## SALES FINANCE COMPANIES JANUARY 1945

Sales finance companies reported a decrease of 7 percent in the number of new passenger cars financed in January 1945 compared with the number financed the preceding month, and the dollar volume of paper acquired in this type of financing decreased 9 percent, according to an announcement released today by J. C. Capt, Director of the Census. A small (3\%) drop in the number of used passenger cars financed was reported, along with a small (3\%) decrease in the amount of paper acquired. Twenty-six percent fewer new commercial vehicles were financed in January 1945 than in December 1.944, and the value of this paper was 17 percent under that recorded for December. The number of used commercial vehicles was down 24 percent, and the dollar volume of such paper dropped 21 percent. Data contained in this report are based on a sample survey conducted by the Bureau of the Census.

The volume of ratail automotive outstandings held by sales finance companies on January 31,1945 was 4 percent less than that reported at the end of December 1944. The index for these outstandings, which dropped to 15 for the final month of 1944 , remained at 15 for the first month of 1945.

OUTSTANDING BALANCES
RETAIL AUTOMOTIVE FINANCING
INDEX DECENBER 31, $1939=100$

Of the wholesale automotive paper acquired by sales finance companies during January 1945, the volume for new passenger and commercial cars was 26 percent over that reported for December 1944, and the volume for used passenger and commercial cars rose 10 percent. Outstanding balances for this type of paper showed a slight (3\%) increase over that held at the end of December 1944.

For January 1945 compared with December 1944, in retail diversified financing,paper acquired on wholesale transactions (other than automotive) increased 171 percent, and paper in industrial, commercial, and farm equipment rose 38 percent. The financing of refrigerators and household appliances showed a gain of 21 percent, and paper on furniture, radios, and musical instruments rose 14 percent; while for residential building repairs and modernization a decrease of 13 percent was revealed.

Diversified outstanding balances held by sales finance companies at the end of January 1945 were increased 27 percent for wholesale-other than automotive and 16 percent for industrial, commercial, and farm equipment. Almost, no change was noted in outstandings for retail-other consumers' goods. The index for outstanding balances of all sales financing in January 1945 (table 1, page 2) showed no change from December 1944, but remained at 18.

Paper acquired during January 1945 was 53 percent of the outstanding balances as of January 31, 1945 for wholesale-other than automotive, 44 percent for wholesale automotive, 13 percent for retail automotive, 11 percent for retail-other consumers' goods, and 5 percent for industrial, commercial, and farm equipment.

These data on the current trends of sales financing during January 1945 were based on reports from 181 sales finance companies, and the dollar volumes should not be assumed to represent the total amount of financing by all sales finance companies in the United States. The data are published as reported, without adjustments for seasonal or price fluctuations. The figures presented in tables 4, 5, and 6 of this release are not comparable to those published for previous months, since monthly reports have not been received each month from identical sales finance companies. All indexes for January were obtained by calculating the percent changes from December 1944 to January' 1945 as shown by data on reports for both months from the same sales finance companies, and by linking these percentages to the

a/ Indexes as of December 31 for the years of 1939, 1940, and 1941 are based on figures reported by sales finance companies on a supplementary report form which accompanied the regular monthly report form for January 1942. Succeeding indexes are derived by calculating the percent changes of the outstanding balances reported by sales finance companies for each month from those reported by the same companies for the preceding month, and by linking these percentages to the indexes for the preceding month.

## Bureau of the Census

Current Statistical Service
a／Indexes are derived by calculating the percent changes in the number of cars financed or the volume of paper acquired by sales finance companies during each month from the number of cars financed or the volume of paper acquired by the same companies during the preceding month，and by linking these percentages to the indexes for the preceding month．The indexes for＂Total retail Automotive，＂＂Total wholesale auto－ motive，＂and＂Total retail，other consumers＇goods＂are based on all figures reported for these items re－ gardless of whether or not breakdowns could be－supplied．
