DEPARTMENT STORE CREDIT - MARCH 1953

Instalment accounts outstanding at department stores showed little change during March. Balances outstanding at the end of the month were 1 per cent above the preceding month end, but were 28 per cent above March a year earlier. Collections on instalment accounts during the month amounted to 17 per cent of balances outstanding at the beginning of the month, 2 points above the February collection ratio, but 3 points below March last year.

Charge accounts outstanding declined slightly in March, a month during which these accounts usually show little change. Compared with a year ago, charge accounts outstanding were up 5 per cent. The charge-account collection ratio increased 5 points to 49 per cent in March, 1 point above a year ago.

Sales of all types increased sharply from February to March—cash sales by 28 per cent, charge-account sales by 31 per cent, and instalment sales by 20 per cent. The percentage distribution of sales indicates that credit sales in March increased slightly relative to cash sales in comparison with both a month ago and a year ago.
