<sup>1</sup> Demand balances with domestic banks, except private banks and American branches of foreign banks, plus cash items in process of collection. The difference between the figures shown in this column and the figures shown against the corresponding captions under "Assets" is accounted for by an excess of allowable deductions over gross demand deposits at a number of banks.

<sup>2</sup> Reserves actually required are based on deposits at opening of business. The figures in this column, therefore, represent the reserves required to be maintained on the business day following the call date. Pursuant to the provisions of law, the Board of Governors of the Federal Reserve System prescribed the following requirements as to reserves to be maintained by each member bank effective at the opening of business April 16, 1938: Time deposits—5 percent for all member banks; Net demand deposits—22½ percent for Central Reserve city banks, 17½ percent for Reserve city banks and 12 percent for Country banks.

<sup>3</sup> Based on member banks' books. These figures differ from those shown by the Federal Reserve banks' books because of a lack of synchronization of entries on the books of the Federal Reserve banks and the member banks.

<sup>4</sup> "Gross demand deposits" and "Deductions", as shown in this table but not elsewhere, exclude uninvested trust funds and balances due from banks, respectively, reported by one bank that has no commercial department.
