## MIMBER BANK EAFINGS, FIROT HALF OF 1956

Net profits after taxes for the first six months of 1956 were $\$ 546$ million, $\$ 62$ million higher than for the first half of 1955, according to preliminary tabulations of member bank earrings reports. On an annual basis, the ratio of net profits to average total capital accounts increased from 7.9 per cent to 8.4 per cent.

An increase of $\$ 372$ million in gross earnings was largely offset by greater expenses, charge-offs, and provisions for taxes. The larger earnings were primarily from increased earnings on loans. During the first half of 1956, both the average volume of loan holdings and the average rate of return were higher. In contrast, average holdings of United States Government obligations declined but, due to a higher rate of return, carnings thereon were practically unchanged.

The net of losses, recoveries, profits, etc., was a loss of $\$ 164$ million, approximately twice that of the first six months of 1955. Taxes on net income increased \$33 million.

Cash dividends declared amounted to $\$ 253$ million, $\$ 21$ million higher than for the first half of 1955. This was a 46 per cent distribution of net profits after taxes and an approximate annual yield of 3.9 per cent on average total capital accounts, compared with 48 per cent and 3.8 per cent, respectively, in the first half of 1955.
(In millions of dollars; first half 1956 preliminary)
