

## NOV 131998

## THE WEEK'S HIGHLIGHTS:

- According to the advance estimate, real GDP grew at a 3.3 percent annual rate in the third quarter, a modest slowing from the 3.7 percent growth registered over the first half of 1998. The composition of third-quarter growth was tilted toward business inventory investment and consumer purchases of services; together, these two categories contributed 3.2 percentage points worth of growth. Measured from four quarters earlier, real GDP has increased 3.4 percent. The GDP price index increased at a 0.8 percent rate in the third quarter and is up 0.9 percent from four quarters earlier.
- Total factory orders for manufactured durable and nondurable goods rose $\$ 1.4$ billion, or 0.4 percent, in September. Much of this strength, though, was concentrated in orders for defense-related goods, which increased $\$ 2.1$ billion. Still, factory orders rose 1.3 percent in the third quarter after falling a combined 1.3 percent over the prior two quarters.
- The Conference Board reported that the index of leading indicators was unchanged in September, as was the index of coincident indicators. The index of lagging indicators, however, fell 0.1 percent.
- The real value of total construction spending rose 0.1 percent in September, with a 0.3 percent drop in private construction more than offset by a 1.6 percent rise in public construction. Through the first nine months of this year, real construction spending has increased 3.9 percent, an appreciable rise from the 1.3 percent gain seen over the same period in 1997.

All data are seasonally adjusted unless otherwise indicated.

## Adjusted Monetary Base

Averages of Daily Figures

The adjusted monetary base is the sum of Federal Reserve deposits and vault cash held by domestic depository institutions, currency held by the public, and an adjustment for the effect of changes in reserve requirement ratios. The monetary base series was recently revised to include Federal Reserve deposits used to satisfy clearing balance contracts. Data are computed by this bank. A detailed description of the adjusted monetary base is available from this bank. Recent data are preliminary.
