

## THE W鲧'S HIGHLIGHTS:

- The consumer price index for all urban consumers (CPI) advanced at a 3 percent annual rate in September, its largest rise in seven months. Excluding energy prices, which accelerated at an annual rate of 16.4 percent in September, the CPI rose 2.2 percent. Through the first three quarters of 1997, the CPI has risen at a 1.8 percent rate, considerably slower than the 3.2 percent rise registered in 1996 (fourth quarter-to-fourth quarter).
- The nominal value of business inventories increased $\$ 2.5$ billion in August, or by 0.2 percent. Total business inventory accumulation in July and August was at an annual rate of about $\$ 24.4$ billion. For purposes of comparison, inventories accumulated at an annual rate of $\$ 51.5$ billion in the second quarter.
- The nominal value of retail sales increased $\$ 0.6$ billion in September, a gain of 0.3 percent from August. For the third quarter, however, paced by strong sales in July and August, total retail sales rose 2.2 percent, a marked reversal from the 0.8 percent decline seen in the second quarter.
- Following a 3.7 percent rate of gain in August, the producer price index for finished goods (PPI) rose at a 5.6 percent annual rate in September. Because of a 0.9 percent rate of decline in July, however, the PPI only rose at a 0.4 percent rate in the third quarter. Producer prices have declined 0.1 percent since the third quarter of 1996.

All data are seasonally adjusted unless otherwise indicated.
