## SALES FINANCE COMPANIES

JUNE 1952

Retail financing--Retail automotive paper acquired by sales finance companies increased further during June, following a sharp increase in the preceding month. Purchases of new passenger car paper continued to show the largest gain, increasing 13 per cent over May, while purchases of used passenger car paper rose 5 per cent. The record volume of paper acquired in June was reflected in a 6 per cent increase in retail automotive balances outstanding. At the month-end, these balances were about 10 per cent above a year ago and approximately 5 per cent above the previous high reached in September of last year.

Purchases of other retail instalment paper by sales finance companies in June increased 18 per cent over May. The volume of household appliance paper acquired rose 32 per cent, and purchases of repair and modernization paper increased 24 per cent. Acquisitions of furniture and television paper, however, decreased 2 per cent from May to June. Reflecting the overall expansion in retail financing other than automotive, outstanding balances of other retail instalment paper increased 7 per cent during June.

[^0]:    NOTE.--June data, based on returns from 107 sales finance companies, are compiled in the same manner as those shown in earlier reports. Aggregates represent only the totals for the reporting companies and, since the reporting sample is not identical from month to month, they are not comparable with totals of preceding months.
