

# SURVEY OF CURRENT BUSINESS WEEKLY SUPPLEMENT

UNITED STATES DEPARTMENT OF COMMERCE BUREAU OF FOREIGN AND DOMESTIC COMMERCE

WASHINGTON, D. C., JULY 31, 1941

#### SUMMARY OF BUSINESS TRENDS

INCOME and employment continue to move upward with the rising volume of general business activity. Monthly income payments, adjusted for seasonal variations, established another record during June—the adjusted index (1935-39=100) moving to 131 compared with 128 in May and a monthly average of 122 in 1929. The rise was strongly implemented by an advance of almost 6 percent in factory pay rolls during the month.

Nearly one-half million additional workers found employment in

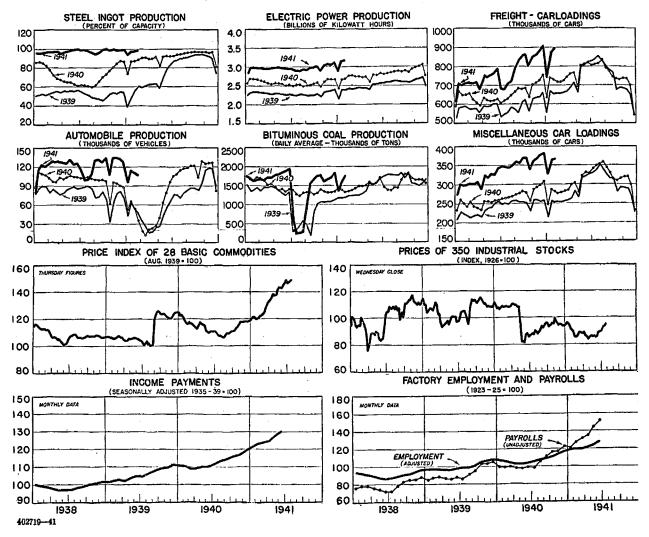

Nearly one-half million additional workers found employment in nonagricultural pursuits during June as total employment of this type reached a new peak of 38.8 million workers—3 million above the total at the start of the defense program a year ago. Strong gains in factory and trade employment, together with the usual seasonal increase in the construction field, accounted for most of the June rise. Factory employment registered the largest gain on a seasonally adjusted basis since the defense program began Increases in defense industries, combined with another substantial rise in nondurable goods employment, lifted the adjusted index (1923–25=100) to 128.4 from 124.8 in the previous month.

Recent price developments reflect the growing pressure on supplies stemming from defense demands, combined with those generated by rising employment and incomes. Increases in wholesale prices during the first 3 weeks of July were particularly widespread. With the exception of foodstuffs, which had already risen sharply in previous months, all subgroups in the Bureau of Labor Statistics' broad index of wholesale prices advanced over the period. Further increases are indicated by the sharp advance in basic commodity prices in the week ending July 25. In this most recent week, the Bureau of Labor Statistics' sensitive index of 28 basic commodity prices (August 1939=100) rose to a new high of 151.2. While the advances extended to all commodity groups, import prices were pushed into a position of leadership by military and political developments in the Far East. Silk, rubber, and tin prices were substantially higher. The Office of Price Administration and Civilian Supply announced that it would place a ceiling price on silk at \$3.04 a pound.

would place a ceiling price on silk at \$3.04 a pound.

In the security markets, prices have continued the advances begun in June. The Dow-Jones average of 65 stocks has risen more than 2 points since the beginning of July, and trading volumes have been somewhat larger. The chief gains have been made by industrial shares, the index closing at 129 on July 26, compared with 123 at the beginning of the month.
