BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM
H. 12
(For Immediate Release)
July 10, 1951

CHANGES IN COVMERCIAL AND INDUSTRIAL LOANS, BY INDUSTRY AND PURPOSE

Commercial, industrial, and agricultural loans at weekly reporting member banks remained practically unchanged during the week ended June 27. The only significant increases by industry were in loans to manufacturers of metals and metal products and to public utilities. The effects of these increases, however, were almost completely offset by decreases in loans to other lines of business and in unclassified loans.

The expansion in loans to manufacturers of metals and metal products and to public utility companies of 42 and 35 million dollars, respectively, was a continuation of the upward trend in these loans. In the opposite direction, loans to manufacturers of food, liquor, and tobacco products and to commodity dealers continued to decline. Changes in loans to other types of businesses were less pronounced.

The most important changes in loans to various types of borrowers during the week and since the end of march were as follows:

|  | Week <br> ended <br> Sune 27 | Change <br> since |
| :--- | :---: | :---: |
| Business of borrower | March 28 |  |

Changes in loans classified as to purpose indicated that loans for defense and defense-supporing activities continued to increase during the week. Total non-defense loans declined, although non-defense loans for financing plant and equipment increased 19 million dollars.
