THE EMPLOYMENT SITUATION: NOVEMBER 1994

Employment expanded further in November and unemployment continued to fall, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. The unemployment rate, at 5.6 percent, was down 0.2 percentage point over the month and has declined by 1.1 points since January. Nonfarm payroll employment rose by 350,000 in November, with noteworthy gains in the services, construction, and manufacturing industries. Average hourly earnings in the private sector decreased slightly, following a marked rise in October.

Unemployment (Household Survey Data)

Both the number of unemployed persons and the unemployment rate declined in November. At 5.6 percent, the jobless rate has fallen by half a percentage point since August and by 1.1 points since January. The number of persons unemployed has dropped by 1.4 million since January to 7.3 million. (See table A-1.)

The unemployment rates for adult men (4.9 percent) and teenagers (15.3 percent) declined over the month. Adult women's jobless rate was unchanged at 5.0 percent, after falling 0.3 percentage point in the prior month.

Data from the household survey for 1994 are not directly comparable with data for 1993 and earlier years because of the implementation in January 1994 of a major redesign of the survey and the introduction of 1990 census-based population controls, adjusted for the estimated undercount. In addition, the 1994 data may be affected by the transition to the redesigned survey. For example, seasonal factors, of necessity, have been computed based on data collected in the survey prior to its revision, and these factors may not fully capture the pattern of seasonality in the current data. Hence, over-the-month comparisons of labor force estimates should be made with caution. For additional information on the redesign, see "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of Employment and Earnings.

In accordance with usual practice, the release of December data on January 6, 1995, will incorporate annual revisions in seasonally adjusted unemployment and other labor force series. Because of the survey changes described above, only seasonally adjusted data for the most recent year will be recomputed.

NOTE: Household data for 1994 are not directly comparable with data for 1993 and earlier years. For additional information, see "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of Employment and Earnings.

Rates for whites (4.8 percent), blacks (10.5 percent), and Hispanics (8.6 percent) were all down from their October levels. (See tables A-1 and A-2.)

Total Employment and the Labor Force (Household Survey Data)

Total employment rose by 372,000 in November to a seasonally adjusted level of 124.6 million. Employment has grown sharply since July, and, as a result, the employment-population ratio--the proportion of the working-age population with jobs--has risen nearly a full percentage point to 63.1 percent. (See table A-1.) About 7.5 million persons (not seasonally adjusted), or 6.0 percent of all employed persons, held more than one job in November (table A-8). The number of persons working part time even though they would have preferred full-time work was unchanged at 4.4 million (table A-3).

The civilian labor force, at 131.9 million, was little changed in November, after seasonal adjustment. The labor force participation rate, at 66.8 percent, remained at a very high level and has risen half a percentage point since July. (See table A-1.)

Persons Not in the Labor Force (Household Survey Data)

The number of persons with a marginal attachment to the labor force--those who wanted and were available for work but were no longer actively looking after having searched for work sometime during the past 12 months--was 1.7 million (not seasonally adjusted) in November. Of that total, the number of discouraged workers--persons who were not looking because they felt there were no jobs available for them--was 447,000. (See table A-8.)

Industry Payroll Employment (Establishment Survey Data)

Total nonfarm payroll employment climbed by 350,000 in November to 114.7 million, seasonally adjusted. The bulk of this increase occurred in three industries--services, construction, and manufacturing. (See table B-1.) Since January, the number of payroll jobs has expanded by 3.0 million.

An unusually large amount of the November job gain took place in the goods-producing industries. After showing little change in October, the construction industry added 71,000 jobs, with growth occurring in all three of its component industries--special trade contractors, general building contractors, and heavy construction. The return of some construction workers in the Southeast who were unable to work during the heavy and prolonged October rains added to the November total. Also, the November survey likely recorded fewer seasonal layoffs than normal, because the reference week--the week containing the 12th of the month--occurred very early (November 6-12). Mining employment continued to edge down in November, reflecting further job losses in oil and gas extraction.

Manufacturing employment increased by 51,000 in November, following an advance of nearly this magnitude in October. November gains were widespread in the durable goods industries, with the largest in industrial machinery, electronic equipment, fabricated metals, and lumber and wood products. Within nondurables, gains in food processing and in rubber and plastics were partially offset by losses in apparel, which continued its slow, long-term employment decline. The number of factory jobs has risen by 255,000 since reaching a low in September 1993.

Employment in the services industry rose by 147,000 over the month. Nearly two-thirds of the advance took place in business services, largely in personnel supply. In contrast, health services had a smaller-than-usual employment increase, while hotels and other lodging places continued a string of job losses that began in August.

Retail trade employment edged up by 25,000 (on a seasonally adjusted basis) in November. This total reflected gains in building materials and garden supply stores, food stores, and automotive dealers. These gains were partially offset by declines in apparel and other specialty retailers and in general merchandise stores; the early timing of the survey reference week most likely failed to capture some of the typical November holiday buildup in these seasonal retail industries. Wholesale trade employment rose only slightly (9,000) in November; this industry, however, has added about 140,000 jobs over the past 12 months.

The transportation industry added 18,000 jobs in November; most of the increase occurred in trucking and warehousing. The real estate industry also added workers, while job losses continued in nondepository financial institutions (such as mortgage banking) and the insurance industry. A small gain in local government employment mostly reflected the hiring of temporary workers for the November elections.

Weekly Hours (Establishment Survey Data)

The average workweek for production or nonsupervisory workers on private nonfarm payrolls declined by 0.3 hour in November, returning to its September level of 34.6 hours, seasonally adjusted. The average manufacturing workweek and factory overtime held steady at 42.1 and 4.7 hours, respectively. Both remain at extremely high levels. (See table B-2.)

As a result of the decrease in hours, the index of aggregate weekly hours of private production or nonsupervisory workers on nonfarm payrolls was down 0.5 percent to 130.5 (1982=100) in November, seasonally adjusted. The manufacturing index rose by 0.3 percent to 106.7. (See table B-5.)

Hourly and Weekly Earnings (Establishment Survey Data)

Average hourly earnings of private production or nonsupervisory workers slipped 2 cents in November to \$11.22, seasonally adjusted, following a 7-cent rise in October (as revised). The 2-month gain of 5 cents was about in line with the trend over the past year. Average weekly earnings decreased by 1.0 percent in November to \$388.21. Over the year, both hourly and weekly earnings increased by 2.6 percent. (See table B-3.)

The Employment Situation news release for December 1994 will be released on Friday, January 6, 1995, at 8:30 A.M. (EST). Release dates for the balance of 1995 are as follows:

1/ The population figures are not adjusted for seasonal variation; therefore, identical numbers appear in the unadjusted and seasonally adjusted columns.

2/ Data for 1994 are not directly comparable with data for 1993 and earlier years. For additional information, see "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of Employment and Earnings.

NOTE: Detail for the above race and Hispanic-origin groups will not sum to totals because data for the "other races" group are not presented and Hispanics are included in both the white and black population groups.

1/ Unemployment as a percent of the civilian labor force.

2/ Data for 1994 are not directly comparable with data for 1993 and earlier years. For additional information, see "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of Employment and Earnings.

HOUSEHOLD DATA

Table A-8. Persons not in the labor force and multiple jobholders by sex, not seasonally adjusted

(Numbers in thousands)

Category	November 1994		
	Total	Men	Women
NOT IN THE LABOR FORCE			
Total not in the labor force.....	65,738	23,755	41,983
Persons who currently want a job.....	5,411	2,151	3,260
Searched for work and available to work now1/.....	1,674	818	855
Reason not currently looking:			
Discouragement over job prospects2/.....	447	277	171
Reasons other than discouragement3/.....	1,226	542	685
MULTIPLE JOBHOLDERS			
Total multiple jobholders4/.....	7,475	4,068	3,407
Percent of total employed.....	6.0	6.0	5.9
Primary job full time, secondary job part time.....	4,384	2,685	1,700
Primary and secondary jobs both part time.....	1,702	537	1,165
Primary and secondary jobs both full time.....	241	174	67
Hours vary on primary or secondary job.....	1,103	649	454

1/ Data refer to persons who have searched for work during the prior 12 months and were available to take a job during the reference week.

2/ Includes thinks no work available, could not find work, lacks schooling or training, employer thinks too young or old, and other types of discrimination.

3/ Includes those who did not actively look for work in the prior 4 weeks for such reasons as child-care and transportation problems, as well as a small number for which reason for nonparticipation was not determined.

4/ Includes persons who work part time on their primary job and full time on their secondary job(s), not shown separately.

1/ Data relate to production workers in mining and manufacturing; construction workers in construction; and nonsupervisory workers in transportation and public utilities; wholesale and retail trade; finance, insurance, and real estate; and services. These groups account for approximately four-fifths of the total employees on private nonfarm payrolls.

2/ These series are not published seasonally adjusted since the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.

p = preliminary.
