## USWFinancial Data

## THE WEEK'S HIGHLIGHTS:

$\checkmark$ From the average of the two maintenance periods ending May 8, 1996, to the average of the two maintenance periods ending Oct. 9, the adjusted monetary base has risen at a 5.2 percent annual rate. This compares to the 1.9 percent rate of increase for the period from Jan. 3, 1996, to May 8 (see page 2). NOTE: The adjusted monetary base has been revised to include deposits used to satisfy clearing balance contracts. This change also affects the adjusted reserves series on page 4 and the money multiplier on page 5.
$\checkmark$ The value of total sales at merchant wholesalers fell 0.9 percent in August, only the second drop in the past 12 months. Sales of durable goods fell 1.3 percent, as auto sales declined for the sixth time this year. Wholesale sales are not adjusted for price changes.
$\checkmark$ Consumer installment credit outstanding increased $\$ 3.3$ billion in August, or at a 3.5 percent annual rate. Consumer debt is up 10.1 percent over the past year.
$\checkmark$ Declines in manufacturing and government payrolls caused total nonfarm payroll employment to fall 40,000 in September. After rising at a 2.8 percent annual rate in the second quarter, nonfarm employment advanced at a 2.2 percent rate in the third quarter.

All data are seasonally adjusted unless otherwise indicated.

[^0]
## Adjusted Monetary Base

The odjusted monetory bose is the sum of Federal Reserve deposits and vault cosh held by domestic depository institutions, currency held by the public, and adjustment for the effect of changes in reserve requirement rotios. Federal Reserve deposits now include the omounts used to satisfy clearing balance contracts. Data are computed by this bonk. A detailed description of the odjusted monetory bose is avoiloble from this Bank. Recent data ore preliminary.
