tables II.D1, II.D2, II.D8, III.D1, III.D2, and III.D8 of this publication.

For balance of payments purposes, all exchange gains and losses and translation adjustments are included in direct investment income, even though they may be excluded from net income for income statement purposey. Direct investment income is intended to reflect all the benefits a U.S. parent receives from its investments in affiliates, whether in the form of ordinary income, extraordinary income, or other income-type items. Thus, exchange gains and losses, translation adjustments, and extraordinary gains and losses that are excluded from affiliates' reported net income for income statement purposes are added to reported net income by BEA in computing direct investment income for balance of payments purposes.

In the 1977 benchmark survey, all companies had to translate their financial statements in accordance with FASB 8, because FASB 52 had not yet been instituted. Thus, in that survey, all exchange gains and losses were included in net income for income statement purposes, as well as in direct investment income for balance of payments purposes.

For companies that switched from FASB 8 to FASB 52 during 1982, income statement accounts were calculated in conformance with FASB 52. In the balance sheet, the opening balances were translated based upon FASB 8 and the closing balances were translated based upon FASB 52. The one-time revaluation of U.S. parents' equity in their foreign affiliates that resulted from the switch is considered to be a valuation adjustment to the direct investment position and, therefore, is excluded from direct investment income and capital flows.

Table 2.-Selected Data for All Foreign Affiliates and All U.S. Parents, by Fiscal-Year Ending Date

|  | Total | Fiscal-year ending date |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

1. Sales were not reported on the BE-10A BANK and BE-10B BANK forms. Thus, in this table, total income is used in place of sales for bank parents and affiliates.

## Fiscal-year reporting

Data for foreign affiliates and U.S. parents were required to be filed on a fiscal-year basis. An affiliate's or parent's 1982 fiscal year was defined to be the affiliate's or parent's financial reporting year that ended in calendar year 1982.

The 1982 benchmark survey is the first BEA survey of U.S. direct investment abroad to collect data on a fiscalyear basis. ${ }^{3}$ Previously, BEA's annual data on U.S. direct investment abroad were reported on, or close to, a calen-dar-year basis or, in the case of annual direct investment position and balance of payments data, were derived by aggregating reported quarterly data to approximate a cal-endar-year total. Reporting was changed to a fiscal-year basis in the 1982 benchmark survey to reduce the reporting burden on respondents.

Because data from the benchmark survey are on a fiscal-year basis, they are not comparable with other BEA data that are on a calendar-year basis. The extent of noncomparability depends, in part, on the number and size of foreign affiliates or U.S. parents whose fiscal years do not correspond to the calendar year. Table 2 shows the number of, and selected data items for, foreign affiliates and U.S. parents, classified by the affiliate's or parent's fiscal-year ending date. Table 3 shows the number and total assets of foreign affiliates further disaggregated by industry and by country of affiliate, crossclassified by the affiliate's fiscal-year ending date, and table 4 shows the number and total assets of U.S. parents further disaggregated by industry of U.S. parent, crossclassified by the parent's fiscal-year ending date.

In 1982 , only 59.8 percent of foreign affiliates and 63.0 percent of U.S. parents had fiscal years that corresponded exactly to the calendar year. In most cases, however, these affiliates' and parents' shares of the reported data of all affiliates and parents were considerably higher. For example, their shares of assets were 80.0 and 90.0 percent, and their shares of sales 74.0 and 78.0 percent, respectively. Thus, affiliates and parents whose fiscal years did not correspond to the calendar year accounted for proportionately smaller shares of the reported data than their numbers might imply. However, the actual difference between the data reported in the benchmark survey and the data that

[^2] was the first to collect fiscal-year data.
would have been reported if these affiliates and parents had been on a calendar-year basis is unknown.
For financial and operating data, fiscal-year reporting affects comparability with past, but not future, BEA data, because future BEA surveys that collect such data will also generally be on a fiscal-year basis. For direct investment position and balance of payments data, comparability of the benchmark survey data with both past and future estimates of these items in the U.S. balance of payments accounts and in the annual series on the direct investment position is affected, because these estimates have been, and will continue to be, on a calendar-year basis. Thus, the 1982 benchmark survey data cannot be entered directly into the U.S. balance of payments accounts or used to compute the 1982 estimates for the annual series on the direct investment position. Rather, the data must first be adjusted to a calendar-year basis. The adjusted data are scheduled for publication in the June and August 1986 issues of the Survey of Current Business. The unadjusted fiscal-year data are presented in this publication because they are comparable to the fiscal-year financial and operating data from the benchmark survey.

## Confidentiality

Under the International Investment Survey Act of 1976, the direct investment data collected by BEA are confidential; thus, they cannot be published "in such a manner that the person to whom the information relates can be specifically identified." Access to the data is limited to officials and employees (including consultants and contractors and their employees) of the Government agencies that are specifically designated by the President to perform functions under the act. The act further specifies that the information collected under it must be used for statistical and analytical purposes only. For example, use of an individual person's data for regulatory purposes is prohibited.

Data in the tables in this publication were suppressed (that is, not shown) if showing them might disclose the data for individual companies. The suppression procedure used consisted of three steps:

1. A key item was selected from a group of related items. For example, total assets was selected as the key item for most individual asset items, total income for most individual income statement items, etc.
2. In all tables containing that key item, the data in each country, industry, or country-industry cell for the item was subjected to a suppression analysis. Objective criteria were used to determine whether an individual company's data might be disclosed if data in the cell were published. If these criteria were met, the data in the cell were suppressed.
3. If the data in a cell for the key item were suppressed, then the data in the comparable cell for all items related to that key item, whether in the same or another table, were also suppressed.
A "(D)" entered in a data cell indicates that the data were suppressed for confidentiality reasons.
Although other Federal agencies have used suppression procedures based on key items for their data, this is the
first time that BEA has used such a procedure for its direct investment data. In previously published data on direct investment, data for every item, not just for key items, were individually subjected to a suppression analysis. Following a review of other agencies' suppression procedures, BEA has determined that the new method will continue to permit confidentiality requirements to be met while allowing the publication of more data at significant savings in time and cost.

## Classification procedures

Country classification.-Each foreign affiliate is classified by its country of location, that is, the country in which the affiliate's physical assets are located or where

Table 3.-Number and Total Assets of All Foreign Affiliates, Industry and Country of Affiliate by Fiscal-Year Ending Date

${ }^{\text {D }}$ Suppressed to avoid disclosure of data of individual companies.
its primary activity is carried out. In most cases, the country of location of a business enterprise is the same as its country of organization or incorporation. However, in some cases, a business enterprise is incorporated in one country, but part or all of its physical assets are located, or its activities carried out, in a second country.
If all its physical assets or operations are located outside its country of incorporation, the enterprise is treated as an incorporated foreign affiliate in the country where its physical assets and operations are located. No foreign affiliate is considered to exist in the country of incorporation, because the entity there is only a shell or paper company, and transactions would not normally occur with it. If, however, an enterprise has some physical assets or operations in each country, it is considered two separate af-filiates-an incorporated affiliate located in the country of incorporation and an unincorporated affiliate (a branch) located in the other country.

There are two exceptions to these general rules. First, if a business enterprise incorporated in one foreign country has physical assets or operations in more than one other foreign country, an incorporated foreign affiliate is deemed to exist in the country of incorporation, even though the enterprise may have no physical assets or operations in that country. Unincorporated foreign affiliates (branches) are deemed to exist in each of the other foreign countries. In effect, the affiliate in the country of incorporation is considered a holding company whose assets are the equity it holds in the unincorporated affiliates in the other countries. Second, if a business enterprise incorporated abroad by a U.S. person conducts its operations from, and has all of its physical assets in, the United States, it is treated as an incorporated foreign affiliate in the country of incorporation, even though it has no oper-
ations or physical assets there. This treatment ensures that the foreign entity is reported to BEA.
In the 1977 benchmark survey, enterprises whose physical assets or operations were located completely outside their countries of organization were handled on a case-bycase basis. Thus, an enterprise that, in 1982, is considered one affiliate, located in the same country as its physical assets or operations, may, in 1977, have been considered two affiliates, one in the country where its physical assets or operations were located and another in the country of organization.
Balance of payments transactions involving a given affiliate are classified in the affiliate's country of location, even when they are with a third-country transactor rather than with the affiliate itself-as when a U.S. parent purchases an affiliate's capital stock from a person in a country other than the affiliate's country of location. The direct investment capital flows resulting from the transaction are classified in the country of the affiliate because such flows change the U.S. direct investment position in that country. (However, the associated settlement flows, which are included in the portfolio investment accounts of the U.S. balance of payments, are likely to be classified in the country of the foreign transactor.)

Unless otherwise specified, the designation "by country" in a table title in this publication indicates that the data in the table are disaggregated by country of foreign affiliate. If a different method of country disaggregation is used, it is so specified in the table title. Also, to avoid confusion as to whether country of affiliate or some other method of disaggregation was used-for example, trade data could be disaggregated either by country of affiliate or by country of origin or destination-the one used is explicitly stated in the table title.

[^3]Table 5 presents selected data for all foreign affiliates of all U.S. parents, classified by country of affiliate; each individual country in which U.S. direct investment in 1982 was reported is shown separately and is grouped by geographic area. Due to confidentiality requirements and space limitations, many countries could not be shown separately in the other tables in this publication. However, the individual countries included in a country group shown in the other tables may be determined, and their relative sizes assessed, by referring to table 5 .

In this publication, the "International" category consists of affiliates that have operations spanning more than one country and that are engaged in petroleum shipping, other water transportation, and oil and gas drilling. Affiliates in these industries that have operations entirely in one country are classified in that specific country. Thus, an affiliate engaged in shipping goods among countries is classified in "International," whereas one engaged in local coastal or inland shipping is classified in the country along whose coast or on whose waterways it is operating. Similarly, an oil rig that was moved from place to place during the year is classified in "International," but one that was stationary for the entire year is classified in the country where it was located.
Industry classification.-Each U.S. parent or foreign affiliate is classified by industry using a three-stage procedure based on sales (total income for holding companies):
(1) A given U.S. parent or foreign affiliate was classified in the major industry group that accounted for the largest percentage of its sales. The major industry groups used for this purpose were (a) agriculture, forestry, and fishing, (b) mining, (c) petroleum, (d) construction, (e) manufacturing, (f) transportation, communication, and public utilities, (g) wholesale trade, (h) retail trade, (i) finance, insurance, and real estate, and ( $j$ ) services.
(2) Within the major industry group, the U.S. parent or foreign affiliate was then classified in the two-digit industry in which its sales were largest. A two-digit industry was defined for this purpose to consist of all three-digit subindustries that have the same digits in the first two places of their three-digit code. ${ }^{4}$
(3) Within its two-digit industry, the U.S. parent or foreign affiliate was then classified in the three-digit subindustry in which its sales were largest.

If, at any of these three stages, two or more categories accounted for the same percentage of sales, classification was based on subjective judgment.

This procedure ensured that the U.S. parent or foreign affiliate was not assigned to a three-digit subindustry that was outside its major industry, even if its sales in that subindustry exceeded its sales in the largest three-digit subindustry within its major industry. It also ensured that the U.S. parent or foreign affiliate was not assigned to a three-digit subindustry that was outside its two-digit industry, even if its sales in that subindustry exceeded its sales in the largest subindustry within its two-digit indus-

[^4]try. For example, suppose a parent's or affiliate's sales were distributed as follows:

|  | Sales |  |  |
| :---: | :---: | :---: | :---: |
| Industry code | (Percentage of total) |  |  |
| 351 | 5 |  |  |
| 352 | 10 | 30 | 55 |
| 353 | 15 |  |  |
| 367 | 25 |  |  |
| 508 | 45 |  |  |

where industry codes $351,352,353$, and 367 are in manufacturing and code 508 is in wholesale trade. Because 55 percent of the parent's or affiliate's sales were in manufacturing and only 45 percent were in wholesale trade, the parent's or affiliate's major industry is manufacturing. Because 30 percent of its sales within manufacturing were in two-digit industry 35 (nonelectrical machinery)-that is, the sum of the percentages in 351,352 , and 353 is 30 per-cent-and 25 percent were in two-digit industry 36 (electrical machinery), the parent's or affiliate's two-digit industry is 35 . Finally, because its sales within industry 35 were largest in subindustry 353, the parent's or affiliate's three-digit subindustry is 353 . Thus, the three-stage classification procedure results in the parent or affiliate being assigned to subindustry 353, even though its sales in that subindustry were smaller than its sales in either subindustries 508 or 367.
The 1982 benchmark survey is the first BEA survey of U.S. direct investment abroad to use the three-stage classification procedure. In past surveys of such investment, a two-stage procedure was used. In the two-stage procedure, a parent or affiliate was classified in the largest threedigit subindustry within its major industry group, regardless of whether that subindustry was also in the parent's or affiliate's largest two-digit industry. Under the threestage procedure used in 1982, the three-digit industry in which the parent or affiliate is classified had to be in the largest two-digit industry. The effect of the new procedure, however, is small, and resulted in a different classification for only a few parents and affiliates.
Unless otherwise specified, the designation "by industry" in the title of a table in this publication indicates that the data in the table are disaggregated (1) by industry of foreign affiliate, if the table presents foreign affiliate financial and operating data or balance of payments and direct investment position data, or (2) by industry of U.S. parent, if the table presents U.S. parent financial and operating data. If a different basis of disaggregation is used, it is so specified in the table title, as when affiliate data are disaggregated by industry of U.S. parent.
The industry classification system used by BEA for direct investment purposes is adapted from, but not identical to, the Enterprise Standard Industrial Classification (ESIC) Manual, 1974. (The ESIC, in turn, is related to the Standard Industrial Classification (SIC) Manual, 1972; the ESIC is designed for classifying an enterprise as a whole, whereas the SIC is designed for classifying individual establishments within pn enterprise. The 1982 benchmark survey collected data at the enterprise, not the establishment, level.) A list and description of the codes used are

[^5]found in the Direct Investment Industry and Foreign Trade Classifications Booklet, which is reprinted in the appendix.

To conform to the ESIC system, petroleum is not listed as a major industry group in the booklet. Rather, the three-digit subindustries within petroleum are spread among the other major industries-for example, crude petroleum extraction is in mining, petroleum refining is in manufacturing, gasoline service stations are in retail trade, etc. For direct investment classification and publication purposes, however, these various petroleum subindustries are pulled together and petroleum is considered a separate major industry group.
U.S. parents that are individuals, estates, or trusts have been classified in a separate industry, "nonbusiness entities, except Government," which, in this publication, is treated as part of the major industry "finance, insurance, and real estate." This industry is included on tables that disaggregate affiliate data from the $\mathrm{BE}-10 \mathrm{~B}$ forms by industry of U.S. parent. It is not included on tables containing U.S. parent financial and operating data from the BE10A forms because U.S. parents that were individuals, estates, or trusts were not required to report financial and operating data.
Since the 1977 benchmark survey was conducted, a number of changes in BEA's direct investment industry classifications have been made. Some codes, particularly in the services industries, have been split into two or more new codes to permit further disaggregation of the data. The expansion of the services industry codes was in response to recent demands by users for more detailed information on U.S. international services transactions. Specifically, former code 479 ("transportation, warehousing, terminal facilities, travel agents, and related services, n.e.c.") has been split into new codes 401, 475, and 477; former code 610 ("finance, except banking") has been split into new codes 611 and 612; former code 630 ("insurance carriers, agents, brokers, and services") has been split into new codes 631,632 , and 639 ; and former code 899 ("other personal and business services, n.e.c., provided on a commercial basis") has been split into new codes 733, 734, 735, 736, 737, 739, 890, 892, 895, 896, and 897. (See the Direct Investment Industry and Foreign Trade Classifications Booklet for the titles of the new codes.) In addition, a few codes were combined with other codes or were deleted. Finally, the titles of a number of codes were shortened, or changed to conform more closely to those in the 1974 ESIC manual, with no substantive impact.

Table 6 presents selected data for all foreign affiliates and all U.S. parents, classified by industry; each threedigit subindustry is shown separately, and is grouped by the major industry to which it belongs. Due primarily to confidentiality requirements, many of the three-digit industry categories are not shown separately in the other tables in this publication. However, the individual industries included in an industry group shown in the other tables may be determined, and their relative sizes assessed, by referring to table 6.

Although each U.S. parent and foreign affiliate is classified in a single industry based on its major activity, a given parent or affiliate may have had activities in more than one industry. Thus, the distribution of data by industry of U.S. parent or foreign affiliate may differ from the distribution that would have resulted if the data for each
of a parent's or affiliate's activities were separately classified and the resulting data were summed, by activity, across all parents or affiliates. Distributions of the latter type are more indicative than those by industry of enterprise, of the actual activities in which the parents or affiliates are engaged. Such distributions were obtained in the 1982 benchmark survey for sales, employment, and several employment-related items for production workers, of U.S. parents. For foreign affiliates, they were obtained for only one data item-sales.

Sales by each parent and affiliate were required to be distributed among three-digit industries, primarily for purposes of assigning an industry code to the parent or affiliate. Each U.S. parent was further required to distribute its employment among those industries in which it also had sales and to distribute its other employment-related items among those manufacturing industries in which it also had sales. ${ }^{5}$ By summing these data across parents and affiliates, data disaggregated by industry of sales can be derived. The distribution by industry of sales roughly approximates the distribution that would have resulted if the data were reported and classified at the establishment, rather than the enterprise, level.

In table 7, U.S. parents' sales and employment disaggregated by industry of sales are compared with U.S. parents' sales and employment disaggregated by industry of parent, and foreign affiliates' sales disaggregated by industry of sales are compared with affiliates' sales disaggregated by industry of affiliate. (For nonbank parents of majori-ty-owned nonbank affiliates, data by industry of sales crossclassified by industry of parent are shown in table III.N2 for sales and III.O2 for employment; for nonbank affiliates of nonbank parents and for majority-owned nonbank affiliates of nonbank parents, affiliates' sales by industry of sales crossclassified by industry of affiliate are shown in tables II.E17 and III.E17, respectively.)

For sales, differences between the distribution by industry of enterprise and the distribution by industry of sales were much larger for U.S. parents than for foreign affiliates, primarily because U.S. parents are more diversified than their affiliates. Their greater diversity, in part, reflects the much greater degree of consolidation of U.S. parents. As noted earlier, parents were required to report on a fully consolidated domestic basis, regardless of the industry classification of the individual domestic subsidiaries included in the consolidation. Foreign affiliates, in contrast, could be consolidated only if they were in the same country and were classified in the same three-digit industry.

## Financial and operating data for foreign affiliates and U.S. parents

Financial and operating data include, among other things, data on balance sheets and income statements; external financial position; property, plant, and equipment;

(*) Less than $\$ 500,000( \pm)$ or 50 employees.
${ }^{0}$ Suppressed to avoid disclosure of data of individual companies.

1. Sales were not reported on the BE-10B BANK form. Thus, in this table, total income is used
in place of sales for bank affiliates.
in place of sales for bank affiliates.
petroleum and mining exploration and development expenditures; employment and employee compensation; U.S. merchandise trade; technology; investment incentives; and performance requirements (requirements imposed by foreign governments as a condition for affiliates to operate in their countries).

Foreign affiliate financial and operating data were collected in parts I, II, IV, and V of the BE-10B (or part II of the 10B BANK) form. The most detail-covering all of the types of data listed above-was obtained for majorityowned nonbank affiliates. (A majority-owned affiliate is one in which the combined direct and indirect ownership interest of all U.S. parents exceeds 50 percent.) For minor-ity-owned nonbank affiliates, complete balance sheets, income statements, and data on investment incentives and performance requirements were obtained; however, among the other types of financial and operating data, only seven items-U.S. merchandise exports shipped to affiliates by U.S. parents and by other U.S. persons; U.S. merchandise imports shipped by affiliates to U.S. parents and to other U.S. persons; property, plant, and equipment expenditures; total employment; and total employee compensa-tion-were requested. The least detail-seven items-was obtained for bank affiliates.
U.S. parent financial and operating data were collected in part II of the BE-10A (or 10A BANK) form. As in the case of affiliates, much more detail was obtained for nonbank parents than for bank parents. Nonbank parents had to provide complete balance sheets and income statements and considerable detail for some of the other types of financial and operating data, such as technology; property, plant, and equipment; employment and employee compensation; and U.S. merchandise trade. Bank parents, on the other hand, had to complete only five items.

Most of the concepts and definitions used in reporting the financial and operating data can be found on the BE10 forms or in the Instruction Booklet to the forms; the forms and Instruction Booklet are reproduced in the appendix to this publication. The following discussion focuses on conceptual, definitional, or statistical issues that require further explanation or that are not covered in the forms or Instruction Booklet.

General validity of data.-All financial and operating data reported for foreign affiliates and U.S. parents were required to pass certain basic computerized edit checks. The data were also reviewed by BEA for consistency with related data from other parts of the report form for the same affiliate or parent, with comparable data reported by other affiliates or parents, and with data available from outside sources. As a result of this process, a number of changes to the reported data were made, usually after consultation with reporters. However, some data items on the forms were not integrated with, or related to, data from other parts of the forms and could not be checked thoroughly. Consequently, these data are more likely to be subject to both reporting errors and underreporting than the integrated data. Particularly subject to error and underreporting were the data for bank parents and affiliates, the seven selected items listed above for minority-owned nonbank affiliates, and the data on employment, trade, technology, performance requirements, investment incentives, production royalty payments, taxes other than income and payroll taxes, and subsidies for nonbank parents and majority-owned nonbank affiliates.

In some cases, reporters had difficulty supplying the required information because the data were not easily accessible or were unavailable from their financial accounting records. Data on trade and employment were especially difficult for reporters to provide. For these data, reporters often made estimates, the quality of which is difficult to assess.

Balance sheet.-Balance sheet data for unincorporated foreign affiliates were reported differently in the 1982 benchmark survey than in past benchmark surveys of U.S. direct investment abroad. In the 1982 survey, receivables from, and liabilities to, these affiliates' U.S. parents and other owners had to be disaggregated among the various asset and liability categories in the balance sheet. (Similar disaggregation was required for data on the composition of the external financial position and for balance of payments data-see discussion of the direct investment position and balance of payments data below.) In previous benchmark surveys, in contrast, such receivables and liabilities were netted against each other and the net amount was reported as part of the single item, total owners' equity in unincorporated foreign affiliates, in the balance sheet.

Reporting for unincorporated foreign affiliates was changed in the 1982 benchmark survey so that treatment of these affiliates would parallel that of incorporated affiliates. This change was possible because, over time, accounting procedures for unincorporated businesses have become more like those for incorporated businesses.

Two conceptual issues relating to the balance sheets of insurance companies were encountered during processing of the benchmark survey. The first issue arose because insurance companies normally do not distinguish between current and noncurrent items in their balance sheets, as required by the survey. Making the distinction was particularly difficult in the case of marketable securities held by the insurance companies. The treatment of such securities thus varied from company to company. Some treated them as current, because they viewed them primarily as short-term reserves against losses that could be quickly sold or liquidated, even though the length of time to maturity exceeded 1 year. Others treated them as noncurrent, because they viewed them primarily as long-term investments, even though the securities might have to be sold or liquidated quickly in the event of insurance losses. In processing the data, it was decided to treat all marketable securities held by insurance companies as noncurrent. Therefore, for both U.S. parents and foreign affiliates in insurance, "other" current assets-which consisted largely of marketable securities-were combined with, and are shown in this publication as part of, "other noncurrent investments."

The second conceptual issue concerned the treatment of real estate investments of insurance companies. These investments could have been included in several different accounts in the balance sheet. A number of companies included them in the property, plant, and equipment account. That account, however, was intended to include only real estate actually used or occupied by the insurance companies, such as the buildings and premises used for their offices; it was not intended to include real estate held for investment purposes. In processing the data, real estate investments of the larger parents and affiliates were excluded from the property, plant, and equipment

[^7]account, and were included instead in "other noncurrent assets." For most analytical purposes, however, a broader measure of the stock of property, plant, and equipmentdefined to include property, plant, and equipment wherever carried in the balance sheet-is desirable. This broader concept is used in tables II.L1 and III.L1 for U.S. parents, and in tables III.C1, III.C2, and III.C3 for affiliates, in this publication.

Income statement.-In the 1982 benchmark survey, income statements of foreign affiliates and U.S. parents were reported in accordance with GAAP. The income statements of foreign affiliates, as reported in the 1982 survey, differ conceptually from those reported in the 1977 benchmark survey, primarily because of differences in the treatment of exchange gains and losses. As noted earlier, some companies that, in 1977, used FASB 8 as the basis for accounting for exchange gains and losses in their affiliates' income statements had, by 1982, shifted to using FASB 52 instead. (See discussion of exchange gains and losses and translation adjustments above.)

For affiliates or U.S. parents engaged in the extraction of natural resources, net income is after deduction of book depletion, that is, those expenses representing the periodic chargeoff of the actual cost of capital assets related to the extraction of natural resources. Tax or percentage depletion is not deducted. The deduction of book, rather than tax or percentage, depletion is in conformance with GAAP. Book depletion is deducted because it reflects the actual cost incurred in purchasing the property containing the natural resources, acquiring the mineral rights, etc. Tax or percentage depletion, on the other hand, may bear no relationship to the actual cost incurred.

Sales.-Sales are defined as gross sales minus returns, allowances, and discounts, or gross operating revenues, both exclusive of sales and consumption taxes levied directly on consumers, net value-added taxes, and excise taxes levied on manufacturers, wholesalers, or retailers. On the BE-10A BANK and BE-10B BANK forms, sales were not reported. Thus, in this publication, sales of parents and affiliates for which BE-10A BANK or BE-10B BANK forms were filed are considered to be equal to their total income, which was reported.

In the 1982 benchmark survey, for the first time, total sales by U.S. parents and by majority-owned nonbank foreign affiliates had to be disaggregated to show sales of goods separately from sales of services. For this purpose, sales of goods were defined as those sales associated with industries coded in the $000,100,200,300$, or 500 series, except 070,108 , and 138 ; sales of services were defined as those sales associated with industries coded in the 400 , 600,700 , or 800 series, or in codes 070,108 , or 138 . (See the Direct Investment Industry and Foreign Trade Classifications Booklet, reprinted in the appendix, for a description of these codes.) When a sale consisted of both goods and services and the two components could not be unbundled because, for example, the goods and services were not separately billed, the total sale was classified as a good or service depending upon which component accounted for the most value.

Total sales by majority-owned nonbank affiliates also had to be disaggregated by destination to show local sales, sales to the United States, and sales to other countries. Local sales of a given affiliate are sales charged by the af-
filiate to persons in its own country of location. All sales by affiliates classified in "International" are considered local.

Employment and employee compensation. -In the benchmark survey, employment was defined as the number of full-time and part-time employees on the payroll at the end of fiscal year 1982. A count taken during, rather than at the end of, fiscal year 1982 was acceptable if it was a reasonable proxy for the end-of-year number. In either case, if employment was unusually high or low because of temporary factors (for example, a strike) or large seasonal variations, the number that reflected normal operations, or an average for fiscal year 1982, was required.

This definition differed from the one used in the 1977 benchmark survey. In that survey, employment was defined as the average number of full-time and part-time employees for the reporting period; an end-of-year figure was permitted only if employment did not vary significantly during the year due to temporary or seasonal factors. The change in definition between the 1977 and 1982 surveys was made to ease the reporting burden on respondents, most of whom found an end-of-period figure easier to provide than an average. The change, which was primarily one of emphasis, probably does not significantly affect the comparability of the 1977 and 1982 data.

Employment of U.S. parents can be classified both by industry of parent and, for the first time, by industry of sales. As discussed in the industry classification section, the latter is based on information supplied by each U.S. parent on employment in the individual three-digit industries in which it also had sales. Employment of foreign affiliates can be classified by industry of affiliate but not by industry of sales. The information needed for the latter classification was not obtained in the 1982 benchmark survey, because the 1977 survey results had indicated that most affiliates, unlike most U.S. parents, had sales and, therefore, employment in only one or two three-digit industries. The 1982 survey confirms the 1977 results; it shows that, in 1982, fewer than 10 percent of foreign affiliates had sales in more than two industries. Thus, the distribution of affiliate employment by industry of sales probably would not differ significantly from that by industry of affiliate.

The employment and employee compensation data from the benchmark survey can be used to compute compensation per employee or wages and salaries per employee for U.S. parents and foreign affiliates. The resulting rates, however, may be misleading (and, thus, are not shown in this publication) for two reasons. First, in the employment data, a part-time employee is counted the same as a fulltime employee. Thus, compensation per employee and wages and salaries per employee may vary across parents or affiliates simply because of differences in the number of their part-time workers. Second, compensation per employee and wages and salaries per employee may be distorted by data for businesses or business segments acquired or sold during the year. For a newly acquired business, for example, reported compensation data often covered only the portion of the year that the business was in the universe. Employment of the business, however, was reported as of yearend. When compensation data are only for a portion of the year, but employment is as of yearend, compensation per employee and wages and salaries per employee are understated.

When using the 1982 benchmark survey data, better measures of compensation for U.S. parents and foreign affiliates than either compensation per employee or wages and salaries per employee are hourly compensation and wage rates. The information needed to derive hourly compensation and wage rates was collected in the survey for production workers of those U.S. parents and foreign affiliates that had manufacturing activities. (The data were collected only for production workers because data on hours worked by nonproduction workers are generally not maintained by reporters and because aggregate hourly compensation and wage rates for the United States and foreign countries, to which the benchmark survey data might be compared, are limited to production workers.) U.S. parents had to report the data separately for each manufacturing industry in which they had sales. Thus, data on hourly compensation and wage rates paid to the parents' manufacturing production workers can be disaggregated by industry of sales as well as by industry of parent. Unlike U.S. parents, for each of these data items, affiliates had to report only one number covering all manufacturing industries in which they had sales. Consequently , for affiliates, no disaggregation of hourly compensation and wage rates by industry of sales is possible. However, as noted earlier, most affiliates had sales in only one industry so that hourly rates by industry of sales would probably not differ significantly from those by industry of affiliate.

For U.S. parents, tables II. 03 and III. 03 in this publication show employment, compensation, and hourly rates of production workers associated with the parents' manufacturing sales, disaggregated by industry of sales. Table III. 04 shows the parents' data disaggregated by industry of parent.
In the 1977 benchmark survey, employment and compensation data for both parents and affiliates could be disaggregated only by industry of enterprise. For U.S. parents, therefore, table III. 04 , rather than table II. 03 or III.03, in this publication should be used for comparison with the 1977 data.

It should be noted, that, for both parents and affiliates, the 1982 data disaggregated by industry of enterprise cover only production workers that (1) are engaged in manufacturing activities and (2) are employed by parents or affiliates classified in manufacturing. The published data from the 1977 benchmark survey covered production workers employed by parents and affiliates classified in manufacturing, regardless of whether those workers were actually engaged in manufacturing activities. ${ }^{6}$ The differences between the two sets of data, however, are probably small, because parents and affiliates in manufacturing have relatively few production workers engaged in nonmanufacturing activities.
U.S. merchandise trade.-The concepts and definitions underlying the data on U.S. merchandise trade of U.S. parents and foreign affiliates are nearly identical to those used for the all-U.S. merchandise trade data compiled by

[^8]the Census Bureau. The trade data were particularly difficult for reporters to provide, but BEA's review of the data indicates that, except as noted below, they are probably reasonably comparable with the Census data.

The benchmark survey forms asked that the U.S. merchandise trade data be reported on a "shipped" basisthat is, on the basis of when, where, and to (or by) whom the goods were physically shipped-in order for them to be comparable with the Census data. However, most reporters keep their books on the "charged" basis-that is, on the basis of when, where, and to (or by) whom the goods were charged. Differences between these two bases can be substantial. Such differences may arise, for example, when a U.S. parent buys goods from an affiliate in country A and sells them to an affiliate in country B, but the goods are shipped directly from country A to country B. When it records the transactions on its books, the U.S. parent would show a purchase charged to it from country A and a sale charged by it to country B. If the parent's trade data were reported on the charged basis in the benchmark survey, the purchase and sale would have appeared as a U.S. import and U.S. export, respectively. However, the goods never physically entered or left the United States and, on a shipped basis, should have been recorded neither as a U.S. import nor as a U.S. export.
Based on its review, BEA believes most data were reported on a shipped rather than on a charged basis. However, some reporters had difficulty obtaining data on a shipped basis, which usually required use of shipping department invoices rather than accounting records. BEA required revised reports to be filed when it determined that the data were on a charged basis. However, some cases of erroneous reporting were probably not identified or corrected.

Another difference between the trade data in this publication and the Census trade data is that the former are on a fiscal-year basis while the latter are on a calendar-year basis. Although this could be an important source of noncomparability between the two sets of data, the extent of such noncomparability is unknown.

It should also be noted that Census and BEA trade data come from two different sources-the BEA data are based on company records, whereas the Census data are compiled from export and import documents filed by shippers with the U.S. Customs Service on each individual transaction. The timing, valuation, origin or destination, shipper, and product involved in a given export or import transaction may have been recorded differently on company records and on the Customs export and import documents.
In this publication, exports and imports of U.S. parents and foreign affiliates are disaggregated into 12 product categories, based on the Standard International Trade Classification, Revision 2 (United Nations Statistical Papers, Series M, No. 34/Rev. 2), hereinafter referred to as the SITC. (See the Direct Investment Industry and Foreign Trade Classifications Booklet, pages 21-24, for a description of the categories used.)
Several problems of classification in the benchmark survey were observed. One was in the classification of certain parts and accessories for transportation equipment. In the SITC, some transport equipment parts that are shipped separately are included in "road vehicles and parts" or in "other transport equipment," based on the part's end use; other parts are included in SITC categories
appropriate to the type of part, based on the principal material from which it is made or on its general function. Some reporters had difficulty distinguishing in their records between parts that should have been included in "road vehicles and parts" or "other transport equipment" and parts that should have been included in other categories. BEA reviewed reports with large trade values and, after discussions with reporters, revised those with incorrect reporting. However, reports with low values were not reviewed and, in some cases, reporters may have erroneously included both types of parts in "road vehicles and parts" or "other transport equipment." Thus, these two categories may be overstated and other categories, particularly machinery, may be understated to an unknown extent.

Another classification problem involved soybean exports. In the SITC, soybeans, other oil seeds, and oleaginous fruit are included in "crude materials, inedible, except fuels." Some reporters, however, incorrectly included these products in "food and live animals chiefly for food." Reports with large values were reviewed by BEA and revised data were obtained for those reports found to be incorrect.
Total U.S. trade associated with U.S. parents and their foreign affiliates consists of (1) trade between U.S. parents and their foreign affiliates, (2) trade between other U.S. persons and foreign affiliates, and (3) trade between U.S. parents and unaffiliated foreigners. Data on trade between U.S. parents and their foreign affiliates were collected on both the BE-10A and BE-10B forms; on the BE10A form, total trade of a given U.S. parent with all of its foreign affiliates combined was reported, while on the BE10B form, trade of the U.S. parent with only the individual foreign affiliate covered by that form was reported. In theory, the sum of a U.S. parent's trade with each of its individual foreign affiliates, as reported on the BE-10B forms for those affiliates, should equal the parent's total trade with all of its affiliates combined, as reported on the parent's BE-10A form. In fact, however, the sum of the data from the affiliates' $\mathrm{BE}-10 \mathrm{~B}$ forms may not equal the total reported on their parent's $\mathrm{BE}-10 \mathrm{~A}$ form because of differences in timing and valuation, and because the parent's BE-10A form may include data for affiliates that are exempt from being reported on the BE-10B form. In this publication, the data on trade between parents and affiliates used in computing total U.S. trade associated with U.S. parents and their foreign affiliates are derived from the affiliates' BE-10B forms rather than from the U.S. parents' $\mathrm{BE}-10 \mathrm{~A}$ forms. (The data derived from the parent's BE-10A forms are shown as an addendum only.) Data on trade between other U.S. residents and foreign affiliates are also derived from the affiliates' $\mathrm{BE}-10 \mathrm{~B}$ forms. However, data on trade between U.S. parents and unaffiliated foreigners are from the parents' $\mathrm{BE}-10 \mathrm{~A}$ forms.

## Direct investment position and balance of payments data

The direct investment position and balance of payments data cover U.S. parents' positions in, and transactions with, their foreign affiliates; in contrast, affiliate financial and operating data, discussed above, cover the activities of the foreign affiliates themselves, including positions in,
and transactions with, them by all persons, not just their U.S. parents. For example, the U.S. direct investment position abroad is equal to U.S. parents' equity in, and net outstanding loans to, their foreign affiliates; foreign affiliates' total assets, in contrast, are equal to the sum of total owners' equity in affiliates held by both U.S. parents and all other persons and total liabilities owed by affiliates to both U.S. parents and all other persons.

Data for the position and balance of payments items were reported in part III of the $\mathrm{BE}-10 \mathrm{~B}$ (or $\mathrm{BE}-10 \mathrm{~B}$ BANK) form. The balance of payments items consist primarily of transactions between parents and their affiliates, or transactions between parents and other persons that change the parents' equity in their affiliates. Beginning with the publication of estimates based on the 1982 benchmark survey, the major items that will appear directly in the U.S. balance of payments accounts for U.S. direct investment abroad are:

- Direct investment capital outflows
- Direct investment income
- Direct investment royalties and license fees
- Other direct investment services

As discussed earlier, the direct investment position and balance of payments data collected in the 1982 benchmark survey and shown in this publication are on a fiscal-year basis, whereas the data in the U.S. balance of payments accounts and in BEA's annual series on the direct investment position have been, and will continue to be, on a cal-endar-year basis. When data from the 1982 benchmark survey are incorporated into the U.S. balance of payments accounts and the annual series on the position, they will be adjusted to a calendar-year basis. These adjusted data for 1982 will also be extrapolated forward to derive universe estimates for subsequent calendar years based on sample data for those years. The adjusted 1982 data and the estimates for calendar years 1983-85, based on the adjusted 1982 data, are scheduled for publication in the June and August 1986 issues of the Survey of Current Business.

The position and balance of payments data included here differ from data from the 1977 benchmark survey because the basis of reporting for unincorporated affiliates differs. As noted earlier, reporting for these affiliates was changed to make it comparable with that for incorporated affiliates. Thus, in the 1982 benchmark survey, unincorporated affiliates' payables to, and receivables from, their U.S. parents had to be disaggregated among the various payable and receivable categories in the affiliates' intercompany accounts; in the 1977 benchmark survey, the net amount of such payables and receivables, together with the U.S. parents' equity position in the affiliates, were reported in a single summary account. Also, in the 1982 survey, earnings of unincorporated affiliates were disaggregated into the portion distributed to U.S. parents and the portion reinvested in the affiliates, whereas in the 1977 survey all such earnings were reported as a single item. Although these changes do not affect the totals for the direct investment position or the major items that appear directly in the U.S. balance of payments accounts, they do affect the individual components of these items.

Data on the new basis for unincorporated affiliates have been reported in BEA's quarterly sample surveys since 1982, in anticipation of their being used to extrapolate for-
ward the data from the 1982 benchmark survey to derive universe estimates for subsequent years. However, the 1982 benchmark survey data have not been available until now. BEA nevertheless published preliminary estimates on the new basis for 1982 forward in the June and August 1984, and June and August 1985, issues of the Survey. The estimates consisted primarily of the reported sample data, but were reasonably complete because the reported data covered such a large proportion of the universe of unincorporated affiliates. ${ }^{7}$ Revised universe estimates extrapolated from the 1982 benchmark survey data are scheduled for publication in the June and August 1986 issues of the Survey.
U.S. direct investment position abroad.-As noted above, the U.S. direct investment position abroad is equal to U.S. parents' equity in, and net outstanding loans to, their foreign affiliates. The position may be viewed as the U.S. parents' contribution to the total assets of their foreign affiliates or as financing provided by U.S. parents to their affiliates in the form of either equity or debt. The data are derived from the foreign affiliates' books at yearend.
U.S. parents' equity in incorporated foreign affiliates consist of the U.S. parents' holdings of capital stock in, and other capital contributions to, their affiliates and U.S. parents' equity in the retained earnings of their affiliates.

Capital stock includes all stock of affiliates, whether common or preferred, voting or nonvoting. Other capital contributions by U.S. parents, also referred to as the U.S. parents' equity in additional paid-in capital, consist of capital, invested or contributed, that is not included in capital stock, such as amounts paid for stock in excess of its par or stated value, capitalizations of intercompany accounts (conversions of debt to equity) that do not result in the issuance of capital stock, and donations. U.S. parents' equity in retained earnings is the U.S. parents' shares of the undistributed earnings of their incorporated foreign affiliates.
U.S. parents' equity in unincorporated affiliates consists of U.S. parents' shares of the affiliates' total owners' equity. No breakdown of owners' equity by type was obtained for these affiliates.
The U.S. parents' net outstanding loans to their fureign affiliates, also referred to as the affiliates' net intercompany account payables to U.S. parents, consist of trade accounts and trade notes payable, other current liabilities, and long-term debt owed by the affiliates to their U.S. parents, net of similar items due to the affiliates from their U.S. parents.

Intercompany accounts include the net book value of all capital leases and of operating leases of more than 1 year. The net book value of property leased to a foreign affiliate by its U.S. parent is included in affiliates' payables, and the net book value of property leased by a foreign affiliate to its U.S. parent is included in affiliates' receivables. Capital leases recognize that title to the leased property will be transferred to the lessee at the termination of the lease-similar to an installment sale. Operating leases have a term that is signficantly shorter than the expected useful life of the tangible property being leased, and there

[^9]is usually an expectation that the leased property will be returned to the lessor at the termination of the lease. For capital leases, the net book value of the leased property is the amount of principal payments remaining due; for operating leases of more than 1 year, the net book value is the original cost of the leased property less accumulated depreciation.
Intercompany accounts also include outstanding funds borrowed from unaffiliated foreigners and then reloaned to U.S. parents by Netherlands Antilles finance affiliates. Typically, Netherlands Antilles finance affiliates have been established to provide U.S. parents with a means of raising funds abroad without having the associated interest payments subjected to a 30 -percent U.S. withholding tax on interest payments to foreigners. ${ }^{8}$ The payments were exempted from the withholding tax by a treaty between the United States and the Netherlands Antilles. The funds reloaned to parents have been included in the intercompany accounts and, hence, in the U.S. direct investment position abroad since 1977; before 1977, they were treated as direct borrowing by the U.S. parents from unaffiliated foreigners and were included in portfolio investment. Under the present treatment, the funds reloaned to U.S. parents are recorded in the intercompany accounts as receivables by the Netherlands Antilles finance affiliates from their U.S. parents. Such receivables, when netted against payables, reduce affiliates' net intercompany account payables to U.S. parents and, hence, the direct investment position.

As a result of the change in treatment of unincorporated affiliates discussed earlier, U.S. parents' equity in, and intercompany accounts with, these affiliates, which previously were reported together in a single summary account, were, in the 1982 benchmark survey, reported separately. The equity portion is now included, together with equity in incorporated affiliates, as part of U.S. parents' shares of total owners' equity in all affiliates, and the intercompany account portion is included, together with intercompany accounts of incorporated affiliates, as part of intercompany accounts of U.S. parents with all foreign affiliates. The intercompany account portion is further disaggregated into payables and receivables.

For affiliates that are banks, the direct investment position is defined to include only their pareats' permanent debt and equity investment in them; similarly, the direct investment flows that enter the U.S. balance of payments accounts for these affiliates include only transactions related to such permanent investment. All other transactions and positions-mainly claims and liabilities arising from the parents' and affiliates' normal banking busi-ness-are excluded from the direct investment accounts because they are more properly included with other banking claims and liabilities in the portfolio investment accounts.
The definition of permanent investment may vary somewhat from bank to bank. Examples of such investment are funds from parents that are used to establish or acquire the affiliates or that finance the affiliates' purchases of property, plant, and equipment.
The relationship between a U.S. parent and its foreign affiliate may be a two-way one, in which each may have debt and equity investment in the other. Thus, a U.S.

[^10]parent may have investment in a foreign affiliate that, in turn, has investment in it as a result of the affiliate's lending funds to, or acquiring voting securities or other equity interest in, the U.S. parent. As discussed earlier, in the intercompany accounts of the position, affiliate receivables from their U.S. parents (reverse debt investment) are netted against affiliate payables to their U.S. parents. The question arises as to whether affiliates' equity investment in their U.S. parents (reverse equity investment) should also be netted against the U.S. parents' equity investment in them. Conceptually, one can argue that reverse equity, as well as debt, investment should be netted to obtain an accurate measure of the net investment by U.S. parents in affiliates. This was the treatment before 1977, but, in some instances, it resulted in double-counting among the various accounts of the U.S. international investment position and in the capital accounts of the U.S. balance of payments. Therefore, since 1977, reverse equity investment of foreign affiliates in their U.S. parents has not been netted against analogous investment of U.S. parents in their affiliates. It is instead included in the foreign direct investment position in the United States if the affiliate's ownership in its U.S. parent is 10 percent or more, or in the foreign portfolio investment position in the United States if the affiliate's ownership is less than 10 percent. However, reverse debt investment continues to be netted. ${ }^{9}$

The direct investment position at the end of a year is equal to the position at the beginning of the year plus the change in the position during the year. The change during the year is the sum of direct investment capital outflows and valuation adjustments. Direct investment capital outflows are defined below. Valuation adjustments are broadly defined to include all changes in the position other than capital outflows. Such changes primarily reflect differences between transactions values on U.S. parents' books, which are used by BEA to record capital outflows, and book values on foreign affiliates' books, which are used to record the position and, hence, changes in the position. For example, they include differences between the proceeds from and the book values of affiliates that are sold or liquidated by U.S. parents; differences between the purchase price and the book values of affiliates that are acquired by U.S. parents; and writeoffs resulting from uncompensated expropriations of affiliates. As noted earlier, valuation adjustments also include the one-time adjustment to owners' equity made by affiliates that, during 1982, switched from using FASB 8 to using FASB 52 as the basis for translating their financial statements from foreign currencies into U.S. dollars. (See the section on exchange gains and losses and translation adjustments.)

In theory, the direct investment position could be based either on the books of U.S. parents or on the books of foreign affiliates. Traditionally, it has been based on the foreign affiliates' books because the valuation method used on affiliates' books-that is, historical cost-is usually fairly consistent from affiliate to affiliate, while that used

[^11]on U.S. parents' books may vary from parent to parent. For example, depending on their percentage ownership, some parents may use the cost method while others may use the equity method of valuing investments (if the cost method is used, the U.S. parents' equity in retained earnings since acquisition or establishment would be excluded). Still other parents may use market values or may write off the excess of market value over book value, either in whole or in part. In contrast to the position, most balance of payments flow items-equity capital and intercompany debt outflows, distributed earnings, interest, royalties and license fees, and other services transactions-are based on the books of the U.S. parents. This is mainly because, for balance of payments purposes, transactions values-which may be available only from the U.S. parents' books-are required. (For example, when a U.S. parent purchases or sells an affiliate's stock to or from an unaffiliated third party, the transaction is recorded only on the parent's books, not on the affiliate's books.)

Direct investment capital outflows.-Direct investment capital outflows consist of equity capital outflows, reinvested earnings, and intercompany debt outflows. As a result of the change in treatment of unincorporated affiliates discussed earlier, direct investment capital outflows to such affiliates, which previously were shown together as a single summary account, have been split into the equity capital, reinvested earnings, and intercompany debt components. Each component is combined with the corresponding component for incorporated affiliates to obtain a total for all affiliates. In the few cases where equity capital flows of an unincorporated affiliate could not be separated from intercompany debt flows, the entire amount is considered equity capital.

Equity capital outflows are net increases in U.S. parents' equity in their foreign affiliates, whether incorporated or unincorporated. They exclude changes in equity that result from the reinvestment of earnings, which are considered a separate component of direct investment capital outflows.

Increases in U.S. parents' equity in their foreign affiliates result from the U.S. parents' establishment of new foreign affiliates, initial acquisitions of a 10 -percent-ormore ownership interest in existing foreign business enterprises, acquisitions of additional ownership interests in existing foreign affiliates, and capital contributions to affiliates. Such increases in equity are recorded as capital outflows. Decreases in equity result from liquidations of foreign affiliates, partial or total sales of ownership interests in foreign affiliates, and returns of capital of contributions. They include liquidating dividends, which are a return of capital to U.S. parents upon the liquidation of affiliates or the sale of affiliates' assets. Decreases in equity are recorded as capital inflows to U.S. parents and are netted against increases in equity, to derive the net increase in U.S. parents' equity in their foreign affiliates.

Equity capital outflows are recorded at transactions values, based on the books of U.S. parents. Such outflows may differ from those based on the books of foreign affiliates. For example, as noted earlier, when a U.S. parent purchases or sells capital stock from or to an unaffiliated third party, the transaction is recorded only on the parent's books, not on the affiliate's books. Also, transactions values on U.S. parents' books reflect the actual cost of
ownership interests in affiliates that are acquired or sold by U.S. parents, including any premium or discount; such values may differ from the book values recorded on the affiliates' books. (Transactions values may also differ from market values if, for example, the U.S. parent and the person from, or to, whom the U.S. parent is acquiring or selling the ownership interest are affiliated rather than independent.) For unincorporated affiliates, equity capital outflows include changes in assets that may be carried only on the U.S. parents' books. For example, fixed assets of a branch may be carried only on the parent's, not the affiliate's, books.

Reinvested earnings of foreign affiliates are earnings less distributed earnings. Earnings are U.S. parents' shares in the net income of their foreign affiliates, after provision for foreign income taxes, plus their shares of any capital gains or losses that, according to FASB 52, are not included in affiliates' net income for income statement purposes. Net income and, therefore, earnings, are taken from the books of the foreign affiliate. A U.S. parent's share in net income is based on its directly held equity interest in the foreign affiliate.

For incorporated foreign affiliates, distributed earnings are dividends on common or preferred stock held by U.S. parents, before deduction of foreign withholding taxes and whether paid out of current or past earnings. Dividends exclude stock and liquidating dividends. Stock dividends are excluded because they are a capitalization of retained earnings-a substitution of one type of equity (capital stock) for another (retained earnings)-which reduces the amount of retained earnings available for distribution, but leaves total owners' equity unchanged. (Thus, stock dividends do not give rise to entries in the balance of payments accounts.) Liquidating dividends are excluded because they are a return of capital, rather than a remittance of earnings. (Liquidating dividends are recorded instead as inflows in the direct investment equity capital account.) For unincorporated affiliates, distributed earnings are earnings distributed to U.S. parents, whether out of current or past earnings. ${ }^{10}$

Distributed earnings are based on the books of the U.S. parents. Since they are on an accrual basis, they are reported as of the date they are either received from, or entered into intercompany accounts with, foreign affiliates, whichever occurred first. Thus, for example, dividends declared by a foreign affiliate, but not remitted because of exchange controls or for other reasons, are included in dividends when they are entered into intercompany accounts with the affiliate; at the same time, an offsetting intercompany debt outflow is recorded in the direct investment capital account. Distributed earnings are included whether they are paid in cash, through debt creation, or in kind.

Earnings are included in direct investment income (see definition in the next section) because they are income to the U.S. parent, whether they are reinvested or remitted to the parent. However, because earnings that are reinvested are not actually transferred to the U.S. parent, but rather increase the parent's investment in its affiliate, an entry of equal magnitude but opposite sign to that made

[^12]in the direct investment income account is made in the direct investment capital account.

Intercompany debt outflows consist of the increase in U.S. parents' net intercompany account receivables from their foreign affiliates during the year. The increase is derived by subtracting the net outstanding intercompany account balance at the end of the previous year from the net outstanding balance at the end of the current year. The net balance at the end of a year is calculated as U.S. parents' receivables (amounts due) from affiliates less U.S. parents' payables (amounts owed) to affiliates. When a U.S. parent lends funds to its foreign affiliate, its receivables increase; subsequently, when the affiliate repays the principal owed to its U.S. parent, the U.S. parent's receivables from the affiliate are reduced. In parallel fashion, when a U.S. parent borrows funds from its foreign affiliate, its payables increase; subsequently, when the U.S. parent repays the principal owed to its affiliate, the U.S. parent's payables to the affiliate are reduced. Increases in U.S. parents' receivables from their affiliates or reductions in U.S. parents' payables to their affiliates give rise to outflows on intercompany account. Reductions in U.S. parents' receivables from their affiliates or increases in U.S. parents' payables to their affiliates give rise to inflows.

Not all intercompany account transactions reflect actual flows of funds. For example, when distributed earnings, interest, or royalties and license fees accrue to a U.S. parent from its foreign affiliate, the full amount is included as a current account receipt on U.S. direct investment abroad. If all or part of that amount is not actually transferred to the U.S. parent, the amount not transferred is entered into the intercompany account as an increase in the U.S. parent's receivables from its affiliate (an outflow).

The net change in intercompany accounts includes changes in the net book value of capital leases and of operating leases of 1 year or more between U.S. parents and their foreign affiliates. (See discussion in the section on the direct investment position.) When property is leased by a foreign affiliate from its U.S. parent, the net book value of the leased property is treated as an increase in the U.S. parent's receivables from its affiliate and is recorded as an intercompany debt outflow. The subsequent payment of principal on a capital lease, or of depreciation on an operating lease, is a return of capital and, for property leased by the foreign affiliate from its parent, is recorded as an intercompany debt inflow because it reduces the U.S. parent's receivables from its affiliate. (When property is leased to a U.S. parent by its foreign affiliate, the flows recorded are the reverse of the preceding.)

As noted in the last section, the intercompany accounts component of the direct investment position has, since 1977, included outstanding funds that are borrowed from unaffiliated foreigners and then reloaned to U.S. parents by Netherlands Antilles finance affiliates. When the funds are reloaned to U.S. parents, they are recorded in the direct investment capital account as an increase in U.S. parents' payables to their Netherlands Antilles finance af-filiates-that is, as an intercompany debt inflow. Subsequent repayments of the borrowing are recorded as intercompany debt outflows.

Intercompany debt outflows, like equity capital outflows, are based on the books of U.S. parents and may
differ from those based on the books of foreign affiliates. For example, a U.S. parent's receivables from its affiliate, as recorded on the parent's books, may not necessarily be equal to the affiliate's payables to its parent, as recorded on the affiliate's books, due to differences in accounting or valuation.

Most direct investment capital outflows are the result of transactions between U.S. parents and their foreign affiliates, including direct debt transactions between U.S. parents and their indirectly owned foreign affiliates. Equity capital outflows, however, may also result from transactions between U.S. parents and unaffiliated foreigners that change U.S. parents' equity in their foreign affiliates. An example of the latter is a U.S. parent's purchase of an affiliate's capital stock from an unaffiliated foreigner, rather than from the affiliate itself.

Direct investment capital outflows exclude the transfer of a direct investment interest between two U.S. persons. Such a transfer is excluded because it changes neither the nature of the investment interest-that is, it remains a direct investment interest-nor the value of the U.S. direct investment position abroad. It merely represents a shift in the ownership of the direct investment interest from one U.S. person to another. If, however, either U.S. person has a portfolio (less than 10 percent) investment interest before a transfer of equity that, in connection with the transfer, becomes a direct investment interest, a direct investment capital outflow and offsetting portfolio investment capital inflow are recorded for the extinguished portfolio interest. Similarly, if either U.S. person had a direct investment interest before a transfer of equity that, in connection with the transfer, becomes a portfolio investment interest, a direct investment capital inflow and offsetting portfolio investment capital outflow are recorded for the new portfolio interest. Such shifts in ownership interests between the direct and portfolio investment accounts are recorded as offsetting capital flows in the two accounts because they change the nature of the investment interest and represent a shift in the investment position from one account to the other.

Direct investment capital outflows exclude transactions between foreign affiliates and U.S. persons other than the affiliates' own U.S. parents. For example, loans by a U.S. bank to a foreign affiliate in which the bank does not have a direct investment ownership interest, and loans by one U.S. parent to another U.S. parent's foreign affiliate in which the first U.S. parent does not have a direct investment ownership interest, are excluded. (They are included instead in the portfolio investment accounts.)

When direct investment capital outflows are classified by country, the country of foreign affiliate is used, even if the foreign affiliate is not itself a party to the transaction. Thus, for example, if a U.S. parent purchases an affiliate's capital stock from a third-country transactor, such transactions are nevertheless classified in the country of the affiliate. They are classified in the affiliate's country because the resulting outflows change the U.S. direct investment position in that country. (However, the associated settlement flows, which are included in the portfolio investment account, are likely to be classified in the country of the transactor. If the two countries are in different geographical areas, a statistical discrepancy between areas would occur in the U.S. balance of payments accounts.)

In cases where reverse investment exists, treatment of reverse direct investment capital flows is the same as that for the analogous accounts in the direct investment position. (See discussion on the direct investment position.)

Certain transactions may affect two of the major components of direct investment capital outflows simultaneously and by exactly offsetting amounts. Such transactions are "grossed up"-that is, the outflows and the offsetting inflows resulting from the transaction are recorded in the accounts for each component rather than being netted to zero and not recorded in either account. However, because such gross flows are exactly offsetting, they have no net effect on outflows as a whole. An example of a transaction that results in gross, but not net, flows is are the capitalization of intercompany debt (which gives rise to an intercompany debt inflow from, and an equity capital outflow to, the same affiliate).

Direct investment income.-Direct investment income is the return on the U.S. direct investment position abroadthat is, it is the U.S. parents' return on their debt and equity investment in their foreign affiliates. It consists of earnings (the U.S. parents' shares in the net income of their foreign affiliates plus their shares of any capital gains or losses not included in affiliates' net income for income statement purposes), less foreign withholding taxes on distributed earnings received by U.S. parents from their foreign affiliates, plus interest (net of withholding taxes) on intercompany accounts. Interest is defined as interest received by U.S. parents from their foreign affiliates, net of interest paid by U.S. parents to their foreign affiliates.

Direct investment income is recorded as accrued. When funds are not actually transferred to U.S. parents, offsetting entries are made in the direct investment capital account.

Direct investment income differs from earnings (as defined in the previous section) because it is from the viewpoint of U.S. parents-that is, it is the return the U.S. parents receive on their investment. Earnings, in contrast, are from the viewpoint of affiliates-that is, they are (the U.S. parents' shares of) what the affiliates earn from their business. Thus, to derive direct investment income, foreign withholding taxes on distributed earnings are subtracted from earnings, because they reduce the U.S. parents' return, and interest (net of withholding taxes) on intercompany accounts are added to earnings, because it increases the U.S. parents' return. Earnings (net of withholding taxes on distributed earnings) are the U.S. parents' return on their equity investment, while interest (net of withholding taxes) is the U.S. parents' return on their debt investment in foreign affiliates.

Both direct investment income and earnings are defined to include all capital gains and losses, whether or not such gains and losses are included in net income for income statement purposes. They include, for example, gains and losses, whether realized or unrealized, that result from the sale or other disposition of affiliates' assets and liabilities, from changes in the dollar value of foreign-currency-denominated assets and liabilities that are caused by exchange rate changes, from writedowns of the book value of assets and liabilities, and from the translation of the affiliates' financial statements from local currencies into dol-
lars. They also include extraordinary items (material items that are unusual and nonrecurring) and all other income-type items that, under GAAP, are not included in the income statements of affiliates but instead are taken directly to an equity account or to retained earnings. Such capital gains and losses, like ordinary income, are considered part of the U.S. parents' return on their investments in affiliates.

As noted earlier, companies that used FASB 52 to translate foreign affiliates' financial statements into dollars may have excluded certain exchange gains and losses and translation adjustments from their affiliates' net income, as reported for income statement purposes. In addition, certain extraordinary items may have been excluded. Separate data on the U.S. parents' shares of these items were obtained in the benchmark survey and are added to the parents' shares of reported net income of affiliates to derive direct investment income for balance of payments purposes.

Withholding taxes are taxes withheld by governments on income or other funds that are distributed or remitted. As noted above, earnings are before, but direct investment income is after, deduction of withholding taxes.

Interest is interest received by, or credited to, U.S. parents on debt owed to them by their foreign affiliates, less interest paid or credited by U.S. parents on debt owed by them to their foreign affiliates, both after deduction of (foreign or U.S.) withholding taxes. For foreign affiliates that are banks, interest includes only receipts on the U.S. parents' permanent debt capital. Interest includes net interest on leases between U.S. parents and foreign affiliates that are capitalized (capital leases), because the outstanding capitalized value of such leases is included in the intercompany account component of the direct investment position. Interest is reported as accrued and is included in direct investment income whether paid in cash, through debt creation, or in kind.

Table 8 shows direct investment income and the relationship among its components for all foreign affiliates of all U.S. parents.

Direct investment royalties and license fees.-Direct investment royalties and license fees are receipts by U.S. parents from, less payments by U.S. parents to, their foreign affiliates of royalties, license fees, and other fees for the use or sale of intangible property or rights, such as patents, industrial processes, trademarks, copyrights, franchises, designs, know-how, formulas, techniques, manufacturing rights, and other intangible assets or proprietary rights. Both receipts and payments are net of (foreign or U.S.) withholding taxes.

Receipts and payments of royalties and license fees are reported as accrued. When funds are not actually transferred, offsetting entries are made in the intercompany debt account with foreign affiliates.

Both receipts and payments are based on the books of the U.S. parents and are reported as of the date they are either received from or paid to foreign affiliates or entered into the intercompany debt account with foreign affiliates, whichever occurred first.

Other direct investment services.-Other direct investment services transactions consist of receipts by U.S. parents from, less payments by U.S. parents to, their foreign

Table 8.-Source and Relationship of Direct Investment Income and Its Components
[Millions of dollars]

| Line |  | Fiscal year 1982 amount |
| :---: | :---: | :---: |

affiliates of service charges, charges for the use of tangible property, and film and television tape rentals. Both receipts and payments are net of (foreign or U.S.) withholding taxes, are reported as accrued, and are based on the books of U.S. parents.

Service charges consist of fees for services-such as management, professional, or technical services-rendered between U.S. parents and their foreign affiliates, whether in the form of sales of services or reimbursements. Sales of services are receipts for services rendered that are normally included in sales in the income statement of the seller. Receipts for services rendered are included in sales if performance of the service is a primary activity of the enterprise. For example, if a U.S. management consulting firm provides management consulting services to its foreign affiliates, the revenues therefrom would normally be included in its sales.

Reimbursements are receipts for services rendered that are normally included in "other income," rather than in sales, in the income statement of the provider of the service. Such receipts should be included in "other income," rather than sales, if performance of the service is not among the primary activities of the enterprise; the service performed may, however, facilitate or support the conduct of the enterprise's primary activities. This would be the case, for example, if a U.S. manufacturing firm occasionally provides management, professional, technical, or other services to its foreign affiliates on a fee basis.

Reimbursements may take the form of allocated expenses or direct charges for the services rendered. Allocated expenses are types of overhead expenses that are apportioned among the various divisions or parts of an enterprise. Research and development assessments on foreign affiliates by a U.S. parent for research and development the parent performs and shares with its affiliates is an example.

In the 1977 benchmark survey, sales of services and reimbursements should have been reported together in the single item "fees for services rendered." However, in their responses to that item, many companies failed to cover the full range of services rendered by parents and affiliates to each other. Underreporting was particularly evident for services that are considered sales rather than reimbursements. For 1982, therefore, the item from the 1977 survey was split into two separate items, one for sales of services and one for reimbursements. In the instructions for each item, coverage was clarified by specifying where the charges to be included would normally appear in the
income statement of the provider of the service. Review of the 1982 data confirmed that underreporting did occur with the single-item approach used in 1977.

The review also indicated that certain transactions included in sales of services in the 1982 survey probably, for balance of payments purposes, should not be included. Under current practice, several types of transactions are already included elsewhere in the U.S. balance of payments accounts and to include them also in "other direct investment services" would be duplicative. In particular, intercompany payments of reinsurance premiums, and reimbursements for reinsurance losses, are already reported in a separate BEA survey and are included, together with similar transactions with unaffiliated foreign persons, in the "other private services" account of the U.S. balance of payments. Also, receipts and payments for transporting goods to or from the U.S. customs area are already included, together with similar transactions with unaffiliated foreign persons, in the "other transportation" account.

In addition, payments made by parents to foreign affiliates for transporting the parent's goods between foreign ports were reported in the benchmark survey as sales of services by the affiliates to the parents, but are excluded from this item for balance of payments purposes. Such transportation charges become a component of the parents' cost of the goods and are included in the goods' ultimate value. That value, including the transportation charges, is already reflected elsewhere in the accounts. Therefore, inclusion of the transportation payments in this item as well would result in a statistical discrepancy.

During the data review, transactions that should not have been included in sales of services for balance of payments purposes were eliminated, to the extent they were identifiable. Most of the larger transactions were identified; however, many of the smaller ones were not and remain in the published totals. Payments for transporting goods both between U.S. and foreign ports and between two foreign ports are shown as addenda items in columns 10 and 11, respectively, of tables I.V7, I.V8, I.V15, II.V7, II.V8, III.V7, and III.V8. The comparable receipts are not shown because, in most cases, they could not be separately identified and were known to be relatively small.

A number of reporters also included, in sales of services, receipts for manufacturing-type activities performed for others on contract, such as receipts by a refinery for refining crude oil that it does not itself own. These receipts are for manufacturing activities rather than for sales of services. Such receipts were eliminated from sales of services in the tables in this publication.

Rentals for the use of tangible property include total lease payments under operating leases of 1 year or less and net rent on operating leases of more than 1 year that have not been capitalized. From the lessors' viewpoint, total lease payments for operating leases consist of two components: (1) net rent, which covers interest, administrative expenses, and profit and (2) depreciation, which is a return of capital. For operating leases of more than 1 year, net rent is included in this account and depreciation is included as an intercompany debt flow in the direct investment capital account. For operating leases of 1 year or less, total lease payments-both net rent and deprecia-tion-are included in this account. They are included because the value of property leased to or from foreigners for 1 year or less is excluded from U.S. merchandise exports and imports in the U.S. balance of payments accounts; because no export or import by U.S. parents is recorded in the merchandise trade account, no subsequent return of capital to or by U.S. parents in the form of depreciation is recorded in the direct investment capital account. Such depreciation is instead considered part of rentals-a receipt for services rendered by, rather than a return of capital to, the lessor.

Film and television tape rentals are rentals received by U.S. parents from, less rentals paid by U.S. parents to, their foreign affiliate for the use or sale of film and television tapes. When such film and television tapes are shipped by U.S. parents to foreign affiliates, receipts for the tapes are considered receipts for services rather than receipts for merchandise because the cost of the physical tapes themselves is usually incidental to the value of the services-entertainment, education, etc.-that they provide. Thus, film and television tape rentals are excluded from U.S. merchandise trade and are included instead in "other" direct investment services.

## TABLE ARRANGEMENT

As noted above, the amount and type of data collected in the benchmark survey depended on whether the foreign affiliates or U.S. parents were banks or nonbanks and, for nonbank affiliates, on whether they were majority or minority owned. Data could have been published, at different levels of detail, for 15 possible groups of affiliates and their parents. Table 9 shows the 15 affiliate groups; selected data for the affiliates in each group are shown in panel A and selected data for each group's U.S. parents are shown in the corresponding column of panel B. Due to space and resource limitations, data are presented in the remainder of this publication only for 5 of the 15 groups of affiliates and their parents: Group I-all affiliates of all U.S. parents (column 1), group II-nonbank affiliates of nonbank U.S. parents (column 7), group III-majorityowned nonbank affiliates of nonbank U.S. parents (column
8), group IV-nonbank affiliates of U.S. parents in banking (column 10), and group V-bank affiliates of all U.S. parents (column 13). ${ }^{11}$
In this publication, 193 different table formats are presented. Not all of the formats are published for each affiliate group. In some cases, the necessary data were not collected; in others, confidentiality requirements or space limitations precluded publication of certain formats for a given affiliate group even though the data were available. In total, 50 tables are included for group I, 89 for group II, 166 for group III, 2 for group IV, and 1 for group V affiliates and their parents.
11. In this publication, the term "majority-owned nonbank affiliate" means a nonbank affiliate in which the combined direct and indirect ownership interest of all U.S. parents exceeds 50 percent.

1. Sales were not reported on the BE-10A BANK and BE-108 BANK forms. Thus, in this table, total income was used in place of sales for bank parents and affiliates.
2. A "majority-owned nonbank affiliate" is a nonbank affiliate in which the combined direct
and indirect ownership interest of all U.S. parents exceeds 50 percent.
3. A "minority-owned nonbank affiliate", is any nonbank affiliate that is not a "majority-owned
nonbank affiliate," as defined in footnote 2 .
[^13]The list of tables that follows indicates the table formats included in this publication for each of the five affiliate groups. The heading shows the five groups; the stub lists the different table formats. An " $X$ " in the column for a given affiliate group means that the listed table format is published for the affiliates in that group or for their U.S. parents.

The number of a given table consists of (1) a Roman numeral (I, II, III, IV, or V) to indicate the affiliate group covered, (2) a capital letter to indicate the general subject matter (where letters A-J indicate that the table contains foreign affiliate financial and operating data; K-R, U.S. parent financial and operating data; and $S-W$, direct investment position and balance of payments data), and (3) an Arabic numeral to indicate the specific subject matter of the table. Thus, table I.A5 covers all affiliates of all U.S. parents (group I), relates generally to affiliates' balance sheets, and provides data specifically on total assets disaggregated by country by industry. If a given table format is published for more than one affiliate group, it will have the same letter and Arabic numeral designation (to indicate that the general and specific subject matters of the tables are the same), but different Roman numerals (to indicate that different affiliate groups are being cov-
ered). For example, table III.A5 has the same format and the same general and specific subject matters as table I.A5, but covers majority-owned nonbank affiliates of nonbank U.S. parents (group III), rather than all affiliates of all U.S. parents (group I).

All tables for group I are presented first, followed by the tables for groups II, III, IV, and V, in that order. The group covered is indicated at the top of each table. It should be noted that data for U.S. parents of group IV affiliates (that is, for U.S. parents in banking that have nonbank foreign affiliates) are shown in column 10 , panel $B$, of table 9. Also, data for group V affiliates (that is, for bank affiliates of all U.S. parents) are shown in the "banking" industry line or column in the group I tables for all affiliates. The data for group IV bank parents and group V bank affiliates are not repeated in the group IV and group V tables.

When a given table format is not shown for an affiliate group, the numbering of tables for that group may not be consecutive. For example, the first table presented for group I affiliates is table I.A5 because the formats for tables I.A1-4 are not presented.

The footnotes to all tables follow the last table and are arranged according to the table to which they refer.

## LIST OF TABLES

An " $X$ " in the column for a given affiliate group means that the listed table format is published for the affiliates in that group or for their U.S. parents. For further explanation, see the section on table arrangement.

1. U.S. Exports Associated With U.S. Parents and Their Foreign Affiliates, by Industry of U.S. Parent. 2. U.S. Exports Associated With U.S. Parents and Their Foreign Affiliates, by Country of Destination. 3. U.S. Exports Shipped to Unaffiliated Foreigners by U.S. Parents, Industry of U.S. Parent by Product. 4. U.S. Imports Associated With U.S. Parents and Their Foreign Affiliates, by Industry of U.S. Parent.... 5. U.S. Imports Associated With U.S. Parents and Their Foreign Affiliates, by Country of Origin 6. U.S. Imports Shipped by Unaffiliated Foreigners to U.S. Parents, Industry of U.S. Parent by Product
Q. Technology:
2. Expenditures for Research and Development Performed for and by U.S. Parents, by Industry..
3. Royalties and License Fees of U.S. Parents, Receipts and Payments, by Industry
R. Selected and miscellaneous data:
4. Selected Financial and Operating Data of U.S. Parents, by Industry of U.S. Parent
5. Number of U.S. Parents That Had Affiliates in a Given Country and Industry, Country by Industry of Affiliate.
6. Interest, Production Royalty Payments, and Taxes Other Than Income and Payroll Taxes of U.S.

Parents, by Industry

## Direct investment position and balance of payments data

S. U.S. direct investment position abroad:

1. U.S. Direct Investment Position Abroad, Country by Account.
2. U.S. Direct Investment Position Abroad, Industry by Account
3. U.S. Direct Investment Position Abroad, Country by Industry
4. U.S. Direct Investment Position Abroad, Industry by Country
5. U.S. Direct Investment Position Abroad, Industry of U.S. Parent by Account
6. U.S. Direct Investment Position Abroad at Yearend FY 1981, Country by Account
7. U.S. Direct Investment Position Abroad at Yearend FY 1981, Industry by Account
T. Change in the position and direct investment capital outflows:
8. Change in the U.S. Direct Investment Position Abroad, Country by Account
9. Change in the U.S. Direct Investment Position Abroad, Industry by Account
10. Direct Investment Capital Outflows, Country by Industry
11. Direct Investment Capital Outflows, Industry by Country
12. Equity Capital Outflows, Country by Industry
13. Reinvested Earnings, Country by Industry...

Industry
7. Intercompany Debt Outflows, Country by Industry.
8. Change in the U.S. Direct Investment Position Abroad, Industry of U.S. Parent by Account
9. Net Increase in U.S. Parents' Holdings of Equity in Affiliates Resulting From Transactions With

Foreigners, Country by Type
10. Net Increase in U.S. Parents' Holdings of Equity in Affiliates Resulting From Transactions With Foreigners, Industry by Type.
U. Direct investment income:

1. Direct Investment Income, Country by Component.
2. Direct Investment Income, Industry by Component
3. Direct Investment Income, Country by Industry..
4. Direct Investment Income, Industry by Country
5. Direct Investment Income, Industry of U.S. Parent by Component
V. Direct investment royalties and license fees and other services:
6. Direct Investment Royalties and License Fees, Receipts and Payments by U.S. Parents, Country by Type.
7. Direct Investment Royalties and License Fees, Receipts and Payments by U.S. Parents, Industry by Type.
8. Direct Investment Royalties and License Fees (Net Receipts), Country by Industry
9. Direct Investment Royalties and License Fees (Net Receipts), Industry by Country
10. Receipts of Royalties and License Fees by U.S. Parents, Country by Industry
y ....................................................................
11. Direct Investment Royalties and License Fees, Receipts and Payments by U.S. Parents, Industry of U.S. Parent by Type.
12. Other Direct Investment Services, Receipts and Payments by U.S. Parents, Country by Type
13. Other Direct Investment Services, Receipts and Payments by U.S. Parents, Industry by Type
14. Other Direct Investment Services (Net Receipts), Country by Industry
15. Other Direct Investment Services (Net Receipts), Industry by Country
16. Receipts for Other Services by U.S. Parents, Country by Industry
17. Payments for Other Services by U.S. Parents, Country by Industry
18. Receipts of Service Charges by U.S. Parents, Industry by Country
19. Payments of Service Charges by U.S. Parents, Industry by Country
20. Other Direct Investment Services, Receipts and Payments by U.S. Parents, Industry of U.S. Parent by Type...

## W. Selected data

1. Selected Direct Investment Position and Balance of Payments Data, by Country

## TABLES

#### Abstract

Most of the tables in this publication are available on magnetic tape. In addition, BEA can provide tabulations or regression analyses of the data at cost, within the limits of available resources and subject to the legal requirement to avoid disclosure of data for a specific person. Requests should be directed to Office of the Chief, International Investment Division (BE-50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

## General notes to tables

- For a description of the table arrangement and numbering system, see text.
- The affiliate group covered by a given table is indicated at the top of the table.
- A "majority-owned nonbank affiliate" is a nonbank affiliate in which the combined direct and indirect ownership interest of all U.S. parents exceeds 50 percent and in which assets, sales, or net income were at least $\$ 3$ million in 1982.
- Unless otherwise specified, the designation "by country" in a table title indicates that the data are disaggregated by country of foreign affiliate.
- Unless otherwise specified, the designation "by industry" in a table title indicates that the data are disaggregated by (1) industry of foreign affiliate, if the table presents affiliate financial and operating data or balance of payments and direct investment position data (tables designated by letters A-J and S-W), or (2) by industry of U.S. parent, if the table presents U.S. parent financial and operating data (tables designated by letters KR).
- The major industry "petroleum" includes all of the various 3-digit petroleum subindustries. All.other major industries exclude these petroleum subindustries. For example, mining excludes crude petroleum, manufactur-
ing excludes petroleum refining, retail trade excludes gasoline service stations, etc.
- OPEC is the Organization of Petroleum Exporting Countries. The members of OPEC are: Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, Venezuela, and the United Arab Emirates.
- Unless specified as being for close or yearend fiscal year (FY) 1981, balances and direct investment position data are as of close or yearend FY 1982; all other data are for FY 1982. The 1982 fiscal year is the affiliate's or parent's financial reporting year that ended in calendar year 1982.
- Detail may not add to totals because of rounding.
- For items shown in millions of dollars, an asterisk (*) indicates an amount between $-\$ 500,000$ and $+\$ 500,000$; for items shown in thousands of employees, it indicates a number between 0 and 50 .
- A "(D)" indicates that the data in the cell have been suppressed to avoid disclosure of data in that cell, or another cell, for a specific person.
- The individual countries or industries included in a country or industry group shown in the heading or stub of a table may be determined by referring to table 5 (for countries) or table 6 (for industries) in the text.
- All footnotes follow the last table.

## FOOTNOTES TO TABLES

Tables I.D3 and I.D4:

1. Sales were not reported on the BE-10B BANK form. Thus, in this table, total income is used in place of sales for bank affiliates

## Table I.J 1 :

1. See footnote 1 to table I.D3

## Table I.R1:

1. Sales were not reported on the BE-10A BANK form. Thus, in this table, total income is used in place of sales for bank parents.

## Table I.R2

1. A U.S. parent that had affiliates in more than one country or industry is counted once in each country or industry in which it had affiliates. Thus, the numbers appearing in individual country/industry cells do not add to the subtotals and totals.

Tables I.S1, I.S2, I.S5, I.S6, and I.S7

1. Includes common and preferred stock owned by U.S. parents and U.S. parents' equity in ad ditional paid-in capital
2. U.S. parents' equity in retained earnings and legal reserves.

Tables I.T1 and I.T2:

1. A net increase in U.S. parents' equity in affiliates is a balance of payments outflow; a net decrease is a balance of payments inflow. The net increase includes outflows to purchase equity in affiliates from unaffiliated foreigners and inflows from the sale of equity in affiliates to unaf classified because they change the U.S. direct investment position in these affiliates, When the country of the affiliate differs from that of the buyer or seller of its equity, the flows are classi fied according to the country of the affiliate
2. Equal earnings (i.e., the U.S. parents' shares in the net income of their foreign affiliates plus their shares of any capital gains or losses not included in affiliates' net income for income state ment purposes) less distributed earnings (i.e., earnings distributed to U.S. parents, before deduction of foreign withholding taxes).
3. An increase in U.S. parents' payables is a decrease in net intercompany accounts and, there fore, a U.S. balance of payments inflow.

Table I.T5:

1. See footnote 1 to table I.T1

## Table I.T6:

1. See footnote 2 to table I.T1

Table I.T8:
For footnotes 1-3, see footnotes to table I.T.1.

## Tables I.T9 and I.T10

1. See footnote 1 to table I.T1
2. Includes both partial and total acquisitions (sales) of equity
3. Acquisitions (sales) by U.S. parents of a given affiliate's equity from (to) the affiliate itself.
4. Includes acquisitions (sales) by U.S. parents of a given affiliate's equity from (to) other for eign affiliates of the same U.S. parent.

Tables I.U1, I.U2, and I.U5:

1. U.S. parents' shares in the net income of their affiliates, plus their shares of any capital fains or losses not included in affiliates' net income for income statement purposes.
2. Interest received by, or credited to, U.S. parents on debt owed to them by their affiliates, less interest paid, or credited, by U.S. parents on debt owed by them to their affiliates, both after deduction of (foreign or U.S.) withholding taxes.
3. Earnings distributed to U.S. parents, before deduction of foreign withholding taxes.
4. U.S. parents' shares of capital gains or losses of affiliates, whether or not included in affiliates' net income for income statement purposes

Tables I.V7, I.V8, and I.V15:

1. Consist of fees for services-such as management, professional, or technical services-rendered between U.S. parents and their foreign affiliates, whether in the form of sales of services or reimbursements. Sales of services are fees for services rendered that are normally included in are normally included in "other income" in the income statement of the provider of the service Service charges exclude certain transactions that were reported as sales of services in the benchmark survey, but that are already included elsewhere in the U.S. balance of payments accounts They exclude, for example, payments for transporting merchandise between U.S. and foreign ports (shown in column 10) and payments by U.S. parents to foreign affiliates for transporting the parents' merchandise between two foreign ports (shown in column 11). See text for further explanation
2. Although such charges were reported in the benchmark survey as sales of services by foreign ffiliates to U.S. parents, they are excluded from service charges in column 7 because they ar ready included in the "other transportation" account of the U.S. balance of payments.
3. Although such payments were reported in the benchmark survey as sales of services by for ign affices the parents, they are excluded from service charges in column 7, because the re reflected elsewhere in the U.S. balance of payments accounts. See text for further explana-

## Table II.A1:

1. All marketable securities held by insurance companies are treated as noncurrent; therefore they are excluded from column 8 and are included in column 12 of this table

Table II.A2:

1. Includes common and preferred stock and additional paid-in capital.
2. Includes retained earnings and legal reserves.

Table II.A3:

1. See footnote 1 to table II.A.1.

Table II.A4:
For footnotes 1 and 2, see footnotes to table II.A2.
Table II.A13:

1. See footnote 1 to table II.A1.

Table II.A14:
For footnotes 1 and 2, see footnotes to table II.A2.
Table II.A16:

1. See footnote 1 to table II.A1.

Table II.A17:
For footnotes 1 and 2, see footnotes to table II.A2.

## Table II.A18:

1. See footnote 1 to table II.A1.

Table II..A19:
For footnotes 1 and 2, see footnotes to table II.A2.
Tables II.C6 and II.C7:

1. Includes the net book value of transfers in of property, plant, and equipment of majorityowned affiliates. Data on transfers in of minority-owned affiliates were not collected; however, they are believed to be insignificant. For a give

## Tables II.D1, II.D2, and II.D8:

1. Net exchange gains or losses resulting from the translation of affiliates' financial statements from local currencies into U.S. dollars due to changes in exchange rates between local currencies and the dollar, per Financial Accounting Standards Board Statement No. 8 (FASB 8). See text for urther discussion
2. Other net realized and unrealized capital gains or losses that, under U.S. generally accepted accounting principles (GAAP), are to be included in net income for income statement purposes; excludes amounts related to the translation of affiliates' financial statements from local currencies into U.S. dollars, per FASB 8.
3. Net capital gains or losses that, under GAAP, are excluded from net income for income statement purposes. Includes exchange gains or losses and translation adjustments that are excluded from net income, per FASB 52. See text for further discussion.

Table II.E17:

1. For industry classification, each foreign affiliate was required to disaggregate its sales by three-digit industry; the affiliate was classified in the industry in which its sales were largest (see text for discussion of industry classification). When sales are disaggregated by industry of affiliclassified; when disaggregated by industry of sales, they are distributed among all the industries in which the affiliate reported sales-i.e., sales associated with each industry of sales are shown in that industry regardless of the affiliate's industry of classification.
2. In the breakdown of foreign affiliates' sales by industry of sales, only the five largest categories had to be specified. If a given affiliate had sales in more than five industries, the distribution of its sales in the specified industries would have covered less than 100 percent of its total sales. Sales in all unspecified industries combined are shown in this column.

## Table II.G3:

1. Equals column 2, table II.P2.

Table II.G7:

1. Equals column 3, table II.P2.

Table II.G11:

1. Equals column 4, table II.P2

## Table II.G20:

1. Equals column 2, table II.P5

Table II.G24:

1. Equals column 3, table II.P5

## Table II.G28:

1. Equals column 4, table II.P5.

Tables II.I3 and II.I4:

1. In terms of either quantity or value.

Table II.K1:

1. See footnote 1 to table II.A1.

## Table II.L1:

1. For U.S. parents classified in insurance, this table includes all property, plant, and equip1. For U.S. parents classified in insurance, this table includes all property, plant, and equip-
ment wherever carried in the balance sheet. Thus, column 6 of this table does not equal column

10 of table II.K1, which includes only property, plant, and equipment carried in the property, plant, and equipment account of the balance sheet.
2. Excludes transfers in of property, plant, and equipment, which are probably small
3. Includes restatement due to a change in the entity. Also includes the net book value of transfers in of property, plant, and equipment.

## Table II.L2:

1. Part of column 6.
2. Consists of capital expenditures other than those for land, timber, and mineral rights.
3. Equals column 3 of table II.L1. Excludes transfers in of property, plant, and equipment.

## Table II.L3:

1. Part of column 4 of table IIL2
2. Equals column 7 of table II.L2

## Table II.M1:

1. Net realized and unrealized capital gains or losses that, under U.S. generally accepted accounting principles, are to be included in net income for income statement purposes

Table II.N1:

1. Consists of sales associated with industries coded in the $000,100,200,300$, or 500 series, except 070, 108, and 138 . See the Direct Investment Industry and Foreign Trade Classifications Booklel, reprinted in the appendix, for a description of these codes.
2. Consists of sales associated with industries coded in the $400,600,700$, or 800 series, or in codes 070, 108, or 138. See the Direct Investment Industry and Foreign Trade Classifications Book. $l e t$, reprinted in the appendix, for a description of these codes.

## Table 11.03:

1. This table covers employment, employee compensation, and hours worked of production workers associated with the manufacturing sales of U.S. parents, regardless of whether the U.S. parent is actually classified in manufacturing. Thus, it includes data of U.S. parents that are not classified in manufacturing but that nevertheless have manufacturing activities.
2. Equals (column $4 \times 1,000,000) /($ column $2 \times 1,000 \times$ column 7 ).
3. Equals (column $5 \times 1,000,000$ )/(column $2 \times 1,000 \times$ column 7),

## Table II.P1:

1. Does not equal column 3, which is derived from data reported on affiliates' forms, because of differences in timing and valuation and the inclusion of data for affiliates covered on U.S. parents' forms but exempt from being reported on affiliates' forms.

## Table II.P2:

1. A U.S. parent was required to disaggregate its U.S. exports to unaffiliated foreigners by country only if its exports to a given country were $\$ 150,000$ or more. A U.S. parent's exports to unaffiliated foreigners in all countries to which its exports were less than $\$ 150,000$ were reported as a single item and are classified in "unallocated."
2. U.S. exports shipped by U.S. parents to all affiliates, as reported on the U.S. parents' forms, were not disaggregated by country. Thus, data in this column are available only for all countries combined. The total in this column does not equal the total in column 3, which is derived from the data reported on affiliates' forms, because of differences in timing and valuation and the inclusion of data for affiliates covered on U.S. parents' forms but exempt from being reported on affiliates' forms.

Tables II.P4:

1. See foctnote to table II.P1.

## Table II.P5:

1. U.S. imports shipped by unaffiliated foreigners to U.S. parents were not disaggregated by country. Thus, data in column 11, and hence in columns 1 and 12, are available only for all countries combined.
2. U.S. imports shipped to U.S. parents by all affiliates, as reported on the U.S. parents' forms were not disaggregated by country. Thus, data in this column are available only for all countries combined. The total in this column does not equal the total in column 3 , which is derived from data repated affiliates covered on US parents' forms but exampt from being reported on affil ates' forms.

## Table II.Q2:

1. All-industries total equals all-countries total in column 2, table II.V1, and all-industries total in column 2, table II.V2.
2. All-industries total equals all-countries total in column 3, table II.V1, and all-industries total

## Table II.R3:

1. Includes interest received from affiliates.
2. Includes interest paid to affiliates, plus withholding taxes on such interest.
3. Includes sales, consumption, and excise taxes; property and other taxes on the value of assets and capital; and any remaining taxes (other than income and payroll taxes). Also includes al payments of nontax liabilities (other than production royalty payments), such as import and export duties, license fees, fines, penalties, and similar items.

## Tables II.S1 and II.S2

For footnotes 1 and 2, see footnotes to table I.S1.
Tables II.T1 and II.T2.
For footnotes 1-3, see footnotes to table I.T1.

## Tables II.U1 and II.U2:

1. U.S. parents' shares in the net income of their affiliates, plus their shares of any capital gains or losses not included in affiliates' net income for income statement purposes. For table II.U1, total earnings are part of columns 13 and 15 of table II.D1; for table II.U2, they are part of columns 13 and 15 of table II.D2.

For footnotes 2 and 3, see footnotes 2 and 3 to table I.U1.
4. U.S. parents' shares of the capital gains or losses of affiliates, whether or not included in net income for income statement purposes. For table II.U.1, they are part of column 14 of table II.DI for table II.U2, they are part of column 14, table II.D2.

Tables II.V1 and II.V2:

1. Both the all-countries total in table II.V1 and the all-industries total in table II.V2 equal the all-industries total in column 2, table II.Q2.
2. Both the all-countries total in table II.V1 and the all-industries total in table II.V2 equal the all-industries total in column 5 , table II.Q2

Tables II.V7 and II.V8:
For footnotes 1-3, see footnotes to table I.V7.
Table III.A1:

1. See footnote 1 to table II.A1.

Table III.A2:
For footnotes 1 and 2, see footnotes to table II.A2.
Table III.A3:

1. See footnote 1 to table II.A1.

Table III. A4:
For footnotes 1 and 2, see footnotes to table II.A2.
Table III.A13:

1. See footnote 1 to table II.A1.

Table III.A14:
For footnotes 1 and 2, see footnotes to table II.A2.
Table III.A16:

1. See footnote 1 to table II.A1

Table III.A17:
For footnotes 1 and 2, see footnotes to table II.A2.
Table III.A18:

1. See footnote 1 to table II.A1.

## Table III.A19:

For footnotes 1 and 2, see footnotes to table II.A2.

## Table III.B1:

1. For unincorporated affiliates, this item includes total owners' equity. Cumulative retained earnings of unincorporated affiliates-which are an internal, not an external, source of fundswere not reported separately and could not be excluded.
2. For all industries combined and for each of the selected industries, data for this line-position with all transactors combined-are related to data in tables III. A3 and III. A4 in the following manner: Column 3 (of this table) equals column 3 , table III. A4; column 4 equals column 7 , column 4 and than 5 equals the sum of columns 11 and 13, table III.A4; and column 6 equals ceivables, and "other" equity investment.
3. For all industries combined and for each of the selected industries, data for this line-position with U.S. parents-are related to the data in table III.S2 in the following manner. Column 2 (of this table) equals column 8 (of table III.S2); column 5 equals the sum of columns 4 and 6 ; and column 6 equals column 9 less that portion of column 9 that is the net book value of property, plant, and equipment leased by foreign affiliates to their U.S. parents under operating leases of more than l year., For balance of payments purposes, the value of such leased equipment is inin the affiliates' balance sheets, it is normally included in the property, plant, and equipment account, rather than in affiliates' receivables. Thus, it would not appear in column 6 of this table, which includes receivables as reported in the balance sheet.
4. For the selected country or country group covered by this panel of table III. B1, table-to-table references in footnote 2 above apply, except that references to table III.A3 and III. A4 should be replaced by references to the relevant country or country group line of tables III.A1 and III.A2,
respectively. For example, column 3 of the Canada panel of table III.B1 equals column 3 of the respectively. For example,
Canada line of table III. A2.
5. For the selected country or country group covered by this panel of table III.B1, table-to-table references in footnote 3 above apply, except that references to table III.S2 should be replaced by the Canada panel of table III.B1 equals column 8 of the Canada line of table III.S1.

## Table III.B2:

1. See footnote 1 to table III.B1
2. For all industries combined and for each of the selected industries, data for this line-position with all transactors combined-are related to data in tables III.A13 and III.A14 in the following manner: Column 3 (of this table) equals column 3, table III.A14; column 4 equals column 7 , table III.A.14; column 5 equals the sum of columns 11 and 13, table III.A14; and column 6 equals column 4 and that part of columns 12 and 13, table III.A13, that is, stocks, bonds, noncurrent receivables, and "other" equity investment.

## Tables III.C1, IIL.C2, and III.C3:

1. For affiliates classified in insurance, this table includes all property, plant, and equipment wherever carried in the balance sheet. Thus, column 6 of tables III.Cl, III.C2, and III.C3 does not equal column 10 of tables III.A1, II.A3, or $11 . A 13$, respectively, because the latter includes only property, pla
ance sheet.
2. Includes the net book value of transfers in of property, plant, and equipment. For a given affiliate, transfers in are from its U.S. parent or from other foreign affiliates of its U.S. parent. 3. Includes restatement due to a change in the entity.

## Tables III.C4 and 111.C5:

1. Part of column 6.
2. Consists of capital expenditures other than those for land, timber, or mineral rights.
3. For table III.C4, column 4 equals column 3 of table III.C1; for table III.C5, column 4 equals column 3 of table III.C2.

## Tables III.C6 and III.C7:

1. See footnote 2 to table III.C1.

Table III.C8:

1. Consists of capital expenditures other than those for land, timber, and mineral rights.

Tables III.D1, III.D2, and III.D8:
For footnotes 1-3, see footnotes to table II.DI.
Tables III.E1 and III.E2:

1. Sales charged by an affiliate to persons in the country where the affiliate is located. 2. Includes the U.S. parent and its foreign affiliates; equals sum of columns 5, 8, and 11.

## Table III.E3:

1. See footnote 1 to table III.E1.

## Table III.E5:

1. "Other" countries are countries other than the United States and the country where the affiliate is located.

## Table III.E6:

For footnotes 1 and 2, see footnotes to table III.E. 1
Table III.E7:

1. See footnote to table III.E5.
2. For all industries combined, totals for countries or country groups shown in the stub equal column 10, table 12 for the same countries or country groups; for all countries combined totals for industry groups shown in the stub equal column 10, table III.E2, for the same industry groups.

## Table III.E8:

1. See footnote to table III.E5.
2. For all industries combined, totals for countries or country groups shown in the stub equal column II, table IIIEL, for the same countries or country groups, for all countries combined totals for industry groups shown in the stub equal column 11, table III.E2, for the same industry groups.

## Table III.E9

## 1. See footnote to table III.E5

2. For all industries combined, totals for countries or country groups shown in the stub equal解 groups.

Tables III.E10, III.E11, and III.E16:
For footnotes 1 and 2, see footnotes to table II.N1.
3. See footnote 1 to table III.E1

Table III.E17:
For footnotes 1 and 2, see footnotes to table II.E17

Tables III.F13, III.F14, and III.F21:

1. This table covers only data of foreign affiliates classified in manufacturing. It excludes data of affiliates that are engaged in secondary manufacturing activities but are not classified in manufacturing.
For footnotes 2 and 3, see footnotes 2 and 3 to table II. 03 .

Tables III.G1 and III.G3:

1. Equals column 5, table III.P2.

Tables III.G5 and III.G7:

1. Equals column 6, table III.P2.

Table III.G8:

1. Equals column 6, table III.P1.

Tables III.G9 and III.G11:

1. Equals column 7, table III.P2.

Table III.G12:

1. Columns 1,6 , and 11 equal columns 5,6 , and 7, respectively, of table III.P2.
2. Capital equipment and other goods charged to the fixed asset account.

Tables III.G13 and III.G14:

1. See footnote 2 to table III.G12.

## Table III.G17:

1. Equals column 6, table III.P1.
2. See footnote 2 to table III.G12.

Tables III.G18 and III.G20:

1. Equals column 5, table III.P5.

Tables III.G22 and III.G24:

1. Equals column 6, table III.P5.

Table III.G25:

1. Equals column 6, table III.P4.

## Tables III.G26 and III.G28:

1. Equals column 7, table III.P5.

Table III.H7:

1. Equals column 3, table III.V1. All-countries total also equals all-industries total in column 5, able III.Q2.
2. Equals column 2, table III.V1. All-countries total also equals all-industries total in column 2,
table III.Q2.

## Table 11I.H8:

1. Equals column 3, table III.V2. All-industries total also equals all-industries total in column 5,
2. Equals column 2, table III.V2. All-industries total also equals all-industries total in column 2,
able III.Q.2.

## Table III.H15:

1. Equals column 5, table IIIQ2. All-industries total also equals all-countries total in column 3, able III.V1, and all-industries total in column 3, table III.V2.
2. Equals column 2, table IIIQ2. All-industries total also equals all-countries total in column 2,
table III.V1, and all-industries total in column 2, table III.V2.

## Tables III.J3, III.J4, and III.J5:

1. See footnote 3 to table II.R3.

## Table III.K1:

1. See footnote to table II.A1.

## Table III.L1:

1. For U.S. parents classified in insurance, this table includes all property, plant, and equipment wherever carried in the balance sheet. Thus, column 6 of this table does not equal column 10 of table III.K1, which includes only property, plant, and equipment carried in the property, plant, and equipment account of the balance sheet.
For footnotes 2 and 3, see footnotes 2 and 3 to table II.LI.

## Tahle III.L2:

For footnotes 1 and 2, see footnotes 1 and 2 to table II.L2.
3. Equals column 3 of table III.L1. Excludes transfers in of property, plant, and equipment.

## Table III.L3:

1. Part of column 4 of table III.L2.
2. Equals column 7 of table III.L2.

## Table III.M1:

1. See footnote 1 to table II.M1.

## Table III.N1:

For footnotes 1 and 2, see footnotes to table II.N1.

## Table III.N2:

1. For industry classification, each U.S. parent was required to disaggregate its sales by threedigit industry; the U.S. parent was classified in the industry in which its sales were largest (see text for discussion of industry classification). When sales are disaggregated by industry of U.S. parent, total sales of a given U.S. parent are shown in the single industry in which the U.S. parent was classified; when disaggregated by industry of sales, they are distributed among all the industries in which the U.S. parent reported sales-i.e., sales associated with each ind
I In break of U.S. 1 .
2. In the breakdown of U.S. parents' sales by industry of sales, only the eight largest categories
had to be specified. If a given U.S. parent had sales in more than eight industries, the distribuhad to be specified. If a given U.S. parent had sales in more than eight industries, the distribusales. Sales in all unspecified industries combined are shown in this column.

## Table 1II.O2:

1. For industry classification, each U.S. parent was required to disaggregate its sales by threedigit industry, the U.S. parent was classified in the industry in which its sales were largest (see text for discussion of industry classification). When employment is disaggregated by industry of U.S. parent, total employment of a given U.S. parent is shown in the single industry in which the U.S. parent was classified; when disaggregated by industry of sales, it is distributed among all the
industries in which the U.S. parent reported sales-i.e., the number of employees associated with each industry of sales is shown in that industry, regardless of the U.S. parent's industry of classification.
2. Employees working in central administrative offices or headquarters, and not associated with a particular industry of sales, are shown separately in this column rather than being allocated among the various other industries of sales.
3. In the breakdown of employment by industry of sales, only the eight largest industry categories, and employees in central administrative offices or headquarters, had to be specified. If a givent in specified industries would have covered less than 100 percent of total employment Em ment in speall unspecified industries is shown in this column percent

Table 111.O3:
For footnotes 1-3, see footnotes to table II.O3.

## Table III.O4:

1. The data in this table are for a subset of the production workers covered by table III.03. This table covers employment, employee compensation, and hours worked of production workers associated with the manufacturing sales of U.S. parents classified in manufacturing. Thus, data for U.S. parents that have manufacturing activities but are not classified in manufacturing are ex-
cluded. See text for further explanation.

## Table III.P1:

1. Some U.S. parents of majority-owned nonbank affiliates also have minority-owned nonbank affiliates. U.S. exports shipped to these minority-owned affiliates are shown in columns 8,9, and affi.
2. 

## Table III.P2:

1. See footnote 1 to table II.P2.
2. See footnote 1 to table III.P1.
3. See footnote 2 to table II.P2.

## Table III.P4:

1. Some U.S. parents of majority-owned nonbank affiliates also have minority-owned nonbank affiliates. U.S. imports shipped to these minority-owned affiliates are shown in columns 8,9 , and
10
2. See footnote to table II.P1.

## Table III.P5:

1. See footnote 1 to table II.P5.
2. See footnote 1 to table III.P4.
3. See footnote 2 to table II.P5.

Table III.Q2:

1. Equals column 10 , table III.H15. All-industries total also equals all-countries total in column 2, table III.V1, and all-industries total in column 2, table III.V2.
2. Equals column 3, table III.H15. All-industries total also equals all-countries total in column

3, table III.V1, and all-industries total in column 3, table III.V2.

## Table III.R3:

For footnotes 1-3, see footnotes to table II.R3.

## Tables III.S1 and III.S2:

For footnotes 1 and 2, see footnotes to table I.S1.

## Tables III.T1 and III.T2:

For footnotes 1-3, see footnotes to table I.T1

Tables III.U1 and III.U2:

1. U.S. parents' shares in the net income of their affiliates, plus their shares of any capital gains or losses not included in affiliates' net income for income statement purposes. For table III.U1, total earnings are part of columns 13 and 15 of table III.D1; for table III.U2, they are part of columns 13 and 15 of table III.D2.
For footnotes 2 and 3 , see footnotes 2 and 3 to table I.U1
2. U.S. parents' shares of the capital gains or losses of affiliates, whether or not included in net income for income statement purposes. For table III. U1, they are part of column 14 of table III.D1; for table III.U2, they are part of column 14, table III.D2.

Table III.V1:

1. Equals column 10, table III.H7. All-countries total also equals all-industries total in column
2, table III.Q2. 2. Equals co
table III.Q2.

## Table III.V2:

1. Equals column 10, table III.H8. All-industries total also equals all-industries total in column 2, table III.Q2
2. Equals column 3, table III.H8. All-industries total also equals all-industries total in column 5, table III.Q2

Tables III.V7 and III.V8:
For footnotes 1-3, see footnotes to table I.V7
Table IV.J2:

1. See footnote 1 to table II.C6.

## APPENDIX

## A. Benchmark Survey of U.S. Direct Investment Abroad-1982

B. Direct Investment Industry and Foreign Trade Classifications Booklet

Digitized for FRASER
http://fraser.stlouisfed.org

# U.S. DEPARTMENT OF COMMERCE <br> Bureau of Economic Analysis <br> BENCHMARK SURVEY OF U.S. DIRECT INVESTMENT ABROAD-1982 

INSTRUCTION BOOKLET<br>(Forms BE-10A and BE-10B)<br>INTRODÚCTION

The Benchmark Survey of U.S. Direct Investment Abroad-1982 is being conducted by the Department of Commerce to secure data on the economic significance of these investments. The last such Survey was conducted for 1977.

In an international environment subject to rapid political and economic change, the U.S. Government must have reasonably complete and accurate data on U.S. international trade and investment. This benchmark survey will provide such data on U.S. direct investment abroad. The data will be helpful in the formulation of U.S. policy regarding direct investment. They will also be used in analyzing the impact of U.S. policy, and that of foreign host countries, on U.S. direct investment. One important use of the data, for example, will be in bilateral and multilateral negotiations to reduce barriers to world trade and investment, particularly in the services sector.
In addition, the benchmark survey will provide the data necessary to derive current estimates of direct investment from data collected in sample surveys in nonbenchmark years. In particular, this survey, which covers the universe of U.S. direct investment abroad, will serve as a benchmark for the quarterly direct investment estimates included in the international transactions and gross national product accounts. The survey also will provide extensive new data for researchers in business, labor, Government, and universities, for use in examining the relationships between direct investment and other economic variables, such as production, trade, and employment.

The filing of reports for this Survey is mandatory under Section 5 of the International Investment Survey Act of 1976, Public Law No. 472, 94th Congress, 90 Stat. 2059, 22 U.S.C. 3101 through 3108 (hereinafter "the Act"). As provided by Section S(c) of the Act, the information reported may be used for analytical and statistical purposes only and will be held confidential (see II.F. of this Instruction Booklet). The Survey has been approved by OMB under the Paperwork Reduction Act (44 U.S.C. 3501, et $\mathrm{seq})$.

A report must be filed by, or on behàlf of, each U.S. person that, at any time during its 1982 fiscal year, owned or controlled a direct or indirect interest of 10 percent or more in a foreign business enterprise, including real estate abroad held for business purposes. Reporting requirements and instructions relating to specific parts of the report forms are given herein. Regulations may be found in 15 CFR, Part 806. If a person receiving the report forms and instructions is not required to report according to the Act and the reporting requirements, the enclosed "Claim for Not Filing a BE-10" must be completed and returned to the Bureau of Economic Analysis within 30 days.

Your cooperation will be appreciated.

## REPORTING REQUIREMENTS

## I. Definitions

A. United States, when used in a geographic sense, means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and all territories and possessions of the United States.
B. Foreign, when used in a geographic sense, means that which is situated outside the United States or which belongs to or is characteristic of a country other than the United States.
C. Person means any individual, branch, partnership, associated group, association, estate, trust, corporation, or other organization (whether or not organized under the laws of any State), and any government (including a foreign government, the United States Government, a State or local government, and any agency, corporation, financial institution, or other entity or instrumentality thereof, including a government-sponsored agency).
D. United States person means any person resident in the United States or subject to the jurisdiction of the United States (See IV. E. for further details).
E. Foreign person means any person resident outside the United States or subject to the jurisdiction of a country other than the United States (See IV. E. for further details).
F. Business enterprise means any organization, association, branch, or venture which exists for profitmaking purposes or to otherwise secure economic advantage, and any ownership of any real estate.
G. U.S. direct investment abroad means the ownership or control, directly or indirectly, by one U.S. person of 10 per centum or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in an unincorporated foreign business enterprise, including a branch.
H. U.S. Reporter means the U.S. person which has direct investment in a foreign business enterprise, including a branch. If the U.S. person is an incorporated business enterprise, the U.S. Reporter is the fully consolidated U.S. domestic enterprise consisting of (1) the U.S. corporation whose voting securities are not owned more than 50 percent by another U.S. corporation, and (2) proceeding down each ownership chain from that U.S. corporation, any U.S. corporation (including Domestic International Sales Corporations)
whose voting securities are more than 50 percent owned by the U.S. corporation above it.
I. Affiliate means a business enterprise located in one country which is directly or indirectly owned or controlled by a person of another country to the extent of 10 per centum or more of its voting stock for an incorporated business or an equivalent interest for an unincorporated business, including a branch.
J. Foreign affiliate means an affiliate located outside the United States in which a U.S. person has direct investment.
K. Majority-owned foreign affiliate means a foreign affiliate in which the combined direct and indirect ownership interest of ALL U.S. REPORTERS of the affiliate exceeds 50 per centum.
L. Foreign affiliate parent means a U.S. Reporter's foreign affiliate which has an equity interest in another foreign affiliate of the U.S. Reporter.
M. Associated group means two or more persons who, by the appearance of their actions, by agreement, or by an understanding, exercise their voting privileges in a concerted manner to influence the management of a business enterprise. Each of the following are deemed to be an associated group:

1. Members of the same family,
2. A business enterprise and one or more of its officers or directors,
3. Members of a syndicate or joint venture, or
4. A corporation and its domestic subsidiaries.
N. Branch means the operations or activities conducted by a person in a different location in its own name rather than through an incorporated entity.
O. Intermediary means an agent, nominee, manager, custodian, trust, or any person acting in a similar capacity.
P. 1982 fiscal year is the U.S. Reporter's or the foreign affiliate's financial reporting year that has an ending date in calendar year 1982. For a person that does not have a financial reporting year, or does not have a financial reporting year ending in calendar year 1982, its 1982 fiscal year is deemed to be the same as calendar year 1982.

## II. Who Must Report and Forms Required

## A. Basic Requirement

A BE-10 report is required from every U.S. person having a foreign affiliate-that is, every U.S. person having direct or indirect ownership or control of at least 10 per centum of the voting stock of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise-at any time during the U.S. person's 1982 fiscal year. Reports are required even though the foreign business enterprise may have been established, acquired, seized, liquidated, sold, expropriated, or inactivated during FY 1982.

Where a U.S. individual has indirect ownership in a foreign affiliate by virtue of owning 10 percent or more of a U.S. business enterprise that, in turn, owns the foreign affiliate, only the U.S. business enterprise is required to report based on ownership of the foreign affiliate as set forth in the "Exception" in II.B. 1 below. Note, however, that U.S. business enterprises must report on a consolidated basis (see definition of U.S. Reporter).

Reports must be submitted for FY 1982.

## B. Form BE-10A (Report for U.S. Reporter)

1. Filing-A completed Form BE-10A is required from each U.S. Reporter (see definition). Exception: When a U.S. business enterprise owns a foreign affiliate and the U.S. business enterprise is
owned more than 50 per centum by a U.S. individual, the report should be filed by, and Form BE-10A data should be for, the business enterprise rather than the individual. Any direct financial transactions with, or positions in, the foreign affiliate by the individual must be included in the U.S. business enterprise's report.

## (See II.E. below on "Specialized report forms for banks.")

2. Consolidation-When the U.S. Reporter is a corporation, Form BE-10A is required to cover the fully consolidated U.S. domestic enterprise consisting of (1) the U.S. corporation whose voting securities are not owned more than 50 percent by another U.S. corporation, and (2) proceeding down each ownership chain from that U.S. corporation, any U.S. corporation (including Domestic International Sales Corporations) whose voting securities are more than 50 percent owned by the U.S. corporation above it.

The fully consolidated U.S. domestic enterprise excludes foreign branches and other foreign affiliates.

It is recognized that conditions may exist that would lead a U.S. parent company to exclude certain majority (more-than- 50 -percent). owned domestic subsidiaries from financial statements used in reports to shareholders. An example of such exclusion is a majorityowned domestic subsidiary whose operations are unrelated to those of
its owning company; such as a finance company owned by a manufacturer.

BEA prefers that such a subsidiary be consolidated in its U.S. parent's Form BE-10A. In lieu of consolidation, the U.S. parent may either (1) combine or aggregate data for the subsidiary on the U.S. parent's Form BE-10A or (2) file a separate Form BE-10A for such a subsidiary.

In the case of consolidation, combination, or aggregation, the names of each such subsidiary and the increase in the U.S. parent's total assets that resulted from its inclusion of the subsidiary must be given in item 6 of Form BE-10A. A Form BE-10B must also be filed for each of the subsidiary's foreign affiliates. On the Form BE-10A and each of the Form(s) BE-10B, the U.S. parent, including the subsidiary, is considered the U.S. Reporter.

When a separate Form BE-10A is filed for such a subsidiary, the subsidiary should be considered the U.S. Reporter for purposes of completing that form, and items 3, 5, 6, and 7 should be omitted. In Part II, Sections G and H, of the Forms BE-10A for both the parent and such a subsidiary, however, the data requested on transactions with "foreign affiliates" should cover transactions with all foreign affiliates of both the parent and the subsidiary combined. A Form BE-10B must be filed for each of the subsidiary's foreign affiliates, if any. In item 1 of the Form(s) BE-10B for each such affiliate, the subsidiary should be listed as the U.S. Reporter. However, in parts III, IV, and V of all Form(s) BE-10B (whether for affiliates of the U.S. parent or affiliates of such a subsidiary), the term "U.S. Reporter" refers to the fully consolidated U.S. domestic enterprise, including the subsidiary. That is, the report for a given foreign affiliate will always show equity interests and financial positions between that affiliate and all entities that are part of the fully consolidated U.S. domestic enterprise, including subsidiaries reported on separate Forms BE-10A

If all the foreign affiliates of a U.S. parent are owned directly or indirectly by such a subsidiary, and a separate Form BE-10A is filed for that subsidiary, the U.S. parent company must also file a Form BE-10A, on a normally consolidated basis, to include all of its other domestic operations.

The U.S. parent is responsible for ensuring that the required Forms BE-10A and B, for itself and such subsidiaries, are filed with BEA on a timely basis. Such a subsidiary's filing deadline is the same as that which applies to its U.S. parent.
3. Partial exemption when all foreign affiliates are exempt-When there are foreign affiliates, but all are exempt from filing Form BE-10B, then only items 1 through 4 of Form BE-10A, and Form BE-10A SUPPLEMENT, which lists exempt foreign affiliates, must be completed and filed.
4. Partial exemption based on type of U.S. Reporter-U.S. Report. ers that are religious, charitable, or other nonprofit organizations and individuals who directly own a foreign affiliate are required to file Form BE-10A, completing in Part I (Identification of U.S. Reporter), only items 1, 2, 8,9, and 12; the remaining items in Part I and all items in Part II (Financial and Operating Data of the U.S. Reporter) need not be completed.

## C. Form BE-10B (Report for foreign affiliate)

1. Filing-A U.S. person is required to file one Form BE-10B for each foreign affiliate that is not exempt pursuant to II.C.2. below. (Under those limited conditions where foreign affiliates may be consolidated, the consolidated entity is considered to be one foreign affiliate.)

To determine whether, for purposes of reporting, a given foreign business enterprise is considered its foreign affiliate, a U.S. person should sum its percentages of voting ownership through all lines, or chains of ownership, direct and indirect. If the resulting sum is at least 10 percent, then the enterprise is the U.S. person's
foreign affiliate and, unless otherwise exempt, must be reported. In the case of a line of indirect ownership, the U.S. person's percentage ownership in a given foreign business enterprise should be computed as its direct ownership percentage in the first foreign business enterprise in the chain, multiplied by that first enterprise's direct ownership percentage in the second enterprise in the chain, multiplied by the second enterprise's direct ownership percentage in the third enterprise in the chain, multiplied by the corresponding percentages for all other intervening enterprises in the chain, multiplied by the last intervening enterprise's direct ownership percentage in the given foreign business enterprise. To illustrate, suppose that the U.S. person owned 50 percent of foreign business enterprise A directly, and that A owned 75 percent of foreign business enterprise $B$ that, in turn, owned 80 percent of foreign business enterprise $C$. Then the U.S. person's percentage of indirect ownership of $B$ would be 37.5 percent (the product of the first two percentages), its indirect ownership of $C$ would be 30 percent (the product of all three percentages), and $B$ and $C$ (as well as $A$ ) would be considered the U.S. person's foreign affiliates.
(See II.E. below on "Specialized report forms for banks.")
2. Total exemption-A Form BE-10B need not be filed, if:
(a) Each (i.e., all three) of the following items for the foreign affiliate (not the U.S. Reporter's share) was between - $\$ 3,000,000.00$ and $+\$ 3,000,000.00$ for FY 1982:
(1) Total assets, item 60 ;
(2) Sales or gross operating revenues, excluding sales taxes, item 72; and
(3) Net income after provision for foreign income taxes, item 84.

## AND

(b) The foreign affiliate does not own another foreign affiliate for which a Form BE-10B must be filed. If the latter condition is not met, then Form BE-10B must be filed for the foreign affiliate holding the equity interest regardless of the value of its assets, sales, or net income. That is, all affiliates upward in a chain of ownership must be reported. An affiliate's receivables due from its parent may not be netted against total assets when applying the exemption criteria.

Pursuant to item 8, Form BE-10A, a Form BE-10A SUPPLEMENT must be attached giving the name, country of location, and selected information for each exempt foreign affiliate.
3. Number of Forms BE-10B required -If two or more U.S. Reporters jointly own a foreign affiliate, directly or indirectly, each U.S. Reporter must submit a Form BE-10B for the affiliate. The U.S. Reporter having the highest percentage ownership (direct and indirect combined) in the foreign affiliate must file a Form BE-10B in which all Parts, including either Part IV or Part V as required, have been completed (hereinafter referred to as a "complete" report); and the other U.S. Reporter(s) must file a Form BE-10B in which only Part I, items 1 through 25, and Part III, if there is direct ownership or direct financial positions or transactions, have been completed (hereinafter referred to as a "partial" report). If the ownership percentages are the same, the U.S. Reporters must decide among themselves which one will submit the complete report. If Parts II and IV or V are omitted on a particular form, give in item 25 of Part I the name of the U.S. Reporter that is filing the data for those parts.

Note, however, that in Part V, Sections C, D, F, and G, of Form BE-10B, data must be reported by transactor. For example, in Part V, Section D, Composition of External Financing, one transactor category is "with U.S. Reporter(s) of this affiliate". If the U.S. Reporter filing the complete Form BE-10B cannot, or prefers not to, secure from the affiliate and report the data concerning the other U.S. Reporter(s) of the affiliate, then each U.S. Reporter is required to complete those data sections in Part $V$ so as to report its data. The U.S. Reporter filing the complete Form BE-10B must
attach a note to the Form stating that it is not reporting the data in Sections C, D, F, and G of Part V for the other Reporter(s), if it has so elected, and must so inform the other U.S. Reporter(s).
4. Illustration of filing requirements-This section illustrates the number of Forms $\mathrm{BE}-10 \mathrm{~B}$ required based on the situation given below and indicates whether a "complete" or a "partial" report is required, as defined in II.C.3. above. Solid lines indicate ownership (with ownership percentages in parentheses); the dotted line indicates direct financial transactions. Based on the Illustration, the following are required:
(a) From U.S. Reporter Alpha:
(i) For affiliate A , one complete report.
(ii) For affiliate B, one complete report. (Alpha must file the complete report because it has the largest percentage ownership.)
(iii) For affiliate C , one complete report (with Part III filled in to show Alpha's direct financial transactions with the affiliate).
(iv) For affiliate E , one complete report. (Alpha must file the complete report because it has the largest percentage
ownership, even though the ownership is indirect.) Part III will have no entries since there is no direct ownership or direct financial transactions by Alpha with the affiliate.
(b) From U.S. Reporter Beta:
(i) For affiliate $B$, one partial report since the complete report is filed by Alpha.
(ii) For affiliate D , one complete report.
(iii) For affiliate $E$, one partial report since the complete report is filed by Alpha. Part III will have no entries since there is no direct ownership or direct financial transactions by Beta with the affiliate.
(iv) For affiliate $F$, one complete report. Part III will have no entries since there is no direct ownership or direct financial transactions by Beta with the affiliate.

NOTE: U.S. Reporters having a foreign affiliate structure that includes indirectly owned foreign affiliates are requested to submit a complete organization chart of their foreign affiliates showing all the lines of ownership. This will aid us in properly interpreting the report.

## ILLUSTRATION

5. Foreign affiliate consolidation-In cases where the recordkeeping system of foreign affiliates makes it impossible or extremely difficult to file a separate report for each foreign affiliate, a U.S. Reporter may consolidate affiliates in the SAME COUNTRY when the following conditions apply:
(a) The affiliates are in the same BEA 3-digit industry, as defined in the Direct Investment Industry and Foreign Trade Classifications Booklet, Part I; or
(b) The affiliates are integral parts of the same business operation. For example, if German affiliate A manufactures tires and a majority of its sales are to German affiliate B which produces autos, then affiliates A and B may be consolidated.

In all other situations, the U.S. Reporter should call this office at (202) 523.0632 between the hours of 7:30 a.m. and 4:00 p.m. Washington, D.C. time for guidance. UNDER NO CIRCUMSTANCES MAY A U.S. REPORTER CONSOLIDATE FOREIGN AFFILIATES IN DIFFERENT COUNTRIES.
U.S. Reporters who participate in other BEA direct investment surveys must consolidate foreign affiliates in the same manner for all foreign affiliate forms subsequently filed with the Bureau of Economic Analysis (e.g., Forms BE-133B and C, and BE-577). In cases where current consolidation practices on these forms do not conform to the above instructions, the U.S. Reporter is requested to change the consolidation practices on Forms BE-133B and C, and BE-577. When a form based upon the amended consolidation practice is submitted, please bring it to this Bureau's attention when filing the form.
6. Assigning serial numbers to Form BE-10B reports-In item 8 of Form BE-10A, each U.S. Reporter must enter the number of Forms BE-10B it is required to file. The U.S. Reporter also must list all foreign affiliates for which it is filing a Form BE-10B on a separate sheet, and attach the list to its BE-10 report. On that list, the foreign affiliates should be serially numbered, beginning with " 1 ", and the serial number assigned to a given foreign affiliate should then be entered in item 3 and at the top of each ODD numbered page of the Form $\mathrm{BE}-10 \mathrm{~B}$ for that foreign affiliate.

## D. Relationship between Forms BE-10A and BE-10B

The term "U.S. Reporter" as defined means the fully consolidated U.S. domestic enterprise; therefore, on Form BE-10B, when data on trade and financial relationships between the U.S. Reporter and the foreign affiliate are requested, the data must reflect the foreign affiliate's relationship with the entire U.S. enterprise, not merely with one division, operating unit, or part.

## E. Specialized report forms for banks

Specialized report forms have been adopted for banks (that is, for business enterprises over 50 percent of whose total revenues are generated by activities classified in industry code 600), because much of the information on banks' foreign activities which is requested on the standard forms is already being reported to other agencies of the Federal Government. The specialized report forms are designed to yield only such additional information as is deemed necessary. Use of specialized Forms BE-10A BANK and BE-10B BANK is at the discretion of BEA; in situations where their possible use is not clear-cut, permission must be secured from BEA in advance of filing.

Form BE-10A BANK has been developed for reporting by a U.S. Reporter that is a bank or a bank holding company. It is not to be used by a U.S. Reporter that may technically be classified as a bank holding company because of an interest in a banking activity, but that has over 50 percent of its revenues generated by nonbank activities. (Activities of subsidiaries that may not be banks but that provide support to the parent company, such as real estate subsidiaries set up to hold the office building occupied by the parent company, are considered bank activities.)

BE-10B BANK is for reporting of a foreign affiliate that is a bank in which the U.S. Reporter holds a direct and/or indirect ownership interest. However, a foreign bank affiliate of the U.S. Reporter in which the U.S. Reporter holds only an indirect ownership interest of 50 percent or less, and the foreign affiliate does not own another foreign affiliate for which a Form BE-10B must be filed, is exempt from being reported on Form BE-10B BANK, but must be listed on Form BE-10A SUPPLEMENT. Incorporated foreign bank affiliates in which the U.S. Reporter holds a direct equity interest must be separately reported. All branch banks of the U.S. Reporter in a given foreign country must be consolidated on one Form BE-10B BANK even if it is the Reporter's practice to report data for these branches separately on Federal Reserve Form FR105 F or on Comptroller of the Currency Form CC7610-09.

A U.S. Reporter that is a bank, but that has a nonbank foreign affiliate, must file a Form BE-10A BANK for itself and a standard Form BE-10B for the nonbank foreign affiliate.

A U.S. Reporter that is not a bank, but that has a bank foreign affiliate, must file a standard Form BE-10A for itself and a Form BE-10B BANK for the bank foreign affiliate.

Banks located on U.S. military bases abroad and servicing base personnel are not considered "foreign" and a Form BE-10B BANK should not be filed for them.

The specialized report forms, where their use is permitted, replace the standard forms, and the instructions given on the specialized report forms in this Instruction Booklet should be so construed.

## F. Confidentiality of Reports

Section 5(c) of the Act provides that the information filed in this report may be used only for analytical and statistical purposes and access to the information shall be available only to officials and employees (including consultants and contractors and their employees) of agencies designated by the President to perform functions under the Act. The President may authorize the exchange of the information between agencies or officials designated to perform functions under the Act, but only for analytical and statistical purposes. No official or employee (including consultants and contractors and their employees) shall publish or make available any information collected under the Act in such a manner that the person to whom the information relates can be specifically identified. Reports and copies of reports prepared pursuant to the Act are confidential and their submission or disclosure shall not be compelled by any person without the prior written permission of the person filing the report and the customer of such person where the information supplied is identifiable as being derived from the records of such customer ( 22 U.S.C. 3104).

## III. Response Required When Contacted by BEA

A BE-10, Benchmark Survey of U.S. Direct Investment Abroad1982, report is required from every U.S. person having a foreign affiliate-that is, every U.S. person having direct or indirect ownership or control of at least 10 per centum of the voting stock of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise, including branchesat any time during the U.S. person's 1982 fiscal year, whether or not the person is contacted by BEA. In addition, any person BEA contacts, either by sending them the BE-10 Survey report forms or by written inquiry concerning the person's being subject
to the reporting requirements of the BE-10 Survey, must respond in writing. The response must be made by filing the properly completed report, or by certifying in writing within thirty (30) days of being contacted by BEA, to the fact that the person had no direct investment within the purview of the reporting requirements of the BE-10 Survey. A person receiving the BE-10 Survey report forms may accomplish the latter by completing and returning to BEA the "Claim for Not Filing a BE-10," which is included as part of the packet. This requirement is necessary to ensure compliance with reporting requirements and efficient administration of the Act.

## IV. Clarification of Coverage and Special Situations

A. U.S. business enterprise owned by a foreign person-A U.S. business enterprise owned by a foreign person shall report with respect to any foreign business enterprise it owns or controls, directly or indirectly, to the extent of 10 percent or more, but shall not report other property of its foreign owner. For purposes of Form BE-10A (e.g., items 61, 62, and 106 through 190), the foreign parent of the U.S. business enterprise is considered a "foreign person other than the U.S. Reporter's foreign affiliate."
B. Real estate-Real estate held exclusively for personal use and not for profitmaking purposes is exempted from being reported. A residence which is leased by the owner who intends to re-occupy it is considered real estate held for personal use. If a business enterprise, otherwise required to report, is in the form of real property not identifiable by name, a report is required to be filed by and in the name of the beneficial owner, or in the name of such beneficial owner by the intermediary of such beneficial owner.
C. Airlines and ship operators-U.S. airline and ship operator's foreign stations, ticket offices, and terminal and port facilities that provide services only to their own operations are exempted from being reported. Reports are required when such facilities produce significant revenues from services provided to unaffiliated persons.
D. Partnerships-Limited partners do not have voting rights in a partnership and therefore cannot have direct investment in a partnership; their investment is considered to be portfolio investment. Determination of the existence of direct investment in a partnership shall be based on the country of residence of, and the percentage control exercised by, the general partner(s), although the latter may differ from the financial interest of the general partner(s).
E. Determining place of residence and country of jurisdiction of individuals - An individual will be considered a resident of, and subject to the jurisdiction of, the country in which physically located, subject to the following qualifications:

1. Individuals who reside, or expect to reside, outside their country of citizenship for less than one year are considered to be residents of their country of citizenship.
2. Individuals who reside, or expect to reside, outside their country of citizenship for one year or more are considered to be residents of the country in which they are residing, except as provided in IV.E. 3 .
3. Notwithstanding IV.E.2, if an owner or employee of a business enterprise resides outside the country of location of the enterprise for one year or more for the purpose of furthering the business of the enterprise, and the country of the business enterprise is the country of citizenship of the owner or employee, then such owner or employee shall, nevertheless, be considered a resident of the country of citizenship provided there is the intent to return within a reasonable period of time.
4. Individuals and members of their immediate families who are residing outside their country of citizenship as a result of employment by the government of that country-diplomats, consular officials, members of the armed forces, etc-are considered to be residents of their country of citizenship.

## F. Estates, trusts, and intermediaries

1. A U.S. estate is a person and therefore may have direct investment, and the estate, not the beneficiary, is considered to be the U.S. Reporter. Thus, ownership of a foreign affiliate by a U.S. estate shall be reported by the administrator, executor, etc., of the estate and not by the beneficiary.
2. A trust, either U.S. or foreign, is a person, but is not a business enterprise. The trust shall be considered the same as an intermediary and reporting should be as outlined in IV.F.3. below. For reporting purposes, the beneficiary(ies) of the trust, or the creator(s) of the trust in the situation detailed below or if there is, or may be, a reversionary interest, shall be considered to be the owner(s) of the investments of the trust for determining the existence of direct investment. Where a corporation or other organization creates a trust designating its shareholders or members as beneficiaries, the
creating corporation or organization shall be deemed to be the owner of the investments of the trust, or succeeding trusts where the presently existing trust has evolved out of a prior trust, for the purposes of determining the existence and reporting of direct investment.

This procedure is adopted in order to fulfill statistical reporting requirements and does not imply that control over an enterprise owned or controlled by a trust is, or can be, exercised by the beneficiary(ies) or creator(s).
3. Intermediary
(a) If a particular U.S. direct investment abroad is held, administered, or managed by a U.S. intermediary, such intermediary shall be responsible for reporting the required information for, and in the name of, its principal or shall instruct the principal to submit the required information. Upon instructing the principal, the intermediary shall be released from further liability to report provided it has informed this Bureau of the date such instructions were given and the name and address of the principal, and has supplied the principal with any information in the possession of, or which can be secured by, the intermediary that is necessary to permit the principal to complete the required reports. When acting in the capacity of an intermediary, the accounts or transactions of the U.S. intermediary with the foreign affiliate shall be considered as accounts or transactions of the U.S. principal with the foreign affiliate. To the extent such transactions or accounts are unavailable to the principal, they may be required to be reported by the intermediary.
(b) If a U.S. person holds a foreign affiliate through a foreign intermediary, the U.S. person will be considered to own the foreign affiliate directly and all accounts or transactions of the U.S. person with the intermediary will be considered to be with the foreign affiliate.
G. Foreign affiliate operating completely outside its country of incorporation-If a foreign affiliate conducts all its operations from, and is located in, a single foreign country that is different from its foreign country of incorporation, it is deemed to be operating totally outside its country of incorporation. A single BE-10B report for the entity in the country of operation must be filed, treating it as an incorporated foreign affiliate. Do not file a separate BE-10B report for the entity in the foreign country of incorporation.

A foreign affiliate is deemed to have operations in its foreign country of incorporation and, therefore, a separate BE-10B report must be filed for the entity in that country, if it has any of the following in the country of incorporation:

1. Bank account
2. Personnel
3. Property, plant, or equipment
4. Sales

If a foreign affiliate incorporated abroad conducts its operations from, and has locations in, more than one foreign country, a separate Form BE-10B must be filed for each country in which it has operations and a separate Form BE-10B must be filed for the entity in the foreign country of incorporation, treating the entity as an incorporated foreign affiliate in that country.

If a foreign affiliate incorporated abroad conducts its operations from, and is located in, the United States, a Form BE-10B must be filed for the entity in the country of incorporation, treating it as an incorporated foreign affiliate in that country. The affiliate's DI industry code is determined by the operations conducted from the United States.
H. Agencies and representative offices - A foreign represen. tative office (or agent or employee) of a U.S. person is not considered a business enterprise and therefore is not required to be reported as a foreign affiliate. A foreign presence of a U.S. person is considered a foreign representative office, and thus not subject to reporting, if (1) it has no assets (other than office furniture) held either in its own name or in the name of the U.S. person, (2) to the extent that its employees are compensated by commissions, the commissions arise only from sales or business that the employees generate for
the U.S. person, (3) it does not produce revenue (other than funds from the U.S. person to cover its expenses), and (4) it is engaged only in representational, public-relations type activities, or the gather-
ing of market information. A foreign presence that produces revenues from services it provides to unaffiliated persons is considered a foreign affiliate and is subject to reporting requirements.

## V. Accounting Methods and Reporting Procedures

## A. Accounting methods and records - Generally accepted

 U.S. accounting principles should be followed. Corporations should generally use the same methods and records that are used to generate reports to stockholders, unless the line instruction for a given item indicates otherwise. Reports for unincorporated persons must be generated on an equivalent basis.Reference to Financial Accounting Standards Board statements are referred to as "FASB" statements.

## B. Translation of foreign currency financial and operating

 data into U.S. dollars1. Financial statements-Foreign affiliate financial statements, such as the balance sheet and income statement, should be trans. lated from the host country currency to U.S. dollars using U.S. generally accepted accounting principles (FASB S2 or, if the foreign affiliate has not adopted FASB 52 as of the end of its fiscal year 1982, then FASB 8 may be used) as would be required in order to incorporate foreign statements into the U.S. Reporter's financial statements for reports to shareholders.
2. Selected financial and operating data of foreign affiliateAccording to FASB 8 and 52, "Revenue and expense transactions shall be translated in a manner that produces approximately the same dollar amounts that would have resulted had the underlying transactions been translated into dollars on the dates they occurred." Since separate translation of each transaction is usually impractical, the specific result can be achieved by using an average rate for the period. If FASB 8 is used to translate the foreign affiliate's financial statements into U.S. dollars, revenues and expenses that relate to assets and liabilities translated at the historical rates shall be translated at the historical rates used to translate the related assets and liabilities.

In this report, certain revenue and expense transactions which may not be translated separately for the financial statements, such as wages and salaries, exports and imports, and fees and royalties, are required to be reported. These transactions should be translated in a manner that is consistent with that used to translate the financial statements to U.S. dollars.
C. Equity method of accounting for reporting equity investments on Form BE-10B-Investments by one foreign affiliate in the common stock of another foreign affiliate should be accounted for as detailed below. (Note that a foreign affiliate may not fully consolidate an affiliate it owns that is in a different industry or in a different country. See II.C.5. for the rules governing foreign affiliate consolidation.) Equity investments not fully consolidated should be reported as follows:

1. Investment in other foreign affiliates owned at least 20 percent should be reported using the equity method. However, immaterial investments may be reported using the cost method provided this method is consistent with normal reporting practice.
2. Investment in other foreign affiliates owned less than 20 percent should be reported using the cost method.

Furthermore, when, according to the rules for this survey, the owning and the owned foreign affiliates cannot be fully consolidated, adjustments similar to those made in preparing consolidated statements, including adjustments to eliminate intercompany account balances, security holdings, sales and purchases, interest, dividends, and gains and losses, should not be made.
D. Reporting of receipts and payments of dividends, interest, fees, royalties; rentals, etc.-Amounts for items such as dividends, interest, fees, royalties, and rentals should be entered as of the date they were received, paid, or entered into inter. company accounts between the payor and payee, WHICHEVER OCCURRED FIRST. Include amounts for which payment was made in kind. For an item entered into intercompany accounts in, or prior to, the reporting period, in order to avoid duplication, any subsequent settlement of the account in the reporting period should not be reflected again in such item but should be reflected only as a reduction of intercom. pany accounts in the balance sheet.
E. Required information not available-All reasonable efforts must be made to obtain information required for reporting. Every question on each form must be answered, except where specifically exempted.
F. Estimates - If actual data are not available, or only partial data are available, estimates should be supplied and labeled as such. When data items cannot be fully subdivided as required, totals and an estimated breakdown of the total should be supplied.
G. Specify - When "specify" is included in certain data items, the type and dollar amount of the major items included must be given for at least the items mentioned in the line instruction.
H. Space on form insufficient - When space on a form is insufficient to permit a full answer to any item, the required information should be submitted on supplementary sheets, appropriately labeled and referenced to the item number and the form.
I. Annual stockholders' report-Business enterprises issuing annual reports to stockholders are required to furnish a copy of their 1982 annual report to this Bureau.

## VI. Filing Report

A. Due date-BE-10 reports comprising Form BE-10A and Form(s) $\mathrm{BE}-10 \mathrm{~B}$ are due on the following dates:
June 30, 1983-U.S. Reporter required to file less than 20 Forms BE-10B.
July 31, 1983-U.S. Reporter required to file 20 to 99 Forms BE-10B.

August 31, 1983-U.S. Reporter required to file 100 or more Forms BE-10B.
B. Extension-Requests for an extension of the reporting deadline will not normally be granted. However, in a hardship case, a written request for an extension will be considered provided it is received at least 15 days prior to the due date of the report and enumerates substantive reasons necessitating the extension. BEA will provide a written response to such requests.
C. Assistance - If there are any questions concerning the report, phone (202) 523-0632 for assistance between the hours of 7:30 a.m. and 4:00 p.m., Washington, D.C. time.
D. Number of copies-A single original copy of each form or supplement shall be filed with the Bureau of Economic Analysis. For Form BE-10A, this should be the copy with the address label if such a labeled copy has been provided; for Forms BE-10B, attach the appropriate identification label for each foreign affiliate report if such a label has been provided. In addition, each U.S. Reporter must retain a copy of its report to facilitate resolution of any problems which may arise covering the data reported. (Both copies are protected by law; see statement on confidentiality in II.F.)
E. Where to send report-Return the report to U.S. Department of Commerce, Bureau of Economic Analysis (BE-50, SSB), Washington, D.C. 20230.
F. Additional copies of forms-Requests for more than two copies of the forms and instructions will be filled upon demonstration of need (e.g., law and accounting firms must furnish names and addresses of U.S. Reporters for whom they will be filing reports).

# INSTRUCTIONS FOR SPECIFIC PARTS OF THE REPORT FORMS 

## VII. Employment and Employee Compensation (Form BE-10A, Items 76 through 94 and Form <br> BE-10B, Items 134 and 135 or Items 179 through 190).

Employment and employee compensation data should be based on payroll records. They should relate to activities during FY 1982 regardless of whether such activities were charged as an expense on the income statement, charged to inventories, or capitalized. Do NOT include data related to activities of prior periods, such as those capitalized or charged to inventories in prior periods.
A. Employment-Employment is the number of full-time and part-time employees on the payroll at the end of FY 1982, excluding home workers and independent sales personnel who are not employees. A count taken during, rather than at the end of, FY 1982 may be used provided it is a reasonable proxy for the end of FY 1982 number. If employment at the end of FY 1982, or the count taken at some other time during FY 1982, was unusually high or low because of temporary factors (e.g., a strike), the number of employees that reflects normal operations should be given. If the business enterprise's activity involves large seasonal variations, the average number of employees for FY 1982 should be given. If given, the average should be the average for FY 1982 of the number of persons on the payroll at the end of each payroll period, month or quarter. If precise figures are not available, give your best estimate of the number of employees for FY 1982.
B. Research and development (R\&D) employees-Scientists, engineers, and other professional and technical employees, including managers, who spend all or a majority of their time engaged in scientific or engineering $\mathrm{R} \& \mathrm{D}$ work, at a level which requires knowledge of physical or life sciences, engineering, or mathematics at least equivalent to that acquired through completion of a fouryear college course with a major in one of these fields (i.e., training may be either formal or by experience).

R\&D includes basic and applied research in science and in engineering, as well as design and development of prototypes and processes, if the purpose of such activity is to:

1. Pursue a planned search for new knowledge whether or not the search has reference to a specific commercial application;
2. Apply existing knowledge to the creation of a new product or process, including evaluation of uses; or
3. Apply existing knowledge to the employment of a present product or process.

R\&D includes the activities described above whether assigned to separate $\mathrm{R} \& \mathrm{D}$ organization units of the company or carried on by company laboratories and technical groups that are not part of a separate $R \& D$ organization.
C. Employee compensation-Consists of wages and salaries and employer expenditures for all employee benefit plans:

1. Wages and salaries-The gross earnings of all employees before deduction of employees' payroll withholding tax, social insurance contributions, group insurance premiums, union dues, etc. Include time and piece-rate payments, cost of living adjustments, overtime pay and shift differentials, bonuses, profit-sharing amounts, and commissions. Exclude commissions paid to independent sales personnel and piece-rate payments made to home workers who are not employees. (For incorporated business enterprises, include salaries of officers; for unincorporated business enterprises, exclude payments to proprietors or partners.)

Wages and salaries include direct payments by employers for vacations, sick leave, severance (redundancy) pay, etc. Exclude payments made by, or on behalf of, benefit funds rather than by the employer. (Employer contributions to benefit funds are included in "employee benefit plans".)

Wages and salaries include in-kind payments valued at their cost to the employer that are clearly and primarily of benefit to employees as consumers. Do not include expenditures that benefit employers as well as employees, such as for plant facilities, employee training programs, and reimbursements for business expenses.
2. Employee benefit plans-Employer expenditures for all employee benefit plans, including those required by government statute, those resulting from a collective-bargaining contract, or those that are voluntary. Employee benefit plans include Social Security, retirement plans, life and disability insurance, guaranteed sick pay programs, workers' compensation insurance, medical insurance, family allowances, unemployment insurance, severance pay funds, etc. If plans are financed jointly by the employer and the employee, only the contributions of the employer should be included.
D. Production workers engaged in manufacturing activities - For U.S. Reporters, data on the number of, hours worked by, and compensation of, production workers in manufacturing activities are required for each separate manufacturing activity shown in items 13 through 20 of Form BE-10A. For major-ity-owned foreign affiliates, such data are required for manufacturing activities shown in items 44 through 48 of Form BE-10B; if more than one manufacturing activity is shown for a given foreign affiliate, data for all manufacturing activities combined are required. Manufacturing activities are activities covered by DI industry codes 201-390, as defined in the Direct Investment Industry and Foreign Trade Classifications Booklet, Part I.

Production workers are those employees most directly connect. ed with carrying out the activities of the business being reported, up to and including working foremen, but excluding other supervisory employees. They are those involved in the physical produc. tion of goods, handling and storage of goods, related services (e.g., maintenance and repair), and auxiliary production for plant's own use (e.g., power plant). If foreign affiliates maintain employment and payroll records according to national (host country) definitions of wage workers or manual workers that do not differ significantly from the above production worker concept, data may be submitted according to the national concepts.
E. Hours worked by production workers-Hours worked include standby or reporting time but exclude hours paid for time not worked, such as holidays, vacations, sick leave, or other paid leave. Although data on hours worked should ordinarily be obtained from payroll records, reasonable estimates are acceptable if utilizing payroll records would be unduly burdensome. Such estimates may be derived, for example, by multiplying the number of production workers by your estimate of average hours worked per production worker for the reporting period. It is important, however, that such estimates be for hours worked, and that hours paid for time not worked be excluded. Data on hours worked, together with the data on wages and salaries and employee benefit plans, will be used to derive hourly compensation rates for production workers. As a check on your estimates, you can compute the implied hourly compensation rate (i.e., divide the sum of wages and salaries and employee benefit plans for production workers by hours worked) to see if it appears reasonable.
(Form BE-10A, Items 103 through 190 and Form BE-10B, Items 137 through 140 or 205 through 236)

The data on U.S. merchandise trade of U.S. Reporters and their foreign affiliates are to be reported on a "shipped" basis-i.e., on the basis of when, where, and to (or by) whom the goods were shipped-in order for them to be on the same basis as official U.S. trade statistics to which they will be compared. However, it is recognized that U.S. Reporters and their foreign affiliates keep their accounting records on a "charged" basis, i.e., on the basis of when, where, and to (or by) whom the goods were billed or charged. Differences between the "charged" and "shipped" bases may be substantial. A major difference arises when a U.S. Reporter buys goods from an affiliate in country $A$ and sells them to an affiliate in country B, but the goods are shipped directly from country A to country B. Because the goods did not physically enter or leave the United States, they are not U.S. trade. However, when the U.S. Reporter records the transactions on its books, it would show a purchase charged to it from country $A$ and a sale charged by it to country B. If the U.S. Reporter's trade data in this survey were prepared on the "charged" basis, the purchase and sale would appear incorrectly as a U.S. import and a U.S. export, respectively. Other differences arise when the U.S. Reporter charges the sale of its products to a foreign affiliate in one country, but ships the goods directly from the United States to an unaffiliated foreigner in another country. In the data on the "shipped" basis, this should be a U.S. export to an unaffiliated foreigner, not to the foreign affiliate, and the destination should be the country of the unaffiliated foreigner, not that of the foreign affiliate.

For many U.S. Reporters and affiliates, these and other differences between the "charged" and "shipped" bases may not arise. If there is no material difference between the two bases, the "charged" basis may be used. However, if a material difference does exist, then trade must be reported on the "shipped" basis. For this purpose, the U.S. Reporter may have to derive the data from export and import declarations filed with U.S. Customs or from shipping and receiving documents, rather than from accounting records, or may have to otherwise adjust its data from a "charged" to a "shipped" basis. Item 103 of Form BE-10A and item 205 of Form BE-10B are designed to determine whether there is a material difference between the two bases in determining what is considered U.S. trade, whose trade it is, and the timing and ultimate destination or origin of the trade. In item 104 of Form BE-10A and item 206 of Form BE-10B, the U.S. Reporter must indicate that the data are in fact being reported essentially on the "shipped" basis. BEA will request the U.S. Reporter to refile the data if it determines that there is a material difference between the "charged" and "shipped" bases, and that the data are not on, or adjusted to, the "shipped" basis.
A. Definition of U.S. merchandise trade-The phrases "U.S. merchandise trade," "U.S. merchandise exports," and "U.S. merchandise imports" refer to physical movements of goods between the customs area of the United States and the customs area of a foreign country. Consigned goods must be included in the trade figures when shipped or received, even though not normally recorded as sales or purchases, or entered into intercompany accounts when initially consigned. Exclude the value of ships, planes, railroad rolling stock, and trucks that were temporarily outside the United States, or country of location of the foreign affiliate, transporting people or merchandise.
B. Timing-Only goods actually shipped between the United States and a foreign country during FY 1982 should be included, regardless of when the goods were charged or consigned. For example,
goods shipped by the U.S. Reporter to an affiliate in FY 1982 that were charged or consigned to the affiliate in FY 1983, should be included, but goods shipped to an affiliate in FY 1981 that were charged or consigned to the affiliate in FY 1982 should be excluded.
C. Trade of the U.S. Reporter-Goods shipped by, or to, the U.S. Reporter, whether or not they were actually charged or consigned by, or to, the U.S. Reporter, are considered to be trade of the U.S. Reporter.
D. Trade of a foreign affiliate-Goods shipped by, or to, a foreign affiliate, whether or not they were actually charged or consigned by, or to, the foreign affiliate are considered trade of the foreign affiliate.
E. Country of ultimate destination-On Form BE-10A of this report, the country of ultimate destination is the country where the goods are to be consumed, further processed, or manufactured, AS KNOWN TO THE SHIPPER AT THE TIME OF EXPORTATION. IF THE SHIPPER DOES NOT KNOW THE COUNTRY OF ULTIMATE DESTINATION, THE SHIPMENT SHOULD BE CREDITED TO THE LAST COUNTRY TO WHICH THE SHIP. PER KNOWS THAT THE MERCHANDISE WILL BE SHIPPED IN THE SAME FORM AS WHEN EXPORTED.
F. Trade by product-In disaggregating U.S. merchandise exports and imports by product, see the Direct Investment Industry and Foreign Trade Classifications Booklet, Part II, for a detailed description of the product categories used.
G. By (or to) whom goods were shipped-Shipment by, or to, an entity refers to the physical movement of merchandise to or from the U.S. customs area by, or to, that entity regardless of by, or to, whom the merchandise was charged or consigned. Thus, for example, if the U.S. Reporter charges goods to a foreign affiliate in France but ships the goods to an unaffiliated foreigner in Switzerland, the goods are considered U.S. merchandise exports by the U.S. Reporter to the unaffiliated foreigner in Switzerland and should be recorded as such on the U.S. Reporter's Form BE-10A. Or, if the U.S. Reporter charges goods to a German affiliate but ships them to an Italian affiliate, the goods should be recorded as U.S. merchandise exports by the U.S. Reporter only on the Form BE-10B of the Italian affiliate, not on that of the German affiliate. Similarly, if goods were charged by the U.S. Reporter to an affiliate but shipped to the affiliate by another U.S. person, the goods should be considered an export by "other U.S. persons," not by the U.S. Reporter, on the affiliate's Form BE-10B.

For U.S. exports, the shipper of the goods will generally be the exporter shown on the export declaration filed with U.S. Customs; for U.S. imports, the person to whom the goods were shipped will generally be the importer of record shown on the import document filed with U.S. Customs.

NOTE: Merchandise shipped by an independent carrier or a freight forwarder at the expense of an entity are shipments by that entity.
H. Valuation of exports-U.S. merchandise exports should be valued f.a.s. (free alongside ship) at the U.S. port of exportation. This includes all costs incurred up to the point of loading the goods aboard the export carrier at the U.S. port of exportation, including the selling price at the interior point of shipment (or cost if not sold), packaging costs, and inland freight and insur-
ance. It excludes all subsequent costs, such as loading costs, foreign import duties, and freight and insurance from the U.S. port of exportation to the foreign port of entry.
I. Valuation of imports-U.S. imports should be valued at the actual contract price agreed upon between buyer and seller, adjusted to an f.a.s. foreign-port-of-exportation basis. This includes all costs
incurred up to the point of loading the goods aboard the export carrier at the foreign port of exportation, including the selling price at the interior point of shipment (or cost if not sold), packaging costs, and inland freight and insurance. It excludes all subsequent costs, such as loading costs, U.S. import duties, and freight and insurance from the foreign port of exportation to the U.S port of entry.

# U.S. DEPARTMENT OF COMMERCE <br> Bureau of Economic Analysis <br> CLAIM FOR NOT FILING A BE-10 <br> BENCHMARK SURVEY OF U.S. DIRECT INVESTMENT ABROAD-1982 

A BE-10, Benchmark Survey of U.S. Direct Investment Abroad-1982, report is required from every U.S. person having a foreign affiliate-that is, from every U.S. person having ownership or control, directly or indirectly, of 10 per centum or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in an unincorporated foreign business enterprise (including a branch or real estate held for other than personal use)-at any time during their 1982 fiscal year, whether or not the person is contacted by the Bureau of Economic Analysis (BEA). (The U.S. person's 1982 fiscal year is defined to be the person's financial reporting year that has an ending date in calendar year 1982.) In addition, any person BEA contacts, either by sending them the BE-10 Survey report forms or by written inquiry concerning whether the person is subject to the reporting requirements of the Survey, must respond in writing pursuant to Section 806.4 of 15 CFR, Chapter VIII. The response must be made by filing the properly completed report or by certifying in writing that the person has no direct investment within the purview of the Survey's reporting requirements. Such a response is necessary to ensure compliance with, and for the efficient administration of, the International Investment Survey Act, under which the BE-10 Survey is being conducted. If the claim is disallowed, the original due date for the BE-10 remains in force.

A person receiving report forms from BEA and who has no direct investment within the purview of the reporting requirements must complete and return this claim within thirty (30) days to:
U.S. Department of Commerce

Bureau of Economic Analysis (BE-50, SSB)
Washington, D.C. 20230

Name and address of U.S. business enterprise for which this claim is filed-If the enterprise received a prelabeled Form BE-10A - see Item 1, Part I, Form BE-10A-enter name, address and BEA Identification Number from that label in the blocks below; skip a single block between words. If a prelabeled form was not received, enter name and address as contained on letter transmitting the report forms to you, indicating any changes or corrections.

1. This U.S. person did not own or control, directly or indirectly, 10 per centum or more of the voting securities of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise (including a branch or real estate held for other than personal use) at any time during its 1982 fiscal year:

But did file a 1977 BE-10 Survey report with this Bureau.

And did not file a 1977 BE-10 Survey report with this Bureau.

This U.S. person did own or control, directly or indirectly, 10 per centum or more of the voting securities of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise (including a branch or real estate held for other than personal use) during its 1982 fiscal year, but:
2. The owners are citizens of a foreign country who (a) are resident in the U.S. as a result of official employment by a foreign government (including the immediate family of such persons), or (b) have been and expect to be resident in the U.S. for less than one year
3. Is fully consolidated in the BE-10 report for another U.S. person (give name and address of that person and their BEA identification number, if known).

4. Other-Specify and include reference to section of regulations or instructions on which claim is based

## IMPORTANT NOTES

A single original copy of each form or supplement shall be fited with the Bureau of Economic Analysis．For Form BE－10A，this should be the copy with the address labet if such a labefed copy has been provided．

Read Instruction Booklet before completing form．The mstructions given below are only a brief summary of certam ones relating to this form．

## BANKS

See the Instruction Booklet，Part II，Section E，regarding special instructions and report forms for banks and bank holding companies．

## DEFINITIONS

1．U．S．DIRECT INVESTMENT ABROAD－The ownership or control，directly or indirectly，by one U．S．person of 10 per centurn or more of the voling securities of an incorporated foreign business enterprise or an equivalent interest in an unincorporated foregn business enterprise，including a branch．

2．U．S．REPORTER－The U．S．person which has direct investment in a foreign business enterprise，including a branch．If the U．S person is an incorporated business enterprise，the U．S．Reporter is the fully consolidated U．S．domestic enterprise consisting of（1） the U．S．corporation whose voling secunities are not owned mote han 50 percent by another U．S．corporation，and（2）proceeding down each ownership cham from that U．S，corporation，any U．S． corporation（inclucing Domestic international Sales Corporations） whose voting securities afe more than 50 percent owned by the U．S．corporation above it．The fully consolidated U．S．domestic enterprise excludes foreign branches and other foreign affiliates．

3．U．S．REPORTER＇S 1982 FISCAL YEAR ．．．The U．S．Reporter＇s financial reporting year that has an ENDING DATE IN CALENDAR YEAR 1982.

## REPORTING REQUIREMENTS

1．FILING－A completed Form BE－10A is required from each U．S Reporter（see definition）．Exception：When a U．S．business enter prise owns a foreign affiliate and the U．S．business enterprise is owned more than 50 per centum by a U．S．individual，the report enterprise rather than the individual Direct financia transactions or positions if amy，with the fordin affiliat by the indurdual must be included in the business enterprise＇s report．

2．PARTIAL EXEMPTION WHEN ALL FOREIGN AFFILIATES ARE EXEMPT－－When the U．S．Reporter has foreign affiliates，but al are exempt from filing Form $\mathrm{BE}+10 \mathrm{~B}$ ，then only items 1 through 4 of Form BE－10A，and Form BE－10A SUPPLEMENT，which lists exempt foreign affiliates，must be completed and filed．

3．PARTIAL EXEMPTION BASEQ ON TYPE OF REPQRTER－U．S Reporters that are religious，charitable，or other nonprofit organizations，and individuals who directly own a foreign affiliate， are required to the a Form BE－1OA completing，in Part IIdentification of U．S．Reporter），only items 1，2，8，9，and 12 ；the remaining items in Part I and all iterns in Part II（Financial and Operating Data of U．S．Reporterl need not be completed．

4．ASSISTANCE－Telephone（202）523－0632 durng office hours $-7: 30 \mathrm{a} . \mathrm{m}$ ．to $4: 00 \mathrm{p} . \mathrm{m}$ ．Washington，D．C．time．

5．DUE DATE－BE－10 reports comprising both form BE－10A and Form（s）BE－ 10 B are due on the following dates：
June 30， 1983 －U．S．Reporter required to tile less than 20
Forms BE 10 B ．
July 31,1983 －U．S．Reporter required to file 20 to 99
Forms BE－10B．

August 31，1983－Gorms BE－10B． more Forms BE－10B．

## GENERAL NOTES

1．Currency amounts should be reported in U．S．dolars and rounded to the nearest thousand．Example：$\$ 1,033,242.00$ shotfd be reported as \＄1，033

2．If an item is befween + or－－$\$ 500.00$ ，enter＂ 0 ．＂
3．Use parentheses（）to indicate negative numbers
4．Every question on the form should be answered except where reporting is specifically exempt．

5．All questions shoutd be answered in the context of the U．S Reporter＇s 1982 fiscal year isee definition above and item 9 of this Form BE－10AI．

6．Where the instruction＂Mark（ $X$ ）one＂is given，if it is necessary to mark more than one answer，give an explanation．
7．Pages of this report may be separated for machine processing．

## MANDATORY

This survey is being conducted pursuant to the Internationa Investment Survey Act of 1976 PP．L． $94-472,90$ Stat．2059， 22 U．S．C． 3101 to 3108 －hereinafter＂the Act＇＂），and the filing of reports is mandatory pursuant to Section $5(b)(2)$ of the Act 122 U．S．C． 31041.

## PENALTIES

Whoever tails to report may be subject to a civil penalty not exceeding $\$ 10,000$ and to injunctive relief cornmanding such person to comply，of both．Whoever wilfulfy falls to report sham be fined not more than one year，of both．Any officer director，employee or more than one year，of both．Any officer，otrector，employee，or agent of any corporation who knowingty participates in such， imprisonment or both．（See Section 6 of the Act， 22 U．S．C． 3105 ．

## CONFIDENTIALITY

The fnformation filed in this report may be used only for analytical and statistical purposes and access to the information shall be available only to officials and employees fincluding consultants and contractors and their employees）of agencies designated by the resident to perform functions under the Act．We President may afficiais desionated to perform functions under the Act but on analytical and statistical purposes．No official or emplovee lincluding analytical and statistical purposes，No official or employee lincludifg nake available any information collected under the Act in such a manner that the person to whom the information retates can be specitically tdentified．Reports and copies of reports prepared specifically dentifed．Reports and copies of reports prepare disclosure shall not be compelled by any person without the prior written permission of the person filing the report and the customer of such person where the information suppled is identifiable as being derived from the records of such customer（22 U．S．C．3104）．

| NAME OF PERSON TO CONSULT CONCERNING THIS REPORT <br>  | CERTIFICATION－The undersigned person hereby certifies that the infarmation contaned in this report tincluding Fomm BE－10A and BE－108 and any statements attached theretol is accurate and complete and alf estimates used are reasonable ta the best of his／her knowledge and belief． |

2. Form of orgenization of U.S. Reporter - Mark $(X)$ one

3. If the U.S. Reporter is a corporation, is the corporation owned to the extent of more than $\mathbf{5 0 \%}$ af its voting stock by another U.S. business enterprise?
1 C03 ${ }^{1} 1$ Y Yes - Complete the "CLAIM FOR NOT FILING A BE-10" by checking box number 3 and entering in number 3 on the "clairn" the name and address of the U.S. business enterprise in which vour data will be consolidated in accordance with the definition of U.S. Reporter. Submit the claim to BEA and forward the remainder of the BE-10 Survey packet to the U.S. business enterprise in which your data will be consolidated. If this cannot be done, call (202) 523-0632 for further instructions.
$\square$ No
4. Enter employer Identification number(s) used by the U.S. Reporter to fia U.S. income and payroll taxes. Show additional numbers on a separate sheet if necessary.
 must be fully consolidated in this report. However, it is recognized that certain U.S. subsidiaries normally may not be consolidated into the parent company's report to shareholders (because, for example, the subsidiary is in an unrelated line of business). While BEA prefers that such a subsidiary be consolidated in this report, it will permit the U.S. Reporter, in lieu of consolidation, to either 1 combine or aggregate the subsidary in this Form BE-10A or 2I file a separate Form BE-10A for the subsidiary, as specified in the Instruction Bookiet, Partil, Section B. 2.
5. Are data for any U.S. subsidiaries that are not normally consolidated into the parent company's reports to shareholders consolidated, aggregated, or combined in this Form BE-10A?

1005 | 11 |
| :---: |
| 1 |

12, $\square$ No
6. If the answer to item 5 is "Yes," give the name of each such U.S. subsidiary, and the increase in the U.S. Reporter's total assets litem 32 ) that resulted from that U.S. subsidiary's consolidation, aggregation, or combination in this Form BE. 10A.

| Name of U.S. subsidiary |  |  | increase in total assets (Thousands of U.S. daliars) |
| :---: | :---: | :---: | :---: |
|  |  |  | \$ |
|  |  |  | \$ |
|  |  |  | \$ |
| BEA 1006 <br> USE  <br> ONLY  | $3^{2} \longrightarrow 3$ | 4 | 5 |

7. Is a separate Form BE-10A being filed for any normally unconsolidated U.S. subsidiaries that are encompassed in the defintion of the U.S. Reporter?
$1007\left[\begin{array}{l}1 \\ 1\end{array}\right]$ Yes - Enter name under which each separate Form BE-10A is being filed.
8. Enter the number of foreign affiliate reports (Form BE-1OB and BE-1OB BANK) which you are required to file.
$1008\left[\begin{array}{l}1 \text { Number }\end{array} \begin{array}{l}\text { Also attach to your report a list of foreign affiliate reports submitted, giving the affiliate's name and the } \\ \text { serial number for the report as shown in items } 2 \text { and } 3 \text {, respectively, of Form BE-10B or BE-10B BANK. } \\ \text { If you also have exempt foreign affiliates, list them on Form BE-10A SUPPLEMENT and give the requested } \\ \text { information for each. Do not include exempt foreign affifiates in the number given here. }\end{array}\right.$
9. Enter the ending date of this U.S. Reporter's 1982 fiscal year.

10. Was there a change in the entity during FY 1982 that caused prior year data to be restated?
$\left.1010 \begin{array}{|c|}1 \\ \hline 1 \\ \hline\end{array}\right]$ Yes - Please note that the effect of restatement on property, plant, and equipment accounts must be entered in item 65. $12]$ No
11. Major activity of U.S. Reporter - Mark $(X)$ one
$101111 \square$ Production - The U.S. Reporter is primarily engaged in manufacturing, fabricating, assembing, processing, growing, or mining or extracting (including exploration and development) a product. These activities are coded in the $000,100,200$, of 300 series, except 070, 108, and 138, of the codes listed on page 3 of the Direct Investment Industry and Forelgn Trade Classifications Bookiet.
$\left.{ }^{1} 2\right]$ Sales - The U.S. Reporter is primarily engaged in selling (at wholesale or retail) products which it does not produce. These activites are coded in the 500 series of the codes listed on page 3 of the Direct Investment Industry and Foreign Trade Classifications Booklet.
${ }^{1} 3$ [] Services - The U.S. Reporter is primarily engaged in providing a service, such as banking, public utilities, transportation, fodging, consulting, accounting, engineering, and holding companies. These activities are coded in the 400,600, 700 , or 800 series, or in' 070 108 , or 138 , of the codes listed on page 3 of the Direct Investment Industry and Foreign Trade Classifications Booldet.
12. What is the major product or service involved in the activity of the U.S. business enterprise being reported?

## Part I- IDENTIFICATION OF U.S. REPORTER - Continued

INDUSTRY CLASSIFICATION OF U.S. REPORTER (by parcent of sales of gross operating revenues)
Enter the appropriate 3 -digit industry code(s), and the percent, to the nearest tenth of one percent, of sales (as reported in item 39 ) associated with each code. See the "Summary of Industry Ciassifications" in the Direat Investment Industry and Foreign Trade Classifications Booklet, Part 1 , which also contains a full explanation of each code. If you use fewer than eight codes, you must account for one hundred percent of sales. Holding companies should show percent of total income item 43). Note, however, that a U.S. Reporter that is a conglomerate must determine its industry offen an invalid industry classification for a conglomerate. Call BEA for further assistance if this is the U.S. Reporter's apparent classiffication.

## Part II - FINANCIAL AND OPERATING DATA OFU.S. REPORTER

(Insurance companies, see special instructions, page 7.)

| Section A - Balance Sheet of U.S. Reporter | Balance at close of |
| :--- | :--- |

NOTE - All asset and fiability items should be disaggregated in the detail shown; in particular, receivables and payables between the U.S. Reporter and its foreign affiliates should be shown in the proper asset and liability accounts of the U.S. Reporter and not netted.

## ASSETS

23. Cash items - Deposits in financial institutions and other cash items. Do not include overdrafts as negative cash. 2023 . $\$$
24. Trade accounts and trede notes recelvable, current - Net of allowances for doubtful items
25. Other current receivables - Net of allowances for doubtful items. - Specify
26. Inventories - Exeluda land held for resale finclude in item 27) and inventories of marketable securities finclude in
item 27 or 30 as appropriate)

NOTE - Items 56 through 59 pertain to R\&D performad by the U.S. Reporter, including R\&D performed by the
U.S. Reporter for others under contract. This is the basis on which National Science Foundation surveys request
information on R\&D. The FASB 2 measure of R\&D (i.e., R\&D from which the firm benefits) is the sum of items
57 and 60 .

## Section F - Employment and Employee Compensation

Employment and compensation data should be based on pavroll records. They sho ald relate to activities during FY 1982 regardless of whether such activities were charged as an expense on the income statement, charged to inventories, or capitalized. Do NOT include data related to activities of a prior period, such as those capitalized or charged to inventories in pror periods.
Employment is the number of fult-time and part time employees on the payroll at the end of FY 1982. A count taken during, rather than at the end of, FY 1982 may be used provided it is a reasonable proxy for the end of $F Y 1982$ number. If employment at the end of $F Y$ 1982, or the count taken at some other time during FY 1982 , was unusually high or low because of temporary factors lea a strikel or targe seasonal variation the number of employees that reflects normal operations, or an average for FY 1982, should be given.
See the Instruction Booklet, Part VH, for further details of reporting requirements

## Part II - FINANCIAL AND OPERATING DATA OF U.S. REPORTER - Continued

Section G - Distribution of Sales or Gross Operating Revenues
For purposes of distributing sales or gross operating revenues between sales of "goods'" and sales of "services," consider as sales of goods those saies that are associated with industres coded in the 000, 100, 200, 300, and 500 series, except 070, 108, or 138, consider as sates of services those sales that are associated with industries coded in the 400, 600, 700, or 800 senes, or in codes 070, 108, or 138. See the Summary of Industry Classifications'" in the Direct Investment Industry and Foreign Trade Classifications Booklet, Part 1, which also contains a full explanation of each code. The disaggregation of sales by industry in this section should be consistent with the disaggregation used in items 13 through 20 (Industry Classification of U.S. Reporter). When a sale consists of both goods and services and cannot be unbundled ine., the goods and services are not separately billed), classify as a good or service based on whichever accounts for a majority of the value. If actual figures are not available, give best estimates.

## SPECIAL INSTRUCTIONS FOR U.S. REPORTERS THAT ARE INSURANCE COMPANIES

These special instructions are intended to supplement or supplant the instructions given on the form for the indicated items. If problems should arise in applying these instructions of in reporting other specific items, please contact this Bureau at (202) 523-0632.
When there is a difference, the financial schedules in Part Il of this form are to be prepared on the same basis as an annual report to the stockholders, rather than on the basis of an annual statement to an insurance department. Valuation should be according to normal commercia accounting procedures, not at the rates promulgated by the National Association of Insurance Commissioners. Include assets not acceptable for the annual statement to an insurance department. Include non-trusteed or free account assets

## Item

24 Trade accounts and trade notes receivable,
current - Include current items such as agents balances or uncollected premiums, amounts recoverable from reinsurers, and other current notes and accounts receivable (net of allowances for doubtful items) arising from the ordinary course of doubtful

## tems

33 Tiade accounts and trade notes payable,
current - Include current items such as loss liabilities, policy claims, commissions due, and other current liabilities arising from the ordinary course of business. Policy reserves are to be included in "Other noncurrent liabilities,' item 36 , unless they are clearly current liabilities.

39 Sales or gross operating revenues, excluding sales taxes - Include items such as earned premiums, annuity considerations, gross investment income, and items of similar nature. Exclude income from foreign affiliates that is to be reported in item 40.

44 Cost of goods sold - Include costs relating to sales or gross operating revenues, item 39, such as policy losses incurred, death benefits, matured endowments, other policy benefits, increases in liabilities for future policy benefits, other underwriting expenses, and investment expenses.

## Section H - U.S. Merchandise Trade of U.S. Reporter - Goods Only, Do Not Include Services (Valued f.a.s, at the port of exportation)

IMPORTANT NOTES - This section requires the reporting of data on U.S. merchandise trade of the U.S. Reporter in FY 1982. The data should be on a "shipped" basis, i.e., on the basts of when, where, and to (or byl whom the goods were shipped, in order for them to be on the same basis as offical U.S. trade statistics to which they will be compared. A U.S. import or U.S. export should not be recorded here if the goods did not physically enter or leave fi.e., were not physically shipped to or fromi the United States, even though they may have been charged to the U.S. Reporter by, or charged by the U.S. Reporter to, a foreign person. However, U.S. Reporters normally keep their accounting records on a "charged" basis, i.e., on the basis of when, where, and to tor by' whom the goods were charged. The "charged" basis may be used if there is no material difference between it and the "shupped" basis. If there is a material difference between the two bases, the "shipped" basis must be used or adjustments must be made to the data on a "charged" basis to approximate a "shipped" basts, as discussed in the Instruction Booklet, Part Vlli.

Data in this section cover all goods that physically left or entered the U.S. customs area in FY 1982, including capital goods but excluding the value af ships, planes railroad rolling stock, and trucks that were temporarily outside the United States transporting people or merchandise Consigned of ships, planes, rairoad rollng stock, and trucks that were temporarily outside the United States transporting people or merchandise. Consigned goods must be included in the trade figures when shipped or recelved, even though not normally recorded as sales or purchases or entered into exports and imports of the U.S. Reporter to be shown here are not the same as the U. S. Reporter's sales to or purchases from foreign persons because, among other reasons, sales and purchases may include services.

See the Instruction Booklet, Part VIII, for additional detals of data requirements.
103. For this U.S. Reporter, is there a material difference between the "charged" and "shipped" bases in determining what is U.S. trade, whose trade it is, and the timing and ultimate destination or origin of the trade?

U.S. DEPARTMENT OF COMMERCE Bureau of Economic Analysis

## MANDATORY

## BENCHMARK SURVEY <br> OF U.S. DIRECT INVESTMENT ABROAD 1982

If a BEA label has been provided for this affiliate, affix it here) Otherwise fill in.

1. Name of U.S. Reporter of affiliate - Same as item 1 FOM BE TOA

. Name of foreign affiliate being reported - Use the same name on all reports filed subsequently for this affiliate with the Bureat of Economic Analysis, ey, Forms BE-133B BE Subsequently for this
1336 and BE 577

## IMPORTANT NOTES

A single origina copy of each form or supplement shall be filed with the Bureau of Economic Analysis. For Form BE-10B, this should be the copy to which you have attached the appropriate label if such a label has been provided
Read Instruction Booklet before completing form. The instructions given below are only a brief stmmary of certain ones relating to this form

## BANKS

See the Instruction Booklet, Part II. Section E, regarding special instructions and the use of special report forms fo banks and bank holding companies

## DEFINITIONS

1. U.S. DIRECT INVESTMENT ABROAD - The ownership or control directly or indirectly, by one U.S. person of 10 per centum or mare of the voting securities of an incorporated foreign business enterprise or an equivatent interest in an unincorporated foreign business enterprise, including a branch.
2. AFFiLIATE - A business enterprise located in one country which is directly or incirectiy owned or controlied by a person of another country to the extent of 10 per centum or more of its voting stock for an incorporated business or an equivalent interest for an unincorporated business, including a branch.
3. FOREIGN AFFILIATE - An affiliate focated outside the United States in which a U.S. person has direct investment.
4. FOREIGN AFFILIATE'S 1982 FISCAL YEAR - The foreign affiliate's financial reporting year that has an ENDING DATE N CALENDAR YEAR 1982.

## REPORTING REQUIREMENTS

1. FLLING - A U.S. person is required to fle one Form BE-10B for each foreign affmete that is not totally exempt. (Under those limited conditions where foreign affllates may be consolidated, the consolidated entity is considered to be one foreign affiliate. If two or more U.S. Reporters jointly own a foreign affiliate, directly or indirectly, each U.S. Reporter must submit a Form BE-10B report for the affiliate. The U.S. Reporter having the highest percentage ownership (direct and indirect combined) in the foreign affiliate must file a "complete" Form BE-10E report; the other U.S. Reportertst must file a "partial Form BE- 108 report in which only Part 1 , items 1 through 25 , and Part ill, if there is direct ownership or financial
transactions, have been completed. If the percentage of wnership is the same, the U.S Reporters must decide among detailed illustration of foreign affiliate reporting requirements, see the Instruction Booklet. Part II, Section C. 4.
2. TOTAL EXEMPTION - A Form BE-10E need not be filed if:
a. Each (i.e., all three) of the following items for the foreign affiliate (not the U.S. Reporter's share) was between - $\$ 3,000,000.00$ and $+\$ 3,000,000.00$ for the reporting period:
(1) Total assets, item 60 .
(2) Sales or gross operating revenues excluding sales taxes, item 72, and
(3) Net income after provision for foreign income taxes, item 84, AND
b. The foreign affilate does not own another foreign affiliate for which a Form BE. 10 B must be filed. If the latter condition is no met, then Form BE-10B must be filed for the foreign affiliate parent holding the equity interest regardiess of the value of its assets, sales, or net income. That is, all affiliates upward in a chain of ownership must be reported.
NOTE - An affiliate's receivables due from its parent may not be eliminated from totai assets when applying the exemption criteria for preparing this report.
Pursuant to item 8, Form BE-10A, a Form BE-10A SUPPLEMENT must be attached giving the name, country of location, and selected information for each exempt foreign affiliate. If at aftiliates are exempt, then Form BE 10A SUPPLEMENT must be
fited along with the rectired partial Form BE-10A.
3. TRANSLATION OF FOREIGN CURRENCY FINANCIAL AND OPERATING DATA INTO U.S. DOLLARS - The foreign affiliate's financial and operating data should be translated from foreign currency to U.S. dollars using U.S. generally accepted accounting prineiples (FASB 8 or 52, as applicable). See the Instruction Booklet, Part V, Section B.
4. ASSISTANCE - Telephone (202) 523 - 0632 during office hours -7:30 a.m. to 4:00 p.m. Washington, D.C. time.
5. DUE DATE - BE-10 reports comprising both Form BE-10A and Form (s) $\mathrm{BE}-10 \mathrm{~B}$ are due on the following dates:

June 30, 1983 - For a U.S. Reporter required to file less than 20 , 1,1983 Forms BE-10B.
July 31, 1983 - For a US. Reporter required to file 20 to 99 Forms BE-10B
August 31, 1983 - For a U.S. Reporter required to file 100 or more forms BE-1OB

## GENERAL NOTES

1. Currency amounts should be reported in U.S. dollars and rounded to the nearest thousand. Examples: $\$ 1,033,242.00$ should be reported as $\$ 1.033$.
2. If an item is between $\mid \$ 500.00$ and $-\$ 500.00$, enter " 0 .'
3. Use parentheses () to indicate negative numbers.
4. Every question on the form should be answered except where reporting is specifically exempt. If certain information cannot be supplied because the accounts of the foreign affiliate cannot be obtained, give your best estimate.
5. All questions should be answered in the context of the foreign affilate's 1982 fiscal year (see definition above and item 10 of this Form BE-10B)
6. Where the instruction "Mark ( $X$ ) one" is given, if it is necessary to mark more than one answer, give an explanation.
7. Pages of this report may be separated for machine processing. To facilitate correct reassembly, enter the serial number (from item 3) in the space provided in the upper right hand corner of all the ODD numbered pages.

## MANDATORY

This survey is being conducted pursuant to the intemational Investment Survey Act of 1976 IP.L. 94-472, 90 Stat. 2059, 22 Investment Survey Act of 9976 IP.L. $94-472$, 90 Stat. 2059,2
U.S.C. 3107 to 3108 - heremafter "the Act"), and the filing of reports is mandatory pursuant to Section 5 (b) (2) of the Act (22 U.S.C. 3104 ).

## PENALTIES

Whoever fails to report may be subject to a civil penalty not exceeding $\$ 10,000$ and to injunctive relief commanding such person to comply, or both. Whaever willfully fails to report shall be fined not more than $\$ 10,000$ and, if an individual, may be imprisoned for not more than one year, or both. Any officer, director, employee, or agent of any corporation who knowingly participates in such imprisonment, or both. (See Section 6 of the Act, 22 U.S.C. 3105.)

## CONFIDENTIALITY

The information filed in this report may be used only for analytical and statistical purposes and access to the information shal be availamle only to officials and employees (including consultants and contractors and their employees) of agencies designated by the President to perform functions under the Act. The President may authorize the exchange of the information between agencies or officials designated to perform functions under the Act, but only for analytical and statistical purposes. No official or employee (including consultants and contractors and their employees) shall publish or meke available any information collected under the Act in such a manner that the person to whom the information relates can be specifically identified. Reports and copies of reports prepared pursuant to the Act are confidential and their submission or disclosure shall not be compelled by any person without the prior written permission of the person filing the report and the customer of such person where the information supplied is identifiable as being derived from the records of such customer (22 U.S.C. 3104 )
3. Serial number for foreign affiliate - Enter serial number from transmittal list required to be submitted with report pursuant to item 8, Form BE-10A.

Number Also enter this number in the space provided in the upper right hand corner of OOD NUMBERED pages of this report. This will facilitate assembly if form is disassembled for machine processing.
4. Name change - If there has been a name change since 1977, give 1977 name of foreign affiliate.

5. Number of foreign affiliates consolidated - Enter number

If this report is for a single foreign affiliate enter " 1 " in the box. If more than one foreign affiliate is consolidated in this report, enter the number of foreign affiliates consolidated. (Hereinafter they are considered to be ore affliate.)

* NOTE - For a business enterprise that is incorporated in the United States but carries on substantially all of its operations abroad, the foreign portion of its operations should be considered and treated as a branch, i.e., as an unincorporated foreign affilate.

8. Country of Incorporation or organization of foreign affiliate - Mark $(X)$ one

9. Country of lacation - Country in which foreign affiliate's physical assets are located or where its primary activity is carried out - Mark ( $X$ ) one

10. Enter the ending date of this fordign affiliate's 1982 fiscal year

| 1010 |  |  |  | NOTE - For a foreign business enterprise that was a foreign affitiate for all of FY 1982 - Data for the reporting period should be for the forelgn affiliate's 1982 fiscal year; data for close FY 1982 shoutd be for the foreign affiliate as it existed at the ending date of the 1982 fiscal year; and data for close FY 1981 shoud be for the foreign affiliate as it existed one year prior to the 1982 fiscal vear ending date. (Close FY 1981 data must not be restated due to changes in the entity during FY 1982.) |  |  |  |

[^15]Page 3

Items 28 through 38 shouid be marked $(X)$ "No" or ${ }^{*} Y$ es." If "Yes," mark $\{X \mid$ column 3 , if to the best of your knowledge, the incentive or requirement applies only to forsign-owned companies.

INVESTMENT INCENTVES - Did any level of govamment (federal or subfederal) of the country in which this affilatel fs locmted provide fby law, regulation, or administrative practicel investment or production incentives of the following nature to this affiliate during FY 1982 ?

| 28. Tax concessions - Include tax concessions on corporate income, export profits, capital expenditures, sales, exports, license fees, furnover, and other. | 1028 | 1 | 2 | 1 |
| :---: | :---: | :---: | :---: | :---: |
| 29. Tarlft concessions - Include exemption from or reduction of duties on imports, additional duties on imports of competing goods, or rebates of duties on imported inputs. | 1029 | 1 | 2 | $\begin{aligned} & \hline 3 \\ & 1 \\ & \hline \end{aligned}$ |
| 30. Subsidies - Include wage subsidies, investment grants, or loans at below market interest rates | 1030 | 1 | 2 | 1 <br> 1 <br> 1 |
| 31. Other incertives - include local financing, waiving environmental or employment safety standards, research and development support, land seles concessions, exchange control concessions, atc. | 1031 | 1 | 2 | $\begin{aligned} & \hline 3 \\ & 3 \\ & \hline \end{aligned}$ |
| PERFORMARCE REQUIREMENTS - Did any level of government (federal or subfederat) of the country in which this aftillate is located require (by law, regulation, or administrative practice) that the affiliate do any of the following during FY 1982 as a condition for it to operate in the country, to expand its operations, to receive any of the incentives listed above, or to avoid penalties? <br> 32. Export a minimum amount (quantity or value) | 1032 | 1 | 2 | $\begin{aligned} & 1 \\ & 1 \\ & 1 \\ & 1 \\ & 1 \\ & 1 \\ & 1 \\ & 1 \end{aligned}$ |
| 33. Import no more then a cartain amount (quantity or value) | 1033 | 1 | 2 | 13 <br> 1 <br> 1 |
| 34. Acquire a minimum of inpurs focsily | 1034 | 1 | 2 | 13 1 13 13 |
| 35. Employ a minimum amount of local personnel or add a minimum amount of labor content to productis) | 1035 | 1 | 2 | $1_{1}^{1} 1$ |
| 36. Limit the proportion of aquity that the U.S. Rophorter may hold in the affiliate | 1036 | 1 | 2 | 13 1 13 |
| 37. Transfor technology to the host country - For example, require the affiliate to use the most advanced technology for carrying out production, perform R\&D locally, have aceess to the U.S. Reporter's patents, of traift tocal personnel. | 1037 | 1 | 2 | $1_{13}^{13}$ |
| 38. Maintain a spectlied ratio of exports to imports, of of earnings of foraign exchange to expenditures of foreign exchange | 1038 | 1 | ${ }^{2}$ | 13 1 13 |

The dollar values to be entered in items 39 through 41 may have to be calculated by converting to a value figure a target amount that, in the performance requirement, may be stated in percentage or quantity terms. For example, the target amount may be stated as a percentage of some performance requirement, may be stated in percentage or quantity terms. For example, the target amount may be stated as apercentage of some reference base, such as production, net income, or sales, of as a specified number of units produced. imported, or exported. In these cases the requested value figure could be obtained by multiplying the stated percentage by the value of production, net income, or sales, ar by mutiplying the
specified number of units by the value of the units produced, imported, or exported If there is a per unit penalty for not meeting the performance specifed number of units by the value of the units produced, imported, or exported If there is a per unit penalty for not meeting the performance
requirement or a per unit incentive for exceeding it, give the value, as determined above, of the trade or inputs on which such penalties or incentives are based. If this affilate came into existence during FY 1982 so that its $F Y 1982$ operations do not accurately reflect the effect of the requirement(s) for the full year. give a profected value for the full FY 1983.

Amount

|  |  | Amount (Thousands of U.S. Dollarsl (1) |
| :---: | :---: | :---: |
|  |  | 1 |
| 39: If the answer to item 32 is "Yes," give the approximate value of the goods or services that the affilata, at a minimum, had to export in FY 1982. | 1039 | \$ |
|  |  | 1 |
| 40. If the answer to item 33 is "Yes," give the approximate value of the goods or services that the affiliate, at a maximum, was permitted to import in FY 1982. | 1040 |  |
|  |  | 1 |
| 41. If the answer to item 34 is "Yes," give the approximate value of the inputs (other than the direct employment of labon) that the affilate was required to purchase locally in FY 1982. | 1041 |  |

42. Majar aetiviny of foreign affitiate - Mark [X] one.

If inactive - Indicate the activity pertinent to the last active period.
For start-ups - Indicate the intended activity.
$1042\left[\begin{array}{l}1 \\ 1\end{array} \square\right.$ Protuction -. The foreign affiliate is primarily engaged in manufacturing, fabricating, assembing, processing, growing, or mining or extracting lincluding exploration and development) a product. These activities are coded in the 000, 100, 200, or 300 series, except 070,108 , and 138 , of the list of codes given on page 5 .
${ }^{1} 2 \square$ sales - The foreign affiliate is primarily engaged in selling fat wholesale or retaill products which it does not produce. These activities are coded in the 500 series of the list of codes given on page 5 .
$3 \square$ Services -. The foreign affiliate is primarily engaged in providing a service such as banking, public utilities. transportation, lodging, consulting, accounting, engineering, holding companies, etc. These activities are coded in the $400,600,700$ or 800 series, or in 070,108 , of 138 , of the list of codes given on page 5 .

Part II - BASIC FINANCIAL AND OPERATING DATA OF FOREIGN AFFILIATE (Insurance affiliates, see special instructions, page 16.)
Section A - Balance Sheet of Foreign Affiliate
UNINCORPORATED AFFILIATE - All asset and liability iterns should be disaggregated in the detal shown; in particular, receivables and payables between the foreign affiliate and the U.S. Reporter should be shown in the proper asset and liability accounts of the foreign affiate rather than being included only as a net amount in total owners equity. Include asset and liability items of the foreign affiliate that are carried only on an owner's books.

## ASSETS

51. Cash items - Deposits in financial institutions and other cash iterns. Do not include overdrafts here as negative cash.
52. Trade accounts and trade notes receivable, current - Net of allowances for doubtful items
53. Othar currenf racelvables - Net of allowances for doubtful items. - Specify
54. Inventories - Exclude land held for resale finclude in item 55) and inventories of marketable securities (include in item 55 or 58 as appropriatel.
55. Other current assets - Include land held for resale, current marketable securities, and other current assets not included above. - Specify
56. Property, plant and equipmont, net - Land, timber, mineral rights, structures, machinery, equipment, special tools, deposit containers, construction in progress, and capitalized tangible and intangible natural resources exploration and development casts net of accumulated depreciation, depletion, amortization, and like charges. Include items on capitaz leases from others, per FASB 13. Exclude all other types of intangible assets, and land held for resale. (An unincorporated affiliate should include items owned by its U.S. Reporter(s) but that are in the affiliate's possession whether or not carried on the athinate's own books or records. )
57. Equity investment in other foreign affiliates of which this affiliate is a parent This affiliate's equity investment in other reported foreign affiliates of U.S. Reporter(s) including branches of this affliate. The value of equity investment must be computed using the equity method of accounting for those affiliates that are 20 percent or more owned, regardless of how they are normally treated in financial statement preparation Those affiliates that are immaterial or owned at least 10 percent, but less than 20 percent, may be included using the cost method. (If an entry here. Supplement B must be completed and item 6 must be "Yes.")
58. Noncurrent investments not shown in item 57 .- Noncurrent marketable securities other equity investments whether carried on the cost or the equity basis, and other investments.
59. Other moncurrent assets - Other intangible assets, net of amortization; noncurrent trade accounts and trade notes receivable, net of allowances for doubtful items; and other noncurfent assets not included above.

[^16]Page 6

Part II - BASIC FINANCIAL AND OPERATING DATA OF FOREIGN
Part II - BASIC FINANCI
AFFILIATE - Continued
Section B - Income Statement of Foreign Affiliate (Net income must be calculated in accordance with the "all inclusive" concept of the income statement.) INCOME
72. Sales or gross operating revenues, excluding ales taxes - Gross sales minus returns, allowances, and discounts, or gross operating revenues, both exclusive of: sales or consumption taxes levied directly on
73. Equity in net income of raported foreign aftiliates - Equity in net income (distributed and undistributed) after foreign income taxes, of other reported foreign affiliates for which an equity investment is reported in item 57.
74. Income from other equity investments - Income from equity investments included in item 58 . For those investments carfied on the equity basis, report equity in earnings during the reporting period; for those investments carried on the cost basis, report dividends received. Do not include interest income.
75. Net unrealized and fatalized capital gains (losses) - Include fecognized gains (losses) resulting from a. The sale or disposition of investment securities, property, plant and equipment, or other assets;
b. Changes in the foregn affiliate's foreign currency denominated assets and liabilities due to changes in foreign exchange rates during the period; and
c. Other recognized capital gains llosses), including those fesulting from valuation of assets, whether or not realized.
76. Exchanga gain lloss) from transiating this foreign affiliate's financlat statements inta dollars - For
those affiliates using FASB 8 , enter the gain (loss) which results from the translation or remeasuring of the affiliate's financial statements from its local currency into dollars due to a change in the exchange rate between the local curfency and the dolfar during the reporting period.
77. Other income - Non-operating income, income from investments not reported in items 73 and 74, 7. Ond other income not included above. - Specify

\$

Use Part Ill to report the line of direct voting ownership included in item 14, if any, and to report direct financial positions or transactions between the U.S. Feporter and foreign affiliate. For a foraign affiliate in which the U.S. Reporter does not have direct voting ownership, complete only items 96,97 , and 124 through 130 to report any direct financial positions or transactions between the $U . S$. ownership, complete only ite

Section A - Investment Between the U.S. Reporter and Foreign Affiliate
95.

Does the U.S. Reporter's percentage of direct voting ownership given in item 14 exactly match the U.S. Reporter's percentage of direct equity interest in the foreign affiliate?

## Part V - DETAILED FINANCIAL AND OPERATING DATA OF foreign affiliate - Continued

Section G - U.S. Merchandise Trade of Foraign Affiliate - Goods Only, Do Not Include Services
IMPORTANT NOTES - This section requires the reporting of data on U.S. merchandise trade of the foregn affilate in FY 1982 . The data should be on a "shipped" basis, i.e., on the basis of when, where, and to lor by whom the goods were shipped, in order for them to be on the same basis as official U.S trade statistics to which they will be compared. A U.S. import or U.S. export should not be recorded here ff the goods did not physically enter or leave fi.e., were not physically shypped to or froml the United States, even though they may have been charged by the foreign aff tiate to, or charged to the foreign affiliate by, a U. S. person. However, foreign atflistes normally keep, their accounting records on a "charged" basis, i.e., on the basis of when, where, and to lor by) whom the goods were charged. The "charged" basis may be used if there is no material difference between it and the "shipped" basis. If there ts a material difference between the two bases, the "stipped" basts must be used or adjustments must be made to the data on a "charged" basis to approximate a "shipped" basis, as discussed in the Instruction Booklet, Part VIII.
Data in this section cover all goods that physically left or entered the U.S. customs area in FY 1982 , meluding capital goods but exclueding the value of ships, planes, tairoad rolling stock, and trucks that were temporarily outside the country of location of the foreign afflifate transporting people or merchandise. Consigned goods must be included in the trade figures when shipped or recerved, even though not normally recorded as sates or purchases or entered into intercompary accounts when mitially consigned. The data should include goods only; they should exclude
services. Thus US merchandise imports and exports of the foreign affilate to be shown here are not the same as the affiliate's sales to or services. Thus, US merchandise imports and exports of the foreign affilate to be shown here are not the same as the affiliate's sales to, or purchases from, U.S. persons because, among other reasons, sates and purchases may include services
See the Instruction Booklet, Part VIII, for additional details of data requrements.
205.For this foreign affiliate, is there a material difference betwean the "charged" and "shipped" basas in determining what is U.S. trade. whose trade it is, and the timing and uhtimate destination or origin of the trade?
whose rade tis,
206.On what basis were the trade data in this section prepared? - Mark ( $X$ ) one

Saction G - U.S. Merchandise Trade of Foreign Affiliate Goods Only, Do Not Include Services - Continued

## SPECIALINSTRUCTIONS FOR FOREIGN AFFILIATES THAT ARE INSURANCE COMPANIES

These special instructions are intended to supplement or supplant the instructions given elsewhere on the form. If problems should arise in applying these instructions or in problems should arise in applying these instructions or in
reporting other specific items, please contact this Bureau reporting other specific items, please contact this Bu
at $\{2021523-0632$ from 7:30 a.m. until 4:00 p.m. at (202) $523-0632$ fro
Washington, D.C. time.

When there is a difference, the financial schedules are to be prepared on the same basis as an annual report to the stockhoiders, rather than on the basis of an annual statement to an insurance department. Valuation should be according to normal commercial accounting procedures, not at the rates promulgeted by national insurance departments. Include assets not acceptable for the annual statement to an insurance department.

Non-trusteed or free account assets are to be included as part of total assets in this report if these assets are for the benefit or protection of the policy holders being insured by this affiliate.

Assets of an affiliate's U.S. Reporter that are held in the country of location of the affiliate that are for the benefit of the U.S. Reporter's policy holders are not to be included in this report. Such assets of the U.S. Reporter are to be reported to the U.S. Treasury Department on the Treasury International Capital forms.

## Items

52 Trade accounts and trade notes receivable, current Include current items such as agents' balances or uncollected promiums, amounts recoverable from uncollected premioms, amouns fecoverable fints receivable reinsurers, and other current notes and accounts receivab
(net of allowances for doubtful items) arising from the Inet of allowances for doubtf
ordinary course of business.
61 Trade accounts and trade notes payable, current Include current items such as loss liabilities, policy claims, commissions due, and other current liabilities arising from the ordinary course of business. Policy reserves are to be included in item 64, unless they are clearly current liabilities.

72 Sales or gross operating revenues, excluding safes takes - Include items such as earned premiums, annuity considerations, gross investment income, and items of a similar nature. Exclude income from foreign affiliates that is to be reported in item 73 .
79 Cost of goods sold - Include costs relating to sales or gross operating revenues, excluding sales taxes fitem 72), such as policy losses incurred, death benefits, matured endowments, other policy benefits, increases in liabilities for future policy benefits, other underwriting expenses, and investment expenses.

## IMPORTANT NOTES

## Part I－IDENTIFICATION OF U．S．REPORTER－Contínued

## SPECIAL NOTE－BANKS

Specialized report forms have been adopted for banks（that is， business enterprises over 50 percent of whose total revenues are generated by activities classiffed in industry code 600］because much of the information on banks foreign activities which is requested on the standard farms is alresoy being reported to other agencies of the federal Government．The speciaized report forms are designed to yield only such additional information as is BEemed necessary．Use of specialized Forms BE－10A BANK and possible use is not cleat－cut，permission must be secured from possible use is not cleat

Form BE－1OA BANK has been developed for reporting by a U．S． Reporter that is a bank or a bank holding company．It is not to be used by a U．S．Reporter that may technically be classifiad as a bank holding company because of an interest in a banking activity， but that has over 50 percent of its reveriues generated by nonbank activities．（Activities of subsidianies that may not be banks but that provide support to the parent company，such as real estate subsidiaries set up to hofd the office buildings occupled by the parent company，are considered bank activities．）

Fom BE－10B BAlfk has also been developed for feporting of a foreign affiliate that is a bank and in which the U．S．Reporter holds a direct andiar indirect ownership interest．However，a foreign bank affilite of the U．S．Reporter in which the U．S．Feporter holds onfy an indirect ownership interest of 50 pereant or less is exempt
from being reported on Form BE． 10 国 BANK，but must be listed on Form BE－1OA SUPPLEMENT，Incomporated forelgn bank affiliates in which the U．S．Reporter hoids adirect equity interast must be separately reportec，All branch banks of the U．S．Reporter in a given foreign country must be consolidated on one Form BE－10日 BANK even if it is the Reporter＇s practice to report data for thase branches separately on Federal Reserve Form FRiOSF or Comp－ troller of the Currency Form CC．761009．

A U．S．Reporter that is a bank but that has a nontonk formign affiliate，must file a form BE－1OA EANK for tiself and a standard affilate，must fle a form sE－1OA BANK for itse
Form BE － 10 F for the nonbank foreign affilite＊

A U．S．Reporter that is not a bank，but that has a bank foreign affilate，must fill a standard Form BE－10A for itself and a Form BE－10B BANK for the bank foreign affliate．

Banks located on U．S．military bases abroad and servicing base personnet are not considered＂foreign＊and a Form BE－10日 BANK should not be filed for them．

The specialized report forms；where their use is permitted， replace the standard forms，and the instructions glven herein repiace the standard forms，and the instructions given hae Referenees to Forms RE－10A and BE．108 should be interpouted a $\$$ meaning Forms EE－1OA BANK and BE－1OQ QANK，unless otherwise speciffed．

2．Form of organlymtion of U．s．heporter－Mark $(X)$ one

3．If the U．S．Roportmif ita corporation，ts the corporation owned to the extent of more than so\％of its voting stock by

$1003 \backslash 1 \square$ Yes－Complete the＂CLAMM FOR NOT FILING A BE－10＂by chacking box number 3 and entering in number 3 on the＂claim＂the name and address of the U．S．business enterprise in which your deta will be consolldated in accordance with the definition of U．S．Roporter．Submit the claim to BEA and forward the remainder of the BE－10 Survay packet to the U．S．business enterprise in which your dasa will be consolidated．If this cannat be done，call 1202 ） 523 －0632 for further instructions．
${ }^{1} 2 \square$ No
4．Enter anpleyer identifieation numberls）used by the U．S．Reporter fo tie U．S，Income and payroll taxes．Show additional nurnbers on a separate sheet if necossary．
 must be fully consolideted in this report．How over，it is recognized that certain U．S．subsidlathes nomally may not be consolidated into the parent company＇s report to shareholders（because，for example，the subsidiary is in an unrelated ine of businesal）．Whife BEA prefers that such a subsidiary be consolideted in this report，it wili permit the U．S．Reporter，in lieu of consolidation，to either 11 combire or tgeregate the subsidiary in this Form EE－10A or 2）File a separate Form BE－10A for the subsidiary，as specified in the Instructipm Beodiet，Part II，Sectian B． 2.

5．Are data for any U．S．subsidianies that are mot nomally consolidated into the parent company＇s reports to shareholders consolidated，aggregated，of combined in this Form BE－10A？

6．If the answer to item 5 ts＂Yes，＊give the nama of each such U．S．subsidiary，and the increase in tha U．S．Reporter＂s total assets（ftem 23 ）that resulted from that U．S．stbsidiary＇s consolidation，aggregation，or combination in this Form BE－10A

FORM BE-10A (SUPFLEMENT)/REV. 2/B3)

## IMPORTANT NOTES

A single original copy of each form or supplement shall be filed with the Bureau of Economic Analysis. For Form BE-10B, this should be the copy to which you have attached the appropriate label if such a labe has been provided.

Read instruction Booklet before completing form. The instructions given below are only a brief summary of certain ones relating to this form
See SPECIAL NOTE: BANKS, on page 2, before proceeding.

## DEFINITIONS

1. U.S. DIRECT INVESTMENT ABROAD - The ownership or control directly of indirectly, by one U.S. person of 10 per centum or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in an unincorporated foreign business enterprise, including a branch.
2. AFFILIATE - A business enterprise located in one country which is directly or indirectly owned or controfled by a person of another country to the extent of 10 per centum of more of its voting stock for an incorporated business or an equivalent interest for an unincorporated business, including a branch.
3. FOREIGN AFFILIATE - An affiliate located outside the United States in which a U.S. person has direct investment.
4. FOREIGN AFFILIATE'S 1982 FISCAL YEAR - The foreign affiliate's financial reporting year that has an ENDING DATE IN CALENDAR Y YEAR 1982

## REPORTING REQUIREMENTS

1. FILING - AU.S. person is required to file one Form BE 108 for each foreign affiliate that is not totally exempt. Under those limited conditions where foreign affiliates may be consolidated. the consolidated entity is considered to be one foreign affiliate.) If two or more U.S. Reporters jointly own a foreign affiliate, directly or indirectly, each U.S. Reporter must submit a Form BE-10B report for the affiliate. The U.S. Reporter having the highest percentage ownership (direct and indirect combined) in the foreign affiliate must file a "complete" combined) in the foreign affiliate must fne a complete "partial" Form BE-1OB report in which only Part I, iterns I through 25, and Part III, if there is direct ownership or financial transactions, have been completed. If the percentage of ownership is the same, the U.S Reporters must decide among themselves which one will submit the complete report. For a detailed illustration of foreign affilate reporting requirements, see the Instruction Bookiet, Part II, Section C.4.
2. TOTAL EXEMPTION - A Form BE-10B need not be filed if: a. Each (i.e., all three) of the following items, as defined an standard Form BE-1OB, for the foreign affiliate / inot the U.S. Reporter's sharel was between - $\$ 3.000,000.00$ and $+\$ 3,000,000.00$ for the reporting period:
(1) Total assets, item 60,
(2) Sales or gross operating revenues, excluding sates taxes, item 72, and
(3) Net income after provision for foreign income taxes, item 84. AND
b. The foreign affiliate does not own another foreign affiliate for which a Form BE-10B must be filed. If the latter condition is not met, then Form BE-10B must be filed for the foreign affiliate parent holding the equity interest regardless of the value of its assets, sales, or net income. That is, all affiliates upward in a
chain of ownership must be reported.
In addition, a foreign bank affiliate of the U.S. Reporter is exempt from being reported on this Form BE-1OB BANK if the U.S. Reporter holds only an indirect ownership interest and that indirect ownership interest is 50 percent or less, provided that the foreign bank affiliate does not own another foreign affiliate for which a Form BE-10B report must be filed.
NOTE - An affiliate's receivables due from its parent may not be eliminated from total assets when applying the exemption criteria for penaring this report.
Pursuant to item 8, Form BE-10A, a Form BE-10A SUPPLEMENT must be attached giving the name, country of location, and
setected information for each exempt foreign affilfate. If all affitate are exempt, then Form BE-10A SUPPLEMENT must be filed along with the required partial form BE-10A.
3. TRANSLATION OF FOREIGN CURRENCY FINANCIAI AND OPERATING DATA INTO U.S. DOLLARS - The foreign affiliate's financial and operating data should be translated from foreign urrency to U.S. doilars using U.S. generaty accepted accounting 52, as pplicablel See the instruction Sookiat, Part $V$, Section $B$
4. ASSISTANCE - Telephone (202) 523-0632 during office hours 7:30 a.m. to 4:00 p.m. Washington, D.C. time.
5. DUE DATE - BE-10 reports comprising both Form BE-10A and Formisi BE-10B are due on the following dates:

June 30, 1983 - For a U.S. Reporter required to file less than 20 Forms BE- 10 E .
July 31, 1983 - For a U.S. Reporter required to file 20 to 99
Forms BE-10B.
August 31. 1983 - For a U.S. Reporter required to file 100 or more Forms BE-10B.

## GENERAL NOTES

1. Currency amounts should be reported in U.S. dollars and rounded to the nearest thousand. Examples: $\$ 1,033,242.00$ should be reported as $\$ 1.033$.
2. If an item is between $+\$ 500.00$ and $-\$ 500.00$, enter " 0. .
3. Use parentheses ( ) to indicate negative numbers.
4. Every question on the form should be answered except where reporting is specif cally exempt. If certain information cannot be supplied because the accounts of the foreign affilite cannot be obtained, give your best estimate.
5. All questions should be answered in the context of the foreign affiliate's 1982 fiscal year (see definition above and item 100 f this Form BE-10B BANKI.
6. Where the instruction "Mark $(X)$ one" is given, if it is necessary to mark more than one answer, give an explanation.
7. Pages of this report may be separated for machine processing. To facilitate correct reassembly, enter the serial number (from item 3 ) in the space provided in the upper right hand cornef of all the ODD numbered pages.

## MANDATORY

This survey is being conducted pursuant to the International 22 U.S.C. 3101 to 3108 - hereinater "the $A A^{\prime}$ "), and the filing of reports is mandatofy pursuant to section 5(b)(2) of the Act (22 U.S.C. 3104 ).

## PENALTIES

Whoever faids to report may be subject to a civil penalty not exceeding $\$ 10,000$ and to iniunctive relief commanding sueh person to comply, of both. Whoever wilfully fals to report shall be fined not more than $\$ 10,000$ and, if an individual, may be imprisoned for not more than one year, or both. Any officer, director, employee, or agent of any corporation who knowifgly participates in such violations, upon conviction, may be punished by a like fine, imprisonment, or both. (See Section 6 of the Act, 22 U.S.C. 3105.)

## CONFIDENTIALITY

The information filed in this report may be used only for analytical and statistical purposes and access to the information shall be available onty to officiats and employees fincluding consultants and contractors and their employees) of agencies designated by the President to perform functions under the Act. The President may authorize the exchange of the information between agencies or officials designated
to perform functions under the Act but only for analytical and to perform functions under the Act, but only for analytical and statistical pufposes. No official or employee lincluding consultants and contractors and their employees) shall publish or make avalable any infarmation collected under the Act in such a mafner that the person to whom the information relates can be specificaly ldentied. Reports andir submission or disclosure shall not be compelled by any person without the prior written permission of the person filing the report and without the prof witen permission of and the customer of such person where the information supplied is (22 U.S.C. 3104 ).

## SPECIAL NOTETBANKS

Specialized report forms have been adopted for banks Ithat is, for business enterprises over 50 percent of whose total revenues are generated by activities classified in industry code 600), because much of the information on banks' foreign activities which is requested on the standard forms is already being reported to other agencies of the federal Government. The specialized report forms are designed to yield only such adolitional information as is deemed necessary. Use of specialzed forms BE-10A BANK and BE-10B BANK is at the discretion of BEA; in situations where their possible use is not clear-cut, permission must be secured from BEA in advance of filling.
Form BE-10A BANK has been developed for reporting by a U.S. Reporter that is a bank or a bank holding company. It is not to be used by a U.S. Reporter that may technically be classified as a bank holding company because of an interest in a banking activity, but that has over 50 percent of its revenues generated by nonbank activities Activities of subsidiaries that may not be banks but that provide suppor to the parent company, such as real estate subsidiaries set p to hold considered bank activities.)

Form BE-10B BANK is for reporting of a foreign affiliate that is a bank in which the U.S. Reporter holds a direct andior indirect ownership interest. However, a foreign bank affiliate of the U.S. Reporter in which the U.S. Reporter holds only an indirect ownership interest of

50 percent or less is exempt from being reperted on Form BE-10B BANK, but must be listed on Farm BE-1OA SUPPLEMENT.
ncorporated foreign bank affiliates in which the U. S . Reportar holds direct equity interest must be soparately reported. Al branch bank f the $1 s$. Feporter in a given forelan country must be concolidated one Form RE-10B BANK even if it is the Reporter's practice to on far for the banke separate on Fadmal Peserva FA105F or on Comptrolfer of the Currency Form CC7610-09.

A U.S. Reporter that is a bank, but that has a nonbank foreign ffitiate, must file a Form BE-10A BANK for itself and a standard Form BE-10B for the nonbank foreign affiliate.

A U.S. Reporter that is not a bank but that has a bank foreign affiliate, must fite a standard Form BE-10A for tiself and a Form BE-10B BANK for the bank foreign affiliate.

Banks located on U.S. mititary hases abroad and servicing base personnel are not considered "foreign" and a Form BE -10B BANK should not be filed for them.

The specialized report forms, where their use is permitted, replace the standard forms, and the instructions given herein and in the instruction Booklet should be so construed. References to Forms $3 E-10 \mathrm{~A}$ and $\mathrm{BE}-10 \mathrm{~B}$ should be interpreted as meaning Forms $\mathrm{BE}-10 \mathrm{~A}$ BANK and BE-1OB BANK, unless otherwise specified.

## Part I - IDENTIFICATION OF FOREIGN AFFILIATE - Continued

3. Serial number for forelgn aftiliate - Enter serial number from transmittal list required to be submitted with report pursuant to ftem 8 , Form BE-10A.
```
Numbe
``` Also enter this number in the space provided in the upper right hand corner of ODD NUMBERED pages of this report. This will facilitate assembly if form is disassembled for machine processing.
4. Name change - If there has been a name change since 1977. give 1977 name of toreign affiliate.
\begin{tabular}{|l|l|l|l|l|l|}
\hline \begin{tabular}{l} 
BEA \\
USE \\
ONLY
\end{tabular} & 1004 & 1 & 2 & 4 & 5 \\
\hline
\end{tabular}
5. Number of foreign affiliates consolidated .n. Enter number

If this report is for a single foreign affiliate, enter " 1 " in the box. If more than one foreign affitiste is consolidated in this report, enter the number of foreign affiliates consolidated. (Hereinafter they are considered to be one affiliate.)

NOTE - DO NOT consolidate affifiates in different countries, or in different BEA 3-digit industries, except under the limited conditions noted in the Instruction Booliat, Part \(\mathrm{II}_{4}\) Section C. 5.
If number is greater than one, Supplement A of this Form BE-1OB BANK must be completed.
6. Does this foreign affiliate have a direct equity interest in another reported foreign affiliate of its U.S. Reporter(s), including branches of this affiliate, which are NOT fully consolidated on this Form BE-10B BANK? - Mark ( \(X\) ) one
\(1006 \quad 1 \quad 1\) Yes - Supplement B of this Form BE-10 BANK MUST be completed

7. Form of organization of forgign affiliate - Mark (X) one

1007

Corporatio Branch *

Partnership

Sole proprietorship
Other - Specify
* NOTE - For a business enterprise that is incorporated in the Unitod States but carries on substantalty all of its operations abroad, the foreign pertion of its operations should be considered and treated as a branch, i.e., as an unincorporated foreign affiliate.
8. Country of incorporation or organization of foreign aftiliata - Mark \((X)\) one

9. Country of location - Country in which foreign affiliate's physical assets are located or where its primary activity is carted out - Mark (X) one

10. Enter the ending date of this foraign affilhate'a 1982 fiscal yaar

11. Was the foreign business enterprise a foreign affiliate for only part of FY 1982?

NOTE - For a foreign business enterprise that was a foreign affiliate for only part of FY 1982 - if the enterprise became a foreign affiliate during the reporting period, twe close FY 1981 data columns should all be zero. If the enterprise ceased to be an affiliate during the reporting period, the close FY 1982 data colunns should all be zere.
\begin{tabular}{|c|c|c|c|}

\title{
DIRECT INVESTMENT INDUSTRY AND FOREIGN TRADE CLASSIFICATIONS BOOKLET
}

\section*{CONTENTS}PartlIndustry classifications2
Part II
Foreign trade classifications ..... 21

\section*{INTRODUCTION}

This booklet provides detailed descriptions of each of the industry and foreign trade classification categories to be used in completing BEA's surveys of direct investment. Industry classifications described in the first part of this booklet (page 2), are used to determine the type of business conducted by the entity being reported. Do not use industry classifications to classify foreign trade. Foreign trade classifications, described in the second part of this booklet (page 21), are used to classify, by product, U.S. merchandise exports and imports.

\section*{PART I.—DIRECT INVESTMENT INDUSTRY CLASSIFICATIONS}

The titles of some direct investment (DI) industry classifications, by themselves, may be insufficient to classify certain activities. Consult the more detailed descriptions provided below to be sure of the correct classification. To assist in classification, a "NOTE" may be given after the definition of some DI codes. Such notes list the DI code for closely related activities which are NOT included in the classification being defined, but are included in some other classification.

The industry classifications defined below are to be used when completing the industry classification items in the Bureau's surveys of direct investment. These classifications, and their respective code numbers, were adapted from the ENTERPRISE STANDARD INDUSTRIAL CLASSIFICATION MANUAL, 1974, which sets forth an all-inclusive industry classification system for companies. That system, in turn, is related to the STANDARD INDUSTRIAL CLASSIFICATION MANUAL, 1972 (hereinafter referred to as "1972 SIC"), which sets forth an all-inclusive industry classification system for the individual establishments of an enterprise.

For the convenience of those U.S. reporters familiar with the 1972 SIC, the 1972 SIC code or codes which correspond to a given DI classification are shown in parentheses under the heading of each DI classification. There is not always a one-to-one relationship between the two industry classification systems. There may be slight differences between a given DI classification and the corresponding 1972 SIC classification, or a DI classification may be a combination of several 1972 SIC classifications. Therefore, when completing the industry classification items in the surveys, be sure to consult the definitions of the DI industry classifications given below.

There are two combinations of activities which need clarification-
1. Extraction and refining of petroleum by the same entity should always be classified in DI code 291 ("Integrated petroleum refining and extraction"); these activities should NOT be split between DI code 133 ("Crude petroleum extraction (no refining) and natural gas'") and DI code 292 ("Petroleum refining without extraction"), when performed by the same entity.
2. Wholesale marketing of its own products by an entity primarily engaged in production does not constitute "Wholesale trade." For example, if an entity manufactures turbines and sells them to industrial users, its sales should be classified in DI code 351 (manufacturing of "Engines and turbines") and not in DI code 508 (wholesaling of "Other machinery, equipment, and supplies"). If, on the other hand, an entity sells turbines produced by others, its sales should be classified in DI code 508. To the extent that an entity manufactures and sells its own turbines AND sells turbines produced by others, its sales should be split between DI code 351 and DI code 508.

AGRICULTURE, FORESTRY, AND FISHING \\
NOTE.-Owners and lessors of real estate used for agricultural or timber growing purposes which the owners or lessors do not operate themselves but lease to others are classified in DI code 649. \\
Agricultural production-crops (1972 SIC major group 01) \\
Production of cash grains, such as wheat, rice, corn, and soybeans \\
Other field crops, such as cotton, tobacco, and sugar \\
Vegetables, melons, fruits, tree nuts, and horticultural specialities
\end{tabular} & 101 & \begin{tabular}{l}
MINING \\
Mining operations are classified on the basis of the principal mineral produced, or, if there is no production, on the basis of the principal mineral for which exploration or development work is in process or for which mining services are rendered. Mining comprises the extraction of minerals occurring naturally: solids, such as coal and ores; liquids, such as crude petroleum; and gases. Activities include quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparation customarily done at the mine site; developing mines or exploring for minerals and gases; and providing other mining services. \\
Iron ores
\end{tabular} \\
\hline 020 & \begin{tabular}{l}
Agricultural production-livestock, except beef cattle feedlots \\
(1972 SIC major group 02, except 0211) \\
Production of beef cattle, hogs, sheep, and goats \\
Dairy farm products, including the raising of dairy heifer replacements \\
Poultry and eggs
\end{tabular} & & \begin{tabular}{l}
Exploring for, developing, mining, beneficiating, or otherwise preparing iron and manganiferous ores \\
Producing sinter and other agglomerates, except those associated with blast furnace operations \\
NOTE.-Manufacturing of pig iron from iron ore by blast furnaces is classified in DI code 331.
\end{tabular} \\
\hline & \begin{tabular}{l}
Animal specialities, such as horses, rabbits, bees, pets, and fur-bearing animals in captivity \\
NOTE.-Manufacturing or processing dairy products not on a farm is classified in DI code 202.
\end{tabular} & 102 & \begin{tabular}{l}
Copper, lead, zinc, gold, and silver ores (1972 SIC codes 102, 103, and 104) \\
Exploring for, developing, mining, and milling or otherwise preparing copper, lead, zinc, gold, and silver ores
\end{tabular} \\
\hline 021 & \begin{tabular}{l}
Agricultural production—beef cattle feedlots (1972 SIC code 021I) \\
Includes fattening of beef cattle in a confined area for a period of at least 30 days, on own account or on a fee or contract basis.
\end{tabular} & & \begin{tabular}{l}
Recovering copper concentrates by precipitation and leaching of copper ore, and production of silver or gold bullion at the mine, mill, or dredge site \\
NOTE.-Recovery of refined copper by leaching copper concentrates is classified in DI code 335.
\end{tabular} \\
\hline 070 & \begin{tabular}{l}
NOTE.-Feedlot operations that are an integral part of breeding, raising, or grazing of beef cattle are classified in DI code 020. \\
Agricultural services \\
(I972 SIC major group 07) \\
Includes providing soil preparation services, crop services, veterinary and other animal services, farm labor and management services, and landscape and horticultural services.
\end{tabular} & 103 & \begin{tabular}{l}
Bauxite and other aluminum ores \\
(1972 SIC code 105) \\
Exploring for developing, mining, and milling or otherwise preparing bauxite and other aluminum ores \\
Associated activities, such as drying, calcining, activating, and sintering \\
Other metallic ores \\
(1972 SIC codes 106. and 109)
\end{tabular} \\
\hline 080 & \begin{tabular}{l}
Forestry \\
(1972 SIC major group 08) \\
Operating timber tracts for the purpose of selling standing timber \\
Growing of trees for purposes of reforestation and gathering seeds and other miscellaneous forest products \\
Providing forestry services \\
NOTE.-Production of logging camps and logging contractors is classified in DI code 240.
\end{tabular} & 108

120 & \begin{tabular}{l}
Exploring for, developing, mining, and preparing other metallic ores, such as ferroalloys, vanadium, mercury, uranium, platinum, etc. \\
Metal mining services \\
(1972 SIC code 108) \\
Providing metal mining services on a contract or fee basis, such as test drilling, mine exploration and development, and removal of overburden \\
Coal
\end{tabular} \\
\hline 090 & \begin{tabular}{l}
Fishing, hunting, and trapping \\
(1972 SIC major group 09) \\
Commercial fishing, including shellfish \\
Operation of fish hatcheries and preserves \\
Hunting, trapping, and game propagation
\end{tabular} & 120 & \begin{tabular}{l}
(1972 SIC major group I/ and 12) \\
Exploring for, developing, mining, and preparing anthracite, bituminous, and lignite coal and the performing of services related thereto \\
NOTE.-Manufacturing of coal fuel briquets is classified in DI code 299.
\end{tabular} \\
\hline

\hline \multicolumn{2}{|l|}{\multirow[t]{31}{*}{\begin{tabular}{l}
Some manufacturing-type activities ARE CLASSIFIED IN INDUSTRIES OTHER THAN MANUFACTURING. \\
For example: \\
Agriculture, forestry, and fishing \\
Processing on farms is not considered manufacturing if the raw materials are grown on the farm and if the manufacturing activities are on a small scale without the extensive use of paid labor. Other exclusions are custom grist milling, threshing, and cotton ginning. \\
Mining-includes the following: \\
Dressing and beneficating of ores \\
Breaking, washing, and grading of coal \\
Crushing and breaking of stone \\
Crushing, grinding, or otherwise preparing of sand, gravel, and nonmetallic chemical and fertilizer minerals other than barite \\
Construction \\
Fabricating operations performed at the site of construction by contractors are not considered manufacturing (but the prefabrication of sheet metal, concrete, and terrazzo products and similar construction materials IS INCLUDED IN MANUFACTURING). \\
Wholesale and retail trade-includes the following: \\
Cutting and selling purchased carcasses \\
Preparing feed at grain elevators and farm supply stores \\
The breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, such as liquors or chemicals \\
Also included in retail trade is selling, to the general public, products produced on the same premises from which they are sold, such as bakeries, candy stores, ice cream parlors, and custom tailors. \\
Services \\
Tire retreading and rebuilding, sign painting and lettering shops, and the production of motion picture films are classified in services. Repair activities are classified in services (however, ship and boat building and repair, the rebuilding of machinery and equipment on a factory basis, and machine shop repair ARE CLASSIFIED IN MANUFACTURING). \\
Meat packing \\
Manufacturing of sausages and other prepared meat products \\
Poultry dressing and poultry and egg processing \\
202 Dairy products \\
(1972 SIC code 202) \\
Manufacturing of creamery butter, natural and processed cheese, condensed and evaporated milk, ice cream, and frozen desserts \\
Processing (pasteurizing, homogenizing, vitaminizing, bottling) and distributing fluid milk and related products, including cottage cheese

\section*{MANUFACTURING-Continued}

Automotive trimmings, seat covers, and safety straps is classified in DI code 230.

Automotive seats is classified in DI code 250.
Tires, tubes, automotive hoses-plastic and rubberand floor mats is classified in DI code 305.

Automotive glass-headlight lenses, windshields, windows, etc.-is classified in DI code 321.

Gaskets is classified in DI code 329.
Motor vehicle hardware is classified in DI code 342.
Automotive stampings, including fenders, hubcaps, body parts, and trim, is classified in DI code 346.
Automotive springs, skid chains, seat frames, and chrome plating is classified in Dl code 349.

Diesel engines is classified in DI code 351.
Carburetors, pistons, rings, and valves is classified in DI code 359.

Vehicular lighting equipment is classified in DI code 364. Automotive radios is classified in DI code 366.

Automotive antennas is classified in DI code 367.
Storage batteries and ignition systems is classified in DI code 369.
Automotive ammeters and voltmeters is classified in DI code 381.

\section*{379 Other transportation equipment, nec}
(1972 SIC codes 372, 373, 374, 375, 376, and 379)
Complete aircraft, aircraft engines and engine parts. and other aircraft parts and auxiliary equipment (including research and development on aircraft)

All types of ships and boats (including repairing)
Building of floating offshore drilling platforms
Railroad equipment (including rebuilding)
Motorcycles, bicycles, and parts
Guided missiles and space vehicles, their propulsion units, auxiliary equipment, and parts
Travel trailers and campers
Tanks and tank components
Other transportation equipment, nec, such as automobile trailers, snowmobiles, and all terrain vehicles

NOTE.-Manufacturing of-
Mobile homes is classified in DI code 240.
Industrial trucks, tractors, trailers, and stackers is classified in DI code 353.

381 Scientific and measuring instruments
(1972 DI codes 381 and 382)
Engineering, laboratory, scientific, and research instruments and associated equipment, such as nautical, navigational, aeronautical, surveying, and drafting equipment and instruments for laboratory work and scientific research

\section*{MANUFACTURING-Continued}

Automatic controls for regulating residential and commercial environments and appliances, such as temperature and related controls for heating and air conditioning installations and refrigeration applications, which are electrically, electronically, or pneumatically activated, and which measure and control variables, such as temperature and humidity, and automatic regulators used as components of household appliances

Industrial instruments and related products for measuring, displaying, transmitting, and controlling process variables, such as pressure, vacuum, conbustion, flow, level, viscosity, density, acidity, etc., in manufacturing, energy conversion, and public service utilities

Totalizing meters and counting devices, such as watermeters and gasmeters
Instruments for measuring and testing of electricity and electrical signals, such as voltmeters, ammeters, and wattmeters

Measuring and controlling devices, nec, such as nuclear instruments, thermometers, and aircraft engine instruments

NOTE.-Manufacturing of-
Surgical and medical instruments is classified in DI code 384.

Watches and clocks is classified in DI code 387.
Measuring and dispensing pumps is classified in DI code 358.

Optical instruments is classified in Dl code 383.
Monitoring, evaluating, and other support equipment for electronic navigational, radar, sonar, and other communications systems is classified in DI code 366.

383 Optical and opthalmic goods
(1972 SIC codes 383 and 385)
Optical instruments and lenses, such as-
Instruments that measure an optical property
Photographic lenses
Apparatus, except photographic, that projects or magnifies

Optical sighting and fire control equipment
Related analytical instruments
Opthalmic goods, such as frames and eyeglass and sunglass lenses

\section*{Medical instruments and supplies}
(1972 SIC code 384)
Surgical, medical, ophthalmic, and veterinary instruments and apparatus

Orthopedic, prosthetic, and surgical appliances and supplies

Dental equipment and supplies
NOTE.-Manufacturing of X-ray apparatus is classified in DI code 369.

code
\end{tabular} & Item description \\
\hline & TRANSPORTATION, COMMUNICATION, \\
& AND PUBLIC UTILITIES-Continued
\end{tabular}

450 Transportation by air
(1972 SIC major group 45)
Furnishing domestic and foreign air transportation by both certified and noncertified carriers, operating airports and flying fields, and furnishing terminal services

461 Pipelines, petroleum and natural gas
(1972SIC codes 4612, 4613, and part of 492)
Pipeline transportation of crude petroleum and refined petroleum products, such as gasoline and fuel oil
Pipeline transmission of natural gas from the extracting site

NOTE.-Pipeline transportation of natural gas by utilities is classified in DI code 490.

462 Pipelines, except petroleum and natural gas (1972 SIC code 4619)

Pipeline transportation of commodities except crude petroleum, refined products of petroleum, and natural gas
\(470 \quad\) Petroleum storage for hire
(Part of 1972 SIC code 4226)
Operation of petroleurn bulk stations and terminals for hire

\section*{475 Travel agents}
(1972 SIC code 4722)
Arranging tours and transportation for passengers, acting as independent ticket agencies for transportation establishments, and furnishing travel information

477 Transportation, nec, warehousing, terminal facilities, and related services
(1972 SIC major groups 40; 41; 42, except part of code 4226: and 47. except 4722)
Local and suburban and interurban highway passenger transportation

Motor freight transportation and warehousing
Transportation services such as freight forwarding and arrangement of transportation of freight and cargo
NOTE.-Petroleum storage for hire is classified in DI code 470.

\section*{480 Communication}
(1972 SIC major group 48)
Furnishing telephone and telegraph communication service (wire or radio), including domestic, international, marine, mobile, and aeronautical services

Radio and television broadcasting
Other communication services
490 Electric, gas, and sanitary services
(1972 SIC major group 49. except part of code 492)
Generation, transmission, and/or distribution of electrical energy for sale
Natural gas distribution for sale (except for pipeline transportation of natural gas from the extracting site)

\section*{TRANSPORTATION, COMMUNICATION,} AND PUBLIC UTILITIES-Continued

Distribution of water for sale, including irrigation systems
Production and distribution of steam and heated or cooled air for sale

Sanitary services
NOTE.-Pipeline transportation of natural gas from the extracting site is classified in DI code 461.

\section*{WHOLESALE TRADE}

Includes places of business primarily engaged in selling merchandise to-

Retailers
Industrial, commercial, institutional, farm, or professional business users

Other wholesalers
Also includes acting as brokers in buying from, or selling merchandise to, such persons or companies

\section*{DURABLE GOODS}

501 Motor vehicles and equipment
(1972 SIC code 501)
Wholesale distribution of -
New and used passenger automobiles, trucks, and other motor vehicles

Automotive parts, supplies, accessories, tools, and equipment

Rubber tires and tubes

503 Lumber and construction materials
(1972 SIC code 503)

\section*{Wholesale distribution of-}

Rough, dressed, and finished lumber, plywood, door and window frames, and other wood and metal millwork

Construction materials such as cement, granite, sand, brick, etc.

NOTE.-Sale of ready-made concrete is classified in DI code 329.

504 Farm and garden machinery, equipment and supplies
(1972 SIC codes 5083 and 5191)

\section*{Wholesale distribution of -}

Agricultural machinery and equipment for use in preparation and maintenance of soil, planting and harvesting of crops, and other operations and processes pertaining to work on the farm, lawn, or garden

Dairy and other livestock equipment and farm supplies, such as animal feeds, fertilizers, agricultural chemicals, pesticides, and seeds (except grains)

\end{tabular}

\section*{RETAIL TRADE}

Includes selling merchandise to the general public for personal or household consumption, and rendering services incidental to the sale of the goods. Important characteristics are-

The firm is usually a place of business and is engaged in activities to attract the general public to buy.

The firm buys or receives merchandise as well as sells.
The firm may process its own products, as in restaurants or meat markets, but such processing is incidental or subordinate to selling.

Firms that sell exclusively to other businesses, institutional or industrial users, or contractors ARE CLASSIFIED IN WHOLESALE TRADE.

\section*{540 Food stores and eating and drinking places}
(1972 SIC major groups 54 and 58)
Retailing of food products for home preparation, such as by grocery stores, meat and fish markets, fruit and vegetable markets, candy, nut, and confectionery stores, dairy product stores, and retail bakeries
Retailing of prepared foods and drinks, such as by restaurants and bars

NOTE.-Providing meals or operating restaurants in connection with the activities of hotels, rooming houses, camps, and other lodging places are considered an integral part of that activity and are classified in DI code 700.

\section*{554 Gasoline service stations}
(1972 SIC code 554)
Operation of owned or leased gasoline service stations

590 Retail trade, nec
(1972 SIC major groups 52; 53; 55, except code 554; 56; 57; and 59)

\section*{Retailing of 一}

Building materials, hardware, and garden supplies, such as by hardware stores, lumber dealers, and paint, glass, and wallpaper stores

Mobile homes
General merchandise retailing, such as by department stores and variety stores

New and used automobiles, boats, recreational and utility trailers, motorcycles, and new automobile parts and accessories

Apparel and accessories, including shoes and furs

DI
code
Item description

\section*{RETAIL TRADE—Continued}

Furniture, home furnishings, and equipment, including household appliances and radios and televisions
Other miscellaneous goods including drugs, liquor, used merchandise, sporting goods, books, etc.
Nonstore retailers such as mail order houses

\section*{FINANCE, INSURANCE, AND REAL ESTATE}

600 Banking
(1972 SIC codes 601, 602, 603, part of 6052, 6056, and part of 671)
Business enterprises engaged in deposit banking, Edge Act corporations engaged in international or foreign banking, foreign branches and agencies of U.S. banks whether or not they accept deposits abroad, U.S. branches and agencies of foreign banks whether or not they accept deposits in the United States; and bank holding companies, i.e., holding companies for which over 50 percent of their total income is from banks which they hold.
NOTE.-Business enterprises engaged in functions closely related to banking but not accepting deposits, such as nondeposit trust companies, credit agencies, foreign currency exchanges, clearing house associations, money order and travelers' checks issuers, etc., are classified in DI code 612.

611 Franchising, business-selling or licensing
(Part of 1972 SIC code 6794)
Selling or licensing of franchises
NOTE. - The actual operation of businesses of the type for which franchises are sold or licensed is classified according to the type of business operated, such as a fast food restaurant, temporary help service, or real estate brokerage firm.

\section*{612 Other finance}
(1972 SIC codes 604; 605, except part of 6052 and except code 6056; 61; 62; and 67, except codes 671, 6732, and part of codes 6794 and 6799)
Credit agencies extending credit in the form of loans but not engaged in deposit banking, providing services such as those performed by rediscount and financing institutions for credit agencies other than banks, engaging in finance leasing of fixed assets, and agricultural, personal, and business credit institutions, saving and loan associations, and mortgage bankers and brokers
Security and commodity brokers, dealers, exchanges, and services which engage in the purchase, sale, and brokerage of securities; originate, underwrite, and distribute issues of securities; buy and sell commodity contracts; operate security and commodity exchanges; and provide related services such as clearing houses
Operations of management investment companies, unit investment trusts, and face-amount certificate offices Miscellaneous investment activities

NOTE.-Educational, religious, and charitable trusts are classified in DI code 905.
Bank holding companies are classified in DI code 600.
Other holding companies are classified in DI code 671.
Real estate investment trusts are classified in DI code 650.
Franchising is classified in Dl code 611

\section*{PART II.-FOREIGN TRADE CLASSIFICATIONS}

The foreign trade classifications are to be used in classifying U.S. merchandise exports and imports. The classifications are PRODUCT classifications adapted from the Standard International Trade Classification, Revision 2 (United Nations Statistical Papers, Series M, No. 34/Rev. 2), hereinafter referred to as "the SITC." For each product category described below, the equivalent one-, two-, or three-digit SITC code, or combination thereof, is given for the convenience of those U.S. Reporters who are familiar with the SITC.

It should be noted that the FOREIGN TRADE classifications are product classifications used only in classifying merchandise trade flows; they should be carefully distinguished from the DI INDUSTRY classifications contained in Part I of this booklet, which are used in determining the major industrial activity of the entity being reported.
\begin{tabular}{|c|c|}
\hline Item description & Item discription \\
\hline \begin{tabular}{l}
FOOD (RAW AND PREPARED) AND LIVE ANIMALS CHIEFLY FOR FOOD \\
(SITC code 0) \\
Include, for example- \\
Live animals chiefly for food (exclude zoo animals, insects, dogs, cats, etc.) \\
Meat and meat preparations (fresh, concentrated, or preserved) \\
Dairy products and birds' eggs (fresh, concentrated, or preserved) \\
Fish, crustaceans and mollusks, and preparations thereof (fresh, frozen, or preserved) \\
Cereals and cereal preparations (unmilled, cereal meals and flours, "prepared breakfast" foods, bakery products, etc.) \\
Vegetables and fruits (fresh, frozen, preserved or prepared; include edible beans and nuts, except soybeans and other oil seeds) \\
Sugar, sugar preparations, and honey \\
Coffee, tea, cocoa, spices and manufactures thereof (include coffee and tea substitutes) \\
Animal feeding stuffs \\
Margarine, shortening, and prepared edible fats, excluding all other fats and oils. \\
Miscellaneous edible products and preparations
\end{tabular} & \begin{tabular}{l}
BEVERAGES AND TOBACCO \\
(SITC code 1) \\
Include, for example- \\
Bottled and canned soft drinks, mineral waters, and other nonalcoholic beverages \\
Alcoholic beverages \\
Unmanufactured and manufactured tobacco products \\
CRUDE MATERIALS, INEDIBLE, EXCEPT FUELS \\
(SITC code 2) \\
Include, for example - \\
Raw hides, skins, and furskins \\
Soybeans, other oil seeds, and oleaginous fruit \\
Crude rubber, natural, synthetic, and reclaimed (exclude compounded, semiprocessed, and finished rubber products) \\
Cork, natural, raw, and waste \\
Fuelwood and wood charcoal \\
Pulpwood (particles, chips, wood waste, logs and bolts. poles, pilings and posts) \\
Rough-sawed, dressed, and cut-stock lumber, except veneers \\
Pulp and waste paper
\end{tabular} \\
\hline
\end{tabular}
\begin{tabular}{|c|c|}
\hline Item description & Item description \\
\hline \begin{tabular}{l}
CRUDE MATERIALS, INEDIBLE, EXCEPT FUELSContinued \\
Textile fibers and their wastes (raw, natural and synthetic fiber: include scouring and combing mill products, manmade fiber, filament, staple and tow, and rags, but exclude yarn, thread, and fabric) \\
Crude natural fertilizers of animal or vegetable origin, and fertilizers of natural phosphates, nitrates, and potassic salts \\
Crude nonmetallic minerals, except coal, petroleum, and precious stones (include stone, sand and gravel, sulfur, industrial diamonds, natural abrasives, salt, asbestos, etc.) \\
Ferrous and nonferrous metal ores, concentrates, waste, and scrap (include those of precious metals, but exclude gold waste and scrap) \\
Other crude inedible animal and vegetable materials such as seeds, nursery stock, natural resins and gums, etc. \\
PETROLEUM AND PRODUCTS, MINERAL WAXES, NATURAL AND MANUFACTURED GAS \\
(Part of SITC code 3) \\
Include, for example- \\
Petroleum, petroleum products, and related materials (include crude and partly refined petroleum, and petroleum products such as gasoline, kerosene, distillate, and residual fuel oils, lubricating oils and greases, petroleum jelly and mineral waxes, petroleum coke, asphalt, and paving mixtures) \\
Gas, natural and manufactured \\
COAL, COKE, AND BRIQUETS \\
(Part of SITC code 3) \\
Include, for example- \\
Coal, lignite, peat, coke and briquets thereof \\
CHEMICALS AND RELATED PRODUCTS \\
(SITC code 5) \\
Include, for example- \\
Organic and inorganic chemical elements and compounds (include nuclear feed materials and fuels, and radioactive materials) \\
Dyeing, tanning, and coloring materials, natural and synthetic (include color lakes, tannins, printing inks, paints, enamels, and lacquers) \\
Medicinal and pharmaceutical products \\
Essential oils, perfume and flavor materials, including perfumes, cosmetics, and toilet preparations \\
Soap, cleansing and polishing preparations \\
Fertilizers, manufactured (mineral or chemical) \\
Explosives and pyrotechnic products (exclude ordnance and all other ammunition) \\
Artificial resins and plastic materials, and cellulose esters and ethers
\end{tabular} & \begin{tabular}{l}
CHEMICALS AND RELATED PRODUCTSContinued \\
Other chemical products and materials, n.e.s., such as insecticides, herbicides, starches (include corn starch), disinfectants, glues, and adhesives, wood and resin-based chemical products, artificial waxes, artificial graphite, etc. \\
NOTE.-Exclude prepared photographic chemicals, synthetic rubber and cellulosic and noncellulosic manmade fibers. \\
MACHINERY, ELECTRICAL AND NONELECTRICAL, EXCEPT TRANSPORTATION EQUIPMENT \\
(SITC codes 7I-77) \\
Include, for example- \\
Power-generating machinery, equipment and parts (include engines for transportation equipment and nuclear reactors) \\
Agricultural machinery (include tractors and parts) \\
Civil engineering and contractors' plant, equipment and parts \\
Textile and leather machinery and parts \\
Paper and pulp mill machinery, papercutting machines, etc., and parts \\
Printing and bookbinding machinery and parts \\
Food processing machines (except domestic) and parts \\
Metalworking and metalforming machinery, machine tools, and parts \\
Oil and gas field equipment and parts (exclude drill bits, core bits, and reamers) \\
Construction, maintenance, mining, and lifting and loading equipment and parts (exclude wheel- or truck-mounted power cranes, draglines, shovels, and off-highway trucks and trailers) \\
Other industrial machinery and parts specialized to particular industries \\
Telecommunications and sound recorcing and reproducing apparatus and parts (include TV and radio receivers, telephone switchboards, phonographs, tape recorders, etc.) \\
Batteries \\
Electrical apparatus for medical purposes and radiological apparatus \\
Electrical equipment for internal combustion engines \\
Electrical hand tools \\
Electron tubes, semiconductors, etc. \\
Electrical machinery, apparatus and appliances, n.e.s., and parts (include electric household equipment, appliances and parts, and their nonelectric counterparts, but exclude nonelectric cooking stoves and ranges) \\
NOTE. - See description below of road vehicle parts, to determine which parts are included in machinery, and which in road vehicles (SITC 78) or in other transportation equipment (SITC 79).
\end{tabular} \\
\hline
\end{tabular}
\begin{tabular}{|c|c|}
\hline Item description & Item description \\
\hline \begin{tabular}{l}
ROAD VEHICLES (INCLUDING AIR CUSHION VEHICLES) AND PARTS (SEE DESCRIPTION OF PARTS BELOW) \\
(SITC code 78) \\
Include, for example- \\
New and used passenger cars \\
Buses \\
Motorcycles, motorscooters, bicycles, and other cycles, motorized and nonmotorized \\
Trucks, except wheeled armored fighting vehicles \\
Truck trailers \\
Travel trailers and campers \\
Wheel- or truck-mounted power cranes, draglines, and shovels (except railway cranes) \\
Nonmilitary vehicles which operate in whole or in part on runners or skis \\
Motor vehicle stampings \\
Road vehicle parts-Include all parts that are shipped with the vehicle. Product classification of parts that are shipped separately depends on the type of part. Some parts, such as bodies, chassis, shock absorbers, bumpers, mufflers, tailpipes, transmissions, motor vehicle floor coverings, and gaskets, always are classified in SITC 78 (or 79, if parts are for "other transport equipment"). whether or not shipped with the vehicles. Other types of parts are included with vehicles only when shipped with the vehicles; when shipped separately, such parts are classified in other product categories, according to the type of material or the general function of the part. As examples, if shipped separately from vehicles: tires and tubes, brake linings and pads, clutch facings and linings, and automotive glass and mirrors are in SITC 61-66; locks, hinges, and other automotive hardware. vehicle suspension springs and leaves are in SITC 69; and internal combustion piston engines and parts, turbines and parts, motor vehicle pumps and fans, blowers. radios, storage batteries, and electrical equipment for engines and vehicles are in SITC 71-77 \\
OTHER TRANSPORT EQUIPMENT \\
(SITC code 79) \\
Include, for example- \\
Railway vehıcles, new and rebuilt (include railway cranes, rallway and tramway track fixtures and fittings, and hovertrains) \\
Aircraft and associated equipment and parts \\
Ships, boats (include hovercraft) and floating structures \\
Passenger car trailers (include housing-type coaches) \\
Parts for such transport equipment (the description of "road vehicle parts" above applies also to parts for "other transport equipment") \\
METAL MANUFACTURES \\
(SITC codes 67. 68, and 69) \\
Include, for example- \\
Iron and steel products of blast furnaces, steel works, rolling mills and finishing mills
\end{tabular} & \begin{tabular}{l}
METAL MANUFACTURES—Continued \\
Cast iron articles, except ingot molds and railway car wheels \\
Nonferrous metals and metal products (except gold and insulated cable for communication, appliances, and building) \\
Nonferrous metal castings and forgings \\
Uranium depleted in U235 and thorium \\
Fabricated metal products (except ordnance, machinery, and transportation products and insulated electrical items), such as structures and parts of structures, metal containers, wire products, pipes and tubes, nails. screws, nuts and bolts, hand and edge tools, dies and cutting tools; drill bits, core bits, and reamers for oil and gas field drilling machinery; metal venetian blinds, hardware, table flatware and cutlery, utensils and household equipment made of base metal, etc. \\
Metal stampings, except motor vehicle stampings and stamped vitreous enameled parts for washing machines and refrigerators \\
Nonelectric cooking stoves and ranges \\
NOTE.-See description of road vehicle parts to determine which parts are classified in metal manufactures, and which in road vehicles (SITC 78) and in other transport equipment (SITC 79). \\
OTHER MANUFACTURES \\
(SITC codes 61-66, and 8) \\
Include, for example- \\
Leather, leather manufactures and dressed furskins (include composition leather with a basis of leather and manufactures of such composition leather) \\
Rubber manufactures, finished and semifinished (include sheet and plate materials, hardened rubber items, tires and tubes, hygenic and pharmaceutical articles, etc.) \\
Cork manufactures, aggiomerated cork, and articles of same \\
Wood veneers, plywood, improved or reconstructed wood, and other worked wood (include cooperage, millwork, household utensils of wood, etc.) \\
Paper, paperboard, and articles of paper pulp, of paper, or of paperboard \\
Textile yarn, thread, and fabrics of manmade or natural fibers but exclude scouring and combing mill products \\
Made up articles of textile materials, apparel, clothing accessories, and related products \\
Footwear (exclude military apparel and footwear, which are in SITC 9) \\
Floor coverings (include linoleum, carpets, mats, etc.) \\
Nonmetallic mineral manufactures, such as glass and glass products, pottery, lime, cement, and fabricated construction materials, refractory materials, clay, construction materials, etc. (exclude electrical porcelain goods and gaskets of laminated metals) \\
Sanitary, plumbing, heating and lighting fixtures and fittings
\end{tabular} \\
\hline
\end{tabular}
\begin{tabular}{|c|c|}
\hline Item descriphion & Item description \\
\hline \begin{tabular}{l}
OTHER MANUFACTURES-Continued \\
Furniture and parts (include chairs designed for medical, dental, surgical and veterinary use) \\
Travel goods, luggage, handbags and similar containers \\
Optical goods, instruments and apparatus \\
Medical and dental instruments and appliances \\
Meters, counters and measuring, checking, analyzing and controlling instruments \\
Photographic and motion picture apparatus, equipment, and supplies (include prepared photographic film and chemicals) \\
Watches, clocks and parts thereof \\
Phonograph records and record blanks \\
Magnetic tape, including computer recording, etc. \\
Printed matter, include books, magazines, newspapers, commercial printing, etc. \\
Baby carriages, toys, games, and sporting goods \\
Office and stationery supplies \\
Miscellaneous plastic products (except laminated sheets, rods, and tubes)
\end{tabular} & \begin{tabular}{l}
OTHER MANUFACTURES-Continued \\
Works of art, collector's pieces, antiques \\
Jewelry and related articles \\
Musical instruments and parts and accessories \\
Nonmilitary arms, shotgun shells, other hunting and sporting ammunition \\
Other miscellaneous manufactured products \\
ANIMAL AND VEGETABLE OILS, FATS, AND WAXES, AND COMMODITIES NEC \\
(SITC codes 4 and 9) \\
Include, for example - \\
Crude and refined, edible and inedible animal and vegetable fats and oils (exclude margarine, shortening, and other prepared edible fats, which are in SITC 0) \\
Military apparel and footwear \\
Armored vehicles and ordnance, except for shotgun shells, other hunting and sporting ammunition, and nonmilitary arms \\
Pet and 200 animals \\
Gold, nonmonetary (exclude ores and concentrates)
\end{tabular} \\
\hline
\end{tabular}```

[^0]:    1. The Panama Canal Zone was considered "foreign" in the 1982 benchmark survey. In the 1977 benchmark survey and in BEA's other surveys through the third quarter of 1979 , it was treated as a U.S. territory.
[^1]:    2. For a description of the industry codes used, see BEA's Direct Investment In dustry and Foreign Trade Classifications Booklet, reprinted in the appendix.
[^2]:    3. For foreign direct investment in the United States, the 1980 benchmark survey
[^3]:    ${ }^{\text {n }}$ Suppressed to avoid disclosure of data of individual companies.

[^4]:    4. The only exceptions to this rule were that codes $401,449,450,462,475$, and 477 were treated as being in the same two-digit industry, and codes 649 and 650 were treated as being in the same two-digit industry.
[^5]:    (*) Less than $\$ 500,000( \pm)$ or 50 employees
    ${ }^{\text {D }}$ Suppressed to avoid disclosure of data of individual companies.

    1. Sales were not reported on the BE-10B BANK form. Thus, in this table, total income is used
    in place of sales for bank affiliates.
[^6]:    5. In actuality, each U.S. parent was required to distribute its sales, employment, and other employment-related items only among the eight three-digit industries in which its sales were largest, and each foreign affiliate was required to distribute its sales only among the five three-digit industries in which its sales were largest. Parents reported their sales, employment, and other employment-related items, and affiliates reported their sales, in all other industries as a single item, which is shown in the "unspecified" line in the tables in this publication. Because relatively few parents had sales, employment, or other employment-related items in more than eight three-digit industries, and few affiliates had sales in more than five threedigit industries, such unspecified amounts were small.
[^7]:    (*) Less than $\$ 500,000( \pm)$ or 50 employees.
    ${ }^{\text {D }}$ Suppressed to avoid disclosure of data of individual companies.

    1. Sales were not reported on the BE-10A BANK and BE-10B BANK forms. Thus, in this table, 1. Sales were not reported on the BE-10A BANK and BE-10B BAN
    total income is used in place of sales for bank parents and affiliates.
    2. Bank parents were not required to disaggregate their employment by industry of sales $T$
    3. Bank parents were not required to disaggregate their employment by industry of sales. The
    distribution of employment by industry of sales for bank parents was, therefore, estimated by distribution of employment by industry of sales for bank parents was, therefore, estimated by
    multiplying each parent's total employment by the percentage of its sales that were in each in dustry.
[^8]:    6. In the 1977 benchmark survey, data were actually collected on production workers of parents and affiliates classified in all industries, not just of those classified in manufacturing. However, BEA determined that the data were of publishable quality only for production workers of parents and affiliates classified in manufacturing; companies in other industries had difficulty providing the data because they normally do not distinguish between production and nonproduction workers in their employment and payroll records.
[^9]:    7. The estimates for the first quarter of 1982 are exceptions. Sample data on the new basis were not reported to BEA until the second quarter of 1982. Thus, the first quarter estimates were made by extrapolating backward the sample data reported for subsequent quarters. These estimates may be subject to large revisions.
[^10]:    8. The withholding tax was repealed in July 1984.
[^11]:    9. The one exception to this rule for reverse debt investment is in the extremely rare case in which a foreign affiliate and its U.S. parent own 10 percent or more of each other. To avoid double-counting, the U.S. parent's debt and equity investment in the affiliate is included in the U.S. direct investment position abroad, while the affiliate's reverse investment-debt as well as equity-in the U.S. parent is included in the foreign direct investment position in the United States. In this one case, a foreign affiliate's debt investment in its U.S. parent is not netted against the parent's debt investment in it.
[^12]:    10. Except in rare instances, distributed earnings of unincorporated foreign affiliates are not subject to foreign withholding taxes. For publication purposes, such taxes were assumed to be zero.
[^13]:    4. Because some parents have both nonbank and bank affiliates, the sum of columns 4 and 13,7 and 14 , and 10 and 15 contain duplication and do not equal the totals in columns 1,2 , and 3 respectively
    5. Because some parents have both majority- and minority-owned affiliates, the sums of columns 5 and 6,8 and 9 , and 11 and 12 contain duplication and do not equal the totals in columns
    4,7 , and 10 , respectively.
[^14]:    If is determined that there is a material diference between the charged and shipped bases and the data have not been filed on the shipped basis, or the necessary adustments have not been made to put "charged" basis data essentlally on a "shipped" basis, then BEA will require that the data be refiled.

[^15]:    FORM BE 108 (REV $1 / 83$ )

[^16]:    FORM BE-10B (REV $1 / 83$ )
