RETAIL FURNITURE REPORT FOR JUNE 1965

Instalment accounts receivable at reporting furniture stores showed a moderate increase from May to June, and continued about 5 per cent above the corresponding figure for last year. The collection ratio remained at 12 per cent of the first-of-month receivables, about the same rate as a year ago.

Charge account balances followed the usual seasonal pattern, and remained unchanged from the month-earlier and year-earlier figures.

Sales reports indicate a 3 per cent increase in instalment volume, which more than offset the small decline in charge account business. During the first half of 1965 total sales were 5 per cent larger than in the corresponding period of 1964, with the gain in cash and charge volume greater than in the instalment component.
