

- RETALI FURNITGRE REPORT FOR OCTÖBER 19148

Total sqies at credit-granting furniture stores were 12 per cent lower in 'October than in the preceding;month, although some increase is customary during this periad. The decrease was attributable to a contraseasonal decline in instaliment sales partly offset by moderate gains in cash and charge-acicount sales. In comparison with year-ago data, however, both cash and charge-account sales continued to show decreases. Instalment, sales were also below the October 194. volume, the first year-to-year decrease in about three years.

Instalment accounts reçeitable were down slightly in october, but remained well above the year-agb level. Collections on instalment accounts were made somewhat more rapidly than in September, and the ratis of these collections to accounts outstanging on the first of the month moved up one point to 18 per cent. The average repayment period for instalment accoünts outstanding in October was 10 months, about two and one-half months longer than in the corresponding month of 1947.

Inventories incressed 5 per cent further in October, and were 17 per cent larger than those held by credit-granting retail furniture stores a year earlier. At the end of the month the dollar value of stocks was equal to about five months' supply at the current rate of sale.
