

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

For release in morning papers, Saturday, December 21, 1946

G.12.3

December 20, 1946

BUSINESS INDEXES

1939 average = 100 for factory employment and payrolls;
 1923-25 average = 100 for construction contracts;
 1935-39 average = 100 for all other series.

	Adjusted for seasonal variation			Without seasonal adjustment		
	1946		1945	1946		1945
	Nov.	Oct.	Nov.	Nov.	Oct.	Nov.
Industrial production						
Total	p182	181	168	p182	184	167
Manufactures						
Total	p190	188	173	p191	191	173
Durable	p214	213	191	p214	214	192
Nondurable	p171	168	158	p172	172	158
Minerals	p137	144	138	p135	146	134
Construction contracts, value						
Total	*	145	94	*	138	83

Department store sales, value	p273	257	222	p336	278	273
Department store stocks, value	*	237	165	*	267	179

p--Preliminary.

* Data not yet available.

Note:--Production, carloadings, and department store sales indexes based on daily averages. To convert durable manufactures, nondurable manufactures, and minerals indexes to points in total index, shown in Federal Reserve Chart Book, multiply durable by .379, nondurable by .469, and minerals by .152.

Construction contract indexes based on 3-month moving averages, centered at second month, of F. W. Dodge data for 37 Eastern States. To convert indexes to value figures, shown in Federal Reserve Chart Book, multiply total by \$410,269,000, residential by \$184,137,000 and all other by \$226,132,000.

Employment index, without seasonal adjustment, and payrolls index compiled by Bureau of Labor Statistics.

* Data not yet available.

1/ This series is currently based upon man-hour statistics for plants classified in the automobile and automobile parts industries and is designed to measure productive activity during the month in connection with assembly of passenger cars, trucks, trailers, and busses; production of bodies, parts, and accessories, including replacement parts; and output of nonautomotive products made in the plants covered. Recently the level shown by this series has been much higher relative to prewar than the level shown by factory sales of new passenger cars and trucks. The difference is accounted for in part by a sharp increase in production of replacement parts and by other changes in the composition of output. It appears, however, that the series overstates the current level of total output in these industries. Study is being made of production and man-hour statistics in an endeavor to arrive at a more accurate measure of overall production in these industries.
