

SURVEY OF CURRENT BUSINESS

WEEKLY SUPPLEMENT

UNITED STATES DEPARTMENT OF COMMERCE
BUREAU OF FOREIGN AND DOMESTIC COMMERCE

WASHINGTON, D. C., OCTOBER 10, 1940

SUMMARY OF BUSINESS TRENDS

EXCEPT for department-store sales, major indexes of business activity pressed upward. The erratic changes in department-store sales in the one week ended September 28 cannot be judged significant, as consumer purchasing power remains at a high level. In production no abatement in activity was evident in the last week of the month. Automobile output rose above 20,000 units daily; bituminous coal production was up; electric power output reached a new high; lumber was higher. Steel-ingot production advanced last week and is currently scheduled at 94.2 percent of capacity—a mark surpassed only once last fall. Heavy shipments of coal in the final period in September raised freight carloadings, and though the gain for the week was smaller than in the corresponding week last year, the total for the month bettered the 1939 figure.

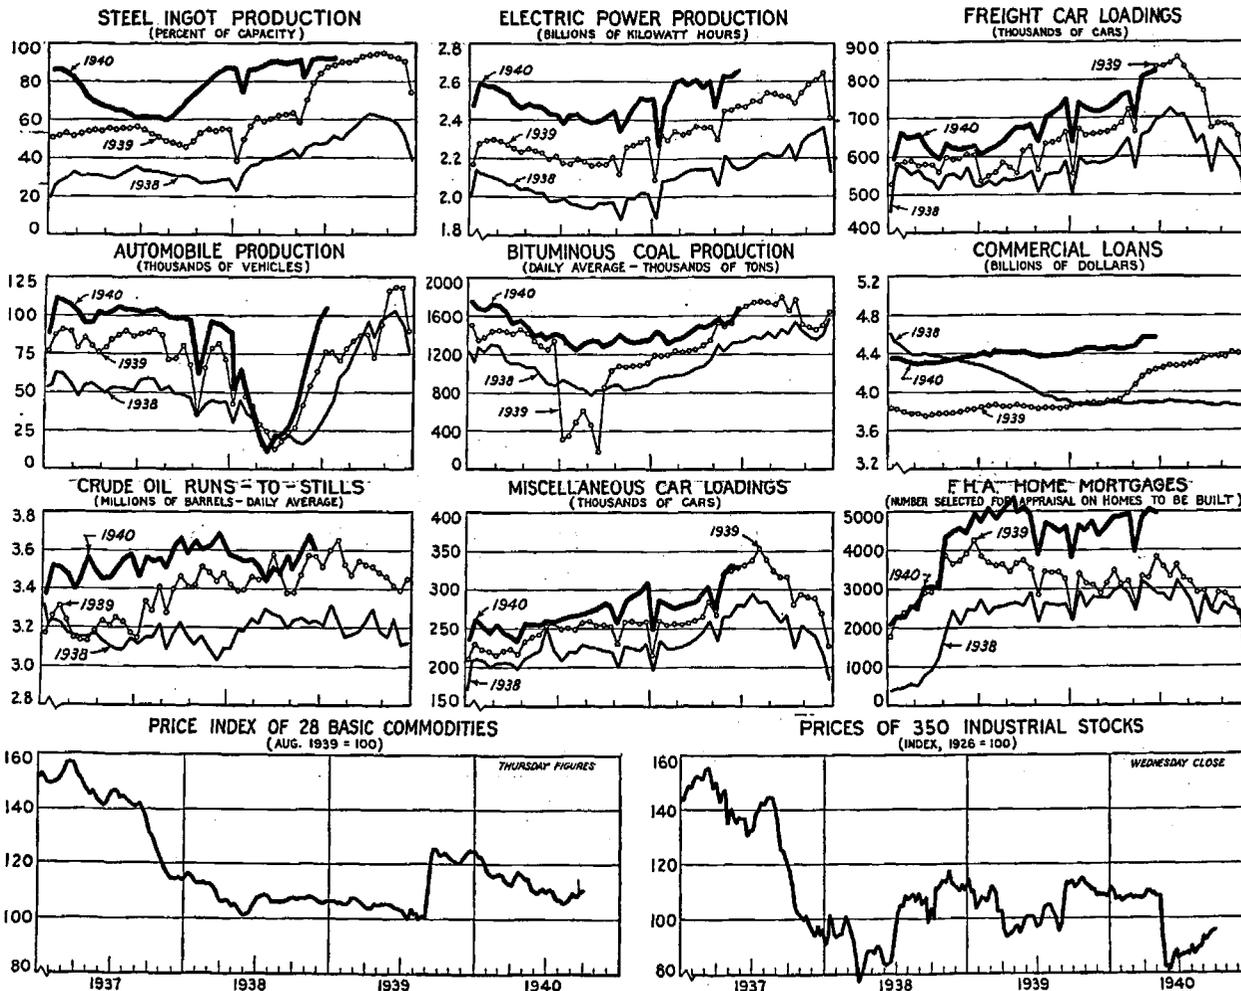

During the week the average price of the 28 commodities in the Bureau of Labor Statistics' spot commodity index held relatively stable. Only domestic agricultural commodities showed any definite tendency to advance—about 1 percent in the week. Raw industrial commodities fluctuated upward but closed the week unchanged. Metal prices were firm but did not rise, though sales in principal markets were heavy. Substantially above the

August totals, copper and zinc sales exceeded the highs of last September by a considerable margin. The 9-week average steel scrap prices slowed during the week as the Iron Age composite prices advanced only slightly to \$20.62.

Accompanying moderately heavier trading in the past week, stock and bond prices recovered from the minor setback of the preceding week. By the end of the week industrial stocks and bonds moved into the highest ground in the Dow-Jones averages since the slump in May. Railroad stocks moved in a parallel fashion, but utility shares have remained relatively unchanged since early July.

The decline in the total volume of construction contract awards so far as data are available for September is entirely the result of a slackening in the public works and utility fields—particularly the publicly-financed component. Residential contract awards again registered a more-than-seasonal gain through the middle of the month, and F. H. A. mortgages selected for appraisal were running ahead of August at the month-end. Nonresidential construction declined less than seasonally, according to part-month data.

* Data for August are the latest available.

† Not reported.

* Revised.

† Data for December 1939, March, June, and August 1940, are for 5 weeks; other months, 4 weeks.

† Revised series. Data on pig iron and steel ingot production have been converted from a long to a short tonnage basis. Revised data on pig iron beginning 1913 will appear in the October Survey and data for steel ingots beginning 1913 are shown in table 26, p. 17, of the May 1940 Survey.

U. S. GOVERNMENT PRINTING OFFICE: 1940
