# BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

G.20

September 13, 1951

## SALES FINANCE COMPANIES

JULY 1951

Retail financing—Purchases of retail automotive instalment paper during July were 2 per cent below the volume of the preceding month, according to reports from a sample of sales finance companies. A decrease in the financing of used passenger cars was of major importance in the overall decrease in retail automotive volume. The financing of new passenger cars was unchanged from the previous month.

Outstanding balances of retail automotive paper showed a small increase during July, and at the month-end were 1 per cent above the level of June 30.

The total volume of other consumer goods paper acquired decreased 4 per cent in July. This change reflected declines in the purchases of all classes of other consumer goods paper excepting refrigerators and other household appliances, financing of which was unchanged from June.

A decrease of 2 per cent in outstanding balances of other consumer goods paper continued a steady downward movement which has been uninterrupted since September of last year.

## Retail Financing by Sales Finance Companies

Wholesale financing—Purchases of wholesale automotive paper during July were moderately below those of the preceding month. Wholesale automotive balances outstanding at the end of July were about 8 per cent below the level of June 30, whereas a gradual expansion of such balances had taken place in recent months.

The volume of wholesale financing of goods other than automobiles during July was relatively unchanged from the level of such activity reported in June. However, there was a further moderate decline in outstanding balances of nonautomotive wholesale paper in July.

NOTE. --July data, based on returns from lll sales finance companies, are compiled in the same manner as those shown in earlier reports. Aggregates represent only the totals for the reporting companies and, since the reporting sample is not identical from month to month, they are not comparable with totals of preceding months.

Indexes as of December 31 for the years of 1939, 1940, and 1941 are based on figures reported by sales finance companies on a supplementary report form which accompanied the regular monthly report form for January 1942. Succeeding indexes are derived by calculating the percentage changes of the outstanding balances reported by sales finance companies for each month from those reported by the same companies for the preceding month, and by linking these percentages to the indexes for the preceding month.

Table 2.--Relative Importance of Loans Made by Sales Finance Companies
During July 1951 and Outstanding Balances at End of Month

| Class of paper                 | Paper acc                              | •                   | Outstanding balances, end of month        |                     |
