## d 171998 the WEEK'S HIGHLIGHTS:

- The index of industrial production fell 0.6 percent in June, its largest decline since December 1991. Although the bulk of the decline stemmed from an 11 percent drop in motor vehicle output (most likely strike-related), total production excluding motor vehicles and parts still fell about 0.1 percent.
- The consumer price index (CPI-U) rose 0.1 percent in June, or 0.7 percent at an annual rate. Gains of 3 percent or more in April and May, however, caused the CPI to advance at a 2 percent rate in the second quarter, a marked uptick from the 0.5 percent inflation rate seen in the first quarter. Measured from four quarters earlier, the CPI is up 1.6 percent.
- After rising a robust 1.2 percent in May, the value of retail sales in current dollar terms rose 0.1 percent in June. For the second quarter, sales increased at an 8 percent annual rate, nearly equaling the 8.3 percent rate posted in the first quarter.
- Producer prices for finished goods (PPI) fell 0.1 percent in June, while those of intermediate materials fell 0.3 percent and prices of crude materials dropped 1.4 percent. Measured from a year earlier, finished goods prices have fallen 0.8 percent, with intermediate and crude materials prices declining 1.8 percent and 8 percent, respectively.
- Paced by a 3.9 percent drop in petroleum prices, the index of U.S. import prices fell 0.5 percent in June. Import prices have yet to increase this year and are off 5.6 percent from a year earlier.

All data are seasonally adjusted unless otherwise indicated.
