## SALES FINANCR COMPANIES

AUGUST 1952

Retail financing-The volume of retail automotive paper purchased by sales finance companies in August dropped 26 per cent from the volume of the preceding month. The sharp reduction in total retail automotive paper acquired reflected decreases in all types of automotive paper. The largest decline, 39 per cent, was reported in new passenger car paper, while used passenger car paper decreased 20 per cent. In the financing of commercial vehicles, new car paper acquired dropped 30 per cent, while purchases of used car paper declined 10 per cent. Despite the sharp reduction in the volume of retail automotive financing during August, outstanding balances of retail automotive paper were unchanged from the end of July to August 31.

Purchases of other retail instalment paper declined 14 per cent in August, the first month-tomonth decline since February. Acquisitions of household appliance paper dropped 22 per cent, while acquisitions of repair and modernization paper decreased 8 per cent. In contrast, purchases of furniture and television paper increased 4 per cent. The drop in total purchases of other retail instalment paper from July's large volume, however, was not sufficient to interrupt the increase in outstanding balances of recent months. An additional increase of 3 per cent during August brought outstanding balances at the month-end to a level about 18 per cent above a year ago.

Wholesale financing--Purchases of wholesale automotive paper decreased about 44 per cent from July to August. Outstanding balances also decreased during August, and at the month-end were about 17 per cent below the level of July 31.

Other wholesale paper acquired during August decreased about 26 per cent. The drop in volume was accompanied by a decline of approximately 5 per cent in outstanding balances.

NOTE:--August data, based on returns from 105 sales finance companies, are compiled in the same manner as those shown in earlier reports. Aggregates represent only the totals for the reporting companies and, since the reporting sample is not identical from month to month, they are not comparable with totals of preceding months.
