

- THE WEEK'S HIGHLIGHTS:
- Output per hour (productivity) in the nonfinancial corporate sector accelerated at a 4.6 percent annual rate in the third quarter after gains of 2.6 percent and 3.1 percent, respectively, in the first and second quarters. Nonfinancial productivity has grown at a 2.6 percent annual rate over the past 4 years.
- Sales of new single family homes rose 0.8 percent in October to an annual rate of 851,000 units. Although new home sales are down 4.6 percent from six months earlier, they are up 5.7 percent from a year earlier.
- The National Association of Purchasing Management's Purchasing Managers' Index fell 1.5 percent in November to 46.8 percent, its lowest reading in 33 months. According to the NAPM, a value below 50 percent generally implies that the manufacturing sector is contracting.
- The inflation-adjusted value of total construction spending, following no change in September, rose just 0.1 percent in October. Measured from a year earlier, however, real construction spending is up 3.8 percent.
- The Conference Board reported that the index of leading indicators rose 0.1 percent in October, the first increase in three months.
- Crude oil prices, as measured by the price of West Texas Intermediate, averaged \$11.48 a barrel for the week ending Nov. 27, down \$2.78 a barrel from four weeks earlier and \$7.87 a barrel from a year ago.

All data are seasonally adjusted unless otherwise indicated.

U.S. Financial Data is published weekly by the Research Division of the Federal Reserve Bank of St. Louis. For more information on data, please call (314) 444-8590. To be added to the mailing list, please call (314) 444-8808 or (314) 444-8809.

Information in this publication is also included in the Federal Reserve Economic Data (FRED) electronic bulletin board at (314) 621-1824 or internet World Wide Web server at www.stls.frb.org/fred.

The adjusted monetary base is the sum of Federal Reserve deposits and vault cash held by domestic depository institutions, currency held by the public, and an adjustment for the effect of changes in reserve requirement ratios. The monetary base series was recently revised to include Federal Reserve deposits used to satisfy clearing balance contracts. Data are computed by this bank. A detailed description of the adjusted monetary base is available from this bank. Recent data are preliminary.
