THE EMPLOYMENT SITUATION: OCTOBER 1973

Employment posted another large increase in October and unemployment dropped after holding steady for several months, it was announced today by the Bureau of Labor Statistics, U. S. Department of Labor. At 4.5 percent, the unemployment rate was down from the 4.8-percent plateau at which it had held since June and from the 5.5-percent level of October 1972.

Total employment (as measured by the household survey) expanded by 570,000 in October to 85.7 million, seasonally adjusted. Employment had risen by an even larger amount in September. Since October a year ago, total employment has grown by 3.2 million persons, an unusually large increase for a 12-month period.

The number of nonagricultural payroll jobs (as measured by the establishment survey) increased by 305, 000, seasonally adjusted, to 76.3 million in October. This was paced by a strong increase in manufacturing. Compared with October of last year, payroll employment rose by 2.7 million.

#### Unemployment

The number of unemployed persons declined 210, 000 (seasonally adjusted) in October to 4.1 million. This decrease, combined with the strong advance in employment, brought the overall jobless rate to its lowest level since April 1970.

Among the major demographic groups, the unemployment rate for adult women declined from 4.8 to 4.4 percent in October. (See table A-3.) In addition, there was a slight decrease in the rate for adult men, from 3.1 to 2.9 percent. Reductions in both groups were concentrated among 20-24 year-olds. Unemployment rates for teenagers (13.9 percent), household heads (2.7 percent), and married men (2.1 percent) approximated the levels they have maintained since July. However, all of these groups have improved their unemployment picture over the last year.

The jobless rate for Negro workers receded from 9. 4 to 8. 3 percent in October, largely as a result of reduced unemployment among Negro teenagers. The

unemployment rate for whites, at 4.1 percent, was not significantly different from its level of the last 3 months. Compared with their year-ago levels, jobless rates for both white and Negro workers have declined substantially.

With regard to the major occupational groups, the decline in unemployment in October was confined to white-collar workers (primarily those in clerical and sales occupations) and service workers. Among the major industry categories, the most

SOURCE: Tables A-1, A-3, A-4, B-1, B-2, and B-4.

prominent change in unemployment was a further decline in the rate for manufacturing workers, particularly those in durable goods. The jobless rate for all manufacturing workers reached its lowest point since the end of 1969.

The unemployment rate for the most recently discharged Vietnam Era veterans (20-24 year-olds) was 8.0 percent in October, little changed over the month and still higher than the rate for nonveterans of the same ages (5.7 percent). In contrast, jobless rates for veterans 25 to 29 (3.2 percent) and 30 to 34 (2.6 percent) were lower than in September and were not materially different from the rates of their nonveteran counterparts. Over the past year, there has been a decline in the unemployment rates of 20-24 and 25-29 year-old veterans. (See table A-7.)

The unemployment rate for workers covered by State unemployment insurance programs, at 2.7 percent in October, has been about the same since April.

Nearly the entire decline in total unemployment took place among those who had been seeking work for a month or less. (See table A-4.) Primarily as a result, the average (mean) duration of unemployment rose from 9.4 weeks in September to 10.4 weeks in October, following a drop in the previous month.

The proportion of jobless persons who had lost their last job showed a substantial decline in October. (See table A-5.) The number of such persons dropped below 1.5 million, its lowest level since February 1970.

#### Civilian Labor Force and Total Employment

The civilian labor force rose by 360, 000 in October (seasonally adjusted) following an even larger increase in September (750, 000). While teenagers accounted for most of the increase in September, adult men made up the bulk of the October expansion. (See table A-1.)

Employment also rose considerably for the second straight month, advancing by 570, 000, seasonally adjusted, to 85.7 million. Adult men accounted for over 300, 000 of this increase, with the balance divided about equally between teenagers and adult women. Since October a year ago, total employment has risen by 3.2 million persons; adult women made up 1.4 million of this gain, with adult men (1.2 million) and teenagers (660, 000) accounting for the remainder.

#### Industry Payroll Employment

Nonagricultural payroll employment continued its strong expansionary trend, rising by 305, 000 to a seasonally adjusted level of 76. 3 million in October. Over the year, payroll jobs have increased by 2. 7 million. (See table B-1.)

An October increase of 105, 000 in the number of goods-producing jobs occurred exclusively in manufacturing, with the durable goods industries continuing to account for most of the advance. This represented the first employment gain for the industry in 4 months. The 200, 000-job growth in the service-producing industries reflected sizeable gains in trade. services, and transportation and public utilities. Over the past year, the goods-producing sector has added 940, 000 jobs, while service-producing employment has grown by nearly 1.8 million.

### Hours of Work

The average workweek for production or nonsupervisory workers on nonagricultural payrolls declined by 0.2 hour in October, after seasonal adjustment, to 37.0 hours. (See table B-2.) While declines took place in nearly every industry division, the average workweek has been in the 37.0-37.2 hour range since early this year.

In manufacturing, the workweek was also down 0.2 hour in October to 40.6 hours. With the exception of a few industries (notably primary metals and transportation equipment), the decline in hours was pervasive throughout the manufacturing industries. Factory overtime hours were 3.7 in October, little changed from the levels held in recent months after declining from the 4.1-hour peak reached in the spring.

### Hourly and Weekly Earnings

Average hourly earnings of production or nonsupervisory workers on nonagricultural payrolls rose 0.8 percent from September to October, seasonally adjusted. Since October a year ago, hourly earnings have risen by 6.7 percent. Weekly earnings rose 0.2 percent from September to October (seasonally adjusted) and have advanced by 5.8 percent from their year-earlier level.

Before adjustment for seasonality, average hourly earnings increased by 1 cent in September to \$3.99. (See table B-3.) Since October 1972, hourly earnings have risen by 25 cents. Weekly earnings averaged \$147.63 in October, down 82 cents from September but \$8.13 above a year earlier.

#### Hourly Earnings Index

The Hourly Earnings Index--earnings adjusted for overtime hours in manufacturing, seasonality, and the effects of changes in the proportion of workers in highwage and low-wage industries--was 149.5 (1967=100) in October, 0.5 percent higher than in September, according to preliminary figures. (See table B-4.) The index was 6.5 percent above October a year ago. All industries recorded gains over the year,

ranging from 5. 2 percent in finance, insurance, and real estate to 8. 4 percent in mining. During the 12-month period ended in September, the Hourly Earnings Index in dollars of constant purchasing power declined 0. 6 percent.

This release presents and analyzes statistics from two major surveys. Data on labor force, total employment, and unemployment are derived from the sample survey of households conducted and tabulated by the Bureau of the Census for the Bureau of Labor Statistics. Statistics on payroll employment, hours, and earnings are collected by State agencies from payroll records of employers and are tabulated by the Bureau of Labor Statistics. A description of the two surveys appears in the BLS publication *Employment and Earnings*.

Table A-4: Unemployed persons 16 years and over by duration of unemployment

(Numbers in thousands)

Duration of unemployment	Oct. 1972	Oct. 1973	Oct. 1972	June 1973	Jul y 1973	Aug. 1973	Sept. 1973	Oct. 1973
Less than 5 weeks	2,197	1,923	2,239	2,233	2,213	2,240	2,167	1,960
to 14 weeks	1.308	1,170	1,455	1,202	1,268	1,205	1,351	1,303
5 weeks and over	965	670	1,117	775	750	796	778	776
15 to 26 weeks	502	375	589	453	482	457	489	439
27 weeks and over	463	295	528	322	268	339	289	337
Average (mean) duration, in weeks	11.3	9,8	11.9	9.8	9.6	10.0	9.4	10.4

<sup>2</sup> Insured unemployment under State programs—unemployment rate calculated as a percent of average covered employment. As with the other statistics presented, insured unemployment data relate to the week containing the 12th.

3 Man-hours lost by the unemployed and persons on part time for economic reasons as a percent of potentially available labor force man-hours.

<sup>4</sup> Unemployment by occupation includes all experienced unemployed persons, whereas that by industry covers only unemployed wage and salary workers.

<sup>&</sup>lt;sup>5</sup> Includes mining, not shown separately.

I Vietnam Era veterans are those who served after August 4, 1964. At present, of the Vietnam Era veterans of all ages, 73 percent are 20 to 29 years of age and 17 percent are 30 to 34 years of age. Post-Korean-peacetime veterans are not included in this table.

table.

2 Since seasonal variations are not present in the population figures, identical numbers appear in the unadjusted and seasonally adjusted columns.

Data relate to production workers in mining and manufacturing: to construction workers in contract construction: and to nonsupervisory workers in transportation and public utilities; wholesale and retail trade; finance, insurance, and real estate; and services. These groups account for approximately four-fifths of the total employment on private nonagricultural payrolls.

p = preliminary.

Finance, insurance, and real estate.	135.4	138.5	139.5	140.9	140.9	142.7	142.4	5.2	2			
Services	140.7	144.7	146.3	147.3	146.9	148.6	149.6	6.3	.6			

<sup>1/</sup> Percent change was -0.6 from September 1972 to September 1973, the latest month available.
2/ Percent change was 0.5 from August 1973 to September 1973, the latest month available.
3/ Less than 0.05 percent.

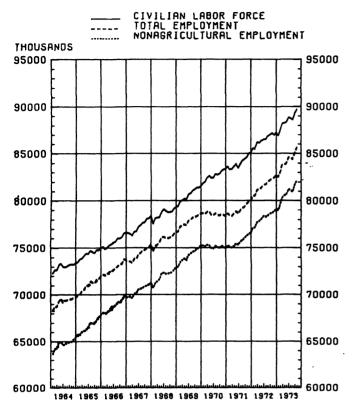

NOTE: All series are in current dollars except where indicated. The index excludes effects of two types of changes that are unrelated to underlying wage-rate developments: Pluctuations in overtime premiums in manufacturing (the only sector for which overtime data are available) and the effects of changes in the proportion of workers in high-wage and low-wage industries. The seasonal adjustment eliminates the effect of changes that normally occur at the same time and in about the same magnitude each year.

p= Preliminary.

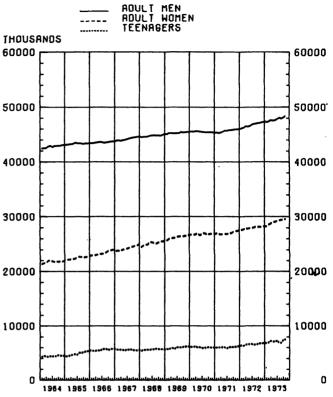

NA Indicates data are not available.

## LABOR FORCE, EMPLOYMENT, UNEMPLOYMENT HOUSEHOLD DATA - SEASONALLY ADJUSTED

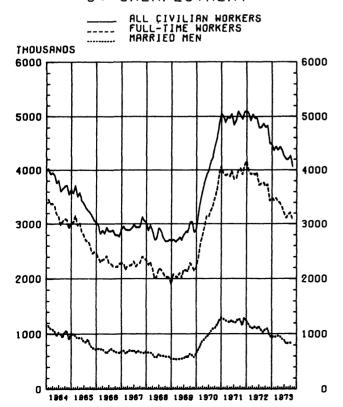

### 1. LABOR FORCE AND EMPLOYMENT

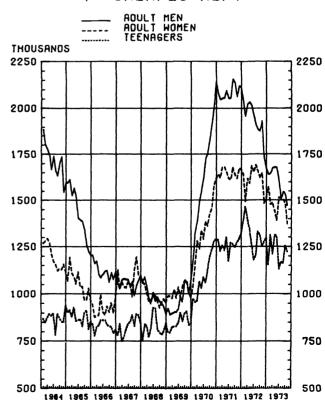

### 2. TOTAL EMPLOYMENT
