\& EOON

(For Immediate Release) February 15, 1961
MEMBER BANK EARNINGS, 1960
Preliminary figures on member bank earnings indicate that net current earnings before income taxes were $\$ 3,268$ million, an increase of $\$ 333$ million over last year. Net profits after taxes were $\$ 1,686$ million or $\$ 429$ million larger and the ratio of net profits to average total capital accounts rose from 7.9 per cent in 1959 to 10.0 per cent in 1960.

Earnings on loans rose $\$ 700$ million as a result of larger average holdings and higher average interest rates and accounted for most of the increase in gross current operating earnings. Earnings on U. S. Government securities rose slightly as a higher average rate of return on these investments offset a substantial decline in average holdings. Earnings on loans rose more sharply during the first half, while earnings on U. S. Government securities rose in the second half after a slight decline in the first half of 1960. Expenses rose $\$ 504$ million or 10 per cent over a year ago.

The net effect of security transactions, other profit and loss adjustments, and changes in valuation reserves was a loss of $\$ 344$ million, compared to $\$ 904$ million in 1959.

Provisions for income taxes amounted to $\$ 1,239$ million, $\$ 464$ million more than last year, reflecting both the increase in net current earnings and the smaller net loss on nonoperating transactions.

Cash dividends declared amounted to $\$ 731$ million, representing a distribution of 43 per cent of net profits after taxes and an approximate yield of 4.3 per cent on average total capital accounts.
