DECEMBER 1962

FOREWORD

This geographical distribution of bank deposits in the United States by counties, States, Federal Reserve districts, and standard metropolitan areas was compiled through the cooperation of The Federal Deposit Insurance Corporation, The Federal Reserve Banks, and the State bank supervisory authorities. The Board of Governors of the Federal Reserve System and the Federal Reserve Banks obtained the data for member banks, the Federal Deposit Insurance Corporation obtained those for nonmember banks, and State bank supervisory authorities cooperated in obtaining data for noninsured banks. Final tabulations were made at the Board's offices.

The main body of the report shows the demand and time deposits of individuals, partnerships, and corporations and total deposits in all banks in the United States, (commercial and mutual savings) by counties, States, and Federal Reserve districts, on June 30, 1962. In addition there are two supplementary sections: (1) a tabulation of the total deposits and time deposits of individuals, partnerships, and corporations in mutual savings banks by counties, States, and Federal Reserve districts, and (2) a tabulation of the demand and time deposits of individuals, partnerships, and corporations and of total deposits in all banks by standard metropolitan statistical areas, as defined by the Bureau of the Census in 1961. Data for deposits of individuals, partnerships, and corporations by counties as of December 31, 1947, June 30, 1949, December 30, 1950, June 30, 1952, June 30, 1954, June 30, 1956, June 23, 1958, and June 15, 1960, are contained in pamphlets previously published by the Board. Future publications are contemplated on a biennial basis as of midyear call dates.

Deposits of branches located outside of the county of the head office, or outside the metropolitan areas, have been included with figures for the counties or areas in which the branches are situated, rather than with those for the area of the head office. Because of these adjustments, the totals for various counties, States, and Federal Reserve districts may not agree with other tabulations classifying deposits by counties, States, and Federal Reserve districts. In addition minor differences may occur between the State and Federal Reserve district figures on this pamphlet and other published data because of the rounding of each county's figures to the nearest hundred dollars and compiling State and Federal Reserve district totals from these rounded figures.

Deposit schedules were revised in 1961 to include, in deposits of individuals, partnerships, and corporations, amounts due to foreign governments and official institutions; deposits in the new foreign official category had previously been reported largely as foreign interbank, as described on pp. 654-656 of the June 1961 issue of the Federal Reserve Bulletin. Also, because data were reported by individual banking offices as of June 30, 1962, some counties are not entirely comparable with data previously collected. For example, some branch banking systems with centralized accounting methods did not allocate certain deposits to individual branches, whereas estimated allocations by counties had previously been furnished.

The numeral following the name of each State, or portion thereof, identifies its Federal Reserve district.

New York City has been treated as a single county. Cities not part of any county have been treated as separate counties and have been indicated by the word "City" after the name. Counties in which there are no deposits have been listed and the figure columns left blank. Figures for a few banking institutions were not available.
