Release THE CDVFRNGEGOF THE BUREAU OF THE CENSUS Statistical December 31, 1942 NfETRUKGiYsTEN

Copy I
In November 1942, the number of new passenger cars financed by sales finance companies was off 42 percent from the number in October of this year, according to an announcement released today by J. C. Capt, Director of the Census. The dollar volume of paper acquired in new passenger car financing was off 40 percent. In used passenger car financing, the number of cars decreased 16 percent, and the dollar volume of paper acquired, 17 percent. Compared with the preceding month, the number of new commercial cars financed was 24 percent less in November and the dollar volume of paper acquired, 16 percent. The number of used commercial cars financed decreased 23 percent, while the dollar volume of paper acquired was off 22 percent.

The volume of retail automotive outstandings held by sales finance companies was 13 percent less as of November 30, than as of October 31, 1942. The index was 157 at the end of November 1941 , but dropped to 44 at the end of this November.

OUTSTANDING BALANCES

Wholesale automotive paper acquired during November 1942 by saies finance companies declined 18 percent in volume from October of this year for new passenger and new commercial cars, while the volume for used passenger and used commercial cars fell off 51 percent. The volume of outstanding balances for this type of paper decreased 5 percent from October 31, 1942 to November 30, 1942.

A comparison of the retail diversified financing by sales finance companies during November 1942 with their respective volumes recorded in October of this year showed decreases for all types for which data are shown: 11 percent for radios and other musical instruments; 14 percent for furniture; 19 percent for other household appliances; 23 percent for residential building repair and modernization; and 26 percent for industrial, commercial, and farm equipment. The volume of wholesale diversified paper acquired in November was 43 percent below that reported for October.

As of November 30, 1942, compared with October 31, 1942 , the volume of diversified outstanding balances held by sales finance companies decreased 7 percent for the retail financing of other consumers' goods; 42 percent for industrial, commercial, and farm equipment; and 29 percent for wholesale diversified financing (other than automotive).

The ratios of the paper acquired during November 1942 to the outstanding balances as of November 30, 1942 were 3 percent for retail automotive, 4 percent for wholesale automotive, l3 percent for wholesale - other than automotive, 4 percent for retail - other consumers' goods, and 4 percent for industrial, commercial, and farm equipment.

These data on the current trends of sales financing during November 1942 were based on reports from 250 sales finance companies, and the dollar volumes should not be used to measure the total amount of financing by all sales finance companies in the United States. The data are published as reported without adjustment for seasonal or price fluctuations. The figures presented in tables 5, 6, and 7 of this release are not comparable to those published for previous months since monthly reports have not been received each month from identical sales finance companies. All indexes for November were obtained by calculating the percent changes from October to November, as shown by data on reports for both months from the same sales finance companies, and by linking these percentages to the indexes previously derived for October 1942.

Financing" report previously published by the Bureau of the Census. Indexes as of December 31 for the years of 1939, 1940, and 1941 are based on figures reported by sales finance companies on a supplementary repart form which accompanied the regular monthly report form for January 1942. Indexes for 1942 are derived by calculating the percent changes of the outstanding balances reported by sales finance companies for each month from those reported by the same companies for the preceding month, and by linking these percentages to the indexes for the preceding month.

a/ Indexes are derived by calculating the percent changes in the number of cars financed by sales finance companies during each month from those financed by the same companies during the preceding month, and by linking these percentages to the indexes for the preceding month. The indexes for "Total retail automotive" are based on all figures reported for this item regardless of whether or not a breakdown could be supplied.
