# District totals and summary figures by months 

## Revised Series

Beginning with the monthly debits release for March 1953, the bank debits series was revised; the major revision was to eliminate debits to United States Government accounts and to time deposit accounts. The figures in this release are comparable with data shown in current releases and provide an overlap of total figures for 10 years. Revised monthly figures for each center for 1952 were shown in a previous release.

In addition to showing monthly estimates by districts and for all centers in total, the tables in this release reflect the revised breakdown of the national series. New York City continues to be shown separately, but totals for the two new groupings of 6 centers (Boston, Philadelphia, Chicago, Detroit, San Francisco, and Los Angeles) and 338 other centers replace the series for 140 centers and 201 other centers. Separate figures are also shown for each of the cities included in the 6 center group. The tables reflect the net addition of three cities and the addition of reporting banks made when the series was revised.

A description of the revised bank debits series appeared in the April 1953 issue of the Federal Reserve Bulletin.

## Definition

The revised series includes debits or charges to demand deposit accounts of individuals, partnerships, and corporations, and of State and local governments, and payments from trust funds on deposit in the banking department. The revised series excludes debits to United States Government deposit accounts, debits to time deposit accounts, and (like the former series) payments of certified and officers' checks, payments in settlement of clearing house balances, charges to expense and miscellaneous accounts, corrections and similar charges, and debits to the accounts of other banks, that is, to interbank accounts.

## Rates of Turnover

Annual rates of turnover are shown by years and by months for New York City, the 6 center group, and the 338 other centers combined; annual rates of turnover are shown for other groupings.
