## r -revised.

1. Unused commitments are the amounts still available for lending under official promises to lend that are expressly conveyed to the bank's customers orally or in writing, usually in the form of a formally executed agreement signed by one of the bank's officers.
2. Commitments for term loans are those for loans with an original maturity of more than one year.
3. Revolving credits are commitment agreements whereby the borrower may draw and repay loans at will with no repayment penalty and under which the commitment rebounds by an equal amount after a takedown has been repaid.
4. Other commitments are expressions of willingness to lend, other than for term loans and revolving credits, that are made known to the customer and are characterized by detailed formal agreements specifying the terms and conditions under which a loan is to be made.
5. Confirmed lines of credit represent general expressions of willingness to lend, other than for term loans or revolving credits, that are made known to the customer but are not characterized by detailed formal agreements specifying the terms and conditions under which a loan is to be made.

NOTE: Included in this series are 122 weekly reporting banks accounting for approximately 85 percent of all commercial and industrial loans, and 95 percent of all nonbank financial loans. As of February 1981, several banks accounting for less than $1 / 2$ percent of unused commitments were dropped from the reporting panel. Individual items may not add to totals due to rounding.

Beginning in December, 1981, shifts of foreign loans from U.S. banking offices to international banking facilities have reduced the levels of Futstanding loans. No information is available on how these shifts affect Digitized for foutstanding loans. No inforr
http://fraser.sunuseddma/commitments.
*Bank reclassifications of unused loan commitments produced breaks in series in May and September 1982 and in June 1983. In May 1982, corrections lowered unused commitments to nonbank financial institutions by $\$ 0.3$ billion and to commercial and industrial (C\&I) firms by $\$ 1.0$ billion. The correction of commitments to C\&I firms included a $\$ 0.6$ billion drop in term loan commitments, an increase of $\$ 1.7$ billion in revolving credit commitments, and declines of $\$ 0.1$ billion and $\$ 2.0$ billion in "other" and confirmed-1ine commitments, respectively. In September, corrections lowered unused commitments to nonbank financial institutions by $\$ 0.8$ billion and to C\&I firms by $\$ 3.2$ billion. The corrections to commitments to C\&I firms included reductions of $\$ 0.4$ billion, $\$ 1.2$ billion, $\$ 1.1$ billion and $\$ 0.5$ billion in term loan, revolving credit, confirmed-line and other commitments, respectively. In June 1983, commitments to nonbank financial institutions and to C\&I firms were lowered by $\$ 0.8$ billion and $\$ 3.0$ billion, respectively. The correction of commitments to C\&I firms included a drop in term loan commitments of $\$ 0.3$ billion, an increase of $\$ 2.5$ billion in revolving credit commitments, and a decline of $\$ 5.3$ billion in other commitments, respectively. Revisions to back data are not available.

r-revised.

1. Loans made under commitments are outstanding loans to commercial and industrial firms and nonbank financial institutions, less repayments of principal, made under commitments currently or previously in force.
2. Term loans are loans with an original maturity of more than 1 year.
3. Loans made under revolving credits are loans under agreements whereby the borrower may draw down and repay loans at will with no repayment penalty and under which the commitment rebounds by an equal amount after a takedown has been repaid.
4. Loans made under other commitments are loans made under expressions of willingness to lend, other than for term loans and revolving credits, that are made known to the customer and are characterized by detailed formal agreements specifying the terms and conditions under which a loan is to be made.
5. Loans made under confirmed lines of credit are loans made under general expressions of willingness to lend, other than for term loans or revolving credits, that are made known to the customer but are not characterized by detailed formal agreements specifying the terms and conditions under which a loan is to be made.

NOTE: Included in this series are 122 weekly reporting banks accounting for approximately 85 percent of all commercial and industrial loans, and 95 percent of all nonbank financial loans. As of February 1981, several banks accounting in total for about $1 / 2$ percent of loans made under commitments were dropped from the reporting panel. Individual items may not add to totals due to rounding.

Beginning in December, 1981 shifts of foreign loans from U.S. banking offices to international banking facilities have reduced the levels of outstanding loans. At banks included in this survey, $\$ 1.5$ billion of commercial and industrial loans were shifted, all but a negligible amount during December. It is believed that the bulk of these loans were made under commitments.
*September 1982 and June 1983 data reflect breaks in series owing to bank reclassifications of outstanding loans. In September 1982, loans to nonbank financial institutions and to commercial and industrial firms were lowered by $\$ 1.5$ billion and $\$ 5.4$ billion, respectively. The correction of outstanding commercial and industrial loans reduced term loans by $\$ 0.8$ billion, revolving credit loans by $\$ 0.9$ billion, and other loans by $\$ 3.7$ billion. Confirmed-line loans were raised by $\$ 0.1$ billion. In June 1983, loans to nonbank financial institutions and to commercial and industrial firms were lowered by $\$ 0.1$ billion and $\$ 1.6$ billion, respectively. The correction of outstanding commercial and industrial loans lowered term loans by $\$ 0.3$ billion, raised revolving credit loans by $\$ 1.5$ billion, and reduced other loans by $\$ 2.8$ billion. Revisions to back data are not available.
