FOR RELEASE: 10:00 A. M. (EDT)
Friday, July 2, 1976

THE EMPLOYMENT SITUATION: JUNE 1976
Unemployment rose in June, and total employment declined slightly, it was reported today by the Bureau of Labor Statistics of the U. S. Department of Labor. The Nation's overall unemployment rate was 7.5 percent, up from 7.3 percent in May and on a par with rates recorded between February and April.

Total employment--as measured by the monthly survey of households--was 200,000 below the May level. Nonagricultural payroll employment-as measured by the monthly survey of establishments--continued unchanged in June. However, both surveys have shown very large employment gains from 1975 recession lows: 3.4 million for total employment and 2.6 million for nonfarm payroll employment.

## Unemployment

The number of unemployed persons increased by 280,000 in June to 7.1 million, seasonally adjusted. The rate of unemployment for all workers in June was 7.5 percent, up from 7.3 percent in May and back to the rates that prevailed from February to April. (See table A-1.)

Unemployment among teenagers changed about in line with seasonal expectations from May to June, as the usual large numbers entered the labor force in search of jobs after the closing of schools. However, on a seasonally adjusted basis, there was an increase among adult men, whose rate of unemployment rose 0.4 percentage point to 6.0 percent. There was also a rise in unemployment among adult women, as their rate moved from 6.8 to 7.1 percent. Unemployment among heads of households, especially among male family heads, increased in June, as did the rates for married men and full-time workers. The jobless rate for black workers rose to 13.3 percent, while the rate for white workers was little changed at 6.8 percent. Over-the-month movements were generally mixed among the major industry and occupational groups, but there were large jobless
rate increases for construction workers and blue-collar craft workers. (See table A-2.)
The average duration of unemployment increased by nearly 2 weeks in June to 16.9 weeks, about equal to the high reached last December. The number unemployed 27 weeks and longer rose by 130,000 in June to 1.3 million. (See table A-4.)

Table A. Highlights of the employment situation (seasonally adjusted data)

The number of persons working part time for economic reasons--full-time workers who are on part-time schedules due to such reasons as slack work or the inability to find full-time work--declined by 300,000 in June to 3.1 million, after fluctuating between 3.2 and 3.4 million since last summer. (See table A-3.)

## Total Employment and the Labor Force

Total employment edged down in June, following increases totaling 1 million in the prior 2 months. The May-June change was characterized by continuing strong gains among adult women, offset by declines among teenagers and adult men. Adult female employment rose 180,000 in June to 31.8 million, 1.6 million above the level of a year earlier. Adult male employment fell 200,000 over the month but was still up 1.2 million from last June. Teenage employment declined by 170,000 in June to 7.3 million, 280,000 above a year earlier.

The total civilian labor force was essentially unchanged in June at 94.6 million. Labor force growth among adult women was offset by a decline among teenagers, as the adult male labor force was about unchanged over the month. Since June a year ago, the labor force has grown by 2.1 million workers- $-700,000 \mathrm{men}, 1.3$ million women, and 100,000 teenagers.

## Discouraged Workers

Discouraged workers are persons who want work but are not looking for jobs because they believe they cannot find any. They do not meet the labor market test--that is, they are not engaged in active job search--and therefore are classified as not in the labor force. These data are published on a quarterly basis.

The number of discouraged workers, which had been declining since last fall, held about steady during the second quarter of 1976. At 900,000 , their number was 250,000 below the third quarter 1975 peak level. Virtually all of this decrease was among those citing job market factors as the reason for their discouragement. (See table B.)

Table B. Discouraged workers, seasonally adjusted quarterly averages

| Characteristic | 1974 |  | 1975 |  |  |  | 1976 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | III | IV | 1 | I I | III | IV | I | II |
| Total. | 625 | 839 | 1,059 | 1,116 | 1,160 | 997 | 937 | 905 |
| Job market factors ${ }^{1}$ | 422 | 592 | 839 | 817 | 947 | 849 | 630 | 627 |
| Personal factors ${ }^{\text {c }}$. | 203 | 247 | 220 | 299 | 213 | 148 | 307 | 278 |

$1_{\text {Job market }}$ factors include "could not find job" and "thinks no job available."
${ }^{2}$ Personal factors include "employers think too young or old," "lacks education or training," and "other personal handicap."

Industry Payroll Employment
Total nonagricultural payroll employment was 79.0 million in June, seasonally adjusted, virtually the same level as in April and May. Payroll employment had grown by 2.6 million between the June 1975 recession low and April of this year. Of the 172 industries comprising the BLS diffusion index of nonagricultural payroll employment, only two-fifths posted employment gains in June, down from nearly two-thirds in the prior month. (See table B-1 and B-6.)

Employment in manufacturing fell slightly in June, as it had in May. Also as in May, most of the decline took place in the nondurable goods industries. Prior to the April-June decline, factory jobs had posted a 900,000 increase from the July 1975 low. Contract construction employment was about unchanged in June at 3.4 million, a level that has prevailed since early last year.

Within the service-producing sector, small over-the-month gains took place in services, trade, and finance, insurance, and real estate. The increase in finance resulted from the settlement of a strike. Employment growth in State and local government appears to have slowed over the past 2 months.

## Hours

The average workweek for all production or nonsupervisory workers on private nonfarm payrolls fell 0.2 hour in June, returning to the April level of 36.1 hours
(seasonally adjusted). All industry divisions with the exception of manufacturing declined over the month. Manufacturing hours were unchanged at 40.2 hours, while factory overtime edged down 0.1 hour to 3.1 hours in June. Both the factory workweek and overtime hours have remained strong during the first half of 1976 and were up 1.4 and 0.8 hours, respectively, over their lows reached in early 1975. (See table B-2.)

Due largely to the decline in average hours, the index of aggregate hours of private nonagricultural production or nonsupervisory workers fell by 0.6 percent to 110.7 (1967=100). The aggregate factory index also dropped, by 0.7 percent to 93.9 in June. Since the March 1975 low, however, the index of factory hours has risen by

```
8.7 percent. (See table B-5.)
```

## Hourly and Weekly Earnings

Average hourly earnings of production or nonsupervisory workers on private nonagricultural payrolls were unchanged from the May level of $\$ 4.83$ (seasonally adjusted), but were up 7.1 percent over the last 12 months. Reflecting the drop in weekly hours, average weekly earnings fell 0.6 percent over the month. Since June a year ago, however, weekly earnings have risen by 7.4 percent.

Before adjustment for seasonality, average hourly earnings went up by 1 cent to \$4.83. Since last June, actual hourly earnings have increased by 32 cents. Weekly earnings in June averaged $\$ 175.81$, an increase of $\$ 1.33$ from May and $\$ 12.10$ over the year. (See table B-3.)

The Hourly Earnings Index
The Hourly Earnings Index--earnings adjusted for overtime in manufacturing, seasonality, and the effects of changes in the proportion of workers in high-wage and low-wage industries--was $184.2(1967=100)$ in June, 0.3 percent higher than in May. The index was 7.0 percent above June a year ago. During the 12 month period ended in May, the Hourly Earnings Index in dollars of constant purchasing power rose 1.5 percent. (See table B-4.)

This release presents and analyzes statistics from two major surveys. Data on labor force, total employment, and unemployment are derived from the sample survey of households conducted and tabulated by the Bureau of the Census for the Bureau of Labor Statistics. Statistics on payroll employment, hours, and earnings are collected by State agencies from payroll records of employers and are tabulated by the Bureau of Labor Statistics. Unless otherwise indicated, data for both series relate to the week of the specified month containing the $\mathbf{1 2 t h}$ day. A description of the two surveys appears in the BLS publication Employment and Earnings.

1 Data relate to production workers in mining and manufacturing: to construction workers in contract construction ad to nonsupervisory workers in transportation and public utilities; wholesale and retail trade; finance, insurance, and real estate; and services. These groups account for approximately four-fifths of the total employment on private nonagricultural payrolls.
$\mathrm{p}=$ preliminary.

1 See footnote 1, table B-2.
2 Percent change was 1.5 from May 1975 to May 1976, the latest month available.
3 Percent change was 0.2 from April 1976 to May 1976, the latest month available.
N.A. $=$ not available.
$\mathrm{p}=\mathrm{preliminary}$.
NOTE: All series are in current dollars except where indicated. The index excludes effects of two types of changes that are unrelated to underlying wage-rate developments: Fluctuations in cver time premiums in manufacturing \{the only sector for which overtime data are available) and the effects of changes in the proportion of workers in high-wage and low-wage industries.

16. AVERAGE WEEKLY OVERTIME HOURS IN MANUFACTURING

NOTE: Charts 14 and 15 relate to production or nonsupervisory workers; chart 16 relates to production workers. Data for the 2 most recent months are preliminary in charts 13-16.

[^0]:    ${ }^{1}$ Seasonal variations are not present in the population figures; therefore, identical numbers appear in the unadjusted and seasonally adjusted columns.

[^1]:    Unemployment rate calculated as a percent of civilian labor force.
    2 Aggregate hours lost by the unemployed and persons on part time for economic reasons as a percent of potentially available labor force hours.
    3 Unemployment by occupation includes all experienced unemployed persons, whereas that by industry covers only unemployed wage and salary workers.
    4 Includes mining, not shown separately.
    5 Vietnam-era veterans are those who served between August 5, 1964, and April 30, 1975.
    cocorrected.
