

Instalment accounts receivable at furniture, jewelry, and household appliance stores were larger at the end of June than a month earlier and substantially above year-ago: levels. The growth in furniture store accounts outstanding in June brought the end-ofronth figure to the hichest point reached since mid-1942.

Instalment accounts of furniture stores were liquidated at a more rapid rate in June than in any other month this year. The ratio of collections during June; to accounts outstanding on June 1 was unchanged from the hay figure of 20 per cent at jevelry stores, while at household appliance: stores the ratio declined from 34 to 32 per cent. For all three kinds of business, instalment accounts were collected less rapidly than in June 1947.
