G. 19

For release at 3 p.m. (Eastern Time)
October 6, 1995

CONSUMER INSTALLMENT CREDIT August 1995

Consumer installment credit outstanding increased \$9.1 billion in August after rising \$8.8 billion in July. Growth in automobile credit slowed in August, while revolving credit and the "other" component both expanded more rapidly.

MONTHLY CHANGE IN CREDIT OUTSTANDING¹

1. Covers most short- and intermediate-term credit extended to individuals that is scheduled to be repaid (or has the option of repayment) in two or more installments, excluding loans secured by real estate.
2. Comprises mobile home loans and all other installment loans not included in automobile or revolving credit, such as loans for education, boats, trailers, or vacations. These loans may be secured or unsecured.
3. Interest rates are annual percentage rates (APR) as specified by the Federal Reserve's Regulation Z. Interest rates for new-car loans and personal loans at commercial banks are simple unweighted averages of each bank's most common rate charged during the first calendar week of the middle month of each quarter. For credit card accounts, the rate for *all accounts* is the stated APR averaged across all credit card accounts at all reporting banks. The rate for *accounts assessed interest* is the annualized ratio of total finance charges at all reporting banks to the total average daily balances against which the finance charges were assessed (excludes accounts for which no finance charges were assessed). Finance company data are from the subsidiaries of the three major U.S. automobile manufacturers and are volume-weighted averages covering all loans of each type purchased during the month.
4. Includes retailers and gasoline companies.
5. Outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originators.
6. Includes estimates for holders that do not separately report consumer credit holding by type.
r = revised. p = preliminary.
